|                          |                        |       |         |   | south-west of the AMP, which are included in the WA Rowley Shoals Marine Park.   |   |
| Roebuck Marine Park      | -                      | ✓     | -       | VI  | Roebuck Marine Park covers an area of 304 km <sup>2</sup> , located ~12 km offshore of Broome, and is adjacent to the WA Yawuru Nagulagun/Roebuck Bay Marine Park.   | Roebuck Marine Park is significant because it contains habitats, species and ecological communities associated with the Northwest Shelf Province and consists entirely of shallow continental shelf habitat. The AMP supports a range of species including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include breeding and resting habitat for seabirds, foraging and internesting habitat for marine turtles, a migratory pathway for humpback whales and foraging habitat for dugong.  |
| Kimberley Marine Park    | ✓                      | ✓     | -       | II, IV, VI  | Kimberley Marine Park covers an area of 74,469 km <sup>2</sup> , located ~100 km north of Broome, extending from the WA State waters boundary north from the Lacepede Islands to the Holothuria Banks offshore from Cape Bougainville. | Kimberley Marine Park is significant because it includes habitats, species and ecological communities associated with three bioregions: <ul style="list-style-type: none"> <li>• Northwest Shelf Province</li> <li>• Northwest Shelf Transition</li> <li>• Timor Province.</li> </ul> It includes two KEFs: Ancient coastline at 125 m depth contour; and Continental slope demersal fish communities. The AMP supports a range of species, including protected species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include breeding and foraging habitat for seabirds, internesting and nesting habitat for marine turtles, breeding, calving and foraging habitat for inshore dolphins, calving, migratory pathway and nursing habitat for humpback whales, migratory pathway for pygmy blue whales, foraging habitat for dugong and foraging habitat for whale sharks. |
| Ashmore Reef Marine Park | ✓                      | -     | -       | Ia, IV  | Ashmore Reef Marine Park covers an area of 583 km <sup>2</sup> , located ~630 km north of  | Ashmore Reef Marine Park is significant because it includes habitats, species and ecological communities associated with the Timor Province. It includes two KEFs:  |

|  |                        |       |         |   | km <sup>2</sup> between Camden Sound and North Kimberley Marine Parks.   | ecological hotspot and supports more than 1% of the world's population of brown boobies, with up to 2000 breeding pairs. About 500 pairs of crested terns also nest on the island (DPAW, 2016b).   |
| Lalang-garram / Camden Sound Marine Park   | ✓                      | -     | -       | Sanctuary, Special Purpose and General Use Zones    | Lalang-garram / Camden Sound Marine Park covers 7050 km <sup>2</sup> located about 150 km north of Derby.  | The Lalang-garram / Camden Sound Marine Park is the most important humpback whale nursery in the Southern Hemisphere. It also features the spectacular coastal Montgomery Reef.<br>The marine park is home to six species of threatened marine turtle. Australian snubfin and Indo-Pacific humpback dolphins, dugongs, saltwater crocodiles, and several species of sawfish (DPAW, 2013).  |
| Rowley Shoals Marine Park                  | -                      | ✓     | -       | Sanctuary, Recreation and General Use Zones         | The Rowley Shoals comprise of three reef systems, Mermaid Reef, Clerke Reef and Imperieuse Reef, all 30-40 km apart. These reef systems are located ~300 km west north-west of Broome. | The three coral atolls of the Rowley Shoals Marine Park comprise of shallow lagoons inhabited by diverse corals and abundant marine life, each covering around 80 km <sup>2</sup> at the edge of Australia's continental shelf.<br>Further offshore, the seafloor slopes away to the abyssal plain, some 6000 m below. Undersea canyons slice the slope; these features are commonly associated with diverse communities of deep-water corals and sponges and create localised upwellings that aggregate pelagic species like tunas and billfish (DEC, 2007a). |
| Yawuru Nagulagun / Roebuck Bay Marine Park | -                      | ✓     | -       | Special Purpose Zone                                | Yawuru Nagulagun / Roebuck Bay Marine Park is a series of intertidal flats lying on the coast to the south-east of Broome.   | Roebuck Bay is an internationally significant wetland and one of the most important feeding grounds for migratory shorebirds in Australia. Australian snubfin and Australian humpback dolphins frequent the waters and humpback whales pass through on their annual migration. Flatback turtles nest on the shores and are found in the bay's waters with other sea turtle species. Seagrass and macroalgae communities provide food for protected species such as the dugong and flatback turtle (DPAW, 2016c).   |
| Eighty Mile Beach Marine Park              | -                      | ✓     | -       | Sanctuary, Recreation, Special                      | Eighty Mile Beach Marine Park covers ~2000 km <sup>2</sup> stretching across 220km of  | Eighty Mile Beach Marine Park is one of the world's most important feeding grounds for small wading birds that migrate to the area each summer, travelling from countries  |

|  |                        |       |         | Purpose and General Use Zones                                | coastline between Port Hedland and Broome.   | thousands of kilometres away. The marine park is a major nesting area for flatback turtles which are found only in northern Australia. Sawfishes, dugongs, dolphins and millions of invertebrates inhabit the sand and mud flats, seagrass meadows, coral reefs and mangroves (DPAW, 2014).  |
| Montebello Islands Marine Park, Barrow Island Marine Park and Barrow Island Marine Management Area (jointly managed) | -                      | ✓     | -       | Sanctuary, Recreation, General Use and Special Purpose Zones | The Montebello Islands Marine Park, Barrow Island Marine Park and Barrow Island Marine Management Area are located off the north-west coast of WA, ~1600 km north of Perth, and cover areas of ~583 km <sup>2</sup> , 42 km <sup>2</sup> and 1,147 km <sup>2</sup> , respectively. | The Montebello/Barrow islands marine conservation reserves have very complex seabed and island topography, resulting in a myriad of different habitats subtidal coral reefs, macroalgal and seagrass communities, subtidal soft-bottom communities, rocky shores and intertidal reef platforms, which support a rich diversity of invertebrates and finfish.<br>The reserves are important breeding areas for several species of marine turtles and seabirds, which use the undisturbed sandy beaches for nesting. Humpback whales migrate through the reserves and dugongs occur in the shallow warm waters (DEC, 2007b).   |
| Ningaloo Marine Park and Muiron Islands Marine Management Area (jointly managed)                                     | -                      | -     | ✓       | Sanctuary, Recreation, General Use and Special Purpose Zones | The Ningaloo Marine Park and Muiron Islands Marine Management Area are located off the North-west Cape of WA, ~1200 km north of Perth, and cover areas of ~2633 km <sup>2</sup> and 286 km <sup>2</sup> , respectively.  | Ningaloo Reef is the largest fringing coral reef in Australia. Temperate and tropical currents converge in the Ningaloo region resulting in highly diverse marine life including spectacular coral reefs, abundant fishes and species with special conservation significance such as turtles, whale sharks, dugongs, whales and dolphins. The region has diverse marine communities including mangroves, algae and filter-feeding communities and has high water quality. These values contribute to the Ningaloo Marine Park being regarded as the State's premier marine conservation icon. The Muiron Islands Marine Management Area is also important, containing a very diverse marine environment, with coral reefs, filter-feeding communities and macroalgal beds. In addition, the Islands are important seabird and green turtle nesting areas. (CALM, 2005a). |

| Shark Bay Marine Park and Hamelin Pool Marine Nature Reserve (jointly managed) | -                      | -     | ✓       | Sanctuary, Recreation, General Use and Special Purpose Zones | The Shark Bay Marine Park and Hamelin Pool Marine Nature Reserves are located 400 km north of Geraldton, covering areas of ~7487 km <sup>2</sup> and 1270 km <sup>2</sup> , respectively. | Seagrass covers over 4000 km <sup>2</sup> of the Shark Bay Marine Park, with 12 different species making it one of the most diverse seagrass assemblages in the world. Dugongs regularly use this habitat, with the bay containing one of the largest dugong populations in the world. Humpback whales also use the bay as a staging post in their migration along the coast. Green and loggerhead turtles occur in the bay with Dirk Hartog Island providing the most important nesting site for loggerheads in Western Australia. Hamelin Pool contains the most diverse and abundant examples of stromatolites found in the world. These are living representatives of stromatolites that existed some 3500 million years ago (CALM, 1996). |

\*Conservation objectives for IUCN categories include:

Ia: Strict Nature Reserve

Ib: Wilderness Area

II: national Park

III: Natural Monument or Feature

IV: Habitat/Species Management Area

V: Protected Landscape

VI: Protected area with sustainable use of natural resources – allow human use but prohibits large scale development.

IUCN categories for the marine park are provided and, in brackets, the IUCN categories for specific zones within each Marine Park as assigned under the North-west Marine Parks Network Management Plan 2018 (DNP, 2018a)

| <b>Wetlands of International Importance (Ramsar)</b> |   |   |  |
| Beecher Point Wetlands                               | Ramsar  | Beecher Point Wetlands is a system of about sixty small wetlands located near Rockingham in south-west WA, covering an area of around 7 km <sup>2</sup> .<br>The site was listed under the Ramsar Convention in 2001.                                     | The wetlands support sedgeland, herbland, grassland, open-shrubland and low open-forest. The sedgelands that occur within the linear wetland depressions of the Ramsar site are a nationally listed TEC.<br>At least four species of amphibians and twenty-one (21) species of reptiles have been recorded on the site. The site also supports the southern brown bandicoot.<br>The site meets criteria 1 and 2 of the Ramsar Convention.          |
| Forrestdale and Thomsons Lakes                       | Ramsar  | Forrestdale Lake is located in the City of Armadale and Thomsons Lake is located in the City of Cockburn both of which lie within the southern Perth metropolitan area, in Western Australia.<br>The site was listed under the Ramsar Convention in 1990. | The lakes are surrounded by medium density urban development and some agricultural land. The sediments of Thomsons Lake are between 30,000 and 40,000 years old, which are the oldest lake sediments discovered in WA to date.<br>These lakes are the best remaining examples of brackish, seasonal lakes with extensive fringing sedgeland, typical of the Swan Coastal Plain.<br>The site meets criteria 1, 3, 5 and 6 of the Ramsar Convention. |
| Peel-Yalgorup System                                 | Ramsar  | Peel-Yalgorup System, located adjacent to the City of Mandurah in   | Peel-Yalgorup System Ramsar site is the most important area for waterbirds in south-western Australia. It supports a large number of waterbirds, and a   |

|---|---|--|--|
|   |   | WA, is a large and diverse system of shallow estuaries, coastal saline lakes and freshwater marshes. The site was listed under the Ramsar Convention in 1990.  | wide variety of waterbird species. It also supports a wide variety of invertebrates, and estuarine and marine fish. The site meets criteria 1, 3, 5 and 6 of the Ramsar Convention.  |
| Vasse-wonnerup system                               | Ramsar  | Vasse-Wonnerup System Ramsar wetland is situated in the Perth Basin, south-western WA. The site was listed under the Ramsar Convention in 1990.  | Vasse-Wonnerup System is an extensive, shallow, nutrient-enriched wetland system of highly varied salinities. Large areas of the wetland dry out in late summer. Vasse-Wonnerup System supports tens of thousands of resident and migrant waterbirds of a wide variety of species. More than 80 species of waterbird have been recorded in the System such as red-necked avocets and black-winged stilts, wood sandpiper, sharp-tailed sandpiper, long-toed stint, curlew sandpiper and common greenshank. Thirteen waterbird species are also known to breed at the Ramsar site, including the largest regular breeding colony of black swans in south-western Australia. The site meets criteria 5 and 6 of the Ramsar Convention. |
| <b>Wetlands of National Importance (DAWE, 2019)</b> |   |  |  |
| Rottneest Island Lakes                              |   | The Rottneest Island Lakes site is the cluster of 18 lakes and swamps on the north-east part of Rottneest Island.  | An outstanding example of a series of lakes/swamps of varied depth and salinity located on an offshore island; the only island among 200 plus in WA exceeding 10 ha in area, that has a salt-lake complex; the only known example of seasonally meromictic lakes in Australia. The area meets criteria 1, 2, 3 and 6 for inclusion on the Directory of Important Wetlands in Australia.  |
| <b>Australian Marine Parks (DNP, 2018b)</b>         |   |  |  |
| Abrolhos Marine Park                                | II, IV, VI  | The Abrolhos Marine Park is located within both the NWMR and SWMR. Refer <b>Table 10-1</b> for description and conservation values.  |  |
| Bremer Marine Park                                  | II, VI  | Bremer Marine Park covers an area of 4472 km <sup>2</sup> and is located approximately half-way between Albany and Esperance, offshore from the Fitzgerald River National Park, extending from the WA State waters boundary. | Bremer Marine Park is significant because it contains habitats, species and ecological communities associated with two bioregions: <ul style="list-style-type: none"> <li>• Southern Province</li> <li>• South-west Shelf Province.</li> </ul> It includes two KEFs: Albany Canyon group and adjacent shelf break; and Ancient coastline at 90-120 m depth.  |

| <b>State Marine Parks and Reserves</b> |   |  |   |
| Jurien Bay Marine Park                 | Sanctuary, Special Purpose and General Use Zones.   | The Jurien Bay Marine Park is located on the central west coast of WA ~200 km north of Perth and covers an area of 824 km <sup>2</sup> .   | An extensive limestone reef system parallel to the shore has created a huge shallow lagoon that provides perfect habitat for Australian sea lions, dolphins and a myriad of juvenile fish. Extensive seagrass meadows inside the reef shelter many marine animals such as western rock lobsters, octopus and cuttlefish that make up the diet of young sea lions. The marine park also surrounds dozens of ecologically important islands that contain rare and endangered animals found nowhere else in the world (CALM, 2005b).   |
| Marmion Marine Park                    | Sanctuary, Recreation and Special Use Zones.        | The Marmion Marine Park lies within State waters between Trigg Island and Burns Beach and encompasses a coastal area of ~95 km <sup>2</sup> . Marmion                                | The marine park has a number of sanctuary zones including Little Island, The Lumps and the Boyinaboat Reef protecting a variety of habitats from limestone reefs, seagrass beds and clear shallow lagoons that support a diversity of marine life. In addition, to a general use zone and the Waterman Recreation Area. The marine park contains important habitat for the endemic Australian   |

|---|---|--|--|
|   |   | Marine Park was the State's first marine park, declared in 1987.   | sea lion, an array of seabird species migratory whales are regular visitors (CALM, 1992; DPAW, 2016d).   |
| Swan Estuary Marine Park                | Special Purpose and Nature Reserve Zones.           | Three biologically important areas of Perth's Swan River make up the Swan Estuary Marine Park, including Alfred Cove, Pelican Point and Crawley. These three sites cover a total area of 3.4 km <sup>2</sup> . | The sand flats, mud flats and beaches at the three locations of the Swan Estuary Marine Park provide the only remaining significant feeding and resting areas in the Swan Estuary, for trans-equatorial migratory wading and waterbirds. The Park and adjacent reserves also provide habitat for a diverse assemblage of aquatic and terrestrial flora and fauna (CALM, 1999).   |
| Shoalwater Islands Marine Park          | Sanctuary, Special Purpose and General Use Zones.   | The Shoalwater Islands Marine Park is located adjacent to Rockingham on the south-west coast of WA, ~50 km south of Perth and covers an area of ~66 km <sup>2</sup> .  | The Shoalwater Islands Marine Park consists of a complex seabed and coastal topography consisting of islands, limestone ridges and reef platforms, protected inshore areas and deeper basins, sandbars and beaches, and is home to five species of cetacean and 14 species of sea and shore bird. The waters of the marine park are also used to access feeding grounds for the little penguin ( <i>Eudyptula minor</i> ) colony on Penguin Island, which is close to the northernmost limit of the species' range and is the largest known breeding colony in Western Australia (DEC, 2007c). |
| Ngari Capes Marine Park                 | Sanctuary, Special Purpose and Recreation Zones.    | The Ngari Capes Marine Park is located off the south-west coast of WA, ~250 km south of Perth, covering ~1238 km <sup>2</sup> .  | The Ngari Capes Marine Park consists of a complex arrangement of sandy bays, high energy limestone and granite reefs bordered by headlands and cliffs and two weathered capes. Coral communities consist of both tropical and temperate species. Cetaceans and pinnipeds are resident in and/or transient through the marine park as well as a diverse range of seabirds and shorebirds (DEC, 2013).   |
| Walpole and Nornalup Inlets Marine Park | Recreation Zone.                                    | The Walpole and Nornalup Inlets Marine Park is located adjacent to the towns of Walpole and Nornalup on the south coast of WA, ~120 km west of Albany, and covers ~14 km <sup>2</sup> .                        | The Walpole and Nornalup Inlets Marine Park consists of a geologically complex lagoonal estuarine system comprising three significant rivers and two connected inlets that are permanently open to the ocean. Approximately 40 marine and estuarine finfish species commonly inhabit the inlet system, as well as a variety of shark and ray species and numerous seabirds and shorebirds. The sandy beaches and shoreline vegetation of the inlet system are of high ecological and social importance to the marine park (DEC, 2009).   |

## 10.11 Summary of Protected Areas within the NMR

Table 10-3 Protected Areas within the NMR

| Protected Area   | IUCN Protected Area Category* or Relevant Park Zone | Description   | Conservation Values   |
|--|---|---|---|
| <b>World Heritage Properties</b>   |   |   |   |
| Kakadu National Park   |   | Kakadu National Park is a living landscape with exceptional natural and cultural values. It is the largest National Park in Australia and preserves the greatest variety of ecosystems on the Australian continent including extensive areas of floodplains, mangroves, tidal mudflats, coastal areas and monsoon forests. The park was inscribed the World Heritage list in three stages over 11 years. It is located in tropical north Australia covering a total area of 19,804 square kilometres. | The conservation values reflect the WHA Criterion: (i), (vi), (vii) and (ix): Natural features relate to Criterion (vii) – the remarkable contrast between the internationally recognised Ramsar-listed wetlands and the spectacular rocky escarpment and its outliers and Criterion (ix) – four major river systems of tropical Australia and floodplains that are dynamic environments, shaped by changing sea levels and big floods every wet season. These floodplains illustrate the ecological and geomorphological effects that have accompanied Holocene climate change and sea level rise. Kakadu National Park contains important and significant habitats supporting a diverse range of flora and fauna. |
| <b>National Heritage Places - Natural</b>  |   |   |   |
| Kakadu National Park   |   | Refer to World Heritage property description above.   | Refer to World Heritage property conservation values above  |
| <b>Commonwealth Heritage Places - Natural</b>  |   |   |   |
| N/A  |   |   |   |
| <b>Wetlands of International Importance (Ramsar)</b>   |   |   |   |
| Kakadu National Park   |   | Australian Ramsar site number 2. The stage 1 and 2 Ramsar sites, established in 1980, 1985 and 1989, respectfully were combined into a single Ramsar site in 2010.  | The Kakadu National Park Ramsar site straddles the western edge of the Arnhem Land Plateau encompassing a range of landforms and extensive floodplains. It is a mosaic of contiguous wetlands comprising the catchments of two large river systems, the East and South Alligator rivers and encompasses extensive tidal mudflat areas. It is an internationally important site for migratory shorebirds as part of the EAAF.  |

| Protected Area                                      | IUCN Protected Area Category* or Relevant Park Zone | Description  | Conservation Values   |
|---|---|--|---|
| Cobourg Peninsula                                   |   | Australian Ramsar site number 1 established in 1974. This Ramsar site includes freshwater and extensive intertidal areas but excludes subtidal areas. It is in a remote location and there has been minimal human impact on the site.                        | The wetlands encompassed in the Ramsar site are some of the better protected and near-natural wetlands in the bioregion and there is a diverse array of wetland in a confined area. The site supports important turtle nesting habitat and habitat for coastal dolphin species and is an internationally significant migratory shorebird habitat as part of the EAAF and an important location for seabird breeding colonies.   |
| <b>Wetlands of National Importance (DAWE, 2019)</b> |   |  |   |
| Southern Gulf Aggregation                           |   | The site is a complex continuous wetland aggregation in the Gulf of Carpentaria, covering an area of ~5460 km <sup>2</sup> located 58 km east of Burketown, Queensland.  | The Southern Gulf Aggregation is the largest continuous estuarine wetland aggregation of its type in northern Australia. It is one of the three most important areas for shorebirds in Australia.<br>The area meets criteria 1, 2, 3, 4, 5 and 6 for inclusion on the Directory of Important Wetlands in Australia.   |
| <b>Australian Marine Parks (DNP, 2018c)</b>         |   |  |   |
| Arafura Marine Park                                 | VI  | Arafura Marine Park covers an area of 22,924 km <sup>2</sup> is located ~256 km north-east of Darwin and 8 km offshore of Croker Island, NT. It extends from NT waters to the limit of Australia's EEZ.  | The AMP is significant because it contains habitats, species and ecological communities associated with two bioregions: <ul style="list-style-type: none"> <li>•Northern Shelf Province</li> <li>•Timor Transition.</li> </ul> It includes one KEF: Tributary canyons of the Arafura Depression.<br>The AMP supports a range of species, including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include interesting habitat for marine turtles and important foraging and breeding habitat for seabirds. |
| Arnhem Marine Park                                  | VI  | Arnhem Marine Park covers an area of 7125 km <sup>2</sup> and is located ~100 km south-east of Croker Island and 60 km south-east of the Arafura Marine Park. It extends from NT waters surrounding the Goulburn Islands, to the waters north of Maningrida. | Arnhem Marine Park is significant because it contains habitats, species and ecological communities associated with the Northern Shelf Province bioregion. The AMP supports a range of species, including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include foraging habitat and a migratory pathway for marine turtles and seabirds.  |
| Gulf of Carpentaria Marine Park                     | II, VI  | Gulf of Carpentaria Marine Park covers an area of 23,771 km <sup>2</sup> and is located ~90 km north-west of Karumba, Queensland and is adjacent to the Wellesley Islands in   | Gulf of Carpentaria Marine Park is significant because it contains habitats, species and ecological communities associated with the Northern Shelf Province bioregion.  |

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

| Protected Area                    | IUCN Protected Area Category* or Relevant Park Zone | Description  | Conservation Values   |
|-----------------------------------|---|--|---|
|                                   |   | the south of the Gulf of Carpentaria basin.  | It includes four KEFs: Gulf of Carpentaria basin; Gulf of Carpentaria coastal zone; Plateaux and saddle north-west of the Wellesley Islands; and Submerged coral reefs of the Gulf of Carpentaria.<br>The AMP supports a range of species, including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include breeding and foraging areas for seabirds and interesting and foraging areas for turtles. |
| Joseph Bonaparte Gulf Marine Park | VI  | The Joseph Bonaparte Gulf Marine Park is located within both the NWMR and NMR.<br>Refer <b>Table 10-1</b> for description and conservation values.   |   |
| Limmen Marine Park                | IV  | Limmen Marine Park covers an area of 1399 km <sup>2</sup> and is located ~315 km south-west of Nhulunbuy, NT, in the south-west of the Gulf of Carpentaria. It extends from NT waters, between the Sir Edward Pellew Group of Islands and Maria Island in the Limmen Bight, adjacent to the NT Limmen Bight Marine Park. | Limmen Marine Park is significant because it contains habitats, species and ecological communities associated with the Northern Shelf bioregion.<br>It includes one KEF: Gulf of Carpentaria coastal zone.<br>The AMP supports a range of species, including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include interesting and foraging habitat for marine turtles.                             |
| Oceanic Shoals Marine Park        | II, IV, VI  | The Oceanic Shoals Marine Park is located within both the NWMR and NMR.<br>Refer <b>Table 10-1</b> for description and conservation values.  |   |
| Wessel Marine Park                | IV, VI  | Wessel Marine Park covers an area of 5908 km <sup>2</sup> and is located ~22 km east of Nhulunbuy, NT. It extends from NT waters adjacent to the tip of the Wessel Islands to NT waters adjacent to Cape Arnhem.   | Wessel Marine Park is significant because it contains habitats, species and ecological communities associated with the Northern Shelf bioregion.<br>It includes one KEF: Gulf of Carpentaria basin.<br>The AMP supports a range of species, including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include breeding habitat for seabirds and interesting and foraging habitat for marine turtles.  |
| West Cape York Marine Park        | II, IV, VI  | West Cape York Marine Park covers an area of 16,012 km <sup>2</sup> and is located adjacent to the northern end  | West Cape York Marine Park is significant because it contains species and ecological communities associated with two bioregions:<br>• Northeast Shelf Transition  |

| Protected Area                             | IUCN Protected Area Category* or Relevant Park Zone | Description  | Conservation Values   |
|--|---|--|---|
|  |   | of Cape York Peninsula ~25 km south-west of Thursday Island and 40 km north-west of Weipa, Queensland.   | <ul style="list-style-type: none"> <li>Northern Shelf Province.</li> </ul> It includes two KEFs: Gulf of Carpentaria basin; and Gulf of Carpentaria coastal zone.<br>The AMP supports a range of species, including species listed as threatened, migratory, marine or cetacean under the EPBC Act. BIAs within the AMP include breeding and foraging habitat for seabirds, internesting and foraging habitat for marine turtles and dugong, and foraging, breeding and calving habitat for dolphins.   |
| <b>Territory Marine Parks and Reserves</b> |   |  |   |
| Cobourg Marine Park                        | II, IV, VI  | Cobourg Marine Park covers an area of 2,290 km <sup>2</sup> and is located in the waters surrounding the Cobourg Peninsula ~220 km north-east of Darwin. The Marine Park is part of the larger Garig Gunak Barlu National Park. Garig Gunak Barlu National Park includes both the Marine Park and the Cobourg Sanctuary. | Cobourg Marine Park is located in the Cobourg and Van Diemen Gulf marine bioregions with the northern portion of the Park covered by the Cobourg marine bioregion and the southern portion covered by the Van Diemen Gulf marine bioregion.<br>The Marine Park is characterised by a number of deeply incised bays and estuaries on its northern shores. These bays are ancient river valleys that were drowned during periods of sea level rise and provide a varied environment and habitat that is quite distinct from the open water areas of the Park. The areas of the Park that have been studied and where extensive collections have been made indicates that the Park supports rich and diverse marine life including live coral reefs, seagrass, diverse reef and pelagic fish populations, marine turtles and dugong. |

\*Conservation objectives for IUCN categories include:

Ia: Strict Nature Reserve

Ib: Wilderness Area

II: National Park

III: Natural Monument or Feature

IV: Habitat/Species Management Area

V: Protected Landscape

VI: Protected area with sustainable use of natural resources – allow human use but prohibits large scale development.

IUCN categories for the marine park are provided and, in brackets, the IUCN categories for specific zones within each Marine Park as assigned under the North Marine Parks Network Management Plan 2018 (DNP, 2018c)

## 11. SOCIO-ECONOMIC AND CULTURAL ENVIRONMENT

This section summarises the information relating to the socio-economic and cultural environment of the regions offshore Western Australia, with a focus on the NWMR and to a lesser extent the SWMR and NWR.

The cultural environment includes Indigenous and European heritage values, including underwater values such as historic shipwrecks. Socio-economic values include commercial and traditional fishing, tourism and recreation, shipping, oil and gas activities and defence activities.

### 11.1 Cultural Heritage

#### 11.1.1 Indigenous Sites of Significance

Murujuga (the Burrup Peninsula) has a very high density of significant Indigenous heritage sites and places with tangible and intangible heritage values. The area has one of the largest, densest, and most diverse collections of rock art in the world. It is estimated that the peninsula and surrounding islands contain over a million petroglyphs (rock engravings) covering a broad range of styles and subjects. The landscape also contains quarries, middens, fish traps, rock shelters, ceremonial sites, artefact scatters, grinding patches and stone arrangements that evidence tens of thousands of years of human occupation. These places are linked to Aboriginal cosmology, Dreaming stories and songs through the stories, knowledge and customs that are still held by traditional custodians.

In 2007 the Dampier Archipelago (including the Burrup Peninsula) was included on the National Heritage List due to outstanding heritage values relating to Australia's cultural history contained in the large number, density, diversity, distribution and fine execution of rock art. Within the National Heritage Place, the Murujuga National Park covers 4913 ha and is co-managed by the Murujuga Aboriginal Corporation and the Department of Biodiversity, Conservation and Attractions. The Murujuga Cultural Landscape was also added to Australia's Tentative World Heritage List in 2020, with full World Heritage Listing anticipated in 2024.

Woodside also recognises the potential for heritage to survive in submerged landscapes. Sea-level rises since the last ice age mean that areas now under the sea were once exposed, that many of today's islands would have been connected to the mainland, and that Aboriginal people are highly likely to have inhabited these places. Woodside works with traditional custodians, academics and heritage professionals to identify tangible and intangible heritage values in the submerged landscape to avoid disturbing heritage where possible and to minimise impacts where heritage cannot be avoided.

It is an offence to excavate, destroy, damage, conceal or alter Indigenous heritage onshore or in state waters under section 17 of the *Aboriginal Heritage Act 1972 (WA) (AHA)* without ministerial authorisation. Where there is a risk of injury or desecration to a significant Aboriginal area, even where permitted under the AHA, any Aboriginal person may apply to the federal Environment Minister for a declaration under sections 9 or 10 of the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984 (Cth)* for the protection and preservation of that area.

The Department of Planning, Lands and Heritage maintains a register of registered sites and heritage places including middens, burial, ceremonial [sites], artefacts, rock shelters, mythological [sites] and engraving sites. There are over 1600 registered sites on Murujuga and the Dampier Archipelago with around 1100 other heritage places. This register is not comprehensive and will be complemented by heritage surveys where necessary. Protection of National and World Heritage values is also legislated through various provisions of the *Environment Protection and Biodiversity Conservation Act 1999 (Cth)*. Murujuga National Park is managed under the *Conservation and Land Management Act 1984 (WA)*.

### 11.1.2 European Sites of Significance

European sites of significance and heritage value are found along adjacent foreshores of the SWMR, NWMR and NWR. Heritage values are protected in Western Australia under the *Heritage Act 2018*.

### 11.1.3 Underwater Cultural Heritage

Places of historic cultural significance are protected under Commonwealth, State and local regimes. Places inscribed on the National or World Heritage list are protected through various provisions of the *Environment Protection and Biodiversity Conservation Act 1999* (Cth). Historic places may also be protected under the *Heritage Act 2018* (WA); under section 129 the prohibited alteration, demolition, damage, despoilment or removal of objects from a registered place may result in a fine of A\$1 million. Protection of heritage by local government typically emanates from local planning schemes produced under Part 5 of the *Planning and Development Act 2005* (WA).

The remains of vessels and aircraft in Commonwealth waters, along with any associated article, are automatically protected under the *Underwater Cultural Heritage Act 2018* (Cth) after 75 years. Remains and relics of any ship lost, wrecked or abandoned in Western Australian waters before 1900 are protected by the *Maritime Archaeology Act 1973* (WA).

The Australian National Shipwreck Database and the WA Maritime Museum Shipwreck Database list these protected wrecks.

### 11.1.4 National and Commonwealth Listed Heritage Places

Australia's National Heritage Sites are those of outstanding natural, historic and/or Indigenous significance to Australia. National Heritage places classed as natural are discussed in **Section 10.3**. Historic and/or Indigenous National Heritage Listed Places of the NWMR include:

- Dampier Archipelago (including Burrup Peninsula)
- Dirk Hartog Landing Site/Cape Inscription
- HMAS Sydney II and the HSK Kormoran Shipwreck Sites
- Batavia Shipwreck Site and Survivor Camps Area 1629 – Houtman Abrolhos

Commonwealth Heritage Places are a collection of sites recognised for their Indigenous, historical and/or natural values, which are owned or controlled by the Australian Government. A number of these sites are owned or controlled by the Department of Defence, as well as Government agencies relating to maritime safety, customs and communication. Commonwealth Heritage places classed as natural are discussed in **Section 10.3**. Listed Heritage Places in the NWMR include:

- Mermaid Reef – Rowley Shoals (refer **Section 10.3**)
- Ashmore Reef National Nature Reserve (refer **Section 10.3**)
- Scott Reef and Surrounds – Commonwealth Area (refer **Section 10.3**)
- Ningaloo Marine Area (refer **Section 10.3**)

World Heritage Properties are those sites that hold universal value which transcends any value they may be held by any one nation. These sites and their qualities are detailed in the Convention concerning the Protection of the World Cultural and Natural Heritage (the World Heritage Convention), to which Australia is a founding member. The Protected Matters Search Report (**Appendix A**) lists two natural World Heritage Properties in the NWMR (refer **Section 10.2**). There are no cultural heritage listings located within the NWMR.

Summary tables of heritage places for NWMR, SWMR and NMR are presented in **Table 11-1, Table 11-2** and **Table 11-3**.

## 11.2 Summary of Heritage Places within the NWMR

Table 11-1 Heritage Places (Indigenous and Historic) within the NWMR

| Heritage Places                                       | Woodside Activity Area |       |         | Class      | Description  | Conservation Values  |
|---|------------------------|-------|---------|------------|--|--|
|   | Browse                 | NWS/S | NW Cape |            |  |  |
| <b>National Heritage Properties</b>                   |                        |       |         |            |  |  |
| Dampier Archipelago (including Burrup Peninsula)      | -                      | ✓     | -       | Indigenous | The Dampier Archipelago (including the Burrup Peninsula) contains one of the densest concentrations of rock engravings in Australia with some sites containing thousands or tens of thousands of images. | The rock engravings comprise images of avian, marine and terrestrial fauna, schematised human figures, figures with mixed human and animal characteristics and geometric designs. At a national level it has an exceptionally diverse and dynamic range of schematised human figures some of which are arranged in complex scenes. The fine execution and dynamic nature of the engravings, particularly some of the composite panels, exhibit a degree of creativity that is unusual in Australian rock engravings. |
| Dirk Hartog Landing Site 1616 – Cape Inscription Area | -                      | -     | ✓       | Historic   | Cape Inscription is the site of the oldest known landings of Europeans on the WA coastline.  | The Cape Inscription area displays uncommon aspects of Australia's cultural history because of the cumulative effect its association with these explorers and surveyors had on growing knowledge of the great southern continent in Europe. The association of the site with these early navigators stimulated the development of the European view of the great southern continent at a time when they began to look at the world with a modern scientific outlook.   |

|-------------------------------------|------------|--|--|
| <b>National Heritage Properties</b> |            |  |  |
| Cheetup Rock Shelter                | Indigenous | Cheetup meaning "place of the birds" is the name of a spacious rock shelter located in Cape Le Grand National Park, about 55 km east of Esperance in WA. Aboriginal people associated with the place identify themselves as Nyungar/Noongar, Ngadju (shortened from Ngadjunmaia) or Mirning. | Cheetup rock shelter provides outstanding evidence for the antiquity of processing and use of cycad seeds by Aboriginal people. The seeds of the cycad are extremely toxic and can cause speedy death if eaten fresh without proper preparation to remove the toxins. The presence of <i>Macrozamia riedlei</i> seeds in a pit lined with Xanthorrhoea (grass tree) leaf bases indicates that the Aboriginal people in the Esperance region had the knowledge to remove the toxins of this important source of carbohydrate and protein at least 13,200 years ago. |

| Heritage Places  | Class    | Description   | Conservation Values  |
|--|----------|---|--|
| Batavia Shipwreck Site and Survivor Camps Area 1629 – Houtman Abrolhos | Historic | The Batavia and its associated sites hold an important place in the discovery and delineation of the WA coastline. The wreck of the Batavia, and other Dutch ships like her, convinced the VOC (Dutch East India Company) of the necessity of more accurate charts of the coastline and resulted in the commissioning of Vlamingh's 1696 voyage.  | Because of its relatively undisturbed nature the archaeological investigation of the wreck itself has revealed a range of objects of considerable value as well as to artefact specialists and historians.   |
| HMAS Sydney II and HSK Kormoran Shipwreck Sites                        | Historic | The naval battle fought between the Australian warship HMAS Sydney II and the German commerce raider HSK Kormoran off the WA coast during World War II was a defining event in Australia's cultural history. HMAS Sydney II was Australia's most famous warship of the time and this battle has forever linked the stories of these warships to each other. The loss of HMAS Sydney II along with its entire crew of 645 following the battle with HSK Kormoran, remains as Australia's worst naval disaster. | The shipwreck sites of HMAS Sydney II and HSK Kormoran have outstanding heritage value to the nation because of their importance in a defining event in Australia's cultural history and for their part in development of the process of the defence of Australia.   |
| <b>Commonwealth Heritage Properties</b>                                |          |   |  |
| Cliff Point Historic Sites   | Historic | Cliff Head is a limestone bluff on the east coast of Garden Island. Evidence of occupation has been reported from the beach just north of the head, the immediate hinterland, the ridge above and on the south face of the ridge.   | The Cliff Point Historic Site, individually significant within the area of Garden Island is important as the first site inhabited by Governor Stirling's party in 1829 when founding the colony of WA, and as WA's first official non-convict settlement. The site was occupied in the first instance by Captain Charles Fremantle before the arrival of Captain Stirling. The party occupied the site for two months before a move was made to the Swan River settlement on the mainland. |
| HMAS Sydney II and HSK Kormoran Shipwreck Sites                        | Historic | As above  | As above   |
| J Gun Battery  | Historic | J Battery comprised two 155 mm long range guns, the other similar battery being at Cape Peron on the mainland at the entrance to Cockburn Sound. Located in the dune systems at the north western   | J Gun Battery (1942) is individually significant within the area of Garden Island (Register No. 019544) and is historically important as the first gun battery constructed on Garden Island and as one of two long range gun batteries which played a  |

|                 |       | corner of Garden Island elements of the J Battery complex are now covered in part by sand. | strategic role in the coastal defences of Cockburn Sound and Fremantle following the entry of Japan into the Second World War (1939-45). |

## 11.5 Fisheries - Commercial

### 11.5.1 Commonwealth and State Fisheries

The diverse range of habitats and species offshore WA has allowed for various fisheries to develop and operate throughout the region.

The Australian Fisheries Management Authority (AFMA) manages fisheries on behalf of the Commonwealth Government and is bound by objectives under the Commonwealth *Fisheries Management Act 1991*.

WA State commercial fisheries are managed by the WA Department of Primary Industries and Regional Development (WA DPIRD) under the WA *Fish Resources Management Act 1994* (FRMA), Fisheries Resources Management Regulations 1995, relevant gazetted notices and licence conditions, and applicable Fishery Management Plans.

Commonwealth and State managed fisheries that operate within the NWMR and in areas beyond this region are summarised in the **Table 11-4**.

Table 11-4 Commonwealth and State managed fisheries

| Fishery                                     | Woodside Activity Area |       |         | Description   |   |  |
|---|------------------------|-------|---------|---|---|--|
|   | Browse                 | NWS/S | NW Cape |   |   |  |
| Abrolhos Islands and Mid-West Trawl Fishery |                        |       | ✓       | <b>Management area</b>  | The Abrolhos Islands and Mid-West Trawl Fishery (AIMWTMF) operates around the Abrolhos Islands within the SWMR.   |  |
|   |                        |       |         | <b>Species targeted</b>   | <b>Fishing methods</b>  | <b>Fishing depth</b>   |
|   |                        |       |         | Saucer scallops ( <i>Ylistrum balloti</i> , formerly <i>Amusium balloti</i> ) | Trawl.  | Information not available, however, the species occurs at depth of around 30-60 m and therefore fishing effort would likely be at these depths (Himmelman <i>et al.</i> , 2009). |
|   |                        |       |         | <b>Fishing effort:</b>  | The scallop landings in the AIMWTMF were 31.0 t meat weight (154.8 t whole weight). Between 2011 and 2015, the annual pre-season surveys showed very low recruitment (1-year old), as a result of the 2011 extreme marine heatwave and subsequent poor spawning stock (Kangas <i>et al.</i> , 2020b). The fishery was closed between 2011 and 2016. |  |
|   |                        |       |         | <b>Active licences/vessels:</b>   | Information about licences or vessels is not available but the Department of Primary Industry and Regional Development reported 774 t of catch from this fishery in the 2019 annual report (DPIRD, 2019).   |  |
| Broome Prawn Managed Fishery                | ✓                      |       |         | <b>Management area</b>  | The Broome Prawn Managed Fishery (BPMF) operates off Broome and forms part of the North Coast Prawn Fishery.  |  |
|   |                        |       |         | <b>Species targeted</b>   | <b>Fishing methods</b>  | <b>Fishing depth</b>   |
|   |                        |       |         | Western king prawn ( <i>Penaeus latisulcatus</i> )<br>Coral prawn             | Trawl.  | Trawling is generally in waters between 30 and 60 m deep, however can occur down to 100 m (DOEH, 2004).  |
|   |                        |       |         | <b>Fishing effort:</b>  | BPMF recorded extremely low fishing effort in 2018. Only two vessels undertook trial fishing to investigate whether the catch rates were sufficient for commercial fishing. This resulted in negligible landings of Western king prawn (Kangas <i>et al.</i> , 2020a).  |  |

|   |                        |       |         | <b>Active licences/vessels:</b> Two vessels conducting fishing trial operated in 2018 (Kangas <i>et al.</i> , 2020a).   |   |                            |  |
| Exmouth Gulf Prawn Managed Fishery          |                        |       | ✓       | <b>Management area</b> The estimated employment in the fishery in 2017 was 18 people including skippers and other crew (Kangas <i>et al.</i> , 2018). The fishery occupies a total area of 4000 km <sup>2</sup> , with only half of this area being trawled (Fletcher and Santoro, 2015). |   |                            |  |
|   |                        |       |         | <b>Species targeted</b>   | <b>Fishing methods</b>  | <b>Fishing depth</b>       |  |
|   |                        |       |         | Western king prawn ( <i>Penaeus latisulcatus</i> )<br>Brown tiger prawn ( <i>Penaeus esculentus</i> )<br>Blue endeavour prawn ( <i>Metapenaeus endeavouri</i> )<br>Banana prawn ( <i>Penaeus merguinensis</i> )   | Trawl.  | Information not available. |  |
|   |                        |       |         | <b>Fishing effort:</b>  | The total landings of prawns in 2018 were 880 t (Kangas <i>et al.</i> , 2020a). In the 2016 season, a fishing effort of about 23,000 hours resulted in a catch of 822 t.  |                            |  |
|   |                        |       |         | <b>Active licences/vessels:</b>   | The precise number of vessels is unreported. Eighteen people were said to be employed in this fishery in 2018 (Kangas <i>et al.</i> , 2019); however, in 2013 it was reported that 18 skippers as well as other crew and support staff were employed (WAFIC <sup>7</sup> ). |                            |  |
| Gascoyne Demersal Scalefish Managed Fishery |                        |       | ✓       | <b>Management area</b> The Gascoyne Demersal Scalefish Fishery (GDSF) is located between the southern Ningaloo Coast to south of Shark Bay (23°07.30'S to 26°.30'S) with a closure area at Point Maud to Tantabiddi (21°56.30'S) (WAFIC <sup>8</sup> ).                                   |   |                            |  |
|   |                        |       |         | <b>Species targeted</b>   | <b>Fishing methods</b>  | <b>Fishing depth</b>       |  |

## 11.5.2 Aquaculture

Aquaculture operations in the northwest are typically restricted to inland and shallow coastal waters.

### West Coast Bioregion

Aquaculture activities in the West Coast bioregion, defined by the Department of Primary Industries and Regional Development (DPIRD) (as the government body responsible management of primary industries in WA) are focused on blue mussels and edible oysters (mainly in Cockburn Sound) and marine algae for production of beta-carotene, used as a food additive and as a nutritional supplement. Offshore marine finfish production is also being developed, initially focusing on yellowtail kingfish.

There is also an emerging black pearl industry (from the *Pinctada margaritifera* oyster) in the Abrolhos Islands. As well as expansion in the production of Akoya pearls (small white pearls from *Pinctada fucata martensi*), *Pinctada albina* (small, yellow pearls) and *Pteria penguin*, which are often used to produce half (mabe) pearls in pink and bluish shades.

Aquaculture licences for producing coral and live rock (pieces of old coral reefs colonised by marine life, such as beneficial bacteria, for aquariums) at the Abrolhos Islands have also been issued and other applications are being assessed.

### Gascoyne Coast Bioregion

In the Gascoyne Coast bioregion, aquaculture activities are focused on the blacklip oyster (*Pinctada margaritifera*) and Akoya pearl oyster (*Pinctada imbricata*) (Gaughan and Santoro, 2020). Several hatcheries supply *P. margaritifera* juveniles to the region's developing black pearl farms.

Other aquaculture developments in the Gascoyne Coast bioregion include emerging producers of coral and live rock species for aquariums.

### North Coast Bioregion

Aquaculture activities in the North Coast bioregion is dominated by the production of pearls. A large number of pearl oysters for seeding are obtained from wild stocks and supplemented by hatchery produced oysters, with major hatcheries operating at Broome and around the Dampier Peninsula (Gaughan and Santoro, 2018). Primary spawning of the pearl oyster occurs from mid-October to December. A smaller secondary spawning occurs in February and March (Gaughan and Santoro, 2020).

Other aquaculture developments in the North Coast include emerging producers of coral and live rock species for aquariums as well as barramundi (*Lates calcarifer*) farms and microalgae culturing for Omega-3, biofuels and protein biomass (Gaughan and Santoro, 2020).

## 11.6 Fisheries – Traditional

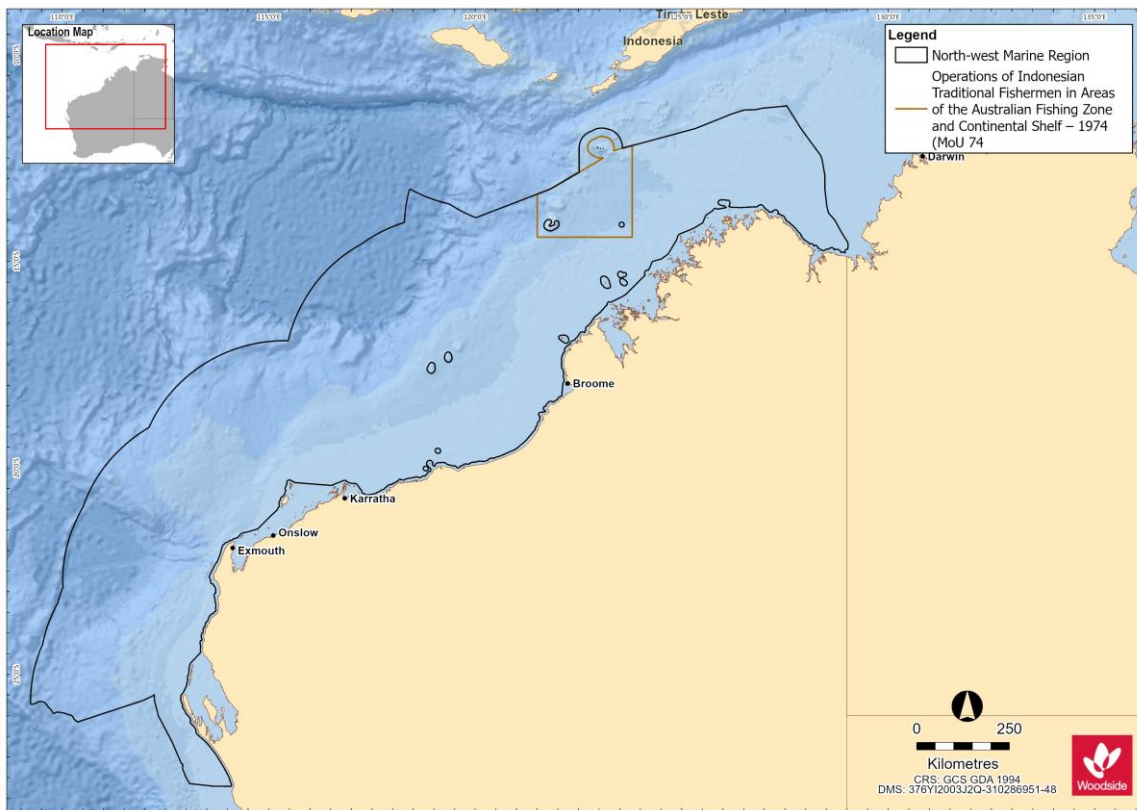

Traditional or customary fisheries are typically restricted to shallow coastal waters and/or areas with structures such as reef.

Dugong, fish and marine turtles that move between coastal and Commonwealth waters are important components of the Aboriginal people's culture and diet. Aboriginal people continue to actively manage their sea country in coastal waters of WA in order to protect and manage the marine environment, its resources and cultural values.

Indonesian fishers can fish within designated areas under the Australia-Indonesia Memorandum of Understanding regarding the Operations of Indonesian Traditional Fishermen in Areas of the Australian Fishing Zone and Continental Shelf – 1974 (MoU 74). Traditional fishing is allowed within the MoU Box (**Figure 11-1**), which encompasses: Ashmore Reef (Pulau Pasir), Cartier Island (Pulau Baru), Seringapatam Reef (Afringan), Scott Reef (Pulau Dato) and Browse Island (Berselan). Restrictions have since been introduced around Ashmore Reef and Cartier Island following their

designation as Nature Reserves under the Commonwealth's *National Parks and Wildlife Conservation Act 1975* in 1983 and 2000, respectively.

The MoU allows Indonesian fishers to fish in designated areas using traditional methods only. These methods include reef gleaning, free-diving, hand lining and other non-mechanised methods. Scott Reef is currently the principal reef in the MoU 74 Box and is utilised seasonally by Indonesian fishers to harvest trepang, trochus shells and other reef species. The peak season is July to October due to more favourable wind conditions, and to allow fishers to sun dry their catch on their boat decks (ERM, 2009). Browse Island is also frequently visited by shark fishers who mostly fish along the eastern margin of the MoU 74 Box.

**Figure 11-1 MOU 74 Box. Operations of Indonesian Traditional Fishermen in Areas of the Australian Fishing Zone and Continental Shelf – 1974**

## 11.7 Tourism and Recreation

There are growing tourism and recreational sectors in WA. The Kimberley, Pilbara and Gascoyne regions are popular visitor destinations for Australian and international tourists. Tourism is concentrated in the vicinity of population centres including Broome, Dampier, Exmouth, Coral Bay and Shark Bay.

Recreational and tourism activities include: charter fishing, other recreational fishing, diving, snorkelling, marine fauna watching, and yachting.

### 11.7.1 Gascoyne Region

Outside the petroleum industry, tourism is the largest revenue earner of all the major industries of the Gascoyne region. It contributes significantly to the local economy in terms of both income and

employment. In 2018 there was an average of 337,400 visitors with a visitor spend of \$359 million (Gascoyne Development Commission<sup>11</sup>).

In 2018-19, the Ningaloo region (Ningaloo Reef and the surrounding coastal region Exmouth Gulf, communities of Exmouth and Coral Bay, and adjacent proposed southern coastal reserves and pastoral leases) contributed an estimated \$110 million in value added to the WA economy (DCBA, 2020). Ningaloo's economic contribution to WA is attributed to four key types of economic activity, tourism expenditure by international, interstate and WA visitors to the Ningaloo region, commercial fishing in the Exmouth Gulf, recreation activity involving the Reef by residents of the Ningaloo region and management and research relating to the Reef (DCBA, 2020). More than 90% of this value added is attributed to the domestic and international tourists who visit Ningaloo each year (DCBA, 2020). The main marine nature-based tourist activities are concentrated around and within the Ningaloo WHA.

### 11.7.2 Pilbara region

Recreation and tourism activities within the Pilbara are of high social value. Tourism is a key economic driver for the Pilbara with more than 1 million visitors to the region every year, generating \$413 million in gross revenue annually (Pilbara Development Commission<sup>12</sup>).

Recreational fishing within the Pilbara region tends to be concentrated in State waters adjacent to population centres. Recreational fishing is known to occur around the Dampier Archipelago with boats launched from boat ramps around Dampier and Karratha (Williamson *et al.*, 2006). Once at sea, charter vessels may also frequent the waters surrounding the Montebello Islands.

### 11.7.3 Kimberley Region

Recreation and tourism activities in the Kimberley region occur predominantly in WA State waters (extending offshore 3 nm from the mainland), adjacent to coastal population centres (e.g. Broome), with a peak in activity during the winter months (dry season). These activities include recreational fishing, diving, snorkelling, wildlife watching and boating.

Primary dive locations in the Kimberley region include the Rowley Shoals, including Mermaid Reef AMP, Scott Reef, Seringapatam Reef, Ashmore Reef AMP and Cartier Island.

## 11.8 Shipping

Commercial shipping traffic is high within the NWMR with vessel activities including commercial fisheries, tourism such as cruises, international shipping and oil and gas operations. There are 12 ports adjacent to the NWMR, including the major ports of Dampier, Port Hedland and Broome, which are operated by their respective port authorities. These ports handle large tonnages of iron ore and petroleum exports in addition to salt, manganese, feldspar chromite and copper (DEWHA, 2008).

Heavy vessel traffic exists within the Pilbara Port Authority management area which recorded 10,064 vessel movements in Port of Dampier 2019/20 annual reporting period (PPA, 2020). Twenty-six designated anchorages for bulk carriers, petroleum and gas tankers, drilling rigs, offshore platforms, and pipelay vessels are located offshore of Rosemary Island.

In 2012, AMSA established a network of shipping fairways off the northwest coast of Australia. The shipping fairways, while not mandatory, aim to reduce the risk of collision between transiting vessels and offshore infrastructure. The fairways are intended to direct large vessels such as bulk carriers and LNG ships trading to the major ports into pre-defined routes to keep them clear of existing and planned offshore infrastructure (AMSA, 2013).

<sup>11</sup> <https://www.gdc.wa.gov.au/industry-profiles/tourism/>

<sup>12</sup> <https://www.pdc.wa.gov.au/our-focus/strategicinitiatives/tourism>

## 11.9 Oil and Gas Infrastructure

The NWMR supports a number of industries including petroleum exploration and production.

Within the NWMR there are seven sedimentary petroleum basins: Northern and Southern Carnarvon basins, Perth, Browse, Roebuck, Offshore Canning and Bonaparte basins. Of these, the Northern Carnarvon, Browse and Bonaparte basins hold large quantities of gas and comprise most of Australia's reserves of natural gas (DEWHA, 2008), which is reflected by the level of development in the area. In addition to existing facilities, there are proposed developments in the region. This includes proposals to develop gas and condensate from a number of fields within the NWMR.

In addition to the oil and gas industry, other land-based industries depend upon the marine environment in the nearshore area. These include ports, salt mines such as Karratha and Onslow, LNG onshore processing facilities such as Burrup Hub, Thevenard Island, Barrow Island, Varanus Island, and small-scale desalination plants at Barrow Island, Burrup, Cape Preston, and Onslow.

### 11.10 Defence

Key Australian Department of Defence (DoD) operational areas and facilities areas of the NWMR for training and operational activities, include:

- An operating logistics base has been established in Dampier to support vessels patrolling the waters around offshore oil and gas facilities. A dedicated navy administrative support facility is also being constructed at the nearby township of Karratha.
- The Royal Australian Air Force currently maintains two 'bare bases' in remote areas of WA that are used for military exercises. One of these is the Royal Australian Air Force Base in Learmonth. The Royal Australian Air Force maintains the Commonwealth Heritage listed Learmonth Air Weapons Range Facility, which is located between Ningaloo Station and the Cape Range National Park. The air training area associated with the Learmonth base extends over the offshore region.
- The Royal Australian Air Force Base Curtin is located on the north coast of WA, south-east of Derby and 170 km east of Broome. It provides support for land, air and sea operations aimed to support Australia's northern approaches.
- The Naval Communications Station Harold E. Holt is located ~6 km north of Exmouth. The main role of the station is to communicate at very low frequencies (19.8 kHz) with Australian and United States submarines and ships in the eastern Indian Ocean and the western Pacific Ocean.

# EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 27-Jun-2023

[Summary](#)

[Details](#)

[Matters of NES](#)

[Other Matters Protected by the EPBC Act](#)

[Extra Information](#)

[Caveat](#)

[Acknowledgements](#)

# Summary

## Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

|   |      |
|---|------|
| <a href="#">World Heritage Properties:</a>                    | None |
| <a href="#">National Heritage Places:</a>                     | None |
| <a href="#">Wetlands of International Importance (Ramsar)</a> | None |
| <a href="#">Great Barrier Reef Marine Park:</a>               | None |
| <a href="#">Commonwealth Marine Area:</a>                     | 1    |

## Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

# Details

## Matters of National Environmental Significance

### Commonwealth Marine Area

[\[ Resource Information \]](#)

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

### Feature Name

EEZ and Territorial Sea

### Listed Threatened Species

[\[ Resource Information \]](#)

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act.  
Number is the current name ID.

### Scientific Name

### Threatened Category

### Presence Text

### BIRD

#### [Calidris canutus](#)

Red Knot, Knot [855]

Endangered

Species or species habitat may occur within area

#### [Calidris ferruginea](#)

Curlew Sandpiper [856]

Critically Endangered

Species or species habitat may occur within area

#### [Macronectes giganteus](#)

Southern Giant-Petrel, Southern Giant Petrel [1060]

Endangered

Species or species habitat may occur within area

#### [Numenius madagascariensis](#)

Eastern Curlew, Far Eastern Curlew [847]

Critically Endangered

Species or species habitat may occur within area

#### [Phaethon lepturus fulvus](#)

Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]

Endangered

Species or species habitat may occur within area

#### [Pterodroma mollis](#)

Soft-plumaged Petrel [1036]

Vulnerable

Species or species habitat may occur within area

## Key Ecological Features

[\[ Resource Information \]](#)

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

| Name  | Region     |
|---|------------|
| <a href="#">Canyons linking the Cuvier Abyssal Plain and the Cape Range Peninsula</a> | North-west |
| <a href="#">Continental Slope Demersal Fish Communities</a>                           | North-west |

## Biologically Important Areas

| Scientific Name                                 | Behaviour                   | Presence       |
|---|-----------------------------|----------------|
| <b>Seabirds</b>                                 |                             |                |
| <a href="#">Ardena pacifica</a>                 |                             |                |
| Wedge-tailed Shearwater [84292]                 | Breeding                    | Known to occur |
| <b>Whales</b>                                   |                             |                |
| <a href="#">Balaenoptera musculus brevipoda</a> |                             |                |
| Pygmy Blue Whale [81317]                        | Distribution                | Known to occur |
| <a href="#">Balaenoptera musculus brevipoda</a> |                             |                |
| Pygmy Blue Whale [81317]                        | Migration                   | Known to occur |
| <a href="#">Megaptera novaeangliae</a>          |                             |                |

## 1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

## 2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

## 3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

## 4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

# Summary

## Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

## Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

## Key Ecological Features

[ [Resource Information](#) ]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

| Name  | Region     |
|---|------------|
| <a href="#">Ancient coastline at 125 m depth contour</a>                              | North-west |
| <a href="#">Canyons linking the Cuvier Abyssal Plain and the Cape Range Peninsula</a> | North-west |
| <a href="#">Commonwealth waters adjacent to Ningaloo Reef</a>                         | North-west |
| <a href="#">Continental Slope Demersal Fish Communities</a>                           | North-west |
| <a href="#">Exmouth Plateau</a>   | North-west |

## Biologically Important Areas

| Scientific Name              | Behaviour                             | Presence       |
|------------------------------|---------------------------------------|----------------|
| <b>Dugong</b>                |                                       |                |
| <a href="#">Dugong dugon</a> |                                       |                |
| Dugong [28]                  | Breeding                              | Known to occur |

# Caveat

## 1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

## 2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

## 3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

## 4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

# 1 Introduction

## 1.1 Purpose

This Oil Pollution Emergency Plan (OPEP) has been developed to establish the processes and procedures within Woodside to respond to and effectively manage incidents that may occur during Stybarrow plug and abandonment activities within Production Licence WA-32-L, offshore Western Australia (WA).

This OPEP is an appendix to the *Stybarrow Plug and Abandonment Environment Plan* (EP) (Appendix D) and is required under the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations (the OPGGS (Environment Regulations)) for approval to perform petroleum activities in Commonwealth waters.

## 1.2 Scope

This OPEP applies to Woodside activities associated with Stybarrow plug and abandonment.

This OPEP applies to oil spills resulting from activities associated with the Stybarrow plug and abandonment or operating under an instrument of the OPGGS Act.

Specifically in reference to oil spill preparedness, this OPEP contains:

- a summary description of the activity and locations (Section 3 of the EP)
- a list of the spill scenarios that may occur during the petroleum activities (Section 2.1)
- an overview of the operational net environmental benefit analysis (NEBA) in relation to the spill scenarios (Section 4)
- details associated with each of the response strategies (Section 3)
- an outline of activities associated with the response to an oil spill (Section 3)
- the First Strike Plan (Appendix A – First Strike Plan).

The spill scenarios listed in Table 2-1 may impact on WA State waters, therefore this plan considers the Western Australia State Hazard Plan – Maritime Environmental Emergencies (SHP-MEE) (Government of WA, 2021) and Offshore Petroleum Industry Guidance Note (IGN) on Marine Oil Pollution: Response and Consultation Arrangements (Department of Transport (DoT), 2020). Woodside acknowledges that as per the IGN, DoT will be the Controlling Agency in a State waters response (Refer to Section 1.5). Woodside will provide all necessary resources, including personnel and equipment, to support DoT's Incident Management Team (IMT) and response, as agreed during consultations with DoT. Woodside has access to staff for the Initial Personnel Requirements as outlined in Annexure 2 of the IGN. Refer to **Appendix B – Western Australia Department of Transport Incident Management Team Coordination** of this plan for these requirements and the control and coordination/IMT structure that will be applied during a marine oil pollution response that impacts State waters.

This plan is to be reviewed and implemented in conjunction with the Stybarrow Plug and Abandonment EP (Section 3) Activity Description and Location.

The activity covered by this OPEP involves plug and abandonment of 10 wells within Stybarrow Production Licence WA-32-L, continued field management scopes on subsea infrastructure and removal of historic wellheads and associated infrastructure within Production Licence WA-32-L. The Stybarrow Field is in 810-850 m water depth around 55 km north-west of Exmouth, WA. For a detailed description of the petroleum activities, refer to Section 3 of the EP.

## 1.3 Hydrocarbons and their Sources

The petroleum activities will be performed using a semi-submersible MODU and up to three general support/supply vessels with further detail provided in Section 3.6 of the EP. Plug and abandonment involves well intervention activities, which will be undertaken in accordance with the accepted Well Operations

Management Plan (WOMP), but do present a loss of well control (LOWC) risk. Woodside has identified a subsea LOWC of 10,264 m<sup>3</sup> over 73 days as the worst-case credible scenario from plug and abandonment activities.

The presence of support vessels in the operational area for the plug and abandonment activities presents a spill risk from a possible but unlikely vessel collision. A vessel collision has the potential to result in the rupture of a fuel tank and the release of marine diesel oil (MDO). The worst-case scenario is associated with the rupture of the largest fuel tank (1,000 m<sup>3</sup> of MDO) of one of the project vessels.

Hydrocarbon properties are presented in Table 1-1.

**Table 1-1: Chemical Properties of hydrocarbons**

| Hydrocarbon Type       | API Gravity | Wax Content (%) | Pour Point (°C) | Asphaltene (%) | Specific Gravity | Viscosity (cP) |
|------------------------|-------------|-----------------|-----------------|----------------|------------------|----------------|
| <b>Stybarrow crude</b> | 22.8        | 16.8            | -36             | <0.5           | 0.916            | 45.5 @ 20°C    |
| <b>MDO<sup>1</sup></b> | 36.4        | 0.05            | -36             | 0.05           | 0.843            | 3.9 @ 20°C     |

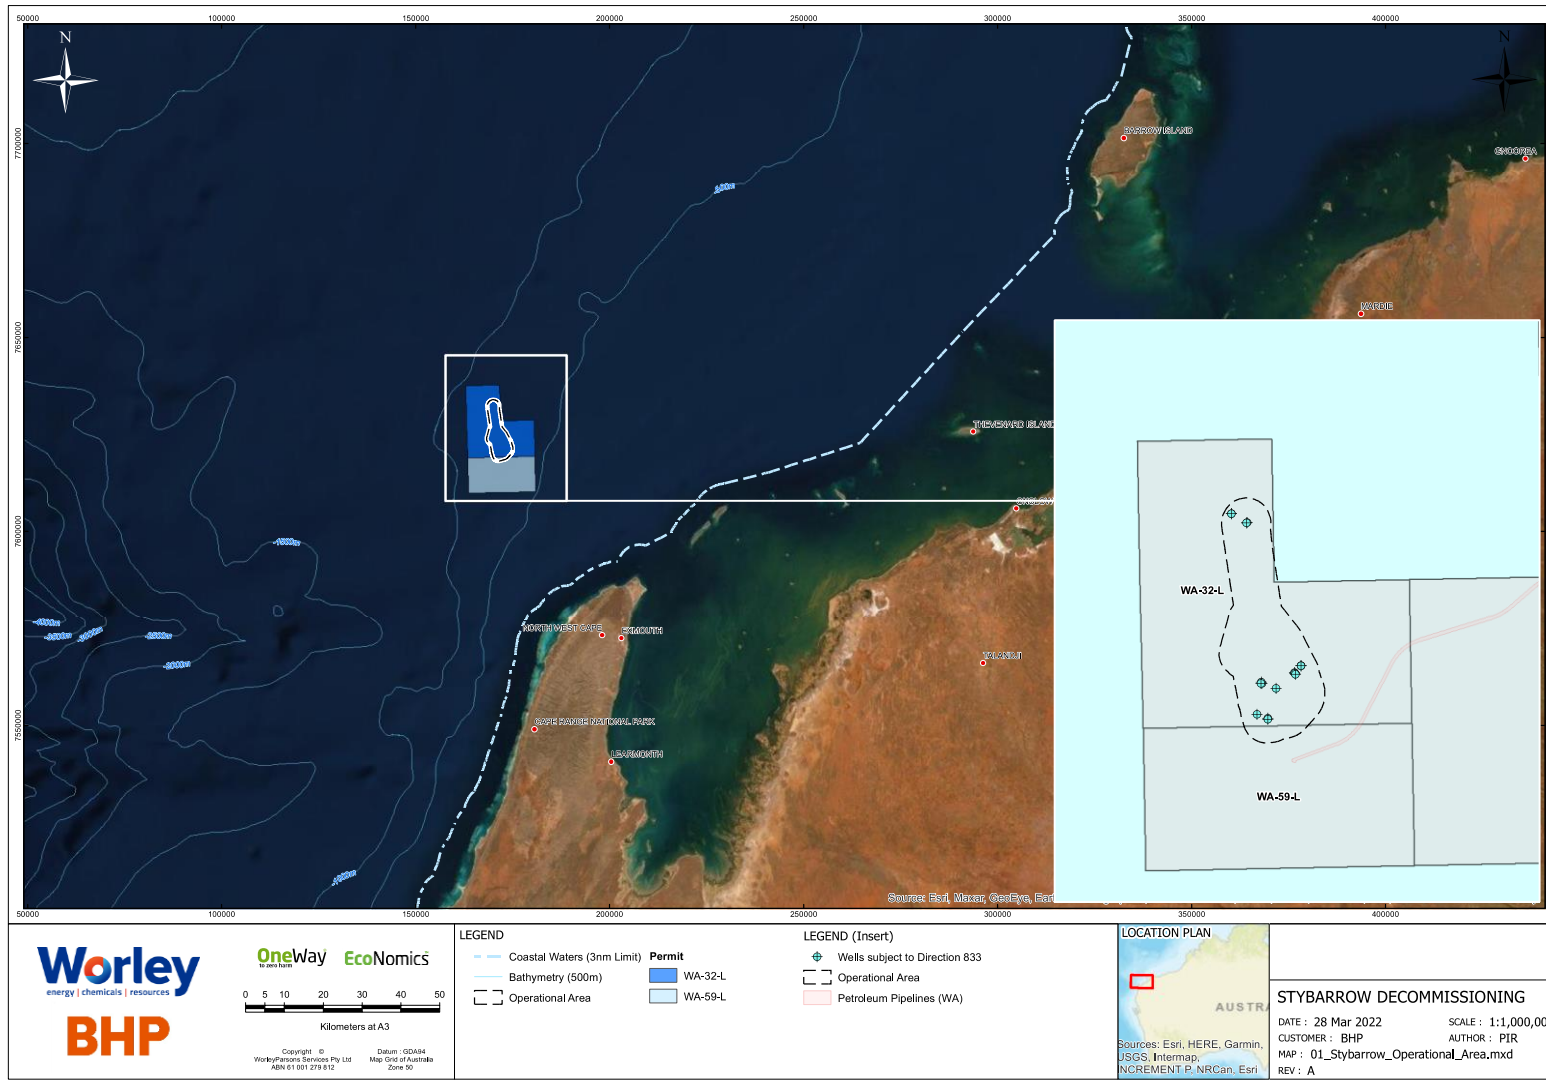

Figure 1-1: Stybarrow Plug and Abandonment Operational Area

## 1.4 Emergency Management and Oil Spill Response Documentation

Table 3-2 demonstrates the scope and content of oil spill related documents developed by Woodside. It excludes other tactical and industry plans, standard operating procedures and field guides prepared by DoT, Department of Biodiversity, Conservation and Attractions, Australian Maritime Oil Spill Centre (AMOSOC), Oil Spill Response Limited (OSRL), National Oceanic and Atmospheric Administration and IPIECA-International Association of Oil and Gas Producers available to Woodside to support oiled shoreline assessment, oiled wildlife response and waste management.

## 1.5 Oil Spill Response Control Agencies

During a spill response, there will be a 'Control Agency' and a 'Jurisdictional Authority' assigned to the incident for all spill response levels.

Definitions of a Control Agency and Jurisdictional Authority are as follows:

- Control Agency: the organisation assigned by legislation, administrative arrangements or within the relevant contingency plan, to control response activities to a maritime environmental emergency (AMSA, 2020). Control Agencies have the operational responsibility of response activities (AMSA, 2002) but may have arrangements in place with other parties to provide response assistance under their direction (AMSA, 2020).
- Jurisdictional Authority: the organisation which has responsibility to verify that an adequate spill response plan is prepared and, in the event of an incident, that a satisfactory response is implemented. The Jurisdictional Authority is also responsible for initiating prosecutions and the recovery of clean-up costs on behalf of all participating agencies.

The applicable Control Agency and Jurisdictional Authority is dependent on the location (Commonwealth vs State waters), type of activity (vessel based or petroleum activity) and the spill response level as shown in Table 1-2.

To aid in the determination of a vessel versus a facility spill, the following guidance is adopted:

- A vessel is a ship at sea to which the *Navigation Act 2012* applies.
- A facility is a petroleum facility as defined under the OPGGS Act, Volume 3, Schedule 3, Part 1, Clause 4 & Volume 2, Part 6.8, Section 640.

Table 1-2: Control Agencies and Jurisdictional Authorities for Oil Spill Response

| Source  | Location            | Level | Hazard Management Agency/ Jurisdictional Authority | Control Agency     | Incident Controller  |
|---|---------------------|-------|--|--------------------|--|
| <b>Spill from facility including subsea infrastructure</b><br><sup>1</sup> Note: pipe laying and accommodation vessels are considered a "facility" under Australian regulations | Commonwealth waters | 1     | NOPSEMA  | Woodside           | Person In Charge (PIC) with support from Onshore Team Leader (OTL) |
|   |                     | 2/3   | NOPSEMA  | Woodside           | Corporate Incident Management Team Incident Commander (CIMT IC)    |

### 1.5.1 Petroleum Activity Spill in Commonwealth Waters

Woodside holds the Control Agency role for its facility related spills within Commonwealth waters. Facility spills include vessels undertaking construction, decommissioning and pipelaying activities in Woodside's operational area. This definition of a 'facility' is defined by Schedule 3, Part 1, Clause 4 of the OPGGS Act 2006.

### 1.5.2 Vessel Spills in WA State Waters

For WA State waters, the DoT Chief Executive Officer is prescribed as the Hazard Management Agency (HMA) for marine oil pollution as per the WA *Emergency Management Act 2005* and Emergency Management

<sup>1</sup> Includes a 'Facility', such as a fixed platform, FPSO/FSO, MODU, subsea infrastructure, or a construction, decommissioning and pipelaying vessel. As defined by Schedule 3, Part 1, Clause 4 of the OPGGS Act 2006.

<sup>2</sup> Vessels are defined by Australian Government Coordination Arrangements for Maritime Environmental Emergencies (AMSA, 2017) as a seismic vessel, supply or support vessel, or offtake tanker.

Regulations 2006. The DoT manages the SHP – MEE (WA DoT, 2021) and is the Control Agency for all vessel-based spills in WA waters outside of a port proclaimed pursuant to the *Port Authorities Act 1999* (WA). For vessel-based spills within a port proclaimed pursuant to the *Port Authorities Act 1999* (WA), the relevant Port Authority or DoT may be the Control Agency.

### 1.5.3 Vessel Spills in Commonwealth Waters

AMSA is the Control Agency for any shipping sourced spill in Australian Commonwealth waters (AMSA, 2020). AMSA is the national shipping and maritime industry regulator and was established under the *Australian Maritime Safety Authority Act 1990*. AMSA manages the National Plan for Maritime Environmental Emergencies (AMSA, 2020) on behalf of the Australian Government, working with State and the Northern Territory governments, emergency services and private industry to maximise Australia's marine pollution response capability.

### 1.5.4 Cross Jurisdictional Spills

#### **Cross Jurisdictional Petroleum Activity Spills**

If a Marine Oil Pollution Incident enters, or has potential to enter, State waters, the DoT is the Hazard Management Agency (HMA) (DoT Chief Executive Officer or proxy). The Assistant Executive Director (or proxy) has been nominated by the HMA to perform the role of State Marine Pollution Coordinator (SMPC) (as prescribed in Section 1.3 of the SHP – MEE (WA DoT, 2021)) and DoT will take on the role as a Control Agency. The role of the SMPC is to provide strategic management of the incident response on behalf of the HMA.

Woodside will notify the DoT Maritime Environmental Emergency Response (MEER) unit as soon as reasonably practicable (within 2 hours of spill occurring) if an actual or impending spill may impact WA State waters. On notification, the HMA will activate their Maritime Environmental Emergency Coordination Centre and the DoT IMT. Woodside will work in partnership with DoT during such instances, as outlined within the DoT's Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements (WA DoT, 2020).

Woodside will conduct initial response actions in State waters as necessary in accordance with its OPEP and continue to manage those operations until formal handover of incident control is completed. Appendix 1 in DoT's Offshore Petroleum Industry Guidance Note (WA DoT, 2020) provides a checklist for formal handover.

For a cross-jurisdictional response, there will be a Lead IMT (DoT or Woodside) for each spill response activity, with DoT's control resting primarily for State waters activities.

Appendix 2 in DoT's Offshore Petroleum Industry Guidance Note (WA DoT, 2020) provides guidance on the allocation of a Lead IMT to response activities for a cross-jurisdictional spill.

To facilitate effective coordination between the two Control Agencies and their respective IMT's, a Joint Strategic Coordination Committee (JSCC) will be established. The JSCC will be jointly chaired by the State Maritime Environmental Emergency Coordinator and Woodside's nominated Crisis Management Team (CMT) Leader and will comprise of individuals deemed necessary by the chairs to ensure an effective coordinated response across both jurisdictions.

For a cross-jurisdictional response, Woodside will be responsible for ensuring adequate resources are provided to DoT as Control Agency, initially 11 personnel to fill roles in the DoT IMT or FOB and operational personnel to assist with those response strategies where DoT is the Lead IMT. Concurrently DoT will also provide two of their personnel to the Woodside IMT. Woodside's CMT Liaison Officer and the Deputy Incident Controller are to attend the DoT Fremantle Incident Command Centre (ICC) as soon as possible after the formal request has been made by the SMPC. It is an expectation that the remaining initial cohort will attend the DoT Fremantle ICC no later than 8am on the day following the request being formally made to Woodside by the SMPC. Woodside personnel designated to serve in DoT's FOB will arrive no later than 24 hours after receipt of formal request from the SMPC.

#### **Cross Jurisdictional Vessel Spills**

For a large vessel spill (e.g. Level 2 and above) that crosses jurisdictions between Commonwealth and State waters, the Control Agency will remain with the original nominated agency or organisation unless otherwise

appointed through agreement between the HMA / Jurisdictional Authority of both waters. AMSA may request that DoT manage a vessel incident in Australian Commonwealth waters (Government of WA ,2021).

Woodside may be requested by the Control Agency to provide a first strike response and all necessary resources (including personnel and equipment) as a Supporting Agency.

## 1.6 Cost recovery

As required under Section 571(2) of the OPGGS Act 2006, Woodside has financial assurances in place to cover any costs, expenses and liabilities arising from carrying out its petroleum activities, including major oil spills. This includes costs incurred by relevant control agencies (e.g. DoT) and third-party spill response service providers.

## 2 Identified Risks

### 2.1 Spill Scenarios for the Stybarrow Plug and Abandonment Activities

The spill scenarios in which hydrocarbons may be released to the marine environment during the petroleum activities are provided in Table 2-1. The justification for selecting these spill scenarios is described in Section 8 of the EP.

**Table 2-1: Hydrocarbon Spill Scenarios**

| Hydrocarbon     | Activity   | Scenarios   | Volume (m <sup>3</sup> ) | Duration      | Likelihood      |
|-----------------|--|---|--------------------------|---------------|-----------------|
| Stybarrow crude | Plug and abandonment                             | Loss of well control  | 10,264                   | 73 days       | Highly Unlikely |
| MDO             | Vessels required to perform petroleum activities | Vessel collision – which ruptures a MDO tank. One-time instantaneous release. | 1,000                    | Instantaneous | Highly Unlikely |
| MDO             | Bunkering  | Bunkering incident.   | 37.5                     | Instantaneous | Highly Unlikely |

Section 8 of the EP details the risk assessment and management for each of these scenarios respectively, which is not repeated in this document. This includes:

- description of the spill scenario
- spill frequency
- hydrocarbon properties
- environment that may be affected (EMBA)
- risk analysis conclusion and ranking
- objectives for spill prevention
- control measures.

#### 2.1.1 Stybarrow Crude

Stybarrow crude has a high density of 916.9 kg/m<sup>3</sup> (API of 22.8) and a low pour point of -36°C. This crude contains about 3.1% (by mass) that should evaporate within the first 12 hours (BP < 180°C), a further 23.7% should evaporate within the first 24 hours (180°C < BP < 265°C), and an additional 30.6% would likely evaporate over several days to a week (265°C < BP < 380°C). Approximately, 42.6% (by mass) of the crude will not evaporate, but rather persist in the environment and gradually decay over time. The persistent characteristics of the crude and the absence of aromatic components indicate that it has been exposed to bacterial degradation within the reservoir and as such can be classified as a biodegraded crude.

The crude is categorised as a group 4 heavy-persistent oil based on categorisation and classification derived from AMSA (2015) guidelines. The classification is based on the specific gravity of hydrocarbons in combination with relevant boiling point ranges.

#### 2.1.2 Diesel (Marine Diesel Oil)

Marine diesel is a mixture of volatile and persistent hydrocarbons with low proportions of highly volatile and residual components. In general, about 6% of the oil mass should evaporate within the first 12 hours (BP < 180 °C); a further 35% should evaporate within the first 24 hours (180 °C < BP < 265 °C); and a further 54% should evaporate over several days (265 °C < BP < 380 °C). Approximately 5% of the oil is shown to be persistent. The aromatic content of the oil is approximately 3%.

If released in the marine environment and in contact with the atmosphere (i.e. surface spill), approximately 41% by mass of this oil is predicted to evaporate over the first couple of days depending upon the prevailing conditions, with further evaporation slowing over time. The heavier (low volatility) components of the oil have a tendency to entrain into the upper water column due to wind-generated waves but can subsequently resurface if wind-waves abate. Therefore, the heavier components of this oil can remain entrained or on the sea surface for an extended period, with associated potential for dissolution of the soluble aromatic fraction.

## 2.2 Environment that May Be Affected

The EMBA for the worst-case spill from Stybarrow plug and abandonment activities is described in the EP. In defining the EMBA, a range of factors detailed in National Offshore Petroleum Safety and Environmental Management Authority Oil Pollution Risk Management Guidance Note A382148 (NOPSEMA, 2021) have been considered. Specifically, the size of the EMBA has been based upon the quantity of hydrocarbons, duration of discharge, concentration of hydrocarbons, film thickness of hydrocarbons that can result in ecological impacts, zone of spill response activities and the environmental conditions that contribute to the largest distance travelled by the hydrocarbon.

## 2.3 Response and monitoring priorities

During an oil spill it is not always feasible to protect all receptors. Prioritising receptors helps to aid decision-making in the preliminary stages of a response, so initial resources are used for best effect. For the purposes of this OPEP, priority areas refer to those locations with significant receptors and values that require protection from the impacts of a spill.

Results from the stochastic hydrocarbon spill modelling were compared against the location of key sensitive receptors with high conservation-valued habitat or species or important socio-economic/heritage value within the EMBA. Relevant values and sensitivities of the environment are described in Section 5 of the EP. The ranking of these sensitivities (also referred to as receptors) are listed, which is consistent with the rankings in *Provisions of Western Australian Marine Oil Pollution Risk Assessment – Protection Priorities: Assessment for Zone 2: Pilbara* (Advisian, 2017).

## 2.4 Spill modelling

### 2.4.1 Stochastic

Stochastic modelling for the Stybarrow plug and abandonment spill scenarios was performed using a three-dimensional spill trajectory and weathering model, SIMAP (Spill Impact Mapping and Analysis Program). This model is designed to simulate the transport, spreading and weathering of specific oil types under the influence of changing meteorological and oceanographic forces. The modelling outputs do not represent the potential behaviour of a single spill (which would have a much smaller area of influence) but provides an indication of the probability of any given area of the sea surface being contacted by hydrocarbons above impact thresholds.

A total of 300 replicate simulations were completed for each of the scenarios to test for trends and variations in the trajectory and weathering of the spilled oil, with an even number of replicates completed over three seasons (Summer: October to March; transitional periods of April and September; Winter: May to August).

### 2.4.2 Deterministic

The stochastic model run demonstrating the fastest shoreline contact at  $>100 \text{ g/m}^2$  and the run demonstrating the widest spread of shoreline contact at  $>100 \text{ g/m}^2$  were then selected for deterministic analysis. The results of the deterministic modelling have been used as the basis for scaling the hydrocarbon spill response preparedness requirements.

### 2.4.3 Modelling results

The selected deterministic runs used to represent the WCCS are based on response thresholds:

- Minimum time to commencement of hydrocarbon accumulation at any shoreline receptor (at a threshold of 100 g/m<sup>2</sup>).
- Maximum cumulative hydrocarbon volume accumulated at any individual shoreline receptor (at a threshold of 100 g/m<sup>2</sup>).
- Maximum cumulative hydrocarbon volume accumulated across all shoreline receptors (at a threshold of 100 g/m<sup>2</sup>).

The volumes as presented in Table 2-2 are the worst-case volumes resulting from the deterministic modelling and have been used to determine appropriate level of response.

**Table 2-2: Modelling results**

| Response parameter   | Modelled result   |   |
|--|---|---|
|  | CS-01: Hydrocarbon release caused by loss of containment (Stybarrow-7 well) | CS-02: hydrocarbon release due to vessel collision            |
| Maximum continuous liquid hydrocarbon release rate and duration  | 10,264 m <sup>3</sup> of Stybarrow Crude over 73 days                       | Instantaneous release of 1000 m <sup>3</sup> of marine diesel |
| Maximum residual surface hydrocarbon after weathering  | 42% residual component of 4,372 m <sup>3</sup>                              | 5% residual component of 50 m <sup>3</sup>                    |
| Deterministic modelling results  |   |   |
| Minimum time to commencement of hydrocarbon accumulation at any shoreline receptor (at a concentration of 100 g/m <sup>2</sup> )                                     | 5 days at Exmouth (26 m <sup>3</sup> )                                      | <i>No contact at threshold</i>                                |
| Maximum cumulative hydrocarbon volume accumulated at any individual shoreline receptor (at a concentration of 100 g/m <sup>2</sup> ).                                | 297 m <sup>3</sup> at Exmouth (day 58)                                      | <i>No contact at threshold</i>                                |
| Maximum cumulative hydrocarbon volume accumulated across all shoreline receptors contacted by accumulated hydrocarbons (at a concentration of 100 g/m <sup>2</sup> ) | 297 m <sup>3</sup> at Exmouth (day 58)                                      | <i>No contact at threshold</i>                                |

The full modelling results from the two selected deterministic modelling runs are included in Table 2-3:

Table 2-3: Protection Priorities for Stybarrow Plug and Abandonment Activities

| Priority protection area | CS-01: Hydrocarbon release caused by loss of containment (Stybarrow-7 well) |  | CS-02: hydrocarbon release due to vessel collision       |  |
|--------------------------|---|--|--|--|
|                          | Minimum time to receptor (days at 100 g/m <sup>2</sup> )                    | Maximum accumulated volume (m <sup>3</sup> ) | Minimum time to receptor (days at 100 g/m <sup>2</sup> ) | Maximum accumulated volume (m <sup>3</sup> ) |
| Exmouth                  | 5 days (26.1 m <sup>3</sup> )   | 297.1 m <sup>3</sup> (day 58)                | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Airlie Island            | 40 days (4.1 m <sup>3</sup> )   | 11.3 m <sup>3</sup> (day 74)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Mary Anne Group          | 41 days (14.3 m <sup>3</sup> )  | 18.8 m <sup>3</sup> (day 61)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Passage Islands          | 42 days (7.7 m <sup>3</sup> )   | 89.0 m <sup>3</sup> (day 69)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Boodie Island            | 43 days (4.1 m <sup>3</sup> )   | 21.0 m <sup>3</sup> (day 63)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Middle Island            | 57 days (6.5 m <sup>3</sup> )   | 20.4 m <sup>3</sup> (day 63)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Barrow Island            | 58 days (13.7 m <sup>3</sup> )  | 36.8 m <sup>3</sup> (day 68)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Hermite Island           | 62 days (14.9 m <sup>3</sup> )  | 16 m <sup>3</sup> (day 85)                   | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Whalebone Island         | 37 days (7.9 m <sup>3</sup> )   | 8.1 m <sup>3</sup> (day 38)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Rivoli Islands           | 36 days (32.1 m <sup>3</sup> )  | 67.0 m <sup>3</sup> (day 38)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Fly Island               | 37 days (4.1 m <sup>3</sup> )   | 6.5 m <sup>3</sup> (day 40)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Observation Island       | 36 days (1.35 m <sup>3</sup> )  | 8.9 m <sup>3</sup> (day 40)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Locker Island            | 37 days (1.9 m <sup>3</sup> )   | 5.4 m <sup>3</sup> (day 41)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Sunday Island            | 35 days (6.6 m <sup>3</sup> )   | 15.5 m <sup>3</sup> (day 37)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Murion Islands           | 35 days (20.5 m <sup>3</sup> )  | 108 m <sup>3</sup> (day 39)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Round Island             | 37 days (2.2 m <sup>3</sup> )   | 3.1 m <sup>3</sup> (day 40)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Table Island             | 37 days (2.3 m <sup>3</sup> )   | 2.3 m <sup>3</sup> (day 37)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Flat Island              | 35 days (4.4 m <sup>3</sup> )   | 29.9 m <sup>3</sup> (day 38)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Peak Island              | 35 days (14.4 m <sup>3</sup> )  | 25.7 m <sup>3</sup> (day 38)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Serrurier Island         | 36 days (9.4 m <sup>3</sup> )   | 24.6 m <sup>3</sup> (day 38)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Ashburton Island         | 56 days (2.3 m <sup>3</sup> )   | 2.5 m <sup>3</sup> (day 73)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Tortoise Island          | 37 days (1.1 m <sup>3</sup> )   | 2.5 m <sup>3</sup> (day 72)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |

| Priority protection area | CS-01: Hydrocarbon release caused by loss of containment (Stybarrow-7 well) |  | CS-02: hydrocarbon release due to vessel collision       |  |
|--------------------------|---|--|--|--|
|                          | Minimum time to receptor (days at 100 g/m <sup>2</sup> )                    | Maximum accumulated volume (m <sup>3</sup> ) | Minimum time to receptor (days at 100 g/m <sup>2</sup> ) | Maximum accumulated volume (m <sup>3</sup> ) |
| Direction Island         | 40 days (2.5 m <sup>3</sup> )   | 2.5 m <sup>3</sup> (day 42)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Twin Island              | 40 days (2.8 m <sup>3</sup> )   | 5.0 m <sup>3</sup> (day 74)                  | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |

| Karratha                 | 62 days (20.3 m <sup>3</sup> )  | 61.5 m <sup>3</sup> (day 68)                 | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |
| Derby - West Kimberely   | 70 days (11.8 m <sup>3</sup> )  | 20.6 m <sup>3</sup> (day 103)                | <i>No contact at threshold</i>                           | <i>No contact at threshold</i>               |

At the time of a spill, the CIMT has the following tools at its disposal to assess the oil spill scenario risk assessment, determine the environmental protection priorities and subsequent response needs for an emergency event related to the Stybarrow Plug and Abandonment activities.

### **NEBA**

The NEBA response strategy evaluation process is a decision support tool used to help select the most appropriate response options that together make up the oil spill response strategies the IMT is to implement in a spill. Using the Strategic NEBA in the EP, the IMT has the foundation for preparing an Operational NEBA to inform response priorities.

### **WMAP**

This Woodside map and geospatial platform provides base maps showing Woodside's assets and activity locations with the ability to activate layers (as required) which include environmental and cultural heritage sensitivities, oil spill response resources, logistics and infrastructure layers, metocean data, vessel locations etc. The software also has an inbuilt oil spill modelling 'Rapid Assessment Tool' (RAT) which uses Oilmap software to allow preliminary trajectory modelling to be undertaken during a response event.

### **Oil Spill Response Atlas (OSRA)-Web Map Application (WMA)**

WA OSRA is a spatial database of environmental, logistical and oil spill response data. Using a GIS platform, OSRA displays datasets collated from a range of custodians, allowing decision-makers to visualise environmental sensitivities and response considerations in a selected location. OSRA-WMA allows the layers found in OSRA to be viewed via a secure portal from the DoT website and provides basic functional tools.

### **North West Cape Sensitivities Mapping**

The purpose of this shoreline sectorisation was to outline sensitive resources at risk, describe a baseline using the systematic cause analysis technique, and outline important segment access information. The document describes localised environmental type (shoreline, substrate) and accessibility of shorelines and required permissions.

### 3 Applicable Response Strategies

The strategies selected during the NEBA process for the worst-case spill scenarios are summarised in Table 3-1. Further description of each strategy includes a risk assessment on performing it, the control options and a conclusion as to how the strategy demonstrates as low as reasonably practicable (ALARP) criteria and Woodside's acceptability criteria.

**Table 3-1: Summarised Response Strategies for the Stybarrow Plug and Abandonment Spill Scenarios**

| Response Strategy                                     | LOWC Crude Spill        | Vessel based MDO Spill |
|---|-------------------------|------------------------|
| Source Control – Vessel-based                         | ×                       | Primary                |
| Source Control – Subsea Intervention                  | Primary                 | ×                      |
| Source Control – Relief Well                          | Primary                 | ×                      |
| Source Control – Capping Stack                        | Primary                 | ×                      |
| Source Control – Subsea First Response Toolkit (SFRT) | Primary                 | ×                      |
| Monitor and Evaluate                                  | Primary                 | Primary                |
| Dispersant – Surface Application                      | Secondary <sup>*^</sup> | ×                      |
| Dispersant – Subsea Application                       | Secondary               | ×                      |
| Containment and Recovery                              | Secondary <sup>*^</sup> | ×                      |
| Shoreline Protection                                  | Primary                 | × <sup>#</sup>         |
| Mechanical Dispersion                                 | ×                       | ×                      |
| In-Situ Burning                                       | ×                       | ×                      |
| Shoreline Clean-Up                                    | Primary                 | × <sup>#</sup>         |
| Natural Recovery                                      | Primary                 | Primary                |
| Environmental Monitoring                              | Primary                 | Primary                |
| Oiled Wildlife Response                               | Primary*                | Primary*               |
| Waste Management                                      | Primary                 | Secondary              |

× Response strategy not applicable for spill scenario

# No shoreline accumulation >100 g/m<sup>2</sup> predicted from spill modelling

\* Potentially activated depending on reports and observations of Monitor and Evaluate

<sup>^</sup> No floating surface hydrocarbons predicted above 50 g/m<sup>2</sup> (minimum thickness required to commence effective surface dispersant application or containment and recovery operations).

Each option has advantages and disadvantages with regard to effectiveness, operational constraints and environmental impacts. Consequently, spill response strategies need to be assessed for each case, taking into account the nature of the spill, oil spill trajectory modelling, the weather conditions, and the advantages and disadvantages of each response strategy.

## 4 Net Environmental Benefit Analysis and Decision-Making Criteria for Response Strategy Selection

For oil spill response, the Incident Action Plan (IAP) response strategies are identified through a process that involves reviewing key decision-making criteria, the outcomes of which are used as inputs to the Operational NEBA. This ensures the most effective response strategies with the least detrimental impacts can be selected and implemented.

The IMT must first gain situational awareness by obtaining answers to the following key questions, which are fundamental to any oil spill response:

- What type of oil has been released?
- What is the expected behaviour of the oil that has been released?
- What volume has been released?
- Is the source under control?
- Where is the oil going?
- What environmental receptors and sensitivities are in the path of the predicted oil trajectory?
- Can the oil be approached or are there safety concerns?
- Can the oil be contained?
- Can the oil be dispersed?
- Will shoreline impact occur, and clean-up be required?

To answer these questions, the Incident Commander must review key information such as engineering advice about the volume and characteristics of the oil released, oil spill trajectory modelling, oil spill tracker buoys, the weather forecast, Automatic Identification System (AIS) vessel feed, aircraft data feeds, operational reports from field teams and operational and environmental monitoring teams to determine presence and/or extent of environmental receptors, advice from the State Government Environmental Scientific Coordinator, any other external advice, the window of ecological sensitivity (Section 4.5 of EP), oil spill reference documents (as detailed in each response strategy within the EP) and any other Daily Field Reports.

The outcome of this data review step is then used to update the Operational NEBA, which assesses the impacts and risks of response strategy options on environmental sensitivities. The spill response risk assessment applies predefined assessment classifications (3P to 3N), as shown in Table 4-1, to assess the potential 'impact, for the receptor sensitivities for each response option. To aid interpretation where both positive and negative impacts have been indicated for a spill response in Table 4-2, cross-referencing potential impacts with the receptor's protection priority can be used to weight benefits and risks to receptors. Those with higher protection priorities can be weighted as of greater importance than risks to lower priorities for determining net environmental benefit.

Where a response has 'zero' scores for all receptors and sensitivities, this may still be assessed as being of net environmental benefit (or carried forward to ALARP assessment) based on potential for indirect (rather than direct) reduction in risk. For example, Monitor and Evaluate has no direct impact on the spill due to implementation of this strategy, but the situational awareness gained from the response allows proactive and effective application of other response strategies, thereby contributing to reducing risk to ALARP.

The NEBA Matrix (Table 4-2) prioritises environmental sensitivities and assesses the individual net effect each response option may have on it, allowing informed decisions to be made. If there are conflicting outcomes for a particular response option, the sensitivity with the higher priority becomes the preferred response option. A NEBA is a decision-making process and will ultimately result in a trade-off of priorities and response strategies.

It is possible for a response strategy to be used for one sensitivity, even if it has been identified that this response option may not benefit one or several other sensitivities. The final outcome of the response, however, should result in an overall net environment benefit. Spill response options identified by Woodside are outlined in Section 3. An evaluation of the impacts and risks of the spill response options is provided in Section 7 of the EP.

The CIMT will apply the Operational NEBA process to identify the response options that are preferred for the situation, oil type and behaviour, environmental conditions, direction of plume and protection priority of sensitive receptors.

The steps in the Operational NEBA aim to identify:

- key ecological values, environmental, socio-economic and cultural heritage receptors (Table 2-3 herein and Section 4 of the EP) within the plume path and predicted EMBA, based on operational monitoring arrangements in Response Strategy 2 (Monitor and Evaluate)
- protection priorities of either High, Medium or Low in line with the rankings in *Provisions of Western Australian Marine Oil Pollution Risk Assessment – Protection Priorities: Assessment for Zone 2: Pilbara* (Advisian, 2017)
- receptors within the window of ecological sensitivity for the period of the oil spill
- response strategies to be included in the IAP work instruction
- new situational awareness information that becomes available from the range of operational monitoring arrangements in Monitor and Evaluate such as updated spill trajectory models, observations of oil on the water and shorelines, locations of sensitive receptors, effectiveness of implemented response strategies, Daily Field Reports, any updated advice from the Environmental Scientific Coordinator (nominated officer from the Department of Biodiversity Conservation and Attractions) and other external sources (such as consideration of recommendations from the WA Hazard Management Agency) for inclusion in daily updates of the Operational NEBA to optimise the IAP. Some sensitive receptors are mobile (such as fish, mammals, birds) and may move in and out of the predicted oil path on numerous occasions throughout the response, requiring frequent review of the NEBA table and selection of response techniques documented in IAPs by the IMT.

The Planning Section Chief will supervise the development of the IAP with the CIMT. The Incident Commander authorises the IAP before releasing it to the Operations Section.

Table 4-1: Net Environmental Benefit Analysis Impact Categories Identifying Potential Change in Impact Due to Response Strategies, Relative to the Impact of the Spill

| NEBA Categories |    | Degree of Impact  | Potential Duration of Impact   | Equivalent Woodside Severity Risk Matrix Consequence Level   |
|-----------------|----|---|--|--|
| Positive        | 3P | Major<br>Likely to prevent:<br><ul style="list-style-type: none"> <li>behavioural impact to biological receptors</li> <li>behavioural impact to socio-economic receptors, such as changes daily business operations, public opinion/behaviours (for example, avoidance of amenities such as beaches), or regulatory designations.</li> </ul>  | Decrease in duration of impact by more than five years                               | N/A.   |
|                 | 2P | Moderate<br>Likely to prevent:<br><ul style="list-style-type: none"> <li>significant impact single phase of reproductive cycle for biological receptors, or</li> <li>detectable financial impact, either directly (such as loss of income) or indirect (such as via public perception), for socio-economic receptors. This level of negative impact is recoverable and unlikely to result in closure of business/industry in the region.</li> </ul>   | Decrease in duration of impact by one to five years                                  | N/A.   |
|                 | 1P | Minor<br>Likely to prevent impact to:<br><ul style="list-style-type: none"> <li>significant proportion of population or breeding stages, for biological receptors, or</li> <li>significant impact to the sensitivity of protective designation for socio-economic receptors; or significant long-term impact to business/industry.</li> </ul>   | Decrease in duration of impact by several seasons (less than one year)               | N/A.   |
|                 | 0  | Non-mitigated spill impact<br>No detectable difference to unmitigated spill difference  |  |  |
| Negative        | 1N | Minor<br>Likely to result in:<br><ul style="list-style-type: none"> <li>behavioural impact for biological receptors</li> <li>behavioural impact for socio-economic receptors, such as changes to daily business operations, public opinion/behaviours (such as avoidance of amenities such as beaches), or regulatory designations.</li> </ul> [Note 1]   | Decrease in duration of impact by several seasons (less than one year)               | Measurable but limited impacts to the environment, where recovery of ecosystems function takes less than one year. Woodside Petroleum Risk Matrix Severity Level 2, Non-Material Risk. |
|                 | 2N | Moderate<br>Likely to result in:<br><ul style="list-style-type: none"> <li>significant impact single phase of reproductive cycle for biological receptors, or</li> <li>detectable financial impact, either directly (such as loss of income) or indirect (such as via public perception), for socio-economic receptors. This level of negative impact is recoverable and unlikely to result in closure of business/industry in the region.</li> </ul> | Increase in duration of impact (one year to less than three years)                   | Substantial impacts to the environment, where recovery of ecosystem function takes between one to three years. Woodside Petroleum Risk Matrix Severity Level 3, Non-Material Risk.     |
|                 | 3N | Major<br>Likely to result in impact to:<br><ul style="list-style-type: none"> <li>significant proportion of population or breeding stages, for biological receptors, or</li> <li>significant impact to the sensitivity of protective designation for socio-economic receptors, or</li> <li>significant long-term impact to business/industry for socio-economic receptors.</li> </ul>   | Increase in duration of impact (three years to more than ten years or unrecoverable) | Serious or severe impacts to the environment and where recovery of ecosystem function takes three years or more. Woodside Petroleum Risk Matrix Severity Level ≥4, Material Risk.      |

Note 1: Behavioural impacts tend to be short-term and limited in their impact (even on a regional scale). The maximum likely should be considered if a response strategy directly impacts behaviour that results in an impact to reproduction and/or the breeding population, such as failure of fish spawning aggregations, then score should be a 2 or 3 rather than 1.

Table 4-2: Operational Net Environmental Benefit Analysis – Response Strategy Selection

| Sensitivity   | Protection Priority* | Seasonal presence on NWS |     |     |     |     |     |     |     |     |     |     |     | Response Strategy |                      |                   |                     |                          |                      |                    |                  |                          |                         |                  |     |     |     |

\*Protection priority: This ranking is based on a combination of factors, including the likelihood of impact (time of year) and severity of impact (type of exposure to the sensitivity, ranking of the sensitivity (Advisian, 2017) and recovery time after exposure to hydrocarbons).

NA: Modelling predicted no shoreline accumulation for any season at or above the low threshold (10 g/m<sup>2</sup>) (RPS, 2022).

Shoreline response: Where shoreline clean-up has been given a negative score, this indicates use of equipment, machinery and personnel in that environment is likely to have negative effect, potentially causing more damage and prolonging the recovery and environmental benefit to that sensitivity.

\* While floating oil concentrations between 10 g/m<sup>2</sup> and 50 g/m<sup>2</sup> are predicted to occur in the LOWC scenario, it is intermittent. This intermittent pattern adds complexity to determining suitable windows of opportunity for dispersant application and containment strategies.

## 5 Response

### 5.1 Incident Management Team Briefing Documents and Task Checklists

The purpose of the CIMT is to gain control of an incident or event and bring it to a safe resolution while minimising the impact on personnel, the environment, assets and reputation. The key to controlling an incident is successful transition from an initial reactive mode to a proactive planning mode. This is achieved through a series of iterative stages that create and refine an IAP.

The Stybarrow Plug and Abandonment – First Strike Plan is listed in Appendix A – First Strike Plan of this document.

The First Strike Plan provides guidance to the Woodside CIMT in the first 24 hours of the spill to respond to a loss of hydrocarbons.

After 24 hours, the Woodside CIMT will further develop Incident Action Plans and Operational NEBAs, which are described further in Section 3.2.

The First Strike Plan acts as the IAP for the initial response (within the first 24 hours of the incident) and is used and updated until Planning prepares the first IAP that is approved by the CIMT IC. This checklist also acts as a permanent record of the initial response to the incident.

The roles and responsibilities for each CIMT position are described in Woodside's *Incident and Crisis Management Procedure* and position-specific *Duty Cards*. Initial notifications and response actions are detailed within the Stybarrow Plug and Abandonment First Strike Plan included herein at Appendix A.

## 6 Response Resources

### 6.1 Source Control

To facilitate and expedite the use of regional MODU for relief well drilling, an Australian Petroleum Production & Exploration Association (APPEA) Memorandum of Understanding: Mutual Assistance is in place. This agreement provides the mechanism to facilitate the transfer of drilling units and well-site services between operators in Australian and Timor Leste administered waters in order to respond urgently to emergency source control events.

Woodside has contracts in place with Wild Well Control Inc (WWCI) and would deploy their Singapore-based Capping Stack. The Singapore-based Capping Stack would be assembled quayside, tested and then transported via barge to a suitable deployment vessel where it would then be transferred, fastened and then commence its transit to the well site.

If the SFRT was required, Woodside has a contract in place with AMOSC to access the SFRT. The SFRT includes debris clearance equipment and ancillary tools. Woodside also has existing contractual arrangements in place with ROV providers. Specialist personnel to deploy the SFRT will be provided via Woodside's contract with Oceaneering.

#### 6.1.1 Well Control Specialists

The Source Control Section will comprise Woodside employees, led by the Woodside Source Control Section Chief. As required, Woodside may request personnel from WWCI or Oceaneering to provide specialist support within the CIMT.

### 6.2 Oil Spill Response Agencies

Woodside maintains contracts with a number of Oil Spill Response Organisations (OSROs). These OSROs have capability to provide technical specialists to supplement the Woodside CIMT if required. OSRO resources also include trained personnel to lead Field Response Teams and provide access to industry response equipment. The main relationships are detailed in the following sub-sections and contact details are included in the First Strike Plan in Appendix A.

#### 6.2.1 AMOSC

Woodside is a Member Company of AMOSC and as such has access to AMOSC's Level 2/3 equipment and personnel as outlined in the AMOSPlan.

AMOSC has contracts with all its member companies to enable the immediate release of Core Group personnel to be made available for any Woodside requirements, as outlined in Woodside's Master Service Contract and Principle and Agency Agreement with AMOSC.

The mutual aid arrangements that AMOSC operates under are collaborated under the AMOSPlan. This provides the mechanism for members of AMOSC to access oil spill response capability of other members. To further enhance the mutual aid arrangements Woodside, Santos, Chevron, and Jadestone have signed a memorandum of understanding (MoU) that defines the group's mutual aid arrangements. Under this MoU, Woodside, Santos, Chevron, and Jadestone have agreed to use their reasonable endeavours to assist in the provision of emergency response services, personnel, consumables and equipment.

#### 6.2.2 Oil Spill Response Limited (OSRL)

Woodside is a member of the OSRL group. OSRL have capacity to mobilise additional equipment and personnel to Western Australia from their Singapore location. Only nominated Woodside personnel may request the assistance of OSRL via the CIMT IC under OSRL's Service Level Agreement (SLA).

OSRL also has a Memorandum of Understanding (MoU) with AMOSC, and OSRL may also be activated by AMOSC to provide resources to AMOSC to respond to a situation. Following initial spill notification, OSRL may be mobilised if required within 8 hours.

Oil spill response equipment maintained by AMOSC (Exmouth, Fremantle and Geelong) and OSRL is available to Woodside during a spill response as part of contractual arrangements in place with these agencies. A complete list of equipment maintained by Woodside's OSRA, including stockpiles in Exmouth and Dampier from the MOSES database (DoT; equipment owners include AMSA, DoT and other titleholders) is provided in Woodside's [Oil Spill Equipment Directory](#) which is assured on a monthly basis.

### 6.2.3 Marine Spill Response Corporation

For protracted response operations, Woodside has an agreement in place with Marine Spill Response Corporation (MSRC), a US-based industry-owned OSRO, for the provision of up to 16 specialist response personnel.

## 6.3 Technical Support (Environmental Monitoring)

Woodside maintains emergency response contracts for the provision of environmental monitoring (operational and scientific monitoring) including water quality monitoring for subsea dispersant injection. Contact details are included in the First Strike Plan in Appendix A.

## 6.4 General Support

Woodside has arrangements in place and access to providers to supply personnel as required to populate response teams. Woodside has tested these arrangements and considers that personnel for shoreline response operations can be sourced to and maintained for the full duration of response to worst-case spill scenario including redundancy, rostering, shift coverage, and rotation for maintaining field capability for the duration of the response. Woodside will mobilise shoreline crews at the direction of WA DoT, and where possible prior to the predicted arrival of hydrocarbons. These crews will focus on pre-cleaning beach areas (e.g., removing debris such as seaweed to areas above the high tide mark) and establishing staging areas to enable a more efficient response when hydrocarbons are arriving ashore.

During the first strike response phase, Woodside will rely on the skilled personnel (i.e., Woodside's Burrup Response Team, AMOSC Core Group, OSRL) to supervise response crews. In addition, personnel from the National Response Team (NRT) will be mobilised. Pending international travel restrictions due to COVID-19 pandemic, OSRL may also supply a selection of ground staff who have the practical skills and experience to assist and support Woodside during a spill response.

All labour-hire or internal personnel not trained in oil spill response would receive role-specific on-the-job training prior to undertaking response operations. Training would be ongoing throughout the response operation.

Woodside has standing contract with labour-hire companies to enable access to a work force that have experience and understanding of HSEQ requirements and remote / regional working with appropriate clearance checks for onsite work.

## 6.5 Spill Response Logistics

A response to a worst-case discharge event will require a large number of equipment and personnel to be deployed and accommodated in multiple locations. Coordination of these aspects of the response will be the responsibility of the Logistics section in the IMT. Woodside has a number of existing arrangements for the storage and transport of equipment in and around Exmouth and Dampier, which will be initially used in a response. These arrangements include agreements with logistics providers for air, marine and land.

The current facilities in Exmouth can be supplemented by regional resources within appropriate timeframes for the response. Regional locations such as Onslow, Karratha and Port Headland are equipped to manage the logistical arrangements for construction, mining and petroleum projects, which are similar in scale to a

large-scale spill response. Woodside maintains a supply base in Dampier, which is immediately available to support response operations. These resources involve the movement of personnel, freight and equipment over large distances.

Woodside has internal resources and utilises third-party logistics providers for movements of freight from overseas locations by air or sea. Woodside along with the specialist contractors, are highly experienced in procurement and supply chain management for large scale projects and ongoing offshore operational activities. These skills are directly transferable to a spill response.

Road transportation of personnel will be by hire cars (for team leaders, SCAT teams, small teams) and by charter buses for large movements of teams such as shoreline responders. Woodside has arrangements in place with multiple service providers that are based in Exmouth and Karratha that can call on additional resources regionally as well as other regional providers. Regional providers can supplement the Exmouth/Karratha arrangements within 2-3 days.

Freight logistics by road will utilise existing local contracts and other local operators supplemented by larger regional providers. Woodside has existing arrangements in place for large scale freight movements by road in the North West.

Accommodation is likely to be a constraint in the response as the lack of suitable accommodation may restrict the numbers of response personnel that could be brought into the region. There is a variety of accommodation options in Exmouth ranging from hotel/motel, backpacker, holiday home rental and caravan and camping sites. This can be supplemented by fly-in-fly-out (FIFO) arrangements with mine camps, accommodation and aerodromes within the iron ore side of the business.

Dampier and Karratha currently have additional accommodation with large accommodation villages (i.e., Gap village) previously used for large construction projects available. These facilities can be used to accommodate responders to address shorelines in the Onslow – Dampier region if required or as a base for long commute by road or air to locations further south.

## 6.6 Response resource status

Woodside maintains databases of available response equipment and dispersant stockpiles which are updated on a monthly bases as part of the Hydrocarbon Spill Preparedness 'Internal Control Environment' (ICE) assurance process.

The Hydrocarbon Spill Response competency dashboard records the number of trained and competent responders that are available across Woodside, and some external providers, to participate in a response.

This number varies depending on expiry of competency certificates, staff attrition, internal rotations, leave and other absences. As such the Dashboard is designed to identify the minimum manning requirements and to identify sufficient redundancy to cater for the variances listed above.

## 6.7 Vessel Support

Woodside maintains an integrated fleet of vessels which are suited to offshore response activities and maintains a contract for provision of a monthly report on the availability and status of suitable emergency vessels and equipment for offshore response and source control operations. The report identifies suitable vessels including those that have an approved Safety Case for working in Australia and those closest to the incident location.

Port facilities at Exmouth, Onslow and Dampier will be used throughout the response. Woodside has access to a supply base in Dampier, which is immediately available to support response operations. A logistics plan will be developed by the IMT with a look ahead to replace or supplement vessels during the response operations to maintain the operational capability.

There may be circumstances where additional support vessels may be required to assist with spill response, e.g., deployment of equipment for an inshore response on North West Cape or transportation of equipment and people to offshore installations or island locations. Woodside monitors suitable vessel availability on a monthly basis. Requests for offshore vessel support can also be made by AMSA. The marine response strategies outlined in this plan can be performed independently or concurrently. In a Level 2/3 spill response, marine strategies are expected to be performed concurrently. During a response, if the CIMT determines that

additional vessels are required, Woodside can source them through supplier contracts or through vessels of opportunity available on local charter market in Exmouth or Onslow.

## 6.8 State and National Resources

In accordance with the State Hazard Plan – Maritime Environmental Emergency (SHP-MEE), and following consultation with the WA DoT, additional personnel to assist with labour intensive aspects of a response (if required) may be sourced through the State Combat Committee (Executive Advisory Group). Depending on the level of response required, sources of labour may include the local shire, DBCA and AMSA.

Under the National Plan, a National Response Team (NRT), comprising experienced personnel from operator to senior spill response manager level from Commonwealth/State/NT agencies, industry and other organisations, has been developed.

The services of the NRT will be obtained through the Environment Protection Group (EPG) and AMSA, which has made arrangements with the respective government and industry agencies, for the release of designated personnel for oil spill response activities. These services will be activated when it is assessed that an oil spill incident exceeds the resource availability at the state level.

During a National Plan incident, the Woodside CIMT or the State Marine Pollution Controller appointed by a Control Agency may submit a request to AMSA for personnel from other States/Territories to become part of the Incident Management Team or the incident response team.

A request should be made initially through the Environment Protection Duty Officer via the Emergency Response Centre on 1800 641 792 or 02 6230 6811. This request must be followed by written confirmation within three (3) hours of the verbal request.

The following information will be provided when making such a request:

- Roles or skills required (e.g., Planning Officer, Aerial Observer);
- Number of personnel required to fill each role;
- Contact name, address, and time of where personnel are to initially report; and
- Brief overview of the work to be undertaken.

Suitable personnel will then be selected by AMSA from the National Response Team or the National Response Support Team (NRST), unless special circumstances exist.

## SPILLS IN STATE/PORT WATERS

As detailed in the table above, in the event of a hydrocarbon spill (hereafter 'spill') where Woodside Energy Ltd ('Woodside') is the responsible party and the spill may impact State waters and shorelines, Woodside (or the Vessel Master) will commence the initial response actions and notify the Western Australian Department of Transport (DoT). In the event that Woodside is the responsible party for a spill that occurs within port limits, Woodside will notify the Port Authority for all spills, and also notify DoT for Level 2 and 3 spills.

Initially Woodside will be required to make available an appropriate number of suitably qualified persons to work in the DoT IMT Annex 6 – Woodside Liaison Officer Resources to DoT.

DoT/ Port Authority's role as the Controlling Agency in State waters/ within port limits does not negate the requirement for Woodside to have appropriate plans and resources in place to adequately respond to a marine hydrocarbon spill incident in State Waters/ within port limits or to commence the initial response actions to a spill prior to DoT establishing incident control in line with DoT *Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements* (July 2020). Cost recovery arrangements for offshore marine pollution incidents (MOP) are in accordance with Section 9 of the Guidance Note:

[https://www.transport.wa.gov.au/mediaFiles/marine/MAC\\_P\\_Westplan\\_MOP\\_OffshorePetroleumIndGuidance.pdf](https://www.transport.wa.gov.au/mediaFiles/marine/MAC_P_Westplan_MOP_OffshorePetroleumIndGuidance.pdf)

Woodside's Incident Management Structure for a hydrocarbon spill, including Woodside Liaison Officer's command structure within DoT can be seen at Annex 5 – Woodside Incident Management Structure.

The coordination structure for a concurrent hydrocarbon spill in both Commonwealth and State waters/ shorelines is shown in is shown in Annex 4 – Coordination structure for a concurrent hydrocarbon spill in both Commonwealth and State waters/ shorelines.

# 1. NOTIFICATIONS

The Incident Controller or delegate must ensure the below notifications (Table 1-1) are completed within the designated timeframes.

**For spills from a vessel, relevant notifications must be undertaken by a WEL representative.**

Table 1-1: Notifications

| In the event of an incident between campaign vessels, also activate relevant vessel Emergency Response Plans and/or Bridging Documents  |  |   |  |  |  |        |               |
|---|--|---|--|--|--|--------|---------------|
| Timing  | By   | To  | Name   | Contact  | Instruction  | Form   | Complete? (✓) |
| NOTIFICATIONS FOR ALL LEVELS OF SPILL   |  |   |  |  |  |        |               |
| Immediately   | Offshore Installation Manager (OIM) or Vessel Master | Woodside Communication Centre (WCC)   | CIMT IC  | ██████████<br>██████████████████<br>██████████████████ | Verbally notify WCC of event and estimated volume and hydrocarbon type.  | Verbal |               |
| Within 2 hours  | Woodside Site Rep (WSR)                              | National Offshore Petroleum Safety Environmental Management Authority (NOPSEMA <sup>1</sup> )       | Incident notification office   | ██████████   | Verbally notify NOPSEMA for spills >80L.<br>Record notification using Initial Verbal Notification Form or equivalent and send to NOPSEMA as soon as practicable (cc to NOPTA and DMIRS).   | ████   |               |
| Within 3 days   | WSR  |   |  |  | Provide a written NOPSEMA Incident Report Form as soon as practicable (no later than 3 days after notification) (cc to NOPTA and DMIRS)<br>NOPSEMA ████████████████████<br>NOPTA ████████████████████<br>DMIRS ████████████████████████████████  | ████   |               |
| As soon as practicable  | CIMT DM or Delegate                                  | Woodside  | Environment Unit Leader  | As per roster  | Verbally notify Environment Unit Leader of event and seek advice on relevant performance standards from EP   | Verbal |               |
| Within 2 hours of becoming aware of a marine oil pollution incident (MOP) that occurs in or may impact state waters   | CIMT DM or Delegate                                  | WA Department of Transport  | DoT Maritime Environmental Emergency Response Unit (MEER) Duty Officer | ██████████   | Verbally notify DoT MEER Duty Officer that a spill has occurred and, if required, request use of equipment stored in Karratha/Fremantle.<br>Follow up with a written POLREP as soon as practicable following verbal notification.<br>Additionally, DoT to be notified if spill is likely to extend into WA State waters. Request DoT to provide Liaison to WEL IMT.  | ████   |               |
| As soon as practicable  | CIMT DM or Delegate                                  | Department of Climate Change, Energy, the Environment and Water (DCCEEW) Director of National Parks | Marine Park Compliance Duty Officer                                    | ██████████   | The Marine Park Compliance Duty Officer is notified in the event of oil pollution within a marine park, or where an oil spill response action must be taken within a marine park, so far as reasonably practicable, prior to response action being taken.<br>This notification should include:<br><ul style="list-style-type: none"><li>titleholder details</li><li>time and location of the incident</li><li>proposed response arrangements and locations as per the OPEP</li><li>contact details for the response coordinator</li><li>confirmation of access to relevant monitoring and evaluation reports when available.</li></ul> | Verbal |               |
| As soon as practicable if there is potential for oiled wildlife or the spill is expected to contact land or waters managed by WA Department of Biodiversity, Conservation and Attractions | CIMT DM or Delegate                                  | WA Department of Biodiversity, Conservation and Attractions (DBCA)                                  | Duty Officer   | ██████████   | Phone call notification  | Verbal |               |

<sup>1</sup> Notification to NOPSEMA must be from a Woodside Representative.

| As soon as practicable  | Public Information  | Relevant cultural authorities               | To be determined                   | To be determined         | Should it be identified that relevant cultural authorities may be affected, Woodside would, at the relevant time, engage with these parties as appropriate.<br><br>Relevant cultural authorities will be re-assessed throughout the response period.   | Verbal initially |  |
| <b>ADDITIONAL NOTIFICATIONS TO BE MADE ONLY IF SPILL IS FROM A VESSEL</b>   |                     |   |                                    |                          |  |                  |  |
| Without delay as per protection of the Sea Act, part II, section 11(1)      | Vessel Master       | Australian Maritime Safety Authority (AMSA) | Response Coordination Centre (RCC) | ██████████<br>██████████ | Verbally notify AMSA RCC of the hydrocarbon spill.<br><br>Follow up with a written Marine Pollution Report (POLREP) as soon as practicable following verbal notification.  | ████             |  |
| <b>ADDITIONAL LEVEL 2/3 NOTIFICATIONS</b>                                   |                     |   |                                    |                          |  |                  |  |
| As soon as practicable  | CIMT DM or Delegate | AMOSC                                       | AMOSC Duty Manager                 | ██████████               | Notify AMOSC that a spill has occurred and follow-up with an email from the <b>CIMT IC/ CIMT Deputy IC/ CMT Leader</b> to formally activate AMOSC.<br><br>Determine what resources are required consistent with the AMOS Plan and detail in a Service Contract that will be sent to Woodside from AMOSC upon activation. | ████             |  |
| As soon as practicable  | CIMT DM or Delegate | Oil Spill Response Limited (OSRL)           | OSRL Duty Manager                  | ██████████               | Contact OSRL duty manager and request assistance from technical advisor in Perth.<br><br>Send the completed notification form to OSRL as soon as practicable.  | ████             |  |
|   |                     |   |                                    |                          | For mobilisation of resources, send the Mobilisation Form to OSRL as soon as practicable. The mobilisation form must be signed by a nominated callout authority from Woodside. OSRL can advise the names on the call out authority list, if required.  | ████             |  |
| As soon as practicable if extra personnel are required for incident support | CIMT DM or Delegate | Marine Spill Response Corporation (MSRC)    | MSRC Response Manager              | ██████████<br>██████████ | Activate the contract with MSRC (in full) for the provision of up to 30 personnel depending on what skills are required. Please note that provision of these personnel from MSRC are on a best endeavours basis and are not guaranteed.  | Verbal           |  |

**IN THE EVENT OF A HYDROCARBON SPILL THAT IS LIKELY TO TRAVERSE INTERNATIONAL WATERS, CIMT WILL NOTIFY THE AUSTRALIAN DEPARTMENT OF FOREIGN AFFAIRS AND TRADE (DFAT):**

██████████ and ██████████

## 2. RESPONSE TECHNIQUES

Table 2-1: Response techniques

| Technique   | Spill type   |              | Level | Pre- Identified Tactics   | Responsible              | ALARP Commitment Summary  | Link to Operational Plans for notification numbers and actions  |
|---|--------------|--------------|-------|---|--------------------------|---|---|
|   | Vessel (MDO) | LOWC (Crude) |       |   |                          |   |   |
| Operational monitoring – tracking buoy (OM02)                               | Yes          | Yes          | ALL   | If a vessel is on location, consider the need to deploy the oil spill tracking buoy. If no vessel is on location, consider the need to mobilise oil spill tracking buoys from the King Bay Supply Base (KBSB) Stockpile.<br><br>If a surface sheen is visible from the facility, deploy the satellite tracking buoy within two hours. | Operations               | DAY 1:<br>Tracking buoy deployed within 2 hours.  | Surveillance and Reconnaissance to Detect Hydrocarbons and Resources at Risk (OM02) of The Operational Monitoring Operational Plan.<br><br>Deploy tracking buoy in accordance with [REDACTED]   |
| Operational monitoring – predictive modelling (OM01)                        | Yes          | Yes          | ALL   | Undertake initial modelling using the <a href="#">Rapid Assessment Oil Spill Tool</a> and weathering fate analysis using Automated Data Inquiry for Oil Spills (ADIOS) or refer to the hydrocarbon information in <a href="#">Appendix A</a> .  | Situation or Environment | DAY 1:<br>Initial modelling within 6 hours using the Rapid Assessment Tool.   | Predictive Modelling of Hydrocarbons to Assess Resources at Risk (OM01 of The Operational Monitoring Operational Plan).<br><br>[REDACTED]   |
|   | Yes          | Yes          | ALL   | Send Oil Spill Trajectory Modelling (OSTM) form ( <a href="#">Appendix B, Form 7</a> ) to RPS Response ([REDACTED]).  | Situation                | DAY 1:<br>Detailed modelling within 4 hours of RPS Response receiving information from Woodside.  | <i>Planning to download immediately and follow steps</i>  |
| Operational monitoring – aerial surveillance (OM02)                         | Yes          | Yes          | ALL   | Instruct Aviation Unit Leader to commence aerial observations in daylight hours. Aerial surveillance observer to complete log in <a href="#">Appendix B Form 8</a> .  | Logistics – Aviation     | DAY 1:<br>2 trained aerial observers.<br>1 aircraft available.<br><br>Report made available to the IMT within 2 hours of landing after each sortie.   | Surveillance and Reconnaissance to Detect Hydrocarbons and Resources at Risk (OM02 of The Operational Monitoring Operational Plan).<br><br>[REDACTED]<br><i>Planning to download immediately and follow steps</i>                       |
| Operational monitoring – satellite tracking (OM02)                          | Yes          | Yes          | ALL   | The Situation Unit Leader should be instructed to stand up Kongsberg Satellite Services (KSAT) to provide satellite imagery of the spill ([REDACTED]).  | Situation                | DAY 1:<br>Service provider will confirm availability of an initial acquisition within 2 hours.<br><br>Data received to be uploaded into Woodside Common Operating Picture.  | <i>Planning to download immediately and follow steps</i>  |
| Operational monitoring – monitoring hydrocarbons in water (OM03)            | Yes          | Yes          | ALL   | Consider the need to mobilise resources to undertake water quality monitoring (OM03).   | Planning or Environment  | DAY 3:<br>Service provider deploy resources within 3 days:<br>- 3 specialists in water quality monitoring<br>- 2 monitoring systems and ancillaries<br>- 1 vessel for deploying the monitoring systems with a dedicated winch, A-frame or Hiab and ancillaries to deploy the equipment.<br><br>Daily fluorometry reports will be provided to IMT. | Detecting and Monitoring for the Presence and Properties of Hydrocarbons in the Marine Environment (OM03 of The Operational Monitoring Operational Plan).<br><br>[REDACTED]<br><i>Planning to download immediately and follow steps</i> |
| Operational monitoring – pre-emptive assessment of receptors at risk (OM04) | Yes          | Yes          | ALL   | Consider the need to mobilise resources to undertake pre-emptive assessment of sensitive receptors at risk (OM04).  | Planning or Environment  | Within 2 days of impacts predicted by OM01/02/03, and in agreement with WA DoT (for Level 2/3 incidents), deployment of 2 specialists from resource pool in establishing the status of sensitive receptors  | Pre-emptive Assessment of Sensitive Receptors (OM04 of The Operational Monitoring Operational Plan).<br><br>[REDACTED]<br><i>Planning to download immediately and follow steps</i>  |
| Operational monitoring – shoreline assessment (OM05)                        | Yes          | Yes          | ALL   | Consider the need to mobilise resources to undertake shoreline assessment surveys (OM05).   | Planning or Environment  | Within 2 days of impacts predicted by OM01/02/03, and in agreement with WA DoT (for Level 2/3 incidents), deployment of 1 specialist in SCAT for each RPA   | Shoreline Assessment (OM05 of The Operational Monitoring Operational Plan).<br><br>[REDACTED]<br><i>Planning to download immediately and follow steps</i>   |

| Technique                           | Spill type   |              | Level | Pre- Identified Tactics   | Responsible            | ALARP Commitment Summary   | Link to Operational Plans for notification numbers and actions  |
|-------------------------------------|--------------|--------------|-------|---|------------------------|--|---|
|                                     | Vessel (MDO) | LOWC (Crude) |       |   |                        |  |   |
| Surface dispersant                  | No           | Potentially  | L2/3  | <p>Modelling for a LOWC of Stybarrow Crude does not predict floating hydrocarbons at minimum threshold required for feasible surface dispersant application. However, it is included as a contingent (secondary) option for possible intermittent areas of floating oil concentrations between 10 and 50 g/m<sup>2</sup>. This intermittent pattern adds complexity to determining suitable windows of opportunity for dispersant application.</p> <p>Surface dispersant application is also not deemed to be a feasible response technique for spills of highly volatile hydrocarbons such as MDO as it is prone to rapid spreading, thinning and evaporation. Dispersant droplets pass through thin surface films without binding to the hydrocarbon and thus its use would unnecessarily introduce additional chemical substances to the marine environment and increase entrained hydrocarbons.</p> <p>Dispersant use is therefore not considered to provide a net environmental benefit.</p> | Logistics and Planning | <p>1 aircraft with minimum payload of 1,850 litre mobilised to site within 4 hours of activation.</p> <p>3 additional aircraft mobilised to site within another 20 hours of activation.</p> <p>1 high capacity aircraft with minimum payload of 10 m<sup>3</sup> mobilised to site within 20 hours of activation if required.</p> <p>2 offtake support vessels from integrated fleet will undertake dispersant trials within 48 hours of the release as per first strike plan.</p> <p>Up to 4 vessels spraying per day by day 5.</p> <p>Access to 5000 m<sup>3</sup> of dispersant on activation of Global Dispersant (GDS) membership within 24-48 hours.</p> | <p>Surface Dispersants Operational Plan</p> <p>█</p> <p><i>Logistics to download immediately and follow steps</i></p>       |
| Containment and recovery            | No           | Potentially  | L2/3  | <p>Modelling for a LOWC of Stybarrow Crude does not predict floating hydrocarbons at minimum threshold required for feasible deployment of containment and recovery operations. However, it is included as a contingent (secondary) option for possible intermittent areas of floating oil concentrations between 10 and 50 g/m<sup>2</sup>. This intermittent pattern adds complexity to determining suitable windows of opportunity for containment and recovery application.</p> <p>Additionally, volatile hydrocarbons such as MDO are likely to weather, spread and evaporate quickly and lead to unsafe conditions in the vicinity of fresh hydrocarbon.</p> <p>Corralling volatile substances such as MDO also poses a safety risk and thus should be avoided. This response technique is therefore not recommended.</p>   | Logistics and Planning | <p>2 containment and recovery operations would be mobilised by day 2.</p> <p>4 additional vessel-based containment and recovery operations using 3<sup>rd</sup> party provider resources could be mobilised by day 10.</p> <p>Deployment of 2 containment and recovery teams would be available by day 2, and 4 containment and recovery teams available by day 10.</p> <p>Each operation will have internal or added 100 m<sup>3</sup> of liquid waste storage onboard.</p>   | <p>Containment and Recovery Operational Plan</p> <p>█</p> <p><i>Logistics to download immediately and follow steps</i></p>  |
| Mechanical dispersion               | No           | No           | N/A   | This response strategy is not recommended.  |                        |  |   |
| In-situ burning                     | No           | No           | N/A   | This response strategy is not recommended.  |                        |  |   |
| Shoreline protection and deflection | No           | Yes          | L2/3  | <p>Shoreline protection and deflection may be deployed in agreement with WA DoT (Level 2/3 spills) if Operational Monitoring activities predict shoreline contact.</p> <p>Woodside will mobilise and commence shoreline protection and deflection tactics to reduce the volume of oil accumulating on shorelines at selected RPAs.</p> <p>Equipment and relevant personnel from Woodside, AMOSC and AMSA stockpiles to be</p>   | Logistics and Planning | <p>In agreement with WA DoT, activate relevant Tactical Response Plans (TRPs) within 24 hours of the release.</p> <p>In agreement with WA DoT, mobilise teams to RPAs within 2 days of operational monitoring predicting impacts.</p> <p>Equipment mobilised from closest stockpile within 2 days of operational monitoring predicting impacts.</p>  | <p>Protection and Deflection Operational Plan</p> <p>█</p> <p><i>Logistics to download immediately and follow steps</i></p> |

### 3. RESPONSE PROTECTION AREAS

**Action: Provide relevant Control Agency with applicable Tactical Response Plans for any Response Protection Areas (RPAs) identified during operational monitoring.**

Based on hydrocarbon spill modelling results, there are no sensitive receptors with the potential to be contacted by hydrocarbon at or above impact threshold levels within 48 hours of a spill.

The deterministic hydrocarbon spill modelling run demonstrating the shortest timeframe to shoreline contact at or above feasible response threshold levels ( $>100 \text{ g/m}^2$ ) indicates that the following sensitive receptor has the potential to be contacted by hydrocarbons beyond 48 hours of a spill:

- Exmouth (Day 5,  $26 \text{ m}^3$ )

The deterministic hydrocarbon spill modelling run demonstrating the greatest spread of shoreline impact at or above feasible response threshold levels ( $>100 \text{ g/m}^2$ ) indicate potential contact from Day 35 and beyond as follows:

- Between Day 35 and Day 56 (Month 2) – peak accumulations ( $>100 \text{ g/m}^2$ ) total  $622.6 \text{ m}^3$  across 26 sites with the maximum single accumulation of  $226 \text{ m}^3$  at Ashburton on Day 40.
- Between Day 57 and Day 103 (Months 3 and 4) – peak accumulations ( $>100 \text{ g/m}^2$ ) total  $623.3 \text{ m}^3$  across 5 additional sites with the maximum single accumulation of  $297 \text{ m}^3$  at Exmouth on Day 58.

Additional information on these receptors can be found in Section 2.2.3 of the Stybarrow Plug and Abandonment OPEP.

Tactical Response plans for these locations can be accessed via the [Hydrocarbon Spill Response Information - Tactical Response Plans](#) and include the details of potential forward operating bases and staging areas.

Oil Spill Trajectory Modelling specific to the spill event will be required to determine the regional sensitive receptors to be contacted beyond 48 hours of a spill.

**Figure 3-1** illustrates the location of regional sensitive receptors in relation to the Stybarrow Plug and Abandonment Operational Area and identifies priority protection areas.

Consideration should be given to other stakeholders (including mariners) in the vicinity of the spill location. **Table 3-1** indicates the assets within the vicinity of the Stybarrow Plug and Abandonment Operational Area.

**Table 3-1: Assets in the vicinity of the Stybarrow Plug and Abandonment Operational Area**

| Asset                 | Distance and Direction from Operational Area | Operator |
|-----------------------|--|----------|
| Ngujima-Yin FPSO      | 20 km east                                   | Woodside |
| Ningaloo Vision FPSO  | 23 km east                                   | Santos   |
| Pyrenees Venture FPSO | 26 km east-south-east                        | Woodside |

#### 4. SURFACE DISPERSANT APPLICATION

Surface dispersant application is not considered an appropriate contingent (secondary) response strategy for this activity as described in the Stybarrow Plug and Abandonment Environment Plan.

It is not likely to be effective based on modelling results. None of the LOWC deterministic simulations predict floating oil exposure  $\geq 50 \text{ g/m}^2$ . While floating oil concentrations between 10 and 50  $\text{g/m}^2$  are predicted to occur, it is intermittent.

Surface dispersant application may be viable in these intermittent areas of floating oil concentrations between 10 and 50  $\text{g/m}^2$  however this intermittent pattern adds complexity to determining suitable windows of opportunity for dispersant application.

If required, the CIMT Planning Section would work to determine an appropriate zone of dispersant application.

## ANNEX 1 – CREDIBLE SPILL SCENARIOS AND HYDROCARBON INFORMATION

Table A - 1: Credible spill scenarios and hydrocarbon information

| Scenario   | Product           | API gravity | Volume                | Residue                       | Weathering rate                     |       | Suggested ADIOS2 Analogue <sup>2</sup> |
|--|-------------------|-------------|-----------------------|-------------------------------|-------------------------------------|-------|--|
|  |                   |             |                       |                               |                                     |       |  |
| CS-01 (WCCS)<br>Loss of well control (LOWC)                | Stybarrow Crude   | 22.8        | 10,264 m <sup>3</sup> | 42.6% or 4,372 m <sup>3</sup> | 12 hours (BP < 180 °C)              | 3.1%  | Wandoo (AD01895)<br>API 19.4           |
|  |                   |             |                       |                               | 24 hours (180 °C < BP < 265 °C)     | 23.7% |  |
|  |                   |             |                       |                               | Several days (265 °C < BP < 380 °C) | 30.6% |  |
| CS-02<br>Vessel collision resulting in rupture of MDO tank | Marine Diesel Oil | 37.6        | 1,000 m <sup>3</sup>  | 5% or 50 m <sup>3</sup>       | 12 hours (BP < 180 °C)              | 6%    | Diesel Fuel Oil (Southern USA 1)       |
|  |                   |             |                       |                               | 24 hours (180 °C < BP < 265 °C)     | 35%   |  |
|  |                   |             |                       |                               | Several days (265 °C < BP < 380 °C) | 54%   |  |

<sup>2</sup> Initial screening of possible ADIOS2 analogues considered hydrocarbons with similar APIs. Suggested selection is based on the closest distillation cut to the Woodside hydrocarbon. Only hydrocarbons with >380°C distillation cuts were included in selection process.

### ANNEX 4 – COORDINATION STRUCTURE FOR A CONCURRENT HYDROCARBON SPILL IN BOTH COMMONWEALTH AND STATE WATERS/ SHORELINES<sup>3</sup>

The Control Agency for a hydrocarbon spill in Commonwealth waters resulting from an offshore petroleum activity is Woodside (the Petroleum Titleholder).

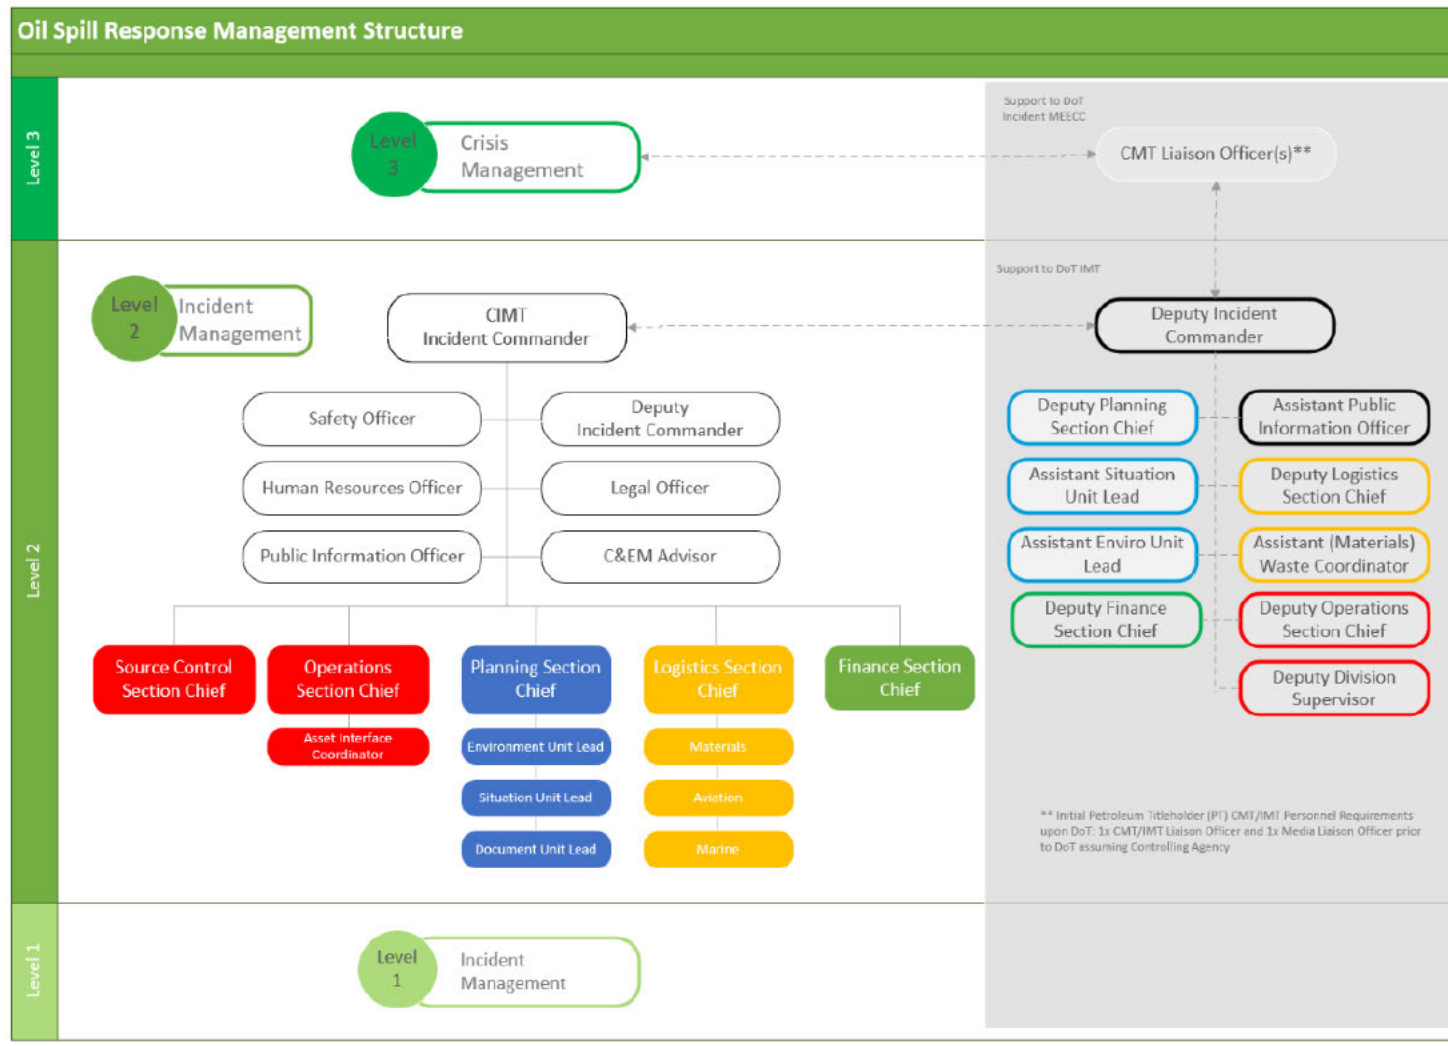

The Control Agency/HMA for a hydrocarbon spill in State waters/shorelines resulting from an offshore petroleum activity is DoT. DoT will appoint an Incident Controller and form a separate IMT to only manage the spill within State waters/shorelines.

<sup>3</sup> Adapted from DoT Offshore Petroleum Industry Guidance Note, Marine Oil Pollution: Response and Consultation Arrangements July 2020. Note: For full structure up to Commonwealth Cabinet/Minister refer to Marine Oil Pollution: Response and Consultation Arrangements Section 6.5, Figure 4.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

## ANNEX 5 – WOODSIDE INCIDENT MANAGEMENT STRUCTURE

Woodside Incident Management Structure for Hydrocarbon Spill (including Woodside Liaison Officers Command Structure within DoT IMT if required).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

## ANNEX 6 – WOODSIDE LIAISON OFFICER RESOURCES TO DOT

In the event that DoT is required to establish an IMT, Woodside will make available an appropriate number of appropriately qualified persons to work within the DoT IMT. In the event the PPA is the Control Agency within the Dampier Port Limits, Woodside will make available similar roles as requested.

It is an expectation that Woodside’s nominated CMT Liaison Officer and the Deputy Incident Controller attend the DoT Fremantle ICC as soon as possible after the formal request has been made by the State Marine Pollution Coordinator (SMPC), and no later than 8am on the day following the request being formally made. For Woodside personnel designated to serve in DoT’s Forward Operating Base (FOB), it is expected that they arrive at the FOB no later than 24 hours from the formal request being made by the SMPC.

| Area   | Woodside Liaison Role <sup>4</sup>    | Key Duties  | # |
|--|---------------------------------------|---|---|
| DoT Maritime Environmental Emergency Coordination Centre (MEECC) | CIMT Liaison                          | <ul style="list-style-type: none"> <li>• Provide a direct liaison between the CMT and the MEECC.</li> <li>• Facilitate effective communications and coordination between the CIMT Leader and State Marine Pollution Coordinator (SMPC).</li> <li>• Offer advice to SMPC on matters pertaining to PT crisis management policies and procedures.</li> </ul>   | 1 |
| DoT IMT Incident Control   | Deputy Incident Commander (Deputy IC) | <ul style="list-style-type: none"> <li>• Provide a direct liaison between the PT IMT and DoT IMT.</li> <li>• Facilitate effective communications and coordination between the PT IC and the DoT IC.</li> <li>• Offer advice to the DoT IC on matters pertaining to PT incident response policies and procedures.</li> <li>• Offer advice to the Safety Coordinator on matters pertaining to PT safety policies and procedures, particularly as they relate to PT employees or contractors operating under the control of the DoT IMT.</li> </ul>  | 1 |
| DoT IMT Intelligence   | Situation Unit Leader (Intelligence)  | <ul style="list-style-type: none"> <li>• As part of the Intelligence Team, assist the Intelligence Officer in the performance of their duties in relation to situation and awareness.</li> <li>• Facilitate the provision of relevant modelling and predications from the PT IMT.</li> <li>• Assist in the interpretation of modelling and predictions originating from the PT IMT.</li> <li>• Facilitate the provision of relevant situation and awareness information originating from the DoT IMT to the PT IMT.</li> <li>• Facilitate the provision of relevant mapping from the PT IMT.</li> <li>• Assist in the interpretation of mapping originating from the PT IMT.</li> </ul> | 1 |

<sup>4</sup> These positions would be mobilised, in consultation with DoT, to align to the actual spill scenario. The selected roles and/or individual personnel would be subject to continued evaluation to ensure continued 'best fit'. For CIMT roster arrangements, contact the WCC. During a prolonged response, additional personnel may be sourced through internal resourcing and mutual Aid agreements such as the AMOSC Core Group via [REDACTED]

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

## **Appendix E. ALARP Assessment for Resourcing Oil Spill Response Strategies**

# 1 Source Control (Vessel)

## 1.1 Source Control via Vessel SOPEP – ALARP Assessment

Alternative, additional and improved options have been assessed against the base capability described in Section 10.4.1 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 1.1.1 Alternative control measures

| Alternative Control Measures considered   |                             |             |              |             |
|---|-----------------------------|-------------|--------------|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |                             |             |              |             |
| Option considered   | Environmental consideration | Feasibility | Approx. Cost | Implemented |
| No reasonably practical alternative control measures identified   |                             |             |              | N/A         |

### 1.1.2 Additional control measures

| Additional Control Measures considered   |                             |             |              |             |
|--|-----------------------------|-------------|--------------|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |                             |             |              |             |
| Option considered  | Environmental consideration | Feasibility | Approx. Cost | Implemented |
| No reasonably practical additional control measures identified   |                             |             |              | N/A         |

### 1.1.3 Improved control measures

| Improved Control Measures considered  |                             |             |              |             |
|---|-----------------------------|-------------|--------------|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |                             |             |              |             |
| Option considered   | Environmental consideration | Feasibility | Approx. Cost | Implemented |
| No reasonably practical improved control measures identified  |                             |             |              | N/A         |

## 1.2 Selected control measures

Following review of alternative, additional and improved control measures, the following controls were selected for implementation for the activity.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected

## 2 Source Control (Well Intervention)

Woodside has based its response planning on the worst-case credible scenarios (as described in the Stybarrow Well Plug and Abandonment Environment Plan). This includes the following selection of primary source control and well intervention techniques which would be conducted concurrently:

- ROV intervention
- debris clearance and/or removal
- capping stack
- relief well drilling.

### 2.1 ROV Intervention

Following confirmation of an emergency event, Woodside would mobilise inspection class ROVs to assess the status of the wellhead. The ROV available on the MODU can be deployed for this purpose within 48 hours. Work class ROVs for well intervention are also available through the existing frame agreements and are available for deployment within seven days (Table 2-1). It is not expected that any additional regulatory approvals would be required as inspection, maintenance and repair is within the scope of activities for the Stybarrow Operations Safety Case as well as the scope of activities for contracted Frame Agreement vessels.

As Woodside holds Frame Agreements for vessels along with contracts for ROV providers and pilots, inspection activities using ROVs are expected to commence within seven days.

A hydraulic accumulator contained as part of the SFRT can be mobilised and deployed with well intervention attempted within 11 days.

**Table 2-1: ROV timings**

|  | Estimate ROV inspection duration for Stybarrow-7 |
|--|--|
| Source and mobilise vessel with work class ROV     | 2 days   |
| Liaise with Regulator regarding risks and impacts* | 4 days   |
| Undertake ROV Inspection                           | 1 day  |
| TOTAL  | 7 days*  |

\* Based on timings from the Report into the Montara Commission of Enquiry, submission and discussion of revised documentation for limited activities inside the Petroleum Safety Zone (water deluge operations) to manage personnel risks and impacts was up to 20 days.

#### 2.1.1 Safety Case considerations

Woodside has assessed against the NOPSEMA safety case guidance (NOPSEMA N-09000-GN1661), confirming that vessels conducting subsea intervention operations are not classified as an “associated offshore place” but as a facility and therefore require the appropriate Safety Case arrangements to be in place. In the event of an emergency, Woodside has access to suitable vessels (ISVs) for well intervention through existing frame agreements. The frame agreements for ISV vessels require the vessels to maintain in-force safety case approval covering a range of subsea activities. This would cover the requirement for intervention operations such as subsea manifold installation, maintenance and repair, commissioning, cargo transfer (including bulk liquids) and ROV operations. With frame agreements in place, the credible Safety Case Scenario from those presented in Figure 2-3 for implementing this response would be “no safety case revision required”. Timeframes for well intervention are detailed in Figure 2-2 and would be implemented concurrently to the actions required by the “no Safety Case” revision scenario detailed in Figure 2-3, therefore, the Safety Case scenario will have no impact on the delivery of the strategy.

### 2.2 Debris clearance and/or removal

The Woodside Source Control Response Procedure details the mobilisation and resource requirements for implementing this strategy. Debris clearance may be required as a prerequisite to deployment of the capping stack. The AMOSC SFRT would be mobilised from Fremantle. The mobilisation of the SFRT would take place in parallel with mobilisation of the capping stack to ensure initial ROV surveys and debris clearance have

commenced before the arrival of the capping stack. The SFRT comprises ROV-deployed cutters and tools that are used to remove damaged or redundant items from the wellhead and allow improved access to the well. The SFRT can be mobilised and deployed with well intervention attempted within 11 days.

### 2.2.1 Safety Case considerations

Woodside has assessed against the NOPSEMA safety case guidance (NOPSEMA N-09000-GN1661) and can confirm that vessels conducting debris clearance and removal operations are not classified as an “associated offshore place” but as a facility and therefore require the appropriate Safety Case arrangements in place. In the event of an emergency, Woodside has access to suitable ISVs for these operations through existing frame agreements. The frame agreements for ISVs require the vessels to maintain in-force safety case approval covering a range of subsea activities. This would cover the requirement for debris clearance and removal operations such as subsea manifold installation, commissioning, cargo transfer (including bulk liquids) and ROV operations. With frame agreements in place, the credible Safety Case Scenario, from those presented in Figure 2-3 for implementing this response would be “no safety case revision required”. Timeframes for debris clearance and removal equipment deployment are detailed in Figure 2-2 and would be implemented concurrently to the actions required by the “No Safety Case” revision scenario detailed in Figure 2-3, therefore, the Safety Case scenario will have no impact on the delivery of the strategy.

## 2.3 Capping stack

The Woodside Source Control Emergency Response Procedure details the mobilisation and resource requirements for implementing this strategy. A capping stack is designed to be installed on a subsea well and provides a temporary means of sealing the well, until a permanent well kill can be performed through either a relief well or well re-entry.

In the event of a loss of well containment at less than the WCCS, the use of a subsea deployment method such as a heavy lift vessel, which is more commonly used in industry, is a more reliable and, in turn, ALARP approach. If environmental conditions permit (wind speed, wave height, current and plume radius), vertical deployment of a capping stack with a heavy lift vessel with a 150 T crane capacity in shallower waters or 250 T crane in deeper waters could be feasible.

Woodside assumes that sourcing conventional capping stack deployment vessels would be per the Activity Source Control Emergency Response Plan. This plan has pre-identified vessel specifications for the capping stack deployment and Woodside monitors the availability and location of these vessels on a monthly basis. Woodside maintain several frame agreements with various vessel service providers and maintains the ability to call off services with a capping stack and debris clearance agreement. The location of suitable vessels for capping stack deployment are monitored monthly. The supply arrangements and reliability to achieve the required mobilisation time will be revalidated prior to spud. Consideration to mobilise the capping stack from the supplier on a suitable vessel but then hand over to another vessel to conduct the capping activity will also be made to meet response time frames.

A capping stack will be mobilised to site within 16 days. Woodside will monitor the conditions around the wellsite and deployment for well intervention attempt will be undertaken once plume size is acceptable and safety and metocean conditions are suitable.

### 2.3.1 Safety Case considerations

Woodside has assessed against the NOPSEMA safety case guidance (NOPSEMA N-09000-GN1661) and can confirm that vessels conducting capping stack are not classified as an “associated offshore place” but as a facility and therefore require the appropriate Safety Case arrangements in place.

The 16-day timeframe to mobilise the vessel is based on the following assumptions:

- existing frame agreement vessel, located outside the region with approved Australian Safety Case
- a safety case revision and scope of validation is required
- vessel meets the technical requirements for deploying capping stack as per the Source Control Emergency Response Plan (SCERP)
- vessel has an active heave compensated crane, rated to at least 150 T for shallow waters or 250 T in deeper waters and at least 90 m in length and a deck capacity to hold at least 110 T of capping stack.

Timeframes for capping stack deployment detailed in Figure 2-2 would be implemented concurrently with the actions required for the Safety Case revision development scenarios detailed in Figure 2-3 and Table 2-3. To reduce uncertainty in regulatory approval timeframe, Woodside is collaborating with The Drilling Industry

Steering Committee (DISC) and a contracted ISV Vessel Operator to develop a generic Safety Case Revision that contemplates a capping stack deployment. This Safety Case Revision will be used to reduce uncertainty in permissioning timeframes in the event a capping stack deployment is required. Woodside will execute the capping stack response in the fastest possible timeframe, provided the required safety and metocean conditions allow. Woodside has considered a broad range of alternate, additional, and improved options as outlined later in Section 2.5.

## 2.4 Relief Well drilling

The options analysis detailed in this section considers options to source, contract and mobilise a MODU and ensure necessary regulatory approvals are in place to meet timelines for relief well drilling. The screening for relief well drilling MODUs is based on the following and the process used for Stybarrow-7 is illustrated in Figure 2-1:

- Primary – review internal Woodside drilling programs and MODU availability to source an appropriate rig operating within Australia with an approved Safety Case.
- Alternate – source and contract a MODU through APPEA MOU that is operating within Australia with an approved Safety Case.
- Contingency – Source and contract a MODU outside Australia with an approved Australian Safety Case.

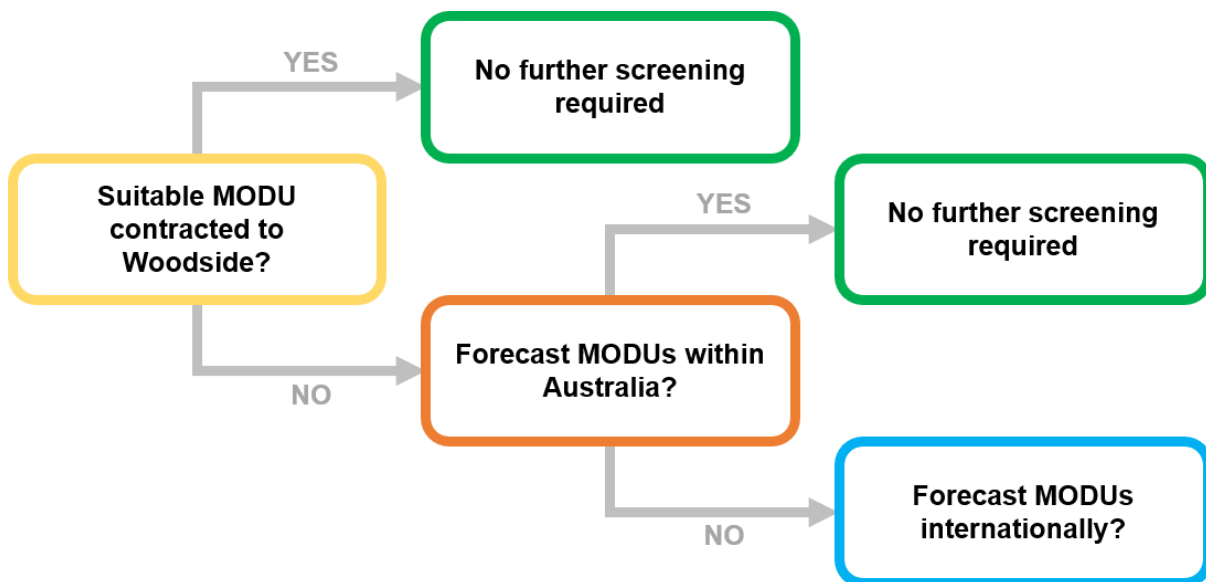

Figure 2-1: Stybarrow-7 process for sourcing relief well MODU

Screening of a relief well MODU from international waters is undertaken only if required, i.e. there is low confidence in local (Australian) availability. The capability, location and Australian Safety Case status is assessed for each Woodside contracted MODU. In the event the Woodside contracted MODUs are unsuitable, screening is extended to all MODUs operating in Australian Waters. The suitability and location of pre-identified relief well MODUs is tested again prior to the operation. Though the APPEA MoU will serve as the instrument to facilitate the transfer of drilling units and well site services between operators in the event of an emergency, Woodside will engage each of the identified titleholders in advance to maintain confidence in MODU suitability and availability.

Based on the detail provided, the Primary and Alternate approaches are expected to be achieved within the 21-day period.

The internal and external availability of moored MODUs, plus rig activities of registered operators and rigs with approved safety cases, are tracked by Woodside on a monthly basis, with a two-year look ahead, to ensure that the best available option can be sourced and utilised in the event of the worst-case credible scenario.

If the above forecast indicates a gap in availability of a suitable MODU for relief well drilling within Australia, screening would be extended to MODUs with a valid safety case outside Australia. If an international MODU with an Australian safety case is not identified, an internal review will be undertaken, NOPSEMA notified and the issue tabled at the APPEA Drilling Industry Safety Committee. A review of the significance of the change

in risk will be undertaken in accordance with Woodside's environment management of change requirements and relevant regulatory triggers. The aforementioned lookahead timeframe would allow two years' warning of any potential gap. Woodside will execute relief well drilling in the fastest possible timeframe.

The detail of these arrangements demonstrates that the risks have been reduced to ALARP and Acceptable levels through the control measures and performance standards outlined in Section 10.4.1 of the Environment Plan.

### 2.4.1 Relief Well drilling timings

The duration of a blowout (from initiation to a successful kill) is assessed as 73 days for Stybarrow-7 well. Relief wells for other wells within the field are expected to be similar duration.

Details on the steps and time required to drill a relief well is shown in Table 2-2. DP and moored MODUs are suitable for the Stybarrow-7 well. A moored MODU has been used as the basis for the analysis within this document.

To validate the effectiveness of the relief MODU supply arrangements through the APPEA MoU, an exercise to test the 21-day mobilisation period forms part of Woodside's three-yearly Hydrocarbon Spill Arrangements Testing Schedule. Testing of these arrangements are facilitated by an external party and includes suspension of the assisting operator's activities, contracting the MODU, vessel safety case revision and transit to location.

**Table 2-2: Relief well drilling timings**

|   | Estimate Relief Well duration for Stybarrow-7 (days) – moored |
|---|---|
| Suspend operations and secure well (under APPEA MoU), source and contract MODU and mobilise to location. Concurrently secure regulatory approval. | 21 days (MODU from within region)                             |
|   | 44 days (MODU from South-east Asia)                           |
| Drill well to intercept point (approx. 13.5 days)   | 13.5 days   |
| Intercept and kill well (approx. 15.5 days).  | 15.5 days   |
|   | <b>73.0 days</b>  |

The following conditions and assumptions are applicable:

- A dynamically positioned MODU is not available.
- A pre-lay mooring spread is required to moor the rig over subsea infrastructure which would occur in parallel to MODU mobilisation.

Woodside has considered a broad range of alternate, additional, and improved options as outlined in Section 2.5.

Intersect and kill duration is estimated at 15.5 days. This is a moderately conservative estimate. During the intersect process, the relief well will be incrementally drilled and logged to accurately approach and locate the existing well bore. This will result in the highest probability of intersecting the well on the first attempt and thus will reduce the overall time to kill the well. During the Montara incident, it took five attempts to achieve a successful intersect.

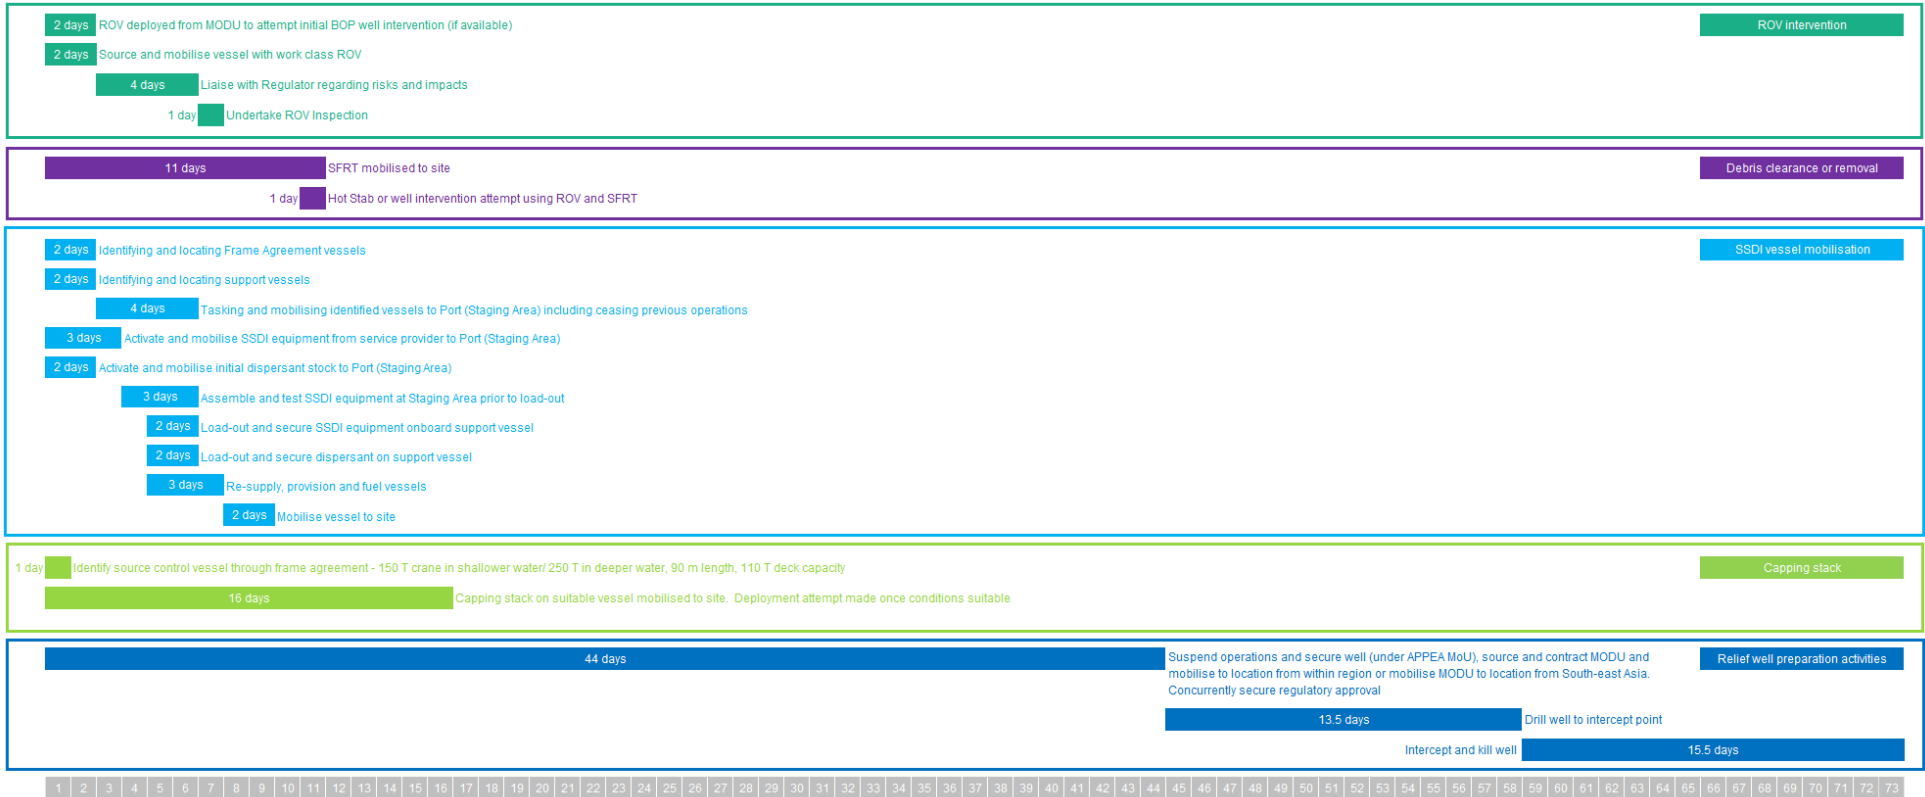

Figure 2-2: Source control and well intervention response strategy deployment timeframes for Stybarrow-7 well

## 2.4.2 Safety Case considerations

Woodside recognises that it will not be the Operator or holder of the Safety Case for the MODU and/or vessels involved in relief well activities. In the event that a revision to the Operator's Safety Case is required for relief well drilling, Woodside has identified measures to ensure timely response and optimise preparedness as far as practicable that can be undertaken to expedite a straightforward Safety Case revision for a MODU/ vessel to commence drilling a relief well. Performance standards associated with these measures have been included in Section 10.4.1.

These include;

- Access to Safety and Risk discipline personnel with specialist knowledge.
- Monitoring internal and external rigs and vessel availability in the region and extended area through contracted arrangements on a monthly basis, with a two-year lookahead.
- Prioritisation of rigs/vessels with current or historical contracting arrangements. Woodside maintains records of previous contracting arrangements and companies. All current contracts for vessels and rigs are required to support Woodside in the event of an emergency.
- Leverage mutual aid arrangements such as the APPEA MOU for vessel and rig support.
- Woodside Planning and Logistics, and Safety Officers (on-Roster/Call 24/7) which can articulate need for, and deliver Woodside support, in key delivery tasks including sitting with potential outside operators.
- Ongoing strategic industry engagement and collaboration with NOPSEMA to work toward time reductions in regulatory approvals for emergency events.

Woodside has identified three safety case revision development and submission scenarios for a MODU and plotted these alongside the relief well preparation activities in Figure 2-3. The assumptions for each of the cases are detailed in subsequent Table 2-3.

The MODUs screened for contingency relief well drilling all operate under an Accepted base Safety Case. A relief well Safety Case Revision would leverage the previously accepted Safety Case Revision for Stybarrow-7, including the associated site-specific well hazards. As such, there is less new detail for the regulator to review and should present a short review timeframe with no impact expected to the commencement of relief well drilling activities.

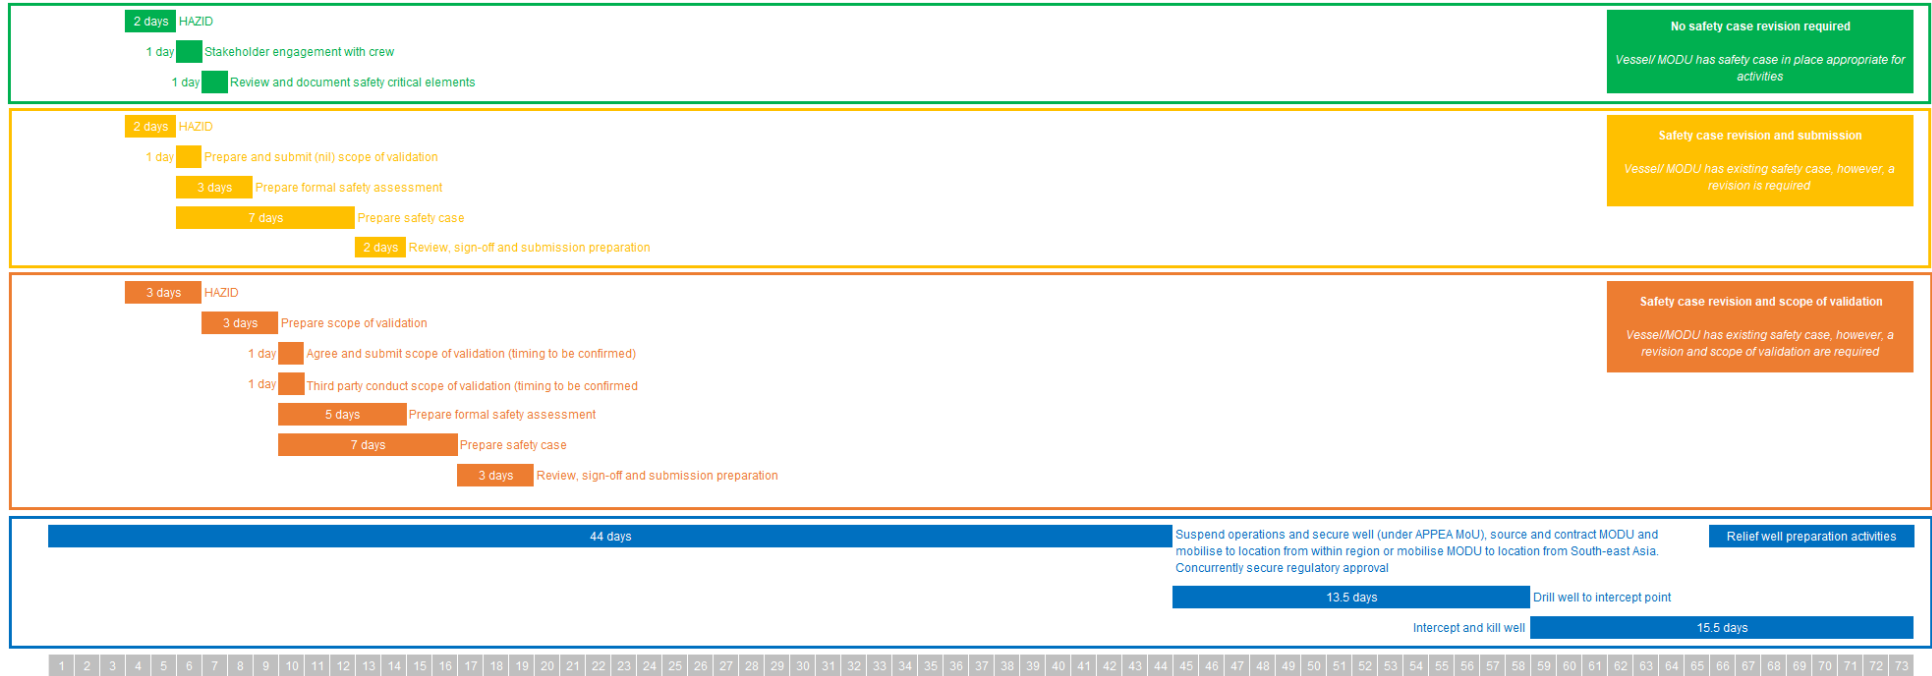

Figure 2-3: Timeline showing safety case revision timings alongside other relief well preparation activity timings for Stybarrow-7 well

Table 2-3: Safety case revision conditions and assumptions

| Case                           | No safety case revision required   | Safety case revision and submission  | Safety case revision and scope of validation  |
|--------------------------------|--|--|---|
| <b>Description</b>             | Vessel/MODU has a safety case in place appropriate for activities.   | Vessel/MODU has an existing safety case, however, a revision is required.  | Vessel/MODU has an existing safety case, however, a revision is required plus scope of validation.  |
| <b>Conditions/ assumptions</b> | Assumes that existing vessel/MODU safety case covers working under the same conditions or the loss of containment is not severe enough to result in any risk on the sea surface. | Safety case timing assumes vessel/MODU selected and crew and available for workshops and safety case studies.  | Safety case timing assumes vessel/ MODU selected and crew and available for workshops and safety case studies.  |
|                                |  | Assumes nil scope of validation. This assumes that the vessel for SSDI allows for working in a hydrocarbon environment and control measures are already in place in the existing safety case. For MODU, it assumes that the relief well equipment is already part of the MODU facility and MODU safety case. | Validation will be required for new facilities only. The time needed for the validator to complete the review (from the last document received) and prepare validation statement is undetermined. This is not accounted for here as the safety case submission is not dependent on the validation statement, however the safety case acceptance is. |
|                                |  | Assumes safety case preparation is undertaken 24/7.  | Assumes safety case preparation is undertaken 24/7.   |

### 2.5 Source Control – Control Measure Options Analysis

The assessments described in Sections 2.1, 2.2, 2.3 and 2.4 outline the primary and alternate approaches that Woodside would implement for source control. In Sections 2.6 and 2.7, Woodside has outlined the options considered against the activation/mobilisation (alternative, additional and improved options) and deployment (additional and improved options). This assessment provides an evaluation of:

- predicted cost associated with adopting the option
- predicted change/environmental benefit
- predicted effectiveness/feasibility of the option.

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.1 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical.

- Alternative options, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control.
- Additional control measures are evaluated in terms of their ability to reduce an impact or risk when added to the existing suite of control measures.
- Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility.

Options where there is not a clear justification for their inclusion or exclusion may be subject to a detailed assessment.

#### 2.5.1 Activation/Mobilisation Options considered

##### Alternative

- Standby MODU shared for all Woodside activities
- Standby MODU shared across APPEA MOU Titleholders

##### Additional

- Implement and maintain minimum standards for Safety Case development

##### Improved

- Monitor internal drilling programs for rig availability
- Monitor external activity for rig availability
- Monitor status of Registered Operators/ Approved Safety cases for rigs

#### 2.5.2 Deployment Options considered

##### Additional

- Offset capping alternative to conventional capping stack deployment
- Dual vessel capping stack deployment
- Subsea Containment System alternative to capping stack deployment
- Pre-drilling top-holes
- Purchase and maintain mooring system
- Contract in place with WWCI and Oceaneering

##### Improved

- Maintaining relief well drilling supplies (mud, casing, etc).

## 2.6 Activation/Mobilisation – Control Measure Options Analysis

This section details the assessment of alternative, additional or improved control measures that were considered to ensure the selected level of performance in Section 10.4.1 of the Environment Plan reduces the risk to ALARP. The Alternative, Additional and Improved control measures that have been assessed and selected are highlighted in green and the relevant performance of the selected control is cross referenced. Items highlighted in red have been considered and rejected on the basis that they are not feasible or the costs are clearly grossly disproportionate compared to the environmental benefit.

### 2.6.1 Alternative control measures

| Alternative Control Measures Considered   |   |   |  |  |             |
|---|---|---|--|--|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |   |   |  |  |             |
| Option considered   | Feasibility   | Environmental benefits/impacts  | Approximate cost   | Assessment conclusions   | Implemented |
| Standby MODU shared for all Woodside activities   | A standby MODU shared across all Woodside activities is likely to provide a moderate environmental benefit as it may reduce the 21-day sourcing, contracting and mobilisation time by up to 10 days (to 11 days). This would reduce the volume and duration of release and may reduce impacts on receptors and sensitivities.                               | This option is not considered feasible for all Woodside activities as there are a large range of well depths, complexities, geologies and geophysical properties across all Woodside's operations. The large geographic area of Woodside activities also means that the MODU is unlikely to be in the correct location at the right time when required. | Even with costs shared across Woodside operations, the costs (approximately A\$219 m per annum, A\$1.95 b over the five years) of maintaining a shared MODU are considered disproportionate to the environmental benefit potentially achieved by reducing mobilisation times by up to 10 days. | The costs and complexity of having a MODU and maintaining this arrangement for the duration of the Petroleum Activities Program are disproportionate to the environmental benefit gained above finding a MODU through the MOU agreement for all spill scenarios.     | No          |
| Standby MODU shared across APPEA MOU Titleholders   | A standby MODU shared across all titleholders who are signatories to the APPEA MOU is likely to provide a minor environmental benefit as it may reduce the 21-day sourcing, contracting and mobilisation time by up to seven days (to 14 days). This would reduce the volume and duration of release and may reduce impacts on receptors and sensitivities. | This option is not considered feasible for a number of Titleholders due to the remote distances in Australia as well as a substantial range of well depths, types, complexities, geologies and geophysical properties across a range of Titleholders  | As the environmental benefit is only considered minor and the reduction in timing would only be for the mobilisation period (reduction from 21 days to 14 days) the costs are considered disproportionate to the minor benefit gained.   | The costs and complexity of having a MODU and maintaining a shared arrangement for the duration of the Petroleum Activities Program are disproportionate to the environmental benefit gained above finding a MODU through the MOU agreement for all spill scenarios. | No          |

### 2.6.2 Additional control measures

| Additional Control Measures Considered   |  |  |   |   |             |
|--|--|--|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |  |  |   |   |             |
| Option considered  | Feasibility  | Environmental benefits/impacts   | Approximate cost  | Assessment conclusions  | Implemented |
| Implement and maintain minimum standards for Safety Case development   | Woodside's contingency planning consideration would be to source a rig from outside Australia with an existing Safety Case. This would require development and approval of a safety case revision for the rig and activities prior to commencing well kill operations. | This option is considered feasible and would require Woodside to develop minimum standards for safe operations for relevant Safety Case input along with maintaining key resources to support review of Safety Cases. Woodside would not be the operator for relief well drilling and would therefore not develop or submit the Safety Case revision. Woodside's role as Titleholder would be to provide minimum standard for safe operations that MODU operators would be required to meet and/or exceed. | Woodside has outlined control measures and performance standards regarding template Safety Case documentation and maintenance of resources and capability for expedited Safety Case review. | This option has been selected based on its feasibility, low cost and the potential environmental benefits it would provide. | Yes         |

2.6.3 Improved control measures

| Improved control measures Considered  |  |  |  |   |             |
|---|--|--|--|---|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |  |  |  |   |             |
| Option considered   | Feasibility  | Environmental benefits/impacts   | Approximate cost   | Assessment conclusions  | Implemented |
| Monitor internal drilling programs for rig availability   | Woodside may be conducting other campaigns that overlap with the Petroleum Activities Program, potentially providing availability of a relief well drilling rig within Woodside.<br><br>The environmental benefit of monitoring other drilling programs internally is that Woodside would be in a position to understand which other rigs might be rapidly available for relief well operations if required, potentially reducing the time to drill the relief well, resulting in less hydrocarbon to the environment. | Woodside monitors vessel and MODU availability through market intelligence services for location. Woodside will continually monitor other drilling and exploration activities within Australia and as available throughout the region to track rigs and explore rig availability during well intervention operations.          | Associated cost of implementation is minimal to the environmental benefit gained.<br><br>Woodside has outlined control measures and performance standards.   | This option is a low-cost control measure with potential to reduce the volume of hydrocarbon released to the environment. | Yes         |
| Monitor external activity for rig availability  | The environmental benefit achieved by monitoring drilling programs and rig movements across industry provides the potential for increased availability of suitable rigs for relief well drilling. Additional discussions with other Petroleum Titleholders may be undertaken to potentially gain faster access to a rig and reduce the time taken to kill the well and therefore volume of hydrocarbons released.  | Woodside will source a relief well drilling rig in accordance with the APPEA MOU on rig sharing in the unlikely event this is required. Commercial and operational provisions do not allow Woodside to discuss current and potential drilling programs in detail with other Petroleum Titleholders.                            | Associated cost of implementation is moderate to the environmental benefit gained. Woodside will continually engage with other Titleholders and Operators regarding activities within Australia and as available throughout the region to track rigs and explore rig availability during well intervention operations. | This option is a low-cost control measure with potential to reduce the volume of hydrocarbon released to the environment. | Yes         |
| Monitor status of Registered Operators/ Approved Safety cases for rigs  | Woodside can monitor the status of Registered Operators for rigs operating within Australia (and therefore safety case status) on a monthly basis. This allows for a prioritised selection of rigs in the event of a response with priority given to those with an existing safety case.   | The environmental benefit of monitoring other drilling programs internally is that Woodside would be in a position to understand which other rigs might be rapidly available for relief well operations if required, potentially reducing the time to drill the relief well, resulting in less hydrocarbon to the environment. | The cost is minimal.   | This option is a low-cost control measure with potential to reduce the volume of hydrocarbon released to the environment. | Yes         |

## 2.7 Deployment – Control Measure Options Analysis

### 2.7.1 Additional Control Measures

| Additional Control Measures considered   |  |  |   |   |             |
|--|--|--|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |  |  |   |   |             |
| Option considered  | Environmental consideration  | Feasibility  | Approximate cost  | Assessment conclusions  | Implemented |
| Offset capping alternative to conventional capping stack deployment  | While the use of an offset capping system could reduce the quantity of hydrocarbon entering the marine environment, deployment of an offset capping deployment in the water depths at the Stybarrow-7 well (850 m) is not deemed feasible – maximum safe water depths are stated by OSRL to be 600 m. The water depth coupled with mobilisation lead times for both the cap and required vessels/ support equipment makes this technique unfeasible. | <p>Technical feasibility:</p> <ul style="list-style-type: none"> <li>The base case considerations for OIE requires a coordinated response by 4 to 7 vessels working simultaneously outside of the 500m exclusion zone. In the event of a worst-case shallow water gas discharge, the 10% LEL modelled radius extends beyond the area of activity required for the OIE deployment thereby introducing health and safety risk to any vessels required for the initial deployment of the carrier and subsequent operations with ROV during capping operations. Though manageable for single vessels, it is prohibitive for operations requiring SIMOPs with numerous vessels working at 180 degrees from one another.</li> <li>Water depth is also a key consideration as buoyancy modules have not been proven for use in these depths or with the expected worst-case gas blowout rates.</li> </ul> <p>Other factors:</p> <ul style="list-style-type: none"> <li>Due to the OIE's size and scale, fabrication of equipment, e.g. mooring anchors, outside of the contractor's scope of supply is likely to require engagement of international suppliers, further increasing complexity and uncertainty in associated time frames.</li> <li>Screening indicates that mobilising some components of the OIE, based in Italy, can only be done so by sea and is likely to erode any time savings realised through killing the well via a relief well.</li> <li>The March 2019 OSRL exercise in Europe tested deployment of the OIE and highlighted that it will require a 600+MT crane vessel for deployment to ensure there is useable hook height for the crane to conduct the lift of the carrier. Vessels with such capability and a current Australian vessel safety case are not locally or readily available.</li> </ul> | Due to risks, uncertainty and complexity of this option, and the inability to realise any environmental gains, any cost would be disproportionate to the benefits gained.   | <p>Woodside has confidence in availability of suitable relief well MODUs across the required drilling time frame thus the OIE would provide no advantage.</p> <p>Implementation of OIE has been assessed as a complex and unfeasible SIMOPs operation, precluded by a combination of the site-specific metocean and worst-case discharge conditions at the Pyxis location.</p> <p>Implementation of a novel technology such as OIE culminates in low certainty of success while at the same time increasing associated health and safety risks.</p> <p>As such the primary source control response and ALARP position remains drilling a relief well.</p> | <b>No</b>   |
| Dual vessel capping stack deployment   | While the use of dual vessel to deploy the capping system could reduce the quantity of hydrocarbon entering the marine environment, this is an unproven technology. Additionally, mobilisation lead times for both a cap and required vessels and support equipment, would minimise any environmental benefit.   | A dual vessel deployment is somewhat feasible provided a large enough deck barge can be located. Deck barges of 120 m are not, however, very common and will present a logistical challenge to identify and relocate to the region. Furthermore, the longer length barges may need mooring assist to remain centred over the well. The capping stack would be handed off from a crane vessel to the anchor handler vessel (AHV) work wire outside of the exclusion zone. The AHV would then manoeuvre the barge into the plume to get the capping stack over the well. In this method, the barge would be in the plume, but the AHV and all personnel would be able to maintain a safe position outside of the gas zone. The capping stack would actually be lowered on the AHV work wire so a crane would not be required on the barge.   | Due to there being minimal environmental benefits gained by the prolonged lead times needed to execute this technique, plus a potential increase in safety issues, any cost would be disproportionate to the benefits gained.   | Given there is minimal environmental benefit and an increase in safety issues surrounding SIMOPS and deployment in shallow waters, this option would not provide an environmental or safety benefit.  | <b>No</b>   |
| Subsea Containment System alternative to capping stack deployment  | While the use of a subsea containment system could reduce the quantity of hydrocarbon entering the marine environment, this is an unproven technology. Additionally, the system is unlikely to be feasibly deployed and activated for at least 90 days following a blowout due to equipment requirements and logistics. No environmental benefit is therefore predicted given the  | The timing for mobilisation, deployment and activation of the subsea containment system is likely to be >90 days which is longer than the expected 71 days for relief well drilling operations based on the location, size and scale of the equipment required, including seabed piles that can only be transported by vessel.   | Woodside has investigated the logistics of reducing this timeframe by pre-positioning equipment but the costs of purchasing dedicated equipment by Woodside for this Petroleum Activities Program is not considered reasonably practical and are considered disproportionate to the environmental benefit gained. | This option would not provide an environmental benefit.   | <b>No</b>   |

|   |   |  |   |   |     |
|---|---|--|---|---|-----|
|   | release duration is 73 days before drilling of a relief well under the adopted control measure.   |  |   |   |     |
| Pre-drilling top-holes                      | This option represents additional environmental impacts associated with discharge of additional drill cuttings and fluids along with benthic habitat disturbance. It is also not expected to result in a significant decrease in relief well timings  | This option is not considered feasible due to the uncertainties related to the location and trajectory of the intervention well, which may vary according to the actual conditions at the time the loss of containment event occurs. Additionally, there is only expected to be a minor reduction in timing for this option of 1-2 days based on the drilling schedule. Duration to drill and kill may be reduced by 1-2 days, but top-hole may have to be relocated, due to location being unsafe or unsuitable and further works will be required each year to maintain the top holes. | Utilising an existing MODU and pre-drilling top-hole for relief well commencement would significantly increase costs associated the Petroleum Activities Program. Estimated cost over the program's life is approx. A\$555,000 per day over the PAP based on 2-4 days of top-hole drilling (plus standby time) for the well as the worst-case scenario. | This option would not provide an environmental benefit due to the additional environmental impacts coupled with a lack of improved relief well timings. | No  |
| Purchase and maintain mooring system        | Purchasing and maintaining a mooring system could provide a moderate environmental benefit as it may reduce equipment sourcing time. However, due to the continued need for specialists to install the equipment plus sourcing a suitable vessel, the timeframe reduction would be minimal. | Woodside is not a specialist in installing and maintaining moorings so would require specialists to come in to install the moorings and would also require specialist vessels to be sourced to undertake the work.   | The cost of purchasing, storing and maintaining pre-lay mooring systems with anchors, chains, buoys and ancillary equipment is considered disproportionate to the environmental benefit gained.   | This option would not provide an environmental benefit as timeframe reductions would be minimal.  | No  |
| Contract in place with WWCI and Oceaneering | Woodside has an agreement in place with WWCI and Oceaneering to provide trained personnel in the event of an incident. This will ensure that competent personnel are available in the shortest possible timeframe.  | Having contracts in place to access trained, competent personnel in the event of an incident would reduce mobilisation times. This option is considered reasonably practicable.  | Minimal cost implications – Woodside has standing contract in place to provide assistance across all activities.  | This control measure is adopted as the costs and complexity are not considered disproportionate to any environmental benefit that might be realised.    | Yes |

### 2.7.2 Improved Control Measures

| Improved Control Measures considered  |  |   |   |   |             |
|---|--|---|---|---|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |  |   |   |   |             |
| Option considered   | Environmental consideration  | Feasibility   | Approximate cost  | Assessment conclusions                                  | Implemented |
| Maintaining relief well drilling supplies   | There is not predicted to be any reduction in relief well timing or spill duration from Woodside maintaining stocks of drilling supplies (mud, casing, cement, etc.) | It would be feasible to source some relief well drilling supplies such as casing but the actual composition of the cement and mud required will need to be specific to the well. This option is also not deemed necessary as the lead time for sourcing and mobilising these supplies is included in the 21 days for sourcing and mobilising a rig. | The capital cost of Woodside purchasing relevant drilling supplies is expected to be approximately A\$600,000 with additional costs for storage and ongoing costs for replenishment. These costs are considered disproportionate to the environmental benefit gained. | This option would not provide an environmental benefit. | No          |

### 2.8 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activity.

- Alternative
  - None selected
- Additional

- Implement and maintain minimum standards for Safety Case development
- Contract in place with WWCI and Oceaneering to supply trained, competent personnel
- Improved
  - Monitor internal drilling programs for MODU availability
  - Monitor external activity for MODU availability
  - Monitor status of Registered Operators / Approved Safety cases for MODUs

### 3 Monitor and Evaluation (including Operational Monitoring)

This Section should be read in conjunction with Section 10.4.2 of the Environment Plan which is the capability planned for this activity.

#### 3.1 Monitor and Evaluate – ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.2 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

##### 3.1.1 Alternative Control Measures

| Alternative Control Measures considered   |   |   |  |  |             |
|---|---|---|--|--|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |   |   |  |  |             |
| Option considered   | Environmental consideration   | Feasibility   | Approximate cost                             | Assessment conclusions   | Implemented |
| Aerostat (or similar inflatable observation platform) for localised aerial surveillance.  | Lead time to Aerostat surveillance is disproportionate to the environmental benefit. The system also provides a very limited field of visibility around the vessel it is deployed from. | Long lead time to access (>10 days). Each system would require an operator to interpret data and direct vessels accordingly. Requires multiple systems for shoreline use. | Purchase cost per system approx. A\$300,000. | This option is not adopted as the minimal environmental benefit gained is disproportionate to the cost and complexity of its implementation. | No          |

##### 3.1.2 Additional Control Measures

| Additional Control Measures considered   |   |  |   |   |             |
|--|---|--|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |   |  |   |   |             |
| Option considered  | Environmental consideration   | Feasibility  | Approximate cost  | Assessment conclusions  | Implemented |
| Additional personnel trained to use systems.   | Current arrangement provides an environmental benefit in the availability of trained personnel facilitating access to monitoring data used to inform all other response techniques. No improvement required.      | No improvement can be made, all personnel in technical roles e.g. intelligence unit are trained and competent on the software systems. Personnel are trained and exercised regularly. Use of the software and systems forms part of regular work assignments and projects.   | Cost for training in-house staff would be approx. A\$25,000.                                    | This option is not adopted as the current capability meets the need.  | No          |
| Additional satellite tracking buoys to enable greater area coverage.   | Increased capability does not provide an environmental benefit compared to the disproportionate cost in having an additional contract in place.   | Tracking buoy on location at manned facility, additional needs are met from Woodside owned stocks in King Bay Support Base (KBSB) and Exmouth or can be provided by service provider.  | Cost for an additional satellite tracking buoy would be A\$200 per day or A\$6,000 to purchase. | This option is not adopted as the current capability meets the need, but additional units are available if required.                              | No          |
| Additional trained aerial observers.   | Woodside has access to a pool of trained, competent observers at strategic locations to ensure timely and sustainable response. Additional observers are available through current contracts with AMOSC and OSRL. | Aviation standards and guidelines ensure all aircraft crews are competent for their roles. Woodside maintains a pool of trained and competent aerial observers with various home base locations to be called upon at the time of an incident. Regular audits of oil spill response organisations ensure training and competency is maintained. | Cost for additional trained aerial observers would be A\$2,000 per person per day.              | This option is not adopted as the current capability meets the need, but additional observers are available via response contractors if required. | No          |

##### 3.1.3 Improved Control Measures

| Improved Control Measures considered  |   |   |  |  |             |
|---|---|---|--|--|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |   |  |  |             |
| Option considered   | Environmental consideration   | Feasibility   | Approximate cost   | Assessment conclusions   | Implemented |
| Faster turnaround time from modelling contractor.   | Improved control measure does not provide an environmental benefit compared to the disproportionate cost in having an additional contract in place. | External contractor on CIMT roster to be called as soon as required. However initial information needs to be gathered by CIMT team to request an accurate model. External contractor has person on call to respond from their own location. | Modelling service with a faster activation time would be achieved via membership of an alternative modelling service at an annual cost of A\$50,000 for 24hr access plus | This option is not adopted as the minimal environmental benefit gained is disproportionate to the cost and complexity of its implementation. | No          |

| Improved Control Measures considered  |   |   |  |  |    |
|---|---|---|--|--|----|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |   |  |  |    |
|   |   |   | an initial A\$5,000 per modelling run.   |  |    |
| Night time aerial surveillance.   | The risk of undertaking the aerial observations at night is disproportionate to the limited environmental benefit. The images would be of low quality and as such the variable is not adopted.  | Flights will only occur when deemed safe by the pilot. The risk of night operations is disproportionate to the benefit gained, as images from sensors (IR, UV, etc) will be low quality.<br><br>Flight time limitations will be adhered to. | No improvement can be made without risk to personnel health and safety and breaching Woodside's Golden Rules.  | This option is not adopted as the safety considerations outweigh any environmental benefit gained.   | No |
| Faster mobilisation time (for water quality monitoring).  | Due to the restriction on accessing the spill location on Day one there is no environmental benefit in having vessels available from day one. The cost of having dedicated equipment and personnel is disproportionate to the environmental benefit. The availability of vessels and personnel meets the response need.<br><br>Shortening the timeframes for vessel availability would require dedicated response vessels on standby in KBSB.<br><br>The cost and organisational complexity of employing two dedicated response vessels (approximately \$15M/year per vessel) is considered disproportionate to the potential environmental benefit to be realised by adopting this delivery options. | Operations are not feasible on day 1 as the hydrocarbon will take time to surface, and volatility has potential to cause health concerns within the first 24 hours of the response.   | Cost for purchase of equipment approx. A\$200,000. Ongoing costs per annum for cost of hire and pre-positioning for life of asset/activity would be larger than the purchase cost.<br><br>Dedicated equipment and personnel, living locally and on short notice to mobilise. The cost would be approx. A\$1 m per annum, which is disproportionate to the incremental benefit this would provide, assets are already available on day 1. 2 integrated fleet vessels are available from day 1, however these could be tasked with other operations. | This option is not adopted as the area could not be accessed earlier due to safety considerations. Additionally, the cost and complexity of implementation outweighs the benefits. | No |

### 3.2 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the PAP.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected

## 4 Subsea Dispersant Injection

This Section should be read in conjunction with Section 10.4.3 of the Environment Plan which is the capability planned for this activity.

### 4.1 Subsea Dispersant Injection – ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.3 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

The scope of existing safety cases for Frame Agreement vessels includes all relevant activities for SSDI operations. Depending on the location and availability of vessels, Woodside expects the SSDI capability can be mobilised to site for deployment within 12 days. This may be able to be achieved faster if vessels are closer to appropriate staging areas and not already involved in other operations. The following steps are included within the indicative timeframe and many of these are expected to be concurrent activities, as shown in Figure 2-2.

#### 4.1.1 Subsea Dispersant Injection timing

- Identifying and locating Frame Agreement vessels (1-2 days)
- Identifying and locating Support vessels (1-2 days)
- Tasking and mobilising identified vessels to Port (Staging Area) including ceasing previous operations (2-4 days)
- Activate and mobilise SSDI equipment from service provider to Port (Staging Area) (2-3 days)
- Activate and mobilise initial dispersant stock to Port (Staging Area) (1-2 days)
- Assemble and test SSDI equipment at Staging Area prior to load-out (2-3 days)
- Re-supply, provision and fuel vessels (1-2 days)
- Load-out and secure SSDI equipment onboard ISV (1-2 days)
- Load-out and secure Dispersant on Support Vessel (1-2 days)
- Contingency for unforeseen events (1 day)

#### 4.1.2 Response Planning: Stybarrow-7 Loss of Well Containment (Credible Scenario-01)

Following a loss of well control it may take 2-5 days to complete a risk assessment, discuss and agree appropriate control measures with NOPSEMA (Safety, Environment and Well Integrity divisions), and monitor the operating environment within the Petroleum Safety Zone around a well or facilities. Subsea dispersant injection is unlikely to be deployed until approximately Day 12, subject to subsea ROV survey of the site and agreement of risk assessment and recommended control measures to ensure personnel safety.

Dispersant efficacy testing has not been undertaken for subsea conditions, but industry experience estimates a subsea amenability to dispersant of approximately 50-60% effectiveness. These results were determined in ideal laboratory conditions and represent the expected treatment of hydrocarbons that are contacted. Based on response planning assumptions outlined in Section 10.4.3, the subsea dispersant injection system (as part of the SFRT package) is able to deliver approx. 60-75 m<sup>3</sup> per day on a continuous 24 hour/ 7 day basis.

For the purpose of capability demonstration below, Woodside has shown that once the SSDI system arrives and is able to be deployed safely, sufficient capability exists to commence and continue SSDI until the well is killed (approximately day 73).

Table 4-1: Response Planning – Subsea Dispersant Injection

| Subsea Dispersant Injection (SSDI) |   | Day | Day | Day | Day | Day | Day   | Day   | Week   | Week   | Week   | Month   | Month   | Month | Month |
|------------------------------------|---|-----|-----|-----|-----|-----|-------|-------|--------|--------|--------|---------|---------|-------|-------|
|                                    |   | 1   | 2   | 3   | 4   | 5   | 6     | 7     | 2      | 3      | 4      | 2       | 3       | 4     | 5     |
|                                    | Oil Release Rate – m <sup>3</sup>             | 143 | 143 | 143 | 143 | 143 | 143   | 143   | 1,001  | 1,001  | 1,001  | 4,004   | 4,004   | 0     | 0     |
| <b>A</b>                           | Capability available - m <sup>3</sup>         |     |     |     |     |     |       |       |        |        |        |         |         |       |       |
| A1                                 | Predicted oil volume treated by SSDI (lower)  | 0   | 0   | 0   | 0   | 0   | 0     | 0     | 3,600  | 12,600 | 12,600 | 50,400  | 50,400  | 0     | 0     |
| A2                                 | Predicted oil volume treated by SSDI (upper)  | 0   | 0   | 0   | 0   | 0   | 4,500 | 4,500 | 31,500 | 31,500 | 31,500 | 126,000 | 126,000 | 0     | 0     |
| A3                                 | Dispersant application volume (lower)         | 0   | 0   | 0   | 0   | 0   | 0     | 0     | 120    | 420    | 420    | 1,680   | 1,680   | 0     | 0     |
| A4                                 | Dispersant application volume (upper)         | 0   | 0   | 0   | 0   | 0   | 75    | 75    | 525    | 525    | 525    | 2,100   | 2,100   | 0     | 0     |
| <b>B</b>                           | Subsea release oil remaining - m <sup>3</sup> |     |     |     |     |     |       |       |        |        |        |         |         |       |       |
| B1                                 | Predicted oil volume not treated (lower)      | 143 | 143 | 143 | 143 | 143 | 143   | 143   | 0      | 0      | 0      | 0       | 0       | 0     | 0     |
| B2                                 | Predicted oil volume not treated (upper)      | 143 | 143 | 143 | 143 | 143 | 0     | 0     | 0      | 0      | 0      | 0       | 0       | 0     | 0     |

A1 and A2 – the upper and lower volumes in m<sup>3</sup> that subsea dispersant injection may be able to treat (based on response planning assumptions in Section 10.4.3 and volumes in A3 and A4). These are based on a 1:50 ratio for A1 and a 1:100 ratio for A2

A3 and A4 – the upper and lower volumes in m<sup>3</sup> of the associated dispersant injection volumes for A1 and A2

B1 and B2 – the upper and lower volumes in m<sup>3</sup> of the subsea oil that is not treated on each day, following predicted treatment outlined in A1 and A2 (oil released - predicted oil volume treated (R1-A1))

## 4.2 Subsea Dispersant Injection – Control Measure Options Analysis

### 4.2.1 Alternative control measures

| Alternative Control Measures considered   |  |   |  |  |             |
|---|--|---|--|--|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |  |   |  |  |             |
| Option considered   | Environmental consideration  | Feasibility   | Approx. Cost   | Assessment conclusions   | Implemented |
| Dedicated, contracted ISV for SSDI mobilisation and deployment (based in Australia)   | Reducing the mobilisation and deployment time of the SSDI through vessel standby/pre-positioning is unlikely to result in a significant change in environmental benefit. Under current arrangements the SSDI system can be on location from approx. day 12 depending on ISV availability where a dedicated, contracted vessel may enable the SSDI system on location from day 10.<br><br>Once deployed the SSDI will be utilised to increase entrainment of released oil and to ensure safe operations for surface deployment of SFRT and other surface response techniques. | A modified Construction vessel or vessels with suitable remote operated underwater vehicles (ROVs) is required to load, transport and deploy the SSDI system.<br><br>The critical element in deployment of the SSDI is the availability of an appropriate ISV. Achieving a shorter mobilisation would require the vessel's work schedule to be permanently restricted so as to permit a quicker return to Exmouth, reducing the utilisation of the vessel, or the permanent retention of a dedicated ISV. Neither option is considered reasonably practicable.<br><br>Acceleration is limited by availability of the SSDI system mobilisation and this control measure is not expected to reduce the estimated extent and magnitude of impact from a well release on receptor locations compared with the proposed mobilisation plan using pre-identified or vessels available through frame agreements.  | A dedicated vessel on standby in Exmouth, ready to load is estimated to cost A\$20 m per annum. This is considered cost-prohibitive for the PAP.   | This response strategy is not considered as a primary response and this control measure is not adopted as the cost, complexity and feasibility is considered disproportionate to the minor environmental benefit that might be gained  | No          |
| Shared, contracted ISV for SSDI mobilisation and deployment (shared between Titleholders)   | Reducing the mobilisation and deployment time of the SSDI through vessel standby/pre-positioning is unlikely to result in a significant change in environmental benefit. Under current arrangements the SSDI system can be on location from approx. day 12 depending on ISV availability where a dedicated, contracted vessel may enable the SSDI system on location from day 10.<br><br>Once deployed the SSDI will be utilised to increase entrainment of released oil and to ensure safe operations for surface deployment of SFRT and other surface response techniques. | A modified Construction vessel or vessels with suitable remote operated underwater vehicles (ROVs) is required to load, transport and deploy the SSDI system.<br><br>The critical element in deployment of the SSDI is the availability of an appropriate ISV. Achieving a shorter mobilisation would require the vessel's work schedule to be permanently restricted so as to permit a quicker return to Exmouth, reducing the utilisation of the vessel, or the permanent retention of a dedicated ISV. Neither option is considered reasonably practicable.<br><br>This option is not considered feasible for a number of Titleholders due to the remote distances in Australia as well as a substantial range of well depths, types, complexities, geologies and geophysical properties across a range of Titleholders.<br><br>Additionally, acceleration is limited by availability of the SSDI system mobilisation and this control measure is not expected to reduce the estimated extent and magnitude of impact from a well release on receptor locations compared with the proposed mobilisation plan using pre-identified or vessels available through frame agreements. | A dedicated vessel on standby in Exmouth, ready to load is estimated to cost A\$20 m per annum. As a shared cost across a range of titleholders, this may be approximately A\$2 m each. This is considered cost-prohibitive for the PAP. | This response strategy is not considered as a primary response and this control measure is not adopted as the cost, complexity and feasibility is considered disproportionate to the minor environmental benefit that might be gained by 1-2 days of additional subsea dispersant injection. | No          |

### 4.2.2 Additional control measures

| Additional Control Measures considered   |  |   |   |   |             |
|--|--|---|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |  |   |   |   |             |
| Option considered  | Environmental consideration  | Feasibility   | Approx. Cost  | Assessment conclusions  | Implemented |
| Pre-identifying/ contracting vessels through Frame Agreements for SSDI loading and operations  | Ensuring the mobilisation and deployment time of the SSDI through vessel availability/ contracting strategy is likely to result in a moderate environmental benefit as using these arrangements, the SSDI will be on location from approximately Day 12. | Achieving a shorter mobilisation would require the vessel being on standby with limited duties to permit a faster return to Exmouth and this is not considered reasonably practical.<br><br>Woodside has established frame agreements with vessel providers and will track availability of similar vessels. These options are both considered reasonably practicable. | Associated cost of implementation is minimal to the environmental benefit gained. | This control measure is adopted as the costs and complexity are not considered disproportionate | Yes         |

|  |  |  |  |  |  |
|--|--|--|--|--|--|
|  |  |  |  | to any environmental benefit that might be realised. |  |
|--|--|--|--|--|--|

### 4.2.3 Improved control measures

| Improved Control Measures considered  |                             |             |              |                        |             |
|---|-----------------------------|-------------|--------------|------------------------|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |                             |             |              |                        |             |
| Option considered   | Environmental consideration | Feasibility | Approx. Cost | Assessment conclusions | Implemented |
| No reasonably practical improved control measures identified.   |                             |             |              |                        |             |

### 4.3 Selected control measures

Following review of alternative, additional and improved control measures, the following controls were selected for implementation for the activity.

- Alternative
  - None selected
- Additional
  - Pre-identifying / contracting vessels through Frame Agreements for SSDI loading and operations
- Improved
  - None selected

## 5 Surface Dispersant Application

### 5.1 ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 5.2 Existing Capability

Woodside’s existing level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability incorporates planning for operational factors such as weather, daylight, crew/vessel/aircraft location and duties prior to deployment, survey or classification society inspection requirements for vessels, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisioning, and other similar logistics and operational limitations that are beyond Woodside’s direct control.

#### Existing Capability - Surface Dispersant Application

- Aircraft - large: Woodside has access to: 1 large capacity aircraft (Day 2, OSRL Hercules) and 2<sup>nd</sup> large capacity aircraft (Day 3, OSRL 727). Additional aircraft is available from air contracts (end Week 1)
- Aircraft – small: Woodside has access to: 1 small aircraft (FWADC) available within 4 hours of activation, and 3 additional FWADC aircraft available within 20 hours of activation. Additional aircraft is available from air contracts (end Week 1)
- Vessels: Woodside has access to two integrated vessels to undertake dispersant trials within 48 hours of the release, and up to 4 vessels spraying by day 5. Additional vessels is available from marine contracts (end Week 1).

### 5.3 Response Planning

Deterministic modelling for the LOWC scenario indicates that predicted the first shoreline loading and accumulation volumes at feasible response thresholds (>100 g/m<sup>2</sup>) at (i) Exmouth (Day 5, 26 m<sup>3</sup>) and (ii) between Day 35 and Day 56 (Month 2) – across 26 sites with the maximum single accumulation of 226 m<sup>3</sup> at Ashburton on Day 40. However, modelling results at defined response thresholds (>50 g/m<sup>2</sup>) indicate that the subsea release from LOWC scenario is not expected provide widespread opportunities for surface dispersant. None of the 300 LOWC deterministic simulations predict floating oil exposure ≥ 50 g/m<sup>2</sup>, which is due the scenario being a subsea release and oil rising from 733 m below the surface and the lower flow rate than other reservoirs (~155 m<sup>3</sup>/day).

Additional data to support the assessment and suitability of Surface Dispersant and Containment and Recovery for the LOWC scenario was obtained from RPS to assess the suitability of these response techniques. In all scenarios the earliest possible floating oil >10g/m<sup>2</sup> was predicted on Day 16 and therefore current capability is more than sufficient to treat any available oil above treatable threshold concentrations and until surface hydrocarbons no longer meet threshold parameters. For example, if volumes presented in areas where oil may coalesce, pool and aggregate.

Operational limitations such as number of aircraft conducting sorties per day from Dampier are not a concern in this scenario due to the low available surface oiling. If the Operational NEBA showed a net benefit, equipment and resources for Surface Dispersant application would be deployed to offshore areas where Operational Monitoring reports indicate oil patches present suitable oil thickness (>50 g/m<sup>2</sup>) to consider surface dispersant spraying. This would be based on Predictive modelling (OM01), direct observation/surveillance (OM02) and, where appropriate, hydrocarbon detection in water (OM03), employed from the outset of a spill to track the oil, assess where and when appropriate response techniques are deployed.

To target effective response operations, Woodside would mobilise resources to commence Surface Dispersant spraying at the leading edge and would prioritise response operations for BAOAC 5. This approach would result in the greatest volume and surface area treated by Surface Dispersant Operations but may also limit the geographic area and effectiveness of Containment and Recovery as these operations cannot be conducted under or near the surface dispersant spraying operations due to personnel safety reasons. If Surface Dispersant operations using vessels and aircraft target the leading edge of the slick where surface concentration and viscosity thresholds are met, Containment and Recovery operations would be deployed behind the Surface Dispersant application area to target discrete patches of thick oil at BAOAC 4 and 5 and remaining oil that is not dispersed.

### 5.4 Control Measure Options Analysis

#### 5.4.1 Alternative Control Measures

| Alternative Control Measures considered   |   |   |   |   |             |
|---|---|---|---|---|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |   |   |   |   |             |
| Option considered   | Environmental consideration   | Feasibility   | Approximate cost  | Assessment conclusions  | Implemented |
| Dedicated Response Vessel in region (exclusive to Woodside)   | The environmental benefits associated with surface dispersant application are described above.<br><br>The additional environmental benefit obtained from immediate access to this equipment, permitting deployment as soon as conditions became favourable, would result in a negligible environmental benefit (25-40m <sup>3</sup> of oil contacted resulting in approximately 12-26m <sup>3</sup> of oil treated) based on one operation. | Chartering and equipping additional vessels on standby has been considered. The option is reasonably practicable but the sacrifice (charter costs and organisational complexity) is significant, particularly when compared with the anticipated availability of vessel and FWADC resources which have a similar dispersant delivery capacity and are available from Day 2 to treat the spill. The effectiveness of this control (weather dependency, availability and survivability) is rated as very low. | The cost (\$15 M per annum for the PAP) and organisational complexity of employing a dedicated response vessel is considered disproportionate to the minor environmental benefit to be realised by implementing this control. | This option is not adopted as it has low effectiveness and cost is disproportionate to the minimal potential environmental benefit. | No          |

|   |   |  |   |  |    |
|---|---|--|---|--|----|
| Dedicated Response Vessel in region (shared resource) | The environmental benefit would be similar to that described above for Woodside integrated fleet vessels. | Additional resources and capability can be contracted should the need arise, and dispersant build-up is capable of satisfying additional demand. | The cost and complexity of implementing and maintain this alternative control measure is considered high given the predicted effectiveness. Even with consideration of shared costs, the minor benefit of this control measure does not justify the cost. | This option is not adopted as the complexity and cost are disproportionate to the minimal potential environmental benefit. | No |
|---|---|--|---|--|----|

### 5.4.2 Additional Control Measures

| Additional Control Measures considered   |  |  |  |  |             |
|--|--|--|--|--|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |  |  |  |  |             |
| Option considered  | Environmental consideration  | Feasibility  | Approx. Cost   | Assessment conclusions   | Implemented |
| Lease/purchase additional spray systems and/or dispersant stocks (based at Exmouth/Dampier)  | Purchase of additional system(s) and/or dispersant stocks would not provide a significant environmental benefit compared to the current capability in place. | Time to set up and mobilise a marine charter vessel is ~10 days, at which point existing SDA systems are available for loading onto vessels. Adding additional spray systems would allow for extra surface dispersant application capacity but is unlikely to reduce deployment times for this strategy.   | For the WCCS, additional SDA (vessel) spray systems and large quantities of dispersant are already available through AMOSC, AMSA and OSRL therefore the cost is considered disproportionate to the minor benefit gained. | This option is not adopted as the current capability meets the need. | No          |
| Train additional Woodside personnel in Dampier to coordinate vessel dispersant application   | Limited environmental benefit to be gained by training additional personnel.   | Current capability meets need. Woodside has a pool of trained, competent offshore responders / team leaders at strategic locations to ensure timely and sustainable response. Additional personnel are available through current contracts with AMOSC and OSRL and agreements with AMSA. Marine standards & guidelines ensure vessel masters are competent for their roles. Regular audits of oil spill response organisations ensure training and competency is maintained. | Minor additional cost regarding training and maintenance of competency.  | This option is not adopted as the current capability meets the need. | No          |

### 5.4.3 Improved Control Measures

| Improved Control Measures considered  |   |  |   |  |             |
|---|---|--|---|--|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |  |   |  |             |
| Option considered   | Environmental consideration   | Feasibility  | Approximate cost  | Assessment conclusions   | Implemented |
| Locate vessel spraying equipment on additional in-field support vessel(s)   | This option may achieve minor incremental improvements in surface oil and residual oil volumes similar to those described for integrated fleet vessels. However, given the likely vessel re-supply times involved to/from the offshore spill location, this option is unlikely to realise material environmental benefits additional the capability selected. | Woodside currently has dispersant spray systems pre-located on vessels used in-field during cargo transfer activities. Consideration of equipping additional vessels with similar equipment was made but is not being carried through to implementation. | The option is reasonably practicable and the cost (charter and operational/maintenance costs) is expected to be moderate, particularly when compared with the ability to rapidly commence spraying operations, subject to safety considerations but Woodside considers the existing control measures to be sufficient for the need. | This option is not adopted as the current capability meets the need. | No          |

## 5.5 Selected control measures

Following review of alternative, additional and improved control measures, the following controls were selected for implementation for the activity.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected.

## 6 Containment and Recovery

### 6.1 ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 6.2 Existing Capability

Woodside’s existing level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability incorporates planning for operational factors such as weather, daylight, crew/vessel/aircraft location and duties prior to deployment, survey or classification society inspection requirements for vessels, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisioning, and other similar logistics and operational limitations that are beyond Woodside’s direct control.

#### Existing Capability - Containment and Recovery

- Vessels: Woodside has access to two containment and recovery operations (Day 2) and 4 additional vessel-based containment and recovery operations using 3<sup>rd</sup> party provider resources could be deployed by day 10. Additional vessels is available from marine contracts (end Week 1-2).
- Equipment: Woodside has access to equipment in Karratha at King Bay Supply Facility (KBSF), via DoT and AMSA stockpiles via Mutual Aid, and arrangements with AMOSC and OSRL.

### 6.3 Response Planning

Deterministic modelling for the LOWC scenario indicates that predicted the first shoreline loading and accumulation volumes at feasible response thresholds (>100 g/m<sup>2</sup>) at (i) Exmouth (Day 5, 26 m<sup>3</sup>) and (ii) between Day 35 and Day 56 (Month 2) – across 26 sites with the maximum single accumulation of 226 m<sup>3</sup> at Ashburton on Day 40. However, modelling results at defined response thresholds (>50 g/m<sup>2</sup>) indicate that the subsea release from LOWC scenario is not expected provide widespread opportunities for surface dispersant. None of the 300 LOWC deterministic simulations predict floating oil exposure ≥ 50 g/m<sup>2</sup>, which is due the scenario being a subsea release and oil rising from 733 m below the surface and the lower flow rate than other reservoirs (~155 m<sup>3</sup>/day).

Additional data to support the assessment and suitability of Surface Dispersant and Containment and Recovery for the LOWC scenario was obtained from RPS to assess the suitability of these response techniques. In all scenarios the earliest possible floating oil >10g/m<sup>2</sup> was predicted on Day 16 and therefore current capability is more than sufficient to treat any available oil above treatable threshold concentrations and until surface hydrocarbons no longer meet threshold parameters. For example if volumes presented in areas where oil may coalesce, pool and aggregate.

Operational limitations such as vessel and equipment availability are not a concern in this scenario due to the low available surface oiling. If the Operational NEBA showed a net benefit, equipment and resources for Surface Dispersant application would be deployed to offshore areas where Operational Monitoring reports indicate oil patches present suitable oil thickness (>50 g/m<sup>2</sup>) to consider Containment and Recovery operations. This would be based on Predictive modelling (OM01), direct observation/surveillance (OM02) and, where appropriate, hydrocarbon detection in water (OM03), employed from the outset of a spill to track the oil, assess where and when appropriate response techniques are deployed.

To target effective response operations, Woodside would deploy Containment and Recovery operations behind the Surface Dispersant application area to target discrete patches of thick oil at BAOAC 4 and 5 and remaining oil that is not dispersed. The geographic area and effectiveness of Containment and Recovery may be limited as these operations cannot be conducted under or near the Surface Dispersant spraying operations due to personnel safety reasons.

### 6.4 Control Measure Options Analysis

#### 6.4.1 Alternative Control Measures

| Alternative Control Measures considered   |  |   |   |   |             |
|---|--|---|---|---|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |  |   |   |   |             |
| Option considered   | Environmental consideration  | Feasibility   | Approximate cost  | Assessment conclusions  | Implemented |
| Dedicated Response Vessel in region<br>(exclusive to Woodside)  | The environmental benefits associated with containment and recovery are described above.<br><br>The additional environmental benefit obtained from immediate access to this equipment, permitting deployment as soon as conditions became favourable, would result in a negligible environmental benefit – 22.5-67.5 m <sup>3</sup> of oil recovered per operating unit per day. | Chartering and equipping additional vessels on standby has been considered. The option is reasonably practicable but the sacrifice (charter costs and organisational complexity) is significant, particularly when compared with the anticipated effectiveness of dispersant operations to treat the spill which are available from Day 2. The effectiveness of this control (encounter rate, weather dependency, availability) is rated as very low. | The cost (\$15 M per annum for the PAP) and organisational complexity of employing a dedicated response vessel is considered disproportionate to the insignificant environmental benefit to be realised by implementing this control. | This option is not adopted as it has low effectiveness and cost is disproportionate to the minimal potential environmental benefit. | No          |

|   |   |  |   |   |    |
|---|---|--|---|---|----|
| Dedicated Response Vessel in region (shared resource) | The environmental benefit would be similar to that described above for Woodside integrated fleet vessels.   | Additional containment and recovery resources and capability can be contracted should the need arise.  | The cost and complexity of implementing and maintain this alternative control measure is considered high given the predicted effectiveness. Even with consideration of shared costs, the minor benefit of this control measure does not justify the cost. | This option is not adopted as it has low effectiveness and cost is disproportionate to the minimal potential environmental benefit. | No |
| Regional oil spill response contractor                | This option may achieve minor incremental improvements in surface oil and residual oil volumes similar to those described for integrated fleet vessels. However, given the likely vessel transit times involved to/from the offshore spill location, this option is unlikely to realise material environmental benefits additional the capability selected. | No current private response contracting capability exists that would significantly improve response timing or effectiveness in the Dampier or Exmouth regions. | N/A – not currently feasible  | This option is not adopted as it is not currently feasible.   |    |

6.4.2 Additional Control Measures

| Additional Control Measures considered   |   |  |   |  |             |
|--|---|--|---|--|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |   |  |   |  |             |
| Option considered  | Environmental consideration   | Feasibility  | Approx. Cost  | Assessment conclusions   | Implemented |
| Train additional Woodside personnel in Dampier to coordinate containment and recovery operations   | Limited environmental benefit to be gained by training additional personnel as the number of operations will be governed by the availability of response vessels. | Current capability meets need. Woodside has a pool of trained, competent offshore responders / team leaders at strategic locations to ensure timely and sustainable response. Additional personnel are available through current contracts with AMOSC and OSRL and agreements with AMSA. Marine standards & guidelines ensure vessel masters are competent for their roles. Regular audits of oil spill response organisations ensure training and competency is maintained. | Minor additional cost regarding training and maintenance of competency. | This option is not adopted as the current capability meets the need. | No          |

6.4.3 Improved Control Measures

| Improved Control Measures considered  |   |  |   |   |             |
|---|---|--|---|---|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |  |   |   |             |
| Option considered   | Environmental consideration   | Feasibility  | Approximate cost  | Assessment conclusions  | Implemented |
| Prioritise rapid sweep systems (NOFI Buster series, Desmi Speed Sweep, etc.) for mobilisation from service providers  | The environmental benefit of containment and recovery as a response strategy is minor. This response strategy is not considered to be as effective as surface dispersant application to prevent hydrocarbons reaching the shore, but there is expected to be a minor environmental benefit since each rapid sweep containment and recovery operation could remove an additional 10-45 m3 per operation per day. | Rapid sweep systems allow containment and recovery operations to be undertaken at speeds of up to 3 knots. This allows for greater encounter rates and surface coverage. AMOSC has recently purchased a Speed Sweep system and a number of NOFI systems are available through Mutual Aid arrangements. | Additional costs for prioritising rapid sweep systems are negligible    | Although containment and recovery remains a low-efficiency response technique, this control measure is adopted as the costs and complexity are not considered disproportionate to any environmental benefit that might be realised. | Yes         |
| Prioritise active booming systems (Ro-skim, etc.) for mobilisation from service providers   | The environmental benefit of containment and recovery as a response strategy is minor. This response strategy is not considered to be as effective as surface dispersant application to prevent hydrocarbons reaching the shore, but there is expected to be a minor environmental benefit since each rapid sweep containment and   | Active booming systems allow containment and recovery operations without the need for an additional skimming system. This allows for greater effectiveness and continued skimming operations. Active booming systems are available through   | Additional costs for prioritising active booming systems are negligible | Although containment and recovery remains a low-efficiency response technique, this control measure is adopted as the costs and complexity are not considered disproportionate to   | Yes         |

| Improved Control Measures considered  |  |  |  |  |    |
|---|--|--|--|--|----|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |  |  |  |  |    |
|   | recovery operation could remove an additional 10-45 m3 per operation per day.  | OSRL and Mutual Aid arrangements and would be prioritised for mobilisation.  |  | any environmental benefit that might be realised.  |    |
| Pre-position additional containment and recovery equipment (Exmouth)  | It is unlikely that faster mobilisation and deployment from Exmouth would significantly increase response effectiveness or removal of oil to create an increased environmental benefit   | Facilities at Exmouth are currently limited by tides and draft for the loading and unloading of vessels with heavy plant and equipment. Access to the Navy Pier to provide an additional loading location is subject to Defence Force approval and cannot be relied upon for rapid approval in the event of an oil spill.  | Limited additional cost considerations.  | This option is not adopted as the complexity is disproportionate to the minimal potential environmental benefit due to the low efficiency of containment and recovery as a response technique. | No |
| Re-locate containment and recovery equipment on in-field vessels  | The additional environmental benefit obtained from faster mobilisation and deployment would be limited by safety considerations during the initial period following the release. Once operations were considered safe, the vessels would increase recovery capacity to 23-90 m3/day per operation. The limited oil treatment of containment and recovery and expected effectiveness of dispersant application from vessels indicates the preference would be for greater SDA capability. | Operations close to the release location are unlikely to be feasible during the initial period due to the uncertainty of the situation and potential safety impacts on personnel. Vessels may require time to return to port and load equipment, fuel etc. to allow response duration to be the maximum possible once deployed. Shortening the timeframes for vessel availability would require equipment to be pre-positioned on-board vessels. | The cost and organisational complexity of employing two dedicated response vessels (approximately \$15M per year per vessel) is considered disproportionate to the limited environmental benefit to be realised by adopting this control               | This option is not adopted as the cost is disproportionate to the minimal potential environmental benefit due to the low efficiency of containment and recovery as a response technique.       | No |
| Purchase or pre-position larger skimmers  | The environmental benefit of containment and recovery for the loss of well control scenario is minor. This response strategy is not considered to be as effective as surface dispersant application to prevent hydrocarbons reaching the shore.  | Larger systems such as the Desmi Octopus or Transrec with >200 m3 per hour capacity, could improve recovery rates, however are not readily available in Australia and not easily compatible with booming, waste and hydraulic power systems. If required and deemed to be of benefit, these systems are available through Service Providers such as OSRL.  | Cost of purchasing Octopus system is \$600,000 plus additional transport, training and commissioning costs and ongoing maintenance costs. Cost for pre-positioning in Australia for the life of the asset/activity is greater than the purchase costs. | This option is not adopted as the cost is disproportionate to the minimal potential environmental benefit due to the low efficiency of containment and recovery as a response technique.       | No |

### 6.5 Selected control measures

Following review of alternative, additional and improved control measures, the following controls were selected for implementation for the activity.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - Prioritise rapid sweep systems (NOFI Buster series, Desmi Speed Sweep, etc.) for mobilisation from service providers.
  - Prioritise active booming systems (Ro-skim, etc.) for mobilisation from service providers.

## 7 Shoreline Protection

### 7.1 Shoreline Protection & Deflection – ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in 10.4.4 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 7.2 Existing Capability – Shoreline Protection and Deflection

Woodside’s exiting level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/ vessel/ aircraft/ vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/ restocking provisions, and other similar logistic and operational limitation that are beyond Woodside’s direct control.

### 7.3 Response Planning: Stybarrow-7 loss of well containment– Shoreline Protection and Deflection

Planning for shoreline protection is based upon identification of Response Protection Areas (RPAs) from deterministic modelling and the logistics associated with deploying protection at these locations. The response planning scenarios indicate that this would require effective mobilisation to priority shorelines and maintenance of protection until operational monitoring confirms that the locations were no longer at risk. Woodside has identified the RPAs from deterministic modelling results provided from specific scenarios.

The control measures selected provide capability to mobilise shoreline protection equipment by Day 2 (if required). Deterministic modelling for the first shoreline contact at response thresholds (>100 g/m<sup>2</sup>) for CS-01 is at Exmouth on Day 5 (26.1 m<sup>3</sup>). Deterministic modelling for the largest spread and volumes ashore predicts all other contact at feasible response thresholds in Months 2 to 3. There is no shoreline impact predicted at threshold for CS-02. The existing capability is, therefore, considered sufficient to mobilise and deploy protection at RPAs prior to hydrocarbon accumulation, guided by predictive modelling, direct observation/surveillance and remote sensing methods (OM01, OM02 and OM03) employed from the outset of a spill to track the oil and assess receptors at risk. This will then trigger the undertaking of pre-emptive assessments of sensitive receptors at risk (OM04) if required. OM04 would only be undertaken in liaison with WA DoT. Tactical response plans exist for many of the RPAs identified.

Table 7-1 below outlines the capability required (number of RPAs predicted to be impacted) against the capability available (number of shoreline protection and deflection operations that can be mobilised and deployed). As can be seen from the table below. Woodside’s capability exceeds the response planning need identified for shoreline protection and deflection operations.

**Table 7-1: Response Planning – Shoreline Protection and Deflection**

| Shoreline Protection & Deflection (SPD) |   | Day | Day | Day | Day | Day | Day | Day | Week | Week | Week | Month | Month | Month | Month |
|---|---|-----|-----|-----|-----|-----|-----|-----|------|------|------|-------|-------|-------|-------|
|   |   | 1   | 2   | 3   | 4   | 5   | 6   | 7   | 2    | 3    | 4    | 2     | 3     | 4     | 5     |
|   | RPAs impacted by maximum accumulated volume – Stybarrow-7 (CS-01) | 0   | 0   | 0   | 0   | 1   | 0   | 0   | 0    | 0    | 0    | 26    | 5     | 0     | 0     |
| <b>A</b>                                | <b>Capability Required (number of operations)</b>                 |     |     |     |     |     |     |     |      |      |      |       |       |       |       |
| A1                                      | SPD operations required – based on resources-at-risk (lower)      | 0   | 0   | 0   | 0   | 1   | 0   | 0   | 0    | 0    | 0    | 26    | 5     | 0     | 0     |
| A2                                      | SPD operations required – based on resources-at-risk (upper)      | 0   | 0   | 0   | 0   | 2   | 0   | 0   | 0    | 0    | 0    | 52    | 10    | 0     | 0     |
| <b>B</b>                                | <b>Capability Available (operations per day)</b>                  |     |     |     |     |     |     |     |      |      |      |       |       |       |       |
| B1                                      | SPD operations available – per day (lower)                        | 0   | 1   | 1   | 2   | 2   | 4   | 6   | 70   | 70   | 70   | 330   | 330   | 330   | 330   |
| B2                                      | SPD operations available – per day (upper)                        | 1   | 2   | 3   | 4   | 6   | 8   | 10  | 84   | 84   | 84   | 336   | 336   | 336   | 336   |
| <b>C</b>                                | <b>Capability Gap (operations per day)</b>                        |     |     |     |     |     |     |     |      |      |      |       |       |       |       |
| C1                                      | SPD operations gap – per day (lower)                              | 0   | 0   | 0   | 0   | 0   | 0   | 0   | 0    | 0    | 0    | 0     | 0     | 0     |       |
| C2                                      | SPD operations gap – per day (upper)                              | 0   | 0   | 0   | 0   | 0   | 0   | 0   | 0    | 0    | 0    | 0     | 0     | 0     |       |

A1 and A2 – the upper and lower number of shoreline protection operations required based on the number of Response Protection Areas contacted at the maximum accumulated volume.

B1 and B2 – the upper and lower number of shoreline protection and deflection operations available (based on response planning assumptions in Section 10.4.5).

C1 and C2 – the gap between the upper and lower number of shoreline protection and deflection operations required in A1 compared to the operations available in B1 and B2

Pre-emptive mobilisation of equipment and personnel would commence as soon as practicable prior to oil contact. Additional resources would be mobilised depending on the scale of the event to increase the length or number of shorelines being protected.

A shoreline protection and deflection response would be launched and additional TRPs drafted only when operational monitoring (OM02 and OM03) and modelling (OM01) indicate that contact could occur at RPA(s) within 14 days. The outputs from the monitoring will inform the need for and/or direct any additional response techniques and, additionally, if/when the spill enters State Waters and control of the incident passes to WA DoT.

## 7.4 Shoreline Protection and Deflection – Control Measure Options Analysis

### 7.4.1 Alternative Control Measures

| Alternative Control Measures Considered   |   |   |   |   |             |
|---|---|---|---|---|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |   |   |   |   |             |
| Option considered   | Environmental consideration   | Feasibility   | Approximate cost  | Assessment conclusions  | Implemented |
| Pre-position equipment at Response Protection Areas (RPAs)  | Additional environmental benefit of having equipment prepositioned is considered minor. Equipment is currently available to protect RPAs and additional shorelines, within estimated minimum times until shoreline contact at RPAs, enabling mobilisation of the selected delivery options. | <p>The incremental environmental benefit associated with these delivery options is considered minor and unlikely to reduce the environmental consequence of a significant hydrocarbon release beyond the adopted delivery options. Considering the highly unlikely nature of a significant hydrocarbon release and the costs and organisational complexity associated with prepositioning and maintenance of equipment, the sacrifice is considered disproportionate to the limited environmental benefit that might be realised.</p> <p>Furthermore, these options would conflict with the mutual aid philosophy being adopted under the selected delivery options.</p> <p>The selected delivery options for shoreline protection and deflection meet the relevant objectives of this control measure and do not require prepositioned or additional equipment in Exmouth.</p> | Total cost to preposition protection/ deflection packages at each site of potential impact would be approx. A\$6,100 per package per day. | This option is not adopted as the existing capability meets the need. | <b>No</b>   |

### 7.4.2 Additional Control Measures

| Additional Control Measures Considered   |   |   |   |   |             |
|--|---|---|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |   |   |   |   |             |
| Option considered  | Environmental consideration   | Feasibility   | Approximate cost  | Assessment conclusions  | Implemented |
| Supplemented stockpiles of equipment in Exmouth to protect additional shorelines   | <p>Additional equipment would increase the number of receptor areas that could be protected from hydrocarbon contact. However, current availability of personnel and equipment is capable of protecting up to 30 km of shoreline, commensurate with the scale and progressive nature of shoreline impact. Additional stocks would be made available from international sources if long term up scaling were necessary.</p> <p>A reduction in environmental consequence from a 'B' rating (serious long-term impacts) is unlikely to be realised as a result of having more equipment available locally.</p> | <p>The incremental environmental benefit associated with these delivery options is considered minor and unlikely to reduce the environmental consequence of a significant hydrocarbon release beyond the adopted delivery options. Considering the highly unlikely nature of a significant hydrocarbon release and the costs and organisational complexity associated with prepositioning and maintenance of equipment, the sacrifice is considered disproportionate to the limited environmental benefit that might be realised.</p> <p>Furthermore, these options would conflict with the mutual aid philosophy being adopted under the selected delivery options.</p> <p>The selected delivery options for shoreline protection and deflection meet the relevant objectives of this control measure and do not require prepositioned or additional equipment in Exmouth.</p> | Total cost for purchase supplemental protection and deflection equipment would be approx. A\$455,000 per package. | This option is not adopted as the existing capability meets the need. | <b>No</b>   |

|                              |  |  |   |   |           |
|------------------------------|--|--|---|---|-----------|
| Additional trained personnel | The level of training and competency of the response personnel ensures the shoreline protection and deflection operation is delivered with minimum secondary impact to the environment. Training additional personnel does not provide an increased environmental benefit. | Additional personnel required to sustain an extended response can be sourced through the Woodside <a href="#">People &amp; Global Capability Surge Labour Requirement Plan</a> . Additional personnel sourced from contracted OSRO's (OSRL/AMOSC) to manage other responders. Response personnel are trained and exercised regularly in shoreline response techniques and methods. All personnel involved in a response will receive a full operational/safety brief prior to commencing operations. | Additional Specialist Personnel would cost A\$2,000 per person per day. | This option is not adopted as the existing capability meets the need. | <b>No</b> |
|------------------------------|--|--|---|---|-----------|

### 7.4.3 Improved Control Measures

| Improved Control Measures considered  |   |   |   |   |             |
|---|---|---|---|---|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |   |   |   |             |
| Option considered   | Environmental consideration   | Feasibility   | Approximate cost  | Assessment conclusions  | Implemented |
| Faster response/<br>mobilisation time   | Given modelling does not predict any floating oil at offshore response threshold (>50 g/m <sup>2</sup> ) and initial shoreline contact at response threshold (>100 g/m <sup>2</sup> ) is predicted on Day 5, Woodside considers that there is sufficient time for deployment of protection and deflection operations prior to impact. | Response teams, trained personnel, contracted oil spill response service providers, government agencies and the associated mitigation equipment required to enact an initial protection and deflection response will be available for mobilisation within 24-48 hrs of activation. Additional equipment from existing stockpiles and oil spill response service providers can be on scene within days. Hydrocarbons are predicted to accumulate at response threshold (100 g/m <sup>2</sup> ) on Day 5 at Exmouth, therefore allowing enough time to re-locate existing equipment, personnel and other resources to the most appropriate areas. | The cost of establishing a local stockpile of new mitigation equipment (including protection and deflection boom) closer to the expected hydrocarbon stranding areas is not commensurate with the need. | This option is not adopted as the existing capability meets the need. | <b>No</b>   |

### 7.5 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the PAP.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected

## 8 Shoreline Clean-Up

### 8.1 Shoreline Clean-up – ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.5 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

#### 8.1.1 Existing Capability – Shoreline Clean-up

Woodside’s existing level of capability is based on internal and third-party resources that are available 24 hours per day, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, re-fuelling/re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside’s direct control.

#### 8.1.2 Response planning: Stybarrow-7 (CS-01) – Shoreline Clean-up

Woodside has assessed existing capability against the WCCS and has identified that the range of techniques provide an ongoing approach to shoreline clean-up at identified RPAs. Woodside’s capability can cover all required shoreline clean-up operations for the PAP.

Deterministic modelling for the first shoreline contact above feasible response thresholds (>100 g/m<sup>2</sup>) for CS-01 is at Exmouth on Day 5 (26.1 m<sup>3</sup>). Deterministic modelling for the largest volumes ashore predicts all other contact at feasible response thresholds in Months 2 to 4. The largest volumes predicted to accumulate ashore are at Ashburton on day 40 (225.6 m<sup>3</sup>) and Exmouth on day 58 (297.1 m<sup>3</sup>). There is no shoreline impact predicted at threshold for CS-02.

These figures have been combined into a single response planning need scenario that provides a worst-case scenario for planning purposes as outlined below. Given all other shoreline contact scenarios identified from deterministic modelling are longer time frames and lesser volumes, demonstration of capability against this need will ensure Woodside can meet requirements for any other outcome. Woodside is satisfied that the current capability is managing risks and impacts to ALARP.

In the event of a real spill, predictive modelling, direct observation/surveillance and remote sensing methods (OM01, OM02 and OM03) will be employed from the outset of a spill to track the oil real-time and assess receptors at risk of impact. This will then trigger the undertaking of pre-emptive assessments of sensitive receptors at risk (OM04) and shoreline assessments (OM05) to establish the extent and distribution of oiling and thus direct any shoreline clean-up operations. OM04 and OM05 would only be undertaken in liaison with WA DoT.

Due to the timeframe of predicted accumulation for shoreline clean-up, and deterministic modelling predicting ongoing stranding after this peak, this response may not be as time critical compared to other response techniques and the scale will depend on the success of other techniques preventing oiling occurring. Further, the potential scale and remoteness of a response coupled with the uncertainty of which locations will be affected precludes the stockpiling or prepositioning of equipment specific to shorelines. The most significant constraint is accommodation and transport of personnel in the Dampier region to undertake clean-up operations and to manage wastes generated during the response effort. From previous assessment of facilities in the Dampier region, Woodside estimates that current accommodation can cater for a range of 500-700 personnel per day.

Woodside has identified several options which could be mobilised to achieve defined response objectives. Evaluation considers the benefit in terms of the time to respond and the scale of response made possible by each option. The evaluation of possible control measures is summarised in Section 8.2

**Table 8-1: Response planning – shoreline clean-up**

| Shoreline Clean-up (Phase 2) |   | Day | Day | Day | Day | Day | Day | Day | Week | Week | Week | Month | Month | Month | Month |
|------------------------------|---|-----|-----|-----|-----|-----|-----|-----|------|------|------|-------|-------|-------|-------|
|                              |   | 1   | 2   | 3   | 4   | 5   | 6   | 7   | 2    | 3    | 4    | 2     | 3     | 4     | 5     |
|                              | Shoreline accumulation (above 100g/m <sup>2</sup> ) - m <sup>3</sup>      | 0   | 0   | 0   | 0   | 26  | 0   | 0   | 0    | 0    | 0    | 623   | 587   | 37    | 0     |
|                              | Oil remaining on shoreline following response operations - m <sup>3</sup> | 0   | 0   | 0   | 0   | 0   | 10  | 4   | 0    | 0    | 0    | 0     | 249   | 85    | 0     |
| <b>A</b>                     | <b>Capability Required (number of operations)</b>                         |     |     |     |     |     |     |     |      |      |      |       |       |       |       |
| A1                           | Shoreline clean-up operations required (lower)                            | 0   | 0   | 0   | 0   | 3   | 1   | 0   | 0    | 0    | 0    | 62    | 84    | 12    | 0     |
| A2                           | Shoreline clean-up operations required (upper)                            | 0   | 0   | 0   | 0   | 4   | 1   | 1   | 0    | 0    | 0    | 125   | 167   | 24    | 0     |
| <b>B</b>                     | <b>Capability Available (number of operations)</b>                        |     |     |     |     |     |     |     |      |      |      |       |       |       |       |
| B1                           | Shoreline clean-up operations available - Stage 2 - Manual (lower)        | 0   | 1   | 3   | 5   | 8   | 12  | 15  | 105  | 105  | 105  | 560   | 560   | 560   | 560   |
| B2                           | Shoreline clean-up operations available - Stage 2 - Manual (upper)        | 0   | 2   | 5   | 8   | 10  | 15  | 20  | 140  | 140  | 140  | 560   | 560   | 560   | 560   |
| <b>C</b>                     | <b>Capability Gap</b>   |     |     |     |     |     |     |     |      |      |      |       |       |       |       |
| C1                           | Shoreline clean-up operations gap (lower)                                 | 0   | 0   | 0   | 0   | 0   | 0   | 0   | 0    | 0    | 0    | 0     | 0     | 0     | 0     |
| C2                           | Shoreline clean-up operations gap (upper)                                 | 0   | 0   | 0   | 0   | 0   | 0   | 0   | 0    | 0    | 0    | 0     | 0     | 0     | 0     |

A1 and A2 – the number of shoreline clean-up operations required based on the hydrocarbon volumes ashore above 100 g/m<sup>2</sup>.

B1 and B2 – the upper and lower number of shoreline clean-up operations available (based on response planning assumptions in Section 10.4.5).

C1 and C2 – the gap between the upper and lower number of shoreline clean-up operations required in A1 and A2 compared to the operations available in B1 and B2.

## 8.2 Shoreline Clean-up – Control measure options analysis

### 8.2.1 Alternative Control Measures

| Alternative Control Measures Considered   |                             |             |                  |                        |             |
|---|-----------------------------|-------------|------------------|------------------------|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |                             |             |                  |                        |             |
| Option considered   | Environmental consideration | Feasibility | Approximate cost | Assessment conclusions | Implemented |
| No reasonably practical alternative control measures identified.  |                             |             |                  |                        |             |

### 8.2.2 Additional Control Measures

| Additional Control Measures Considered   |  |  |   |   |             |
|--|--|--|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |  |  |   |   |             |
| Option considered  | Environmental consideration  | Feasibility  | Approximate cost  | Assessment conclusions  | Implemented |
| Additional trained personnel available   | The level of training and competency of the response personnel ensures the shoreline clean-up operation is delivered with minimum secondary impact to the environment. Training additional personnel does not provide an increased environmental benefit.  | Additional personnel required to sustain an extended response can be sourced through the Woodside <a href="#">People &amp; Global Capability Surge Labour Requirement Plan</a> . Additional personnel sourced from contracted OSROs (OSRL/AMOSC) to manage other responders<br><br>Response personnel are trained and exercised regularly in shoreline response techniques and methods. All personnel involved in a response will receive a full operational/safety brief prior to commencing operations.  | Additional Specialist Personnel would cost A\$2,000 per person per day. | This option is not adopted as the existing capability meets the need. | No          |
| Additional trained personnel deployed  | Maintaining a span of control of 200 competent personnel is deemed manageable and appropriate for this activity. Additional personnel conducting clean-up activities may be able to complete the clean-up in a shorter timeframe, but modelling predicts ongoing stranding of hydrocarbons over a period of weeks. Managing a smaller, targeted response is expected to achieve an environmental benefit through ensuring the shoreline clean-up response is suitable and scalable for the shoreline substrate and sensitivity type.<br><br>This will ensure there is no increased impact from the shoreline clean-up through the presence of unnecessary personnel and equipment. | The figure of 200 personnel is broken down to include on 1-2 x Trained Supervisors managing 8-10 personnel/labour hire responders. This allows for multiple operational teams to operate along the extended shoreline at different locations. Typically, an additional 30-50% of the tactical workforce is required to support ongoing operations including On-Scene control, logistics, safety/medical/welfare and transport.<br><br>Personnel on site will include members with the appropriate specialties to ensure an efficient shoreline clean-up.<br><br>Additional personnel are available through existing contracts with oil spill response organisations, labour hire organisations and environmental panel contractors | Additional Specialist Personnel would cost A\$2,000 per person per day. | This option is not adopted as the existing capability meets the need. | No          |

### 8.2.3 Improved Control Measures

| Improved Control Measures considered  |                             |             |                  |                        |             |
|---|-----------------------------|-------------|------------------|------------------------|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |                             |             |                  |                        |             |
| Option considered   | Environmental consideration | Feasibility | Approximate cost | Assessment conclusions | Implemented |

|   |  |  |   |  |           |
|---|--|--|---|--|-----------|
| <p>Faster response/<br/>mobilisation time</p> | <p>Given modelling predicts initial shoreline contact at response threshold (&gt;100 g/m<sup>2</sup>) is predicted on Day 5, Woodside considers that there is sufficient time for deployment of clean-up operations prior to impact.</p> | <p>Response teams, trained personnel, contracted oil spill response service providers, government agencies and the associated mitigation equipment required to enact an initial protection and deflection response will be available for mobilisation within 24-48 hrs of activation.</p> <p>Additional equipment from existing stockpiles and oil spill response service providers can be on scene within days.</p> <p>Hydrocarbons are predicted to accumulate at response threshold (100 g/m<sup>2</sup>) on Day 5 at Exmouth, therefore allowing enough time to re-locate existing equipment, personnel and other resources to the most appropriate areas.</p> | <p>The cost of establishing a local stockpile of new shoreline clean-up equipment closer to the expected hydrocarbon stranding areas is not commensurate with the need.</p> | <p>This option is not adopted as the existing capability meets the need.</p> | <p>No</p> |
|---|--|--|---|--|-----------|

### 8.3 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the PAP.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected

## 9 Scientific Monitoring

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.7 of the Environment Plan with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 9.1 Existing Capability – Scientific Monitoring

Woodside’s existing level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, re-fuelling/re-stocking provisions, and other similar logistic and operational limitations that are beyond Woodside’s direct control.

### 9.2 Scientific Monitoring – Control Measure Options Analysis

#### 9.2.1 Alternative Control Measures

| Alternative Control Measures considered   |                          |   |             |   |   |
|---|--------------------------|---|-------------|---|---|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |                          |   |             |   |   |
| Ref   | Control Measure Category | Option considered   | Implemented | Environmental Consideration   | Feasibility / Cost  |
| SM01  | System                   | Analytical laboratory facilities closer to the likely spill affected area | No          | SM01 water quality monitoring requires water samples to be transported to National Association of Testing Authorities (NATA) rated laboratories in Perth or interstate. Consider the benefit of laboratory access and transportation times to deliver water samples and complete lab analysis. There is a time lag from collection of water samples to being in receipt of results and confirming hydrocarbon contact to sensitive receptors). The environmental consideration of having access to suitable laboratory facilities in Exmouth or Karratha to carry out the hydrocarbon analysis would provide faster turnaround in reporting of results only by a matter of days (as per the time to transport samples to laboratories). | Laboratory facilities and staff available at locations closer to the spill affected area can reduce reporting times only to a moderate degree (days) with associated high costs of maintaining capability do not improve the environmental benefit.   |
| SM01  | System                   | Dedicated contracted SMP vessel (exclusive to Woodside)                   | No          | Would provide faster mobilisation time of scientific monitoring resources, environmental benefit associated with faster mobilisation time would be minor compared to selected options.  | Chartering and equipping additional vessels on standby for scientific monitoring has been considered. The option is reasonably practicable but the sacrifice (charter costs and organisational complexity) is significant, particularly when compared with the anticipated availability of vessels and resources within the required timeframes. The selected delivery provides capability to meet the scientific monitoring objectives, including collection of pre-emptive data where baseline knowledge gaps are identified for receptor locations where spill predictions of time to contact are >10 days. The effectiveness of this alternative control (weather dependency, availability and survivability) is rated as very low<br><br>The cost and organisational complexity of employing a dedicated response vessel is considered disproportionate to the potential environmental benefit by adopting these delivery options. |

#### 9.2.2 Additional Control Measures

| Additional Control Measures considered   |                          |  |             |   |  |
|--|--------------------------|--|-------------|---|--|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |                          |  |             |   |  |
| Ref  | Control Measure Category | Option considered  | Implemented | Environmental Consideration   | Feasibility / Cost   |
| SM01   | System                   | Determine baseline data needs and provide implementation plan in the event of an unplanned hydrocarbon release | Yes         | Address resourcing needs to collect post spill (pre-contact) baseline data as spill expands in the event of a loss of well containment from the PAP activities. | Woodside relies on existing environmental baseline for receptors which have predicted hydrocarbon contact (above environment threshold) <10 days and acquiring pre-emptive data in the event of a hydrocarbon spill from the PAP activities based on receptors predicted to have hydrocarbon contact >10 days.<br><br>Ensure there is appropriate baseline for key receptors for all geographic locations that are potentially impacted <10 days of spill event, where practicable.<br><br>Address resourcing needs to collect pre-emptive baseline as spill expands in the event of a loss of well control (LOWC) and a surface release of marine diesel from the activities. |

### 9.2.3 Improved Control Measures

**Improved Control Measures considered** – No reasonably practicable improved Control Measures identified.

## 9.3 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the PAP.

- Alternative
  - None selected
- Additional
  - Determine baseline data needs and activate SMPs for any identified PBAs in the event of an unplanned hydrocarbon release
- Improved
  - None selected

## 9.4 Operational Plan

Key actions from the Scientific Monitoring Program Operational Plan for implementing the response are outlined in Table 9-1.

**Table 9-1: Scientific monitoring program operational plan actions**

| Responsibility  | Action  |
|---|---|
| Activation  |   |
| CIMT Planning<br>(CIMT Planning – Environment Unit)   | Mobilise SMP Lead/Manager and SMP Coordinator to the CIMT Planning function.  |
| CIMT Planning<br>(CIMT Planning – Environment Unit)<br><br>(SMP Lead/Manager and SMP Coordinator)                                 | Constantly assess all outputs from OM01, OM02 and OM03 (Section 10.4.2 of the Environment Plan) to determine receptor locations and receptors at risk. Confirm sensitive receptors likely to be exposed to hydrocarbons, timeframes to specific receptor locations and which SMPs are triggered.<br><br>Review baseline data for receptors at risk.   |
| CIMT Planning<br>(CIMT Planning – Environment Unit)<br><br>(SMP Lead/Manager and SMP Coordinator)                                 | SMP co-ordinator stands up the SMP contractor.<br><br>Stands up subject matter experts, if required.  |
| CIMT Planning (CIMT Planning – Environment Unit)<br><br>(SMP Lead/Manager<br>SMP Coordinator, SMP standby contractor SMP manager) | Establish if, and where, pre-contact baseline data acquisition is required.<br><br>Determine practicable baseline acquisition program based on predicted timescales to contact and anticipated SMP mobilisation times.<br><br>Determine scope for preliminary post-contact surveys during the Response Phase.<br><br>Determine which SMP activities are required at each location based on the identified receptor sensitivities. |
| CIMT Planning (CIMT Planning – Environment Unit)<br><br>(SMP Lead/Manager, SMP Coordinator, SMP                                   | If response phase data acquisition is required, stand up the contractor SMP teams for data acquisition and instruct them to standby awaiting further details for mobilisation from the CIMT.  |

| Responsibility   | Action   |
|--|--|
| standby contractor SMP manager)  |  |
| CIMT Planning (CIMT Planning – Environment Unit)<br>(SMP Lead/Manager, SMP Coordinator, SMP standby contractor SMP manager)  | SMP contractor, SMP standby contractor to prepare the Field Implementation Plan.<br>Prepare and obtain sign-off of the Response Phase SMP work plan and Field Implementation Plan.<br>Update the IAP.  |
| CIMT Planning (CIMT Planning – Environment Unit)<br>(SMP Lead/Manager, SMP Coordinator SMP standby contractor SMP manager)   | Liaise with CIMT Logistics, and determine the status and availability of aircraft, vessels and road transportation available to transport survey personnel and equipment to point of departure.<br>Engage with SMP standby contractor SMP Manager and CIMT Logistics to establish mobilisation plan, secure logistics resources and establish ongoing logistical support operations, including: <ul style="list-style-type: none"> <li>• Vessels, vehicles and other logistics resources</li> <li>• Vessel fit-out specifications (as</li> <li>• Detailed in the Scientific Monitoring Program Operational Plan</li> <li>• Equipment storage and pick-up locations</li> <li>• Personnel pick-up/airport departure locations</li> <li>• Ports of departure</li> <li>• Land based operational centres and forward operations bases</li> </ul> Accommodation and food requirements. |
| CIMT Planning (CIMT Planning – Environment Unit)<br>(SMP Lead/Manager, SMP Coordinator, SMP standby contractor (SMP manager) | Confirm communications procedures between Woodside SMP team, SMP contractor SMP Duty Manager, SMP Team Leads and Operations Coordinator (CIMT).  |
| <b>Mobilisation</b>  |  |
| CIMT Logistics   | Engage vessels and vehicles and arrange fitting out as specified by the mobilisation Plan Confirm vessel departure windows and communicate with the SMP contractor SMP Duty Manager.<br>Agree SMP mobilisation timeline and induction procedures with the Operations Coordinator (CIMT).   |
| CIMT Logistics   | Coordinate with SMP contractor SMP Duty Manager to mobilise teams and equipment according to the logistics plan and Sector induction procedures.   |
| SMP Survey Team Leads  | SMP Survey Team Leader(s) coordinate on-ground/on-vessel mobilisations and support services with the Operations Coordinator (CIMT).  |

## 9.5 ALARP and Acceptability Summary

| ALARP and Acceptability Summary   |  |
|---|--|
| Scientific Monitoring   |  |
| <b>ALARP Summary</b>  | All known reasonably practicable control measures have been adopted  |
|   | X Determine baseline data needs and activate SMPs for any identified PBAs in the event of an unplanned hydrocarbon release   |
|   | No reasonably practical additional, alternative, and/or improved control measure exists  |
| <p>The resulting scientific monitoring capability has been assessed against the worst-case credible spill scenarios. The range of strategies provide an ongoing approach to monitoring operations to assess and evaluate the scale and extent of impacts.</p> <p>All known reasonably practicable control measures have been adopted with the cost and organisational complexity of these options determined to be Moderate and the overall delivery effectiveness considered Medium. The SMP's main objectives can be met, with the addition of one alternative control measures to provide further benefit.</p> |  |
| <b>Acceptability Summary</b>  | <ul style="list-style-type: none"> <li>• The control measures selected for implementation manage the potential impacts and risks to ALARP.</li> <li>• In the event of a hydrocarbon spill for the PAP, the control measures selected, meet or exceed the requirements of Woodside Management System and industry best-practice.</li> <li>• Throughout the PAP, relevant Australian standards and codes of practice will be followed to evaluate the impacts from a loss of well containment.</li> <li>• The level of impact and risk to the environment has been considered with regard to the principles of Environmentally Sustainable Development (ESD); and risks and impacts from a range of identified scenarios were assessed in detail. The control measures described consider the conservation of biological and ecological diversity, through both the selection of control measures and the management of their performance. The control measures have been developed to account for the worst-case credible case scenarios, and uncertainty has not been used as a reason for postponing control measures.</li> </ul> |
| <p>On the basis from the impact assessment above and in <b>Section 8</b> of the EP Woodside considers the adopted controls discussed manage the impacts and risks associated with implementing scientific monitoring activities to a level that is ALARP and acceptable.</p>  |  |

## 10 Oiled Wildlife Response – ALARP Assessment

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.8 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 10.1 Existing Capability – Wildlife Response

Woodside’s exiting level of capability is based on internal and third-party resources that are available 24 hours per day, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside’s direct control.

### 10.2 Oiled Wildlife Response – Control Measure Options Analysis

#### 10.2.1 Alternative Control Measures

| Alternative Control Measures Considered   |   |  |   |   |             |
|---|---|--|---|---|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |   |  |   |   |             |
| Option considered   | Environmental consideration   | Feasibility  | Approximate cost  | Assessment conclusions  | Implemented |
| Direct contracts with service providers   | This option duplicates the capability accessed through AMOSC and OSRL and would compete for the same resources. Does not provide a significant increase in environmental benefit. | These delivery options provide increased effectiveness through more direct communication and control of specialists. However, no significant net benefit is anticipated. | Duplication of capability – already subscribed to through contracts with AMOSC and OSRL | This option is not adopted as the existing capability meets the need. | <b>No</b>   |

#### 10.2.2 Additional Control Measures

| Additional Control Measures Considered   |   |   |   |   |             |
|--|---|---|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |   |   |   |   |             |
| Option considered  | Environmental consideration   | Feasibility   | Approximate cost  | Assessment conclusions  | Implemented |
| Additional wildlife treatment systems  | <p>The selected delivery options provide access to call-off contracts with selected specialist providers. The agreements ensure that these resources can be mobilised to meet the required response objectives, commensurate with the progressive nature of environmental impact and the time available to monitor hydrocarbon plume trajectories.</p> <p>Provides response equipment and personnel by Day 3. The additional cost in having a dedicated oiled wildlife response (equipment and personnel) in place is disproportionate to environmental benefit.</p> <p>These selected delivery options provide capacity to carry out an oiled wildlife response if contact is predicted; and to scale up the response if required to treat widespread contamination.</p> <p>Current capability meets the needs required and there is no additional environmental benefit in adopting the improvements.</p> | <p>Although hydrocarbon contact above threshold concentrations with offshore waters is expected on day 12 (CS-01), given the low likelihood of such an event occurring and that the current capability meets the need, the cost of implementing measures to reduce the mobilisation time is considered disproportionate to the benefit. Additionally, the remote offshore location of the release site, with an earliest impact on day 12, provides sufficient opportunity for the ongoing monitoring and surveillance operations to inform the scale of the response.</p> <p>Numbers of oiled wildlife are expected to be low in the remote offshore setting of the oiled wildlife response, given the distance from known aggregation areas.</p> <p>Oiled wildlife response capacity would be addressed for open Commonwealth waters through the AMOSC arrangements, as informed by operational monitoring.</p> <p>The cost and organisational complexity of this approach is moderate, and the overall delivery effectiveness is high.</p> | Additional wildlife response resources could total A\$1,700 per operational site per day. | This option is not adopted as the existing capability meets the need. | <b>No</b>   |

|  |   |  |   |   |           |
|--|---|--|---|---|-----------|
| Additional trained wildlife responders | Numbers of oiled wildlife are expected to be low in the remote offshore setting of the oiled wildlife response, given the distance from known aggregation areas.<br><br>The potential environmental benefit of training additional personnel is expected to be low. | Current numbers meet the needs required and additional personnel are available through existing contracts with oil spill response organisations and environmental panel contractors.<br><br>Additional equipment and facilities would be required to support ongoing response, depending on the scale of the event and the impact to wildlife. Materials for holding facilities, portable pools, enclosures and rehabilitation areas would be sourced as required. | Additional wildlife response personnel cost A\$2,000 per person per day | This option is not adopted as the existing capability meets the need. | <b>No</b> |
|--|---|--|---|---|-----------|

### 10.2.3 Improved Control Measures

| Improved Control Measures considered  |   |   |  |   |             |
|---|---|---|--|---|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |   |  |   |             |
| Option considered   | Environmental consideration   | Feasibility   | Approximate cost   | Assessment conclusions  | Implemented |
| Faster mobilisation time for wildlife response  | Response time is limited by specialist personnel mobilisation time. Current timing is sufficient for expected first shoreline contact.<br><br>This control measure provides increased effectiveness through faster mobilisation of specialists. However, no significant net environmental benefit is expected due to shoreline stranding times. | Pre-positioning vessels or equipment would reduce mobilisation time for oiled wildlife response activities. However, given the effectiveness of an oiled wildlife response is expected to be low, an earlier response would provide a marginal increase in environmental benefit. | Wildlife response packages to preposition at vulnerable sites identified through the deterministic modelling cost A\$700 per package per day.<br><br>The cost of having dedicated equipment and personnel available to respond faster is considered disproportionate to the environmental benefit. | This option is not adopted as the existing capability meets the need. | <b>No</b>   |

### 10.3 Selected control measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the PAP.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected

## 11 Waste Management

Alternative, Additional and Improved options have been identified and assessed against the base capability described in Section 10.4.10 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

### 11.1 Existing Capability – Waste Management

Woodside’s exiting level of capability is based on internal and third-party resources that are available 24 hours per day, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/restocking provisions, and other similar logistic and operational limitation that are beyond Woodside’s direct control.

### 11.2 Waste Management – Control Measure Options Analysis

#### 11.2.1 Alternative Control Measures

| Alternative Control Measures Considered   |                             |             |                  |                        |             |
|---|-----------------------------|-------------|------------------|------------------------|-------------|
| <i>Alternative, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control</i> |                             |             |                  |                        |             |
| Option considered   | Environmental consideration | Feasibility | Approximate cost | Assessment conclusions | Implemented |
| No reasonably practical alternative control measures identified.  |                             |             |                  |                        |             |

#### 11.2.2 Additional Control Measures

| Additional Control Measures Considered   |   |  |   |   |             |
|--|---|--|---|---|-------------|
| <i>Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures</i> |   |  |   |   |             |
| Option considered  | Environmental consideration   | Feasibility  | Approximate cost  | Assessment conclusions  | Implemented |
| Increased waste storage capability   | The procurement of waste storage equipment options on the day of the event will allow immediate response and storage of collected waste. The environmental benefit of immediate waste storage is to reduce ecological consequence by safely securing waste, allowing continuous response operations to occur. | Access to Veolia’s storage options provides the resources required to store and transport sufficient waste to meet the need. Access to waste contractors existing facilities enables waste to be stockpiled and gradually processed within the regional waste handling facilities. Additional temporary storage equipment is available through existing contract and arrangements with OSRL. Existing arrangements meet identified need for the PAP. | Cost for increased waste disposal capability would be approx. A\$1,300 per m <sup>3</sup> .<br>Cost for increased onshore temporary waste storage capability would be approx. A\$40 per unit per day. | This option is not adopted as the existing capability meets the need. | No          |

#### 11.2.3 Improved Control Measures

| Improved Control Measures considered  |   |  |  |   |             |
|---|---|--|--|---|-------------|
| <i>Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility</i> |   |  |  |   |             |
| Option considered   | Environmental consideration   | Feasibility  | Approximate cost   | Assessment conclusions  | Implemented |
| Faster response time  | The access to Veolia waste storage options provides the resources to store and transport waste, permitting the wastes to be stockpiled and gradually processed within the regional waste handling facilities.<br><br>Bulk transport to Veolia’s licensed waste management facilities would be undertaken via controlled-waste-licensed vehicles and in accordance with Environmental Protection (Controlled Waste) Regulations 2004.<br><br>The environmental benefit from successful waste storage will reduce pressure on the treatment and disposal facilities reducing ecological consequences by safely securing waste. In addition, waste storage and transport will allow continuous response operations to occur. | Woodside already maintains an equipment stockpile in Exmouth to enable shorter response times to incidents. This stockpile includes temporary waste storage equipment.<br><br>Woodside has access to stockpiles of waste storage and equipment in Dampier and Exmouth through existing contracts and arrangements. | The incremental benefit of having a dedicated local Woodside owned stockpile of waste equipment and transport is considered minor and cost is considered disproportionate to the benefit gained given predicted shoreline contact times. | This option is not adopted as the existing capability meets the need. | No          |

|  |   |  |  |  |  |
|--|---|--|--|--|--|
|  | <p>This delivery option would increase known available storage, eliminating the risk of additional resources not being available at the time of the event. However, the environmental benefit of Woodside procuring additional waste storage is considered minor as the risk of additional storage not being available at the time of the event is considered low and existing arrangements provide adequate storage to support the response.</p> |  |  |  |  |
|--|---|--|--|--|--|

### 11.3 Selected control measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the PAP.

- Alternative
  - None selected
- Additional
  - None selected
- Improved
  - None selected

## **Appendix F. Relevant Persons Consultation**

**Table 1 and 2, Appendix F – Stybarrow Plug and Abandonment Environment Plan**

Date: November 2023

Revision: 1

**TABLE OF CONTENTS**

**TABLE 1: CONSULTATION REPORT WITH RELEVANT PERSONS OR ORGANISATIONS.....9**

**TABLE 2: ENGAGEMENT REPORT WITH PERSONS OR ORGANISATIONS ASSESSED AS NOT RELEVANT .....265**

**1. INITIAL CONSULTATION (27 MAY 2022).....272**

1.1 Consultation Information Sheet sent to relevant persons .....272

1.2 Email sent to Australian Hydrographic Office (AHO) and Australian Maritime Safety Authority (AMSA) – Marine Safety (27 May 2022) .....280

1.3 Email sent to Australian Fisheries Management Authority (AFMA) (27 May 2022) .. .....282

1.4 Email sent to Director of National Parks (DNP) (27 May 2022).....285

1.5 Email sent to Department of Biodiversity, Conservation and Attractions (DBCA) (27 May 2022).....287

1.6 Email sent to Department of Mines, Industry Regulation and Safety (DMIRS) (27 May 2022).....289

1.7 Email sent to Department of Transport (DoT) (27 May 2022).....290

1.8 Email sent to Western Australian Fishing Industry Council (WAFIC) (27 May 2022) .....292

1.9 Email sent to Exmouth Recreational Marine Users (27 May 2022).....295

1.9.1 Email sent to Exmouth Game Fishing Club (27 May 2022).....297

1.10 Email sent to Department of Agriculture, Water and the Environment (DAWE) (27 May 2022).....299

1.11 Email sent to Department of Defence (DoD) (27 May 2022).....302

1.12 Email sent to Department of Primary Industries and Regional Development (DPIRD) (27 May 2022).....304

1.13 Email sent to Department of Industry, Science, Energy and Resources (DISER) (27 May 2022).....307

1.14 Email sent to Recfishwest (27 May 2022) .....309

1.15 Email sent to Marine Tourism WA (27 May 2022) .....311

1.16 Email sent to APPEA (27 May 2022) .....313

1.17 Email sent to Western Deepwater Trawl Fishery (27 May 2022) .....315

1.18 Email sent to Australian Border Force (27 May 2022).....318

1.19 Email sent to Commonwealth Fisheries Association (CFA) (27 May 2022) .....320

1.20 Email sent to Ningaloo Coast World Heritage Advisory Committee (NCWHAC) (27 May 2022).....323

1.21 Email sent to Shire of Exmouth (27 May 2022) .....325

1.22 Email sent to Exmouth Community Liaison Group (27 May 2022).....327

1.23 Email sent to WA Game Fishing Association (27 May 2022).....329

1.24 Email sent to Cape Conservation Group (27 May 2022) .....330

|           |   |            |

## Stybarrow Plug and Abandonment Environment Plan

### Australian Fisheries Management Authority (AFMA)

- Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with AFMA for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:
  - Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
  - Consultation information provided to AFMA on 27 May 2022 based on their function, interest and activities.
  - Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
  - Woodside has addressed and responded to AFMA over a 17 month period.

#### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed AFMA advising of the proposed activity (Appendix F, reference 1.3) and provided a Consultation Information Sheet.
- On 1 June 2022, AFMA responded advising that it had no specific comment on the proposal and that it is important to consult with all fishers who have entitlements to fish within the proposed area, which could be done through the relevant fishing industry associations or directly with fishers who hold entitlements in the area. AFMA also provided contact details for fishery associations, as well as for obtaining individual contact details for licence holders.
- On 27 July 2022, Woodside responded and confirmed that it had provided information to the Western Deepwater Trawl Fishery as well as representative organisations and licence holders as per AFMA contact details.
- On 16 February 2023, Woodside emailed AFMA advising of the proposed activity (Appendix F, reference 2.19) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to AFMA advising of the proposed activity (Appendix F, reference 2.19.1) and provided a Consultation Information Sheet.
- On 27 March 2023, AFMA responded advising that it has no specific comment on the proposal and that it is important to consult with all fishers who have entitlements to fish within the proposed area, which can be done through the relevant fishing industry associations or directly with fishers who hold entitlements in the area. AFMA also provided contact details for fishery associations, as well as for obtaining individual contact details for licence holders.
- On 2 April 2023, Woodside responded and thanked AFMA for its feedback and confirmed that it had provided information to relevant fishery licence holders as well as representative organisations on behalf of Commonwealth fishery licence holders who have entitlements to fish within the proposed area.

As stated, the summary above demonstrates that Woodside's consultation with AFMA for the purpose of 11A(1) is complete. However, as per Woodside's ongoing commitment to consultation, engagement with AFMA continues as summarised below:

#### Ongoing consultation:

- On 22 May 2023, Woodside emailed AFMA requesting Commonwealth fishery licence holder contact details unrelated to this proposed activity.
- On 30 May 2023, AFMA responded to advise there will be a change in providing this information. In a further follow up email on the same day, AFMA advised there is a fee payable for this information and a need to sign a Deed of Confidentiality.
- On 17 July 2023, an agreement was reached with AFMA for Woodside to consult directly with Commonwealth fisheries as per contact details provided by AFMA under the new Deed of Confidentiality.

| Australian Hydrographic Office (AHO)   |   |  |
|--|---|--|
| <p>Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with AHO for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.</li> <li>• Consultation information provided to AHO on 27 May 2022 based on their function, interest and activities.</li> <li>• Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.</li> <li>• Woodside has addressed and responded to AHO over a 17 month period.</li> </ul> <p><b>Summary of information provided and record of consultation:</b></p> <ul style="list-style-type: none"> <li>• On 27 May 2022, Woodside emailed the AHO advising of the proposed activity (Appendix F, reference 1.2) and provided a Consultation Information Sheet.</li> <li>• On 16 February 2023, Woodside emailed the AHO advising of the proposed activity (Appendix F, reference 2.15) and provided a Consultation Information Sheet.</li> <li>• On 17 February 2023, the AHO responded and acknowledged receipt of Woodside’s consultation email.</li> <li>• On 15 March 2023, Woodside sent a reminder email to AHO advising of the proposed activity (Appendix F, reference 2.15.1) and provided a Consultation Information Sheet.</li> <li>• On 15 March 2023, AHO responded to Woodside and acknowledged receipt of Woodside’s consultation email.</li> </ul> |   |  |
| Summary of Feedback, Objection or Claim  | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan  |
| <p>AHO acknowledged receipt of consultation emails.</p> <p>Whilst feedback has been received, there were no objections or claims.</p>  | <p>Woodside notes that AHO has acknowledged receipt of consultation information.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside will notify the AHO no less than four working weeks before operations commence, as referenced as <b>PS 1.3</b> in this EP.</p> <p>No additional measures or controls are required.</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Australian Maritime Safety Authority (AMSA) - Marine Safety**

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with AMSA for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to AMSA – Marine Safety on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to AMSA – Marine Safety over a 17 month period.

**Summary of information provided and record of consultation:**

- On 27 May 2022, Woodside emailed AMSA advising of the proposed activity (Appendix F, reference 1.2) and provided a Consultation Information Sheet.
- On 1 June 2022, AMSA responded to Woodside requesting that AHO is contacted no less than four weeks before operations, with details relevant to operations, in order for the AHO to promulgate the appropriate Notice to Mariners. AMSA further requested that the main vessel/s notify AMSA’s Joint Rescue Coordination Centre (JRCC) for promulgation of radio-navigation warnings 24-48 hours before operations commence. JRCC will require the vessel details (including name, call sign and Maritime Mobile Service Identity (MMSI)), satellite communications details (including INMARSAT-C and satellite telephone), area of operation, requested clearance from other vessels and need to be advised when operations start and end.
  - AMSA reminded Woodside of its obligations to comply with the International Rules for Preventing Collisions at Sea (COLREGs), in particular, the use of appropriate lights and shapes to reflect the nature of operations (e.g., restricted in the ability to manoeuvre). Vessels should also ensure their navigation status is set correctly in the ship’s AIS unit.
  - AMSA provided contact details for Woodside to obtain a vessel traffic plot showing Automatic Identification System (AIS) traffic data.
- On 27 July 2022, Woodside responded to AMSA advising it would:
  - Notify the AHO no less than four weeks before operations, with details relevant to the operations in order for the AHO to promulgate the appropriate Notice to Mariners.
  - Notify AMSA’s JRCC at least 24-48 hours before operations commence, in order to promulgate radio-navigation warnings.
  - Notify AHO and the JRCC in the event of changes to intended operations.

Woodside also noted AMSA’s feedback on the exhibition of appropriate lights and shapes and confirmed it will:

  - Comply with the International Rules for Preventing Collisions at Sea.
  - Ensure vessel navigation status is set correctly in the ship’s AIS unit.

- On 16 February 2023, Woodside emailed AMSA advising of the proposed activity (Appendix F, reference 2.15) and provided a Consultation Information Sheet.
- On 15 March 2023, Woodside sent a reminder email to AMSA advising of the proposed activity (Appendix F, reference 2.15.1) and provided shipping lane figures.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with DFAT for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to DFAT on 15 March 2023 based on their function, interest and activities.
- Woodside has addressed and responded to DFAT over an 8 month period.

### **Summary of information provided and record of consultation:**

- On 15 March 2023, Woodside emailed DFAT advising of the proposed activity (Appendix F, reference 2.68) and provided a Consultation Information Sheet. Woodside specifically sought DFAT's input to the proposed activities in relation to:
  - Management of foreign vessels.
  - Confirmation as to whether there are any specific persons or organisations that Woodside should contact whose functions, interests or activities may be affected by the proposed activities in foreign countries.
  - Implications for oil spill planning and response in international waters.
  - Noted previous advice from DFAT on a separate EP in relation to oil spill response planning in international waters and requested confirmation that Woodside's proposed notifications meet DFAT's requirements.
- On 31 March 2023, Woodside emailed DFAT following up of the proposed activity (Appendix F, reference 2.68.1) and to request any feedback. Woodside reiterated its specific requests for DFAT's input from its initial email on 15 March 2023.
- On 19 April 2023, Woodside emailed DFAT following up of the proposed activity (Appendix F, reference 2.68.2) and to request any feedback and DFAT's specific input to Woodside's proposed activities described in its 15 March 2023 email.
- On 1 May 2023, Woodside had a phone call with DFAT to follow up on the proposed activity and request any feedback.
- On 1 May 2023, Woodside followed up the phone call with an email thanking DFAT for its time and:
  - provided information regarding consultation requirements under the OPGGS Regulations.
  - noted the potential implications for oil spill planning and response in international waters or impacts to the interests of foreign countries from unplanned activities.
  - requested advice on the best contact at DFAT to provide feedback on Woodside's consultation and provided a copy of previously provided information.
- On 1 May 2023, DFAT responded thanking Woodside for its email and provided contact details for the correct persons within DFAT to provide feedback.
- On 1 May 2023, DFAT responded thanking Woodside for its email and:
  - noted that the activities will be conducted in Australian waters and environmental management is therefore a matter for Australian domestic regulators.
  - requested Woodside submits its plans to NOPSEMA in accordance with the relevant regulations and that NOPSEMA can contact the relevant part of DFAT should this be necessary.
- On 10 May 2023, Woodside emailed DFAT to thank it for its feedback and:

## *Stybarrow Plug and Abandonment Environment Plan*

- Noted DFAT's advice that:
  - environmental management for these EPs is a matter for Australian domestic regulators;
  - Woodside should submit its plans to NOPSEMA in accordance with the relevant regulations; and
  - NOPSEMA can contact the relevant part of DFAT should this be necessary.
- Confirmed that:
  - Woodside would engage NOPSEMA with respect to DFAT's advice.
  - planned activities proposed under the proposed EP would be conducted in Australian waters.
- Woodside clarified that in the highly unlikely event of a hydrocarbon spill, modelling has indicated that the spill may traverse international waters, including a potential for hydrocarbons to accumulate on Indonesian shorelines. Therefore, these EPs may require international consultation and oil spill response requirements, prompting DFAT's functions interests or activities.
- Woodside offered a meeting with DFAT to discuss the proposed activities and Woodside's request for DFAT's input and feedback.
- Woodside reiterated its specific requests for DFAT's input from its 15 March 2023 email.
- On 10 May 2023, DFAT responded:
  - confirming it was happy to meet with Woodside and provided possible dates.
  - Noted it recognises that Woodside would like to consult with DFAT, and it would do its best to incorporate the relevant parts of the department.
  - Noted the proposed notification requirements set out in Woodside's email which included notifying AMSA and Western Australian departments as soon as possible and notifying other government departments as soon as practical after that. DFAT agreed that AMSA is the most appropriate point of contact and AMSA quickly notifies DFAT when there are maritime incidents that may have an international dimension.
- On 11 May 2023, Woodside thanked DFAT by email for the previous response and asked DFAT to nominate a preferred time for a video call to further discussions.
- On 12 May 2023, DFAT emailed Woodside proposing meeting arrangements.
- On 12 May 2023, Woodside emailed DFAT confirming meeting arrangements.
- On 24 May 2023, Woodside had a meeting with DFAT.
  - Woodside explained the change in consultation requirements for consultation on the environment that may be affected (EMBA) by planned or unplanned activities the subject of the EP and explained the EMBA which predicts that in the unlikely event of a hydrocarbon spill, the spill may traverse international waters and slick may wash up on the shoreline in Indonesia.
  - DFAT advised it would normally consider the maritime boundaries and sovereign rights within those areas and noted there are conventions on oil spill, but generally that will lead to another Department that has responsibility, for example NOPSEMA or AMSA.
  - DFAT noted there is a bilateral desk which manages Australia's relationship with Indonesia, which would work with the Embassy in Indonesia. DFAT noted it is very happy with AMSA being the contact point and agency for oil spill.
  - DFAT advised it would want to manage any sensitivities around engagement with the countries directly.
  - DFAT advised it would:

## Stybarrow Plug and Abandonment Environment Plan

- Check relevant treaties to confirm lead agencies.
- Confirm Woodside's proposed notification requirements are appropriate.
- Provide an after-hours contact within DFAT that can provide notification internally very quickly. Noted there is a single entry point into DFAT and that part of DFAT can send information internally to assess.
- Woodside provided an overview of the proposed activities.
- DFAT queried what time period Woodside's hydrocarbon spill modelling covers.
- Woodside advised it works out what the worst-case scenario is if oil is free flowing, so it assumes there is no response and then models a minimum of 100 runs based on different weather patterns throughout the year which would impact where the oil would go.
- On 30 May 2023, DFAT emailed Woodside thanking it for the meeting and:
  - Advised it had reviewed the treaties to which Australia is party and which relate to oil spills and oil spill response and confirmed that AMSA is the correct contact point.
  - Advised AMSA would normally contact DFAT when a maritime incident involves another country.
  - Advised that should Woodside wish to contact DFAT in an emergency, it can email the Global Watch Office ([globalwatchoffice@dfat.gov.au](mailto:globalwatchoffice@dfat.gov.au)) which is monitored 24/7 and can contact the relevant part of DFAT for a response.
  - Provided contact information for DFAT agencies in Timor-Leste and Indonesia.
- On 2 June 2023, Woodside responded thanking DFAT for its confirmation and providing the contact details for relevant officials, which Woodside would reach out to directly if necessary, as part of EP preparation.
- On 15 June 2023, Woodside emailed the DFAT agency contacts provided and:
  - provided a Consultation Information Sheet for the proposed activities.
  - advised the proposed activities could potentially have an environmental consequence beyond Australia's jurisdiction, in the highly unlikely event of a hydrocarbon release.
  - noted the Australian Government is signatory to international agreements with both Timor-Leste and Indonesia, which address matters relating to oil spill preparedness and response, reflecting the shared commitment to managing the risks associated with petroleum activities and protecting the marine environment in the region.
  - outlined the notifications Woodside plans to include in the EP in the event a hydrocarbon spill occurred that is likely to traverse international waters.
  - requested any further feedback from DFAT.
- On 16 June 2023, Woodside emailed an additional DFAT representative following receipt of an out of office.
- On 26 June 2023, DFAT responded to Woodside stating it did not have any comments on the material provided. DFAT suggested Woodside consult with Timor-Leste's Autoridade Nacional do Petróleo e Minerais / National Petroleum and Minerals Authority (Portuguese acronym ANPM) if not already done so noting the proposed activities could potentially have an environmental consequence in Timor-Leste's maritime jurisdiction.
- On 27 June 2023, Woodside responded to DFAT to advise the modelling of worst case hydrocarbon spill indicated no contact at Timor-Leste. Woodside noted it would engage with ANPM if an unplanned event indicates hydrocarbons may enter Timor-Leste's maritime jurisdiction. Woodside also noted ANPM were aware of Woodside's response capabilities and internal processes as it had engaged with ANPM on this for another EP.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with DoD for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to DoD on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to DoD over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed DoD advising of the proposed activity (Appendix F, reference 1.11) and provided a Consultation Information Sheet.
- On 16 February 2023, Woodside emailed DoD advising of the proposed activity (Appendix F, reference 2.16) and provided a Consultation Information Sheet.
- On 8 March 2023, Woodside emailed DoD following up on the proposed activity and provided a Defence map (Appendix F, reference 2.16.1)

|---|--|--|
| No feedback, objections or claims received despite follow up. | Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7). | <p>Woodside notes DoD feedback for previous regional activities and commits to:</p> <ul style="list-style-type: none"> <li>○ providing DoD activity notification five weeks prior to commencement (<b>PS 1.5</b>) and AHO four weeks prior to commencement (<b>PS 1.3</b>).</li> <li>○ engaging Airservices Australia if the restricted airspace is activated.</li> <li>○ confirming restricted air space status with DoD as part of the commencement of activity notification.</li> </ul> <p>No additional measures or controls are required.</p> |

Department of Primary Industries and Regional Development (DPIRD)

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with DPIRD for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to DPIRD on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided DPIRD with the opportunity to provide feedback over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed DPIRD advising of the proposed activity (Appendix F, reference 1.12) and provided a Consultation Information Sheet.
- On 16 February 2023, Woodside emailed DPIRD advising of the proposed activity (Appendix F, reference 2.20) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to DPIRD advising of the proposed activity (Appendix F, reference 2.20.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan  |
|---|--|--|
| No feedback, objections or claims received despite follow up. | <p>Woodside has provided consultation information to DPIRD, WAFIC, and individual relevant licence holders.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside has assessed the potential for interaction with Commonwealth and State managed commercial fisheries in <b>Section 4.8.2</b> of this EP.</p> <p>Woodside will provide notifications to AFMA, DAFF – Fisheries, CFA, DPIRD, WAFIC, and relevant Fishery Licence Holders that have the potential to be directly impacted by planned activities in the Operational Area (Western Deepwater Trawl Fishery) prior to the commencement and at the end of the activity, as referenced as <b>PS 1.4</b> in this EP.</p> <p>No additional measures or controls are required.</p> |

Department of Transport (DoT)

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Department of Transport for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to Department of Transport (DoT) on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to Department of Transport over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed DoT advising of the proposed activity (Appendix F, reference 1.7) and provided a Consultation Information Sheet.
- On 7 June 2022, DoT responded to Woodside and provided advice on consultation if there was a risk that a spill could impact State waters from the proposed activity.
- On 27 July 2022, Woodside responded to DoT confirming that it acknowledged DoT's consultation requirements (Appendix 6 of the Department of Transport Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements, July 2020) and would provide a copy of the OPEP (Appendix D) for consultation.
- On 22 February 2023, Woodside emailed DoT advising of the proposed activity (Appendix F, reference 2.72) and provided a copy of the Stybarrow P&A Oil Pollution First Strike Plan.
- On 4 April 2023, DoT responded to Woodside seeking further clarification on the Stybarrow P&A Oil Pollution First Strike Plan. DoT:
  - Requested the OPEP
  - Asked if there was any modelling on the use of subsea dispersant and if there was any potential for subsea dispersant or dispersed oil to enter into State waters
  - Asked if there is a potential for oil to enter State waters, what Scientific Monitoring Plans would be activated.
- On 24 April 2023, Woodside responded to DoT's request for further information as follows:
  - Provided a full copy of the OPEP.
  - Advised no modelling has been undertaken. Subsea dispersant modelling may be undertaken to inform discussions with regulatory bodies and/or relevant persons/organisations who could be affected by a dispersant response.
  - Confirmed Woodside maintains a suite of 10 Scientific Monitoring Program (SMP) plans.
- On 18 May 2023, DOT responded to Woodside advising it had no further comments.

| <p><b>Commonwealth and WA State Government Departments or Agencies – Environment</b></p> |  |   |
| <p><b>Director of National Parks (DNP)</b></p>   |  |   |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Director of National Parks (DNP) for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to DNP on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to DNP over a 17 month period.

### **Summary of information provided and record of consultation:**

- On 27 May 2022, Woodside emailed DNP advising of the proposed activity (Appendix F, reference 1.4) and provided a Consultation Information Sheet.
- On 26 July 2022, DNP responded to noting:
  - Proposed activities may directly affect the values present in the marine parks and should be factored into the environment plan.
  - Proposed activities should be undertaken with the utmost care and an absolute avoidance of unplanned impacts upon the environment now and into the future given the proximity of the Operational Area to the Ningaloo Coast World Heritage Area.
  - Biologically important areas (BIAs) are present or nearby to the Operational Area.
  - Key Ecological Features (KEF) are present or nearby to the Operational Area, which are identified values of the Gascoyne and Ningaloo Marine Parks and activities that could affect these features should be factored into risk assessments.
  - There may also be cultural values present providing advice on consultation with Indigenous peoples and representative organisations where sea country could be affected by the proposed activities.
  - Their Marine Compliance Duty Officer is to be advised within 24 hours in the event that a marine pollution event is likely to impact on a marine park and further, it may request daily or weekly Situation Reports, depending on the scale and severity of the pollution incident.
- DNP also provided guidance on resource materials to assist in the development of the environmental plan with respect to assessing Australian marine parks and their representativeness, including:
  - The North-west Marine Parks Network Management Plan 2018 (management plan)
  - The Australian Marine Parks Science Atlas
- On 28 July 2022, Woodside responded to DNP and confirmed the following information:
  - Woodside confirmed:
    - DNP's expectations and contact details for consultation in the event of an incident that was likely to impact a marine park had been included in the environmental plan.
    - Potential impacts to marine park values had been assessed in developing the environment plan.
    - An assessment of planned activities, including leaving equipment in situ, and mitigating the activity's impact upon the environment had been included in the environment plan.
    - BIAs had been assessed in the environment plan.
    - KEFs had been assessed in the environment plan.
    - Information had been provided to the Yamatji Marlpa Aboriginal Corporation on behalf of the Nganhurra Thanardi Garrbu Aboriginal Corporation as part of consultation activities.
  - Woodside acknowledged references provided by DNP to support development of the environment plan, these being:
    - The North-west Marine Parks Network Management Plan 2018 (management plan)

## Stybarrow Plug and Abandonment Environment Plan

- The Australian Marine Parks Science Atlas.
- On 28 July 2022, DNP emailed Woodside, noting that the matters raised by DNP will be captured in the EP and that Woodside will provide an update in regards to the OPEP when it is available.
- On 16 February 2023, Woodside emailed DNP advising of the proposed activity considering potential risks to Australian Marine Parks (AMP) (Appendix F, reference 2.23), and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to DNP advising of the proposed activity (Appendix F, reference 2.23.1) and provided a Consultation Information Sheet.
- On 21 April 2023, the DNP responded, thanked Woodside for the opportunity to comment.
  - The DNP confirmed that the planned activities do not overlap any AMPs and there are no authorisation requirements from the DNP.
  - The DNP noted it has worked closely with NOPSEMA to develop and publish a guidance note and included link to the online document.
  - The DNP noted that the EP should:
    - identify and manage all impacts and risks on Australian marine park values (including ecosystem values) to an acceptable level and consider all options to avoid or reduce them to as low as reasonably practicable.
    - clearly demonstrate that the activity will not be inconsistent with the management plan.
  - The DNP also noted:
    - the North-west Marine Parks Network Management Plan 2018 (management plan) came into effect on 1 July 2018 and provides further information on values for Gascoyne Marine Park, which is the nearest to the proposed activity.
    - Australian marine park values are broadly defined into four categories: natural (including ecosystems), cultural, heritage and socio-economic. Information on the values for the marine parks is also located on the Australian Marine Parks Science Atlas.
  - The DNP asked to be made aware of incidences which occur within a marine park or are likely to impact on a marine park as soon as possible.
  - The DNP requested notification to be provided to the 24-hour Marine Compliance Duty Officer and should include:
    - titleholder details
    - time and location of the incident (including name of marine park likely to be affected)
    - proposed response arrangements as per the Oil Pollution Emergency Plan (e.g. dispersant, containment, etc.)
    - confirmation of providing access to relevant monitoring and evaluation reports when available; and
    - contact details for the response coordinator.
  - The DNP noted it may request daily or weekly Situation Reports, depending on the scale and severity of the pollution incident.
- On 4 May 2023, Woodside responded to the DNP thanking it for its response, including:
  - confirmation that planned activities do not overlap any AMPs, and as such there are no approvals required from DNP;
  - noted that the nearest marine turtle nesting site is approximately 39 km from the Operational Areas, which exceeds the 20 km buffer set by the National Light Pollution Guidelines (NLPG).
  - confirmed that Woodside has increased the buffer from turtle nesting beaches to 20 km as part of its controls for the proposed EP.

| <p>DNP provided the following feedback:</p> <ul style="list-style-type: none"> <li>noted there may be cultural values present requiring consultation with Indigenous peoples and representative organisations where sea country could be affected by the proposed activities.</li> <li>confirmed that planned activities do not overlap any AMPS and there are no authorisation requirements from the DNP.</li> <li>asked to be made aware of incidences which occur within a marine park or are likely to impact on a marine park as soon as possible.</li> <li>requested notification to be provided to the 24 hour Marine Compliance Duty Officer.</li> </ul> | <p>Woodside has addressed the DNP's feedback, including:</p> <ul style="list-style-type: none"> <li>advising that information had been provided to the Yamatji Marlpa Aboriginal Corporation (YMAC) on behalf of the Nganhurra Thanardi Garrbu Aboriginal Corporation as part of consultation activities.</li> <li>confirmed that planned activities and the Operational Area for this EP do not overlap any AMPs;</li> <li>noted DNP's advice that it had no objections or claims with respect to the proposed activity; and</li> <li>confirmed that Woodside will contact the DNP if details regarding the activity change and result in an overlap with or new impact to a marine park, or for emergency responses.</li> <li>noted that the nearest marine turtle nesting site is approximately 39 km from the Operational Areas, which exceeds the 20 km buffer set by the National Light Pollution Guidelines (NLPG).</li> <li>confirmed that Woodside has increased the buffer from turtle nesting beaches to 20 km as part of its controls for the proposed EP.</li> </ul> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside has increased the buffer from turtle nesting beaches to 20 km for the proposed EP.</p> <p>The Environment Plan demonstrates that the proposed activities are outside the boundaries of a proclaimed Commonwealth Marine Park and identifies that there are no credible impacts to the values of any Commonwealth Marine Parks as a result of planned activities (<b>Section 4.8</b>). While impacts to Commonwealth Marine Parks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in <b>Section 8.2</b> and <b>Section 8.3</b>.</p> <p>This EP demonstrates how Woodside will identify and managed all impacts and risks on Australian marine park values (including ecosystem values) to an ALARP and acceptable level and that the activity is not inconsistent with the management plan (<b>Section 9</b>).</p> <p>Woodside will ensure DNP is made aware of any incidences within a marine park for the activity, as per the commitment in the Oil Pollution First Strike Plan (<b>Appendix D</b>).</p> <p>Woodside considers the measures and controls in the EP are appropriate.</p> |
| <p>Ningaloo Coast World Heritage Advisory Committee (NCWHAC)</p>   |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Ningaloo Coast World Heritage Advisory Committee (NCWHAC) for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to NCWHAC on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to NCWHAC over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed NCWHAC advising of the proposed activity (Appendix F, reference 1.20) and provided a Consultation Information Sheet.
- On 16 February 2023, Woodside emailed NCWHAC advising of the proposed activity considering potential risks to Australian marine Parks (Appendix F, reference 2.13), and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to NCWHAC advising of the proposed activity (Appendix F, reference 2.13.1) and provided a Consultation Information Sheet.
- On 15 April 2023, NCWHAC responded to Woodside via NOPSEMA noting additional potential impacts to the outstanding universal value (OUV) within and adjacent to NCHWA. NCWHAC:
  - Noted concerns related to towing of equipment through the NCWHAC
  - Requested that known migratory periods informed measures to avoid migratory times and routes
  - Requested further information on routes taken to transport materials. Currently no indication of how the removed equipment will be taken away, including the size of the vessel; total number of journeys necessary for the removal; and time of year the vessel will be taking this route.
  - Requested a review other infrastructure left in situ near the site to understand cumulative impacts from infrastructure left in situ.
  - Noted concerns with new advice in relation to the unplanned loss of buoyancy of Stybarrow - (noting industry issues with maintaining RTM buoyancy across several current offshore projects). Requesting NOPSEMA review the adequacy of industry post-production maintenance and removal for all current and future environment plans.
  - Requiring further clarification on noise emissions from the proposed activity.
  - Noted traversing of the NCWHAC increases the likelihood of the introduction of Invasive Marine Species. Requesting NOPSEMA review information on the equipment being exempt from IMS management measures and apply the highest possible IMS mitigation.
- On 6 June 2023, Woodside responded to the NCWHAC regarding its comments raised with respect to the proposed decommissioning of the Stybarrow field. With respect to the proposed activity, Woodside advised:
  - It has considered the potential impacts associated with an unplanned loss of hydrocarbons to the marine environment due to vessel collision and will implement appropriate controls to mitigate against an unplanned release of hydrocarbons.
  - Woodside has determined that an unplanned loss of hydrocarbons represents a moderate current risk rating that is unlikely to result in potential impact greater than localized, minor and temporary disruption to a small proportion of the population and no impact on critical habitat or activity.
  - The proposed activities are outside the boundaries of the NCWHA and there are no credible direct impacts to the values of the NCWHA.
  - There are no current activities planned that would require vessels to transit directly through the Ningaloo Marine Park.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>○ Collisions with migratory species from vessel collision are unlikely to occur on the basis that during infrastructure removal activities vessels will operate at slow speeds, and whilst transiting between the OA and port, vessels will implement controls aligned to industry best practice and legislative requirements including compliance with requirements under the EPBC Act.</li> <li>○ There is no planned vessel transit route through the Ningaloo Marine Park or Exmouth Gulf.</li> <li>○ A CSV will be the primary vessel used to remove equipment from the field.</li> <li>○ Woodside has considered the potential impacts from noise emissions in the EP and has assessed each control against its ALARP process to identify controls that when implemented are considered to manage the impacts on marine fauna to ALARP.</li> </ul> |   |   |

| Summary of Feedback, Objection or Claim   | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan   |
| <p>The NCHWAC provided feedback with respect to the proposed activity. It noted potential impacts to the OUVs within and adjacent to the NCHWA from:</p> <ul style="list-style-type: none"> <li>• Oil spill / other discharges</li> <li>• Collisions</li> <li>• Cumulative impacts</li> <li>• Noise</li> <li>• Invasive marine species</li> <li>• Atmospheric emissions</li> </ul>  | <p>Woodside has addressed the NCWHAC’s feedback, including advising:</p> <ul style="list-style-type: none"> <li>• It has considered the potential impacts associated with an unplanned loss of hydrocarbons to the marine environment due to vessel collision and will implement appropriate controls to mitigate against an unplanned release of hydrocarbons.</li> <li>• Woodside has determined that an unplanned loss of hydrocarbons represents a moderate current risk rating that is unlikely to result in potential impact greater than localized, minor and temporary disruption to a small proportion of the population and no impact on critical habitat or activity.</li> <li>• The proposed activities are outside the boundaries of the NCWHA and there are no credible direct impacts to the values of the NCWHA.</li> <li>• There are no current activities planned that would require vessels to transit directly through the Ningaloo Marine Park.</li> <li>• Collisions with migratory species from vessel collision are unlikely to occur on the basis that during infrastructure removal activities vessels will operator at slow speeds, and whilst transiting between the OA and port, vessels will implement controls aligned to industry best practice and legislative requirements including compliance with requirements under the EPBC Act.</li> </ul> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>The Environment Plan demonstrates that the proposed activities are outside the boundaries of the Ningaloo Marine Park and identifies that there are no credible impacts to the values of the Ningaloo Marine Park (<b>Section 4.8</b>). While impacts to the Ningaloo Marine Park are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in <b>Section 8.2</b> and <b>Section 8.3</b>.</p> <p>No additional measures or controls are required.</p> |
| <p><b>Department of Biodiversity, Conservation and Attractions (DBCA)</b></p>   |   |   |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Department of Biodiversity, Conservation and Attractions (DBCA) for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to DBCA on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to DBCA over a 16 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed DBCA advising of the proposed activity (Appendix F, reference 1.5) and provided a Consultation Information Sheet.
- On 2 June 2022, DBCA responded to Woodside advising it had no comments in relation to its responsibilities under the *Conservation and Land Management Act 1984* and *Biodiversity Conservation Act 2016* based on the information provided by Woodside.
- On 27 July 2022, Woodside responded to DBCA acknowledging its advice.
- On 16 February 2023, Woodside emailed DBCA advising of the proposed activity (Appendix F, reference 2.24) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside emailed DBCA advising of the proposed activity (Appendix F, reference 2.24.1) and provided a Consultation Information Sheet.
- On 16 March 2023, DBCA responded, noting it had provided feedback previously on proposed activities. DBCA had several comments specific to the activities proposed in the information sheet:
  - Should Woodside have any additional information in relation to its monitoring or oil spill response preparedness for these decommissioning activities for DBCA's information, this would be welcome.
  - Woodside should be aware that any activities requiring access to reserves managed by DBCA under the CALM Act or requiring the taking / disturbance of threatened fauna listed under the BC Act in State waters may require additional approvals under this legislation, and early consultation with DBCA is recommended.
- On 1 June 2023, Woodside responded to DBCA:
  - Advising in accordance with Regulation 12(3) and 13(3) of the Environment Regulations 2009 of the OPGGS Act, Woodside's EPs describe the existing environment that may be affected by the activity during planned and unplanned activities. When describing the existing environment Woodside includes details of the particular values and sensitivities of the environment within and in proximity to operational areas and the EMBA for impact assessment and risk evaluation.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Western Tuna and Billfish Fishery for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Western Tuna and Billfish Fishery on 17 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Western Tuna and Billfish Fishery with the opportunity to provide feedback over a 9 month period.

### Summary of information provided and record of consultation:

- On 17 February 2023, Woodside emailed licence holders advising of the proposed activity (Appendix F, reference 2.3) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to licence holders advising of the proposed activity (Appendix F, reference 2.3.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan  |
|---|--|--|
| No feedback, objections or claims received despite follow up. | <p>Woodside has provided consultation information to AFMA, DAFF - Fisheries, CFA, ASBTIA, Tuna Australia and individual relevant licence holders.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. ## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Commonwealth Fisheries Association (CFA) for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to CFA on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided CFA with the opportunity to provide feedback over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed CFA advising of the proposed activity (Appendix F, reference 1.19) and provided a Consultation Information Sheet.
- On 16 February 2023, Woodside emailed the CFA advising of the proposed activity (Appendix F, reference 2.17) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to CFA advising of the proposed activity (Appendix F, reference 2.17.1) and provided a Consultation Information Sheet.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Tuna Australia for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Tuna Australia on 16 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to Tuna Australia over a 9 month period.

### Summary of information provided and record of consultation:

- On 17 June 2022, Tuna Australia provided the following feedback on the proposed activity:
  - Tuna Australia is putting together a consultation submission on the Stybarrow decommissioning environmental plans.
  - Tuna Australia sought additional time beyond the consultation closing date to provide feedback on proposed activities as it was still waiting on feedback from members holding Statutory Fishing Rights in the Western Tuna Billfish Fishery (WTBF).
- On 1 July 2022, Tuna Australia emailed Woodside:
  - provided background information on the fishery, including target species and historical locations for fishing activity.
  - noted that there had been no recent fishing effort at the Stybarrow location.
  - advised that several of its members were pursuing joint venture fishing arrangements with the Australian government to work these fishing grounds.
  - advised it was assisting a fisher to access WTBF licences and quota to commence fishing activities from Exmouth from the start of the 2023 season, with potential for spatial conflict arising from Woodside's planned activities.
  - drew Woodside's attention to the importance of the Leeuwin current as an important fauna distribution feature, including the target species of the WTBF.
  - In addition, Tuna Australia made the following claims/requests:
    - It is not evident from the risk management plan that these impacts have been considered or mitigated to an extent that would not impact tuna quality. We would like to see more specific mitigation detail regarding this in the relevant risk assessments.
    - A nuance of longline fishing is that the gear is set to drift with the currents and weather influences. Fishers have very little control over the distance and direction of the drift until they haul the gear. The risk management plans speak in general terms about cautionary areas, exclusion zones and notices to mariners. We would like to understand how Woodside contracted vessels in these areas can deconflict themselves from drifting longline gear should it enter the Operational Area
    - The risk assessments are silent on potential impacts on the electrical and acoustic interferences that may be generated by machinery or vessels used in these activities. This may impact on fishing vessel instrumentation, navigation systems and fish detecting equipment. Is there likely to be any undue acoustic or frequency disturbances produced by these proposed activities?
    - For the activities identified in these proposals, we would like to be reassured that these are done in the most expeditious timeframe and with utmost regard to the marine environment to maintain the integrity of the marine resource and impacts on other lawful users.
    - Tuna Australia provided an invoice for professional services fees for the consultation activity undertaken.
- On 29 July 2022, Woodside responded to Tuna Australia and:
  - acknowledged the feedback provided by Tuna Australia on behalf of its members on current and potential future fishing activities.
  - provided additional information on expected marine discharges and seabed disturbances.
  - provided additional information on the administration of and access to the safety exclusion zones and precautionary areas, as well as opportunities to establish on-water communications protocols to ensure the safety of all marine users.

## Stybarrow Plug and Abandonment Environment Plan

- advised that acoustic impacts will be limited to vessel noise and noises associated with cutting activities at the seabed.
- confirmed it planned to undertake proposed activities in accordance with the Environment Plan and as expeditiously as possible.
- provided further detail on activities and the completion date associated with the progressive decommissioning of the Stybarrow Field.
- On 16 February 2023, Woodside emailed Tuna Australia advising of the proposed activity (Appendix F, reference 2.18) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Tuna Australia advising of the proposed activity (Appendix F, reference 2.18.1) and provided a Consultation Information Sheet.
- On 15 March 2023 Tuna Australia responded and provided a position statement for consideration prior to consultation taking place and:
  - An overview of Tuna Australia's functions, interests and activities as well as the organisation's company objectives.
  - The geographic areas that Tuna Australia represents by membership Statutory Fishing Rights
  - A recommendation that project proponents also engage with the Australian Southern Bluefin Tuna Industry Association for any proposals in the Southern Bluefin Tuna fishing area.
  - The position that Tuna Australia considers itself a 'relevant person' consistent with NOPSEMA guidelines.
  - Tuna Australia requested:
    - Tuna Australia be contacted when any proposed activity has the potential to impact vessel navigation, fishing activities, and/or the conservation of fish resources consistent with the Offshore Petroleum and Greenhouse Gas Storage Act 2006.
    - A map from proponents of the proposed activity to determine if its member interests may be affected on a case-by-case basis.
    - Where potential effects exist, there is a need for a service agreement. Tuna Australia advised it can no longer coordinate consultation with offshore energy activities on behalf of our members without a service agreement in place. Tuna Australia requests proponents execute our services agreement and provide information in a written succinct manner including estimated boundaries for extent of planned activity impacts (i.e. artificial light, noise, discharges etc) as well as activities within the operational area. This advice will be distributed to members and non-members holding SFRs in the Eastern (114 concession holders) and Western (61 concession holders) Tuna and Billfish Fisheries for comment. Information provided would be relevant to tuna and billfish fisheries in the area that may affect vessel navigation, fishing activities, and/or the conservation of fish resources based on the planned aspects of the activity, and proposed control measures to manage impacts.
    - Tuna Australia noted that it wishes to engage constructively with project proponents for all situations where there is potential for conflict with vessel navigation, access to fishing area and/or gear, and the biology of target fish and baitfish. Advice provided can change annually due to the dynamic nature of our fisheries.
    - Tuna Australia encouraged companies requiring advice from our sector to enter into a consultation services agreement with Tuna Australia to support their applications. Noting that Tuna Australia may be able to provide information on vessel navigation, fishing activities and/or the conservation of fish resources that may be affected that is not publicly available and will be an important input to environmental impact and risk assessment processes.

The summary above demonstrates that consultation for the purpose of 11A(1) is complete however, as per Woodside's commitment to ongoing consultation, engagement has continued as summarised below:

### Ongoing consultation:

- On 26 May 2023, Woodside had a phone call with the Tuna Australia CEO and explained that Woodside would like to discuss a path forward following receipt of Tuna Australia's Position Statement across its EP activities, including the activities proposed under this EP.
  - Noted Tuna Australia's correspondence to NOPSEMA and copied to Woodside dated 17 May 2023, with respect to unrelated EPs.
  - Noted Tuna Australia's previous EP consultation feedback that Woodside had responded to with respect to unrelated EPs.
  - Reiterated that Woodside does not expect Tuna Australia to provide a consultation report for each of its EPs and are concerned about this potential misalignment on expectations.

## *Stybarrow Plug and Abandonment Environment Plan*

- Tuna Australia advised it would like to discuss a way forward as woodside suggested and requested Woodside call Tuna Australia on 30 May 2023, which Woodside committed to.
- On 2 June 2023, Woodside called Tuna Australia to follow up on its phone call on 26 May 2023.
  - Woodside left a message requesting a call back and the opportunity to meet with Tuna Australia to discuss Woodside's portfolio of environment plan activities.
  - Woodside requested the opportunity to discuss options to consult with Tuna Australia and potentially lessen the burden on Tuna Australia for providing feedback on Woodside's EPs.
  - Woodside offered the opportunity to take Tuna Australia through the entire EP portfolio, inclusive of decommissioning, so Tuna Australia could better assess the volume of activities.
  - Woodside reiterated that there was no expectation for Tuna Australia to provide a consultation report on each individual EP, and potentially there is an opportunity for Woodside and Tuna Australia to work together on a more strategic approach.
- On 20 June 2023, Woodside had a meeting with Tuna Australia and:
  - Discussed Tuna Australia's position statement, and in particular its reference to activities that have the potential to impact vessel navigation, fishing activities, and/or the conservation of fish resources.
  - Provided an overview of Woodside's activities and changes to consultation requirements following recent case law.
  - Tuna Australia agreed to provide more detail on how it would distribute consultation materials to its membership/licence holders and the format of any report arising from the data collected.
  - Woodside committed to review TA's Service Agreement.
- On 26 June 2023, Woodside emailed Tuna Australia thanking it for the 20 June 2023 meeting. Woodside:
  - Noted the clarity Tuna Australia's position statement provided with respect to being contacted when the proposed activity has the potential to impact vessel navigation, fishing activities, and/or the conservation of fish resources.
  - Noted that Woodside had provided a description of its activities and how recent case law and NOPSEMA guidance had resulted in Woodside undertaking consultation on the widest potential EMBA, which is a significantly greater area than any planned activity and any activity within an Operational Area.
  - Noted Tuna Australia's agreement to provide more detail on how Tuna Australia will distribute consultation materials to its members/licence holders and the format of any report.
- On 30 June 2023, Tuna Australia responded to Woodside. Tuna Australia:
  - Noted outcomes of the recent case law focussed on stakeholder engagement and ensuring energy companies meet regulatory requirements and NOPSEMA guidelines.
  - Requested Woodside send the recent case law.
  - Reached out to energy companies who have executed a services agreement with Tuna Australia and asked whether Tuna Australia could inform Woodside about their working relationship. Beach Energy confirmed it was happy for TA to share its details.
  - Advised how it contacts concession holders and what it provides to them.
  - Provided a Tuna Australia contact who manages engagement with energy companies to progress a service agreement with Tuna Australia.
- On 17 July 2023, Woodside emailed Tuna Australia and confirmed:
  - Woodside's legal team had reviewed the Tuna Australia document and requested some minor changes to be made.
  - Woodside asked Tuna Australia if a marked up version of the Service Agreement would be the simplest way for Tuna Australia to review.

*Stybarrow Plug and Abandonment Environment Plan*

- Woodside attached a Supplier Questionnaire as part of its due diligence process and asked Tuna Australia to complete the form.
- On 18 July 2023, Tuna Australia emailed Woodside and confirmed:
  - Woodside should send a marked up version of the Service Agreement for Tuna Australia to review.
  - Tuna Australia would fill out the Supplier Questionnaire and return in the next couple of days.
- On 18 July 2023, Woodside emailed Tuna Australia and sent a marked up version of the Service Agreement for Tuna Australia to review.
- On 19 July 2023, Tuna Australia emailed Woodside and thanked it for sending through edits to TA's services agreement and commented:
  - Tuna Australia does not want any changes made to Schedule 2 of their Service Agreement and if Woodside has requirements outside of what Tuna Australia provides, then this will need to be discussed, agreed, and costed accordingly.
  - Tuna Australia would like further details on the Annual service for the Woodside Master Existing document including the rationale for the payment proposed.
  - Tuna Australia does not agree to a fixed price for the above bodies of work. Tuna Australia wants clarification on what the Annual service entails, and how the fixed priced value was arrived at.
  - Re the fixed fee for delivery of a specific consultation service, Tuna Australia need to remain flexible to clients needs and discuss additional works should they be required. TA says it specified in the schedule that it would never proceed with more work or charge more money without approval and this should suffice for Woodside.
  - Tuna Australia does not agree on the current terms which have been changed in Item 2 of Schedule 1 and says it seeks a two year agreement as per the agreement template.
- On 2 August 2023, Woodside emailed Tuna Australia, thanked them for their response re the Service Agreement and advised that Woodside's legal team will review and Woodside will revert as soon as possible. Woodside asked Tuna Australia to please complete the Supplier Questionnaire which was sent on 17 July 2023.
- On 3 August 2023, Tuna Australia replied, apologised for the delay and sent the completed Supplier Questionnaire to Woodside.
- On 8 August 2023, Tuna Australia responded in regards to another EP stating that as per its recent discussions with Woodside, Tuna Australia could consult on the EP once it had a services agreement in place.
- On 23 August 2023, Tuna Australia emailed Woodside following up on Woodside's consultation requirements with the tuna longline industry regarding another EP. Tuna Australia asked for clarity on whether Woodside was planning to engage Tuna Australia to consult on behalf of the tuna longline industry on this and other upcoming EPs that Woodside was seeking feedback on.
- On 30 August Woodside emailed Tuna Australia and advised that Tuna Australia's feedback on the Service Agreement had been discussed with Woodside's legal team. Woodside asked for clarity on whether Tuna Australia would accept section 15: Ethical Business Practices. Once this had been accepted, Woodside could work through Tuna Australia's other points.
- On 4 September 2023, Tuna Australia emailed Woodside and advised that it had seen these anti bribery and corruption clauses included in the vendor registration process of other energy companies but had not seen it proposed inside an agreement before. Tuna Australia advised it was not against including them in the agreement, but asked if it was the best place for it.

| Summary of Feedback, Objection or Claim | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |
|---|---|-------------------------------|
|---|---|-------------------------------|

*Stybarrow Plug and Abandonment Environment Plan*

|   |  |  |
|---|--|--|
| <p>Tuna Australia noted:</p> <ul style="list-style-type: none"> <li>• Several members were pursuing joint venture fishing arrangements to work these fishing grounds.</li> <li>• Importance of the Leeuwin current as an important fauna distribution feature, including the target species of the WTBF.</li> <li>• It is not evident that the impacts have been considered or mitigated to an extent that would not impact tuna quality. More specific mitigation detail required.</li> <li>• Requested information on how contracted vessels in these areas can deconflict themselves from drifting longline gear should it enter the Operational Area.</li> <li>• Risk assessments are silent on potential impacts on the electrical and acoustic interferences that may be generated by machinery or vessels used in these activities</li> <li>• Sought reassurance activities would be done in the most expeditious timeframe and with utmost regard to the marine environment.</li> </ul> | <p>Woodside has:</p> <ul style="list-style-type: none"> <li>• provided additional information on expected marine discharges and seabed disturbances.</li> <li>• provided additional information on the administration of and access to the safety exclusion zones and precautionary areas, as well as opportunities to establish on-water communications protocols to ensure the safety of all marine users.</li> <li>• advised that acoustic impacts will be limited to MODU and vessel noise and noises associated with activities at the seabed.</li> <li>• confirmed it planned to undertake proposed activities in accordance with the Environment Plan and as expeditiously as possible.</li> <li>• provided further detail on activities and the completion date associated with the progressive decommissioning of the Stybarrow Field.</li> </ul> <p>Woodside has addressed Tuna Australia’s feedback, including advising that EP controls are in place to limit to the duration of activities, and minimise the temporary exclusion zone.</p> <p>Woodside noted that:</p> <ul style="list-style-type: none"> <li>• routine marine discharges would be managed according to legislative and regulatory requirements.</li> <li>• discharges are expected to rapidly disperse soon after release given the offshore location and water depth.</li> <li>• seabed disturbance associated with the activity will be temporary and localised to the activity areas</li> <li>• there are no other acoustic sources that will be used for the activity other than MODU, project vessels and temporary subsea equipment used for plugging and abandoning the wells.</li> </ul> <p>The fishery management area for the Western Tuna and Billfish Fishery, which Tuna Australia represents, overlaps both the Operational Area and EMBA. However, there is considered to be no potential for interaction within these areas as:</p> <ul style="list-style-type: none"> <li>• no recent fishing effort has occurred within or nearby to the Operational Area.</li> <li>• Fishery Status Report 2022 indicates current fishing effort is concentrated between Carnarvon and Albany and occurred within the EMBA in the last five years (2016–2021) (Patterson et al., 2022).</li> <li>• Woodside acknowledges previous feedback received from Tuna Australia with respect to separate EPs. Woodside confirms that it conducts impact and risk assessments for its activities in order to identify and manage environmental impacts and risks, which includes potential interaction with recreational and commercial fishers.</li> <li>• To manage potential interactions, Woodside has the following controls in place with regard to the Petroleum Activities Program (PAP) of this EP: <ul style="list-style-type: none"> <li>• MODU and Vessels adhere to regulatory requirements for navigational safety.</li> </ul> </li> </ul> | <p>Woodside has assessed the potential for interaction with Commonwealth and State managed commercial fisheries in <b>Section 4.8.2</b> of this EP.</p> <p>Woodside will provide notifications to AFMA, DAFF – Fisheries, CFA, DPIRD, WAFIC, and relevant Fishery Licence Holders that have the potential to be directly impacted by planned activities in the Operational Area (Western Deepwater Trawl Fishery) prior to the commencement and at the end of the activity, as referenced as <b>PS 1.4</b> in this EP.</p> <p>Woodside has consulted Tuna Australia in the course of preparing this EP. Woodside has assessed the claims or objections raised by Tuna Australia. No additional measures or controls have been put in place.</p> <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on Tuna Australia’s functions, interests or activities.</p> |

**Northern Prawn Fishery**

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Northern Prawn Fishery for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Northern Prawn Fishery on 1 June 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Northern Prawn Fishery with the opportunity to provide feedback over a 5 month period.

### Summary of information provided and record of consultation:

- On 1 June 2023, Woodside sent an email to Northern Prawn fishery licence holders advising of the proposed activity (Appendix F, reference 3.3) and provided the February 2023 Consultation Information Sheet.
- On 23 June 2023, Woodside sent a follow up email to Northern Prawn fishery licence holders advising of the proposed activity (Appendix F, reference 3.3.1) and provided a Consultation Information Sheet.

| <b>Shark Bay Scallop Managed Fishery</b>                      |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shark Bay Scallop Managed Fishery for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shark Bay Scallop Managed Fishery on 17 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shark Bay Scallop Managed Fishery with the opportunity to provide feedback over a 9 month period.

### Summary of information provided and record of consultation:

- On 17 February 2023, Woodside sent a letter to Shark Bay Scallop Managed Fishery advising of the proposed activity (Appendix F, reference 2.33) and provided a website link to Consultation Information.
- On 8 March 2023, Woodside sent a reminder letter to Shark Bay Scallop Managed Fishery advising of the proposed activity (Appendix F, reference 2.10) and provided a website link to Consultation Information.

| <b>Western Australian Fishing Industry Council (WAFIC)</b>    |  |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with WAFIC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to WAFIC on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to WAFIC over an 18 month period.

### **Summary of information provided and record of consultation:**

- On 27 May 2022, Woodside emailed WAFIC advising of the proposed activity (Appendix F, reference 1.8) and provided a Consultation Information Sheet.
- On 4 July 2022, WAFIC responded to Woodside advising its support for the P&A of 10 production/injection wells.
- On 28 July 2022, Woodside responded to WAFIC and acknowledged WAFIC's feedback on the P&A activities for the 10 production/injection wells.
- On 29 August 2022, WAFIC emailed Woodside thanking it for the updated information and requested further information unrelated to this EP.
- On 16 February 2023, Woodside emailed WAFIC advising of the proposed activity (Appendix F, reference 2.14) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to WAFIC advising of the proposed activity (Appendix F, reference 2.14.1) and provided a Consultation Information Sheet.
- On 5 May 2023, Woodside had a phone call with WAFIC to follow up on a number of EPs, including the activities proposed under this EP, and to request any further feedback. Woodside committed to providing WAFIC with a consolidated email outlining all the EPs Woodside is currently consulting WAFIC on for ease of feedback.
- On 5 May 2023, Woodside sent an email to WAFIC providing the status of feedback on a number of EPs, including the activities proposed under this EP. Woodside advised it would soon be submitting the EP for assessment and requested any further feedback.
- On 19 May 2023, Woodside had a phone call with WAFIC to follow up on a number of EPs, including the activities proposed under this EP and to request any feedback.
- On 24 May 2023, WAFIC emailed Woodside to ask whether Woodside was planning to develop and implement a compensation framework Fishers' engagement. WAFIC also suggested a different consulting approach with WAFIC and commercial fishers may need to be adopted as WAFIC had limited resources and other oil and gas proponents utilising WAFIC's fee-for-service model for EPs would be prioritised.
- On 20 June 2023, Woodside emailed WAFIC advising the fisheries it had assessed as having a potential for interaction in the Operational Area and EMBA for a number of EPs, including the activities proposed under this EP, in line with its consultation approach for unplanned events. Woodside re-provided the Consultation Information Sheet and followed up on any further feedback with respect to the proposed EP.
- On 27 June 2023, Woodside emailed WAFIC providing a response to feedback on a separate EP and followed up to confirm if there was any further feedback with respect to the activities proposed under this EP.

The summary above demonstrates that consultation for the purpose of 11A(1) is complete however, as per Woodside's commitment to ongoing consultation, engagement has continued as summarised below:

## Stybarrow Plug and Abandonment Environment Plan

### Ongoing consultation

- On 25 July 2023, WAFIC’s CEO sent a letter to Woodside’s CEO to register significant frustration with regard to Woodside pursuing detailed responses to EPs or Decommissioning Proposals. WAFIC noted:
  - Since start of 2023, it had received more than 60 emails seeking feedback for activities proposed by Woodside;
  - Each email placed significant workload pressures on WAFIC, an organisation without sufficient resources to meet the deadlines required;
  - It had a number of other oil and gas titleholders operating in WA waters seeking similar feedback for their projects;
  - WAFIC requested Woodside to review its current consultation methodology for engagement with WAFIC.
  
- On 16 August 2023, Woodside emailed WAFIC and confirmed a meeting for 28 August 2023. Woodside also provided an outline of existing EP consultation and upcoming in the coming weeks which were not relevant to this EP.
  
- On 25 August 2023, Woodside’s Executive Vice President replied to the letter from WAFIC CEO and noted:
  - Woodside’s consultation is designed to ensure that relevant persons are identified and given sufficient information and a reasonable period to make an informed assessment of the possible consequences of the proposed activity.
  - Woodside is keen to meet with WAFIC and to ensure Woodside’s consultation with WAFIC and the commercial fishing sector achieves this outcome.
  - Woodside thanked WAFIC for sharing concerns and appreciated the opportunity to discuss these matters further and will be in touch to organise a suitable meeting date.
  
- On 28 August 2023, Woodside met with WAFIC to discuss consultation on Environment Plans:
  - WAFIC noted the high level of consultation currently being experienced and resourcing requirements. It noted it needed to prioritise consultation and had provided guidance to offshore proponents.
  - Woodside discussed relevant persons consultation and acknowledged the high level of consultation to meet regulatory requirements and case law.
  - WAFIC noted the importance of genuine consultation and building a relationship with the commercial fishing sector.
  - Woodside sought to understand the most appropriate way to consult the commercial fishery sector.
  - WAFIC and Woodside agreed a more strategic approach to consultation was required, noting the WAFIC fee for service model.
  - Woodside recognised the need for WAFIC to be appropriately resourced to consider consultation materials.
  - It was noted it is challenging to make assumptions about certain offshore activities, for example considering water depth or distance from shore, to reduce consultation fatigue.
  - Pipeline installation, seismic and decommissioning are activities of the most interest to the commercial fishing sector.
  - WAFIC noted consultation at the Offshore Project Proposal stage was effective in understanding projects and upcoming work scopes.
  - Woodside and WAFIC agreed to identify a more strategic and tailored model to consult the commercial fishery sector.
  - Woodside gave a presentation on Environment Plan activities, consultation requirements, the environment that may be affected, and consultation on another EP.

| <p><b>Western Rock Lobster Council</b></p>   |  |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with the Western Rock Lobster Council for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Western Rock Lobster Council on 16 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to Western Rock Lobster Council over a 9 month period.

### **Summary of information provided and record of consultation:**

- On 10 February 2023, WAFIC emailed the Western Rock Lobster Council (and copied in Woodside) to introduce Woodside's consultation team to the Council and included a link to NOPSEMA's consultation guidelines.
- On 16 February 2023, Woodside responded to WAFIC's email and the Western Rock Lobster Council and welcomed an opportunity to discuss Woodside's planned activities (for this and other EPs) with the Council and its members. Woodside asked for guidance on whether to send consultation for members to the Council or to the members directly. Woodside's email included links to information on proposed activities and Consultation Information Sheets.
- On 27 February 2023, the Western Rock Lobster Council responded to Woodside requesting a map that included all the relevant projects Woodside was undertaking so it had a reference point for size/locations. The Council also asked for consultation time frames in relation to each individual project. The Council advised it would communicate all relevant information to its members.
- On 1 March 2023, Woodside provided copies of Consultation Information Sheets for proposed activities including activities for this EP, feedback dates and maps. Woodside confirmed it had provided this information to Western Rock Lobster Fishery licence holders directly via post but welcomed the Council's offer to provide consultation information to members directly as well.
- On 14 March 2023, Woodside sent a follow up email to the Western Rock Lobster Council.
- On 20 March 2023, Western Rock Lobster thanked Woodside for its email and requested an extension of 2 weeks on the feedback dates.
- On 30 March 2023, Woodside responded confirming the requested extension to provide feedback.
- On 12 April 2023, Woodside emailed the Western Rock Lobster Council to follow up on feedback relating to the proposed activity.
- On 10 May 2023, Woodside had a phone call with the Western Rock Lobster Council to follow up on feedback relating to a number of EPs, including the activities proposed under this EP. Woodside referred to its email dated 12 April 2023 which referenced the EPs. The Western Rock Lobster Council advised it would come back to Woodside the same day if it had any feedback.
- On 11 May 2023, Western Rock Lobster Council emailed Woodside to advise it did not have any comments on the EPs, including the activities proposed under this EP.
- On 11 May 2023, Woodside thanked the Western Rock Lobster Council for its response and confirmed Woodside would continue to engage the Western Rock Lobster Council with respect to applicable EPs.

*Stybarrow Plug and Abandonment Environment Plan*

| <b>Recreational marine users and representative bodies</b>   |  |   |
| <b>Exmouth Recreational Marine Users</b>   |  |   |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Exmouth Recreational Marine Users for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to Exmouth Recreational Marine Users on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to Exmouth Recreational Marine Users over a 17 month period.

**Summary of information provided and record of consultation:**

- On 27 May 2022, Woodside emailed Exmouth Recreational Marine Users advising of the proposed activity (Appendix F, reference 1.9 and reference 1.9.1) and provided a Consultation Information Sheet.
- On 31 May 2022, an Exmouth Recreational Marine User responded requesting that the proposed activity did not commence until after GAMEX tournament was conducted in March each year.
- On 28 July 2022, Woodside responded advising that there were no plans to be in the field in March 2023. Woodside committed to maintaining contact as planning progressed for mutual activities.
- On 17 February 2023, Woodside emailed Exmouth Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.9) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Exmouth Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.9.1) and provided a Consultation Information Sheet.

| <b>Summary of Feedback, Objection or Claim</b>   | <b>Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response</b>  | <b>Inclusion in Environment Plan</b>   |
|--|---|--|
| <p>No feedback was received from Exmouth Recreational Marine Users, with the exception of one licence holders which requested that the proposed activity did not commence until after GAMEX tournament was conducted in March each year.</p> | <p>Woodside notes that no feedback has been received from Exmouth Recreational Marine Users, with the exception of once licence holder. Woodside addressed their feedback by confirming there were no plans to be in the field in March 2023.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7).</p> <p>Woodside has provided consultation information to Recfishwest, Marine Tourism Association of WA, WA Game Fishing Association and individual recreational marine users.</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on Exmouth Recreational Marine Users’ functions, interests or activities.</p> <p>No additional measures or controls are required.</p> |
| <p><b>Gascoyne Recreational Marine Users</b></p>   |   |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Gascoyne Recreational Marine Users for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Gascoyne Recreational Marine Users (Onslow and Exmouth-based fishing clubs and charter boat / marine tourism operators) on 17 February 2023, based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Gascoyne Recreational Marine Users with the opportunity to provide feedback over a 9 month period.

### Summary of information provided and record of consultation:

- On 17 February 2023, Woodside sent a letter to Gascoyne Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.34, reference 2.34.1, reference 2.34.2 and reference 2.34.3) and provided a Consultation Information Sheet.
- On 8 March 2023, Woodside sent a letter to Gascoyne Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.34.1 and reference 2.34.1.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |
|---|--|--|
| No feedback, objections or claims received despite follow up. | <p>Woodside has provided consultation information to Recfishwest, Marine Tourism Association of WA, WA Game Fishing Association and individual recreational marine users.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. | <b>Karratha Recreational Marine Users</b>                     |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Karratha Recreational Marine Users for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Karratha Recreational Marine Users (Dampier-based fishing clubs and charter boat / marine tourism operators) on 17 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Karratha Recreational Marine Users with the opportunity to provide feedback over a 9 month period.

### Summary of information provided and record of consultation:

- On 17 February 2023, Woodside sent a letter to Karratha Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.9) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Karratha Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.9.1) and provided a Consultation Information Sheet.
- On 15 March 2023, Woodside sent a reminder email to King Bay Game Fishing Club advising of the proposed activity (Appendix F, reference 2.9.2) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan                    |
|---|---|--|
| No feedback, objections or claims received despite follow up. | <p>Woodside has provided consultation information to Recfishwest, Marine Tourism Association of WA, WA Game Fishing Association and individual recreational marine users.</p> <p>Woodside engages in ongoing consultation with stakeholders throughout the life of an EP. Should feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | No additional measures or controls are required. |
| <b>Pilbara / Kimberley Recreational Marine Users</b>          |   |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Pilbara / Kimberley Recreational Marine Users for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Pilbara/Kimberley Recreational Marine Users on 17 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Pilbara/Kimberley Recreational Marine Users with the opportunity to provide feedback over a 9 month period.

### Summary of information provided and record of consultation:

- On 16/17 February 2023, Woodside sent a letter to Pilbara / Kimberley Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.34 and reference 2.34.1) and provided a Consultation Information Sheet.
- On 8 March 2023, Woodside sent a letter to Pilbara / Kimberley Recreational Marine Users advising of the proposed activity (Appendix F, reference 2.34.1 and reference 2.34.1.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |

| <b>West Coast Recreational Marine Users</b>                   |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with West Coast Recreational Marine Users for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to West Coast Recreational Marine Users on 1 June 2023 based on their function, interest and activities.
- Woodside has addressed and responded to West Coast Recreational Marine Users over a 6 month period.

### Summary of information provided and record of consultation:

- On 1 June 2023, Woodside sent a letter to West Coast Recreational Marine Users advising of the proposed activity (Appendix F, reference 3.4) and provided a Consultation Information Sheet.
- On 23 June 2023, Woodside sent a reminder email to West Coast Recreational Marine Users advising of the proposed activity (Appendix F, reference 3.4.1) and provided a Consultation Information Sheet.
- On 31 July 2023, a West Coast recreational marine user, Ultimate Outback Experiences, contacted Woodside's 1800 number to query why it was receiving letters from Woodside.
- On 31 July 2023, Woodside responded to the recreational marine user by email to ask if it could please provide further detail about the information received from Woodside to assist further with a response.
- On 7 August 2023, the recreational marine user attached in an email photos of the letters received which related to this proposed activity, as well as other Griffin and Stybarrow Environment Plans.
- On 16 August 2023, Woodside responded to the recreational marine user and providing more detail about the process of consultation and the relevance to Ultimate Outback Experiences, as a West Coast recreational marine user. Woodside offered to meet to discuss further if required.

| Summary of Feedback, Objection or Claim  | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                           |

| <b>Recfishwest</b>  |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Recfishwest for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to Recfishwest on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to Recfishwest over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed Recfishwest advising of the proposed activity (Appendix F, reference 1.14) and provided a Consultation Information Sheet.
- On 17 June 2022, Recfishwest responded to Woodside and provided the following information:
  - Recfishwest is the peak body representing the interests of the estimated 740,000 recreational fishers in Western Australia. Recfishwest are a not-for-profit community-based organisation that endeavours to ensure high quality recreational fishing experiences are maintained and enjoyed for all in the community.
  - Recreational fishing is an integral part of the Pilbara lifestyle. The region's unique coastline includes some of Australia's prime fishing locations and includes an array of offshore islands, coral reef systems and offshore habitats, providing ample recreational fishing opportunities which hold a plethora of high valued species making it a key driver of visitation to the region, attracting visitors from around the state and country.
  - Recfishwest places the highest priority on preserving the marine environment and safeguarding the future of our recreational fishing experiences, which are reliant on healthy habitats and abundant fish stocks. While the planned activities stated in these environmental plans are located a fair distance from shore, the field is still actively fished by members of the recreational fishing community.

Recfishwest provided further feedback as follows:

- Acknowledged the previous correspondence which advises recreational fishers to observe a 500 m safety exclusion zone around the wells and a 1,500 m radius around the Operational Area for the duration of the activity.
- In review of the work planned in the environmental plans for stakeholder consultation, Recfishwest do not object to the steps taken to address concerns that the recreational fishing sector might have.
- Additionally, Recfishwest would like to be consulted on any upcoming offshore exploration activities, irrespective of the distance from shore and that all charts are updated, so recreational fishers can locate the areas.
- On 27 July 2022, Woodside responded to Recfishwest acknowledging Recfishwest's advocacy role on behalf of recreational fishers in Western Australia. Woodside also:
  - acknowledged the social importance to regional communities of recreational fishing.
  - acknowledged the potential presence of recreational fishers at the activity location.
  - noted feedback from Recfishwest on exclusion zones.
  - noted that Recfishwest does not object to planned activities.
  - advised it will continue to keep Recfishwest informed of planned activities and that nautical charts are maintained.
- On 16 February 2023, Woodside emailed Recfishwest advising of the proposed activity (Appendix F, reference 2.2) and a provided a Consultation Information Sheet.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>• On 2 March 2023 Recfishwest responded by email acknowledging Woodside's update on the proposed decommissioning of the Stybarrow field. <ul style="list-style-type: none"> <li>○ Recfishwest referred to advice previously provided on the importance of recreational fishing to the Gascoyne region and that areas around both fields are actively fished by the recreational fishing community.</li> <li>○ Recfishwest noted that the proposed activities timing and that existing and new exclusion/cautionary zones will be in place during this period.</li> <li>○ Recfishwest advised it had reviewed the consultation information sheets and had no concerns regarding the proposed activities.</li> <li>○ Recfishwest requested to be kept informed as activities progress so that it may advise recreational fishers as required.</li> </ul> </li> <li>• On 24 March 2023 Woodside emailed Recfishwest noting its feedback on the activity update and for previous consultation activities. *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Chevron for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Chevron on 17 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to Chevron over a 9 month period.

**Summary of information provided and record of consultation:**

- On 17 February 2023, Woodside emailed Chevron advising of the proposed activity (Appendix F, reference 2.4) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Chevron advising of the proposed activity (Appendix F, reference 2.4.1) and provided a Consultation Information Sheet.
- On 22 March 2023, Chevron responded, thanking Woodside for the consultation information, advising that they are actively reviewing the information (expected completion by mid-April), and requesting GIS shape files for the EP.
- On 3 April 2023, Woodside responded, thanking Chevron for the feedback and provided the GIS shape files for the EP as requested.
- On 26 April 2023, Woodside emailed Chevron Australia following up on feedback with respect to the proposed activity.
- On 1 June 2023, Woodside emailed Chevron Australia following up on feedback with respect to the proposed activity.
- On 16 June 2023, Chevron responded advising there was no impact identified for activities proposed under this EP. Chevron requested that if the work plan is executed during the cyclone season, that Woodside provides cyclone anchor configuration, as well as mooring design, site specific geophysical and geotechnical data, anchor analysis, risk mitigations to inform Chevron Australia of the potential risks to our assets within the affected leases.
- On 30 June 2023, Woodside responded thanking Chevron for its feedback that there was no impact identified for proposed activities under this EP and confirming there was no planned mooring.

| Summary of Feedback, Objection or Claim | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |
|---|---|-------------------------------|
|---|---|-------------------------------|

*Stybarrow Plug and Abandonment Environment Plan*

|   |   |  |
|---|---|--|
| <p>Chevron requested GIS shape files for the proposed activities and advised there was no impact identified for activities proposed under this EP.</p> <p>Chevron requested if the work plan is executed in the cyclone season then Woodside to provide cyclone anchor configuration, mooring design, site specific geophysical and geotechnical data and risk mitigations.</p> <p>Whilst feedback has been received, there were no objections or claims.</p>   | <p>Woodside has addressed Chevron’s feedback by providing requested GIS shape files and noting its feedback that there was no impact identified for activities proposed under this EP.</p> <p>Woodside confirmed there was no mooring in relation to the EP and no activity during the cyclone season.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. - Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to AEP on 27 May 2022 July 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided AEP with the opportunity to provide feedback over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed AEP advising of the proposed activity (Appendix F, reference 1.16) and provided a Consultation Information Sheet.
- On 17 February 2023, Woodside emailed AEP advising of the proposed activity (Appendix F, reference 2.2) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to AEP advising of the proposed activity (Appendix F, reference 2.2.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim   | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |
|---|--|--|
| No feedback, objections or claims received despite follow up.   | Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b> ). | No additional measures or controls are required. |

| <p><b>Balanggarra Aboriginal Corporation (BAC)</b></p> <p>BAC is established under the Native Title Act 1993 by the Balanggarra People to represent the Balanggarra People (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with BAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to BAC on 23 February 2023 based on their function, interest and activities.
- Woodside consulted with BAC over an 8 month period.

### Summary of information provided and record of consultation:

- On 23 February 2023, Woodside emailed BAC advising of the proposed activity (Appendix F, reference 2.36) and provided a Consultation Information Sheet.
- On 08 March 2023, Woodside called BAC and sent a follow up email to confirm whether BAC may have interests impacted by proposed activities.
- On 06 April 2023, Woodside phoned BAC to advise Woodside would be visiting East Kimberley 11 April 2023 and asked if they would like to meet.
- On 11 April 2023, Woodside personnel drove to Wyndham to visit BAC office, however the office was unattended and closed.
- On 13 April 2023, Woodside emailed BAC advising they had visited the BAC office and offered to re-visit or set up a video meeting.
- On 28 April 2023, Woodside called BAC and sent a follow up email asking if BAC would like a meeting to discuss proposed activities.
- On 15 May 2023 Woodside called BAC and left message offering to meet in person, via video link or over the phone.
- On 18 July 2023, Woodside emailed BAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that BAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 17 August 2023, Woodside emailed BAC notifying them of another activity and noting that Woodside is keen to meet with BAC directors at a time that is suitable for BAC.
- On 9 September 2023, Woodside emailed BAC the activity Summary Information Sheet (Appendix F, reference 2.81), advising the proposed activity start date, and offering to meet with BAC. Woodside requested BAC confirm **a**) if they are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and **b**) if there is any information they wish to provide on cultural features and/or heritage values.
- On 13 October 2023, Woodside contacted BAC via an alternative email address to seek advice on making contact with the BAC Board or contact person.
- On 25 October 2023, Woodside emailed the Kimberley Land Council (KLC) seeking advice on a point of contact for BAC.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with BJNAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to BJNAC on 24 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to BJNAC over an 8-month period.

### Summary of information provided and record of consultation:

- On 24 February 2023, Woodside emailed BJNAC advising of the proposed activity (Appendix F, reference 2.55) and provided a Consultation Information Sheet.
- On 8 March 2023, Woodside phoned BJNAC and sent a follow up email to confirm whether BJNAC may have interests impacted by proposed activities (Appendix F, reference 2.55.1).
- On 5 April 2023, Woodside left a voicemail for BJNAC and sent a follow up reminder email to confirm whether BJNAC may have interests impacted by proposed activities.
- **(1) & (2)** On 14 April 2023, BJNAC sent an email to Woodside advising it is interested in collaborative engagement, however, requires 28 days to develop a resourcing protocol for consultation and objects to any progression of EPs in the meantime. BJNAC also advised that “there may be cases where the PBC simply want to make you aware of the Bardi and Jawi Marine Park and will be requesting that you factor in the values that are outlined in our Joint Management Plan for the Park, into your environment plan for projects. In other cases, the PBC may want to respond with more detailed information if a project is likely to have a greater effect on Bardi and Jawi sea country.”
- **(1)** On 5 June 2023, BJNAC emailed Woodside a draft resourcing protocol for consideration and stated it would await comments from Woodside.
- On 7 June 2023, Woodside emailed BJNAC inviting them to a community information drop-in session. The email offered separate meeting if desired, and requested the invitation be passed on to members and any other individuals.
- **(1)** On 18 July 2023, Woodside emailed BJNAC thanking them for the draft protocol and restated Woodside’s objectives for consultation. In the email, Woodside included a summary sheet for this activity along with NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that BJNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- **(1)** On 8 August 2023, BJNAC (via NOPSEMA) emailed Woodside enclosing a letter relating to among other things:
  - Culturally appropriate consultation processes,
  - Information that will support free, prior and informed consent.
  - Financial support to bring together the right people to ensure appropriate consultations.
- On 9 September 2023, Woodside emailed BJNAC the activity Summary Information Sheet (Appendix F, reference 2.81), advising the proposed activity start date, and offering to meet with BJNAC. Woodside requested BJNAC confirm a) if they are aware of any people, who in accordance with Indigenous tradition, may have spiritual

*Stybarrow Plug and Abandonment Environment Plan*

and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and b) if there is any information they wish to provide on cultural features and/or heritage values.

- **(1)** On 13 October 2023, Woodside met with the BJNAC Executive Officer in Perth to discuss the engagement framework for future consultations. At the meeting:
  - It was agreed to make some small changes to the engagement framework provided by BJNAC
  - BJNAC observed that Woodside were engaging well compared to other companies
  - Woodside spoke about the preparation of animated videos to use in future consultations.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with BYAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on BYAC's preferred method of consultation. This has not resulted in a face-to-face meeting as information provided was sufficient for BYAC to determine that they did not require direct consultation with Woodside, however, they requested to be kept informed of activities.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheets and Consultation Summary Sheets to BYAC. These set out details of the proposed activity, the location, timing as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that BYAC can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to BYAC on 17 March 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to BYAC over 7 months, demonstrating a "reasonable period" of consultation.

Woodside asked BYAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via a meeting and written exchanges to further understand the environment in which the activity will take place. BYAC has engaged with the detail of the activity advising that it did not require direct consultation. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BYAC's functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 17 March 2023, Woodside emailed BYAC advising of the proposed activity (Appendix F, reference 2.38) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interest that BYAC and its members may have within the EMBA, information on how BYAC would like to engage, and requested that BYAC provide information to its

*Stybarrow Plug and Abandonment Environment Plan*

members as required.

- On 30 March 2023, Woodside called BYAC to request a time to meet and consult about the activities.
- On 30 March 2023, Woodside followed up the phone call to BYAC with an email requesting to meet and understand BYAC's interests, which may be impacted by the proposed activities. Woodside also asked for BYAC's preferred form of consultation.
- On 2 April 2023, Woodside emailed BYAC to check whether the previous email on 30 March 2023 had been received.
- **(1) (2) (3) (4)** On 4 April 2023, BYAC responded to Woodside and advised that the activities were not directly within the Yamatji Nation ILUA area and therefore there was no specific requirements for direct consultation with BYAC. However, BYAC requested they be kept informed of the activities given there was the possibility that the Hutt River coastline areas or the areas identified for consultation in the Yamatji Sea Connection Indigenous Protected Area (SCIPA), as well as migrating marine life that are part of the life inhabiting or traversing through the SCIPA area (Hutt River coastline to the Abrolhos Houtman Islands) may be impacted by unplanned spills from the proposed activity. BYAC advised that over the next two years it would be undertaking a Sea Country Indigenous Protected Areas (SCIPA) project to develop a Management Plan for the area. One of the tasks of this project would be to investigate the Yamatji sea connections which would help determine how such impacts may affect Yamatji cultural heritage values. BYAC also said they would pass on contact details to their project coordinator for further consultation opportunities in the future.
- **(2)** On 14 September 2023, Woodside emailed BYAC to keep them informed of the activities, as requested, and advised the planned start date for the activity. The email again requested that if BYAC was aware of any other people with whom Woodside should consult, and if there was any information BYAC wished to provide on cultural values, to contact Woodside. Woodside reiterated that it would take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81)
- **(4)** On 15 September 2023, BYAC emailed Woodside confirming receipt of the previous email and noted the information was provided to the SCIPA Project Manager to consider if there was any updated interest and information.

Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p><b>(1) &amp; (4)</b> Existing controls considered sufficient, as described in <b>Section 7 and 8</b>.</p> <p><b>(2) &amp; (3)</b> Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage BYAC through ongoing engagement and will send Start of Activity Notifications as BYAC requested to be kept informed of progress in relation to proposed activities (<b>Section 11.8</b> and <b>Table 11-5</b> of the EP).</p> |
| <p><b>Buurabalayji Thalanyji Aboriginal Corporation (BTAC)</b></p> <p>BTAC is established under the Native Title Act 1993 by the Thalanyji people to represent the Thalanyji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>   |   |   |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has consulted under Regulation 11A with BTAC by providing sufficient information, a reasonable period of time and opportunity for BTAC to make an informed assessment of the possible consequences of the activities on functions, interests or activities. Woodside has addressed each objection or claim made by BTAC. Woodside has included cultural values and controls relevant to Woodside's understanding of BTAC's functions, interests and activities in its environment plan and in response to topics raised during consultation by BTAC.

As demonstrated in the summary below and consultation record that follows, consultation with BTAC complies with Regulation 11A and is complete.

### **Sufficient Information:**

- Woodside sought direction on BTAC's preferred method of consultation. This has not resulted in a face-to-face meeting with the Board, however, BTAC has exchanged multiple correspondence and telephone engagements on the activity with BTAC representatives. Woodside has offered to coordinate meetings at the location of BTAC's choosing, with BTAC nominated representatives. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 11A consultation.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to BTAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and interested individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan"
- Provided response to questions asked about the activity through consultation. Through these questions, BTAC has displayed an understanding of the activities under this environment plan.

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside commenced consultation with BTAC on 22 February 2023. Woodside has since addressed and responded to BTAC queries over 8 months, demonstrating a "reasonable period" of consultation.
- Woodside advised that BTAC could request the particular information provided in the consultation not be published (to align with 11A(2)(4)).

Woodside asked BTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via discussions and written exchanges to further understand the environment in which the activity will take place. BTAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BTAC's functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 9 February 2023, Woodside emailed BTAC following up on correspondence regarding other EPs and advising that Woodside would be sending information about decommissioning activities for consultation.

## Stybarrow Plug and Abandonment Environment Plan

- On 13 February 2023, BTAC representative called and spoke to Woodside asking what Woodside was proposing for next steps for consultation and whether Woodside would like to meet with the BTAC Board, the Council of Thalanyji Elders or present at a common law meeting. Woodside said they would be guided by BTAC, but suggested meeting initially with the BTAC Board. Following a suggestion by BTAC that the group may benefit from an anthropologist to articulate sea country values, Woodside said they would look at those sorts of requests on a case-by-case basis. Woodside also confirmed they are able to support consultation meetings. A BTAC representative said he would discuss Woodside EPs with BTAC and aim to respond by 20 February 2023.
- On 20 February 2023, BTAC provided a letter to Woodside in relation to consultation on activities unrelated to this EP, however this correspondence did also make assertions and requests that concern general consultation matters between BTAC and Woodside, including:
  - **(1) (2)** BTAC confirmed that BTAC on behalf of Thalanyji people has interests and that the Thalanyji people have an enduring deep connection to sea country north of Onslow, extending out to islands off the Pilbara coast such as the Monte Bello islands, Barrow Island and the Mackerel Islands.
  - BTAC advised it was seeking the opportunity to engage with Woodside and NOPSEMA on activities unrelated to this EP.
  - **(5)** BTAC advised it has not specifically developed values regarding Sea Country into a format that could be articulated for consultation and seeks support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community. This would enable BTAC and Woodside to collaborate to develop effective management plans that can provide adequate protection to sea country values.
  - **(3)** BTAC advised the information in the consultation fact sheets it has received as very general. BTAC seeks support from Woodside to obtain technical support to review the information and provide BTAC and its members with feedback on the project risks to Sea Country and help BTAC contemplate the potential management controls that could be developed to protect its values and interests.
  - **(4)** BTAC requested that emergency response capability is developed and locally provided to be able to respond to potential activities/actions that may cause an impact in the EMBA. BTAC encouraged Woodside and industry to build capacity and capability in BTAC's ranger program so that it could participate in response planning and management activities.
  - **(6)** BTAC noted that ongoing consultation with BTAC will be imperative and likely continuous given recent changes to consultation requirements and this will continue to be a burden on the organisation. BTAC requested that Woodside enter a consultation or engagement framework to ensure BTAC can be properly resourced financially and intellectually to participate in the consultation and management planning processes for the activities.
- On 22 February 2023 Woodside emailed BTAC advising of the proposed activity (Appendix F, reference 2.39) and provided a Consultation Information Sheet.
- On 22 February 2023, Woodside emailed RRF Australia (support organisation for BTAC) confirming that BTAC requested the email about activities be forwarded to them.
- On 23 February 2023, RRF Australia emailed Woodside acknowledging the email and informing they would provide advice to BTAC within the requested timeframe.
- On 13 March 2023, BTAC emailed Woodside asking it to confirm if there is a revised submission date in relation to the proposed activities.
- On 17 March 2023, Woodside emailed a letter to BTAC suggesting a forward plan for consultation on all EPs that Woodside has notified BTAC about. Woodside noted that it will formalise the matters outlined in its correspondence by including in each of the Environment Plan statements along the following lines:
  - BTAC for and on behalf of Thalanyji has interests and values in the EMBA and is concerned about the possible impact on these interests and values, including to Sea Country, arising from Woodside's proposed activities.
  - BTAC, with support from Woodside and through the provision of independent expertise, will on an ongoing basis:
    - convey to Woodside the nature of Thalanyji interests and values, noting that BTAC would like to conduct work to articulate those values in a manner that Woodside understands.
    - provide information to Woodside about how those interests and values intersect with the EMBA and how that should be managed.

## Stybarrow Plug and Abandonment Environment Plan

- Woodside will engage in ongoing consultation with BTAC for the purposes of ongoing monitoring, management and emergency response associated with environmental risk.
- Woodside and BTAC will work under an adaptive management approach as the understanding of each other's values and interests, activities, needs and aspirations grow during the course of ongoing consultation. This means that Woodside's Environment Plans may be updated from time to time so that they accurately reflect environmental risk as they relate to BTAC's interests and values, and the management measures that Woodside and BTAC will put in place to avoid and otherwise mitigate and manage environmental risk.
- BTAC can at any time make direct representations to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) about the nature of BTAC's interests and how they may be affected by Woodside's activities.
- **(3)** Woodside advised that in response to the provision of independent expert environmental management advice to BTAC, Woodside would be pleased to provide the resources necessary for BTAC to obtain and retain this advice on the basis that such advice is provided by an experienced and reputable oil and gas environmental management expert who is independent of Woodside, and who has the capacity to undertake this work to meet consultation schedules.
- Woodside suggested a range of organisations for BTAC's consideration who are not working for Woodside.
- **(4)** Woodside also advised it would also be pleased to support BTAC to acquire anthropological advice.
- Woodside advised, with reference to the timeframes described about activities unrelated to this EP, that environmental protection and management associated with these activities is subject to an adaptive management approach. This means that consultation between Woodside and BTAC about environmental risk and management responses is ongoing, and changes can be made to improve environmental protection and management practices over time, including in the associated Environment Plans (EPs). Woodside proposed the following next steps:
- Woodside will formalise the matters outlined in correspondence between Woodside and BTAC by including in each of the Environment Plans statements along the following lines:
- BTAC for and on behalf of Thalanyji has interests and values in the EMBA and is concerned about the possible impact on these interests and values, including to Sea Country, arising from Woodside's proposed activities.
- BTAC, with support from Woodside and through the provision of independent expertise, will on an ongoing basis:
  - **(5)** convey to Woodside the nature of Thalanyji interests and values, noting that BTAC would like to conduct work to articulate those values in a manner that Woodside understands.
  - provide information to Woodside about how those interests and values intersect with the EMBA and how that should be managed.
- **(4)** Woodside will engage in ongoing consultation with BTAC for the purposes of ongoing monitoring, management and emergency response associated with environmental risk.
- Woodside and BTAC will work under an adaptive management approach as the understanding of each other's values and interests, activities, needs, and aspirations grow during ongoing consultation. This means that Woodside's Environment Plans may be updated from time to time so they accurately reflect environmental risk as they relate to BTAC's interests and values, and the management measures that Woodside and BTAC will put in place to avoid and otherwise mitigate and manage environmental risk.
- BTAC can at any time can make direct representations to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) about the nature of BTAC's interests and how they may be affected by Woodside's activities.
- Woodside proposed if BTAC considers it appropriate, that the principles discussed in its correspondence (this 17 March 2023 letter and BTAC's correspondence of 20 February 2023 that was regarding matters unrelated to this EP) apply to the various decommissioning and drilling EPs that Woodside has notified BTAC about. This will ensure these arrangements are formalised into regulatory processes and documentation. As per Woodside's ongoing consultation approach, feedback continues to be assessed through the life of the EPs.
- Woodside advised BTAC that its letter of 20 February 2023 and this response will be included in the EP. Woodside requested that if their feedback is sensitive, please inform Woodside, and it will make this known to NOPSEMA upon submission of the Environment Plans to ensure this information remains confidential to NOPSEMA.

## *Stybarrow Plug and Abandonment Environment Plan*

- On 30 March 2023, Woodside spoke with BTAC to follow up on correspondence described above. BTAC indicated that they desired a consultation agreement and intended to provide correspondence accordingly.
- **(1) (2)** On 17 April 2023, Woodside spoke with BTAC by telephone. The BTAC representative stated that they were aware that there were archaeological sites identified on nearshore islands and a cultural obligation to care for the environmental values of sea country. The BTAC representative stated there was an in principle agreement to submission of current EPs while continuing to negotiate the collaboration agreement for support for rangers and support for recording of cultural values.
- On 18 April 2023, BTAC emailed a response regarding Woodside's consultation activities:
  - **(6)** BTAC agreed that subject to formalising arrangements, BTAC agrees in principle for Woodside to include the statements described in our letter dated 17 March.
  - **(6)** BTAC proposed that a Collaboration Agreement would be an appropriate mechanism to provide ongoing feedback to Woodside regarding its activities.
  - BTAC invited Woodside to a Board meeting to discuss activities and other short-, medium- and longer-term activities, discuss BTAC's strategic plan and details of a collaboration agreement.
- On 19 April 2023, Woodside emailed to accept an invitation from BTAC to attend their forthcoming Board meeting and requesting half a day of the Board's time, preferably before the first week of May.
- On 28 April 2023, Woodside emailed BTAC to follow up in relation to BTAC's proposed collaboration agreement and discussed Environment Plans for other activities.
- On 4 May 2023, Woodside called BTAC. It was discussed that:
  - Woodside would be sending BTAC more EPs (for other activities) for consultation.
  - **(6)** Woodside is working on draft key terms/principles for the collaboration agreement for BTAC's consideration.
  - A meeting between Woodside and the BTAC Board may be possible in June.
  - Woodside intended to submit EPs (including this proposed activity) soon.
- On 4 May 2023, BTAC emailed Woodside to continue discussion regarding a potential future meeting between Woodside and the BTAC Board to discuss activities on Thalanyji Country, activities for which BTAC's ongoing consultation is sought, the collaboration agreement and other items not related to this proposed activity.
- On 19 May 2023, Woodside phoned BTAC to inform them of some unrelated EP's to be notified and to talk about meeting BTAC to discuss this EP along with other EPs.
- On 19 May 2023, BTAC emailed Woodside about another EP, and to confirm that Woodside will prepare an overview presentation for BTAC on all existing and proposed EPs, including this EP.
- On 14 June 2023, Woodside emailed BTAC a letter setting out draft principles for a consultation framework, among other things the following were noted;
  - BTAC seek to build a relationship and partnership with Woodside.
  - Woodside and BTAC wish to consult and progress matters of importance to both parties.
  - Woodside and BTAC Board will meet every 3 months and maintain a list of matters to progress.
  - Woodside will re-imburse expenditure by BTAC based on an agreed schedule of rates.

## Stybarrow Plug and Abandonment Environment Plan

- On 10 July 2023, Woodside called BTAC by telephone but there was no answer.
- **(7)** On the 10 July 2023, Woodside followed up a phone call with BTAC with an email to seek further confirmation that BTAC did not object to Woodside's submission of a number of Environmental Plans (including this one) that it is planning to submit to NOPSEMA. Woodside outlined a series of commitments to BTAC in order to ensure ongoing consultation and a positive working relationship continues.
- On 19 July 2023, Woodside emailed BTAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that BTAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.
- On 19 July 2023, Woodside emailed BTAC seeking a time to continue discussion regarding a draft presentation to a meeting between Woodside and the BTAC Board about activities on Thalanyji country including other items not related to this proposed activity, and the collaboration principles.
- On 19 July 2023, BTAC emailed Woodside to organise a time for the discussion regarding the draft presentation.
- On 20 July 2023, Woodside emailed BTAC a draft presentation for discussion. Stybarrow decommissioning operations areas are shown on slides 11,12,13.
- On 26 July 2023, Woodside emailed BTAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 26 July 2023, Woodside emailed BTAC Woodside's template presentation further to an earlier draft for consideration.
- On 28 July 2023, Woodside emailed BTAC meeting details to join a Teams meeting of 28 July 2023.
- On 28 July 2023, BTAC emailed Woodside with outcomes of meeting, confirming Woodside has set aside funding for engagement, Woodside wish to meet with BTAC board (or sub-committee) as soon as available to discuss offshore activities/EPs. Woodside will prepare a draft framework agreement which would address Woodside's support for BTAC for ongoing consultation in relation to NOPSEMA matters.
- On 31 July 2023, Woodside emailed BTAC noting that Woodside would be open to funding a special meeting with the board or sub-committee and requesting a cost estimate for such a meeting.
- On 31 July 2023, Woodside emailed 3 letters to BTAC, 2 of those letters related to other Woodside activities. The 3rd letter outlined support for an ethnographic assessment to:
  - **(2)** identify sea country values generally sufficient to inform all Woodside EPs.
  - support any work necessary to clarify or define the offshore areas that are relevant to the Thalanyji People.
  - propose the delivery of interim reports if this will enable prioritising matters considered most critical by BTAC.
  - confirm Woodside will be responsible for all reasonable costs to complete the assessment.
  - confirm BTAC retains intellectual property.
- On 15 August 2023, Woodside emailed BTAC thanking them for their time on the phone regarding another activity unrelated to this EP. Woodside reaffirmed its commitment to building a positive ongoing relationship with BTAC and expressed a desire to meet again soon.
  - On 22 August 2023, BTAC emailed Woodside acknowledging correspondence and noting they will come back with a time to meet and progress matters.
  - On 23 August 2023, Woodside emailed BTAC requesting to meet for an initial discussion to layout the various matters that have been under discussion, including BTAC's capacity and priority areas previously identified by BTAC.

## Stybarrow Plug and Abandonment Environment Plan

- On 13 September 2023, Woodside emailed BTAC advising of the planned start date for the activity, and once again requesting if BTAC is aware of any other people with whom Woodside should consult, and if there is any information BTAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).
- **(5)** On 14 September 2023, BTAC emailed a letter to Woodside regarding a framework agreement with BTAC. The intent of the agreement would be to formalise a co-ordinated, streamlined approach to progressing meaningful ongoing engagement and consultation. The letter included areas the agreed framework could address, and confirmed that the agreed framework would allow BTAC to meaningfully comment on a range of issues including:
  - **(6) (7)** BTAC thanked Woodside for committing to on-going consultation throughout the life of relevant various EPs and associated activities.
  - **(6)** BTAC noted that Woodside has commenced consultation, or intends to consult, with Thalanyji people through BTAC for more than 24 separate activities including this activity.
  - How/whether EP activities could impact cultural values, interests and customary or organisational activities, concerns and useful ways these can be addressed.
  - The content of EPs prior to submission to NOPSEMA
  - Appropriate ways for mitigating risk and ensuring ongoing social licence.
  - A further letter attached to the letter outlining a proposed cost recovery mechanism for consultation activities, and BTAC stated that it did not sanction or endorse any consultation occurring without cost recovery.
- On 14 September 2023, Woodside emailed BTAC acknowledging BTAC's email of 14 September and planning further review and discussion.
- **(7)** On 20 September 2023, BTAC emailed Woodside requesting a response from Woodside about accepting the proposed costs acceptance letter which BTAC sent on 14 September 2023 and requesting a list of current and ongoing activities Woodside were seeking ongoing consultation for.
- **(5) (6)** On 20 September 2023, BTAC emailed Woodside further to their earlier email on 20 September 2023, requesting a response to BTAC's cost proposal, a list of Woodside activities for ongoing consultation and an update on the status of the framework agreement to assist in ongoing consultation, for BTAC's review.
- **(6) (7)** On 22 September 2023, Woodside emailed BTAC accepting BTAC's proposed consultation fee structure, the list of activities that Woodside has consulted BTAC on and advising that the draft framework agreement to assist in ongoing consultation was under internal review.
- **(7)** On 26 September BTAC emailed Woodside acknowledging EP information received, signed costs and acceptance letter and that a draft agreement was currently under internal Woodside review. The email confirmed BTAC will be assisted with legal advice from Banks-Smith & Associates (BSA).
- On 27 September 2023, Banks-Smith + Associates (BSA) emailed Woodside clarifying that they are instructed by BTAC on this matter.
- On 4 October 2023, Woodside emailed BTAC via BSA thanking them and stating that they look forward to an ongoing relationship with BTAC and its legal representation.
- **(8)** On 1 November 2023, BTAC emailed Woodside inviting Woodside to present on Woodside activities at a 1 hour slot in the BTAC Common Law Holders meeting on 27 November.
- **(8)** On 1 November 2023, Woodside emailed BTAC accepting the offer to present at the Common Law Holders meeting and offering to pay costs for the meeting.

### Ongoing Relationship Building

*Stybarrow Plug and Abandonment Environment Plan*

|   |  |                                      |
|---|--|--------------------------------------|
| Woodside is continuing to pursue an ongoing two-way relationship with BTAC including the development of a Collaboration Agreement focused on future opportunities to work together. |  |                                      |
| <b>Summary of Feedback, Objection or Claim</b>  | <b>Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response</b> | <b>Inclusion in Environment Plan</b> |

*Stybarrow Plug and Abandonment Environment Plan*

|  |  |  |
|--|--|--|
| <ul style="list-style-type: none"> <li>• BTAC stated that their interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Montebello Islands.</li> <li>• BTAC has a cultural obligation to care for the environmental values of sea country.</li> <li>• Requested Woodside support BTAC in obtaining technical advice relating to the proposed activity which was sent to BTAC.</li> <li>• Expressed desire to be involved in local emergency response capability, potentially via an Indigenous Ranger Program.</li> <li>• BTAC has not specifically developed values regarding Sea Country into a format that could be articulated for consultation. BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.</li> <li>• BTAC has stated there is an in principle agreement to submission of current EPs, including this EP, while continuing to negotiate the collaboration agreement and support for recording of cultural values.</li> <li>• BTAC emailed Woodside a costs acceptance letter setting out the costs for attendance at consultation activities.</li> <li>• BTAC offered Woodside the opportunity to present to a Common Law Holders meeting on 27 November.</li> </ul> | <ol style="list-style-type: none"> <li>(1) Given the EMBA for this activity extends to nearshore areas coastally adjacent to BTAC native title lands, these values may be relevant in the event of an unplanned hydrocarbon spill. The nearshore islands identified by BTAC do fall within the EMBA and the potential impacts assessed in <b>Section 4.2</b> in the EP. BTAC has not provided further detail regarding heritage value of places or cultural features of the Operational Area or the EMBA.</li> <li>(2) Woodside assessed BTAC’s cultural obligation to care for environmental values of sea country to represent potential cultural values in <b>Section 4.8.1.5</b> in the EP.</li> <li>(3) Woodside has offered support for technical advice and other support that has not been taken up.</li> <li>(4) Woodside has offered to support BTAC to engage in management and emergency response.</li> <li>(5) Woodside agreed to support the articulation and recording of sea country values. Since Woodside formally offered to support BTAC undertake an ethnographic assessment in July 2023, BTAC has not indicated that it desires to initiate the activity. Completion of an ethnographic assessment is not required to undertake or complete consultation under Reg 11A and/or for a comprehensive description of the environment. Opportunity to undertake this work continues under the proposed Collaboration Agreement (see 6) as part of ongoing engagement. Woodside has been able to develop a robust understanding of Thalanyji Sea Country cultural values and features in absence of this assessment.</li> <li>(6) Separate from consultation under Reg 11A, Woodside will establish a Collaboration Agreement with BTAC to assist in ongoing consultation. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members, and slide packs associated with offered face-to-face meetings. Woodside has developed a Framework Agreement for ongoing consultation which is under internal review and will be forwarded to BTAC for their consideration in October 2023. The agreement includes support for recording and articulation of Sea Country values and will help support ongoing consultation as set out by BTAC in their 14 September 2023 letter to Woodside, which requested such an agreement.</li> </ol> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see</p> | <ol style="list-style-type: none"> <li>(1) Existing controls considered sufficient as described in <b>Section 7 &amp; 8</b>. The First Strike Oil Spill Response Plan (<b>Appendix D</b>) includes a requirement to notify Traditional Owners whose interests may be affected by a spill.</li> <li>(2) Woodside updated <b>Section 4.8.1.5</b> to record BTAC’s interests and potential cultural values and assessed potential impact on these, including controls, in section 8.</li> <li>(3) Not required</li> <li>(4) The Program for Ongoing Engagement with Traditional Custodians (<b>Appendix J</b>) includes commitments to social investment to support Indigenous Ranger programs, and support for Indigenous oil spill response capabilities.</li> <li>(5) Woodside has taken all reasonable steps to identify cultural features and heritage features of Thalanyji people within the EMBA. This is described in <b>Section 4.8.1</b>. The proposed Collaboration Agreement recorded in <b>Appendix J</b> enables an ethnographic survey to be undertaken at a later date, but is not required to discharge Regulation 11A requirements. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply</li> </ol> |

Stybarrow Plug and Abandonment Environment Plan

|  |  |  |
|--|--|--|
|  | <p><b>Section 11.7).</b></p> <p>(7) Woodside and BTAC have agreed on a Costs Acceptance Letter. On 22 September 2023 Woodside requested that BTAC send an estimate cost for the remainder of 2023 so that a purchase order could be raised. BTAC and Woodside's signed costs and acceptance letter shared, and BTAC confirmed that they will be assisted with legal advice from Banks-Smith &amp; Associates (BSA) who were included in this correspondence. Woodside assesses that the proposed Collaboration Agreement is an appropriate mechanism for addressing appropriate cost recovery for BTAC. Woodside has already offered BTAC support for technical advice (see 3), and informed BTAC that is would financially support consultation meetings (e.g. 13 Feb 2023 discussion). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of Reg 11A for this activity is complete. Any further engagement with BTAC will be for the purpose of ongoing engagement.</p> <p>(8) Woodside accepted BTAC's offer to present at a Common Law Holders meeting on 27 November. Woodside has offered to provide funding for this meeting. This engagement will be for the purpose of ongoing consultation.</p> | <p>its Management of Change and Revision process (see <b>Section 11.7</b>).</p> <p>(6) &amp; (7) Although consultation for the purpose of Reg 11A is complete, Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement (<b>Appendix J</b>). This includes continued engagement regarding the Collaboration Agreement that Woodside seeks with BTAC, which could include ongoing support for BTAC to define and articulate values, provision of ongoing feedback and cost recovery. This is described further in the Program of Ongoing Engagement with Traditional Custodians, <b>Appendix J</b>.</p> <p>(8) The planned Common Law Holders meeting on 27 November will be treated as ongoing consultation, as described in <b>Section 5.7</b> and <b>11.8</b> of the EP.</p> |
| <p><b>Dambimangari Aboriginal Corporation (DAC)</b></p> <p>DAC is established under the Native Title Act 1993 by the Dambimangari people to represent the Dambimangari people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with DAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to DAC on 23 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to DAC over an 8-month period.

### Summary of information provided and record of consultation:

- On 23 February 2023, Woodside emailed DAC advising of the proposed activity (Appendix F, reference 2.40) and provided a Consultation Information Sheet.
- On 8 March 2023 Woodside sent a follow up reminder email to confirm whether DAC may have interests impacted by proposed activities (Appendix F, reference 2.40.1).
- On 5 April 2023 Woodside emailed DAC to advise a Woodside personnel was visiting West Kimberley and able to visit Derby if they would like to meet.
- On 5 April 2023 Woodside was advised (in person) that KLC legal would respond on behalf of DAC.
- On 8 June 2023, Woodside emailed DAC inviting them to a community information drop-in session. The email offered a separate meeting if desired, and requested the invitation be passed on to members and any other relevant individuals.
- On 24 July 2023, Woodside emailed DAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that DAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 17 August 2023, Woodside emailed DAC in relation to another activity, re-iterating a request to meet with DAC to discuss all activities.
- On 9 September 2023, Woodside emailed DAC the activity Summary Information Sheet (Appendix F, reference 2.81), advising the proposed activity start date, and offering to meet with DAC. Woodside requested DAC confirm **a)** if they are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and **b)** if there is any information they wish to provide on cultural features and/or heritage values.
- On 16 October and 18 October 2023, Woodside emailed two alternate contacts for DAC seeking an opportunity to connect with DAC and the Board in the near future.
- On 8 November 2023, Woodside visited the DAC offices and met with the Project Contractor and Ranger Coordinator.
  - Woodside explained that we had attempted different contact numbers and emails for Dambimangari AC and had not had a response to date so visited the office whilst in Derby.
  - Woodside explained that Woodside have existing Projects that are due for submission of Environment Plans to NOPSEMA.
  - Woodside explained that Woodside are keen to understand if there is any feedback DAC would like to provide or questions?
  - Woodside provided an overview of EMBA's including the link to NOPSEMA consultation guidance. Woodside asked if there is anyone in attendance can speak with now to make Introductions?
  - DAC advised it would be best to go through the CEO who was on a visit to Koolan Island. The CEO's contact details were provided at the time.
- On 11 November 2023, Woodside wrote DAC a letter requesting a meeting with the CEO and Board, at a flexible time, date and location, and offering to pay reasonable costs for the meeting.

| <p>DAC has not provided feedback, objections to date or claims in response to the information provided, since consultation began in February 2023.</p>   | <p>Woodside demonstrated reasonable effort to engage in two-way dialogue. DAC has had a reasonable opportunity to participate in consultation over this 7-month period.</p> <p>Woodside has:</p> <ul style="list-style-type: none"> <li>• Sought DAC’s direction on their preferred method of consultation.</li> <li>• Set out in detail what is being sought through consultation.</li> <li>• Asked DAC to distribute the request for consultation and information sheets to their members.</li> <li>• Asked whether DAC was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> <li>• Provided DAC with NOPSEMA’s guidelines and brochure on consultation.</li> </ul> <p>Consultation with DAC has not identified any other groups or individuals relevant to communally held functions, activities or interests.</p> <p>No material issues or concerns related to the proposed activity were raised during consultation to date. Woodside invited further feedback in accordance with Woodside’s approach to ongoing consultation (see <b>Section 11.8</b>).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls in the EP address DAC Native Title Holders’ functions, interests or activities.</p> <p>As identified in <b>Section 11.8</b> of this EP, Woodside will continue to consult DAC following acceptance of the EP, as requirement by the implementation strategy as set out regulation 14(9) of the Environment Regulations.</p> <p>Based on the engagement to date, no additional controls have been identified.</p> |
| <p><b>Gogolanyngor Aboriginal Corporation (GAC)</b></p> <p>GAC is established under the Native Title Act 1993 by the Jabirr Jabirr/Ngumbarl and Bindunbur people to represent the Jabirr Jabirr/Ngumbarl and Bindunbur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |   |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with GAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to GAC on 28 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to GAC over an 8-month period.

### **Summary of information provided and record of consultation:**

- On 28 February 2023, Woodside emailed Kimberley Land Council advising of the proposed activity (Appendix F, reference 2.41) and provided a Consultation Information Sheet.
- On 28 February 2023, Kimberley Land Council advised it had passed Woodside's information to the relevant contact person at GAC.
- On 8 March 2023, Woodside emailed KLC following up on the proposed activity and whether there were any initial concerns.
- On 4 April 2023, Kimberley Land Council phoned Woodside with contact details for GAC and asked for Woodside to contact GAC directly.
- On 5 April, Woodside phoned GAC's chairperson to ask if they had any questions Woodside could assist with.
- On 6 April 2023 a Woodside representative spoke with the relevant contact person at GAC about the proposed activity. The GAC representative had no questions or concerns and stated their surprise at being consulted now with the projects being so far away.
- On 13 April 2023, Woodside emailed GAC's chairperson proposing a meeting date and confirming that Woodside is meeting one of the directors of GAC to discuss further questions.
- On 14 April 2023, GAC's chairperson acknowledged the email.
- On 24 April 2023, Woodside emailed GAC's chairperson requesting to meet any time between 1 March to 4 April 2023.
- On 26 April 2023, GAC's chairperson emailed Woodside confirming availability on 1 May 2023.
- On 26 April 2023, Woodside emailed GAC's chairperson confirming their availability.
- On 1 May 2023, a Woodside representative met with GAC chairperson in Broome and discussed the Stybarrow activities and EMBA, so the chairperson could speak to the activities at the GAC directors and members meeting on 2 May 2023.
- On 2 May 2023, a Woodside representative was invited into the GAC's Board meeting, Woodside explained the activities and information sheet relating to this EP, the Board had copies of the information sheets. The Board had no questions or concerns, Woodside requested that they take time to discuss the activity and if any questions or concerns arose to pass them on to Woodside.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with MG Corp for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to MG Corp on 23 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to MG Corp over an 8 month period.

### **Summary of information provided and record of consultation:**

- On 23 February 2023, Woodside telephoned and emailed MG Corp advising of the proposed activity (Appendix F, reference 2.42) and provided a Consultation Information Sheet.
- On 24 February 2023, MG Corp emailed Woodside and advised it would forward Woodside's information to the relevant person.
- On 8 March 2023, Woodside sent a follow up email to MG Corp advising of the proposed activity (Appendix F, reference 2.42.1) and provided a Consultation Information Sheet.
- On 11 April 2023, a Woodside representative met with the MG Corp Exec Chair and agreed to a further meeting on 12 April 2023 as the CEO wished to discuss new energy opportunities. Woodside also forwarded the CEO directly the information on the proposed activity that had been sent previously to the MG Corp contact.
- On 12 April 2023, MG Corp telephoned and cancelled the scheduled meeting due to another unexpected meeting and said they would call to re-schedule.
- On 13 April 2023, MG Corp acknowledged receipt of the information and advised it would respond following review of that information.
- On 24 April 2023, Woodside emailed MG Corp to inquire if they could meet to discuss the activities.
- On 15 May 2023, Woodside telephone and emailed MG Corp to follow up and seek a meeting.
- On 7 June 2023, Woodside emailed MG Corp inviting them to community information drop-in sessions and requesting they inform members or any others who may want to understand Woodside activities relating to this and other EPs.
- On 18 July 2023, Woodside emailed MG Corp NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that MG Corp advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 17 August 2023, Woodside emailed MG Corp about another activity and re-iterating a request to meet with MG Corp.
- On 17 August 2023, MG Corp emailed Woodside offering Woodside the opportunity to present to the Board on 17 September 2023.
- On 17 August 2023, Woodside emailed MG Corp accepting the invitation for 17 September 2023.

*Stybarrow Plug and Abandonment Environment Plan*

- On 29 August 2023, Woodside emailed MG Corp seeking confirmation of time to meet with the Board.
- On 9 September 2023, Woodside emailed MG Corp enclosing the activity Summary Information Sheet (Appendix F, reference 2.81), advising the proposed activity start date, and noting the planned meeting with MG Corp. Woodside requested MG Corp confirm a) if they are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and b) if there is any information they wish to provide on cultural features and/or heritage values.
- On 15 September 2023, Woodside emailed MG Corp an agenda and presentation in advance of the meeting planned for 18 September.
- **(1) & (2)** On 18 September 2023, Woodside met with the MG Corp Chair and Directors and presented on the Stybarrow P&A Activity including the EMBA, the activity detail, potential impacts and controls, and desired consultation outcomes. MG Corp had the following feedback, which was addressed by Woodside during the meeting:
  - Asked whether there are Native Title and agreements in place where Woodside Operations exist.
  - Asked how quick is the oil spill response. Woodside explained that response teams are on standby and Woodside has a crisis centre who will respond within an hour, and who conduct drills and activities with contractors and government agencies.
  - Asked what are the chances of finding something in our waters. Woodside explained that for this EP it would be an unlikely and rare event.
  - Advised that they were OK with the Stybarrow P&A EP presented during the meeting
  - In relation to other EPs discussed at the meeting, advised that Native Title coexists with Balangarra and MG Corp would like to make sure they are involved in any future discussions. Woodside advised they have already made attempts to contact Balangarra.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with KTLA for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to KTLA on 24 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to KTLA over an 8-month period.

### Summary of information provided and record of consultation:

- On 24 February 2023, Woodside emailed KTLA advising of the proposed activity (Appendix F, reference 2.35) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email followed on from previous correspondence on other activities and requested KTLA to inform Woodside if there is anything else that could be done to facilitate consultation.
- On 24 March 2023, Woodside sent a follow up email to KTLA in relation to the proposed activity and seeking feedback, offering in person discussions at any time suitable to the organisation (Appendix F, reference 2.35.1).
- On 18 April 2023, Woodside emailed KTLA following up on the information sent through in relation to the proposed activity and seeking feedback, again offering discussion at any suitable time including travelling to their office in person if desired.
- On 19 April 2023, Woodside attempted to contact KTLA via the Karajarri Traditional Lands Association Facebook page.
- On 19 April 2023, Woodside emailed KTLA to follow up on a phone call (earlier on 19 April 2023) and proposed a face-to-face meeting on 1 May 2023. No response has been received.
- On 28 April 2023, Woodside emailed KTLA including the email chain demonstrating efforts to engage and notifying KTLA that the next step is for the EP for the proposed activity to be submitted to NOPSEMA for technical assessment. It stated that the EP submission is imminent and requested any priority feedback as a priority to reflect in this submission, noting that feedback is also welcome over the life of the EP.
- (1) On 2 May 2023, Woodside representative visited the KTLA Kimberley office and met with the KTLA project manager to discuss the information provided 24 February, KTLA Legal representative joined the meeting. KTLA said the legal representative would draft Woodside a letter requesting funds to enable them to hold a meeting and seek external advice.
- On 7 June 2023, Woodside emailed KTLA inviting them to community information drop-in sessions and requesting they inform members or any others who may want to understand Woodside activities relating to this and other EPs.
- On 24 July 2023, Woodside emailed KTLA NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that KTLA advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed KTLA Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

*Stybarrow Plug and Abandonment Environment Plan*

- On 9 September 2023, Woodside emailed KTLA enclosing the activity Summary Information Sheet (Appendix F, reference 2.81), requesting an opportunity to meet with KTLA and noting Woodside’s offer to fund consultation activities. Woodside requested KTLA confirm a) if they are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and b) if there is any information they wish to provide on cultural features and/or heritage values.
- On 13 October 2023, Woodside emailed an alternate email address for KTLA, requesting advice on how to make contact or a Contact Person for KTLA.

| Summary of Feedback, Objection or Claim  | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan  |
|--|---|--|
| <p>(1) KTLA indicated a request for funding for consultation would be submitted to Woodside, but to date this request has not been received.</p> | <p>(1) Woodside has noted it is willing to fund consultation, but has not received a request from KTLA, despite KTLA advising it would do so.</p> <p>Woodside demonstrated reasonable effort to engage in two-way dialogue. KTLA has had a reasonable opportunity to participate in consultation. Woodside has:</p> <ul style="list-style-type: none"> <li>• Sought KTLA’s direction on their preferred method of consultation.</li> <li>• Set out in detail what is being sought through consultation.</li> <li>• Asked KTLA to distribute the request for consultation and information sheets to their members.</li> <li>• Asked whether KTLA was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> <li>• Provided KTLA with NOPSEMA’s guidelines and brochure on consultation.</li> </ul> <p>Consultation with KTLA has not identified any other groups or individuals relevant to communally held functions, activities or interests.</p> <p>No material issues or concerns related to the proposed activity were raised during consultation to date. Woodside invited further feedback in accordance with Woodside’s approach to ongoing two-way consultation (see <b>Section 11.8</b>).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Not required.</p> <p>As identified in <b>Section 11.8</b> of this EP, Woodside will continue to consult KTLA following acceptance of the EP, as required by the implementation strategy and set out in Regulation 14(9) of the Environment Regulations.</p> <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on KTLA’s functions, interests or activities.</p> <p>Based on the engagement to date, no additional controls have been identified.</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Kariyarra Aboriginal Corporation (KAC)**

Kariyarra is established under the Native Title Act 1993 by Kariyarra people to represent the Kariyarra people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with KAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on Kariyarra's preferred method of consultation. This has not resulted in a face-to-face meeting however emails and phone calls have been exchanged. Woodside has demonstrated reasonable effort to consult since February 2023.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheet and Consultation Summary Sheets to Kariyarra. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, KAC has displayed an understanding of the activities under this Environment Plan.
- Advised that Kariyarra can request that particular information provided in the consultation not be published (to align with 11A(2)(4))

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Kariyarra on 24 February 2023 based on their functions, interests and activities.
- Woodside has addressed and responded to Kariyarra over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked Kariyarra if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via written exchanges.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Kariyarra functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 24 February 2023, Woodside emailed KAC advising of the proposed activity (Appendix F, reference 2.43) and provided a Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KAC may have within the EMBA.
- On 24 March 2023, Woodside emailed the KAC twice, following up on the proposed activity and to request any feedback.
- On 18 April 2023, Woodside emailed the KAC, to seek guidance whether KAC would like to arrange a meeting for Woodside to clarify any questions that they may have and asked for KAC's preferred meeting date(s), at its earliest convenience. An offer of an online or in-person meeting was made.

## *Stybarrow Plug and Abandonment Environment Plan*

- On 28 April 2023, Woodside emailed KAC including the email chain and a copy of the Summary Information Sheet, demonstrating efforts to engage and notifying that the next step is for the EP for the proposed activity to be submitted to NOPSEMA for technical assessment. It stated that the EP submission is imminent and requested any feedback as a priority to reflect in this submission, noting that feedback is also welcome over the life of the EP.
- **(1)** On 2 May 2023 Woodside phone KAC and left a message for a return call to discuss EP. No return call was received.
- **(1)** On 3 May 2023 Woodside phoned KAC and left a message for a return call to discuss EP. No return call was received.
- **(1)** On 9 May 2023, Woodside called into the South Hedland Office of KAC to meet with the CEO. The CEO was unavailable, Woodside left contact details and proposed meeting times.
- **(1)** On 10 May 2023, Woodside phoned KAC CEO and asked for meeting whilst still in South Hedland. CEO had a full calendar and no time to meet however would try to respond as soon as time permitted. He asked when the EPs were due for submission.
- **(1)** On 12 May 2023, Woodside emailed KAC to confirm telephone conversation of 10 May and to advise that the EPs are due for submission in the following two weeks and advised that Woodside would take feedback for the life of the EP.
- On 18 July 2023, Woodside emailed KAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that KAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- **(5)** On 26 July 2023, Woodside emailed KAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- **(2)** On 31 August 2023, KAC emailed Woodside apologising for not responding sooner and noting that KAC were seeking legal advice on matters.
- On 31 August 2023, Woodside emailed KAC acknowledging their response.
- **(5) (2)** On 31 August 2023, KAC (via legal representative) emailed Woodside requesting information about another activity unrelated to this EP, indicating they required costs to be met for KAC to be engaged in consultations with Woodside.
- On 10 September 2023, Woodside emailed KAC (via legal representation) a response advising that Woodside was still to provide clarity on funding.
- On 10 September 2023, KAC emailed Woodside (via legal representation) regarding another activity unrelated to this EP), thanking Woodside and restating funding requirements. Legal representation advised with funding that further consultation can move forward, and if it is not forthcoming KAC will be advised.
- On 10 September 2023, Woodside emailed KAC advising of the planned start date for the activity, and once again requesting if KAC is aware of any other people with whom Woodside should consult, and if there is any information KAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 3.2).
- **(2) (3)** On 13 September 2023, KAC (via legal representation) emailed Woodside requesting confirmation that consultation costs would be covered by Woodside. KAC also advised that the Kariyarra have sea rights referenced in their native title evidence. The KAC lawyer affirmed that further consultation will be required now that KAC has a legal advisor.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>On 13 September 2023, KAC (via legal representative) emailed Woodside requesting a copy of the information sheet for another EP unrelated to this activity, previously provided by Woodside to KAC.</li> <li>On 13 September 2023, Woodside emailed KAC (via legal representative) with information on another EP as requested. Woodside also noted that a response to funding had not yet been received but would be followed up and confirming that Woodside are looking for positive engagement with KAC.</li> <li><b>(4)</b> On 13 September 2023, Woodside emailed KAC (via legal representative) noting in principle agreement to covering costs and requesting reasonable quotes for all areas requested by KAC in the email of 31 August 2023 regarding another activity unrelated to this EP.</li> </ul>                        |  |   |

Woodside recognises that KAC holds Sea Country rights and interests that need to be protected (<b>Section 4.8.1</b>).</p> <p><b>(2)</b> <b>(4) &amp; (5)</b> Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with KAC through ongoing engagement and continue to progress towards an Engagement Protocol as requested by Kariyarra (<b>Appendix J</b>).</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Karri Karrak Aboriginal Corporation (KKAC)**

KKAC is established through the South West Native Title Settlement under the Noongar Recognition Act 2016 by the Noongar people to represent the Wardandi and Bibulmun/Piblemen defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with KKAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### Sufficient Information:

- Woodside sought direction on KKAC’s preferred method of consultation.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.

### Reasonable Period:

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to KKAC on 17 March 2023.
- Woodside addressed and responded to KKAC over an 8-month period demonstrating a “reasonable period” of consultation.
- Woodside asked KKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside has provided a reasonable opportunity for input since March 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place.
- Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KKAC functions, interests or activities.

### Summary of information provided and record of consultation:

- On 17 March 2023, Woodside emailed KKAC advising of the proposed activity (Appendix F, reference 2.44) and provided a Consultation Information Sheet.
- On 21 March 2023, KKAC responded, noting that Woodside’s consultation information related to the Pilbara. The Karri Karrak region is in Southwest Australia.
- On 22 March 2023 Woodside responded and advised that recent changes in regulations regarding consultation on project activity required Woodside to consult a broader range of organisations.
- On 22 March 2023 KKAC responded, advising information would be passed on to KKAC Directors.
- On 15 September 2023, Woodside emailed KKAC advising of the planned start date for the activity, and once again requesting if KKAC is aware of any other people with whom Woodside should consult, and if there is any information KKAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 3.2).
- On 18 October 2023, Woodside met with KKAC CEO and Cultural Advice Committee, to discuss other Environment Plans. Woodside advised that its activities could affect KKAC country as outlined in the EMBA’s for the other Environment Plans discussed.

| Summary of Feedback, Objection or Claim | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |
|---|---|-------------------------------|
|---|---|-------------------------------|

*Stybarrow Plug and Abandonment Environment Plan*

|   |   |  |
|---|---|--|
| <p>In consultation in the course of preparing the EP since March 2023, KKAC has not provided feedback, objections or claims to date in response to the information provided.</p>  | <p>Woodside demonstrated reasonable effort to engage in two-way dialogue. KKAC has had reasonable opportunity to participate in consultation.</p> <p>Woodside has:</p> <ul style="list-style-type: none"> <li>• Sought KKAC’s direction on their preferred method of consultation.</li> <li>• Set out in detail what is being sought through consultation.</li> <li>• Asked KKAC to distribute the request for consultation and information sheets to their members.</li> <li>• Asked whether KKAC was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> </ul> <p>Consultation with KKAC has not identified any other groups or individuals relevant to communally held functions, activities or interests.</p> <p>No material issues or concerns related to the proposed activity were raised during consultation to date. Woodside invited further feedback in accordance with Woodside’s approach to ongoing consultation (see <b>Section 11.8</b>).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls in the EP address KKAC Native Title Holders’ functions, interests or activities.</p> <p>As identified in <b>Section 11.8</b> of this EP, Woodside will continue to consult KKAC following acceptance of the EP, as requirement by the implementation strategy as set out regulation 14(9) of the Environment Regulations.</p> <p>Based on the engagement to date, no additional controls have been identified.</p> |
| <p><b>Malgana Aboriginal Corporation (Malgana)</b></p> <p>Malgana is established under the Native Title Act 1993 by the Malgana people to represent the Malgana people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |   |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Malgana for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on Malgana's preferred method of consultation. This resulted in a face-to-face meeting being coordinated at a location of Malgana's choosing, with Malgana nominated representatives. This meeting included information that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Malgana on 17 March 2023.
- Woodside addressed and responded to Malgana over an 8 month period demonstrating a "reasonable period" of consultation.
- Woodside asked Malgana if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside has provided a reasonable opportunity for input since March 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. Malgana has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.
- Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Malgana functions, interests or activities.

### **Summary of information provided and record of consultation:**

- Between 17 February 2023 and 17 March 2023 (the date information was provided regarding this EP), Woodside and Malgana had been communicating to settle a meeting time to discuss other Woodside EPs.
- On 10 February 2023, Woodside emailed Malgana requesting any feedback from its Board of Directors on other activities of which Woodside had notified Malgana. Woodside mentioned this proposed activity and advised Malgana that information would be sent shortly.
- On 21 February 2023, Woodside followed Malgana up via email requesting any feedback from its Board of Directors.
- On 22 February 2023, Malgana emailed Woodside regarding scheduling an opportunity for Woodside to present at an upcoming Malgana Board Meeting.
- On 7 March 2023, Malgana emailed Woodside:
  - Malgana advised for Woodside to begin consultation with Malgana, the initial step would be for Woodside to attend a 'MAC Directors Meeting'; the next Board meeting was planned for 3-4 April 2023;
  - Malgana advised it was not adequately funded to attend to these matters and requested a pro rata contribution of \$2500.00 plus GST be paid towards the overall meeting costs to place this matter formally on the agenda;

## Stybarrow Plug and Abandonment Environment Plan

- Malgana asked whether one or two hours was requested for Woodside's presentation and discussion.
- On 9 March 2023, Woodside emailed Malgana:
  - Woodside confirmed the proposed meeting dates and logistics;
  - Woodside requested a half day to present on the EPs on which it was seeking feedback.
- On 17 March 2023, Woodside emailed Malgana advising of the proposed activity (Appendix F, reference 2.45) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet.
- On 19 March 2023, Woodside emailed Malgana proposing an alternative date for the meeting so that required project personnel would be available.
- On 22 March 2023, Malgana emailed Woodside to agree on the proposed date and coordinate arrangements for the meeting.
- On 23 March 2023, Malgana emailed Woodside to discuss advance payment for consultation.
- On 23 March 2023, Woodside emailed Malgana to confirm arrangements for the meeting.
- On 4 April 2023, Woodside met with Malgana representatives in Woodside's Perth offices: Woodside:
  - Described the EP framework, referring to the *Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations*, NOPSEMA's role as the Regulator and general contents of EPs.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which would be open for consultation in 2023.
  - Provided an overview of the broader EP activities.
  - Described the proposed activity, noting that it included removing equipment but that some buried equipment like mattresses, and anchors will be left in situ as removing them may have greater environmental impact.
  - Described the types of vessels involved.
  - Described the planned impacts and respective controls of the above activities including: the presence of vessels, seabed disturbance, underwater noise, discharge from vessels, emissions to air and external lighting.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for each proposed activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities or interests of MAC and the people it represents may be impacted by any of those activities.
  - Specifically asked the following:
    - How could these activities impact Malgana's cultural values, interests and activities – did protecting the environment do enough to protect Malgana's cultural values?
    - What were Malgana's concerns about the proposed activities and what did Malgana think Woodside should do about them?
    - Was there anything Malgana wanted included in the EPs before submission?
    - Was there anyone else Woodside should consult with about the activities?
  - Advised that Woodside would continue to take feedback from MAC for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should MAC desire to provide feedback directly to the Regulator.

## Stybarrow Plug and Abandonment Environment Plan

- At the 4 April 2023 meeting MAC asked/noted:
  - What arrangements were in place for earthquake tremors.
    - Woodside responded that facilities and equipment were designed to withstand seismic activity.
  - **(1) (2)** Malgana stated that the Shark Bay environment was unique and had the largest living organism in the world. It also contained stromatolites and microbial mats which were among the oldest living organisms in the world. Stochastic modelling of the worst-case credible spill scenario for the petroleum activity indicated that these receptors would not be contacted.
  - **(1) (2)** Malgana stated that they believed there were flaws in modelling related to Shark Bay hydrodynamics. Woodside responded that nearshore processes may not be very accurate in the model, but that Woodside planned for spill response in Shark Bay regardless.
  - **(1)** Malgana asked what would be left behind following the decommissioning activities.
    - Woodside confirmed that the RTMs were removed, some buried equipment remained as it would have greater environment impact digging it up.
  - Malgana asked what the cumulative impact of this and other activities would be if releases occurred at the same time.
    - Woodside responded that they were separate activities with relative timing for each activity.
- On 20 April 2023, Malgana emailed Woodside:
  - Malgana thanked Woodside for the consultation meeting, noting that the Board enjoyed the informative and detailed information provided.
  - Malgana thanked Woodside for its proactive response to ensure Malgana Country was sufficiently protected and ready in case of unplanned events.
  - Malgana noted discussion points from the meeting:
    - Agreement that an ongoing partnership should be formed.
    - Emphasised the sensitivity and importance of Shark Bay culturally and environmentally.
    - Indicated concerns regarding hydrodynamic modelling and reflection of flow into the bay.
    - Feedback helped Woodside improve its EPs.
  - Malgana requested Woodside:
    - **(1)** Clarify how hydrodynamics of Shark Bay were resolved in modelling.
    - Provide Malgana rangers with training and equipment for incident response.
    - Provide a Shark Bay response team with emergency response plans and exercises.
    - Develop a communication strategy for emergencies.
    - (1) Information on how Woodside can support Malgana rangers and people.
    - A timeframe for a follow up meeting to discuss these points.
    - Guidance on the format of desired feedback.
- On 18 May 2023, Woodside emailed Malgana a letter:
  - Woodside thanked Malgana for the consultation meeting and its correspondence of 20 April 2023, and its careful consideration of the matters presented.
  - Woodside acknowledged Malgana had interests in the EMBA and noted that Woodside wanted to ensure impacts were as minimal as reasonably practicable.

*Stybarrow Plug and Abandonment Environment Plan*

|--|--|---|
| <ul style="list-style-type: none"> <li>○ A high-level overview of presented topics was provided.</li> <li>○ Woodside provided responses to the requests made in Malgana’s correspondence of 20 April 2023.</li> <li>○ Woodside’s hydrocarbon spill modelling was provided by specialist consultants using global best practice techniques and software. Woodside had requested further information from the consultants on how Shark Bay hydrodynamics were resolved in the model and would communicate to Malgana once received.</li> <li>○ (1) Woodside was investigating options for Indigenous Ranger hydrocarbon spill response training and capability. Woodside intended to work on this collaboratively with spill response agencies, Traditional Owners and industry.</li> <li>○ Existing emergency response arrangements that help protect the environment would trigger notification of Traditional Owners and other relevant stakeholders based on the spill’s trajectory at the time of the spill.</li> <li>○ Woodside proposed another meeting to discuss opportunities for rangers and Indigenous people, noting that Woodside would contact Malgana by phone to arrange details.</li> <li>○ (1) Woodside stated it could receive feedback in any format of Malgana’s choice. Woodside offered to provide resources to Malgana to obtain expert advice on proposed activities for which Malgana was a relevant person, beyond that which had already been received in the course of preparing the EP. A suggested list of experienced and reputable industry environmental consultants was provided.</li> <li>○ Woodside noted that the feedback and the letter would be included in EPs that would be submitted to NOPSEMA.</li> </ul> | <ul style="list-style-type: none"> <li>● Woodside provided responses to questions noted from the meeting that were not related to the proposed activity.</li> <li>● On 19 May, Woodside emailed Malgana to advise if would get in contact in the following week and provided contact details.</li> <li>● On 19 July 2023, Woodside emailed Malgana NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Malgana advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> <li>● (4) On 26 July 2023, Woodside emailed Malgana Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.</li> <li>● (1) &amp; (2) On 1 August 2023, Woodside emailed Malgana with follow up information that Malgana requested about hydrocarbon spill modelling which came out of the meeting of 4 April 2023.</li> <li>● (3) On 1 August 2023, Malgana emailed Woodside with follow up information that Malgana requested about hydrocarbon spill modelling which came out of the meeting of 4 April 2023 with Malgana.</li> <li>● On 1 August 2023, Woodside thanked Malgana for the information and noted that Malgana was looking to get an environmental consultant to give advice to its Board.</li> <li>● (4) On 3 August 2023, Woodside emailed Malgana notifying about another activity unrelated to this EP, and requested to meet to discuss matters, including the issue raised by Malgana regarding securing an environmental consultant to give advice to the Malgana Board.</li> <li>● On 13 September 2023, Woodside emailed Malgana advising of the planned start date for the activity, and once again requesting if Malgana is aware of any other people with whom Woodside should consult, and if there is any information Malgana wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 3.2).</li> </ul> |   |
| <p><b>Summary of Feedback, Objection or Claim</b></p>  | <p><b>Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response</b></p>  | <p><b>Inclusion in Environment Plan</b></p> |

*Stybarrow Plug and Abandonment Environment Plan*

|   |  |  |
|---|--|--|
| <p>(1) During face-to-face engagement related to this activity and others, Malgana requested further information on topics related to this proposed activity which was responded to during the meeting:</p> <ul style="list-style-type: none"> <li>• What is left behind after decommissioning.</li> <li>• Management of Invasive Marine species.</li> <li>• Spill response arrangements and that they believe there are flaws in modelling related to Shark Bay hydrodynamics.</li> <li>• Interest in expanding ranger program</li> </ul> <p>(2) Malgana indicated it has particular interest in sea grasses, stromatolites and microbial mats.</p> <p>(3) Malgana expressed a desire for ongoing engagement and partnership.</p> <p>(4) Malgana noted its funding is restricted for these types of engagement and requested funding support. Woodside agreed to the requested funding assistance.</p> | <p>(1) Woodside responded to Malgana's requests for further information during face-to-face engagements and follow up emails, and no further information was requested on these topics. On 1 August 2023, Woodside emailed the requested information about hydrocarbon spill modelling and Malgana thanked Woodside for its response. No further requests or objections have been made on this matter by Malgana to date.</p> <p>(2) Woodside assessed Malgana's interest in sea grasses, stromatolites and microbial mats to represent potential cultural values. Environmental sensitivities that Malgana noted as having particular interest within Shark Bay are within the EMBA (see <b>Table 4-13</b> of the EP). Shark Bay stromatolites and seagrass beds are inshore of the predicted EMBA and therefore it is not expected that there would be any impact to Shark Bay stromatolites or seagrass beds in the event of an unplanned hydrocarbon spill.</p> <p>(3) &amp; (4) Separate from consultation under Reg 11A, Woodside supports ongoing engagement and has responded to Malgana's advice about the limitations on their resources. Woodside has offered to support Malgana in correspondence sent in May and August 2023, including support for environmental expertise, supplying names of organisations Malgana may want to consider conducting the work, however these offers have not been taken up.</p> <p>Sufficient information to allow informed assessment has already been provided, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members, and a face-to-face meeting on 4 April 2023 for which Woodside met Malgana's costs, with appropriate material (pictures, maps, videos) and project attendance allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (refer to <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7 and 8</b>.</p> <p>(2) Woodside updated <b>Section 4.8.1.5</b> to record Malgana's interests and potential cultural values, including sea grasses, stromatolites and microbial mats and assessed potential impact on these, including controls, in <b>Section 7 and 8</b> of the EP.</p> <p>(3) &amp; (4) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with Malgana to address funding restrictions as part of ongoing engagement (<b>Section 11.8</b> and <b>Table 11-5</b> of the EP).</p> |
| <p><b>Murujuga Aboriginal Corporation (MAC)</b></p> <p>MAC is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.</p>   |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with MAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in **Section 5.5** of the EP. Specifically:

### Sufficient Information:

- Woodside sought direction on MAC's preferred method of consultation. This resulted in face-to-face meetings being coordinated at the location of MAC's choosing, with MAC nominated representatives. These meetings included information that was readily accessible and appropriate.
- Provided Consultation Information Sheets and Consultation Summary Sheets to MAC. Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, MAC has displayed an understanding of the activities under this Environment Plan.
- Advised that MAC can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### Reasonable Period:

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to MAC on 24 February 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to MAC queries over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked MAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. MAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see **Section 11.7** of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MAC's functions, interests or activities.

### Summary of information provided and record of consultation:

- On 24 February 2023, Woodside emailed MAC advising of the proposed activity (Appendix F, reference 2.67) and provided a Consultation Information Sheet.
- On 7 March, Woodside spoke with MAC to follow up on the material provided.
- On 30 March, Woodside again spoke with MAC to follow up on the material provided.
- On 3 April MAC emailed Woodside asking for a list of outstanding issues that Woodside would like to progress.
- **(1)** On 5 April 2023 Woodside responded to MAC via email with a list of open topics, which included the request for feedback on the proposed activity. Woodside requested advice from MAC on:
  - How the activity could impact cultural values
  - If MAC proposes anything to be included in the EP prior to submission.

## Stybarrow Plug and Abandonment Environment Plan

- If MAC would like a meeting to discuss the activity
- Whether MAC does not intend to provide advice prior to EP submission.
- On 12 April, Woodside telephoned MAC regarding several topics including feedback on the proposed activity. MAC responded that their Board of Directors were meeting soon, and that Woodside could expect to hear from MAC with a plan on how to progress consultation on EP's.
- On 5 June MAC invited Woodside to attend a meeting of the Circle of Elders on 22 June 2023.
- (1) On 22 June 2023, Woodside met with MAC Board and Circle of Elders. Woodside:
  - Described the Environment Plan framework, referring to the *Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations*, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
  - Provided an overview of the decommissioning activities.
  - Described the proposed activity, noting infrastructure to be removed; including existing pipeline and the location of the three activities located near Exmouth and Onslow.
  - Described the types of vessels involved.
  - Described the planned impacts and respective controls of the above activities including: the presence of vessels, seabed disturbance, underwater noise, discharge from vessels, emissions to air and external lighting.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for each proposed decommissioning activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities or interests of MAC and the people it represents may be impacted by any of those activities.
  - Specifically asked the following:
    - How could these activities impact your cultural values, interests and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - (2) Advised that Woodside will continue to take feedback from MAC for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should MAC desire to provide feedback directly to the Regulator.
  - At the 22 June 2023 meeting MAC asked:
    - whether any of the proposed activities are close to Pluto/Murujuga.
      - Woodside advised that the activities proposed under this EP are closer to Exmouth.
    - how old Woodside's assets are.

*Stybarrow Plug and Abandonment Environment Plan*

This email also reiterated Woodside’s request that MAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> <li>• <b>(2)</b> On 21 July 2023, MAC emailed a letter to Woodside. The letter confirmed that MAC have no concerns at this time with regards to the Stybarrow Plug &amp; Abandonment EP. MAC confirmed their desire for ongoing engagement and appreciated Woodside’s commitment to this.</li> <li>• <b>(2)</b> On 26 July 2023, Woodside emailed MAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.</li> <li>• <b>(3)</b> On 1 September 2023, MAC emailed a letter to Woodside noting the following in response to Woodside’s query regarding consultation on another activity unrelated to this EP:             <ul style="list-style-type: none"> <li>○ MAC consulted with women appointed to their Circle of Elders regarding the query</li> <li>○ MAC is comfortable that the women in the Circle of Elders are the right people to be consulted about these matters.</li> <li>○ MAC notes that it would be extremely unusual for knowledge to be held by an individual without surrounding groups knowing about it.</li> <li>○ The Circle of Elders themselves represent the Ngarda-Ngarli; the collective term for the Traditional Custodians who look after Murujuga Country.</li> </ul> </li> <li>• On 13 September 2023, Woodside emailed MAC advising of the planned start date for the activity, and once again requesting if MAC is aware of any other people with whom Woodside should consult, and if there is any information MAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).</li> </ul> |  |                                      |
| <b>Summary of Feedback, Objection or Claim</b>  | <b>Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response</b> | <b>Inclusion in Environment Plan</b> |

*Stybarrow Plug and Abandonment Environment Plan*

|   |   |   |
|---|---|---|
| <p>(1) MAC has provided significant valuable input into the management of known and potential cultural and heritage values across several EPs, including this one. During face-to-face engagement on 22 June 2023, MAC asked:</p> <ul style="list-style-type: none"> <li>• Whether any activities were close to Pluto/Murujuga.</li> <li>• How old Woodside’s assets are.</li> <li>• What conditions infrastructure is in.</li> <li>• How long decommissioned metal would be around for.</li> </ul> <p>Woodside responded to queries within the meeting.</p> <p>(2) MAC has written to Woodside on 21 July 2023 noting they had no concerns at present with this EP.</p> <p>(3) On 1 September 2023, MAC has confirmed that they are the appropriate body corporate and cultural authority over Murujuga.</p> | <p>(1) The feedback raised by MAC in the 22 June meeting in relation to location of activities, age of assets, condition of infrastructure and decommissioned metal were addressed by Woodside in the meeting.</p> <p>(2) Woodside has accepted MAC’s feedback on 21 July 2023 that they have no concerns with this EP at the time of writing, and their desire for ongoing engagement. The EP and supporting Sensitive Information document shows that Woodside has demonstrated that a genuine two-way dialogue has taken place between Woodside and MAC, since February 2023. Woodside has:</p> <ul style="list-style-type: none"> <li>• Sought MAC’s direction on their preferred method of consultation.</li> <li>• Set out in detail what is being sought through consultation.</li> <li>• Asked MAC to distribute the request for consultation and information sheets to their members.</li> <li>• Asked whether MAC was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult providing reasonable time since 18 July 2023 for responses. Consultation has not identified any other groups or individuals relevant to communally held functions, activities, or interests.</li> <li>• Provided MAC with NOPSEMA’s guidelines and brochure on consultation.</li> <li>• Advised MAC of the activity start date.</li> </ul> <p>(3) Woodside accepts that MAC is the cultural authority over Murujuga. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient as described in <b>Section 7 and 8</b> of the EP.</p> <p>(2) Not required</p> <p>(3) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to consult with MAC as the cultural authority over Murujuga for ongoing consultation and for all relevant EPs (<b>Section 11.8</b>).</p> |
| <p><b>Mayala Inninalang Aboriginal Corporation (MIAC)</b></p> <p>MIAC is established under the Native Title Act 1993 by the Mayala people to represent the Mayala people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>   |   |   |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with MIAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on MIAC's preferred method of consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets to MIAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Explained the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that MIAC can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Consultation Information Sheet was publicly available on the BHP website May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to MIAC on 28 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to MIAC over an 8-month period.

### **Summary of information provided and record of consultation:**

Kimberley Land Council (KLC) is the nominated Representative of MIAC.

- **(1)** On 28 February 2023, Woodside emailed MIAC via KLC advising of the proposed activity (Appendix F, reference 2.46) and provided a Consultation Information Sheet.
- On 28 February 2023, KLC emailed to advise it had passed Woodside's information to the relevant contact person at MIAC.
- **(1)** On 8 March 2023, Woodside emailed MIAC via KLC to ask whether there were any initial concerns and whether MIAC members would like to speak to Woodside or provide feedback on the activity (Appendix F, reference 2.46.1).
- **(1)** On 5 April 2023, Woodside sent a follow up email to KLC as nominated contact person to confirm whether MIAC may have interests impacted by the proposed activities.
- On 6 April 2023, KLC responded to Woodside to advise the email regarding the proposed activity had been sent to the relevant contact person at MIAC.
- On 8 June 2023, Woodside emailed KLC as the nominated focal point for MIAC to advise MIAC of community information drop-in sessions to be held in several Kimberley towns to discuss Woodside planned activities. Woodside requested details be passed on to members or anyone who would like to understand the activities.
- On 19 July Woodside emailed KLC to request they forward an email from Woodside to MIAC about guidelines and policies released by NOPSEMA.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>• On 19 July 2023, Woodside emailed MIAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that MIAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> <li>• On 8 August 2023, MIAC (via NOPSEMA) emailed Woodside enclosing a letter relating to among other things:             <ul style="list-style-type: none"> <li>○ Culturally appropriate consultation processes,</li> <li>○ Information that will support free, prior and informed consent.</li> <li>○ <b>(2)</b> Financial support to bring together the right people to ensure appropriate consultations.</li> </ul> </li> <li>• On 3 October 2023, KLC emailed Woodside confirming they are the contact person for MIAC.</li> <li>• On 13 October 2023, Woodside emailed MIAC thanking them for the 8 August 2023 email and requesting an opportunity in the future to meet in person for a meeting. No response was received.</li> <li>• On 18 October 2023, Woodside emailed MIAC introducing a new Woodside focal point and again requesting to meet in person with the MIAC Board.</li> <li>• <b>(2)</b> On 27 October 2023, Woodside emailed MIAC following up with the previous email informing MIAC that Woodside will cover meeting costs including flights and accommodation. Alternatively, Woodside suggested an online teams meeting if that was the preferred method of consultation. No response has been received.</li> </ul> |  |  |

| <p>(1) MIAC has not provided feedback, objections to date or claims in response to the activity information provided since consultation began in February 2023.</p> <p>(2) In an 8 August 2023 letter regarding consultation on another activity, MIAC stated that they are not funded and required financial support.</p>  | <p>(1) Woodside accepts that MIAC has no feedback to provide for this EP.</p> <p>(2) Woodside has responded to MIAC's financial requests in the 8 August 2023 letter and offered financial support for ongoing consultation on 27 October 2023, which has not yet been taken up by MIAC. Sufficient information to allow informed assessment on this activity has been provided, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p><b>(1)</b> Existing controls considered sufficient, as described in <b>Section 7 and 8</b>.</p> <p><b>(2)</b> Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with MIAC as part of ongoing engagement (<b>Section 11.8</b> of the EP).</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Nanda Aboriginal Corporation (Nanda)**

Nanda is established under the Native Title Act 1993 by the Nanda people to represent the Nanda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Nanda for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in **Section 5.5** of the EP. Specifically:

### Sufficient Information:

- Woodside sought direction on Nanda's preferred method of consultation. This resulted in one face-to-face meeting being coordinated at location of Nanda's choosing, with Nanda nominated representatives. This meeting included information that was readily accessible and appropriate. A further meeting was held with Nanda's legal representatives.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheet and Consultation Summary Sheets to Nanda. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, Nanda have displayed an understanding of the activities under this Environment Plan
- Advised that Nanda can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### Reasonable Period:

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Nanda on 17 March 2023.
- Woodside has addressed and responded to Nanda over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked Nanda if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since March 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. Nanda has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nanda's functions, interests or activities.

### Summary of information provided and record of consultation:

YMAC is the Native Title Representative Body (NTRB) for the Yamatji and Pilbara regions, which includes Nanda. NTRBs exist to provide assistance to native title claimants and holders in regard to their native title rights. No native title has been recognised over the EMBA, however YMAC is identified in the North West Marine Parks Network Management Plan as the contact for identifying cultural values in nearby Australian Marine Parks.

- On 17 March 2023, Woodside emailed Nanda/YMAC to discuss meeting arrangements with Nanda and provided a simplified Consultation Information Sheet (Appendix F, reference 2.47) (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email stated

## Stybarrow Plug and Abandonment Environment Plan

that Woodside was seeking to understand the nature of interests Nanda and its members may have in relation to the activity.

- On 17 March 2023, Woodside emailed Nanda/YMAC following up for a date, cost estimate and logistical details for a meeting, continuing existing discussions on the proposed engagement. Woodside requested on whether a date and budget has been confirmed for a meeting with Nanda and to notify it of additional EPs for consideration by the Nanda Board.
- On 23 March Nanda/YMAC responded inviting Woodside to meet the Board of Directors on 19 April 2023 in Geraldton. Woodside accepted the invitation.
- On 23 March 2023, Nanda/YMAC emailed Woodside regarding a budget for the upcoming meeting.
- On 24 March 2023, Nanda/YMAC emailed Woodside confirming location of meeting in Geraldton.
- **(3)** On 29 March 2023, Nanda/YMAC emailed Woodside regarding a budget for the upcoming meeting.
- **(3)** On 5 April 2023, Woodside emailed Nanda/YMAC and accepted the proposed budget.
- **(1)** On 19 April 2023, Woodside met with directors and other representatives from Nanda Aboriginal Corporation in Geraldton. Woodside:
  - Described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
  - Provided an overview of the broader drilling and well EP activities.
  - Described the proposed activity, and unplanned impacts by difference to what was already discussed in unrelated EPs at the meeting.
  - Described the types of vessels involved.
  - Described the planned impacts and respective controls of the above activities including: the presence of vessels, seabed disturbance, underwater noise, discharge from vessels, emissions to air and external lighting.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for each proposed activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities or interests of MAC and the people it represents may be impacted by any of those activities.
  - Woodside specifically asked the following:
    - How could these activities impact your cultural values, interests and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?

## Stybarrow Plug and Abandonment Environment Plan

- Is there anyone else Woodside should consult with about the activities?
  - Advised that Woodside will continue to take feedback from MAC for the life of the EP
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should MAC desire to provide feedback directly to the regulator.
- **(1)** At the 19 April 2023 meeting Nanda asked:
  - whether Woodside has ever had an oil spill.
    - Woodside responded that they have had small spills but nothing that had lasting impact, and while worst case spills will be discussed today we have not had anything close to this scale happen before.
  - whether Woodside activities are resistant to cyclone.
    - Woodside responded that while some of assets would continue operating the execution activities such as seabed intervention and pipelay would be moved away and made safe.
  - **(2)** about control measures to avoid impacts to migratory whales.
    - Woodside described control measures intended to be in place for the activity.
  - for detail on oil spill response particularly shoreline impact.
    - Woodside described hydrocarbon spill preparedness, emergency planning and the various response techniques.
  - Nanda asked how material is disposed of
    - Woodside responded that it is cleaned, separate, and recycled or reused.
  - Nanda asked whether new vessels are required to complete decommissioning work.
    - Woodside responded that new vessels are specialised assets for the decommissioning activity.
- **(3) (4)** On 19 April 2023, Woodside emailed YMAC/Nanda/NTGAC following up with information offered at the meeting of 13 March 2023 (with NTGAC); management of emissions, organisations that may provide independent expertise and re-iterating they would like to meet regularly with YMAC/Nanda/NTGAC. Woodside made note that PBCs may be interested in Woodside's ongoing support and capacity building by way of social investments.
- On 18 May 2023, Woodside emailed Nanda:
  - Woodside thanked Nanda for the consultation meeting and their careful consideration of the matters presented.
  - **(2)** Woodside acknowledged and respected that Nanda have interests in the EMBA and noted that we want to ensure impacts are as minimal as reasonably practicable.
  - A high-level overview of presented topics was provided.
  - Woodside notified that the feedback and the letter will be included in Environment Plans that will be submitted to NOPSEMA.
  - **(1)** Woodside provided responses to questions noted from the meeting that were not related to the proposed activity.
- On 21 July 2023 Woodside emailed Nanda NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Nanda advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside

*Stybarrow Plug and Abandonment Environment Plan*

should consult.

- On 21 July 2023, Nanda sent an automatic email response with a return date of 31 July 2023, no further email correspondence received to date.
- **(4)** On 25 July 2023, Woodside emailed Nanda (via YMAC) Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 14 September 2023, Woodside emailed Nanda advising of the planned start date for the activity, and once again requesting if Nanda is aware of any other people with whom Woodside should consult, and if there is any information Nanda wish to provide on cultural values and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).

| Summary of Feedback, Objection or Claim | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |
|---|---|-------------------------------|
|---|---|-------------------------------|

*Stybarrow Plug and Abandonment Environment Plan*

|  |  |  |
|--|--|--|
| <p>(1) During face-to-face engagement related to this activity and others, Nanda requested further information on topics related to this proposed activity which were responded to during the meeting and in correspondence shortly afterwards:</p> <ul style="list-style-type: none"> <li>• Decommissioning</li> <li>• Hydrocarbon spill response, potential shoreline impact and emergency planning</li> <li>• Impacts to whales.</li> <li>• Spill response arrangements</li> <li>• Whether all infrastructure is eventually removed at decommissioning.</li> <li>• Cyclone resistance.</li> <li>• Greenhouse emissions.</li> </ul> <p>(2) Nanda expressed a general interest in whales. Woodside discussed control measures to protect migratory whales from an ecological perspective during the meeting in which the issue was raised. No further feedback or comment was received on this topic.</p> <p>(3) Nanda requested funding for meetings and to fund an expert environmental scientist.</p> <p>(4) Nanda have expressed interest in ongoing engagement and capacity building and investment opportunities.</p> | <p>(1) Woodside responded to Nanda's requests for further information during face-to-face engagements in which they were raised, and no further information was requested on these topics.</p> <p>(2) Woodside assessed Nanda's interest in whales and whale sharks to represent cultural values.</p> <p>(3) Woodside accepted the budget for the 19 April 2023 and on a request for environmental expertise said they fund other requests on a case-by-case basis. Woodside provided the names of organisations Nanda may wish to consider for environmental expertise. No further request for funding has been received by Woodside.</p> <p>(4) Woodside has assessed the Program of Ongoing Engagement with Traditional Custodians will support ongoing consultation with Nanda and address appropriate support for resourcing, separate from consultation under Reg 11A, Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members, and a face to face meeting on 19 April 2023 for which Woodside met Nanda's costs, with appropriate material (pictures, maps, videos) and project attendance allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7</b> and <b>8</b>.</p> <p>(2) Woodside updated <b>Section 4.8.1</b> to reflect Nanda's interests and potential cultural values, including whales, and assessed potential impact on these, including controls, in <b>Section 7</b> and <b>8</b>.</p> <p>(3) Not required.</p> <p>(4) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with Nanda as part of ongoing engagement as described in <b>Section 11.8</b> and <b>Table 11-5</b>.</p> |
|--|--|--|

**Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC)**

NTGAC is established under the Native Title Act 1993 by the Baiyungu people to represent the Baiyungu people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with NTGAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on NTGAC's preferred method of consultation. This resulted in two face-to-face meetings being coordinated at the location of NTGAC's choosing, with NTGAC nominated representatives. These meetings included information that was readily accessible and appropriate.
- Provided Consultation Information Sheet and Consultation Summary Sheets to NTGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format. Consultation Information Sheet was publicly available on the BHP website May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls to manage potential impacts to ALARP and acceptable levels.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, NTGAC have displayed an understanding of the activities under this Environment Plan.
- Advised that NTGAC can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to NTGAC on 16 February 2023 based on their function, interest, and activities.
- Woodside commenced consultation with NTGAC in February 2023. Woodside has addressed and responded to NTGAC over nearly 9 months, demonstrating a "reasonable period" of consultation.

Woodside asked NTGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. NTGAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NTGAC functions, interests or activities.

Woodside does not agree with NTGAC's assertion that it has not yet been adequately consulted on the activity. Woodside has assessed the claims and feedback raised by NTGAC, as detailed later in this section alongside Woodside's response to the claims. Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NTGAC's functions, interests, or activities.

### **Summary of information provided and record of consultation:**

Yamatji Marlpa Aboriginal Corporation (YMAC) is the Native Title Representative Body (NTRB) for the Yamatji and Pilbara regions, which includes NTGAC. NTRBs exist to provide assistance to native title claimants and holders in regard to their native title rights. No native title has been recognised over the EMBA, however YMAC is identified in the North West Marine Parks Network Management Plan as the contact for identifying cultural values in nearby Australian Marine Parks.

## Stybarrow Plug and Abandonment Environment Plan

- On 6 January 2023, Woodside phoned NTGAC via the representative body Yamatji Marlpa Aboriginal Corporation (YMAC) for the purpose of introduction and to explain that Woodside will be sending information concerning EPs.
- On 27 January 2023 Woodside spoke with and emailed NTGAC/YMAC to follow up on information provided on 20 January 2023 related to another EP. Woodside requested if NTGAC required anything further ahead of a planned meeting with Woodside on 16 February 2023.
- (1) On 1 February 2023, NTGAC/YMAC spoke with Woodside to confirm the planned meeting for 16 February 2023. It was arranged to hold a subsequent phone discussion between key representatives on 10 February to discuss scope for the consultation meeting. Woodside said that it is anticipating feedback from the group on the proposed activity at this consultation meeting and asked for any specific families or individuals that Woodside should be engaging with to be invited. NTGAC/YMAC responded that consultation with NTGAC as the representative body is appropriate.
- On 10 February 2023, Woodside spoke with NTGAC and described the proposed scope of the consultation meeting planned for 16 February 2023.
- On 16 February 2023, Woodside presented to a meeting of the NTGAC Board and YMAC representatives, Woodside:
  - Described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which would be open for consultation in 2023.
  - Provided an overview of the decommissioning activities.
  - Described the proposed activity, noting that this decommissioning activity is in shallower water, the RTM is on the seabed and there is a section of pipeline being removed.
  - Described the types of vessels involved.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for each proposed decommissioning activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities, or interests of NTGAC PBC and the people it represents may be impacted by any of those activities.
  - Specifically asked the following:
    - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - Advised that Woodside will continue to take feedback from NTGAC for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should NTGAC desire to provide feedback directly to the regulator.
- On 16 February 2023 Woodside presented to a meeting of the NTGAC Board and YMAC representatives. Woodside:
  - described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.

## Stybarrow Plug and Abandonment Environment Plan

- Provided an overview of the decommissioning activities.
- Described the proposed activity, noting that this decommissioning activity is in shallower water, the RTM is on the seabed and there is a section of pipeline being removed.
- Described the types of vessels involved.
- Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
- Displayed and spoke to the EMBA for each proposed decommissioning activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
- Stated that Woodside wanted to understand how the functions, activities, or interests of NTGAC PBC and the people it represents may be impacted by any of those activities.
- Specifically asked the following:
  - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
  - What are your concerns about the proposed activities and what do you think we should do about them?
  - Is there anything you would like included in the EPs before submission?
  - Is there anyone else Woodside should consult with about the activities?
- Advised that Woodside will continue to take feedback from NTGAC for the life of the EP.
- Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should NTGAC desire to provide feedback directly to the regulator.
- At the meeting on 16 February 2023, NTGAC asked:
  - Woodside to explain the Stybarrow and Griffin decommissioning activities by points of difference from the Nganhurra RTM decommissioning activities.
  - **(2)** Whether any oil will come out when equipment is removed
    - Woodside responded that this is not expected however the activities do have risk of hydrocarbon loss of containment, which was explained further in the meeting.
  - NTGAC asked whether other vessels could interfere with the activity.
    - Woodside responded that a 500m exclusion zone will be implemented to try to avoid this situation.
  - NTGAC asked whether the activities can be done outside whale shark season.
    - Woodside responded that it isn't planned and noted that vessels move slowly.
  - NTGAC asked what will happen to the turrets post-removal.
    - Woodside responded that the steel and plastic will be recycled.
- At the meeting on 16 February 2023 YMAC asked:
  - About risk to marine parks
    - Woodside replied that nothing is planned to go into marine parks or Exmouth Gulf.
  - YMAC asked whether Woodside have had any incidents with similar activities before
    - Woodside responded that we have completed decommissioning of the Balnaves field in the past with no material incidents.
  - YMAC asked for more detail on how the potential loss of containment volumes were identified

## Stybarrow Plug and Abandonment Environment Plan

- Woodside replied that it is either the largest fuel tank from a vessel, or what could come out of the wells where relevant. EMBA for each activity was shown again and scenarios reiterated.
- Woodside noted this concluded the Decommissioning section of the meeting and called for any further questions or feedback. None were received.
- Woodside stated that there is significant work and consultation coming up, and it hoped to spend more time with NTGAC to understand expectations and desire of how Woodside can work with NTGAC.
- **(6)** YMAC expressed that they are being inundated with requests for consultation from oil and gas operators and are working internally on processes and priorities for consultation.
- Woodside welcomed the transparency and discussion on capacity.
- **(7)** NTGAC expressed that consulting on these types of activities is not viewed as wasting time, but consultation which gives nothing back to the community is not a priority. They are interested in partnership programs and on-country engagements.
- Woodside stated that while all the big companies will have deadlines and need to get feedback to meet legal requirements, Woodside desires it to be a jointly held process and that if NTGAC desires any support or assistance to please request it.
- On 21 February 2023, NTGAC/YMAC emailed Woodside to seek clarification of the attendee names at the 16 February 2023 Board meeting.
- On 21 February 2023, Woodside emailed NTGAC/YMAC the attendee names at the 16 February 2023 Board meeting and provided a copy of the presentation pack. Woodside followed up on request for any further feedback on the proposed activity.
- On 21 February 2023, Woodside emailed NTGAC via YMAC with the plain English activity summary sheet attached, and links to the detailed consultation information sheets (Appendix F, reference 2.48).
- On 22 February 2023, NTGAC/YMAC emailed Woodside to thank Woodside for sending the relevant information.
- Between 22-23 February 2023, NTGAC/YMAC and Woodside exchanged emails about additional resourcing so NTGAC could obtain independent expertise on a different activity but not for the proposed activities in this EP.
- On 22 March 2023, Woodside emailed and followed up by phone NTGAC/YMAC to see if there was any feedback on the proposed activities.
- On 28 March 2023, YMAC followed up with Woodside on a Woodside action arising from the 16 February meeting to supply photos and diagrams in relation to the different activity.
- On 31 March 2023, Woodside emailed NTGAC/YMAC to follow up with the relevant photos and diagrams requested, noting contact details, and welcoming any further feedback. Woodside thanked NTGAC for their work to date and requested that NTGAC reach out for any assistance. No further response was received to Woodside's request for feedback on the activity.
- On 1 June 2023, Woodside emailed NTGAC/YMAC to ask if any further assistance or information was required on Woodside matters.
- On 7 June 2023, NTGAC/YMAC emailed Woodside to apologise for delayed response and to advise that the Board are currently busy, the request for information will be followed up
- On 19 June 2023, Woodside emailed NTGAC/YMAC to inform that they were sending information on an unrelated EP and to ask whether NTGAC required any consultations on any matters. Woodside also asked NTGAC if they required any assistance in relation to consultation. On 19 June 2023, NTGAC/YMAC emailed Woodside with instructions from NTGAC Directors that they would like to undertake a consultation workshop with Woodside.
- On 19 June 2023, Woodside emailed NTGAC/YMAC to request a one-day meeting at a time and locations suitable to the Board.
- On 20 June 2023, Woodside emailed NTGA/YMAC to confirm information of an unrelated EP and to agree to a funding request and confirm awaiting meeting details.
- On 20 June 2023, NTGAC/YMAC emailed Woodside to acknowledge they will look at the Board's availability for a one day meeting.

## Stybarrow Plug and Abandonment Environment Plan

- On 21 June 2023, NTGAC/YMAC emailed Woodside to acknowledge they will look at booking a full day's workshop and that they would like all EP activities to be covered.
- On 21 June 2023, Woodside emailed NTGAC/YMAC noting workshop and agreeing to assist with planning arrangements.
- On 30 June 2023, NTGAC/YMAC emailed Woodside with a date and proposed budget for a full day meeting with NTGAC Board on 15 August 2023.
- On 5 July 2023, Woodside emailed NTGAC/YMAC to confirm the meeting date and offer assistance with meeting arrangements.
- On 17 July 2023, NTGAC/YMAC emailed Woodside attaching a draft framework for consultation with PBCs. YMAC advised NTGAC is not in a position to provide comments on consultation at this time. NTGAC would like to have a strategic planning workshop to develop benefits Woodside can provide under the consultation agreement and to discuss implementation of the framework.
- On 19 July 2023, Woodside emailed NTGAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NTGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 24 July 2023, Woodside emailed NTGAC to request a pre meeting to finalise the agenda for 15 August workshop with NTGAC board. The email set out suggested topics to support outcomes to address NTGACS concerns and aspirations and address Woodside's needs in respect of how best to work with NTGAC.
- **(9) (10)** On 25 July 2023, Woodside emailed NTGAC/YMAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 28 July 2023, NTGAC/YMAC confirmed availability for a pre meeting.
- On 31 July 2023, Woodside emailed NTGAC/YMAC to accept a pre meeting date.
- On 9 August 2023, Woodside emailed NTGAC/YMAC requesting clarity around the meeting scheduled for 15 August 2023.
- On 11 August 2023, Woodside emailed NTGAC/YMAC confirming meeting and Woodside representatives for 15 August 2023.
- On 14 August 2023, NTGAC/YMAC emailed Woodside acknowledging the meeting to be held 15 August 2023.
- **(2)** On 15 August 2023, Woodside presented to the NTGAC about several EPs including this EP. At the meeting Woodside:
  - Described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
  - Provided an update and overview of the decommissioning activities.
  - Described the proposed activity, noting that this activity included removing subsea equipment.
  - Described the types of vessels involved.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for the proposed activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities, or interests of NTGAC and the people it represents may be impacted by any of those activities.
  - Specifically asked the following:

## Stybarrow Plug and Abandonment Environment Plan

- How could these activities impact your cultural values, interests, and activities – does protecting the environment do enough to protect your cultural values?
  - What are your concerns about the proposed activities and what do you think we should do about them?
  - Is there anything you would like included in the EPs before submission?
  - Is there anyone else Woodside should consult with about the activities?
  - Advised that Woodside will continue to take feedback from NTGAC for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should NTGAC desire to provide feedback directly to the regulator.
  - And **(3)** At the 15 August meeting NTGAC asked the following questions and gave the following feedback:
  - YMAC asked about whale sightings and response.
    - **(3)** Woodside responded that response depended on activity and controls, Marine Mammal Observers are implemented.
  - **(9) (10)** A proposed framework for consultation was discussed, involving Woodside funding a General Project Report to be written by an independent suitably qualified and experienced consultant, to be provided to NTGAC initially and then on to Woodside.
  - Terms for ongoing engagement were discussed, including frequency, participation, and content in context of the proposed General Project Report
  - **(8)** NTGAC Strategic Plan and relation to potential Woodside social investment opportunities were explored.
  - NTGAC stated their consultation expectations (two-way dialogue preferred over one-way presentations and requested that consultation meetings cover whole projects or phases rather than single EP activities which is too time consuming).
  - NTGAC requested that a table of EPs be submitted by December with a timeline.
  - **(5)** NTGAC stated that they did not consider that they had been consulted on other EPs based on engagement to date.
  - **(2) (3) (5)** On 31 August 2023, Woodside emailed NGTAC/YMAC, confirming outcomes of the meeting, including:
    - YMAC to provide a first draft of a consultation agreement.
    - YMAC to prepare the first draft of a general report.
    - Woodside to provide a list of upcoming activities.
    - Agreed to continue discussions relating to key community focus areas highlighted by NTGAC.
    - Feedback from NTGAC on the appropriateness of the information given by Woodside (too technical) to enable NTGAC to provide feedback.
    - Responded to NTGAC's claim that consultation has not begun by stating that in their view consultation has begun and is ongoing.
  - **(2) (3) (4)** On 6 September 2023, Woodside emailed NTGAC/YMAC with responses to queries about another activity, including:
    - Ballast waters release.
    - Specific chemicals released in marine environment.
    - Ballast waters testing for PFAs.
  - On 6 September 2023, NTGAC/YMAC emailed Woodside acknowledging information and noting they would pass over to their environmental scientist, as was stated as part of their proposed framework for consultation on 15 August 2023 meeting.
- (5)** On 14 September 2023, Woodside emailed NTGAC advising of the planned start date for the activity, as well as a list of all other activities as requested by NTGAC at the 15 August 2023 meeting. Woodside also once again requested if NTGAC is aware of any other people with whom Woodside should consult, and if there is any information NTGAC wishes to provide on cultural values and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).

|--|---|--|
| <p>consultation.</p> <p><b>(7)</b> NTGAC expressed interest in partnership programs and on-country engagements.</p> <p><b>(8)</b> NTGAC want to explore social investment opportunities with Woodside which may then feed into NTGAC's Strategic Plan.</p> <p><b>(9)</b> NTGAC are developing the first draft of a Consultation Agreement.</p> <p><b>(10)</b> NTGAC expressed a desire for ongoing engagement and partnership.</p>   | <p>environmental scientist, which was confirmed by email from NTGAC on 6 September 2023.</p> <p><b>(10)</b> Woodside's proposed Program of Ongoing Engagement with Traditional Custodians, that has been shared with NTGAC, includes consideration of social investment opportunities.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> |  |
| <p><b>Ngarluma Aboriginal Corporation (NAC)</b></p> <p>NAC is established under the Native Title Act 1993 by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |   |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with NAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on NAC's preferred method of consultation. This resulted in a face-to-face meeting being coordinated at the location of NAC's choosing, with NAC nominated representatives. This meeting included information that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheets and Consultation Summary Sheets to NAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, NAC have displayed an understanding of the activities under this Environment Plan.
- Advised that NAC can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to NAC on 24 February 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to NAC over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked NAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via a meeting and written exchanges to further understand the environment in which the activity will take place. NAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NAC's functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 24 February 2023, Woodside emailed NAC advising of the proposed activity (Appendix F, reference 2.50) and provided a Consultation Information Sheet. Woodside noted it was seeking NAC's feedback as soon as possible on the proposed activity. Woodside made it clear it was prepared to consult in the manner and

## Stybarrow Plug and Abandonment Environment Plan

location preferred by NAC and resource the meeting appropriately.

- On 24 February 2023, NAC emailed Woodside and acknowledged receipt of Woodside's emails and advised it was yet to attend to the emails and would do so following the week 27 February 2023.
- On 9 March 2023, Woodside emailed NAC and left a phone message to follow up on the email received 24 February 2023. Woodside advised it was seeking opportunity to present an EP overview to the NAC Board and asked if there had been any progress in terms of securing a preferred day and timeslot.
- On 9 March 2023, NAC emailed Woodside to advise that the contact at NAC was unavailable to meet on 30 March 2023.
- On 9 March 2023, Woodside emailed NAC:
  - Woodside noted that during a previous meeting, NAC had advised its next Board meeting would be held on 29 and 30 March 2023 and that Woodside would be potentially assigned time on the agenda to present on either one of those days.
  - Woodside advised that this was an important opportunity to ensure the NAC Board had the opportunity to provide feedback on the EPs and if they had interests in the environment that may be affected (EMBA).
  - Woodside welcomed the suggestion of alternative days/times or ways it could provide an overview to the NAC Board.
- On 10 March 2023, NAC emailed Woodside to advise that its March Board Meeting was full with overspills from January and February and that at this stage it would need to leave the EP consultation until the April meeting.
- On 14 March 2023, Woodside emailed NAC to request the dates for the April Board meeting and to confirm the time Woodside might be allocated to present.
- On 14 March 2023, NAC emailed Woodside to advise the Board meeting was tentatively set for 29 April 2023. NAC advised this needed to be confirmed with its Board before it could commit to a time or date.
- Between 12-17 April 2023, NAC and Woodside exchanged emails with Woodside seeking confirmation of the April Board meeting date and whether Woodside would be allocated time on the agenda.
- On 17 April 2023, Woodside emailed NAC noting there had been no confirmation of an April meeting and sought advice on whether NAC had feedback in relation to the proposed activities. The email explained Woodside's plan to submit the EP and that it was seeking pre-submission feedback, noting that feedback could be provided for the life of the EP. Woodside sought an email supporting the approach and also looked forward to meeting in future.
- On 20 April 2023, NAC emailed Woodside noting that the next Board meeting would be 26 April 2023 and asked whether Woodside would still like to attend.
- On 20 April 2023, NAC emailed Woodside requesting any documentation for the Board meeting packs.
- On 20 April 2023, Woodside emailed NAC confirming that Woodside would appreciate time to present at the Board meeting.
- **(2)** On 20 April 2023, NAC emailed Woodside acknowledging receipt of the materials and asked questions regarding an unrelated EP. NAC stated that it was supportive of decommissioning activities.
- On 21 April 2023, NAC emailed Woodside to advise that there was no time for Woodside on the April Board Meeting agenda, but time would be set aside in May, with a tentative date of 17 May 2023.

## Stybarrow Plug and Abandonment Environment Plan

- On 21 April 2023, Woodside thanked NAC for its response.
- On 26 April 2023, Woodside emailed NAC additional information unrelated to this EP and re-iterated that Woodside would like to meet to talk about activity in further detail.
- On 28 April 2023, Woodside emailed NAC advising that the next step was for the EP to be submitted but no feedback had been received to date. The email stated that before Woodside submits, Woodside sought to understand whether there were any issues or concerns regarding the proposed activities that needed to be reflected in the EP.
- On 10 May 2023, NAC replied to Woodside stating that it was supportive of EP submissions unrelated to this EP and looked forward to ongoing consultation.
- On 12 May 2023, NAC emailed Woodside to advise Woodside had been allocated a one hour window in the NAC Board Meeting on 17 May 2023.
- On 17 May 2023, Woodside presented to the NAC Board of Directors in Karratha. Woodside:
  - Described the EP framework, referring to the *Offshore Petroleum and Greenhouse Gas Storage Act* (Environment) Regulations, NOPSEMA's role as Regulator and general contents of EPs.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which would be open for consultation in 2023.
  - Provided an overview of the broader EP activities.
  - Described the proposed activity, noting that it included removing equipment and a section of the pipeline and explained that some buried equipment would be left *in situ*.
  - Described the types of vessels involved.
  - Described the planned impacts and respective controls of the above activities including the presence of vessels, seabed disturbance, underwater noise, discharge from vessels, emissions to air and external lighting.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks were not expected to occur and were unlikely.
  - Displayed and spoke to the EMBA for each proposed activity, and the individual worst-case loss of containment scenarios identified, noting that they were all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities or interests of NAC and the people it represented might be impacted by any of the activities.
  - Specifically asked the following:
    - How could the activities impact NAC's cultural values, interests, and activities - did protecting the environment do enough to protect NAC's cultural values?
    - What were NAC's concerns about the proposed activities and what did NAC think Woodside should do about them?
    - Was there anything NAC wanted included in the EPs before submission?
    - Was there anyone else Woodside should consult with about the activities?
  - Advised that Woodside would continue to take feedback from NAC for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should NAC desire to provide feedback directly to the Regulator.
- **(1)** At the 17 May 2023 meeting NAC asked:
  - Whether leaving equipment in place would impact the environment.
    - Woodside responded that it was better to leave buried equipment, that no harmful substances would be left, just steel and concrete.

## Stybarrow Plug and Abandonment Environment Plan

- Whether the infrastructure could be left to attract fish.
    - Woodside responded that while some of the Griffin buoys were successfully repurposed as artificial reef near Exmouth, unless it is buried all equipment is now being removed.
  - Woodside asked if there was any further feedback or questions about this activity, none were received.
- On 18 July 2023, Woodside emailed NAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.
- On 26 July 2023, Woodside emailed NAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
  - **(1)** On 11 August 2023, Woodside held a team's meeting with NAC energy adviser the following were noted:
    - Identify EPs for prioritisation.
    - NAC will put together a working group.
    - Bi-monthly consultations.
    - NAC has capacity issues and requires time to deal with matters.
- On 16 August 2023, Woodside emailed NAC requesting to re-establish regular meetings on a monthly basis with the Karratha-based Woodside contact.
- On 13 September 2023, Woodside emailed NAC acknowledging the previous email, advising of the planned start date for the activity, once again requesting if NAC is aware of any other people with whom Woodside should consult; and if there is any information NAC wish to provide on cultural values, reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).
- **(3)** On 18 September 2023, NAC emailed Woodside proposing:
  - Establishment of Joint Working Group;
  - Woodside to provide draft agreement;
  - Working group meeting commence in October with monthly meetings;
  - Noting arrangements would cover future scope of consultations with NAC.
- On 28 September 2023, a NAC representative emailed Woodside requesting a phone discussion about consultations with NAC.
- **(3)** On 28 September 2023, Woodside had a phone discussion with a NAC representative who was following up on Woodside consultation requests and wished to progress a consultation meeting with the NAC Working Group in October. The representative requested Woodside:
  - Proposed date/s to meet;
  - Confirmed Woodside would cover cost;
  - Provided any relevant information prior to the meeting;
  - Advised on which EPs it would like to consult with NAC;Woodside agreed to follow up on the above and looked forward to meeting with the Working Group in October.
- On 10 October 2023, Woodside emailed NAC in response to NAC's email of 18 September 2023, in principle supporting NAC's proposal for ongoing consultation through a Working Group. Woodside requested meeting dates and asked NAC if it would prefer that Woodside provided a first draft of the agreement.

*Stybarrow Plug and Abandonment Environment Plan*

- On 19 October 2023, Woodside emailed NAC following up on the 1 October 2023 email.
- **(3)** On 19 October 2023, NAC emailed Woodside advising it would provide a draft engagement letter in the near future. NAC also asked if there were any urgent matters pending.
- On 2 November 2023, Woodside emailed NAC outlining top priorities and listed future EPs for consultation that were unrelated to this EP, and asked for feedback from NAC.
- On 3 November 2023, Woodside emailed NAC with a future EP priority list unrelated to this EP. Woodside also asked NAC for their availability over the next two weeks.
- **(3)** On 3 November 2023, NAC emailed Woodside asking how long would it take to cover the list of EPs in a meeting. NAC also informed Woodside it would send through an engagement letter that day.
- **(3)** On 3 November 2023, NAC emailed Woodside a draft engagement protocol letter and stated it looked forward to closing out this matter and scheduling a meeting.
- Quarterly Heritage Meetings:
  - Woodside convenes a quarterly meeting of Traditional Custodian representatives from the Representative Aboriginal Corporations involved in historical native title claims over the Burrup Peninsula, including NAC. Individual attendees are nominated by their representative Aboriginal Corporations. These meetings are summarised separately in this table.
  - NAC did not nominate attendees to quarterly meetings in 2021 or the first half of 2022 but were provided with copies of the slides used.

| Summary of Feedback, Objection or Claim  | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan  |
|--|---|--|
| <p><b>(1)</b> During face-to-face engagements related to this activity and others, NAC asked:</p> <ul style="list-style-type: none"> <li>• When the activities were proposed to commence;</li> <li>• How many people crew the drill rig;</li> <li>• Whether the pipeline was covered over.</li> </ul> <p><b>(2)</b> NAC emailed Woodside on 20 April 2023, supporting submission of this EP and advised it looked forward to ongoing consultation.</p> <p><b>(3)</b> NAC proposed establishing a Joint Working Group to engage in meetings with Woodside for ongoing consultation. NAC noted it had capacity issues and required resourcing to cover costs of meeting.</p> | <p><b>(1)</b> Woodside responded to NAC requests for further information during face-to-face engagements, and no further information was requested on these topics.</p> <p><b>(2)</b> Woodside notes NAC is supportive of this EP submission.</p> <p><b>(3)</b> Separate from consultation under Reg 11A, Woodside will establish an agreement with NAC to work with the NAC Working Group. The agreement and Working Group would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff, a face-to-face meeting with appropriate material (pictures, maps, video) and project attendance allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p><b>(1)</b> Existing controls considered sufficient as described in <b>Section 7</b> and <b>8</b>.</p> <p><b>(2)</b> &amp; <b>(3)</b> Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with NAC through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (<b>Appendix J</b>).</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Nimanburr Aboriginal Corporation (Nimanburr)**

Nimanburr is established under the Native Title Act 1993 by the Nimanburr people to represent the Nimanburr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Nimanburr for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Adopted multiple modes of communication (email, phone, public information sessions and face-to-face) when consulting with Nimanburr.
- Sought direction on Nimanburr's preferred method of consultation.
- Provided Consultation Information Sheets and Consultation Summary Sheets to Nimanburr. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- No questions were asked about the activity throughout consultation on this EP.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that Nimanburr can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Nimanburr on 28 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to Nimanburr over an 8 month period.

### **Summary of information provided and record of consultation:**

Kimberley Land Council (KLC) is the nominated representative of Nimanburr.

- **(2)** On 28 February 2023, Woodside emailed Nimanburr/KLC advising of the proposed activity (Appendix F, reference 2.51) and provided a Consultation Information Sheet.
- On 28 February 2023, KLC advised it had passed Woodside's information to the relevant contact person at Nimanburr.
- **(2)** On 8 March 2023, Woodside sent a follow up email to Nimanburr/KLC with information sheets (Appendix F, reference 2.51.1).
- On 4 April 2023, Kimberley Land Council telephoned and provided Woodside with contact for Nimanburr, for Woodside to contact Nimanburr directly.

## Stybarrow Plug and Abandonment Environment Plan

- On 5 April 2023, Woodside sent a follow up email to Nimanburr/KLC to confirm whether Nimanburr may have interests impacted by proposed activities and to offer to meet in Broome the following day.
- On 3 May 2023, Woodside met with two Nimanburr members and agreed to drive to meet the Nimanburr director at the Nimanburr Dampier Peninsula block.
- **(2)** On 5 May 2023, Woodside drove to meet the Nimanburr director, on country up the Dampier Peninsula and provided hard copies of the Stybarrow Plug and Abandonment fact sheets and provided an overview of the activity.
- **(2)** On 10 May 2023, Woodside called the Nimanburr director, asking if he had any questions or concerns over the EMBA. No concerns were raised.
- On 11 May 2023, Nimanburr/KLC emailed Woodside to request a meeting and presentation at their next Board meeting.
- On 8 June 2023, Woodside emailed Nimanburr inviting them to a community information drop-in session. The email offered a separate meeting if desired, and requested the invitation be passed on to members and any other individuals.
- On 18 July 2023, Woodside emailed Nimanburr NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Nimanburr advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 6 October 2023, Woodside phone Nimanburr who invited them to visit their community on the 10 October 2023.
- On 6 October 2023, Nimanburr/KLC emailed Woodside with a formal invitation to meet and present at their Director's meeting on the 13 October 2023.
- **(2)** On 10 October 2023, Woodside met with Nimanburr in person on Country and explained two activities unrelated to this EP. Woodside asked if there were any relevant persons with whom Woodside should consult to which Nimanburr replied no. Woodside also asked how Nimanburr would like to be consulted going forward and it was agreed they would meet quarterly out on Nimanburr community.

| Summary of Feedback, Objection or Claim  | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan   |
|--|---|---|
| <p><b>(1)</b> In consultation in the course of preparing this EP since February 2023, Nimanburr has not provided feedback, objections or claims in response to the information provided.</p> <p><b>(2)</b> Nimanburr has requested Woodside present at the next Board meeting but has not communicated the date and time for this meeting yet. Nimanburr has stated they will be in contact with Woodside in the coming months with a confirmed date and time.</p> | <p><b>(1)</b> Woodside accepts that Nimanburr has no feedback on this EP.</p> <p><b>(2)</b> Sufficient information to allow informed assessment has already been provided including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members, and a face to face meeting on 5 May 2023 to which Woodside followed up soon after with a phone call, allowing opportunity to ask questions and seek further understanding on this EP.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p><b>(1)</b> Existing controls considered sufficient as described in <b>Section 7</b> and <b>8</b>.</p> <p><b>(2)</b> As identified in <b>Section 11.8</b> of this EP, Woodside will continue to consult following acceptance of the EP, as requirement by the implementation strategy as set out regulation 14(9) of the Environment Regulations.</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Nyul Nyul PBC Aboriginal Corporation (NNAC)**

NNAC is established under the Native Title Act 1993 by the Nyul Nyul people to represent the Nyul Nyul people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with NNAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Adopted multiple modes of communication (email, phone, public information sessions and face-to-face) when consulting with NNAC
- Sought direction on NNAC's preferred method of consultation.
- Provided Consultation Information Sheets and Consultation Summary Sheets to NNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- No questions were asked about the activity throughout consultation on this EP.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that NNAC can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to NNAC on 28 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to NNAC over an 8-month period.

### **Summary of information provided and record of consultation:**

Kimberley Land Council is the nominated representative of NNAC.

- **(2)** On 28 February 2023, Woodside emailed NNAC/KLC advising of the proposed activity (Appendix F, reference 2.52) and provided a Consultation Information Sheet.
- On 28 February 2023, KLC advised it had passed Woodside's information to the relevant contact person at NNAC.
- On 4 April 2023, KLC phoned and provided Woodside with NNAC contact details for Woodside to contact NNAC directly.
- **(2)** On 5 April 2023, Woodside sent a follow up email to confirm whether NNAC may have interests impacted by proposed activities and to request to meet whilst currently in Broome.
- On 5 April 2023, NNAC nominated contact person emailed Woodside that they had forwarded Woodside email to chairperson and other directors and asked that they set up a meeting.

## *Stybarrow Plug and Abandonment Environment Plan*

- On 5 April 2023, Woodside emailed asking if any of NNAC directors resided in Broome and offered to drive up the Dampier Peninsula on 6 April to meet NNAC directors and members.
- On 6 April 2023, NNAC nominated contact person emailed Woodside with contact for a Broome based director.
- **(2)** On 11 April – 13 April 2023, Woodside called NNAC director based in Broome four times seeking a meeting, phone rang out on all calls.
- On 26 April 2023, Woodside called NNAC nominated contact, however the phone was disconnected.
- On 26 April 2023, Woodside emailed nominated NNAC contact, however received message advising contact email in box was full and could not be delivered.
- On 26 April 2023, Woodside called NNAC Broome based director advising Woodside would be visiting West Kimberley 1 - 5 May 2023 and wanted to meet. Director explained it would be best to meet with all directors and they would try and coordinate meeting. Woodside advised they were happy to drive to Beagle Bay for meeting if most directors resided in Beagle Bay.
- On 2 May 2023, Woodside called NNAC director for details on directors meeting but was advised they were unable to coordinate a directors meeting.
- **(2)** On 10 May 2023, Woodside called Beagle Bay Community office twice with no answer.
- **(2)** On 15 May 2023, Woodside called Beagle Bay Community office with no answer.
- On 25 May 2023, Woodside phoned NNAC to seek a meeting time, NNAC invited Woodside to a meeting on 14 June 2023 to speak to Directors and members. Woodside accepted the invitation.
- **(2)** On 7 June 2023, Woodside emailed NNAC with information about community information drop-in sessions to be held in Broome, Derby and Kununurra.
- **(2)** On 14 June 2023, Woodside travelled to Beagle Bay to a pre-arranged meeting with NNAC at their invitation. On arrival Woodside were told the agenda was full and were informed they may be placed on a Board meeting Agenda in August.
- On 20 July 2023, Woodside emailed NNAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- **(2)** On 9 September 2023, Woodside emailed NNAC advising of the planned start date for the activity. Woodside also once again requested if NNAC is aware of any other people with whom Woodside should consult, and if there is any information NNAC wishes to provide on cultural values and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.83).
- On 10 October 2023, Woodside emailed NNAC/KLC requesting an opportunity to meet with NNAC and consult on EPs, informing that they are happy to pay reasonable sitting costs.
- On 26 October 2023, NNAC/KLC emailed Woodside thanking them for their email and informed Woodside that the NNAC Board would like to meet for a consultation workshop.
- On 1 November 2023, Woodside emailed NNAC/KLC and responded that they would be happy to coordinate and fund the consultation workshop and requested a 3-4 hour time slot.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>(2) On 6 November 2023, NNAC/KLC emailed Woodside informing that they would seek confirmation from NNAC but that Woodside should expect a meeting date around February 2024.</li> </ul>  |   |   |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with NKAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to NKAC on 24 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to NKAC over an 8-month period.

The Nyangumarta Karajarri Aboriginal Corporation's nominated contact representative as listed under the Office of the Registrar of Indigenous Corporations, and the General Report 2021 published 25/5/22 is the Kimberley Land Council with listed email address. Woodside therefore directs correspondence through this channel in accordance with NKAC preference.

### **Summary of information provided and record of consultation:**

- On 24 February 2023, Woodside emailed NKAC advising of the proposed activity (Appendix F, reference 2.53) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email followed on from previous correspondence on other activities and requested NKAC to inform Woodside if there is anything else that could be done to facilitate consultation.
- On 24 February 2023, KLC advised via phone that the information had been forwarded to NKAC directors for their consideration.
- On 24 March 2023, Woodside emailed NKAC/KLC following up on the information sent through in relation to the proposed activity and seeking feedback offering in person discussions at any time suitable to the organisation (Appendix F, reference 2.53.1).
- On 24 March 2023, Woodside emailed KLC thanking it for its assistance.
- On 18 April 2023, Woodside emailed NKAC/KLC following up on the information sent through in relation to the proposed activity and seeking feedback, noting that Woodside had not been contacted by directors yet.
- On 18 April 2023, the KLC representative emailed Woodside, advised that its duties as contact person had been discharged and that it was up to the directors to manage consultation in the future, and that they would be considering Woodside's communication.
- On 28 April 2023, Woodside emailed NKAC/KLC and included the email chain demonstrating efforts to engage and noted that the next step was for the EP for the proposed activity to be submitted to NOPSEMA for technical assessment. The email stated that the EP submission was imminent and requested any feedback as a priority to reflect in this submission, noting that feedback was also welcome over the life of the EP.
- On 24 July 2023, Woodside emailed NKAC/KLC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NKAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 25 July 2023, KLC emailed Woodside to confirm receipt of email and that correspondence was passed on to the relevant group for consideration.
- On 26 July 2023, Woodside emailed NKAC/KLC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 9 September 2023, Woodside emailed NKAC/KLC enclosing the activity Summary Information Sheet (Appendix F, reference 2.81), and requested an opportunity to meet NKAC/KLC noting Woodside's offer to fund consultation activities. Woodside requested NKAC/KLC confirm a) if they were aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not as yet been

Woodside invited further feedback in accordance with Woodside’s approach to ongoing consultation (<b>see Section 11.8</b>).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (<b>see Section 11.7</b>).</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on NKAC’s functions, interests or activities.</p> <p>Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with NKAC through ongoing engagement as outlined in <b>Section 11.8</b>.</p> <p>Based on the engagement to date, no additional controls have been identified.</p> |
| <p><b>Nyangumarta Warrarn Aboriginal Corporation (NWAC)</b></p> <p>NWAC is established under the Native Title Act 1993 by the Nyangumarta people to represent the Nyangumarta people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |  |  |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with NWAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to NWAC on 24 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to NWAC over an 8 month period.

**Summary of information provided and record of consultation:**

- On 24 February 2023, Woodside emailed NWAC advising of the proposed activity (Appendix F, reference 2.54) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email followed on from previous correspondence on other activities and requested NWAC to inform Woodside if there was anything else that could be done to facilitate consultation.
- On 24 March 2023, Woodside emailed NWAC following up on previous emails and seeking to make further contact. The email requested NWAC inform Woodside if there was anything else that could be done to facilitate consultation.
- On 18 April 2023, Woodside left a voice mail and emailed Yamatji Marlpa Aboriginal Corporation (YMAC), asking whether they had an alternative contact for NWAC. No response was received.
- On 28 April 2023, Woodside emailed NWAC including the email chain demonstrating efforts to engage and noted that the next step was for the EP for the proposed activity to be submitted to NOPSEMA for technical assessment. The email stated the EP submission was imminent and requested any feedback was a priority to reflect in this submission, noting that feedback was also welcome over the life of the EP.
- On 18 July 2023, Woodside emailed NWAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that NWAC advised Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 25 July 2023, NWAC (via YMAC) emailed Woodside acknowledging receipt of correspondence and informing Woodside that the YMAC legal team member would make contact.
- On 25 July 2023, Woodside emailed YMAC to confirm receipt of the email and identified two methods of contact.
- On 26 July 2023, Woodside emailed NWAC (via YMAC) Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- On 9 September 2023, Woodside emailed NWAC (via YMAC) enclosing the activity Summary Information Sheet (Appendix F, reference 2.81), and requested an opportunity to meet with NWAC and noted Woodside’s offer to fund consultation activities. Woodside requested NWAC confirm a) if they were aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and b) if there was any information they wished to provide on cultural features and/or heritage values.
- On 11 October 2023, Woodside emailed an alternative NWAC contact seeking a meeting.
- On 18 October 2023, Woodside emailed an alternative YMAC contact seeking an opportunity to speak to the contact person for NWAC.

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with RRKAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### Sufficient Information:

- Woodside sought direction on RRKAC's preferred method of consultation. This resulted in a face-to-face meeting being coordinated at the location of RRKAC's choosing, with RRKAC nominated representatives. This meeting included information that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to RRKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, RRKAC has displayed an understanding of the activities under this Environment Plan
- Advised that RRKAC could request the particular information provided in the consultation not be published (to align with 11A(2)(4)).

### Reasonable Period:

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to RRKAC on 15 February 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to RRKAC over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked RRKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. RRKAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on RRKAC's functions, interests or activities.

### Summary of information provided and record of consultation:

- On 24 February 2023, Woodside emailed RRKAC advising of the proposed activity (Appendix F, reference 2.66) and provided a Consultation Information Sheet and to confirm an already proposed February 2023 meeting (from previous discussions on unrelated EPs). Woodside noted it is seeking RRKAC's feedback as soon as possible on the proposed activity.
- On 9 March 2023, RRKAC responded and advised that the interests of RRKAC people are best served through the joint Heritage Advisory Committee (HAC) that is required under Yaburara Mardudhunera and Kuruma Marthudhunera Indigenous Land Use Agreement. RRKAC included Wirrawandi AC into the email as they are

## Stybarrow Plug and Abandonment Environment Plan

required to facilitate the Committee.

- Between 15-17 March 2023, Woodside exchanged email correspondence with RRKAC (and WAC) in relation to establishing a meeting with the joint Heritage Advisory Committee. The meeting was confirmed for 31 March 2023.
- **(1)** On 31 March 2023, Woodside met with the Robe River Kuruma and Wirrawandi Joint Heritage Advisory Committee (HAC) in Karratha:
  - Woodside described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Woodside encouraged HAC to raise anything which they feel is missing in the information provided during the meeting, or any issues or concerns.
  - Woodside displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
  - Woodside gave an overview of the need for decommissioning and how it generally involves removing infrastructure from the environment when it's no longer needed, unless there is a better environmental outcome from leaving it in place.
  - Woodside explained the proposed activity and how wells are plugged and abandoned.
  - Woodside explained planned and unplanned environmental risks and impacts for decommissioning activities, noting that the worst-case consequence for the activity is a diesel spill from a vessel collision. Woodside gave an overview of emergency spill response planning.
  - RRKWAC mentioned mangroves as a concern. Woodside explained that plans are drawn up for protecting sensitive areas in the event of a spill.
  - RRKWAC asked whether Woodside are talking to other people with regards to EPs. Woodside advised that we are talking to every Aboriginal corporation under Native Title and ILUA from Port Hedland to Shark Bay for these activities.
  - Woodside asked whether RRKWAC had any further questions or feedback on decommissioning activities, none were received.
- On 3 May 2023, Woodside emailed a letter to RRKAC:
  - Woodside thanked HAC for the meeting, their careful consideration of the matters and feedback provided.
  - Woodside acknowledged that RRKAC and WAC (represented together as HAC) have interests in the EMBA and noted that we want to ensure impacts are as minimal as reasonably practicable.
  - A high-level overview of presented topics was provided.
  - Woodside provided responses to questions noted from the meeting that were not related to the proposed activity.
  - Woodside notified that the feedback and the letter will be included in Environment Plans that will be submitted to NOPSEMA.
  - **(2) and (3)** Woodside noted that during the meeting the joint HAC of RRKAC and WAC expressed a desire for ongoing engagement and partnership .and stated that Woodside looks forward to meeting again so that actions to support RRKAC (and WAC) can be put in place
- On 18 July 2023, Woodside emailed RRKAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that RRKAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed RRKAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 11 August 2023, RRKAC emailed Woodside in response to another matter and in addition requesting ongoing consultation and training opportunities for rangers to prepare rangers for caring for sea and coastal country.

*Stybarrow Plug and Abandonment Environment Plan*

- On 14 August 2023, Woodside emailed RRKAC thanking them for their response and requesting to meet to discuss training opportunities for rangers.
- On 14 August RRKAC emailed Woodside agreeing to a meeting and indicating they would arrange a suitable time for a discussion.
- On 11 September 2023, Woodside emailed RRKAC acknowledging the previous email, advising of the planned start date for the activity, and once again requesting if RRKAC is aware of any other people with whom Woodside should consult, and if there is any information RRKAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. Woodside confirmed an internal meeting taking place in October 2023 to discuss Jajiwurra Rangers. The Summary Information Sheet for this activity was attached (Appendix F, reference 3.43.1).
- **(2)** On 15 September 2023, RRKAC emailed Woodside advising they have noted Woodside’s plans, and that they aren’t resourced to adequately respond, and would require Woodside to fund additional resources.
- **(2)** On 18 September 2023, Woodside sent two emails to RRKAC clarifying that Woodside can provide funding to support consultation activities and requested RRKAC provide quotes and attached a Proposed Program of Ongoing Engagement with Traditional Custodians. An email was also sent from our SAP system a vendor onboarding process. No response has been received.

|---|---|-------------------------------|
|---|---|-------------------------------|

*Stybarrow Plug and Abandonment Environment Plan*

|   |  |   |
|---|--|---|
| <p>(1) During face-to-face engagement related to this activity and others, RRKAC/HAC requested further information on topics related to this proposed activity which was responded to during the meeting:</p> <ul style="list-style-type: none"> <li>• Protection of mangroves in the event of a spill</li> <li>• Whether Woodside is talking to other people as part of consultation</li> </ul> <p>(2) RRKAC noted that they are insufficiently resourced to fully engage and respond regarding EPs.</p> <p>(3) RRKAC/HAC expressed a desire for ongoing engagement and partnership.</p> | <p>(1) Woodside responded to RRKAC/HAC's requests for further information during face-to-face engagements, and no further information was requested on these topics.</p> <p>(2) Woodside supports ongoing engagement and have responded to RRKACs advice about the limitations on their resources. Woodside has offered to support RRKAC in correspondence sent on May 3, 2023 and September 2023, however these offers have not been taken up. As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of Reg 11A is complete. Any further engagement with and support offered to RRKAC will be for the purpose of ongoing engagement.</p> <p>(3) Woodside has assessed the Program of Ongoing Engagement with Traditional Custodians will support ongoing consultation with RRKAC and address appropriate support for resourcing, separate from consultation under Reg 11A, Sufficient information to allow informed assessment has already been provided, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members, and a face to face meeting on 31 March 2023 for which Woodside met RRKAC's costs, with appropriate material (pictures, maps, videos) and project attendance allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7 and 8</b>.</p> <p>(2) &amp; (3) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with RRKAC through ongoing engagement and continue to progress with establishing a Framework Agreement as part of Woodside's Program of Ongoing Engagement with Traditional Custodians (<b>Appendix J</b>). This includes addressing RRKAC's resourcing issue for ongoing consultation via a Framework Agreement.</p> |
| <p><b>Wanparta Aboriginal Corporation (Wanparta)</b></p> <p>Wanparta is established under the Native Title Act 1993 by the Ngarla people to represent the Ngarla people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>  |  |   |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Wanparta for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on Wanparta's preferred method of consultation. This resulted in a face-to-face meeting being coordinated at a location of Wanparta's choosing, with Wanparta nominated representatives. This meeting included information that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheet and Consultation Summary Sheets to Wanparta. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, Wanparta has displayed an understanding of the activities under this Environment Plan.
- Advised that Wanparta can request that particular information provided in the consultation not be published (to align with 11A(2)(4)).

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Wanparta on 24 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to Wanparta over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked Wanparta if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. Wanparta has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see **Section 11.7** of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wanparta functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 24 February 2023, Woodside emailed Wanparta advising of the proposed activity (Appendix F, reference 2.56) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Wanparta and its members may have within the EMBA and information on how Wanparta would like to engage.
- On 2 March 2023, Wanparta emailed Woodside to state that all information had been received and passed to the Directors for comment.

## *Stybarrow Plug and Abandonment Environment Plan*

- On 24 March 2023, Woodside emailed Wanparta asking whether the Directors have any questions or have advised whether they wish to discuss further. An offer of phone discussion, online or in person meeting was made.
- On 27 March 2023, Wanparta contacted Woodside via email to clarify that the Directors had not provided any questions or feedback.
- On 18 April 2023, Woodside emailed Wanparta following up on previous emails and seeking to make further contact, asking for advice on how Wanparta would like to engage
- On 28 April 2023, Woodside emailed Wanparta including the email chain demonstrating efforts to engage and notifying that the next step is for the EP for the proposed activity to be submitted to NOPSEMA for technical assessment. It stated that the EP submission is imminent and requested any feedback as a priority to reflect in this submission, noting that feedback is also welcome over the life of the EP.
- On 6 July 2023, Woodside emailed Wanparta following up on various EPs noting that Woodside would happily meet with the Wanparta board and members to provide a complete overview of all planned activities.
- On 18 July 2023, Woodside emailed Wanparta NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Wanparta advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 21 July 2023, Wanparta emailed Woodside noting they were planning two Board meetings in order to hear from the multiple proponents that have identified Wanparta as Relevant Persons, inviting Woodside to present at one of these meetings.
- Between 24 July 2023 and 25 July 2023, various communication was swapped to set up consultation meeting and to add other unrelated EPs to the agenda.
- On 26 July 2023, Woodside emailed Wanparta Woodside's planned Program of Ongoing Engagement with Traditional Custodians, confirming Woodside's preference to attend the 31 August 2023 board meeting.
- **(3)** On 31 August 2023, Woodside met with Wanparta Board and members in South Hedland to consult on 3 other Environment Plans, Woodside:
  - Described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Provided an overview of the broader EP activities.
  - Noted the Stybarrow P&A activity as a previous activity for consultation.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Stated that Woodside wanted to understand how the functions, activities or interests of Wanparta and the people it represents may be impacted by any of those activities.
  - Specifically asked the following:
    - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - Advised that Woodside will continue to take feedback from Wanparta for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should Wanparta desire to provide feedback directly to the regulator.
- **(1) (3)** At the 31 August 2023 meeting Wanparta asked/noted:

*Stybarrow Plug and Abandonment Environment Plan*

| <p>(1) During face-to-face engagement related to this activity and others, Wanparta requested further information on topics related to this proposed activity which was responded to during the meeting:</p> <ul style="list-style-type: none"> <li>• What remains after decommissioning.</li> <li>• What chemicals in the water may be discharged during commissioning?</li> <li>• The importance of water was emphasised by the group.</li> </ul> <p>(2) Wanparta expressed interest in a range of social investment opportunities including a ranger program. Wanparta stated their interest in ongoing engagement with Woodside.</p> <p>(3) Wanparta advised that one of the family groups was not represented at the 31 August meeting, but the absent family group would be brought up to speed following the meeting.</p> | <p>(1) Woodside responded to Wanparta's requests for further information during face-to-face engagements, and no further information was requested on these topics.</p> <p>(2) Separate from consultation under Reg 11A, Woodside has commenced discussion with Wanparta about social investment opportunities as part of ongoing engagement.</p> <p>(3) Woodside notes Wanparta's advice that one family group was not at the 31 August meeting, and that those present at the meeting will share the information with the absent family group.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7 and 8</b>.</p> <p>(2) &amp; (3) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with Wanparta through ongoing engagement and will send them Start of Activity Notifications as they requested to be kept informed of progress in relation to proposed activities (<b>Section 11.8 and Table 11-5</b> of the EP).</p> |
| <p><b>Wilinggin Aboriginal Corporation</b></p> <p>Wilinggin Aboriginal Corporation is established under the Native Title Act 1993 by the Ngarinyin people to represent the Ngarinyin people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>   |   |  |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Wilinggin Aboriginal Corporation for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to WAC on 24 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to WAC over an 8-month period.

**Summary of information provided and record of consultation:**

- On 24 February 2023, Woodside emailed Wilinggin advising of the proposed activity (Appendix F, reference 2.57) and provided a Consultation Information Sheet.
- On 8 March 2023, Woodside sent a follow up email to enquire whether there were any concerns with the information and whether Wilinggin wanted to meet to discuss the activity (Appendix F, reference 2.57.1).
- On 9 March 2023, Wilinggin acknowledged receiving the information sent on 24 February 2023 by phone.
- On 5 April 2023, Woodside spoke with the newly appointed GM for Wilinggin, who advised that KLC would respond on behalf of Wilinggin, Dambimangari AC and Wunambal Gaambera (WGAC) and suggested the response was about to occur.
- On 7 June 2023, Woodside emailed Wilinggin to forward an invitation to a community information drop-in session. The email requested the invitation be passed on to members and any other individuals.
- On 7 June 2023, Wilinggin sent a text message to Woodside confirming receipt of the invitation to the community information sessions.
- On 18 and 20 July 2023, Woodside emailed NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information to two different Wilinggin contacts. This email also reiterated Woodside's request that Wilinggin advised Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 9 September 2023, Woodside emailed Wilinggin and enclosed the activity Summary Information Sheet, and requested an opportunity to meet with Wilinggin and noted Woodside's offer to fund consultation activities. Woodside requested Wilinggin confirm a) if they were aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and b) if there was any information they wished to provide on cultural features and/or heritage values.
- On 11 and 13 October 2023, Woodside emailed two different Wilinggin contacts seeking an opportunity to meet and discuss EPs.

Woodside invited further feedback in accordance with Woodside's approach to ongoing consultation (see <b>Section 11.8</b>).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on Wilinggin's functions, interests or activities.</p> <p>As identified in <b>Section 11.8</b> of this EP, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in regulation 14(9) of the Environment Regulations.</p> <p>Based on the engagement to date, no additional controls have been identified.</p> |
| <p><b>Wirrawandi Aboriginal Corporation (WAC)</b></p> <p>WAC is established under the Native Title Act 1993 by the Mardudhunera and Yaburara people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values</p> |  |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Wirrawandi Aboriginal Corporation for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on WAC's preferred method of consultation. This resulted in a face-to-face meeting being coordinated at a location of WAC's choosing. This meeting included information that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheets and Consultation Summary Sheets to WAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, WAC have displayed an understanding of the activities under this Environment Plan.
- Advised that WAC could request the particular information provided in the consultation not be published (to align with 11A(2)(4))

### **Reasonable Period:**

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to WAC on 24 February 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to WAC over 8 months, demonstrating a "reasonable period" of consultation.
- Woodside asked WAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. WAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WAC's functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 21 February 2023, Woodside spoke with WAC to discuss a consultation meeting.
- On 24 February 2023, Woodside emailed WAC advising of the proposed activity (Appendix F, reference 2.58) and provided a Consultation Information Sheet. Woodside noted it is seeking WAC's feedback as soon as possible on the proposed activity. Woodside also requested confirmation of the opportunity to meet with the WAC Board when they were next due to meet in Perth in March.

## *Stybarrow Plug and Abandonment Environment Plan*

- On 24 February 2023, WAC responded acknowledging Woodside's email and advised that a meeting was yet to be finalised and that further details and associated costs would be discussed once the meeting had been confirmed.
- On 7 March 2023, WAC provided a formal quote, draft agenda and a meeting date of 23 March 2023.
- On 7 March 2023, Woodside responded thanking WAC for sending through the quote
- On 7 March 2023, Woodside emailed WAC following up on the 23 March meeting date.
- On 8 March 2023, Woodside phoned WAC and agreed to proceed with the meeting.
- On 9 March 2023, RRRKAC copied WAC into an email to Woodside to advise the environment impacts of this EP and other unrelated EPs have been discussed with the Robe River Kuruma Heritage Council and they have recommended that the interests of Robe River Kuruma people are best served through the joint Heritage Advisory Committee that is required under Yaburara Mardudhunera and Kuruma Marthudunera Indigenous Land Use Agreement. The email advised Wirrawandi is required to facilitate this committee.
- On 15 March 2023, Woodside sent a follow up email to confirm details of the meeting on 23 March 2023.
- On 15 March 2023, WAC responded providing details of the date, time, venue, intent and agenda of the meeting on 23 March 2023.
- On 16 March 2023, WAC emailed Woodside regarding the Joint Heritage Advisory Group meeting on 31 March 2023 confirming conference room booking in Karratha.
- On 17 March 2023, Woodside responded and confirmed the relevant representation would provide the suite of EP information overviews and cover the broader community activity for awareness.
- On 17 March 2023, WAC responded and requested a dedicated meeting to address Cultural Capture, WAC Commercial and Fuel supply opportunity. WAC requested to meet week of the 29 March 2023.
- On 20 March 2023, Woodside responded confirming meeting arrangements for 29 March 2023.
- On 23 March 2023, WAC confirmed its attendance at the meeting on 29 March 2023.
- **(1)** On 23 March 2023, Woodside presented to a meeting of the WAC Board and Elders in Perth. Woodside:
  - Described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
  - Provided an overview of the broader decommissioning activities.
  - Described the proposed activity, explaining how an understanding of the environment and receptors is key to understanding it and how controls are put in place to minimise all impacts.
  - Described the types of vessels involved.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for each proposed decommissioning activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities or interests of WAC PBC and the people it represents may be impacted by any of those activities.
  - Specifically asked the following:
    - How could these activities impact your cultural values, interests and activities - does protecting the environment do enough to protect your cultural values?

## Stybarrow Plug and Abandonment Environment Plan

- What are your concerns about the proposed activities and what do you think we should do about them?
- Is there anything you would like included in the EPs before submission?
- Is there anyone else Woodside should consult with about the activities?
- Advised that Woodside will continue to take feedback from WAC for the life of the EP.
- Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should WAC desire to provide feedback directly to the regulator.
- (1) At the 23 March meeting:
  - WAC asked how much planning for decommissioning is done in early phases of the project.
    - Woodside responded that there wasn't much for this facility, but it's now required that every new project has a full decommissioning plan before installation of plants.
  - WAC asked how spills are prevented and how they are contained,
    - Woodside responded by outlining preventative and mitigative controls.
  - WAC asked whether Woodside has had any major spills,
    - Woodside responded that they have had no major spills and that it has learnt from spills of other operators.
  - WAC asked whether activities could be stopped during whale migration,
    - Woodside responded that it is not planned and explained controls to limit potential impacts on whales.
  - WAC asked about potential noise impact on whale communication.
    - Woodside responded that controls have been put in place to reduce this risk.
  - WAC asked whether the turtle monitoring program is still in place.
    - Woodside responded that it is.
  - WAC asked whether diesel would be on the surface only,
    - Woodside responded that if there was a diesel spill there would be a slick, but diesel would also go into the water column and potentially stay above ecological threshold for weeks. If there was a real incident our modelling using actual data could predict where it would go, and we could use scientific monitoring to determine impacts.
  - WAC stated that this kind of information sharing is important, and that Woodside's time was appreciated and whether this type of information is broadly available to the community,
    - Woodside responded that there are a number of open community sessions available in the region where it could be discussed.
  - WAC indicated that since they are engaging with a number of energy industry operators, they will consider the information provided and discuss internally before any further
- On 24 March, Woodside responded thanking WAC for the meeting and proposed a venue and time for the next meeting.
- On 24 March 2023, WAC responded thanking Woodside for the meeting and accepted the invite for the next meeting.
- On 24 March 2023, Woodside responded thanking WAC for its email.
- (1) On 31 March 2023, Woodside met with the Robe River Kuruma and Wirrawandi Joint Heritage Advisory Committee (**HAC**) in Karratha:
  - Woodside described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Woodside encouraged HAC to raise anything which they feel is missing in the information provided during the meeting, or any issues or concerns.

## Stybarrow Plug and Abandonment Environment Plan

- Woodside displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
- Woodside gave an overview of the need for decommissioning and how it generally involves removing infrastructure from the environment when it's no longer needed, unless there is a better environmental outcome from leaving it in place.
- Woodside explained the proposed activity and how wells are plugged and abandoned.
- Woodside explained planned and unplanned environmental risks and impacts for decommissioning activities, noting that the worst-case consequence for the activity is a diesel spill from a vessel collision. Woodside gave an overview of emergency spill response planning.
- Woodside explained planned and unplanned environmental risks and impacts for decommissioning activities, noting that the worst-case consequence for the activity is a diesel spill from a vessel collision. Woodside gave an overview of emergency spill response planning.
- **(1)** On 3 May 2023, Woodside emailed a letter to WAC regarding the meeting with HAC on 31 March:
  - Woodside thanked HAC for the meeting and their careful consideration of the matters and feedback provided.
  - Woodside acknowledged that both WAC and RRKAC (represented together as HAC) have interests in the EMBA and noted that Woodside want to ensure impacts are as minimal as reasonably practicable.
  - A high-level overview of presented topics was provided.
  - Woodside provided responses to matters raised during the meeting that were not related to the proposed activity.
  - Woodside noted that feedback and the letter from WAC will be included in Environment Plans that will be submitted to NOPSEMA.
- On 18 July 2023, Woodside emailed WAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that WAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed WAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 3 August 2023, WAC emailed Woodside requesting a map of relevant Commonwealth and State EMBAS.
- On 10 August 2023, Woodside emailed WAC providing a list (as requested by WAC) of current and pending EPs.
- On 10 August 2023, WAC emailed Woodside with thanks for the information and with a query about EMBAs.
- On 15 August 2023, Woodside emailed WAC providing an explanation of the query in relation to EMBAs and EMBA development.
- On 15 August 2023, WAC emailed Woodside with thanks for the clarification and noting they would provide a formal response shortly.
- **(3)** On 31 August 2023, WAC emailed a letter to Woodside proposing a framework agreement to provide a streamlined, formalised approach to consultation between WAC and Woodside. This included a list of activities that WAC is to be consulted on including this one.
- On 11 September 2023, Woodside emailed WAC acknowledging the previous email, advising of the planned start date for the activity, and once again requesting if WAC is aware of any other people with whom Woodside should consult, and if there is any information WAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).
- **(3)** On 11 September 2023, WAC emailed Woodside with a copy of the letter of 31 August, advising that WAC does not object to Woodside progressing environment plans for the activities outlined on the proviso that Woodside and WAC enter into a framework agreement to provide for ongoing meaningful consultation with WAC and YM members in relation to activities the subject of EPs, as outlined in the attached letter on terms suitable to both parties within a reasonable period (nominally within the next 2-3 months).
- **(3)** On 12 September 2023, Woodside emailed WAC confirming receipt of the email of 11 September.
- On 28 September 2023, Woodside emailed WAC informing them who their focal point is.
- **(3)** On 3 October 2023, WAC emailed Woodside requesting a catch up.
- On 3 October 2023, Woodside emailed WAC suggesting dates during October to meet up.
- On 3 October 2023, WAC emailed Woodside confirming availability on suggested dates.

*Stybarrow Plug and Abandonment Environment Plan*

- On 3 October 2023, Woodside emailed WAC confirming dates and meeting location.
- On 20 October 2023, Woodside and WAC met in Perth. Meeting was held with the new CEO and Chairperson to discuss current EPs and how parties intend to support each other through the process. Confirmed WAC's preferred EP consultation process and discussed recent correspondence between previous CEO and Woodside. WAC confirmed they are going to address all open EPs as a matter of priority. Noted the WAC AGM is taking place in approx. 10 days.

Quarterly Heritage Meetings:

- Woodside convenes a quarterly meeting of Traditional Custodian representatives from the Representative Aboriginal Corporations involved in historical native title claims over the Burrup Peninsula, including WAC. Individual attendees are nominated by their representative Aboriginal Corporations. These meetings are summarised separately in this table.
- Copies of slides are made available to representative Aboriginal Corporations for the general awareness of members who were not able to attend individual meetings.

| Summary of Feedback, Objection or Claim | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |
|---|---|-------------------------------|
|---|---|-------------------------------|

*Stybarrow Plug and Abandonment Environment Plan*

|  |   |  |
|--|---|--|
| <p>(1) During face-to-face engagements related to this activity and others, the WAC Board requested further information on topics related to this proposed activity which were responded to during the meeting:</p> <ul style="list-style-type: none"> <li>• Early planning of decommissioning</li> <li>• Emergency preparedness</li> <li>• The relevance of the EMBA to consultation</li> <li>• Whether activities stop during whale migration.</li> <li>• Potential impacts on whales.</li> <li>• Whether a diesel spill would only be on the surface.</li> <li>• How long diesel stays in the environment.</li> <li>• What happens if something is dropped into the ocean.</li> <li>• How soon is a spill responded to.</li> <li>• Whether the turtle monitoring program is still in place.</li> </ul> <p>(2) WAC expressed a general interest in whales. Woodside discussed controls protecting whales from an ecological perspective during meetings in which they were raised, no further feedback or comment was received on these topics.</p> <p>(3) WAC expressed that it does not object to Woodside progressing the proposed activity on the provision that Woodside and WAC enter into a framework agreement to provide for ongoing meaningful consultation a desire for ongoing engagement and partnership through a Framework Agreement.</p> | <p>(1) Woodside responded to WAC's requests for further information during face-to-face engagements, and no further information was requested on these topics.</p> <p>(2) Woodside assessed WAC's interest in whales to represent potential cultural values.</p> <p>(3) Woodside has confirmed and accepts that WAC is seeking to establish a framework agreement for the purposes of ongoing consultation with Woodside.</p> <p>Separate from consultation under Reg 11A, Woodside will establish a framework agreement with WAC. The agreement will be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff, a face-to-face meeting with appropriate material (pictures, maps, video) and project attendance allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. ## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with WWAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in **Section 5.5** of the EP. Specifically:

### Sufficient Information:

- Provided Consultation Information Sheet and Consultation Summary Sheets to WWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Sought direction on WWAC's preferred method of consultation.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside sought direction on WWAC's preferred method of consultation. This resulted in a face-to-face meeting being coordinated at a location of WWAC's choosing. This meeting included information that was readily accessible and appropriate.

### Reasonable Period:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to WWAC on 28 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to WWAC over an 8 month period, demonstrating a "reasonable period" of consultation.

Woodside asked WWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see **Section 11.7** of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WWAC's functions, interests or activities.

### Summary of information provided and record of consultation:

Kimberley Land Council (KLC) is the nominated Representative of WWAC.

- **(1)** On 28 February 2023, Woodside emailed KLC advising of the proposed activity (Appendix F, reference 2.59) and provided a Consultation Information Sheet.
- **(2)** On 28 February 2023 KLC advised it had passed Woodside's information to the relevant contact person at WWAC.
- **(2)** On 4 April 2023, KLC advised Woodside (in person) they would remain as the nominated contact person for WWAC.
- On 5 April 2023, Woodside sent a follow up email to KLC as the nominated WWAC contact person to confirm whether WWAC may have interests impacted by proposed activities (Appendix F, reference 2.59.1).

*Stybarrow Plug and Abandonment Environment Plan*

- On 6 April 2023 KLC responded to Woodside to advise the email regarding the proposed activity had been sent to the relevant contact person at WWAC.
- (1) On 8 June 2023, Woodside emailed KLC as the nominated focal point for WWAC to forward an invite to WWAC to a community information drop-in session. The email requested the invitation be passed on to members and any other individuals that may be relevant.
- On 18 July 2023, Woodside emailed KLC to request information be passed on to WWAC about NOPSEMA publications.
- On 19 July 2023, Woodside emailed WWAC/KLC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that WWAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- (2) On 19 July 2023, KLC emailed Woodside confirming the email with NOPSEMA information had been forwarded to WWAC.
- (1) On 9 September 2023, Woodside emailed WWAC/KLC seeking feedback on the activity. Woodside again asked if WWAC was aware of any other relevant people with whom Woodside should consult or if they had any feedback, claims, queries or objections on the activity. The email also contained NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information.
- (1) On 22 September 2023, Woodside sent a follow up email to WWAC, further requesting feedback and an opportunity to meet to discuss the activity. Woodside informed WWAC that they are happy to cover all reasonable meeting costs.
- On 13 October 2023, Woodside emailed KLC to confirm that they had the correct contact information for WWAC.
- (2) On 26 October 2023, KLC emailed Woodside and confirmed that the contact details provided were correct and that delayed responses are to be expected.

| Summary of Feedback, Objection or Claim   | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan  |
|---|--|--|
| <p>(1) WWAC has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in February 2023.</p> <p>(2) KLC on behalf of WWAC has confirmed receipt of materials.</p> | <p>(1) Woodside accepts that WWAC has no feedback on this activity.</p> <p>(2) Woodside has made contact with WWAC via email and in person (via KLC) over an 8 month period. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff and a face-to-face community information session, allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7</b> and <b>8</b>.</p> <p>(2) As identified in <b>Section 11.8</b> of this EP, Woodside will continue to consult following acceptance of the EP, as requirement by the implementation strategy as set out regulation 14(9) of the Environment Regulations.</p> |

*Stybarrow Plug and Abandonment Environment Plan*

**Wunambal Gaambera Aboriginal Corporation (WGAC)**

WGAC is established under the Native Title Act 1993 by the Wunambal Gaambera people to represent the Wunambal Gaambera people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with WGAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### **Sufficient Information:**

- Provided Consultation Information Sheet and Consultation Summary Sheets to WGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Sought direction on WGAC's preferred method of consultation.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and "Guideline: Consultation in the course of preparing an environment plan".

### **Reasonable Period:**

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to WGAC on 28 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to WGAC over an 8-month period, demonstrating a "reasonable period" of consultation.

Woodside asked WGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WGAC's functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 28 February 2023, Woodside emailed WGAC advising of the proposed activity (Appendix F, reference 2.60) and provided a Consultation Information Sheet and confirmed an already proposed February 2023 meeting. Woodside noted it was seeking RRRKAC's feedback as soon as possible on the proposed activity.
- On 28 February 2023, KLC advised it had passed Woodside's information on to the relevant contact person at WAC.
- On 8 March 2023, Woodside sent a follow up email to WGAC regarding the information sent earlier and enquired as to whether WGAC had any queries or concerns regarding the proposed activity (Appendix F, reference 2.60.1).
- On 7 April 2023, Woodside was advised in person that KLC legal would respond on behalf of WGAC, DAC and Wilinggin Aboriginal Corporation.
- On 8 June 2023, Woodside emailed KLC as the nominated focal point to forward an invitation to WGAC to a community information drop-in session. The email requested the invitation be passed on to members and any other individuals.

*Stybarrow Plug and Abandonment Environment Plan*

**Yawuru Native Title Holders Aboriginal Corporation (Yawuru)**

Yawuru is established under the Native Title Act 1993 by the Yawuru people to represent the Yawuru people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Yawuru for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in **Section 5.5** of the EP. Specifically:

### **Sufficient Information:**

- Provided Consultation Information Sheet and Consultation Summary Sheets to Yawuru. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Sought direction on Yawuru's preferred method of consultation.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".

### **Reasonable Period:**

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Yawuru on 23 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to Yawuru over an 8-month period, demonstrating a "reasonable period" of consultation.
- Woodside asked Yawuru if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside has provided a reasonable opportunity for input since February 2023. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yawuru's functions, interests or activities.

### **Summary of information provided and record of consultation:**

- On 23 February 2023, Woodside emailed Yawuru Native Title Holders Aboriginal Corporation regarding the proposed activity (Appendix F, Section 2.62).
- On 23 February 2023, Yawuru Native Title Holders emailed Woodside acknowledging receipt of email.
- On 23 February 2023, Woodside emailed Yawuru Native Title Holders thanking them for their email.
- On 4 April 2023, Yawuru Native Title Holders emailed Woodside proposing to meet on 4 April 2023 at their office.
- On 4 April, Woodside met with Yawuru's Manager Native Title & Environmental Services and discussed the fact sheets for this matter which Yawuru had received. The Manager said they did not need to understand anything further but would check with other Yawuru personnel.
- (1) On 13 April 2023, Woodside emailed Yawuru Native Title Holders thanking them for meeting with Woodside and confirming Yawuru Native Title Holders had no comments on the proposed activity. Woodside informed Yawuru Native Title Holders that Woodside's Carbon team would get in touch with them regarding other activities.
- (1) On 15 April 2023, Yawuru Native Title Holders emailed Woodside confirming they do not need to engage further with Woodside on their activities in this EP this year.
- On 17 April 2023, Woodside emailed Yawuru Native Title Holders, thanking them for their email and requested confirmation that Yawuru Native Title Holders do not need to be engaged further in relation to the proposed activity.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>On 7 June 2023, Woodside emailed Yawuru Native Title Holders inviting them to a community information drop-in session. The email offered separate meeting if desired, and requested the invitation be passed on to members and any other individuals.</li> <li>On 18 July 2023, Woodside emailed Yawuru (NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Not required. Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on Yawuru’s functions, interests or activities. Based on engagement to date, no additional measures or controls are required.</p> |
| <p><b>Yindjibarndi Aboriginal Corporation (YAC)</b></p> <p>YAC is established under the <i>Native Title Act 1993</i> by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>   |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with YAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

### Sufficient Information:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheet and Consultation Summary Sheets to Yindjibarndi. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".

### Reasonable Period:

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Yindjibarndi on 24 February 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to Yindjibarndi over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked YAC it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 11.7 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yindjibarndi functions, interests, or activities.

### Summary of information provided and record of consultation:

- On 24 February 2023, Woodside emailed YAC advising of the proposed activity (Appendix F, reference 2.63) and provided a Consultation Information Sheet.
- **(1) & (2)** On 26 February 2023, YAC emailed Woodside to advise that Yindjibarndi will not be providing any comment on the proposed activity and noted it respected the traditional owners whose land and sea lies adjacent to, and within, the precinct of, the projects and will leave any comment and advice to be provided by them.
- On 28 February 2023, Woodside emailed YAC noting the response.
- On 7 July 2023, Woodside called Yindjibarndi who reiterated that it would prefer that comments come from coastal Aboriginal Corporations and not themselves.
- On 18 July 2023, Woodside emailed YAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that YAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.
- On 26 July 2023, Woodside emailed YAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- **(3)** On 1 August 2023, YAC emailed Woodside acknowledging 26 July 2023 email, and confirming that NYFL will manage Oil and Gas matters on behalf of YAC.

## Stybarrow Plug and Abandonment Environment Plan

- On 11 August 2023 YAC through the NYFL emailed Woodside in response to another matter noting that YAC look forward to progressing discussion with Woodside on the proposed program of consultation. A letter attached with the email set out, among other things, YAC's views on consultation, method of communication and funding for participation for YAC's consultation.
- On 15 August 2023, Woodside emailed YAC through the NYFL thanking them for their correspondence and requesting availability to meet.
- On 18 August 2023, YAC emailed Woodside through NYFL noting a date of 30 August 2023 to meet to discuss next steps.
- On 18 August 2023, Woodside emailed YAC accepting the proposed date to meet to discuss engagement processes.
- On 28 August 2023, Woodside emailed NYFL requesting a video link for a consultant to Woodside who will be involved in consultation and engagement going forward.
- On 28 August 2023, NYFL emailed through an agenda for the proposed meeting.
- On 30 August 2023, Woodside met with NYFL to discuss a consultation process and engagement with NYFL and YAC going forward.
- On 12 September 2023, Woodside emailed YAC advising of the planned start date for the activity, and once again requesting if YAC is aware of any other people with whom Woodside should consult, and if there is any information WGAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).

| Summary of Feedback, Objection or Claim   | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan  |
|---|---|--|
| <p>(1) YAC has provided a response and advised that it will not be providing any comment on the proposed activity.</p> <p>(2) YAC expressed that they would prefer that traditional owner groups with land and sea adjacent to and within the present of the projects provide comment.</p> <p>(3) Yindjibarndi has instructed Woodside that it will be represented by NYFL in ongoing discussion about EPs.</p>   | <p>(1) Woodside accepts Yindjibarndi's response.</p> <p>(2) Woodside agrees and respects YAC's position that traditional owners whose land and sea are adjacent to or within the precinct of the projects, should be able to provide comment.</p> <p>(3) Woodside will engage with NYFL on behalf of Yindjibarndi for ongoing consultation related to this activity, separate from consultation under Reg 11A.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Not required.</p> <p>(2) Not required.</p> <p>(3) Future correspondence will be sent through NYFL. Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with YAC through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside's Program of Ongoing Engagement with Traditional Custodians (<b>Appendix J</b>).</p> |
| <p><b>Yinggarda Aboriginal Corporation (YAC)</b></p> <p>YAC is established under the Native Title Act 1993 by the Yinggarda people to represent the Yinggarda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p> |   |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with YAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

### Sufficient Information:

- Woodside sought direction on YAC's preferred method of consultation. This resulted in face-to-face meetings being coordinated at the location of YAC's choosing, with YAC nominated representatives. These meetings included information that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Provided Consultation Information Sheets and Consultation Summary Sheets to YAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Provided response to questions asked about the activity through consultation. Through these questions, YAC has displayed an understanding of the activities under this Environment Plan.
- Advised that YAC could request the particular information provided in the consultation not be published (to align with 11A(2)(4)).

### Reasonable Period:

- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to YAC on 22 February 2023 based on their function, interest, and activities.
- Woodside has addressed and responded to YAC over 8 months, demonstrating a "reasonable period" of consultation.

Woodside asked YAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside has provided a reasonable opportunity for input since February 2023 and a genuine two-way dialogue has occurred via meetings and written exchanges to further understand the environment in which the activity will take place. YAC has engaged with the detail of the activity asking related questions. The details of these engagements are described in the consultation summary below.

Woodside engages in ongoing consultation, beyond that required by Regulation 11A, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see **Section 11.7** of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YAC's functions, interests or activities.

### Summary of information provided and record of consultation:

YMAC is the Native Title Representative Body (NTRB) for the Yamatji and Pilbara regions. NTRBs exist to provide assistance to native title claimants and holders in regards to their native title rights. No native title has been recognised over the EMBA, however YMAC is identified in the Northwest Marine Parks Network Management Plan as the contact for identifying cultural values in nearby Australian Marine Parks.

- On 22 February 2023, Woodside emailed YAC via YMAC advising of the proposed activity (Appendix F, reference 2.64) and provided a Consultation Information Sheet. Woodside noted it is seeking YAC's feedback as soon as possible on the proposed activity. Woodside stated that it would be grateful to meet with YAC at the earliest convenience at location of YAC's preference, providing budget and resources).

## *Stybarrow Plug and Abandonment Environment Plan*

- On 24 February 2023, Woodside followed up with YAC/YMAC via phone call. YAC/YMAC advised it would send an email on 24 February to discuss an invitation for Woodside to meet with YAC.
- On 20 March 2023, Woodside emailed YAC/YMAC to follow up the discussed invitation for a face-to-face meeting with its Board of Directors and offering a phone discussion if YAC had any questions on the activities in the meantime.
- On 23 March 2023, YAC/YMAC emailed Woodside and proposed a meeting on 3 May 2023 in Carnarvon and provided an estimate of its proposed costs. The invitation was accepted, and arrangements made for a pre-meeting with YMAC to coordinate details.
- On 23 March 2023, Woodside email YAC/YMAC confirming the meeting on 3 May 2023 stating that preference is to meet face to face to help develop relationship.
- On 23 March 2023, the YMAC lawyer emailed to arrange a pre-meet conversation on 31 April.
- On 24 March 2023, Woodside emailed to confirm the pre-meet conversation.
- On 27 March 2023, YAC/YMAC agreed that Woodside would organise the meeting.
- On 30 March 2023, YAC/YMAC emailed Woodside apologising that they were no longer available to meet.
- On 30 March 2023, Woodside emailed YAC/YMAC to acknowledge their unavailability and to give the name of a new focal point.
- On 27 April 2023, Woodside emailed the YMAC lawyer to confirm timing and location for the face-to-face meeting on 3 May, but the email bounced back requesting correspondence be forwarded to an alternate contact in YMAC.
- On 27 April 2023, Woodside forwarded the email seeking to confirm time and location for the planned meeting to the alternate contact in YMAC.
- On 27 April 2023, YMAC emailed and phoned Woodside, confirming that they no longer represented YAC and that the meeting on 3 May was cancelled. Gumala Aboriginal Corporation (Gumala) is now representing YAC and YMAC is in the process of hand over, including correspondence with Woodside.
- On 27 April 2023, Woodside acknowledged YMAC email re Gumala transition to new service provider.
- On 28 April 2023, Woodside attempted to call Gumula and left a voicemail to establish connection.
- On 28 April 2023, Woodside emailed Gumula to establish contact and inform them of the prior context. Woodside stated that it is still interested in meeting with the YAC board if they are interested.
- On 8 May 2023, Woodside phoned Gumula to follow up the email, explaining that it was seeking to consult YAC on the proposed activity and noted that a planned meeting had been cancelled. Gumula indicated that the email address previously contacted was correct and indicated that it would call back. No return call or email was received.
- On 1 June 2023, Woodside emailed and phoned Gumala to speak with someone about consulting YAC on EPs. Reception said they would have a member of the governance team call back.
  - On 9 June 2023, YAC/GAC emailed in relation to an unrelated EP but included information on a Board meeting slot for Woodside to discuss all projects and financial assistance.
  - On 15 June 2023, Woodside received an email from YAC stating they were keen for Woodside to consult to the group. They indicated a date had been set for 5 July 2023 for a consultation meeting.
  - On 19 June 2023, Woodside emailed Gumala accepting the invitation to attend the YAC Board meeting, requesting a half day meeting with the YAC Board to allow YAC time to ask questions and have time to consider information.
  - On 21 June 2023, Gumala emailed Woodside inviting attendance at a half day YAC Board meeting to discuss other EP matters.

## Stybarrow Plug and Abandonment Environment Plan

- On 21 June 2023, Woodside emailed Gumala accepting the invite to attend the YAC Board meeting on 5 July for a half day.
- **(1)** On 5 July 2023, Woodside presented to the YAC about several EPs including this EP. At the meeting Woodside:
  - Described the Environment Plan framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of Environment Plans.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities which will be open for consultation in 2023.
  - Described the proposed activity, including plugging and abandoning the wells, removing subsea equipment.
  - Described the types of vessels involved.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA for the proposed activity, and the individual worst-case loss of containment scenarios identified, noting that they are all diesel fuel releases which would only be caused by vessel collisions.
  - Stated that Woodside wanted to understand how the functions, activities or interests of YAC and the people it represents may be impacted by any of those activities;
  - Specifically asked the following:
    - How could these activities impact your cultural values, interests and activities – does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - Advised that Woodside will continue to take feedback from YAC for the life of the EP.
  - Provided personal contact details for further feedback. Woodside provided NOPSEMA contact details, should WAC desire to provide feedback directly to the regulator.
- At the 5 July meeting YAC asked the following questions and provided the following feedback:
  - Whether Woodside has undertaken environmental studies and whether these studies are ongoing.
  - What environmental monitoring happens after the EPs are approved.
    - Woodside responded that numerous environmental studies are undertaken, and they form part of the EPs, some information about ongoing commitments and research studies are available on Woodside's website. Woodside notes that they commit to ongoing consultation with YAC and will take feedback if any new information in relation to risks comes to light.
  - **(1)** YAC expressed sadness at the potential for environmental impact.
    - Response: Woodside explained that the potential impact from the unplanned activities is very low. For example, Woodside has been operating in the region for over 30 years and has not had a serious unplanned environmental event in that time. Importantly, if there is an unplanned event, the entire EMBA as shown on the maps will not be impacted. The area of the EMBA will be somewhere within the mapped area depending on factors such as wind, current and tide.
  - **(1)** YAC stated plants, animals and the environment are inexorably linked to their culture and asked: whether Woodside has undertaken environmental studies and whether these studies ongoing; and what environmental monitoring happens after the EPs are approved.

## Stybarrow Plug and Abandonment Environment Plan

- Response: Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research, some of which are set out on Woodside's website.
- **(2)** Environmental monitoring is an ongoing activity, and the nature and timing of environmental monitoring depends on the nature, possible consequences, and likelihood of the environmental risks. Importantly, Woodside commits to ongoing consultation with YAC and will be able to take feedback if any new information in relation to risks comes to light.
- **(1) (2)** YAC expressed concern about potential impacts to potential impact patterns of whales, and potential collisions. Woodside responded by explaining controls which would be in place to minimise impacts and risks to whales, and no further information was requested.
- On 17 July 2023, Woodside emailed YAC a letter summarising the 5 July meeting.
- On 19 July 2023, Woodside emailed YAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that YAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 19 July 2023, YAC emailed Woodside acknowledging receipt of Woodside's email of 19 July.
- On 26 July 2023, Woodside emailed MAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- On 2 August 2023, YAC lawyer (Banks-Smith & Assoc - BSA) emailed Woodside to indicate that they had been placed on a retainer by YAC to advise on NOPSEMA matters.
- On 3 August 2023, Woodside emailed YAC the NOPSEMA guidelines again with BSA addressed in the email. On 4 August 2023, BSA emailed Woodside confirming instructions by YAC to formally engage with Woodside regarding future NOPSEMA consultation and requiring funds for engagement.
- On 10 August 2023, BSA emailed Woodside to provide instructions that the YAC Board requires more time to conclude its investigations and form a considered view of what feedback it is to provide Woodside on multiple proposed activities.
- On 11 August 2023, YAC emailed Woodside confirming formal resolution by the Board to retain their lawyer to engage on NOPSEMA matters and providing a copy of the Board Resolution.
- On 11 August 2023, Woodside emailed YAC via BSA acknowledging the request for a draft consultation agreement, noting it would be attended to within a week or so and confirming the process for onboarding to receive payments.
- **(3)** On 14 August 2023, YAC via their lawyer emailed Woodside stating that it looked forward to receiving the consultation agreement for consideration and agreeing arrangements for provision of resourcing.
- On 13 September 2023, Woodside emailed YAC via BSA advising of the planned start date for the activity, and once again requesting if YAC is aware of any other people with whom Woodside should consult, and if there is any information YAC wish to provide on cultural values, and reiterating that Woodside will take feedback after the commencement of the activity as part of ongoing consultation. The Summary Information Sheet for this activity was attached (Appendix F, reference 2.81).
- **(3)** On 13 September 2023, YAC via BSA responded to Woodside advising that in the absence of a draft consultation agreement they were unable to respond in substance to the matters raised.
- **(3)** On 14 September 2023, Woodside emailed YAC via BSA with a proposed consultation framework.
- **(3)** On 14 September 2023, YAC via BSA confirmed receipt of the consultation framework and advised they would seek direction from the YAC Board.
-

*Stybarrow Plug and Abandonment Environment Plan*

| Summary of Feedback, Objection or Claim   | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan   |
|---|---|---|
| <p>(1) During face-to-face engagements related to this activity and others YAC requested further information on topics related to this proposed activity which was responded to during the meeting:</p> <ul style="list-style-type: none"> <li>• Whether Woodside has undertaken environmental studies and whether these studies are ongoing.</li> </ul> <p>YAC also expressed the following:</p> <ul style="list-style-type: none"> <li>• Sadness at the potential for environmental impact</li> <li>• Ranger programs could assist with environmental management and monitoring.</li> <li>• Expressed concern about potential impacts to patterns of whales, and potential collisions.</li> </ul> <p>(2) YAC expressed a general interest in whales. Woodside discussed controls protecting whales from an ecological perspective during meetings in which they were raised, no further feedback or comment was received on these topics.</p> <p>(3) Woodside has provided a draft Consultation Framework Agreement which includes suggested timeframes to settle the agreement and timeframes for ongoing consultation with the Board.</p> | <p>(1) Woodside responded to YAC’s requests for further information during face-to-face engagements, and no further information was requested on these topics.</p> <p>(2) Woodside noted YAC’s interest in whales and responded by explaining controls protecting whales from an ecological perspective.</p> <p>(3) Separate from consultation under Reg 11A, Woodside will establish a framework agreement with YAC. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff, a face-to-face meeting with appropriate material (pictures, maps, video) and project attendance allowing opportunity to ask questions and seek further understanding.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7 and 8</b>.</p> <p>(2) Woodside updated <b>Section 4.8</b> to record YAC’s interests, including whales and assessed potential impact on these, including controls, in <b>Section 8.3.7</b>.</p> <p>(3) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with YAC through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (<b>Appendix J</b>).</p> |
| <p><b>Yued Aboriginal Corporation (Yued)</b></p> <p>Yued is established through the South West Native Title Settlement under the Noongar Recognition Act 2016 by the Noongar people to represent the Yued people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>   |   |   |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Yued for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Yued on 17 March 2023 based on their function, interest and activities.
- Woodside addressed and responded to Yued over an 8-month period.

### **Summary of information provided and record of consultation:**

- On 17 March 2023, Woodside emailed Yued advising of the proposed activity (Appendix F, reference 2.65) and provided a Consultation Information Sheet.
- On 20 March 2023, Woodside emailed Yued seeking a meeting to discuss the activity.
- On 20 March 2023, Yued responded and confirmed that the consultation information had been sent to the CEO.
- On 20 March 2023, Woodside emailed Yued confirming an email had also been sent to the CEO.
- Between 28-30 March 2023, Woodside and Yued emailed confirming meeting arrangements for a meeting date of 5 April 2023.
- On 3 April 2023, Woodside phoned and emailed Yued to confirm an initial discussion about the activity and requested details of the date, venue and time.
- On 4 April 2023, Yued emailed Woodside to confirm a Teams meeting on 5 April 2023.
- On 19 April 2023, Woodside emailed Yued with outcomes of the meeting of 5 April 2023, and noted:
  - Woodside was seeking comment on cultural values that should be considered in Woodside EPs;
  - Woodside preferred to meet face-to-face;
  - Woodside asked what values Yued wished to include in the EP, and
  - There would be opportunity for feedback/input for Yued throughout the EP process.
- On 1 June 2023, Yued emailed Woodside, and noted:
  - **(1)** The degree of uncertainty around oil spill modelling created concerns for Yued Board and cultural advisers;
  - **(2)** The Yued AC was encouraged that there had been some diligence done by Woodside to move towards a better understanding of the cultural context of Yued Country. There was no evidence to suggest that the cultural values in Yued Country nor the cultural rights ascribed under the South West Native Title Settlement (SWNTS) were understood and were being mitigated against. Yued were encouraged to hear that Woodside had therefore done a preliminary check of the AHIS Register and would consult this database on the basis of an unplanned event and looked forward to the results of this exercise.
  - **(3)** Woodside were relying on a 30-day window for feedback that was not communicated, and Yued requested that this information was stated upfront in future.
- On 3 July 2023, Woodside emailed Yued to request a meeting to discuss this EP and other Woodside activities.

Stybarrow Plug and Abandonment Environment Plan

| Summary of Feedback, Objection or Claim   | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan  |
|---|--|--|
| <p>(1) Yued were concerned about the degree of uncertainty around oil spill modelling.</p> <p>(2) Yued were concerned that the cultural values of Yued country and cultural rights under the South West Native Title Settlement were not understood and mitigated against.</p> <p>(3) The timeframe for consultation was not communicated to Yued AC, and that for future requests this information was to be communicated.</p> | <p>(1) Woodside notes Yued’s concern about oil spill modelling uncertainty. Woodside’s oil spill response procedures as outlined in the EP are robust to modelling uncertainty. The Oil Spill Pollution First Strike Plan (<b>Appendix D</b>) includes a requirement to notify traditional owners who may be affected by a spill.</p> <p>(2) Woodside notes Yued’s claim that the cultural values of Yued country and cultural rights under the SWNTS were not understood. Woodside has updated <b>Section 4.8.1.5.1</b> to capture Yued’s feedback and has consulted with Yued as described in the above consultation record. Woodside has completed an ACHIS database search covering the Yued ILUA area, as listed in <b>Appendix I</b>. Mitigations for impacts to the cultural values and heritage features of the environment are described in <b>Section 7 &amp; 8</b>, and the Oil Spill Pollution First Strike Plan (<b>Appendix D</b>) includes a requirement to notify traditional owners who may be affected by a spill.</p> <p>(3) Woodside notes Yued’s comment about timeframes for consultation. For this activity Woodside has consulted with Yued over an 8-month period. Woodside has demonstrated reasonable effort to engage in two-way dialogue. Yued has had a reasonable opportunity to participate in consultation.</p> <p>Woodside has:</p> <ul style="list-style-type: none"> <li>• Sought Yued’s direction on their preferred method of consultation.</li> <li>• Set out in detail what is being sought through consultation.</li> <li>• Asked Yued to distribute the request for consultation and information sheets to their members.</li> <li>• Asked whether Yued was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult.</li> </ul> <p>Consultation with Yued has not identified any other groups or individuals relevant to communally held functions, activities or interests.</p> <p>No material issues or concerns related to the proposed activity were raised during consultation to date. Woodside invited further feedback in accordance with Woodside’s approach to ongoing consultation (see <b>Section 11.8</b>).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>(1) The Oil Spill Pollution First Strike Plan (<b>Appendix D</b>) includes a requirement to notify traditional owners who may be affected by a spill.</p> <p>(2) Description of the Socio-Economic Environment has been updated to capture feedback received by Yued in <b>Section 4.8.1.5.1</b>. Existing controls considered sufficient as described in <b>Section 7 &amp; 8</b> including consideration of impacts to shoreline heritage sites and intangible cultural heritage, and the requirement to notify traditional owners who may be affected by a spill identified in <b>Appendix D</b>.</p> <p>(3) Not required.</p> <p>Woodside considers the measures and controls described within this EP address Yued’s functions, interests or activities.</p> <p>As identified in <b>Section 11.7</b> of this EP, Woodside will continue to consult following acceptance of the EP, as requirement by the implementation strategy as set out regulation 14(9) of the Environment Regulations.</p> |
| <p><b>Native Title Representative Bodies</b></p>  |  |  |

*Stybarrow Plug and Abandonment Environment Plan*

**Yamatji Marlpa Aboriginal Corporation (YMAC)**

YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with YMAC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

### **Sufficient Information:**

- Woodside sought direction on YMAC's preferred method of consultation. This resulted in meetings being coordinated at locations of YMAC's choosing, with YMAC nominated representatives. These meetings included Woodside presenting information in a format and style that was readily accessible and appropriate.
- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- The updated Consultation Information Sheet and Consultation Summary Sheets were developed by Indigenous staff for YMAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.

### **Reasonable Period:**

- Woodside published advertisements in national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to YMAC on 13 March 2023 based on their function, interest and activities.
- Woodside addressed and responded to YMAC over a 6 month period, demonstrating a "reasonable period" of consultation.

### **Summary of information provided and record of consultation:**

- On 21 February 2023, Woodside emailed YMAC advising of the proposed activity (Appendix F, reference 2.49) and provided a Consultation Information Sheet.
- On 13 March 2023, Woodside emailed YMAC as to whether YMAC considers itself a 'relevant person' under subregulation 11 A (1) of the Environment Regulations for the purposes of consultation on EPs and, if so, whether that relevance is limited to a facilitation function in its capacity as a representative of Traditional Owner groups/corporations that overlap or adjacent to the environment that may be affected (EMBA) of a particular activity.
- On 15 March 2023, Woodside emailed YMAC to request a response as to whether YMAC considers itself a 'relevant person' under relevant sections of the Environment Regulations for the purposes of consultation in EPs.
- On 15 March 2023, (1) YMAC replied to confirm that in its view it is a 'relevant person' under subregulation 11 A (1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation. YMAC does not intend to provide substantive comment on the content of EPs.
- On 20 March 2023, YMAC replied to confirm that in its view it is a 'relevant person' under subregulation 11 A (1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation. YMAC does not intend to provide substantive comment on the content of EPs.
- On 20 March 2023, Woodside emailed YMAC to thank it for its reply and to advise that that this assessment would be included in Woodside's EPs.
- On 20 March 2023, YMAC emailed Woodside confirming that they agree to their advice being included in reporting (YMAC is the representative for NTGAC and Nanda Aboriginal Corporation and was the representative for Yinggarda Aboriginal Corporation until April 2023).
- On 12 June 2023, YMAC emailed Woodside on behalf of itself and its clients. The email attached:
  - **(2)** a proposal to fund in-house expertise to support consultations and administration of the consultation framework.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>○ (2) a draft consultation framework.</li> <li>● On 12 June 2023, Woodside emailed YMAC, thanking them for the documents and informing them that Woodside would respond shortly.</li> <li>● On 25 July 2023, Woodside emailed YMAC:             <ul style="list-style-type: none"> <li>○ agreeing in principle to the draft consultation framework and funding proposal but seeking further discussion on details.</li> <li>○ stating that Woodside is open to considering an industry funded position at YMAC to support the work they are facilitating.</li> <li>○ attaching Woodside’s Program for Ongoing Engagement with Traditional Custodians.</li> <li>○ seeking a meeting with YMAC in relation to the draft consultation framework at YMAC’s earliest convenience.</li> </ul> </li> </ul> |  |  |

| <p>(1) YMAC has provided feedback that in its view it is a ‘relevant person’ under subregulation 11 A (1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation and does not intend to provide substantive comment on the content of EPs.</p> <p>(2) YMAC has provided feedback that it is seeking an industry funded position to support consultations for this and other activities. YMAC has provided a draft consultation framework to assist the consultation process.</p>   | <p>(1) YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate representing the cultural rights of a Traditional Custodian Community but exist to assist native title claimants and holders.</p> <p>Woodside accepts YMAC’s feedback that it is a relevant person only in relation to its facilitation and coordination function as a representative body. Woodside has consulted with YMAC in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation, and it has responded that it does not intend to provide substantive comment on the content of EPs.</p> <p>(2) Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (refer to <b>Section 11.7</b>).</p> <p>Woodside is engaging with YMAC in relation to its request for an industry funded position and a draft consultation framework.</p> | <p>(1) Existing controls considered sufficient, as described in <b>Section 7</b> and <b>8</b>.</p> <p>(2) Although consultation for the purpose of Reg 11A is complete, Woodside will continue to engage with YMAC through ongoing engagement and continue engaging with YMAC in relation to its request for an industry funded position and a draft consultation framework (<b>Appendix J</b>).</p> |
| <p><b>Kimberley Land Council (KLC)</b></p> <p>KLC is the Native Title Representative Body for the Kimberley region of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.</p>  |  |  |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with KLC for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to KLC on 16 February 2023 based on their function, interest and activities.
- Woodside addressed and responded to KLC over an 8-month period.

**Summary of information provided and record of consultation:**

- On 16 February Woodside emailed KLC advising of the proposed activity (Appendix F, reference 2.37).
- On 23 February, Woodside emailed KLC with further information and providing consultation information sheet.
- **(2)** Woodside has been engaging with KLC on behalf of its represented groups as described in relevant sections above
- On 8 June 2023, Woodside emailed KLC inviting them to a community information drop-in session. The email requested that KLC pass on the invitation to other groups, members and any other individuals who may be interested in Woodside’s activities.
- On 19 June 2023, Woodside spoke to KLC to follow up on attendees for the workshop. KLC stated they were still trying to lock down particular groups.
- **(3)** On 23 June 2023, Woodside spoke to KLC at the NOPSEMA Summit. KLC confirmed they were still interested in the ranger workshop but would be unavailable for a couple of weeks.

| Summary of Feedback, Objection or Claim | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |
|---|---|-------------------------------|

| <p><b>Western Australian Museum</b></p>   |   |  |
| <p>Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with the WA Museum for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.</li> <li>• Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.</li> <li>• Consultation information provided to Western Australian Museum on 16 February 2023 based on their function, interest and activities.</li> <li>• Woodside has addressed and responded to Western Australian Museum over a 9 month period.</li> </ul> <p><b>Summary of information provided and record of consultation:</b></p> <ul style="list-style-type: none"> <li>• On 16 February 2023, Woodside emailed the Western Australian Museum advising of the proposed activity (Appendix F, reference 2.22) and provided a Consultation Information Sheet.</li> <li>• On 24 February 2023, WA Museum responded, thanking Woodside for their email and confirmed it had no feedback for the proposed EP.</li> <li>• On 9 March 2023, Woodside responded, thanking WA Museum for their response.</li> </ul> |   |  |

*Stybarrow Plug and Abandonment Environment Plan*

| Summary of Feedback, Objection or Claim  | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan  |
|--|---|--|
| <p>The Western Australian Museum advised it had no feedback with respect to the proposed activities.</p> <p>Whilst feedback has been received, there were no objections or claims.</p> | <p>The Western Australian Museum confirmed it has no feedback for the proposed activity.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>The Environment Plan demonstrates that there are no known underwater heritage sites or shipwrecks within the Petroleum Activities Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (<b>Section 4.8.1</b>). While impacts to underwater heritage sites or shipwrecks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in <b>Section 8.2</b> and <b>Section 8.3</b>.</p> <p>No additional measures or controls are required.</p> |
| <p><b>Local government and community representative groups or organisations</b></p>  |   |  |
| <p><b>Shire of Carnarvon</b></p>   |   |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with the Shire of Carnarvon for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shire of Carnarvon on 16 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to Shire of Carnarvon over a 10 month period.

### Summary of information provided and record of consultation:

- On 16 February 2023, Woodside emailed Shire of Carnarvon advising of the proposed activity (Appendix F, reference 2.5) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Shire of Carnarvon advising of the proposed activity (Appendix F, reference 2.5.1) and provided a Consultation Information Sheet.
- On 3 May 2023, Woodside had a meeting with the Shire of Carnarvon (SoC) on a separate EP and provided an overview of activities proposed under this EP.
  - The SoC noted that they were struggling to see how the Shire may be impacted by Woodside's activities that it has been receiving consultation information for. Noted that the Town of Coral Bay is within the Shire of Carnarvon which is closer to Woodside's activities, but this is still quite a distance.
  - Noted that the townsite of Coral Bay may be more directly within Woodside's area of potential impact and is very reliant on the environment. Noted that there are fisheries based in Carnarvon going out to Shark Bay which are an important part of the economy and lifestyle.
  - Woodside thanked the SoC for its advice around engagement and agreed that the meeting was a good opportunity to establish a relationship with the SoC and determine the best method to engage moving forward.
  - Woodside explained recent changes to consultation and the expansive area titleholders are now required to consult on, referred to as the EMBA.
  - Woodside explained that the EMBA for each EP is determined based on the largest spatial extent where unplanned events could potentially have an environmental consequence. Explained that for each of the EPs Woodside would be discussing with the SoC, the EMBA is determined by the unlikely event of a hydrocarbon release.
  - Woodside explained that the SoC has the opportunity to provide feedback on each of Woodside's proposed activities that it would be providing an overview of.
  - Woodside provided an overview of the proposed activities, including:
  - Provided an overview of Woodside's approach to decommissioning.
    - Advised there are three oil fields being decommissioned in a similar area and showed a map - Griffin, Stybarrow and Griffin.
    - Explained that the production facilities have already been removed.
    - The EMBA is a diesel spill is from the vessel - that's the scenario we model for.
  - The SoC noted that in the event of a spill, it would be good to understand where the Shire sits as part of the response to protect its habitats.
  - Woodside explained it has oil spill response plans in place specific to the EP which it provides to DoT and AMSA for feedback as the response agencies.
  - The SoC thanked Woodside for the overview of activities and advised it would consider the information within the context of the Shire's interests in the environment and its link to its economy.

## Stybarrow Plug and Abandonment Environment Plan

- The SoC noted that the risk profiles of Carnarvon compared to the townsite of Coral Bay are different and noted that Coral Bay is geographically close to Exmouth. SoC requested additional clarity on the contact points for Coral Bay for each of the activities.
- On 5 May 2023, Woodside sent an email to the Shire of Carnarvon thanking the Shire for the 3 May 2023 meeting and provided a consolidated email with all proposed activities Woodside is consulting the Shire on, including the activities proposed under this EP. Woodside confirmed it is looking into the likelihood of contact along Coral Bay for each of the EPs and committed to providing this additional information.
- On 29 May 2023, the Shire of Carnarvon responded and:
  - thanked Woodside for providing the consultation information.
  - noted that it appreciated being kept informed and felt that the meeting was useful in allowing the Shire to better understand the potential risks for areas within the Shire and the mitigations measures in place.
  - requested that should risks to the Shire change for these projects or new risks emerge for these or other projects, it would appreciate being advised.
  - advised it had no further comment.
- On 29 May 2023, Woodside responded and:
  - Thanked the Shire for its feedback with respect to a number of EPs, including the activities proposed under this EP.
  - Noted the Shire's advice that:
    - it would like to be updated if risks to the Shire change for these projects or new risks emerge for these or other projects.
    - the Shire has no further comments.
  - Noted that at the 3 May 2023 meeting, Woodside committed to providing the Shire with the likelihood of contact along Coral Bay for each of the above EPs. Woodside:
    - explained the EMBA being determined by the highly unlikely event of a hydrocarbon release from activities within the scope of the EP.
    - explained that when Woodside models the EMBA for a hydrocarbon spill, we consider both the environmental and visual amenity risk. The outputs identify which areas of the marine environment could be exposed to hydrocarbons at levels exceeding certain threshold concentrations in the unlikely event of a spill.
    - summarised the probabilities of surface, shoreline and in-water hydrocarbon contact at Coral Bay for a number of EPs, including the activities proposed under this EP.
- On 29 May 2023, the Shire of Carnarvon responded and thanked Woodside for the information. The Shire suggested that Woodside brief their Local Emergency Management Committee as most of the risk is only in the event of an emergency and established contact with the committee.
- On 8 June 2023, Woodside responded to Shire of Carnarvon and welcomed the opportunity to meet with the Local Emergency Management Committee requesting availability and offering to co-ordinate for Woodside.
- On 20 July 2023, Woodside followed up with SoC requesting to attend its Local Emergency Management Committee meeting.
- On 20 July 2023, SoC responded inviting Woodside to attend its next LEMC on August 16, 2023.
- On 21 July 2023, Woodside responded to SoC accepting the invitation to attend the committee meeting.
- On 16 August 2023, Woodside attended SoC LMEC meeting and provided:

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>○ an overview of proposed activities relevant to the Shire including this EP</li> <li>○ outlined consultation approach and explanation of Environment that May Be Affected (EMBA) as a modelling process of the broadest extent a diesel spill could spread based on a number of conditions.</li> <li>○ Detail of oil spill response approach in the highly unlikely event of a hydrocarbon spill</li> <li>○ Woodside key steps when activating an oil spill response plan</li> <li>○ SoC thanked Woodside for presenting to the committee and had no questions or concerns.</li> </ul>  |   |  |

| <p>Woodside had a meeting with the Shire of Carnarvon, where the Shire provided feedback that:</p> <ul style="list-style-type: none"> <li>• they were struggling to see how the Shire may be impacted by Woodside's activities that it has been receiving consultation information for.</li> <li>• undertook to give the Council an update and if they have further input, they would reach out to Woodside.</li> <li>• requested Woodside send an email with the full list of EPs it had consulted the Shire on, so they had it in one place, including this EP.</li> <li>• requested Woodside provide the contact points for Coral Bay for each of the environment plans discussed, including the activities proposed under this EP.</li> <li>• requested Woodside brief the Shire’s LEMC.</li> </ul> <p>At the request of the Shire, Woodside had a further meeting with the Shire’s Local Emergency Management Committee to outline oil spill response approach. No questions or comments were raised</p> | <p>Woodside has addressed the Shire of Carnarvon’s feedback, including:</p> <ul style="list-style-type: none"> <li>• providing additional information on the proposed activities.</li> <li>• provided a consolidated email with all EPs Woodside was consulting the Shire on, including the activities proposed under this EP.</li> <li>• provided the Shire with the contact points to Coral Bay for each of the EPs, including the activities proposed under this EP.</li> <li>• meeting with the Shire’s LEMC to provide an oil spill response briefing.</li> </ul> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on the Shire of Carnarvon’s functions, interests or activities.</p> <p>No additional measures or controls are required.</p> |
| <p><b>Shire of Exmouth</b></p>  |   |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shire of Exmouth for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to Shire of Exmouth on 27 May 2022 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Exmouth with the opportunity to provide feedback over a 17 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed Shire of Exmouth advising of the proposed activity (Appendix F, reference 1.21) and provided a Consultation Information Sheet.
- On 17 February 2023, Woodside emailed Shire of Exmouth advising of the proposed activity (Appendix F, reference 2.28) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Shire of Exmouth advising of the proposed activity (Appendix F, reference 2.28.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |
|---|--|--|
| No feedback, objections or claims received despite follow up. | Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b> ). | No additional measures or controls are required. |
| <b>Shire of Ashburton</b>                                     |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shire of Ashburton for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shire of Ashburton on 17 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Ashburton with the opportunity to provide feedback over a 12 month period.

### Summary of information provided and record of consultation:

- On 17 February 2023, Woodside emailed Shire of Ashburton advising of the proposed activity (Appendix F, reference 2.29) and provided a Consultation Information Sheet.
- On 2 March 2023, Woodside met with Shire of Ashburton and discussed Environment Plans and consultation including the activities proposed under this EP. No concerns or questions were raised about the proposed activity.
- On 8 May 2023, Woodside attended an Onslow Community Information Night hosted by the Shire of Ashburton and presented on decommissioning activities. There were no questions raised about the proposed activity.

As stated, the summary above demonstrates that Woodside's consultation with Shire of Ashburton for the purpose of 11A(1) is complete. However as per Woodside's ongoing commitment to consultation, engagement with Shire of Ashburton continues as summarised below;

### Ongoing consultation:

- On 7 August 2023, Woodside emailed the Shire of Ashburton on a variety of matters/query responses (for other EPs) including organising an opportunity to brief the Shire's Local and District Emergency Management Committee (LEMC) on its approach to managing a hydrocarbon release in the highly unlikely event this occurs.
- On 14 August 2023, Shire of Ashburton emailed Woodside thanking it for the response which was deemed sufficient and inviting Woodside to present at the Shire's December community information sessions. It was also suggested that for more regular information sharing, Woodside could submit articles to the *Onslow Pipeline*.
- On 26 September 2023, Woodside emailed the Shire of Ashburton asking when the next Shire's Local and District Emergency Management Committee (LEMC) meeting was.
- On 26 September 2023, Shire of Ashburton responded with the next LEMC meeting date and shared the contact details for Woodside to be added to the invite list.
- On 26 September 2023, Woodside emailed Shire of Ashburton with a list of desired meeting attendees to be invited and confirmed start time.
- On 26 September 2023, Shire of Ashburton responded with Teams link invite and confirmed contact details of Woodside requested attendees. The Shire advised it will confirm the exact presentation time, closer to the meeting date.
- On 17 October the Shire of Ashburton and Woodside exchanged further emails confirming presentation start time and attendee details.

| <p><b>Shire of Wyndham-East Kimberley</b></p>  |  |  |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shire of Wyndham-East Kimberley for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shire of Wyndham-East Kimberley on 1 June 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Wyndham-East Kimberley with the opportunity to provide feedback over a 9 month period.

**Summary of information provided and record of consultation:**

- On 1 June 2023, Woodside emailed Shire of Wyndham-East Kimberley advising of the proposed activity (Appendix F, reference 3.1) and provided the February 2023 Consultation Information Sheet.
- On 23 June 2023, Woodside sent a reminder email to the Shire advising of the proposed activity (Appendix F, reference 3.1.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |
|---|--|--|
| No feedback, objections or claims received despite follow up. | Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b> ). | No additional measures or controls are required. |
| <b>Shire of Derby/West Kimberley</b>                          |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shire of Derby/West Kimberley for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shire of Derby / West Kimberley on 1 June 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Shire of Derby / West Kimberley over a 5 month period.

### Summary of information provided and record of consultation:

- On 1 June 2023, Woodside emailed Shire of Derby/West Kimberley advising of the proposed activity (Appendix F, reference 3.1) and provided the February 2023 Consultation Information Sheet.
- On 20 June 2023, the Shire of Derby / West Kimberley responded to advise it had no specific feedback regarding this proposed activity. The Shire sought advice about a spill that may impact the Shire's Local Emergency Management Arrangements.
- On 27 June 2023, Woodside responded to the Shire of Derby / West Kimberley acknowledging the Shire had no specific feedback. Woodside also sought further clarification on the request/query regarding oil spill arrangements.
- On 27 June 2023, the Shire of Derby / West Kimberley responded to advise the Shire expects to be notified in the unlikely event of a petroleum oil spill to reach the coastline.
- On 3 July 2023, Woodside responded to advise that in line with Woodside's Oil Pollution Strike Plan, in the event a hydrocarbon release was to enter the Shire's area of responsibility Woodside would contact the Shire regarding response arrangements.

| Summary of Feedback, Objection or Claim  | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response   | Inclusion in Environment Plan   |
|--|---|---|
| The Shire advised it had no specific feedback on proposed activities but sought further clarification on oil spill arrangements. | <p>Woodside acknowledged the Shire's advice it had no specific feedback on the proposed activities.</p> <p>Woodside advised the Shire that it would be advised of response arrangements in the event of a hydrocarbon release.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on the Shire of Derby/West Kimberley's functions, interests or activities.</p> <p>No additional measures or controls are required.</p> |
| <b>Shire of East Pilbara</b>   |   |   |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shire of East Pilbara for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shire of East Pilbara on 1 June 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of East Pilbara with the opportunity to provide feedback over a 5 month period.

**Summary of information provided and record of consultation:**

- On 1 June 2023, Woodside emailed Shire of East Pilbara advising of the proposed activity (Appendix F, reference 3.1) and provided the February 2023 Consultation Information Sheet.
- On 23 June 2023, Woodside sent a reminder email to the Shire advising of the proposed activity (Appendix F, reference 3.1.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |
|---|--|--|
| No feedback, objections or claims received despite follow up. | Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b> ). | No additional measures or controls are required. |
| <b>Shire of Broome</b>  |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Shire of Broome for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Shire of Broome on 1 June 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Broome with the opportunity to provide feedback over a 5 month period.

### Summary of information provided and record of consultation:

- On 1 June 2023, Woodside emailed Shire of Broome advising of the proposed activity (Appendix F, reference 3.1) and provided the February 2023 Consultation Information Sheet.
- On 23 June 2023, Woodside sent a reminder email to the Shire advising of the proposed activity (Appendix F, reference 3.1.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with the KCLG for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Karratha Community Liaison Group on 17 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to Karratha Community Liaison Group over a 9 month period.

### Summary of information provided and record of consultation:

- On 17 February 2023, Woodside emailed Karratha Community Liaison Group advising of the proposed activity (Appendix F, reference 2.73) and provided a Consultation Information Sheet.
- On 8 March 2023, Woodside sent a reminder email to Karratha Community Liaison Group advising of the proposed activity (Appendix F, reference 2.73.1) and provided a Consultation Information Sheet.
- On 29 June 2023, Woodside presented to the Karratha Community Liaison Group on previous and upcoming EP consultation (Appendix F, reference 3.14).
  - Woodside acknowledged and discussed the increased volume of consultation material the Community Liaison Group (CLG) members had been receiving and explained the changes requiring consultation based on EMBA. A member of the CLG asked how they can opt out of consultation for Woodside's Environment Plans.
  - Woodside presented a slide which listed Environment Plans on which the CLG members had recently been consulted and potential Environment Plans they may be consulted on throughout the remainder of 2023.
  - Woodside confirmed it had a Senior Environment Adviser available to discuss any of the Environment Plans in detail after the meeting. No CLG members met with the Adviser and no feedback was received with specific reference to Woodside's Environment Plans.
- On 29 September 2023, Woodside presented to the Karratha CLG on Woodside activities, including a status update on this EP. No feedback was received related to this EP. (Appendix F, reference 3.18)

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |

| No feedback, objections or claims received despite follow up. | Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b> ). | No additional measures or controls are required. |
| <b>Margaret River Chamber of Commerce and Industry</b>        |  |  |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Margaret River Chamber of Commerce and Industry for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Margaret River Chamber of Commerce and Industry on 1 June 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided the Margaret River Chamber of Commerce and Industry with the opportunity to provide feedback over a 5 month period.

### Summary of information provided and record of consultation:

- On 1 June 2023, Woodside emailed Margaret River Chamber of Commerce and Industry advising of the proposed activity (Appendix F, reference 3.1) and provided the February 2023 Consultation Information Sheet.
- On 23 June 2023, Woodside sent a reminder email to the Shire advising of the proposed activity (Appendix F, reference 3.1.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with ACF for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to ACF on 16 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided ACF with the opportunity to provide feedback over a 9 month period.

**Summary of information provided and record of consultation:**

- On 16 February 2023, Woodside emailed ACF advising of the proposed activity (Appendix F, reference 2.12) and provided a Consultation Information Sheet
- On 10 March 2023, Woodside sent a reminder email to ACF advising of the proposed activity (Appendix F, reference 2.12.1) and provided a Consultation Information Sheet.

| Summary of Feedback, Objection or Claim                       | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan                    |
|---|--|--|
| No feedback, objections or claims received despite follow up. | Woodside engages in ongoing consultation throughout the life of an EP. | <b>Friends of the Earth Australia</b>                         |  |  |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Friends of the Earth Australia for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Consultation information provided to Friends of the Earth on 8 February 2023 based on their function, interest and activities.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Woodside has addressed and responded to Friends of the Earth over a 9 month period.

**Summary of information provided and record of consultation:**

- On 8 February 2023, Woodside had a meeting with Friends of the Earth of Australia:
  - Friends of the Earth provided Woodside an overview of the organisation’s functions, activities and interests.
  - Woodside provided an overview of its upcoming decommissioning activities, including activities proposed under this EP.
  - Friends of the Earth advised its desire for recycling, but also to leave certain infrastructure in-situ because of the habitat it has created. Friends of the Earth also expressed its views on dredging to minimise turbidity and working with Traditional Custodians to be guided on their views.
  - Woodside provided an overview of its expanded approach to consultation on the EMBA for proposed activities, including risks and mitigations.
- On 9 February 2023, Woodside emailed Friends of the Earth Australia thanking it for its time to meet with Woodside on 8 February 2023. Woodside summarised the proposed activities, including the activities proposed under this EP and provided a link to the Activity Update Consultation Information Sheet as well as Woodside’s Consultation website which can be subscribed to.
- On 30 May 2023, Woodside had an email exchange with Friends of the Earth to arrange an update on Woodside’s decommissioning activities, including the activities proposed under this EP.
- On 30 May 2023, Woodside met with Friends of the Earth Australia and discussed the merits of leaving infrastructure in-situ, where there are net environmental benefits for marine life and/or other relevant considerations. This discussion was unrelated to this EP. It was agreed a meeting to discuss decommissioning further would be beneficial.
- On 6 June 2023, Woodside sent an email to Friends of the Earth Australia thanking it for the 30 May 2023 discussion and provided a copy of a number of Consultation Information Sheets, including the activities proposed under this EP and offered to arrange a meeting.

| Summary of Feedback, Objection or Claim | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response | Inclusion in Environment Plan |

|  |  |  |
|--|--|--|
| <p>Friends of the Earth provided feedback including:</p> <ul style="list-style-type: none"> <li>• advising of its desire for recycling</li> <li>• expressing its views on working with Traditional Custodians to be guided on their views.</li> <li>• Advising that its interest is in marine life, social justice and Indigenous issues and welcomed a further meeting to further discuss proposed decommissioning activities.</li> </ul> | <p>Woodside has addressed Friends of the Earth's feedback, including:</p> <ul style="list-style-type: none"> <li>• Woodside also advised its focus on establishing local content opportunities for onshore recycling.</li> <li>• providing an overview of its expanded approach to consultation on the EMBA for proposed activities, including risks and mitigations.</li> <li>• Woodside recommended Friends of the Earth subscribe to the Woodside Consultation Page to receive all the latest updates on all Woodside's proposed activities.</li> <li>• Agreeing to send further information about proposed decommissioning activities.</li> </ul> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on Friends of the Earth's functions, interests or activities.</p> <p>No additional measures or controls are required.</p> |
| <p><b>Maritime Union of Australia (MUA)</b></p>  |  |  |

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Maritime Union of Australia (MUA) for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to MUA on 21 February 2023 based on their function, interest and activities.
- Woodside has addressed and responded to MUA over a 10 month period.

### **Summary of information provided and record of consultation:**

- On 21 February 2023, Woodside emailed the Maritime Union of Australia advising of the proposed activity (Appendix F, reference 2.32) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to the Maritime Union of Australia advising of the proposed activity (Appendix F, reference 2.32.1) and provided a Consultation Information Sheet.
- On 15 March 2023, the Maritime Union of Australia emailed thanking Woodside for the opportunity to comment on the Stybarrow Decommissioning EPs. The Maritime Union of Australia advised it had no comments to make on the projects.
- On 15 March 2023, Woodside responded thanking the Maritime Union of Australia for their response.

The summary above demonstrates that consultation for the purpose of 11A(1) is complete however, as per Woodside's commitment to ongoing consultation, engagement has continued as summarised below:

### **Ongoing consultation:**

- On 30 May 2023, Woodside met the new MUA representative at an industry conference and committed to follow up directly later in relation to the MUA position of removal of all infrastructure.
- On 6 June 2023, Woodside sent an email to the MUA thanking it for the 30 May 2023 discussion and provided a copy of a number of Consultation Information Sheets, including the activities proposed under this EP.
- On 14 June 2023, the MUA sent an email thanking Woodside for its 6 June 2023 email and provided potential dates for a meeting.
- Between 15 June 2023 and 22 June 2023, Woodside and MUA sent email correspondence to arrange a meeting on 5 July 2023.
- Between 3 July and 4 July Woodside and MUA exchanged emails to arrange an alternative meeting time.
- On 18 July 2023, MUA emailed Woodside requesting further information and a meeting regarding Griffin and Stybarrow EPs with equipment left in situ. MUA advised it had not provided feedback regarding this to date however now had reason to need further details. Information required included options assessment and criteria, images of equipment, final footprint and cumulative impacts of equipment left in situ.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>On 20 July 2023, Woodside responded to the MUA seeking available times to meet and discuss the information requested and also advised of the names of the relevant EPs the MUA was referring to.</li> <li>On 21 July 2023, MUA responded with its meeting time availability.</li> <li>On 27 July 2023, Woodside offered meeting times suitable to the MUA.</li> <li>On 27 July 2023, MUA responded with a date to meet of 4 August 2023</li> <li>On 31 July 2023, Woodside set up the meeting for 4 August 2023 and agreed to provide information in advance of the meeting.</li> <li>On 4 August 2023, Woodside met with the MUA to answer questions in relation to the decommissioning EPs where equipment was left in-situ. The meeting was unrelated to this EP.</li> </ul> |  |   |
|--|--|---|
| Summary of Feedback, Objection or Claim  | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan   |
| The MUA advised it had no comments to make with respect to the proposed activities.  | <p>Woodside notes the MUA’s advice that it has no comments to make with respect to the proposed activities.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on MUA’s functions, interests or activities.</p> <p>No additional measures or controls are required.</p> |
| <b>Research institutes and local conservation groups or organisations</b>  |  |   |
| <b>Cape Conservation Group (CCG)</b>   |  |   |

## Stybarrow Plug and Abandonment Environment Plan

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Cape Conservation Group for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to CCG on 27 May 2022 based on their function, interest and activities.
- Woodside has addressed and responded to CCG over a 16 month period.

### Summary of information provided and record of consultation:

- On 27 May 2022, Woodside emailed CCG advising of the proposed activity (Appendix F, reference 1.24) and provided a Consultation Information Sheet.
  - On 17 February 2023, Woodside emailed the CCG advising of the proposed activity (Appendix F, reference 2.26) and provided a Consultation Information Sheet.
  - On 23 February 2023 CCG emailed Woodside seeking additional information on EPs unrelated to this EP.
  - On 1 March 2023, Woodside emailed the Cape Conservation Group to address concerns unrelated to this EP.
  - On 10 March 2023 Woodside emailed CCG advising of changes to the proposed activity scope and provided an updated Consultation Information Sheet (Appendix F, reference 2.26.1).
  - On 14 March 2023 CCG responded to Woodside advising:
    - there is heightened potential of damage to the marine environment and wildlife during Woodside decommissioning activities including but not limited to:
    - Higher risk to reef and island habitats from spills
    - Increased potential negative impacts on migrating whales from marine noise
    - Higher possibility for contamination of inshore areas and reef habitat by chemicals used in the process of growth removal as a result of persistent and reckless delays in maintenance and disposal.
- CCG submits that:
- NOPSEMA and Regulators deny approval to Environmental Plans that include intentional petroleum releases.
  - Woodside be held accountable for failing to maintain infrastructure during and after the use/decommissioning of a field, as well as environmental and social damage caused by its industrial activities.
  - the use of CSV working in shallow waters increases risk.
- CCG further submits that:
- no more delay or environmental damage from Stybarrow can be tolerated.
  - due to previous Woodside consultations being unsatisfactory, CCG efforts in this space will be directed towards the regulators, government and media.
- On 24 May 2023 Woodside responded to CCG advising:
    - all decommissioning activities will be undertaken in accordance with relevant accepted EPs under NOPSEMA's jurisdiction.

*Stybarrow Plug and Abandonment Environment Plan*

| <ul style="list-style-type: none"> <li>○ unplanned loss of containment events have been identified as part of the EP risk assessment process (presented in <b>Section 8</b> of the respective EPs) and appropriate controls are adopted to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill.</li> <li>○ noise emissions from a range of sources have been assessed. Noise from vessel activities has the potential to exceed thresholds at the source, however as marine fauna is transient in the Operational Area, individuals are expected to potentially show localised avoidance based on behavioural avoidance responses.</li> <li>○ marine growth and scale from subsea infrastructure may be removed using water jetting and blasting to expose lifting points or gain visualisation. Removed material is expected to disperse with prevailing currents or sink to the bottom. An acidification agent may be added to jetting water in a highly targeted process involving water and chemicals involved around &lt;1 m<sup>3</sup>.</li> <li>○ planned discharges include routine and non-routine discharges associated with the general operations of project vessels of its commitment to completing decommissioning and all regulatory requirements stipulated by the regulator through general directions.</li> <li>○ of its commitment to completing decommissioning and all regulatory requirements stipulated by the regulator through general directions.</li> </ul> |  |  |
|---|--|--|
| Summary of Feedback, Objection or Claim   | Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response  | Inclusion in Environment Plan  |
| <p>CCG responded to Woodside seeking additional information on matters unrelated to this EP.</p> <p>CCG advised there is a heightened risk to the marine environment during decommissioning activities from the potential for spills, marine noise and contamination of inshore areas and reef habitat by chemicals used in the decommissioning. CCG also advised the use of CSV in the shallow water increases risk.</p> <p>Whilst feedback has been received, there were no objections or claims.</p>   | <p>Woodside responded advising:</p> <ul style="list-style-type: none"> <li>• All current and proposed field management and decommissioning activities will be undertaken in accordance with relevant accepted EPs under NOPSEMA’s regulatory jurisdiction.</li> <li>• Noise emissions from a range of sources have been assessed. Noise from vessel activities has the potential to exceed thresholds at the source, however as marine fauna is transient in the Operational Area, individuals are expected to potentially show localised avoidance based on behavioural avoidance responses.</li> <li>• Impacts and risks associated with these activities will be reduced to a level that is as low as reasonably practicable (ALARP) and acceptable to the satisfaction of NOPSEMA.</li> </ul> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see <b>Section 11.7</b>).</p> | <p>Woodside has consulted CCG in the course of preparing this EP. Woodside has assessed the claims or objections raised by CCG. No additional measures or controls have been put in place.</p> <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on CCG’s functions, interests or activities.</p> |
| <p><b>Protect Ningaloo</b></p>  |  |  |

*Stybarrow Plug and Abandonment Environment Plan*

Woodside has discharged its obligations for consultation under Regulation 11A(1) and consultation with Protect Ningaloo for the purpose of 11A(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet was publicly available on the BHP website in May 2022, and the updated Consultation Information Sheet has been available on the Woodside website since February 2023.
- Woodside published advertisements in a national, state, and relevant local newspapers including The Australian, The West Australian, North West Telegraph, Pilbara News, Midwest Times (15 February 2023) and the Geraldton Guardian (17 February 2023) advising of the proposed activities and requesting comments or feedback.
- Consultation information provided to Protect Ningaloo on 17 February 2023 based on their function, interest and activities.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Protect Ningaloo with the opportunity to provide feedback over a 9 month period.

**Summary of information provided and record of consultation:**

- On 17 February 2023, Woodside emailed Protect Ningaloo advising of the proposed activity (Appendix F, reference 2.27) and provided a Consultation Information Sheet.
- On 10 March 2023, Woodside sent a reminder email to Protect Ningaloo advising of the proposed activity (Appendix F, reference 2.27.1) and provided a Consultation Information Sheet.

| <b>Summary of Feedback, Objection or Claim</b>                | <b>Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response</b>   | <b>Inclusion in Environment Plan</b>             |

## Invitation for Feedback: Stakeholder Information Fact Sheet

### Stybarrow Plug & Abandonment and Decommissioning Environment Plans

#### Northern Carnarvon Basin, North West Australia

BHP Billiton Petroleum Pty Ltd (BHP) is planning to undertake subsea decommissioning activities for the Stybarrow field which is located within Commonwealth waters in Production Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately 810-850 m (Figure 1).

The Stybarrow development was in production from 2007 until 2015 and consisted of the Stybarrow floating production, storage and offloading (FPSO) facility and its mooring, subsea facilities including 10 subsea wells (production and water/gas injectors), the associated trees, manifolds, risers, flowlines, and umbilicals, and the disconnectable turret mooring (DTM) buoy which connected the FPSO to the subsea infrastructure.

Decommissioning of the Stybarrow Field is planned to be undertaken in stages under relevant Commonwealth approvals, with regulatory approvals being sought for the following activities:

- Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, umbilicals and the DTM and its moorings);
- Ongoing field management activities, such as equipment inspection and monitoring;.
- The plug and abandonment (P&A) of 10 production/injection wells;
- Removal of the H4 flowline; and
- Proposed leave *in situ* of the DTM anchors (buried) and suction gravity bases for the riser holdbacks and water injection manifold.

This Stakeholder Fact Sheet relates to the activities planned to be managed under two Environment Plans (EPs), these being for:

- The well P&A, H4 flowline removal activities, managed under the Stybarrow P&A Environment Plan (EP).
- The equipment proposed to remain *in situ*, managed under a separate Stybarrow Field Deviation EP.

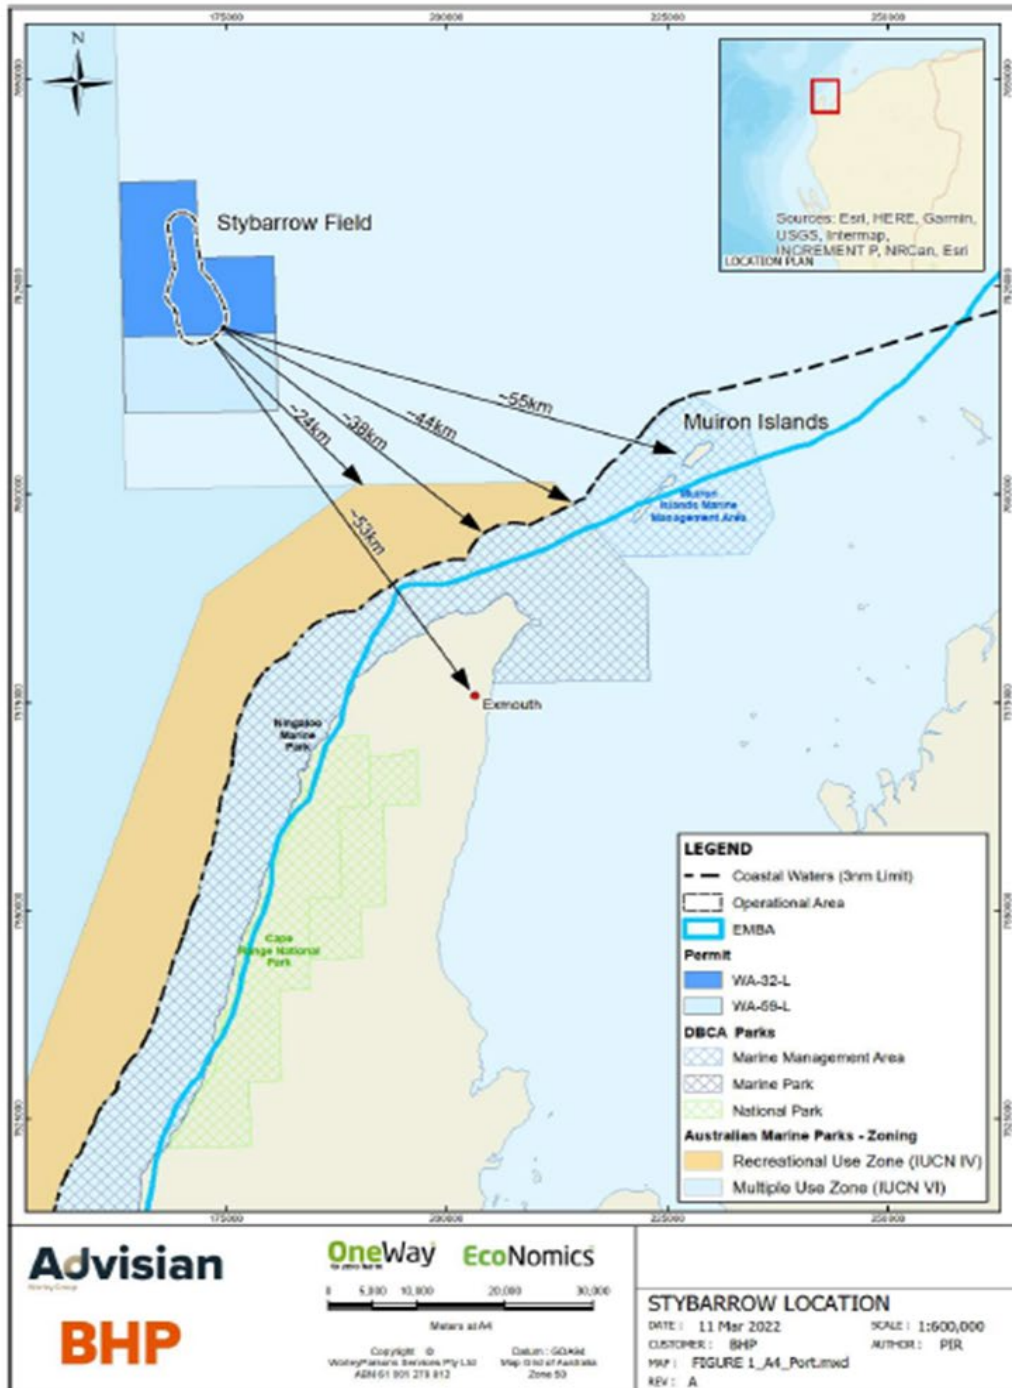

An EP for the subsea equipment removal and ongoing field management activities was submitted in April 2022 and is presently under assessment.

The well P&A and H4 flowline removal activities are planned to commence in 2024, pending approvals, vessel availability and weather constraints. BHP is preparing an EP for this activity for submission to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009. The EP is being written to allow the activity to occur at any time of year as schedules are subject to change and to allow our business flexibility. The P&A activities are required to be completed no later than 30 September 2024 and equipment removal completed no later than 31 March 2025.

BHP Billiton Petroleum (Australia) Pty Ltd is the designated operator on behalf of a joint venture comprising BHP Billiton Petroleum (Australia) Pty Ltd and Woodside Energy Ltd (Woodside), which are the holders of Production Licence WA-32-L.

Figure 1 Stybarrow Location

Document number: 411012-00432-20000-REP-0001\_Rev0 20220526

### Location of Operational Area

The Operational Area defines the spatial boundary within which the proposed activities will take place (Figure 1 and

Figure 2). The Operational Area is temporary for the duration of activities and will comprise a 1,500 m radius around the wells and subsea infrastructure. The nearest point to mainland shore from the Operational Area is approximately 42 km (near the tip of North West Cape) and the closest major town is Exmouth, approximately 52 km to the south east. There are several Commonwealth and State Marine protected areas in the region, the closest being the Gascoyne Australian Marine Park in Commonwealth waters, which is approximately 5 km west of the Operational Area (Figure 1 and Table 1).

Table 1 Marine protected areas in the region

| Value/ Sensitivity  | Approx. Distance from Operational Area |
|---|--|
| Gascoyne Australian Marine Park (Commonwealth)            | 5 km                                   |
| Ningaloo Australian Marine Park (Commonwealth)            | 24 km                                  |
| Ningaloo Marine Park (Western Australia)                  | 36 km                                  |
| Muiron Islands Marine Management Area (Western Australia) | 45 km                                  |

### Description of Activity

Within the scope of EPs covered by this fact sheet, BHP proposes to:

- Plug and abandon the 10 Stybarrow development wells
- Remove the H4 flowline which was blocked due to a sanding event during production. BHP has assessed that the impact to the marine environment would be a release of up to 14m<sup>3</sup> in the event that any hydrocarbons are released during recovery of the flowline.

At the conclusion of these activities, BHP is proposes that the following equipment will be left in situ:

- 9 DTM mooring anchors;
- 9 suction pile riser bases; and
- The suction pile foundation for the water injection manifold.

BHP has undertaken an environmental impact assessment of the feasible decommissioning options for the equipment proposed to be left *in situ*. This assessment concluded that leaving these items *in situ* was a better environmental outcome due to:

- the environmental damage caused by their removal, given they are deeply embedded in the seabed.
- the very low environmental risk associated with the degradation of equipment. The items are of steel construction and do not contain plastics or other known contaminants. The degradation products of steel are not considered toxic and these materials are routinely used in the construction of marinas, breakwaters etc.
- minimal impact to other users of the sea, due to the water depth (800m+)

The locations of the wellheads, H4 flowline and equipment proposed to be left *in situ* are provided in Table 3.

A detailed inventory of subsea infrastructure to be removed or left *in situ* under these activity scopes is included in the respective EPs, which will be available on NOPSEMA's website (<https://www.nopsema.gov.au/>) upon submission.

### Summary of potential risks and associated management measures

Potential risks and management measures associated with the activity have been considered and are summarised in Table 4.

Table 4 Potential risks and associated management measures

| Potential Risks           | Management and/or mitigation measures  |
|---------------------------|--|
| <b>Planned Activities</b> |  |
| Physical presence         | <ul style="list-style-type: none"> <li>BHP's existing infrastructure is marked on nautical charts.</li> <li>Establishment of a 500 m safety exclusion zone around the wells and a 1500 m Operational Area for the duration of the activity.</li> <li>Consultation with relevant stakeholders (e.g., adjacent petroleum titleholders, commercial fishers and their representative organisations, government departments and agencies and local communities) to inform decision making for the proposed activity and the development of the Environment Plan.</li> <li>BHP will notify relevant fishing industry representative organisations/associations and Government maritime safety agencies of the start and end dates for the activity, the MODU location and details of exclusion zones prior to commencement of the P&amp;A and other removal activities.</li> </ul> |
| Light emissions           | <ul style="list-style-type: none"> <li>Lighting is minimised to that required for safety and navigational purposes.</li> </ul>   |
| Noise Emissions           | <ul style="list-style-type: none"> <li>Measures will be in place for interacting with protected marine fauna as per the EPBC Regulations (Part 8) and consistent with relevant Conservation Management Plans</li> <li>Engines, compressors and machinery on the vessel are maintained via the vessel preventative maintenance system (PMS) to ensure equipment is operating efficiently.</li> </ul>  |
| Atmospheric emissions     | <ul style="list-style-type: none"> <li>Air emissions from marine engines meet MARPOL requirements and are routinely maintained.</li> <li>Marine-grade (low sulphur) diesel to be used.</li> </ul>  |
| Routine vessel discharges | <ul style="list-style-type: none"> <li>Routine discharges and vessel waste treatment systems will meet legal / MARPOL requirements.</li> <li>No discharge of oily water exceeding 15 ppm oil in water content.</li> <li>Food-scrap macerated prior to discharge.</li> <li>Maintain biosecurity requirements such as anti-fouling certification, ballast water and biofouling controls.</li> </ul>  |

| Potential Risks                            | Management and/or mitigation measures   |
|--|---|
|  | <ul style="list-style-type: none"> <li>Chemical use will be managed in accordance with BHP and contractor chemical selection and approval procedures</li> </ul>   |
| Subsea discharges                          | <ul style="list-style-type: none"> <li>Chemical use will be managed in accordance with BHP and contractor chemical selection and approval procedures.</li> <li>All routine marine discharges will be managed according to legislative and regulatory requirements and BHP's Environment Performance Standards where applicable.</li> </ul>  |
| <b>Unplanned Risks</b>                     |   |
| Unplanned releases, including hydrocarbons | <ul style="list-style-type: none"> <li>All personnel undertaking activities will undergo relevant inductions and training</li> <li>Procedures for lifts, equipment maintenance, inspections and bunding</li> <li>All offshore activities will be managed in accordance with lifting and transfer procedures</li> <li>Well barrier management shall be implemented, tested and monitored</li> <li>Recovery of solid wastes overboard where safe and practicable to do so</li> <li>Implementation of Oil Pollution Emergency Plan (OPEP).</li> <li>No heavy fuels used – only marine diesel oil (MDO).</li> <li>Appropriate vessel spill response plans, equipment and materials will be in place and maintained</li> </ul> |
| Marine fauna interaction                   | <ul style="list-style-type: none"> <li>Measures will be in place for interacting with protected marine fauna as per the Environment Protection Biodiversity Conservation (EPBC) Regulations (Part 8).</li> </ul>  |
| Introduced marine species                  | <ul style="list-style-type: none"> <li>BHP contracted vessels comply with Australian biosecurity requirements and guidance, and Australian ballast water requirements.</li> <li>Vessels will be assessed and managed in line with BHP procedures to prevent the introduction of invasive marine species.</li> </ul>   |
| Vessel collision                           | <ul style="list-style-type: none"> <li>Marine notifications will be made to relevant stakeholders, describing the location of the activity and exclusion/cautionary zones to prevent the risk of vessel collisions</li> </ul>   |

### Protecting Our People and the Environment

Safety of our people and the communities in which we operate always comes first. Identifying, controlling, and mitigating safety risks is managed through an overarching, consistent approach guided by BHP's Risk Management governance framework, with supporting processes and performance standards. All activities (routine and non-routine) will be performed in accordance with the industry-leading standards established in BHP's Charter, HSEC Framework and Controls, BHP's Wells and Seismic Delivery Management System, Engineering Standards and Procedures, the Environment Plan and the NOPSEMA-accepted Well Operations Management Plan (WOMP) and NOPSEMA-accepted Vessel Safety Case.

Offshore petroleum activities are regulated through a robust and comprehensive environmental protection regime administered by NOPSEMA under the Commonwealth *Offshore Petroleum and Greenhouse Gas Storage Act 2006*. BHP undertakes risk assessments for all environmental aspects of a petroleum activity and stringently adheres to the regulatory regime.

The objective of the Environment Plan is to ensure that potential adverse impacts on the environment associated with activities, during both routine and non-routine activities, are identified, and will be continuously reduced to as low as reasonably practicable (ALARP) and an acceptable level. BHP is committed to understanding the impacts of our activities on stakeholders with an interest in the Stybarrow field and seeks feedback as part of the development of the EP.

### Responding to Emergencies

BHP's incident response plans are accepted by the regulator NOPSEMA. The Commonwealth Oil Pollution Emergency Plan (OPEP) is required by law under the Environmental Regulations and forms an appendix to the full EP. The OPEP outlines responsibilities, specific procedures and identifies resources available in the unlikely event of an oil pollution incident. BHP maintains a constant vigilance and readiness to prevent and/or respond to hydrocarbon loss of containment incidents. The readiness and competency of BHP to respond to incidents is maintained and tested by conducting activity-specific emergency response exercises.

---

Should you have any questions, concerns or grievances regarding these activities or any other BHP Petroleum activities, please call BHP WA Community Hotline on **1800 421 077** or send an email to **[bhppetexternalaffairs@bhp.com](mailto:bhppetexternalaffairs@bhp.com)**

BHP believes in putting health and safety first, being environmentally responsible and supporting our communities.

Fact Sheet - Stybarrow P&A and Decommissioning Environment Plans.pdf;

Dear AMSA and AHO

BHP is planning for the next stage of its ongoing safe and sustainable closure of the Stybarrow Field in Commonwealth waters, approximately 53 km north-west of Exmouth, Western Australia.

Production from the Stybarrow Field commenced in 2007 and ceased in 2015. Since that time the following cessation activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected (except for an abandoned flowline which was blocked by sand and gas hydrate during production, which is disconnected, sealed and lying on the seabed).
- All production, gas injection and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed from the field in August 2015.

BHP consulted stakeholders in March 2022 on the first phase of decommissioning, these being activities for the proposed removal of the Stybarrow subsea equipment and ongoing field management activities until the equipment is removed. Feedback from stakeholders was considered in planning the Stybarrow Equipment Removal Environment Plan (EP), which was submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in April 2022 for assessment.

BHP is now seeking stakeholder feedback on well plug and abandonment (P&A) and decommissioning activities, which are proposed to be managed under two separate Environment Plans, these being:

- Stybarrow P&A EP
- Stybarrow Field Deviation EP

A summary of proposed activities to be managed under each EP follows and a fact sheet is attached providing more detail on infrastructure location and activity, as well as a summary of risks and associated management measures.

Fact Sheet - Stybarrow P&A and Decommissioning Environment Plans.pdf;

Dear stakeholder

BHP is planning for the next stage of its ongoing safe and sustainable closure of the Stybarrow Field in Commonwealth waters, approximately 53 km north-west of Exmouth, Western Australia.

Production from the Stybarrow Field commenced in 2007 and ceased in 2015. Since that time the following cessation activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected (except for an abandoned flowline which was blocked by sand and gas hydrate during production, which is disconnected, sealed and lying on the seabed).
- All production, gas injection and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed from the field in August 2015.

BHP consulted stakeholders in March 2022 on the first phase of decommissioning, these being activities for the proposed removal of the Stybarrow subsea equipment and ongoing field management activities until the equipment is removed. Feedback from stakeholders was considered in planning the Stybarrow Equipment Removal Environment Plan (EP), which was submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in April 2022 for assessment.

BHP is now seeking stakeholder feedback on well plug and abandonment (P&A) and decommissioning activities, which are proposed to be managed under two separate Environment Plans, these being:

- Stybarrow P&A EP
- Stybarrow Field Deviation EP

A summary of proposed activities to be managed under each EP follows and a fact sheet is attached providing more detail on infrastructure location and activity, as well as a summary of risks and associated management measures.

## Commercial Fishing Overview

## *Stybarrow Plug and Abandonment Environment Plan*

Commercial fisheries have been identified as being relevant to the proposed activities on the basis of fishing licence overlap with the proposed Operational (activity) Area, as well as consideration of fishing effort data, fishing methods and water depth.

### **Commonwealth fisheries**

There are four overlapping Commonwealth fisheries, of which the Western Deepwater Trawl Fishery has been identified as relevant based on the identification criteria. BHP will consult representative organisations and licence holders entitled to fish in the Operational Area.

### **State fisheries**

There are six overlapping State fisheries, of which the following fisheries have been identified as being relevant based on the identification criteria. Individual licence holders in these fisheries will be consulted.

- Mackerel Managed Fishery (Area 3)
- West Coast Deep Sea Crustacean Managed Fishery

The following government departments and organisations will also be consulted on behalf of licence holders entitled to fish in the Operational Area:

#### **Commonwealth Fisheries:**

- Australian Fisheries Management Authority
- Australian Southern Bluefin Tuna Industry Association on behalf of licence holders in the Southern Bluefin Tuna and Western Skipjack Tuna Fisheries
- Department of Agriculture, Water and the Environment
- Commonwealth Fisheries Association on behalf of licence holders in the Western Deepwater Trawl, Western Tuna and Billfish and Western Skipjack Tuna Fisheries
- Tuna Australia on behalf of licence holders in the Western Tuna and Billfish Fishery

#### **State Fisheries and recreational fishing:**

- Department of Primary Industry and Resources
- Western Australian Fishing Industry Council
- Pearl Producers Association
- Recfishwest

## **Your Feedback**

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Regards,

**BHP**

Fact Sheet - Stybarrow P&A and Decommissioning Environment Plans.pdf;

Dear tourism/charter operator

BHP is planning for the next stage of its ongoing safe and sustainable closure of the Stybarrow Field in Commonwealth waters, approximately 53 km north-west of Exmouth, Western Australia.

Production from the Stybarrow Field commenced in 2007 and ceased in 2015. Since that time the following cessation activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected (except for an abandoned flowline which was blocked by sand and gas hydrate during production, which is disconnected, sealed and lying on the seabed).
- All production, gas injection and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed from the field in August 2015.

BHP consulted stakeholders in March 2022 on the first phase of decommissioning, these being activities for the proposed removal of the Stybarrow subsea equipment and ongoing field management activities until the equipment is removed. Feedback from stakeholders was considered in planning the Stybarrow Equipment Removal Environment Plan (EP), which was submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in April 2022 for assessment.

BHP is now seeking stakeholder feedback on well plug and abandonment (P&A) and decommissioning activities, which are proposed to be managed under two separate Environment Plans, these being:

- Stybarrow P&A EP
- Stybarrow Field Deviation EP

## Stybarrow Plug and Abandonment Environment Plan

A summary of proposed activities to be managed under each EP follows and a fact sheet is attached providing more detail on infrastructure location and activity, as well as a summary of risks and associated management measures.

### Activity Overview

Typically, two (but up to six) project vessels will be in the Operational Area during well P&A and subsea infrastructure removal activities.  |
| <b>Operational area:</b>   | A 500 m safety exclusion zone around the wells and a 1,500 m radius temporary Operational Area (precautionary) around the wells and subsea equipment for the duration of the activity.  |

### Your Feedback

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Regards,

**Commercial Fishing Overview**

## *Stybarrow Plug and Abandonment Environment Plan*

Commercial fisheries have been identified as being relevant to the proposed activities on the basis of fishing licence overlap with the proposed Operational (activity) Area, as well as consideration of fishing effort data, fishing methods and water depth.

### **Commonwealth fisheries**

There are four overlapping Commonwealth fisheries, of which the Western Deepwater Trawl Fishery has been identified as relevant based on the identification criteria. BHP will consult representative organisations and licence holders entitled to fish in the Operational Area.

### **State fisheries**

There are six overlapping State fisheries, of which the following fisheries have been identified as being relevant based on the identification criteria. Individual licence holders in these fisheries will be consulted.

- Mackerel Managed Fishery (Area 3)
- West Coast Deep Sea Crustacean Managed Fishery

The following government departments and organisations will also be consulted on behalf of licence holders entitled to fish in the Operational Area:

### **Commonwealth Fisheries:**

- Australian Fisheries Management Authority
- Australian Southern Bluefin Tuna Industry Association on behalf of licence holders in the Southern Bluefin Tuna and Western Skipjack Tuna Fisheries
- Department of Agriculture, Water and the Environment
- Commonwealth Fisheries Association on behalf of licence holders in the Western Deepwater Trawl, Western Tuna and Billfish and Western Skipjack Tuna Fisheries
- Tuna Australia on behalf of licence holders in the Western Tuna and Billfish Fishery

### **State Fisheries and recreational fishing:**

- Department of Primary Industry and Resources
- Western Australian Fishing Industry Council
- Pearl Producers Association
- Recfishwest

## **Your Feedback**

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Fact Sheet - Stybarrow P&A and Decommissioning Environment Plans.pdf;

Dear DISER

BHP is planning for the next stage of its ongoing safe and sustainable closure of the Stybarrow Field in Commonwealth waters, approximately 53 km north-west of Exmouth, Western Australia.

Production from the Stybarrow Field commenced in 2007 and ceased in 2015. Since that time the following cessation activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected (except for an abandoned flowline which was blocked by sand and gas hydrate during production, which is disconnected, sealed and lying on the seabed).
- All production, gas injection and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed from the field in August 2015.

BHP consulted stakeholders in March 2022 on the first phase of decommissioning, these being activities for the proposed removal of the Stybarrow subsea equipment and ongoing field management activities until the equipment is removed. Feedback from stakeholders was considered in planning the Stybarrow Equipment Removal Environment Plan (EP), which was submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in April 2022 for assessment.

BHP is now seeking stakeholder feedback on well plug and abandonment (P&A) and decommissioning activities, which are proposed to be managed under two separate Environment Plans, these being:

- Stybarrow P&A EP
- Stybarrow Field Deviation EP

A summary of proposed activities to be managed under each EP follows and a fact sheet is attached providing more detail on infrastructure location and activity, as well as a summary of risks and associated management measures.

Typically, two (but up to six) project vessels will be in the Operational Area during well P&A and subsea infrastructure removal activities. |
| <b>Operational area:</b>     | A 500 m safety exclusion zone around the wells and a 1,500 m radius temporary Operational Area (precautionary) around the wells and subsea equipment for the duration of the activity.   |

### Your Feedback

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Regards,

**BHP**

Fact Sheet - Stybarrow P&A and Decommissioning Environment Plans.pdf;

Dear Recfishwest

BHP is planning for the next stage of its ongoing safe and sustainable closure of the Stybarrow Field in Commonwealth waters, approximately 53 km north-west of Exmouth, Western Australia.

Production from the Stybarrow Field commenced in 2007 and ceased in 2015. Since that time the following cessation activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected (except for an abandoned flowline which was blocked by sand and gas hydrate during production, which is disconnected, sealed and lying on the seabed).
- All production, gas injection and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed from the field in August 2015.

BHP consulted stakeholders in March 2022 on the first phase of decommissioning, these being activities for the proposed removal of the Stybarrow subsea equipment and ongoing field management activities until the equipment is removed. Feedback from stakeholders was considered in planning the Stybarrow Equipment Removal Environment Plan (EP), which was submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in April 2022 for assessment.

BHP is now seeking stakeholder feedback on well plug and abandonment (P&A) and decommissioning activities, which are proposed to be managed under two separate Environment Plans, these being:

- Stybarrow P&A EP
- Stybarrow Field Deviation EP

A summary of proposed activities to be managed under each EP follows and a fact sheet is attached providing more detail on infrastructure location and activity, as well as a summary of risks and associated management measures.

**Activity Overview**

**Commercial Fishing Overview**

## *Stybarrow Plug and Abandonment Environment Plan*

Commercial fisheries have been identified as being relevant to the proposed activities on the basis of fishing licence overlap with the proposed Operational (activity) Area, as well as consideration of fishing effort data, fishing methods and water depth.

### **Commonwealth fisheries**

There are four overlapping Commonwealth fisheries, of which the Western Deepwater Trawl Fishery has been identified as relevant based on the identification criteria. BHP will consult representative organisations and licence holders entitled to fish in the Operational Area.

### **State fisheries**

There are six overlapping State fisheries, of which the following fisheries have been identified as being relevant based on the identification criteria. Individual licence holders in these fisheries will be consulted.

- Mackerel Managed Fishery (Area 3)
- West Coast Deep Sea Crustacean Managed Fishery

The following government departments and organisations will also be consulted on behalf of licence holders entitled to fish in the Operational Area:

### **Commonwealth Fisheries:**

- Australian Fisheries Management Authority
- Australian Southern Bluefin Tuna Industry Association on behalf of licence holders in the Southern Bluefin Tuna and Western Skipjack Tuna Fisheries
- Department of Agriculture, Water and the Environment
- Commonwealth Fisheries Association on behalf of licence holders in the Western Deepwater Trawl, Western Tuna and Billfish and Western Skipjack Tuna Fisheries
- Tuna Australia on behalf of licence holders in the Western Tuna and Billfish Fishery

### **State Fisheries and recreational fishing:**

- Department of Primary Industry and Resources
- Western Australian Fishing Industry Council
- Pearl Producers Association
- Recfishwest

## **Your Feedback**

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Regards,

**BHP**

| <b>Vessels:</b>              | Semi submersible mobile offshore drilling unit (MODU) (Dynamic positioning)<br>Offshore support vessels, such as general support/supply vessels, construction support vessels/installation vessels. Typically, two (but up to six) project vessels will be in the Operational Area during well P&A and subsea infrastructure removal activities. |
| <b>Operational area:</b>     | A 500 m safety exclusion zone around the wells and a 1,500 m radius temporary Operational Area (precautionary) around the wells and subsea equipment for the duration of the activity.   |

**Commercial Fishing Overview**

## *Stybarrow Plug and Abandonment Environment Plan*

Commercial fisheries have been identified as being relevant to the proposed activities on the basis of fishing licence overlap with the proposed Operational (activity) Area, as well as consideration of fishing effort data, fishing methods and water depth.

### **Commonwealth fisheries**

There are four overlapping Commonwealth fisheries, of which the Western Deepwater Trawl Fishery has been identified as relevant based on the identification criteria. BHP will consult representative organisations and licence holders entitled to fish in the Operational Area.

### **State fisheries**

There are six overlapping State fisheries, of which the following fisheries have been identified as being relevant based on the identification criteria. Individual licence holders in these fisheries will be consulted.

- Mackerel Managed Fishery (Area 3)
- West Coast Deep Sea Crustacean Managed Fishery

The following government departments and organisations will also be consulted on behalf of licence holders entitled to fish in the Operational Area:

### **Commonwealth Fisheries:**

- Australian Fisheries Management Authority
- Australian Southern Bluefin Tuna Industry Association on behalf of licence holders in the Southern Bluefin Tuna and Western Skipjack Tuna Fisheries
- Department of Agriculture, Water and the Environment
- Commonwealth Fisheries Association on behalf of licence holders in the Western Deepwater Trawl, Western Tuna and Billfish and Western Skipjack Tuna Fisheries
- Tuna Australia on behalf of licence holders in the Western Tuna and Billfish Fishery

### **State Fisheries and recreational fishing:**

- Department of Primary Industry and Resources
- Western Australian Fishing Industry Council
- Pearl Producers Association
- Recfishwest

## **Your Feedback**

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Regards,

**BHP**

Fact Sheet - Stybarrow P&A and Decommissioning Environment Plans.pdf;

Dear Ningaloo Coast World Heritage Advisory Committee

BHP is planning for the next stage of its ongoing safe and sustainable closure of the Stybarrow Field in Commonwealth waters, approximately 53 km north-west of Exmouth, Western Australia.

Production from the Stybarrow Field commenced in 2007 and ceased in 2015. Since that time the following cessation activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected (except for an abandoned flowline which was blocked by sand and gas hydrate during production, which is disconnected, sealed and lying on the seabed).
- All production, gas injection and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed from the field in August 2015.

BHP consulted stakeholders in March 2022 on the first phase of decommissioning, these being activities for the proposed removal of the Stybarrow subsea equipment and ongoing field management activities until the equipment is removed. Feedback from stakeholders was considered in planning the Stybarrow Equipment Removal Environment Plan (EP), which was submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in April 2022 for assessment.

BHP is now seeking stakeholder feedback on well plug and abandonment (P&A) and decommissioning activities, which are proposed to be managed under two separate Environment Plans, these being:

- Stybarrow P&A EP
- Stybarrow Field Deviation EP

A summary of proposed activities to be managed under each EP follows and a fact sheet is attached providing more detail on infrastructure location and activity, as well as a summary of risks and associated management measures.

| <b>Operational area:</b>     | A 500 m safety exclusion zone around the wells and a 1,500 m radius temporary Operational Area (precautionary) around the wells and subsea equipment for the duration of the activity.   |

### Your Feedback

Your feedback on the proposed activity and our response will be provided to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), as is required under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.

As a relevant stakeholder you are invited to provide comments. The Environment Plan will contain a summary of all comments received. However, BHP will not use or disclose your personal information in the Environment Plan. Full transcripts of all correspondence will be included in a separate sensitive information part of the Environment Plan provided to NOPSEMA.

Please provide comment as soon as practicable. Comments can be made by email, letter or by phone (refer to attached Fact Sheet for contact details) by close of business on **24 June 2022**.

Regards,

**BHP**

1.26 Presentation to Exmouth Community Liaison Group (21 September 2022)

**INTRODUCTION**

**Disclaimer, important notes and assumptions**

**Information**

This presentation has been prepared by Woodside Energy Group Ltd ("Woodside"). By accessing/attending this presentation you agree to be bound by the following conditions. All information included in this presentation, including any forward-looking statements, speak only as of the date of this presentation. Except as required by law, neither Woodside, its related bodies corporate, nor any of their respective officers, directors, employees, advisers or representatives ("Beneficiaries") intends to, or undertakes to, or assumes any obligation to, provide any additional information or revise the statements in this presentation, whether as a result of a change in expectations or assumptions, new information, future events, results or circumstances.

This presentation may contain industry, market and competitive position data that is based on industry publications and studies conducted by third parties as well as Woodside's internal estimates and research. While Woodside believes that each of these publications and third party studies is reliable, Woodside has not independently verified the market and industry data obtained from these third party sources. Accordingly, undue reliance should not be placed on any of the industry, market and competitive position data contained in this presentation.

To the maximum extent permitted by law, neither Woodside, its related bodies corporate, nor any of their respective Beneficiaries, assume any responsibility for, or make any representation or warranty (express or implied) as to, the fairness, currency, accuracy, adequacy, reliability or completeness of the information in this presentation.

**No offer or advice**

This presentation is not intended to and does not constitute, form part of, or contain an offer or invitation to sell to Woodside shareholders (or any other person), or a solicitation of an offer from Woodside shareholders (or any other person), or a solicitation of any vote or approval from Woodside shareholders (or any other person) in any jurisdiction. This presentation has been prepared without reference to the investment objectives, financial and taxation situation or particular needs of any Woodside shareholder or any other person. The information and recommendations contained in this presentation do not constitute, and should not be taken as, financial product advice. The Woodside board encourages you to seek independent legal, financial, taxation and other professional advice before making any investment decision.

This presentation shall not be distributed, transmitted, published, reproduced or otherwise made available to any other person, in whole or in part, directly or indirectly, for any purposes whatsoever. In particular, this presentation and the information contained herein may not be taken or transmitted, in, into or from and may not be copied, forwarded, distributed or transmitted in or into any jurisdiction in which such release, publication or distribution would be unlawful. The distribution of this presentation may be restricted by law, and persons into whose possession this presentation comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction.

**Forward looking statements**

This presentation may contain forward-looking statements with respect to Woodside's business and operations, market conditions, results of operations and financial condition which reflect Woodside's views held as at the date of this presentation. All statements, other than statements of historical or present facts, are forward-looking statements and generally may be identified by the use of forward-looking words such as 'guidance', 'foresee', 'likely', 'potential', 'anticipate', 'believe', 'aim', 'estimate', 'expect', 'intend', 'may', 'target', 'plan', 'forecast', 'project', 'schedule', 'will', 'should', 'seek' and other similar words or expressions.

Forward-looking statements are not guarantees of future performance and are subject to inherent known and unknown risks, uncertainties, assumptions and other factors, many of which are beyond the control of Woodside, its related bodies corporate and their respective Beneficiaries. Details of the key risks relating to Woodside and its business can be found in the "Risk" section of Woodside's most recent Annual Report released to the Australian Securities Exchange and in Woodside's filings with the U.S. Securities and Exchange Commission. You should review and have regard to these risks when considering the information contained in this presentation.

Investors are strongly cautioned not to place undue reliance on any forward-looking statements. Actual results or performance may vary materially from those expressed in, or implied by, any forward-looking statements.

**Other important information**

All references to dollars, cents or \$ in this presentation are to US currency, unless otherwise stated. References to "Woodside" may be references to Woodside Energy Group Ltd or its applicable subsidiaries. This presentation does not include any express or implied prices at which Woodside will buy or sell financial products.

EXMOUTH COMMUNITY REFERENCE GROUP

**AGENDA**

- Operations update
- Activity update
- Environment Plans
- Community partnerships

3 |

ENVIRONMENT PLANS

**Stybarrow Decommissioning**

- Stybarrow ceased production in 2015 and planning is underway for decommissioning in 2023/24
- Decommissioning activities will be covered by three Environment Plans, all currently under assessment

**Decommissioning and Field Management (Cth)**

- Submitted for assessment April 2022
- Proposal to remove subsea equipment including wellheads, flexibles, DTM, moorings and ancillary subsea equipment

**End State Decommissioning (Cth)**

- Submitted for assessment July 2022
- Proposal to leave *in situ* anchors, suction bases and a historical wellhead that was unable to be removed previously

**Plug & Abandonment (Cth)**

- Submitted for assessment August 2022
- Proposal to plug and abandon 10 Stybarrow wells

12 |

## 2. Activity Update (February 2023)

### 2.1 Activity Update - Information Sheet – Stybarrow Decommissioning Environment Plans (16 February 2023)

STAKEHOLDER CONSULTATION

# INFORMATION SHEET

February 2023

## ACTIVITY UPDATE – STYBARROW DECOMMISSIONING ENVIRONMENT PLANS

### EXMOUTH PLATEAU SUB-BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an Environment Plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure the activity is carried out in a manner that is consistent with the principles of Ecologically Sustainable Development (ESD), by which the environmental impacts and risks of the activity are reduced to As Low As Reasonably Practicable (ALARP) and of an acceptable level. We want relevant persons whose functions, interests or activities may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

#### Overview

Woodside is planning to undertake subsea decommissioning activities for the Stybarrow field (previously operated by BHP Petroleum Pty Ltd (BHP)), which is located in Commonwealth waters in permit area WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately 810 - 850m (**Figure 1**).

Regulatory approvals are being sought for the following activities:

#### Stybarrow plug and production (P&A) EP

- Well P&A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.
- Potential unblocking of the H4 flowline, if deemed feasible.

#### Stybarrow Decommissioning and Field Management EP

- Removal of subsea equipment including wellheads, trees, manifolds, risers, flexible flowlines, umbilicals.
- Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Recovery of the DTM may require it to be towed to shallower water outside of permit area WA-32-L. It is intended that the DTM will be towed to WA-12-L, adjacent to the Woodside-operated Griffin field, in water depths of about 120 m and, that the DTM would be placed directly onto a vessel, not placed on the seabed.
- Ongoing field management activities (equipment monitoring and inspection).

#### Stybarrow Field Deviation EP

- Proposed leave *in situ* of the nine DTM drag anchors (buried), nine suction piles for the riser holdbacks and the historical exploration wellhead, Eskdale-1, which was unable to be removed following its drilling and abandonment in 2003.

P&A activities are anticipated to take approximately 6-9 months to complete, removal activities are anticipated to take approximately 6 months to complete and DTM removal activities are anticipated to take approximately 2-4 weeks to complete.

Decommissioning of the Stybarrow field is planned to be undertaken following acceptance of the EP, with work anticipated to commence around late 2023, commencing with P&A pre-execution activities, subject to vessel availability and weather constraints.

The P&A activities are required to be completed by 30 September 2024 and equipment removal completed by 31 March 2025, as per NOPSEMA General Direction 833.

Following removal, Woodside proposes to dispose of equipment onshore in accordance with applicable requirements, assessing all options to reduce waste through reuse or recycling of recovered equipment.

The equipment locations and proposed activity or end state is summarised at **Table 2**.

EPs for these activities have previously been submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for assessment under the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009*.

This Activity Update provides an overview of proposed activities under each of the three EPs, as well as additional information or changes to information previously provided.

Feedback from relevant persons as part of current consultation activities will be included in revisions to the EPs, which will be submitted to NOPSEMA for further assessment.

#### Stybarrow Decommissioning Background

The Stybarrow development was in production from 2007 to 2015 and consisted of the Stybarrow floating production, storage and offloading (FPSO) facility and its moorings, subsea facilities including 10 subsea wells (production and water/gas injectors), the associated trees, manifolds, risers, flowlines, umbilicals and the DTM buoy which connected the FPSO to the subsea infrastructure.

Since 2015 the following activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected, with the exception of the H4 flowline which was blocked by sand and hydrates during production. The H4 flowline is disconnected, sealed and lying on the seabed. Hydrates are ice like solids that form when water and natural gas combine at high pressure and low temperatures. They are stable and pose no impact to the environment.

- All production, gas and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed the field in August 2015.

During an echo sounding survey of the facilities in 2016, the DTM was found to have lost buoyancy and is now lying on the seabed at a depth of approximately 820 meters. Since then, the buoyancy modules from the risers have been removed to eliminate the risk of floating equipment coming to the sea surface.

**Communications with mariners**

**Well P&A:** The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centers within WA-32-L. It is intended that a temporary 500 m exclusion zone will apply around the MODU and the associated project vessels during P&A activities.

**Removal activities:** The Operational Area includes the area encompassing an approximate 1,500 m radius around the subsea infrastructure and wellheads. It is intended that a temporary 500 m exclusion zone will apply around the Construction Support Vessel and the associated project vessels during removal activities.

The DTM has an existing 1200 m radius petroleum safety zone which will continue to be in place until it is removed. It is intended that a temporary 500 m exclusion zone will apply around the HLV and the associated project vessels during the removal of the DTM.

Commercial fishers and other marine users are permitted to use but should take care when entering the Operational Area and remain clear of the Exclusion Zone.

It is intended that subsea infrastructure which is proposed to be left in situ will continue to be marked, and infrastructure proposed to be removed will continue to be marked on navigation charts until it is removed.

It is anticipated that vessels will operate 24 hours per day for the duration of the activities. The duration of these activities is subject to change due to project schedule requirements, vessel availability, weather or unforeseen circumstances.

Typical subsea cutting activity

**Decommissioning assessment**

Woodside has undertaken an assessment to identify potential risks to the marine environment and relevant persons, considering timing, duration, location and potential impacts arising from the planned activities. A number of mitigation and management measures will be implemented and are summarised in **Table 3**. Further details will be provided in the revised EPs.

In preparing the EP revisions, Woodside's intent is to minimise environmental and social impacts associated with the proposed activities, and we are seeking comments and input from relevant persons to inform our decision making and for the intended outcome of consultation (see above).

**Joint Venture**

Woodside Energy (Australia) Pty Ltd is operator and sole titleholder of WA-32-L.

Woodside Energy (Australia) Pty Ltd is operator of WA-12-L SR on behalf of Joint Venture participant Mobil Australia Resources Company Pty Ltd.

**We welcome your feedback by 17 March 2023.**

**Environment That May Be Affected (EMBA)**

The environment that may be affected (EMBA) is the largest spatial extent where unplanned events could potentially have an environmental consequence. For this EP, the broadest extent of the EMBA has been determined by the highly unlikely event of a hydrocarbon release from both the direct and indirect activities the subject of the EP. The worst-case credible spill scenario for these EPs is loss of well containment during the well P&A activities.

The EMBA does not represent the predicted impact of the highly unlikely oil release. Rather, the EMBA represents the merged area of many possible paths that a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release.

This means that in the highly unlikely event that a hydrocarbon release does occur, the entire EMBA will not be affected and the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

There are three potential EMBA's for this EP, reflecting the activities and the different locations that the activity could occur.

Each of the EMBA's are presented in Figure 2 below and summarised as:

- **Loss of Well Containment EMBA** : Primary activity of the Well P&A EP – P&A of 10 production/injection wells by a MODU.
- **Facilities Equipment Removal EMBA** : Primary activity for the Stybarrow Decommissioning and Field Management EP – Recovery of subsea infrastructure using a CSV.
- **DTM Tow Location EMBA** : Option for the removal of the DTM, an activity within the Stybarrow Decommissioning and Field Management EP – DTM towed from its current location approximately 65 km to permit area WA-12-L SR (adjacent to Griffin permit area) for recovery by the HLV in shallow water. This EMBA has been adopted from the worst-case spill from a vessel collision at the Griffin removal location.

Given the buried nature of the infrastructure proposed to remain in situ and the absence of related activities for the infrastructure, the EMBA for this EP is the footprint of the equipment.

Figure 2. Environment that may be affected (EMBA) for the proposed activity.

**Mitigation and Management Measures**

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from the decommissioning activities considering timing, duration, location.

A number of mitigation and management measures for the removal of the RTM are outlined in **Table 3**. Further details will be provided in the EP.

**Table 3. Summary of key risks and/or Impacts and management measures for the Stybarrow Decommissioning activities. Key risks and/or Impacts and management measure apply to activities occurring within the title area and tow location.**

| Potential Impact/ Risk  | Description of Source of Potential Impact/ Risk  | Description of Potential Impacts  | Proposed Mitigation and/ or Management Measure  |
|---|--|---|---|
| <b>Planned</b>  |  |   |   |
| <b>Physical presence and interactions with other marine users</b>   | <ul style="list-style-type: none"> <li>The activities will be undertaken using a range of project vessels, namely a MODU, CSV and a HLV, along with general support project vessels. A 500 m petroleum safety zone will apply around the equipment locations. If the DTM is towed out of title, a 500 m exclusion zone will apply to the DTM and project vessels during tow and lifting.</li> <li>Presence of vessels in the safety and exclusion zones has the potential to result in interaction with third-party marine users.</li> </ul> | <ul style="list-style-type: none"> <li>Interference with commercial shipping.</li> <li>Interference with commercial fishing activity.</li> <li>Displacement of recreational fishing activity.</li> <li>Interaction with existing oil and gas infrastructure.</li> </ul>   | <ul style="list-style-type: none"> <li>500 m petroleum safety zone maintained around equipment until removal.</li> <li>500 m exclusion zone established around the MODU and project vessels.</li> <li>Activity support vessel(s) to communicate with third-party vessels to assist in maintaining the petroleum safety zone/ exclusion zones.</li> <li>Consultation with relevant persons for the consultation outcomes.</li> </ul> |
| <b>Physical presence of Infrastructure on seabed causing seabed disturbance Interference and displacement of other marine users</b> | <ul style="list-style-type: none"> <li>Excess marine growth may need to be removed from the equipment prior to removal using high-pressure water jetting.</li> <li>Equipment deburial and short-term wet parking of infrastructure may be required.</li> </ul>   | <ul style="list-style-type: none"> <li>Removal activities may result in localised, temporary seabed disturbance from resuspension of sediments.</li> <li>Marine growth removal may result in highly localised seabed disturbance as debris deposits on the seabed.</li> <li>Interference or displacement of commercial fishing activity.</li> <li>Displacement of recreational fishing activity.</li> </ul> | <ul style="list-style-type: none"> <li>Use controlled recovery techniques to limit seabed disturbance.</li> <li>Equipment to be marked on navigational charts until removal.</li> </ul>   |
| <b>Discharges: Project Vessels</b>  | <ul style="list-style-type: none"> <li>Sewage, greywater and putrescible waste will be discharged from project vessels.</li> <li>Bilge water, deck drainage and brine and cooling water may also be discharged.</li> </ul>   | <ul style="list-style-type: none"> <li>Short-term, localised impacts to water quality i.e. eutrophication from the addition of nutrients from these discharge fluids.</li> </ul>  | <ul style="list-style-type: none"> <li>All routine marine discharges will be managed according to legislative and regulatory requirements.</li> </ul>   |
| <b>Discharges: Decommissioning Activities</b>   | <ul style="list-style-type: none"> <li>During equipment removal, small volumes of treated seawater within the equipment will be released into the surrounding environment.</li> <li>Chemical use may be required to remove marine growth.</li> <li>During recovery of the blocked H4 flowline, it may be necessary to cut and recover rather than unblocking, resulting in a release of up to 14m<sup>3</sup> crude oil and sand</li> </ul>  | <ul style="list-style-type: none"> <li>Localised short-term impacts to water quality from the release of seawater ballast and residual chemicals and hydrocarbons.</li> </ul>   | <ul style="list-style-type: none"> <li>Chemical reviews performed on all previously approved chemicals to confirm potential impacts are reduced to ALARP.</li> </ul>  |

| Potential Impact/ Risk   | Description of Source of Potential Impact/ Risk  | Description of Potential Impacts  | Proposed Mitigation and/ or Management Measure   |
|--|--|---|--|
| <b>Light Emissions</b>   | <ul style="list-style-type: none"> <li>Project vessels and MODU will use external lighting to navigate and conduct safe operations at night.</li> <li>Vessel lighting will also be used to communicate the vessel's presence to other marine users (i.e. navigation/ warning lights).</li> <li>Light emissions may be generated by flaring during well P&amp;A if required. Flaring is only expected to occur for short durations (hours).</li> </ul>  | <ul style="list-style-type: none"> <li>Light emissions have the potential to affect fauna such as marine turtles and birds by influencing changes in behaviour or impacting their orientation.</li> </ul>   | <ul style="list-style-type: none"> <li>Implement relevant controls in the National Light Pollution Guidelines for Wildlife including Marine Turtles, Seabirds and Migratory Shorebirds (2020).</li> <li>Lighting will be limited to the minimum required for navigational and safety requirements except in emergency circumstances.</li> <li>Maintain a 12 km buffer from turtle nesting beaches during towing and lifting activities to avoid impacts to turtle hatchlings.</li> </ul>   |
| <b>Noise Emissions</b>   | <ul style="list-style-type: none"> <li>Project vessels will generate noise both in the air and underwater due to the operation or thruster engines, propellers, and the use of cutting tools subsea.</li> </ul>  | <ul style="list-style-type: none"> <li>Noise from project vessels and the MODU will contribute to ambient noise levels.</li> <li>Elevated underwater noise has the potential to affect marine fauna.</li> </ul>   | <ul style="list-style-type: none"> <li>Maintain a 12 km buffer from turtle nesting beaches during towing and lifting activities to avoid impacts to turtles.</li> <li>Compliance with legislative and regulatory requirements for interactions with marine fauna to prevent adverse interactions.</li> </ul>   |
| <b>Atmospheric Emissions</b>   | <ul style="list-style-type: none"> <li>Atmospheric emissions will be generated by the MODU and project vessels from internal combustion engines and incineration activities.</li> <li>Atmospheric emissions will be generated from venting of residual gas and contingent flaring from the MODU during P&amp;A activities</li> </ul>   | <ul style="list-style-type: none"> <li>Emissions from project vessels could result in temporary, localised reductions in air quality in the immediate vicinity of the vessels.</li> <li>Venting or flaring of hydrocarbon gas may result in a short-lived localised gas plume and a minor contribution to greenhouse gas emissions</li> </ul> | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for marine air pollution.</li> <li>Flaring and venting of hydrocarbons is restricted to a duration necessary to perform the P&amp;A activity.</li> </ul>  |
| <b>Unplanned</b>   |  |   |  |
| <b>Unplanned Hydrocarbon Release – vessel collision or Loss of Well Containment during P&amp;A</b> | <ul style="list-style-type: none"> <li>Project vessels will use marine diesel fuel.</li> <li>In the unlikely event of a vessel collision involving a project vessel or third-party vessels during the activity, there is potential for a release of marine diesel fuel if the collision has enough force to penetrate the vessel hull in the exact location of the fuel tank.</li> <li>In the highly unlikely event of loss of well containment, there is the potential for a release of well fluids.</li> </ul> | <ul style="list-style-type: none"> <li>In the highly unlikely event of a vessel collision causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur.</li> </ul>   | <p><b>Preventing Vessel Collision:</b></p> <ul style="list-style-type: none"> <li>500 m exclusion zone established around the equipment and project vessels during removal activities.</li> <li>Compliance with legislative and regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements.</li> <li>Consultation with relevant persons to ensure other marine users are informed and aware, reducing the likelihood of a collision.</li> <li>Develop a management plan for simultaneous operations where multiple campaigns occur concurrently in the same Operational Area.</li> </ul> <p><b>Spill Response Arrangements:</b></p> <ul style="list-style-type: none"> <li>Arrangements supporting the Oil Pollution Emergency Preparation document (OPEP) will be tested to ensure the OPEP can be implemented as planned.</li> <li>Emergency response activities would be implemented in line with the OPEP.</li> </ul> |

| Potential Impact/ Risk  | Description of Source of Potential Impact/ Risk  | Description of Potential Impacts   | Proposed Mitigation and/ or Management Measure  |
|---|--|--|---|
| <b>Deck Spills and Bunkering</b>                                    | <ul style="list-style-type: none"> <li>Accidental deck spills from project vessels can include stored hydrocarbons, chemicals or equipment.</li> </ul>   | <ul style="list-style-type: none"> <li>Deck spills could result in short term, localised impacts to water quality or marine fauna in the immediate area surrounding the spill.</li> </ul>  | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for the prevention of marine pollution.</li> <li>Liquid chemical and fuel storage areas banded or secondarily contained when they are not being handled or temporarily moved.</li> <li>Maintain and locate spill kits in close proximity to hydrocarbon storage and deck areas for use to contain and recover deck spills</li> <li>Appropriate bunkering equipment kept and maintained, and contractors to follow procedures and requirements for bunkering and refuelling to reduce the likelihood of a spill.</li> </ul>   |
| <b>Unplanned Discharge of Solid Hazardous/ Non-Hazardous Wastes</b> | <ul style="list-style-type: none"> <li>Accidental, unplanned loss of hazardous solid wastes such as oily rags or paint cans from the project vessels.</li> </ul>   | <ul style="list-style-type: none"> <li>Short term, localised impacts to water quality or marine fauna in the area surrounding the release.</li> <li>Incorrect classification of waste can also result in inappropriate disposal of hazardous decommissioning wastes.</li> </ul>  | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for the prevention of marine pollution and handling of hazardous wastes</li> <li>Project vessel waste arrangements to ensure waste is recorded and segregated and that all non-putrescible waste (excludes all food, greywater or sewage waste) to be disposed of onshore.</li> <li>Lost waste and dropped objects will be recovered, where safe and practicable.</li> <li>Waste contractors engaged to identify potential waste disposal pathways.</li> <li>Infrastructure and resource recovery strategy that ensures waste is handled and disposed of in accordance with applicable legislation, monitors and tracks waste and sets KPIs for recycling and reuse of decommissioned infrastructure.</li> </ul> |
| <b>Vessel Collision with Marine Fauna</b>                           | <ul style="list-style-type: none"> <li>Vessel movements have the potential to result in collisions between the vessel (hull and propellers) and marine fauna.</li> </ul>   | <ul style="list-style-type: none"> <li>Vessel disturbance presents a potential threat to marine mammals, marine reptiles and fish, sharks and rays.</li> </ul>   | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for interactions with marine fauna to reduce the likelihood of a collision occurring.</li> </ul>   |
| <b>Disturbance to Seabed from Dropped Objects</b>                   | <ul style="list-style-type: none"> <li>Accidental, unplanned dropping of objects overboard from project vessels during recovery operations.</li> </ul>   | <ul style="list-style-type: none"> <li>Short term, localised impacts to sediment quality and benthic habitats.</li> </ul>  | <ul style="list-style-type: none"> <li>Project vessel inductions include control measures and training for crew in dropped object prevention.</li> <li>Lost waste/ dropped objects will be recovered where safe and practicable to do so.</li> <li>Procedures for lifts, bulk transfers and cargo loading if an unplanned object release does occur.</li> </ul>   |
| <b>Accidental Introduction of Invasive Marine Species</b>           | <ul style="list-style-type: none"> <li>Vessels transiting to the Operational Area may be subject to marine fouling whereby organisms attach to the vessel hull.</li> <li>Organisms can also be drawn into ballast tanks during onboarding of ballast water</li> <li>IMS could also be present as biofouling on subsea structures.</li> </ul> | <ul style="list-style-type: none"> <li>It is not credible for IMS to be introduced and establish on the seabed or subsea structures in the Operational Area as these deep waters are not conducive to the settlement and establishment of IMS.</li> <li>There is potential for the transfer of IMS between the project vessels and DTM while in its currently location within the Operational Area, or for IMS to be established in the shallower waters of the controlled sinking location or tow route and lift location.</li> </ul> | <ul style="list-style-type: none"> <li>Ballast water will be managed according to legislative and regulatory requirements.</li> <li>Application of Woodside's IMS risk assessment and appropriate management measures to the RTM, project vessels and relevant immersible equipment such as Remotely Operated Vehicles (ROVs), unless exempt.</li> </ul>  |

**Feedback**

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before 17 March 2023 via:

**E: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au)**  
**Toll free: 1800 442 977**

You can subscribe on our website to receive Consultation Information Sheets for proposed activities: **[www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities)**.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.

Please note that your feedback and our response will be included in our EP for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)*.

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EP in order for this information to remain confidential to NOPSEMA.

Dear Stakeholder

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

## *Stybarrow Plug and Abandonment Environment Plan*

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.2.1 Email sent to the following relevant persons (10 March 2023)**

- *Australian Border Force*
- *Department of Industry, Science and Resources (DISR)*
- *Department of Mines, Industry Regulation and Safety (DMIRS)*
- *Australian Petroleum Production and Exploration Association (APPEA)*
- *Marine Tourism Association of Western Australia*
- *Pearl Producers Association*
- *Western Australian Game Fishing Association*

Dear Stakeholder

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

## Stybarrow Plug and Abandonment Environment Plan

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### Woodside Feedback

#### 2.3 Email sent to North West Slope and Trawl Fishery (4 licence holders), Western Deepwater Trawl Fishery (5 licence holders) and Western Tuna and Billfish Fishery (4 licence holders) (17 February 2023)

Dear Licence Holder

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

**Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.**

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website. Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

**Commonwealth-managed fishery implications:**

We note there are three overlapping Commonwealth managed fisheries (listed below) in the Environments that May Be Affected (EMBAs) for the Griffin and Stybarrow decommissioning projects, of which the Western Deepwater Trawl Fishery may have been active in the Stybarrow Operational Area (see attached Information Sheets for more details).

- Western Tuna and Billfish
- North West Slope Trawl
- Western Deepwater Trawl

Woodside is consulting licence holders in these fisheries, as well as providing information to representative organisations on AFMA advice that it expects all Commonwealth fishers who have entitlements to fish within the proposed area to be consulted, which can be through the relevant fishing industry associations.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.3.1 Email sent to North West Slope and Trawl Fishery (4 licence holders), Western Deepwater Trawl Fishery (5 licence holders) and Western Tuna and Billfish Fishery (4 licence holders) (10 March 2023)**

Dear Licence Holder

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

## *Stybarrow Plug and Abandonment Environment Plan*

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

Dear Titleholder

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

*Stybarrow Plug and Abandonment Environment Plan*

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

Dear Titleholder

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

#### **2.5 Email sent to the Shire of Carnarvon (16 February 2023)**

Dear Shire of Carnarvon

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

## Stybarrow Plug and Abandonment Environment Plan

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at:

[Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.5.1 Email sent to Shire of Carnarvon (10 March 2023)**

Dear Shire of Carnarvon

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

### **2.6 Email sent to the Town of Port Hedland (16 February 2023)**

For the Attention of the CEO, Town of Port Hedland

Dear Town of Port Hedland

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

## Stybarrow Plug and Abandonment Environment Plan

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.6.1 Email sent to Town of Port Hedland (10 March 2023)**

Dear Town of Port Hedland

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

### **2.7 Email sent to the Carnarvon Chamber of Commerce and Industry (16 February 2023)**

Dear Carnarvon Chamber of Commerce and Industry

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

*Stybarrow Plug and Abandonment Environment Plan*

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.7.1 Email sent to Carnarvon Chamber of Commerce and Industry (10 March 2023)**

Dear Carnarvon Chamber of Commerce and Industry

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

## *Stybarrow Plug and Abandonment Environment Plan*

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

## **Woodside Feedback**

### **2.8 Email sent to the Port Hedland Chamber of Commerce and Industry (16 February 2023)**

Dear Port Hedland Chamber of Commerce and Industry

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>   |
|-----------------|---|---|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposal to leave in situ 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Attn: [Stakeholder]  
[Company]  
[Address]

Dear Stakeholder

Woodside previously consulted you (correspondence dated 17 February 2023) on Woodside's proposed activities for the decommissioning of the Griffin and Stybarrow fields.

The Griffin Field is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

The below QR codes link to our Consultation Information Sheets for the proposed activities, which provide a summary of potential key risks and associated management measures. Should the information be easier for you to access, the Information Sheets are also available on our [website](http://www.woodside.com).

Activity Update: Griffin  
Decommissioning EP

Activity Update:  
Stybarrow  
Decommissioning EP

Activity Update:  
Stybarrow Plug &  
Abandonment EP

We would appreciate any feedback you may have by 17 March 2023 to support the development of our proposed environment plans.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

Kind regards,

**2.11 Email sent to the Conservation Council of WA (CCWA) (16 February 2023)**

Dear Conservation Council of WA

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>  |
|-----------------|---|--|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> </ul> |

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

## *Stybarrow Plug and Abandonment Environment Plan*

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.11.1 Email sent to CCWA (10 March 2023)**

Dear Conservation Council of WA

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

**2.12 Email sent to the Australian Conservation Foundation (ACF) (16 February 2023)**

Dear Australian Conservation Foundation

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

### **Woodside Feedback**

### **2.13 Email sent to the Ningaloo Coast World Heritage Advisory Committee (NCWHAC) (16 February 2023)**

Dear Ningaloo World Heritage Area Committee

## Stybarrow Plug and Abandonment Environment Plan

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

## *Stybarrow Plug and Abandonment Environment Plan*

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.13.1 Email sent to NCWHAC (10 March 2023)**

Dear Ningaloo Coast World Heritage Area Advisory Committee

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

### **2.14 Email sent to the Western Australian Fishing Industry Council (WAFIC) (16 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

*Stybarrow Plug and Abandonment Environment Plan*

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

**Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.**

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

**Commercial fishing implications:  
Commonwealth-managed fisheries**

We note there are three active overlapping Commonwealth managed fisheries in the environment that may be affected (EMBA), listed below, of which the Western Deepwater Trawl Fishery may have been active in the Stybarrow Operational Area in recent years. We have consulted licence holders in this fishery.

*Stybarrow Plug and Abandonment Environment Plan*

- Western Tuna and Billfish
- North West Slope Trawl
- Western Deepwater Trawl

Woodside has also provided information to the representative organisations of other identified Commonwealth managed fisheries on AFMA advice that it expects all Commonwealth fishers who have entitlements to fish within the proposed area to be consulted, which can be through the relevant fishing industry associations.

**State-managed fisheries**

We note that there are 20 overlapping State managed fisheries in the EMBA listed below.

- Exmouth Gulf Beach Seine and Mesh Net Managed Fish
- Exmouth Gulf Prawn Managed Fishery
- Gascoyne Demersal Scalefish Managed Fishery
- Mackerel Managed Fishery (Area 2)
- Mackerel Managed Fishery (Area 3)
- Marine Aquarium Fish Managed Fishery
- Nickol Bay Prawn Managed Fishery
- Onslow Prawn Managed Fishery
- Open Access in the North Coast, Gascoyne Coast and
- Pilbara Crab Managed Fishery
- Pilbara Fish Trawl (Interim) Managed Fishery
- Pilbara Line Fishery (Condition)
- Pilbara Trap Managed Fishery
- Shark Bay Crab Managed Fishery
- Shark Bay Prawn Managed Fishery
- Shark Bay Scallop Managed Fishery
- West Australian Sea Cucumber Fishery
- West Coast Deep Sea Crustacean Managed Fishery
- West Coast Demersal Scalefish (Interim) Managed Fishery
- West Coast Rock Lobster Managed Fishery

Of these State-managed fisheries, the following may have been active in the Operational Area in recent years.

| <b>Griffin Field Decommissioning</b>  | <b>Stybarrow Field Decommissioning</b>   |

| <ul style="list-style-type: none"> <li>• Exmouth Gulf Prawn Managed Fishery</li> <li>• Mackerel Managed Fishery (Area 2)</li> <li>• Marine Aquarium Fish Managed Fishery</li> <li>• Onslow Prawn Managed Fishery</li> <li>• Pilbara Line Fishery (Condition)</li> <li>• Pilbara Trap Managed Fishery</li> <li>• Tour Operators</li> <li>• West Coast Deep Sea Crustacean Managed Fishery</li> </ul> | <ul style="list-style-type: none"> <li>• Tour Operators</li> <li>• West Coast Deep Sea Crustacean Managed Fishery</li> </ul> |

**Feedback:**

## *Stybarrow Plug and Abandonment Environment Plan*

If you have any feedback on these activities, please respond to Woodside at:  
[Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.14.1 Email sent to WAFIC (10 March 2023)**

Dear

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

**Woodside Feedback**

**2.15 Email sent to the Australian Maritime Safety Authority (AMSA) and Australian Hydrographic Office (AHO) (16 February 2023)**

Dear AMSA and AHO

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

## *Stybarrow Plug and Abandonment Environment Plan*

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.15.1 Email sent to AMSA – Marine Safety and AHO (15 March 2023)**

Dear AMSA and AHO

Woodside previously consulted you (email below) on its plans for the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

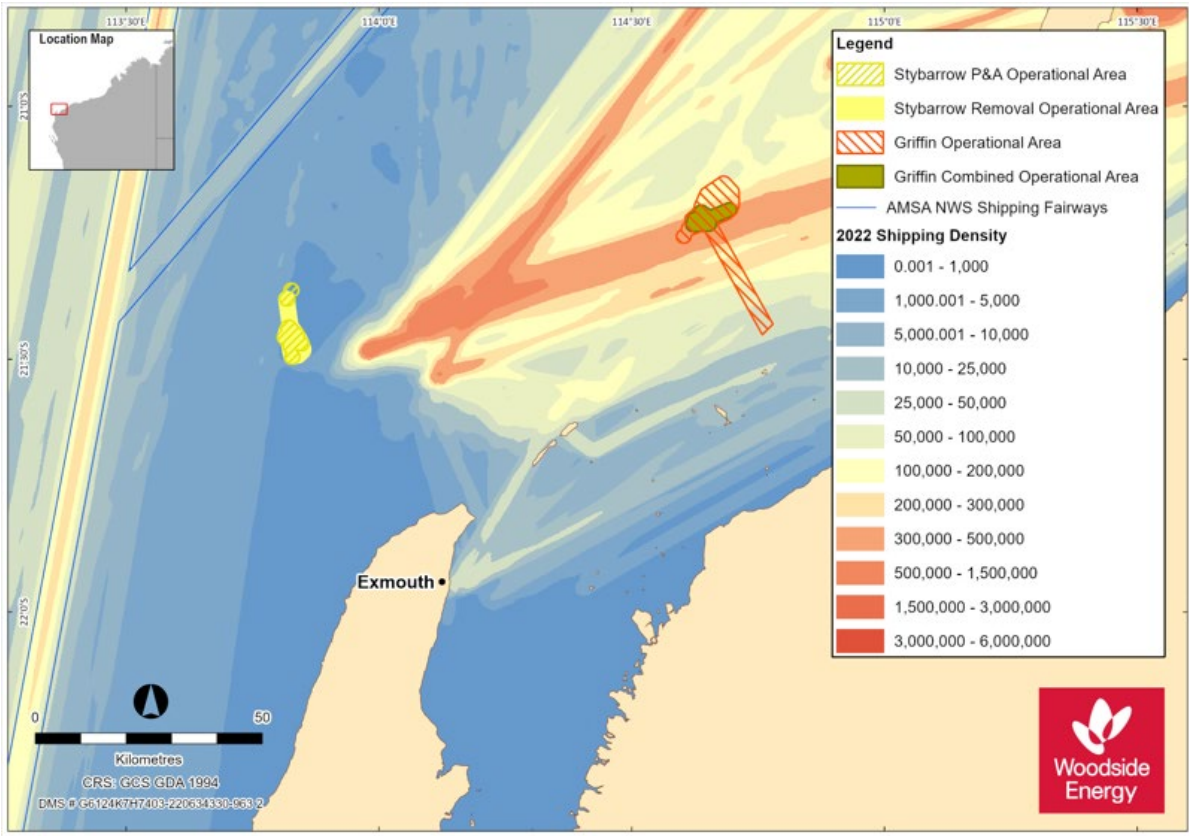

The Shipping Lane figures for the proposed activities Operational Areas are attached. Separate figures showing the Environment that May Be Affected (EMBA) for the proposed activities have also been attached for reference.

Please let us know should you have any feedback relating to the proposed activities by 17 March 2023.

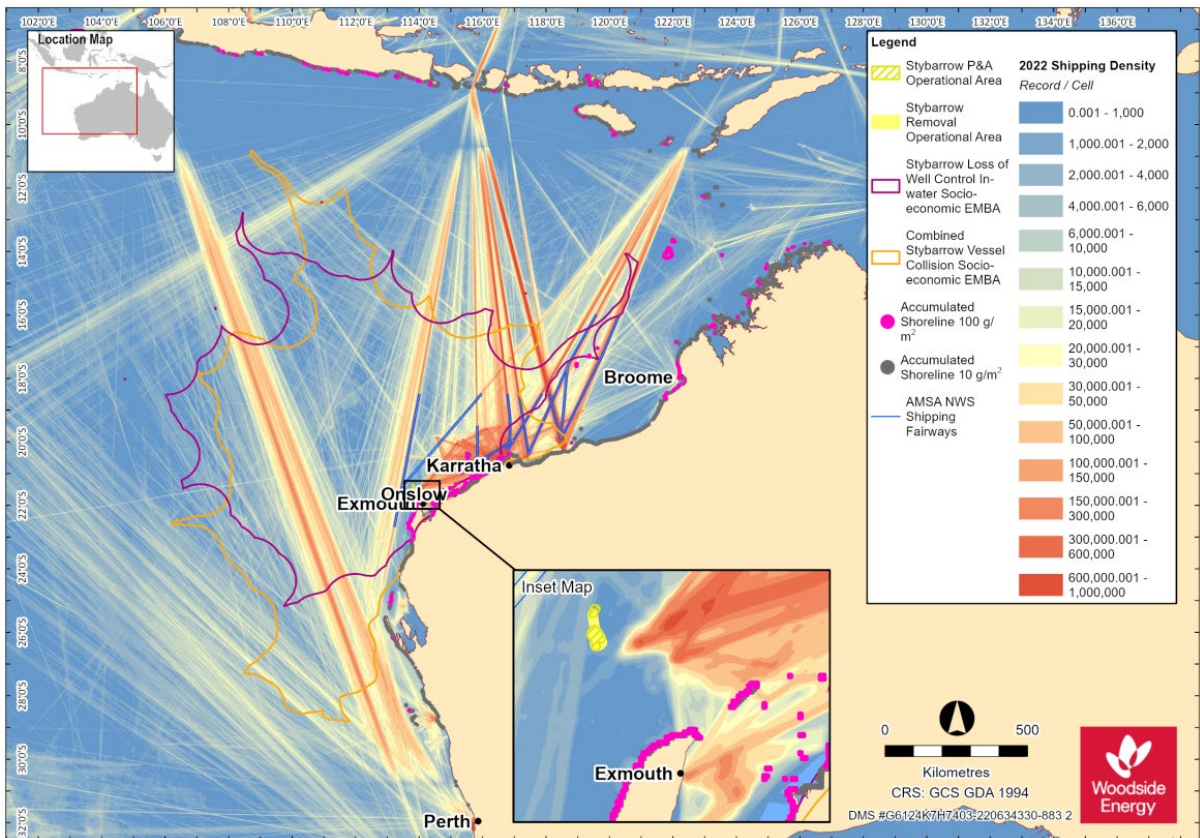

Regards  
Woodside Feedback

## 2.16 Email sent to the Department of Defence (DoD) (16 February 2023)

Dear Department of Defence

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

### Activity:

|                 | <b>Griffin Field Decommissioning Activities</b>  | <b>Stybarrow Field Decommissioning Activities</b>   |
|-----------------|--|---|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> </ul> |

|                                 |   |  |
|---------------------------------|---|--|
|                                 | <p>sections of it to be towed to shallower water out of the title.</p> <ul style="list-style-type: none"> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposal to leave in situ 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for the PLEM and 4 distribution skids.</li> </ul> | <ul style="list-style-type: none"> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Recovery of the DTM may require it to be towed to shallower water outside of permit area WA-32-L to support the DTM removal from the marine environment.</li> <li>• Ongoing field management activities (equipment monitoring and inspection).</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposed leave in situ of the 9 DTM drag anchors (buried), nine suction piles for the riser holdbacks and the historical exploration wellhead, Eskdale-1, which was unable to be removed following its drilling and abandonment in 2003.</li> </ul> |

### **2.16.1 Email sent to the DoD (8 March 2023)**

Dear Department of Defence

Woodside previously consulted you (email below) on its plans for the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

The Defence Area figures for the proposed Griffin and Stybarrow Operational Areas are attached. Separate figures showing the Environment that May Be Affected (EMBA) for the proposed activities are also attached for reference.

Please let us know should you have any feedback relating to the proposed activities by **17 March 2023**.

Regards

### **Woodside Feedback**

,

### **2.17 Email sent to the Commonwealth Fisheries Association (CFA) (16 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

**Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.**

*Stybarrow Plug and Abandonment Environment Plan*

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>  |
|-----------------|---|--|

**Commonwealth-managed fishery implications:**

We note there are three overlapping Commonwealth managed fisheries (listed below) in the Environments that May Be Affected (EMBA)s for the Griffin and Stybarrow decommissioning projects, of which the Western Deepwater Trawl Fishery may have been active in the Stybarrow Operational Area (see attached Information Sheets for more details).

- Western Tuna and Billfish
- North West Slope Trawl
- Western Deepwater Trawl

Woodside is consulting licence holders in these fisheries, as well as providing information to representative organisations on AFMA advice that it expects all Commonwealth fishers who have entitlements to fish within the proposed area to be consulted, which can be through the relevant fishing industry associations.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

## *Stybarrow Plug and Abandonment Environment Plan*

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.17.1 Email sent to CFA (10 March 2023)**

Dear [REDACTED]

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

### **2.18 Email sent to Tuna Australia (16 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

## Stybarrow Plug and Abandonment Environment Plan

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

**Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.**

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website.

Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

### Activity:

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>  |
|-----------------|---|--|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees,</li> </ul> |

|                                 |   |  |
|---------------------------------|---|--|
|                                 | <ul style="list-style-type: none"> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposal to leave in situ 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for the PLEM and 4 distribution skids.</li> </ul> | <p>manifolds, risers, flexible flowlines, and umbilicals).</p> <ul style="list-style-type: none"> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Recovery of the DTM may require it to be towed to shallower water outside of permit area WA-32-L to support the DTM removal from the marine environment.</li> <li>• Ongoing field management activities (equipment monitoring and inspection).</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposed leave in situ of the 9 DTM drag anchors (buried), nine suction piles for the riser holdbacks and the historical exploration wellhead, Eskdale-1, which was unable to be removed following its drilling and abandonment in 2003.</li> </ul> |
| <b>Location:</b>                | <ul style="list-style-type: none"> <li>• 94 km northeast of Exmouth, Western Australia.</li> </ul>  | <ul style="list-style-type: none"> <li>• 53 km northwest of Exmouth, Western Australia.</li> </ul>   |
| <b>Approx. Water Depth (m):</b> | <ul style="list-style-type: none"> <li>• Approx. 120 m.</li> </ul>  | <ul style="list-style-type: none"> <li>• Approx. 810 – 850 m.</li> </ul>   |
| <b>Schedule:</b>                | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Earliest proposed removal activity start is estimated to be Q4 2023, subject to approvals, vessel availability and weather constraints.</li> <li>• Facilities removal must be completed no later than 31 December 2024, pursuant to General Direction 832.</li> </ul>   | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Earliest P&amp;A start is estimated to be Q4 2023, subject to approvals, MODU and vessel availability and weather constraints.</li> <li>• P&amp;A activities must be completed no later than 30 September 2024, pursuant to General Direction 833.</li> </ul> <p><b>Removal Activities</b></p>  |

| <b>Duration:</b>                   | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal activities are anticipated to take approximately 6 months to complete and GEP removal activities are anticipated to take approximately 2 months to complete.</li> </ul>   | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• P&amp;A activities are anticipated to take approximately 6 – 9 months.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal activities are anticipated to take approximately 4-6 months to complete and DTM removal activities are anticipated to take approximately 1 month to complete.</li> </ul>  |
| <b>Exclusionary/Cautious Zone:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• The temporary Operational Area includes the area encompassing an approximate 1,500 m radius around the equipment.</li> <li>• A temporary 500 m exclusion zone will apply around the project vessels during removal and potential tow activities.</li> </ul> | <p><b>P&amp;A Activities</b></p> <ul style="list-style-type: none"> <li>• The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centers within WA-32-L.</li> <li>• A temporary 500 m exclusion zone will apply around the MODU and the associated project vessels during P&amp;A activities.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• The temporary Operational Area includes the area encompassing an approximate 1,500 m radius around the subsea infrastructure and wellheads.</li> </ul> |

|                 |   |   |
|-----------------|---|---|
|                 |   | <ul style="list-style-type: none"> <li>• The DTM has an existing 1200 m radius petroleum safety zone which will continue to be in place until it is removed.</li> <li>• A temporary 500 m exclusion zone will apply around the CSV and the associated project vessels during removal activities.</li> <li>• A temporary 500 m exclusion zone will apply around the HLV and the associated project vessels during the removal of the DTM.</li> </ul> |
| <b>Vessels:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Construction support vessel (CSV) and Heavy Lift Vessel (HLV) for recovery and pipeline removal activities.</li> <li>• An anchor handling tug (AHT) to support the towing of the RTM to sheltered water.</li> </ul> | <p><b>P&amp;A activities</b></p> <ul style="list-style-type: none"> <li>• Semi-Submersible Mobile Offshore Drilling Unit (MODU)</li> <li>• The MODU will be supported by 2 to 3 offshore support vessels.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• CSV and HLV for recovery and activities.</li> <li>• AHTs to support the towing of the DTM to the shallower water location (if required).</li> </ul>  |

**Commonwealth-managed fishery implications:**

We note there are three overlapping Commonwealth managed fisheries (listed below) in the Environments that May Be Affected (EMBA) for the Griffin and Stybarrow decommissioning projects, of which the Western Deepwater Trawl Fishery may have been active in the Stybarrow Operational Area (see attached Information Sheets for more details).

- Western Tuna and Billfish
- North West Slope Trawl
- Western Deepwater Trawl

Woodside is consulting licence holders in these fisheries, as well as providing information to representative organisations on AFMA advice that it expects all Commonwealth fishers who have entitlements to fish within the proposed area to be consulted, which can be through the relevant fishing industry associations.

## Stybarrow Plug and Abandonment Environment Plan

### Feedback:

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### 2.18.1 Email sent to Tuna Australia (10 March 2023)

Dear [REDACTED]

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

**Woodside Feedback**

**2.19 Email sent to the Australian Fisheries Management Authority (AFMA) (16 February 2023)**

Dear AFMA

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

**Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.**

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website.

Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

**Commonwealth-managed fishery implications:**

We note there are three overlapping Commonwealth managed fisheries (listed below) in the Environments that May Be Affected (EMBAs) for the Griffin and Stybarrow decommissioning projects, of which the Western Deepwater Trawl Fishery may have been active in the Stybarrow Operational Area (see attached Information Sheets for more details).

## *Stybarrow Plug and Abandonment Environment Plan*

- Western Tuna and Billfish
- North West Slope Trawl
- Western Deepwater Trawl

Woodside is consulting licence holders in these fisheries, as well as providing information to representative organisations on AFMA advice that it expects all Commonwealth fishers who have entitlements to fish within the proposed area to be consulted, which can be through the relevant fishing industry associations.

### **Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.19.1 Email sent to AFMA (10 March 2023)**

Dear AFMA

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

## *Stybarrow Plug and Abandonment Environment Plan*

- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

#### **2.20 Email sent to the Department of Primary Industries and Regional Development (DPIRD) (16 February 2023)**

Dear DPIRD

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

**Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.**

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available and be accessed via the QR Code in this letter.

Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management

Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

**Activity:**

**State-managed fisheries implications:**

We note there are 20 overlapping State managed fisheries (listed below) in the Environments that May Be Affected (EMBA) for the Griffin and Stybarrow decommissioning projects (see attached Information Sheets for more details).

- Exmouth Gulf Beach Seine and Mesh Net Managed Fish
- Exmouth Gulf Prawn Managed Fishery
- Gascoyne Demersal Scalefish Managed Fishery
- Mackerel Managed Fishery (Area 2)
- Mackerel Managed Fishery (Area 3)
- Marine Aquarium Fish Managed Fishery
- Nickol Bay Prawn Managed Fishery
- Onslow Prawn Managed Fishery
- Pilbara Crab Managed Fishery
- Pilbara Fish Trawl (Interim) Managed Fishery
- Pilbara Line Fishery (Condition)
- Pilbara Trap Managed Fishery
- Shark Bay Crab Managed Fishery
- Shark Bay Prawn Managed Fishery
- Shark Bay Scallop Managed Fishery
- West Australian Sea Cucumber Fishery
- West Coast Deep Sea Crustacean Managed Fishery
- West Coast Demersal Scalefish (Interim) Managed Fishery
- West Coast Rock Lobster Managed Fishery

Of these State-managed fisheries, the following may have been active in the Operational Area in recent years.

| <b>Griffin Field Decommissioning</b>  | <b>Stybarrow Field Decommissioning</b>   |

|---|--|

Woodside is consulting licence holders in all identified fisheries, as well as providing information to representative organisations.

### **Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

### **2.20.1 Email sent to DPIRD (10 March 2023)**

Dear [REDACTED]

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

*Stybarrow Plug and Abandonment Environment Plan*

- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

**Woodside Feedback**

**2.21 Email sent to the Department of Climate Change, Energy, the Environment and Water (DCCEEW) and the Department of Agriculture, Fisheries and Forestry (DAFF) (16 February 2023)**

Dear DCCEEW and DAFF

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

|--|--|--|

**Biosecurity implications:**

With respect to the biosecurity matters, please note the following information below:

**Environment description Griffin Field:**

The **Operational Area** falls within the continental slope and shelf. The continental slope and shelf are, for the most part, ecosystems built on a soft sediment habitat with gradational variation in species composition due to depth, water temperature, light penetration and sediment composition/structure. It consists of generally sparse populations of sessile sponges, soft corals and algae (at shallower depths), with a mobile population of burrowing crustaceans, echinoderms and molluscs.

The **Environment that May Be Affected (EMBA)** falls within continental shelf, continental slope, continental rise and abyssal plain. The Griffin field subsea infrastructure has created a large artificial reef system in an otherwise fine sand and mud habitat with sparse benthic populations typical of the continental slope and shelf.

**Environment description Stybarrow Field:**

The **Operational Area** and the **EMBA** both fall within the outer shelf, continental slope, and deep ocean. The continental slope and shelf are, for the most part, ecosystems built on a soft sediment habitat with gradational variation in species composition due to depth, water temperature, light penetration, and sediment composition/structure. It consists of generally sparse populations of sessile filter feeders (e.g., sponges, soft corals etc.), infauna, and a mobile epibiota (e.g., crustaceans, echinoderms, and molluscs).

| <b>Potential IMS risk</b> | <b>IMS mitigation management</b> |
|---------------------------|----------------------------------|
|---------------------------|----------------------------------|

|  |   |
|--|---|
| Accidental introduction and establishment of invasive marine species | Ballast water will be managed according to legislative and regulatory requirements.<br>Application of Woodside’s IMS risk assessment and appropriate management measures to the RTM (Griffin), DTM (Stybarrow), project vessels and relevant immersible equipment such as Remotely Operated Vehicles (ROVs), unless exempt. |
|--|---|

**Commercial fishing implications:**

Woodside has assessed potential impacts for commercial fisheries based on ABARES/AFMA data, fishing methods and water depth.

We note there are three overlapping Commonwealth managed fisheries (listed below) in the Environments that May Be Affected (EMBAs) for the Griffin and Stybarrow decommissioning projects, of which the Western Deepwater Trawl Fishery may have been active in the Stybarrow Operational Area (see attached Information Sheets for more details).

- Western Tuna and Billfish
- North West Slope Trawl

## *Stybarrow Plug and Abandonment Environment Plan*

- Western Deepwater Trawl

Woodside is consulting licence holders in these fisheries, as well as providing information to representative organisations on AFMA advice that it expects all Commonwealth fishers who have entitlements to fish within the proposed area to be consulted, which can be through the relevant fishing industry associations.

### **Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.21.1 Email sent to the DCCEE and DAFF (10 March 2023)**

Dear DCCEE and DAFF

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

## Stybarrow Plug and Abandonment Environment Plan

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards  
Woodside Feedback

### 2.22 Email sent to the Department of Planning, Lands and Heritage (DPLH) and WA Museum (16 February 2023)

Dear DPLH and WA Museum

Woodside is planning to undertake subsea decommissioning activities for the Griffin and Stybarrow fields (previously operated by BHP Petroleum Pty Ltd (BHP)).

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

## Stybarrow Plug and Abandonment Environment Plan

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### 2.23 Email sent to the Director of National Parks (DNP) (16 February 2023)

Dear DNP

Woodside is planning to undertake subsea decommissioning activities for the Griffin and Stybarrow fields (previously operated by BHP Petroleum Pty Ltd (BHP)).

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

|-----------------|--|--|
|                 |  | <ul style="list-style-type: none"> <li>• A temporary 500 m exclusion zone will apply around the CSV and the associated project vessels during removal activities.</li> <li>• A temporary 500 m exclusion zone will apply around the HLV and the associated project vessels during the removal of the DTM.</li> </ul>   |
| <b>Vessels:</b> | <b>Removal Activities</b> <ul style="list-style-type: none"> <li>• Construction support vessel (CSV) and Heavy Lift Vessel (HLV) for recovery and pipeline removal activities.</li> <li>• An anchor handling tug (AHT) to support the towing of the RTM to sheltered water.</li> </ul> | <b>P&amp;A activities</b> <ul style="list-style-type: none"> <li>• Semi-Submersible Mobile Offshore Drilling Unit (MODU)</li> <li>• The MODU will be supported by 2 to 3 offshore support vessels.</li> </ul> <b>Removal Activities</b> <ul style="list-style-type: none"> <li>• CSV and HLV for recovery and activities.</li> <li>• AHTs to support the towing of the DTM to the shallower water location (if required).</li> </ul> |

**Protected Area implications:**

We note Australian Government Guidance on consultation activities and confirm that:

| Griffin Field Decommissioning Activities   | Stybarrow Field Decommissioning Activities   |
|--|--|
| <ul style="list-style-type: none"> <li>• Proposed activities are outside the boundaries of a proclaimed Australian Marine Park.</li> <li>• Nearest protected areas are: <ul style="list-style-type: none"> <li>○ ~76 km to Gascoyne Commonwealth Marine Park</li> <li>○ ~59 km to Ningaloo Marine Park (Commonwealth)</li> <li>○ ~41 km to Ningaloo Marine Park (State)</li> <li>○ ~42km to Murion Islands Marine Management Area</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>• Proposed activities are outside the boundaries of a proclaimed Australian Marine Park.</li> <li>• Nearest protected areas are: <ul style="list-style-type: none"> <li>○ ~5 km to Gascoyne Commonwealth Marine Park</li> <li>○ ~24 km to Ningaloo Marine Park (Commonwealth)</li> <li>○ ~36 km to Ningaloo Marine Park (State)</li> <li>○ ~45 km to Murion Islands Marine Management Area</li> </ul> </li> </ul> |

We have assessed potential risks to Protected Areas in the development of the proposed Environment Plan and believe that there are no credible risks as part of planned activities that have potential to impact the values of Australian Marine Parks.

The worst-case credible spill scenarios have been assessed for activities to be managed under the Environment Plans:

|  |   |
|--|---|
| <b>Stybarrow Field Management and Decommissioning EP</b> | The worst-case credible spill scenario assessed in this EP is the remote likelihood event of a vessel collision resulting a |

A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities, which will include notification to relevant agencies and organisations as to the nature and

## *Stybarrow Plug and Abandonment Environment Plan*

scale of the event, as soon as practicable following an occurrence. The Director of National Parks will be advised if an environmental incident occurs that may impact on the values of the Marine Park.

### **Feedback:**

If you have any feedback on these activities, please respond to Woodside at:

[Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.23.1 Email sent to DNP (10 March 2023)**

Dear DNP

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

**2.24 Email sent to the Department of Biodiversity, Conservation and Attractions (DBCA) (16 February 2023)**

Dear DBCA

Woodside is planning to undertake subsea decommissioning activities for the Griffin and Stybarrow fields (previously operated by BHP Petroleum Pty Ltd (BHP)).

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

| <b>Vessels:</b> | <b>Removal Activities</b> <ul style="list-style-type: none"> <li>• Construction support vessel (CSV) and Heavy Lift Vessel (HLV) for recovery and pipeline removal activities.</li> <li>• An anchor handling tug (AHT) to support the towing of the RTM to sheltered water.</li> </ul> | <b>P&amp;A activities</b> <ul style="list-style-type: none"> <li>• Semi-Submersible Mobile Offshore Drilling Unit (MODU)</li> <li>• The MODU will be supported by 2 to 3 offshore support vessels.</li> </ul> <b>Removal Activities</b> <ul style="list-style-type: none"> <li>• CSV and HLV for recovery and activities.</li> <li>• AHTs to support the towing of the DTM to the shallower water location (if required).</li> </ul> |

**Protected Area implications:**

We note Australian Government Guidance on consultation activities and confirm that:

| <b>Griffin Field Decommissioning Activities</b>  | <b>Stybarrow Field Decommissioning Activities</b>  |
|--|--|
| <ul style="list-style-type: none"> <li>• Proposed activities are outside the boundaries of a proclaimed Australian Marine Park.</li> <li>• Nearest protected areas are: <ul style="list-style-type: none"> <li>○ ~76 km to Gascoyne Commonwealth Marine Park</li> <li>○ ~59 km to Ningaloo Marine Park (Commonwealth)</li> <li>○ ~41 km to Ningaloo Marine Park (State)</li> <li>○ ~42km to Muiron Islands Marine Management Area</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>• Proposed activities are outside the boundaries of a proclaimed Australian Marine Park.</li> <li>• Nearest protected areas are: <ul style="list-style-type: none"> <li>○ ~5 km to Gascoyne Commonwealth Marine Park</li> <li>○ ~24 km to Ningaloo Marine Park (Commonwealth)</li> <li>○ ~36 km to Ningaloo Marine Park (State)</li> <li>○ ~45 km to Muiron Islands Marine Management Area</li> </ul> </li> </ul> |

We have assessed potential risks to Protected Areas in the development of the proposed Environment Plan and believe that there are no credible risks as part of planned activities that have potential to impact the values of Western Australian Protected Areas.

However, we note a number of State-managed Protected Areas within the Environments that May be Affected for the Griffin and Stybarrow decommissioning activities, in particular the EMBA for proposed plugging and abandonment activities at the Stybarrow Field. We have attached a separate information sheet for these activities and would be pleased to provide additional information on Conservation Parks, Marine Management Areas, Marine Parks, National Parks and Nature Reserves that may be potentially affected by activity risks.

A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities, which will include notification to relevant agencies and organisations as to the nature and

## *Stybarrow Plug and Abandonment Environment Plan*

scale of the event, as soon as practicable following an occurrence. DBCA will be advised if an environmental incident occurs that may impact on the values of State Managed Protected Areas.

### **Feedback:**

If you have any feedback on these activities, please respond to Woodside at:

[Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **2.24.1 Email sent to DBCA - (10 March 2023)**

Dear DBCA

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

## Woodside Feedback

### 2.25 Email sent to the Exmouth Community Liaison Group (16 February 2023)

Dear Exmouth Community Liaison Group,

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.25.1.1 Email sent to Exmouth Community Liaison Group (10 March 2023)**

Dear Exmouth Community Liaison Group

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

## Stybarrow Plug and Abandonment Environment Plan

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

### 2.26 Email sent to the Cape Conservation Group (CCG) (17 February 2023)

Dear [Redacted]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

### 2.27 Email sent to Protect Ningaloo (17 February 2023)

Dear Stakeholder

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.27.1 Email sent to Protect Ningaloo (10 March 2023)**

Dear Stakeholder

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

## *Stybarrow Plug and Abandonment Environment Plan*

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

## **Woodside Feedback**

### **2.28 Email sent to the Shire of Exmouth (17 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.30 Email sent to the University of Western Australia (UWA) (21 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

*Stybarrow Plug and Abandonment Environment Plan*

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

**Woodside is seeking your advice regarding any research activities that UWA may be undertaking that may overlap with our proposed activities.**

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>   |
|-----------------|---|---|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> |

**2.30.1 Email sent to UWA (10 March 2023)**

Dear [REDACTED]

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

## *Stybarrow Plug and Abandonment Environment Plan*

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.32.1 Email sent to MUA (10 March 2023)**

Dear [REDACTED]

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards  
Woodside Feedback

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The Griffin Field is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Please see the relevant QR codes below which link directly to consultation Information Sheets which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website [www.woodside.com](http://www.woodside.com). You can also subscribe to receive updates on our consultation activities by subscribing through our Consultation Activities page.

Activity Update: Griffin Decommissioning EP

Activity Update: Stybarrow Decommissioning EP

Activity Update: Stybarrow Plug & Abandonment EP

Operational Areas and Exclusion Zones will apply around a range of vessels that will support plugging and abandonment and infrastructure recovery and removal activities, which are outlined in the activity summaries below.

A summary of proposed activities is outlined below and more detailed information is provided in the attached Consultation Information Sheets, including a summary of potential key risks and associated management measures. The Information Sheets are also available and be accessed via the QR Code in this letter.

Fisheries have been identified as being relevant based on fishing licence overlap with the activity area, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by 17 March 2023.

**Activity:**

|                 | Griffin Field Decommissioning Activities  | Stybarrow Field Decommissioning Activities   |
|-----------------|---|--|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposal to leave <i>in situ</i> 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for the PLEM and 4 distribution skids.</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Recovery of the DTM may require it to be towed to shallower water outside of permit area WA-32-L to support the DTM removal from the marine environment.</li> <li>• Ongoing field management activities (equipment monitoring and inspection).</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposed leave <i>in situ</i> of the 9 DTM drag anchors (buried), nine suction piles for the riser holdbacks and the historical exploration wellhead, Eskdale-1, which was unable to be removed following its drilling and abandonment in 2003.</li> </ul> |

**State-managed fisheries implications:**

We note that there are 20 overlapping State managed fisheries in the EMBA listed below.

- Exmouth Gulf Beach Seine and Mesh Net Managed Fish
- Exmouth Gulf Prawn Managed Fishery
- Gascoyne Demersal Scalefish Managed Fishery
- Mackerel Managed Fishery (Area 2)
- Mackerel Managed Fishery (Area 3)
- Marine Aquarium Fish Managed Fishery
- Nickol Bay Prawn Managed Fishery

209808-3

- Onslow Prawn Managed Fishery
- Pilbara Crab Managed Fishery
- Pilbara Fish Trawl (Interim) Managed Fishery
- Pilbara Line Fishery (Condition)
- Pilbara Trap Managed Fishery
- Shark Bay Crab Managed Fishery
- Shark Bay Prawn Managed Fishery
- Shark Bay Scallop Managed Fishery
- West Australian Sea Cucumber Fishery
- West Coast Deep Sea Crustacean Managed Fishery
- West Coast Demersal Scalefish (Interim) Managed Fishery
- West Coast Rock Lobster Managed Fishery

Of these State-managed fisheries, the following may have been active in the Operational Area in recent years.

| Griffin Field Decommissioning   | Stybarrow Field Decommissioning  |
|---|--|
| <ul style="list-style-type: none"> <li>• Exmouth Gulf Prawn Managed Fishery</li> <li>• Mackerel Managed Fishery (Area 2)</li> <li>• Marine Aquarium Fish Managed Fishery</li> <li>• Onslow Prawn Managed Fishery</li> <li>• Pilbara Line Fishery (Condition)</li> <li>• Pilbara Trap Managed Fishery</li> <li>• Tour Operators</li> <li>• West Coast Deep Sea Crustacean Managed Fishery</li> </ul> | <ul style="list-style-type: none"> <li>• Tour Operators</li> <li>• West Coast Deep Sea Crustacean Managed Fishery</li> </ul> |

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

**2.34 Letter sent to Gascoyne (65 licence holders) and Pilbara / Kimberley recreational marine users (95 licence holders) (17 February 2023)**

17 February 2023

Dear [Redacted]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Please see the relevant QR codes below which link directly to consultation Information Sheets which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website [www.woodside.com](http://www.woodside.com). You can also subscribe to receive updates on our consultation activities by subscribing through our Consultation Activities page.

Activity Update: Griffin

**2.34.1 Email sent to Carnarvon Fishing Club (17 February 2023)**

Dear Carnarvon Fishing Club

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>  |
|-----------------|---|--|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> </ul> |

## Stybarrow Plug and Abandonment Environment Plan

Hope you're well.

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons, including the Ashburton Anglers, are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

### Activity:

|                 | Griffin Field Decommissioning Activities  | Stybarrow Field Decommissioning Activities  |
|-----------------|---|---|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>Cutting and removal of the wellhead and subsea tree assembly.</li> <li>Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> |

|                                 |   |   |
|---------------------------------|---|---|
|                                 | <ul style="list-style-type: none"> <li>Ongoing field management activities.</li> <li>Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>Proposal to leave in situ 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for the PLEM and 4 distribution skids.</li> </ul> | <ul style="list-style-type: none"> <li>Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Recovery of the DTM may require it to be towed to shallower water outside of permit area WA-32-L to support the DTM removal from the marine environment.</li> <li>Ongoing field management activities (equipment monitoring and inspection).</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>Proposed leave in situ of the 9 DTM drag anchors (buried), nine suction piles for the riser holdbacks and the historical exploration wellhead, Eskdale-1, which was unable to be removed following its drilling and abandonment in 2003.</li> </ul> |
| <b>Location:</b>                | <ul style="list-style-type: none"> <li>94 km northeast of Exmouth, Western Australia.</li> </ul>  | <ul style="list-style-type: none"> <li>53 km northwest of Exmouth, Western Australia.</li> </ul>  |
| <b>Approx. Water Depth (m):</b> | <ul style="list-style-type: none"> <li>Approx. 120 m.</li> </ul>  | <ul style="list-style-type: none"> <li>Approx. 810 – 850 m.</li> </ul>  |
| <b>Schedule:</b>                | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>Earliest proposed removal activity start is estimated to be Q4 2023, subject to approvals, vessel availability and weather constraints.</li> <li>Facilities removal must be completed no later than 31 December 2024, pursuant to General Direction 832.</li> </ul>   | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>Earliest P&amp;A start is estimated to be Q4 2023, subject to approvals, MODU and vessel availability and weather constraints.</li> <li>P&amp;A activities must be completed no later than 30 September 2024, pursuant to General Direction 833.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>Earliest facilities and DTM removal is estimated to be Q4 2023, subject to approvals, vessel availability and weather constraints.</li> </ul>  |

|                                    |   |   |

|                                    |   | <ul style="list-style-type: none"> <li>Equipment removal must be completed no later than 31 March 2025, pursuant to General Direction 833.</li> </ul>   |
| <b>Duration:</b>                   | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>Removal activities are anticipated to take approximately 6 months to complete and GEP removal activities are anticipated to take approximately 2 months to complete.</li> </ul>   | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>P&amp;A activities are anticipated to take approximately 6 – 9 months.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>Removal activities are anticipated to take approximately 4-6 months to complete and DTM removal activities are anticipated to take approximately 1 month to complete.</li> </ul>   |
| <b>Exclusionary/Cautious Zone:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>The temporary Operational Area includes the area encompassing an approximate 1,500 m radius around the equipment.</li> <li>A temporary 500 m exclusion zone will apply around the project vessels during removal and potential tow activities.</li> </ul> | <p><b>P&amp;A Activities</b></p> <ul style="list-style-type: none"> <li>The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centers within WA-32-L.</li> <li>A temporary 500 m exclusion zone will apply around the MODU and the associated project vessels during P&amp;A activities.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>The temporary Operational Area includes the area encompassing an approximate 1,500 m radius around the subsea infrastructure and wellheads.</li> <li>The DTM has an existing 1200 m radius petroleum safety zone which will continue to be in place until it is removed.</li> <li>A temporary 500 m exclusion zone will apply around the CSV and the associated project vessels during removal activities.</li> <li>A temporary 500 m exclusion zone will apply around the HLV</li> </ul> |

|                 |   |  |
|-----------------|---|--|
|                 |   | and the associated project vessels during the removal of the DTM.  |
| <b>Vessels:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Construction support vessel (CSV) and Heavy Lift Vessel (HLV) for recovery and pipeline removal activities.</li> <li>• An anchor handling tug (AHT) to support the towing of the RTM to sheltered water.</li> </ul> | <p><b>P&amp;A activities</b></p> <ul style="list-style-type: none"> <li>• Semi-Submersible Mobile Offshore Drilling Unit (MODU)</li> <li>• The MODU will be supported by 2 to 3 offshore support vessels.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• CSV and HLV for recovery and activities.</li> <li>• AHTs to support the towing of the DTM to the shallower water location (if required).</li> </ul> |

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.34.4 Email sent to the Port Hedland Fishing Club (16 February 2023)**

Dear Port Hedland Fishing Club

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

*Stybarrow Plug and Abandonment Environment Plan*

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

[Company]  
[Address]

Dear Stakeholder

Woodside previously consulted you (correspondence dated 17 February 2023) on Woodside's proposed activities for the decommissioning of the Griffin and Stybarrow fields.

The Griffin Field is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

The below QR codes link to our Consultation Information Sheets for the proposed activities, which provide a summary of potential key risks and associated management measures. Should the information be easier for you to access, the Information Sheets are also available on our [website](#).

Activity Update: Griffin

### **2.34.1.1 Email sent to Carnarvon Fishing Club (10 March 2023)**

Dear Carnarvon Fishing Club

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

### **Woodside Feedback**

### **2.34.1.2 Email sent to Port Hedland Game Fishing Club (10 March 2023)**

Dear Port Hedland Fishing Club

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

## *Stybarrow Plug and Abandonment Environment Plan*

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

## **Woodside Feedback**

### **2.35 Email sent to Karajarri Traditional Lands Association (KTLA) (24 February 2023)**

Good afternoon

In follow up to email correspondence sent to you on 27 January regarding the Environmental Plan (EP) information shared to date for the Scarborough project activity and the Nganghurra Riser Turret Mooring (RTM) removal, please can you advise if you have any queries relating to this activity at your earliest convenience.

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if Karajarri Traditional Lands Association (KTLA) has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if the KTLA would like us to consult further on these EPs.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking KTLA's feedback as soon as possible, Woodside is also seeking KTLA's feedback on these decommissioning and drilling activities by **17 March 2023**.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

Decommissioning Activities:

- Stybarrow. Plug and abandonment (P&A) of the wells.
  - [consultation-information-sheet--stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)

Drilling Activities:

- WA-34-L Pyxis Drilling and Subsea Installation.

## *Stybarrow Plug and Abandonment Environment Plan*

- [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)

If there is anything else, Woodside can do at this time to facilitate consultation, if the directors of KTLA make an assessment that this is required to provide more information about these planned work activities, please let me know.

Thank you for your time in considering these matters.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

### **2.35.1 Follow up Email to Karajarri Traditional Lands Association (24 March 2023)**

Good morning

I'm wondering if you are able to please advise if you have received this email and a separate email regarding our decommissioning activity sent on 24/2.

If you have any questions or would like to discuss further I can make myself available to discuss via phone or in person at a time that is suitable to you and/or an organisation representative.

I look forward to hearing from you.

Kind regards

### **2.36 Email sent to Balangarra Aboriginal Corporation (23 February 2023)**

Hi [REDACTED]

Thankyou for providing the contact information and taking my telephone call. I will call again next week just as a follow up and to make sure you received my email.

I hope this message finds you well.

As per our telephone conversation, I am contacting you regarding Woodside's plans in relation to activities:

1. The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet--stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#);

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Balangarra Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

## *Stybarrow Plug and Abandonment Environment Plan*

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Balanggarra Aboriginal Corporation members as required. Woodside would be pleased to speak with Balanggarra Aboriginal Corporation members in addition to the Balanggarra Aboriginal Corporation Board / office holders.

Kind regards

██████

### **2.37 Email sent to Kimberley Land Council (KLC) (16 February 2023)**

Good afternoon ██████

Thank you for your time the other day and your offer of assistance in relation to the Woodside environmental consultations.

I undertook to provide you with a forward plan for EPs for this year, however, I currently only have the first quarter. In the first quarter there are three EPs where Traditional Owners in the KLC region appear to be adjacent to the "the environment that may be affected" (EMBA). Please refer to the below.

As discussed, we are not seeking to consult with the KLC but seeking to consult with Traditional Owners adjacent to the EMBA. We would appreciate any guidance on how best to reach out to the various groups who may also be currently impacted by floods.

The three EPs below are:

Scarborough Seabed Installation and Trunkline Installation (SCA SITI). In relation to this I have attached an overview sheet in relation to the Scarborough project and the SCA SITI specific information sheet. I understand ██████ from Woodside has already reached out to the 3 groups indicated for that EP; Drill and complete one new Pluto production well (PLA08) and may also carry out maintenance activities on existing production wells. This work will take place in Commonwealth waters, approximately 170 km north-west of Dampier. The proposed PLA08 production well will be located at a water depth of approximately 820m. We will provide information sheets on this shortly.

The decommissioning Stybarrow subsea development wells and removal of infrastructure. We will provide information sheets on this shortly.

As discussed, ██████ will commence calling out to the groups for PLA08 and Stybarrow shortly and may be in contact to determine best way forward.

Kind regards

**2.38 Email to Bundi Yamatji Aboriginal Corporation (BYAC) (17 March 2023)**

Dear [REDACTED]

I hope this email finds you well.

I am contacting you to discuss Woodside's environmental plans in relation to the following activities:

Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.

## *Stybarrow Plug and Abandonment Environment Plan*

consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf  
(woodside.com)

Consultation Information Sheet - Stybarrow Decommissioning Environment Plans (woodside.com)  
Griffin decommissioning.

consultation-information-sheet---griffin-decommissioning-environment-plans.pdf (woodside.com)

Julimar Appraisal Drilling.

Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan  
(woodside.com)

In preparing for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in each EP. The attached documents provide further information about this work, including a summary of the potential risks and the management measures Woodside plans to implement for this work.

Woodside is seeking to understand the nature of the interests that Bundi Yamatj Aboriginal Corporation (BYAC) and its members may have in relation to these activities by **17 April 2023**. If there are other methods of consultation that BYAC would like Woodside to undertake, we would be pleased to work with BYAC to accommodate these.

Please feel free to contact me if you require further information or assistance in relation to this matter. Feedback can be provided directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling Woodside's feedback number 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and the attached document to BYAC members as required. Woodside would be pleased to speak with BYAC members in addition to the BYAC Board/office holders.

Kind regards

### **2.39 Email sent to Buurabalayji Thalanyji Aboriginal Corporation (BTAC) (22 February 2023)**

Dear [REDACTED]

Firstly, thank you for your correspondence of 20 February regarding consultations about the Scarborough project. We will respond to this correspondence in the coming days and would be most grateful for the opportunity to meet with you to discuss the matters raised in your letter and our relationship more broadly.

Further to my correspondence of 18 January regarding Woodside's plan to remove the Nganhurra Riser Turret Mooring (RTM), and of 20 January regarding Woodside's Scarborough project, please find attached information about Woodside's decommissioning and drilling activities that we are seeking to consult with Buurabalayji Thalanyji Aboriginal Corporation (BTAC) about.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking BTAC's feedback as soon as possible, Woodside is seeking BTAC's feedback on these decommissioning and drilling activities by 17 March. The plain English summary of each of

## *Stybarrow Plug and Abandonment Environment Plan*

these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

Decommissioning Activities:

Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 18 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below.

Julimar Appraisal Drilling.

[Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan](#)  
(woodside.com)

We look forward to meeting with you to discuss and respond to the matters raised in your letter, this correspondence, and to discuss other matters important to BTAC and Woodside.

Thank you, [REDACTED] for yours and [REDACTED] consideration and work to progress these important consultations. We are looking forward to working with BTAC.

As always, please feel free to contact me on the details below if you require further information or assistance.

Yours sincerely

### **2.40 Email sent to Dambimangari Aboriginal Corporation (23 February 2023)**

Hi [REDACTED]

I hope this message finds you well.

I spoke with [REDACTED] this afternoon and she pointed me to yourself to provide information on some planned activities south of Dampier.

As per my telephone conversation with [REDACTED] I am contacting you regarding Woodside's plans in relation to activities:

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information

## *Stybarrow Plug and Abandonment Environment Plan*

can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf](#) (woodside.com);

- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan (woodside.com)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Dambimangari Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Dambimangari Aboriginal Corporation members as required. Woodside would be pleased to speak with Dambimangari Aboriginal Corporation members in addition to the Dambimangari Aboriginal Corporation Board / office holders if desired.

Kind regards

### **2.40.1 Follow up Email to Dambimangari Aboriginal Corporation (8 March 2023)**

Dear [REDACTED]

I am following up on my email sent 23.02.23 with the information fact sheets, firstly to make sure you received them and if there were any initial concerns.

If you or any members would like to speak with us, please let us know by 15 March 2023.

You can provide feedback directly to me by email, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Regards

[REDACTED]

### **2.41 Email sent to Gogolanyngor Aboriginal Corporation via Kimberley Land Council (KLC) (28 February 2023)**

Hi

## *Stybarrow Plug and Abandonment Environment Plan*

After speaking with [REDACTED] I am sending through 5 individual emails to be passed on by KLC to the respective PBCs, in relation to activities planned by Woodside Energy. We would appreciate if these emails and information sheets could be passed on at your earliest to provide information to the individual Aboriginal Corporations and their members.

Could I please ask, that I am notified once all the five Aboriginal Groups have been sent the email and information sheets.

Thank you

Info for Gogolanyngor Aboriginal Corporation

Dear [REDACTED]

I hope this message finds you well.

We are contacting you regarding Woodside's plans in relation to near future activities:

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf](#) (woodside.com);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan](#) (woodside.com)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Gogolanyngor Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by 15 March 2023. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Gogolanyngor Aboriginal Corporation members as required. Woodside would be pleased to speak with Gogolanyngor

Aboriginal Corporation members in addition to the Gogolanyngor Aboriginal Corporation Board / office holders if desired.

Kind regards

**2.42 Email sent to Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang Corporation (MG Corp) (23 February 2023)**

Dear [REDACTED]

Nice talking to you today, although only by telephone and I will call again next week just to make sure you received my email.

I hope this message finds you well.

As per our telephone conversation, I am contacting you regarding Woodside's plans in relation to activities:

The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf](#) (woodside.com);

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that MG Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by 15 March 2023. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to MG corporation members as required. Woodside would be pleased to speak with MG corporation members in addition to the MG corporation Board / office holders.

Kind regards

[REDACTED]

**2.42.1 Follow up email sent to Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang Corporation (MG Corp) (8 March 2023)**

Dear [REDACTED]

I am following up on my email sent 24.02.23 with the information fact sheets, firstly to make sure you received them and if there were any initial concerns. If you or any members would like to speak with us, please let us know by **15 March 2023**.

You can provide feedback directly to me by email, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

## 2.43 Email sent to Kariyarra Aboriginal Corporation (24 February 2023)

Hello 

In follow up to our telephone conversation on the 27 January please let me know if you have any questions regarding the Environmental Plan (EP) information shared with you to date for Scarborough and Nganhurra RTM.

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if Kariyarra has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if Kariyarra would like us to consult further on these EPs.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking Kariyarra's feedback as soon as possible, Woodside is also seeking Kariyarra's feedback on these decommissioning and drilling activities by **17 March 2023**. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.

- [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

If there is anything else, Woodside can do at this time to facilitate consultation if Kariyarra make an assessment that this is required to provide more information about these planned work activities please let me know.

Thank you for your time in considering these matters.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

#### **2.44 Email sent to Karri Karrak Aboriginal Corporation (KKAC) (17 March 2023)**

Good afternoon [REDACTED]

I am reaching out on the understanding you are the point of contact for the Karri Karrak Aboriginal Corporation (KKAC). I have attached information in relation to Woodside's proposal to plug and abandon (P&A) a former production well that was used for the Stybarrow project approximately 50km North West of Exmouth. The Stybarrow project is no longer operating and Woodside is in the process of completing the decommissioning of this project.

In preparation for this P&A work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Please find below a link to the Consultation Information Sheet for this activity and attached a plain English overview. These documents provide further background on this proposed work, including a summary of potential key risks and associated management measures.

- [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)

Woodside is seeking to understand the nature of the interests that Karri Karrak Aboriginal Corporation (KKAC) and its members may have in relation to this P&A activity, and particularly in relation to the highly unlikely event that a loss of well containment may cause an accumulation of hydrocarbons on parts of the shoreline on KKAC country. Woodside is seeking KKAC's feedback by 17 April 2023.

Please feel free to contact me if you require further information or assistance in relation to this matter. We are also happy to discuss appropriate mechanisms for consultation.

KKAC can provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling Woodside's feedback number 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached document to KKAC members as required. Woodside would be pleased to speak with KKAC members in addition to the KKAC Board/office holders.

I look forward to hearing from you.

Sincerely

**2.45 Email sent to Malgana Aboriginal Corporation (17 March 2023)**

Dear [REDACTED]

Further to our recent conversations and plans to meet, please additional decommissioning and drilling activities for consideration at the meeting. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

Decommissioning Activities:

- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

Drilling Activities:

- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

We look forward to meeting with you and receiving feedback from Malgana about these activities.

Kind regards

[REDACTED]

**2.46 Email sent to Mayala Inninalang Aboriginal Corporation via Kimberley Land Council (KLC) (28 February 2023)**

Hi  
Info for Myala Inninalang Aboriginal Corporation.

Dear [REDACTED]

I hope this message finds you well.

We are contacting you regarding Woodside's plans in relation to near future activities:

## Stybarrow Plug and Abandonment Environment Plan

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf (woodside.com);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan (woodside.com)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Mayala Inninalang Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by 15 March 2023. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to Feedback@woodside.com.au or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to communications@nopsema.gov.au or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Mayala Inninalang Aboriginal Corporation members as required. Woodside would be pleased to speak with Mayala Inninalang Aboriginal Corporation members in addition to the Mayala Inninalang Aboriginal Corporation Board / office holders if desired.

Kind regards

### **2.46.1 Follow up email sent to Mayala Inninalang Aboriginal Corporation via Kimberley Land Council (KLC) (8 March 2023)**

Hi [REDACTED]

We are required to follow up with the Native Titleholders just to check in and make sure they have no concerns and to re-iterate to contact us if they do. Below is what I have sent out to other groups and asking if you could please send out to the 5 groups KLC manage and when sending, could you please cc feedback@woodside.com.au

Dear [REDACTED]

I am following up on my email sent 23.02.23 with the information fact sheets, firstly to make sure you received them and if there were any initial concerns. If you or any members would like to speak with us, please let us know by 15 March 2023.

You can provide feedback, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Thanks

**2.47 Email sent to Nanda Aboriginal Corporation (NAC) (17 March 2023)**

Hi

Thank you for the meeting with YMAC legal on 13 March. It was a pleasure to meet you all.

I am following up to see whether you have a date and budget for a meeting with Nanda AC (NAC) and to notify you of additional EPs for consideration by the NAC Board outlined below.

1. Woodside's proposal to plug and abandon (P&A) a former production well that was used for the Stybarrow project approximately 50km North West of Exmouth. The Stybarrow project is no longer operating and Woodside is in the process of completing the decommissioning of this project. In preparation for this P&A work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Please see link to the Consultation Information Sheet for this activity, and attached plain English overview. These documents provide further background on this proposed work, including a summary of potential key risks and associated management measures.

2. Woodside plans to drill and complete one new Pluto gas production well called PLA08. Subsea equipment will be installed to connect this well to the existing Pluto subsea infrastructure. It may also carry out maintenance activities on existing Pluto, Pyxis and Xena gas production wells as required. This work will take place in Commonwealth waters, approximately 170 km north-west of Dampier in title area WA-34-L. The proposed PLA08 production well will be located at a water depth of approximately 820m. WA-34-L Pyxis Drilling and Subsea Installation.

Please see link to the Consultation Information Sheet for this activity, and attached plain English overview. These documents provide further background on this proposed work, including a summary of potential key risks and associated management measures.

Woodside is seeking to understand the nature of the interests that NAC and its members may have in relation to these activities. Please feel free to contact me if you require further information or assistance in relation to this matter. We are also happy to discuss appropriate mechanisms for consultation.

NAC can provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling Woodside's feedback number 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and the attached document to NAC members as required. Woodside would be pleased to speak with NAC members in addition to the NAC Board/office holders.

Kind regards

**2.48 Email sent to Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC) via Yamatji Marlpa Aboriginal Corporation (YMAC) (21 February 2023)**

Dear [REDACTED]

Firstly, thank you for your assistance in arranging the meeting between NTGAC and Woodside on 16 February. It was a pleasure to meet the NTGAC Board and YMAC staff. We were most grateful for the opportunity to provide information about our plans and to learn of NTGAC's questions. We will write separately to thank the NTGAC Board for the meeting.

As was discussed during our meeting, please find attached information about Woodside's decommissioning and drilling activities. With the exception of removing the Nganhurra Riser Turret Mooring, for which Woodside seeks NTGAC's feedback soonest, Woodside is seeking feedback on these decommissioning and drilling activities by **17 March**. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. To recap, these activities are:

**Decommissioning Activities:**

Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 18 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below. [consultation-information-sheet---nganhurra-operations-cessation-environment-plan-revision.pdf \(woodside.com\)](#)

Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A), and decommissioning. [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)

Woodside also looks forward to receiving NTGAC's feedback on the four Scarborough project activities as soon as is possible.

In providing this information and requests for feedback, I acknowledge [REDACTED] email of 20 February outlining NTGAC's request of Woodside to provide funding for YMAC's in-house environmental scientist to undertake a review of the RTM environmental plan. [REDACTED] [REDACTED] will be in contact with [REDACTED] directly about this in the coming days.

Thanks again [REDACTED] for your assistance last week, your consideration of these matters and for your work to progress these important consultations.

Yours sincerely

## **2.49 Email to Yamatji Marlpa Aboriginal Corporation (YMAC) (21 February 2023)**

Dear [REDACTED]

Firstly, thank you for your assistance in arranging the meeting between NTGAC and Woodside on 16 February. It was a pleasure to meet the NTGAC Board and YMAC staff. We were most grateful for the opportunity to provide information about our plans and to learn of NTGAC's questions. We will write separately to thank the NTGAC Board for the meeting. As was discussed during our meeting, please find attached information about Woodside's decommissioning and drilling activities. With the exception of removing the Nganhurra Riser Turret Mooring, for which Woodside seeks NTGAC's feedback soonest, Woodside is seeking feedback on these decommissioning and drilling activities by **17 March**. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. To recap, these activities are:

Decommissioning Activities:

Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 18 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below. [consultation-information-sheet---nganhurra-operations-cessation-environment-plan-revision.pdf](#) (woodside.com)

Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A), and decommissioning. [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf](#) (woodside.com)

Consultation Information Sheet - Stybarrow Decommissioning Environment Plans (woodside.com)  
Griffin decommissioning.

[consultation-information-sheet---griffin-decommissioning-environment-plans.pdf](#) (woodside.com)

Drilling Activities:

TPA03 Well Intervention.

Consultation Information Sheet - TPA03 Well Intervention Environment Plan (woodside.com)

WA-34-L Pyxis Drilling and Subsea Installation.

Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan (woodside.com)

Julimar Appraisal Drilling.

Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan (woodside.com)

Woodside also looks forward to receiving NTGAC's feedback on the four Scarborough project activities as soon as is possible.

In providing this information and requests for feedback, I acknowledge [REDACTED] email of 20 February outlining NTGAC's request of Woodside to provide funding for YMAC's in-house environmental scientist to undertake a review of the RTM environmental plan. [REDACTED] [REDACTED] will be in contact with [REDACTED] directly about this in the coming days.

Thanks again [REDACTED] your assistance last week, your consideration of these matters and for your work to progress these important consultations.

Yours sincerely

## 2.50 Email sent to Ngarluma Aboriginal Corporation (NAC) (24 February 2023)

Good morning,

I mentioned I would be sharing more information when we met on **Friday 17 February**, to discuss the Environmental Plan (EP) information shared with you to date for Scarborough and Nganhurra RTM. This is the email with further information for NAC to consider if they have any interests in the EMBA (Environment that may be affected) relative to the attached information sheets.

It would be greatly appreciated if you could please acknowledge receipt and confirm the opportunity to meet with the NAC board when they are next due to meet on 29 or 30 March. We welcome the opportunity to spend a whole day with the board on a different day if that works.

This email provides information on Woodside's decommissioning and drilling activities that we are seeking to consult with NAC about.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking NAC's feedback as soon as possible, Woodside is seeking NAC's feedback on these decommissioning and drilling activities by **17 March** 2023. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 20 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below.
  - [consultation-information-sheet---nganhurra-operations-cessation-environment-plan-revision.pdf \(woodside.com\)](#)
- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

## *Stybarrow Plug and Abandonment Environment Plan*

In providing this information and requests for feedback, I acknowledge that we are working towards presenting to the NAC board at their next board meeting in March. Woodside would be most grateful for the opportunity to meet with NAC, at NAC's earliest convenience, and at a location suitable to NAC. Woodside would also be pleased to provide the resources necessary to hold this meeting and we look forward to receiving a budget for consideration. If there is anything else, we can do at this time to facilitate consultation about these planned work activities please let me know.

Thank you, [REDACTED] for consideration of these matters and work to progress these important consultations.

Please feel free to contact me on the details below if you require further information or assistance.

Regards

### **2.51 Email sent to Nimanburr Aboriginal Corporation via Kimberley Land Council (KLC) (28 February 2023)**

Hi

Info for Nimanburr Aboriginal Corporation

Dear [REDACTED]

I hope this message finds you well.

We are contacting you regarding Woodside's plans in relation to near future activities:

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf (woodside.com);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan (woodside.com)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Nimanburr Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Nimanburr Aboriginal Corporation members as required. Woodside would be pleased to speak with Nimanburr Aboriginal Corporation members in addition to the Nimanburr Aboriginal Corporation Board / office holders if desired.

Kind regards

**2.51.1 Follow up email sent to Nimanburr Aboriginal Corporation via Kimberley Land Council (KLC) (8 March 2023)**

Hi [REDACTED]

We are required to follow up with the Native Titleholders just to check in and make sure they have no concerns and to re-iterate to contact us if they do. Below is what I have sent out to other groups and asking if you could please send out to the 5 groups KLC manage and when sending, could you please cc [feedback@woodside.com.au](mailto:feedback@woodside.com.au)

Dear [REDACTED]

I am following up on my email sent 23.02.23 with the information fact sheets, firstly to make sure you received them and if there were any initial concerns. If you or any members would like to speak with us, please let us know by **15 March 2023**.

You can provide feedback, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Thanks  
[REDACTED]

**2.52 Email sent to Nyul Nyul Aboriginal Corporation via Kimberley Land Council (KLC) (28 February 2023)**

Hi  
Info for Nyul Nyul PBC Aboriginal Corporation.

Dear [REDACTED]

I hope this message finds you well.

We are contacting you regarding Woodside's plans in relation to near future activities:

## *Stybarrow Plug and Abandonment Environment Plan*

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf (woodside.com);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan (woodside.com)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Nyul Nyul Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by 15 March 2023. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Nyul Nyul Aboriginal Corporation members as required. Woodside would be pleased to speak with Nyul Nyul Aboriginal Corporation members in addition to the Nyul Nyul Aboriginal Corporation Board / office holders if desired.

Kind regards

### **2.53 Email sent to Nyangumarta Karajarri Aboriginal Corporation (NKAC) via Kimberley Land Council (KLC) (24 February 2023)**

Hello [REDACTED]

Thank you for your email received on 30 January advising that you have forwarded the Environmental Plan (EP) information shared to date for Scarborough and the Nganghurra RTM on to the respective Nyangumarta Karajarri Aboriginal Corporation (NKAC) directors.

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if NKAC has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if the NKAC directors would like us to consult further on these EPs.

## *Stybarrow Plug and Abandonment Environment Plan*

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking NKAC's feedback as soon as possible, Woodside is also seeking NKAC's feedback on these decommissioning and drilling activities by 17 March 2023.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. Plug and abandonment (P&A) of the wells.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)

### Drilling Activities:

- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)

If there is anything else, Woodside can do at this time to facilitate consultation, if the directors of NKAC make an assessment that this is required to provide more information about these planned work activities, please let me know.

Thank you for your time in considering these matters.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

### **2.53.1 Follow up Email sent to Nyangumarta Karajarri Aboriginal Corporation (NGAC) via Kimberley Land Council (KLC) (24 March 2023)**

Hello [REDACTED]

I hope you are well. I thought I would reach out in follow up to the information on Scarborough and other decommissioning activity that has been sent for sharing with the directors and whether any questions or interest in meeting with Woodside to discuss the information further may have arisen.

Please don't hesitate to contact me if you have any queries on this as we welcome the opportunity to meet should the directors wish to do so.

Kind regards  
[REDACTED]

### **2.54 Email sent to Nyangumarta Warrarn Aboriginal Corporation (NWAC) (24 February 2023)**

Dear [REDACTED]

I thought I would take this opportunity to follow up on our previous email correspondence sent to you on 27 January regarding the Environmental Plan (EP) information shared to date for the Scarborough project activity and the Nganhurra Riser Turret Mooring (RTM)

## *Stybarrow Plug and Abandonment Environment Plan*

removal. If you have any queries relating to this activity please let me know at your earliest convenience.

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if Nyangumarta Warrarn Aboriginal Corporation (NWAC) has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if the NWAC directors would like us to consult further on these EPs.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking NWAC's feedback as soon as possible, Woodside is also seeking NWAC's feedback on these decommissioning and drilling activities by 17 March 2023.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. Plug and abandonment (P&A) of the wells.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)

### Drilling Activities:

- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)

If there is anything else, Woodside can do at this time to facilitate consultation, if the directors of NWAC make an assessment that this is required to provide more information about these planned work activities, please let me know.

Thank you for your time in considering these matters.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

## **2.55 Email sent to Bardi and Jawi Niimidiman Aboriginal Corporation (24 February 2023)**

Hi [REDACTED]

Nice talking to you earlier and as per our conversation, please find attached Fact Sheets and relevant info below.

I am contacting you regarding Woodside's plans in relation to near future activities:

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website -

Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation  
Environment Plan (woodside.com)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Bardi Jawi Niimidiman Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by 15 March 2023. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Bardi Jawi Niimidiman Aboriginal Corporation members as required. Woodside would be pleased to speak with Bardi Jawi Niimidiman Aboriginal Corporation members in addition to the Bardi Jawi Niimidiman Aboriginal Corporation Board / office holders if desired.

Kind regards

**2.55.1 Follow up email sent to Bardi Jawi Niimidiman Aboriginal Corporation (8 March 2023)**

Dear [REDACTED]

I am following up on my email sent 24.02.23 with the information fact sheets, firstly to make sure you received documents and if there were any initial concerns.

If you or any members would like to speak with us, please let us know by 15 March 2023.

You can provide feedback directly to me by email, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Regards  
[REDACTED]

**2.56 Email sent to Wanparta Aboriginal Corporation (24 February 2023)**

Hello [REDACTED]

## *Stybarrow Plug and Abandonment Environment Plan*

In follow up to your email received on 31 January please let me know if you have received any questions from the Wanparta Directors regarding the Environmental Plan (EP) information shared with you to date for Scarborough and Nganghurra RTM.

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if Wanparta has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if Wanparta would like us to consult further on these EPs.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking Wanparta's feedback as soon as possible, Woodside is also seeking Wanparta's feedback on these decommissioning and drilling activities by 17 March 2023.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. Plug and abandonment (P&A) of the wells.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

If there is anything else, Woodside can do at this time to facilitate consultation, if Wanparta make an assessment that this is required to provide more information about these planned work activities, please let me know.

Thank you for your time in considering these matters.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

## **2.57 Email sent to Wilinggin Aboriginal Corporation (24 February 2023)**

Dear Wilinggin Aboriginal Corporation

I hope this message finds you well.

I am contacting you regarding Woodside's plans in relation to near future activities:

1. The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#);

## *Stybarrow Plug and Abandonment Environment Plan*

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Wilinggin Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Wilinggin Aboriginal Corporation members as required. Woodside would be pleased to speak with Wilinggin Aboriginal Corporation members in addition to the Wilinggin Aboriginal Corporation Board / office holders.

Kind regards

■

### **2.57.1 Follow up email sent to Wilinggin Aboriginal Corporation (8 March 2023)**

Dear Wilinggin Aboriginal Corporation

I am following up on my email sent 24.02.23 with the information fact sheets, to see if there were any initial concerns.

If you or any members would like to speak with us, please let us know by 15 March 2023.

You can provide feedback directly to me by email, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Regards

■

### **2.58 Email sent to Wirrawandi Aboriginal Corporation (WAC) (24 February 2023)**

Good morning, ■

I hope your Friday is going well.

I mentioned I would be sharing more information when we met on Tuesday 21 February, to discuss the Environmental Plan (EP) information shared with you to date for Scarborough

and Nganhurra RTM. This is the email with further information for Wirrawandi to consider if they have any interests in the Environment that may be affected (EMBA) relative to the attached information sheets.

It would be greatly appreciated if you could please acknowledge receipt and confirm the opportunity to meet with the Wirrawandi board when they are next due to meet in Perth in March.

This email provides information on Woodside's decommissioning and drilling activities that we are seeking to consult with Wirrawandi about.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking Wirrawandi's feedback as soon as possible, Woodside is seeking Wirrawandi's feedback on these decommissioning and drilling activities by **17 March 2023**. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

Decommissioning Activities:

- Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 18 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below.
  - [consultation-information-sheet---nganhurra-operations-cessation-environment-plan-revision.pdf \(woodside.com\)](#)
- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

In providing this information and requests for feedback, I acknowledge that we are working towards presenting to the Wirrawandi board at their next board meeting in March. Woodside would be most grateful for the opportunity to meet at Wirrawandi's earliest convenience, and at a location suitable to Wirrawandi. Woodside would also be pleased to provide the resources necessary to hold this meeting and we look forward to receiving a budget for consideration. If there is anything else, we can do at this time to facilitate consultation about these planned work activities please let me know.

## Stybarrow Plug and Abandonment Environment Plan

Thank you, [REDACTED] for consideration of these matters and work to progress these important consultations.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

### 2.59 Email sent to Wanjina-Wunggurr Aboriginal Corporation via Kimberley Land Council (KLC) (28 February 2023)

Hi

After speaking with [REDACTED] I am sending through 5 individual emails to be passed on by KLC to the respective PBCs, in relation to activities planned by Woodside. We would appreciate if these emails and information could be passed on at your earliest to provide information to the individual Aboriginal Corporations and their members.

Dear [REDACTED]

I hope this message finds you well.

We are contacting you regarding Woodside's plans in relation to near future activities:

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Wunjina-Wunggurr Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Wunjina-Wunggurr Aboriginal Corporation members as required. Woodside would be pleased to speak with Wunjina-Wunggurr Aboriginal Corporation members in addition to the Wunjina-Wunggurr Aboriginal Corporation Board / office holders if desired.

Kind regards

**2.59.1 Follow up email to Wanjina-Wunggurr Aboriginal Corporation via Kimberley Land Council (KLC) (5 April 2023)**

Dear [REDACTED]

I am contacting you as the nominated contact person for Wanjina-Wunggurr Aboriginal Corporation.

Information was sent out 28/02/23 in relation to activities planned by Woodside Energy (Stybarrow plug and abandonment and Pyxis drilling and subsea installation activity) to Wanjina-Wunggurr Aboriginal Corporation and since we did not hear back, we are wanting to check that there are no concerns or questions so as we can these concerns addressed by the appropriate subject matter experts.

Could I please ask, if Wanjina-Wunggurr Aboriginal Corporation board or members have any concerns or questions, they contact me by email with these to [REDACTED] or to yourself.

Alternatively, if there are no concerns, could they also contact myself or yourself to inform us that there are no concerns or questions relating to the above mentioned activities.

Thanks and regards

[REDACTED]

**2.60 Email sent to Wunambal Gaambera Aboriginal Corporation (WGAC) (24 February 2023)**

Dear [REDACTED]

I tried calling yesterday and today I was given your email address and phone number.

I hope this message finds you well.

I am contacting you regarding Woodside's plans in relation to near future activities:

1. The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](https://www.woodside.com/consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf);

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

## *Stybarrow Plug and Abandonment Environment Plan*

Woodside is seeking to understand the nature of the interests that Wunambal Gaambera Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Wunambal Gaambera Aboriginal Corporation members as required. Woodside would be pleased to speak with Wunambal Gaambera Aboriginal Corporation members in addition to the Wunambal Gaambera Aboriginal Corporation Board / office holders.

Kind regards

■

### **2.60.1 Follow up Email to Wunambal Gaambera Aboriginal Corporation (WGAC) (8 March 2023)**

Dear ■

I am following up on my email sent 24.02.23 with the information fact sheets, firstly to make sure you received them and if there were any initial concerns.

If you or any members would like to speak with us, please let us know by 15 March 2023.

You can provide feedback directly to me by email, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Regards

■

### **2.61 Email sent to Yamatiji Marlpa Aboriginal Corporation (YMAC) (21 February 2023)**

Dear ■

Firstly, thank you for your assistance in arranging the meeting between NTGAC and Woodside on 16 February. It was a pleasure to meet the NTGAC Board and YMAC staff. We were most grateful for the opportunity to provide information about our plans and to learn of NTGAC's questions. We will write separately to thank the NTGAC Board for the meeting.

As was discussed during our meeting, please find attached information about Woodside's decommissioning and drilling activities. With the exception of removing the Nganhurra Riser Turret Mooring, for which Woodside seeks NTGAC's feedback soonest, Woodside is seeking feedback on these decommissioning and drilling activities by 17 March. The plain English

## Stybarrow Plug and Abandonment Environment Plan

summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. To recap, these activities are:

### Decommissioning Activities:

- Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 18 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below.
  - [consultation-information-sheet---nganhurra-operations-cessation-environment-plan-revision.pdf \(woodside.com\)](#)
- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A), and decommissioning.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

Woodside also looks forward to receiving NTGAC's feedback on the four Scarborough project activities as soon as is possible.

In providing this information and requests for feedback, I acknowledge [REDACTED] email of 20 February outlining NTGAC's request of Woodside to provide funding for YMAC's in-house environmental scientist to undertake a review of the RTM environmental plan. [REDACTED] will be in contact with [REDACTED] directly about this in the coming days.

Thanks again [REDACTED] for your assistance last week, your consideration of these matters and for your work to progress these important consultations.

Yours sincerely

[REDACTED]

## 2.62 Email sent to Yawuru Title Holders Aboriginal Corporation (23 February 2023)

Hi [REDACTED]

## *Stybarrow Plug and Abandonment Environment Plan*

As per our conversation, please find attached fact sheets and below some information and contact points. I will follow up next week to see if there are any immediate concerns and to check you received info.

I am contacting Yawuru Aboriginal Corporation regarding Woodside's plans in relation to activities:

- The Stybarrow plug and abandonment (P&A) of the wells as part of the decommissioning, the Summary Information sheet is attached and further information can be found here on Woodside's website - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#);
- The Pyxis drilling and subsea installation activity the Summary Information sheet is attached and ad further information can be found here on Woodside's website - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)

In preparation for the activities, Woodside has undertaken assessments to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Woodside is seeking to understand the nature of the interests that Yawuru Native Title Holders Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts, as set out in the Summary Information sheet attached.

If you would like to speak with us, please let us know by **15 March 2023**. Please also let us know how you would like us to engage with you as soon as possible.

If there is any support or specific information that you require as part of our engagement, please let me know.

You can also provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and, the attached documents to Yawuru Native Title Holders Aboriginal Corporation members as required. Woodside would be pleased to speak with Yawuru Native Title Holders Aboriginal Corporation members in addition to the Yawuru Native Title Holders Aboriginal Corporation Board / office holders if desired.

Regards

### **2.63 Email sent to Yindjibarndi Aboriginal Corporation (YAC) (24 February 2023)**

Hello [REDACTED]

I understand you last spoke with [REDACTED] on 25 January regarding the Environmental Plan (EP) information shared with YAC for the Scarborough project activity and Nganghurra RTM.

## *Stybarrow Plug and Abandonment Environment Plan*

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if YAC has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if YAC would like us to consult further on these EPs.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which I understand YAC has verbally advised they have no interests, Woodside is also seeking YAC's feedback on these decommissioning and drilling activities by **17 March 2023**.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

Thank you for your time in considering these matters. We look forward to hearing from you.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

## **2.64 Email sent to Yinggarda Aboriginal Corporation via Yamatji Marlpa Aboriginal Corporation (YMAC) (22 February 2023)**

Dear [REDACTED]

I hope this message finds you well.

Further to my correspondence of 18 January regarding Woodside's plan to remove the Nganhurra Riser Turret Mooring (RTM), and [REDACTED] correspondence of 20 January regarding Woodside's Scarborough project, please find attached information about Woodside's decommissioning and drilling activities that we are seeking to consult with Yinggarda Aboriginal Corporation (YAC) about.

## Stybarrow Plug and Abandonment Environment Plan

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking YAC's feedback as soon as possible, Woodside is seeking YAC's feedback on these decommissioning and drilling activities by 17 March. The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Removal of the Nganhurra Riser Turret Mooring (RTM). Information about the RTM was previously emailed on 18 January. For ease of reference, the summary information is attached and the consultation information sheet for the RTM can be found at the link below.
  - [consultation-information-sheet---nganhurra-operations-cessation-environment-plan-revision.pdf \(woodside.com\)](#)
- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

In providing this information and requests for feedback, I acknowledge [REDACTED] correspondence of 6 February and my response of 10 February in which we discussed arrangements for a meeting between YAC and Woodside. Woodside would be most grateful for the opportunity to meet with YAC, at YAC's earliest convenience, and at a location suitable to YAC. Woodside would also be pleased to provide the resources necessary to hold this meeting and we look forward to receiving a budget for consideration. If there is anything else, we can do at this time to facilitate consultation about these planned work activities please let me know.

Thank you, [REDACTED], for yours, YAC's and YMAC's consideration of these matters and work to progress these important consultations.

As always, please feel free to contact me on the details below if you require further information or assistance.

Yours sincerely

## 2.65 Email sent to Yued Aboriginal Corporation (17 March 2023)

*Stybarrow Plug and Abandonment Environment Plan*

Dear Yued Aboriginal Corporation

Please find below and attached information concerning Woodside's proposal to plug and abandon (P&A) a former production well that was used for the Stybarrow project approximately 50km North West of Exmouth. The Stybarrow project is no longer operating and Woodside is in the process of completing the decommissioning of this project.

In preparation for this P&A work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the Environmental Plan (EP).

Please find below a link to the Consultation Information Sheet for this activity and attached a plain English overview. These documents provide further background on this proposed work, including a summary of potential key risks and associated management measures.

[consultation-information-sheet--stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)

Woodside is seeking to understand the nature of the interests that YAC and its members may have in relation to this P&A activity, and particularly in relation to the highly unlikely event that a loss of well containment may cause an accumulation of hydrocarbons on parts of the shoreline on YAC country. Woodside is seeking YAC's feedback by **17 April 2023**.

Please feel free to contact me if you require further information or assistance in relation to this matter. We are also happy to discuss appropriate mechanisms for consultation.

YAC can provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling Woodside's feedback number 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please feel free to forward this email and the attached document to YAC members as required. Woodside would be pleased to speak with YAC members in addition to the YAC Board/office holders.

I look forward to hearing from you.

Sincerely

[Redacted signature block]

**2.66 Email sent to Robe River Kuruma Aboriginal Corporation (RRKAC) (24 February 2023)**

Hello [Redacted]

I understand you met with [Redacted] 31 January regarding the Environmental Plan (EP) information shared with Robe River Kuruma Aboriginal Corporation (RRKAC) for the Scarborough project activity and Nganghurra RTM and that this information was to be presented at the RRKAC Board meeting this week 21-22 February. [Redacted] advised we have a number of EPs we will reach out to RRKAC on.

## Stybarrow Plug and Abandonment Environment Plan

This email provides further information on Woodside's decommissioning and drilling activities that we are seeking to understand if RRKAC has any interests in the Environment that may be affected (EMBA) relative to the attached information sheets and if RRKAC would like us to consult further on these EPs.

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside would appreciate feedback on as soon as possible, Woodside is also seeking RRKAC's feedback on these decommissioning and drilling activities by **17 March 2023**.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

Thank you for your time in considering these matters. We look forward to hearing from you.

Please feel free to contact me on the details below if you require further information or assistance.

Kind regards

## 2.67 Email sent to Murujuga Aboriginal Corporation (MAC) (24 February 2023)

Wayiba [REDACTED]

I understand that you met with Woodside on Monday 20 February to further discuss the information shared to date on the Nganhurra RTM decommissioning and Scarborough project activity Environmental Plans (EPs). I believe you have been made aware of other EPs we also request your feedback on.

## *Stybarrow Plug and Abandonment Environment Plan*

With the exception of removing the Nganhurra RTM and the Scarborough project, for which Woodside is seeking MAC's feedback as soon as possible, Woodside is also seeking MAC's feedback on these decommissioning and drilling activities by **17 March 2023**.

The plain English summary of each of these activities is attached, and I have provided a link to the more detailed consultation information sheets below. These activities are:

### Decommissioning Activities:

- Stybarrow. This involves two work activities that are subject to separate environment plans; plug and abandonment (P&A) of the wells and decommissioning the infrastructure.
  - [consultation-information-sheet---stybarrow-plug-and-abandonment-environment-plan.pdf \(woodside.com\)](#)
  - [Consultation Information Sheet - Stybarrow Decommissioning Environment Plans \(woodside.com\)](#)
- Griffin decommissioning.
  - [consultation-information-sheet---griffin-decommissioning-environment-plans.pdf \(woodside.com\)](#)

### Drilling Activities:

- TPA03 Well Intervention.
  - [Consultation Information Sheet - TPA03 Well Intervention Environment Plan \(woodside.com\)](#)
- WA-34-L Pyxis Drilling and Subsea Installation.
  - [Consultation Information Sheet - WA-34-L Pyxis Drilling and Subsea Installation Environment Plan \(woodside.com\)](#)
- Julimar Appraisal Drilling.
  - [Consultation Information Sheet - Julimar Appraisal Drilling and Survey Environment Plan \(woodside.com\)](#)

Thank you for your time in considering these matters and please feel free to contact me on the details below if you require further information or assistance.

Kind regards

## **2.68 Email sent to Department of Foreign Affairs and Trade (DFAT) (15 March 2023)**

Dear Department of Foreign Affairs and Trade (DFAT)

Woodside is planning to undertake the following activities in Commonwealth waters under the following environment plans:

- drilling and subsea infrastructure installation activities for one well (PLA08) and contingent well intervention activities for current production wells, under the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan Revision (**PLA08 EP**).
- plug and abandonment (P&A) activities in the Stybarrow field, under the Stybarrow P&A Environment Plan (**Stybarrow P&A EP**).

An overview of the proposed activities in the PLA08 EP and the Stybarrow P&A EP is set out below.

Following recent changes to Commonwealth Environment Plan consultation requirements, Woodside is now consulting stakeholders who are located within the environment that may be affected (EMBA) by a proposed petroleum activity.

The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence. For these environment plans, the broadest extent of the EMBA has been determined by

*Stybarrow Plug and Abandonment Environment Plan*

the highly unlikely event of a hydrocarbon release from activities within the scope the EP. The worst-case credible spill scenario for the PLA08 EP and Stybarrow P&A EP is a well loss of integrity.

The EMBA's for the PLA08 EP and Stybarrow P&A EP traverse international waters and modelling has indicated that there may be a potential for hydrocarbons to accumulate on Indonesian shorelines. Therefore, these EPs may require international consultation and oil spill response requirements. The PLA08 EP Operational Area is located approximately 315 km from international waters and the Stybarrow P&A EP Operational Area is located approximately 313 km from international waters.

Due to the distance of the Operational Area from international waters, any hydrocarbons that reach those waters and/or Indonesian shorelines would likely result in coverage which is fragmented (with low concentrations) and weathered hydrocarbons.

Updated Consultation Information Sheets are attached, which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

**Input for DFAT:**

With respect to the proposed activities under the PLA08 EP and Stybarrow P&A EP, Woodside requests the following information from DFAT:

- Feedback from DFAT specific to the proposed activities described under the relevant EPs.
- Management of vessels (for example, fishing or shipping vessels), should these vessels be present in the EMBA.
- Confirmation as to whether there are any specific persons or organisations that Woodside should contact whose functions, interests or activities may be affected by the proposed activities in foreign countries and, if so, the relevant contact details
- Implications for oil spill planning and response in international waters. This includes any specific persons or organisations Woodside should contact in the event of unplanned activities where the interests of foreign countries may be impacted to assist with our response planning.

**Oil Spill Response Planning and Marine Pollution:**

We note DFAT's previous advice (correspondence dated 29 July 2021) during EP consultation regarding oil spill response planning in international waters. In finalising our marine pollution notifications for the PLA08 EP and Stybarrow P&A EP, **Woodside seeks confirmation that the following notifications meet DFAT's requirements:**

- Woodside will verbally notify AMSA and Western Australian departments responsible for marine pollution as soon as possible after the incident.
- Woodside will follow up its AMSA notification by way of an online report via AMSA's web site.
- Woodside will notify other relevant government departments as soon as practicable. These notifications include DFAT via the [sea.law@dfat.gov.au](mailto:sea.law@dfat.gov.au) email address if a spill is likely to enter international waters.

Woodside may have proposed activities in the future which may also have EMBA's that reach international waters. These environment plans might have similar international consultation and spill response requirements as well.

We would be grateful for DFAT's feedback and advice by **14 April 2023**. Please respond to Woodside at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

**Activity:**

|                 | PLA08 EP   | Stybarrow P&A EP  |
|-----------------|--|---|
| <b>Summary:</b> | Drill and develop the proposed PLA08 production well.<br>Contingent activities including well intervention workover or re-drill the Pluto, Pyxis, and Xena production wells (PLA01 to PLA08, PYA01 and PL-PYA02, and XNA01 | <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> </ul> |

*Stybarrow Plug and Abandonment Environment Plan*

|   |  |  |
|---|--|--|
|   | and XNA02) to monitor and maintain their integrity, if required.   | <ul style="list-style-type: none"> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul>  |
| <b>Permit area:</b>                                       | WA-34-L  | WA-32-L  |
| <b>Location:</b>  | ~170 km north-west of Dampier  | ~53 km northwest of Exmouth, Western Australia.  |
| <b>Operational Area distance to international waters:</b> | ~ 315 km   | ~ 313 km   |
| <b>Approx. Water Depth (m):</b>                           | PLA08: ~820 m  | ~ 810 – 850 m.   |
| <b>Schedule:</b>  | Planned drilling, completions, subsea installation and pre-commissioning activities for the proposed PLA08 well are anticipated around Q2 – Q4 2023. Timing of activities is subject to approvals, project schedule requirements, vessel availability, weather or unforeseen circumstances.  | Earliest P&A start is estimated to be Q4 2023, subject to approvals, MODU and vessel availability and weather constraints. P&A activities must be completed no later than 30 September 2024, pursuant to General Direction 833.                                  |
| <b>Duration:</b>  | Drilling activities for the proposed PLA08 well are currently expected to take approximately 50 days to complete. Installation of subsea infrastructure and pre-commissioning will commence on completion of drilling and is expected to take up to approximately 30 days. If required, well intervention activities will take up to 70 days per well to complete. Activities may occur intermittently over a two-year period.                   | P&A activities are anticipated to take approximately 6 – 9 months.   |
| <b>Exclusionary / Cautionary Zone:</b>                    | A 500 m radius Operational Area will be applied around the dynamically positioned MODU.<br>A 1500 m radius Operational Area will be applied around the PLA08 well location and subsea installation locations (PLA08 to Pluto manifold) whilst activities are taking place.<br>A 4000 m radius Operational Area will apply around a moored MODU, if used.<br>A temporary 500 m petroleum safety exclusion zone will apply during MODU activities. | The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centres within WA-32-L.<br>A temporary 500 m exclusion zone will apply around the MODU and the associated project vessels during P&A activities. |
| <b>Vessels:</b>   | A dynamically positioned MODU is intended to be used for the drilling activities. The MODU may be supported by subsea installation and light well intervention vessels. Support vessels may be used including, anchor handling vessels and activity support vessels.   | Semi-Submersible Mobile Offshore Drilling Unit (MODU)<br>The MODU will be supported by 2 to 3 offshore support vessels.  |

|  |
|--|
| The vessels will operate on dynamic positioning and will not anchor/moor on the seabed.<br>Vessels will operate 24 hours per day for the duration of the activities. |
|--|

**Feedback:**

Your feedback and our response will be included in our Environment Plans which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for any of the activities proposed under an Environment Plan is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan to ensure this information remains confidential to NOPSEMA.

Please provide your views by **14 April 2023**.

Regards,

**Woodside Feedback**

**2.68.1 Email sent to DFAT (31 March 2023)**

Dear Department of Foreign Affairs and Trade (DFAT)

Woodside previously consulted you (email below) on its plans to undertake the following activities in Commonwealth waters under the following environment plans:

- drilling and subsea infrastructure installation activities for one well (PLA08) and contingent well intervention activities for current production wells, under the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan Revision (**PLA08 EP**).
- plug and abandonment (P&A) activities in the Stybarrow field, under the Stybarrow P&A Environment Plan (**Stybarrow P&A EP**).

An overview of the proposed activities in the PLA08 EP and the Stybarrow P&A EP is set out below.

**Input for DFAT:**

With respect to the proposed activities under the PLA08 EP and Stybarrow P&A EP, Woodside requests the following information from DFAT:

- Feedback from DFAT specific to the proposed activities described under the relevant EPs.
- Management of vessels (for example, fishing or shipping vessels), should these vessels be present in the EMBA.
- Confirmation as to whether there are any specific persons or organisations that Woodside should contact whose functions, interests or activities may be affected by the proposed activities in foreign countries and, if so, the relevant contact details
- Implications for oil spill planning and response in international waters. This includes any specific persons or organisations Woodside should contact in the event of unplanned activities where the interests of foreign countries may be impacted to assist with our response planning.

**Oil Spill Response Planning and Marine Pollution:**

We note DFAT's previous advice (correspondence dated 29 July 2021) during EP consultation regarding oil spill response planning in international waters. In finalising our marine pollution notifications for the PLA08 EP and Stybarrow P&A EP, **Woodside seeks confirmation that the following notifications meet DFAT's requirements:**

- Woodside will verbally notify AMSA and Western Australian departments responsible for marine pollution as soon as possible after the incident.

## *Stybarrow Plug and Abandonment Environment Plan*

- Woodside will follow up its AMSA notification by way of an online report via AMSA's web site.
- Woodside will notify other relevant government departments as soon as practicable. These notifications include DFAT via the [sea.law@dfat.gov.au](mailto:sea.law@dfat.gov.au) email address if a spill is likely to enter international waters.

We would be grateful for DFAT's feedback and advice by **14 April 2023**.

Kind regards,  
**Woodside Feedback**

### **2.68.2 Email sent to DFAT (19 April 2023)**

Dear Department of Foreign Affairs and Trade (DFAT)

Woodside is following up on its below environment plan consultation with regard to the following activities in Commonwealth waters:

- drilling and subsea infrastructure installation activities for one well (PLA08) and contingent well intervention activities for current production wells, under the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan Revision (**PLA08 EP**); and
- plug and abandonment (P&A) activities in the Stybarrow field, under the Stybarrow P&A Environment Plan (**Stybarrow P&A EP**).

In particular, Woodside requests the following information from DFAT:

- Feedback from DFAT specific to the proposed activities described under the relevant EPs.
- Management of vessels (for example, fishing or shipping vessels), should these vessels be present in the EMBA.
- Confirmation as to whether there are any specific persons or organisations that Woodside should contact whose functions, interests or activities may be affected by the proposed activities in foreign countries and, if so, the relevant contact details
- Implications for oil spill planning and response in international waters. This includes any specific persons or organisations Woodside should contact in the event of unplanned activities where the interests of foreign countries may be impacted to assist with our response planning.

We would be grateful for your feedback and advice at your earliest convenience, and by **28 April 2023**.

Kind regards,

**Woodside Feedback**

### **2.69 Email sent to Australian Institute of Marine Science (AIMS) (21 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

*Stybarrow Plug and Abandonment Environment Plan*

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

**Woodside is seeking your advice regarding any research activities that AIMS may be undertaking that may overlap with our proposed activities.**

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>   | <b>Stybarrow Field Decommissioning Activities</b>  |
|-----------------|---|--|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. **Feedback:**

If you have any feedback on these activities, please respond to Woodside at:

[Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

## Woodside Feedback

### 2.69.1 Email sent to AIMS (10 March 2023)

Dear [REDACTED]

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

We provided this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

We would appreciate any feedback you may have by **17 March 2023** to support the development of our proposed Environment Plans.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

## *Stybarrow Plug and Abandonment Environment Plan*

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Regards

## **Woodside Feedback**

### **2.70 Email sent to Australian Maritime Safety Authority (AMSA) – Marine Pollution (22 February 2023)**

Hi [REDACTED]

As part of Woodside's ongoing consultation for its current and planned activities, I would like to advise the Australian Maritime Safety Authority (AMSA) that Woodside is preparing the Stybarrow Plug and Abandonment Environment Plan (EP). The EP will support P&A activities required as part of the progressive decommissioning of the Stybarrow field, which is in Commonwealth waters in Production Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately ~810-850 m.

Woodside would like to offer AMSA the opportunity to review or provide comment on the activity.

For reference, AMSA would have received OPEPs for other Stybarrow decommissioning activities from the former titleholder, BHP Petroleum.

Information is presented as follows:

- A Consultation Information Sheet providing information on the proposed activities is available here: [Link](#)
- The *Stybarrow Plug and Abandonment Oil Pollution First Strike Plan* is also attached. This will form part of the approval submission in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Woodside anticipates submitting the proposed EP in early June 2023 to support these activities.

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **Monday 22 May 2023**.

Your feedback and our response will be included in our Environment Plan which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

## *Stybarrow Plug and Abandonment Environment Plan*

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Many thanks,

█

█

█

### **2.70.1 Email sent to AMSA – Marine Pollution (AMSA) (8 May 2023)**

Dear █

Woodside previously consulted the Australian Maritime Safety Authority (AMSA) (email below) on its plans for the decommissioning of the Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

The Consultation Information Sheet providing information on the proposed activities is available here: [Link](#), and the *Stybarrow Plug and Abandonment Oil Pollution First Strike Plan* is attached.

Should you have any feedback relating to the proposed activities, please let us know by 22 May 2023. Thank you.

Best regards,

█

### **2.71 Email sent to City of Karratha (17 February 2023)**

Dear █

Woodside has previously consulted the City of Karratha on its plans to undertake the following activities in Commonwealth waters:

- Activities on the TPA03 production well to remediate a down-hole valve and continue production from the lower reservoir, under the TPA03 Well Intervention Environment Plan (**TPA03 EP**);
- Geotechnical and geophysical surveys, drilling and appraisal of the Julimar South-1 well (previously called JULA-P) and, plug and abandonment of Julimar South-1, if required, under the Julimar Drilling and Surveys Environment Plan (**Julimar EP**); and
- Drilling and subsea infrastructure installation activities for one well (PLA08) and contingent well intervention activities for current production wells, under the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan Revision (**PLA08 EP**).

Updated consultation Information Sheets are attached, which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures.

Woodside has previously submitted Revision 0 of the TPA03 EP to NOPSEMA which has been available on the NOPSEMA website since August 2022 ([https://info.nopsema.gov.au/environment\\_plans/606/show\\_public](https://info.nopsema.gov.au/environment_plans/606/show_public)).

*Stybarrow Plug and Abandonment Environment Plan*

Woodside is preparing to submit a further revision of the TPA03 EP to NOPSEMA with recent changes. We confirm the location and duration described in these revisions remain the same, with no material changes.

The Julimar EP and revised PLA08 EP have not yet been submitted to NOPSEMA.

Woodside would also like to provide an update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information on progressive decommissioning of Griffin and Stybarrow fields to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021. The Griffin Field is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m. The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Updated consultation Information Sheets for each of the activities listed above are attached, which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

**As we are inviting consultation with you on each of the EPs above, for ease of reference, we have attached the information in this one email. In an effort to simplify feedback, we have also included a feedback template (Appendix A) at the bottom of this email which you may wish to use to provide your feedback specific to the proposed EPs.**

If you have feedback specific to each of the proposed activities described under the relevant EPs, please respond to Woodside at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **17 March 2023**.

**1. Activity:**

|                 | TPA03 EP   | Julimar EP   | PLA08 EP  | Griffin Field Decommissioning Activities  | Stybarrow Field Decommissioning Activities  |
|-----------------|--|--|---|---|---|
| <b>Summary:</b> | Well intervention activities on the TPA03 production well to remediate a down-hole valve and continue production from the lower reservoir. The TPA03 production well is a dual zone well connected to the Tidepole manifold and forms part of the subsea production infrastructure | 2. One new appraisal-keeper well, Julimar South-1, will be drilled to further understand reservoir properties.<br>3. Prior to drilling, anchor hold tests will occur around the Julimar South-1 well location. The well will then be drilled, appraisal activities undertaken and then the reservoir section cemented and suspended pending a development decision.<br>4. Geotechnical and geophysical surveys will be conducted to support Julimar South-1 well activities and future drilling mooring designs.<br>5. | Drill and develop the proposed PLA08 production well. Contingent activities including well intervention workover or re-drill the Pluto, Pyxis, and Xena production wells (PLA01 to PLA08, PYA01 and PL-PYA02, and XNA01 and XNA02) to monitor and | <b>Removal Activities</b> <ul style="list-style-type: none"> <li>Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>Removal of the Riser Turret Mooring (RTM) and its moorings.</li> </ul> | <b>Plugging and Abandonment (P&amp;A) Activities</b> <ul style="list-style-type: none"> <li>Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>Cutting and removal of the wellhead and subsea tree assembly.</li> </ul> |

|                            |  |  |   |   |   |
|----------------------------|--|--|---|---|---|
|                            | <p>for the Goodwyn Alpha Platform. Once the TPA03 well intervention has been completed, the well will be shut-in until production is required. The shut-in and subsequent return to production of the well will be managed under the accepted Goodwyn Alpha (GWA) Facility Operations EP (March 2022).</p> | <p>6. Development of the Julimar South-1 well is subject to future development decisions</p> <ul style="list-style-type: none"> <li>• If the well is not developed, it will be plugged and abandoned (P&amp;A) under this EP (during the three year period).</li> <li>• If the well is selected for development, completions and end of field life (EOFL) P&amp;A activities would be subject to a future EP.</li> </ul> | <p>maintain their integrity, if required.</p> | <p>Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</p> <ul style="list-style-type: none"> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b><br/>Proposal to leave in situ 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for the PLEM and 4 distribution skids.</p> | <ul style="list-style-type: none"> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. Recovery of the DTM may require it to be towed to shallower water outside of permit area WA-32-L to support the DTM removal from the marine environment.</li> <li>• Ongoing field management activities (equipment monitoring and inspection).</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposed leave in situ of the 9 DTM drag anchors (buried), nine suction piles for the riser holdbacks and the historical exploration wellhead, Eskdale-1, which was unable to be removed following its drilling and abandonment in 2003.</li> </ul> |

|-----------------|---|---|--|---|--|
|                 |   |   |  |   | A temporary 500 m exclusion zone will apply around the HLV and the associated project vessels during the removal of the DTM.   |
| <b>Vessels:</b> | Well Intervention Vessel (WIV) General supply/support vessels The vessels will operate on dynamic positioning and will not anchor/moor on the seabed. Vessels will operate 24 hours per day for the duration of the activities. | MODU General supply/support vessels Survey / AHT vessel The vessels will operate on dynamic positioning and will not anchor/moor on the seabed. Vessels will operate 24 hours per day for the duration of the activities. | A dynamically positioned MODU is intended to be used for the drilling activities. The MODU may be supported by subsea installation and light well intervention vessels. Support vessels may be used including, anchor handling vessels and activity support vessels. The vessels will operate on dynamic positioning and will not anchor/moor on the seabed. Vessels will operate 24 hours per day for the duration of the activities. | <b>Removal Activities</b> <ul style="list-style-type: none"> <li>Construction support vessel (CSV) and Heavy Lift Vessel (HLV) for recovery and pipeline removal activities.</li> </ul> An anchor handling tug (AHT) to support the towing of the RTM to sheltered water. | <b>P&amp;A activities</b> <ul style="list-style-type: none"> <li>Semi-Submersible Mobile Offshore Drilling Unit (MODU)</li> <li>The MODU will be supported by 2 to 3 offshore support vessels.</li> </ul> <b>Removal Activities</b> <ul style="list-style-type: none"> <li>CSV and HLV for recovery and activities. <ul style="list-style-type: none"> <li>AHTs to support the towing of the DTM to the shallower water location (if required).</li> </ul> </li> </ul> |

**Feedback:**

If you have any issues or concerns with these activities, or any other issues relevant to these locations, please respond to Woodside at:

[Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plans which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for any of the activities proposed under an Environment Plan is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan to ensure this information remains confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

Best regards,

[REDACTED]  
[REDACTED]

### **2.71.1 Email sent to City of Karratha (8 March 2023)**

Hi [REDACTED]

Woodside is sending this email by way of a reminder that the consultation period to provide feedback on the following proposed activities in Commonwealth waters, is closing soon:

- Activities on the TPA03 production well to remediate a down-hole valve and continue production from the lower reservoir, under the TPA03 Well Intervention Environment Plan (TPA03 EP);
- Geotechnical and geophysical surveys, drilling and appraisal of the Julimar South-1 well (previously called JULA-P) and, plug and abandonment of Julimar South-1, if required, under the Julimar Drilling and Surveys Environment Plan (Julimar EP);
- Drilling and subsea infrastructure installation activities for one well (PLA08) and contingent well intervention activities for current production wells, under the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan Revision (PLA08 EP);
- Decommissioning of the Griffin field under the Griffin Decommissioning and Field Management EP, Griffin Gas Export Pipeline EP and Griffin Field Deviation EP; and
- Decommissioning of the Stybarrow field under the Stybarrow Plug and Abandonment EP, Stybarrow Decommissioning and Field Management EP and Stybarrow Field Deviation EP.

We would appreciate any feedback you may have by 17 March 2023 to support our development of the proposed environment plans.

Best regards,

### **2.72 Email to Department of Transport (DoT) (22 February 2023)**

Hi [REDACTED]

As part of Woodside's ongoing consultation for its current and planned activities, I would like to advise WA Department of Transport (DoT) that Woodside is preparing the Stybarrow Plug and Abandonment Environment Plan (EP). The EP will support P&A activities required as part of the progressive decommissioning of the Stybarrow field, which is in Commonwealth waters in Production Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately ~810-850 m.

Woodside would like to offer DoT the opportunity to review or provide comment on the activity.

For reference, the DoT would have received OPEPs for other Stybarrow decommissioning activities from the former titleholder, BHP Petroleum.

## *Stybarrow Plug and Abandonment Environment Plan*

Information is presented as follows:

- A Consultation Information Sheet providing information on the proposed activities is available here: [Link](#)
- The *Stybarrow Plug and Abandonment Oil Pollution First Strike Plan* is also attached. This will form part of the approval submission in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).
- In the table below, as requested in the *Offshore Petroleum Industry Guidance Note* (July 2020) and from recent engagement activities between DoT and Woodside, responses to the information requirements are presented in a succinct summary.

Woodside anticipates submitting the proposed EP in early June 2023 to support these activities.

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **Monday 22 May 2023**.

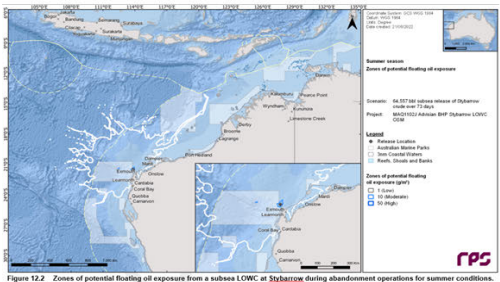

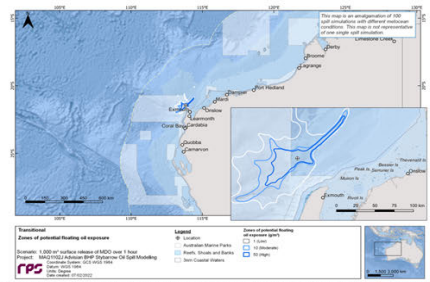

Your feedback and our response will be included in our Environment Plan which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Many

■

# Stybarrow Plug and Abandonment Environment Plan

| Information Requested in the Offshore Petroleum Industry Guidance Note (July 2020)  | Information Provided & Reference   |  |
|---|--|--|
| Description of activity, including the intended schedule, location (including coordinates), distance to nearest landfill and map.   | Included in the consultation information sheet   |  |
| Worst case spill volumes.   | Included in Annex 1 of the First Strike Plan   |  |
| Known or indicative oil type/properties.  | Included in Annex 1 of the First Strike Plan   |  |
| Amenability of oil to dispersants and window of opportunity for dispersant efficacy.  | Modelling for the Stybarrow Crude LOWC scenario does not predict floating hydrocarbons at feasible response thresholds of >50 g/m <sup>3</sup> therefore dispersant is not deemed a suitable response technique. Surface dispersant is also not deemed to be suitable for spills of marine diesel oil (MDO).   |  |
| Description of existing environment and protection priorities.  | Included in Section 3 of the First Strike Plan   |  |
| Details of the environmental risk assessment related to marine oil pollution - describe the process and key outcomes around risk identification, risk analysis, risk evaluation and risk treatment. For further information see the Oil Pollution Risk Management Information Paper (NOPSEMA 2021). | <p>Unplanned loss of containment events from the Petroleum Activities Program have been identified during the risk assessment process (presented in Section 8 of the EP). Further descriptions of risk, impacts and mitigation measures (which are not related to hydrocarbon preparedness and response) are provided in Section 8 of the EP. Two unplanned events or credible spill scenario for the Petroleum Activities Program have been selected as representative across types, sources and incident/response levels, up to and including the WCCS.</p> <p>Annex 1 of the First Strike Plan present the credible scenarios for the Petroleum Activities Program. Two worst-case credible scenarios (CS-01 – LOWC (Stybarrow Crude) and CS-02 – vessel collision (MDO)) have been used for response planning purposes for the activity as all other scenarios are of a lesser scale and extent. By demonstrating capability to meet and manage events of this size and timescale, Woodside assumes relevant scenarios that are smaller in nature and scale can also be managed by the same capability.</p> <p>Response performance outcomes have been defined based on a response to the WCCS.</p>  |  |
| Outcomes of oil spill trajectory modelling, including predicted times to enter State waters and contact shorelines.   | <p><b>Credible Scenario 1 – Loss of well containment at Stybarrow H2 well (Stybarrow Crude)</b><br/>                     Instantaneous release of 10,264 m<sup>3</sup>. 42% residue of 4,372 m<sup>3</sup></p>   | <p><b>Credible Scenario 2 – loss of containment due to vessel collision close to disconnectable turret mooring (DTM) buoy (MDO)</b><br/>                     Instantaneous release of 1,000 m<sup>3</sup>. 5% residue of 50 m<sup>3</sup></p>  |
|   | <p><b>Minimum time to shoreline contact (above 100 g/m<sup>3</sup>) in days – based upon deterministic modelling runs for both fastest time to contact and greatest shoreline accumulations</b></p>  | <p><b>Minimum time to shoreline contact (above 100 g/m<sup>3</sup>) in days – based on stochastic modelling</b></p>  |
|   | <p>Exmouth<br/>                     Day 5, 26.1 m<sup>3</sup> (minimum time)<br/>                     Day 58, 297.1 m<sup>3</sup> (maximum volume)</p> <p>Between Day 35 and Day 56 (Month 2)<br/>                     Peak accumulations (&gt;100 g/m<sup>3</sup>) total 622.6 m<sup>3</sup> across 26 sites<br/>                     Maximum single accumulation of 226 m<sup>3</sup> at Ashburton on Day 40</p> <p>Between Day 57 and Day 103 (Months 3 and 4)<br/>                     Peak accumulations (&gt;100 g/m<sup>3</sup>) total 623.3 m<sup>3</sup> across 5 additional sites<br/>                     Maximum single accumulation of 297 m<sup>3</sup> at Exmouth on Day 58.</p>  | <p>No contact at response thresholds (&gt;100 g/m<sup>3</sup>) or at/above the low threshold (≤10 g/m<sup>3</sup>).</p>  |
|   | <p>Stochastic modelling for the LOWC scenario was undertaken by RPS in July 2022 using NOPSEMA's contemporary modelling thresholds. The white EMBA below shows the 'low' floating threshold i.e. at or above 1 g/m<sup>3</sup>. The summer season was selected as it shows a greater overlap with State waters.</p> <p>State waters contact at the low, floating threshold (1 g/m<sup>3</sup>) is predicted from day 3:</p>  <p>Figure 12.2. Zones of potential floating oil exposure from a subsea LOWC at Stybarrow during abandonment operations for summer conditions. The results were calculated from 100 spill simulations.</p>   | <p>Stochastic modelling for the MDO scenario was undertaken by RPS in February 2022 using NOPSEMA's contemporary modelling thresholds. The white EMBA below shows the 'low' threshold i.e. floating hydrocarbon concentrations at or above 1 g/m<sup>3</sup>. The transitional season was selected as it shows the shortest distance to State waters.</p> <p>Floating hydrocarbons at the low threshold (1 g/m<sup>3</sup>) are not predicted to cross into State waters – see inset.</p>  <p>Figure 11.3. Zones of potential floating oil exposure from a vessel based spill at the DTM buoy during transitional conditions. The results were calculated from 100 spill simulations.</p> |
| Details on initial response actions and key activation timeframes.  | Included in Section 2 of the First Strike Plan   |  |
| Potential Incident Control Centre arrangements.   | Included in Annex 4 and 5 of the First Strike Plan   |  |
| Potential staging areas / Forward Operating Base.   | A Forward Operating Base can be established at Exmouth and/ or Dampier.  |  |
| Details on response strategies.   | Included in Section 2 of the First Strike Plan   |  |
| Use of DoT equipment resources  | Woodside has access to its own and contracted stockpiles of response equipment and acknowledges that potential use of DoT resources cannot be assumed and is at the discretion of DoT.   |  |
| Details and diagrams on proposed IMT structure including integration of DoT arrangements as per this IGN.   | Included in Annex 5, 6 and 7 the First Strike Plan   |  |
| Details on testing of arrangements of OPEP/OSCP.  | <p>Level 1 Response – one Level 1 'First Strike' drill conducted within two weeks of commencing activity. For campaigns with an operational duration of greater than one month this will occur within the first two weeks of commencing the activity and then at least every 6 month hire period thereafter.</p> <p>Level 2 Response – A minimum of one Emergency Management exercise per MODU per campaign. For campaigns with an operational duration of greater than one month this will occur within the first month of commencing the activity and then at least every 6 month hire period thereafter.</p> <p>Level 3 Response – the number of CMT exercises conducted each year is determined by the Chief Executive Officer, in consultation with the Vice President of Security and Emergency Management.</p> <p><b>Testing of Oil Spill Response Arrangements</b></p> <p>Woodside's arrangements for spill response are common across its Australian operating assets and activities to ensure the controls are consistent. The overall objective of testing these arrangements is to ensure that Woodside maintains an ability to respond to a hydrocarbon spill, specifically to:</p> <ul style="list-style-type: none"> <li>Ensure relevant responders, contractors and key personnel understand and practise their assigned roles and responsibilities.</li> <li>Test response arrangements and actions to validate response plans.</li> <li>Ensure lessons learned are incorporated into Woodside's processes and procedures and improvements are made where required.</li> </ul> <p>Woodside's Testing of Arrangements Schedule aligns with international good practice for spill preparedness and response management; the testing is compatible with the IPIECA Good Practice Guide and the Australian Institute for Disaster Resilience (ADR) Australian Emergency Management Arrangements Handbook. If a spill occurs, enacting these arrangements will underpin Woodside's ability to implement a response across its petroleum activities.</p> <p>The hydrocarbon spill arrangements included within the schedule are tested against Woodside's regulatory commitments. Each arrangement has a support agency/company and an area to be tested (e.g. capability, equipment and personnel). For example, an arrangement could be to test Woodside's personnel capability for conducting scientific monitoring, or the ability of the Australian Marine Oil Spill Centre to provide response personnel and equipment.</p> <p>If new response arrangements are introduced, or existing arrangements significantly amended, additional testing is undertaken accordingly. Additional activities or activity locations are not anticipated to occur; however, if they do, testing of relevant response arrangements will be undertaken as soon as practicable.</p> <p>In addition to the testing of response capability within the schedule, up to eight formal exercises are planned annually, across Woodside, to specifically test arrangements for responding to a hydrocarbon spill to the marine environment.</p> <p>Some arrangements may be tested across multiple exercises (e.g. critical arrangements) or via other 'additional assurance' methods outside the formal Testing of Arrangements Schedule that also constitute sufficient evidence of testing of arrangements (e.g. audits, no-notice drills, internal exercises, assurance drills).</p> |  |
| Additional comments   | <p>Please note some of the links in the document are still being finalised, and as such may show a reference error in the attached version.</p> <p>The final version will include a CRN and Doc ID number.</p>   |  |

**2.73 Email sent to Karratha Community Liaison Group (17 February 2023)**

Dear Stakeholder,

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>  | <b>Stybarrow Field Decommissioning Activities</b>  |

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA. Please provide your views by **17 March 2023**.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

**2.73.1 Email sent to Karratha Community Liaison Group (8 March 2023)**

Dear CLG members,

Woodside is sending this email by way of a reminder that the consultation period to provide feedback on the following proposed activities in Commonwealth waters, is closing soon:

- Activities on the TPA03 production well to remediate a down-hole valve and continue production from the lower reservoir, under the TPA03 Well Intervention Environment Plan (**TPA03 EP**);
- Geotechnical and geophysical surveys, drilling and appraisal of the Julimar South-1 well (previously called JULA-P) and, plug and abandonment of Julimar South-1, if required, under the Julimar Drilling and Surveys Environment Plan (**Julimar EP**);
- Drilling and subsea infrastructure installation activities for one well (PLA08) and contingent well intervention activities for current production wells, under the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan Revision (**PLA08 EP**);

*Stybarrow Plug and Abandonment Environment Plan*

- Decommissioning of the Griffin field under the Griffin Decommissioning and Field Management EP, Griffin Gas Export Pipeline EP and Griffin Field Deviation EP; and
- Decommissioning of the Stybarrow field under the Stybarrow Plug and Abandonment EP, Stybarrow Decommissioning and Field Management EP and Stybarrow Field Deviation EP.

We would appreciate any feedback you may have by **17 March 2023** to support our development of the proposed environment plans.

Best regards

**2.74 Email sent to Commonwealth Scientific and Industrial Research Organisation (CSIRO) (21 February 2023)**

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of Environment Plans for each Field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

**Woodside is seeking your advice regarding any research activities that UWA may be undertaking that may overlap with our proposed activities.**

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **17 March 2023**.

**Feedback:**

If you have any feedback on these activities, please respond to Woodside at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

Please provide your views by **17 March 2023**.

## *Stybarrow Plug and Abandonment Environment Plan*

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

### **Woodside Feedback**

#### **2.74.1 Email sent to CSIRO (4 June 2023)**

Dear [REDACTED]

Woodside previously consulted you (see email below) on Woodside's proposed activities for the progressive decommissioning of the Griffin and Stybarrow fields.

Any feedback provided previously on proposed activities will remain current where Environment Plans are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

For reference:

- The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.
- The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Consultation Information Sheets for the proposed activities are attached, which provide a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Should CSIRO have any feedback on the proposed activities, please let us know.

Regards

### **Woodside Feedback**

#### **2.75 Email sent to Broome Chamber of Commerce and Industry (17 May 2023)**

Dear BCCI

Woodside is planning to undertake the following activities in Commonwealth waters under the following environment plans:

- Plug and abandonment (P&A) activities in the Stybarrow field, under the Stybarrow P&A Environment Plan (**Stybarrow P&A EP**).

An overview of the proposed activities under the Stybarrow P&A EP is set out below.

## Stybarrow Plug and Abandonment Environment Plan

Following recent changes to Commonwealth Environment Plan consultation requirements, Woodside is now consulting stakeholders who are located within the Environment that may be affected (EMBA) by a proposed petroleum activity.

The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence. For these environment plans, the broadest extent of the EMBA has been determined by the highly unlikely event of a hydrocarbon release from activities within the scope the EP. The worst-case credible spill scenario for the Stybarrow P&A EP is a well loss of integrity.

An updated Consultation Information Sheet is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We would welcome feedback on the proposed activities by **16 June 2023** at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977.

### Activity:

|   | <b>Stybarrow P&amp;A EP</b>  |
|---|--|
| <b>Summary:</b>   | <ul style="list-style-type: none"> <li>· Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>· Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>· Cutting and removal of the wellhead and subsea tree assembly.</li> <li>· Unblocking of the H4 flowline, if deemed feasible.</li> </ul> |
| <b>Permit area:</b>                                       | WA-32-L  |
| <b>Location:</b>  | ~53 km northwest of Exmouth, Western Australia.  |
| <b>Operational Area distance to international waters:</b> | ~ 313 km   |
| <b>Approx. Water Depth (m):</b>                           | ~ 810 – 850 m.   |
| <b>Schedule:</b>  | Earliest P&A start is estimated to be Q4 2023, subject to approvals, MODU and vessel availability and weather constraints. P&A activities must be completed no later than 30 September 2024, pursuant to General Direction 833.  |
| <b>Duration:</b>  | P&A activities are anticipated to take approximately 6 – 9 months.   |
| <b>Exclusionary / Cautionary Zone:</b>                    | The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centers within WA-32-L.<br>A temporary 500 m exclusion zone will apply around the MODU and the associated project vessels during P&A activities.   |

|                 |   |
|-----------------|---|
| <b>Vessels:</b> | Semi-Submersible Mobile Offshore Drilling Unit (MODU)<br>The MODU will be supported by 2 to 3 offshore support vessels. |
|-----------------|---|

### Feedback:

Your feedback and our response will be included in our Environment Plans which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for any of the activities proposed under an Environment Plan is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan to ensure this information remains confidential to NOPSEMA.

Regards

## Woodside Feedback

### 2.76 Email sent to Pilbara Ports Authority (1 June 2023)

Dear [REDACTED]

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of environment plans (EPs) for each field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

*Stybarrow Plug and Abandonment Environment Plan*

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

**Activity:**

|                 | <b>Griffin Field Decommissioning Activities</b>  | <b>Stybarrow Field Decommissioning Activities</b>   |
|-----------------|--|---|
| <b>Summary:</b> | <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, distribution skids, risers, flexible flowlines, rigid flowlines, umbilicals, and the pipeline end module (PLEM)).</li> <li>• Removal of the Riser Turret Mooring (RTM) and its moorings. Depending on the vessel utilised, recovery of the RTM may require sections of it to be towed to shallower water out of the title.</li> <li>• Removal of an exploration wellhead (Ramillies-1 in neighbouring petroleum title WA-12-L).</li> <li>• Ongoing field management activities.</li> <li>• Pigging and subsequent removal of the 26 km of Griffin Gas Export Pipeline (GEP) within Commonwealth waters.</li> </ul> <p><b>In Situ Activities</b></p> <ul style="list-style-type: none"> <li>• Proposal to leave in situ 12 RTM drag anchors (buried), 6 concrete gravity bases and 5 piled foundations for the PLEM and 4 distribution skids.</li> </ul> | <p><b>Plugging and Abandonment (P&amp;A) Activities</b></p> <ul style="list-style-type: none"> <li>• Pre-execution activities associated with the well P&amp;A, such as barrier testing and removal of marine growth.</li> <li>• Well P&amp;A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.</li> <li>• Cutting and removal of the wellhead and subsea tree assembly.</li> <li>• Unblocking of the H4 flowline, if deemed feasible.</li> </ul> <p><b>Removal Activities</b></p> <ul style="list-style-type: none"> <li>• Removal of subsea equipment (wellheads, trees, manifolds, risers, flexible flowlines, and umbilicals).</li> <li>• Removal of the Disconnectable Turret Mooring (DTM) and its moorings. If you have any feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **1 July 2023**.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

Regards,

**Woodside Feedback**

**2.76.1 Email sent to Pilbara Ports Authority (23 June 2023)**

Dear [REDACTED]

Woodside previously consulted you (email below) on its plans to decommission the Griffin and Stybarrow fields.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

## Stybarrow Plug and Abandonment Environment Plan

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of environment plans (EPs) for each field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

Kind regards,

### **2.77 Email sent to Australian Southern Bluefin Tuna Industry Association (ASBTIA) (1 June 2023)**

Dear Stakeholder

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of environment plans (EPs) for each field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

If you have any feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **1 July 2023**.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

Regards,

**Woodside Feedback**

**2.77.1 Email sent to ASBTIA (23 June 2023)**

Dear Stakeholder,

Woodside previously consulted you (email below) on its plans to decommission the Griffin and Stybarrow fields.

The Griffin Field is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheets. The Information Sheets provide details on activities proposed to be managed under a number of environment plans (EPs) for each field, including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website.

Please let us know if you would like to update previous feedback or have any additional views by 1 July 2023.

## *Stybarrow Plug and Abandonment Environment Plan*

Kind regards,

Woodside Feedback

### **2.78 Email sent to Greenpeace Australia Pacific (GAP) – 2 June 2023**

Dear [REDACTED]

Woodside notes Greenpeace Australia Pacific (GAP) received Woodside's updated consultation information with respect to its proposed decommissioning of the Stybarrow field under the following environment plans (EPs) on 14 February 2023 via Woodside's consultation activities website subscription:

- Stybarrow Plug and Abandonment (P&A) EP
- Stybarrow Decommissioning and Field Management EP
- Stybarrow Field Deviation EP

The Consultation Information Sheet for the proposed activities is re-attached for reference, which includes a summary of potential key risks and associated management measures. The information sheet is also available on our website.

Please let us know if you would like to provide feedback with respect to the above proposed EPs by 9 June 2023.

Regards,

Woodside Feedback

#### **2.78.1 Email sent to GAP (23 June 2023)**

Dear [REDACTED]

Woodside previously consulted Greenpeace Australia Pacific (GAP) (email below) on its plans to decommission the Stybarrow field under the following environment plans (EPs) on 14 February 2023 via Woodside's consultation activities website subscription:

- Stybarrow Plug and Abandonment (P&A) EP
- Stybarrow Decommissioning and Field Management EP
- Stybarrow Field Deviation EP

The Consultation Information Sheet for the proposed activities is attached, which includes a summary of potential key risks and associated management measures. The information sheet is also available on our website.

Please let us know if you would like to provide feedback with respect to the above proposed EPs.

Regards,

Woodside Feedback

# ENVIRONMENT PLAN NOTICE

Woodside Energy (Australia) Pty Ltd (ANZ DOK 623 819) is preparing to conduct decommissioning activities in Commonwealth waters, as described below.

**Gerts Decommissioning and Field Management Environment Plan**

**Activity summary:** Field management and removal of subsurface infrastructure above the seafloor, including the Rose 1 well platform (DTP).

**Location:** ~65 km northwest of Onslow

**Commencement timing:** Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints

**Estimated duration:** Approximately 6 months

**Consultation commenced:** Oct 2022 **Final EP submission to NOPSI/MA:** Dec 2022

**Stybarrow Plug and Abandonment Environment Plan**

**Activity summary:** The permanent plugging and abandonment of the ten Stybarrow subsurface development wells by placing cement plugs in the wells to prevent hydrocarbon seepage

**Location:** ~52 km northwest of Eneabba

**Commencement timing:** Anticipated around late 2023 or 2024, pending approvals, vessel availability and weather constraints

**Estimated duration:** 4 to 8 months

**Consultation commenced:** May 2022 **Final EP submission to NOPSI/MA:** Not yet submitted

**Gerts Gas Export Pipeline Environment Plan**

**Activity summary:** Preparation for and subsequent removal of ~36 km of gas export pipeline and associated infrastructure

**Location:** ~39-45 km northwest of Onslow

**Commencement timing:** Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints

**Estimated duration:** Approximately 2 months

**Consultation commenced:** Jan 2022 **Final EP submission to NOPSI/MA:** Mar 2022

**Stybarrow Decommissioning and Field Management Environment Plan**

**Activity summary:** Field management and removal of subsurface infrastructure above the seafloor including the Disconnector 1 well platform (DTP)

**Location:** ~62 km northwest of Eneabba

**Commencement timing:** Anticipated around Q4 2023, pending approvals, vessel availability and weather constraints

**Estimated duration:** ~6 months

**Consultation commenced:** Feb 2022 **Final EP submission to NOPSI/MA:** Apr 2022

**Gerts Field Deviation Environment Plan**

**Activity summary:** Repositioning of in situ pipes in place of inert, non-toxic structure embedded in the seabed to minimise seabed disturbance (anchors, piles, concrete gravity bases)

**Location:** ~65 km northwest of Onslow

**Commencement timing:** Upon environmental plan acceptance and following completion of removal activities

**Estimated duration:** No duration – infrastructure to be left in situ

**Consultation commenced:** Jan 2022 **Final EP submission to NOPSI/MA:** Feb 2022

**Stybarrow Field Deviation Environment Plan**

**Activity summary:** Repositioning of in situ pipes in place of infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles)

**Location:** ~52 km northwest of Eneabba

**Commencement timing:** Upon environmental plan acceptance and following completion of removal activities

**Estimated duration:** No duration – infrastructure to be left in situ

**Consultation commenced:** May 2022 **Final EP submission to NOPSI/MA:** Jul 2022

**Figure 1: Stybarrow Field**

**Figure 1 (Stybarrow) and Figure 2 (Gerts):** Describe the Operational Areas and the Environment. That may be assessed (EMA) based on a composite of many diverse paths and to the distance where a highly unlikely, unpaired event could have an impact based on weather and ocean conditions.

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be included in the relevant EP.

Impacts associated with routine decommissioning activities include the physical presence of a Mobile Offshore Drilling Unit (MODU) and vessels, interaction with other marine users, decommissioning discharge plumes, atmospheric hydrocarbon emissions, washed disturbance, emissions from the rigging and other vessel impacts (noise, light, air emissions and marine discharges). Impacts that could occur due to an unplanned event include hydrocarbon releases (gas/plasma, marine debris or other vessel injury, vessel collisions with marine fauna, additional washed disturbance, introduced marine species, accidents/collisions or waste or other discharges).

**Figure 1 and Figure 2:** Australia indicative (IMIs) to support persons or organisations under standing or whether their functions, interests or activities may be affected by the proposed activities, with detailed information found in Woodside's Consultation Information Sheets.

**Consultation Participation and Feedback**

Woodside is seeking to consult with relevant persons to inform the preparation of Environment Plans (EP) for the Stybarrow and Gerts decommissioning activities. Consultation designed to notify and obtain input from relevant persons to assist Woodside identify measures to avoid or avoid potential adverse effects of the proposed activity on the environment.

Consultation will inform the development of each EP in accordance with environmental regulations administered by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage Act 2020 (OPGSA) and support other regulatory submissions associated with the planned activities.

Detailed consultation information sheets are available at: [www.woodside.com.au/sustainability/consultation-activities](http://www.woodside.com.au/sustainability/consultation-activities) or you would like additional information about Stybarrow and Gerts decommissioning activities, you can also subscribe to our website to receive future information on proposed activities.

If you would like to comment on the proposed activities outlined above, please contact Woodside before Friday, 17 March 2023 via:

**E: [Feedback@woodside.com](mailto:Feedback@woodside.com)**  
**Tel: +61 8 9422 8177**

**Figure 2: Gerts Field**

# ENVIRONMENT PLAN NOTICE

Woodside Energy (Australia) Pty Ltd (ACN 606 923 879) is proposing to conduct decommissioning activities in Commonwealth waters, as described below:

## Griffin Decommissioning and Field Management Environment Plan

|  |   |
|--|---|
| <b>Activity summary:</b>                     | Field management and removal of subsurface infrastructure above the seafloor, including the Star Tunnel Mooring (STM) |
| <b>Location:</b>                             | ~65 km northwest of Onslow  |
| <b>Commencement date:</b>                    | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints                |
| <b>Estimated duration:</b>                   | Approximately 3 months  |
| <b>Consent issued:</b>                       | Oct 2021  |
| <b>First EP in finalisation to NOPS/DMA:</b> | Dec 2021  |

## Griffin Gas Export Pipeline Environment Plan

|  |  |
|--|--|
| <b>Activity summary:</b>                     | Preparation for and subsequent removal of 36 km of gas export pipeline and associated stabilised on    |
| <b>Location:</b>                             | ~36 km northwest of Onslow   |
| <b>Commencement date:</b>                    | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints |
| <b>Estimated duration:</b>                   | Approximately 3 months   |
| <b>Consent issued:</b>                       | Jan 2022   |
| <b>First EP in finalisation to NOPS/DMA:</b> | Mar 2022   |

## Griffin Field Decommission Environment Plan

|  |   |
|--|---|
| <b>Activity summary:</b>                     | Proposed leave in situ (leave in place) of inert, non-toxic infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles, concrete gravity bases) |
| <b>Location:</b>                             | ~65 km northwest of Onslow  |
| <b>Commencement date:</b>                    | Upon environmental acceptance and following completion of removal activities  |
| <b>Estimated duration:</b>                   | No duration - infrastructure to be left in situ   |
| <b>Consent issued:</b>                       | Jan 2022  |
| <b>First EP in finalisation to NOPS/DMA:</b> | Feb 2022  |

## Stybarrow Plug and Abandonment Environment Plan

|  |  |
|--|--|
| <b>Activity summary:</b>                     | The permanent plugging and abandonment of the Stybarrow subsea development wells by placing cement plugs in the wells to prevent hydrocarbon release |
| <b>Location:</b>                             | ~63 km northwest of Onslow   |
| <b>Commencement date:</b>                    | Anticipated around late 2022 or 2023, pending approvals, vessel availability and weather constraints   |
| <b>Estimated duration:</b>                   | 4 to 6 months  |
| <b>Consent issued:</b>                       | May 2022   |
| <b>First EP in finalisation to NOPS/DMA:</b> | Not yet submitted  |

## Stybarrow Decommissioning and Field Management Environment Plan

|  |   |
|--|---|
| <b>Activity summary:</b>                     | Field management and removal of subsurface infrastructure above the seafloor including the Gas-connectable Tunnel Mooring (GTM) |
| <b>Location:</b>                             | ~63 km northwest of Onslow  |
| <b>Commencement date:</b>                    | Anticipated around Q4 2023, pending approvals, vessel availability and weather constraints                                      |
| <b>Estimated duration:</b>                   | 4 months  |
| <b>Consent issued:</b>                       | Feb 2022  |
| <b>First EP in finalisation to NOPS/DMA:</b> | Apr 2022  |

## Stybarrow Field Decommission Environment Plan

|  |  |
|--|--|
| <b>Activity summary:</b>                     | Proposed leave in situ (leave in place) of infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles) |
| <b>Location:</b>                             | ~63 km northwest of Onslow   |
| <b>Commencement date:</b>                    | Upon environmental acceptance and following completion of removal activities   |
| <b>Estimated duration:</b>                   | No duration - infrastructure to be left in situ  |
| <b>Consent issued:</b>                       | May 2022   |
| <b>First EP in finalisation to NOPS/DMA:</b> | Jul 2022   |

**Figure 1 (Stybarrow) and Figure 2 (Griffin)** Describe the Operational Areas and the proposed Field Management/GMA Areas based on a composite analysis of different paths and 400m distance where a highly unlikely, unplanned event could have an impact based on weather and ocean conditions.

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the table and GMA.

Impacts associated with routine decommissioning activities include the physical presence of a Mobile Offshore Drilling Unit (MODU) and vessel.

The risks with other marine users, decommissioning discharges (oil and gas), hydrocarbon releases, hydrocarbon emissions from Airway heating and other vessel impacts (noise, light, air emissions and marine discharges). Impacts that could occur due to an unplanned event include hydrocarbon releases (oil and gas), marine discharges or other vessel risks, vessel collisions with marine fauna, additional seabed disturbance, increased marine species, accidental loss of waste or other discharges.

**Figure 1 and Figure 2** illustrate the GMA to support persons or organisations understanding of whether their functions, interests or activities may be affected by the proposed activities, with detailed information found in Woodside's Consultation Information Sheets.

Figure 1 Stybarrow Field

Figure 2 Griffin Field

**Consentation Participants and Field back**  
Woodside is looking to consult with relevant persons to inform the preparation of Environment Plans (EPs) for the Stybarrow and Griffin decommissioning activities. Consultation is designed to notify and obtain input from relevant persons to assist Woodside identify measures to lessen or avoid potential adverse effects of the proposed activity on the environment.

Consultation will inform the development of each EP in accordance with environmental regulations administered by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage Act 2020 (OPGSA) and support other regulatory submissions associated with the planned activities.

Detailed consultation information sheets are available at: [www.woodside.com.au/sustainability/consultation-activities](http://www.woodside.com.au/sustainability/consultation-activities) if you would like additional information about Stybarrow and Griffin decommissioning activities. You can also subscribe to our website to receive future information on proposed activities.

If you would like to comment on the proposed activities outlined above, please contact Woodside before Friday, 17 March 2023 via:

### EMPLOYMENT

#### Administration and Finance

**LEGAL SECRETARY**  
The Succession Clerk is looking for a legal secretary to support the legal team in regional and remote areas.

The role of this position involves the management of legal matters and legal proceedings. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### Building and Construction

**3 FLOOR & WALL TIE**  
Subcontractor for 3 floor & wall tie work for a residential development. The work involves the installation of wall ties and floor slabs. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### Education and Teaching

**TEACHERS OF ITALIAN PRIMARY**  
The Italo-Australian Welfare & Cultural Centre Inc (IAWCC) is currently recruiting Teachers of ITALIAN to be assigned to teach in metropolitan primary schools, north and south of the river.

Interested applicants are invited to submit their resumes and cover letters to: [recruitment@iawcc.org.au](mailto:recruitment@iawcc.org.au)

#### Local Govt Vacancies

**City of Melville**  
CORPORATE SERVICES  
The City of Melville has a number of vacancies in the Corporate Services Department. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### General Positions

**CLEANER PRIVATE**  
1 Cleaner position for a private cleaning company. The role involves the cleaning of residential and commercial premises. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### RURAL EMPLOYMENT

**MEATPACKER**  
Meat packer position for a meat processing plant. The role involves the packing and processing of meat products. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### Looking for a new horizon?

Learn new skills. See our Courses & Training section in [www.wa.gov.au](http://www.wa.gov.au)

#### Employment

Our Great Australian

### Mining and Resources

#### WESTAUZ MINING

Westauz Mining Pty Ltd are currently seeking for experienced and motivated individuals to join our team. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### Trades and Technical

**APPLY FOR A RURAL POSITION**  
Rural position for a rural area. The role involves the management of rural operations. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### Local Govt Tenders

**City of Joondalup**  
Solicitation of interest for the provision of road works and services. For more details and application information, please contact the recruitment team on 08 9422 1111.

#### Local Govt Tenders

# ENVIRONMENT PLAN NOTICE

Woodside Energy (Australia) Pty Ltd (ACN1004 821 879) is preparing to conduct decommissioning activities in Commonwealth waters, as described below:

### G 416 Deco and closure of Field Management Centre west Plan

|                                       |   |
|---------------------------------------|---|
| <b>Activity summary:</b>              | Field management and removal of subsea infrastructure above the mudline, including the River Turret Mooring (RTM) |
| <b>Location:</b>                      | ~45 km northwest of Onslow  |
| <b>Commencement date:</b>             | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints            |
| <b>Estimated duration:</b>            | Approximately 6 months  |
| <b>Commence date in commencement:</b> | Oct 2021 <b>Final EPR submission to NOPS/DIA</b> Dec 2021   |

### G 416 Gas Export Pipeline East west Plan

|                                       |  |
|---------------------------------------|--|
| <b>Activity summary:</b>              | Preparation for and subsequent removal of ~26 km of gas export pipeline and associated stabilisation   |
| <b>Location:</b>                      | ~39-45 km northwest of Onslow  |
| <b>Commencement date:</b>             | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints |
| <b>Estimated duration:</b>            | Approximately 2 months   |
| <b>Commence date in commencement:</b> | Jan 2022 <b>Final EPR submission to NOPS/DIA</b> Mar 2022  |

### G 416 Field Centre East west Plan

|                                       |   |
|---------------------------------------|---|
| <b>Activity summary:</b>              | Proposed in situ (leave in place) of most non-toxic infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles, concrete gravity bases) |
| <b>Location:</b>                      | ~45 km northwest of Onslow  |
| <b>Commencement date:</b>             | Upon environmental plan acceptance and following completion of removal activities   |
| <b>Estimated duration:</b>            | No duration – infrastructure to be left in situ   |
| <b>Commence date in commencement:</b> | Jan 2022 <b>Final EPR submission to NOPS/DIA</b> Feb 2022   |

### Stybarrow Plug and Abandonment Centre west Plan

|                                       |   |
|---------------------------------------|---|
| <b>Activity summary:</b>              | The permanent plugging and abandonment of the five Stybarrow subsea development wells by placing cement plugs into wells to prevent hydrocarbon release |
| <b>Location:</b>                      | ~43 km northwest of Onslow  |
| <b>Commencement date:</b>             | Anticipated around late 2022 or 2023, pending approvals, vessel availability and weather constraints  |
| <b>Estimated duration:</b>            | ~4 to 6 months  |
| <b>Commence date in commencement:</b> | May 2022 <b>Final EPR submission to NOPS/DIA</b> Not yet submitted  |

### Stybarrow Decommissioning of Field M 416 in general Commonwealth Plan

|                                       |  |
|---------------------------------------|--|
| <b>Activity summary:</b>              | Field management and removal of subsea infrastructure above the mudline including the Dis-connectable Turret Mooring (DTM) |
| <b>Location:</b>                      | ~43 km northwest of Onslow   |
| <b>Commencement date:</b>             | Anticipated around Oct 2023, pending approvals, vessel availability and weather constraints                                |
| <b>Estimated duration:</b>            | ~4 months  |
| <b>Commence date in commencement:</b> | Feb 2022 <b>Final EPR submission to NOPS/DIA</b> Apr 2022  |

### Stybarrow Field 416 Centre East Plan

|                                       |  |
|---------------------------------------|--|
| <b>Activity summary:</b>              | Proposed in situ (leave in place) of infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles) |
| <b>Location:</b>                      | ~43 km northwest of Onslow   |
| <b>Commencement date:</b>             | Upon environmental plan acceptance and following completion of removal activities  |
| <b>Estimated duration:</b>            | No duration – infrastructure to be left in situ  |
| <b>Commence date in commencement:</b> | May 2022 <b>Final EPR submission to NOPS/DIA</b> Jul 2022  |

**Figure 1 (Stybarrow) and Figure 2 (G 416)** describe the Operational Areas and the Environmentally Sensitive Areas (ESAs) based on a composite of many different points and forward distance which is highly on land, operational events could have an impact based on weather and ocean conditions.

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the ESAs identified and will be applied in the proposed EP.

Impacts associated with the proposed decommissioning activities include the physical presence of a Mobile Offshore Drilling Unit (MODU) and vessels.

Interaction with other marine users, decommissioning discharges (point and diffuse), hydrocarbon spillage, seabed disturbance, emissions from flaring, burning and other wellhead operations, light, air emissions and marine discharges) impacts that could occur due to an unplanned event include hydrocarbon releases (prod/ gas, marine diesel or other wellhead), vessel collisions with marine fauna, additional seabed disturbance, introduced marine species, accidental loss of waste or other discharges.

**Figure 1 and Figure 2** illustrate the ESAs to support persons or organisations understanding of whether their functions, interests or activities may be affected by the proposed activities, with detailed information found in Woodside's Consultation Information Sheets.

Figure 1: Stybarrow Field

Figure 2: G 416 Field

### Consultation Participation and Feedback

Woodside is seeking to connect with relevant persons to inform the preparation of Environment Plans (EPs) for the Stybarrow and G 416 decommissioning activities. Consultation is designed to identify and obtain input from relevant persons to assist Woodside identify measures to lessen or avoid potential adverse effects of the proposed activities on the environment.

Consultation will inform the development of each EP in accordance with environmental regulations administered by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage Act 2020 (OPGSA) and support other regulatory submissions associated with the planned activities.

Detailed consultative information sheets are available at: [www.woodside.com.au/sustainability/formation-activities](http://www.woodside.com.au/sustainability/formation-activities). If you would like additional information about Stybarrow and G 416 decommissioning activities, you can also subscribe via our website to receive future information on proposed activities.

If you would like to comment on the proposed activities above, please contact Woodside before Friday, 17 March 2023 via: [Feedback@woodside.com](mailto:Feedback@woodside.com) or Tel: 1800 410 877

## PUBLIC NOTICES

The Law Reform Commission of Western Australia

### Call for submissions – review of Western Australia's sexual offence laws

The Attorney General, the Hon. John Quigley MLA, asked the Law Reform Commission of Western Australia (LRC) to review WA's sexual offence laws.

The LRC is examining issues including the definition of consent, the defence of mistaken belief in consent, the directions given to juries in sexual offence trials, our substantive sexual offences and their maximum penalties.

The LRC is to provide advice and recommend any necessary reforms to the Attorney General.

The LRC has published Volumes 1 and 2 of a Discussion Paper and a Background Paper. The Discussion Paper outlines options and poses questions about changing our sexual offence laws. The LRC commissioned the Background Paper from experts to help the LRC and the public understand the issues in this area of law.

Volumes 1 and 2 of the Discussion Paper and the Background Paper are both available on the LRC's website: [www.lrc.justice.wa.gov.au](http://www.lrc.justice.wa.gov.au)

Individuals and organisations can provide a submission on one or more of the options and questions in the Discussion Paper and Background Paper. Submissions on Volume 1 close on 17 March 2023. Submissions on Volume 2 close on 6 April 2023. For information about the various ways to make a submission please visit [www.lrc.justice.wa.gov.au](http://www.lrc.justice.wa.gov.au)

The Commission will hold consultations with reference groups and any organisation or person who wishes to contribute to law reform in this area. To register your interest in attending a consultation please email [lawref@lrc.justice.wa.gov.au](mailto:lawref@lrc.justice.wa.gov.au) before 23 February 2023. For more information visit [www.lrc.justice.wa.gov.au](http://www.lrc.justice.wa.gov.au)

EMPLOYMENT

**About Us**  
Boeing Defence Australia is shaping the future of aerospace and delivering some of the nation's most important programs for the Australian Defence Industry. Joining us is a chance to make your mark, working with a diverse team that is united in pushing the boundaries of imagination and excellence.

**The Opportunity**  
We are seeking Multiple Skillsets to support data centre, satellite antenna and facilities infrastructure as a part of the Maintenance and Support Services team located at our Geraldton site. Current Opportunities include:

- Configuration Management Specialist
- ICT Installation Technician
- Drafting & Documentation Officer
- Air Conditioning & Refrigeration Mechanic
- Environment Health & Safety Advisor
- Mechanical Fitter
- Facilities & Grounds Supervisor
- General Hand - Facilities & Grounds
- Cleaner
- Painter / Maintainer - Facilities

**Culture**  
At Boeing, we innovate and collaborate to make the world a better place. From the seabed to outer space, you can contribute to work that matters with a company where diversity, equity and inclusion are core values. We're committed to fostering an environment for every teammate's growth, welcoming, respectful and inclusive, with great opportunities for professional growth. Find your future with us.  
We're committed to building a diverse and inclusive workplace. Female applicants, people of Aboriginal or Torres Strait Island descent and veterans are encouraged to apply.

- Benefits**
- Flexible working options
  - Employee Incentive Program
  - Global opportunities
  - Salary packaging
  - Study assistance

**Security Clearance**  
Applicants must be Australian Citizens to meet Australian Government security requirements. You will be required to successfully undergo an Australian Government positive vetting (PV) security clearance.  
More information on the security clearance vetting process is available on the Australian Government Security Vetting Agency (AGSVA) website (<https://www.defence.gov.au/secure/clearance>).

**Equal Opportunity Employer**  
Boeing is an Equal Opportunity Employer. Employment decisions are made without regard to race, colour, religion, national origin, gender, sexual orientation, gender identity, age, physical or mental disability, genetic factors, military/veteran status or other characteristics protected by law.  
If you are ready to join an innovative industry leader and would like to register your interest in working for Boeing, go to the Boeing Defence Australia Careers web page to apply.

<https://jobs.boeing.com/> Search City: Geraldton, Western Australia

**Government of Western Australia**  
Legal Aid WA

**Solicitor - Carnarvon Satellite Office**  
Fixed Term - Full Time - 12 months (possible permanency and/or extension)  
Specified Calling Level 3/4, up to \$139,705 gross per annum + super + salary sacrifice + benefits + district air conditioning allowance and subsidised housing.  
Are you a talented, enthusiastic and experienced solicitor? In this role you will:  
• Operate independently from our satellite office in Carnarvon  
• Deliver a range of services across civil, family and criminal law areas.  
If you want to know more go to [www.jobs.wa.gov.au](http://www.jobs.wa.gov.au) and search for job vacancy no. LA23028.  
CLOSING DATE: 4pm, 20/2/23.

ENVIRONMENT PLANS NOTICE

Woodside Energy (Australia) Pty Ltd (ACN 090 922 287), Woodside Energy Julimar Pty Ltd (ACN 002 023 020) and Woodside Pump Pty Ltd (ACN 002 27 416) are proposing to conduct activities in Commonwealth waters as described below.

**FW03 Well Intervention Environment Plan (Woodside Energy Ltd)**

|                                 |   |
|---------------------------------|---|
| <b>Activity as a summary:</b>   | Activities on the FW03 production well to remediate a down-hole valve and continue production from this well as required. |
| <b>Location:</b>                | -28 km north-west of Dampier  |
| <b>Commencement timing:</b>     | Anticipated around mid 2023 pending approvals, vessel availability and weather constraints                                |
| <b>Estimated duration:</b>      | - 5 to 16 days and will take place 24 hours, 7 days a week  |
| <b>Consent to be commenced:</b> | June 2022 <b>Final EP submission to NOPSIWA</b> August 2022   |

**In-line Drilling and Seismic Containment Plan (Woodside Energy Julimar Pty Ltd)**

|                                 |  |
|---------------------------------|--|
| <b>Activity as a summary:</b>   | Geotechnical and geophysical surveys, drilling and appraisal of the Julimar South-1 well and plug and abandonment of Julimar South-1H required.  |
| <b>Location:</b>                | - 82 km east-north-east of Dampier   |
| <b>Commencement timing:</b>     | Anticipated around second half of 2022 pending approvals, vessel availability and weather constraints  |
| <b>Estimated duration:</b>      | - 40 days for drilling and appraisal, - 45 days geophysical and geotechnical surveys and - 21 for decommissioning of the Julimar South-1 well. Activities will be conducted 24 hours per day, 7 days per week. |
| <b>Consent to be commenced:</b> | August 2022 <b>Final EP submission to NOPSIWA</b> Not yet submitted  |

**WA-24-L-7 well Drilling and Seismic Containment Plan (Woodside Pump Pty Ltd)**

|                                 |   |
|---------------------------------|---|
| <b>Activity as a summary:</b>   | Grouting and subsea infrastructure installation activities for on/off well (PLAGS) and contingent well intervention activities for current production wells.                                      |
| <b>Location:</b>                | - 70 km north-west of Dampier   |
| <b>Commencement timing:</b>     | Anticipated around second half of 2022 pending approvals, vessel availability and weather constraints   |
| <b>Estimated duration:</b>      | - 90 days for the PLAGS well, - 70 days per well for well intervention activities - 30 days for subsea infrastructure activities. Activities will be conducted 24 hours per day, 7 days per week. |
| <b>Consent to be commenced:</b> | June 2022 <b>Final EP submission to NOPSIWA</b> Not yet submitted   |

Figure 1

Figure 2

Figure 3

**Figure 1 (FW03), Figure 2 (In-line Drilling and Seismic Containment Plan) and Figure 3 (WA-24-L-7 Well):** Data for the Operational Area and the Environment that the Activity (OWA) is based on a composite of many different paths and for that distance where a highly unlikely upstream event could have an impact on ocean weather and ocean conditions.

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the identified risks and will be outlined in the relevant EP. Impacts associated with the planned activities include the high slip presence of a Mobile Offshore Drilling Unit (MODU) and vessels, interaction with other marine users, vessel disturbance such as infrastructure placement, and other vessel drilling and construction impacts such as noise, light, air emissions and marine discharge. Impacts that could occur due to an unplanned event include hydrocarbon releases (condensates, marine diesel or other vessel fuels), vessel collisions with marine fauna, additional seabed disturbance, introduced marine species, accidental loss of waste or other discharges.

**Figure 1, Figure 2 and Figure 3** illustrate the OWA to support persons or organisations understanding of whether their functions, interests or activities may be affected by the proposed activities, with detailed information found in Woodside's Consultation Information Sheets.

**Consultation Participation as a Feedback**

Woodside is seeking to consult with relevant persons to inform the preparation of Environment Plans (EPs) for these activities. Consultation is designed to notify and obtain input from relevant persons to assist Woodside identify measures to lessen or avoid potential adverse effects of the proposed activity on the environment.

Consultation will inform the development of each EP in accordance with environmental regulations administered by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage Act 2004 (OPGGSA) and support other regulatory submissions associated with the proposed activities. Detailed consultation information sheets are available at: [www.woodside.com.au/australian-operations/australian-operations](http://www.woodside.com.au/australian-operations/australian-operations). # ENVIRONMENT PLAN NOTICE

Woodside Energy (Australia) Pty Ltd (ACN 004 623 076) is proposing to conduct decommissioning activities in Commonwealth waters, as described below:

### Griffin Decommissioning as a Field Management Centre area Plan

|   |  |
|---|--|
| <b>Activity summary:</b>                | Field management and removal of subsea infrastructure above the mudline, including the River Torus Mooring (RTM) |
| <b>Location:</b>                        | ~45 km northwest of Orabia   |
| <b>Commencement of work:</b>            | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints           |
| <b>Estimated duration:</b>              | Approximately 4 months   |
| <b>Consentable commencement of:</b>     | Oct 2021   |
| <b>First EPA submission to NOPSDMA:</b> | Dec 2021   |

### Griffin Gas Export Pipeline Decommission Plan

|   |  |
|---|--|
| <b>Activity summary:</b>                | Preparation for and subsequent removal of ~26 km of gas export pipeline and associated stabilisation   |
| <b>Location:</b>                        | ~39-65 km northwest of Orabia  |
| <b>Commencement of work:</b>            | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints |
| <b>Estimated duration:</b>              | Approximately 2 months   |
| <b>Consentable commencement of:</b>     | Jun 2022   |
| <b>First EPA submission to NOPSDMA:</b> | Mar 2022   |

### Griffin Field Decommission Centre area Plan

|   |   |
|---|---|
| <b>Activity summary:</b>                | Proposed lease in situ (leave in place) of inert, non-toxic infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles, concrete gravity bases) |
| <b>Location:</b>                        | ~45 km northwest of Orabia  |
| <b>Commencement of work:</b>            | Upon environment plan acceptance and following completion of removal activities   |
| <b>Estimated duration:</b>              | No duration - infrastructure to be left in situ   |
| <b>Consentable commencement of:</b>     | Jun 2022  |
| <b>First EPA submission to NOPSDMA:</b> | Feb 2022  |

### Stybarrow Plug and Abandonment Centre area Plan

|   |   |
|---|---|
| <b>Activity summary:</b>                | The permanent plugging and abandonment of the then Stybarrow subsea development wells by placing cement plugs in the wells to prevent hydrocarbon release |
| <b>Location:</b>                        | ~33 km northwest of Semauh  |
| <b>Commencement of work:</b>            | Anticipated around late 2023 or 2024, pending approvals, vessel availability and weather constraints  |
| <b>Estimated duration:</b>              | ~4 to 6 months  |
| <b>Consentable commencement of:</b>     | May 2022  |
| <b>First EPA submission to NOPSDMA:</b> | Not yet submitted   |

### Stybarrow Decommissioning as a Field Management Centre area Plan

|   |   |
|---|---|
| <b>Activity summary:</b>                | Field management and removal of subsea infrastructure above the mudline including the Dis-connectable Torus Mooring (DTM) |
| <b>Location:</b>                        | ~33 km northwest of Semauh  |
| <b>Commencement of work:</b>            | Anticipated around Q4 2023, pending approvals, vessel availability and weather constraints                                |
| <b>Estimated duration:</b>              | ~4 months   |
| <b>Consentable commencement of:</b>     | Feb 2022  |
| <b>First EPA submission to NOPSDMA:</b> | Apr 2022  |

### Stybarrow Field Decommission Centre area Plan

|   |  |
|---|--|
| <b>Activity summary:</b>                | Proposed lease in situ (leave in place) of infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles) |
| <b>Location:</b>                        | ~33 km northwest of Semauh   |
| <b>Commencement of work:</b>            | Upon environment plan acceptance and following completion of removal activities  |
| <b>Estimated duration:</b>              | No duration - infrastructure to be left in situ  |
| <b>Consentable commencement of:</b>     | May 2022   |
| <b>First EPA submission to NOPSDMA:</b> | Jul 2022   |

Figure 1 (Stybarrow) and Figure 2 (Griffin) describe the Operational Area and the Environment that may be affected (EMFA) based on a composite of many different risks and further distance where highly sensitive, specialised events could have an impact based on weather and oceanic conditions.

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. Mitigation and management measures have been developed for each of the risks identified and will be applied to the relevant ER.

Impacts associated with the decommissioning activities include the physical presence of a highly reflective Grilling Unit (HCU) and vessel.

Interaction with other marine users, decommissioning discharges (cement slurry, hydraulic fracturing fluids), seabed disturbance, emissions from flaring/burning and other vessel impacts (noise, light, air emissions and marine discharges) impacts that could occur due to unplanned events include: erosion releases (mud/gas, marine diesel) or other vessel fueling, vessel collisions with marine fauna, additional seabed disturbance, introduced marine species, accidental loss of waste or other discharges.

Figure 1 and Figure 2 illustrate indicative EMFA to support persons or organisations understanding of whether their functions, interests or activities may be affected by the proposed activities, with detailed information found in Woodside's Consultation Information Sheets.

Figure 1 - Stybarrow Field

Figure 2 - Griffin Field

### Consultation Participation and Feedback

Woodside is seeking to consult with relevant persons to inform the preparation of Environment Plans (EPs) for the Stybarrow and Griffin decommissioning activities. Consultation is designed to identify and obtain input from relevant persons to assist Woodside identify measures to lessen or avoid potential adverse effects of the proposed activities on the environment.

Consultation will inform the development of each EP in accordance with environmental regulations administered by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage Act 2004 (OPGSA) and support other regulatory submissions associated with the planned activities.

Detailed consultation information sheets are available at [www.woodside.com.au/stybarrow-griffin-decommissioning-activities](http://www.woodside.com.au/stybarrow-griffin-decommissioning-activities) if you would like additional information about Stybarrow and Griffin decommissioning activities. You can also subscribe via our website to receive future information on proposed activities.

If you would like to comment on the proposed activities outlined above, please contact Woodside before Friday, 17 March 2023 via:

# ENVIRONMENT PLAN NOTICE

Woodside Energy (Australia) Pty Ltd (ACN004 923 876) is proposing to conduct decommissioning activities in Commonwealth waters, as described below:

### G-11a Decommissioning and Field Management Canserve Plan

|  |   |   |          |
|--|---|---|----------|
| <b>Activity summary:</b>               | Field management and removal of subsurface infrastructure above the mudline, including the River Turret Mooring (RTM) |   |          |
| <b>Location:</b>                       | ~45 km northwest of Onslow  |   |          |
| <b>Commencement if all going well:</b> | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints                |   |          |
| <b>Estimated duration:</b>             | Approximately 6 months  |   |          |
| <b>Consent to be commenced:</b>        | Oct 2021  | <b>Final EPA submission to NOPSDMA:</b> | Dec 2021 |

### G-11b Gas Escape Pipelines Decommission Plan

|  |  |   |          |
|--|--|---|----------|
| <b>Activity summary:</b>               | Preparation for and subsequent removal of ~26 km of gas report pipelines and associated stabilisation  |   |          |
| <b>Location:</b>                       | ~30-45 km northwest of Onslow  |   |          |
| <b>Commencement if all going well:</b> | Anticipated around second half of 2023, pending approvals, vessel availability and weather constraints |   |          |
| <b>Estimated duration:</b>             | Approximately 2 months   |   |          |
| <b>Consent to be commenced:</b>        | Jan 2022   | <b>Final EPA submission to NOPSDMA:</b> | Mar 2022 |

### G-11c Field Drifts Decommission Plan

|  |   |   |          |
|--|---|---|----------|
| <b>Activity summary:</b>               | Proposed lease in situ (leave in place) of inert, non-toxic infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles, concrete gravity bases) |   |          |
| <b>Location:</b>                       | ~45 km northwest of Onslow  |   |          |
| <b>Commencement if all going well:</b> | Upon environmental plan acceptance and following completion of removal activities   |   |          |
| <b>Estimated duration:</b>             | No duration - infrastructure to be left in situ   |   |          |
| <b>Consent to be commenced:</b>        | Jan 2022  | <b>Final EPA submission to NOPSDMA:</b> | Feb 2022 |

### Stybarrow Plug and Abandonment Canserve Plan

|  |  |   |                   |
|--|--|---|-------------------|
| <b>Activity summary:</b>               | Therapeutic plugging and abandonment of the Stybarrow subsurface development wells by placing cement plugs in the wells to prevent hydrocarbon release |   |                   |
| <b>Location:</b>                       | ~32 km northwest of Onslow   |   |                   |
| <b>Commencement if all going well:</b> | Anticipated around late 2023 or 2024, pending approvals, vessel availability and weather constraints   |   |                   |
| <b>Estimated duration:</b>             | ~4 to 9 months   |   |                   |
| <b>Consent to be commenced:</b>        | May 2022   | <b>Final EPA submission to NOPSDMA:</b> | Not yet submitted |

### Stybarrow Red Drifts Decommissioning and Field Management Canserve Plan

|  |  |   |          |
|--|--|---|----------|
| <b>Activity summary:</b>               | Field management and removal of subsurface infrastructure above the mudline including the Dis-connected Turret Mooring (DTM) |   |          |
| <b>Location:</b>                       | ~52 km northwest of Onslow   |   |          |
| <b>Commencement if all going well:</b> | Anticipated around Q4 2023, pending approvals, vessel availability and weather constraints                                   |   |          |
| <b>Estimated duration:</b>             | ~4 months  |   |          |
| <b>Consent to be commenced:</b>        | Feb 2022   | <b>Final EPA submission to NOPSDMA:</b> | Apr 2022 |

### Stybarrow Red Drifts Decommissioning Plan

|  |  |   |          |
|--|--|---|----------|
| <b>Activity summary:</b>               | Proposed lease in situ (leave in place) of infrastructure embedded in the seabed to minimise seabed disturbance (anchors, piles) |   |          |
| <b>Location:</b>                       | ~52 km northwest of Onslow   |   |          |
| <b>Commencement if all going well:</b> | Upon environmental plan acceptance and following completion of removal activities  |   |          |
| <b>Estimated duration:</b>             | No duration - infrastructure to be left in situ  |   |          |
| <b>Consent to be commenced:</b>        | May 2022   | <b>Final EPA submission to NOPSDMA:</b> | Jul 2022 |

**Figure 1 (Stybarrow) and Figure 2 (Griffin)** describe the Operational Area and the Canserve Plan (CP) for the Stybarrow and Griffin decommissioning activities. The CP is based on a comprehensive risk assessment and is designed to identify and manage risks to the marine environment arising from both planned and unplanned activities. High potential adverse impacts have been identified for each of the activities and will be addressed in the respective CP.

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned and unplanned activities. High potential adverse impacts have been identified for each of the activities and will be addressed in the respective CP. Impacts associated with the decommissioning activities include the physical dispersion of a Mobile Offshore Drilling Unit (MODU) and vessels.

Figure 1: Stybarrow Field

Interaction with other marine users, decommissioning discharges (planned or unplanned) through the drilling, related disturbances, emissions from burning, welding and other vessel impacts (noise, light, air emissions and marine discharge) impacts that could occur due to an unplanned event (such as hydrocarbon releases, gas, marine diesel or other vessel fuel), vessel collisions with marine fauna, additional seabed disturbance, introduced marine species, accidental releases of wellbore fluids.

**Figure 1 and Figure 2** illustrate the Canserve Plan to support marine or organisations understanding of whether their functions, interests or activities may be affected by the proposed activities, with detailed information found in Woodside's Consultation Information Sheets.

Figure 2: Griffin Field

### Consultation Participation and Feedback

Woodside is seeking to consult with relevant persons to inform the preparation of Environment Plans (EPs) for the Stybarrow and Griffin decommissioning activities. Consultation is designed to verify and obtain input from relevant persons to assist Woodside identify measures to lessen or avoid potential adverse effects of the proposed activities on the environment.

Consultation will inform the development of each EP in accordance with environmental regulations administered by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the Offshore Petroleum and Greenhouse Gas Storage Act 2004 (OPGSA) and support other regulatory submissions associated with the proposed activities.

Detailed consultation information sheets are available at: [www.woodside.com.au/stybarrow-griffin](http://www.woodside.com.au/stybarrow-griffin) and whether you would like additional information about Stybarrow and Griffin decommissioning activities. You can also subscribe via our website to receive future information on proposed activities.

If you would like to comment on the proposed activities outlined above, please contact Woodside before Friday, 17 March 2023 via:  
**C. Feedback@woodside.com**  
 Toll free: 1800 442 877

## PUBLIC NOTICES

### Planning and Development Act 2005 LOCAL PLANNING SCHEME AMENDMENT AVAILABLE FOR INSPECTION STANDARD AMENDMENT

Shire of Northampton Local Planning Scheme No. 10 - Amendment No. 8  
 Notice is hereby given that the local government of the Shire of Northampton has prepared the above mentioned planning scheme amendment for the purpose of:

- Amending the Scheme Maps as follows:
  - Re zoning a portion of Lot 254 Glouce Street, Horrocks from "Commercial" zone to "Residential R20" zone;
  - Re zoning a portion of Lot 1 Heaton Way, Horrocks from "Rural" zone to "Residential R20" zone;
  - Re zoning Lots 20, 21 and 47 Mitchell Street, Horrocks from "Local Scheme Reserve - Public Open Space" zone to "Residential R15";
  - Modifying a portion of Lot 10 Grace Street, Horrocks from "Additional Use 3" (A3) to "Additional Use 4" (A4);
  - Re zoning Lots 21 and 22 Mary Street, Mothampton from "Special Use 2 to 'Public Purpose - Emergency Services";
  - Re zoning Lots 505 and 18 North West Coastal Highway Area, from "Special Use" zone to "Rural - Additional Use 2" (AU2) zone; and
  - Remove the SOA3 Public Drinking Water Source Protection over Yelno Springs, Northampton and Port Gregory

Plans and documents setting out and explaining the scheme amendment have been deposited at the Shire of Northampton Council Offices, Hampton Road, Mothampton and the Alton Centre, Gray Street, Kalbarri and will be open for inspection during office hours up to and including Friday 7<sup>th</sup> April 2023. Details are also available via the Northampton website: [www.northampton.wa.gov.au](http://www.northampton.wa.gov.au)

Submissions on the planning scheme amendment may be lodged in writing and should include the amendment number, the property affected and details of the submission and lodged with the undersigned on or before 4.00 pm Friday 7<sup>th</sup> April 2023.

DAVID RICE BARTOLMA  
 ACTING CHIEF EXECUTIVE OFFICER  
 POLICIES, REGULATIONS AND GOVS

2.80 Activity Update Bespoke Consultation Information Sheet- Stybarrow P&A

# STYBARROW PLUG AND ABANDONMENT – SUMMARY INFORMATION SHEET

This is a summary of the activity in plain English. More detailed information is included in the Stybarrow Plug and Abandonment Environment Plan (EP) Information Sheet.

**Overview**

Woodside is planning to decommission subsea equipment in the Stybarrow field, which has finished production. The decommissioning activities will be divided into the following parts, each with its own Environment Plan:

1. Well plugging and abandonment
2. Equipment removal
3. Leaving certain equipment in place

This information sheet has information specifically about the plugging and abandonment activities.

When the Stybarrow field stopped production in 2015, the subsea equipment was flushed out with treated seawater as much as practical and the Stybarrow Venture facility departed.

The work will take place in Commonwealth waters, approximately 50km North West of Exmouth in title area WA-32-L and at a water depth of between about 810m to 850m.

Woodside is planning to start the plug and abandoning work upon the acceptance of the EP and the aim is to start work in around the second half of 2023. The activity is expected to take up to about 9 months.

A map showing the location of this work is below.

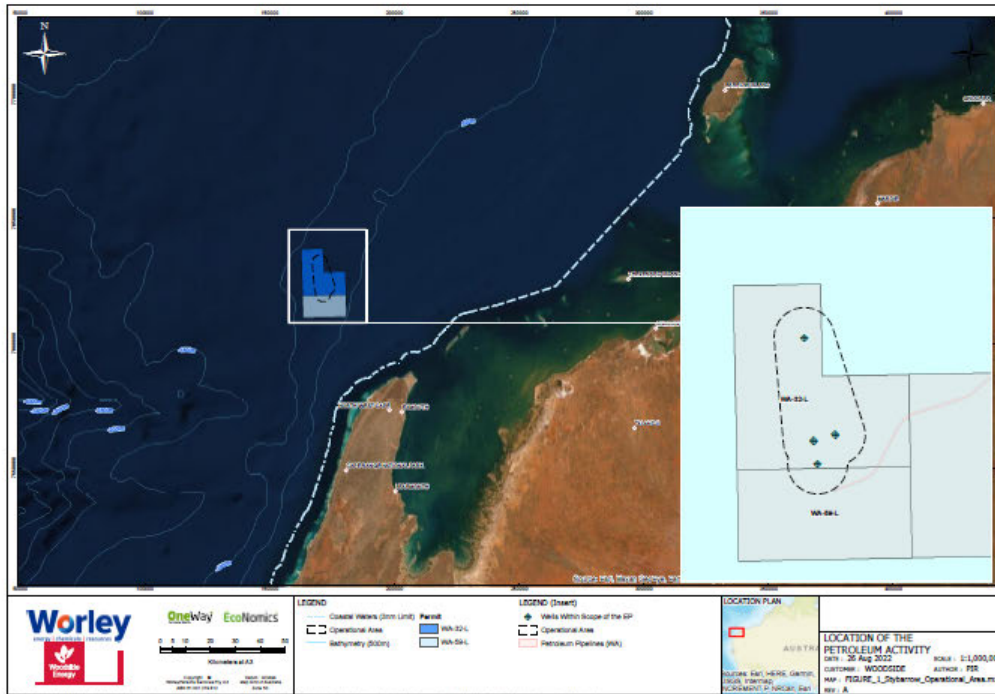

Figure 1. Stybarrow Location Map

**Work Method**

Cement plugs will be installed in 10 wells to permanently prevent the risk of potential leaks. This will be done using a mobile drill rig. If it is practical to do so, a sealed flowline may also be unblocked, flushed and removed.

**Environmental Impacts and Management**

This work program includes Planned Activities but may also result in Unplanned Activities. Both Planned and Unplanned Activities may impact the environment. Woodside manages the work program to reduce impacts and risks to as low as practical.

Planned Activities are activities that Woodside knows will happen as part of this work program. For example, Planned Activities include other marine users being temporarily stopped from accessing the work area, and disturbance to the seabed. Marine vessels used for the work may generate underwater noise, light emissions, atmospheric emissions, and routine discharges (such as sewage, waste, and deck drainage), and other authorised waste. Some seawater with approved chemicals will be released from equipment being removed.

Unplanned Activities are not planned as part of the work program, but may be the result of an accident, incident, or emergency situation. It is highly unlikely that there will be an Unplanned Activity. Unplanned Activities might include a spill of fuel or oil from a vessel collision, a spill on the deck of a vessel (such as during refuelling), or from an oil well, unplanned seabed disturbance, accidental collision with marine animals, waste entering the environment and accidental introduction of invasive species from outside the region. Management measures will be in place to reduce the probability and impacts of these unplanned activities to as low as practical.

A table showing all planned and unplanned activities, potential impacts, and management measures for each is included in the attached Information Sheet, **Table 3**.

The total area over which unplanned events could have environmental impacts is shown in the map below. This is referred to as the environment that may be affected (EMBA). The location in which the Stybarrow Decommissioning activities will occur, known as the Operational Area, is also shown on the map below. In the highly unlikely event such as a fuel spill from a vessel collision, the entire EMBA will not be affected. The part of the EMBA that is affected will only be known at the time of the event.

Figure 2. Environment that may be affected (EMBA) for the proposed activity.

**Providing feedback**

If you have an interest in the area of the “environment that may be affected” (EMBA) by this work program and would like more information or have any concerns, you can tell Woodside by calling **1800 442 977** or sending an email to **Feedback@woodside.com.au**. Please contact Woodside before **17th March 2023** so your questions or concerns can be considered during the environmental approval process.

If you would prefer to speak to the government directly, they can be contacted on **+61 (0)8 6188 8700** or send an email to **communications@nopsema.gov.au**.

**Conclusion**

Woodside produces energy that Western Australia, Australia, and the world needs. Woodside has made this energy from its oil and gas projects in Western Australia for over 35 years safely, reliably, and without any major environmental incident. Woodside is very proud of this legacy.

There are always potential risks with projects like this. Woodside has carefully planned this work program so that the risk of environmental impact is reduced to as low as reasonably practical and of an acceptable level. There are also strict government laws in place to protect the environment. Woodside complies with these laws and has systems in place to keep following these laws and rules for each project it undertakes.

If you would like information about Woodside’s work to study and care for the environment, you can find it at **https://www.woodside.com/sustainability/environment**.

**Further Information**

You can find the detailed Consultation Information Sheet for proposed activity on our website: **https://www.woodside.com/sustainability/consultation-activities**.

2.81 Activity Update Bespoke Consultation Information Sheet – Stybarrow Field Decommissioning

# STYBARROW DECOMMISSIONING – SUMMARY INFORMATION SHEET

This is a summary of the activity in plain English. More detailed information is included in the Stybarrow Decommissioning Environment Plan (EP) Information Sheet.

**Overview**

Woodside is planning to decommission subsea equipment in the Stybarrow field, which has finished production. The decommissioning activities will be divided into the following parts, each with its own Environment Plan:

1. Well plugging and abandonment
2. Equipment removal
3. Leaving certain equipment in place

When the Stybarrow field stopped production in 2015, the subsea equipment was flushed out with treated seawater as much as practical and the Stybarrow Venture facility departed. The Disconnectable Turret Mooring (DTM), which the facility attached to, later unintentionally lowered to the seabed.

This work will take place in Commonwealth waters, approximately 53 km North West of Exmouth in title area WA-32-L and at a water depth of between about 810m to 850m.

Woodside is planning to start the decommissioning activities upon the acceptance of each of the EPs summarised under the Work Method. The aim is to start work in around the second half of 2023.

A map showing the location of this work is below.

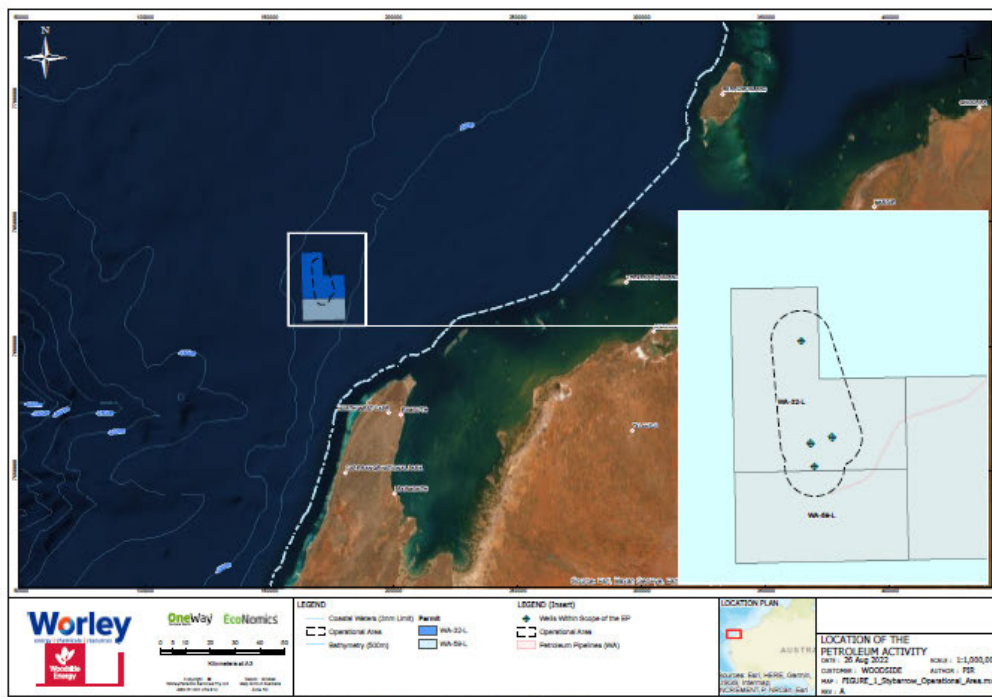

Figure 1. Stybarrow Location Map

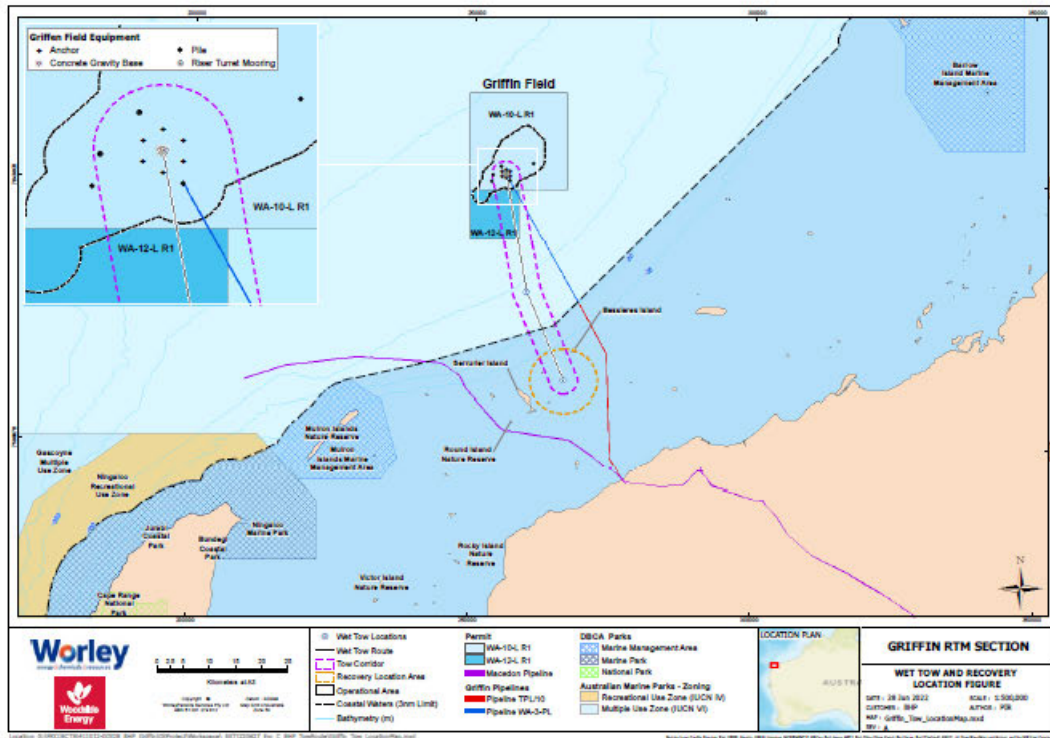

Figure 2. Griffin RTM Tow and Lift Area

**Work Method**

**1. Well plugging and abandonment**

Cement plugs will be installed in 10 wells to permanently prevent the risk of potential leaks. This will be done using a mobile drill rig. If it is practical to do so, a sealed flowline may also be unblocked, flushed and removed. The activity is expected to take up to about 9 months.

**2. Equipment removal**

Taking out subsea equipment, which was used to produce oil from the field, and the DTM which has lowered to the seabed. The plan is to lift the DTM from the water, however if this can't be done in the deep water location, it will be towed to shallower water. All other equipment on the seabed will be recovered in the Stybarrow field by a construction vessel. The activity is expected to take up to about 6 months.

**3. Leaving certain equipment in place**

Woodside is proposing to leave some equipment in place rather than removing it. This includes already buried anchors, piles and one wellhead which can't be removed. These items are made of steel and cement and are non-toxic, and not harmful to the environment.

**Environmental Impacts and Management**

This work program includes Planned Activities but may also result in Unplanned Activities. Both Planned and Unplanned Activities may impact the environment. Woodside manages the work program to reduce impacts and risks to as low as practical.

Planned Activities are activities that Woodside knows will happen as part of this work program. For example, Planned Activities include other marine users being temporarily stopped from accessing the work area, and disturbance to the seabed. Marine vessels used for the

work may generate underwater noise, light emissions, atmospheric emissions, and routine discharges (such as sewage, waste, and deck drainage), and other authorised waste. Some seawater with approved chemicals will be released from equipment being removed.

Unplanned Activities are not planned as part of the work program, but may be the result of an accident, incident, or emergency situation. It is highly unlikely that there will be an Unplanned Activity. Unplanned Activities might include a spill of fuel or oil from a vessel collision, a spill on the deck of a vessel (such as during refuelling), unplanned seabed disturbance, accidental collision with marine animals, waste entering the environment and accidental introduction of invasive species from outside the region. Management measures will be in place to reduce the probability and impacts of these unplanned activities to as low as practical.

A table showing all planned and unplanned activities, potential impacts, and management measures for each is included in the attached Information Sheet, **Table 3**.

The total area over which unplanned events could have environmental impacts is shown in the map below. This is referred to as the environment that may be affected (EMBA). The location in which the Stybarrow Decommissioning activities will occur, known as the Operational Area, is also shown on the map below. In the highly unlikely event such as a fuel spill from a vessel collision, the entire EMBA will not be affected. The part of the EMBA that is affected will only be known at the time of the event.

Figure 2. Environment that may be affected (EMBA) for the proposed activity.

### Providing feedback

If you have an interest in the area of the “environment that may be affected” (EMBA) by this work program and would like more information or have any concerns, you can tell Woodside by calling **1800 442 977** or sending an email to **Feedback@woodside.com.au**. Please contact Woodside before **17th March 2023** so your questions or concerns can be considered during the environmental approval process.

If you would prefer to speak to the government directly, they can be contacted on **+61 (0)8 6188 8700** or send an email to **communications@nopsema.gov.au**.

### Conclusion

Woodside produces energy that Western Australia, Australia, and the world needs. Woodside has made this energy from its oil and gas projects in Western Australia for over 35 years safely, reliably, and without any major environmental incident. Woodside is very proud of this legacy.

There are always potential risks with projects like this. Woodside has carefully planned this work program so that the risk of environmental impact is reduced to as low as reasonably practical and of an acceptable level. There are also strict government laws in place to protect the environment. Woodside complies with these laws and has systems in place to keep following these laws and rules for each project it undertakes.

If you would like information about Woodside’s work to study and care for the environment, you can find it at <https://www.woodside.com/sustainability/environment>.

2.82 Activity Update - Information Sheet – Stybarrow Plug and Abandonment Environment Plan (1 June 2023)

STAKEHOLDER CONSULTATION

# INFORMATION SHEET

February 2023

## ACTIVITY UPDATE – STYBARROW PLUG AND ABANDONMENT ENVIRONMENT PLAN

### EXMOUTH PLATEAU SUB-BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an Environment Plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure the activity is carried out in a manner that is consistent with the principles of Ecologically Sustainable Development (ESD), by which the environmental impacts and risks of the activity are reduced to As Low As Reasonably Practicable (ALARP) and of an acceptable level. We want relevant persons whose functions, interests or activities may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

**Overview**

Woodside, is planning to undertake subsea decommissioning activities for the Stybarrow field (previously operated by BHP Petroleum Pty Ltd (BHP)) which is located within Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately -810 - 850m (Figure 1).

Decommissioning of the Stybarrow field is planned to be undertaken in stages following acceptance of the EP, with work anticipated to start in about Q4 2023.

Regulatory approvals are being sought for the following activities under the **Stybarrow Well Plug and Abandonment (P&A) EP**:

- Pre-execution activities associated with the well P&A, such as barrier testing and removal of marine growth.
- Well P&A of the 10 productions/injection wells by placing cement plugs in the wells to permanently prevent hydrocarbon release.
- Cutting and removal of the wellhead and subsea tree assembly.
- Unblocking of the H4 flowline, if deemed feasible.

Field activities are planned to commence around Q4 2023, subject to approvals, vessel availability and weather constraints. Woodside is preparing the EP for this activity for submission to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) under the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009*.

The P&A activities are required to be completed by 30 September 2024, as per NOPSEMA General Direction B33.

Following wellhead removal, Woodside proposes to dispose of equipment onshore in accordance with applicable requirements, assessing all options to reduce waste through reuse or recycling of recovered equipment.

The equipment locations and proposed activity or end state is summarised at **Table 2**.

**Stybarrow Decommissioning Background**

The Stybarrow development was in production from 2007 until 2015 and consisted of the Stybarrow floating production, storage and offloading (FPSO) facility and its moorings, subsea facilities including 10 subsea wells (production and water/gas injectors), the associated trees, manifolds, risers, flowlines, umbilicals and the disconnectable turret mooring (DTM) buoy which connected the FPSO to the subsea infrastructure.

Since 2015 the following activities have been completed:

- All flowlines and gas lift lines were flushed and filled with treated seawater and production flowlines disconnected, with the exception of the H4 flowline which was blocked by sand and hydrate during production. The flowline is disconnected, sealed and lying on the seabed. Hydrates are ice like solids that form when water and natural gas combine at high pressure and low temperatures. Hydrates are stable and pose no short term or long term impact to the environment.
- All production, gas and water injection wells were shut in and capped.
- The Stybarrow Venture FPSO was disconnected from the DTM and departed the field in August 2015.

**Communications with mariners**

The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centers within WA-32-L. A temporary 500 m exclusion zone will apply around the Mobile Offshore Drilling Unit (MODU) and the associated project vessels during P&A activities.

Commercial fishers and other marine users are permitted to use but should take care when entering the Operational Area and remain clear of the Exclusion Zone.

The wells will continue to be marked on navigation charts following P&A activities.

**Decommissioning assessment**

Woodside has undertaken an assessment to identify potential risks to the marine environment and relevant persons, considering timing, duration, location and potential impacts arising from the planned activities. A number of mitigation and management measures will be implemented and are summarised in **Table 3**. Further details will be provided in the revised EPs.

In preparing the EP revisions, Woodside's intent is to minimise environmental and social impacts associated with the proposed activities, and we are seeking comments and input from relevant persons to inform our decision making and for the intended outcome of consultation (see above).

**Joint Venture**

Woodside Energy (Australia) Pty Ltd is sole titleholder and operator of WA-32-L.

**We welcome your feedback by 17 March 2023.**

1 Stybarrow Decommissioning Environment Plans – update | February 2023

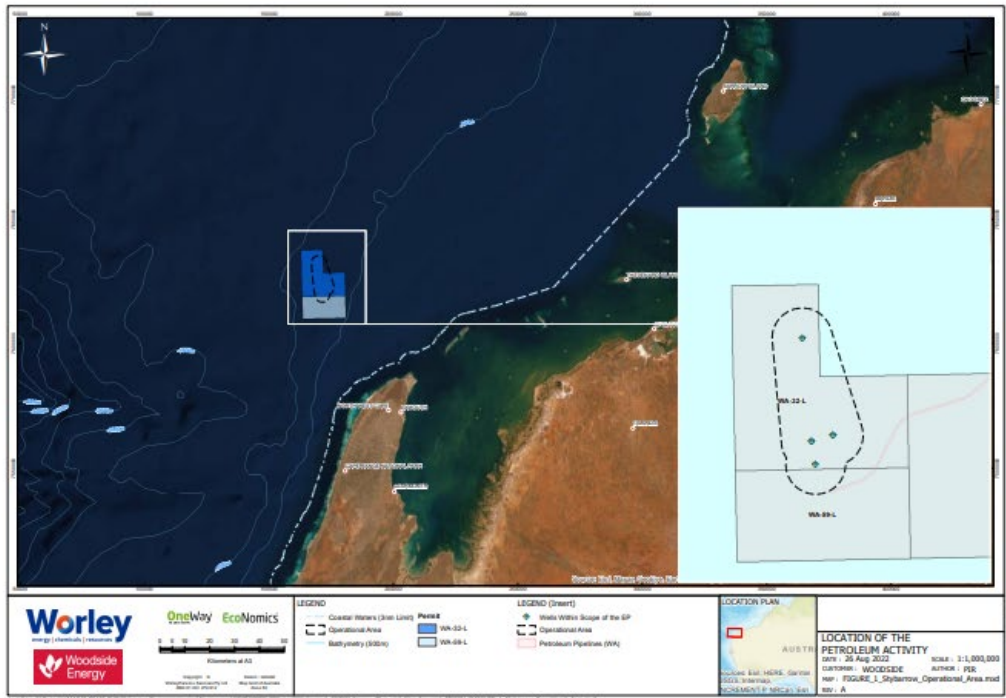

Figure 1. Stybarrow Location Map

Typical well flowbase

Typical subsea equipment recovery activity

**Table 1. Activity summary**

| Stybarrow Decommissioning activities                  | Well P&A  |
|---|---|
| <b>Summary</b>  | Permanent P&A of 10 wells (6 productions wells, 3 water injections wells and 1 gas injection well).<br>Potential removal of wellhead and subsea trees, either by MODU or Construction Support Vessel (CSV).   |
| <b>Earliest expected commencement date</b>            | Earliest P&A start is anticipated to be Q4 2023, subject to approvals, MODU vessel availability and weather constraints. P&A must be completed no later than 30 September 2024 pursuant to General Direction 833.   |
| <b>Simultaneous Operations (SIMOPS)</b>               | Potential SIMOPS may occur with subsea infrastructure removal activities if vessel and equipment availabilities permit.   |
| <b>Petroleum Title</b>                                | WA-32-L   |
| <b>Operational Area</b>                               | The Operational Area includes the area encompassing an approximate 3,000 m radius around each of the four drill centers within WA-32-L.   |
| <b>Exclusion Zones</b>                                | A temporary 500 m exclusion zone will apply around the MODU and the associated project vessels during P&A activities.   |
| <b>Estimated duration</b>                             | -6 – 9 months, comprised of: <ul style="list-style-type: none"> <li>• Preparatory activities (-4 – 7 days per well)</li> <li>• P&amp;A (-18 – 24 days per well)</li> <li>• Removal of Well Infrastructure (-1 – 5 days per well)</li> <li>• Recovery of moorings and ancillary equipment (-1 – 2 days per well)</li> </ul>  |
| <b>Location and Water depth</b>                       | -53km north west of Exmouth, -810 – 850 m water depth   |
| <b>Infrastructure</b>                                 | 6 x production wells<br>3 x water injection wells<br>1 x gas injection well<br><br>The P&A covers the following optional scopes that may be conducted on the MODU or otherwise be covered during the facilities removal scope: <ul style="list-style-type: none"> <li>• Removal of well infrastructure above the mudline including wellheads and xmas trees.</li> <li>• Intervention to unblock residual sand, hydrates and hydrocarbons from inside the H4 flowline, if determined feasible. Once unblocked, it is intended that the flowline will be recovered by a construction vessel under the Stybarrow Decommissioning and Field Management EP.</li> </ul> |
| <b>Vessels</b>  | Semi Submersible Mobile Offshore Drilling Unit<br>MODU supported by 2 – 3 offshore support vessels  |
| <b>Distance to nearest marine park/mature reserve</b> | -5 km to Gascoyne Commonwealth Marine Park<br>-24 km to Ningaloo Marine Park (Commonwealth)<br>-36 km to Ningaloo Marine Park (State)<br>-45 km to Murion Islands Marine Management Area  |

**Table 2. Approximate location and activity/end state**

| Subsea Infrastructure   | Easting  | Northing   | Activity/End State   |
|-------------------------|----------|------------|--|
| Stybarrow 5 (I-3) well  | 173119.0 | 7622683.9  | P&A of 10 wells. Removal of wellhead and subsea trees, either by MODU or CSV |

**Environment That May Be Affected (EMBA)**

The environment that may be affected (EMBA) is the largest spatial extent where unplanned events could potentially have an environmental consequence. For this EP, the broadest extent of the EMBA has been determined by the highly unlikely event of a hydrocarbon release from both the direct and indirect activities the subject of the EP. The worst-case credible spill scenario for this EP is loss of well containment during the well P&A.

The EMBA does not represent the predicted impact of the highly unlikely oil release. Rather, the EMBA represents the merged area of many possible paths that a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release.

This means that in the highly unlikely event that a hydrocarbon release does occur, the entire EMBA will not be affected and the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

The EMBA for the P&A activity is presented in **Figure 2** below.

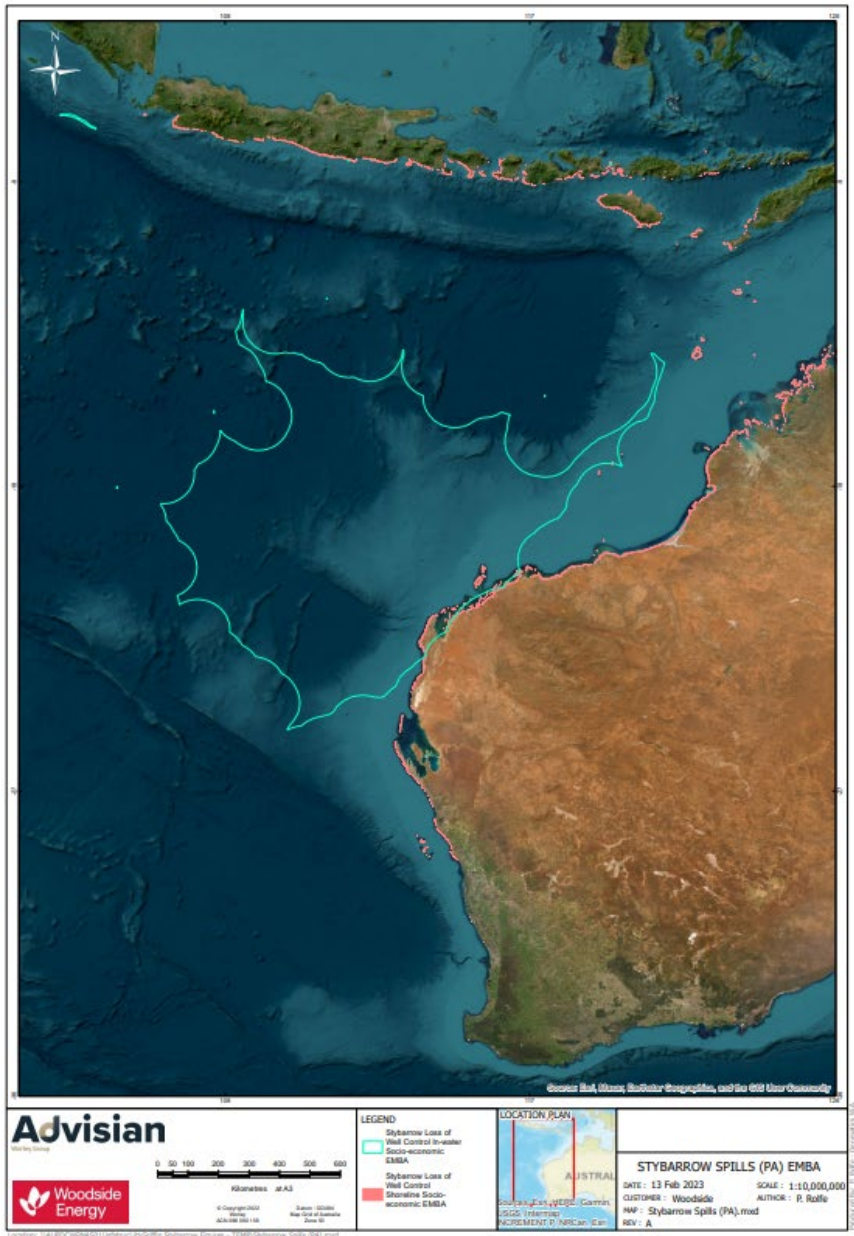

Figure 2. Environment that may be affected (EMBA) for the proposed activity.

**Mitigation and Management Measures**

Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from the decommissioning activities considering timing, duration, location.

A number of mitigation and management measures for the removal of the RTM are outlined in **Table 3**. Further details will be provided in the EP.

**Table 3. Summary of key risks and/or impacts and management measures for the Stybarrow Decommissioning activities. Key risks and/or impacts and management measure apply to activities occurring within the title area and tow location.**

| Potential Impact/ Risk  | Description of Source of Potential Impact/ Risk  | Description of Potential Impacts  | Proposed Mitigation and/ or Management Measure  |
|---|--|---|---|
| <b>Planned</b>  |  |   |   |
| <b>Physical presence and interactions with other marine users</b>   | <ul style="list-style-type: none"> <li>The activities will be undertaken using a range of project vessels, namely a MODU, CSV and a HLV, along with general support project vessels. A 500 m petroleum safety zone will apply around the equipment locations. If the DTM is towed out of title, a 500 m exclusion zone will apply to the DTM and project vessels during tow and lifting.</li> <li>Presence of vessels in the safety and exclusion zones has the potential to result in interaction with third-party marine users.</li> </ul> | <ul style="list-style-type: none"> <li>Interference with commercial shipping.</li> <li>Interference with commercial fishing activity.</li> <li>Displacement of recreational fishing activity.</li> <li>Interaction with existing oil and gas infrastructure.</li> </ul>   | <ul style="list-style-type: none"> <li>500 m petroleum safety zone maintained around equipment until removal.</li> <li>500 m exclusion zone established around the MODU and project vessels.</li> <li>Activity support vessel(s) to communicate with third-party vessels to assist in maintaining the petroleum safety zone/ exclusion zones.</li> <li>Consultation with relevant persons for the consultation outcomes.</li> </ul> |
| <b>Physical presence of infrastructure on seabed causing seabed disturbance interference and displacement of other marine users</b> | <ul style="list-style-type: none"> <li>Excess marine growth may need to be removed from the equipment prior to removal using high-pressure water jetting.</li> <li>Equipment deburial and short-term wet parking of infrastructure may be required.</li> </ul>   | <ul style="list-style-type: none"> <li>Removal activities may result in localised, temporary seabed disturbance from resuspension of sediments.</li> <li>Marine growth removal may result in highly localised seabed disturbance as debris deposits on the seabed.</li> <li>Interference or displacement of commercial fishing activity.</li> <li>Displacement of recreational fishing activity.</li> </ul> | <ul style="list-style-type: none"> <li>Use controlled recovery techniques to limit seabed disturbance.</li> <li>Equipment to be marked on navigational charts until removal.</li> </ul>   |
| <b>Discharges: Project Vessels</b>  | <ul style="list-style-type: none"> <li>Sewage, greywater and putrescible waste will be discharged from project vessels.</li> <li>Bilge water, deck drainage and brine and cooling water may also be discharged.</li> </ul>   | <ul style="list-style-type: none"> <li>Short-term, localised impacts to water quality i.e. eutrophication from the addition of nutrients from these discharge fluids.</li> </ul>  | <ul style="list-style-type: none"> <li>All routine marine discharges will be managed according to legislative and regulatory requirements.</li> </ul>   |
| <b>Discharges: Decommissioning Activities</b>   | <ul style="list-style-type: none"> <li>During equipment removal, small volumes of treated seawater within the equipment will be released into the surrounding environment.</li> <li>Chemical use may be required to remove marine growth.</li> <li>During recovery of the blocked H4 flowline, it may be necessary to cut and recover rather than unblocking, resulting in a release of up to 14m<sup>3</sup> crude oil and sand</li> </ul>  | <ul style="list-style-type: none"> <li>Localised short-term impacts to water quality from the release of seawater ballast and residual chemicals and hydrocarbons.</li> </ul>   | <ul style="list-style-type: none"> <li>Chemical reviews performed on all previously approved chemicals to confirm potential impacts are reduced to ALARP.</li> </ul>  |

| Potential Impact/ Risk   | Description of Source of Potential Impact/ Risk  | Description of Potential Impacts  | Proposed Mitigation and/ or Management Measure   |
|--|--|---|--|
| <b>Light Emissions</b>   | <ul style="list-style-type: none"> <li>Project vessels and MODU will use external lighting to navigate and conduct safe operations at night.</li> <li>Vessel lighting will also be used to communicate the vessel's presence to other marine users (i.e. navigation/ warning lights).</li> <li>Light emissions may be generated by flaring during well P&amp;A if required. Flaring is only expected to occur for short durations (hours).</li> </ul>  | <ul style="list-style-type: none"> <li>Light emissions have the potential to affect fauna such as marine turtles and birds by influencing changes in behaviour or impacting their orientation.</li> </ul>   | <ul style="list-style-type: none"> <li>Implement relevant controls in the National Light Pollution Guidelines for Wildlife including Marine Turtles, Seabirds and Migratory Shorebirds (2020).</li> <li>Lighting will be limited to the minimum required for navigational and safety requirements except in emergency circumstances.</li> <li>Maintain a 12 km buffer from turtle nesting beaches during towing and lifting activities to avoid impacts to turtle hatchlings.</li> </ul>   |
| <b>Noise Emissions</b>   | <ul style="list-style-type: none"> <li>Project vessels will generate noise both in the air and underwater due to the operation or thruster engines, propellers, and the use of cutting tools subsea.</li> </ul>  | <ul style="list-style-type: none"> <li>Noise from project vessels and the MODU will contribute to ambient noise levels.</li> <li>Elevated underwater noise has the potential to affect marine fauna.</li> </ul>   | <ul style="list-style-type: none"> <li>Maintain a 12 km buffer from turtle nesting beaches during towing and lifting activities to avoid impacts to turtles.</li> <li>Compliance with legislative and regulatory requirements for interactions with marine fauna to prevent adverse interactions.</li> </ul>   |
| <b>Atmospheric Emissions</b>   | <ul style="list-style-type: none"> <li>Atmospheric emissions will be generated by the MODU and project vessels from internal combustion engines and incineration activities.</li> <li>Atmospheric emissions will be generated from venting of residual gas and contingent flaring from the MODU during P&amp;A activities</li> </ul>   | <ul style="list-style-type: none"> <li>Emissions from project vessels could result in temporary, localised reductions in air quality in the immediate vicinity of the vessels.</li> <li>Venting or flaring of hydrocarbon gas may result in a short-lived localised gas plume and a minor contribution to greenhouse gas emissions</li> </ul> | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for marine air pollution.</li> <li>Flaring and venting of hydrocarbons is restricted to a duration necessary to perform the P&amp;A activity.</li> </ul>  |
| <b>Unplanned</b>   |  |   |  |
| <b>Unplanned Hydrocarbon Release – vessel collision or Loss of Well Containment during P&amp;A</b> | <ul style="list-style-type: none"> <li>Project vessels will use marine diesel fuel.</li> <li>In the unlikely event of a vessel collision involving a project vessel or third-party vessels during the activity, there is potential for a release of marine diesel fuel if the collision has enough force to penetrate the vessel hull in the exact location of the fuel tank.</li> <li>In the highly unlikely event of loss of well containment, there is the potential for a release of well fluids.</li> </ul> | <ul style="list-style-type: none"> <li>In the highly unlikely event of a vessel collision causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur.</li> </ul>   | <p><b>Preventing Vessel Collision</b></p> <ul style="list-style-type: none"> <li>500 m exclusion zone established around the equipment and project vessels during removal activities.</li> <li>Compliance with legislative and regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements.</li> <li>Consultation with relevant persons to ensure other marine users are informed and aware, reducing the likelihood of a collision.</li> <li>Develop a management plan for simultaneous operations where multiple campaigns occur concurrently in the same Operational Area.</li> </ul> <p><b>Spill Response Arrangements</b></p> <ul style="list-style-type: none"> <li>Arrangements supporting the Oil Pollution Emergency Preparation document (OPEP) will be tested to ensure the OPEP can be implemented as planned.</li> <li>Emergency response activities would be implemented in line with the OPEP.</li> </ul> |

| Potential Impact/ Risk  | Description of Source of Potential Impact/ Risk  | Description of Potential Impacts   | Proposed Mitigation and/ or Management Measure  |
|---|--|--|---|
| <b>Deck Spills and Bunkering</b>                                    | <ul style="list-style-type: none"> <li>Accidental deck spills from project vessels can include stored hydrocarbons, chemicals or equipment.</li> </ul>   | <ul style="list-style-type: none"> <li>Deck spills could result in short term, localised impacts to water quality or marine fauna in the immediate area surrounding the spill.</li> </ul>  | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for the prevention of marine pollution.</li> <li>Liquid chemical and fuel storage areas banded or secondarily contained when they are not being handled or temporarily moved.</li> <li>Maintain and locate spill kits in close proximity to hydrocarbon storage and deck areas for use to contain and recover deck spills</li> <li>Appropriate bunkering equipment kept and maintained, and contractors to follow procedures and requirements for bunkering and refuelling to reduce the likelihood of a spill.</li> </ul>   |
| <b>Unplanned Discharge of Solid Hazardous/ Non-Hazardous Wastes</b> | <ul style="list-style-type: none"> <li>Accidental, unplanned loss of hazardous solid wastes such as oily rags or paint cans from the project vessels.</li> </ul>   | <ul style="list-style-type: none"> <li>Short term, localised impacts to water quality or marine fauna in the area surrounding the release.</li> <li>Incorrect classification of waste can also result in inappropriate disposal of hazardous decommissioning wastes.</li> </ul>  | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for the prevention of marine pollution and handling of hazardous wastes</li> <li>Project vessel waste arrangements to ensure waste is recorded and segregated and that all non-putrescible waste (excludes all food, greywater or sewage waste) to be disposed of onshore.</li> <li>Lost waste and dropped objects will be recovered, where safe and practicable.</li> <li>Waste contractors engaged to identify potential waste disposal pathways.</li> <li>Infrastructure and resource recovery strategy that ensures waste is handled and disposed of in accordance with applicable legislation, monitors and tracks waste and sets KPIs for recycling and reuse of decommissioned infrastructure.</li> </ul> |
| <b>Vessel Collision with Marine Fauna</b>                           | <ul style="list-style-type: none"> <li>Vessel movements have the potential to result in collisions between the vessel (hull and propellers) and marine fauna.</li> </ul>   | <ul style="list-style-type: none"> <li>Vessel disturbance presents a potential threat to marine mammals, marine reptiles and fish, sharks and rays.</li> </ul>   | <ul style="list-style-type: none"> <li>Compliance with legislative and regulatory requirements for interactions with marine fauna to reduce the likelihood of a collision occurring.</li> </ul>   |
| <b>Disturbance to Seabed from Dropped Objects</b>                   | <ul style="list-style-type: none"> <li>Accidental, unplanned dropping of objects overboard from project vessels during recovery operations.</li> </ul>   | <ul style="list-style-type: none"> <li>Short term, localised impacts to sediment quality and benthic habitats.</li> </ul>  | <ul style="list-style-type: none"> <li>Project vessel inductions include control measures and training for crew in dropped object prevention.</li> <li>Lost waste/ dropped objects will be recovered where safe and practicable to do so.</li> <li>Procedures for lifts, bulk transfers and cargo loading if an unplanned object release does occur.</li> </ul>   |
| <b>Accidental Introduction of Invasive Marine Species</b>           | <ul style="list-style-type: none"> <li>Vessels transiting to the Operational Area may be subject to marine fouling whereby organisms attach to the vessel hull.</li> <li>Organisms can also be drawn into ballast tanks during onboarding of ballast water</li> <li>IMS could also be present as biofouling on subsea structures.</li> </ul> | <ul style="list-style-type: none"> <li>It is not credible for IMS to be introduced and establish on the seabed or subsea structures in the Operational Area as these deep waters are not conducive to the settlement and establishment of IMS.</li> <li>There is potential for the transfer of IMS between the project vessels and DTM while in its currently location within the Operational Area, or for IMS to be established in the shallower waters of the controlled sinking location or tow route and lift location.</li> </ul> | <ul style="list-style-type: none"> <li>Ballast water will be managed according to legislative and regulatory requirements.</li> <li>Application of Woodside's IMS risk assessment and appropriate management measures to the RTM, project vessels and relevant immersible equipment such as Remotely Operated Vehicles (ROVs), unless exempt.</li> </ul>  |

| <b>Feedback</b>  |   |  |  |
| <p>If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before 17 March 2023 via:</p> <p><b>E: <a href="mailto:Feedback@woodside.com.au">Feedback@woodside.com.au</a></b><br/> <b>Toll free: 1800 442 977</b></p> <p>You can subscribe on our website to receive Consultation Information Sheets for proposed activities: <a href="http://www.woodside.com/sustainability/consultation-activities">www.woodside.com/sustainability/consultation-activities</a>.</p> <p>Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.</p> |   | <p>Please note that your feedback and our response will be included in our EP for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the <i>Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)</i>.</p> <p>Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EP in order for this information to remain confidential to NOPSEMA.</p> |  |

**2.83 Reminder email and activity update – Nyul Nyul (NNAC) - Stybarrow Plug and Abandonment Environment Plan (9 September 2023)**

Dear [REDACTED]

I was hoping to possibly catch up at KALACC AGM's to introduce myself but understand how busy people are.

Woodside is keen to meet with Nyul Nyul Aboriginal Corporation to explain in more detail, the planned activities and Woodside is willing to pay reasonable meeting costs as we do not want corporations to be out of pocket for consultation meetings.

To assist people understanding the information better, we have commenced working on animation video's so as the activity explanation is not all technical.

We have previously sent information on Decommissioning and Upcoming Project environment plans seeking information on potential impacts to the interests, functions or activities that you may have in the environment that may be affected (EMBA) for each environment plan. This includes consultation in relation to: Stybarrow Decommissioning (Plug and Abandonment) and Pyxis Drilling . The planned activities commencement dates are between 30-October-23 and 30-November-23.

Woodside is again writing to you to confirm:

1. if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity; and
2. if there is any information you wish to provide on cultural features and/or heritage values.

## *Stybarrow Plug and Abandonment Environment Plan*

We have attached the information relevant to each of these activities and ask that you distribute it to members or individuals who may be interested.

The proposed commencement of activities under each of these EPs is included below. Please provide any relevant information prior to the date indicated.

If no feedback is received relating to items a) and b) above by this time, Woodside will take this to mean that you do not wish to provide this information prior to the commencement of the activity.

Please note that we will also take any feedback regarding the above, or any other relevant information you may wish to provide, at any time during the activity and will assess this information using the mechanisms described in the environment plan.

As you are aware, NOPSEMA has published a number of documents on consultation (please see [Document Hub | NOPSEMA](#)). For your convenience we have provided links to the following recent publications below:

- **Brochure:** [Consultation on offshore petroleum environment plans brochure.pdf \(nopsema.gov.au\)](#)
- **Guideline:** [Guideline: Consultation in the course of preparing an environment plan \(nopsema.gov.au\)](#); and
- **Policy:** [Draft policy for managing gender-restricted information PL2098.pdf \(nopsema.gov.au\)](#).

As you will see from the Guideline (link above), the purpose of consultation is to ensure that authorities, persons or organisations which are potentially affected by activities are consulted and their input is considered in the development of the environment plans. Consultation gives the titleholder an opportunity to receive information that it might not otherwise receive from those affected by the proposed activity, and for the titleholder to refine or change the measures it proposes to address impacts and risks by taking into account the information received. This process is intended to improve the titleholder's ability to minimise environmental impacts and risks from the activity.

We also want to make you aware that gender-restricted or other culturally sensitive information is managed carefully. If you have gender-restricted or other culturally sensitive information you wish to share, please let us know and we can discuss how to you want it to be managed. If you would prefer to provide the information directly to NOPSEMA, please do so. The attached NOPSEMA "Policy for managing gender-restricted information" provides information on this.

As you are aware, Woodside provides various forms of assistance to PBCs, Traditional Custodian groups or individuals to support your participation in consultation. Please contact me if you have any questions or wish to discuss further how you would like to provide feedback.

Kind regards,

### 3. Activity Update (June 2023)

Dear Stakeholder

Woodside is preparing the Stybarrow Plug and Abandonment (P&A) Environment Plan (EP), which will support P&A activities required as part of the progressive decommissioning of the Stybarrow field, located in Commonwealth waters in Production Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately ~810-850 m.

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence. For this environmental plan, the broadest extent of the EMBA has been determined by the highly unlikely event of a hydrocarbon release from activities within the scope the EP. The worst-case credible spill scenario for the Stybarrow P&A EP is a well loss of integrity.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by NOPSEMA.

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

## Stybarrow Plug and Abandonment Environment Plan

Dear Titleholder

Woodside is providing this update on the progressive decommissioning of the Stybarrow field, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by NOPSEMA.

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

## Stybarrow Plug and Abandonment Environment Plan

### Feedback:

If you have any feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **1 July 2023**.

Your feedback and our response will be included in our Environment Plan which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

You can also subscribe on our website to receive Consultation Information Sheets for proposed activities: [www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

Regards,

## Woodside Feedback

Dear Titleholder,

Woodside previously consulted you (email below) on its plans to decommission the Stybarrow field in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

## Stybarrow Plug and Abandonment Environment Plan

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

Kind regards,

### Woodside Feedback

### 3.3 Email sent to Northern Prawn Fishery (25 licence holders) (1 June 2023) and Northern Prawn Fishery Industry Pty Ltd

Dear Fishery Stakeholder

Woodside is preparing the Stybarrow Plug and Abandonment (P&A) Environment Plan (EP), which will support P&A activities required as part of the progressive decommissioning of the Stybarrow field, located in Commonwealth waters in Production Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately ~810-850 m.

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence. For this environmental plan, the broadest extent of the EMBA has been determined by the highly unlikely event of a hydrocarbon release from activities within the scope the EP. The worst-case credible spill scenario for the Stybarrow P&A EP is a well loss of integrity.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our [website](#).

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by NOPSEMA.

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

#### Activity:

26 June 2023

Dear Stakeholder

Woodside previously consulted you (correspondence dated 1 June 2023) with respect to its proposed Stybarrow Plug and Abandonment (P&A) Environment Plan (EP), which will support P&A activities required as part of the progressive decommissioning of the Stybarrow field. The field is located in Commonwealth waters in Production Licence WA-32-L, approximately 53 km north-west of Exmouth, Western Australia and in water depths of approximately ~810-850 m.

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence. For this environmental plan, the broadest extent of the EMBA has been determined by the highly unlikely event of a hydrocarbon release from activities within the scope the EP. The worst-case credible spill scenario for the Stybarrow P&A EP is a well loss of integrity.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website: [www.woodside.com](http://www.woodside.com).

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by NOPSEMA.

Please let us know if you would like to update previous feedback or have any additional views by **1 July 2023**.

9 June 2023

Dear Stakeholder

Woodside is providing this update on the progressive decommissioning of the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The Griffin Field is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The Stybarrow Field is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website: [www.woodside.com](http://www.woodside.com).

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by NOPSEMA.

Please let us know if you would like to update previous feedback or have any additional views by **9 July 2023**.

26 June 2023

Dear Stakeholder

Woodside previously consulted you (correspondence dated 9 June 2023) on its plans to progressively decommission the Griffin and Stybarrow fields, previously operated by BHP Petroleum Pty Ltd (BHP).

We are providing this information to ensure relevant persons are informed about the status of proposed activities, as there have been changes to activity scope and supporting consultation information since consultation commenced for these decommissioning projects in 2021.

The **Griffin Field** is in Commonwealth waters in Petroleum Licence WA-10-L, 65 km northwest of Onslow and 94 km northeast of Exmouth, Western Australia and in water depths of approximately 120 m.

The **Stybarrow Field** is in Commonwealth waters in Petroleum Licence WA-32-L, approximately 53 km northwest of Exmouth, Western Australia and in water depths of approximately 810 – 850 m.

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting stakeholders whom are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

A summary of proposed activities is outlined below, and more detailed information is provided in the attached Consultation Information Sheet. The Information Sheet provide details on activities proposed to be managed under a number of environment plans (EPs), including a summary of potential key risks and associated management measures. The Information Sheets are also available on our website: [www.woodside.com](http://www.woodside.com).

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Any feedback provided previously on proposed activities will remain current where EPs are under assessment by NOPSEMA.

Please let us know if you would like to update previous feedback or have any additional views by **9 July 2023**.

### 3.6 Geotargeted social media campaign (May – November 2023)

A Facebook information campaign was targeted along the coastline from Geraldton to Derby to ensure it reached all communities adjacent to the EMBA. Geotargeting locations are distributed along the coast, with 80 km radiuses around towns, cities and shires. Geotargeting points were also included for spaces between towns, cities and shires to ensure no areas were missed – you'll see below there are latitude and longitude references for those locations.

The site of the proposed wellness centre development at Frederick Street.

## Centre to offer medical services and child care

CAIN ANDREWS & KATYA MINNS

The Shire of Broome has approved a development application for a health and wellness centre which will feature a creche able to look after up to 100 children at a time.

The centre will also supply accommodation for medical centre staff with four short-term units to be built in the north-eastern corner of the lot.

The health and wellness centre will feature a dental practice, a GP clinic, pharmacy, beauty clinic, cafe, psychologist's office, physiotherapy office and two medical imaging tenancies with the project estimated to cost just over \$61m.

The development applicant will also have to donate just over \$30,000 for public art or to develop a public art installation equal to that value, thanks

to the Shire's local planning scheme. The site will be at Frederick Street between the Broome Boulevard Shopping Centre and the Broome Recreation and Aquatic Centre where the St Martin de Porres Re-engagement School sits. The school is now searching for a new location, according to the Shire agenda.

Shire president Desiree Male said the development was a step in the right direction for the tourist town.

"To have a private developer come in and put a proposal forward to build something (as) significant as this is fantastic," she said.

"Across the board, we are lacking dreadfully (in child care) and anything that can add to the shortfall is a benefit."

"We're really supportive and thankful that we have attracted this sort of investment to town and we look forward to when it opens."

# Tanami sealing set for 10-year build timeline

DAN JERVIS-BARDY

The sealing of the Tanami track in northern WA will take a decade to complete, the Albanese Government has confirmed.

But Infrastructure Minister Catherine King's office is defending the timeframe, saying it would ensure a consistent and manageable stream of work for local contractors and time for proper consultation with communities along the route.

It was revealed during Senate estimates that \$434 million in Commonwealth funding to seal the Tanami was spread out across the next 10 years, suggesting that was how long it would take to finish the much-needed upgrade.

Sealing the track promises

huge social and economic benefits for communities in the East Kimberley, including making it cheaper and easier to transport goods.

The Opposition slammed the decade-long timeline as "completely unacceptable", accusing both the Albanese and McGowan governments of failing to prioritise the project.

Ms King's office confirmed — and defended — the plan in a statement to The West Australian.

"A 10-year rolling delivery time frame will ensure a steady and sustainable pipeline of works for local construction crews," a spokeswoman said.

"As a large, unsealed and remote road, a staged approach over time also allows for the necessary

planning, environmental approvals and consultation to occur — including with First Nations communities."

The spokeswoman said work on the first portion of the 313km track was expected to start in the middle of the year. The project — jointly funded with the WA Government — is expected to cost \$542 million.

"The WA Government is currently developing a delivery strategy which will inform the project's rollout for upgrading and sealing the road," she said.

"Both governments are working together to ensure construction can start as soon as possible on the project, which will improve road safety, connectivity as well as freight access and productivity."

## YOU'RE INVITED TO COME AND TALK WITH WOODSIDE ABOUT OUR ACTIVITIES.

Woodside is preparing Environment Plans and wants to discuss these with relevant persons, before submission to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

### Activities

- Plug and Abandonment Decommissioning Activities for the Stybarrow field, located about 53 km north-west of Exmouth.
- Pyxis Drilling and Subsea Installation, located about 170 km north west of Dampier.

# Surf club rides crest of wave

CAIN ANDREWS

The new Broome Surf Life Saving Club is set to open to the public, with the main construction work of the \$5.5m project complete.

The club, due open to the public by late July, features a range of new facilities including new and increased storage areas, an education and function room, a new gym, bar and public toilets and showers. And the new facilities are already drawing in new members.

Broome Surf Life Saving Club Building director Rob Aristei said he was excited to see the building near completion after working on the project for the better part of a decade.

"In 2016 we started to get the project off the ground as the old building had reached the end of its life. What we're trying to do is make the club fully sustainable so it will be a lot easier for us to replace equipment, attract more members and even expand our patrolling time."

Broome Surf Life Saving Club manager Lauren Henderson said the new building would allow the

Bar manager Chris Andrzejczek, BSLC chairperson Bec Farmluga, BSLC Education director Carrie Setten, BSLSC Building director Rob Aristei, Broome Surf Life Saving Club manager Lauren Henderson. Picture: Cain Andrews

club to better service the community.

"The new facilities basically enhance our ability to achieve our core mission, which is to keep the community safe," she said. "It also enables us to purchase more equipment and have better training in our training rooms."

Ms Henderson said the new club was already attracting more members.

"We've got the highest number of rippers enrolments this year than we've had since pre-COVID," she said. "There's close to 200 new enrolments and I think the excitement around the new club is part of the reason for that."

The new building doesn't just benefit our

club, but benefits the whole community as well.

Mr Aristei said the build wouldn't have been possible without sponsorship.

"I'd like to thank Surf Life Saving WA and all of the sponsors for their ongoing support, we couldn't have done it without you," he said.

Major Sponsors for the project include Totally Workwear, Cleanaway, Lion, Broome Plumbing and Gas and Galvins Plumbing Supplies. Major contractors involved in the project include CWD Builders, Laird Tran Studios and the Shire of Broome. See more pictures inside the club at broomead.com.au

## Man jailed for robberies on hotels

KATYA MINNS

The accomplice of a gang who acted as a "lookout" for his fellow offenders at the Oaks Hotel, a few days after breaking into and stealing alcohol from the Roebuck Bay Hotel, has been sentenced to 31 months imprisonment.

Anton Caleb Joseph Galova faced Broome's District Court on May 29 and pleaded guilty to six counts of aggravated burglary and stealing.

The court was told the 24-year-old was out drinking with friends and family at a residence before being convinced to accompany four other men to break into the Roebuck Bay Hotel at about

3am on March 18, 2022. Not wanting to be left behind, he went along with the group—helping peel open a metal door to one of the bars within the hotel and stealing 15 bottles of wine.

Three days later, he and the group went to Oaks Hotel on Robinson Street about 2am with the intention to burgle the bar for alcohol.

Galova kept a lookout for security as his fellow offenders used an axe to break the glass of the restaurant to gain entry into the bar, stealing bottles of liquor off the shelves.

An hour after leaving the hotel, the group returned for more alcohol but security was already investigating

the scene and had called police.

The police approached the men leaving the hotel on Guy Street, uncovering bottles of alcohol in their bags and immediately took them into custody.

Defence lawyer Nick Brookes said his client was "not a sophisticated individual" and that Galova did not believe he was fully involved in the crime, hence his co-operation with police when providing statements against the others involved.

District Court Judge Michael Bowden sentenced Galova to 31 months jail, backdated to March 21, 2022. He will be eligible for parole after serving 15½ months.

# Muster ends with Party in the Park

Jimmy Laminon, 5, of Halls Creek.

River Alford, 5, of Kununurra.

**CALLY DUPE**

The East Kimberley's biggest festival came to a big close when hundreds gathered at Celebrity Tree Park for the Ord Valley Muster's Horizon Power Party in the Park.

The event — likely to become a staple of the Muster — was a true East Kimberley celebration, with performances, workshops, displays and fun for the family with local and guest entertainment.

Among the line-up was belly dancing, the East Kimberley College Primary School Choir, the Wild Brumby Line Dancers, the East Kimberley Community Choir, and the East Kimberley College Band.

Also featuring were bands Cruise Control, Girls from Oz and the Band of the First Brigade, from Darwin.

But arguably the most popular activity at this year's event was the Sorby Silver Search, a new rendition of what was for decades called the Diamond Dig.

Like many years before, participants took to three giant sand pits to dig for pop sticks marked with numbers corresponding with various prizes, which ranged from pond lights and a truck wash, to a stunning silver necklace.

Ailrah Rivers, 10, & Jaz Nayah, 8.

Hala, 1, and Simeon McGinness, of Kununurra.

Max & Claire Hogg, with granddaughters Cassidy & Ruthie Cunningham.

John & Julie Patry. Pic: Cally Dupo

Sandy Griffiths & Tammy Cavlovic

Rob & Cooper Cox, 13.

Zoe Sass, 8, and Nikki Cavlovic, 11.

There were three categories, a toddler section, kid section and adult section.

Rainer Winkler's persistence paid off, and after many attempts

he won the top prize in the Ord Valley Muster Silver Search — custom designed necklace designed by Kimberley Fine Diamonds and valued at \$1200.

## The laughs just kept coming at Comedy in the Park show

**CALLY DUPE**

It was a night of side-splitting laughter at Kununurra's sold out Comedy in the Park, with a huge crowd of 900 turning out to enjoy the highlights of the Boob Meta's Ord Valley Muster.

The comedy line-up was hand-picked by the festival organisers to ensure the laughs were non-stop all night, and included comedians Steph Tisdell, Chris Franklin, Bev Killick and Fabian Woods.

It was a global audience at this year's Comedy in the Park, with guests The Kim-

berley Echo spoke with hailing from across Australia and as far away as Oregon in the US.

Hosted by the hilarious self-confessed yubbo Franklin, the crowd roared with laughter listening to his mischievous antics and epic stories, tapping into everyone's inner bogon.

From his flannellette shirt to his double plunger thongs, Franklin's "Hogan-esque" style of comedy touched on the delicate issues of discovering he is one-sixteenth Aboriginal, booze and relationships.

"The audience was brit-

tant, we've had a great time up here, the Ord Valley Muster has looked after us well," Franklin said.

A proud Noongar Yamanman, Woods had the crowd chuckling with funny tales of traditional names and dances.

Bold, brassy and brutally honest, Killick had everyone shedding tears of laughter with her rough talking, sea mama jokes about plugging loving juggy mothers and grotty teenage boys.

Tisdell ended the show with her self-deprecating humour that kept audience chuckling.

# Burney to blitz WA for Voice

DAN JERVIS-BARDY

Minister for Indigenous Australians Linda Burney will next month spend a full week criss-crossing WA to build grassroots support for the Voice to Parliament.

Ms Burney told an audience in Perth on Monday the people of WA had a "big job" in helping the referendum across the line.

In a speech to the Australian Institute of Aboriginal and Torres Strait Islander Studies summit, the minister said she would travel from "Kununurra to Claremont, from Perth to the Pilbara" to listen and talk to voters about the Voice to Parliament.

The rallying cry came as Canting MP Andrew Hastie launches a fundraising drive to position himself as a leading figure in the No campaign. The outcome in WA could be crucial because a majority Yes vote is needed in at least four of the six States to succeed.

Ms Burney recalled the shocking abuse she received when, as a State minister in 2010, she returned to the

Linda Burney

regional NSW town where she grew up.

She revealed how a man, who she suspected went to the same school as her, said: "You know, Linda, the day you were born was one of the darkest days this town has ever seen."

Ms Burney said the "nasty comments" she received in the schoolyard were now directed at her on Twitter and Facebook.

She told the summit it was the First Nations people who were struggling to get their

voices heard, which gave strength to keep prosecuting the case for a Voice to Parliament.

"This referendum is once-in-a-lifetime opportunity," she said.

"We have within our grasp the chance to make a positive change that will last for generations."

While Ms Burney and other Government ministers are upbeat about the referendum, polls suggest support is in decline.

The latest News.com.au poll showed fewer than half voters intended to support the constitutional change.

Yes campaign director Dean Parkin said the "tightening in the numbers" understandable after recent heated political debate.

"The conversation has been bogged in Canberra politics, in a fair bit of negativity there," Mr Parkin told Sky News.

"That phase is coming to an end and so that will allow us to increase the focus and get some more cut through on that conversation that's starting to grow significantly in communities."

### 3.9 Kimberley Geotargeted Social Media Campaign – Community Information Sessions

A Facebook information campaign was targeted in Kununurra, Broome and Derby to ensure it reached communities where the Consultation Information Sessions were planned to be held. Geotargeting points were also included for spaces between towns, cities and shires to ensure no areas were missed – you'll see below there are latitude and longitude references for those locations.

As at 3:30pm, Thursday 15 June 2023

#### Kununurra:

**Dates:** 8 June 2023 – 14 June 2023

**Total reach:** 12,228

**Total impressions:** 14,486

#### **Geotargeting locations:**

- 80km radius around Kununurra
- 80km radius around Durack
- 80km radius around Warmun
- 80km radius around Wyndham

#### \* Locations

Reach people living in or recently in this location. ⓘ

The screenshot displays the Facebook geotargeting interface. At the top, it shows 'Australia' as the selected region. Below this, there is a list of four locations, each with a green checkmark icon, a location name, and a '+ 80 km' radius indicator with a dropdown arrow. The locations are: Durack, Western Australia City; Kununurra, Western Australia City; Warmun, Western Australia City; and Wyndham, Western Australia City. Below the list, there is a search bar with a magnifying glass icon and the text 'Search locations', and a 'Browse' button. At the bottom of the interface, there is a map showing the geographical locations of the four cities with blue location pins and overlapping 80km radius circles. A 'Drop Pin' button is visible in the bottom right corner of the map area.

[Add locations in bulk](#)

The image displays two screenshots from a Facebook interface. The left screenshot shows a 'Facebook Feeds' view with a sponsored post from Woodside Energy. The post features a blue background with white text and the Woodside Energy logo. The right screenshot shows a 'Facebook Stories' view of the same sponsored post, which is a vertical video or image with a blue background and white text.

# Rio reaches \$1b Range milestone

**CHEYANNE ENCISO**

Rio Tinto has spent \$1 billion with WA businesses as it progresses the development of its Western Range joint venture with China Baowu Steel Group.

Simon Trotter, iron ore chief executive of Rio Tinto, said the \$1b spend marked a considerable milestone.

"Rio Tinto spends billions of dollars with local suppliers across Western Australia and the Pilbara every year, helping support thriving communities across the State by providing local jobs for local people," he said.

The 25 million tonnes-a-year Western Range project will help sustain production of Rio's flagship Pilbara blend product from its existing Paraburdoo mining hub as the Eastern Range project depletes. China Baowu said it was pleased to see the Western Range project progressing smoothly.

Premier Roger Cook said significant projects such as the Western Range reinforced WA as an attractive and secure destination for business and investment.

"I want to commend Rio Tinto and Baowu on this latest project milestone and acknowledge their efforts in investing in WA to ensure WA businesses and workers benefit most," he said.

Rio in March reported it had spent \$8.6b with more than 2000 WA and Indigenous businesses in 2022 as part of its local buying program.

The figure included \$618m with Pilbara-based businesses, \$504m with Indigenous companies across WA, and \$438m with businesses run by traditional owners.

Rio Tinto iron ore chief executive Simon Trotter and China Baowu vice-president Hou Angul.

### 3.14 Presentation to Karratha Community Liaison Group (29 June 2023)

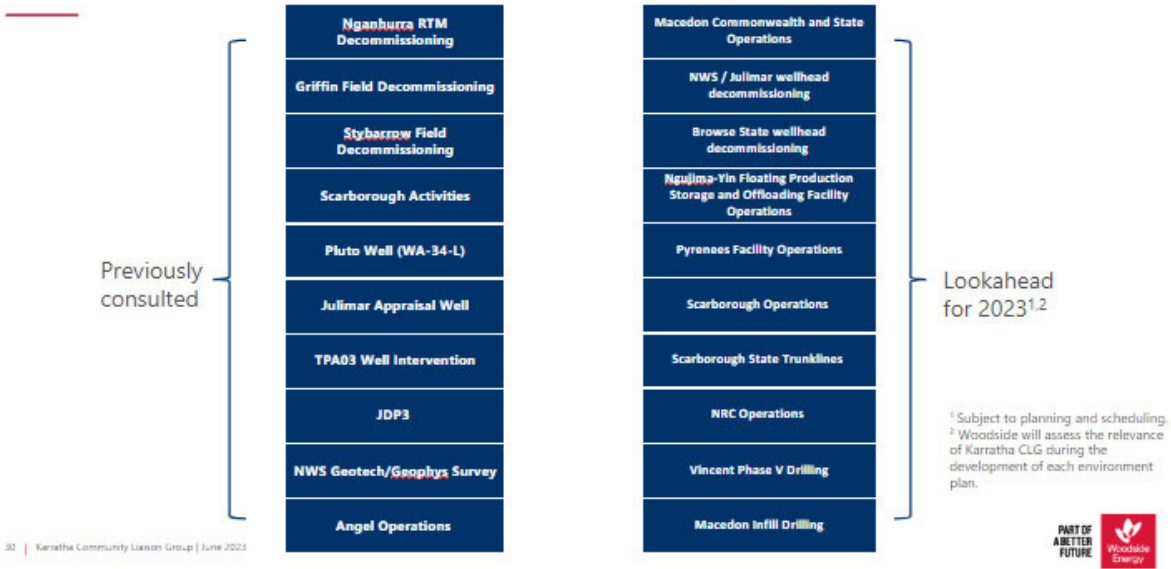

#### ENVIRONMENT PLAN CONSULTATION

- Changes to Commonwealth Environment Plan (EP) consultation requirements.
- Woodside is now consulting based on the **environment that may be affected (EMBA)** by a proposed petroleum activity rather than within the Operational Area.
- The EMBA is the largest spatial extent where unplanned events, no matter how unlikely, could potentially have an environmental consequence.
- Any person or organisation who does not wish to continue to receive EP consultation materials where they have only been assessed as 'relevant' for unplanned events in the EMBA, under the EP consultation requirements, please advise us in writing and we will not send further information.
- However, you should be aware that this request will need to be recorded in our EP documents and will be publicly available.
- We will be holding a drop-in session after this meeting for anyone in community who would like to know more about any of our EPs.

**Audience definition**

Your audience is defined.

Specific Broad

Estimated audience size: 21,400 - 25,200

Estimates may vary significantly over time based on your targeting selections and available data.

**Estimated daily results**

Reach 15K-21K

The accuracy of estimates is based on factors such as past campaign data, the budget you entered, market data, targeting criteria and ad placements. Numbers are provided to give you an idea of performance for your budget, but are only estimates and don't guarantee results.

3.17 Presentation to Exmouth Community Liaison Group (27 July 2023)

**ENVIRONMENT PLAN CONSULTATION**

**Changes to consultation (recap)**

- Changes to Commonwealth Environment Plan (EP) consultation requirements.
- Woodside is now consulting based on the **environment that may be affected (EMBA)** by a proposed petroleum activity rather than within the Operational Area.
- The EMBA is the largest spatial extent where unplanned events, no matter how unlikely, could potentially have an environmental impact.
- Any person or organisation who does not wish to continue to receive EP consultation materials where they have only been assessed as 'relevant' for unplanned events in the EMBA, under the EP consultation requirements, please advise us in writing and we will not send further information.
- However, you should be aware that this request will need to be recorded in our EP documents or as part of other associated regulatory processes and may -be publicly available.
- We want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activities.
- If you would like further information on any of the proposed activities on the following slide please let me know, or email [feedback@woodside.com.au](mailto:feedback@woodside.com.au).

# LOCAL ENGAGEMENT SESSIONS

- We consult relevant persons in the course of preparing an Environment Plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse effects of the proposed activity on the environment.
- This month we held sessions for local community members to seek information about our EPs, to discuss functions, activities of interest that by be affected by our proposed projects and to provide an opportunity for feedback.
- Locations included the Karratha Shopping Centre, Red Earth Arts Precinct, Woodside’s Roebourne Office
- Sessions were advertised to build community awareness and interest.

**ARE YOU INTERESTED IN WHAT WOODSIDE HAS PLANNED ON LAND AND SEA?**

We'd like to talk to relevant persons about our Environment Plans. We welcome your input and wish to provide you with the opportunity to share information and discuss your functions, activities or interests which may be affected by our proposed projects.

Speak to our friendly team members at one of our four sessions in September.

### MinRes in \$24m deal with local company

**DANIEL SPENCE**

Local Pilbara Indigenous-owned business Djelissana Pty Ltd has been awarded a \$24 million contract by Mineral Resources as part of the company's flagship Onslow Iron project.

It is the largest contract MinRes has ever signed with an Indigenous-owned business, as well as the first contract awarded to Djelissana Pty Ltd, which is a Robe River Kurruma business. The Robe River Kurruma people are the traditional owners of the land on which the Korri's Bore mine site is located.

The four-year contract is for exploration earthworks at Korri's Bore mine site, east of Onslow, including constructing access tracks, building drill pads, road maintenance and general earthworks.

Djelissana Pty Ltd will employ about 10 people as

**MinRes managing director Chris Ellison and Djelissana business owner Bevan Wally. Picture: Russell James**

part of the contract including a project manager, mechanics, operators and administration staff.

Djelissana Pty Ltd owner Bevan Wally, who grew up on country, said: "The support provided by MinRes has given us the confidence and capacity to help establish and grow our business. MinRes have shown us action and given us commitments. It's unusual for them to invest and give us a go."

MinRes managing director Chris Ellison said that the company was proud to partner with businesses such as Djelissana that had such a strong connection to country.

"Providing practical guidance and support, such as guaranteeing finance for equipment and plant, helps to build local capability and ensure Indigenous-owned businesses share in our success," he said.

At the contract signing ceremony in Perth, Mr Wally presented traditional gifts to Mr Ellison, including boomerangs, a shield and a long stick.

### SUPPORTING OUR LOCAL COMMUNITIES

The MinRes Community Fund supports our commitment to making meaningful contributions to the communities in which we operate.

Grants of up to **\$10,000** are available to eligible local organisations to support programs and events that help create strong, vibrant and healthy communities.

Applications are open to groups operating in the **Pilbara and Goldfields-Esperance** regions or within the **Shires of Yilgarn, Irwin and Mingenew**.

Applications accepted between **1 to 31 October 2023**.

### Schools to get a staff cash boost

**DANIEL SPENCE**

Pilbara schools will benefit from a multi-million-dollar cash injection from the State Government to recruit and retain staff.

Education Minister Tony Buti said the success of last year's temporary Regional Attraction and Incentive Package meant an additional 18 schools would benefit from \$15.49 million worth of incentive packages.

Schools in the Pilbara who will receive a boost include Broome Senior High School, Carnarvon Community

College, Karratha Senior High School, Holland Senior High School, Tom Price Senior High School and Newman Senior High School.

The incentive helps rural schools to attract and recruit teachers and retain staff and school administrators at schools by providing additional financial incentives.

Staff members will receive between \$5000 and \$17,000 for working in rural and remote public schools for the 2024 school year.

The incentives will be paid in two instalments: the first at the start of the 2024 school year, the balance paid at the end of the 2024 school year.

Dr Buti said schools in regional and remote areas faced additional challenges when recruiting and retaining teachers.

"This significant investment will bring greater continuity for regional and remote students, their families, and the whole community," he said. "The temporary Regional Attraction and Retention Incentive was initially allocated to 48 regional and remote schools.

**Government of Western Australia**  
Department of Health

### Fluoridation for the Newman drinking water system

Community water fluoridation helps protect teeth against decay and is a safe and effective way of improving oral health. More than 92 per cent of the Western Australian population, including the Perth metropolitan area and most large regional communities in the Pilbara and other parts of Western Australia, has benefited from fluoridation of drinking water for more than 40 years.

Fluoridation equipment has been installed at the water treatment plant servicing Newman and is now operational. As with similar plants located throughout Western Australia, the Department of Health will monitor the performance of the water treatment plant to ensure compliance with the Australian Drinking Water Guidelines and the Fluoridation of Public Water Supplies Act 1965.

For more information please contact the Department of Health by email to [shh10@health.wa.gov.au](mailto:shh10@health.wa.gov.au) or call 08 9222 2000 or visit [health.wa.gov.au](http://health.wa.gov.au) and search 'fluoridation'.

Dr Andrew Robertson

## Animal flight policy criticised

**CAIN ANDREWS**

A prominent pet adoption agency has slammed Qantas' animal flight policy claiming it will lead to the unnecessary deaths of hundreds of animals.

Over the past year, animal adoption agency Saving Animals From Euthanasia's regional branches in Broome, Newman, Hedland and Karratha collectively rescued 1856 animals with 62.6 per cent or 950 of them requiring air transport to get to their new homes.

But with Qantas now enforcing a "no-fly" policy for animals when temperatures are forecast to reach more than 35C SAFE founder Sue Hedley said rescue animals that required air transport might have to be destroyed.

"It is crucial to recognise that this policy alteration could have dire consequences for these animals. If they are unable to reach their destination and find new homes, they may tragically face euthanasia as an alternative," she said.

Ms Hedley said SAFE had engaged with Qantas to try to find alternative solutions such as warmer or only allowing animals on early morning flights on days over 35C but was knocked back by the company.

"In over 30 years of operation, SAFE has never had a death during transportation from regional areas to Perth, no matter the temperature," she said.

"Unfortunately, we have been advised that the policy will remain

**Sue Hedley & Salem.** Pic: Helen Odeh

and that no exceptions will be made.

"We firmly believe that the risks associated with this policy extend far beyond those related to flying on a day when temperatures may reach 35C later in the day."

A Karratha woman, who only wishes to be identified as Simona, was told her two dogs would not be allowed to catch a Qantas flight on October 5 because of the policy.

According to Simona, at the last minute she was told her dogs could not catch the flight despite being told the night before her dog would be able to fly.

"It's ridiculous we're here with our dogs everything's packed, and we're going away as well.

"With the way things are in Karratha with the shortage of space available there's no one to look after our pets," she said.

"It's not just inconvenient, it's unethical as they're not even adhering to their own policy.

**Simone's dogs faced being bumped off a Qantas flight because of the airline's heat policy.**

"I get it's about animal safety but what is ridiculous is that the policy clearly states 35C and above and it (was) only 23C."

Qantas eventually made an exception for Simona and her dogs on the day, however, she claims she was told by those at the airport to not tell Ms Hedley about the incident.

Last year, temperatures in Karratha exceeded 35C on 108 days, with a consecutive period of 43 days over 35C between February 12 and March 26.

Responding to questions about the policy, a Qantas spokesperson said the policy was led by the International Pet and Animal Association and the International

Air Transport Association. "Qantas takes the safety and welfare of pets and animals who travel with us extremely seriously," the spokesperson said.

"This is why we don't transport pets when temperatures exceed 35C or fall below 5C, due to the stress and anxiety this could cause."

City of Karratha Mayor Peter Long. Picture: Tom Zaunmayr

# Mayor runs again as candidates put forward pitches

## DANIEL SPENCE

Nominations have closed for the 2023 Karratha mayoral and councillor elections, with the list of candidates running to be the city's next mayor being released.

Peter Long — who has been in the position since 2011 — will be running again and said, if re-elected, he would continue to provide Karratha with intelligent, safe and inclusive leadership.

"I am a full-time mayor, always able to receive you and your ideas," he said. "I love the Pilbara and our community."

Regional Development Australia Pilbara chief executive and former local government minister Tony Simpson is also running for mayor.

His vision is to join forces with State and Federal entities to progress childcare, health and housing solutions.

"I would work to draw major brand investments in retail and leisure to provide more options for residents. Identify land for a

foreshore entertainment hub and infuse Karratha with festivals and quality entertainment," he said.

Brenton Johannsen — who ran for the seat of Durack at the recent Federal election under One Nation — said he would donate the entire mayoral allowance to charity.

"I will be a committed full-time mayor, my goal is to visit all businesses and resident groups on a regular basis to touch base and discuss any new issues," he said.

Mr Johannsen said his aims would be neighbourhood safety, more opportunities for locals, ratepayer discounts for local facilities, moving airport smokers' areas, and eco-friendly weed management.

As a sitting councillor, radio announcer, parent and former local business owner mayoral candidate Pablo Miller said he had got to know the people of Karratha.

"As your mayor, I will continue to not only listen but be a strong advocate for our community," he

said. Mr Johannsen said he was interested in expanding opportunities for young people and families, growing local and cultural tourism, supporting businesses and bolstering mental health services.

The owner of the North West Brewing Co Daniel Scott has a vision as mayor to grow Karratha's economy.

His plan is to create an education and sporting precinct between the TAFE and St Luke's College, with accommodation for secondary and tertiary students.

His plans also include a new home for the Pilbara Universities Centre, and a sporting hub for rugby, soccer, hockey and gymnastics.

Those running for council include Daniel Scott, Kieran Dart, Wayne Mothershaw, Mr Johannsen, Sarah Roots, George Levisianos, Bradley Davey, Mr Simpson, James Corea, Joseph Almonte and Geoff Harris.

Elections will be held for the four vacancies on October 21st.

## **Appendix H. Environmental Monitoring Response Strategies**

## Appendix H – Environmental Monitoring

### 1 Operational Monitoring Activation and Termination Criteria

Table H-1: Operational monitoring objectives, triggers and termination criteria

| Operational Monitoring<br>Operational Plan   | Objectives   | Activation triggers  | Termination criteria  |
|--|--|--|---|
| <p><b>Operational Monitoring Operational Plan 1 (OM01)</b></p> <p>Predictive Modelling of Hydrocarbons to Assess Resources at Risk</p> | <p>OM01 focuses on the conditions that have prevailed since a spill commenced, as well as those that are forecasted in the short term (1–3 days ahead) and longer term. OM01 utilises computer-based forecasting methods to predict hydrocarbon spill movement and guide the management and execution of spill response operations to maximise the protection of environmental resources at risk.</p> <p>The objectives of OM01 are to:</p> <ul style="list-style-type: none"> <li>• Provide forecasting of the movement and weathering of spilled hydrocarbons</li> <li>• Identify resources that are potentially at risk of contamination</li> <li>• Provide simulations showing the outcome of alternative response options (booming patterns etc.) to inform on-going Net Environmental Benefit Analysis (NEBA) and continually assess the efficacy of available response options in order to reduce risks to ALARP</li> </ul> | <p>OM01 will be triggered immediately following a level 2/3 hydrocarbon spill.</p> | <p>The criteria for the termination of OM01 are:</p> <ul style="list-style-type: none"> <li>• The hydrocarbon discharge has ceased and no further surface oil is visible</li> <li>• Response activities have ceased</li> <li>• Hydrocarbon spill modelling (as verified by OM02 surveillance observations) predicts no additional natural resources will be impacted</li> </ul> |

| Operational Monitoring Operational Plan   | Objectives  | Activation triggers  | Termination criteria   |
|---|---|--|--|
| <p><b>Operational Monitoring Operational Plan 2 (OM02)</b></p> <p>Surveillance and reconnaissance to detect hydrocarbons and resources at risk</p>      | <p>OM02 aims to provide regular, on-going hydrocarbon spill surveillance throughout a broad region, in the event of a spill.</p> <p>The objectives of OM02 are:</p> <ul style="list-style-type: none"> <li>• Verify spill modelling results and recalibrate spill trajectory models (OM01).</li> <li>• Understand the behaviour, weathering and fate of surface hydrocarbons.</li> <li>• Identify environmental receptors and locations at risk or contaminated by hydrocarbons.</li> <li>• Inform ongoing Net Environmental Benefit Analysis (NEBA) and continually assess the efficacy of available response options in order to reduce risks to ALARP.</li> <li>• To aid in the subsequent assessment of the short- to long-term impacts and/or recovery of natural resources (assessed in SMPs) by ensuring that the visible cause and effect relationships between the hydrocarbon spill and its impacts to natural resources have been observed and recorded during the operational phase.</li> </ul> | <p>OM02 will be triggered immediately following a level 2/3 hydrocarbon spill.</p> | <p>The termination triggers for the OM02 are:</p> <ul style="list-style-type: none"> <li>• 72 hours has elapsed since the last confirmed observation of surface hydrocarbons.</li> <li>• Latest hydrocarbon spill modelling results (OM01) do not predict surface exposures at visible levels.</li> </ul>  |
| <p><b>Operational Monitoring Operational Plan 3 (OM03)</b></p> <p>Monitoring of hydrocarbon presence, properties, behaviour and weathering in water</p> | <p>OM03 will measure surface, entrained and dissolved hydrocarbons in the water column to inform decision-making for spill response activities.</p> <p>The specific objectives of OM03 are as follows:</p> <ul style="list-style-type: none"> <li>• Detect and monitor for the presence, quantity, properties, behaviour and weathering of surface, entrained and dissolved hydrocarbons.</li> <li>• Verify predictions made by OM01 and observations made by OM02 about the presence and extent of hydrocarbon contamination.</li> </ul> <p>Data collected in OM03 will also be used for the purpose of longer-term water quality monitoring during SM01.</p>  | <p>OM03 will be triggered immediately following a level 2/3 hydrocarbon spill.</p> | <p>The criteria for the termination of OM03 are as follows:</p> <ul style="list-style-type: none"> <li>• The hydrocarbon release has ceased.</li> <li>• Response activities have ceased.</li> <li>• Concentrations of hydrocarbons in the water are below available ANZECC/ ARMCANZ (2018) trigger values for 99% species protection.</li> </ul> |

| Operational Monitoring Operational Plan   | Objectives   | Activation triggers   | Termination criteria  |
|---|--|---|---|
| <p><b>Operational Monitoring Operational Plan 4 (OM04)</b></p> <p>Pre-emptive assessment of sensitive receptors at risk</p> | <p>OM04 aims to undertake a rapid assessment of the presence, extent and current status of shoreline sensitive receptors prior to contact from the hydrocarbon spill, by providing categorical or semi-quantitative information on the characteristics of resources at risk.</p> <p>The primary objective of OM04 is to confirm understanding of the status and characteristics of environmental resources predicted by OM01 and OM02 to be at risk, to further assist in making decisions on the selection of appropriate response actions and prioritisation of resources.</p> <p>Indirectly, qualitative/semi-quantitative pre-contact information collected by OM04 on the status of environmental resources may also aid in the verification of environmental baseline data and provide context for the assessment of environmental impacts, as determined through subsequent SMPs.</p> <p>OM04 would be undertaken in liaison with WA DoT as the control agency once the oil is in State Waters (if a Level 2/3 incident).</p> | <p>Triggers for commencing OM04 include:</p> <ul style="list-style-type: none"> <li>• Contact of a sensitive habitat or shoreline is predicted by OM01, OM02 and/or OM03.</li> <li>• The pre-emptive assessment methods can be implemented before contact from hydrocarbons (once a receptor has been contacted by hydrocarbons it will be assessed under OM05).</li> </ul> | <p>The criteria for the termination of OM04 at any given location are:</p> <ul style="list-style-type: none"> <li>• Locations predicted to be contacted by hydrocarbons have been contacted.</li> <li>• The location has not been contacted by hydrocarbons and is no longer predicted to be contacted by hydrocarbons (resources should be reallocated as appropriate).</li> </ul> |

| Operational Monitoring Operational Plan  | Objectives   | Activation triggers   | Termination criteria  |
|--|--|---|---|
| <p><b>Operational monitoring operational plan 5 (OM05)</b></p> <p>Monitoring of contaminated resources</p> | <p>OM05 aims to implement surveys to assess the condition of wildlife and habitats contacted by hydrocarbons at sensitive habitat and shoreline locations.</p> <p>The primary objectives of OM05 are:</p> <ul style="list-style-type: none"> <li>Record evidence of oiled wildlife (mortalities, sub-lethal impacts, number, extent, location) and habitats (mortalities, sub-lethal impacts, type, extent of cover, area, hydrocarbon character, thickness, mass and content) throughout the response and clean-up at locations contacted by hydrocarbons to inform and prioritise clean-up efforts and resources, while minimising the potential impacts of these activities.</li> </ul> <p>Indirectly, the information collected by OM05 may also support the assessment of environmental impacts, as determined through subsequent SMPs.</p> <p>OM05 would be undertaken in liaison with WA DoT as the control agency once the oil is in State Waters (if a Level 2/3 incident).</p> | <p>OM05 will be triggered when a sensitive habitat or shoreline is predicted to be contacted by hydrocarbons by OM01, OM02 and/or OM03.</p> | <p>The criteria for the termination of OM05 at any given location are:</p> <ul style="list-style-type: none"> <li>No additional response or clean-up of wildlife or habitats is predicted.</li> <li>Spill response and clean-up activities have ceased.</li> </ul> <p>OM05 survey sites established at sensitive habitat and shoreline locations will continue to be monitored during SM02.</p> <p>The formal transition from OM05 to SM02 will begin on cessation of spill response and clean-up activities.</p> |

## 2 Oil Spill Scientific Monitoring Program

### Oil Spill Environmental Monitoring

The following provides some further detail on Woodside's oil spill scientific monitoring Program and includes the following:

- The organisation, roles and responsibilities of the Woodside oil spill scientific monitoring team and external resourcing.
- A summary table of the ten scientific monitoring programs as per the specific focus receptor, objectives, activation triggers and termination criteria.
- Details on the oil spill environmental monitoring activation and termination decision-making processes.
- Baseline knowledge and environmental studies knowledge access via geo-spatial metadata databases.
- An outline of the reporting requirements for oil spill scientific monitoring programs.

### Oil Spill Scientific Monitoring – Delivery Team Roles and Responsibilities

#### *Woodside Oil Spill Scientific Monitoring Delivery Team*

The Woodside science team are responsible for the delivery of the oil spill scientific monitoring. The roles and responsibilities of the Woodside scientific monitoring delivery team are presented in Table H-1 and the organisational structure and Corporate Incident Management Team (CIMT) linkage provided in Figure H-1.

#### *Woodside Oil Spill Scientific monitoring program – External Resourcing*

In the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors, scientific monitoring personnel and scientific equipment to implement the appropriate SMPs will be provided by SMP Standby contractor who hold a standby contract for SMP via the Woodside Environmental Services Panel (ESP). In the event that additional resources are required other consultancy capacity within the Woodside ESP will be utilised (as needed and may extend to specialist contractors such as research agencies engaged in long-term marine monitoring programs). In consultation with the SMP Standby Contractor and/or specialist contractors, the selection, field sampling and approach of the SMPs will be determined by the nature and scale of the spill.

**Table H-2: Woodside and Environmental Service Provider – Oil Spill Scientific Monitoring Program Delivery Team Key Roles and Responsibilities**

| Role  | Location                        | Responsibility  |
|---|---------------------------------|---|
| <b>Woodside Roles</b>   |                                 |   |
| SMP Lead/Manager  | Onshore                         | <ul style="list-style-type: none"> <li>Approves activated the SMPs based on operational monitoring data provided by the Planning Section</li> <li>Provides advice to the CIMT in relation to scientific monitoring</li> <li>Provides technical advice regarding the implementation of scientific monitoring</li> <li>Approves detailed sampling plans prepared for SMPs</li> <li>Directs liaison between statutory authorities, advisors and government agencies in relation to SMPs.</li> </ul>  |
| SMP Co-ordinator  | Onshore                         | <ul style="list-style-type: none"> <li>Activates the SMPs based on operational monitoring data provided by the Planning Section</li> <li>Sits in the Planning Section of the CIMT.</li> <li>Liaises with other CIMT Sections to deliver required logistics, resources and operational support from Woodside to support the Environmental Service Provider in delivering on the SMPs. Acts as the conduit for advice from the SMP Lead/Manager to the Environmental Service Provider</li> <li>Manages the Environmental Service Provider's implementation of the SMPs</li> <li>Liaises with the Environmental Service Provider on delivery of the SMPs</li> <li>Arranges all contractual matters, on behalf of Woodside, associated with the Environmental Service Provider's delivery of the SMPs.</li> </ul> |
| <b>Environmental Service Provider Roles</b>                                     |                                 |   |
| SMP Standby Contractor – SMP Duty Manager/Project Manager (SMP Liaison Officer) | Onshore                         | <ul style="list-style-type: none"> <li>Coordinates the delivery of the SMPs</li> <li>Provides costings, schedule and progress updates for delivery of SMPs</li> <li>Determines the structure of the Environmental Service Provider's team to necessitate delivery of the SMPs</li> <li>Verifies that HSE Plans, detailed sampling plans and other relevant deliverables are developed and implemented for delivery of the SMPs</li> <li>Directs field teams to deliver SMPs</li> <li>Arranges all contractual matters, on behalf of Environmental Service Provider, associated with the delivery of the SMPs to Woodside</li> <li>Manages sub-consultant delivery to Woodside</li> <li>Provides required personnel and equipment to deliver the SMPs.</li> </ul>  |
| SMP Field Teams   | Offshore – Monitoring Locations | <ul style="list-style-type: none"> <li>Delivers the SMPs in the field consistent with the detailed sampling plans and HSE requirements, within time and budget.</li> <li>Early communication of time, budget, HSE risks associated with delivery of the SMPs to the Environmental Service Provider – Project Manager</li> <li>Provides start up, progress and termination updates to the Environmental Service Provider – Project Manager (will be led in-field by a party chief).</li> </ul>   |

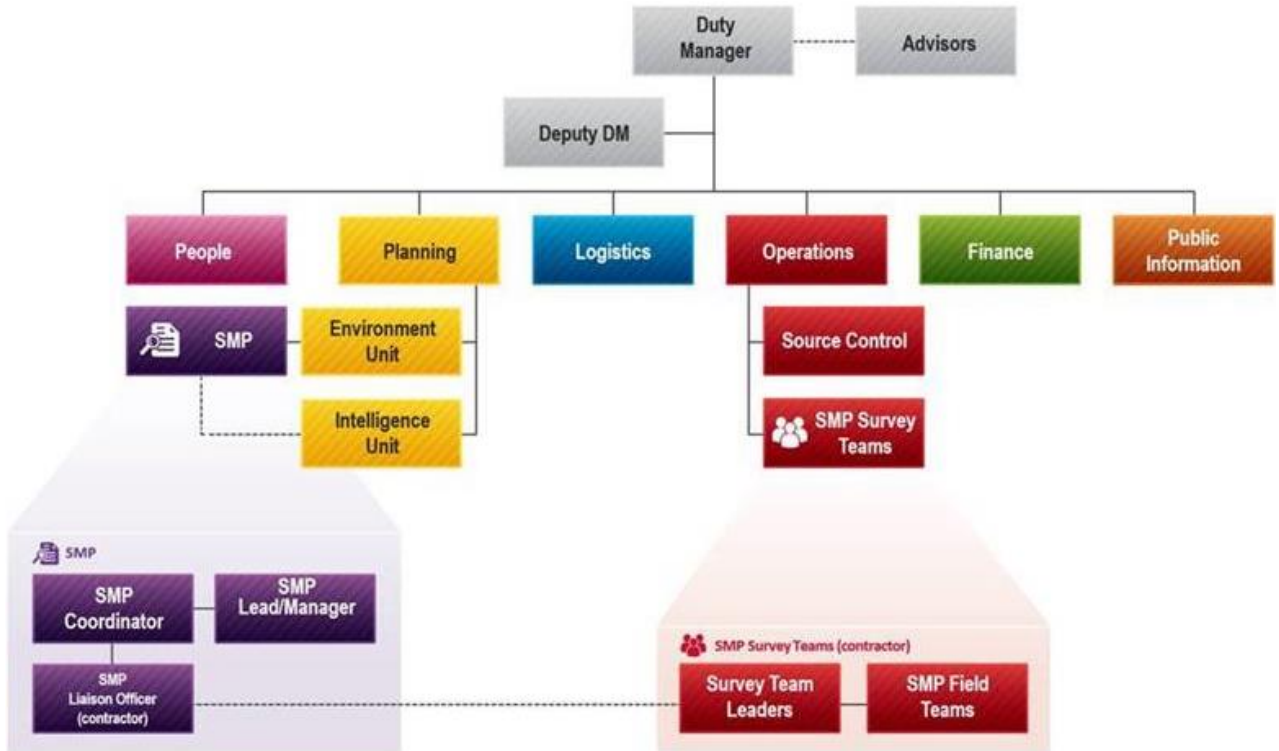

Figure H-1: Woodside Oil Spill Scientific Monitoring Program Delivery Team and Linkage to Corporate Incident Management Team (CIMT) organisational structure.

Table H-3: Oil Spill Environmental Monitoring: Scientific Monitoring Program – Objectives, Activation Triggers and Termination Criteria

| Scientific monitoring Program (SMP)  | Objectives   | Activation Triggers   | Termination Criteria   |
|--|--|---|--|
| Scientific monitoring program 1 (SM01)<br>Assessment of Hydrocarbons in Marine Waters  | <p>SM01 will detect and monitor the presence, extent, persistence and properties of hydrocarbons in marine waters following the spill and the response.</p> <p>The specific objectives of SM01 are as follows:</p> <ul style="list-style-type: none"> <li>Assess and document the extent, severity and persistence of hydrocarbon contamination with reference to observations made during surveillance activities and / or in-water measurements made during operational monitoring; and</li> <li>Provide information that may be used to interpret potential cause and effect drivers for environmental impacts recorded for sensitive receptors monitored under other SMPs.</li> </ul>  | SM01 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors   | <p>SM01 will be terminated when:</p> <ul style="list-style-type: none"> <li>Operational monitoring data relating to observations and / or measurements of hydrocarbons on and in water have been compiled, analysed and reported; and</li> <li>The report provides details of the extent, severity and persistence of hydrocarbons which can be used for analysis of impacts recorded for sensitive receptors monitored under other SMPs.</li> </ul> <p>SMP monitoring of sensitive receptor sites:</p> <ul style="list-style-type: none"> <li>Concentrations of hydrocarbons in water samples are below NOPSEMA guidance note (2019<sup>1</sup>) concentrations of 1 g/m<sup>2</sup> for floating, 10 ppb for entrained and dissolved; and</li> <li>Details of the extent, severity and persistence of hydrocarbons from concentrations recorded in water have been documented at sensitive receptor sites monitored under other SMPs.</li> </ul> |
| Scientific monitoring program 2 (SM02)<br>Assessment of the Presence, Quantity and Character of Hydrocarbons in Marine Sediments | <p>SM02 will detect and monitor the presence, extent, persistence and properties of hydrocarbons in marine sediments following the spill and the response.</p> <p>The specific objectives of SM02 are as follows:</p> <ul style="list-style-type: none"> <li>Determine the extent, severity and persistence of hydrocarbons in marine sediments across selected sites where hydrocarbons were observed or recorded during operational monitoring; and</li> <li>Provide information that may be used to interpret potential cause and effect drivers for environmental impacts recorded for sensitive receptors monitored under other SMPs.</li> </ul>  | <p>SM02 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented as follows:</p> <ul style="list-style-type: none"> <li>Response activities have ceased; and</li> <li>Operational monitoring results made during the response phase indicate that shoreline, intertidal or sub-tidal sediments have been exposed to surface, entrained or dissolved hydrocarbons (at or above 0.5 g/m<sup>2</sup> surface, 5 ppb for entrained/dissolved hydrocarbons and ≥1 g/m<sup>2</sup> for shoreline accumulation).</li> </ul>  | <p>SM02 will be terminated once pre-spill condition is reached and agreed upon as per the SMP termination criteria process and include consideration of:</p> <ul style="list-style-type: none"> <li>Concentrations of hydrocarbons in sediment samples are below ANZECC/ ARMCANZ (2013<sup>2</sup>) sediment quality guideline values (SQGVs) for biological disturbance; and</li> <li>Details of the extent, severity and persistence of hydrocarbons from concentrations recorded in sediments have been documented.</li> </ul>  |
| Scientific monitoring program 3 (SM03)<br>Assessment of Impacts and Recovery of Subtidal and Intertidal Benthos                  | <p>The objectives of SM03 are:</p> <ul style="list-style-type: none"> <li>Characterize the status of intertidal and subtidal benthic habitats and quantify any impacts to functional groups, abundance and density that may be a result of the spill; and</li> <li>Determine the impact of the hydrocarbon spill and subsequent recovery (including impacts associated with the implementation of response options).</li> </ul> <p>Categories of intertidal and subtidal habitats that may be monitored include:</p> <ul style="list-style-type: none"> <li>Coral reefs</li> <li>Seagrass</li> <li>Macro-algae</li> <li>Filter-feeders</li> </ul> <p>SM03 will be supported by sediment contamination records (SM02) and characteristics of the spill derived from OMPs.</p> | <p>SM03 will be activated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented as follows:</p> <ul style="list-style-type: none"> <li>As part of a pre-emptive assessment of PBAs of receptor locations identified by time to hydrocarbon contact &gt;10 days, to target receptors and sites where it is possible to acquire pre-hydrocarbon contact baseline; and</li> <li>Operational monitoring identified shoreline potential contact of hydrocarbons (at or above 0.5 g/m<sup>2</sup> surface, 5 ppb for entrained/dissolved hydrocarbons and ≥1 g/m<sup>2</sup> for shoreline accumulation) for subtidal and intertidal benthic habitat.</li> </ul> | <p>SM03 will be terminated once pre-spill condition is reached and agreed upon as per the SMP termination criteria process and include consideration of:</p> <ul style="list-style-type: none"> <li>Overall impacts to benthic habitats from hydrocarbon exposure have been quantified.</li> <li>Recovery of impacted benthic habitats has been evaluated.</li> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul>   |
| Scientific monitoring program 4 (SM04)   | <p>The objectives of SM04 are:</p> <ul style="list-style-type: none"> <li>Characterize the status of mangroves (and associated salt marsh habitat) at shorelines exposed/contacted by spilled hydrocarbons;</li> </ul>   | SM04 will be activated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the  | SM04 will be terminated once pre-spill condition is reached and agreed upon as per the SMP termination criteria process and include consideration of:  |

<sup>2</sup> Simpson SL, Batley GB and Chariton AA (2013). Revision of the ANZECC/ARMCANZ Sediment Quality Guidelines. CSIRO and Water Science Report 08/07. Land and Water, pp. 132.

| Scientific monitoring Program (SMP)  | Objectives   | Activation Triggers  | Termination Criteria  |
|--|--|--|---|
| Assessment of Impacts and Recovery of Mangroves / Saltmarsh  | <ul style="list-style-type: none"> <li>Quantify any impacts to species (abundance and density) and mangrove/saltmarsh community structure; and</li> <li>Determine and monitor the impact of the hydrocarbon spill and potential subsequent recovery (including impacts associated with the implementation of response options).</li> </ul> <p>SM03 will be supported by sediment sampling undertaken in SM02 and characteristics of the spill derived from OMPs.</p>   | <p>potential to contact sensitive environmental receptors and implemented as follows:</p> <ul style="list-style-type: none"> <li>As part of a pre-emptive assessment of receptor locations identified by time to hydrocarbon contact &gt;10 days; and</li> <li>Operational monitoring identified shoreline potential contact of hydrocarbons (at or above 0.5 g/m<sup>2</sup> surface, 5 ppb for entrained/dissolved hydrocarbons and ≥1 g/m<sup>2</sup> for shoreline accumulation) for mangrove/saltmarsh habitat.</li> </ul>  | <ul style="list-style-type: none"> <li>Impacts to mangrove and saltmarsh habitat from hydrocarbon exposure have been quantified.</li> <li>Recovery of impacted mangrove/saltmarsh habitat has been evaluated.</li> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul>   |
| Scientific monitoring program 5 (SM05)<br>Assessment of Impacts and Recovery of Seabird and Shorebird Populations        | <p>The Objectives of SM05 are to:</p> <ul style="list-style-type: none"> <li>Collate and quantify impacts to avian wildlife from results recorded during OM02 and OM05 (such as mortalities, oiling, rescue and release counts) and undertake a desk-based assessment to infer potential impacts at species population level; and</li> <li>Undertake monitoring to quantify and assess impacts of hydrocarbon exposure to seabirds and shorebird populations at targeted breeding colonies / staging sites / important coastal wetlands where hydrocarbon contact was recorded.</li> </ul>   | <p>SM05 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented as follows:</p> <ul style="list-style-type: none"> <li>As part of a pre-emptive assessment of receptor locations identified by time to hydrocarbon contact &gt;10 days;</li> <li>Operational monitoring predicts shoreline contact of hydrocarbons (at or above 0.5 g/m<sup>2</sup> surface, 5 ppb for entrained/dissolved hydrocarbons and ≥1 g/m<sup>2</sup> for shoreline accumulation) at important bird colonies / staging sites / important coastal wetland locations; or</li> <li>Records of dead, oiled or injured bird species made during the hydrocarbon spill or response.</li> </ul> | <p>SM05 will be terminated once it is agreed that the receptor has returned to pre-spill condition. The SMP termination criteria process will be followed and include consideration of:</p> <ul style="list-style-type: none"> <li>Impacts to seabird and shorebird populations from hydrocarbon exposure have been quantified.</li> <li>Recovery of impacted seabird and shorebird populations has been evaluated.</li> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul> |
| Scientific monitoring program 6 (SM06)<br>Assessment of Impacts and Recovery of Nesting Marine Turtle Populations        | <p>The objectives of SM06 are to:</p> <ul style="list-style-type: none"> <li>To quantify impacts of hydrocarbon exposure or contact on marine turtle nesting populations (including impacts associated with the implementation of response options);</li> <li>Collate and quantify impacts to adult and hatchling marine turtles from results recorded during OM02 and OM05 (such as mortalities, oiling, rescue and release counts) and undertake a desk-based assessment to infer potential impacts at species population levels (including impacts associated with the implementation of response options); and</li> <li>Undertake monitoring to quantify and assess impacts of hydrocarbon exposure to nesting marine turtle populations at known rookeries (including impacts associated with the implementation of response options).</li> </ul> | <p>SM06 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented if operational monitoring has:</p> <ul style="list-style-type: none"> <li>As part of a pre-emptive assessment of receptor locations identified by time to hydrocarbon contact &gt;10 days;</li> <li>Predicted shoreline contact of hydrocarbons (at or above 0.5 g/m<sup>2</sup> surface, 5 ppb for entrained/dissolved hydrocarbons and ≥1 g/m<sup>2</sup> for shoreline accumulation) at known marine turtle rookery locations; or</li> <li>Records of dead, oiled or injured marine turtle species made during the hydrocarbon spill or response.</li> </ul>                                   | <p>SM06 will be terminated once it is agreed that the receptor has returned to pre-spill condition. The SMP termination criteria process will be followed and include consideration of:</p> <ul style="list-style-type: none"> <li>Impacts to nesting marine turtle populations from hydrocarbon exposure have been quantified.</li> <li>Recovery of impacted nesting marine turtle populations has been evaluated.</li> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul> |
| Scientific monitoring program 7 (SM07)<br>Assessment of Impacts to Pinniped Colonies including Haul-out Site Populations | <p>The objectives of SM07 are to:</p> <ul style="list-style-type: none"> <li>Quantify impacts on pinniped colonies and haul-out sites as a result of hydrocarbon exposure/contact.</li> <li>Collate and quantify impacts to pinniped populations from results recorded during OM02 and OM05 (such as mortalities, oiling, rescue and release counts) and undertake a desk-based assessment to infer potential impacts at species population levels.</li> </ul>   | <p>SM07 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented if operational monitoring has:</p> <ul style="list-style-type: none"> <li>As part of a pre-emptive assessment of receptor locations identified by time to hydrocarbon contact &gt;10 days;</li> </ul>   | <p>SM07 will be terminated once it is agreed that the receptor has returned to pre-spill condition. The SMP termination criteria process will be followed and include consideration of:</p> <ul style="list-style-type: none"> <li>Impacts to pinniped populations from hydrocarbon exposure have been quantified.</li> <li>Recovery of pinniped populations has been evaluated.</li> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul>                                    |

| Scientific monitoring Program (SMP)  | Objectives  | Activation Triggers   | Termination Criteria  |
|--|---|---|---|
|  |   | <ul style="list-style-type: none"> <li>Identified shoreline contact of hydrocarbons ((at or above 0.5 g/m<sup>2</sup> surface, ≥5 ppb for entrained/dissolved hydrocarbons and ≥1 g/m<sup>2</sup> for shoreline accumulation) at known pinniped colony or haul-out site(s) (i.e. most northern site is the Houtman Abrolhos Islands); or</li> <li>Records of dead, oiled or injured pinniped species made during the hydrocarbon spill or response.</li> </ul>  |   |
| <p>Scientific monitoring program 8 (SM08)<br/>Desk-Based Assessment of Impacts to Other Non-Avian Marine Megafauna</p>   | <p>The objective of SM08 is to provide a desk-based assessment which collates the results of OM02 and OM05 where observations relate to the mortality, stranding or oiling of mobile marine megafauna species not addressed in SM06 or SM07, including:</p> <ul style="list-style-type: none"> <li>Cetaceans;</li> <li>Dugongs;</li> <li>Whale sharks and other shark and ray populations;</li> <li>Sea snakes; and</li> <li>Crocodiles.</li> </ul> <p>The desk-based assessment will include population analysis to infer potential impacts to marine megafauna species populations.</p>   | <p>SM08 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented if operational monitoring reports records of dead, oiled or injured non-avian marine megafauna during the spill/ response phase.</p>   | <p>SM08 will be terminated when the results of the post-spill monitoring have quantified impacts to non-avian megafauna.</p> <ul style="list-style-type: none"> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul>  |
| <p>Scientific monitoring program 9 (SM09)<br/>Assessment of Impacts and Recovery of Marine Fish associated with SM03 habitats</p>  | <p>The objectives of SM09 are:</p> <ul style="list-style-type: none"> <li>Characterise the status of resident fish populations associated with habitats monitored in SM03 exposed/contacted by spilled hydrocarbons;</li> <li>Quantify any impacts to species (abundance, richness and density) and resident fish population structure (representative functional trophic groups); and</li> <li>Determine and monitor the impact of the hydrocarbon spill and potential subsequent recovery (including impacts associated with the implementation of response options).</li> </ul>  | <p>SM09 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented with SMO3.</p>   | <p>SM09 will be undertaken and terminated concurrent with monitoring undertaken for SM03, as per the SMP termination criteria process</p> <ul style="list-style-type: none"> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul>   |
| <p>Scientific monitoring program 10 (SM10)<br/>SM10 - Assessment of physiological impacts important fish and shellfish species (fish health and seafood quality/safety) and recovery</p> | <p>SM10 aims to assess any physiological impacts to important commercial fish and shellfish species (assessment of fish health) and if applicable, seafood quality/safety. Monitoring will be designed to sample key commercial fish and shellfish species and analyse tissues to identify fish health indicators and biomarkers, for example:</p> <ul style="list-style-type: none"> <li>Liver Detoxification Enzymes (ethoxyresorufin-O-deethylase (EROD) activity)</li> <li>PAH Biliary Metabolites</li> <li>Oxidative DNA Damage</li> <li>Serum SDH</li> <li>Other physiological parameters, such as condition factor (CF), liver somatic index (LSI), gonado-somatic index (GSI) and gonad histology, total weight, length, condition, parasites, egg development, testes development, abnormalities.</li> </ul> <p>Seafood tainting may be included (where appropriate) using applicable sensory tests to objectively assess targeted finfish and shellfish species for hydrocarbon contamination.</p> <p>Results will be used to make inferences on the health of commercial fisheries and the potential magnitude of impacts to fishing industries.</p> | <p>SM10 will be initiated in the event of a Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors and implemented if operational monitoring (OM01, OM02 and OM05) indicates the following:</p> <ul style="list-style-type: none"> <li>The hydrocarbon spill will or has intersected with active commercial fisheries or aquaculture activities.</li> <li>Commercially targeted finfish and/or shellfish mortality has been observed/recorded.</li> <li>Commercial fishing or aquaculture areas have been exposed to hydrocarbons (≥0.5 g/m<sup>2</sup> surface and ≥5 ppb for entrained/dissolved hydrocarbons); and</li> <li>Taste, odour or appearance of seafood presenting a potential human health risk is observed.</li> </ul> | <p>SM10 will be terminated once it is agreed that the receptor has returned to pre-spill condition. The SMP termination criteria process will be followed and include consideration of:</p> <ul style="list-style-type: none"> <li>Physiological impacts to important commercial fish and shellfish species from hydrocarbon exposure have been quantified.</li> <li>Recovery of important commercial fish and shellfish species from hydrocarbon exposure has been evaluated.</li> <li>Impacts to seafood quality/safety (if applicable) have been assessed and information provided to the relevant stakeholders and regulators for the management of any impacted fisheries.</li> <li>Agreement with relevant stakeholders and regulators based on the nature and scale of the hydrocarbon spill impacts and/or that observed impacts can no longer be attributed to the spill.</li> </ul> |

## Activation Triggers and Termination Criteria

### *Scientific monitoring program activation*

The Woodside oil spill scientific monitoring team will be stood up immediately with the occurrence of a hydrocarbon spill (actual or suspected) Level 2 or 3 hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors via the First Strike plan for the petroleum activity programme. The presence of any level of hydrocarbons in the marine environment triggers the activation of the oil spill scientific monitoring program (SMP). This is to ensure the full range of eventualities relating to the environmental, socio-economic and health consequences of the spill are considered in the planning and execution of the SMP. The activation process also takes into consideration the management objectives, species recovery plans, conservation advices and conservations plans for any World Heritage Area (WHA), AMPs, State Marine Parks, other protected area designations (e.g., State nature reserves) and Matters of National Environmental Significance (including listed species under part 3 of the EPBC Act) potentially exposed to hydrocarbons. With the first 24-48 hours of a spill event, such information will be sourced and evaluated as part of the SMP planning process guided by Appendix D (identified receptors vulnerable to hydrocarbon contact), the information presented in the Existing Environment section of the EP as well as other information sources such as the Woodside Baseline Environmental Studies Database.

The starting point for decision-making on which SMPs are activated, and the spatial extent of monitoring activities, will be based on the predictive modelling results (OM01) in the first 24-48 hours until more information is made available from other operational monitoring activities such as aerial surveillance and shoreline surveys. Pre-emptive Baseline Areas (WHA, AMPs and State Marine Parks encompassing key ecological and socio-economic values) are a key focus of the SMP activation decision-making process, particularly, in the early spill event/response phase. As the operational monitoring progresses and further situational awareness information becomes available, it will be possible to understand the nature and scale of the spill. The SMP activation and implementation decision-making will be revisited on a daily basis to account for the updates on spill information. One of the priority focus areas in the early phase of the incident will be to identify and execute pre-emptive SMP assessments at key receptor locations, as required. The SMP activation and implementation decision tree is presented in Figure H-2.

### *Scientific monitoring program termination*

The basis of the termination process for the active SMPs (SMPs 1-10) will include quantification of impacts, evaluation of recovery for the receptor at risk and consultation with relevant authorities, persons and organisations. Termination of each SMP will not be considered until the results (as presented in annual SMP reports for the duration of each program) indicate that the target receptor has returned to pre-spill condition.

Once the SMP results indicate impacted receptor(s) have returned to pre-spill condition (as identified by Woodside) a termination decision-making process will be triggered and a number of steps will be undertaken as follows:

- Woodside will engage expert opinion on whether the receptor has returned to pre-spill condition (based on monitoring data). Subject Matter Expert (SMEs) will be engaged (via the Woodside SME scientific monitoring terms of reference) to review program outcomes, provide expert advice and recommendations for the duration of each SMP.
- Where expert opinion agrees that the receptor has returned to pre-spill condition, findings will then be presented to the relevant authorities, persons and organisations (as defined by the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulation 11A). Stakeholder identification, planning and engagement will be managed by Woodside's Reputation Functional Support Team (FST) and follow the stakeholder management FST guidelines. These guidelines outline the FST roles and responsibilities, competencies, stakeholder communications and planning processes. An assessment of the merits of any objection to termination will be documented in the SMP final report.
- Woodside will decide on termination of SMP based on expert opinion and merits of any stakeholder objections. The final report following termination will include: monitoring results, expert opinion and stakeholder consultation including merits of any objections.
- Termination of SMPs will also consider applicable management objectives, species recovery plans, conservation advices and conservations plans for any World Heritage Area (WHA), AMPs, State Marine Parks, other protected area designations (e.g., State nature reserves) and Matters of National Environmental Significance (including listed species under part 3 of the EPBC Act).

The SMP termination decision-making process will be applied to each active SMP and an iterative process of decision steps continued until each SMP has been terminated (refer to decision-tree diagram for SMP termination criteria, Figure H-3).

# SMP ACTIVATION & IMPLEMENTATION DECISION PROCESS

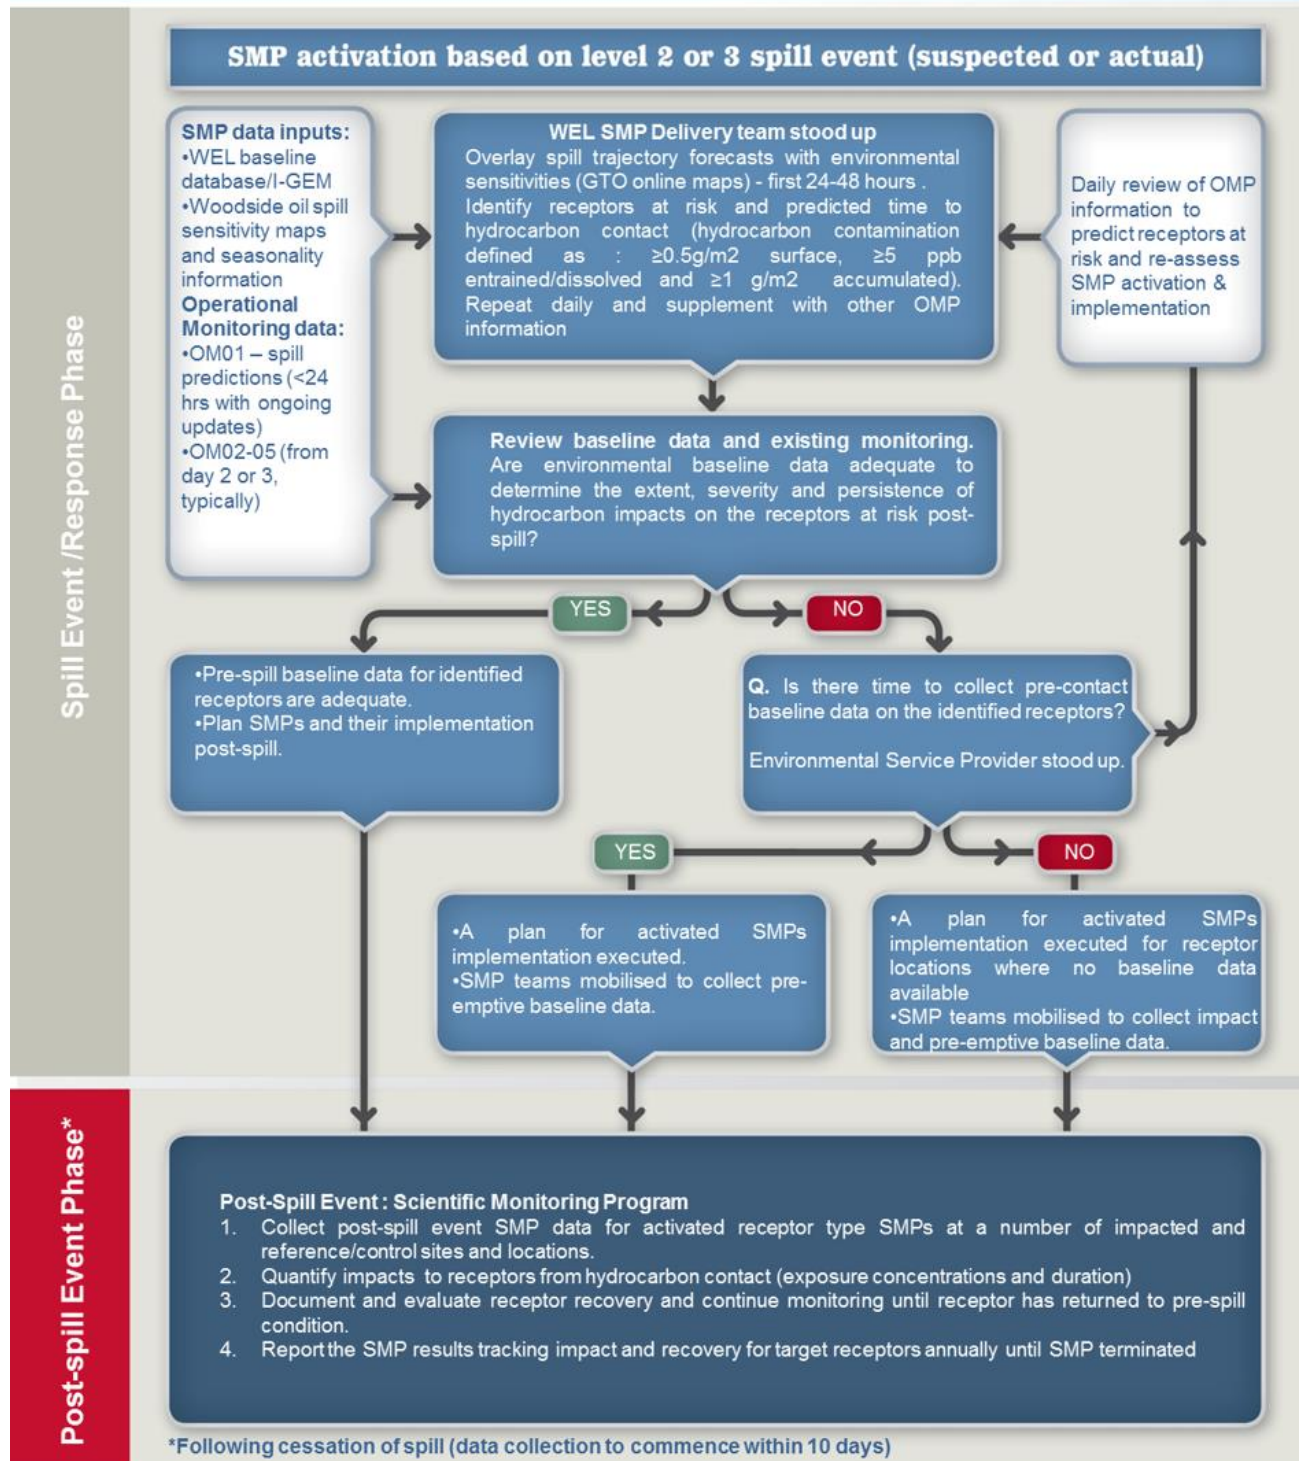

Figure H-2: Activation and Implementation Decision-tree for Oil Spill Environmental Monitoring

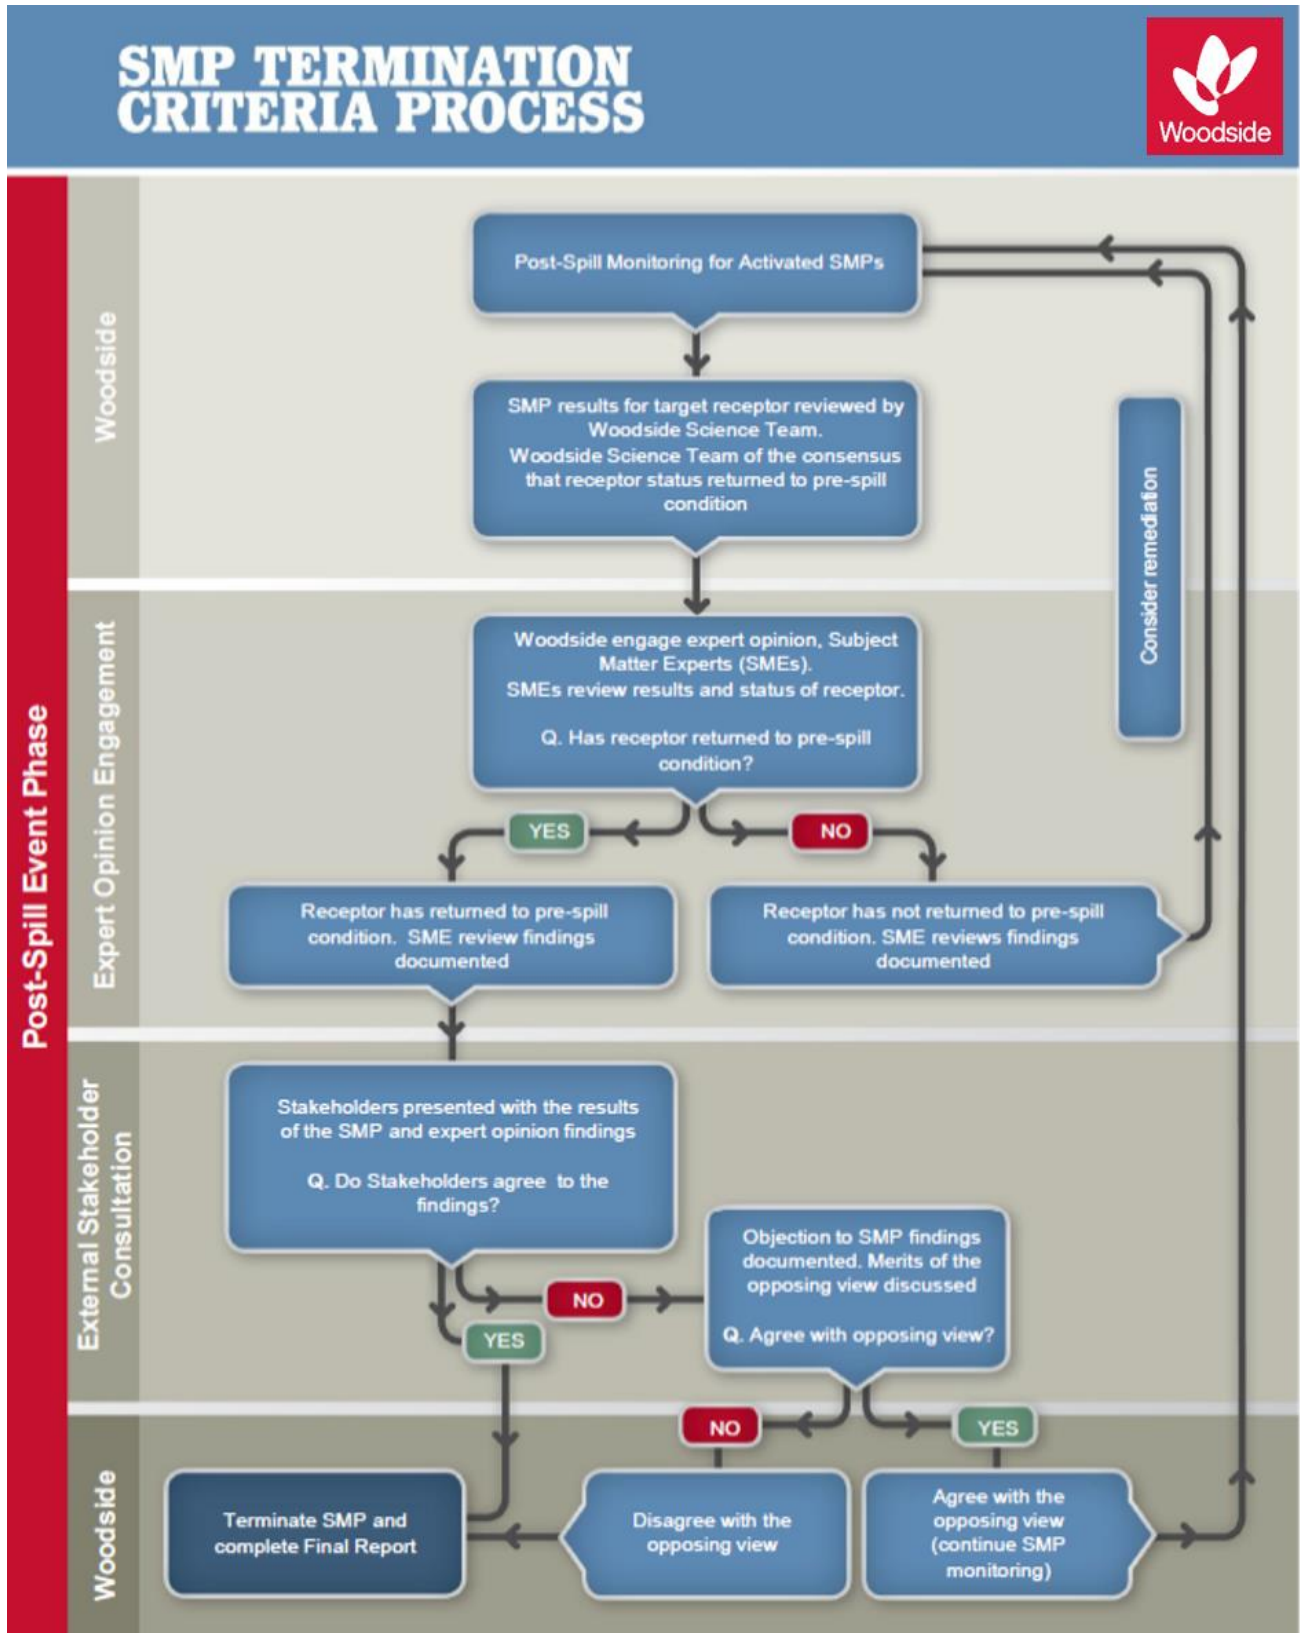

Figure H-3: Termination Criteria Decision-tree for Oil Spill Environmental Monitoring

### Receptors at Risk and Baseline Knowledge

In order to assess the baseline studies available and suitability for oil spill scientific monitoring, Woodside maintains knowledge of environmental baseline studies through the upkeep and use of its Environmental Knowledge Management System.

Woodside's Environmental Knowledge Management System is a centralised platform for scientific information on the existing environment, marine biodiversity, Woodside environmental studies, key environmental impact topics, key literature and web-based resources. The system comprises a number of data directories and an environmental baseline database, as well as folders within the 'Corporate Environment' server space. The environmental baseline database was set up to support Woodside's SMP preparedness and as a SMP resource in the event of an unplanned hydrocarbon spill. The environmental baseline database is subject to updates including annual reviews completed as part of SMP standby contract. This database is accessed pre-PAP to identify Pre-emptive Baseline Areas (PBAs) where hydrocarbon contact is predicted to occur <10 days.

In addition to Woodside's Environmental Knowledge Management System, it is acknowledged that many relevant baseline datasets are held by other organisations (e.g. other oil and gas operators, government agencies, state and federal research institutions and non-governmental organisations). In order to understand the present status of environmental baseline studies a spatial environmental metadata database for Western Australia (Industry-Government Environmental Metadata, I-GEM) was established. IGEM is a collaboration comprising oil and gas operators (including Woodside), government and research agencies and other organisations. IGEM held data were integrated into the Department of Water and Environmental Regulation (WA) Index of Marine Surveys for Assessment (IMSA)<sup>3</sup> in 2020. The Index of Marine Surveys for Assessments (IMSA) is an online portal for information about marine-based environmental surveys in Western Australia. IMSA is a project of the Department of Water and Environmental Regulation (the department) for the systematic capture and sharing of marine data created as part of an environmental impact assessment (EIA).

In the event of an unplanned hydrocarbon release, Woodside intends to interrogate the information on baseline studies status as held by the various databases (e.g. Woodside Environmental Knowledge Management System, IMSA and other sources of existing baseline data) to identify Pre-emptive Baseline Areas (PBAs), i.e., receptors at risk where hydrocarbon contact is predicted to be >10 days, and baseline data can be collected before hydrocarbon contact.

### Reporting

For the scientific monitoring program relevant regulators will be provided with:

- Annual reports summarising the SMPs deployed and active, data collection activities and available findings; and
- Final reports for each SMP summarising the quantitative assessment of environmental impacts and recovery of the receptor once returned to pre-spill condition and termination of the monitoring program.

The reporting requirements of the scientific monitoring program will be specific to the individual SMPs deployed and terms of responsibilities, report templates, schedule, Quality Assurance/Quality Control (QA/QC) and peer-review will be agreed with the contractors engaged to conduct the SMPs. Compliance and auditing mechanisms will be incorporated into the reporting terms.

Receptor areas identified as Pre-emptive Baseline Areas (based on criteria of surface contact and/or entrained hydrocarbon contact ≤10 days (Offshore Australian Marine Parks contacted by hydrocarbons in this timeframe also noted)

Receptor areas identified as Pre-emptive Baseline Areas in the response phase >10 days (based on criteria of surface contact and/or entrained hydrocarbon contact >10 days)

Receptor areas that may be identified as impact or reference sites in the event of major hydrocarbon release and would be identified as part of the SMP planning process

Table H-5: Baseline Studies for the SMPs applicable to identified Pre-emptive Baseline Areas for the Petroleum Activities Program

| Major Baseline   | Proposed Scientific monitoring operational plan and Methodology   | Ningaloo Coast and the Muiron Islands  | Rankin Bank & Glomar Shoal   | Barrow, Montebello and Lowendal Islands  | Montebello AMP   |

## **Appendix I. Cultural Heritage Search Results**

## List of Registered Aboriginal Sites

---

### Search Criteria

404 Registered Aboriginal Sites in Shapefile - Shoreline annual 10 gm2 EMBA. Warning: Search area complex so results may be inaccurate. Contact DPLH for assistance.

### Disclaimer

The *Aboriginal Heritage Act 1972* preserves all Aboriginal sites in Western Australia whether or not they are registered. Aboriginal sites exist that are not recorded on the Register of Aboriginal Sites, and some registered sites may no longer exist.

The information provided is made available in good faith and is predominately based on the information provided to the Department of Planning, Lands and Heritage by third parties. The information is provided solely on the basis that readers will be responsible for making their own assessment as to the accuracy of the information. If you find any errors or omissions in our records, including our maps, it would be appreciated if you email the details to the Department at [AboriginalHeritage@dplh.wa.gov.au](mailto:AboriginalHeritage@dplh.wa.gov.au) and we will make every effort to rectify it as soon as possible.

### South West Settlement ILUA Disclaimer

Your heritage enquiry is on land **within or adjacent to** the following Indigenous Land Use Agreement(s): South West Boojarah #2 Indigenous Land Use Agreement, Yued Indigenous Land Use Agreement.

On 8 June 2015, six identical Indigenous Land Use Agreements (ILUAs) were executed across the South West by the Western Australian Government and, respectively, the Yued, Whadjuk People, Gnaala Karla Booja, Ballardong People, South West Boojarah #2 and Wagyl Kaip & Southern Noongar groups, and the South West Aboriginal Land and Sea Council (SWALSC).

The ILUAs bind the parties (including 'the State', which encompasses all State Government Departments and certain State Government agencies) to enter into a Noongar Standard Heritage Agreement (NSHA) when conducting Aboriginal Heritage Surveys in the ILUA areas, unless they have an existing heritage agreement. It is also intended that other State agencies and instrumentalities enter into the NSHA when conducting Aboriginal Heritage Surveys in the ILUA areas. It is recommended a NSHA is entered into, and an 'Activity Notice' issued under the NSHA, if there is a risk that an activity will 'impact' (i.e. by excavating, damaging, destroying or altering in any way) an Aboriginal heritage site. The Aboriginal Heritage Due Diligence Guidelines, which are referenced by the NSHA, provide guidance on how to assess the potential risk to Aboriginal heritage.

Likewise, from 8 June 2015 the Department of Mines, Industry Regulation and Safety (DMIRS) in granting Mineral, Petroleum and related Access Authority tenures within the South West Settlement ILUA areas, will place a condition on these tenures requiring a heritage agreement or a NSHA before any rights can be exercised.

If you are a State Government Department, Agency or Instrumentality, or have a heritage condition placed on your mineral or petroleum title by DMIRS, you should seek advice as to the requirement to use the NSHA for your proposed activity. The full ILUA documents, maps of the ILUA areas and the NSHA template can be found at <https://www.wa.gov.au/organisation/departments-of-the-premier-and-cabinet/south-west-native-title-settlement>.

Further advice can also be sought from the Department of Planning, Lands and Heritage at [AboriginalHeritage@dplh.wa.gov.au](mailto:AboriginalHeritage@dplh.wa.gov.au).

### Coordinate Accuracy

Coordinates (Easting/Northing metres) are based on the GDA 94 Datum. Accuracy is shown as a code in brackets following the coordinates.

## List of Registered Aboriginal Sites

---

### Terminology (NB that some terminology has varied over the life of the legislation)

**Place ID/Site ID:** This a unique ID assigned by the Department of Planning, Lands and Heritage to the place.

#### Status:

- **Registered Site:** The place has been assessed as meeting Section 5 of the *Aboriginal Heritage Act 1972*.
- **Other Heritage Place which includes:**
  - **Stored Data / Not a Site:** The place has been assessed as not meeting Section 5 of the *Aboriginal Heritage Act 1972*.
  - **Lodged:** Information has been received in relation to the place, but an assessment has not been completed at this *stage* to determine if it meets Section 5 of the *Aboriginal Heritage Act 1972*.

#### Access and Restrictions:

- **File Restricted = No:** Availability of information that the Department of Planning, Lands and Heritage holds in relation to the place is not restricted in any way.
- **File Restricted = Yes:** Some of the information that the Department of Planning, Lands and Heritage holds in relation to the place is restricted if it is considered culturally sensitive. This information will only be made available if the Department of Planning, Lands and Heritage receives written approval from the informants who provided the information. To request access please contact [AboriginalHeritage@dplh.wa.gov.au](mailto:AboriginalHeritage@dplh.wa.gov.au).
- **Boundary Restricted = No:** Place location is shown as accurately as the information lodged with the Registrar allows.
- **Boundary Restricted = Yes:** To preserve confidentiality the exact location and extent of the place is not displayed on the map. However, the shaded region (generally with an area of at least 4km<sup>2</sup>) provides a general indication of where the place is located. If you are a landowner and wish to find out more about the exact location of the place, please contact the Department of Planning, Lands and Heritage.
- **Restrictions:**
  - **No Restrictions:** *Anyone* can view the information.
  - **Male Access Only:** Only *males* can view restricted information.
  - **Female Access Only:** Only *females* can view restricted information.

**Legacy ID:** This is the former unique number that the former Department of Aboriginal Sites assigned to the place. This has been replaced by the Place ID / Site ID.

## **Appendix J. Program of Ongoing Engagement with Traditional Custodians**

## **Proposed Program of Ongoing Engagement with Traditional Custodians**

This Program of Ongoing Engagement with Traditional Custodians (“Program”) has been developed to demonstrate Woodside’s commitment to ongoing engagement and support of Traditional Custodians’ capacity to care for and manage Country, including Sea Country, and has been directly informed by Traditional Custodians’ feedback regarding their capacity to engage and consult on Environment Plans.

It is a living document designed to evolve with ongoing consultation and feedback from Traditional Custodians and, at a minimum, will be subject to annual review. In addition to this Program, Woodside will continue to participate in, and support collective industry engagement with Traditional Owners on the development of a future, sustainable, industry wide Program. Through the Program, Woodside actively supports Traditional Custodians’ capacity for, and involvement in, ongoing engagement and feedback on environment plans.

The Program has been developed so that Traditional Custodians can, on an ongoing basis, provide Woodside with feedback relating to the possible consequences of an activity to be carried out under an environment plan on their functions, interests and activities as they relate to cultural values. This feedback will be evaluated in conjunction with Traditional Custodians and, where necessary, avoidance or mitigation strategies will be developed in collaboration with Traditional Custodians. How the Program is implemented with specific Traditional Custodians will depend on their stated needs and priorities

The Program is underpinned by Woodside’s First Nations Communities Policy ([woodside.com](http://woodside.com)), the objective of which is to ensure Woodside partners and engages with First Nations communities to create positive economic, social and cultural outcomes that leave a lasting legacy. Woodside does this through building respectful relationships and partnerships with First Nations communities where we are active, in the areas where they are most interested in. We acknowledge the unique connection that First Nations communities have to land, waters and the environment.

The Program will include, as agreed with relevant communities, reasonable commitment to:

### **1. Support for ongoing dialogue and engagement**

Woodside will support the capacity of Traditional Custodians to participate in ongoing dialogue and engagement about the environment plans and to enable the ongoing and future identification of cultural values potentially impacted by Woodside’s activities. Woodside further commits to agreeing consultation protocols with individual Traditional Custodians to ensure the material provided is appropriate in level of detail such that the potential for cultural impact from Woodside activities can be determined and as required measures can be adopted to avoid or minimise impact.

In addition, Woodside will receive feedback on cultural values from an individual person or organisation that identifies as a Traditional Custodian, at any stage during the development and implementation of activities. This feedback will be evaluated, in conjunction with the Traditional Custodian individual or group and if required, control measures will put in place to avoid impacts to cultural values, or where avoidance is not possible, to minimise and mitigate the impacts to an acceptable level.

Where cultural values are identified post activity completion, any controls relevant to value management will be implemented during the next relevant activity.

## **2. Support for the identification and recording of cultural features**

Woodside will support Traditional Custodians to record and articulate their Sea Country values and will invest in cultural assessments codesigned with Traditional Custodians, where required, to inform potential risks to cultural values from our petroleum activities.

This may include supporting cultural mapping by Traditional Custodians to identify and map significant cultural features including archaeological sites and other cultural values. The scoping of the mapping process will be codesigned with Traditional Custodians.

Woodside understands that cultural knowledge remains the intellectual property of Traditional Custodians and will agree with Traditional Custodians at the outset how that information from surveys will be used to feedback into and inform the environment plan's design and implementation.

In addition, Woodside applies the Cultural Heritage Management Procedure 2019, updated in 2023, to the Program which:

- provides a process for the identification, protection, and management of Cultural Heritage taking into account relevant standards, in particular, the United Nations Declaration on the Rights of Indigenous Peoples, the Charter for the Protection and Management of the Archaeological Heritage, the Convention for the Safeguarding of the Intangible Cultural Heritage, and the Convention on the Protection of the Underwater Cultural Heritage;
- applies to underwater cultural heritage and, consistent with current practice, provides for the commissioning of (where appropriate) both archaeological and ethnographic assessments of cultural values over the submerged landscape; and
- the process includes the following:
  - early engagement with relevant Traditional Custodians
  - identification of potential heritage, this could include desktop and field surveys undertaken with the Traditional Custodians.
- the development of cultural management strategies; and, where it is determined cultural heritage may be impacted, the development of Cultural Heritage Management Plans codesigned with Traditional Custodians and implemented by Woodside's First Nations team which:
  - focus on avoidance or minimisation of impacts; and
  - provide regular reviews and for inclusion of new information and further development of the Cultural Heritage Management Plan.

Woodside is committed to continue to receive feedback on cultural values for the life of an environment plan, the inclusion of new information and the development of avoidance or mitigation strategies in collaboration with Traditional Custodians. This information will be recorded via the Woodside Management of Knowledge Process and any potential impacts to the accepted Environment Plan evaluated via the Woodside Management of Change Process.

## **3. Building capacity for the ongoing protection of country**

Woodside will support measures to increase the capability and capacity of the Traditional Custodian groups. This is guided by Woodside's Indigenous Affairs Strategy 2019 ("Strategy"), which is designed to enable the building and maintaining of relationships with Traditional Custodians to leave a lasting legacy, including strengthening of Traditional Custodians' capacity to care for and manage Country, including Sea Country. The Strategy was developed with inputs from Traditional Custodians and contains four pillars that direct Woodside's social investment, policies relating to economic development, procurement and employment, and Woodside's agreement making and implementation of agreements. The pillars are:

1. Culture and Heritage Management: support social outcomes through protection, recognition and respect for culture and heritage;
2. Economic Participation: provide training, jobs, and business opportunities;

3. Capability and capacity: ensure strong corporate governance, leadership development and education initiatives to support self-determination; and
4. Safer and Healthier Communities: partner with Aboriginal people and service providers to maximise safer and healthier community outcomes.

Woodside is committed to an ongoing relationship between Woodside and the Traditional Custodian groups. Through consultation with Traditional Custodians Woodside will continue to:

- establish support for Indigenous ranger programs via social investment;
- establish support for Indigenous oil spill response capability via investigating training models;
- establish support for identification and recording of cultural values and the management of that information by Traditional Custodians;
- establish support for programs identified by the Traditional Custodians as important to them and as agreed by Woodside.

#### **4. Support for capacity and capability in relation to governance**

Pillar 3 of the Indigenous Affairs Strategy 2019 focuses on ensuring strong corporate governance, leadership development and education initiatives to support self-determination. To enable this, Woodside will support measures to increase the capability and capacity of the Traditional Custodian groups, including in relation to governance and management systems.

The nature of this support will be informed by the individual needs of Traditional Custodian groups, but may include:

- funding or other support for community meetings, particularly where consultation with representative bodies lies outside of that body's core business and cultural authority or mandate needs to be secured,
- resourcing internal expertise so that information is managed consistently and internally, including ensuring appropriate record keeping of consultation to provide stakeholders with a lasting record of discussions, and
- development or upgrade of IT systems to manage information.

#### **5. Program Reporting and Review of Effectiveness**

Woodside will undertake an annual review of the Program to assess its effectiveness and adapt the Program accordingly. The annual review will also include an assessment of appropriateness of the methods used to undertake ongoing consultation with Traditional Custodians.

Progress of the Program will be reported annually in line with annual sustainability reporting via the Woodside website.

## 6. Current Status

Following distribution of this proposed Program, Woodside is now participating in a number of specific ongoing consultation activities with Traditional Custodian Relevant Persons. Specific ongoing activities are tabulated below:

| <b>Traditional Custodian Relevant Person</b>             | <b>Ongoing Consultation Description</b>  | <b>Forward Plan</b>   | <b>Estimated Timeframes</b>  |
|--|--|---|--|
| Buurabalayji Thalanyji Aboriginal Corporation (BTAC)     | BTAC proposed a Collaboration Agreement in May 2023, Woodside agreed in principle, and exchanged correspondence to understand details of the proposal. The Collaboration Agreement would enable support for BTAC to undertake an ethnographic assessment to articulate values, and ensure appropriate cost recovery  | Woodside and BTAC have executed a Costs Acceptance Letter. Woodside has developed a Collaboration Agreement which is currently under internal Woodside review. Once settled internally it will be put to BTAC for their consideration.  | The draft Collaboration Agreement will be provided to BTAC for consideration in October 2023. Woodside will follow up on a monthly basis for at least six months with BTAC once they are in receipt of the draft proposed Collaboration Agreement from Woodside, or until the Agreement is in place. |
| Yamatji Marlpa Aboriginal Corporation (YMAC)             | In June 2023, YMAC provided Woodside a proposed draft Framework Agreement, and a proposal to fund in-house expertise to support consultation and implement the Collaboration Framework.<br>In July 2023, Woodside agreed in principle to the proposed Collaboration Framework and the funding proposal and requested a meeting to work together on details. Woodside provided the Proposed Program of Ongoing Consultation to complement the proposed Collaboration Framework. | Woodside will continue to communicate with YMAC, seeking to collaborate and reach agreement on the proposed Collaboration Framework and funding agreement. At the point of EP submission, Woodside is seeking a meeting with YMAC at YMAC's earliest convenience.   | Woodside will follow up with YMAC on a monthly basis for at least six months, seeking to progress the Collaboration Framework and funding agreement.   |
| Wirrawandi Aboriginal Corporations (WAC)                 | In August 2023, WAC proposed a Framework Agreement with Woodside to provide a streamlined, formalised approach to consultation between WAC and Woodside. Woodside has confirmed receipt of the proposed framework from WAC.  | Woodside is in contact with the WAC CEO and is currently developing a response to the proposed Framework Agreement put forward by WAC. WAC do not object to Woodside progressing environmental plans on the proviso that both parties enter into an Agreement suitable to each party. WAC have suggested a timeframe to settle the Agreement over the next 2-3 months. Woodside will be aiming to reach agreement within a shorter timeframe. | Ongoing Framework Agreement settled in 2023.   |
| Ngarluma Aboriginal Corporation (NAC)                    | In September 2023, NAC proposed a Joint Working Group to practically manage consultation processes. It was proposed that the group would meet monthly for 2023 and quarterly thereafter, meetings would include NAC CEO and NAC Directors and potentially independent SME/s, the proposal was that Woodside draft a Framework Agreement, and included a request for funding for this approach. Woodside provided in-principle support for the proposal.                        | Woodside has provided in-principle support for NAC's proposal and is currently developing a draft Framework Agreement which once settled internally will be sent to NAC for their response.   | In accordance with NAC's proposed timeframe, Woodside aims to prepare a draft Framework Agreement, settle internally and then meet to discuss in 2023.   |
| Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC) | In a meeting during August 2023, NTGAC proposed a Framework Agreement. This included terms for ongoing   | Woodside and NTGAC/YMAC have agreed in writing to develop a Framework Agreement. Woodside have been responding to queries from NTGAC who have passed  | Woodside will follow up with NTGAC on a monthly basis for at least six months, seeking to  |

|  |  |   |   |
|--|--|---|---|
|  | engagement such as frequency of consultation, participation, and content. NTGAC has also requested Woodside provide funding for an in-house environmental scientist to review material. Woodside agreed in principle to this approach, and has requested a first draft of the Framework Agreement for consideration. Woodside have agreed to pay for YMAC's in-house scientist to attend NTGAC meetings to advise NTGAC. | information provided by Woodside onto their Environmental Scientist. Woodside are awaiting a proposed draft of a Framework Agreement and general report. YMAC's preference is to prepare the drafts, Woodside have offered to assist with drafting and remain ready to respond on receipt of documents.   | progress the Framework Agreement and General report.  |
| Yinggarda Aboriginal Corporation (YAC)                   | In August 2023, YAC requested Woodside provide a draft Framework Agreement for their consideration. Woodside has provided a draft Framework Agreement to YAC for review.   | Woodside's Proposal suggests meeting with YAC every 3 months to progress matters. The Proposal suggests committing to work continuing between meetings with each party nominating focal points. A Scope of Work and schedule of rates is included to re-imburse the cost of ongoing consultation. Woodside's Proposal includes timeframes for anticipated milestones and has suggested the Proposal be in place for an initial 2-year period. Woodside has provided the draft Framework Agreement to YAC; they have advised that they will seek direction from the YAC Board on the proposal. | Woodside will continue following up with YAC on a monthly basis for at least six months, seeking to progress the Framework Agreement. |
| Robe River Kuruma Aboriginal Corporation (RRKAC)         | RRKAC have noted that they are insufficiently resourced to engage further and respond to Woodside regarding EPs. Woodside assesses that a Framework Agreement could address this.  | Woodside has on several occasions written to RRKAC offering to fund consultation meetings. Woodside will offer RRKAC a Framework Agreement which will propose funding, scope of work and timeframes to assist with consultation and ongoing consultation. If RRKAC are open to the proposal, it is intended to put forward a draft Framework Agreement to RRKAC within the next 2 months.   | Woodside will follow up with RRKAC monthly for at least six months, seeking to progress a Framework Agreement.                        |
| Ngarluma Yindjibarndi Foundation Limited (NYFL)          | NYFL and Woodside have an existing Agreement in place which enables quarterly communication about Woodside activities. NYFL has said they are working with other First Nations organisation and representative Bodies developing a Framework Agreement.  | Woodside has not yet seen a draft of the Framework Agreement. Woodside's expectation is that it will outline principles of engagement, details of resourcing, timeframes to meet agreed outcomes etc. Woodside look forward to receiving a draft Agreement and will engage with NYFL to settle on the details of any proposal.  | Woodside will continue to follow up monthly with NYFL for at least six months, seeking to progress a Framework Agreement.             |
| Kariyarra Aboriginal Corporation (KAC)                   | In September 2023 KAC proposed an agreement which would include meeting arrangements, ongoing consultations, specialist advice and contact protocols.  | Woodside support funding request that are reasonable and will seek to reach agreement on a funding proposal put forward by KAC. Woodside agrees that a Framework Agreement is a sound tool to set out ongoing consultation with KAC, funding arrangements and social investment opportunities that KAC would want explored. Woodside will propose a first draft of an agreement and put to KAC in the first instance. Woodside will prepare a draft agreement within the next two months to for KAC's consideration.  | Woodside will continue to follow up monthly with KAC for at least six months, seeking to progress a Framework Agreement.              |
| Bardi and Jawi Niimidiman Aboriginal Corporation (BJNAC) | In June 2023, BJNAC provided Woodside a draft resourcing protocol for consultation. Woodside noted that the draft protocol was drafted with a focus on land based activities that fall within the BJNAC native title determination, as opposed to offshore activities. In October 2023, BJNAC and Woodside met to review the resourcing protocol, which  | Woodside supports funding request that are reasonable.. Woodside agrees that the resourcing protocol is a sound tool to set out ongoing consultation with BJNAC, funding arrangements and employment, training and contracting  | Woodside will continue to follow up monthly with BJNAC for at least six months, seeking to progress a Resourcing Protocol.            |

|  |  |  |  |
|--|--|--|--|
|  | resulted in some small changes being agreed. BJNAC and Woodside agreed that both organisations were on the same page for ongoing consultation. | opportunities that BJNAC want to explore. Woodside is awaiting BJNAC's revised protocol. |  |
