		28/07/2023 3:54	28/07/2023 10:42	Outbound Email		20230728 Email Follow Up July 2023	Follow up email seeking feedback on Beehive Project update that was provided in May 2023 via email.	N/A		* Follow up email seeking feedback on Beehive Project update. * Advised we are finalising the Environment Plans in preparation for submission to NOPSEMA as soon as the end of August 2023 and are sending this as further reminder of the opportunity to provide feedback on EOG's proposed offshore activities. * Provided website links to the Project Information and EP's and also supplied email, mail and phone options to provide feedback, objections, claims or if you know of any other persons or organisations that may have interest in this project. * Requested if they have no further comments to make, to let us know by responding to this email, and we will close consultation for you or your organisation.
		7/08/2023 14:44	7/08/2023 14:44	Outbound Phone Call		PH-02- July Follow Up	Follow up call. Call went to message bank. Left a detailed message concerning the Beehive project and advised contact details should the dept wish to provide feedback on the project.	N/A		N/A
		14/11/2023 10:56	14/11/2023 13:22	Outbound Email		20231114 Email Follow Up November 2023	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A		N/A
		24/11/2023 9:13	24/11/2023 16:04	Outbound Email		20231124 Email Close Out November 2023	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A		N/A
NT Department of Infrastructure, Planning & Logistics - Marine Safety NT	NT Government Department responsible for administering commercial fishing and aquaculture, marine pests, biosecurity, indigenous fishing, recreational fishing, boat ramps, tides, boat rules and safety in the NT.	25/01/2023 16:00	25/01/2023 14:00	Outbound Phone Call	356	N/A	Phone call to Marine Safety NT enquiring on approvals required to place Public Notice's at boat ramps in NT. (Note: No written phone call record was kept. Follow up email as MONT-01 Xen)	Confirmed I was speaking to the right area and asked for an email to be sent through with the details. Email address provided.		Provided background on the Beehive Project and potential EMBA should a discharge occur. Explained that we are completing engagement on the project to identify relevant persons that may be affected by the activity and that one of the engagement activities is placing Public Notices at Boat Ramps. Asked what approvals would be required to place a Public Notice at the boat ramps in NT
		25/01/2023 16:26	25/01/2023 18:26	Outbound Email		(MONT-01 Xen)	Email sent re approvals required from Marine Safety NT to place Public Notice's at the boat ramps in NT.	Auto receipt acknowledgement received.		As discussed on the phone this afternoon, we are looking to place a Public Notice at each of the following 22 NT boat ramps (Wadeye, Crab Claw Island, East Arm, Saltwater Arm, Channel Point, Mandorah, Dinah Beach, Stuarts Tree, Dundee Beach, Channel Island, Doyles, South Alligator, Six Pack Creek 1, Southport, Nightcliff, East Alligator, Six Pack Creek 2, Middle Arm, Buffalo Creek, Milne Inlet, Palmerston, Leaders Creek). A copy of the notice is attached. We will print the notice on an A3 coroflute board which will be attached to a single timber stake for display at the boat ramps. The signs will be placed as soon as we have approvals and weather allows and displayed for 3 – 4 months then we will remove them. The intent of the notice is to engage and search for information about what environmental values people may have in the EOG project area. Given the project is offshore, we have chosen boat ramps as one of the methods to engage with people who use the sea. I look forward to hearing from you soon.
		27/01/2023 15:23	27/01/2023 15:23	Inbound Email		(MONT-02 Xen)	Response to email dated 25/1/23.	They are checking EOG request and will provide an answer by Monday		N/A
		6/02/2023 11:54	6/02/2023 14:40	Outbound Email		(MONT-03 Xen) & (MONT-04 Xen)	Follow up to email received 6/2/23.	Auto acknowledgement email received and also advised they are still following up with communications team.		Just touching base to see if you have received feedback on our request? We are looking to do 20 of the ramps between next Monday 13/2/23 to Wednesday 15/2/23. We will not get to Wadeye or East Alligator due to flooding and road closure during this time but will look to get them put up at a later time so will still need access to those 2 as well.
		9/02/2023 10:26	9/02/2023 10:51	Outbound Email		(MONT-05 Xen) & (MONT-06 Xen)	Follow to email received 6/2/23.	Auto acknowledgement email received and also advised they are still following up with communications team.		Hope you are both well. Just chasing an update on my request below as we would like to place the Public Notices at the Public Boat Ramps next week.
		9/02/2023 16:14	9/02/2023 16:14	Inbound Email		(MONT-07 Xen) & (MONT-08 Xen)	Response to email 25/1/23.	MONT comments: •They have received EOG signage at public boat ramps request. •They are unable to support private signage requests at public boat ramps. •If a discussion is needed, please contact the MONT.		Phone call made to clarify. Was made clear that no public signage is allowed at any NT boat ramps. Was suggested to contact Amateur Fisherman's Association NT (AFANT) to discuss ways to best reach people who use the waterways in project area. Additional email received with AFANT contact details.
		23/05/2023 22:31	23/05/2023 22:31	Outbound Email		(MONT-09 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A		* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.

NT Department of Territory Families, Housing & Communities - Heritage Branch	Works with the community to conserve the unique and diverse heritage of the NT. Supports the Heritage Council, provides advice about heritage management, promotes heritage and encourages good conservation practice, oversees the NT Heritage Grants Program and the Rates Relief Program, and works with other government departments to conserve Government owned heritage assets.	31/01/2023 15:21	31/01/2023 15:21	Outbound Email	356	(TYHC-01 Xen)	Assistance in identifying cultural heritage sites in EMBA.	N/A		EOG has an offshore exploration project in the Joseph Bonaparte Gulf (WA), and as part of the process for developing an Environmental Plan are required to describe the cultural features within the spill zone environment that may be affected (EMBA). This spill zone EMBA crosses state boundaries into Northern Territory. I am interested in obtaining cultural heritage site data (public and non-public, historical, Aboriginal, Macassan). Below is a quick snapshot of the EMBA area (within purple outline), which you can see is quite large and I assume would contain a number of registered entries. What is the best way forward for obtaining the information and the costs involved? All non-public information can be kept unpublished and non-public as part of the Environmental Plan assessment process.
		7/02/2023 14:59	7/02/2023 14:59	Outbound Email		(TYHC-02 Xen)	Follow up email to email sent 31/1/23 for assistance in identifying cultural heritage sites in EMBA.	N/A		Are you able to assist with the way forward for an area of this size?
		7/02/2023 16:26	7/02/2023 16:26	Inbound Email		(TYHC-03 Xen)	Assistance in identifying cultural heritage sites in EMBA.	TFHC comments: •They can't provide a detailed response about heritage impacts for a project footprint of this scale. •They make a few observations: only a fraction of historic wrecks have been located. •Recommends the Underwater Cultural Heritage Act 2018 as its jurisdiction to the Continental Shelf. •Recommends noting the various protected zones around the NT under this Act. •Recommends reading the Heritage Act 2011 •Recommends the NT Heritage Register because it notes some of heritage places protected along the coast. Research these sites on the DCCEEW site.		N/A
		23/05/2023 22:31	23/05/2023 22:31	Outbound Email		(TYHC-04 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance. West Daly Regional Council	Northern Territory local government authority for the Wadeye, Peppimenarti, Council Homelands & Palumpa Communities and has a large section of the Joseph Bonaparte Gulf coastline.	6/02/2023 15:38	6/02/2023 15:38	Outbound Email	360	(WDRC-01 Xen)	Email sent re approvals required from West Daly Regional Council to place Public Notice at the boat ramp at Wadeye and Public Noticeboard at Wadeye.	N/A	EOG Resources are looking to place a Public Notice at the Wadeye Boat Ramp as soon as possible and are seeking any prior approvals that may be required. In addition, if there is a Public Noticeboard in Wadeye, we would also like to place a copy of the notice there as well. A copy of the Public Notice is attached. We will print the notice on a 600mm x 420mm coffute board which would be attached to a single timber stake for display at the boat ramp or on an A4 leaflet for the Public Noticeboard. Once placed the signs would be displayed for 3 – 4 months then we will remove them. The intent of the notice is to engage and search for information about what environmental values people may have in the EOG project area. Given the project is offshore, we have chosen the boat ramp as one of the methods to engage with people who use the sea. Given the location of Wadeye a community noticeboard in Wadeye would also be beneficial for our engagement. If we are able to place the Public Notices, given Wadeye is currently cut off by road, we would be appreciative of any suggestions of local contractors to help us place the notices in Wadeye. I look forward to hearing from you soon.

Kimberley Ports Authority	Responsible for the Ports of Broome, Wyndham, Derby & Yampi Sound under the Port Authorities Act 1999 (WA) to operate, maintain, control and preserve the ports and the assets. Relevant if activities impact the ports.	25/01/2023 16:00	25/01/2023 16:00	Outbound Phone Call	319	N/A	Phone call to Kimberley Ports Authority enquiring on approvals required to place Public Notice's at the boat ramps in Broome (Entrance Point), Derby & Wyndham. (Note: No written phone call record was kept. Follow up email as KPA-01 Xen)	Asked for the request to be emailed and provided email address.	Provided background on the Beehive Project and potential EMBA should a discharge occur. Explained that we are completing engagement on the project to identify relevant persons that may be affected by the activity and that one of the engagement activities is placing Public Notices at Boat Ramps. Asked what approvals would be required to place a Public Notice at the boat ramps in Broome (Entrance Point), Derby & Wyndham.
		25/01/2023 12:20	25/01/2023 12:20	Outbound Email		(KPA-01 Xen)	Email sent re approvals required from Kimberley Ports Authority to place Public Notice's at the boat ramps in Broome (Entrance Point), Derby & Wyndham.	N/A	As discussed on the phone, we are looking to place a Public Notice at the boat ramps in Broome, Derby and Wyndham. A copy of the notice is attached. We will print the notice on an A3 corflute board which will be attached to a single timber stake for display at the boat ramps. The signs will be placed as soon as we have approvals and weather allows and displayed for 3 – 4 months then we will remove them. The intent of the notice is to engage and search for information about what environmental values people may have in the EOG project area. Given the project is offshore, we have chosen boat ramps as one of the methods to engage with people who use the sea. If you have any questions or require clarification, please let me know. I look forward to your response.
		1/02/2023 10:51	1/02/2023 10:51	Inbound Email		(KPA-02 Xen)	Response to email sent 25/1/23 re approvals required from Kimberley Ports Authority to place Public Notice's at the boat ramps in Broome (Entrance Point), Derby & Wyndham.	No issues placing this notice at the Entrance Point boat ramp in Broome. The Town Beach boat ramp is owned / managed by the Shire so if you were intending to place a notice here then best to check with them. For Derby the ramp is on KPA vested land and there is also no issues from our perspective however Port is leased to the Shire so please raise with Shire of Derby / West Kimberley. For Wyndham ramps are owned and managed by the Shire Of Wyndham / East Kimberley.	Refer to email dated 3/2/23.
		3/02/2023 7:57	3/02/2023 7:57	Outbound Email		(KPA-03 Xen)	Response to email received 1/2/23 re approvals required from Kimberley Ports Authority to place Public Notice's at the boat ramps in Broome (Entrance Point), Derby & Wyndham.	N/A	Thank you for the response. I have also made contact with the 3 councils in Wyndham, Derby & Broome.
		29/06/2023 8:56	29/06/2023 8:56	Outbound Email		(KPA-04 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.

Shire of Broome	Western Australian Local Government Authority with approx. 900km's of coastline within their authority area.	24/01/2023 15:00	24/01/2023 15:00	Outbound Phone Call	360	N/A	Phone call to Shire of Broome enquiring on approvals required to place Public Notice's at the boat ramps in Broome (Town Beach, Entrance Point, Gantheaum Point) and at One Arm Point which are all in the Broome Shire area. (Note: No written phone call record was kept. Follow up email as SOB-01 Xen)	Advised that Kimberley Ports would need to be contacted in relation to Entrance Point and was provided an email address for the Shire of Broome Rangers for the other Boat Ramps.	Provided background on the Beehive Project and potential EMBA should a discharge occur. Explained that we are completing engagement on the project to identify relevant persons that may be affected by the activity and that one of the engagement activities is placing Public Notices at Boat Ramps. Asked what approvals would be required to place a Public Notice at the boat ramps in Broome Shire.
		25/01/2023 10:52	25/01/2023 10:52	Outbound Email		[SOB-01 Xen]	Email sent re approvals required from Shire of Broome to place Public Notice's at the boat ramps in Broome (Town Beach, Entrance Point, Gantheaum Point) and at One Arm Point which are all in the Broome Shire area.	N/A	Following call with Shire of Broome, an email was sent with our request to place a Public Notice at the boat ramps in Broome (Town Beach, Entrance Point, Gantheaum Point) and at One Arm Point which are all in the Broome Shire area with a copy of the notice. We will print the notice on an A3 corflute board which will be attached to a single timber stake for display at the boat ramps. The signs will be displayed for 3 – 4 months then we will remove them. The intent of the notice is to engage and search for information about what environmental values people may have in the EOG project area. Given the project is offshore, we have chosen boat ramps as one of the methods to engage with people who use the sea.
		6/02/2023 12:22	6/02/2023 12:22	Outbound Email		[SOB-02 Xen]	Email sent as follow up to email on 25/1/23.	N/A	Just following up on email from 25/1/23. We are looking to come to Broome on Friday 17/2/23 & Saturday 18/2/23 to place the signs but wanted to make sure it was ok from your end. We have received approval from Kimberley Ports Authority separately.
		6/02/2023 13:26	6/02/2023 13:26	Inbound Email		[SOB-03 Xen]	Email received from Shire of Broome regarding placement of Public Notices at Boat Ramps.	SOB Comments: •They support the proposal without it requiring any planning approval. •Need to confirm the dates EOG intend to remove the boat ramp signs. •Exact locations and number of signs would be appreciated. •Aerials from Google Maps/Landgate's Map Viewer Plus would be sufficient. •Noted the land surrounding the boat ramps towards the port is managed by Kimberley Ports Authority and Lombadina is crown land. •The DPLH should be contacted.	Refer to email dated 9/2/23.
		9/02/2023 10:19	30/03/2023 10:19	Outbound Email		[SOB-04 Xen]	Email sent to Shire of Broome responding to comments in email received 6/2/23.	N/A	Thanks for the response. A colleague and I will be placing the Public Notices next week (17/2/23 & 18/2/23) at the Boat Ramps and will remove them by approx. 30/3/23. In Broome, the plan is to place 1 x Public Notice at the 3 locations as per below map. I would like to place them close to any other signage at these locations so as people read them but place them so as they do not interfere with the other signage. We will need to assess each location whilst we are there to determine exact locations. For Dampier Peninsula, we will need to assess if the public boat ramp is the right place for the public notice at One Arm Point or if we just use a smaller version of the public notice on community noticeboards at Ardyaloon and Lombadina. We have been in contact with Kimberley Ports and Department of Planning, Lands & Heritage as well with our plans. For offshore activities, under the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 Regulation 11A, consultation with relevant authorities, persons and organisations must be undertaken in preparing an environmental plan. If you like I can provide you with actual locations once the public notices are placed at the boat ramps.
		19/05/2023 13:57	19/05/2023 13:57	Outbound Email		[SOB-05 Xen]	Beehive Project information for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. Shire of Derby / West Kimberley	Western Australian Local Government Authority covering 118560 square kilometres of land in the North West Kimberley Region with an expansive coastline within their authority area.	25/01/2023 12:35	25/01/2023 12:35	Outbound Email	360	(SDWK-01 Xen)	Email sent re approvals required from Shire of Derby / West Kimberley to place Public Notice at the boat ramp in Derby.	Auto acknowledgement received.	As discussed on the phone, we are looking to place a Public Notice at the boat ramp in Derby. A copy of the notice is attached. We will print the notice on an A3 corflute board which will be attached to a single timber stake for display at the boat ramps. The signs will be placed as soon as we have approvals and weather allows and displayed for 3 – 4 months then we will remove them. Given access to Derby is not currently available we would be interested in a suggestion of a service provider to install the Public Notice on our behalf. To do this we would get the notice printed and sent to Derby to be installed on our behalf. The intent of the notice is to engage and search for information about what environmental values people may have in the EOG project area. Given the project is offshore, we have chosen boat ramps as one of the methods to engage with people who use the sea. If you have any questions or require clarification, please let me know. I look forward to your response.
		25/01/2023 15:30	25/01/2023 15:30	Outbound Phone Call		N/A	Phone call to Shire of Derby / West Kimberley enquiring on approvals required to place Public Notice at the boat ramp in Derby. (Note: No written phone call record was kept. Follow up email as SDWK-01 Xen)	Given recent flooding the person we need to speak to is really busy so email address was provided to send email with details.	Provided background on the Beehive Project and potential EMBA should a discharge occur. Explained that we are completing engagement on the project to identify relevant persons that may be affected by the activity and that one of the engagement activities is placing Public Notices at Boat Ramps. Asked what approvals would be required to place a Public Notice at the boat ramp in Derby.
		30/03/2023 16:23	30/03/2023 16:23	Outbound Email		[SDWK-02 Xen]	Follow up of email dated 25/1/23.	Auto acknowledgement received.	Appreciate you would be very busy with flood reconstruction work at present but just touching base to see if we can get some feedback on our request below? I look forward to your response.
		19/05/2023 13:55	19/05/2023 13:55	Outbound Email		[SDWK-03 Xen]	Beehive Project information for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
		20/06/2023 0:36	20/06/2023 0:36	Inbound Email		[SDWK-04 Xen]	Feedback to May 2023 Beehive Project Update.	Remote from Shire, does not know how Shire would be impacted.	N/A
		29/06/2023 10:55	29/06/2023 10:55	Outbound Phone Call		PH-01- June Calls	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	Confirmed response to information recently sent through.	N/A
		7/07/2023 8:47	7/07/2023 8:47	Outbound Email		[SDWK-05 Xen]	Acknowledgement and response to feedback from 20/6/23.	N/A	Thank you for your email dated 20 June 2023 acknowledging receipt of the information provided. We also note your comment around not knowing how your Shire would be impacted as our activity is "very remote". You are correct in pointing out the Beehive project location, and perhaps the distance offshore, relative to the Shire of Derby and West Kimberley ("SDWK"), is large – around 600 km in a straight line from the Beehive-1 drilling location to the town of Derby. As such, EOG's planned activities as noted in the Flyer sent on 19 May should have not impact the SDWK. Due to the Beehive-1 Drilling Environment that May Be Affected ("EMBA") developed as part of emergency response planning for a loss of well control event, EOG is required to consult with the SDWK as this does have a low, but non-zero probability, to reach your Shire if and only if such a highly unlikely incident were to occur. As such, we would encourage that you visit EOG's Social Pinpoint Consultation Hub to learn more and provide any further feedback or concerns you or your organization may have so that we may respond and provide additional information as may be needed.
		14/11/2023 12:40	14/11/2023 12:40	Outbound Email		(SDWK-06 Xen)	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
		24/11/2023 9:13	24/11/2023 16:04	Outbound Email		20231124 Email Close Out November 2023	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A

No concerns raised.	N/A
		22/11/2022 0:00	22/11/2022 0:00	Inbound Email		[DBCA-11 Xen]	Email received from DBCA. Thank you for providing the DBCA with information in relation to EOG's upcoming activities in Exploration Permit WA-488-P within Commonwealth waters. Based on the documentation provided for review and other readily available information, DBCA has no comments in relation to its responsibilities under the Conservation and Land Management Act 1984 and Biodiversity Conservation Act 2016. Please continue to provide all future notifications to EMBAdmin@dbca.wa.gov.au.	No concerns raised.	N/A
		23/11/2022 0:00	23/11/2022 0:00	Outbound Email		[DBCA-12 Xen]	Email sent from EOG to DCBA. Thank you kindly for the response, we will continue to utilise EMBAdmin@dbca.wa.gov.au for all future notifications.	No concerns raised.	N/A
		16/12/2022 0:00	16/12/2022 0:00	Outbound Email		[DBCA-13 Xen]	Email sent from EOG to DCBA. "Thanks for calling back. We have just resubmitted an EP and OPEP for the Beehive exploration drilling project in the Joseph Bonaparte Gulf. Our risk assessment for a worst-case crude oil spill (Section 8.7 of the EP) has identified the potential for oiling of seabirds, shorebirds, turtles and other species. The OPEP identifies oiled wildlife response as being a priority with estimates of approximately 200 personnel and significant support infrastructure required within 6 weeks of a spill occurring. EOG is a member of AMOSC and OSRL, and has access to significant other support, but does recognise that the DBCA is the lead agency for OWR under the SHP-MEE. If the WAOWRP is activated, EOG has committed to providing all necessary resources to assist the WA DoT and/or the NT DEPWS as the Control Agencies. We would request that the DBCA review the OWR arrangements in the OPEP to ensure that they are consistent with your expectations. Any advice or comments are welcome."	No concerns raised.	EOG comments: • we would like to meet early in the new year to further discuss the arrangements with a view to better coordinating responses between DBCA and EOG. • The appendices to the EP have not been attached. If required, they can be downloaded from this link (Sharing with third parties).
		16/12/2022 9:55	16/12/2022 9:55	Outbound Email		[DBCA-19 Xen]	Talking about the EP and the OPEP for the Beehive exploration drilling project.	N/A	Thanks for calling back. We have just resubmitted an EP and OPEP for the Beehive exploration drilling project in the Joseph Bonaparte Gulf. Our risk assessment for a worst-case crude oil spill (Section 8.7 of the EP) has identified the potential for oiling of seabirds, shorebirds, turtles and other species. The OPEP identifies oiled wildlife response as being a priority with estimates of approximately 200 personnel and significant support infrastructure required within 6 weeks of a spill occurring. EOG is a member of AMOSC and OSRL, and has access to significant other support, but does recognise that the DBCA is the lead agency for OWR under the SHP-MEE. The appendices to the EP have not been attached – if required, they can be downloaded from attached link. If you have any questions, please don't hesitate to contact me.
		19/12/2022 0:00	19/12/2022 0:00	Inbound Email		[DBCA-15 Xen]	Email from DBCA to EOG stating query had been passed on to the Environmental Management Branch (EMB) and that EMB receives and responds on behalf of the Department of Biodiversity, Conservation and Attractions, to advice requests and invitations to comment from petroleum operators in relation to the development of Environment Plans where the department is identified as a relevant stakeholder. Email also advised that the EP and OPEP email attachments had been lost in the email chain and asked if we would mind resending the documents. DBCA also advised they do not have access to the SharePoint folder and if EOG could allow email address access to the folder.	DBCA comments: * EP and OPEP email attachments had been lost in the email chain. Request to resend the documents. * DBCA also advised they do not have access to the SharePoint folder and if EOG could allow email address access to the folder.	Refer to email dated 20-Dec-22.
		19/12/2022 16:37	19/12/2022 16:37	Inbound Email		[DBCA-20 Xen]	Previous query had been passed onto the Environmental Management Branch (EMB). Asked to have the EP and the OPEP resent.	DBCA comments: •EOG query has been passes onto the Environmental Management Branch (EMB). •The EMB responds on behalf of the DBCA to advice requests and invitations to comment from petroleum operators in relation to the development of EP's where the department is a relevant stakeholder. •Comments the EP and the OPEP have been lost in the email chain. Request to resend. •DBCA does not have access to the SharePoint folder. •Request for email address to have access to the folder.	N/A
		20/12/2022 0:00	20/12/2022 0:00	Outbound Email		[DBCA-16 Xen]	Email from EOG to DBCA providing links and attachments for OPEP & EP.	No concerns raised.	N/A
		20/12/2022 0:00	20/12/2022 0:00	Inbound Email		[DBCA-17 Xen]	Email from DBCA to EOG confirming receipt of documents and that it would be the new year before they reviewed as going on leave today. Asked if there was a timeframe in which a response is required.	No concerns raised.	N/A
		20/12/2022 0:00	20/12/2022 0:00	Outbound Email		[DBCA-18 Xen]	Email from EOG to DBCA confirming also on leave till new year and that perhaps we get back in contact in the new year.	No concerns raised.	N/A
		20/12/2022 13:29	20/12/2022 13:29	Outbound Email		[DBCA-23 Xen]	Setting up a contact time in the New Year.	N/A	I'm off on holidays from today as well and won't be back until 9 January. We expect that that we will receive comments on the EP/OPEP from NOPSEMA in late January. I appreciate that there is a lot of information to review, so would appreciate whatever you can manage. Perhaps if we get back in contact in the new year and see how we're travelling.
		20/12/2022 14:09	20/12/2022 14:09	Inbound Email		[DBCA-22 Xen]	Thanking EOG for getting back to them and updating them on a timeframe.	DBCA won't be able to review the documents before the new year. Request for a timeframe in which a response is required by.	N/A
		20/12/2022 15:33	20/12/2022 15:33	Inbound Email		[DBCA-24 Xen]	Response to previous email 20/12/22.	Confirmation will be in touch.	N/A

		20/12/2022 17:44	20/12/2022 17:44	Outbound Email		(DBCA-21 Ken)	Thanking DBCA for the update and attaching the files.	N/A	Thanks for the update. The EP and OPEP are attached. The appendices to the EP are here: Sharing with third parties. If it doesn't work, give me a bell.	
		30/01/2023 12:21	30/01/2023 12:21	Outbound Email		(DBCA-25 Ken)	Checking in after the New Year and asking if the DBCA has had a chance to review the EOG'S OPEP.	N/A	Have you managed to have a review of EOG's OPEP? We have now received comments back from NOPSEMA and are planning to meet them in Perth on Wednesday 22 Feb. Would you be available for a meeting on Thursday 23 Feb? If so, do you have any preferred times? Although there were no significant comments related to oiled wildlife response, we would like to ensure that the OPEP is appropriate and integrates with the WAOWRP.	
		1/02/2023 11:34	1/02/2023 11:34	Inbound Email		(DBCA-26 Ken)	EP & OPEP feedback.	DBCA Comments: •They review Fact Sheets for EPs relevant to offshore petroleum and gas operations and undertake a high-level risk assessment to determine an appropriate response. •They don't typically review offshore oil and gas EPs and OPEPs at a detailed level unless it presents a high risk to values pertinent to the Conservation and Land Management Act 1984 and Biodiversity Conservation Act 2016 due to limited internal capacity. •They have undertaken a broad review of EOG's EP and OPEP for the project. •Section 8.12.4 of the OPEP states DBCA are the responsible body for the Controlled Waste Tracking System, however the system is managed by the Department of Water and Environmental Regulation. •Provided aligns with the recent revised WA Oiled Wildlife Response Plan and complementary manual in 2022, DBCA has no further comments to provide. •The EP factsheets can be sent to email provided. A response will be provided by an officer from the Environmental Management Branch.		
		1/02/2023 11:51	1/02/2023 11:51	Outbound Email		(DBCA-27 Ken)	Discussing the EOG arrangements.	N/A	Thanks for the phone call and the previous response below. As discussed on the phone, we understand that DBCA believes that EOG's arrangements generally align with the revised WA OWRP (and Manual), apart from Section 8.12.4 of the OPEP. We'll update Section 8.12.4 and review the revised WA OWRP (and Manual) to ensure EOG's arrangements align with them. Additionally, could you please confirm that DBCA does not want to meet with EOG in Perth in February (as requested in my email from 30 Jan 23)?	
		1/02/2023 11:55	1/02/2023 11:55	Inbound Email		(DBCA-28 Ken)	Stating there is no benefit to a meeting this month.	DBCA does not anticipate any additional benefit in meeting with EOG this month to discuss this exploration project.	N/A	
		1/02/2023 11:56	1/02/2023 11:56	Outbound Email		(DBCA-29 Ken)	Response to email from DBCA 1/2/23.	N/A	Thank you	
		23/05/2023 22:36	23/05/2023 22:36	Outbound Email		(DBCA-30 Ken)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone..	
		29/06/2023 11:36	29/06/2023 11:36	Outbound Phone Call		PH-01- June Calls	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	Unsure if information flyer / letter had been received. Will find out and respond.	N/A	
		30/06/2023 8:24	30/06/2023 13:05	Outbound Email		20230630 Email Follow Up June 2023	Follow up email seeking feedback by 21 July 2023 on update that was provided in May 2023 via email.	N/A	This message is in follow up to the email below providing an update to the Beehive project and requesting that you (or your organisation) share your assessment of how you may be affected by our proposed activities. We are kindly requesting feedback from you by 21 July 2023.	
		11/07/2023 11:22	11/07/2023 11:22	Inbound Email		(DBCA-32 Ken)	Feedback from May 2023 Beehive Project Update.	DBCA comments: They have undertaken a review of the documentation provided and other available information. They provide comments on the matters relevant to DBCA's Conservation and Land Management Act 1984 and Biodiversity Conservation Act 2016 related responsibilities: •There are ecological important areas located in the vicinity of the proposed operations, incl. North Kimberley Marine Parks (M 20) and the Ord River Nature Reserve (R 31967). •There is potential areas that would be affected by the project if there is a substantial hydrocarbon release. •Baseline values and state of potentially affected environment should be understood and documented prior to any operations commencing that have the potential to led to hydrocarbon releases. •Request EOG to have established appropriate baseline survey data on the current state of areas supporting important ecological values, and current contamination present. •Desktop, and collection of appropriate baseline abundance and distribution data for benthic habitat and marine fauna species in the potential impact area to ensure EOG can identify, monitor and remediate any impacts on ecological values and recovery of these values •DBCA undertakes monitoring in marine parks and reserve and publishes monitoring reports available on their website. •EOG should be aware that monitoring is targeted to inform internal values and objectives. Not suitable for all oil spill risk assessment and management planning. •DBCA encourages EOG to acquire information to implement a Before-After-Control-Impact (BACI) framework, and may include independent monitoring and collection of data. •DBCA recommends EOG refer to the National Light Pollution Guidelines for Wildlife as a best-practice industry standard for managing potential impacts of light pollution. •Incident and Emergency Response information provided, including notes on oiled wildlife management response •Directs EOG to DoT regarding marine pollution and the Offshore Petroleum Industry Guidance Note of September 2018.	N/A	
		19/07/2023 3:01	19/07/2023 3:01	Outbound Email		(DCBA-32 Ken)	Response to feedback email 11/7/23.	N/A	A comprehensive description of the environment at risk in the event of a large hydrocarbon release is provided in Appendix 5 of the Beehive-1 Drilling Environment Plan (EP). This chapter uses publicly available baseline data from a range of sources to describe protected areas, flora and fauna, heritage and socio-economic values with the environment that may be affected (EMBA) in the event of a large hydrocarbon spill. Section 5.4.9 of Appendix 5 describes the North Kimberley Marine Park, while the Ord River Nature Reserve is described in the context of its Ramsar site listing, but not as a Nature Reserve per se. We will correct this in the EP. An Operational and Scientific Monitoring Programme (OSMP) has been prepared for the project and is available as Appendix C to the Oil Pollution Emergency Plan (OPEP). Chapter 3 of the OSMP provides links to existing publicly available baseline data, and Chapter 4 (particularly Table 4.3) outlines the priority pre-spill contact survey areas in the event of a spill. The North Kimberley Marine Park and Ord River Floodplain are listed in this table as priority areas for water and sediment sampling. Chapters 9 and 10 and Part B of the OSMP describe the capability and implementation arrangements in place to implement the OSMP. This ensures that in the event of a spill, EOG has in place the capacity to undertake pre- and post-contact environmental monitoring. EOG has factored in the National Light Pollution Guidelines for Wildlife (DoEE, 2020) in its impact assessment (Section 7.3 of the EP) but will update the EP to reference the more recently released Light Pollution Guidelines for Wildlife including Marine Turtles, Seabirds and Migratory Shorebirds (DCCEEW, 2023). EOG will specifically reference this guideline in Chapter 9 of the EP, which focuses on the impact assessment for hydrocarbon spill response. Emergency response contact details in the event of a hydrocarbon spill are included in Section 3.1 of the OPEP. The DBCA's Kimberley office will be added to this section of the OPEP as requested, and we note your comments about the whole-of-government spill response. The DoT's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of September 2018 titled Marine Oil Pollution: Response and Consultation Arrangements have already been taken into consideration in the preparation of the OPEP. EOG is committed to clean-up and monitoring of areas of DBCA's interests in the event of a hydrocarbon spill. NOPSEMA will not accept the EP unless they are satisfied that EOG has demonstrated the capability to do so.

WA Department of Transport - Oil Spill Response Coordination	Manage oil pollution preparedness for response in WA state waters. Relevant if the activity results in impacts to a marine park.	18/09/2021 0:00	18/09/2021 0:00	Outbound Email	356	(WA DOT-01, Q2 & 03)	EOG emailed Flyer 1.	No concerns raised.	N/A	
		29/09/2021 0:00	29/09/2021 0:00	Inbound Email		(WA DOT-01, Q2 & 03)	WA DoT advised EOG that if a risk of a spill impacts WA State waters from the activity, then the WA DoT is to be consulted as per the DoT Offshore Petroleum Industry Guidance Note - Marine Oil Pollution: Response and Consultation Arrangements (July 2020).	WA DoT advised: * That if a risk of a spill impacts WA State waters from the activity, then the WA DoT is to be consulted as per the DoT Offshore Petroleum Industry Guidance Note - Marine Oil Pollution: Response and Consultation Arrangements (July 2020).	Refer to email dated 30-Sep-21.	
		30/09/2021 0:00	30/09/2021 0:00	Outbound Email		(WA DOT-01, Q2 & 03)	EOG thanked WA DoT for the response and noted that the ecological EMBA for a vessel-based diesel spill does not enter WA state waters or reach shorelines; however the socioeconomic EMBA does reach state waters and shorelines but is not predicted to have ecological impacts and is highly unlikely to require an on-water response. EOG advised they will provide more information going forward.	No concerns raised.	EOG response: * Noted that the ecological EMBA for a vessel-based diesel spill does not enter WA state waters or reach shorelines however the socioeconomic EMBA does reach state waters and shorelines but is not predicted to have ecological impacts and is highly unlikely to require an on-water response. * Advised they will provide more information going forward.	
		7/10/2021 0:00	7/10/2021 0:00	Inbound Email		(WA DOT-04 & 05)	WA DoT replied to EOG to acknowledge email sent on 30 Sept.	No concerns raised.	N/A	
		12/10/2021 0:00	12/10/2021 0:00	Outbound Email		(WA DOT-04 & 05)	EOG emailed WA DoT with EOG's response to Westplan Appendix 6 to the Offshore Petroleum Industry Guidance Note: Marine Oil Pollution Response and Consultation Arrangements (July 2020). EOG encouraged WA DoT to provide questions so that arrangements can be made to discuss.	No concerns raised.	EOG provided response to Westplan Appendix 6 to the Offshore Petroleum Industry Guidance Note: Marine Oil Pollution Response and Consultation Arrangements (July 2020) and sought comments.	
		27/10/2021 0:00	27/10/2021 0:00	Inbound Email		(WA DOT-06)	WA DoT thanked EOG for the information sent on 12 Oct and confirmed the WA DoT were happy with the level of information provided and did not require anything further given the low risk to the State for this activity.	WA DoT confirmed they were happy with the level of information provided and did not require anything further given the low risk to the State for this activity.	N/A	
		28/02/2022 0:00	28/02/2022 0:00	Outbound Email		(WA DOT-07)	EOG emailed Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A	
		9/03/2022 0:00	9/03/2022 0:00	Inbound Email		(WA DOT-08)	WA DoT replied to EOG stating that if there is a risk of a spill impacting WA State waters from the proposed drilling activities, EOG must ensure that the WA DoT is consulted as outlined in the DoT Offshore Petroleum Industry Guidance Note - Marine Oil Pollution: Response and Consultation Arrangements (July 2020).	WA DoT comment: * If there is a risk of a spill impacting WA State waters from the proposed drilling activities, EOG must ensure that the WA DoT is consulted as outlined in the DoT Offshore Petroleum Industry Guidance Note - Marine Oil Pollution: Response and Consultation Arrangements (July 2020).	N/A	
		17/03/2022 0:00	17/03/2022 0:00	Outbound Email		(WA DOT-09)	EOG emailed WA DoT Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A	
		30/03/2022 0:00	30/03/2022 0:00	Outbound Email		(WA DOT-10)	EOG had a meeting with WA DoT to discuss resourcing and state requirements in relation to oil spill response. EOG sent an email with a summary of the meeting discussion to WA DoT.	WA DOT comments: * asked if there was anything in particular EOG wanted to know at this time. * pointed out that it is a very remote area and that mobilising people and resources would take time and that there are significant safety considerations involved. * said that one of WA DoT's primary focus is ensuring cross-jurisdictional arrangements are properly planned for and implemented. * asked if EOG understood the cross-jurisdictional arrangements. * noted that Wyndham Port had been acquired by Kimberley Ports. * noted that there is potential for significant impact in NT waters and asked if EOG knew about their requirements in particular, how many people would they want in an NT IMT (noting that there could be significant resource requirements for WA and NT IMTs). * asked whether EOG had engaged an OSMP service Provider. * asked about EOG's presence in Australia and whether EOG were members with AMOSC and OSRL	EOG comments: * gave brief overview of potential spill impacts, noting the extensive shorelines predicted to be contacted along with very short times to landfall. Explained that we are planning to submit the EP and OPEP by the end of April, but expect 3 revisions from NOPSEMA, with acceptance in Q1 2023. * indicated we were just looking at an introductory meeting. * EOG understand the WA requirements (e.g. initial 11 people into WA IMT, with likely more to follow) and submitting the OPEP to them at the time of submission. WA would be the lead agency for Shorelines and OWR, and that EOG would support them. Tactical Response Plans (TRPs) will probably be required however these will most likely be developed following the first submission. * sent information to Wyndham Port and were hopeful of potentially using the port as a Forward Operations base. * very little published about the NT's response arrangements. Same information sent to NT EPA as sent to WA DoT and still waiting on a response. * our current knowledge of NT arrangements is based on the information within another proponents OPEP which is currently under acessment. * EOG are planning to use the APPEA Framework for the OSMP and that RPS are provisionally available to act as an OSMP Service Provider. We recognise that detailed OSMP Implementation Plans may need to be developed following the first submission. * EOG currently only has a Drilling Manager in Australia but does have a Crisis Response Team and Crisis Management Plan based in Houston and have said that they would supply a Deputy IC and Liaison Officers to the IMT in the event of a spill. * EOG are not yet members of AMOSC but plan to join AMOSC. EOG are a member of OSRL and will ensure that local membership is obtained prior to drilling activities. EOG also have MSAs with WSF Well Control (WWC) and other well control companies and consultants. EOG had engaged AGR for drilling services and that AGR would supply the bulk of the IMT requirements through Australia, with surge capacity from the UK and Singapore.	
		8/04/2022 0:00	8/04/2022 0:00	Inbound Email		(WA DOT-11)	WA DoT replied via email and confirmed that the summary of meeting was as per the meeting discussion on 30 March 2022 and thanked EOG for the advance consultation provided.	No concerns raised.	N/A	
		12/05/2022 0:00	12/05/2022 0:00	Outbound Email		(WA DOT-12)	EOG emailed Information Flyer 4 with an update on the PDSA phase and invited return comment. The flyer also notified the stakeholder that the Drilling EP was available on NOPSEMA's website for public exhibition for 30 days, until 8th June 2022.	No concerns raised.	N/A	
		12/05/2022 0:00	12/05/2022 0:00	Outbound Email		(WA DOT-13)	EOG emailed WA DoT to notify that the Drilling EP is open for comment on NOPSEMA's website & provided a copy of OPEP, EP, the oil spill modelling report including EOG's response to Appendix 6. In addition EOG clarified a QA correction in the OSTM report.	No concerns raised.	N/A	
		18/05/2022 0:00	18/05/2022 0:00	Inbound Email		(WA DOT-14)	WA DoT emailed EOG confirming receipt of information sent on 12 May and said they will review the info and provide comments if they have any. WA DoT advised EOG to use the generic email for future correspondence.	No concerns raised.	N/A	
		27/06/2022 0:00	27/06/2022 0:00	Outbound Email		(WA DOT-15)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A

N/A
15/12/2022 0:00	15/12/2022 0:00	Outbound Email	(WA DOT-19 Xen)	Email sent from EOG to DoT. "We have now resubmitted the EP and OPEP to NOPSEMA (revised OPEP attached). Thanks for your comments from the 8 August review and the feedback from our 1 September 2022 meeting. The OPEP has been significantly updated, addressing your comments and feedback, and includes new appendices demonstrating the capability of the DIMT and operational teams (based on an analysis by AMOSC). We have incorporated the DoT Kimberley shoreline cells and have committed to developing TRPs for a number of locations (in development by OSRL). RPS has reviewed the capability requirements for the OSM BIP and we include additional updated information on monitoring priorities and capability. We welcome any comments / feedback on the revised OPEP.	No concerns raised.	EOG requests: * We recall that you mentioned that other TRs have TRPs for the region and that you may be able to put us in touch with them. Is this possible? * As part of our re-assessment of the response strategies, and to ensure better integration between the DoT and EOG IMTs, we would like to invite the DoT to participate in some of the OPEP Testing in the new year. If this is possible, could you please indicate when might be a good time? * The OPEP references information within the EP and the EP Appendices. If you would like a copy of these, or if you have any other questions, please don't hesitate to contact me.
15/12/2022 0:00	15/12/2022 0:00	Inbound Email	(WA Dot-21 Xen)	Automated acknowledgment of email.	No concerns raised.	N/A
19/12/2022 0:00	19/12/2022 0:00	Inbound Email	(WA Dot-22 Xen)	Email from DoT. "Thank you for providing us with the updated OPEP. Can you please provide a response to our comments with this? I can certainly advise who has TRP's in the area (just specify which area you are interested in) but it will of course be up to EOG to make contact with them. How early in the New Year are you looking to exercise the OPEP?	DoT comments: * Can you please provide a response to our comments with this? 1 - Please ensure that it is clear within the Beehive 1 Exploration Drilling Oil Pollution Emergency Plan (OPEP) that the Department of Transport (DoT) is the Hazard Management Agency for marine oil pollution in WA State waters under the Emergency Management Act 2005 2 - There are references in Section 2.1.4 to a 'lead' Jurisdiction Authority. Please clarify this. 3 - Section 2.1.4 also states that 'If a Level 2/3 Petroleum Activity in Commonwealth waters is likely to enter WA or NT waters, the Jurisdictional Authority remains true to the source of the spill (i.e., NOPSEMA for Commonwealth waters).' Please clarify the detail and intent of this statement. 4 - Provide detail on the risk assessment undertaken in relation to those potential spill scenarios as covered by this OPEP. 5 - Provide details on the properties of all potential spill types as covered by this OPEP. 6 - Provide a map of the Environment that May Be Affected (EMBA) based on the spill modelling that has been conducted. 7 - Have limiting conditions of each of the potential response method been considered? 8 - Provide detail on what equipment, personnel, supplies and services may be required. 9 - Please provide detail on where the above will be sourced. 10 - Does the 128 persons identified in Appendix B (DIMT) include all field-based responders? 11 - It is unclear in the OPEP where the initial 11 personnel that may be required by DoT would be sourced from. Please clarify this noting that for certain positions, DoT's preference is that these are filled by people with an intimate knowledge of certain EOG processes and this OPEP. 12 - Table 6.2 details contractors and suppliers that EOG hopes to have in place. Noting that many of these are either not yet in place or don't yet have dedicated providers specified, when will these be finalised? 13 - Provide details on the location and facilities of the Incident Control Centre that would be utilised by EOG. 14 - Have any estimates of waste volumes been predicted? And if so, what are they? What waste management contract is in place (or will be in place)? 15 - Section 4.7 (waste mgmt.) makes reference to EOG providing a Facilities Support Officer to DoT, however, it doesn't make mention of the provision of contract services/resources – please clarify. 16 - Is there a communications plan in place in the event of a spill occurring? 17 - Is there a system in place for EOG responders to access EOG specific incident related documents/templates? 18 - Provide details on the operational and scientific monitoring program (OSMP) including provisions for the utilisation of baseline data. 19 - Provide detail on the amenability of oil to dispersant and what type of dispersant is more likely to be used in the event of an incident. 20 - Provide detail on the arrangements to be in place for EOG to access 24hr real time spill modelling. 21 - Does EOG have measures in place to ensure responder safety is the priority? 22 - Section 8.1 details that 'This OPEP relies on the supply of trained personnel from other response organisations; EOG will not be responsible for their training.' How does EOG ensure it has access to adequately trained personnel? Please also note that DoT expects that Petroleum Titleholders ensure that they have access to adequate resources and do not rely on DoT resources.	Refer to email dated 20/12/22 & 21/12/22.
20/12/2022 0:00	20/12/2022 0:00	Outbound Email	(WA Dot-23 Xen)	Email from EOG to DoT. "Response has been prepared which is being reviewed and will be provided in the next few days."	Can advise about the TRP's in the area. EOG will have to make contact with the TRP's instead of the WA DoT. Seeking clarification about the OPEP timing in the New Year.	EOG response: * Response has been prepared which is being reviewed and will be provided in the next few days.
21/12/2022 0:00	21/12/2022 0:00	Inbound Email	(WA Dot-24 Xen)	Email from DoT to EOG acknowledging receipt of email from 20/12/22.	No concerns raised.	N/A
22/12/2022 13:21	22/12/2022 13:21	Outbound Email	(WA DoT-40 Xen)	Response to email from DOT dated 19/12/22.	Comments raised by DOT in email dated 19/12/22: 1 - Please ensure that it is clear within the Beehive 1 Exploration Drilling Oil Pollution Emergency Plan (OPEP) that the Department of Transport (DoT) is the Hazard Management Agency for marine oil pollution in WA State waters under the Emergency Management Act 2005 2 - There are references in Section 2.1.4 to a 'lead' Jurisdiction Authority. Please clarify this. 3 - Section 2.1.4 also states that 'If a Level 2/3 Petroleum Activity in Commonwealth waters is likely to enter WA or NT waters, the Jurisdictional Authority remains true to the source of the spill (i.e., NOPSEMA for Commonwealth waters).' Please clarify the detail and intent of this statement. 4 - Provide detail on the risk assessment undertaken in relation to those potential spill scenarios as covered by this OPEP. 5 - Provide details on the properties of all potential spill types as covered by this OPEP. 6 - Provide a map of the Environment that May Be Affected (EMBA) based on the spill modelling that has been conducted. 7 - Have limiting conditions of each of the potential response method been considered? 8 - Provide detail on what equipment, personnel, supplies and services may be required. 9 - Please provide detail on where the above will be sourced. 10 - Does the 128 persons identified in Appendix B (DIMT) include all field-based responders? 11 - It is unclear in the OPEP where the initial 11 personnel that may be required by DoT would be sourced from. Please clarify this noting that for certain positions, DoT's preference is that these are filled by people with an intimate knowledge of certain EOG processes and this OPEP. 12 - Table 6.2 details contractors and suppliers that EOG hopes to have in place. Noting that many of these are either not yet in place or don't yet have dedicated providers specified, when will these be finalised? 13 - Provide details on the location and facilities of the Incident Control Centre that would be utilised by EOG. 14 - Have any estimates of waste volumes been predicted? And if so, what are they? What waste management contract is in place (or will be in place)? 15 - Section 4.7 (waste mgmt.) makes reference to EOG providing a Facilities Support Officer to DoT, however, it doesn't make mention of the provision of contract services/resources – please clarify. 16 - Is there a communications plan in place in the event of a spill occurring? 17 - Is there a system in place for EOG responders to access EOG specific incident related documents/templates? 18 - Provide details on the operational and scientific monitoring program (OSMP) including provisions for the utilisation of baseline data. 19 - Provide detail on the amenability of oil to dispersant and what type of dispersant is more likely to be used in the event of an incident. 20 - Provide detail on the arrangements to be in place for EOG to access 24hr real time spill modelling. 21 - Does EOG have measures in place to ensure responder safety is the priority? 22 - Section 8.1 details that 'This OPEP relies on the supply of trained personnel from other response organisations; EOG will not be responsible for their training.' How does EOG ensure it has access to adequately trained personnel? Please also note that DoT expects that Petroleum Titleholders ensure that they have access to adequate resources and do not rely on DoT resources.	Following up from previous email 19/12/22, please find attached EOG's response to the DoT's comments on the Beehive-1 drilling OPEP. EOG's response to each point raised in email dated 19/12/22: 1 - OPEP: Table 2.1 – Note 3; Section 2.3.2. 2 - OPEP: References to 'lead' jurisdiction authority removed. 3 - OPEP: Section 2 revised to provide clarification on Jurisdictional Authorities. 4 - EP: Chapter 6 of the EP details the Environmental Impact & Risk Assessment Methodology. Sections 8.6 and 8.7 provide the risk assessments for Marine Diesel Oil (MDO) Release and Loss of Well Containment. Chapter 9 provides the risk assessment for oil spill response activities. 5 - OPEP: Table 1.3 provides summary information on indicative crude oil and MDO properties. OPEP Appendix B (Basis of Design): Section 4 provides an overview of the oil spill modelling; Section 4.2 describes the response planning thresholds; and Section 4.3 details the deterministic modelling outcomes used to select the level case discharges (WCD) used for the Basis of Design. 6 - OPEP: Figure 4.2 (LoWC EMBA) and Figure 4.32 (MDO EMBA). 7 - OPEP: Appendix B (Basis of Design): Section 6 outlines the Field Capability Basis of Assessment, including the use of cone of response models (Section 6.2), oil spill budgets (Section 6.3) and tiered response (Section 6.4). AMOSC provided an assessment of response requirements (Section 6.5). Section 6.6 presents the overall field capability assessment. Section 7 provides information on field capability arrangements, including limiting conditions. Section 8 describes the arrangements for each response strategy, including limiting conditions. 8 - OPEP Appendix A (DIMT Capability Assessment): Section 1.2 describes the methodology used (including AMOSC's justification) for determining DIMT requirements. The rest of Appendix A describes the capability for a DIMT from initial ramp-up through to peak requirements. OPEP Appendix B (Basis of Design): Sections 6 through 8 provide details on the equipment, personnel, supplies and services required to implement the response strategies. 9 - OPEP: Table 6.2 provides details on where equipment, personnel, supplies and services will be sourced. OPEP Appendix A (DIMT Capability Assessment): Section 2 provides detail on where DIMT personnel would be sourced. OPEP Appendix B (Basis of Design): Section 7 provides overarching details on where equipment, personnel, supplies and services would be sourced. Section 8 provides further detail for each of the response strategies. 10 - OPEP Appendix A (DIMT Capability Assessment): Section 3 identifies the required personnel for the DIMT. Table 3.1 identifies a total of 110 personnel required to support a 24/7 DIMT, including rotations. OPEP Appendix B (Basis of Design): AMOSC provided an assessment of response requirements (Section 6.5) identifying a requirement for over 500 personnel to support Monitoring and Evaluation, Surface Dispersant Application, Containment and Recovery, Shoreline Protection and Deflection, Shoreline Assessment and Clean-up, and Oiled Wildlife Response. OPEP Appendix C (Operational and Scientific Monitoring Plan) implementation plan (OSM BIP)] RPS reviewed the OSM BIP and provided reports on their capability to respond. Section 8 identifies the personnel requirements for the implementation of OSM. 11 - OPEP Appendix A (DIMT Capability Assessment): Table 3.1 identifies where the initial 11 personnel that may be required by DoT would be sourced from. 12 - OPEP: Table 6.2 updated. Includes details of arrangements in place and timing for arrangements for other contractors and suppliers. 13 - The Incident Control Room would be located at EOG contractor offices in Perth WA. 14 - OPEP Appendix B (Basis of Design): Table 8.4 identifies the anticipated waste streams for a LoWC. OPEP: Table 6.2 details that a contract with a licenced waste management contractor will be in place prior to mobilisation. 15 - EOG commits to providing all contract services/resources requested by the WA DoT. 16 - OPEP: Table 3.1 provides a notification plan. The Beehive 1 Drilling Emergency Response Plan (AGR-AP-HSEQ-MOI) will include a communications plan. 17 - Information will be available on the EOG contractor Sharepoint site. 18 - OPEP Appendix C (OSM BIP): Attached as appendix to OPEP. Includes provisions for the utilisation of baseline data. 16 - OPEP: Table 3.1 provides a notification plan. The Beehive 1 Drilling Emergency Response Plan (AGR-AP-HSEQ-MOI) will include a communications plan. 17 - Information will be available on the EOG contractor Sharepoint site. 18 - OPEP Appendix C (OSM BIP): Attached as appendix to OPEP. Includes provisions for the utilisation of baseline data. 19 - EP: Section 9.3 presents the risk assessment for dispersant application. Appendix 6 of the EP provides revised modelling incorporating increased dispersant use. OPEP Appendix B (Basis of Design): Section 6.3.1 provides the oil spill budget for dispersant use. Table B.1 lists the approved dispersants considered for use. 20 - OPEP: Table 6.2. EOG will rely on contractors to access 24hr real time spill modelling. 21 - The EOG Australian Projects Health, Safety and Environment (HSE) Management Plan (096161-2022-Beehive *1-HSEPlan-RevD) provides overall guidance for health and safety matters. OPEP Appendix A (DIMT Capability Assessment): The Safety Officer will be responsible for ensuring site risk assessments are in place and safety plan is in force across all of the response. 22 - OPEP Appendix A (DIMT Capability Assessment): Section 3 identifies the required personnel for the DIMT. Table 3.1 identifies where these personnel would be sourced to support a 24/7 DIMT, including rotations. OPEP Appendix B (Basis of Design): AMOSC provided an assessment of response requirements (Section 6.5) identifying a requirement for over 500 personnel to support Monitoring and Evaluation, Surface Dispersant Application, Containment and Recovery, Shoreline Protection and Deflection, Shoreline Assessment and Clean-up, and Oiled Wildlife Response. Section 7 identifies where these resources would be sourced.
17/01/2023 11:11	17/01/2023 11:11	Outbound Email	(WAODT-41 Xen)	Email to WAODT advising locations where EOG has committed to preparing TRP's.	N/A	The attached file has the locations where EOG has committed to preparing TRPs (based on contact within 15 days). Could you please advise whether any other titleholders have TRPs for these locations (or nearby locations)? If so, could you provide their contact details?
20/01/2023 15:57	20/01/2023 15:57	Inbound Email	(WAODT-42 Xen)	Response to email 17/1/23 re TRP's.	WA DoT comments: •They have check the database for any records of TRP's in the location provided by EOG •They did not find any records of TRP's. •They suggest being aware of operators within same area that EOG could ask for guidance	N/A
24/01/2023 17:10	24/01/2023 17:10	Outbound Email	(WA Dot-25 Xen)	Response to email about the Exploration Drilling Oil Pollution Emergency Plan.	OPEP reviewed and comments generated from this review are outlined: 1 - 5: No further comment. 6 - Request clarification on modelling concentrations as depicted in Figure 4.2 and Figure 4.3 7 - 10: No further comment. 11 - Table 3.1 indicates that the majority of the positions to be provided to DoT would be made up of EOG and EOG contractors. It also indicates the Deputy Planning Officer and Deputy Logistics Officer positions would not be filled by EOG staff. Reuqest to clarify why these positions are not filled by EOG staff and/or provide an indication as to how EOG contractors would have an intimate knowledge of an EOG plan given they are not from EOG. It is also noted that Table 3.1 of Appendix A indicates that the 11 personnel may not be available until Day 3-8. Query what provisions are in place in the event they are required before then. 12 - 15: No further comment. 16 - Query what will be the main form of communications between the Field and IMT? 17 - No further comment. 18 - Table 7.1 of Appendix C details that no scientific monitoring can be done inside of 7 days – query if there is baseline data available for those potential impacted locations. Table 9.3 also indicates that some resources are yet to be sourced – query when will this be confirmed. 19 - The requested information was unable to be found within the sections quoted – request to clarify. Request for information EOG may have on the effectiveness of dispersant on the crude oil targeted within this plan (query has any actual testing occurred). 20 - 22: No further comment. There is a reference within Appendix B: Basis of Design and Field Capability to a 'WA State Combat Committee' – request to clarify what this is referring to.	Refer to email dated 30/1/23
30/01/2023 11:30	30/01/2023 11:30	Outbound Email	(WA Dot-26 Xen)	Response to DOT email 24/1/23.	N/A	Thanks for the comments. I think that we have a good understanding of what is required to address most of these comments but would like a couple of clarifications. Comment 11: * EOG are considering who would be suitable for the Deputy Planning Officer and Deputy Logistics Officer positions. EOG's contractor engaged for Drilling Management Services and for the DIMT, we were wondering if EOG's contractor staff would be suitable for these roles? * We will commit to providing the Deputy Planning Officer and Deputy Logistics Officer positions within 24 hours. When would you expect the other positions to be required? Comment 16: * Table 2.1 of Appendix A identifies that the Planning Section Chief has overall responsibility for communications and that the Communications Unit Manager will ensure effective communications from the IMT to the field, and intra-field communications * Table 5.15 of the OPEP identifies that EOG would utilise the services of a specialist communication provider * Table 6.2 of the OPEP identifies that up to 50 satellite phones would be hired. * As any response which includes WA waters would involve WA DoT and DBCA, we were wondering if you have an existing system/plan that we can align with? Comment 19: * In the event of a LOWC event, all of the approved dispersants listed in Table B.1 of Appendix B would likely be used. * I could find no records of Jabiru crude actually being tested against dispersants. * We have received advice from AMOSC and OSRL that Jabiru crude would likely be amenable to dispersant use. We could probably provide copies of these emails (with approval) – would this be sufficient? On another note, we will be in Perth for a number of meetings in late February and were hoping to meet with you on Friday 25 February . Would you be available then? If so, what time/s would you prefer?
30/01/2023 11:31	30/01/2023 11:31	Inbound Email	(WA Dot-27 Xen)	Auto reply from DoT.	Automatic response email stating out of office until Tuesday 31 January 2023	N/A
31/01/2023 9:37	31/01/2023 9:37	Outbound Email	(WA Dot-28 Xen)	Asking about availability for a meeting.	N/A	We have other meetings in Fremantle on Thursday 23 Feb. Would you be available for a meeting on Thursday from around 10.30 AM?
31/01/2023 17:16	31/01/2023 17:16	Inbound Email	(WA Dot-29 Xen)	Confirming meeting and discussion.	WA DoT comments that the time and date for the meeting is suitable. Asks about the meeting agenda and that the other EOG emails will be answered shortly.	N/A
1/02/2023 9:11	1/02/2023 9:11	Outbound Email	(WA Dot-30 Xen)	Thanks for confirming appointment.	N/A	Thanks for confirming appointment.
1/02/2023 10:35	1/02/2023 10:35	Inbound Email	(WA Dot-31 Xen)	Purpose of meeting.	Seeking clarification about the purpose of the meeting.	N/A
1/02/2023 11:38	1/02/2023 11:38	Outbound Email	(WA Dot-32 Xen)	Outlining the purpose of the meeting.	N/A	Key people from EOG will be in town and are keen to introduce themselves. We'd probably like to spend a bit of time discussing the comments, but would also like to discuss some other aspects of EOG's response and testing arrangements. We're in the process of reviewing and updating the OPEP and have identified that we need to provide more detail on personnel, equipment and response strategies. At this time, we think that we may want to discuss how EOG's arrangements integrate with the WA arrangements, particularly at the operational (in-field) level. We'd also like to talk about proposed OPEP testing arrangements, including WA DoT's involvement. We may also identify other questions for WA DoT as we revise the OPEP. I'll prepare a short agenda closer to the time. I'll follow up with a meeting request.
1/02/2023 17:53	1/02/2023 17:53	Inbound Email	(WA Dot-33 Xen)	Meeting arrangements.	WA DoT comments: •Would like a meeting agenda •Possibly changing the meeting time to 1pm due to the availability of one colleague. •If the meeting time cannot be change WA DoT will take any questions offline if they unable to answer them during the meeting.	N/A
2/02/2023 14:45	2/02/2023 14:45	Outbound Email	(WA Dot-34 Xen)	Meeting arrangements.	N/A	We are keen to investigate you and your colleague's availability for two hours on Wednesday 22 Feb from 1pm, later than 1pm on Thursday 23 Feb, or any time Friday 24 Feb. If nothing else suits, we can make the 1 pm meeting.
2/02/2023 16:14	2/02/2023 16:14	Inbound Email	(WA Dot-35 Xen)	Meeting arrangements.	WA DoT comments about a colleague's availability and if it would work for EOG.	N/A.
3/02/2023 7:40	3/02/2023 7:40	Outbound Email	(WA Dot-36 Xen)	Meeting arrangements.	N/A	Thanks for that. I'll cancel the previous meeting and send out a new invite.
8/02/2023 15:11	8/02/2023 15:11	Inbound Email	(WA Dot-38 Xen)	Responses from the DoT to EOG email 30/1/23.	They have responded to the email from 30/1/2023 in red. They are willing to discuss the responses in further detail in a meeting if EOG prefers. •Comment 11- The DoT expectations are outlined in the Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements (IGN). If a deviation to this was to be proposed, they require justification as to why and how the alternative would be able to deliver what is required before they can comment on suitability. As per the IGN, the remaining positions are required to be provided by 8am the following day that the request for the personnel is made. •Comment 16- They don't have a publicly available plan that can be provided for alignment. They can comment on suitability if EOG provided them with some details. •Comment 19- Further confirmation of advice sought is needed.	Comments in email dated 30/1/23. Comment 11: * EOG are considering who would be suitable for the Deputy Planning Officer and Deputy Logistics Officer positions. EOG's contractor for Drilling Management Services and for the DIMT, we were wondering if EOG's contractor staff would be suitable for these roles? * We will commit to providing the Deputy Planning Officer and Deputy Logistics Officer positions within 24 hours. When would you expect the other positions to be required? Comment 16: * Table 2.1 of Appendix A identifies that the Planning Section Chief has overall responsibility for communications and that the Communications Unit Manager will ensure effective communications from the IMT to the field, and intra-field communications * Table 5.15 of the OPEP identifies that EOG would utilise the services of a specialist communication provider * Table 6.2 of the OPEP identifies that up to 50 satellite phones would be hired. * As any response which includes WA waters would involve WA DoT and DBCA, we were wondering if you have an existing system/plan that we can align with? Comment 19: * In the event of a LOWC event, all of the approved dispersants listed in Table B.1 of Appendix B would likely be used. * I could find no records of Jabiru crude actually being tested against dispersants. * We have received advice from AMOSC and OSRL that Jabiru crude would likely be amenable to dispersant use. We could probably provide copies of these emails (with approval) – would this be sufficient?
8/02/2023 15:27	8/02/2023 15:27	Outbound Email	(WA DoT-39 Xen)	Thanking DoT for the feedback.	N/A	Thanks for the feedback.
23/05/2023 22:38	23/05/2023 22:38	Outbound Email	(WA DoT-43 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
23/05/2023 22:39	23/05/2023 22:39	Inbound Email	(WA DoT-45 Xen)	Auto acknowledgement of email from 23/5/23.	Auto acknowledgement of email from 23/5/23.	N/A
5/06/2023 21:54	5/06/2023 21:54	Inbound Email	(WA DoT-43 Xen)	Response to May 2023 Project Update email.	Thank you for the update.	N/A
30/06/2023 6:24	30/06/2023 13:05	Outbound Email	2023/630 Email Follow Up June 2023	Follow up email seeking feedback by 21 July 2023 on update that was provided in May 2023 via email.	N/A	This message is in follow up to the email below providing an update to the Beehive project and requesting that you (or your organisation) share your assessment of how you may be affected by our proposed activities. We are kindly requesting feedback from you by 21 July 2023.
4/07/2023 20:14	4/07/2023 20:14	Inbound Email	(WA DoT-46 Xen)	Feedback to May 2023 Beehive Project Update.	WA DoT comments: •If there is a risk of a spill impacting State waters from any of EOG proposed activities, EOG need to ensure that DoT is consulted as per the Department of Transport Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements (July 2020).	N/A
6/07/2023 23:22	6/07/2023 23:22	Outbound Email	(WA DoT-47 Xen)	Acknowledgement of feedback from 4/7/23.	N/A	Thank you for the email response and information. Our team has been and will continue to consult with the Department of Transport as outlined in the Department of Transport Offshore Petroleum Industry Guidance Note- Marine Oil Pollution: Response and Consultation Arrangements (July 2020) as related to the Beehive Project WA-488-P activities.
13/10/2023 8:50	13/10/2023 8:50	Outbound Email	WA DoT-48 Xen	Email advises that the EP is available for public exhibition and feedback and comments are welcomed.	N/A	N/A
26/10/2023 22:28	26/10/2023 22:28	Inbound Email	WA DoT-49 Xen	DoT have asked for some responses from previous discussions to assist them in their review of the EPs.	N/A	N/A
6/11/2023 20:47	6/11/2023 20:47	Outbound Email	WA DoT-50 Xen	EOG provided a table with responses to DoT's previous feedback and advised the latest version of the EP has included updates to areas where DoT had provided feedback. Advised that EOG will contact DoT in the unlikely event that there are further updates based on feedback at this late stage of the consultation.	N/A	N/A
4/12/2023 23:16	4/12/2023 23:16	Inbound Email	(WA DoT-51 Xen)	Response to previous communications (WA DoT-50)	Comment 11 concerns regarding suitability of using external personnel. Preference s is sourced internally. Query on ability to meet requirement.	Response as per email (WA DoT-52 Xen)

		28/05/2023 19:38	28/05/2023 19:38	Inbound Email		(TUNAA-05 Xen)	Response to email 26/5/23 providing services agreement for consideration.	Please find attached our services agreement for your consideration.	Refer to email dated 26/6/23.
		28/06/2023 7:21	28/06/2023 7:21	Outbound Email		(TUNAA-06 Xen)	Response to email 28/5/23 confirming receipt of services agreement and that EOG would review and respond.	N/A	My apologies for the delayed response, we are in receipt of your services agreement, our team will review and follow back up with you.
		19/07/2023 11:28	19/07/2023 11:28	Outbound Email		(TUNAA-07 Xen)	Response to emails 25/5/23 & 28/5/23 regarding services agreement.	N/A	Thank you for your email dated 25 May 2023 providing Tuna Australia's Position Statement as well as email dated 28 May 2023 providing a copy of Tuna Australia's form of Service Agreement for consideration. Please find attached a Beehive Project Fact Sheet (July 2023 – Tuna Australia ("Fact Sheet"), which responds to the request contained in Tuna Australia's Position Statement for "information in a written succinct manner including estimated boundaries for extent of planned activity impacts (i.e., artificial light, noise, discharges etc.) as well as activities within the operational area." As noted in the Fact Sheet, the Environmental Plan has identified control measures in place to minimise these impacts to as low as reasonably practicable. We have also attached a link to NOPSEMA's brochure entitled "Consultation on offshore petroleum environment plans" (the "Brochure") https://www.nopsema.gov.au/sites/default/files/documents/Consultation%20on%20offshore%20petroleum%20environment%20plans%20brochure.pdf As indicated on the fourth page under the heading "What if I don't have the resources to participate?", NOPSEMA has confirmed that there is no requirement in law for titleholders to pay costs associated with consultation. EOG is consulting with the individual Southern Bluefin Tuna and Billfish Fishery license holders and peak representative bodies because the fishing zones for those specific fisheries overlap the Geotechnical and Drilling Environment that May Be Affected ("EMBA"). Nonetheless, we note that no recent historic fishing effort has occurred near the Beehive project for any of the tuna fisheries. You may also be aware that the proposed activity is relatively minimal in that the proposed activity consists of geotechnical work and a single exploration well that would be capped and abandoned at the end of the work program. Given (1) NOPSEMA's position on costs as set forth in the Brochure, (2) the lack of fishing in the area for the last three years, (3) the fact that we are consulting directly with the fisheries that overlap the EMBA, and (4) the scope of the activity being proposed, we do not see a Service Agreement with Tuna Australia as being appropriate. Of course, we would be pleased to hear from you further regarding the information we have provided and to understand any additional feedback (whether in relation to artificial light, noise, discharges you specifically requested or otherwise) should you have any outstanding comments, questions, or concerns.
		10/08/2023 12:58	10/08/2023 12:58	Inbound Email		(TUNAA-08 Xen)	Follow up email as a result of forwarded email from member. Comment on: services agreement, desire to be consulted, position statement, AFMA communications with NOPSEMA. Prompt for further engagement.	Email response as logged in CM.
		25/08/2023 5:58	25/08/2023 5:58	Outbound Email		(TUNAA-09 Xen)	Follow up email: information reviewed, fact sheet attached, other stakeholder consultation, assessment of merit.	Information reviewed, fact sheet attached, other stakeholder consultation, assessment of merit.	N/A

		25/08/2023 12:37	25/08/2023 12:37	Inbound Email		(TUNAA-10 Xen)	Response to EOG Resources email (TUNNA-09 Xen). Notes broad level advice, mailing accuracy concerns, view towards incomplete consultation, offer to assist with consultation and reporting under OPGSSA 2006.	EOG Resources direct contact of tuna concession holders with regard to consultation and reporting under OPGSSA 2006. AMPA advice to NOPSEMA for energy companies to consult through fishing industry associations. Concession owner advice to consult through Tuna Australia. Concern mailing lists used are outdated/inaccurate. Affirmation of Tuna Australia's database as actively managed and accurate. View towards consultation not conducted through Tuna Australia as incomplete. Offer to assist to meet consultation and reporting under OPGSSA 2006. Request by fisheries regulator and industry for energy companies to work with industry associations.	Tuna Australia replied on 25 August 2023 claiming that: 1.AFMA "… have advised NOPSEMA for energy companies to consult through fishing industry associations." EOG has consulted through fishing industry associations. The AFMA "Petroleum industry consultation with the commercial fishing industry" webpage (https://www.afma.gov.au/afmas-research/petroleum-industry-consultation-commercial-fishing-industry) states: "AFMA expects petroleum operators to consult directly with fishing operators about all activities and projects which may affect day to day fishing activities." 2."[C]oncession owners have advised energy companies to direct consultation through Tuna Australia." Two tuna fishers have contacted EOG requesting their consultation be directed through Tuna Australia. No other tuna fishers have requested this. 3.Mailing lists provided by AFMA (and other sources) "… are outdated or otherwise inaccurate." EOG has used the available records from AFMA.
		13/09/2023 12:20	13/09/2023 12:20	Outbound Email		(TUNAA-11 Xen)	Response to inbound email 25/08/2023 thanking for response and address the matters raised around requirements for cconsultation.	Matters are of general application to consultation activities, but not to project and ongoing consultation. Affirm view that EOG is undertaking comprehensive consultation in accordance with legislative requirements. EOG remain open to further engagement. Notes Tuna Australia position to only engage further if compensated to participate, and enter into contract. EOG has provided information requested, and taken into consideration items raised when planning activity. EOG takes view that entering into a legal contract is not reasonable.	N/A
		26/10/2023 4:39	26/10/2023 4:39	Outbound Email		(TUNAA-12 Xen)	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
		25/10/2023 11:54	25/10/2023 11:54	Inbound Email		TUNAA-13 Xen	Thank you for reaching out to Tuna Australia as a relevant person under reporting requirements. Cursory review of EP raises following points: 1. Tuna Australia and ASBTIA are the only peak bodies representing tuna fisheries. Advice from other "peak bodies" does not: represent views of tuna industry, have outreach to all concession holders and owners, have visibility on current industry intelligence, fishing proposals and future development. Advice from bodies not authorised to represent tuna fisheries is flawed and must be removed from the EP. 2. EP makes reference to SFR holders who have been consulted and as listed as relevant persons. Based on the numbers in the EP, consultation appears inadequate and does not meet regulatory requirements. 3. Under OPGGS Act 2006 when developing EP, proponent must demonstrate they can "carry on those activities in a manner that does not interfere with navigation, fishing, or the conservation of the resources of the sea and seabed". TP must address planned fishing effort and development of the fishery. Historical fishing effort for validating proposal activities is a flawed assessment. Concerned energy companies accessing outdating, inaccurate, not fit-for-purpose mailing lists that do not target required audience. Tuna Australia offered to assist using internal database, and holds view that not conducting through Tuna Australia is likely to be incomplete consultation. AFMA advised NOPSEMA that preferred consultation method is through fishing industry associations. Tuan concession owners wish for EP consultation to be directed to Tuna Australia. Given recent legal decisions regarding adequate/genuine consultation, better environmental outcomes achieved through Tuna Australia process. Can provide industry position statement and services agreement.	TUNA Australia reviewed EOG EP and raise some following points: 1. Tuna Australia and ASBTIA are the only peak bodies representing tuna fisheries. Advice from other "peak bodies" does not: represent views of tuna industry, have outreach to all concession holders and owners, have visibility on current industry intelligence, fishing proposals and future development. Advice from bodies not authorised to represent tuna fisheries is flawed and must be removed from the EP. 2. EP makes reference to SFR holders who have been consulted and as listed as relevant persons. Based on the numbers in the EP, consultation appears inadequate and does not meet regulatory requirements. 3. Under OPGGS Act 2006 when developing EP, proponent must demonstrate they can "carry on those activities in a manner that does not interfere with navigation, fishing, or the conservation of the resources of the sea and seabed". TP must address planned fishing effort and development of the fishery. Historical fishing effort for validating proposal activities is a flawed assessment. Concerned energy companies accessing outdating, inaccurate, not fit-for-purpose mailing lists that do not target required audience. Tuna Australia offered to assist using internal database, and holds view that not conducting through Tuna Australia is likely to be incomplete consultation. AFMA advised NOPSEMA that preferred consultation method is through fishing industry associations. Tuan concession owners wish for EP consultation to be directed to Tuna Australia. Given recent legal decisions regarding adequate/genuine consultation, better environmental outcomes achieved through Tuna Australia process.	Assessment of Tuna Australia claims: 1."Tuna Australia and ASBTIA are the only peak bodies representing tuna fisheries." EOG recognises that Tuna Australia and ASBTIA are peak bodies representing tuna fisheries. EOG also recognises the Commonwealth Fisheries Association, Seafood Industry Australia and WAFIC as peak bodies representing fisheries, including tuna. 2."Advice from other "peak bodies" does not: a.represent views of tuna industry, EOG recognises that Tuna Australia and ASBTIA represent the views of their members and the industry at large. b.have outreach to all concession holders and owners, Email from Tuna Australia (TUNNA-03EXN) commences with "Tuna Australia members and non-members …". This indicates that Tuna Australia does not represent all tuna fishers. c.have visibility on current industry intelligence, fishing proposals and future development." EOG would welcome any information that Tuna Australia can provide on on current industry intelligence, fishing proposals and future development. 3."Advice from bodies not authorised to represent tuna fisheries is flawed and must be removed from the EP." Regulation 16(b) of the OPGGS(Environment) Regulations 2009 requires EOG to submit a report on all consultatjn undertaken in the course of preparing the EP. 4.Not all SFR holders have been consulted as relevant persons. EOG obtained lists of SFR holders from the Australian Fisheries Management Authority (AFMA) and has contacted (or attempted copntact) with all of them. If Tuna Australia believes that other SFR holders should be consulted, please advise and we will had them to our list of relevant persons. 5.The EP does not demonstrate compliance with s 280(2) of the OPGGS Act. Tuna Australia's claim is based on a partial reading of this section which requires that a titleholder must "carry on those activities in a manner that does not interfere with navigation, fishing, or the conservation of the resources of the sea and seabed". However Tuna Australia's claim excludes the last semisence of s 280(2) which states "… "to a greater extent than is necessary for the reasonable exercise of the rights and performance of the duties of the first person." EOG believes that their activities would not interfere to a greater extent than is necessary for the reasonable exercise of their rights and performance of their duties. 6.Planned fishing effort and development of the fishery should be included in impact and risk assessments and that the use of historical fishing is not appropriate. EOG is unaware of any planned fishing effort and development of the fishery. We would welcome any information that Tuna Australia can provide. If relevant, we will include in impact and risk assessments. In the absence of any 7."(N)ot conducting through Tuna Australia is likely to be incomplete consultation." EOG has consulted with individual fishers as well as with industry associations. 8."(Tuna) concession owners wish for EP consultation to be directed to Tuna Australia." Two tuna fishers have contacted EOG requesting their consultation be directed through Tuna Australia. No other tuna fishers have requested this.

Northern Prawn Fishery Industry Pty Ltd	NPF Industry Pty Ltd is a single voice for the industry in the Northern Prawn Fishery.	18/09/2021 0:00	18/09/2021 0:00	Outbound Email	355	(NPF-1, 2 & 3)	EOG emailed Flyer 1.	No concerns raised.	N/A
		28/09/2021 0:00	28/09/2021 0:00	Inbound Email		(NPF-1, 2 & 3)	NPF responded requesting shape files of the Beehive project area to help inform their response. EOG responded via email with attached shape files.	NPF requested shape files of the Beehive project area to help inform their response.	EOG responded via email with shape files.
		27/10/2021 0:00	27/10/2021 0:00	Outbound Phone Call		PH-Pre-Xen	EOG spoke to NPF who confirmed the shapefiles were sent to the NPF CEO on 11 October to have a look at it. NPF advised it is best to contact NPF CEO directly and provided the email and mobile details.	No concerns raised.	N/A
		28/10/2021 0:00	28/10/2021 0:00	Outbound Email		(NPF-4)	EOG emailed NPF CEO the information flyer and asked if NPF had any feedback on the project based on the information and shapefiles that were sent to NPF on 28 September. EOG requested a reply email to confirm receipt of email and any questions from NPF.	No concerns raised.	N/A
		28/10/2021 0:00	28/10/2021 0:00	Inbound Email		(NPF-5)	NPF CEO replied to EOG that they had received the shapefiles internally on 11 October but was out of the office. She confirmed that she would review the files and get back to EOG early next week.	No concerns raised.	N/A
		8/11/2021 0:00	8/11/2021 0:00	Outbound Phone Call		PH-Pre-Xen	EOG spoke to NPF CEO who apologised for not providing comments sooner. She confirmed she hadn't read the whole EP and that she would provide some comments by mid week at the earliest re potential impact on NPF. EOG stated that Chapter 7 of the EP would be worth directing focus on as it addressed potential impacts and the mitigation measures. EOG also mentioned the survey area has been reduced and offered to send through the updated map. NPF CEO was keen to see the updated map and requested new coordinates to assist her with a quick turnaround of comments. EOG will send those to her asap.	Apologised for not providing comments sooner. Confirmed she hadn't read the whole EP and that she would provide some comments by mid week at the earliest re potential impact on NPF. Was keen to see the updated map and requested new coordinates to assist her with a quick turnaround of comments.	EOG stated that Chapter 7 of the EP would be worth directing focus on as it addressed potential impacts and the mitigation measures. EOG also mentioned the survey area has been reduced and offered to send through the updated map. EOG to send shape files.
		9/11/2021 0:00	9/11/2021 0:00	Outbound Email		(NPF-6)	EOG emailed NPF CEO the revised PDSA survey area map & coordinates and resent the information flyer requesting feedback via reply email.	No concerns raised.	EOG emailed the revised PDSA survey area map & coordinates and resent the information flyer requesting feedback.
		10/11/2021 0:00	10/11/2021 0:00	Inbound Email		(NPF-7)	NPF CEO requested shapefiles for the revised survey area.	Requested shapefiles for the revised survey area.	Refer to email 10-Nov-21.
		10/11/2021 0:00	10/11/2021 0:00	Inbound Email		(NPF-8)	NPF CEO emailed EOG concerns including the NPF is totally opposed to any exploratory or drilling activity which may impact on catches and / or fishing operations from 1st August to 1 December in any given year. In addition, due consideration has not been given to the potential immediate hazards and / or long term impacts of the proposed operation on TEP species, including sawfish.	Concerns including the NPF is totally opposed to any exploratory or drilling activity which may impact on catches and / or fishing operations from 1st August to 1 December in any given year. In addition, due consideration has not been given to the potential immediate hazards and / or long term impacts of the proposed operation on TEP species, including sawfish.	Refer to email 12-Nov-21.
		12/11/2021 0:00	12/11/2021 0:00	Outbound Email		(NPF-9)	EOG responded to NPF's concerns via email.	No concerns raised.	EOG responded to the NPF concerns with the following: * Acknowledgement of the low fishing effort and catch in the PDSA area, noting that the EP includes an impact assessment for impacts to the fishery, including vessel displacement. * Acknowledgement that the PDSA will aim to be completed prior to the start of August in order to avoid disruption to the fishery. This will also negate the need for compensation. * Impacts to threatened species, such as turtles, sawfish and sea snakes, along with impacts to prawns, are addressed in the EP. * Committed to continuing consultation with the NPFI as planning for the drilling campaign progresses.
		23/11/2021 0:00	23/11/2021 0:00	Outbound Email		(NPF-10)	EOG advised NPF that the EP had been submitted to NOPSEMA for a completeness check prior to its publication on the NOPSEMA website, and provided a copy of the EP (in advance of public exhibition).	No concerns raised.	N/A

		23/11/2022 0:00	23/11/2022 0:00	Outbound Email		(NPF-16 Xen)	Email sent from EOG to NPF CEO providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
		24/05/2023 2:44	19/06/2023 2:44	Outbound Email		(NPF-17 Xen)	Beehive Project Update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance. Also provided information to mitigate a previous concern raised by the NPF for the activity occurring between 1 August - 1 December in any year.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
		19/06/2023 14:05	19/06/2023 14:05	Inbound Phone Call		N/A	Call received from CEO as they had not received any updates on the Beehive Project but was made aware that a recent update had been sent out on the Beehive Project. (Note: No written phone call record was kept. Email received as per NPF-18 Xen)	CEO called and said they had not received any recent updates on the Beehive Project but had been made aware that a recent update has been sent out. CEO said: * they have an interest in the project as their members fish in the project area. * couldn't find any updates in her emails other than an email from November 2021 although updates could have been sent to a past Project Manager. * asked for an email address to send what they thought was the last update they received.	EOG response: * confirmed a recent update was sent in May 2023 which contains the most up to date information and superseded past updates. * would resend update from May 2023. * asked that if there was any feedback or comments to send them through in writing via email.
		19/06/2023 14:09	19/06/2023 14:09	Inbound Email		(NPF-18 Xen)	Email received from CEO following todays phone call with the last correspondence they believed they had received.	As discussed in phone call.	Refer to email 19/6/23 15:03.
		19/06/2023 15:04	19/06/2023 15:04	Outbound Email		(NPF-19 Xen)	Email resending Beehive Project update from 24/5/23 and seeking clarity on email address for future correspondence.	N/A	The most recent email from 24/5/23 (copy attached for your review) has been sent to an NPF email address. Can you please confirm if this email address is the appropriate email address or should we update our records with another email address for all future correspondence. If you have any comments or feedback in relation to the attached email which contains the most current information for the Beehive activity, can you please email those comments or feedback to (email addresses provided).
		20/06/2023 10:24	20/06/2023 10:24	Inbound Email		(NPF-20 Xen)	May 2023 Beehive Project Update	NPF Comments: •They have received the recent email and also the email from the 24th May. •They wish for the email address to be included in all future correspondences. •Will discuss the May email in a phone call later. •Request EOG advise if the project area has changed since the last reviewed shape files in 2021, and if so, send new shapefiles to assist with NPF comments on the EP.	Refer email dated 20/6/23 16:20.
		20/06/2023 16:20	20/06/2023 16:20	Outbound Email		(NPF-21 Xen)	May 2023 Beehive Project Update	N/A	* Thanks for the note. I have added your second email address so that all future correspondence goes to both addresses. The May 2023 email I sent yesterday gives the most current up to date information for the Beehive Project. * In relation to the shape files, I can confirm the ones you reviewed in 2021 remain current, * We look forward to receiving any written feedback or comments you may have on the Beehive Project.
		20/06/2023 17:07	20/06/2023 17:07	Inbound Email		(NPF-22 Xen)	May 2023 Beehive Project Update	NPF asks if there is a cut off date for feedback.	Refer to email dated 21/6/23 08:51.
		21/06/2023 8:51	21/06/2023 8:51	Outbound Email		(NPF-23 Xen)	May 2023 Beehive Project Update	N/A	It would be appreciated if you could send through comments or feedback before 21 July 2023.
		21/06/2023 9:01	21/06/2023 9:01	Inbound Email		(NPF-24 Xen)	May 2023 Beehive Project Update	Thanks – will get back to you asap.	N/A
		19/07/2023 3:50	19/07/2023 3:50	Outbound Email		(NPF-25 Xen)	Provision of updated DRAFT Commercial Fisheries Compensation Protocol	N/A	We have made additional revisions to the DRAFT Commercial Fisheries Compensation Protocol and have attached for your information.
		27/07/2023 10:27	27/07/2023 10:27	Inbound Email		(NPF-26 Xen)	Feedback.	Apologises for the delay in providing NPFI's latest response on the Beehive project to you. Will ensure this is on your desk by Monday latest.	N/A
		2/08/2023 15:22	2/08/2023 15:22	Outbound Email		(NPF-27 Xen)	Follow up on feedback.	N/A	Thanks for the note below. Just thought I would follow up on NPFI's latest response on the Beehive Project that you indicated in your note. We are working on finalizing our Environment Plans in preparation for submission to NOPSEMA towards the end of August 2023 and would like to consider feedback or comments from NPFI in our Environment Plans for the submission. Look forward to hearing from you soon.
		3/08/2023 10:34	3/08/2023 10:34	Inbound Email		(NPF-28 Xen)	Feedback from May 2023 Beehive Project Update and DRAFT Commercial Fisheries Compensation Protocol.	NPF reiterates their concerns: •The JBG raging banana prawn fishery is managed by AFMA is highly regulated and represents a component of the NPF. Significant investment in quantifying the JBG in estuarine habitats. Various harvest strategies have been simulation-tested to ensure the stock and fishery in the JBG are robust to climate variability with a harvest strategy adopted in 2020. The impacts of fishing on other components of the JBG ecosystem have been assessed. This is an ongoing investment in research, stock assessment and management has enabled the JBG to be certified by the Marine Stewardship Council (MSC). •NPFI notes that there is low level of NPF commercial prawn fishing effort/catch in the specific area proposed, with the majority of fishing effort occurring on adult prawns to the north and north-west of the drilling location. NPF records show significant historical concentrations of fishing effort/catch adjacent to the project area. Potential impacts should not be underestimated. NPFI notes other life-history phases of reding banana prawn. Victoria River and Forsyth Creek and the rivers feeding into Cambridge Gulf that support prime estuarine habitats. Makes note of juvenile prawn migration and their habitats. NPFI is concerned that the passage of postlarval and juvenile reding banana prawns may be interrupted by drilling activities. Interference with onshore-offshore prawn migration from drilling activities is highly likely to put added pressure on the reding banana prawn stock •Impacts on Threatened, Endangered & At-Risk species (TEPs) remains a concern of NPF due to the potential impact for this project. NPF have concerns for four sawfish species that have utilise marine and coastal habitats in the JBG. NPFI notes they are committed to improving the sustainability of bycatch taken during trawl operations, including TEPs. Ongoing research in the JBG is being conducted via Crew-Member-Observer program (NPF Industry) and Scientific Observers (AFMA) during commercial fishing operations. The data includes information on TEPs. In addition, vessel logbooks collect information of the TEPs that are collated and reported by CSIRO. NPFI partners with CSIRO to invest in research projects aimed at improving knowledge of marine species. NPFI reiterates that due consideration must be given to the potential immediate hazards and/or long-term impacts of the proposed operation on TEP species. They request that the impact of both the geophysical investigations and drilling activity on both the NPF commercial prawn fishery and all TEP species are recognised and comprehensively addressed in the development of the EP. •Geophysical Investigations and Drilling Activity: Limited data available on the impacts of using certain equipment and drilling activities on prawns. NPFI is concerned about both the short and longer term impacts of this project on the productivity of the fishery. NPFI note marine mammals may also experience sensitive to noise during this project. This is particularly concerning to endangered species in the region. •Timing: Joseph Bonaparte Fishery (JBG) is currently closed to commercial prawn fishing from 1st December to 1 August each year for biological and economic sustainability purposes. The opportunity for NPF operators to access the highly productive, historical fishing grounds in the JBG is limited to 1 August to 1 December each year. Unfettered access during this period of time is critical to NPF industry to maximise catch and economic return from the JBG. NPFI is totally opposed to any exploratory or drilling activity which may impact on catches and/ or fishing operations from 1st August to 1 December in any given year. NPFI and/or individual fishing companies will be seeking compensation from EOG on behalf of the NPF Statutory Fishing Rights holders should there be any disruption to, or displacement of, NPF commercial fishing activities , and/ or loss of fishery productivity, and/or threat to the NPF's Marine Stewardship Council certification from the activities in relation to Beehive Project WA-488-P.	N/A
		3/08/2023 11:36	3/08/2023 11:36	Outbound Email		(NPF-29 Xen)	Acknowledgement of feedback for our review.		Thank you for the feedback in the below email dated 3 August 2023 on behalf of NPFI. Our team will review the feedback provided and will follow back up with you upon completion of our review.
		25/08/2023 6:22	25/08/2023 6:22	Outbound Email		(NPF-30 Xen)	Response email providing response to previous email points.	Consultation with other operators, acknowledgement of opposition to drilling, mutual access, unavoidable impacts compensation, vessel and equipment availability connection to activity timing and associated mitigation measures, geophysical v geotechnical clarification, impact to prawn migration noted and assessment of impact by EOG, TEPs assessments. Request for compensation protocol feedback, and any other feedback relating to EP submissions.	N/A
		24/08/2023 18:40	24/08/2023 18:40	Inbound Email		(NPF-31 Xen)	Notification of CP on leave and earliest response to be 11 September.	Notification of CP on leave and earliest response to be 11 September.	N/A
		13/09/2023 13:04	13/09/2023 13:04	Outbound Email		(NPF-32 Xen)	Following up on earlier email (NPF-30 Xen), which has been reattached. Notification of submission date and request for feedback.	Following up on earlier email (NPF-30 Xen), which has been reattached. Notification of submission date and request for feedback.	N/A
		13/09/2023 13:04	13/09/2023 13:04	Outbound Email		NPF-32 Xen	Following up on earlier email (NPF-30 Xen), which has been reattached. Notification of submission date and request for feedback.	Following up on earlier email (NPF-30 Xen), which has been reattached. Notification of submission date and request for feedback.	N/A
		26/10/2023 4:32	26/10/2023 4:32	Outbound Email		(NPF-33 Xen)	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs. Also follow up on any comments on the draft Fisheries Compensation Protocol.	N/A	N/A
		24/11/2023 10:02	24/11/2023 10:02	Outbound Email		NPF-34 Xen	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A
		3/12/2023 18:07	3/12/2023 18:07	Inbound Email		NPF-35 Xen	NPFI response thanks EGO for their follow up email and apologises for the delay in responding. NPFI advises that the fishing industry will be seeking compensation should there be any short or long term impacts to commercial fishing operations, fishing productivity or Marine Stewardship Council certification. NPFI advises they are opposed to any impacts during the industry's unfettered access from 1 December to 1 August each year and its concerns about potential impacts on prawn productivity and environmental impacts to marine resources.	N/A	N/A
		6/12/2023 11:24	6/12/2023 11:24	Outbound Email		NPF-36 Xen	EOG thanks NPFI for their feedback and advised they will update their records accordingly.	N/A	N/A
Western Australian Fishing Industry Council (WAFIC)	Peak industry body representing the interests of the WA commercial fishing, pearling and aquaculture sectors.	17/09/2021 0:00	17/09/2021 0:00	Outbound Email	355	(WAFIC-01)	EOG emailed Flyer 1.	No concerns raised.	N/A
		6/10/2021 0:00	6/10/2021 0:00	Outbound Phone Call		PH-Pre-Xen	EOG called WAFIC left message requesting call back to verify if Flyer 1 was received by WAFIC.	No concerns raised.	N/A
		6/10/2021 0:00	6/10/2021 0:00	Inbound Email		(WAFIC-02)	WAFIC responded on email to EOG asking if EOG had also sent the information flyer to other fisheries. WAFIC advised they would provide a more detailed response shortly.	No concerns raised.	N/A
		18/10/2021 0:00	18/10/2021 0:00	Outbound Email		(WAFIC-03)	EOG thanked WAFIC for their response and noted a more detailed response is pending. EOG confirmed they are consulting with WA commercial fisheries i.e. Northern Scale Demersal Fisheries, MMF (Area 1- Kimberley), Kimberley Crab managed fishery, Kimberley Prawn managed fishery and Kimberley Gillnet & Barramundi fishery.	No concerns raised.	N/A
		27/10/2021 0:00	27/10/2021 0:00	Outbound Phone Call		PH-Pre-Xen	EOG called WAFIC to follow-up and left voice message asking if they had a detailed response (as per email on 6 Oct 22) and if they could send any written feedback via reply email.	No concerns raised.	N/A
		28/10/2021 0:00	28/10/2021 0:00	Outbound Email		(WAFIC-04)	EOG followed up on the voice message left for WAFIC on 27 October 2022 and asked if WAFIC could provide a detailed response for EOG at their earliest convenience.	No concerns raised.	N/A
		28/10/2021 0:00	28/10/2021 0:00	Inbound Email		(WAFIC-05)	WAFIC provided EOG with comments.	WAFIC comments include: * No fishing from support /commercial vessels. * All support vessels must divert around commercial fishing activity and remain clear of underwater fishing gear. * Requested further information regarding an unplanned spill event.	Refer to email dated 4-Nov-21.
		4/11/2021 0:00	4/11/2021 0:00	Outbound Email		(WAFIC-06)	EOG sent response to WAFIC's comments.	No concerns raised.	EOG responses: * Confirmed no fishing activity from project vessels as part of EP commitments. * Confirmed control measures in place for managing displacement of commercial fisheries and unplanned spill events.
		23/11/2021 0:00	23/11/2021 0:00	Inbound Email		(WAFIC-07)	WAFIC thanked EOG for the email sent 4 Nov 2022 and stated they had no further comments regarding the proposed activities.	WAFIC response: * No further comments regarding the proposed activities.	N/A
		2/12/2021 0:00	2/12/2021 0:00	Outbound Email		(WAFIC-08)	EOG emailed Information Flyer 2 to notify WAFIC that the PDSA EP was now available for public exhibition and comment on the NOPSEMA website and the latest updates to the EP.	No concerns raised.	N/A
		8/12/2021 0:00	8/12/2021 0:00	Inbound Email		(WAFIC-09)	WAFIC emailed EOG that they had reviewed the additional information on Flyer 2 and have no further comments.	No concerns raised.	N/A
		28/02/2022 0:00	28/02/2022 0:00	Outbound Email		(WAFIC-10)	EOG emailed Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A
		2/03/2022 0:00	2/03/2022 0:00	Inbound Email		(WAFIC-11)	WAFIC emailed EOG regarding Flyer 3 and asked EOG to confirm whether the following would be undertaken in the event of an unplanned discharge incident.	WAFIC questions to confirm whether the following would be undertaken in the event of an unplanned discharge incident: * Established baseline scientific data on aquatic organisms and the aquatic environment * Communication strategy and scenario/exercise training that considers the commercial fishing industry in the event of an incident. * Support to the commercial fishing industry with regards to traceability of fish products to manage tainting risks. * A detailed process for post spill scientific monitoring of aquatic organism and aquatic environment. * Commitment for financial adjustment to the commercial fishing industry.	Refer to email dated 9-Mar-22.
		9/03/2022 0:00	9/03/2022 0:00	Outbound Email		(WAFIC-12 & 13)	EOG responded to WAFICs query on the handling and management of oil spill response in the event of an unplanned discharge incident. WAFIC thanked EOG for their comments and offered EOG any guidance or feedback on the Compensation policy/procedure should EOG wish to take up the offer. At this stage WAFIC have no further comment on the drilling activity.	WAFIC response: * Offered EOG guidance or feedback on the Compensation policy/procedure should EOG wish to take up the offer. * No further comments at this stage.	EOG reviewed the concerns raised by WAFIC regarding the PDSA and in response: * Agreed to no fishing from activity vessels (see PDSA EP). * Control measures in relation to temporary displacement of commercial fishers and interference with commercial fishing vessels is addressed in in the EPs. * Baseline publicly available data on the existing environment is included in Chapter 5 of the EPs. * The OPEP includes the communication strategy between EOG and fisheries. * The OSMP framework includes testing for fish tainting. Baseline data on water quality and sediment quality would be obtained from control sites in the event of a large-scale hydrocarbon spill to inform the analysis of impacts. * EOG is required to provide NOPSEMA with a demonstration of Financial Assurance in the event of a worst-case incident (typically a hydrocarbon spill) and EOG has the financial resources to respond.
		12/05/2022 0:00	12/05/2022 0:00	Outbound Email		(WAFIC-14)	EOG emailed Information Flyer 4 with an update on the PDSA phase and invited return comment. The flyer also notified that the Drilling EP was available on NOPSEMA's website for public exhibition for 30 days, until 8th June 2022.	No concerns raised.	N/A
		13/05/2022 0:00	13/05/2022 0:00	Inbound Email		(WAFIC-15)	WAFIC emailed to thank EOG for the update.	No concerns raised.	N/A
		27/06/2022 0:00	27/06/2022 0:00	Outbound Email		(WAFIC-16)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A
		14/07/2022 0:00	14/07/2022 0:00	Inbound Email		(WAFIC-17)	WAFIC emailed to thank EOG for the update and confirmed WAFIC had no comments to the proposed changes.	No concerns raised.	N/A
		7/11/2022 0:00	7/11/2022 0:00	Outbound Email		(WAFIC-18 Xen)	Email sent from EOG to WAFIC seeking to take them on the offer to review our Draft Commercial Fisheries Compensation Policy (which was attached), providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	EOG asked WAFIC to review the Draft Commercial Fisheries Compensation Policy as previously offered.
		14/11/2022 0:00	14/11/2022 0:00	Inbound Email		(WAFIC-19 Xen)	Email received from WAFIC introducing additional relevant person and providing contact details.	No concerns raised.	N/A
		15/11/2022 0:00	15/11/2022 0:00	Inbound Email		(WAFIC-21 Xen)	Email received from WAFIC. They will review the draft protocols next week but asked for clarity if EOG based them on the NERA collaborative seismic EP protocols or was something new developed?	WAFIC confirmed they will review the draft protocols but asked for clarity on whether EOG based them on the NERA collaborative seismic EP protocols or was something new developed?	N/A

		21/11/2022 0:00	21/11/2022 0:00	Outbound Email		(WAFIC-20 Xen)	Email sent by EOG to WAFIC thanking for the update.	No concerns raised.	N/A
		21/11/2022 0:00	21/11/2022 0:00	Outbound Email		(WAFIC-22 Xen)	Email sent by EOG to WAFIC that EOG will seek further information to clarify as requested in email 15 November 2022.	No concerns raised.	N/A
		23/11/2022 0:00	23/11/2022 0:00	Outbound Email		(WAFIC-23 Xen)	Email sent by EOG to WAFIC. EOG protocols broadly align with the NERA collaborative seismic EP protocols but is adapted to be more applicable to the non-seismic activities EOG are contemplating over the next two years.	No concerns raised.	EOG confirmed protocols broadly align with the NERA collaborative seismic EP protocols but is adapted to be more applicable to the non-seismic activities EOG are contemplating over the next two years.
		5/12/2022 0:00	5/12/2022 0:00	Inbound Email		(WAFIC-24 Xen)	Review of compensation protocols.	WAFIC comments reviewed the compensation protocols and need clarification on some parts. •Section 7- Where there may be some behavioural or biological impact to a fishery, which may not have an economic impact to commercial fishing. Any changes to behavioural or biological impacts the resources available to harvest and therefore economically can impact commercial fishing. •Clarification on history of fishing within the EOG petroleum permit or the actual operational area of the activity •Query is these two full years or just active for a set period of time in each year? •Section 8 - It is not clear in the statement, how to demonstrate a direct loss in relation to the EOG Petroleum Activity, this is potentially subjective, this may require an additional statement. •With regards to the drilling and geotechnical activities, an attached confidential advice is provided.	N/A
		7/12/2022 0:00	7/12/2022 0:00	Outbound Email		(WAFIC-25 Xen)	Email sent by EOG to WAFIC. We will follow up with our team to provide the answers and clarifications needed. Thank you for your confidential advice which will be handled as confidential.		EOG response: * We will follow up with our team to provide the answers and clarifications needed.
		24/05/2023 2:49	24/05/2023 2:49	Outbound Email		(WAFIC-26 Xen)	* Provide responses to previous questions and provision of Fisheries protocol. * Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	Apologies for the delayed timeframe in which to respond but we are now able to provide answers to your previous questions, provide a project update and provide a revised version of Fisheries protocol for your additional review and feedback. We appreciate WAFIC's previous comments on the Fisheries protocol. We have taken these comments into account, along with other feedback so that we may finalise this document in due course. We have provided a summary of the Fisheries protocol on the EOG website for anyone to access and intend to provide the full document once finalized to anyone who requests a copy in writing. Answers to the questions you have asked are provided below: * Section 7 – Where there may be some behavioural or biological impact to a fishery, which may not have an economic impact to commercial fishing. Just to clarify any changes to behavioural or biological impacts the resources available to harvest and therefore economically can impact commercial fishing. o For clarity we have removed this text from the Protocol. The likelihood and extent of a behavioural or biological impact will be important to quantifying any economic impact, which could be positive, negative, or neutral. Given the relatively small Petroleum Activity areas the Beehive activities will take place in relative to the size of the fishing grounds, any impact is expected to be minor and temporary especially as both the fish and fishers are mobile. * Just to clarify is the history of fishing within the EOG petroleum permit or the actual operational area of the activity? o EOG would initially only request the history of fishing within the Petroleum Activity area to determine the validity of any claims. Further analysis could require data over a larger area, but this would be requested from the claimant only if needed with rationale for such a request provided. * "For at least two out of the last five years". Is these two full years or just active for a set period of time in each year? o EOG would initially only request the current and historical catch history, in hours, during the calendar month of the Petroleum Activity for the month(s) a claim is being made and for the same calendar month(s) during the 5 previous calendar years. Further analysis could require data over additional months, but this would be requested from the claimant only if needed with rationale for such a request provided. * Section 8 - All fishing history and potential economic losses must relate directly to the EOG Petroleum Activity, during the time period of the operations associated with the same Petroleum Activity. It is not clear in the statement above, how to demonstrate a direct loss in relation to the EOG Petroleum Activity, this is potentially subjective, this may require an additional statement just to clarify the intent. o Without knowing the nature and extent of any impact it is difficult to determine in advance how that loss would be related (directly or indirectly) to the Petroleum Activity, but the data requested is the minimum required to determine if a claim has validity. EOG has proposed what it believes is a simple and fair framework with this Protocol, and expects any claim would be a two way dialogue between EOG and the claimant, with an independent Mediator brought in if needed. As a reminder the Beehive Project is divided into two phases: Geotechnical, followed by Exploration Drilling. Below is an update for each. * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. EOG is committed to continued open engagement to keep our stakeholders informed. You can access the website with the link below for the most up to date project information at any time. https://www.eogresources.com/australia EOG requests that you visit our website and access our Social Pinpoint Consultation Hub to share your assessment of how you may be affected by our proposed activities and the associated environmental impacts and risks. We will assess the merits of any objections or claims that you make. We will provide a response to you which will outline our assessment of merit and any actions we have taken to lessen the degree to which you may be affected. To assist you in making your assessment the current EPs can be found via EOG website. A version can also be found on the NOPSEMA website here: Geotechnical Investigations: https://info.nopsema.gov.au/environment_plans/605/show_public Drilling: https://info.nopsema.gov.au/environment_plans/587/show_public Note: you may request that information you provide during the consultation not be made publicly available. That information must still be included in the environment plan submitted to NOPSEMA as sensitive information but will be excluded from information published on NOPSEMA's website. * The Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (including the definitions, sections 9(8), and 11A(4)) indicate that, if requested, information that you or your organization provides, along with personal information, will be considered "sensitive information". Environment plans published by NOPSEMA on its website do not include any information deemed as sensitive. We will seek to address questions in a timely manner. Please reply to this correspondence with any feedback, objections, claims, or if you know of any other persons or organisations that may have interest in this project, by replying to this email, mailing or by phone contact with our Local Consultant Representative.
		28/06/2023 11:08	28/06/2023 11:08	Outbound Phone Call		PH-01- June Calls	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	Confirmed correspondence had been received and that they would review and provide any comments / questions to EOG via email.	N/A
		3/07/2023 22:53	3/07/2023 22:53	Inbound Email		(WAFIC-27 Xen)	Beehive Project & DRAFT Commercial Fisheries Compensation Protocol feedback.	WAFIC acknowledge receipt on the project update for Beehive WA-488-P and the revised Commercial Fisheries Compensation Protocol. Comments: •Revised protocols now seem to include several disclaimers that have a legal basis. Due to the recent court case has resulted in changes around consultation. •WAFIC don't have the expertise or resources to consider this from a legal perspective. They trust that the consultation process undertaken by titleholders with our industry is genuine and transparent and not guided and developed by legal professionals. •Any advice provided by WAFIC is provided based on our best knowledge, with a focus on ensuring the rights of the fishing industry are considered. •WAFIC provide the following feedback on the protocols: * Commercial fisher definition – need to expand "licence holder" to "The holder of a licence, or a person acting on the licence holder's behalf" to allow for transfer of units or leasing arrangements. * Current catch definition – reflected in hours may to need be reflected in a measure of time relevant to the fisheries management requirements. Some logbooks for reporting catch have different methods. * Safety – Is EOG's only communicating with fishers via the notice to mariners, will EOG also send notifications? * Loss of catch – can you please specify the time required to lodge a claim – up to 12 months? * Fishing Gear Loss or Damage – Is the intention to make fishers lodge insurance claim before coming to EOG? If the loss was a direct result of the survey, why can't EOG cover that. Some fishers may have additional costs associated with making an insurance claim, so they would be left out of pocket. * 3 month claim period for fishing gear loss – can this be extended to up to 6 months to allow for changes in fishing patterns. Please note WAFIC does not represent the Commonwealth Northern Prawn Fishery.	N/A
		6/07/2023 22:10	6/07/2023 22:10	Outbound Email		(WAFIC-28 Xen)	Acknowledgement of feedback 3/7/23.	N/A	Thank you for your email and notes around the changes in consultation resulting from the recent court case. We understand that any advice provided by WAFIC is based on the best of your knowledge with a focus on ensuring the rights of the fishing industry are considered. We greatly appreciate your feedback in this regard. Our team is currently working on reviewing the feedback provided so we can respond to you as soon as possible. It is noted that WAFIC does not represent the Commonwealth Northern Prawn Fishery, please know we are working with them as well.
		19/07/2023 3:25	19/07/2023 3:25	Outbound Email		(WAFIC-29 Xen)	Response to feedback email 3/7/23.	N/A	Thank you again for your comments regarding the Beehive Exploration Fisheries Compensation Protocol. We have made revisions as a result of your feedback, and these are incorporated in the attached revised version and the notes below. * (WAFIC Feedback) Commercial fisher definition – you may need to expand "licence holder" to "The holder of a licence, or a person acting on the licence holder's behalf" to allow for transfer of units or leasing arrangements. (EOG Response) We have made this change in the attached revised version. * (WAFIC Feedback) Current catch definition – reflected in hours may to need be reflected in a measure of time relevant to the fisheries management requirements. Some logbooks for reporting catch have different methods. (EOG Response) We have made this change in the attached revised version. * (WAFIC Feedback) Safety – is EOG's only communicating with fishers via the notice to mariners, will EOG also send notifications? (EOG Response) We have made this change in the attached revised version to add email notifications where possible, although we note that EOG does not have email addresses for most license holders. * (WAFIC Feedback) Loss of catch – can you please specify the time required to lodge a claim – up to 12 months? (EOG Response) Further to this request, we have adjusted the claim period from 3 months to 6 months, and to ensure consistency and administrative simplicity made this applicable to all claims, which is reflected in the attached revised version. * (WAFIC Feedback) Fishing Gear Loss or Damage – Is the intention to make fishers lodge insurance claim before coming to EOG? If the loss was a direct result of the survey, why can't EOG cover that. Some fishers many have additional costs associated with making an insurance claim, so they would be left out of pocket. (EOG Response) Part of our concern is ensuring the Compensation Protocol and insurance coverage work together and do not conflict. Our intention is to ensure that there is clarity for the Commercial Fishers in regards to coverage and to avoid the likelihood of problems with insurance coverage due to the potential for overlapping reimbursement. We have made a minor revision in the attached revised version to hopefully clarify this point. * (WAFIC Feedback) 3 month claim period for fishing gear loss – can this be extended to up to 6 months to allow for changes in fishing patterns. (EOG Response) Further to this request, we have adjusted the claim period from 3 months to 6 months, which is reflected in the attached revised version.

		27/10/2021 0:00	27/10/2021 0:00	Outbound Email		(AFANT-03)	EOG followed up with AFANT and resent the information flyer. EOG requested that feedback / comment via reply email at their earliest convenience.	No concerns raised.	N/A
		5/12/2022 0:00	5/12/2022 0:00	Outbound Email		(AFANT-04 Xen)	Email sent from EOG to AFANT providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
		14/02/2023 18:28	14/02/2023 18:28	Outbound Email		(AFANT-05 Xen)	Following in person meeting, email sent to AFANT confirming request for suggestions on how to reach to more amateur and recreational fishers or groups to provide information on the Beehive Project in The Joseph Bonaparte Gulf.	N/A	Thank you for the chat today at the AFANT office. Please find attached a copy of the Public Notice that EOG Resources Australia Block WA-488 Pty Ltd (EOG) would like to share with stakeholders on their Beehive Project in the Joseph Bonaparte Gulf. As discussed, I dropped into AFANT to seek suggestions on how EOG could get the information in the Public Notice regarding the Beehive Project out to amateur and recreational fishers or groups in the NT that may be a stakeholder. We have done Public Notices in NT Newspapers and placed a copy of the Public Notice on non-social media Community Noticeboards around Darwin however any other suggestions on how to reach more amateur and recreational fishers or groups would be greatly appreciated. We did also approach the NT Department of Planning, Infrastructure and Logistics about placing a Public Notice at boat ramps for which they have responsibility for however our request was not allowed. The intent of the Public Notice is to search for information about what environmental values people may have in the EOG project area for the Geotechnical and Drilling activities and requests that they share their assessment of how their functions, activities, interests, or values in or around the project area may be affected by our proposed activities and the predicted environmental impacts and risks. On receipt of their assessment, we will assess the merits of any objections or claims they make and provide a response to them which will outline our assessment of merit and any actions taken to mitigate the degree to which they may be affected. Once again, thankyou for your time and we would appreciate any suggestions AFANT may have.
		15/02/2023 10:44	15/02/2023 10:44	Inbound Email		(AFANT-06 Xen)	Email from AFANT requesting consultation period closing date.	Request EOG to provide the consultation period closing date.	Refer to email sent to AFANT dated 16/2/23.
		16/02/2023 8:06	16/02/2023 8:06	Outbound Email		(AFANT-07 Xen)	Email sent to AFANT advising would need to clarify consultation closing date.	EOG confirming the revised closing date.	Refer to email sent to AFANT dated 17/2/23.
		17/02/2023 7:54	17/02/2023 7:54	Outbound Email		(AFANT-08 Xen)	Email sent to AFANT confirming consultation closing period.	EOG stating the consultation period closing date is 14 April 2023.	No concerns raised.
		3/03/2023 8:48	3/03/2023 8:48	Outbound Email		(AFANT-09 Xen)	Follow up of previous email 14/2/23.	N/A	I am just following up to see if AFANT has any suggestions to assist EOG in getting the information in the Public Notice out to amateur and recreational fishers and groups in the NT?

		10/08/2023 4:06	10/08/2023 4:06	Outbound Email		[GN2-02 Xen]	Communications between licensed fisher, and consulting with Tuna Australia as a Relevant Person due to their role as a peak industry body.	Received notification regarding consultation process around EPs to be submitted to NOPSEMA in regard to the Bee Hive Project. Welcome the opportunity for the fishing industry to consult directly with yourselves. The correct and only industry empowered body to consult directly on behalf of the members of the Western Tuna and Bill Fish fishery is Tuna Australia. Best outcome is to be working with Tuna Australia as the most efficient way for our industry to engage in any consultative process. Request to contact Tuna Australia.	Thank you for your response. In addition to reaching out to licensed fishers like yourself directly, we are already consulting with Tuna Australia as a Relevant Person due to their role as a peak industry body. Relay any questions, comments, or concerns about the Beehive project directly to us or via Tuna Australia as you see fit.
