	2/08/2023 11:04	Inbound Email	(SNZ-01 Xen)	Response email providing Tuna Australia as the avenue for consultation.	Tuna Australia as the avenue for consultation, with contact details for CEO included.	Response as logged in CM

	10/08/2023 4:06	Outbound Email	(SNZ-02 Xen)	Communications between licensed fisher, and consulting with Tuna Australia as a Relevant Person due to their role as a peak industry body.	Received notification regarding a consultation process around Environmental Plans to be submitted to NOPSEMA around the end of August in regard to the Bee Hive Project. Welcome the opportunity for the fishing industry to consult directly with yourselves. The correct and only industry empowered body to consult directly with you on behalf of the members of the Western Tuna and Bill Fish fishery is TUNA AUSTRALIA. For everybody's best outcomes working with TUNA AUSTRALIA is the most efficient way for our industry to engage in any consultative process and urge you to contact them directly.	Thank you for your response. In addition to reaching out to licensed fishers like yourself directly, we are already consulting with Tuna Australia as a Relevant Person due to their role as a peak industry body. Relay any questions, comments, or concerns about the Beehive project directly to us or via Tuna Australia as you see fit.

Member of Public 1	8/03/2023 10:31	Inbound Phone Call		Inbound phone call requesting more information regarding the longitude and latitude of the Beehive Activity.	Stakeholder called after seeing the EOG Public Notice at Cullen Bay Marina and has requested more information regarding the longitude and latitude of the Beehive Activity. Stakeholder and his wife are yachties and plan to do a trip into the Joseph Bonaparte Gulf from around April 2023 to around August 2023 and wanted to confirm where our activities are so as they can be out of the way.	Verbally mentioned the activities are unlikely to occur during the stated period however we would email information to confirm longitude and latitude and details of the project as they become available. Stakeholder provided email address for communication.														
	24/03/2023 8:17	Outbound Email	(COLR-01 Xen)	Provision of information in relation to Beehive Activity as requested in phone call 8/3/23.	N/A	Thank you for your interest in the EOG Beehive project. My understanding is that you have requested the longitude and latitude of the Beehive Activity as you will be within the Joseph Bonaparte Gulf between April and August 2023. Please see the requested information below, which represents the maximum extent of the proposed activities (Geotech or Drilling): <table border="1"> <thead> <tr> <th>Point</th> <th>Latitude</th> <th>Longitude</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>-14° 00' 13.06"</td> <td>128° 32' 39.75"</td> </tr> <tr> <td>2</td> <td>-14° 00' 13.44"</td> <td>128° 36' 18.78"</td> </tr> <tr> <td>3</td> <td>-14° 04' 22.99"</td> <td>128° 36' 18.35"</td> </tr> <tr> <td>4</td> <td>-14° 04' 22.60"</td> <td>128° 32' 39.26"</td> </tr> </tbody> </table> As noted during the call with our representative, EOG is unlikely to have any activities during the time period you have inquired about. If that is to change, we would be able to notify you at your specified contact details. In addition, a Notice to Mariners would be issued through the relevant government agencies advising of a 500 m exclusion zone around any activity vessel(s) shortly prior to and during an activity period. Note: you may request that information you provide during the consultation not be made publicly available. That information must still be included in the environment plan submitted to NOPSEMA as sensitive information but will be excluded from information published on NOPSEMA's website. * The Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (including the definitions, sections 9(8), and 11A(4)) indicate that, if requested, information that you or your organization provides, along with personal information, will be considered "sensitive information". Environment plans published by NOPSEMA on its website do not include any information deemed as sensitive. Project updates can also be found on the EOG website: https://www.eogresources.com/australia	Point	Latitude	Longitude	1	-14° 00' 13.06"	128° 32' 39.75"	2	-14° 00' 13.44"	128° 36' 18.78"	3	-14° 04' 22.99"	128° 36' 18.35"	4	-14° 04' 22.60"
Point	Latitude	Longitude																		
1	-14° 00' 13.06"	128° 32' 39.75"																		
2	-14° 00' 13.44"	128° 36' 18.78"																		
3	-14° 04' 22.99"	128° 36' 18.35"																		
4	-14° 04' 22.60"	128° 32' 39.26"																		
	23/05/2023 23:32	Outbound Email	(COLR-02 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance. Seafarms Group Limited	25/03/2022 0:00	Outbound Email	(SGL-01)	EOG emailed Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A
	31/03/2022 0:00	Outbound Phone Call	N/A	EOG called SGL to see if they received email 25-Mar-22 and left message to return call. SGL returned call and stated it was not received and provided alternative email address to send through the Drilling Flyer 3.	No concerns raised.	N/A
	4/04/2022 0:00	Outbound Email	(SGL-02)	EOG emailed SGL the Information Flyer 3 to notify the stakeholder of the Beehive-1 exploration well drilling program as requested.	No concerns raised.	N/A
	4/04/2022 0:00	Inbound Email	(SGL-03)	SGL replied to EOG with thanks and noted that that their company concern would only relate to any event which could jeopardise sea water quality. Ballast water exchange, oil / fuels spills or any pollution would probably be the issues of greatest risk concern, indicating to EOG the importance of mitigating these risks in the planning of the project.	SGL noted that that their company concern would only relate to any event which could jeopardise sea water quality. Ballast water exchange, oil / fuels spills or any pollution would probably be the issues of greatest risk concern, indicating to EOG the importance of mitigating these risks in the planning of the project.	Refer email dated 9-Apr-22.
	9/04/2022 0:00	Outbound Email	(SGL-04)	EOG responded to SGL concerns in email dated 4-Apr-22.		We understand your concerns regarding the potential for water pollution in the event of a hydrocarbon spill as the Beehive-1 site is located about 130 km northwest of the entrance to Forsyth Creek. Hydrocarbon spills, whether they be diesel from vessels or crude oil from a well, are extremely rare events during exploration drilling. Notwithstanding this, EOG is putting significant effort into the preparation of the oil spill environmental risk assessment for the Beehive-1 drilling Environment Plan (EP). We are also progressing plans for the preparation of the Oil Pollution Emergency Plan (OPEP) and Operational and Scientific Monitoring Program (OSMP), which describe the processes in place to respond to a hydrocarbon spill and what measures will be in place to monitor the environmental and socio economic impacts of a spill. So we can better the potential risks to your planned Sea Dragon project, could you please inform when the project is scheduled to become operational and confirm the project location (our review of your EPBC Referral indicates the grow out ponds are located adjacent to Forsyth Creek) so we can nominate the water intake area as a priority protection site in the event of a spill? With your permission, we will add your contact details to our contact directory as a stakeholder to call in the event of a spill. Are your details the best to include, or are there others we should include?
	12/05/2022 0:00	Outbound Email	(SGL-05)	EOG emailed Information Flyer 4 with an update on the PDSA phase and invited return comment. The flyer also notified that the Drilling EP was available on NOPSEMA's website for public exhibition for 30 days, until 8th June 2022.	No concerns raised.	N/A
	27/06/2022 0:00	Outbound Email	(SGL-06)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A

Eni Australia B.V.	18/09/2021 0:00	Outbound Email	(ENI-01)	EOG emailed Flyer 1.	No concerns raised.	N/A
	4/10/2021 0:00	Inbound Email	(ENI-02)	ENI responded with options for a call with EOG to discuss the activity.	No concerns raised.	N/A
	4/10/2021 0:00	Outbound Email	(ENI-03, ENI-04 & ENI-05)	EOG responded to ENI to confirm whether the discussion would be fairly high level (2 or 3 persons) or more in-depth requiring Beehive and Blacktip team members and confirmed 9am Perth 6 Oct of meeting.	No concerns raised.	N/A
	4/10/2021 0:00	Inbound Email	(ENI-03, ENI-04 & ENI-05)	ENI replied to EOG confirming their meeting would be high-level and a calendar invite would be sent for 9am 6th Oct Perth time.	No concerns raised.	N/A
	6/10/2021 0:00	Public / Group Meeting	N/A	EOG and Eni introductory meeting via online meeting to describe the PDSA activity. EOG confirmed that activities over the gas pipeline would be minimised or avoided. EOG requested the pipeline coordinates so that accurate mapping of the pipeline in relation to the PDSA area could be undertaken. EOG thanked Eni for the introductory meeting and requested the detailed pipeline coordinates. EOG asked Eni if they had any formal comments on the proposed activity or information flyer and requested that any comments be made via email.	No concerns raised.	EOG comments: * Confirmed that activities over the gas pipeline would be minimised or avoided. * Requested the pipeline coordinates so that accurate mapping of the pipeline in relation to the PDSA area could be undertaken. * Asked Eni if they had any formal comments on the proposed activity or information flyer and requested that any comments be made via email.
	6/10/2021 0:00	Outbound Email	(ENI-03, ENI-04 & ENI-05)	EOG emailed ENI with thanks for the introductory meeting and looked forward to receiving the detailed pipeline coordinates. EOG asked ENI if they had any formal comments on the proposed activity or information flyer and requested that any comments be made via email.	No concerns raised.	N/A
	19/10/2021 0:00	Inbound Email	(ENI-06)	ENI emailed EOG the Blacktip gas export pipeline alignment sheets. ENI mentioned there were no technical concerns from them.	ENI response to meeting: * Provided gas export pipeline alignment sheets. * Confirmed there were no technical concerns from ENI.	N/A
	10/11/2021 0:00	Outbound Email	(ENI-07)	EOG emailed ENI to follow-up on request for a pipeline layout shape file and to also provide an EOG update on timing of the PDSA activities and to confirm the PDSA activity area has been officially reduced and no longer overlaps the Blacktip gas pipeline (the outline is ~1.4 km away from the pipeline at its closest point). An updated map was provided. EOG also requested any updates from ENI regarding the Blacktip drilling activity.	No concerns raised.	N/A
	2/12/2021 0:00	Outbound Email	(ENI-08)	EOG emailed Information Flyer 2 to notify ENI that the PDSA EP was now available for public exhibition and comment on the NOPSEMA website and the latest updates to the EP.	No concerns raised.	N/A
	28/02/2022 0:00	Outbound Email	(ENI-09)	EOG emailed Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A
	28/02/2022 0:00	Inbound Email	(ENI-10)	ENI notified EOG of change of contacts going forward.	No concerns raised.	N/A
	12/05/2022 0:00	Outbound Email	(ENI -11)	EOG emailed Information Flyer 4 with an update on the PDSA phase and invited return comment. The flyer also notified that the Drilling EP was available on NOPSEMA's website for public exhibition for 30 days, until 8th June 2022.	No concerns raised.	N/A
	27/06/2022 0:00	Outbound Email	(ENI -12)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A
	23/11/2022 0:00	Outbound Email	(ENI-13 Xen)	Email sent by EOG to Eni Australia providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	23/11/2022 0:01	Outbound Email	(ENI-14 Xen)	Received undeliverable notice for one of the ENI contacts and have removed that email address from profile. Email was also sent to the other ENI contact.	No concerns raised.	N/A

	23/05/20 23 14:17	Outbound Email	(ENI-15 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A		<ul style="list-style-type: none"> * Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.

30/07/2023 23:14	Inbound Email	(ASC-02 Xen)	Feedback to May 2023 Beehive Project Update.	Thank you for the opportunity to review and comment. I'm sorry about the delay getting back to you but we are currently reviewing EOG Resources proposal and expect to get something back to you by 17 August.	N/A	
4/08/2023 22:18	Outbound Email	(ASC-03 Xen)	Acknowledgement of feedback to May 2023 Beehive Project Update.	N/A		Thank you for the response. We will be looking forward to any feedback you have to provide by 17 August.
17/08/2023 16:23	Outbound Phone Call		Follow up phone call. Contact person had just landed in Broome. Does have feedback and can call back at another time, but will also submit feedback through email. I said I was happy to take a call if needed but advised email is a good way to respond also.	Does have feedback and can call back at another time, but will also submit feedback through email.	N/A	
2/11/2023 0:21	Outbound Email	20231102	Follow up email sent to a numerous RPs notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A		N/A
1/11/2023 21:22	Inbound Email	ASC-04 Xen	ASC have provided advice about their interests related to sea country and their shareholders and asked four questions in relation to: 1. the process for reporting accidental waste discharge 2. the process for reporting damage to sea life on the sea floor 3. what opportunities are available for sea rangers on the project 4. what opportunities to work with ASC on the project	N/A		N/A
24/11/2023 9:20	Outbound Email	ASC-05 Xen	Email contained responses to each of the four questions from the ASC email of 1 November 2023. 1. Numerous controls are in place to prevent accidental discharge of waste. Description of incident reporting and investigation are contained in Section 10.7 of the Drilling EP and Section 8.7 of the Geotech EP and a table is included in the response. Also identifies the process by which EOG would report an incident to appropriate stakeholders. 2. Identifies how damage to sea life is described in the relevant sections of each EP, that it's considered a reportable incident and the ways in which it will be reported under the different jurisdictions and statutes. 3. Opportunities for Sea Rangers may arise in the unlikely event of an unplanned incident. 4. EOG would need to know the capabilities and equipment of the ASC in order to identify opportunities to work together.	N/A		N/A
Ardyaloon Inc. 31/05/2023 10:35	Outbound Phone Call		Arrangements and requirements for information session on 8/6/23.	N/A		Called Ardyaloon office to check on requirements to come into the community for information session on 8/6/23. Was asked to send email with details which and email address was provided.
31/05/2023 10:40	Outbound Email	(ARDY-01 Xen)	Arrangements and requirements for information session on 8/6/23.	N/A		I just called the Ardyaloon office and they have asked me to send you a note. As you would be aware, representatives for EOG Resources will be in Ardyaloon next Thursday 8 June 2023 for an Information Session at the Bardi Hall for their Beehive Project in the Joseph Bonaparte Gulf. There will be 5 representatives from EOG Resources. We will come to the Ardyaloon Office to sign in on arrival to Ardyaloon at around 8am before going to the Bardi Hall for the Information Session from 9am – 12pm that was booked for us. In addition, I just wanted to check if we require the Permit via Department of Planning, Lands & Heritage. I applied for the permit on 18 May 2023 and when I followed up with the department this week, they said they were awaiting approval to issue the Permit. If the Permit is required, are you able to assist us with obtaining that approval or point us in the right direction so as the Permit can be issued. If you need any clarification or have any questions, please email or call me.
13/07/2023 12:39	Inbound Email	(ARDY-02 Xen)	Arrangements and requirements for information session on 8/6/23.	Thanks for your email & info. The community office opens at 8:30 am. You can each sign in electronically by texting name & organisation to the following number. I have attached a copy of our community protocols that may be of some help to you during your visit.	N/A	
8/06/2023 9:00	Public / Group Meeting	Public Information Session Ardyaloon	Ardyaloon Community Information Session - 2 Attendees on behalf of Ardyaloon Inc. Feedback was provided to assist with preparation of EP. Issues discussed were related to general questions or concerns about overall industry impacts of all proponents rather than with respect to EOG's project.	* EOG's project was noted as being far away so discussion was focused on what they are concerned about in general, not raised as concerns related to EOG's project. * Seismicity - would the operation lead to an increase in seismic activity in the area? If the resource is being removed from the subsurface, might this lead to problems in the future? * Fresh water supply (underground aquifer) - would operations have any impact on local fresh water supply in underground aquifers? * Increased air traffic (collision potentials) - would the operations increase air traffic activity and associated risks? Could this potentially overburden Emergency services in the area? * Hunting resources - could an event impact freshwater hunting resources - "this is our food bowl". This includes sea country for fishing and dugong and turtle (including cultural significance of the resources). * Economic benefit - the project is offshore, so they see no direct economic benefit. The project is too small and too far away. Some potential for economic activity associated with Djarindjin Community Airport refuelling. * Other proponents previously came as they may have gas pipeline and risks to mitigate for this community.		* Beehive Project information provided and discussed with attendees with responses given to answer the questions asked.

					* Due to the lack of proximity and that our project is offshore, the interest level in this community is low and there is likely to be more interest in Wyndham.	
	27/11/2023 10:45	Outbound Email	ARDY-04 Xen	Follow up email confirming projects have not changed since June information sessions and providing opportunity and means to consult by 11 December. Also providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A
Arnhem Land Aboriginal Land Trust	26/08/2022 0:00	Outbound Email	(ALALT-01 Xen)	Email sent by EOG to Arnhem Land Aboriginal Land Trust C/ Northern Land Council providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information will be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(ALALT-02 Xen)	Email sent from EOG to Arnhem Land Aboriginal Trust C/ Northern Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin. NB: Incorrect subject line of email. Should read: "Meeting with Northern Land Council request to CEO".	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
	8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly. I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.
	9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
	19/05/2023 14:17	Outbound Email	(ALALT-03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.

Balanggarra Aboriginal Corporation	21/09/2021 0:00	Outbound Email	(BAC-01)	EOG emailed Flyer 1.	No concerns raised.	N/A
	6/10/2021 0:00	Outbound Phone Call	N/A	EOG spoke to BAC who confirmed BAC CEO is in a forum but has received the email. EOG thanked BAC and reiterated that any comments from BAC CEO would be welcome in writing.	No concerns raised.	N/A
	2/12/2021 0:00	Outbound Email	(BAC-02)	EOG emailed Information Flyer 2 to notify BAC that the PDSA EP was now available for public exhibition and comment on the NOPSEMA website and the latest updates to the EP.	No concerns raised.	N/A
	28/02/2022 0:00	Outbound Email	(BAC-03)	EOG emailed Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A
	12/05/2022 0:00	Outbound Email	(BAC-04)	EOG emailed Information Flyer 4 with an update on the PDSA phase and invited return comment. The flyer also notified that the Drilling EP was available on NOPSEMA's website for public exhibition for 30 days, until 8th June 2022.	No concerns raised.	N/A
	13/05/2022 0:00	Outbound Phone Call	N/A	EOG called BAC via mobile and left a voice message asking if they had received the drilling Flyer 3 and if they had any feedback to provide in writing or call EOG.	No concerns raised.	N/A
	16/05/2022 0:00	Inbound Email	(BAC-05)	BAC CEO emailed EOG concerned about the project occurring off the coastline of BAC Country. BAC CEO stated "As previously flagged, our group hold exclusive possession native title rights in this area. Any oil spill or related pollution would severely damage our coast, which including important cultural sites as well as a number of tourism endeavours run by Balanggarra people. We would like to understand in detail how EOG plans to manage any risks to the Kimberley coastline as well as any plans that the company has to share its plans and proposals for co-management with our community."	BAC concerns: * Beehive-1 project occurs off the coastline of its Country. * BAC holds exclusive possession Native Title rights in this area. Any oil spill or related pollution would severely damage the coast, including important cultural sites as well as a number of tourism endeavours run by the Balanggarra people. * The Corporation would like to understand EOG's plans to manage any risks to the Kimberley coastline and any plans or proposals by EOG to be shared with the Corporation for co management with the Balanggarra community.	Refer to email dated 24-May-22.
	24/05/2022 0:00	Outbound Email	Email (BAC-06)	EOG responded to the BAC's concerns and provided a copy of the OPEP, OSMP and Drilling EP in relation to prevention of and response to an oil spill. EOG welcomed the opportunity to work with the Corporation to co-manage any shoreline spill response.	No concerns raised.	EOG response: * Provided a copy of the OPEP, OSMP and Drilling EP in relation to prevention of and response to an oil spill. * EOG welcomed the opportunity to work with BAC to co-manage any shoreline spill response.
	3/06/2022 0:00	Outbound Phone Call	(BAC-07 & BAC-08)	EOG called the BAC's CEO to discuss his concerns, who confirmed that the documents issued on 24th May were received. EOG summarised the conversation including a request for a meeting and sent this to the BAC via email. Subsequently, an in person meeting with the CEO has been scheduled for late July 2022 via additional email.	The BAC CEO comments: * Concerned that there had been no formal approach or notifications to Aboriginal organisations in the region, as would happen under the state processes. * The Balanggarra community is concerned about potential impacts from an oil spill. * Explained that engagement with Aboriginal communities needs to go beyond simple notifications and should involve face-to-face meetings with the proponent. * Stated that as there are low literacy levels, presentations should be made in a form that is easy to understand. * Explained the Balanggarra have an important connection to the country, including coastal and marine areas, and see an oil spill as potentially existential. * The Balanggarra Marine Rangers have been involved in a number of projects in the region, including on important habitat for dugongs and snubfin dolphins. * The Balanggarra are keen to explore small scale tourism in the region with a focus on	EOG summarised the conversation in an email including a request for a meeting. An in person meeting with the CEO was scheduled for late July 2022.

				marine and coastal areas.	
27/06/2022 0:00	Outbound Email	(BAC-09)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A
30/06/2022 0:00	Outbound Email	(BAC-10)	EOG requested an introductory meeting by sending formal letter via email to BAC CEO & confirmed the date for the meeting via phone call on 29-Jul-22 in a follow up email.	No concerns raised.	N/A
5/07/2022 0:00	Outbound Phone Call	N/A	EOG called BAC CEO and apologized for EOG's delayed response in reaching out directly per previous conversations with EOG. Advised BAC CEO that we would like to set up an introductory in person meeting in Australia in relation to EOG's consultations with the Balanggarra Aboriginal Corporation. BAC CEO expressed appreciation for the phone call and was glad to take my call and further advised an in-person meeting is greatly appreciated and welcomed as it is preferred to consult directly with the company then a third-party representative. Meeting for 29-Jun-22 in Perth. BAC CEO was kind enough to offer securing meeting space and confirming the meeting time. BAC CEO explained they have some concerns with the project. EOG advised that they are happy to listen to the concerns as part of the consultation process. BAC CEO advised it would be a good idea for EOG to visit Kununurra. EOG advised they had plans to and would welcome any suggestions BAC has to incorporate into EOG visit. BAC CEO did offer that it would be wise to meet with a few of the elders on the BAC board while in the community and BAC CEO will help to arrange that. BAC CEO did advise that when writing or speaking it is preferred to use Indigenous rather than Tribal.	Need further information on the project.	Meetings being arranged for Perth with BAC CEO followed by meeting in Kununurra with BAC Board.
5/07/2022 0:00	Outbound Email	(BAC-11)	EOG & BAC CEO continue to discuss details for meeting.	No concerns raised.	N/A
1/08/2022 10:00	In Person Meeting	(BAC-20 Xen)	Meeting held with Balanggarra Aboriginal Corporation to provide Beehive Project Information to engage and seek feedback with the group and members that may be affected by our Beehive Project in the Joseph Bonaparte Gulf.	Information not publicly available.	N/A
10/08/2022 0:00	Outbound Email	(BAC-12)	EOG expressing gratitude for face to face meeting. Advising plans will be provided soon and inviting thoughts or comments at any time.	No concerns raised.	N/A
16/08/2022 0:00	Outbound Email	(BAC-13)	Advising plan will sent before end of week. Suggesting next face to face meeting during week beginning 5-Sep-22, requesting preferred date.	No concerns raised.	N/A
26/08/2022 0:00	Outbound Email	(BAC-12 Xen)	Email sent by EOG to BAC. Please find attached information flyer as requested pertaining to the Beehive offshore project. As we discussed if you would be so kind to provide the address for the office in Kununurra in which to have the printed copies delivered we will have them sent right away. Looking forward to meeting with the board on September 7th, 2022. Also advised how sensitive information would be handled.	26/8/22 - Email (1) response from BAC. If you can send the flyers to (address provided) that would be great. 26/8/22 - Email (2) response from BAC. Would it be ok to share this document with MG Corp as the other potentially affected native title holding body?	29/8/22 - Email (1) response from EOG. We are happy to put together the information to further the understanding of EOG's project. As discussed 20 copies will be sent to the address provided. As always if at any time there are questions or you need additional information please don't hesitate to reach out. 29/8/22 - Email (2) response from EOG. Thank you kindly for offering to send this on to MG Corp, please know that EOG has been in contact with them and if requested will provide the same material but tailored to the MG Corp. If you have frequent chats with the MG Corp please feel free to let them know what we have done for the BAC and if you have found it to be helpful please feel free to suggest they reach out to EOG. 30/8/22 - 20 Copies of Beehive Flyer sent via Express Post to address supplied.
7/09/2022 10:30	In Person Meeting	(BAC-16 Xen)	Meeting held with Balanggarra Aboriginal Corporation to provide Beehive Project Information to engage and seek feedback with the group and members that may be affected by our Beehive Project in the Joseph Bonaparte Gulf.	Information not publicly available.	N/A
15/09/2022 0:00	Outbound Email	(BAC-14 Xen)	Email sent by EOG to BAC CEO. Many thanks to you and the board for welcoming the EOG team to the BAC board meeting on September 7th, 2022 in Kununurra. The time you all spent with us to collaborate about our project and ask questions was very much appreciated. I am following up to see if there are any items EOG needs to address as a result of the board discussion following our meeting? We discussed the BAC providing information about the coastal marine ranger program, can you please send that over? Please note that in line with regulation 9 (8) of the Offshore Petroleum and Greenhouse Gas (Environment) Regulations 2009, correspondence between EOG and you or your organization must be provided to NOPSEMA with the EPs sensitive information (i.e., not publicly available).	No concerns raised.	EOG followed up on the meeting on September 7th, 2022 in Kununurra to see: * If there are any items EOG needs to address as a result of the board discussion following the meeting? * Following up on BAC providing information about the coastal marine ranger program as discussed in meeting.
16/09/2022 0:00	Outbound Phone Call	(BAC-13XEN)	EOG attempted to call BAC CEO. No answer. Left message.	No concerns raised.	N/A
28/10/2022 0:00	Outbound Email	(BAC-15 Xen)	Email sent from EOG to BAC CEO as follow up from meeting with BAC Board 7/9/22 in Kununurra, providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
5/12/2022 0:00	Inbound Email	(BAC-18 Xen)	Email from BAC CEO advising he is finishing up as CEO at BAC on 16 December and that Balanggarra's directors are currently reviewing management arrangements moving forward.	No concerns raised.	N/A
17/12/2022 0:00	Outbound Email	(BAC-17 Xen)	Email from EOG to BAC CEO wishing BAC CEO all the best for new endeavours. Email also provided BAC the last few emails and information that was sent on to BAC CEO for their information, stated that EOG is looking forward to continued engagement with BAC and that we are happy to answer any outstanding questions if there are any and made comment on how sensitive information will be handled.	No concerns raised.	N/A
18/05/2023 23:20	Outbound Email	(BAC-19 Xen)	Beehive Project Update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's.

24/11/2023 9:13	Outbound Email	20231124 Email Close Out November 2023	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A		N/A
Bardi & Jawi Niimidiman Aboriginal Corporation	26/08/2022 0:00	Outbound Email	(BJNAC-01 Xen)	Email sent by EOG to Bardi and Jawi Niimidiman Aboriginal Corporation providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(BJNAC-02 Xen)	Email sent from EOG to Bardi and Jawi Niimidiman Aboriginal Corporation providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	13/02/2023 19:53	Outbound Email	(BJNAC-03 Xen)	Arranging meeting with Bardi & Jawi Niimidiman Aboriginal Corporation.	N/A	Thank you for taking my call earlier today and for the quick chat. Bardi and Jawi Niimidiman Aboriginal Corporation may have been sent communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As we discussed, this may have been sent to Kimberley Land Council rather than direct. As part of the process for developing an Environmental Plan, the Aboriginal groups along the Kimberley coastline just north of Broome onwards, including Bardi and Jawi Niimidiman AC, have been identified relevant organisations that may have interest in the project. Although the project is in the Joseph Bonaparte Gulf, the project has a spill-zone Environment that May Be Affected (EMBA) that stretches along the coastline. EOG would like to organise a brief meet and greet in Broome to establish relationships in the area. We will be in Broome on Wednesday 1 March, and if availability allows would love to introduce ourselves to anyone who might be available from Bardi and Jawi Niimidiman AC. You mentioned there may be a few other groups who work within the marine parks within that Kimberley area that may also be interested in meeting EOG. I would be greatly appreciative if you were able to share some contact information.
	16/02/2023 15:03	Inbound Email	(BJNAC-04 Xen)	Arranging meeting with Bardi & Jawi Niimidiman Aboriginal Corporation.	Please see the relevant Bardi stakeholders (cc'd) to be invited to the session once you have the time and venue confirmed. I'll also notify the PBC board once the meeting details become available.	N/A
	22/02/2023 15:49	Inbound Email	(BJNAC-05 Xen)	Arranging meeting with Bardi & Jawi Niimidiman Aboriginal Corporation.	N/A	Many thanks for your patience as we organise a venue. We have booked a small room in the afternoon in Broome. We are open with the time we are available – so I will tentatively propose 1pm-2pm? Please let me know if that time is an issue for anyone – otherwise we look forward to meeting you.
	24/02/2023 12:07	Inbound Email	(BJNAC-06 Xen)	Arranging meeting with Bardi & Jawi Niimidiman Aboriginal Corporation.	Thanks for making contact, unfortunately the DBCA reps mentioned in this thread will be in meetings all day Tuesday and Wednesday 28th / 1st so will be unable to attend this catch up.	N/A
	24/02/2023 12:07	Outbound Email	(BJNAC-07 Xen)	Arranging meeting with Bardi & Jawi Niimidiman Aboriginal Corporation.	N/A	That's a shame but thank you for informing me. It's understandable that you have other commitments to prioritise. I will certainly contact you if I need to discuss anything further with you. Likewise, if any queries or concerns arise regarding offshore projects, EOG's in particular or just generally, I can certainly try to assist and would be happy to provide what information I can.
	1/03/2023 13:00	Outbound Email	(BJNAC-08 Xen)	Arranging meeting with Bardi & Jawi Niimidiman Aboriginal Corporation.	N/A	Confirmation sent for meeting place in Broome.

3/11/2023 0:00	Public / Group Meeting	BJNAC-MEMO-1	Summary memorandum of Bardi Jawi Niimidiman meeting 1 March 2023, noting attendance, apologies, no response,	No members of BJNAC attended the proposed session on 1 March 2023.	N/A
14/04/2023 13:10	Inbound Email	(BJNAC-08 Xen)	Consultation next steps with Bardi and Jawi PBC (PBC) in relation to proposed activities and objection to progressing Environmental Plan Approvals with regulator.	Thank you for expressing interest in consulting with the Bardi and Jawi PBC (PBC) in relation to your proposed activities. Due commitments, the wet season and recent cyclone activity in the region, the PBC will be meeting on 19-20 April to discuss each of your matters. While we are interested in collaborative engagement, the PBC needs time to consider the Santos NA Barossa Pty Ltd v Tipakalippa [2022] FCAFC 193 decision, your compliance with and our interpretation of the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009, as well as the greater effects and risks posed to Bardi and Jawi sea country by your projects. The PBC note that there may be cases where the PBC simply want to make you aware of the Bardi and Jawi Marine Park and will be requesting that you factor in the values that are outlined in our Joint Management Plan for the Park, into your environment plan for projects. In other cases, the PBC may want to respond with more detailed information if a project is likely to have a greater effect on Bardi and Jawi sea country. Unfortunately, however, the PBC is currently unable to engage with you on a goodwill basis via attending and coordinating meetings, or with general correspondence. In order to allow the PBC to act in its capacity over the area and provide the necessary assistance to you on your various matters, it will need to prepare a resourcing protocol for your execution. This resourcing protocol will provide certainty to both parties and allow us to provide the assistance required to you. Please allow up to 28 days from the date of this email to receive a draft resourcing protocol for your consideration. In the meantime, the PBC object to you progressing your matters with the PBC, as well as making a submission to NOPSEMA for your Environmental Plans.	Refer to email 6/6/23.
5/06/2023 16:15	Inbound Email	(BJNAC-11 Xen)	Request to enter into a resourcing protocol for ongoing consultation.	In order to address the PBC's concerns, as well as facilitate positive working relations, we propose to enter into the resourcing protocol to consult. To this end, please find enclosed a draft copy of the PBC's protocol for your consideration. The PBC note that it has made a considerable, and unrecoverable effort to prepare the protocol to align with the findings of the Court in the Santos decision around the requirements for consultation. We look forward to receiving your comments to the protocol. Please do not hesitate to contact myself for this matter on my details below.	N/A
6/06/2023 21:14	Outbound Email	(BJNAC-10 Xen)	* Response to email 5/6/23 stating we are currently reviewing the resourcing protocol that was provided.* Beehive Project Update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Thank you for the email of 5 June 2023, our team is currently reviewing the resourcing protocol you provided and will follow back up with you upon completion of our review.* Information and flyer for Beehive Project Geotechnical and Exploration Drilling provided.* The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's.* Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required.* Information provided on how sensitive information is handled.* Options provided to respond via email, mail or phone.
30/06/2023 15:09	Outbound Phone Call		Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	N/A	No answer left message for call back.
3/07/2023 16:00	Outbound Post / Letter	20230703 Letter Follow Up July 2023	Follow up letter sent seeking feedback by 21 July 2023 on update that was provided in May 2023 via letter.	N/A	* Follow up letter with information for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
19/07/2023 10:12	Outbound Email	(BJNAC-12 Xen)	Response to feedback email 5/6/23.	N/A	Thank you for your email of 5 June 2023 attaching a draft Resourcing Protocol. As referenced in your email, we look forward to establishing positive working relations. We appreciate your comment that the draft Resourcing Protocol has been prepared to "align with the findings in the Court in the Santos decision around the requirements for consultation." However, we do note that the draft provided discusses a consent requirement. As stated at the fifth page in NOPSEMA's brochure entitled "Consultation on offshore petroleum environment plans" (the "Brochure") (which is linked below for your ease of reference): "Titleholders are not required by law to obtain agreement or consent from relevant persons for their offshore petroleum activities to proceed; however, they are required to demonstrate in their environment plan how the concerns, objections or claims raised by relevant persons were considered and demonstrate that their response to that information was appropriate." https://www.nopsema.gov.au/sites/default/files/documents/Consultation%20on%20offshore%20petroleum%20environment%20plans%20brochure.pdf The introduction of a consent requirement in the draft Resourcing Protocol does not follow this approach and it appears that it was not developed in the context of an offshore resources project. Our proposed operations are limited in scope. We are currently seeking to conduct a geotechnical study and a single exploration well that will be capped and abandoned after drilling. To assist the parties in better understanding the project scope and developing the positive working relationship we both wish to achieve, we would suggest scheduling a discussion to better understand the contents of the proposed Resourcing Protocol. Again, thank you for your response to date and we look forward to hearing from you at your earliest opportunity and being able to work together.
25/08/2023 5:47	Outbound Email	(BJNAC-13 Xen)	Follow up email, including acknowledgement of letter to NOPSEMA and prompt to further discussion on Resourcing Protocol Agreement.	N/A	N/A
26/10/2023 4:27	Outbound Email	(BJNAC-14 Xen)	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs. Further note to schedule discussion on Resourcing Protocol agreement.	N/A	N/A

	24/11/2023 11:36	Outbound Email	BJNAC-15 Xen	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A
Traditional Owner 1	7/06/2023 13:00	Public / Group Meeting	Public Information Session Broome	Broome Community Information Session - 3 Attendees. Feedback was provided to assist with preparation of EP.	<ul style="list-style-type: none"> * Introduced species pest management (particularly example of cane toads) is an issue of importance. * Turtle and dugong are migratory species and important cultural animals to manage in the project area. * Local concerns around overfishing (commercial) and overhunting (traditional). * Noted that more interest in the project likely in Wyndham. * Part of ranger network and would be interested in funding if the project progressed past exploration. * Discussion of indigenous ranger network and indication that North Australia Indigenous Land and Sea Management Alliance (NAILSMA) is now Indigenous Salt Water Advisory Group (ISWAG) and that this organization would be potentially relevant for spill response activity. 	<ul style="list-style-type: none"> * Beehive Project information provided and discussed with attendees. * The control of introduced and invasive species is addressed in the current EOG Plans. * The EOG plans will be reviewed to ensure these species (turtle & dugong) have been considered. * Though overfishing and overhunting were raised, when asked about what they are concerned about in the area, it was not raised as a concern related to this project.
Bindunbur	26/08/2022 0:00	Outbound Email	(B-01 Xen)	Email sent by EOG to Bindunbur (c/- Kimberley Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A

	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
	8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: <ul style="list-style-type: none"> * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline <p>At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly.</p> <p>I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.</p>
	9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
	19/05/2023 14:34	Outbound Email	(CPSLT-03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. ("EOG") regarding its activity plans and request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. We are finalising the Environment Plans in preparation for submission to NOPSEMA (the offshore regulator) as soon as the end of August 2023 and are sending this as further reminder of the opportunity to provide feedback on EOG's proposed offshore activities. A summary of the proposed activities is available via the following links: https://www.eogresources.com/australia https://klarite.mysocialpinpoint.com.au/beehive Geotechnical Investigations: https://info.nopsema.gov.au/environment_plans/605/show_public Drilling: https://info.nopsema.gov.au/environment_plans/587/show_public Please reply to this correspondence with any feedback, objections, claims or if you know of any other persons or organisations that may have interest in this project. Alternatively, should you have no further comments to make, you may wish to let us know by responding to this email, and we will close consultation for you or your organisation. 	
14/11/2023 2:49	Inbound Email	(NLC-29 Xen)	Advice provided on groups that correspond through the KLC, and the new email to send the correspondence to. Advice on who the NLC does not represent and to no longer send related communications to the NLC regarding those listed groups.	Advice on representation and provision of new email address.	Amended records to reflect advice.

No concerns raised.	N/A
	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitation to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A

8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: <ul style="list-style-type: none"> * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline <p>At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly.</p> <p>I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.</p>
9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
19/05/2023 14:37	Outbound Email	(DRPKALT -03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance. Traditional Owner 3	13/06/2023 9:00	Public / Group Meeting	Public Information Session Kalumburu	<p>* Kalumburu Community Information Session - 12 Attendees. Feedback was provided to assist with preparation of EP.</p> <p>* The community members did not have any overall objections to the project. They would like it to be conducted safely and hope that they can see direct benefits to their people and their region.</p> <p>* They expressed appreciation for us coming to the community. Although they understand the role of the company via the approvals from the government departments, they indicated that speaking with them was more valuable and important to them than having us speak with government.</p> <p>* A key point to note is that the CEO, Chairperson and community members of the Kalumburu Aboriginal Corporation had a keen understanding of the difference between an offshore and onshore project and did not know who or what role NOPSEMA is responsible for.</p> <p>* Noted that some members asked if we had talked to Aboriginal people closest to the project activities (i.e. Wyndham and Kununurra).</p> <p>* A large portion of the discussion was around educating the community on company background, what is the project work, how does an EP process work, what is the title grant process.</p>	<p>* Important Fishing area for oysters, scallops, fish, crabs, sting rays etc.</p> <p>* Marine Life needs to be protected eg. Turtles, Whales, Mangrove etc.</p> <p>* Important Cultural Heritage resources in the area include Rock Art, Marine Resources & camping locations along the shore.</p> <p>* Would like to see economic benefits for the local community in relation to jobs (specifically for young people to become engaged in the industry), direct payments and ensure no negative impact on tourism.</p> <p>* Infrastructure - the roads are not in good condition, and it is tough to get supplies locally during the wet season. If there is an emergency, the area will need to be accessible. Could infrastructure improvements arise from the industry activity?</p>	<p>* Beehive Project information provided and discussed with attendees with responses given to answer the questions asked.</p> <p>* We indicated that further activities would require further EPs and associated consultation. If the exploration activity is successful, we could have discussions about the community's infrastructure and economic interests that might align with the scope of the activity.</p>
Durduga Tree Point Aboriginal Association Incorporated	26/08/2022 0:00	Outbound Email	(DTPAAI-01 Xen)	Email sent by EOG to Durduga Tree Point Aboriginal Association Incorporated (c/- Northern Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(DTPAAI-02 Xen)	Email sent from EOG to Durduga Tree Point Aboriginal Association Incorporated C/ Northern Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
	8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	<p>More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list:</p> <ul style="list-style-type: none"> * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline <p>At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly.</p> <p>I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.</p>
	9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
	23/05/2023 22:46	Outbound Email	(DTPAAI-03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	<p>* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided:</p> <p>* The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program.</p> <p>* Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A
Traditional Owner 4	7/06/2023 13:00	Public / Group Meeting	Public Information Session Broome	Broome Community Information Session - 3 Attendees. Feedback was provided to assist with preparation of EP.	<ul style="list-style-type: none"> Introduced species pest management (particularly example of cane toads) is an issue of importance. Turtle and dugong are migratory species and important cultural animals to manage in the project area. Local concerns around overfishing (commercial) and overhunting (traditional). Noted that more interest in the project likely in Wyndham. Part of ranger network and would be interested in funding if the project progressed past exploration. Discussion of indigenous ranger network and indication that North Australia Indigenous Land and Sea Management Alliance (NAISMA) is now Indigenous Salt Water Advisory Group (ISWAG) and that this organization would be potentially relevant for spill response activity. 	<ul style="list-style-type: none"> Beehive Project information provided and discussed with attendees. The control of introduced and invasive species is addressed in the current EOG Plans. The EOG plans will be reviewed to ensure these species (turtle & dugong) have been considered. Though overfishing and overhunting were raised, when asked about what they are concerned about in the area, it was not raised as a concern related to this project.
Traditional Owner 5	13/06/2023 9:00	Public / Group Meeting	Public Information Session Kalumburu	<ul style="list-style-type: none"> Kalumburu Community Information Session - 12 Attendees. Feedback was provided to assist with preparation of EP. The community members did not have any overall objections to the project. They would like it to be conducted safely and hope that they can see direct benefits to their people and their region. They expressed appreciation for us coming to the community. Although they understand the role of the company via the approvals from the government departments, they indicated that speaking with them was more valuable and important to them than having us speak with government. A key point to note is that the CEO, Chairperson and community members of the Kalumburu Aboriginal Corporation had a keen understanding of the difference between an offshore and onshore project and did not know who or what role NOPSEMA is responsible for. Noted that some members asked if we had talked to Aboriginal people closest to the project activities (i.e. Wyndham and Kununurra). A large portion of the discussion was around educating the community on company background, what is the project work, how does an EP process work, what is the title grant process. 	<ul style="list-style-type: none"> Important Fishing area for oysters, scallops, fish, crabs, sting rays etc. Marine Life needs to be protected eg. Turtles, Whales, Mangrove etc. Important Cultural Heritage resources in the area include Rock Art, Marine Resources & camping locations along the shore. Would like to see economic benefits for the local community in relation to jobs (specifically for young people to become engaged in the industry), direct payments and ensure no negative impact on tourism. Infrastructure - the roads are not in good condition, and it is tough to get supplies locally during the wet season. If there is an emergency, the area will need to be accessible. Could infrastructure improvements arise from the industry activity? 	<ul style="list-style-type: none"> Beehive Project information provided and discussed with attendees with responses given to answer the questions asked. Gogolanyngor Aboriginal Corporation	26/08/2023 0:00	Outbound Email	(GAC-01 Xen)	Email sent by EOG to Gogolanyngor Aboriginal Corporation (c/- Kimberley Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2023 0:00	Outbound Email	(GAC-02 Xen)	Email sent from EOG to Gogolanyngor Aboriginal Corporation C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	15/02/2023 16:14	Outbound Email	(GAC-05 Xen)	Arranging meeting with Gogolanyngor Aboriginal Corporation.	N/A	Gogolanyngor Aboriginal Corporation may have been sent communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). These communications may have been sent to Kimberley Land Council rather than direct to your organisation or GAC. As part of the process for developing an Environmental Plan, the Aboriginal groups along the Kimberley coastline just north of Broome onwards, including Gogolanyngor Aboriginal Corporation, have been identified relevant organisations that may have interest in the project. Although the project is in the Joseph Bonaparte Gulf, the project has a spill-zone Environment that May Be Affected (EMBA) that stretches along the coastline. EOG would like to organise a brief meet and

					greet in Broome to establish relationships in the area. We will be in Broome on Wednesday 1 March, and if availability allows and you believe it is appropriate we would love to introduce ourselves to anyone who might be available from Waardi/GAC. I will follow up with a call later this week, but if you have any questions in the meantime please reach out.
15/02/2023 16:14	Outbound Email	(GAC-03 Xen)	Arranging meeting with Gogolanyngor Aboriginal Corporation.	N/A	Gogolanyngor Aboriginal Corporation may have been sent communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). 24/02/2023 10:28	Outbound Email	(GAC-04 Xen)	Arranging meeting with Gogolanyngor Aboriginal Corporation.	N/A	EOG will be in Broome on Wednesday 1st March. We were hoping to establish some relationships in the area and meet with a member of your organisation, just to introduce ourselves and touch base on the project we have in WA. We would be grateful to have a moment of your time to meet. It was indicated to us that you might not be available on that day, we would also be happy to meet with anyone else you think might be appropriate and suitable in your place. Please have a perusal of the below email and let me know if it is possible to catch up on 1 March. Happy to talk with you if you want to give me a quick call.
27/02/2023 12:47	Inbound Email	(GAC-07 Xen)	Arranging meeting with Gogolanyngor Aboriginal Corporation.	Good morning , thank you for your email, you will need to contact the Kimberley Land Council who provides Gogolanyngor Aboriginal Corporation (GAC) with some support services, Waardi is not in a position to discuss Native Title matters, you will need to talk to the PBC in regard to the project. You can contact the Land council and ask to speak with the Project Officer supporting GAC. They will know the word GAC more readily than they would Gogolanyngor. I'm sorry for the delayed response and not being able to help.	N/A
27/02/2023 13:50	Outbound Email	(GAC-08 Xen)	Arranging meeting with Gogolanyngor Aboriginal Corporation.	N/A	No worries about the delay, and you were of assistance. It is helpful for me to know what services you can and cannot provide, and who best to communicate with. We have a meeting with Kimberley Land Council on Wednesday morning so I can certainly discuss further with them. I appreciate you taking the time to get back to me.
23/05/2023 22:48	Outbound Email	(GAC-09 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. Kalumburu Aboriginal Corporation	25/01/20 23 14:00	Outbound Email	(KAC-01 Xen)	Email sent re approvals required from Kalumburu Aboriginal Corporation to place Public Notice's at the boat ramps north of Kalumburu being Drysdale River, McGowan Island Camping Ground & Honeymoon Bay and Public Noticeboard in Kalumburu.	N/A	EOG Resources are looking to place a Public Notice at each of the boat ramps north of Kalumburu being Drysdale River, McGowan Island Camping Ground & Honeymoon Bay as soon as possible and are seeking any prior approvals that may be required. In addition, if there is a Public Noticeboard in Kalumburu we would also like to place a copy of the notice there as well. A copy of the Public Notice is attached. We will print the notice on an A3 corflute board which would be attached to a single timber stake for display at the boat ramps or on an A4 leaflet for the Public Noticeboard. Once placed the signs would be displayed for 3 – 4 months then we will remove them. The intent of the notice is to engage and search for information about what environmental values people may have in the EOG project area. Given the project is offshore, we have chosen boat ramps as one of the methods to engage with people who use the sea. Given the location of Kalumburu a community noticeboard in Kalumburu would also be beneficial for our engagement. If we are able to place the Public Notices, given Kalumburu is currently cut off by road, we would be appreciative of any suggestions locally to help us place the notices. I look forward to hearing from you soon.
	30/03/20 23 17:10	Outbound Email	(KAC-02 Xen)	Follow up of email dated 25/1/23.	N/A	I am just following up on my email from 25/1/23 to see if the attached Public Notice can be placed in the Kalumburu community at the 3 Boat Ramps and the Community Noticeboards? Also given that Kalumburu is cut off by road if there is someone locally that can assist us with putting up the notices? I look forward to hearing from you.

	18/05/2023 15:02	Outbound Email	(KAC-05 Xen)	Application to enter Kalumburu for Beehive Project Information Session 13/6/23.	N/A	Application sent via WA Department of Planning, Lands & Heritage to enter Kalumburu for Beehive Project Information Session 13/6/23.
	19/05/2023 13:06	Outbound Email	KAC-03 Xen	Beehive Project Update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	<p>* Information and flyer for Beehive Project Geotechnical and Exploration Drilling provided:</p> <p>* The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program.</p> <p>* Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling.</p> <p>* Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's.</p> <p>* Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required.</p> <p>* Information provided on how sensitive information is handled.</p> <p>* Options provided to respond via email, mail or phone.</p>

	29/06/2023 0:39	Outbound Email	(KAC-04 Xen)	Confirmation of outcomes from Community Information Session on 13/6/23.	N/A	<p>Thank you again for your hospitality and warm welcome to your country. You and your staff were very kind and accommodating to our team as we journeyed to inform and consult on our Beehive project.</p> <p>The community members that sat down with our team expressed the desire for EOG to continue to communicate with the Kalumburu community as our projects progress and to work towards a safe work program when activity begins. EOG is committed to continuous consultation and will be happy to provide updates as the projects continue to progress. As requested, all updates and communication will be directed to you as CEO. A safe work program is what we aim to accomplish, and safety and environmental matters are integrated into our business planning, training, development and decision-making, our team is focused on doing the right thing.</p> <p>If any questions have surfaced after our visit, please don't hesitate to reach out.</p>
	14/11/2023 11:04	Outbound Email	(KAC-07 Xen)	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
	24/11/2023 9:13	Outbound Email	20231124 Email Close Out November 2023	<p>Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met.</p> <p>If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.</p>	N/A	N/A
Kenbi Aboriginal Land Trust	26/08/2022 0:00	Outbound Email	(KALT-01 Xen)	Email sent by EOG to Kenbi Aboriginal Land Trust (c/- Northern Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(KALT-02 Xen)	Email sent from EOG to Kenbi Aboriginal Land Trust C/ Northern Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A

8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: <ul style="list-style-type: none"> * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline <p>At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly.</p> <p>I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.</p>
9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
23/05/2023 22:49	Outbound Email	(KALT-03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	<ul style="list-style-type: none"> * Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. 	13/05/20 22 0:00	Outbound Phone Call	N/A	EOG spoke to KLC who confirmed receipt of email but advised to call MG Corp as they are closest country to the proposed drilling area.	No concerns raised.	N/A
	27/06/20 22 0:00	Outbound Email	(KLC-06)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A
	23/11/20 22 0:00	Outbound Email	(KLC-07 Xen)	Email sent from EOG to KLC providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/20 23 9:00	Outbound Email	(KLC-08 Xen)	Introduction to the KLC and request for a meeting.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	23/01/20 23 9:00	Outbound Email	(KLC-17 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I am following up on the below as to whether anyone was available on the morning of 1 March for EOG to meet?
	24/01/20 23 12:00	Outbound Phone Call		Called the Kimberley Land Council to enquire re approvals required to place Public Notices at the public boat ramps at Wyndham, Kalumburu, Derby, One Arm Point & Broome.	Permits may be required for travelling through Aboriginal Lands with information and online application being available on WA Dept of Planning, Lands & Heritage site. Also mentioned need to speak to local councils and possibly the Registered Native Title Body Corporates for some of the areas we want to enter.	Provided background on the Beehive Project and potential EMBA should a discharge occur. Explained that we are completing engagement on the project to identify relevant persons that may be affected by the activity and that one of the engagement activities is placing Public Notices at Boat Ramps. Asked what approvals would be required to place a Public Notice at the public boat ramps at Wyndham, Kalumburu, Derby, One Arm Point & Broome.
	15/02/20 23 10:05	Outbound Email	(KLC-10 Xen)	Seeking contacts for Wanjina Wunggurr AC, Mayala Inninalang AC, Nyul Nyul AC & Nimanburr AC	N/A	Would you be able to provide me the best contact for the following groups: * Wanjina Wunggurr AC * Mayala Inninalang AC * Nyul Nyul AC * Nimanburr AC
	16/02/20 23 14:12	Inbound Email	(KLC-20 Xen)	Arranging meeting with Kimberley Land Council.	As your nominated contact person for this Corporation I am forwarding to you the below email from EOG for your consideration and attendances (if any). Should you require KLC assistance, please feel free to contact Project Officer at our Broome Office.	N/A
	16/02/20 23 16:05	Outbound Email	(KLC-11Xen)	Alternative contact for meeting Nimanburr Aboriginal Corporation.	For your attendances as contact person for Nimanburr Aboriginal Corporation.	N/A
	16/02/20 23 16:15	Inbound Email	(KLC-12 Xen)	Arranging meeting with Kimberley Land Council Corporations.	Please note I have forwarded your correspondence to the Directors and/or Executives of the Corporations mentioned below. I cc'd you in on the correspondence to Nimanburr Aboriginal Corporation because the contact person email is a generic email publicly available, but some of the other Corporations use my email address to forward on to their private emails not publicly available.	
16/02/20 23 16:15	Outbound Email	(KLC-13 Xen)	Arranging meetings with Kimberley Land Council Corporations.	N/A	Thanks for passing my message on – much appreciated.	
22/02/20 23 18:03	Outbound Email	(KLC-17 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I am following up on the below as to whether anyone was available on the morning of 1 March for EOG to meet?	
22/02/20 23 18:14	Outbound Email	(KLC-15 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I haven't had any interest come directly through to me yet – I was wondering if anything may have come through to yourself by chance? Looking at my initial email to you, I can see that I may not have provided enough information about EOG and their project to generate interest in the meet and greet. Do you think it would be worth providing some additional context to the request to meet the various groups? If so I am happy to provide. By chance, is there anyone inside the Kimberley Land Council that EOG could meet with more generally to talk about engagement with the various groups that you know of or recommend? Or yourself if you think that is appropriate? I made a request to the main KLC email (attached) late last month but haven't heard back.	
24/02/20 23 11:28	Outbound Phone Call	(KLC-25 Xen)	Arranging meeting with Kimberley Land Council.	* Confirmed no return correspondence received to date. * Reception stated that without an appointment that would be limited. * Reception clarified who I might want to meet with. * Reception asked for clarity of the meeting and project. * Reception forwarded the call through to the Executive Assistant – unsuccessful. * Reception forwarded the call through to Principal Legal – unsuccessful. * Reception to resend the email internally.	* Follow up on meeting request email. * Asked if we were to turn up to the office on the provided date would that be okay. * Stated EOG was unsure of the overall structure within KLC. * EOG outlined meeting and project intent.	
24/02/20 23 12:55	Outbound Email	(KLC-14 Xen)	Arranging meeting with Kimberley Land Council / Nimanburr Aboriginal Corporation.	N/A	I am following up on the below email. We will be in Broome on Wednesday March 1 and we would like to establish some relationships in the area and were hoping to briefly introduce ourselves to someone from Nimanburr if they are available that day. Would that be yourself? Happy for someone to contact to me to discuss further; of if there is a phone number you can pass on to me I am happy to call that also.	

27/02/20 23 9:10	Inbound Email	(KLC-21 Xen)	Arranging meeting with Mayala Inninalang Aboriginal Corporation.	Not sure if I sent this through to you or not. Please see below email chain for your records and information (email sent from Kimberley Land Council to Mayala Inninalang Aboriginal Corporation for meeting with EOG).	N/A
27/02/20 23 10:48	Outbound Email	(KLC-18 Xen)	Confirming a meeting time and place.	N/A	Thank you so much for responding, no worries on the timeframe in replying to me. That would be perfect, we are flying in the day before. We look forward to meeting KLC CEO on Wednesday 1 March at 9am. Confirming that we go to your office at 11 Gregory Street?
27/02/20 23 12:41	Inbound Email	(KLC-09 Xen)	Meeting request.	Apologies in the late response to meeting request. KLC CEO is available Wednesday 1 March at 9am to meeting. Does this time suit?	N/A
27/02/20 23 12:50	Inbound Email	(KLC-19 Xen)	Arranging meeting with Kimberley Land Council.	Yes KLC Office is at 11 Gregory Street.	N/A
27/02/20 23 17:46	Outbound Email	(KLC-23 Xen)	General enquiry.	N/A	Many thanks for relaying this information through – it's much appreciated. Initially we were reaching out as we will be in Broome and thought it might be a good opportunity to introduce ourselves and meet representatives of the PBCs while in town. Understandable that timing doesn't always work out that way. Regarding Mayala, EOG is currently working on their project updates to provide at a later date, unfortunately they won't be able to get this information in time for the board meeting. How often do the board meetings occur, and are you the best contact to request an agenda item on the next board meeting? More generally, from now on if EOG have information to pass onto Mayala, and Wanjina Wungurr and Nyul Nyul ACs would you be the best contacts to submit this information? For Nimanburr, is it recommended I send to both their contacts?
28/02/20 23 10:05	Inbound Email	KLC-32 Xen	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wungurr, Nimanburr.	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wungurr, Nimanburr.	N/A
1/03/202 3 9:00	In Person Meeting	(KLC-29 Xen)	Meeting held with Kimberley Land Council to seek guidance on ways and methods to engage with communities, groups or individuals through the Kimberley that may be affected by our Beehive Project in the Joseph Bonaparte Gulf.	Information not publicly available.	N/A
23/05/20 23 22:51	Outbound Email	(KLC-26 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
30/06/20 23 6:24	Outbound Email	20230630 Email Follow Up June 2023	Follow up email seeking feedback by 21 July 2023 on update that was provided in May 2023 via email.	N/A	This message is in follow up to the email below providing an update to the Beehive project and requesting that you (or your organisation) share your assessment of how you may be affected by our proposed activities. We are kindly requesting feedback from you by 21 July 2023.
30/06/20 23 6:25	Inbound Email	(KLC-27 Xen)	Contact details update.	Please use the ORIC website to update the contact details you have on file for Aboriginal Corporations in the Kimberley.	N/A
30/06/20 23 15:28	Outbound Phone Call	20230630 KLC Outbound Phone Call	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	All communications received are forwarded to 2 separate email addresses previously supplied for review and response. Request that all PBC communications are emailed to email address supplied. Advised that 2 previous contacts have now left KLC. Best to check ORIC for updated emails of contact officers.	Information noted and records will be updated.
30/06/20 23 22:51	Outbound Email	(KLC-28 Xen)	Acknowledgement of contact details email.	N/A	Thank you for the information our team will continue to utilize all contact information available via the ORIC website for Aboriginal Corporations in the Kimberley.
15/08/20 23 11:44	Outbound Phone Call	20230815 KLC Outbound Phone Call	Follow up phone call. Received all emails but could not locate Wanjina-Wungurr directed email. Best to remove klc@klc email and have the emails go to legalsecretary@klc email and the ORIC emails. Can call Legal Secretary direct number, but will most likely need to leave voicemail - happy for reception to continue taking calls still if needs be. For the KLC in it's own right, email to the Executive Assistant email. Had a brief discussion on the project process, the EMBA and spill response for the information of the reception team member's general interest.	Communications received, though unsure on Wanjina-Wungurr email. Confirmed the emails that could be used.	Will update CM emails accordingly, and double check the email through to Wanjina-Wungurr.
10/08/20 23 4:58	Outbound Email	20230810 Email Follow Up August 2023	<ul style="list-style-type: none"> We are following up on the previous communications sent by EOG Resources Australia Block WA-488 Pty. Ltd. ("EOG") regarding its activity plans and request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. We are finalising the Environment Plans in preparation for submission to NOPSEMA (the offshore regulator) as soon as the end of August 2023 and are sending this as further reminder of the opportunity to provide feedback on EOG's proposed offshore activities. A summary of the proposed activities is available via the following links: https://www.eogresources.com/australia https://klarite.mysocialpinpoint.com.au/beehive <p>Geotechnical Investigations: https://info.nopsema.gov.au/environment_plans/605/show_public Drilling: https://info.nopsema.gov.au/environment_plans/587/show_public</p> <ul style="list-style-type: none"> Please reply to this correspondence with any feedback, objections, claims or if you know of any other persons or organisations that may have interest in this project. 14/11/20 23 10:56	Outbound Email	20231114 Email Follow Up Novembe r 2023	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
27/11/20 23 11:37	Outbound Email		Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A

Traditional Owner 9	7/06/2023 13:00	Public / Group Meeting	Public Information Session Broome	Broome Community Information Session - 3 Attendees. Feedback was provided to assist with preparation of EP.	<ul style="list-style-type: none"> * Introduced species pest management (particularly example of cane toads) is an issue of importance. * Turtle and dugong are migratory species and important cultural animals to manage in the project area. * Local concerns around overfishing (commercial) and overhunting (traditional). * Noted that more interest in the project likely in Wyndham. * Part of ranger network and would be interested in funding if the project progressed past exploration. * Discussion of indigenous ranger network and indication that North Australia Indigenous Land and Sea Management Alliance (NAISMA) is now Indigenous Salt Water Advisory Group (ISWAG) and that this organization would be potentially relevant for spill response activity. 	<ul style="list-style-type: none"> * Beehive Project information provided and discussed with attendees. * The control of introduced and invasive species is addressed in the current EOG Plans. * The EOG plans will be reviewed to ensure these species (turtle & dugong) have been considered. * Though overfishing and overhunting were raised, when asked about what they are concerned about in the area, it was not raised as a concern related to this project.
Larrakia Nation Aboriginal Corporation	26/08/2022 0:00	Outbound Email	(L-01 Xen)	Email sent by EOG to Larrakia (c/- Northern Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(L-02 Xen)	Email sent from EOG to Larrakia C/ Northern Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
	8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	<p>More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list:</p> <ul style="list-style-type: none"> * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline <p>At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly.</p> <p>I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.</p>
	9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.

9/02/202 3 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
23/05/20 23 10:53	Outbound Email	(LWAC-03 Xen)	Beehive Project Update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	<p>* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.</p>

Traditional Owner 10	13/06/2023 9:00	Public / Group Meeting	Public Information Session Kalumburu	<ul style="list-style-type: none"> Kalumburu Community Information Session - 12 Attendees. Feedback was provided to assist with preparation of EP. The community members did not have any overall objections to the project. They would like it to be conducted safely and hope that they can see direct benefits to their people and their region. They expressed appreciation for us coming to the community. Although they understand the role of the company via the approvals from the government departments, they indicated that speaking with them was more valuable and important to them than having us speak with government. A key point to note is that the CEO, Chairperson and community members of the Kalumburu Aboriginal Corporation had a keen understanding of the difference between an offshore and onshore project and did not know who or what role NOPSEMA is responsible for. Noted that some members asked if we had talked to Aboriginal people closest to the project activities (i.e. Wyndham and Kununurra). A large portion of the discussion was around educating the community on company background, what is the project work, how does an EP process work, what is the title grant process. 	<ul style="list-style-type: none"> Important Fishing area for oysters, scallops, fish, crabs, sting rays etc. Marine Life needs to be protected eg. Turtles, Whales, Mangrove etc. Important Cultural Heritage resources in the area include Rock Art, Marine Resources & camping locations along the shore. Would like to see economic benefits for the local community in relation to jobs (specifically for young people to become engaged in the industry), direct payments and ensure no negative impact on tourism. Infrastructure - the roads are not in good condition, and it is tough to get supplies locally during the wet season. If there is an emergency, the area will need to be accessible. Could infrastructure improvements arise from the industry activity? 	<ul style="list-style-type: none"> Beehive Project information provided and discussed with attendees with responses given to answer the questions asked. We indicated that further activities would require further EPs and associated consultation. If the exploration activity is successful, we could have discussions about the community's infrastructure and economic interests that might align with the scope of the activity.
Mayala Inninalang Aboriginal Corporation	26/08/2022 0:00	Outbound Email	(MIAC-01 Xen)	Email sent by EOG to Mayala Inninalang Aboriginal Corporation (c/- Kimberley Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A

28/10/20 22 0:00	Outbound Email	(MIAC-02 Xen)	Email sent from EOG to Mayala Inninalang Aboriginal Corporation C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
15/02/20 23 10:05	Outbound Email	(KLC-10 Xen)	Seeking contacts for Wanjina Wunggurr AC, Mayala Inninalang AC, Nyul Nyul AC & Nimanburr AC	N/A	Would you be able to provide me the best contact for the following groups: * Wanjina Wunggurr AC * Mayala Inninalang AC * Nyul Nyul AC * Nimanburr AC
16/02/20 23 14:12	Inbound Email	(KLC-20 Xen)	Arranging meeting with Kimberley Land Council.	As your nominated contact person for this Corporation I am forwarding to you the below email from EOG for your consideration and attendances (if any). Should you require KLC assistance, please feel free to contact Project Officer at our Broome Office.	N/A
16/02/20 23 16:15	Inbound Email	(KLC-12 Xen)	Arranging meeting with Kimberley Land Council Corporations.	Please note I have forwarded your correspondence to the Directors and/or Executives of the Corporations mentioned below. I cc'd you in on the correspondence to Nimanburr Aboriginal Corporation because the contact person email is a generic email publicly available, but some of the other Corporations use my email address to forward on to their private emails not publicly available.	
16/02/20 23 16:15	Outbound Email	(KLC-13 Xen)	Arranging meetings with Kimberley Land Council Corporations.	N/A	Thanks for passing my message on – much appreciated.
22/02/20 23 18:14	Outbound Email	(KLC-15 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I haven't had any interest come directly through to me yet – I was wondering if anything may have come through to yourself by chance? Looking at my initial email to you, I can see that I may not have provided enough information about EOG and their project to generate interest in the meet and greet. Do you think it would be worth providing some additional context to the request to meet the various groups? If so I am happy to provide. By chance, is there anyone inside the Kimberley Land Council that EOG could meet with more generally to talk about engagement with the various groups that you know of or recommend? Or yourself if you think that is appropriate? I made a request to the main KLC email (attached) late last month but haven't heard back.
27/02/20 23 9:10	Inbound Email	(KLC-21 Xen)	Arranging meeting with Mayala Inninalang Aboriginal Corporation.	Not sure if I sent this through to you or not. Please see below email chain for your records and information.	N/A
27/02/20 23 13:59	Inbound Email	(KLC-22 Xen)	Arranging meeting with Mayala Inninalang Aboriginal Corporation.	Apologies for the delayed response, your email has just made its way to me as the Mayala project officer. The Mayala Board are meeting this week however their agenda is already full. Confirmed project officer for both Wanjina Wunggurr AC & Nyul Nyul AC and project officer for Nimanburr and also the best contact person. Please forward information you would like to share with the Mayala board and I can flag it with the Chair.	N/A
27/02/20 23 17:46	Outbound Email	(KLC-23 Xen)	General enquiry.	N/A	Many thanks for relaying this information through – it's much appreciated. Initially we were reaching out as we will be in Broome and thought it might be a good opportunity to introduce ourselves and meet representatives of the PBCs while in town. Understandable that timing doesn't always work out that way. Regarding Mayala, EOG is currently working on their project updates to provide at a later date, unfortunately they won't be able to get this information in time for the board meeting. How often do the board meetings occur, and are you the best contact to request an agenda item on the next board meeting? More generally, from now on if EOG have information to pass onto Mayala, and Wanjina Wunggurr and Nyul Nyul ACs would you be the best contacts to submit this information? For Nimanburr, is it recommended I send to both their contacts?
28/02/20 23 10:05	Inbound Email	KLC-32 Xen	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wunggurr, Nimanburr.	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wunggurr, Nimanburr.	N/A
28/02/20 23 12:18	Inbound Email	MIAC-09 Xen	The board likely meet within the next 3 months, date has not been confirmed. When board set date for the next directors meeting, can share with EOG and place EOG on the agenda.	The board likely meet within the next 3 months, date has not been confirmed. When board set date for the next directors meeting, can share with EOG and place EOG on the agenda.	N/A
23/05/20 23 22:55	Outbound Email	(MIAC-03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
30/06/20 23 6:24	Outbound Email	20230630 Email Follow Up June 2023	Follow up email seeking feedback by 21 July 2023 on update that was provided in May 2023 via email.	N/A	This message is in follow up to the email below providing an update to the Beehive project and requesting that you (or your organisation) share your assessment of how you may be affected by our proposed activities. We are kindly requesting feedback from you by 21 July 2023.
30/06/20 23 15:23	Outbound Phone Call	20230630 KLC Outbound Phone Call	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	3.28pm - Spoke to KLC. All communications received are forwarded to 2 separate email addresses previously supplied for review and response. Request that all PBC communications are emailed to email address supplied. Advised that 2 previous contacts have now left KLC. Best to check ORIC for updated emails of contact officers.	3.23pm - Called contact and left for a return call. 3.28pm - Information noted and records will be updated.
3/07/202 3 16:00	Outbound Post / Letter	20230703 Letter Follow Up July 2023	Follow up letter sent seeking feedback by 21 July 2023 on update that was provided in May 2023 via letter.	N/A	* Follow up letter with information for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. A key point to note is that the CEO, Chairperson and community members of the Kalumburu Aboriginal Corporation had a keen understanding of the difference between an offshore and onshore project and did not know who or what role NOPSEMA is responsible for. Noted that some members asked if we had talked to Aboriginal people closest to the project activities (i.e. Wyndham and Kununurra). A large portion of the discussion was around educating the community on company background, what is the project work, how does an EP process work, what is the title grant process. 	<ul style="list-style-type: none"> Important Fishing area for oysters, scallops, fish, crabs, sting rays etc. Marine Life needs to be protected eg. Turtles, Whales, Mangrove etc. Important Cultural Heritage resources in the area include Rock Art, Marine Resources & camping locations along the shore. Would like to see economic benefits for the local community in relation to jobs (specifically for young people to become engaged in the industry), direct payments and ensure no negative impact on tourism. Infrastructure - the roads are not in good condition, and it is tough to get supplies locally during the wet season. If there is an emergency, the area will need to be accessible. Could infrastructure improvements arise from the industry activity? 	<ul style="list-style-type: none"> Beehive Project information provided and discussed with attendees with responses given to answer the questions asked. We indicated that further activities would require further EPs and associated consultation. If the exploration activity is successful, we could have discussions about the community's infrastructure and economic interests that might align with the scope of the activity.
Miriuwong & Gajerrong Aboriginal Corporation	18/09/2021 0:00	Outbound Email	(MGAC-01 & 02)	EOG emailed Flyer 1.	No concerns raised.	N/A
	20/09/2021 0:00	Inbound Email	(MGAC-01 & 02)	Response from MG Corp thanking us for the email and saying they will be in touch shortly once the flyer has been reviewed.	No concerns raised.	N/A
	27/10/2021 0:00	Outbound Email	(MGAC-03)	EOG thanked MG Corp for acknowledgement email and asked if they could confirm if they had any feedback to send through via reply email at their earliest convenience.	No concerns raised.	N/A
	2/12/2021 0:00	Outbound Email	(MGAC-04 & 05)	EOG emailed Information Flyer 2 to notify MGAC that the PDSA EP was now available for public exhibition and comment on the NOPSEMA website and the latest updates to the EP. Email was also forwarded to another address as requested.	No concerns raised.	N/A
	28/02/2022 0:00	Outbound Email	(MGAC-06)	EOG emailed Information Flyer 3 to notify of the Beehive-1 exploration well drilling program.	No concerns raised.	N/A

	12/05/20 22 0:00	Outbound Email	(MGAC-07 & 08)	EOG emailed Information Flyer 4 with an update on the PDSA phase and invited return comment. The flyer also notified that the Drilling EP was available on NOPSEMA's website for public exhibition for 30 days, until 8th June.	No concerns raised.	N/A
	13/05/20 22 0:00	Outbound Phone Call	(MGAC-09)	EOG spoke to MG Corp but was busy in meeting. EOG sent email to MG Corp with general query i.e. have they received the flyers and do they have feedback or questions.	No concerns raised.	N/A
	27/06/20 22 0:00	Outbound Email	(MGAC-10) & (MGAC-11)	EOG emailed Flyer 5 with updates to the Geotechnical phase and invited to return comment.	No concerns raised.	N/A
	30/08/20 22 0:00	Outbound Email	(MGAC-12 Xen)	Email sent by EOG to MG Corp following up to enquire if there are any outstanding questions they may have regarding the information provided in relation EOG's Beehive project, notifying that EOG is actively engaging with the BAC and would like to offer to have the same engagement with MG Corp to address any questions they may have and providing information on how sensitive information will be handled.	No concerns raised.	N/A
	28/10/20 22 0:00	Outbound Email	(MGAC-13 Xen)	Email sent from EOG to MG Corp providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A

Nimanburr Aboriginal Corporation	26/08/20 22 0:00	Outbound Email	(NAC-01 Xen)	Email sent by EOG to Nimanburr Aboriginal Corporation (c/- Kimberley Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A

28/10/20 22 0:00	Outbound Email	(NAC-02 Xen)	Email sent from EOG to Nimanburr Aboriginal Corporation C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
15/02/20 23 10:05	Outbound Email	(KLC-10 Xen)	Seeking contacts for Wanjina Wunggurr AC, Mayala Inninalang AC, Nyul Nyul AC & Nimanburr AC	N/A	Would you be able to provide me the best contact for the following groups: * Wanjina Wunggurr AC * Mayala Inninalang AC * Nyul Nyul AC * Nimanburr AC
16/02/20 23 16:05	Outbound Email	(KLC-11 Xen)	Alternative contact for meeting Nimanburr Aboriginal Corporation.	For your attendances as contact person for Nimanburr Aboriginal Corporation.	N/A
16/02/20 23 16:15	Inbound Email	(KLC-12 Xen)	Arranging meeting with Kimberley Land Council Corporations.	Please note I have forwarded your correspondence to the Directors and/or Executives of the Corporations mentioned below. I cc'd you in on the correspondence to Nimanburr Aboriginal Corporation because the contact person email is a generic email publicly available, but some of the other Corporations use my email address to forward on to their private emails not publicly available.	
16/02/20 23 16:15	Outbound Email	(KLC-13 Xen)	Arranging meetings with Kimberley Land Council Corporations.	N/A	Thanks for passing my message on – much appreciated.
22/02/20 23 18:14	Outbound Email	(KLC-15 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I haven't had any interest come directly through to me yet – I was wondering if anything may have come through to yourself by chance? Looking at my initial email to you, I can see that I may not have provided enough information about EOG and their project to generate interest in the meet and greet. Do you think it would be worth providing some additional context to the request to meet the various groups? If so I am happy to provide. By chance, is there anyone inside the Kimberley Land Council that EOG could meet with more generally to talk about engagement with the various groups that you know of or recommend? Or yourself if you think that is appropriate? I made a request to the main KLC email (attached) late last month but haven't heard back.
24/02/20 23 12:55	Outbound Email	(KLC-14 Xen)	Arranging meeting with Kimberley Land Council / Nimanburr Aboriginal Corporation.	N/A	I am following up on the below email. We will be in Broome on Wednesday March 1 and we would like to establish some relationships in the area and were hoping to briefly introduce ourselves to someone from Nimanburr if they are available that day. Would that be yourself? Happy for someone to contact to me to discuss further; or if there is a phone number you can pass on to me I am happy to call that also.
27/02/20 23 17:46	Outbound Email	(KLC-23 Xen)	General enquiry.	N/A	Many thanks for relaying this information through – it's much appreciated. Initially we were reaching out as we will be in Broome and thought it might be a good opportunity to introduce ourselves and meet representatives of the PBCs while in town. Understandable that timing doesn't always work out that way. Regarding Mayala, EOG is currently working on their project updates to provide at a later date, unfortunately they won't be able to get this information in time for the board meeting. How often do the board meetings occur, and are you the best contact to request an agenda item on the next board meeting? More generally, from now on if EOG have information to pass onto Mayala, and Wanjina Wunggurr and Nyul Nyul ACs would you be the best contacts to submit this information? For Nimanburr, is it recommended I send to both their contacts?
28/02/20 23 10:05	Inbound Email	KLC-32 Xen	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wunggurr, Nimanburr.	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wunggurr, Nimanburr.	N/A

No concerns raised.	N/A
19/01/20 23 15:31	Outbound Email	(NLC-04 Xen)	Introduction email to Northern Land Council requesting a meet and greet in Darwin.	No response received.	I was hoping to get into contact with someone within the Northern Land Council who could assist me in how I would go about organising a meet and greet in Darwin next month. We would like to discuss an offshore project in Western Australia and have identified that there are groups in the Northern Territory who may be interested in the project. We were hoping to have a chat about the stakeholder consultation process, and next steps forward. Happy to chat further, or if you have any suggestions on someone else or the best way to organise a meet up, please reach out to me on this email. Look forward to hearing from you.
19/01/20 23 15:32	Inbound Email	(NLC-05 Xen)	Automatic reply to previous email on 19/1/23.	Thank you for your email. I am currently on leave until 31/1/23. Alternate contact details given in automatic reply.	Email to be sent to alternate contact.
19/01/20 23 15:51	Outbound Email	(NLC-06 Xen)	Introductory email sent to alternate contact as per automatic reply 19/1/23.	No response received.	I received an out of office response, listing you as the contact in their absence. Would you be able to read my original query below and assist? Or would you be able to suggest who best to address my query to if I reach out through the main NLC email?
23/01/20 23 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
24/01/20 23 12:00	Outbound Phone Call		Called the Northern Land Council to enquire re approvals required to place Public Notices at the public boat ramps from Wadeye around to East Alligator near Kakadu.	Permits will be required through NLC to enter any Aboriginal lands which are available on their website. Will also need to speak to relevant councils and national parks for access to ramps as well.	Provided background on the Beehive Project and potential EMBA should a discharge occur. Explained that we are completing engagement on the project to identify relevant persons that may be affected by the activity and that one of the engagement activities is placing Public Notices at Boat Ramps. Asked what approvals would be required to place a Public Notice at the public boat ramps from Wadeye around to East Alligator near Kakadu.
7/02/202 3 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
8/02/202 3 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly. I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.
9/02/202 3 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
9/02/202 3 17:41	Outbound Email	(NLC-11 Xen)	Meeting with Northern Land Council.	N/A	Thank you, for passing on, that is much appreciated. Looking forward to hearing more.
13/02/20 23 10:39	Outbound Email	(NLC-15 Xen)	Arranging meeting with Northern Land Council.	N/A	EOG will be in Darwin Sunday 26 and Monday 27 February. We're interested to meet with NLC representatives who are available to establish some relationships in the area, and get a broader understanding of the consultation landscape before progressing with consultation – would you be available for a quick meet and greet, or have suggestions for who to meet with?
13/02/20 23 14:14	Inbound Email	(NLC-12 Xen)	Arranging meeting with Northern Land Council.	Heritage Branch representative has passed on the below email chain, I'm currently acting Manager of NLC's Petroleum Unit. I'd be available to meet with EOG on Monday 27th of February if you're happy to nominate a suitable time.	
13/02/20 23 15:32	Outbound Email	(NLC-13 Xen)	Arranging meeting with Northern Land Council.	N/A	Thank you for touching base and offering to meet up with EOG. Would the afternoon be okay with all involved? Perhaps 2pm? Please let me know if you require some more background information from me.
20/02/20 23 11:09	Inbound Email	(NLC-14 Xen)	Arranging meeting with Northern Land Council.	N/A	I was quickly following up on the below on the time of 2pm. Are we okay to meet you in the Northern Land Council Office? We would be happy to just drop in at 2pm, if that is suitable.
24/02/20 23 9:50	Outbound Phone Call	(NLC-25 Xen)	Arranging meeting with Northern Land Council.	N/A	Attempted call to NLC Acting Manager Petroleum Unit. Left voicemail. X 2 attempts.
24/02/20 23 10:41	Outbound Phone Call	(NLC-22 Xen)	Arranging meeting with Northern Land Council.	N/A	Attempted call. Automated response cannot take call, try again later.
24/02/20 23 10:55	Outbound Phone Call	(NLC-23 Xen)	Arranging meeting with Northern Land Council.	N/A	Attempted call. Automated response cannot take call, try again later
24/02/20 23 11:26	Outbound Phone Call	(NLC-24 Xen)	Arranging meeting with Northern Land Council.	N/A	Attempted call. Automated response cannot take call, try again later.

24/02/2023 12:32	Outbound Email	(NLC-16 Xen)	Arranging meeting with Northern Land Council.	N/A	Confirming if 2pm was a suitable time to pop in and meet?
24/02/2023 13:05	Outbound Phone Call	(NLC-21 Xen)	Arranging meeting with Northern Land Council.	N/A	Confirmation of meeting and time.
24/02/2023 13:36	Inbound Email	(NLC-17 Xen)	Arranging meeting with Northern Land Council.	An NLC representative is available and will meet you on Monday. I have another meeting but the representative can reach me if there are any questions I need to answer.	N/A
27/02/2023 9:49	Inbound Email	(NLC-19 Xen)	Cancellation of todays meeting.	So sorry to have to cancel todays catch up- I'm not well and won't be in the office today. Apologies again for any inconvenience caused.	N/A
27/02/2023 10:03	Outbound Email	(NLC-20 Xen)	Arranging meeting with Northern Land Council.	N/A	I'm sorry to hear that - I hope you are able to recover quickly. We were looking forward to meeting in person. Is there an opportunity to have a teams meeting later down the line if that's possible? Would there be any opportunity for a teams meeting on Wednesday 1st, or next week as EOG are hoping to understand our next steps for their project.
8/03/2023 8:00	In Person Meeting	(NLC-28 Xen)	Meeting held with Northern Land Council to seek guidance on ways and methods to engage with communities, groups or individuals through the NT that may be affected by our Beehive Project in the Joseph Bonaparte Gulf.	Information not publicly available.	N/A
23/05/2023 23:01	Outbound Email	(NLC-26 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
30/07/2023 13:17	Outbound Phone Call	20230730 NLC Outbound Phone Call	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	1:17pm - Automated message that all our agents are busy taking other calls please try again later. 1:55pm - Confirmed communications were received and forwarded onto the relevant department. Also confirmed to continue sending correspondence through to both areas (emails provided).	1:55pm - I asked if it was preferred that we sent future correspondence direct to the relevant department.
7/07/2023 6:56	Outbound Email	(NLC-27 Xen)	Additional email address for May 2023 Beehive Project Update.	N/A	My apologies for not including you on the mail below as we discussed during our meeting to begin including you on all email communication with NLC. We have updated our contact information for NLC, and you will be on all email communication. I hope my email finds you well.
7/07/2023 6:59	Outbound Email	20230707 Email Follow Up June 2023	Follow up email seeking feedback by 21 July 2023 on update that was provided in May 2023 via email.	N/A	This message is in follow up to the email below providing an update to the Beehive project and requesting that you (or your organisation) share your assessment of how you may be affected by our proposed activities. We are kindly requesting feedback from you by 21 July 2023.
10/08/2023 4:58	Outbound Email	20230810 Email Follow Up August 2023	<ul style="list-style-type: none"> We are following up on the previous communications sent by EOG Resources Australia Block WA-488 Pty. Ltd. ("EOG") regarding its activity plans and request to consult with you regarding the Beehive project located in the Joseph Bonaparte Gulf in Western Australia. We are finalising the Environment Plans in preparation for submission to NOPSEMA (the offshore regulator) as soon as the end of August 2023 and are sending this as further reminder of the opportunity to provide feedback on EOG's proposed offshore activities. A summary of the proposed activities is available via the following links: https://www.eogresources.com/australia https://klarite.mysocialpinpoint.com.au/beehive Geotechnical Investigations: https://info.nopsema.gov.au/environment_plans/605/show_public Drilling: https://info.nopsema.gov.au/environment_plans/587/show_public Please reply to this correspondence with any feedback, objections, claims or if you know of any other persons or organisations that may have interest in this project. Alternatively, should you have no further comments to make, you may wish to let us know by responding to this email, and we will close consultation for you or your organisation. Nyul Nyul PBC Aboriginal Corporation	26/08/2022 0:00	Outbound Email	(NNPBCA C-01 Xen)	Email sent by EOG to Nyul Nyul PBC Aboriginal Corporation (c/- Kimberley Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(NNPBCA C-02 Xen)	Email sent from EOG to Nyul Nyul PBC Aboriginal Corporation C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	15/02/2023 10:05	Outbound Email	(KLC-10 Xen)	Seeking contacts for Wanjina Wunggurr AC, Mayala Inninalang AC, Nyul Nyul AC & Nimanburr AC	N/A	Would you be able to provide me the best contact for the following groups: * Wanjina Wunggurr AC * Mayala Inninalang AC * Nyul Nyul AC * Nimanburr AC
	16/02/2023 16:15	Inbound Email	(KLC-12 Xen)	Arranging meeting with Kimberley Land Council Corporations.	Please note I have forwarded your correspondence to the Directors and/or Executives of the Corporations mentioned below. I cc'd you in on the correspondence to Nimanburr Aboriginal Corporation because the contact person email is a generic email publicly available, but some of the other Corporations use my email address to forward on to their private emails not publicly available.	
	16/02/2023 16:15	Outbound Email	(KLC-13 Xen)	Arranging meetings with Kimberley Land Council Corporations.	N/A	Thanks for passing my message on – much appreciated.
	22/02/2023 18:14	Outbound Email	(KLC-15 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I haven't had any interest come directly through to me yet – I was wondering if anything may have come through to yourself by chance? Looking at my initial email to you, I can see that I may not have provided enough information about EOG and their project to generate interest in the meet and greet. Do you think it would be worth providing some additional context to the request to meet the various groups? If so I am happy to provide. By chance, is there anyone inside the Kimberley Land Council that EOG could meet with more generally to talk about engagement with the various groups that you know of or recommend? Or yourself if you think that is appropriate? I made a request to the main KLC email (attached) late last month but haven't heard back.
	27/02/2023 17:46	Outbound Email	(KLC-23 Xen)	General enquiry.	N/A	Many thanks for relaying this information through – it's much appreciated. Initially we were reaching out as we will be in Broome and thought it might be a good opportunity to introduce ourselves and meet representatives of the PBCs while in town. Understandable that timing doesn't always work out that way. Regarding Mayala, EOG is currently working on their project updates to provide at a later date, unfortunately they won't be able to get this information in time for the board meeting. How often do the board meetings occur, and are you the best contact to request an agenda item on the next board meeting? More generally, from now on if EOG have information to pass onto Mayala, and Wanjina Wunggurr and Nyul Nyul ACs would you be the best contacts to submit this information? For Nimanburr, is it recommended I send to both their contacts?
	28/02/2023 10:05	Inbound Email	KLC-32 Xen	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wunggurr, Nimanburr.	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wunggurr, Nimanburr.	N/A
	23/05/2023 23:03	Outbound Email	(NNPBCA C-03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
	30/06/2023 15:28	Outbound Phone Call	20230630 KLC Outbound Phone Call	Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	All communications received are forwarded to 2 separate email addresses previously supplied for review and response. Request that all PBC communications are emailed to email address supplied. Advised that 2 previous contacts have now left KLC. Best to check ORIC for updated emails of contact officers.	Information noted and records will be updated.
	3/07/2023 16:00	Outbound Post / Letter	20230703 Letter Follow Up July 2023	Follow up letter sent seeking feedback by 21 July 2023 on update that was provided in May 2023 via letter.	N/A	* Follow up letter with information for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. 	15/08/2023 11:44	Outbound Phone Call	20230815 KLC Outbound Phone Call	Follow up phone call. Received all emails but could not locate Wanjina-Wungurr directed email. Best to remove klc@klc email and have the emails go to legalsecretary@klc email and the ORIC emails. Can call Legal Secretary direct number, but will most likely need to leave voicemail - happy for reception to continue taking calls still if needs be. For the KLC in it's own right, email to the Executive Assistant email. Had a brief discussion on the project process, the EMBA and spill response for the information of the reception team member's general interest.	Communications received, though unsure on Wanjina-Wungurr email. Confirmed the emails that could be used.	Will update CM emails accordingly, and double check the email through to Wanjina-Wungurr.
	14/11/2023 10:56	Outbound Email	20231114 Email Follow Up November 2023	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
	24/11/2023 9:13	Outbound Email	20231124 Email Close Out November 2023	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A
	28/11/2023 6:52	Inbound Email	NNPBCAC -04 Xen	Apologise for delayed response. NNPBC would like EOG to present and share information post-AGM meeting, where a new board will be elected, with a date proposed in the New Year. Board requests personal consultation. Contact Person will keep contact and provide notice to discuss the project in the new year.	Request for personal consultation with board in 2024.	As per subsequent email.
	30/11/2023 11:06	Outbound Email	NNPBCAC -05 Xen	Thank you for acknowledging. Understand that no general or specific feedback has been provided. EOG welcome opportunity to present project to NNPBC board. EOG is located in North America, request to present virtually. Note that length of time project information has been available and no concerns identified at this time, new year meeting will be continuing consultation and not impact the resubmission of the EPs. If there is feedback for this assessment round, please provide prior to 11 December 2023.	N/A	N/A
Oolin Sunday Island Cultural Tours	23/05/2023 13:39	Outbound Email	(OSICT-01 Xen)	Beehive Project information for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance. N/A	This message is in follow up to the email below providing an update to the Beehive project and requesting that you (or your organisation) share your assessment of how you may be affected by our proposed activities. We are kindly requesting feedback from you by 21 July 2023.
	30/06/2023 15:12	Outbound Phone Call		Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	3/7/23 - 1:20pm - They received the letter / email and reviewed and note it doesn't impact the tourism operation, however considering the currents and tidal connections is thinking of sea country as she is part of Bardi Jawi. Has forwarded what she received to Bardi Jawi as well. Appreciated us reaching out.	30/6/23 - 3:12pm - Left a voicemail for return call. 30/6/23 - 4:29pm - Received a call back but missed the call. 3/7/23 - 1:20pm - Confirmed that Bardi Jawi has also been contacted, and that if there is any further comments or queries she has in future to reach out to the emails, phone numbers or myself.
	14/11/2023 10:56	Outbound Email	20231114 Email Follow Up November 2023	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
	24/11/2023 9:13	Outbound Email	20231124 Email Close Out November 2023	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A

Traditional Owner 13	13/06/20 23 9:00	Public / Group Meeting	Public Information Session Kalumburu	<ul style="list-style-type: none"> * Kalumburu Community Information Session - 12 Attendees. Feedback was provided to assist with preparation of EP. * The community members did not have any overall objections to the project. They would like it to be conducted safely and hope that they can see direct benefits to their people and their region. * They expressed appreciation for us coming to the community. Although they understand the role of the company via the approvals from the government departments, they indicated that speaking with them was more valuable and important to them than having us speak with government. * A key point to note is that the CEO, Chairperson and community members of the Kalumburu Aboriginal Corporation had a keen understanding of the difference between an offshore and onshore project and did not know who or what role NOPSEMA is responsible for. * Noted that some members asked if we had talked to Aboriginal people closest to the project activities (i.e. Wyndham and Kununurra). * A large portion of the discussion was around educating the community on company background, what is the project work, how does an EP process work, what is the title grant process. 	<ul style="list-style-type: none"> * Important Fishing area for oysters, scallops, fish, crabs, sting rays etc. * Marine Life needs to be protected eg. Turtles, Whales, Mangrove etc. * Important Cultural Heritage resources in the area include Rock Art, Marine Resources & camping locations along the shore. * Would like to see economic benefits for the local community in relation to jobs (specifically for young people to become engaged in the industry), direct payments and ensure no negative impact on tourism. * Infrastructure - the roads are not in good condition, and it is tough to get supplies locally during the wet season. If there is an emergency, the area will need to be accessible. Could infrastructure improvements arise from the industry activity? 	<ul style="list-style-type: none"> * Beehive Project information provided and discussed with attendees with responses given to answer the questions asked. * We indicated that further activities would require further EPs and associated consultation. If the exploration activity is successful, we could have discussions about the community's infrastructure and economic interests that might align with the scope of the activity.
Tiwi Islands Land Council	26/08/20 22 0:00	Outbound Email	(TIALT-01 Xen)	Email sent by EOG to Tiwi Islands Aboriginal Lands Trust providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/20 22 0:00	Outbound Email	(TIALT-02 Xen)	Email sent from EOG to Tiwi Islands Aboriginal Lands Trust providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	19/01/20 23 14:45	Outbound Phone Call	(TIALT-03 Xen)	Introductory phone call to arrange meeting with Tiwi Land Council to talk about consultation for the Beehive Project.	<p>Tiwi Land Council Comments:</p> <ul style="list-style-type: none"> * Suggested the best way forward was to send a proposal to the Acting CEO and it should contain what's planned, timespan, royalties, map, description of activities. * Mentioned that there has been some changeover internally and affecting responses to communications. * Mentioned the elections are coming up in June so there is a lot going on in the Tiwi Land Council but it is a possibility. 	<p>EOG Comments:</p> <ul style="list-style-type: none"> * Introduction made. * Outlined purpose of call that we would like to meet with Tiwi Land Council to talk about the project and understand step forward with stakeholder consultation. * Mentioned that we had sent some communications through to the Tiwi Land Council previously but no response has been received and as I was away from my computer I didn't have on hand the information or dates regarding the communications. * Asked the likelihood of being able to set up a meeting next month just based on best knowledge.
	23/01/20 23 8:45	Outbound Email	(TIALT-04 Xen)	EOG introduction to Tiwi Land Council and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Tiwi Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Tiwi Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Corporate Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	10/02/20 23 11:18	Outbound Email	(TIALT-05 Xen)	Arranging meeting with the Tiwi Land Council.	N/A	I don't know if you recall but I called you a couple of weeks back to ask some advice on getting in contact with the Tiwi Land Council. Thank you for your assistance, it was much appreciated. Are you based in Darwin yourself? We will be there at the end of the month Sunday 26 and Monday 27 February. I was wondering if you would be free for a quick coffee one of those days?
	10/02/20 23 12:47	Inbound Email	(TIALT-06 Xen)	Arranging meeting with Tiwi Land Council.	I am away Sunday 26 February arriving back in the early hours of Monday 27 February. I would like to have a coffee with you in Darwin. Do you mind please giving me some more details about EOG and their project.	N/A
	10/02/20 23 17:07	Outbound Email	(TIALT-07 Xen)	Arranging meeting with Tiwi Land Council.	N/A	EOG Resources and their project is an offshore exploration project in the Joseph Bonaparte Gulf (WA side). EOG are searching broadly around who may be an affected person for their project (and the cultural values present). We have been in contact with Northern Land Council, Tiwi Land Council and Kimberley Land Council. Our intent to meet with you is not necessarily to go into all the details of the project, but get an understanding of the lay of the land (and sea if you will). Is there a time that is best for you on the Monday?
	13/02/20 23 12:16	Inbound Email	(TIALT-09 Xen)	Arranging meeting with Tiwi Land Council.	Suggestions given on who to speak to further discussions.	
	13/02/20 23 12:18	Outbound Email	(TIALT-08 Xen)	Arranging meeting with Tiwi Land Council.	N/A	Please see below map for reference. Beehive-1 is the exploration hole location. The purple outline is the spill-zone Environment that May Be Affected (EMBA). You can see the Land Council boundaries are in green.
	13/02/20 23 14:52	Outbound Email	(TIALT-10 Xen)	Arranging meeting with Tiwi Land Council.	Thank you so much for following this up – I saw the meeting request come through and that time will be perfect I'm sure. I very much appreciate you having those discussions and assisting to organise that on my behalf. I look forward to meeting you and the members of the Tiwi Land Council.	
	27/02/20 23 10:00	In Person Meeting	(TIALT-17 Xen)	Meeting held with Tiwi Island Land Council to seek guidance on ways and methods to engage with communities, groups or individuals associated with Tiwi Islands that may be affected by our Beehive Project in the Joseph Bonaparte Gulf.	Information not publicly available.	N/A
	27/02/20 23 13:46	Outbound Email	(TIALT-11 Xen)	Provision of EOG Website post meeting.	N/A	Many thanks for you time this morning – we appreciate how busy you must be and that you were able to give us your time. As mentioned at the end of the meeting, I am sending through the link to the EOG Resources webpage to all in attendance at the meeting: https://www.eogresources.com/company/areas-of-operation/australia
	27/02/20 23 14:23	Inbound Email	(TIALT-12 Xen)	Provision of EOG website post meeting.	Thank you for attending the TLC office today to discuss the project. I can confirm that the link to the website is working fine and the information is accessible.	N/A
	27/02/20 23 14:41	Outbound Email	(TIALT-14 Xen)	Provision of EOG website details post meeting.	N/A	Wonderful – thanks for confirming.

	6/06/2023 20:55	Outbound Email	(TIALT-15 Xen)	* Follow up to meeting on 27/2/23 and provision of information. * Beehive Project Update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	* Follow up to the in-person meeting held at your office on 27 February 2023. Again, we would like to thank the Tiwi Land Council for the time spent meeting with EOG. As discussed, it is understood that the role of the TLC is to represent the Tiwi people and consult on our project directly rather than EOG reaching out to the Tiwi people outside of the TLC. EOG has put together the project information (attached) TLC indicated would be helpful in consultation efforts. If any questions or requests for additional information arises, please let us know and we will be happy to provide you with the project related information in which to respond. Your team advised that the only additional persons / organisations you recommend that EOG consult with is the Northern Land Council and Kimberley Land Council and as stated we are actively consulting with them. * Updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.
	3/07/2023 13:27	Outbound Phone Call		Follow up phone call re May 2023 Beehive Project Update made to enquire if they had and comments or feedback to be considered in the Environmental Plan to be submitted to NOPSEMA.	Advised that relevant contacts are all on the islands today for meeting so won't be able to follow up today but will follow up tomorrow when they return. Confirmed if it was the February mail-outs.	I noted that we had a more recent communication drive as we provide project updates, but that also we had a tailored communication to TLC due to the requests from the meeting in February.
	7/07/2023 8:41	Outbound Email	(TIALT-16 Xen)	Follow up email seeking feedback by 21 July 2023 on update that was provided in May 2023 via email.	N/A	This message is in follow up to the email below providing an update and the project information we discussed at our in-person meeting on 27 February 2023. We are kindly requesting feedback from you by 21 July 2023.
	9/07/2023 21:12	Inbound Email	(TIALT-18 Xen)	Feedback from May 2023 Beehive Project Update.	I can confirm that there are no cultural impacts on the Tiwi Islands from EOG Resources Beehive Project WA-488-P proposed operations because of their distance from the Tiwi Islands.	N/A
	19/07/2023 2:45	Outbound Email	(TIALT-19 Xen)	Response to feedback email 9/7/23.	N/A	Thank you very much for your response, we greatly appreciate it and will notate our project records accordingly.
	14/11/2023 12:42	Outbound Email	(TIALT - 20 Xen)	Follow up email notifying of re-submission to NOPSEMA and invitation to review the EPs.	N/A	N/A
	24/11/2023 15:48	Outbound Email	TIALT - 21 Xen	Follow up email providing opportunity and means to consult by 11 December and providing the statement that EOG believes a reasonable opportunity to consult has been provided and that legislative obligations have been met. If there is feedback, objections or claims please make contact. Alternatively, if no further comments please advise to close out consultation.	N/A	N/A
Top End Aboriginal Corporation Croker Island	26/08/2022 0:00	Outbound Email	(TEACCI-01 Xen)	Email sent by EOG to Top End Aboriginal Corporation Croker Island Pastoral Lease (c/- Northern Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(TEACCI-02 Xen)	Email sent from EOG to Top End Aboriginal Corporation Croker Island C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/2023 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitation to contact me.
	7/02/2023 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
	8/02/2023 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly. I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.
	9/02/2023 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would	

				be best placed to discuss further in regards to what you have proposed below.

Top End Aboriginal Corporation Spirit Hills Pastoral Lease	26/08/20 22 0:00	Outbound Email	(TEACSHPL- 01 Xen)	Email sent by EOG to Top End Aboriginal Corporation Spirit Hills Pastoral Lease (c/- Northern Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/20 22 0:00	Outbound Email	(TEACSHPL- 02 Xen)	Email sent from EOG to Top End Aboriginal Corporation Spirit Hills Pastoral Lease C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	23/01/20 23 8:48	Outbound Email	(NLC-07 Xen)	Introductory email and request for meeting in Darwin.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). As part of the process for developing an Environmental Plan, the Northern Land Council has been identified as both a relevant person, and a representative body of other identified relevant persons. EOG Resources is an American energy company and representatives from America will be in Australia in February. On behalf of EOG, I would like to organise a brief meet and greet in Darwin to establish a relationship with Northern Land Council members to further our understanding on the best way forward regarding stakeholder consultation for the EOG project. Could you please assist me in identifying who would be the best person/people within your Organisational Structure for this type of project, for the EOG representative to meet and establish a relationship with? I understand you will have a number of priorities, but the date EOG is proposing to be in Darwin is Monday 27 February 2022. If you have any questions please do not hesitate to contact me.
	7/02/202 3 22:05	Inbound Email	(NLC-08 Xen)	Meeting with Northern Land Council.	I was on extended leave and just catching up on my emails. Let me know the groups in NT and I can point you in the right direction on who would be best placed to assist.	N/A
	8/02/202 3 10:47	Outbound Email	(NLC-09 Xen)	Meeting with Northern Land Council.	N/A	More broadly, looking at the NLC Region map – it is coastline groups within Victoria River District, Darwin/Daly/Wagait and West Arnhem. Looking at my more specific list: * Top End Aboriginal Corporation * Legune Pastoral Lease * Spirit Hill Pastoral No 2 * Croker Island * Larrakia * Daly River/Port Keats Aboriginal Land Trust * Kenbi Aboriginal Land Trust * Arnhem Land Aboriginal Land Trust * Delissaville/Wagait/Larrakia Aboriginal Land Trust * Limilngan-Wulna (Land Holding) Aboriginal Corporation * Cobourg Peninsula Sanctuary Land Trust * Durduga Tree Point Aboriginal Association Incorporate (Tree Point Community) * Any other potential clans/TOs/Aboriginal stakeholders along the coastline At the moment NNTT is down, and I did want to cross reference again to see that I captured everything/spelt correctly. I understand that's a lot of groups, and you might not be able to address or assist with them all. EOG will be in Darwin Sunday 26 and Monday 27 February. I sent an email to the reception (please see attached). We're not intending for a full community consultation as yet, but really interested to meet with NLC representatives who are available and establish some relationships in the area – including yourself if you're available and think it would be of benefit. Look forward to hearing back from you, and thank you for getting back me.
	9/02/202 3 17:37	Inbound Email	(NLC-10 Xen)	Meeting with Northern Land Council.	I have copied in (Branch Manager - Resources and Energy) and (Legal Practice Manager - Resources and Energy) who work in the Resources and Energy sector within NLC and would be best placed to discuss further in regards to what you have proposed below.	
	23/05/20 23 23:07	Outbound Email	(TEACSHPL- 03 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance. Traditional Owner 14	13/06/2023 9:00	Public / Group Meeting	Public Information Session Kalumburu	<ul style="list-style-type: none"> Kalumburu Community Information Session - 12 Attendees. Feedback was provided to assist with preparation of EP. The community members did not have any overall objections to the project. They would like it to be conducted safely and hope that they can see direct benefits to their people and their region. They expressed appreciation for us coming to the community. Although they understand the role of the company via the approvals from the government departments, they indicated that speaking with them was more valuable and important to them than having us speak with government. A key point to note is that the CEO, Chairperson and community members of the Kalumburu Aboriginal Corporation had a keen understanding of the difference between an offshore and onshore project and did not know who or what role NOPSEMA is responsible for. Noted that some members asked if we had talked to Aboriginal people closest to the project activities (i.e. Wyndham and Kununurra). A large portion of the discussion was around educating the community on company background, what is the project work, how does an EP process work, what is the title grant process. 	<ul style="list-style-type: none"> Important Fishing area for oysters, scallops, fish, crabs, sting rays etc. Marine Life needs to be protected eg. Turtles, Whales, Mangrove etc. Important Cultural Heritage resources in the area include Rock Art, Marine Resources & camping locations along the shore. Would like to see economic benefits for the local community in relation to jobs (specifically for young people to become engaged in the industry), direct payments and ensure no negative impact on tourism. Infrastructure - the roads are not in good condition, and it is tough to get supplies locally during the wet season. If there is an emergency, the area will need to be accessible. Could infrastructure improvements arise from the industry activity? 	<ul style="list-style-type: none"> Beehive Project information provided and discussed with attendees with responses given to answer the questions asked. We indicated that further activities would require further EPs and associated consultation. If the exploration activity is successful, we could have discussions about the community's infrastructure and economic interests that might align with the scope of the activity.
Wardi Limited	15/02/2023 10:28	Outbound Email / Inbound Email	(WLD-03 Xen)	Request to meet, followed by follow up call and follow up email.	GM has stated that KLC and GAC are the correct group to discuss Native Title related matters.	Refer all matters to GAC.

Wanjina-Wungurr Aboriginal Corporation	26/08/2022 0:00	Outbound Email	(WWAC-01 Xen)	Email sent by EOG to Wanjina-Wungurr Aboriginal Corporation (c/- Kimberley Land Council) providing information on EOG, Beehive Project update, Beehive Project location, where to find information flyers and information regarding the project on EOG website, inviting for comments or questions and information about how sensitive information would be handled.	No concerns raised.	N/A
	28/10/2022 0:00	Outbound Email	(WWAC-02 Xen)	Email sent from EOG to Wanjina-Wungurr Aboriginal Corporation C/ Kimberley Land Council providing Beehive Project update, providing details of where information can be found, information on how sensitive information would be handled, seeking feedback / objections / claims for the project and asking if there are other persons / organisations that may have interest in the project.	No concerns raised.	N/A
	13/02/2023 10:54	Outbound Email	(WWAC-03 Xen)	Arranging meeting with Wanjina-Wungurr Aboriginal Corporation.	N/A	You may recall receiving communications from EOG Resources (via email and / or letter) regarding their Beehive project, an offshore exploration project in the Joseph Bonaparte Gulf (WA). EOG would like to organise a brief meet and greet in Broome to establish a relationship with Wanjina-Wungurr Aboriginal Corporation on Wednesday 1 March 2022. Would you have any availability for a quick informal meet and greet on that day?
	15/02/2023 10:05	Outbound Email	(KLC-10 Xen)	Seeking contacts for Wanjina Wungurr AC, Mayala Inninalang AC, Nyul Nyul AC & Nimanburr AC	N/A	Would you be able to provide me the best contact for the following groups: * Wanjina Wungurr AC * Mayala Inninalang AC * Nyul Nyul AC * Nimanburr AC
	16/02/2023 16:15	Inbound Email	(KLC-12 Xen)	Arranging meeting with Kimberley Land Council Corporations.	Please note I have forwarded your correspondence to the Directors and/or Executives of the Corporations mentioned below. I cc'd you in on the correspondence to Nimanburr Aboriginal Corporation because the contact person email is a generic email publicly available, but some of the other Corporations use my email address to forward on to their private emails not publicly available.	
	16/02/2023 16:15	Outbound Email	(KLC-13 Xen)	Arranging meetings with Kimberley Land Council Corporations.	N/A	Thanks for passing my message on – much appreciated.
	22/02/2023 18:14	Outbound Email	(KLC-15 Xen)	Arranging meeting with Kimberley Land Council.	N/A	I haven't had any interest come directly through to me yet – I was wondering if anything may have come through to yourself by chance? Looking at my initial email to you, I can see that I may not have provided enough information about EOG and their project to generate interest in the meet and greet. Do you think it would be worth providing some additional context to the request to meet the various groups? If so I am happy to provide. By chance, is there anyone inside the Kimberley Land Council that EOG could meet with more generally to talk about engagement with the various groups that you know of or recommend? Or yourself if you think that is appropriate? I made a request to the main KLC email (attached) late last month but haven't heard back.
	27/02/2023 17:46	Outbound Email	(KLC-23 Xen)	General enquiry.	N/A	Many thanks for relaying this information through – it's much appreciated. Initially we were reaching out as we will be in Broome and thought it might be a good opportunity to introduce ourselves and meet representatives of the PBCs while in town. Understandable that timing doesn't always work out that way. Regarding Mayala, EOG is currently working on their project updates to provide at a later date, unfortunately they won't be able to get this information in time for the board meeting. How often do the board meetings occur, and are you the best contact to request an agenda item on the next board meeting? More generally, from now on if EOG have information to pass onto Mayala, and Wanjina Wungurr and Nyul Nyul ACs would you be the best contacts to submit this information? For Nimanburr, is it recommended I send to both their contacts?

28/02/2023 10:05	Inbound Email	KLC-32 Xen	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wungurr, Nimanburr.	I can confirm that you are correct with your advice regarding the appropriate people to send through your requests regarding: Mayala, Nyul Nyul and Wanjina Wungurr, Nimanburr.	N/A
23/05/2023 23:11	Outbound Email	(WWAC-04 Xen)	Beehive Project update for proposed Geotechnical & Drilling activities and seeking feedback for these 2 proposed activities to assist with Environment Plan acceptance.	N/A	<ul style="list-style-type: none"> * Follow up on updated information and flyer for Beehive Project Geotechnical and Exploration Drilling provided: * The Geotechnical environment plan is currently under assessment with NOPSEMA with the activity scheduled to occur over approximately 2 weeks between the 1st of October 2023 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2023. More information will be provided prior to the start of this geotechnical program. * Drilling of a single exploration well, Beehive-1, is planned to take place over a 55-to-100-day period between the 1st of January 2024 and no later than the 31st of December 2025, which was previously estimated to occur between March 2023 and December 2024. The drilling environment plan is currently under assessment with NOPSEMA with activity timing contingent on the receipt of environment plan acceptance, rig, and equipment availability. More information will be provided prior to the start of drilling. * Guidance provided to EOG Australia Website and NOPSEMA website for further information and access to EP's. * Request made to provide feedback on any affects the Beehive Project may have to them to which we will assess and respond as required. * Information provided on how sensitive information is handled. * Options provided to respond via email, mail or phone.

N/A	<ul style="list-style-type: none"> * Follow up email seeking feedback on Beehive Project update. * Advised we are finalising the Environment Plans in preparation for submission to NOPSEMA as soon as the end of August 2023 and are sending this as further reminder of the opportunity to provide feedback on EOG's proposed offshore activities. * Provided website links to the Project Information and EP's and also supplied email, mail and phone options to provide feedback, objections, claims or if you know of any other persons or organisations that may have interest in this project. * Requested if they have no further comments to make, to let us know by responding to this email, and we will close consultation for you or your organisation.
15/08/2023 11:44	Outbound Phone Call	20230815 KLC Outbound Phone Call	Follow up phone call. Received all emails but could not locate Wanjina-Wungurr directed email. Best to remove klc@klc email and have the emails go to legalsecretary@klc email and the ORIC emails. Can call Legal Secretary direct number, but will most likely need to leave voicemail - happy for reception to continue taking calls still if needs be. For the KLC in it's own right, email to the Executive Assistant email. Had a brief discussion on the project process, the EMBA and spill response for the information of the reception team member's general interest.	Communications received, though unsure on Wanjina-Wungurr email. Confirmed the emails that could be used.	Will update CM emails accordingly, and double check the email through to Wanjina-Wungurr. Wanjina-Wungurr email sent 28 July according to CM.

Conservation Council WA	8/06/2022 0:00	Inbound Post / Letter	(CCWA-01)	CCWA provided public comment via NOPSEMA on the Drilling EP Rev 0 expressing concern for a range of environmental issues.	CCWA concerns raised: a) the potential impacts to the Joseph Bonaparte Gulf Australian Marine Park, the North Kimberley Marine Park, the Ord River Floodplain, the King Shoals Sanctuary Zone and the Cape Domett Special Purpose Zone; b) the measures the Proponent will apply to minimise the risks to significant environmental receptors; c) the management of its GHGe, the cumulative impacts of its GHGe in the region, and the measures it will apply to reduce or offset any residual climate impacts from its GHGe; d) the misrepresentative claims regarding the application of the IAP2 criteria and values in the stakeholder consultation approach; and e) consultation with other relevant persons or organisations. Consultation with a much wider group of relevant persons must first be initiated in order for the Proponent to have fulfilled its obligations under Regulation 11A (1)(d) of the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations.	Refer to email 26-Jul-22.

	14/06/20 23 6:42	Inbound Email	(CSIRO-02 Xen)	Feedback to May 2023 Project Update.	Thank you for your correspondence in regard to the Beehive Project in the Joseph Bonaparte Gulf. On behalf of CSIRO, I have attached a response summarising CSIRO's historical and ongoing marine and coastal activities and interests in the JBG region. Feedback points from the summary: * Majority of fishing effort occurs on adult prawns to the north and north-west of the drilling location. * Possible effects of drilling activities on migration of prawn larvae and post larvae from their offshore spawning grounds, through the drill zone and further out to sea to the adult prawn habitats in the marine waters about 60 - 80m deep in the north-west / central region of the JBG. * Possible effects of seismic activities on threatened, endangered and protected species that are known to be particularly sensitive to noise in the JBG. * Possible high turbidity, loss of phytoplankton food resources, physical and acoustic impediment from activities in the JBG.	N/A
	14/06/20 23 20:15	Social Pinpoint Survey	CSIRO-07 Xen	Survey submission in social pinpoint outlining functions, interests and activities, requesting to opt into consultation process, and providing feedback to both Geotech and Exploration activities.	Outlining CSIROs historical and ongoing activities and highlighting foreseen impacts and risks regarding numerous species. Duplicate information to the inbound email provided on the same day.	N/A
	19/07/20 23 3:04	Outbound Email	(CSIRO-03 Xen)	Response to feedback email 14/6/23.	N/A	Thank you for your correspondence dated 14 June 2023 regarding the Beehive-1 drilling campaign. We welcome the information you provided, which supplements our knowledge of the region and will be added to the Existing Environment chapter of the Beehive-1 Drilling Environment Plan (EP). You raised a concern about impeding the passage of post-larval and juvenile redleg banana prawns by drilling activities; possibly high turbidity, loss of phytoplankton food resources, physical and acoustic impediment. Section 7.6.1 of the Beehive-1 Drilling EP presents the environmental impact assessment for the discharge of drilling cuttings and muds. With regard to turbidity, the total suspended solid (TSS) modelling indicates that the area affected by high exposure (>1,830 mg/L, which may result in fauna mortality) is limited to <0.01 sq km, the area of low exposure (10-1,830 mg/L) is 12.20 sq km and the area affected by the minimum reporting threshold (5-10 mg/L) is 10.4 sq km (see Table 7.21 of the EP). Section 7.6.4 of the Drilling EP presents the EIA for the modelling results in the context of the Joseph Bonaparte Gulf, with the impact to the Northern Prawn Fishery determined to be negligible, due primarily to a very small area of impact within a very large gulf. The physical footprint of the drilling operation is limited to three jack-up rig legs. Each leg occupies an area of about 254 sq metres, a total area of 769 sq metres. The matrix-type design of the legs allows for water to flow through them. In the context of the size of the Joseph Bonaparte Gulf, this nature and temporary area of occupation will have negligible impact on prawn movements. As a jack-up rig that does not require dynamic positioning to remain on station (i.e., it is anchored to the seabed by its legs), there is minimal underwater sound generated by jack-up drill rigs, even while drilling (see EP Section 7.5). If vertical seismic profiling (VSP) is undertaken, the area expected to be affected by sound greater than 160 dB (sound levels greater than that affecting the behaviour of marine invertebrates such as prawns) is less than 500 m from the sound source. Marine mammals are described in Section 5.4.5 of the drilling EP. With regards to noise impacts, potential impacts to marine mammals are assessed in Section 7.5 and have been assessed as 'negligible'. Underwater sound modelling

					<p>undertaken for VSP in Victoria indicated an area of impact of 304 m to recoverable injury, with the thresholds for behavioural impacts and temporary or permanent threshold shift (TTS and PTS) for marine mammals not reached. VSP is temporary in nature (12-24 hours) and as such, the impacts to marine mammals and crustaceans are considered negligible.</p> <p>Pristis spp (sawfish) are described and have their habitats mapped in Section 5.4.4 of the drilling EP. We will use the references you cited to determine if there's additional information on these species that can be described in the EP.</p> <p>Given the EIA conducted for prawns for the Beehive-1 drilling campaign, EOG does not believe that the discharge of drill cuttings and muds will impede the passage of post-larval and juvenile redleg banana prawns. We welcome a call with you if you would like to discuss this further or have information for us that differs from that presented in the EIA.</p>

Appendix 9 Fisheries Compensation Protocol - Summary

Fisheries Compensation Protocol - Summary

EOG Resources - Beehive Exploration

EOG Resources Australia Block WA-488 Pty Ltd ('EOG') is the titleholder of exploration permit WA-488-P (the 'Permit') and proposes to drill the Beehive-1 exploration well and conduct a related pre-drill geotechnical assessment (together the 'Activities') within Commonwealth waters approximately 80 kilometres off the Western Australian coastline, located in the Joseph Bonaparte Gulf. More details about these Activities can be found on EOG's website set out below.

Introduction

Offshore petroleum titleholders and licenced commercial fishers have mutual access rights and use of marine commons. With such rights comes the obligation to carry out activities safely and without interference with each other. EOG is committed to minimising impacts to commercial fishers from its offshore activities.

EOG has developed a Fisheries Compensation Protocol ('the Protocol'), summarised here, that outlines EOG's approach to minimising impacts to commercial fishers. The Protocol has been developed in line with Australian offshore industry best practice guidance (NERA, 2021). EOG's aim is to consult with commercial fishers in an open, transparent and respectful manner in order to promote safety and understand and minimise environmental and economic impacts.

Safety

EOG is focused on operating safely, which sometimes requires restricting access to defined areas while an activity is underway. EOG acknowledges that this may temporarily interfere with commercial fishing operations.

Environmental protection

All offshore petroleum activities must prepare Environment Plans (EP) that outline the potential impacts and risks to the environment, including risks to socio-economic factors such as commercial fishing. The EPs must be assessed and accepted by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) before any activities can commence. The EP must propose control measures to reduce impacts and risk to be 'as low as reasonably practicable' (ALARP) and acceptable.

The Protocol is one such control measure in the unlikely event where impacts to the commercial fishing industry cannot be avoided or minimised and where the impacts may cause an economic loss.

Consultation

EOG works to identify commercial fishers potentially impacted by its Activities. EOG seeks to consult with commercial fishers in an open, transparent and respectful manner to 1) inform the environmental assessment process, and 2) seek to minimise potential disturbance to fishing grounds.

EOG is also making efforts to determine whether fishers wish to be consulted directly or via their representative association, where one exists.

Where a commercial fisher or fishing association believes they could be impacted by EOG's Activities and informs EOG as such, EOG will endeavour to provide activity-specific information as requested by the commercial fisher and/or association, discuss the issues and work to avoid or minimise impacts.

Economic loss

EOG is committed to the principle that a commercial fisher should not suffer an economic loss as a direct result of EOG Activities. Losses may be incurred for one of the following reasons:

- Fishing not undertaken - due to the need to avoid fishing in an EOG activity area and not being able to fish elsewhere;
- Displacement from fishing – due to the displacement from the EOG activity at the time of the activity resulting in reduced catch from fishing in a new area and/or increased running costs;
- Fishing gear loss or damage – loss of or damage to fishing gear as a result of accidental and uninsured physical contact with EOG vessels or in-water equipment.

Claims procedure

EOG works to provide a fair, simple and transparent process for a commercial fisher to claim compensation, where the commercial fisher has consulted with EOG in good faith ahead of project activities and provided that the fisher has taken steps to avoid impacts and mitigate any economic losses to their business as a result of the EOG Activities.

Claim procedure

A full copy of the Fisheries Compensation Protocol is available upon written request and provides simple claim forms for each type of loss (as listed above). Claims must be made within three months of the claimed event and must be supported by historical and current catch and effort evidence.

Before approving a claim, EOG may request to meet with the commercial fisher or their representative to seek further details. EOG will use best endeavours to approve claims within 60 days of receiving a claim.

Resolving disagreements

The Protocol outlines a process for managing disagreements regarding a claim, including appointing an independent mediator (paid by EOG) to facilitate both parties reaching an agreement.

Feedback

EOG encourages you to ask questions or provide feedback. Please use the following contact details to do so:

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar)	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	1
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	19
Listed Migratory Species:	37

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	None

Key Ecological Features

[\[Resource Information \]](#)

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Carbonate bank and terrace system of the Sahul Shelf	North-west

Biologically Important Areas

Scientific Name	Behaviour	Presence
Marine Turtles		
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar)	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	2
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	20
Listed Migratory Species:	39

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	1
Wetlands of International Importance (Ramsar)	1
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	2
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	46
Listed Migratory Species:	63

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <https://www.dcceew.gov.au/parks-heritage/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	1

Sternula albifrons Little Tern [82849]		Species or species habitat may occur within area
Migratory Marine Species		
Anoxypristis cuspidata Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat known to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat may occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Species or species habitat known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Dugong dugon Dugong [28]		Species or species habitat known to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Isurus paucus Longfin Mako [82947]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area
Megaptera novaeangliae Humpback Whale [38]		Species or species habitat likely to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat likely to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat likely to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Breeding known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Breeding known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat likely to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Sousa sahalensis as Sousa chinensis Australian Humpback Dolphin [87942]		Species or species habitat known to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Migratory Terrestrial Species		
Cecropis daurica Red-rumped Swallow [80610]		Species or species habitat may occur within area
Cuculus optatus Oriental Cuckoo, Horsfield's Cuckoo [86651]		Species or species habitat may occur within area
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area
Motacilla flava Yellow Wagtail [644]		Species or species habitat likely to occur within area
Rhipidura rufifrons Rufous Fantail [592]		Species or species habitat likely to occur within area
Migratory Wetlands Species		
Acrocephalus orientalis Oriental Reed-Warbler [59570]		Species or species habitat may occur within area
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area
Arenaria interpres Ruddy Turnstone [872]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris acuminata Sharp-tailed Sandpiper [874]		Species or species habitat known to occur within area
Calidris alba Sanderling [875]		Species or species habitat likely to occur within area
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area
Calidris tenuirostris Great Knot [862]	Critically Endangered	Species or species habitat likely to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Species or species habitat likely to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area
Limnodromus semipalmatus Asian Dowitcher [843]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]		Species or species habitat likely to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius phaeopus Whimbrel [849]		Species or species habitat likely to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pluvialis squatarola Grey Plover [865]		Species or species habitat likely to occur within area

Listed Marine Species [\[Resource Information \]](#)

Scientific Name	Threatened Category	Presence Text
Bird		
Acrocephalus orientalis Oriental Reed-Warbler [59570]		Species or species habitat may occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area
Anseranas semipalmata Magpie Goose [978]		Species or species habitat may occur within area overfly marine area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Arenaria interpres Ruddy Turnstone [872]		Species or species habitat likely to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]		Species or species habitat known to occur within area
Calidris alba Sanderling [875]		Species or species habitat likely to occur within area
Calidris canutus Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area overfly marine area
Calidris tenuirostris Great Knot [862]	Critically Endangered	Species or species habitat likely to occur within area overfly marine area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat known to occur within area
Cecropis daurica as Hirundo daurica Red-rumped Swallow [80610]		Species or species habitat may occur within area overfly marine area
Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat likely to occur within area overfly marine area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Species or species habitat likely to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area overfly marine area
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat likely to occur within area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area overfly marine area
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area overfly marine area
Limnodromus semipalmatus Asian Dowitcher [843]		Species or species habitat may occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]		Species or species habitat likely to occur within area overfly marine area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Motacilla flava Yellow Wagtail [644]		Species or species habitat likely to occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius phaeopus Whimbrel [849]		Species or species habitat likely to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat likely to occur within area
Pluvialis squatarola Grey Plover [865]		Species or species habitat likely to occur within area overfly marine area
Rhipidura rufifrons Rufous Fantail [592]		Species or species habitat likely to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area overfly marine area
Sterna dougallii Roseate Tern [817]		Breeding likely to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Thalasseus bengalensis as Sterna bengalensis Lesser Crested Tern [66546]		Breeding known to occur within area
Fish		
Bhanotia fasciolata Corrugated Pipefish, Barbed Pipefish [66188]		Species or species habitat may occur within area
Campichthys tricarinatus Three-keel Pipefish [66192]		Species or species habitat may occur within area
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
Corythoichthys amplexus Fijian Banded Pipefish, Brown-banded Pipefish [66199]		Species or species habitat may occur within area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
Corythoichthys haematopterus Reef-top Pipefish [66201]		Species or species habitat may occur within area
Corythoichthys intestinalis Australian Messmate Pipefish, Banded Pipefish [66202]		Species or species habitat may occur within area
Corythoichthys schultzi Schultz's Pipefish [66205]		Species or species habitat may occur within area
Cosmocampus banneri Roughridge Pipefish [66206]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Festucalex cinctus Girdled Pipefish [66214]		Species or species habitat may occur within area
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area
Halicampus spinostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area
Haliichthys taeniophorus Ribbioned Pipehorse, Ribbioned Seadragon [66226]		Species or species habitat may occur within area
Hippichthys cyanospilos Blue-speckled Pipefish, Blue-spotted Pipefish [66228]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippichthys parvicarinatus Short-keel Pipefish, Short-keeled Pipefish [66230]		Species or species habitat may occur within area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammal		
Dugong dugon Dugong [28]		Species or species habitat known to occur within area
Reptile		
Acalyptophis peronii Horned Seasnake [1114]		Species or species habitat may occur within area
Aipysurus apraefrontalis Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area
Aipysurus duboisii Dubois' Seasnake [1116]		Species or species habitat may occur within area
Aipysurus eydouxii Spine-tailed Seasnake [1117]		Species or species habitat may occur within area
Aipysurus foliosquama Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat may occur within area
Aipysurus laevis Olive Seasnake [1120]		Species or species habitat may occur within area
Astrotia stokesii Stokes' Seasnake [1122]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Caretta caretta Loggerhead Turtle [1763]	Endangered	Species or species habitat known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Chitulia inornata as Hydrophis inornatus Plain Seasnake [87379]		Species or species habitat may occur within area
Chitulia ornata as Hydrophis ornatus Spotted Seasnake, Ornate Reef Seasnake [87377]		Species or species habitat may occur within area
Crocodylus johnstoni Freshwater Crocodile, Johnston's Crocodile, Johnstone's Crocodile [1773]		Species or species habitat may occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Disteira kingii Spectacled Seasnake [1123]		Species or species habitat may occur within area
Disteira major Olive-headed Seasnake [1124]		Species or species habitat may occur within area
Emydocephalus annulatus Turtle-headed Seasnake [1125]		Species or species habitat may occur within area
Enhydrina schistosa Beaked Seasnake [1126]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat known to occur within area
Hydrelaps darwiniensis Black-ringed Seasnake [1100]		Species or species habitat may occur within area
Hydrophis atriceps Black-headed Seasnake [1101]		Species or species habitat may occur within area
Hydrophis elegans Elegant Seasnake [1104]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli Small-headed Seasnake [75601]		Species or species habitat may occur within area
Lapemis curtus as Lapemis hardwickii Spine-bellied Seasnake [83554]		Species or species habitat may occur within area
Leioselasma coggeri as Hydrophis coggeri Black-headed Sea Snake, Slender-necked Seasnake [87373]		Species or species habitat may occur within area
Leioselasma pacifica as Hydrophis pacificus Large-headed Seasnake, Pacific Seasnake [87378]		Species or species habitat may occur within area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Parahydrophis mertoni Northern Mangrove Seasnake [1090]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Pelamis platurus Yellow-bellied Seasnake [1091]		Species or species habitat may occur within area
Whales and Other Cetaceans [Resource Information]		
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Species or species habitat likely to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Breeding known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Sousa sahalensis Australian Humpback Dolphin [87942]		Species or species habitat known to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area

Key Ecological Features [[Resource Information](#)]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Carbonate bank and terrace system of the Sahul Shelf	North-west
Pinnacles of the Bonaparte Basin	North-west

Biologically Important Areas

Scientific Name	Behaviour	Presence
Dolphins		
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Breeding	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Calving	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Foraging (high density prey)	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Resting	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Significant habitat - unknown behaviour	Likely to occur

Scientific Name	Behaviour	Presence
Marine Turtles		
Caretta caretta Loggerhead Turtle [1763]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting buffer	Known to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting	Likely to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur
Seabirds		
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Sharks		
Rhincodon typus Whale Shark [66680]	Foraging	Known to occur

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar)	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	1
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	20
Listed Migratory Species:	38

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	None
Commonwealth Heritage Places:	None
Listed Marine Species:	59
Whales and Other Cetaceans:	14

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar)	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	1
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	20
Listed Migratory Species:	38

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	None
Commonwealth Heritage Places:	None
Listed Marine Species:	67
Whales and Other Cetaceans:	14
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	2
Habitat Critical to the Survival of Marine Turtles:	1

Extra Information

This part of the report provides information that may also be relevant to the area you have

Key Ecological Features

[\[Resource Information \]](#)

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region	Buffer Status
Carbonate bank and terrace system of the Sahul Shelf	North-west	In feature area

Biologically Important Areas

Scientific Name	Behaviour	Presence	Buffer Status
Marine Turtles			
Chelonia mydas			
Green Turtle [1765]	Foraging	Known to occur	In feature area
Lepidochelys olivacea			
Olive Ridley Turtle [1767]	Foraging	Known to occur	In feature area
Natator depressus			
Flatback Turtle [59257]	Internesting buffer	Known to occur	In feature area

Seabirds

Thalasseus bengalensis			
Lesser Crested Tern [66546]	Breeding	Known to occur	In feature area

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	1
Wetlands of International Importance (Ramsar)	1
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	1
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	47
Listed Migratory Species:	64

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Antechinus bellus Fawn Antechinus [344]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area	In feature area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Conilurus penicillatus Brush-tailed Rabbit-rat, Brush-tailed Tree-rat, Pakooma [132]	Vulnerable	Species or species habitat may occur within area	In feature area
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat known to occur within area	In feature area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat known to occur within area	In feature area
Mesembriomys gouldii gouldii Black-footed Tree-rat (Kimberley and mainland Northern Territory), Djintamoonga, Manbul [87618]	Endangered	Species or species habitat may occur within area	In feature area
Petrogale concinna canescens Nabarlek (Top End) [87606]	Endangered	Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Petrogale concinna monastria Nabarlek (Kimberley) [87607]	Endangered	Species or species habitat likely to occur within area	In feature area
Phascogale pirata Northern Brush-tailed Phascogale [82954]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Saccolaimus saccolaimus nudicluniatus Bare-rumped Sheath-tailed Bat, Bare-rumped Sheath-tail Bat [66889]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Trichosurus vulpecula arnhemensis Northern Brushtail Possum [83091]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Xeromys myoides Water Mouse, False Water Rat, Yirrkoo [66]	Vulnerable	Species or species habitat likely to occur within area	In feature area
REPTILE			
Acanthopphis hawkei Plains Death Adder [83821]	Vulnerable	Species or species habitat may occur within area	In feature area
Aipysurus apraefrontalis Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Aipysurus foliosquama Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat may occur within area	In feature area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Species or species habitat known to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat known to occur within area	In feature area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area	In feature area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area	In feature area

SHARK

Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area	In feature area
Glyphis garricki Northern River Shark, New Guinea River Shark [82454]	Endangered	Breeding known to occur within area	In feature area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Breeding known to occur within area	In feature area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area	In feature area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In feature area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat likely to occur within area	In feature area

Listed Migratory Species

Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Species or species habitat likely to occur within area	In feature area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area overfly marine area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]		Breeding known to occur within area	In feature area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area	In feature area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat likely to occur within area	In feature area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area overfly marine area	In feature area
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area	In feature area
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area overfly marine area	In feature area
Limnodromus semipalmatus Asian Dowitcher [843]		Species or species habitat may occur within area overfly marine area	In feature area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area	In feature area
Limosa limosa Black-tailed Godwit [845]		Species or species habitat likely to occur within area overfly marine area	In feature area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area	In feature area
Motacilla flava Yellow Wagtail [644]		Species or species habitat likely to occur within area overfly marine area	In feature area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Numenius phaeopus Whimbrel [849]		Species or species habitat likely to occur within area	In feature area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area	In feature area
Pandion haliaetus Osprey [952]		Breeding known to occur within area	In feature area
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area	In buffer area only
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat likely to occur within area	In feature area
Pluvialis squatarola Grey Plover [865]		Species or species habitat likely to occur within area overfly marine area	In feature area
Rhipidura rufifrons Rufous Fantail [592]		Species or species habitat likely to occur within area overfly marine area	In feature area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area overfly marine area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Sterna dougallii Roseate Tern [817]		Breeding likely to occur within area	In feature area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area	In feature area
Thalasseus bengalensis as Sterna bengalensis Lesser Crested Tern [66546]		Breeding known to occur within area	In feature area
Fish			
Bhanotia fasciolata Corrugated Pipefish, Barbed Pipefish [66188]		Species or species habitat may occur within area	In feature area
Campichthys tricarinatus Three-keel Pipefish [66192]		Species or species habitat may occur within area	In feature area
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area	In feature area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area	In feature area
Corythoichthys amplexus Fijian Banded Pipefish, Brown-banded Pipefish [66199]		Species or species habitat may occur within area	In feature area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area	In feature area
Corythoichthys haematopterus Reef-top Pipefish [66201]		Species or species habitat may occur within area	In feature area
Corythoichthys intestinalis Australian Messmate Pipefish, Banded Pipefish [66202]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Corythoichthys schultzi Schultz's Pipefish [66205]		Species or species habitat may occur within area	In feature area
Cosmocampus banneri Roughridge Pipefish [66206]		Species or species habitat may occur within area	In feature area
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area	In feature area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area	In feature area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area	In feature area
Festucalex cinctus Girdled Pipefish [66214]		Species or species habitat may occur within area	In feature area
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area	In feature area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area	In feature area
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area	In feature area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area	In feature area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area	In feature area
Hippichthys cyanospilos Blue-speckled Pipefish, Blue-spotted Pipefish [66228]		Species or species habitat may occur within area	In feature area
Hippichthys parvicarinatus Short-keel Pipefish, Short-keeled Pipefish [66230]		Species or species habitat may occur within area	In feature area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area	In feature area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area	In feature area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area	In feature area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area	In feature area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area	In feature area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area	In feature area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area	In feature area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area	In feature area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area	In feature area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area	In feature area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area	In feature area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area	In feature area
Mammal			
Dugong dugon Dugong [28]		Species or species habitat known to occur within area	In feature area
Reptile			
Acalyptophis peronii Horned Seasnake [1114]		Species or species habitat may occur within area	In feature area
Aipysurus apraefrontalis Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area	In feature area
Aipysurus duboisii Dubois' Seasnake [1116]		Species or species habitat may occur within area	In feature area
Aipysurus eydouxii Spine-tailed Seasnake [1117]		Species or species habitat may occur within area	In feature area
Aipysurus foliosquama Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Aipysurus laevis Olive Seasnake [1120]		Species or species habitat may occur within area	In feature area
Astrotia stokesii Stokes' Seasnake [1122]		Species or species habitat may occur within area	In feature area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Species or species habitat known to occur within area	In feature area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In feature area
Chitulia inornata as Hydrophis inornatus Plain Seasnake [87379]		Species or species habitat may occur within area	In feature area
Chitulia ornata as Hydrophis ornatus Spotted Seasnake, Ornate Reef Seasnake [87377]		Species or species habitat may occur within area	In feature area
Crocodylus johnstoni Freshwater Crocodile, Johnston's Crocodile, Johnstone's Crocodile [1773]		Species or species habitat may occur within area	In feature area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area	In feature area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area	In feature area
Disteira kingii Spectacled Seasnake [1123]		Species or species habitat may occur within area	In feature area
Disteira major Olive-headed Seasnake [1124]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Emydocephalus annulatus Turtle-headed Seasnake [1125]		Species or species habitat may occur within area	In feature area
Enhydrina schistosa Beaked Seasnake [1126]		Species or species habitat may occur within area	In feature area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat known to occur within area	In feature area
Hydrelaps darwiniensis Black-ringed Seasnake [1100]		Species or species habitat may occur within area	In feature area
Hydrophis atriceps Black-headed Seasnake [1101]		Species or species habitat may occur within area	In feature area
Hydrophis elegans Elegant Seasnake [1104]		Species or species habitat may occur within area	In feature area
Hydrophis macdowelli as Hydrophis mcdowelli Small-headed Seasnake [75601]		Species or species habitat may occur within area	In feature area
Lapemis curtus as Lapemis hardwickii Spine-bellied Seasnake [83554]		Species or species habitat may occur within area	In feature area
Leioselasma coggeri as Hydrophis coggeri Black-headed Sea Snake, Slender-necked Seasnake [87373]		Species or species habitat may occur within area	In feature area
Leioselasma pacifica as Hydrophis pacificus Large-headed Seasnake, Pacific Seasnake [87378]		Species or species habitat may occur within area	In feature area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area	In feature area
Parahydrophis mertoni Northern Mangrove Seasnake [1090]		Species or species habitat may occur within area	In feature area
Pelamis platurus Yellow-bellied Seasnake [1091]		Species or species habitat may occur within area	In feature area

Key Ecological Features [[Resource Information](#)]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region	Buffer Status
Ancient coastline at 125 m depth contour	North-west	In feature area
Carbonate bank and terrace system of the Sahul Shelf	North-west	In feature area
Pinnacles of the Bonaparte Basin	North-west	In feature area

Biologically Important Areas

Scientific Name	Behaviour	Presence	Buffer Status
Dolphins			
Orcaella heinsohni			
Australian Snubfin Dolphin [81322]	Breeding	Known to occur	In feature area
Orcaella heinsohni			
Australian Snubfin Dolphin [81322]	Calving	Known to occur	In feature area
Orcaella heinsohni			
Australian Snubfin Dolphin [81322]	Foraging (high density prey)	Known to occur	In feature area
Orcaella heinsohni			
Australian Snubfin Dolphin [81322]	Resting	Known to occur	In feature area

Scientific Name	Behaviour	Presence	Buffer Status
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging	Likely to occur	In feature area
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Significant habitat - unknown behaviour	Likely to occur	In feature area
Marine Turtles			
Caretta caretta Loggerhead Turtle [1763]	Foraging	Known to occur	In feature area
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur	In feature area
Chelonia mydas Green Turtle [1765]	Internesting buffer	Known to occur	In feature area
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur	In feature area
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur	In feature area
Natator depressus Flatback Turtle [59257]	Internesting	Likely to occur	In feature area
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur	In feature area
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur	In feature area
Seabirds			
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur	In feature area
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur	In feature area
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur	In feature area
Sharks			

Scientific Name	Behaviour	Presence	Buffer Status
Rhincodon typus Whale Shark [66680]	Foraging	Known to occur	In feature area

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.
