Disclaimer

The Aboriginal Cultural Heritage Act 2021 (Act) recognises, protects, conserves, and preserves Aboriginal cultural heritage (ACH), and recognises the fundamental importance of ACH to Aboriginal people and its role in Aboriginal communities past, present and future. The Act recognises the value of ACH to Aboriginal people as well as to the wider Western Australian community.

Aboriginal cultural heritage in Western Australia is protected, whether or not the ACH has been reported to the ACH Council or exists on the Directory.

The information provided is made available in good faith and is predominately based on the information provided to the Department of Planning, Lands and Heritage by third parties. The information is provided solely on the basis that readers will be responsible for making their own assessment as to the accuracy of the information. If you find any errors or omissions in our records, including our maps, it would be appreciated if you email the details to the Department at AboriginalHeritage@dplh.wa.gov.au and we will make every effort to rectify it as soon as possible.

List of Aboriginal Cultural Heritage (ACH) Directory

Terminology

ID: Reported ACH is assigned a unique ID by the Department of Planning, Lands and Heritage using the format: ACH-00000001. For ACH places on the former Register the ID numbers remain unchanged and use the new format. For example the ACH ID of the place Swan River was previously '3536' and is now 'ACH-00003536'.

Access and Restrictions:

- Boundary Reliable (Yes/No): Indicates whether the location and extent of the ACH boundary is considered reliable.
- Boundary Restricted = No: ACH location is shown as accurately as the information submitted allows.
- Boundary Restricted = Yes: To preserve confidentiality the exact location and extent of the place is not displayed on the map. However, the shaded region (generally with an area of at least 4km²) provides a general indication of where the ACH is located. If you are a landowner and wish to find out more about the exact location of the place, please contact the Department of Planning, Lands and Heritage.
- Culturally Sensitive = No: Availability of information that the Department of Planning, Lands and Heritage holds in relation to the ACH is not restricted in any way.
- Culturally Sensitive = Yes: Some of the information that the Department of Planning, Lands and Heritage holds in relation to the ACH is restricted if it is considered culturally sensitive information. This information will only be made available if the Department of Planning, Lands and Heritage receives written approval from the people who provided the information. To request access please contact AboriginalHeritage@dplh.wa.gov.au.
- Culturally Sensitive Nature:
 - No Gender / Initiation Restrictions: Anyone can view the information.
 - Men only: Only males can view restricted information.
 - Women only: Only females can view restricted information.

Status:

- ACH Directory: Aboriginal cultural heritage place or cultural landscape.
- Pending: Aboriginal cultural heritage place or cultural landscape with information in a verification stage.
- Historic: Aboriginal heritage places determined to not meet the criteria of Section 5 of the Aboriginal Heritage Act 1972. Includes places that no longer exist as a result of land use activities with existing approvals.

ACH Type:

- Cultural Landscape: a group of areas interconnected through the tangible elements of Aboriginal culture heritage present.
- Place: an area in which tangible elements of Aboriginal cultural heritage are present.

Place Type: The type of Aboriginal cultural heritage place. For example an artefact scatter place or engravings place.

Legacy Place Status: A status determined under the previous Aboriginal Heritage Act 1972:

- Registered Site: the place was assessed as meeting Section 5 of the Aboriginal Heritage Act 1972.
- Lodged: Information was received in relation to the place, but an assessment was not completed to determine if it met section 5 of the Aboriginal Heritage Act 1972.
- Stored Data/Not a Site: The place was assessed as not meeting Section 5 of the Aboriginal Heritage Act 1972.

Legacy ID: This is the former unique number that the former Department of Aboriginal Sites assigned to the place.

List of Aboriginal Cultural Heritage (ACH) Directory

Terminology

ID: Reported ACH is assigned a unique ID by the Department of Planning, Lands and Heritage using the format: ACH-00000001. For ACH places on the former Register the ID numbers remain unchanged and use the new format. For example the ACH ID of the place Swan River was previously '3536' and is now 'ACH-00003536'.

Access and Restrictions:

- Boundary Reliable (Yes/No): Indicates whether the location and extent of the ACH boundary is considered reliable.
- Boundary Restricted = No: ACH location is shown as accurately as the information submitted allows.
- Boundary Restricted = Yes: To preserve confidentiality the exact location and extent of the place is not displayed on the map. However, the shaded region (generally with an area of at least 4km²) provides a general indication of where the ACH is located. If you are a landowner and wish to find out more about the exact location of the place, please contact the Department of Planning, Lands and Heritage.
- Culturally Sensitive = No: Availability of information that the Department of Planning, Lands and Heritage holds in relation to the ACH is not restricted in any way.
- Culturally Sensitive = Yes: Some of the information that the Department of Planning, Lands and Heritage holds in relation to the ACH is restricted if it is considered culturally sensitive information. This information will only be made available if the Department of Planning, Lands and Heritage receives written approval from the people who provided the information. To request access please contact AboriginalHeritage@dplh.wa.gov.au.
- Culturally Sensitive Nature:
 - No Gender / Initiation Restrictions: Anyone can view the information.
 - Men only: Only males can view restricted information.
 - Women only: Only females can view restricted information.

Status:

- ACH Directory: Aboriginal cultural heritage place or cultural landscape.
- Pending: Aboriginal cultural heritage place or cultural landscape with information in a verification stage.
- Historic: Aboriginal heritage places determined to not meet the criteria of Section 5 of the Aboriginal Heritage Act 1972. Includes places that no longer exist as a result of land use activities with existing approvals.

ACH Type:

- Cultural Landscape: a group of areas interconnected through the tangible elements of Aboriginal culture heritage present.
- Place: an area in which tangible elements of Aboriginal cultural heritage are present.

Place Type: The type of Aboriginal cultural heritage place. For example an artefact scatter place or engravings place.

Legacy Place Status: A status determined under the previous Aboriginal Heritage Act 1972:

- Registered Site: the place was assessed as meeting Section 5 of the Aboriginal Heritage Act 1972.
- Lodged: Information was received in relation to the place, but an assessment was not completed to determine if it met section 5 of the Aboriginal Heritage Act 1972.
- Stored Data/Not a Site: The place was assessed as not meeting Section 5 of the Aboriginal Heritage Act 1972.

Legacy ID: This is the former unique number that the former Department of Aboriginal Sites assigned to the place.

The Act recognises the value of ACH to Aboriginal people as well as to the wider Western Australian community.

Aboriginal cultural heritage in Western Australia is protected, whether or not the ACH has been reported to the ACH Council or exists on the Directory.

The information provided is made available in good faith and is predominately based on the information provided to the Department of Planning, Lands and Heritage by third parties. The information is provided solely on the basis that readers will be responsible for making their own assessment as to the accuracy of the information. If you find any errors or omissions in our records, including our maps, it would be appreciated if you email the details to the Department at AboriginalHeritage@dplh.wa.gov.au and we will make every effort to rectify it as soon as possible.

South West Settlement ILUA Disclaimer

Your heritage enquiry is on land within or adjacent to the following Indigenous Land Use Agreement(s): Wagyl Kaip & Southern Noongar Indigenous Land Use Agreement, Gnaala Karla Booja Indigenous Land Use Agreement, South West Boojarah #2 Indigenous Land Use Agreement, Yued Indigenous Land Use Agreement, Whadjuk People Indigenous Land Use Agreement.

On 8 June 2015, six identical Indigenous Land Use Agreements (ILUAs) were executed across the South West by the Western Australian Government and, respectively, the Yued, Whadjuk People, Gnaala Karla Booja, Ballardong People, South West Boojarah #2 and Wagyl Kaip & Southern Noongar groups, and the South West Aboriginal Land and Sea Council (SWALSC).

The ILUAs bind the parties (including 'the State', which encompasses all State Government Departments and certain State Government agencies) to enter into a Noongar Standard Heritage Agreement (NSHA) when conducting Aboriginal Heritage Surveys in the ILUA areas, unless they have an existing heritage agreement. It is also intended that other State agencies and instrumentalities enter into the NSHA when conducting Aboriginal Heritage Surveys in the ILUA areas. It is recommended a NSHA is entered into, and an 'Activity Notice' issued under the NSHA, if there is a risk that an activity will 'impact' (i.e. by excavating, damaging, destroying or altering in any way) an Aboriginal heritage site. The Aboriginal Heritage Due Diligence Guidelines, which are referenced by the NSHA, provide guidance on how to assess the potential risk to Aboriginal heritage.

Likewise, from 8 June 2015 the Department of Mines, Industry Regulation and Safety (DMIRS) in granting Mineral, Petroleum and related Access Authority tenures within the South West Settlement ILUA areas, will place a condition on these tenures requiring a heritage agreement or a NSHA before any rights can be exercised.

If you are a State Government Department, Agency or Instrumentality, or have a heritage condition placed on your mineral or petroleum title by DMIRS, you should seek advice as to the requirement to use the NSHA for your proposed activity. The full ILUA documents, maps of the ILUA areas and the NSHA template can be found at <https://www.wa.gov.au/organisation/department-of-the-premier-and-cabinet/south-west-native-title-settlement>.

Further advice can also be sought from the Department of Planning, Lands and Heritage at AboriginalHeritage@dplh.wa.gov.au.

List of Aboriginal Cultural Heritage (ACH) Directory

Terminology

ID: Reported ACH is assigned a unique ID by the Department of Planning, Lands and Heritage using the format: ACH-00000001. For ACH places on the former Register the ID numbers remain unchanged and use the new format. For example the ACH ID of the place Swan River was previously '3536' and is now 'ACH-00003536'.

Access and Restrictions:

- Boundary Reliable (Yes/No): Indicates whether the location and extent of the ACH boundary is considered reliable.
- Boundary Restricted = No: ACH location is shown as accurately as the information submitted allows.
- Boundary Restricted = Yes: To preserve confidentiality the exact location and extent of the place is not displayed on the map. However, the shaded region (generally with an area of at least 4km²) provides a general indication of where the ACH is located. If you are a landowner and wish to find out more about the exact location of the place, please contact the Department of Planning, Lands and Heritage.
- Culturally Sensitive = No: Availability of information that the Department of Planning, Lands and Heritage holds in relation to the ACH is not restricted in any way.
- Culturally Sensitive = Yes: Some of the information that the Department of Planning, Lands and Heritage holds in relation to the ACH is restricted if it is considered culturally sensitive information. This information will only be made available if the Department of Planning, Lands and Heritage receives written approval from the people who provided the information. To request access please contact AboriginalHeritage@dplh.wa.gov.au.
- Culturally Sensitive Nature:
 - No Gender / Initiation Restrictions: Anyone can view the information.
 - Men only: Only males can view restricted information.
 - Women only: Only females can view restricted information.

Status:

- ACH Directory: Aboriginal cultural heritage place or cultural landscape.
- Pending: Aboriginal cultural heritage place or cultural landscape with information in a verification stage.
- Historic: Aboriginal heritage places determined to not meet the criteria of Section 5 of the Aboriginal Heritage Act 1972. Includes places that no longer exist as a result of land use activities with existing approvals.

ACH Type:

- Cultural Landscape: a group of areas interconnected through the tangible elements of Aboriginal culture heritage present.
- Place: an area in which tangible elements of Aboriginal cultural heritage are present.

Place Type: The type of Aboriginal cultural heritage place. For example an artefact scatter place or engravings place.

Legacy Place Status: A status determined under the previous Aboriginal Heritage Act 1972:

- Registered Site: the place was assessed as meeting Section 5 of the Aboriginal Heritage Act 1972.
- Lodged: Information was received in relation to the place, but an assessment was not completed to determine if it met section 5 of the Aboriginal Heritage Act 1972.
- Stored Data/Not a Site: The place was assessed as not meeting Section 5 of the Aboriginal Heritage Act 1972.

Legacy ID: This is the former unique number that the former Department of Aboriginal Sites assigned to the place.

Terminology

ID: Reported ACH is assigned a unique ID by the Department of Planning, Lands and Heritage using the format: ACH-00000001. For ACH places on the former Register the ID numbers remain unchanged and use the new format. For example the ACH ID of the place Swan River was previously '3536' and is now 'ACH-00003536'.

Access and Restrictions:

- Boundary Reliable (Yes/No): Indicates whether the location and extent of the ACH boundary is considered reliable.
- Boundary Restricted = No: ACH location is shown as accurately as the information submitted allows.
- Boundary Restricted = Yes: To preserve confidentiality the exact location and extent of the place is not displayed on the map. However, the shaded region (generally with an area of at least 4km²) provides a general indication of where the ACH is located. If you are a landowner and wish to find out more about the exact location of the place, please contact the Department of Planning, Lands and Heritage.
- Culturally Sensitive = No: Availability of information that the Department of Planning, Lands and Heritage holds in relation to the ACH is not restricted in any way.
- Culturally Sensitive = Yes: Some of the information that the Department of Planning, Lands and Heritage holds in relation to the ACH is restricted if it is considered culturally sensitive information. This information will only be made available if the Department of Planning, Lands and Heritage receives written approval from the people who provided the information. To request access please contact AboriginalHeritage@dplh.wa.gov.au.
- Culturally Sensitive Nature:
 - No Gender / Initiation Restrictions: Anyone can view the information.
 - Men only: Only males can view restricted information.
 - Women only: Only females can view restricted information.

Status:

- ACH Directory: Aboriginal cultural heritage place or cultural landscape.
- Pending: Aboriginal cultural heritage place or cultural landscape with information in a verification stage.
- Historic: Aboriginal heritage places determined to not meet the criteria of Section 5 of the Aboriginal Heritage Act 1972. Includes places that no longer exist as a result of land use activities with existing approvals.

ACH Type:

- Cultural Landscape: a group of areas interconnected through the tangible elements of Aboriginal culture heritage present.
- Place: an area in which tangible elements of Aboriginal cultural heritage are present.

Place Type: The type of Aboriginal cultural heritage place. For example an artefact scatter place or engravings place.

Legacy Place Status: A status determined under the previous Aboriginal Heritage Act 1972:

- Registered Site: the place was assessed as meeting Section 5 of the Aboriginal Heritage Act 1972.
- Lodged: Information was received in relation to the place, but an assessment was not completed to determine if it met section 5 of the Aboriginal Heritage Act 1972.
- Stored Data/Not a Site: The place was assessed as not meeting Section 5 of the Aboriginal Heritage Act 1972.

Legacy ID: This is the former unique number that the former Department of Aboriginal Sites assigned to the place.

Disclaimer

The Aboriginal Cultural Heritage Act 2021 (Act) recognises, protects, conserves, and preserves Aboriginal cultural heritage (ACH), and recognises the fundamental importance of ACH to Aboriginal people and its role in Aboriginal communities past, present and future. The Act recognises the value of ACH to Aboriginal people as well as to the wider Western Australian community.

Aboriginal cultural heritage in Western Australia is protected, whether or not the ACH has been reported to the ACH Council or exists on the Directory.

The information provided is made available in good faith and is predominately based on the information provided to the Department of Planning, Lands and Heritage by third parties. The information is provided solely on the basis that readers will be responsible for making their own assessment as to the accuracy of the information. If you find any errors or omissions in our records, including our maps, it would be appreciated if you email the details to the Department at AboriginalHeritage@dplh.wa.gov.au and we will make every effort to rectify it as soon as possible.

RELEVANCY ASSESSMENT

Assessment of Relevant Persons for the Proposed Activity

The result of Woodside’s assessment of relevant persons in accordance with regulation 25(1) of the Environment Regulations is outlined below at **Table 1** and **Table 2**.

Persons or organisations that Woodside assessed as not relevant but nonetheless chose to contact at its discretion in accordance with **Section 5.3.4** or self-identified and Woodside assessed as not relevant are summarised below at **Table 1** and **Table 3**.

Table 1: Assessment of Relevancy

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
<i>Commonwealth, Western Australia and Northern Territory Government Departments or Agencies – Marine</i>			
Australian Border Force (ABF)	Responsible for coordinating maritime security	Woodside has applied its methodology for ‘Government departments / agencies – marine’ under regulation 25(1)(a) of the Environment Regulations. ABF’s responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Department of Foreign Affairs and Trade (DFAT)	Responsible for promoting and protecting Australia’s interests internationally and contributes to global stability and economic growth. DFAT manages Australia’s relationships and interaction with the governments of our neighbouring countries.	Woodside has applied its methodology for ‘Government departments / agencies – marine’ under regulation 25(1)(a) of the Environment Regulations. DFAT has no direct role in the management of the Commonwealth marine area, but has an interest in ensuring that consultation with foreign entities, both private and government, is effective and is aligned with Australia’s interests. DFAT manages Australia’s relationships and interaction with the governments of our neighbouring countries. The proposed activity has the potential to impact DFAT’s functions, interests or activities as the EMBA overlaps Indonesian and Timor Leste waters.	Yes
Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA)	Responsible for managing fisheries within 12 nm of Christmas Island and Cocos (Keeling) Island	Woodside has applied its methodology for ‘Government departments / agencies – marine’ under regulation 25(1)(a) of the Environment Regulations. The Christmas Island Line Fishery and Cocos (Keeling) Island Marine Aquarium Fishery are active in the EMBA. DITRDCA’s responsibilities may be relevant to the activity as the Christmas Island Line Fishery and Cocos (Keeling) Island Marine Aquarium Fishery are active in the EMBA.	Yes
Australian Fisheries Management Authority (AFMA)	Responsible for managing Commonwealth fisheries	Woodside has applied its methodology for ‘Government departments / agencies – marine’ under regulation 25(1)(a) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		<p>No Commonwealth fisheries are active in the Operational Area. The North West Slope Trawl Fishery, Northern Prawn Fishery, Western Deepwater Trawl Fishery, Western Tuna and Billfish Fishery, Christmas Island Line Fishery, and Cocos (Keeling) Islands Marine Aquarium Fishery are active in the EMBA.</p> <p>AFMA's responsibilities may be relevant to the activity as the North West Slope Trawl Fishery, Northern Prawn Fishery, Western Deepwater Trawl Fishery, Western Tuna and Billfish Fishery, Christmas Island Line Fishery, and Cocos (Keeling) Islands Marine Aquarium Fishery are active in the EMBA.</p>	
Australian Hydrographic Office (AHO)	Responsible for maritime safety and Notices to Mariners	<p>Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations.</p> <p>AHO's responsibilities may be relevant to the activity as there are proposed vessel activities.</p>	Yes
Australian Maritime Safety Authority (AMSA) – Marine Safety	Statutory agency for vessel safety and navigation	<p>Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations</p> <p>AMSA – Marine Safety's responsibilities may be relevant to the activity as there are proposed vessel activities.</p>	Yes
Australian Maritime Safety Authority (AMSA) – Marine Pollution	Legislated responsibility for oil pollution response in Commonwealth waters	<p>Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations.</p> <p>AMSA – Marine Pollution's responsibilities may be relevant to the activity as the proposed activity has a hydrocarbon spill risk which may require AMSA response in Commonwealth waters.</p>	Yes
Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries	Responsible for implementing Commonwealth policies and programs to support agriculture, fishery, food and forestry industries	<p>Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations.</p> <p>No Commonwealth fisheries are active in the Operational Area. The North West Slope Trawl Fishery, Northern Prawn Fishery, Western Deepwater Trawl Fishery, Western Tuna and Billfish</p>	Yes

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		There are known shipwrecks overlapping the EMBA which the Western Australian Museum may be responsible for.	
Pilbara Ports Authority	Responsible for the operation of the Port of Dampier and Port of Port Hedland.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Pilbara Ports Authority's responsibilities as the EMBA overlaps the Pilbara Ports Authority's area of responsibility.	Yes
Kimberley Ports Authority	Responsible for the operation of the Port of Broome.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Kimberley Ports Authority's responsibilities as the EMBA overlaps Kimberley Ports Authority's area of responsibility.	Yes
Mid West Ports Authority	Responsible for the operation of the Port of Geraldton.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Mid West Ports Authority's responsibilities as the EMBA overlaps Mid West Ports Authority's area of responsibility.	Yes
Fremantle Port Authority	Responsible for the operation of Port of Fremantle.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Fremantle Port Authority's responsibilities as the EMBA overlaps Fremantle Port Authority's area of responsibility.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Southern Ports	Responsible for the operation of the Port of Albany and Port of Bunbury.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Southern Ports' responsibilities as the EMBA overlaps Southern Ports' area of responsibility.	Yes
Port of Christmas Island	Responsible for the operation of the Port of Christmas Island.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Port of Christmas Island's responsibilities as the EMBA overlaps Port of Christmas Island's area of responsibility.	Yes
Port of Cocos (Keeling) Island	Responsible for the operation of the Port of Cocos (Keeling) Island.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Port of Cocos (Keeling) Island's responsibilities as the EMBA overlaps Port of Cocos (Keeling) Island's area of responsibility.	Yes
Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)	DAFF administers, implements and enforces the Biosecurity Act 2015. The Department requests to be consulted where an activity has the potential to transfer marine pests. DAFF also has inspection and reporting requirements to ensure that all conveyances (vessels, installations and aircraft) arriving in Australian territory comply with international health regulations and that any biosecurity risk is managed.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DAFF – Biosecurity's responsibilities may be relevant to the proposed activities in the EMBA in the prevention of introduced marine species.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
	The Department requests to be consulted where an activity involves the movement of aircraft or vessels between Australia and offshore petroleum activities either inside or outside Australian territory.		
Department of Climate Change, Energy, the Environment and Water (DCCEEW)	Responsible for implementing Commonwealth policies and programs to support climate change, sustainable energy use, water resources, the environment and our heritage. <i>Administers the Underwater Cultural Heritage Act 2018 in collaboration with the States, Northern Territory and Norfolk Island, which is responsible for the protection of shipwrecks, sunken aircraft and other types of underwater heritage and their associated artefacts in Commonwealth waters.</i>	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DCCEEW's responsibilities may be relevant to the proposed activities in the EMBA as there are potential environmental impacts from the proposed activity. There is known Maritime Cultural Heritage overlapping the EMBA.	Yes
Director of National Parks (DNP)	Responsible for the management of Commonwealth parks and conservation zones.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DNP's responsibilities may be relevant to the activity as DNP requires an awareness of activities that occur within AMPs, and an understanding of potential impacts and risks to the values of parks (NOPSEMA guidance note: N-04750-GN1785 A620236, June 2020). Titleholders are required to consult DNP on offshore petroleum and greenhouse gas exploration activities if they occur in, or may impact on the values of marine parks, including where potential spill response activities may occur in the event of a spill (i.e. scientific monitoring).	Yes
Ningaloo Coast World Heritage Advisory Committee (NCWHAC)	Supports the DBCA to manage the Ningaloo Coast World Heritage Area.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. The NCWHAC's responsibilities may be relevant to the activity as the EMBA overlaps the Ningaloo Marine Park.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Department of Biodiversity, Conservation and Attractions (DBCA)	Responsible for managing WA's parks, forests and reserves to achieve wildlife conservation and provide sustainable recreation and tourism opportunities.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. The DBCA's responsibilities may be relevant to the activity as EMBA overlaps WA parks, forests or reserves. Activities have the potential to impact marine tourism in the EMBA.	Yes
Northern Territory Department of Industry, Tourism and Trade (DITT) – NT Fisheries	Responsible for managing State fisheries in the Northern Territory.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The Northern Territory Aquarium Fish/Display Fish Fishery, Northern Territory Spanish Mackerel Fishery, Northern Territory Offshore Net & Line Fishery, Northern Territory Demersal Fishery, Northern Territory Mud Crab Fishery, Northern Territory Mollusc Fishery, Northern Territory Aquaculture Fishery overlap the EMBA but have not been active in the EMBA in the past 5 years. Under regulation 25(1)(e) of the Environment Regulations, Woodside at its discretion has chosen to assess NT Fisheries as a relevant person.	Yes
Northern Territory Department of Industry, Tourism and Trade (DITT) (Aquatic Biosecurity)	Monitors and manages the risk of new marine pests arriving in the Northern Territory.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. As the EMBA overlaps Northern Territory waters, DITT – Aquatic Biosecurity's responsibilities may overlap with potential risks and impacts specific to the proposed petroleum activity in the EMBA.	Yes
Northern Territory Department of Environment, Parks and Water Security (DEPWS)	Responsible for managing the Northern Territory's policies to protect the environment and natural resources.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. As the EMBA overlaps Northern Territory waters, DEPWS's responsibilities may overlap with potential risks and impacts specific to the proposed petroleum activity in the EMBA.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Northern Territory Environment Protection Agency (NTEPA)	Responsible for promoting the ecologically sustainable development of the Northern Territory.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has a hydrocarbon spill risk, which may require NTEPA response in State waters as the EMBA overlaps Northern Territory waters.	Yes
Northern Territory Department of Infrastructure, Planning and Logistics (DIPL) (Marine Safety)	Responsible for marine safety in Northern Territory waters.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. As the EMBA overlaps Northern Territory waters, DIPL – Marine Safety's responsibilities may overlap with potential risks and impacts specific to the proposed petroleum activity in the EMBA.	Yes
Department of Territory Families, Housing and Communities (Heritage Branch)	Responsible for working with the community to preserve the heritage of the Northern Territory, including maritime heritage.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. There is no known Maritime Cultural Heritage overlapping the EMBA in Northern Territory waters. Woodside chose to contact Department of Territory Families, Housing and Communities (Heritage Branch) in line with Section 5.3.4 of the EP.	No
Commonwealth and State Government Departments or Agencies – Industry			
Department of Industry, Science and Resources (DISR)	Department of relevant Commonwealth Minister.	Required to be consulted under regulation 25(1)(a) of the Environment Regulations.	Yes

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Tourism and Trade (DITT) (Mining and Energy)			

Commonwealth Commercial fisheries and representative bodies			
North West Slope and Trawl Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>Although the fishery overlaps the Operational Area, the fishery has not been active in the Operational Area within the last 5 years. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.</p>	Yes
Southern Bluefin Tuna Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>Woodside does not consider that the proposed activity will present a risk to licence holders, given since 1992, the majority of Australian catch has concentrated in south-eastern Australia. (Patterson et al., 2022). In addition, given fishing methods by licence holders for species fished in this fishery (Australia has a 35% share of total global allowable catch of Southern Bluefin Tuna, which is value-added through tuna ranching near Port Lincoln (South Australia), or fishing effort in New South Wales (Australian Southern Bluefin Tuna Industry Association).</p>	No
Western Deepwater Trawl Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.</p>	Yes

Western Skipjack Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>Woodside does not consider that the activity will present a risk to licence holders, given the fishery spans the Australian Fishing Zone west of Victoria and the Torres Strait. The Fishery is not currently active and no fishing has occurred since 2009 (Patterson et al., 2022). In addition, interactions are not expected given the species' pelagic distribution fishing methods for species fished by licence holders.</p>	No
Western Tuna and Billfish Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>Although the fishery overlaps the Operational Area, the fishery has not been active in the Operational Area within the last 5 years. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.</p>	Yes
Northern Prawn Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.</p>	Yes
Christmas Island Line Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.</p> <p>The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.</p>	Yes
Cocos (Keeling) Islands Marine Aquarium Fishery	Commonwealth commercial fishery	<p>Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(a) of the Environment Regulations.</p> <p>The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.</p>	Yes

CONSULTATION ACTIVITIES

Ngujima-Yin Floating Production Storage and Offloading Facility Operations EP Consultation Activities

Woodside has been conducting extensive consultation with relevant persons and other parties for this EP since September 2023 when consultation commenced with interested and affected stakeholders as part of a planned, integrated and consistent approach to stakeholder engagement for Woodside's proposed opportunities. A broad consultation process has been undertaken with relevant persons for the Ngujima-Yin Floating Production Storage and Offloading Facility Operations. Consultation aims to be inclusive, transparent, voluntary, respectful and two-way. Consultation was undertaken by email, letter, phone call and/or meeting.

- Woodside advertised the planned activities proposed for this EP in national, state and relevant local newspapers (see **Record of Consultation, reference 3.1**). Regional newspapers do not require subscription and are available (and in some cases delivered) directly to households. All communities within or adjacent to the EMBA had access to this information via this media. No direct comments or feedback were received from the advertisements.

- A Consultation Information Sheet was provided to relevant persons and persons Woodside chose to contact (see **Section 5.3.4**), which included details such as an activity overview, maps, a summary of key risks and/or impacts and management measures (**Record of Consultation, reference 1.1**).
- Since the commencement of the initial consultation period (September 2023), the stakeholder Consultation Information Sheet (**Record of Consultation, reference 1.1**) has been available on Woodside’s website. The Woodside Consultation Information Sheets include a toll-free 1800 phone number and Woodside’s feedback email address (feedback@woodside.com.au).
- Additional targeted information was provided to relevant marine users including AHO and AMSA – Marine Safety (**Record of Consultation, reference 1.14**). This information included maps and additional information relevant to the specific category of persons. The relevant persons had a 42-day period in which to provide feedback.
- Where appropriate, Woodside conducted phone calls and meetings with relevant persons.
- Where appropriate, targeted follow-up emails were sent to relevant persons who had not provided a response prior to the close of the target feedback period.
- Woodside considered relevant person responses and assessed the merits and relevance of objections and claims about the potential adverse impact of the proposed activity set out in the EP, in accordance with the intended outcome of consultation (see **Section 5.2**).
- Consultation activities undertaken with relevant persons are summarised at **Record of Consultation, Table 2**.
- Engagement undertaken with persons or organisations Woodside assessed as not relevant but chose to contact (see **Section 5.3.4**) or self-identified and Woodside assessed as not relevant are summarised at **Record of Consultation, Table 3**.

Social media

- From 13 September 2023, Woodside commenced a sponsored social media campaign (**Record of Consultation, reference 3.2**) geotargeting local government authorities in Perth Metro, regional areas in the north of WA and regional areas in the south of WA, which are within or coastally adjacent to the EMBA for the proposed activities. The campaign had a reach of more than 1.3 million and brought the proposed activity to the attention of persons who may be interested and advised persons or organisations on how they can find out Woodside’s proposed activities by visiting Woodside’s website.

23 October 2023	Exmouth	Community Consultation Roadshow
4 November 2023	Dampier	Dampier Beachside Twilight Markets

Traditional Custodian Specific Consultation

In addition to the approaches above including community information sessions, additional activities were undertaken with relevant Traditional Custodians, which were specifically designed to provide for effective engagement with Traditional Custodians so that information was provided in a form that was readily accessible and appropriate (**Section 5.5**).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Consultation undertaken specifically with Traditional Custodians for this Environment Plan includes:

- Direct engagement with nominated representative bodies via the contact listed on the ORIC website, requesting advice on how they would like to be engaged and asking whether other members and/or individuals should be consulted. This has resulted in:
- Meetings with directors, elders and any nominated representatives, on country or in Perth
- Requests and offers of resourcing to enable and support consultation
- Exchange of written feedback and correspondence
- Summary Consultation Information Sheet, developed and reviewed by Indigenous representatives in collaboration with technical experts to ensure content is appropriate to the intended recipients, was provided to relevant Traditional Custodian groups (**Record of Consultation, reference 1.2**) and phone calls to provide context to the consultation made.
- Ongoing efforts were made to engage and develop relationships with these bodies via a variety of means such as email, phone calls, alternative contacts, texts, social media and in some cases physical visits.
- Consultation meetings with attendees decided by Traditional Custodian groups, supported by senior Woodside representatives, subject matter experts, First Nations Relations advisers with skills and experience in community engagement. Meetings are developed through a two-way consultation process to ensure effective information sharing via:
 - Mutually agreed agenda avoiding time pressure
 - Encouraging Traditional Custodian attendees to control the pace of the meeting and pause at any time to ask questions, seek clarification or provide feedback
 - Visual aids such as posters, presentations, simplified technical videos and real-world pictures and footage
 - Emphasis on potential planned and unplanned risks and impacts of the activity
 - Ample opportunity for questions and feedback
 - Discussion about ongoing relationship development and opportunities
 - Distribution of hard-copy Consultation Information Sheets (**Record of Consultation, reference 1.1**) and Summary Consultation Information Sheets (**Record of Consultation, reference 1.2**)
 - Meeting all costs such as sitting fees, travel, legal support and executive support and other support required
- Advertising in Indigenous publications such as the Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) (**Record of Consultation, reference 3.1**).
- Woodside has a geotargeted sponsored social media campaign (**Record of Consultation, reference 3.2**) to various communities that are coastally adjacent to the EMBA for the proposed activities.
- The wide-reaching campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations how they can find out about Woodside's proposed activities by visiting Woodside's website, which details the intent of consultation with relevant persons under the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The campaign reached

around 1,369,350 people and was viewed more than 7 million times across various regions as shown in **Record of Consultation, reference 3.2**.

- These social media posts were developed with input from Indigenous representatives. Social media is a highly effective means to engage Indigenous audiences as outlined in Indigenous Digital Life (Professor Carlson, 2021). Advertisements used language and information appropriate to Indigenous audiences. Feedback from community engagements indicates a high level of penetration for this technique.
- Woodside has employed a diverse range of techniques to allow relevant persons to become aware of the proposed activity and how it may affect their functions, activities or interests, and to understand their ability to provide feedback. The combination of PBC engagement meetings, traditional print media, social media and face-to face community interaction was designed with input from Indigenous representatives and adapted to the audience, so that it provides a wide-ranging opportunity to consult.

Table 2: Consultation Report with Relevant Persons or Organisations

Commonwealth and WA State Government Departments or Agencies – Marine		
Australian Border Force (ABF)		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Border Force (ABF) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to ABF on 13 September 2023 based on their function, interest and activities. • Woodside has provided a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow up email seeking feedback on the proposed activities. • Woodside has provided ABF with the opportunity to provide feedback over a 5-month period. <p>Summary of information provided and record of consultation:</p> <ul style="list-style-type: none"> • On 13 September 2023, Woodside emailed ABF advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to ABF following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website. 		
Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate,	Woodside has addressed maritime security-related issues in Section 6 of the EP based on previous offshore activities.

Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DITRDCA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DITRDCA on 15 December 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activity.
- Woodside has provided the DITRDCA with the opportunity to provide feedback over a 2-month period.

Summary of information provided and record of consultation:

- On 15 December 2023, Woodside emailed DITRDCA advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to DITRDCA following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Australian Fisheries Management Authority (AFMA)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Fisheries Management Authority (AFMA) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to AFMA on 20 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to AFMA over a 5-month period.

Summary of information provided and record of consultation:

- On 20 September 2023, Woodside emailed AFMA advising of the proposed activity (Record of Consultation, reference 1.34) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 October 2023, AFMA emailed to thank Woodside for the advice and:
 - (1) Advised it had no specific comments on the proposal.
 - (2) Encouraged Woodside, if it had not already done so, to engage directly with Commonwealth fishing operators in the area and included contact details for relevant industry associations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 October 2023, Woodside responded thanking AFMA for its email and confirmed it had provided information to relevant fishery licence holders as well as the relevant representative organisations and fishing industry associations.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) AFMA advised it had no specific comments on the proposal.</p> <p>(2) AFMA encouraged Woodside to consult directly with fishing operators who have entitlements to fish within the proposed area.</p> <p>Whilst feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted AFMA had no comments on the proposal.</p> <p>(2) Woodside confirmed it had consulted individual Commonwealth fishing operators in the area, as well as relevant representative bodies and fishing industry associations.</p> <p>Woodside has consulted AFMA, DAFF - Fisheries, CFA, Tuna Australia, ASBTIA, Northern Prawn Fishery Industry Pty Ltd and individual relevant licence holders.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>(2) Woodside has assessed the relevancy of Commonwealth fisheries issues in Section 4.10.1 of the EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional controls or measures are required.</p>

Australian Hydrographic Office (AHO)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Hydrographic Office (AHO) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to AHO on 15 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has provided AHO with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed AHO advising of the proposed activity (Record of Consultation, reference 1.13) and provided a Consultation Information Sheet, shipping lanes map (Record of Consultation, reference 1.14) and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to AHO (Record of Consultation, reference 2.1) following up on the proposed activity and provided the shipping lanes map and a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 17 October 2023, AHO responded, acknowledging receipt of Woodside's email and noting the data would be registered, assessed, prioritised and validated in preparation for updating navigational charting products.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plans
<p>(1) AHO acknowledged receipt of consultation emails.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted AHO's acknowledgement of its email and that it had no specific feedback for this EP.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>Woodside will notify the AHO of the location of new permanent infrastructure to enable update of maritime charts, as required, as referenced in PS 1.2 of this EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>

Australian Maritime Safety Authority (AMSA) - Marine Safety

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Maritime Safety Authority (AMSA) – Marine Safety for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to AMSA – Marine Safety on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to AMSA – Marine Safety over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed AMSA – Marine Safety advising of the proposed activity (Record of Consultation, reference 1.13) and provided a Consultation Information Sheet, GIS shape file, shipping lanes map (Record of Consultation, reference 1.14) and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 25 September 2023, AMSA – Marine Safety thanked Woodside for its email and:
 - (1) Advised that as the infrastructure was already in place, previous advice provided by AMSA remained.
 - (2) Reminded Woodside that vessels should exhibit appropriate lights and shapes to reflect the nature of operation.
 - (3) Confirmed Woodside should evaluate and implement adequate anti-collision measures.
- On 10 October 2023, Woodside thanked AMSA – Marine Safety for its feedback. Woodside also:
 - Noted that previous advice from AMSA regarding these operations remained.
 - Confirmed vessels would exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.
 - Advised that while Woodside did not propose to implement further anti-collision measures for this activity at this time, collision risk mitigation measures were constantly being evaluated.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
AMSA – Marine Safety provided feedback that: (1) Previous advice from AMSA regarding the operations remained. (2) Vessels should exhibit appropriate lights and shapes.	(1) Woodside noted that previous AMSA – Marine Safety advice regarding the operations remained relevant. (2) Woodside confirmed vessels would exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.	(1) Not required. (2, 3) The EP contains a number of controls that address AMSA’s feedback on lighting and compliance with the international rule for preventing collisions at sea, specifically safety zones are established, vessels are

Australian Maritime Safety Authority (AMSA) – Marine Pollution

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Maritime Safety Authority (AMSA) – Marine Pollution for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to AMSA – Marine Pollution on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided AMSA - Marine Pollution with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed AMSA – Marine Pollution advising of the proposed activity (Record of Consultation, reference 1.15) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> On 16 October 2023, Woodside sent a reminder email to AMSA – Marine Pollution following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website. On 21 December 2023, Woodside emailed AMSA – Marine Pollution (Record of Consultation, reference 1.109) and provided a copy of the Oil Pollution First Strike Plan (FSP) (Appendix I) and invited AMSA – Marine Pollution to comment on the activity. 		
Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has addressed oil pollution planning and response in Appendix H. No additional measures or controls are required.
Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Agriculture, Fisheries and Forestry (DAFF) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. Consultation Information provided to DAFF - Fisheries on 15 September 2023 based on their function, interest and activities. Woodside has provided a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. Woodside has sent a follow up email seeking feedback on the proposed activities. Woodside has provided DAFF - Fisheries with the opportunity to provide feedback over a 5-month period. <p>Summary of information provided and record of consultation:</p>

- On 15 September 2023, Woodside emailed DAFF – Fisheries advising of the proposed activity (Record of Consultation, reference 1.33) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DAFF – Fisheries following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	<p>Woodside has consulted AFMA, CFA and individual relevant licence holders.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Vessels are required to comply with the Australian Biosecurity Act 2015, specifically the Australian Ballast Water Management Requirements (as defined under the Biosecurity Act 2015) (aligned with the International Convention for the Control and Management of Ships’ Ballast Water and Sediments) to prevent introducing IMS. Vessels will be assessed and managed to prevent the introduction of invasive marine species in accordance with Woodside’s Invasive Marine Species Management Plan (see Section 6.7.4 of the EP).</p> <p>Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>Woodside will provide notification of significant change, as appropriate, to AFMA, DAFF – Fisheries, CFA, DPIRD, Recfishwest and WAFIC, as referenced in Section 7.10 of the EP.</p> <p>No additional measures or controls are required.</p>

Department of Defence (DoD)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Defence (DoD) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DoD on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to DoD over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed DoD advising of the proposed activity (Record of Consultation, reference 1.7) and provided a Consultation Information Sheet, defence map (Record of Consultation, reference 1.8) and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website as well as the defence map.
- On 25 October 2023, DoD thanked Woodside for its email and provided feedback regarding:
 - (1) The location of the activity areas within an exercise area and restricted airspace.
 - (2) Unexploded ordinance (UXO) that may be present on and in the seafloor, and that Woodside must inform itself as to the risks associated with conducting activities in that area, with the Commonwealth of Australia taking no responsibility for reporting the UXO in the area, identifying or removing UXO from the area, or any loss or damage suffered or incurred by Woodside or any third party arising out of, or directly related to, UXO in the area.
 - (3) DoD's notification requirements including liaison with the Australian Hydrographic Service/Office (AHS/AHO).
- On 1 November 2023, Woodside thanked DoD for its feedback and confirmed:
 - It had noted the location of activity areas and the presence of exercise areas and restricted airspace.
 - It had noted the advice regarding location, identification, removal or damage to equipment from unexploded ordinances (UXO)s.
 - The Australian Hydrographic Service/Office (AHS/AHO) had been engaged for this activity and is part of the activity notification protocols.

Department of Primary Industries and Regional Development (DPIRD)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Primary Industries and Regional Development (DPIRD) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DPIRD on 22 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside sent follow-up email seeking feedback on the proposed activities.
- Woodside has provided DPIRD with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> On 22 September 2023, Woodside emailed DPIRD advising of the proposed activity (Record of Consultation, reference 1.38) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. On 16 October 2023, Woodside sent a reminder email to DPIRD following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website. 		
Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>No feedback, objections or claims received despite follow up.</p>	<p>Woodside has consulted DPIRD, WAFIC, and relevant individual licence holders (via WAFIC).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Woodside has assessed the relevancy of State fisheries issues in Section 4.10.1 of the EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>Woodside will provide notification of significant change, as appropriate, to AFMA, DAFF – Fisheries, CFA, DPIRD, Recfishwest and WAFIC, as referenced in Section 7.10 of the EP.</p> <p>No additional measures or controls are required.</p>
<p>Department of Transport (DoT)</p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Transport (DoT) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. Consultation Information provided to DoT on 13 September 2023 based on their function, interest and activities.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to DoT over a 5-month period.

Summary of information provided and record of consultation:

- On 13 September 2023, Woodside emailed DoT advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 02 October 2023, DoT responded to Woodside's email and asked to be consulted if there is a risk of a spill impacting State waters.
- On 04 October 2023, Woodside responded thanking DoT for its email and confirming DoT will be consulted if there is a risk of a spill impacting State waters from the proposed activities.
- On 21 December 2023, Woodside emailed DoT (Record of Consultation, reference 1.107) and provided a copy of the Oil Pollution First Strike Plan (FSP) (Appendix I) and invited DoT to comment on the activity.
- On 1 January 2024, DoT responded thanking Woodside for providing the Oil Pollution First Strike Plan for the Ngujima-Yin operations. DoT advised the plan had been reviewed. DoT also:
 - **(2)** Provided a comment on whether any dispersant efficacy testing had been done on the Ngujima-Yin topsides blend, and if so, what were the efficacy results.
- On 14 February 2024, Woodside responding thanking DoT for its email. Woodside:
 - Advised the topsides blend at Ngujima-Yin changed depending on which of the wells were being produced from in a greater proportion at any time.
 - Provided results of the historical dispersant efficacy testing data used for the blend.
 - Advised it was currently planning on refreshing its dispersant efficacy testing for operating assets and, at that time, would endeavour to take a sample of a "heavier" blend from Ngujima-Yin topsides for testing purposes.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) DoT requested to be consulted if there was a risk of a spill impacting State waters.</p> <p>(2) DoT commented on whether dispersant efficacy testing had been done on the Ngujima-Yin topsides blend, and what the results were.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside has addressed DoT's feedback, including confirming that if there was a risk of a spill impacting State waters, DoT would be consulted.</p> <p>(2) Woodside is currently planning to refresh its dispersant efficacy testing for operating assets. Woodside advised DoT the topsides blend at Ngujima-Yin changed depending on well production. Woodside provided results of historical dispersant efficacy testing data used for the blend.</p>	<p>(1) Woodside will consult DoT if there is a spill impacting State water from the proposed activity, as referenced in the Oil Pollution First Strike Plan (Appendix I).</p> <p>(2) Not required.</p> <p>No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 in this EP).</p>

Department of Planning, Lands and Heritage (DPLH)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Planning, Lands and Heritage (DPLH) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DPLH on 13 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to DPLH over a 5-month period.

Summary of information provided and record of consultation:

- On 13 September 2023, Woodside emailed DPLH advising of the proposed activity (Record of Consultation, reference 1.39) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DPLH following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.
- On 18 October 2023, DPLH thanked Woodside for the opportunity to provide feedback and:
 - (1) Confirmed it administered Crown land within the boundaries of the State of Western Australia, including coastal waters out to three nautical miles offshore.
 - (2) Recommended consultation with the Department of Biodiversity, Conservation and Attractions (DBCA), given the proximity of the proposal to Marine Reserve 2.
 - (3) Noted that due to the proposal’s location outside of coastal waters, it had no further comment to make.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 6 November 2023, Woodside responded thanking DPLH for its feedback. Woodside confirmed it had consulted DBCA for the EP and acknowledged that, due to the operation’s location outside of coastal waters, DPLH had no further comment.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) DPLH confirmed it administered Crown land in WA, including coastal waters out to three nautical miles offshore.</p> <p>(2) Due to the proximity of the proposal to Marine Reserve 2, DPLH recommended Woodside consult the Department of Biosecurity, Conservation and Attractions (DBCA).</p> <p>(3) DPLH advised it had no further comment given the operation’s location outside coastal waters.</p> <p>While feedback has been received, there have been no objections or claims.</p>	<p>(1) Woodside noted DPLH’s area of administration.</p> <p>(2) Woodside confirmed to DPLH that DBCA had also been consulted for this EP.</p> <p>(3) Woodside acknowledged that DPLH had no further comment on the proposal.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 in this EP).</p>	<p>(1) Not required.</p> <p>(2) Woodside has assessed DBCA as a relevant person for this EP (see Appendix F, Table 1) in accordance with regulation 25(1) of the Environment Regulations and consulted it alongside DPLH.</p> <p>(3) Not required.</p> <p>The Environment Plan demonstrates that there are no known underwater heritage sites or shipwrecks within the Petroleum Activities Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (Sections 4.10.4 and 6.6). While impacts to underwater heritage sites or shipwrecks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.8.</p> <p>No additional measures or controls are required.</p>

Western Australian Museum

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WA Museum for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information provided to WA Museum on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to WA Museum over a 5-month period.

Summary of information provided and record of consultation:

- On 13 September 2023, Woodside emailed WA Museum advising of the proposed activity (Record of Consultation, reference 1.10) and provided a Consultation Information Sheet, list of shipwrecks and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 October 2023, WA Museum responded thanking Woodside for the information. WA Museum:
 - **(1)** Advised that under the Underwater Heritage Act 2018, proponents should, in the first place, contact DCCEEW as the Commonwealth regulator.
 - **(2)** Directed Woodside to refer to the Commonwealth Government's Underwater Cultural Heritage Guidance for Offshore Developments regarding UCH assessments and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.
 - **(3)** Recommended that Woodside engages a suitably qualified and experienced maritime archaeologist to undertake a UCH Desktop Assessment to identify Aboriginal and non-Aboriginal UCH within the project area.
 - **(4)** Recommended that Woodside consult with Traditional Owners where appropriate if the project involves seabed disturbance in water shallower than 130 metres.
- On 15 November 2023, Woodside responded and thanked WA Museum for its feedback. Woodside:
 - Confirmed it had consulted the Commonwealth regulator, DCCEEW, for this EP.
 - Confirmed it referred to the Commonwealth Government's Underwater Cultural Heritage Guidance for Offshore Developments regarding UCH assessments and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.
 - Noted that as this EP involved ongoing operations, mapping and identification for non-Aboriginal UCH within the project area had previously been completed.
 - Advised that Woodside engaged a desktop review by qualified and experienced maritime archaeologists for seabed disturbing activities to a depth of approximately 130m. As the shallowest water depth for the Operational Area of this activity is 180m, Woodside considered the projects area to be beyond the depth contours for potential Aboriginal UCH.
 - Confirmed that while this activity did not involve seabed disturbance in water shallower than 130m, Woodside consulted with Traditional Owners in the course of preparing EPs and also engaged in ongoing consultation subsequent to the approval of EPs.
 - As per Woodside's ongoing consultation approach, feedback and comments received continued to be assessed and responded to, as required, through the life of an EP.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Pilbara Ports Authority on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Pilbara Ports Authority with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed Pilbara Ports Authority advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Pilbara Ports Authority following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Kimberley Ports Authority

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kimberley Ports Authority for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information provided to Kimberley Ports Authority on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Kimberley Ports Authority with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed Kimberley Ports Authority advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Kimberley Ports Authority following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Mid West Ports Authority

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Mid West Ports Authority for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Mid West Ports Authority on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided the Mid West Ports Authority with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed Mid West Ports Authority advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Mid West Ports Authority following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Fremantle Port Authority

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Fremantle Ports for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Fremantle Ports on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Fremantle Ports with the opportunity to provide feedback over a 5-month period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Fremantle Ports advising of the proposed activity (Record of Consultation, reference 1.36 and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Fremantle Ports following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Southern Ports – Albany and Bunbury

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Southern Ports – Albany and Bunbury for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Southern Ports – Albany and Bunbury on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Southern Ports – Albany and Bunbury with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 9 January 2024, Woodside sent a reminder email to Port of Christmas Island following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Port of Cocos (Keeling) Islands

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Port of Cocos (Keeling) Islands for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Port of Cocos (Keeling) Islands on 18 December 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Port of Cocos (Keeling) Islands with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 18 December 2023, Woodside emailed Port of Cocos (Keeling) Islands advising of the proposed activity (Record of Consultation, reference 1.107) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> On 12 January 2024, Woodside sent a reminder email to Port of Cocos (Keeling) Islands following up on the proposed activity (Record of Consultation, reference 2.21) and included a link to the Consultation Information Sheet on Woodside's website. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Commonwealth and State Government Departments or Agencies – Environment

Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Agriculture, Fisheries and Forestry (DAFF) - Biosecurity for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity on 16 October 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided DAFF - Biosecurity with the opportunity to provide feedback over a 4-month period.

Summary of information provided and record of consultation:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 16 October 2023, Woodside emailed DAFF - Biosecurity advising of the proposed activity (Record of Consultation, reference 1.57) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 3 November 2023, Woodside sent a reminder email following up on the proposed activity (Record of Consultation, reference 2.15) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16). 7.1.16	Vessels are required to comply with the Australian Biosecurity Act 2015, specifically the Australian Ballast Water Management Requirements (as defined under the Biosecurity Act 2015) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing IMS. Vessels will be assessed and managed to prevent the introduction of invasive marine species in accordance with Woodside's Invasive Marine Species Management Plan (see Section 6.7.4 of the EP). No additional measures or controls are required.

Department of Climate Change, Energy, the Environment and Water (DCCEEW)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Climate Change, Energy, the Environment and Water (DCCEEW) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DCCEEW on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to DCCEEW over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed DCCEEW advising of the proposed activity (Record of Consultation, reference 1.9) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 October 2023, DCCEEW responded thanking Woodside for contacting the Department in relation to this EP. DCCEEW:
 - **(1)** Advised Underwater Cultural Heritage (UCH) may potentially be impacted by planned or unplanned activities or events in relation to offshore petroleum activities.
 - **(2)** Noted Woodside was already aware of the *Underwater Cultural Heritage Act 2018* (UCH Act 2018) and its requirements based on communication received during previous EP consultations.
 - **(3)** Provided a summary of legislation and protections, key requirements and obligations, and management considerations and recommendations from the UCH Act 2018.
- On 15 November 2023, Woodside responded and thanked DCCEEW for its email. Woodside:
 - Confirmed it was aware of the legislative requirements of the Underwater Cultural Heritage Act 2018.
 - Noted the Department’s summary of legislation and protections, key responsibilities and obligations for proponents, and management recommendations.
 - Confirmed it referred to the Department’s UCH Guidance for Offshore Developments document and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.
 - Confirmed mapping and identification for non-Aboriginal UCH with the project area had previously been completed for these ongoing activities.
 - Advised the shallowest water depths in the Operational Area, at 180m, were considered beyond the 130m depth contours for potential Aboriginal UCH.
 - Confirmed it consulted with communities and Traditional Owners in the course of preparing EPs and engaged in ongoing consultation subsequent to the approval of EPs.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
DCCEEW provided feedback on: (1) UCH may potentially be impacted by planned or unplanned activities related to offshore petroleum activities. (2) It noted Woodside is already aware of the Underwater Cultural Heritage Act 2018.	(1) Woodside confirmed it referred to the Department’s UCH Guidance for Offshore Developments document and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage. Woodside also confirmed that as these are ongoing operations, mapping for non-Aboriginal UCH has previously been completed. Woodside noted that the	(1) The EP demonstrates that there are no known underwater heritage sites or shipwrecks within the Petroleum Activities Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (Section 4.10.4 and Section 6.6). While impacts to underwater heritage sites or shipwrecks are possible in the event of

<p>(3) A summary of legislation and protections, key responsibilities and obligations, and management considerations and recommendations from the UCH Act 2018.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>shallowest water depths for this activity were 180m, which is considered beyond the depth contours for potential Aboriginal UCH.</p> <p>(2) Woodside confirmed it was aware of the legislative requirements of the Underwater Cultural Heritage Act 2018.</p> <p>(3) Woodside noted the Department’s summary of key legislation and protections, responsibilities and obligations, and management considerations and recommendations from the UCH Act 2018.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.8 of this EP.</p> <p>(2, 3) Not required.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>
---	--	--

Director of National Parks (DNP)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Director of National Parks (DNP) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DNP on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow up emails seeking feedback on the proposed activities.
- Woodside has provided Director of National Parks with the opportunity to provide feedback over a 5-month period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed DNP advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DNP following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.
- On 9 November 2023, Woodside sent a second reminder email to DNP following up on the proposed activity (Record of Consultation, reference 2.17) and included a link to the Consultation Information Sheet on Woodside’s website.
- On 7 December 2023, DNP responded to Woodside and apologised for the delayed response. DNP noted that:
 - **(1)** Based on the information provided, the planned activity did not overlap any Australian Marine Parks (AMPs) therefore there were no authorisation requirements from the DNP.
 - **(2)** To assist in the preparation of an EP for petroleum activities, NOPSEMA has worked closely with Parks Australia to develop and publish a guidance note that outlines what titleholders need to consider and evaluate. Titleholders should ensure the EP:
 - Identified and managed all impacts and risks on Australian marine park values (including ecosystem values) and had considered all options to avoid or reduce them to as low as reasonably practicable.
 - Clearly demonstrated the activity would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
 - **(3)** It did not require further notification of progress made in relation to this activity unless details regarding the activity changed and resulted in an overlap with a marine park or new impact, or for emergency responses.
- On 14 December 2023, Woodside responded thanking DNP for its email and:
 - Noted DNP’s confirmation that planned activities did not overlap any AMPs and there were no authorisation requirements.
 - Confirmed Woodside had taken into consideration the Petroleum Activities and Australian Marine Parks guidance note to ensure the EP:
 - Identified and managed all impacts and risks on AMP values (including ecosystem values) to an acceptable level.
 - Clearly demonstrated that the activities would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
 - Confirmed Woodside would notify DNP in relation to these activities if details regarding the activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
---	---	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>DNP advised:</p> <p>(1) Planned activities do not overlap any Australian Marine Parks and there are therefore no authorisation requirements from the DNP.</p> <p>(2) Woodside should ensure EPs identify and manage all impacts and risks on AMP values, and clearly demonstrate that activities will not be inconsistent with the management plan.</p> <p>(3) It does not require further notification of progress unless details regarding the activity change and result in an overlap with a marine park or new impact, or for emergency responses.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted the DNP's confirmation that planned activities did no overlap AMPs and there are no authorisation requirements.</p> <p>(2) Woodside confirmed it had taken into consideration the Petroleum Activities and Marine Parks guidance note to ensure the EP identified and managed all risks on AMP values, and clearly demonstrated that activities will not be inconsistent with the management plan.</p> <p>(3) Woodside confirmed it would notify DNP if activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>(2) The EP demonstrates how Woodside will identify and manage all impacts and risks on Australian marine park values (including ecosystem values) to an ALARP and acceptable level and that the activity is not inconsistent with the management plan (see Section 6.8 of the EP).</p> <p>(3) Woodside will provide notification of significant change, as appropriate, to relevant persons as referenced in Section 7.10 of the EP. Woodside will ensure DNP is made aware of any incidences within a marine park for the activity, as per the commitment in the Oil Pollution First Strike Plan (Appendix I).</p> <p>No additional measures or controls are required.</p>
--	---	--

Ningaloo Coast World Heritage Advisory Committee (NCWHAC)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Ningaloo Coast World Heritage Advisory Committee (NCWHAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to NCWHAC on 13 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow up emails seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided NCWHAC with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 13 September 2023, Woodside emailed NCWHAC advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 16 October 2023, Woodside sent a reminder email to NCWHAC following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.
- On 9 November 2023, Woodside sent a second reminder email to NCWHAC following up on the proposed activity (Record of Consultation, reference 2.17) and included a link to the Consultation Information Sheet on Woodside’s website. No response was received.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	No additional measures or controls are required.

Department of Biodiversity, Conservation and Attractions (DBCA)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Department of Biodiversity, Conservation and Attractions (DBCA) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DBCA on 13 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure Consultation on offshore petroleum environment plans: Information for the community.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to DBCA over a 5-month period.

Summary of information provided and record of consultation:

- On 13 September 2023, Woodside emailed DBCA advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 October 2023, DBCA responded thanking Woodside for the email and consultation information. DBCA noted:
 - **(1)** The operations were in vicinity of reserves managed by DBCA under the CALM act and given the ecological importance of areas potentially affected by a hydrocarbon release from the proposed activities, it was considered important that the baseline values and state of the potentially affected environment were appropriately understood and documented prior to operations commencing.
 - **(2)** It would like to have confidence that Woodside had established appropriate baseline survey data on the current state of areas supporting important ecological values and any current contamination if present within the area of potential impact of hydrocarbon releases.
 - **(3)** It undertakes monitoring in marine parks and reserves and published monitoring reports which are available on its website, however Woodside should be aware this monitoring is targeted to inform DBCA's values and objectives and is not necessarily suitable to provide baseline information for oil spill risk assessment and management planning.
 - **(4)** It recommended Woodside refer to the Department of Climate Change, Energy, the Environment and Water's National Light Pollution Guidelines for Wildlife as a best-practice industry standard for managing potential impacts of light pollution on marine fauna.
 - **(5)** In the event of a hydrocarbon release, it was requested that Woodside notify DBCA's Pilbara regional office as soon as practicable on (08) 9182 2000.
 - **(6)** It would not implement an oiled wildlife management response on behalf of a petroleum operator except as part of a whole of government response mandated by regulatory decision makers.
 - **(7)** Woodside should refer to the Department of Transport's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements.
- On 31 October 2023, following feedback from the Shire of Shark Bay that the DBCA's Shark Bay office may also wish to provide feedback, Woodside emailed DBCA Shark Bay advising of the proposed activity (Record of Consultation, reference 1.61) and provided a Consultation Information Sheet. Woodside noted in the email that DBCA's main department had already provided feedback on the activity.
- On 15 November 2023, Woodside responded thanking DBCA's main department for its feedback on 23 October 2023. Woodside:
 - Confirmed it maintained knowledge and an understanding of areas of ecological importance within and adjacent to operational areas.
 - Advised its oil spill scientific monitoring program would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release.
 - Confirmed the lighting associated with the Ngujima-Yin FPSO Facility Operations EP and any associated activity vessels was required as a priority for safe operation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Confirmed it had considered DCCEEW’s National Light Pollution Guidelines with respect to vessel activities. The impact assessment determined that the impacts of lighting were as low as reasonably practicable.
 - Advised it had incorporated the DBCA Pilbara regional office telephone number as part of the notifications listed in the Oil Pollution First Strike Plan, which describes the incident management structure, notification and reporting requirements, the Operational Area, activity specific credible spill scenarios, and the hydrocarbon spill response strategies available.
 - Noted that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.
- On 15 December 2023, Woodside sent a reminder email to the DBCA’s Shark Bay office following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>DBCA provided feedback related to:</p> <p>(1) Ecologically important areas including marine parks and coastal conservation reserves in the vicinity of the proposed operations.</p> <p>(2) The establishment of appropriate baseline survey data on the current state of areas.</p> <p>(3) Encouraging Woodside to acquire the necessary information to implement a Before-After Control Impact (BACI) framework.</p> <p>(4) Recommending Woodside refers to DCCEEW’s National Light Pollution Guidelines for Wildlife.</p> <p>(5) Its ‘Incidents and Emergency process, including that Woodside notify DBCA’s Pilbara office as soon as practicable in the event of a hydrocarbon release.</p> <p>(6) The implementation of an oiled wildlife management response.</p> <p>(7) Woodside should refer to the DoT’s web content on marine pollution, and the guidance note Marine Oil Pollution: Response and Consultation Arrangements.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside reaffirmed to DBCA that areas of ecological importance in the proximity of the Environment Plan Operational Areas would not be impacted by planned activities.</p> <p>(2) Woodside confirmed it maintained knowledge and an understanding of areas of ecological importance adjacent to Operational Areas.</p> <p>(3) Woodside confirmed its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors.</p> <p>(4) Woodside confirmed it had considered DCCEEW’s National Light Pollution Guidelines for Wildlife and that lighting associated with this EP was required as a priority for safe operation.</p> <p>(5) Woodside noted DBCA’s Incidents and Emergency Response and confirmed the DBCA Pilbara number had been incorporated as part of the Oil Pollution First Strike Plan.</p>	<p>(1) The Environment Plan demonstrates that the proposed activities are outside the boundaries of a proclaimed State Marine Park and identifies that there are no credible impacts to the values of any State Marine Parks as a result of planned activities (Section 4.9.4 and Section 6.8 of the EP). While impacts to Commonwealth Marine Parks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Sections 6.8.3-6.8.10 of the EP.</p> <p>(2, 3) Under the Oil Spill Scientific Monitoring Program preparedness, an annual review and update to environmental baseline studies database is completed and documented as described in Section 7.7.2 of this EP.</p> <p>(4) Woodside’s impact assessment for light emissions is based on recommendations of the National Light Pollution Guidelines for Wildlife (see Section 6.6.7).</p> <p>(5) DBCA’s Pilbara phone number has been incorporated into the Oil Pollution First Strike Plan for this EP (see Appendix I).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>(6) Woodside noted DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.</p> <p>(7) Woodside noted DBCA's reference to DoT's marine oil pollution content.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).</p>	<p>(6) Woodside's Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) for this EP (see Appendix H).</p> <p>(7) Woodside refers to the specified marine oil pollution content and guidance note in its First Strike Plan for this activity (Appendix I).</p> <p>No additional measures or controls are required.</p>
--	--	---

Department of Industry, Tourism and Trade (DITT) - NT Fisheries

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NT Fisheries for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to NT Fisheries on 22 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided NT Fisheries with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside emailed NT Fisheries advising of the proposed activity (Record of Consultation, reference 1.39) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to NT Fisheries following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has assessed the potential for interaction with Northern Territory managed commercial fisheries in Section 4.10.1 of this EP. No additional measures or controls are required.

Department of Industry, Tourism and Trade (DITT) – Aquatic Biosecurity

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DITT – Aquatic Biosecurity for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DITT – Aquatic Biosecurity on 15 December 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided DITT – Aquatic Biosecurity with the opportunity to provide feedback over a 2-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside emailed DITT – Aquatic Biosecurity, advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 19 January 2024, Woodside sent a reminder email to DITT – Aquatic Biosecurity following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

Commonwealth Commercial fisheries and representative bodies

North West Slope and Trawl Fishery

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with North West Slope and Trawl Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to North West Slope and Trawl Fishery on 22 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activity.
- Woodside has provided the North West Slope and Trawl Fishery with the opportunity to provide feedback over a 5-month period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside emailed North West Slope and Trawl Fishery advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to North West Slope and Trawl Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted AFMA, DAFF – Fisheries, CFA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Western Deepwater Trawl Fishery

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Western Deepwater Trawl Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Western Deepwater Trawl Fishery on 22 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided the Western Deepwater Trawl Fishery with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside emailed Western Deepwater Trawl Fishery advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Western Deepwater Trawl Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Western Tuna and Billfish Fishery

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Western Tuna and Billfish Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Western Tuna and Billfish Fishery on 22 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Western Tuna and Billfish Fishery over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside emailed Western Tuna and Billfish Fishery advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Western Tuna and Billfish Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside’s website.
- **(1)** On 19 October 2023, a licence holder from the Western Tuna and Billfish Fishery responded asking to be removed from Woodside’s mailing list and for Woodside to consult with Tuna Australia.
- On 2 November 2023, Woodside responded thanking the licence holder for their email and confirming they would be removed from Woodside’s mailing list and correspondence would be directed to Tuna Australia.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) A licence holder from the Western Tuna and Billfish Fishery asked to be removed from Woodside’s mailing list and for Woodside to consult with Tuna Australia. While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside respects that consultation is voluntary. Woodside confirmed it had removed the licence holder from mailing lists and would direct correspondence to Tuna Australia.</p> <p>Woodside has consulted Tuna Australia, AFMA, DAFF - Fisheries, CFA, ASBTIA and relevant individual licence holders.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>(1) Not required.</p> <p>Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>

Northern Prawn Fishery

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Northern Prawn Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Northern Prawn Fishery on 22 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Northern Prawn Fishery over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside emailed Northern Prawn Fishery advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Northern Prawn Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 18 October 2023, a licence holder from the Northern Prawn Fishery responded asking to be removed from Woodside's mailing list.
- On 24 November 2023, Woodside responded thanking the licence holder for their email and confirming they had been removed from the mailing list.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) A licence holder from Northern Prawn Fishery asked to be removed from Woodside's mailing list.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside respects that consultation is voluntary. Woodside confirmed it had removed the licence holder from the mailing list.</p> <p>Woodside has consulted AFMA, DAFF - Fisheries, CFA, Northern Prawn Fishery Industry Pty Ltd, and relevant individual licence holders.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback</p>	<p>(1) Not required.</p> <p>Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide</p>

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted AFMA and DAFF – Fisheries. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Tuna Australia		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Tuna Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Tuna Australia on 22 September 2023 based on their function, interest and activities. • Woodside has provided a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow up email seeking feedback on the proposed activities. • Woodside has addressed and responded to Tuna Australia over a 5-month period. <p>Historical engagement:</p> <ul style="list-style-type: none"> • On 15 March 2023, in response to another EP, Tuna Australia provided Woodside its position statement for engaging with energy companies seeking consultation advice from stakeholders on environmental plans and project proposals. Tuna Australia’s feedback included advice that: <ul style="list-style-type: none"> – (1) Due to increased activity of proponents seeking to access offshore areas for various maritime developments, Tuna Australia could no longer coordinate consultation with offshore energy activities on behalf of its members without a service agreement in place. Tuna Australia noted it might be able to provide

information on vessel navigation, fishing activities and/or the conservation of fish resources that may be affected, that is not publicly available and would be an important input to environmental impact and risk assessment processes.

- On 17 May 2023, Woodside thanked Tuna Australia for its industry position statement and stated:
 - The level of feedback provided by an organisation, if any, is at the person or organisation’s discretion. Woodside did not expect organisations to provide reports or engage consultants to provide feedback.
 - Woodside was open to suggestions to make consultation more manageable.
 - Woodside was happy to meet with Tuna Australia to provide an overview of its proposed activities, how EPs were developed and the extensive controls in place to reduce impacts to ALARP and acceptable. Woodside further advised the aim was to provide an efficient, simple way to obtain feedback and assist in understanding Woodside’s activities so Tuna Australia’s input could be considered in the development of EPs.
- On 17 May 2023, Tuna Australia wrote to NOPSEMA (and copied Woodside) regarding Woodside’s position on engagement with Tuna Australia as the lead representative organisation and relevant person for concession holders in the Western Tuna and Billfish Fishery (WTBF). Tuna Australia stated:
 - **(1)** Energy companies who executed service agreements with Tuna Australia ensured all WTBF and Eastern Tuna and Billfish Fishery concession holders were consulted on EPs and responses were provided in a report. This process was efficient and met consultation requirements.
 - It was unfortunate Woodside did not appreciate the nature of fishing and was more content to receive information to support their EPs free of charge which was not consistent with Woodside’s company values.
 - **(1)** Not all energy companies wanted to keep sponging off the community that wished to assist them. Tuna Australia had sound relationships with many energy companies who recognised Tuna Australia as a relevant person and had executed service agreements. In exchange Tuna Australia consulted with concession holders and provided informed, up to date commentary and information consistent with Tuna Australia’s industry position statement.
 - The WTBF fishing zone had been in place for a long time before the start of energy exploration in the marine environment. Tuna Australia was pleased that many energy companies respected this history. Woodside however failed to recognise that the WTBF was even a relevant person. For example, the WTBF was not listed as a relevant fishery in another Woodside EP.
 - WTBF concession holders were concerned with developments in their fishing zone and had comments and questions on EPs and proposals.
 - Tuna Australia requested NOPSEMA stipulated that all EP submissions received formal advice from Tuna Australia.
- On 26 May 2023, Woodside had a phone call with the Tuna Australia CEO and:
 - Explained that Woodside would like to discuss a path forward following receipt of Tuna Australia’s Position Statement across its EP activities.
 - Noted Tuna Australia’s previous EP consultation feedback that Woodside had responded to with respect to unrelated EPs.
 - Reiterated that Woodside does not expect Tuna Australia to provide a consultation report for each of its EPs and was concerned about this potential misalignment on expectations.
 - Tuna Australia advised it would like to discuss a way forward as Woodside suggested, and requested Woodside call Tuna on 30 May 2023, which Woodside committed to.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 June 2023, Woodside made a follow up phone call to Tuna Australia and left a voicemail covering the following:
 - Woodside called Tuna Australia on 2 June 2023 to follow up on phone call on 26 May 2023.
 - Woodside left a message requesting a call back and the opportunity to meet with Tuna Australia to discuss Woodside's portfolio of EP activities.
 - Woodside requested the opportunity to discuss options to consult with Tuna Australia and potentially lessen the burden on Tuna Australia for providing feedback on Woodside's EPs.
 - Woodside offered the opportunity to take Tuna Australia through the entire EP portfolio so Tuna Australia could better assess the volume of activities.
 - Woodside reiterated that there was no expectation for Tuna Australia to provide a consultation report on each individual EP, and potentially there was an opportunity for Woodside and Tuna Australia to work together on a more strategic approach.
- On 6 June 2023, Tuna Australia returned Woodside's call regarding an opportunity to meet to discuss a more strategic approach to consultation.
- On 8 June 2023, Tuna Australia returned Woodside's call and asked Woodside to call back on 14 June 2023.
- On 14 June 2023, Woodside returned Tuna Australia's phone call and left a message for Tuna Australia to call back.
- On 20 June 2023, Woodside and Tuna Australia held a meeting to discuss Tuna Australia's Industry Position Statement.
 - Woodside provided an overview of its activities and explained how recent case law and NOPSEMA guidance had resulted in Woodside undertaking consultation on the widest potential 'EMBA'.
 - Tuna Australia agreed to share with Woodside the name of any of the Offshore Sectors' titleholders that have entered into Tuna Australia's service agreement to date.
 - **(1)** Tuna Australia also agreed to provide more detail on how Tuna Australia will distribute consultation materials to its membership/licence holders and the format of any report arising from the data collected.
 - Woodside committed to review Tuna Australia's Service Agreement.
- On 26 June 2023, Woodside emailed Tuna Australia following the meeting held on 20 June 2023 and recapped what was discussed.
 - Woodside thanked Tuna Australia for its time and stated it looked forward to continuing to work with Tuna Australia.
 - Woodside directed Tuna Australia to contact the Woodside Feedback inbox for any further information.
- On 30 June 2023, Tuna Australia's CEO responded to Woodside's email of 26 June 2023. Tuna Australia:
 - Noted outcomes of the recent case law focussed on stakeholder engagement and ensuring energy companies meet regulatory requirements and NOPSEMA guidelines.
 - Requested Woodside send the recent case law.
 - Reached out to energy companies who have executed a services agreement with Tuna Australia and asked whether Tuna Australia could inform Woodside about their working relationship. Beach Energy confirmed it was happy for Tuna Australia to share its details.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advised how it contacted concession holders and what it provides to them.
 - **(1)** Provided a Tuna Australia contact who managed engagement with energy companies to progress a service agreement with Tuna Australia.
- On 17 July 2023, Woodside emailed Tuna Australia and confirmed:
 - Woodside's legal team had reviewed the Tuna Australia document and requested some minor changes to be made.
 - Woodside asked Tuna Australia if a marked-up version of the Service Agreement would be the simplest way for Tuna Australia to review.
 - Woodside attached a Supplier Questionnaire as part of its due diligence process and asked Tuna Australia to complete the form.
- On 18 July 2023, Tuna Australia emailed Woodside and confirmed:
 - Woodside should send a marked-up version of the Service Agreement for Tuna Australia to review.
 - Tuna Australia would fill out the Supplier Questionnaire and return in the next couple of days.
- On 18 July 2023, Woodside emailed Tuna Australia and sent a marked-up version of the Service Agreement for Tuna Australia to review.
- On 19 July 2023, Tuna Australia emailed Woodside and thanked it for sending through edits to Tuna Australia's services agreement and commented:
 - **(2)** Tuna Australia did not want any changes made to Schedule 2 of their Service Agreement and if Woodside had requirements outside of what Tuna Australia provided, then this would need to be discussed, agreed, and costed accordingly.
 - **(2)** Tuna Australia would like further details on the annual service for the Woodside Master Existing document including the rationale for the payment proposed,
 - **(2)** Tuna Australia does not agree to a fixed price for the above bodies of work. Tuna Australia wants clarification on what the Annual service entails, and how the fixed priced value was arrived at.
 - **(2)** Regarding the fixed fee for delivery of a specific consultation service, Tuna Australia needed to remain flexible to clients' needs and discuss additional works should they be required.
 - **(2)** Tuna Australia did not agree on the current terms which have been changed in Item 2 of Schedule 1 and said it sought a two-year agreement as per the agreement template.
- On 2 August 2023, Woodside emailed Tuna Australia, thanked them for their response regarding the Service Agreement and advised that Woodside's legal team would review and Woodside would revert as soon as possible. Woodside asked Tuna Australia to complete the Supplier Questionnaire sent on 17/7/2023.
- On 3 August 2023, Tuna Australia replied, apologised for the delay and sent the completed Supplier Questionnaire to Woodside.
- On 30 August 2023, Woodside emailed Tuna Australia and advised that Tuna Australia's feedback on the Service Agreement had been discussed with Woodside's legal team. Woodside asked for clarity on whether Tuna Australia would accept section 15: Ethical Business Practices. Once this had been accepted, Woodside could work through Tuna Australia's other points.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** On 4 September 2023, Tuna Australia emailed Woodside and advised that it had seen anti bribery and corruption clauses included in the vendor registration process of other energy companies but had not seen it proposed inside an agreement before. Tuna Australia advised it was not against including them in the agreement, but asked if it was the best place for it.

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside emailed Tuna Australia advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 31 October 2023, Woodside sent a reminder email to Tuna Australia following up on the proposed activity (Record of Consultation, reference 2.12) and included a link to the Consultation Information Sheet on Woodside's website.
- On 6 November 2023, Tuna Australia responded and stated:
 - **(3)** It was prepared to assist Woodside to ensure this environmental plan was comprehensive and extended to all relevant persons, and that Woodside was aware the AFMA webpage requesting concession owners and holders to be contacted was out of date.
 - **(4)** The proponent must address planned fishing effort and development of the fishery, and focussing on historical fishing effort as the basis for validating the environment plan was a flawed assessment.
 - **(5)** It was concerned recent consultation by energy companies had involved accessing mailing lists sourced from AFMA or elsewhere and some contact lists were outdated, inaccurate and not fit-for-purpose as they did not contact the required target audience, while Tuna Australia's database was up to date, accurate and actively managed and reviewed.
 - **(6)** It had offered to assist energy companies to genuinely and comprehensively meet consultation and reporting requirements and its view was that consultation not conducted through its services was highly likely to be incomplete.
 - **(7)** Tuna Australia could not support this Environment Plan proposal as it believed Woodside had fallen short of genuine and comprehensive consultation.
 - **(8)** Woodside should advise Tuna Australia if it wished to progress with a services agreement and work collaboratively.
- On 22 November 2023, Woodside responded thanking Tuna Australia for its email and advised:
 - As Tuna Australia was aware, offshore proponents consult relevant persons under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.
 - Woodside's consultation process identified relevant persons and provided them sufficient information and a reasonable period to make an informed assessment of the possible consequences of the proposed activity on their functions, interests and activities.
 - Woodside obtained contact details of individual Commonwealth fishing statutory fishing rights and fishing permit holders so that consultation was consistent with the Regulations. As noted on its website, AFMA's expectation was that petroleum operators consulted with fishing operators about all activities and projects which may affect day-to-day fishing activities.
 - In addition to consulting individual licence holders, Woodside consulted relevant fishing industry associations and representative bodies such as Tuna Australia and Commonwealth Fisheries Association, and referred to the AFMA website to help inform which associations and bodies were relevant.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- While the management area for the Western Tuna and Billfish Fishery overlapped the Operational Area for this EP, based on AFMA data, no recent fishing effort had occurred within the Operational Area for at least the past 10 years. Despite this, Woodside chose to consult licence holders in this fishery.
- The Offshore Environment Regulations did not require entry into service agreements in order to meet Environment Plan consultation requirements.
- Woodside considered it had met its consultation obligations under the Regulations and given Tuna Australia sufficient time and information to provide input.
- On 5 December 2023, Tuna Australia responded and thanked Woodside for its advice. Tuna Australia noted:
 - **(9)** It was concerned Woodside was electing to cherry-pick on how to meet statutory requirements, for example by focussing on fishing effort and disregarding important information in the OPGGS Act 2006 and Regulations.
 - **(10)** To progress consultation, it wished to pause the process while it took advice.
 - **(6)** It could assist Woodside to develop an environmental plan that was significantly improved and met regulatory requirements.
- On 20 December 2023, Woodside responded and thanked Tuna Australia for its response. Woodside advised:
 - Woodside met its legislative and regulatory requirements in the development and implementation of an Environment Plan.
 - Woodside would continue to consult Tuna Australia and individual Commonwealth licence holders for proposed activities where relevant and as appropriate.
 - Consultation was voluntary and Tuna Australia could decide whether it wished to engage in the process or not.
- On 21 December 2023, Tuna Australia responded and thanked Woodside for its response. Tuna Australia noted:
 - **(1, 3, 7)** The OPGGS Act 2006 clearly stated that when developing an EP, the proponent must demonstrate they could “carry on those activities in a manner that does not interfere with navigation, fishing or the conservation of the resources of the sea and seabed”. Tuna Australia had provided Woodside with its industry position statement and, as mentioned previously, it was prepared to provide services to Woodside to ensure the Environmental Plan met legislative and regulatory requirements. Tuna Australia would ensure thorough and comprehensive consultation on the proposed EP to ensure activities did not have an adverse impact on the fishery and marine environment, and without this advice, any EP submitted to NOPSEMA would be incomplete, inadequate and would not meet regulatory requirements.
 - **(11)** Tuna Australia would welcome comment from NOPSEMA on the content required in an EP to meet regulatory requirements when considering potential impacts on Australian tuna fisheries, especially in the context of knowing that Tuna Australia can comprehensively provide this information through a services agreement and Woodside has chosen not to engage.
 - **(8)** Tuna Australia was now breaking for the festive season but urged Woodside, in the meantime, to consider whether it would like to enter a services agreement and to advise Tuna Australia accordingly in the week starting 8 January.

Ongoing engagement:

- On 5 February 2024, Tuna Australia emailed Woodside regarding another EP and provided feedback on Woodside’s approach to consultation. Tuna Australia noted:

- **(3)** Woodside had decided that rather than developing an ongoing working relationship with Tuna Australia, it would contact all tuna concession owners and holders by accessing the AFMA database.
- (12) There were many AFMA permit registers depending on the fishery and the permit register changed regularly as entitlements were sold and traded. This meant Woodside would need to request a new permit register every time it submitted an EP or a variation to an EP. Woodside would need to reference when it sourced the permit registry to ensure NOPSEMA was assured the list was not outdated.
- (13) After reviewing the FMA 1991 Act and Regulations, Tuna Australia believed Woodside had been provided permit register contact details in error. Tuna Australia was following up on the use of industry data with AFMA and had not ruled out legally challenging the provision of industry data sourced in the manner by Woodside.
- On 19 February 2024, Woodside responded to Tuna Australia and advised:
 - Woodside was willing to have a working relationship with Tuna Australia, however it noted Tuna Australia’s position was to only do this via a fee-for-service agreement.
 - Woodside had previously engaged with Tuna Australia on a draft agreement, however Tuna Australia was not willing to make amendments to the draft agreement proposed by Woodside.
 - Outside a fee-for-service agreement, Woodside was willing to explore options on how best to consult Tuna Australia and licence holders.
 - As previously advised, Tuna Australia obtained contact details of individual Commonwealth statutory fishing rights and fishing permit holders so consultation was consistent with the Regulations. Consultation with fishery operators met the expectation of AFMA that petroleum operators consulted with fishing operators about all activities and projects which might affect day-to-day fishing activities.
 - Woodside regularly updated contact details of individual licence holders to facilitate consultation.
 - Woodside noted Tuna Australia was engaging with AFMA on the provision of permit register contact details under the *Fisheries Management Act 1991*, and Regulations.
- On 19 February 2024, Tuna Australia responded and advised:
 - **(2)** The offer it previously received from Woodside to charter Tuna Australia to do a report on fisheries was insulting.
 - **(1, 6)** As mentioned many times, Tuna Australia could reach out to all tuna concession owners and holders relevant to proposed EPs ensuring improved outcomes to meet regulatory requirements. Other energy companies had executed a services agreement with Tuna Australia and were pleased with the engagement and detailed advice.
 - **(1, 8)** Tuna Australia had proposed a very simple process ensuring Woodside met consultation obligations while not placing disproportionate burden on other sectors, and if Woodside would like an updated services agreement, Woodside should let Tuna Australia know.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
---	---	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>Tuna Australia provided feedback that:</p> <p>(1) It could no longer coordinate consultation with offshore energy activities on behalf of its members without a services agreement in place. Tuna Australia advised other energy companies had entered into the agreement.</p> <p>(2) In response to minor proposed amendments from Woodside to the service agreement, Tuna Australia did not want changes made to Schedule 2; requested further details on the annual service including rationale for the payment proposed; did not agree to a fixed price; and did not agree on the current terms which had been changed in Item 2 of Schedule 1 and sought a two-year agreement. Tuna Australia also advised it was not against including anti-bribery and corruption clauses in the agreement but asked if it was the best place for it.</p> <p>(3) With regards to this EP, Tuna Australia was prepared to assist Woodside to ensure its EP was comprehensive and extended to all relevant persons and asserted that Woodside was aware advice on AFMA’s website was out of date.</p> <p>(4) Focusing on historical fishing effort was a flawed assessment.</p> <p>(5) It had concerns about energy companies sourcing mailing lists from AFMA or elsewhere as some contact lists were outdated, inaccurate and not fit-for-purpose, compared to Tuna Australia’s database which was up to date and accurate.</p> <p>(6) It was offering to assist energy companies to genuinely and comprehensively meet consultation and reporting requirements.</p> <p>(7) It could not support the EP proposal as it believed Woodside had fallen short of genuine and comprehensive consultation.</p>	<p>(1) Woodside respects that, for a relevant person, consultation is voluntary. Woodside advised Tuna Australia the level of feedback provided by an organisation, if any, was at the person or organisation’s discretion, and Woodside was open to suggestions from Tuna Australia on ways to improve efficiency and simplicity for feedback.</p> <p>(2) Woodside requested clarity on whether Tuna Australia would accept Section 15: Ethical Business Practices. Woodside advised Tuna Australia if the amendment was accepted, Woodside could work through Tuna Australia’s other points regarding the service agreement.</p> <p>(3) Woodside has developed a methodology for identifying relevant persons, in accordance with regulation 25(1) of the Environment Regulations that is consistent with NOPSEMA’s guideline. Woodside advised Tuna Australia that Woodside’s consultation process identified relevant persons and provided them with sufficient information and a reasonable period in which to provide feedback.</p> <p>(4) Woodside determined, and advised Tuna Australia, that although the Western Tuna and Billfish Fishery management area overlapped the Operational Area, there had been no fishing effort in the Operational Area for at least the past 10 years. Despite this, Woodside chose to consult licence holders in the fishery.</p> <p>(5) Woodside obtains contact details of Commonwealth statutory fishing rights and fishing permit holders so that consultation is consistent with the Regulations, as per the expectation from AFMA that petroleum operators consulted with fishing operators about all activities and projects which may affect day-to-day fishing activities.</p> <p>(6) Woodside has developed a methodology for identifying relevant persons, in accordance with regulation 25(1) of the Environment Regulations that is</p>	<p>(1, 2) Not required.</p> <p>(3) Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP and identified relevant persons in Appendix F, Table 1 of this EP in accordance with regulation 25(1) of the Environment Regulations.</p> <p>(4, 5, 6) Not required.</p> <p>(7) Woodside considers that Tuna Australia has been given sufficient information and a reasonable period in which to make an informed assessment of the possible consequences of the activity on its functions, interests or activities, as described in Section 5.4 of this EP.</p> <p>(8, 9, 10, 11, 12, 13) Not required.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>Woodside considers the measures and controls in the EP address Tuna Australia’s functions, interests or activities.</p> <p>No additional controls or measures are required.</p>

<p>(8) Woodside should advise Tuna Australia if it wished to progress with a services agreement and work collaboratively.</p> <p>(9) It was concerned Woodside was electing to cherry-pick on how to meet statutory requirements.</p> <p>(10) To progress consultation, it wished to pause the process to obtain advice.</p> <p>(11) It welcomed comment from NOPSEMA on the content required for an EP to meet regulatory requirements.</p> <p>(12) There were many AFMA permit registers depending on the fishery and the permit register changed regularly as entitlements were sold and traded.</p> <p>(13) It had reviewed the FMA 1991 Act and Regulations and believed Woodside had been provided permit register contact details in error and was following up on the use of industry data with AFMA.</p>	<p>consistent with NOPSEMA’s guideline. Woodside advised Tuna Australia that in addition to consulting individual licence holders, Woodside consulted relevant fishing industry associations and representative bodies such as Tuna Australia and the Commonwealth Fisheries Association. Woodside also consulted DAFF – Fisheries and WAFIC for this EP.</p> <p>(7) Woodside considers it has met its consultation obligations under the Environment Regulations and given Tuna Australia sufficient time and information to obtain input and to assist Woodside to confirm current measures or identify additional measures.</p> <p>(8) Woodside noted, and advised Tuna Australia, that the Offshore Environment Regulations did not require entry into service agreements in order to meet EP consultation requirements.</p> <p>(9) Woodside considers it has met its legislative and regulatory requirements in the development and implementation of an EP.</p> <p>(10) Woodside noted Tuna Australia’s wish to pause the consultation process and advised it would continue to consult Tuna Australia and Commonwealth licence holders for proposed activities where relevant and as appropriate, and that consultation was voluntary and Tuna Australia could decide whether it wished to engage in the process or not.</p> <p>(11) Woodside noted that Tuna Australia welcomed comment from NOPSEMA on the content required for an EP to meet regulatory requirements.</p> <p>(12) Woodside advised Tuna Australia that it regularly updated contact details of individual licence holders to facilitate consultation.</p> <p>(13) Woodside noted Tuna Australia was engaging AFMA on the provision of permit register contact details</p>

Pearl Producers Association (PPA)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Pearl Producers Association (PPA) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Pearl Producers Association on 26 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Pearl Producers Association with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 26 September 2023, Woodside emailed Pearl Producers Australia advising of the proposed activity (Record of Consultation, reference 1.45) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Pearl Producers Australia following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	<p>Woodside has consulted AFMA, DAFF – Fisheries and CFA.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>
Northern Prawn Fishery Industry Pty Ltd		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Northern Prawn Fishery Industry Pty Ltd for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Northern Prawn Fishery Industry Pty Ltd on 18 October 2023 based on their function, interest and activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow up email seeking feedback on the proposed activities. • Woodside has provided Northern Prawn Fishery Industry with the opportunity to provide feedback over a 3-month period. <p>Summary of information provided and record of consultation:</p> <ul style="list-style-type: none"> • On 18 October 2023, Woodside emailed Northern Prawn Fishery Industry Pty Ltd advising of the proposed activity (Record of Consultation, reference 1.58) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. 		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 November 2023, Woodside sent a reminder email to Northern Prawn Fishery Industry Pty Ltd following up on the proposed activity (Record of Consultation, reference 2.14) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA, and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Western Australian Commercial fisheries and representative bodies

Western Australian Fishing Industry Council (WAFIC)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Western Australian Fishing Industry Council (WAFIC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to WAFIC on 20 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to WAFIC over a 5-month period.

Summary of information provided and record of consultation:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 20 September 2023, Woodside emailed WAFIC advising of the proposed activity (Record of Consultation, reference 1.31) and provided an overview and Consultation Information Sheet for distribution to licence holders in four State fisheries relevant to the Operational Area of the proposed activity.
- On 21 September 2023, WAFIC responded thanking Woodside for its email and:
 - **(1)** Advised it would send out the consultation material under the agreed fee-for-service agreement.
 - **(2)** Asked Woodside to confirm the relevance of the Marine Aquarium Fish Managed Fishery, on the basis that the hand collection and diving methods used in this fishery were not applicable at the water depths of the proposed activity.
- On 21 September 2023, Woodside responded thanking WAFIC for its email and confirmed that on the basis of the activity water depths, it would remove Marine Aquarium Fish Managed Fishery from relevant fisheries for this activity.
- On 21 September 2023, Woodside emailed WAFIC with an amendment to the information intended for distribution to the relevant fisheries, including an additional line regarding notification of activities.
- On 21 September 2023, WAFIC emailed Woodside confirming it had sent the amended version of the consultation information to licence holders in the three fisheries relevant to the Operational Area for this EP: Mackerel Managed Fishery (Area 2), Pilbara Line Fishery and West Coast Deep Sea Crustacean Managed Fishery.
- On 18 October 2023, Woodside sent a reminder email to WAFIC following up on the proposed activity (Record of Consultation, reference 2.4). Woodside noted that it understood WAFIC may not consider it necessary to send a reminder email to individual licence holders but provided a link to the Consultation Information Sheet on Woodside's website for WAFIC's information and for distribution to licence holders at WAFIC's discretion.
- On 19 October 2023, WAFIC thanked Woodside for its email and confirmed that:
 - **(3)** As per WAFIC's protocol to avoid consultation fatigue, it did not consider it necessary to issue a consultation reminder to commercial licence holders.
 - **(4)** WAFIC would take time to review the consultation material ahead of the closure of the consultation period.
- On 31 October 2023, Woodside sent an email thanking WAFIC for its response regarding reminders and for reviewing the consultation material.
- On 31 October 2023, WAFIC emailed Woodside to confirm it had not received any feedback or concerns from licence holders regarding this EP. WAFIC also:
 - **(5)** Confirmed that given the activity in this EP was standard business for Woodside, it had no further comment at this stage.
 - **(6)** Confirmed and agreed that Woodside would send all notifications regarding activities to WAFIC.
 - **(7)** Requested to be consulted on any future development activities considered for the Ngujima-Yin facility that was subject to a separate EP.
- On 1 November 2023, Woodside responded thanking WAFIC for its email and:
 - Noted there was no feedback or concerns from licence holders and no further comment from WAFIC.
 - Noted that as the EP included ongoing operations no activity notifications were expected, but confirmed it would provide WAFIC with start and end activity notifications for the associated drilling, construction and installation activities which would be subject to a separate EP.
 - Confirmed it would consult WAFIC on these future EPs related to the Ngujima-Yin FPSO Facility.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 6 November 2023, WAFIC responded thanking Woodside for its confirmation email regarding this EP.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>WAFIC provided feedback and:</p> <p>(1) Advised it would send consultation material to relevant stakeholders.</p> <p>(2) Asked Woodside to clarify the relevance to the Operational Area of two fisheries based on the collection and diving methods.</p> <p>(3) Advised it did not consider it necessary to send reminder emails to licence holders for this activity.</p> <p>(4) Confirmed it would take time to review the consultation material before the end of the consultation period.</p> <p>(5) Noted it had no further comment on the EP at this stage.</p> <p>(6) Confirmed Woodside should send all notifications regarding activities to WAFIC.</p> <p>(7) Requested to be consulted on future EPs regarding the Ngujima-Yin FPSO Facility.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted WAFIC would distribute consultation material.</p> <p>(2) Woodside assessed WAFIC's feedback regarding the relevancy of two fisheries and confirmed that, based on WAFIC's expertise on water depths and the methods of hand collection and diving, it would not consider the Marine Aquarium and Specimen Shell fisheries relevant to the Operational Area for this EP.</p> <p>(3) Woodside noted WAFIC's advice that it was not necessary to send reminder emails to individual licence holders.</p> <p>(4,5) Woodside noted WAFIC had reviewed the consultation material and did not have further comment on the EP at this stage.</p> <p>(6) Woodside confirmed that while there were not expected to be activity notifications for the ongoing operations involved with this EP, it would provide WAFIC with start and end activity notifications for the associated drilling, construction and installation activities which would be subject to a separate EP.</p> <p>(7) Woodside confirmed it would consult WAFIC on future EPs related to the Ngujima-Yin FPSO Facility.</p> <p>Woodside has consulted DPIRD, WAFIC and individual licence holders (via WAFIC).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will</p>	<p>(1) Not required.</p> <p>(2) Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has updated its assessment of relevancy for consultation purposes (see Record of Consultation, Table 1) to reflect WAFIC's advice and consultation guidelines.</p> <p>(3, 4, 5) Not required.</p> <p>(6) Woodside engages in ongoing consultation and will provide notifications of significant change, as appropriate, to WAFIC as referenced in Section 7.10 of the EP.</p> <p>(7) Not required.</p> <p>No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	apply its Management of Change and Revision process (see Section 7.1.16).	
Mackerel Managed Fishery (Area 2)		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Mackerel Managed Fishery (Area 2) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Mackerel Managed Fishery (Area 2), via WAFIC, on 21 September 2023 based on their function, interest and activities. • Woodside has provided the Mackerel Managed Fishery (Area 2) with the opportunity to provide feedback over a 5-month period. <p>Summary of information provided and record of consultation:</p> <ul style="list-style-type: none"> • On 21 September 2023, WAFIC, on behalf of Woodside, emailed Mackerel Managed Fishery (Area 2) advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet. • As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required for the Mackerel Managed Fishery (Area 2). 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received.	<p>Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC).</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP.</p> <p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>
West Coast Deep Sea Crustacean Managed Fishery		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with West Coast Deep Sea Crustacean Managed Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to West Coast Deep Sea Crustacean Managed Fishery, via WAFIC, on 21 September 2023 based on their function, interest and activities.
- Woodside has provided the West Coast Deep Sea Crustacean Managed Fishery with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed West Coast Deep Sea Crustacean Managed Fishery advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required for the West Coast Deep Sea Crustacean Managed Fishery.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Pilbara Line Fishery

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Pilbara Line Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Pilbara Line Fishery, via WAFIC, on 21 September 2023 based on their function, interest and activities.
- Woodside has provided Pilbara Line Fishery with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed Pilbara Line Fishery advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required for the Pilbara Line Fishery.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Western Rock Lobster Council

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Western Rock Lobster Council for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Western Rock Lobster Council on 30 October 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has provided Western Rock Lobster Council with the opportunity to provide feedback over a 3-month period.

Summary of information provided and record of consultation:

- On 30 October 2023, Woodside emailed Western Rock Lobster Council advising of the proposed activity (Record of Consultation, reference 1.59) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 13 November 2023, Woodside sent a reminder email to Western Rock Lobster Council following up on the proposed activity (Record of Consultation 2.16) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Recreational marine users and representative bodies

Exmouth Recreational Marine Users

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Exmouth Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Exmouth Recreational Marine Users on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Exmouth Recreational Marine Users with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Exmouth Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Exmouth Recreational Marine Users following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Gascoyne Recreational Marine Users

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Gascoyne Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Gascoyne Recreational Marine Users on 22 September 2023 based on their function, interest and activities.
- Woodside has referred Gascoyne Recreational Marine Users to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up letter seeking feedback on the proposed activities.
- Woodside has provided Gascoyne Recreational Marine Users with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside sent a letter to Gascoyne Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and referred to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Gascoyne Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 2.6) and included a QR code link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Pilbara/Kimberley Recreational Marine Users		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Pilbara/Kimberley Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Pilbara/Kimberley Recreational Marine Users on 22 September 2023 based on their function, interest and activities.
- Woodside has referred Pilbara/Kimberley Recreational Marine Users to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up letter seeking feedback on the proposed activities.
- Woodside has provided Pilbara/Kimberley Recreational Marine Users with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside sent a letter to Pilbara/Kimberley Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and referred to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Pilbara/Kimberley Recreational Marine Users following up on the proposed activity (Record of Consultation, reference 2.6) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Lombadina Aboriginal Corporation (LAC)

LAC have been identified as a relevant person through their functions, activities or interests as a Pilbara/Kimberley Recreational Marine User, as identified in Table 1. LAC is not a Prescribed Body Corporate under the Native Title Act 1993 and associated regulations.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with LAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside Sought direction on LAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to LAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that LAC's can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with LAC in October 2023. Woodside has addressed and responded to LAC over 5 months, demonstrating a "reasonable" period of consultation.
- Woodside asked LAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on LAC'S functions, interests or activities.

Historical engagement:

- On 25 July 2023, Woodside emailed LAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that LAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside emailed LAC advising of the proposed activity (Record of Consultation, reference 1.98) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that lac and its members may have within the EMBA, information on how LAC would like to engage, and requested that LAC provide information to other individuals as required.
- On 10 October 2023, Woodside met with LAC in person for a consultation meeting on this activity. Woodside explained the activity, noting that it is a 5-year submission review and had been operating since 2008 and was located near Exmouth. Woodside described the EMBA and how the EMBA is created. Woodside talked through the NOPSEMA guidelines.
 - **(1)** LAC asked a question about how Woodside drilled into the ocean floor. Woodside said they would provide an animation drilling video that demonstrated the process.
 - Woodside asked LAC if there were any cultural values that they would like Woodside to know about noting that there is the option to require information to be kept confidential. Woodside asked whether LAC had any further questions or concerns in relation to this EP. LAC responded no to both queries.
 - Woodside said it was able to fund future meetings.
- **(1)** On 17 October 2023, Woodside emailed LAC thanking them for the 10 October 2023 meeting and reaffirmed that feedback on EPs can be provided over the life of the EP and does not need to occur before the activity commences. Woodside also provided a drilling video as requested by LAC at the meeting. No response has been received.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) During face-to-face engagement related to this activity and others, LAC requested further information on a topic related to the proposed activity which was responded to during the meeting:</p> <ul style="list-style-type: none"> • How Woodside drills into the ocean floor. 	<p>(1) Woodside responded to LAC's requests for information, and no further information was requested on this topic.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with LAC (Section 7.10). As outlined in the</p>	<p>(1) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with LAC as part of ongoing engagement (Section 7.10 of the EP).</p>

Karratha Recreational Marine Users

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Karratha Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Karratha Recreational Marine Users on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email to Karratha Recreational Marine Users seeking feedback on the proposed activities.
- Woodside has provided the Karratha Recreational Marine Users with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Karratha Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> On 16 October 2023, Woodside sent a reminder email to Karratha Recreational Marine Users following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>No feedback, objections or claims received despite follow up.</p>	<p>Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. - On 22 September 2023, Woodside sent a letter to West Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and referred to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to West Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 2.6) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	<p>Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>

South Coast Recreational Marine Users

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with South Coast Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to South Coast Recreational Marine Users on 22 September 2023 based on their function, interest and activities.
- Woodside has referred South Coast Recreational Marine Users to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up letter seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided South Coast Recreational Marine Users with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 22 September 2023, Woodside sent a letter to South Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to South Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 2.6).
- On 4 October 2023, a fishing charter operator consulted as part of the South Coast Recreational Marine Users emailed Woodside and commented they were vehemently against the proposal of FPSOs in the Carnarvon Basin due to the risks to marine and shore environments which, in their opinion, outweighed the projects. Their concerns regarded:
 - (1) The drilling of two new wells and the impact on the World Heritage-listed reef and coast.
 - (2) Seismic blasting carried out to search for the new wells and the impact on the natural environment including fauna.
 - (3) The potential of a crude oil spill and/or the release of hydrocarbons and the effect on marine life, Ningaloo Reef, and coastline.
 - (4) The impact on shoreline bird life and marine mammals such as whales.
- On 12 October 2023, Woodside emailed the fishing charter operator thanking them for their email, and to confirm they were referencing activities relating to this EP, and which stakeholder group they were part of.
- On 12 October 2023, the fishing charter operator responded to Woodside confirming their comments were in relation to this EP and that they were part of the coastal tourism stakeholder group.
- On 27 November 2023, Woodside responded thanking the fishing charter operator for their feedback and advised:
 - The five-year revision of the Ngujima-Yin FPSO Facility Operations EP included production from a proposed additional two wells via subsea tieback to existing infrastructure. There were no planned impacts on the nearby World Heritage area or coastline as a result of the proposed additional wells or ongoing activities proposed under the Ngujima-Yin FPSO Facility Operations EP. The proposed activity to drill the two wells would be subject to a separate and future EP, for which Woodside would undertake consultation.
 - There were no seismic activities associated with the five-year revision of the Ngujima-Yin FPSO Facility Operations EP.
 - In accordance with Woodside's risk assessment for this EP, a worst-case loss of well containment had been defined as a 'highly unlikely' event. In the highly unlikely event of a hydrocarbon release, Woodside had a well-developed oil response management framework, including specific responses for sensitive areas such as Ningaloo Marine Park, and an Oil Pollution First Strike Plan which would guide the immediate response.
 - The potential impacts on bird life and marine animals depended on the timing, duration and extent of a spill in the highly unlikely event this occurred. Response options to mitigate environmental impacts included tracking the spill, the use of protective barriers, shoreline clean-up techniques, prevention of

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

the spill contacting wildlife where feasible and rehabilitation of wildlife where contact occurred, and long-term monitoring of sensitive species and sites after a spill event.		
Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>A fishing charter operator from the South Coast Recreational Marine Users provided feedback that he was against the proposed activities and was concerned about:</p> <ul style="list-style-type: none"> (1) The drilling of two new wells and the impacts. (2) Seismic blasting to search for the new wells. (3) Potential of a crude oil spill and its impact on marine life, reef and coastline. (4) The impact on shoreline birds and marine mammals. 	<ul style="list-style-type: none"> (1) There are no drilling activities associated with this EP. Woodside advised the fishing charter operator the EP included production from a proposed additional two wells. The proposed activity to drill to two wells would be subject to a separate and future EP, for which Woodside would undertake consultation. (2) There are no seismic activities associated with this EP. Woodside provided this advice to the fishing charter operator. (3) Woodside advised a worst-case loss of well containment had been defined as a ‘highly unlikely’ event and it had a well-developed oil response management framework including an Oil Pollution First Strike Plan. (4) Woodside advised the impact on animals depended on the timing, duration and extent of a spill. Response options included tracking, protective barriers, shoreline clean-up techniques, prevention of contact with wildlife and rehabilitation of wildlife where contact occurs, and long-term monitoring of species and sites after a spill. <p>Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and relevant individual recreational marine users.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Christmas Island Recreational Marine Users

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Christmas Island Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Christmas Island Recreational Marine Users on 14 September/03 October 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email/letter seeking feedback on the proposed activities.
- Woodside has provided the Christmas Island Recreational Marine Users with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023 and 03 October 2023, Woodside emailed/sent a letter to Christmas Island Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.6 and 1.53) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023 and 24 October 2023, Woodside sent a reminder email or letter to Christmas Island Recreational Marine Users following up on the proposed activities (Record of Consultation, reference 2.1 and 2.9) and included a link/QR code to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and relevant individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Refer to electronic version for most up to date information.</p>		

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Marine Tourism WA with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Marine Tourism WA advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Marine Tourism WA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted Recfishwest, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

WA Game Fishing Association

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WA Game Fishing Association for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to WA Game Fishing Association on 14 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided WA Game Fishing Association with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed WA Game Fishing Association advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to WA Game Fishing Association following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	<p>Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and relevant individual recreational marine users.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>

Titleholders and Operators

Chevron Australia/ Osaka Gas Gorgon/ Tokyo Gas Gorgon/ JERA Gorgon

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Chevron Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided Western Gas on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Western Gas with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed Western Gas advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Western Gas following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Exxon Mobil Australia Resources Company

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Exxon Mobil Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information provided to Exxon Mobil Australia on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Exxon Mobil Australia with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Exxon Mobil Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Exxon Mobil Australia following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shell Australia

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shell Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shell Australia on 15 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shell Australia with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed Shell Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shell Australia following up on the proposed activity ((Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

BP Developments Australia

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BP Developments for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to BP Developments on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to BP Developments Australia over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed BP Developments Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 03 October 2023, BP Developments Australia responded thanking Woodside for its email and advising it had no objections or further feedback at that time.
- On 03 October 2023, Woodside responded thanking BP Developments Australia for its email.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) BP Developments Australia advised it had no objections or further feedback. Whilst feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted BP Developments had no objections or feedback. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required. No additional measures or controls are required.</p>

Carnarvon Energy

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Carnarvon Energy for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Carnarvon Energy on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to Carnarvon Energy over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Carnarvon Energy advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 28 September 2023, Carnarvon Energy responded thanking Woodside for its email and confirming it had no further request for information after reviewing the consultation material.
- On 29 September 2023, Woodside responded thanking Carnarvon Energy for its email and noted it had no further requests for information.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Carnarvon Energy advised it had no further requests for information.</p> <p>Whilst feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted Carnarvon Energy had no further requests for information.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>(1) Not required.</p> <p>No additional measures or controls are required.</p>

PE Wheatstone

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with PE Wheatstone for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to PE Wheatstone on 14 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to PE Wheatstone over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed PE Wheatstone advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 14 September 2023, PE Wheatstone responded thanking Woodside for its email and confirming it had no concerns on the consultation information provided.
- On 21 September 2023, Woodside responded thanking PE Wheatstone for its email and acknowledged it had no concerns.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) PE Wheatstone advised it had no concerns on the consultation information provided.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted PE Wheatstone had no concerns. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>No additional measures or controls are required.</p>

Kyushu Electric Wheatstone

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kyushu Electric Wheatstone for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Kyushu Electric Wheatstone on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Kyushu Electric Wheatstone with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Kyushu Electric Wheatstone advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Kyushu Electric Wheatstone following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Eni Australia

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Eni Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Eni Australia on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided Eni Australia with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Eni Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Eni Australia following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Finder Energy No 16

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Finder Energy No 16 for the purpose of 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Finder Energy on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Finder Energy No 16 over a 5-month period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Finder Energy advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email (Record of Consultation, reference 2.1) following up on the proposed activity and included a link to the Consultation Information Sheet on Woodside’s website.
- **(1)** On 17 October 2023, Finder Energy responded thanking Woodside for its email and advising it had no feedback on the proposed activities.
- On 17 October 2023, Woodside responded thanking Finder Energy for its email and noted it had no feedback on the proposed activities.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Finder Energy advised it had no feedback on the proposed activities. Whilst feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted Finder Energy had no feedback on the proposed activities. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>(1) Not required. No additional measures or controls are required.</p>

Jadestone

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Jadestone for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Jadestone on 14 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided the Jadestone with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Jadestone advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Jadestone following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

KUFPEC

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KUFPEC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to KUFPEC on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided KUFPEC with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed KUFPEC advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to KUFPEC following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Santos NA Energy Holdings / Santos Ltd / Santos WA Northwest / Santos Offshore / Santos WA Southwest / Santos (BOL) / Santos WA PVG

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Santos for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Santos on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Santos over a 5-month period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>Summary of information provided and record of consultation:</p> <ul style="list-style-type: none"> On 14 September 2023, Woodside emailed Santos advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. (1) On 20 September 2023, Santos responded thanking Woodside for its email and advising it had no comments or objections to the proposed activities. On 22 September 2023, Woodside responded thanking Santos for its email. 		
--	--	--

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plans
<p>(1) Santos advised it had no comments or objections regarding the proposed activities.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted Santos had no comments or objections.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>No additional measures or controls are required.</p>

Coastal Oil and Gas

<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Coastal Oil and Gas for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

VRX Silica

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with VRX Silica for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to VRX Silica on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided VRX Silica with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed VRX Silica advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to VRX Silica following up on the proposed activities (Record of Consultation, reference 2.1).

Origin Energy Browse

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Origin Energy Browse for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Origin Energy Browse on 27 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Origin Energy Browse with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 14 September 2023, Woodside emailed Origin Energy Browse advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 27 September 2023, Woodside forwarded its email and consultation information to another Origin Energy email address after receiving a delivery failure on the initial email.
- On 16 October 2023, Woodside sent a reminder email to Origin Energy Browse following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 October 2023, Origin Energy sent an email to Woodside thanking it for getting in touch and asking to confirm its details.
- On 7 November 2023, Woodside emailed Origin Energy and confirmed it was contacting Origin Energy Browse as a titleholder in regard to consultation for this EP. Woodside provided another link to the Consultation Information Sheet on its website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

--	--	---

Traditional Custodians and nominated representative corporations

Murujuga Aboriginal Corporation (MAC)

MAC is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on MAC’s preferred method of consultation.
- Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to MAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that MAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Woodside commenced consultation with MAC in November 2023. Woodside has addressed and responded to MAC over 4 months, demonstrating a “reasonable period” of consultation.

Woodside asked MAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MAC’s functions, interests or activities.

Historical Engagement

- On 18 July 2023, Woodside emailed MAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that MAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed MAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- **(1)** On 1 September 2023, MAC emailed a letter to Woodside noting the following in response to Woodside’s query regarding consultation on another activity unrelated to this EP:
 - MAC consulted with women appointed to their Circle of Elders regarding the query.
 - MAC is comfortable that the women in the Circle of Elders are the right people to be consulted about these matters.
 - MAC notes that it would be extremely unusual for knowledge to be held by an individual without surrounding groups knowing about it.
 - The Circle of Elders themselves represent the Ngarda-Ngarli; the collective term for the Traditional Custodians who look after Murujuga Country.

Summary of information provided and record of consultation for this EP:

- On 17 November 2023, Woodside emailed MAC advising of the proposed activity (Record of Consultation, reference 1.63) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that MAC and its members may have within the EMBA, information on how MAC would like to engage, and requested that MAC provide information to other individuals as required.
- **(2)** On 17 November 2023, MAC emailed Woodside confirming receipt of materials and informed that they would send off for review.
- On 5 January 2024, Woodside emailed MAC a table displaying the status of Woodside’s outstanding EP consultations with MAC. Woodside offered to set up a consultation meeting to work through this table with MAC. No response has been received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) On 1 September 2023, MAC confirmed that they were the appropriate body corporate and cultural authority over Murujuga.</p> <p>(2) MAC confirmed it had received the consultation materials for this EP but has not provided further feedback, questions or objections to the activity.</p>	<p>(1) Woodside accepts and respects MAC's position as the appropriate body corporate and cultural authority over Murujuga.</p> <p>(2) Woodside accepts MAC has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with MAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to MAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>(2) Existing controls considered sufficient as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with MAC through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside's Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>
<p>Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC)</p> <p>NTGAC is established under the Native Title Act 1993 by the Baiyungu people to represent the Baiyungu people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NTGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p>Sufficient Information:</p> <ul style="list-style-type: none"> Woodside sought direction on NTGAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. 		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided Consultation Information Sheet and Summary Information Sheets developed by Indigenous staff to NTGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that NTGAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with NTGAC in October 2023. Woodside has addressed and responded to NTGAC over 5 months, demonstrating a "reasonable" period of consultation.

Woodside asked NTGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NTGAC's functions, interests or activities.

Historical engagement:

- On 19 July 2023, Woodside emailed NTGAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NTGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed NTGAC/YMAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 23 October 2023, Woodside emailed NTGAC (via YMAC) advising of the proposed activity (Record of Consultation, reference 1.64) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NTGAC and its members may have within the EMBA, information on how NTGAC would like to engage, and requested that NTGAC provide information to other individuals as required.

- On 13 November 2023, Woodside emailed NTGAC (via YMAC) noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet.

Ongoing engagement:

- (1)** On 14 December 2023, Woodside emailed YMAC attaching the Program of Ongoing Consultation and advised that Woodside wanted to progress negotiations on consultation frameworks with groups represented by YMAC (including NTGAC). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide NTGAC with the information NTGAC requires to make free, prior and informed decisions about Woodside’s EPs.
 - Agreement as to how NTGAC will provide feedback and how that can best be represented in EPs.
 - An agreed schedule of rates for NTGAC’s participation in consultation.
 - How the outputs of the consultations will be managed.
- On 21 December 2023, Woodside emailed NTGAC/YMAC with a list of activities, as requested, including this activity.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>No feedback, objections or claims have been received for this activity since consultation commenced in October 2023, despite follow up.</p> <p>(1) NTGAC are developing the first draft of a Consultation Agreement, and General Report. The proposal for the General Report is that it would outline the nature of the activities for each phase of the project and the risks associated with each of the relevant activities. Woodside are awaiting receipt of the initial draft of the General Report.</p>	<p>Woodside accepts that NTGAC has no feedback on this activity.</p> <p>(1) Separate from consultation under regulation 25 of the Environment Regulations for this activity, Woodside is applying internal approvals to settle a Consultation Agreement with NTGAC. The Consultation Agreement and General Report/s would be used to frame ongoing consultation to occur as part of Woodside’s commitment to post regulation 25(1) of the Environment Regulations consultation. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff.</p>	<p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>(1) Woodside is implementing a program to actively support Traditional Custodians’ capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes continued engagement regarding NTGAC’s proposed Consultation Framework and General Report which will be applied to ongoing consultation.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	---	--

Buurabalayji Thalanyji Aboriginal Corporation (BTAC)

BTAC is established under the Native Title Act 1993 by the Thalanyji people to represent the Thalanyji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on BTAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Summary Information Sheet developed by Indigenous staff to BTAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that BTAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation with BTAC in October 2023.
- Woodside has addressed and responded to BTAC over 5 months, demonstrating a “reasonable” period of consultation.

Woodside asked BTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BTAC’s functions, interests or activities.

Historical Engagement:

- On 20 February 2023, BTAC sent a letter to Woodside, in relation to another project, confirming that:
 - **(1)** BTAC, on behalf of Thalanyji people, had interests in archaeological sites on nearshore islands including the Montebello islands, Barrow Island and Mackerel Islands, and had a cultural obligation to care for sea country and environmental values.
 - **(2)** BTAC had not specifically developed values regarding Sea Country into a format that could be articulated for consultation.
 - **(3)** BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.
 - **(4)** BTAC proposed that Woodside enter into a consultation or engagement framework agreement to set out a process for ongoing consultation.
- On 19 July 2023, Woodside emailed BTAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that BTAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed BTAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed BTAC advising of the proposed activity (Record of Consultation, reference 1.65) and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that BTAC and its members may have within the EMBA.
- **(4)** On 13 October 2023, legal practice Banks-Smith and Associates emailed Woodside confirming they acted for BTAC on NOPSEMA matters. Among other things, they noted, they required an indemnity clause in the proposed framework agreement against any court action that arose from a claim against BTAC in regard to the consultation they engaged on with Woodside EP’s.
- **(4)** On 31 October 2023, BSA emailed Woodside, requesting a response to the email about indemnifying BTAC.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 1 November 2023, BTAC emailed Woodside inviting Woodside to present on Woodside activities at a 1-hour slot in the BTAC Common Law Holders meeting on 27 November 2023.
- On 1 November 2023, Woodside emailed BTAC accepting the offer to present at the Common Law Holders meeting and offering to pay costs for the meeting.
- On 2 November 2023, Woodside emailed BSA noting they would not agree to the request to indemnify BTAC against any court proceedings as a result of consultation they engage in with Woodside on EP's. Woodside re-iterated their wish to progress the framework agreement to build their relationship with BTAC. Woodside again noted that they wish to progress other matters, including the commitment to mapping BTAC's sea country values.
- **(4)** On 2 November 2023, BSA emailed Woodside requesting more detail about Woodside not supporting the indemnity request.
- On 3 November 2023, BSA emailed Woodside confirming that BTAC would like Woodside to present to a BTAC members meeting on 27 November 2023 in Carnarvon.
- On 18 November 2023, Woodside emailed BSA with further information about why they will not indemnify BTAC as requested in the 13 October 2023 email. Woodside explained that it could harm genuine engagement, may promote behaviours in others who may become aware of the indemnity by Woodside, and it would not be good practice to provide an indemnity in relation to the act or omission of other parties that Woodside would not necessarily engage with. Woodside again noted their commitment to build an ongoing relationship with BTAC.
- **(3, 4)** On 27 November 2023, Woodside attended and presented at the BTAC Common Law Holders meeting. The one-hour timeslot did not allow for taking feedback in relation to EPs, but the Common Law Holders meeting were made aware that Woodside had been attempting to meet since January 2023 on activities and had agreed to pay for reasonable consultation costs as well as fund Sea Country mapping but that these offers had not been taken up. BTAC members were very interested in an ongoing relationship and discussed sea country mapping, which Woodside had responded to in writing earlier in 2023, Woodside agreed to re-send the relevant correspondence to the new CEO. BTAC noted they would invite Woodside to attend a meeting with BTAC early in 2024, a collaborative agreement will be settled and further ongoing consultation on all relevant Eps will continue in order of priority for BTAC and Woodside.
- On 7 December 2023, Woodside emailed BSA requesting a response to the email of 18 November 2023 in relation to their request and Woodside's response on indemnification. Woodside noted that the framework agreement has not been finalised to date but would include the following:
 - Agreement between parties to consult in a meaningful and genuine manner.
 - Procedure Woodside will follow when a submission requires consultation, which would include notification and an invitation to meet.
 - Initial and ongoing consultation about activities.
 - How Thalanyji provides feedback and how to represent that feedback in submissions.
 - Agreed schedule of rates.
 - How to manage the outputs of consultation.
 - Woodside requested to meet to progress discussions with BTAC.
- On 7 December 2023, Woodside emailed BTAC forwarding correspondence received from and correspondence sent to the previous CEO dated 20 February 2023 and dated 17 March 2023, confirming support for recording sea country values and confirming anthropological support. Woodside confirmed support to pay

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

reasonable costs for ethnographic/anthropological support for mapping and recording sea country values. Woodside requested to be contacted to enable progress on the above matters. BTAC's letter of 20 February 2023 in relation to other activities noted interests in archaeological sites on nearshore islands including the Montebello and Barrow Islands, they noted a cultural obligation to care for sea country and environmental values.

- **(3)** On 7 December 2023, BTAC emailed Woodside accepting the offer to take up sea country mapping and research. BTAC requested a meeting in the week of 15 January 2024 to plan for upcoming activities.
- **(5)** On 8 December 2023, BSA emailed Woodside in relation to settling finance matter, noting they would wait to schedule a meeting with BTAC once financials sorted.
- On 8 December 2023, Woodside emailed BSA requesting further details on finances for the framework agreement, noting that Woodside's policies require itemised estimates for services.
- **(5)** On 11 December 2023, BSA emailed acknowledging costs estimates would be provided shortly and requesting availability to meet with BTAC during January, February and March 2024.
- On 12 December 2023, BTAC emailed Woodside asking if 17 January 2024 was a suitable date to meet.
- On 12 December 2023, Woodside emailed BSA noting that BTAC had suggested a meeting during the week of 15 January 2024 to discuss sea country mapping. Woodside suggested that they would include time to progress the framework agreement and present on the status of current EPs.
- On 15 December 2023, BTAC emailed Woodside requesting a copy of the slide presentation from the meeting of 27 November 2023.
- On 18 December 2023, Woodside emailed BTAC a copy of the slide presentation as requested from the meeting of 27 November 2023.
- On 19 December 2023, Woodside emailed BTAC agreeing to meet on 17 January 2024, Woodside provided an example of costings provided by other PBCs and noted they would not be able to pay legal fees if the framework agreement and EPs were not discussed. Woodside requested other meeting dates if the 17 January 2024 meeting was only to discuss sea country mapping.
- **(4)** On 19 December 2023, BSA emailed Woodside noting that they had an understanding that the EP consultation and framework agreement would be discussed at the 17 January 2024 meeting. BSA queried the detail of the information being sought by Woodside on funding.
- On 20 December 2023, Woodside emailed BSA noting that they were seeking a cost estimate and required this prior to BSA being present at the BTAC meeting if they wished to be funded for attendance.
- On 9 January 2024, Woodside emailed BTAC confirming a meeting on 17 January 2024 to discuss sea country mapping, requesting logistics and cost coverage estimate.
- On 16 January 2024, BTAC emailed Woodside confirming meeting of 17 January 2024 with BTAC and requesting the names of Woodside attendees.
- On 16 January 2024, Woodside emailed BTAC with the names of Woodside attendees, as requested.
- On 17 January 2024, Woodside met with BTAC and discussed (among other things):
 - **(2, 3)** Sea country mapping, confirming:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- BTAC choose their own experts for ethnographic survey.
- BTAC retain intellectual property of material and may request information not be provided.
- Fieldwork required with a preferred commencement in April, with Woodside personnel in attendance as guided by BTAC.
- **(6)** BTAC prefer early notice on EPs, if possible.
- **(7)** BTAC keen on employment/training opportunities and opportunities for rangers.
- **(6)** BTAC to form a committee for consultation on EPs.
 - **(7)** On 17 January 2024, Woodside emailed BTAC information about training pathways as discussed at the meeting with BTAC on 17 January 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) BTAC have stated that their interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands, and BTAC has a cultural obligation to care for the environmental values of sea country.</p> <p>(2) BTAC have not specifically developed values regarding Sea Country into a format that could be articulated for consultation. BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.</p> <p>(3) Requested Woodside supports BTAC in obtaining technical advice relating to the proposed activities which were sent to BTAC.</p> <p>(4) BTAC proposed a Collaboration Agreement as an appropriate mechanism to provide ongoing feedback to Woodside regarding its activities.</p> <p>(5) BTAC does not endorse any consultation without appropriate cost recovery.</p>	<p>(1) The nearshore islands identified by BTAC do not fall within the EMBA and will not be impacted by any of the activities set out in the EP. Woodside assessed BTAC’s cultural obligation to care for environmental values of Sea country to represent potential cultural values.</p> <p>(2) Woodside agreed to support the articulation and recording of sea country values. This offer has been taken up with further details to be addressed in writing from BTAC following the meeting of 17 January 2024. The draft Collaboration Agreement at (7) below includes support for recording and articulation of Sea Country values. Completion of an ethnographic assessment is not required to undertake or complete consultation under regulation 25 of the Environment Regulations. Opportunity to undertake this work continues under the proposed Collaboration Agreement (see 6) as part of ongoing engagement. Woodside has been able to develop a robust understanding of Thalanyji Sea Country cultural values and features in absence of this assessment.</p> <p>(3) Woodside has offered financial support for technical advice and other support this has now</p>	<p>(1) Woodside updated Section 4.9 to record BTAC’s interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.</p> <p>(2) Woodside has developed the Thalanyji Sea Country Management process described in the EP Section 7.6 to develop a robust understanding of Thalanyji Sea Country cultural values and heritage features, in the absence of the ethnographic survey. Woodside has taken all reasonable steps to identify cultural features and heritage features of Thalanyji people within the EMBA. This is described in Section 4.9. The proposed Collaboration Agreement and PS 16.2.1 enables an ethnographic survey to be undertaken at a later date. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of the EP). PS 16.3.1 ensures that potential impacts to newly identified cultural values is managed to ALARP and Acceptable levels.</p> <p>(3) Not required.</p> <p>(4, 5, 6) Woodside is implementing a program to actively support Traditional Custodians’ capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>(6) BTAC requested early notification on EPs and are interested in forming a committee for ongoing consultation on EPs.</p> <p>(7) BTAC expressed desire to be involved in local emergency response capability, potentially via an Indigenous Ranger Program. Interested in opportunities for employment/training.</p>	<p>been taken up, with further details to be addressed in writing from BTAC following the meeting of 17 January 2024. The draft Collaboration Agreement at (7) below includes technical support for recording of sea country values.</p> <p>(4) Separate from consultation under regulation 25 of the Environment Regulations, Woodside has drafted a Collaboration Agreement with BTAC and is awaiting final internal review. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p> <p>(5) Woodside and BTAC have agreed on a Costs Acceptance Letter. Woodside assesses that the proposed Collaboration Agreement is an appropriate mechanism for addressing appropriate cost recovery for BTAC. Woodside has already offered BTAC support for technical advice and informed BTAC that it would financially support consultation meetings. As described in the summary above, Woodside has afforded sufficient information and reasonable time for BTAC to provide feedback in the course of preparing this EP.</p> <p>(6) Woodside supports ongoing consultation being conducted in the most appropriate way for BTAC.</p> <p>(7) Woodside will engage in ongoing consultation with BTAC for the purposes of ongoing monitoring, management and emergency response associated with environmental risk. On 17 January 2024 Woodside provided information about training/employment program to BTAC.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including</p>	<p>Traditional Custodians, (Appendix G). This includes continued engagement regarding the Collaboration Agreement that Woodside seeks with BTAC, a draft of which includes support for BTAC to define and articulate sea values, provision of ongoing feedback and cost recovery.</p> <p>(7) The Program for Ongoing Engagement with Traditional Custodians (Appendix G) includes commitments to social investment to support Indigenous Ranger programs, and support for Indigenous oil spill response capabilities.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	
--	---	--

Yinggarda Aboriginal Corporation (YAC)

YAC is established under the Native Title Act 1993 by the Yinggarda people to represent the Yinggarda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25(1) of the Environment Regulations and consultation with YAC for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on YAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to YAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that YAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to YAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked YAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YAC functions, interests or activities.

Historical engagement:

- On 19 July 2023, Woodside emailed YAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that YAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed YAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed YAC advising of the proposed activity (Record of Consultation, reference 1.66) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that YAC and its members may have within the EMBA, information on how YAC would like to engage, and requested that YAC provide information to other individuals as required.
- **(1)** On 13 October 2023, legal practice Banks-Smith and Associates emailed Woodside confirming they acted for YAC on NOPSEMA matters. Among other things, they noted, they required an indemnity and hold harmless clause be included in the Framework Agreement to protect against potential exposure to activist litigation.
- On 2 November 2023, Woodside emailed BSA advising they would not agree to the request to indemnify YAC against any court proceedings as a result of consultation they engage in with Woodside on EPs.
- **(1)** On 2 November 2023, BSA emailed Woodside requesting information on the reason for Woodside's position not to include indemnification in the consultation agreement.
- On 18 November 2023, Woodside emailed BSA with further information about why they would not indemnify YAC as requested in the 13 October 2023 email. Woodside explained that it could harm genuine engagement, may promote behaviours in others who may become aware of the indemnity by Woodside, and it would not be good practice to provide an indemnity in relation to the act or omission of other parties that Woodside would not necessarily engage with.
- On 28 December 2023, Woodside emailed YAC following up on the initial email sent on 11 October 2023. Woodside advised YAC the timeframe in which the EP will be submitted and requested the opportunity for consultation. No response has been received.
- On 12 February 2024, Woodside emailed YAC informing YAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024. Woodside sent links to NOPSEMA's NOPEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) YAC has requested that Woodside enter into a Framework Agreement to set out a process for ongoing consultation.</p> <p>YAC has not provided feedback, objections or claims in response to this activity since consultation commenced in October 2023, despite follow up.</p>	<p>(1) Separate from consultation under regulation 25 of the Environment Regulations, Woodside has provided a draft Framework Agreement for YAC’s consideration. As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to YAC will be for the purpose of ongoing engagement.</p> <p>Woodside accepts that YAC has no feedback on the activity at this time.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with YAC as part of ongoing engagement (Appendix G). This includes the proposed Framework Agreement which will be applied to ongoing consultation. Existing controls considered sufficient, as described in Section 6 and 7.</p>

Kariyarra Aboriginal Corporation (Kariyarra)

Kariyarra is established under the Native Title Act 1993 by Kariyarra people to represent the Kariyarra people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kariyarra for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Kariyarra preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Kariyarra. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Kariyarra can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Kariyarra over 5 months, demonstrating a "reasonable period" of consultation.

Woodside asked Kariyarra if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.15 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Kariyarra functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed Kariyarra NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Kariyarra advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed Kariyarra Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, KAC (via legal representative) emailed Woodside attaching a letter and Woodside policy documents. The letter set out the following:
 - (1) Requesting a meeting with KAC at a suitable time with an agreed agenda be arranged, including preparation of "co-management agreement".
 - (1) An agreement which provides the most effective tool for the effective and ongoing consultation by Woodside with KAC.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** An agreed budget to fund (among other things) preparation of Agreement, meetings, and specialist advice.
- **(3)** Noting that KAC asserted sea rights in their native title claim. (Note: Native title was found by the Federal Court not to exist in the sea in the KAC determination).
- **(1)** Contact protocols going forward.
- **(1)** On 28 September 2023, KAC (via legal representative) emailed Woodside a funding request for fees and disbursements, however, did not provide a reasonable basis for the quote.
- On 18 October 2023, Woodside emailed KAC advising of the proposed activity (Record of Consultation, reference 1.67) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KAC and its members may have within the EMBA, information on how KAC would like to engage, and requested that KAC provide information to other individuals as required.
- **(3)** Between 20 -23 October 2023, several emails were exchanged in relation to costs and Woodside reiterated the need for a reasonable quote.
- **(3)** On 26 October 2023, KAC (via legal representative) emailed Woodside in relation to meeting with KAC about Eps, stating Woodside's proposed cost structure was inadequate and would confer with EDO the Traditional Owners that have taken court action.
- **(3)** On 14 November 2023, KAC (via legal representative) emailed Woodside in relation to costs of consultation meetings noting that they had taken their concerns to the EDO.
- On 22 November, Woodside emailed KAC (via legal representative) reiterating a preparedness to fund consultation for consultation meetings and noting that Woodside were looking at implementing further environmental controls in relation to operations to reduce or remove any potential impact to KAC sea country. Woodside said they wished to progress the framework agreement and suggested a full day meeting with KAC. The agreement could set out a protocol for ongoing consultation on EPs where consultation for purposes of developing an EP is closed, and for consultation on development of EPs for new activities.
- **(1)** On 23 November 2023, KAC (via legal representative) emailed Woodside agreeing to Woodside's proposal in the email of 22 November 2023, requesting a draft protocol and suggesting dates for a meeting between KAC and Woodside.
- **(3)** On 23 November 2023, KAC (via legal representative) emailed Woodside seeking costs already incurred by his services to KAC.
- **(3)** On 29 November 2023, KAC (via legal representative) emailed Woodside following a phone conversation with Woodside, confirming a meeting of 5 December 2023 in Karratha with KAC and included quotes for meeting costs.
- **(1)** On 29 November 2023, KAC (via legal representative) emailed Woodside with details of meeting with KAC, request for proposed protocol and suggested Agenda for the meeting.
- **(1, 3)** On 29 November 2023, Woodside emailed KAC (via legal representative) attaching Woodside's Program of Ongoing Consultation, a revised Agenda and suggesting the protocol between KAC and Woodside would set out:
 - How Woodside and KAC would consult, the basic procedure for initial and ongoing consultation in relation to activities
 - Agreement as to how Woodside would provide KAC information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- How KAC would provide feedback and how Woodside represents that into submissions.
- Agreed schedule of rates.
- How the outputs of the consultations are managed.
- On 29 November 2023, KAC (via legal representative) emailed Woodside with an amended proposed Agenda for the upcoming meeting.
- On 5 December 2023, Woodside and KAC met in Port Hedland. At the meeting Woodside
 - Presented on an Engagement Protocol.
 - What Woodside plan to do to protect the environment.
 - Presented the regulatory context.
 - Spoke about the biological studies that are carried out through different times of the year.
 - Discussed why Woodside were talking to KAC.
 - Displayed the EMBA and how it was developed.
 - Showed projects open for ongoing consultation.
 - Spoke to what Woodside were seeking to understand from KAC:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
- **(4)** KAC asked how Woodside maintain the validity of controls over periods of times, sighting turtles as an example in terms of whether current controls would be sufficient into the future.
 - Woodside noted that there is ongoing monitoring and Woodside would apply its Management of Change and Revision process to address controls.
 - Noted the EP's subject of ongoing consultation, including this EP.
 - Spoke to planned and unplanned risks.
- **(2)** KAC gave a presentation to Woodside on their sea country rights and duties:
 - Accessing sea country for fishing, trapping, crabbing catching turtle, hunting dugong, using stingray barbs for spears and collecting shellfish.
 - Visiting offshore islands at low tide.
 - Passing on traditional knowledge to children.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Secret habitat tokens.
- Having duties to look after and protect all of KACs sea country.
- **(1, 2, 3)** KAC outlined their consultation requirements to Woodside:
 - Co-designed and co-managed approach to protecting sea country.
 - On-going input into Eps.
 - An agreement with Woodside.
 - Funding for sea rangers.
 - A positive and collaborative relationship.
- **(1, 3)** On 13 December 2023, KAC (via legal representative) emailed Woodside with outcomes of the 5 December meeting, confirming availability for a workshop in March 2024 and that KAC and Woodside aim to reach agreement on an engagement protocol by mid-2024.
- **(1)** On 20 December 2023, Woodside emailed KAC (via legal representative) confirming the process for ongoing consultation, noting information to be included in this EP provided by KAC and noting that Woodside looks forward to reaching agreement with KAC on consultation process.
- **(3)** On 20 December 2023, KAC (via legal representative) emailed Woodside noting further information regarding sea country features and values KAC wish noted within EPs.
- **(1)** On 20 December 2023, KAC (via legal representative) emailed Woodside acknowledging they looked forward to progressing an agreement in 2024 between KAC and Woodside.
- On 13 January 2024, KAC (via legal representative) emailed Woodside a letter expressing interest in signing a consultation agreement with Woodside. KAC informed Woodside that the letter has been approved for signing by the Corporation Chair and waits for Woodside's response.
- On 22 January 2024, KAC (via legal representative) emailed Woodside following up on previous correspondence (13 January 2024) and again expressing interest in signing a consultation agreement with Woodside.
- On 21 February 2024, Woodside emailed KLC (via legal representative) thanking them for their email and attaching a draft consultation agreement letter outlining the objectives, terms and conditions, and proposed consultation schedule with KLC.
- On 21 February 2024, KAC (via legal representative) emailed Woodside requesting a word version of the letter sent on 21 February 2024.
- On 22 February 2024, Woodside emailed KAC (via legal representative) attaching the requested version of the letter.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
(1) KAC have noted that they want to engage on matters with Woodside and would like to develop an Engagement Protocol for (among other things)	(1, 2) Woodside have agreed to fund reasonable costs and funded the 5 December 2023 meeting. Woodside will fund future meetings on an agreed	(1, 2, 4) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue ongoing engagement with KAC and will work towards

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>ongoing input into EP's and a collaborative relationship with Woodside.</p> <p>(2) KAC has indicated they require costs to be met for KAC to be engaged in consultations with Woodside.</p> <p>(3) At a face-to-face meeting on 5 December 2023, KAC gave a presentation about their sea country rights and duties. They mentioned:</p> <ul style="list-style-type: none"> • Fishing, trapping, crabbing catching turtle, hunting dugong, and using stingray barbs for spears and collecting shellfish. • Visiting offshore islands at low tide. • Secret habitat tokens. • Having a duty to look after and protect sea country. <p>(4) Asked how the validity of current controls are maintained and appropriate into the future.</p>	<p>costs basis to be set out in the Engagement Protocol. Woodside and KAC have agreed to hold a workshop in early March 2024 to progress towards an Engagement Protocol as requested and agreed by KAC and Woodside. As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25(1) of the Environment Regulations is complete. Any further engagement with and support offered to KAC will be for the purpose of ongoing engagement.</p> <p>(3) Woodside has noted the KAC's values and interests in sea country in Section 4.9. Woodside accepts that KAC may have sea country values within the EMBA for this EP. Since October 2023, KAC has not raised any claims or objections in relation to this activity.</p> <p>(4) Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (refer to Section 7.1.16).</p>	<p>an Engagement Protocol which will include reasonable funding as requested by KAC and supported by Woodside (Appendix G).</p> <p>(3) Existing controls considered sufficient as described in Section 6 of the EP. Woodside recognises that KAC holds Sea Country rights and interests that need to be protected (Section 4.9).</p>
--	---	---

Wirrawandi Aboriginal Corporation (WAC)
WAC is established under the Native Title Act 1993 by the Mardudhunera and Yaburara people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wirrawandi Aboriginal Corporation (WAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on WAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.

- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to WAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that WAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to WAC over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked WAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WAC functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed WAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that WAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed WAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed WAC advising of the proposed activity (Record of Consultation, reference 1.68) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

information on the interests that WAC and its members may have within the EMBA, information on how WAC would like to engage, and requested that WAC provide information to other individuals as required.

- On 3 October 2023, Woodside and WAC exchanged email correspondence on the logistics of booking a meeting to discuss the environment plan. Woodside offered to meet WAC at a location suitable to them.
- On 20 October 2023, WAC and Woodside met and discussed:
 - Current EPs and how parties intended to support each other through the process.
 - Woodside’s intention to ensure that WAC was adequately consulted on all EPs.
 - WAC’s current corporate restructure and the impact of this on ability to engage in consultation.
 - **(1)** WAC’s interest in discussing a Framework Agreement once the new CEO was settled in.
- On 24 October 2023, Woodside sent a follow-up email enquiring if WAC had any questions relating to this EP and offering to schedule a consultation session with the members and/or Board of WAC.
- On 3 November 2023, Woodside emailed WAC following up regarding feedback on this activity and again attaching the Summary Information Sheet (Record of Consultation, reference 1.2). Woodside advised WAC it could take some additional time to consider the consultation. Woodside asked WAC to advise if it would like to set up a consultation meeting. No response has been received.
- On 19 December 2023, Woodside emailed WAC wishing a happy festive season, thanking WAC for their contributions throughout the year and offering availability for consultation sessions.
- On 19 December 2023, WAC emailed Woodside noting its thanks for Woodside support.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) WAC are interested in developing a Framework Agreement that includes outlining a process for ongoing consultation.</p> <p>WAC has not provided feedback, objections to date or claims in response to the information provided on this activity since consultation commenced in October 2023, despite follow-up.</p>	<p>(1) Separate from consultation under regulation 25 of the Environment Regulations, Woodside will establish a framework agreement with WAC. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff. Any further engagement with and support offered to WAC will be for the purpose of ongoing engagement.</p> <p>Woodside accepts that WAC has no feedback on the activity at this time.</p>	<p>(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with WAC as part of ongoing engagement (Section 7.10 of the EP). This includes continued engagement regarding WAC’s proposed Framework Agreement which will be applied to ongoing consultation. This is described further in the Program of Ongoing Engagement with Traditional Custodians, Appendix G.</p> <p>Existing controls considered sufficient, as described in Section 6 and 7.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>

Robe River Kuruma Aboriginal Corporation (RRKAC)

RRKAC is established under the Native Title Act 1993 by the Robe River Kuruma people to represent the Robe River Kuruma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation Robe River Kuruma Aboriginal Corporation (RRKAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on RRKAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to RRKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that RRKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Woodside has addressed and responded to RRKAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked RRKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on RRKAC functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed RRKAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that RRKAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed RRKAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed RRKAC advising of the proposed activity (Record of Consultation, reference 1.69) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that RRKAC and its members may have within the EMBA, information on how RRKAC would like to engage, and requested that RRKAC provide information to other individuals as required.
- On 24 October 2023, Woodside sent a follow-up email enquiring if RRKAC had any questions relating to this EP and offering to schedule a consultation session with the members and/or board of RRKAC. No response has been received.
- On 14 November 2023, Woodside emailed RRKAC following up on the offer for Woodside to provide support to RRKAC for EP consultation.
- On 14 November 2023, RRKAC emailed Woodside advising that he would put Woodside in touch with the most appropriate team member to progress discussions.
- On 16 November 2023, Woodside emailed RRKAC with thanks and advice that Woodside will wait to hear from the nominated individual.
- On 19 December 2023, Woodside emailed RRKAC wishing a happy festive season, thanking RRKAC for their contributions throughout the year and offering availability for consultation sessions.
- On 9 January 2024, Woodside emailed RRKAC following up on this activity and offering an opportunity for discussion. Woodside advised RRKAC of the best contact after 31 January 2024.
- On 11 January 2024, Woodside and RRKAC, held a telephone discussion:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> - (1) RRKAC have recently employed new personnel, RRKAC noted that once the new employees were settled in, RRKAC would be happy to consult with Woodside on relevant EPs. - (2) RRKAC noted that some RRKAC country is on the coast (and would be affected by an oil spill or another such environmental incident), they feel that EMBA's are far too broad, and the areas covered by EMBA's are far too big and unfeasible. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>RRKAC provided feedback regarding:</p> <p>(1) It had employed new personnel and would be happy to consult on relevant EPs once they were settled in.</p> <p>(2) It considers the EMBA's too broad.</p> <p>While general feedback has been received, RRKAC has not provided objections or claims in response to the information provided since consultation commenced in October 2023.</p>	<p>Following a phone discussion with RRKAC, Woodside noted:</p> <p>(1) RRKAC had new employees starting.</p> <p>(2) RRKAC considered the EMBA's were too broad.</p> <p>Woodside accepts that RRKAC has no feedback on this activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with RRKAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to RRKAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1, 2) Not required.</p> <p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with RRKAC as part of ongoing engagement (Section 7.10 and Appendix G of the EP).</p>
<p>Ngarluma Aboriginal Corporation (NAC)</p>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NAC is established under the Native Title Act 1993 by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to NAC over 4 months, demonstrating a "reasonable period" of consultation.
- Woodside asked NAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NAC functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Historical Engagement

- On 18 July 2023, Woodside emailed NAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed NAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- **(1)** On 18 September 2023, NAC emailed Woodside proposing the establishment of a joint working group to manage the consultation process for Woodside's environmental plans. NAC explained the purpose of the group and noted the positions and roles of the NAC representatives that would be included in the working group. NAC also discussed seeking funding from Woodside to support the formation of this new working group and pointed out key actions moving forward, the timeframe of events and attached a budget summary.
- On 10 October 2023, Woodside emailed NAC approving the proposal in principle and affirming that Woodside is looking forward to ongoing consultation. Woodside stated that some administrative process still needed to be arranged and asked for NAC's availability to schedule a meeting.
- On 19 October 2023, Woodside emailed NAC following up on previous correspondence and asking for a response to the email sent on 10 October 2023.
- **(1)** On 19 October 2023, NAC emailed Woodside advising NAC would share a draft engagement letter with Woodside soon. NAC also requested for Woodside to share the expected agenda for the upcoming sessions and advise if there were any urgent matters pending.

Summary of information provided and record of consultation for this EP:

- On 2 November 2023, Woodside emailed NAC outlining top priorities and listed future EPs for consultation. Woodside included a link to the Consultation Information Sheet for this activity and requested feedback regarding the activity.
- On 3 November 2023, Woodside emailed NAC with a future EP priority list which included this EP, with a link to the Consultation Information Sheet. Woodside also asked NAC for their availability over the next two weeks.
- **(1)** On 3 November 2023, NAC emailed Woodside advising that the draft engagement protocol would be shared on this date and noting that once executed, operational matters could be addressed in the first working group meeting. NAC also requested an estimation of the timeframe for working through the list.
- **(1)** On 3 November 2023, NAC emailed Woodside a draft engagement protocol letter and stated that they look forward to closing out this matter and scheduling a meeting.
- On 13 November 2023, Woodside emailed NAC acknowledging that Woodside noted that NAC were not available for consultation prior to 25 November 2023, noting that Woodside would respond to the draft engagement protocol as soon as possible.
- **(1)** On 13 November 2023, NAC emailed Woodside noting there were no other urgent EP consultations, noting this EP (among others) had previously been flagged for consultation and requiring the engagement protocol be in place prior to any meetings occurring.
- On 17 November 2023 Woodside emailed NAC advising of the proposed activity (Record of Consultation, reference 1.70) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

information on the interests that NAC and its members may have within the EMBA, information on how NAC would like to engage, and requested that NAC provide information to other individuals as required.

Quarterly Heritage Meetings:

Woodside convenes a quarterly meeting of Traditional Custodian representatives from the Representative Aboriginal Corporations involved in historical native title claims over the Burrup Peninsula, including NAC. Individual attendees are nominated by their representative Aboriginal Corporations. These meetings are summarised separately in this table.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>During consultation engagement related to this activity and others since October 2023, NAC has no feedback, questions or objections to the activity.</p> <p>(1) NAC proposed establishing a Joint Working Group to engage in meetings with Woodside for ongoing consultation. NAC noted it had they have capacity issues and require resourcing to cover costs of meeting.</p>	<p>Woodside accepts that NAC has no feedback on this activity at this time.</p> <p>(1) Separate from consultation under regulation 25 of the Environment Regulations, Woodside will establish an agreement with NAC to work with the NAC Working Group. The agreement and Working Group would be used to frame ongoing consultation during the life of the EP. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (See Section 7.1.16 of this EP).</p>	<p>Existing controls considered sufficient as described in Section 6 and 7.</p> <p>(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with NAC through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>

Yindjibarndi Aboriginal Corporation

YAC is established under the Native Title Act 1993 by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation Yindjibarndi Aboriginal Corporation (YAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information:

- Woodside sought direction on Yindjibarndi's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Yindjibarndi. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the information and request for feedback be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that Yindjibarndi can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with Yindjibarndi in October 2023. Woodside has responded to Yindjibarndi over 5 months, demonstrating a "reasonable period" of consultation.

Woodside asked Yindjibarndi if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yindjibarndi functions, interests, or activities.

Historical engagement:

- (1) On 6 and 7 July 2023, Woodside called Yindjibarndi who reiterated they would prefer that comments come from coastal Aboriginal Corporations and not themselves.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 July 2023, Woodside emailed Yindjibarndi NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Yindjibarndi advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.
- On 26 July 2023, Woodside emailed Yindjibarndi Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- **(2)** On 1 August 2023, Yindjibarndi emailed Woodside acknowledging 26 July 2023 email, and advising that NYFL would manage Oil and Gas matters on behalf of Yindjibarndi.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed Yindjibarndi (via NYFL) of the proposed activity (Record of Consultation, reference 1.71) and provided a Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Yindjibarndi and its members may have within the EMBA, information on how Yindjibarndi would like to engage, and requested that Yindjibarndi provide information to other individuals as required.

See NYFL on behalf of Yindjibarndi below for record of further engagement.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Yinjibarndi expressed that they would prefer that Traditional Owner groups with land and sea adjacent to and within the precinct of the projects provide comment.</p> <p>(2) Yindjibarndi has instructed Woodside that it will be represented by NYFL in ongoing discussion about EP’s.</p> <p>During consultation engagement related to this activity and others since October 2023, Yindjibarndi/NYFL has provided no feedback, questions or objections to the activity.</p>	<p>(1) Woodside respects Yinjibarndi’s position that Traditional Owners whose land and sea are adjacent to or within the precinct of the projects should be able to provide comment.</p> <p>(2) Woodside will engage with NYFL on behalf of Yindjibarndi for ongoing consultation related to this activity, separate from consultation under regulation 25 of the Environment Regulations.</p> <p>Woodside accepts that Yindjibarndi/NYFL has no feedback on this activity at this time.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside</p>	<p>(1) Not required.</p> <p>(2) Future correspondence will be sent through NYFL.</p> <p>Existing controls considered sufficient as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with NYFL through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	will apply its Management of Change and Revision process (see Section 7.1.16).	
--	--	--

Wanparta Aboriginal Corporation
 Wanparta is established under the Native Title Act 1993 by the Ngarla people to represent the Ngarla people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wanparta Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Sufficient Information:**
- Woodside sought direction on Wanparta’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
 - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Wanparta. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
 - Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
 - Articulated planned and unplanned environmental risks and impacts, with proposed controls.
 - Asked for the consultation and information sheets to be distributed to members and individuals as required.
 - Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
 - Advised that Wanparta can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

- Reasonable Period:**
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
 - Woodside has provided Wanparta Aboriginal Corporation with the opportunity to provide feedback over 5 months, demonstrating a “reasonable” period of consultation.

- Woodside asked Wanparta Aboriginal Corporation if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wanparta Aboriginal Corporation's functions, interests or activities.

Historical Engagement

- On 18 July 2023, Woodside emailed Wanparta NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Wanparta advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed Wanparta Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- **(1)** On 31 August 2023, Woodside met with the Wanparta Board on another activity, at that meeting Wanparta stated their sea country values noting that water and the ocean was extremely important to them, and they had a responsibility to look after ocean and lore. They noted the bream, octopus, stingray and kestrel as totemic species.

Summary of information provided and record of consultation for this EP:

- On 4 October 2023, Woodside phoned Wanparta to check in and consult on upcoming matters.
- On 4 October 2023, Woodside emailed Wanparta following up with a summary of the previous phone call. The outcomes of the phone discussion were:
 - **(2)** Wanparta's interest in a Wanparta Ranger program and EP funding.
 - **(2)** Wanparta's interest in a Karratha Gas Plant visit, as well as possible school visits and Perth Office visits.
 - Wanparta's request for updates on EPs unrelated to this one.
 - Woodside's query into Wanparta's thoughts on a formal authorisation/consent/endorsement process regarding future EPs.
- On 5 October 2023, Woodside emailed Wanparta advising of the proposed activity (Record of Consultation, reference 1.72) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Wanparta and its members may have within the EMBA, information on how Wanparta would like to engage, and requested that Wanparta provide information to other individuals as required.
- **(3)** On 6 October 2023, Wanparta emailed Woodside thanking them for the previous summary email (5 October 2023) and stated that it will bring all the 4 October 2023 items to the Board for further consideration and would revert shortly after.
- On 7 November 2023, Woodside emailed Wanparta following up previous correspondence (6 October 2023) and to check if there was any further information Wanparta would like from Woodside regarding this EP. No response was received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Ongoing engagement:

- **(4)** On 13 November 2023, Wanparta emailed Woodside requesting funding to assist with ongoing consideration of Woodside EPs. Wanparta noted the consultation meeting to be held between Wanparta and Woodside in February 2023.
- **(4)** On 22 November, Woodside acknowledged Wanparta’s requests and agreed to seek out available options for funding.
- From 24 - 28 November 2023, Woodside and Wanparta exchanged emails seeking availability for a phone call.
- **(4)** On 30 November 2023, Wanparta emailed Woodside in relation to a financial matter unrelated to this EP, also suggesting a date for a directors’ meeting for the purposes of ongoing consultation across EPs in Karratha on 23 February 2023.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Wanparta stated that water and the ocean were extremely important to them, and they had a responsibility to look after ocean and lore. They noted the bream, octopus, stingray and kestrel as totemic species.</p> <p>(2) Wanparta expressed interest in a range of social investment opportunities including a ranger program. Wanparta stated their interest in ongoing engagement with Woodside. Wanparta are currently discussing these issues at Board level.</p> <p>(3) Wanparta acknowledged receipt of the consultation information but has not provided feedback, questions or objections to the activity despite follow up.</p> <p>(4) Wanparta requested funding to participate in ongoing consultation.</p>	<p>(1) Woodside assessed Wanparta’s interest in water and the species described to represent potential cultural values.</p> <p>(2, 4) Woodside is continuing to work with Wanparta regarding social investment opportunities. Woodside considers all funding requests and supports funding within reasonable parameters. Separate from consultation under regulation 25 of the Environment Regulations, Woodside has commenced discussion with Wanparta about a framework agreement for ongoing engagement. Wanparta intended to discuss the proposal with their Board during their meeting in October. Woodside will follow up on a response and seek to reach a Framework Agreement during early 2024. The Framework Agreement is an effective mechanism for social investment opportunities, including for the ranger program. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff, a face-to-face meeting with appropriate material (pictures, maps, video) and project attendance</p>	<p>(1, 2) Woodside updated Section 4.9 to record WAC’s interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7. Woodside is implementing a program to actively support Traditional Custodians’ capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians (Appendix G). This includes continued engagement regarding the proposed Framework Agreement which will be applied to ongoing consultation.</p> <p>(3) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>(4) Woodside provides funding to all reasonable funding requests.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>allowing opportunity to ask questions and seek further understanding.</p> <p>(3) Woodside accepts that Wanparta has no feedback on this activity at this time.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	--	--

Malgana Aboriginal Corporation (Malgana)
Malgana is established under the Native Title Act 1993 by the Malgana people to represent the Malgana people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Malgana for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Malgana’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Malgana. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that Malgana can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with Malgana in October 2023. Woodside has addressed and responded to Malgana over 5 months, demonstrating a “reasonable” period of consultation.
- Woodside asked Malgana if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Malgana’s functions, interests or activities.

Historical engagement:

- On 19 July 2023, Woodside emailed Malgana NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Malgana advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed Malgana Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- **(1)** On 1 August 2023, Malgana emailed Woodside with thanks for information requested about another activity noting that Malgana was looking to get an environmental consultant to provide advice to their Board, noting they were seeking quotes and would come back to Woodside for cost approval.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed Malgana advising of the proposed activity (Record of Consultation, reference 1.73) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Malgana and its members may have within the EMBA, information on how Malgana would like to engage, and requested that Malgana provide information to other individuals as required.
- On 20 October 2023, Woodside emailed an alternate contact at Malgana (the registered contact person), requesting feedback/further information about activities that Malgana had previously been notified about by Woodside and offered assistance to Malgana for consultation if required. Woodside re-attached earlier emails and requested the information be forwarded to any members and other individuals or groups who may have interests.
- On 26 October 2023, Woodside attempted to call Malgana on the phone number listed on the website of the Office of the Registrar of Indigenous Corporations (ORIC) but the number was not connected. Woodside emailed Malgana following up on the proposed activities and requesting feedback and re-iterating an offer of assistance if required by Malgana about the activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 November 2023, Woodside again emailed Malgana following up on proposed activities and requesting feedback.
- On 2 February 2024, Woodside emailed Malgana referencing previous emails sent by Woodside in October and November 2023 about this activity. Woodside informed Malgana that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Malgana at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments received post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) During previous consultation in relation to separate activities Malgana noted that their funding was restricted for these types of engagement and requested funding support, including an environmental consultant to advise the Board.</p> <p>Malgana has not provided feedback, objections to date or claims in response to the activity information provided since consultation began in October 2023.</p>	<p>(1) Woodside supports ongoing engagement and have responded to Malgana’s advice about the limitations on their resources. Woodside has offered to support Malgana in correspondence including support for environmental expertise supplying names of organisation that Malgana may want to consider conducting the work, however these offers have not yet been taken up yet.</p> <p>Woodside accepts that Malgana has no feedback on the activity currently.</p> <p>Woodside has assessed the Program of Ongoing Engagement with Traditional Custodians will support ongoing consultation with Malgana and address appropriate support for resourcing, separate from consultation under regulation 25 of the Environment Regulations. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Although consultation for the purpose of regulation 25(1) of the Environment Regulations is complete, Woodside will continue to engage with Malgana through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (Appendix G). This includes addressing Malgana’s resourcing issue for ongoing consultation via a Framework Agreement.</p> <p>Existing controls considered sufficient, as described in Section 6 and 7.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Nanda Aboriginal Corporation

Nanda is established under the Native Title Act 1993 by the Nanda people to represent the Nanda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Nanda Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Nanda's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Nanda. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Nanda can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Nanda over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked Nanda if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nanda functions, interests or activities.

Historical Engagement:

- On 21 July 2023, Woodside emailed Nanda NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Nanda advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed Nanda (via YMAC) Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 23 October 2023, Woodside emailed Nanda (via YMAC) advising of the proposed activity (Record of Consultation, reference 1.78) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that Nanda and its members may have within the EMBA, information on how Nanda would like to engage, and requested that Nanda provide information to other individuals as required.
- On 13 November 2023, Woodside emailed YMAC noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet.
- On 14 December 2023, Woodside emailed YMAC attaching the Program of Ongoing Consultation and advising that Woodside would like to progress negotiations on consultation frameworks with groups represented by YMAC (including Nanda). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside would follow when a submission required consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside would provide Nanda with the information Nanda required to make free, prior and informed decisions about Woodside’s Environmental Plans.
 - Agreement as to how Nanda would provide feedback and how that could best be represented in EPs.
 - On an agreed schedule of rates for Nanda’s participation in consultation.
 - How to manage the outputs of the consultations.
- On 21 December 2023, Woodside emailed Nanda (via YMAC) providing a list of Woodside’s upcoming activities as requested.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
Nanda has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.	Woodside accepts that Nanda has no feedback on the activity at this time. Woodside has assessed the Program of Ongoing Engagement with Traditional Custodians will	Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations, Woodside will continue to engage

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>In previous meetings about other unrelated activities, Nanda expressed a desire for ongoing engagement and capacity building.</p>	<p>support ongoing consultation with Nanda and address appropriate support for resourcing, separate from consultation under regulation 25 of the Environment Regulations, Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>with Nanda as part of ongoing engagement (Section 7.10 of the EP).</p>
--	--	---

Gogolanyngor Aboriginal Corporation (GAC)

GAC is established under the Native Title Act 1993 by the Jabirr Jabirr/Ngumbarl and Bindunbur people to represent the Jabirr Jabirr/Ngumbarl and Bindunbur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with GAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on GAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to GAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advised that GAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to GAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked GAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GAC functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed GAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that GAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed GAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside emailed GAC advising of the proposed activity (Record of Consultation, reference 1.79) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that GAC and its members may have within the EMBA, information on how GAC would like to engage, and requested that GAC provide information to other individuals as required. The email requested information on the interests that GAC and its members may have within the EMBA. Woodside also suggested a lunch meeting in Broome the following week.
- **(1)** On 7 October 2023, GAC responded thanking Woodside for its email and confirming it would be available to meet in Broome the following week.
- On 7 October 2023, Woodside thanked GAC for its email and confirmed it would try to line up a meeting in Broome.
- On 18 October 2023, Woodside emailed GAC to follow up if there were any questions regarding the EP and requested a suitable time to call.
- **(2)** On 19 October 2023, GAC emailed Woodside and confirmed it had briefly seen the consultation material and would follow up. No response has been received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 November 2023, Woodside emailed GAC following up on previous correspondence and requesting to meet in person in Broome the following week. No response has been received.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) GAC advised it was available to meet Woodside in Broome.</p> <p>(2) GAC confirmed it had received the consultation information but has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.</p>	<p>(1) Woodside noted GAC's interest in a meeting and proposed several potential dates in November.</p> <p>(2) Woodside accepts that GAC has no current feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with GAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to GAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Not required.</p> <p>(2) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with GAC as part of ongoing engagement (Section 7.10 of the EP).</p>

Nimanburr Aboriginal Corporation

Nimanburr is established under the Native Title Act 1993 by the Nimanburr people to represent the Nimanburr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Nimanburr for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on Nimanburr's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Nimanburr. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Nimanburr can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Nimanburr over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked Nimanburr if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nimanburr functions, interests or activities.

Historical Engagement:

- On 18 July 2023, Woodside emailed KLC on behalf of Nimanburr NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Nimanburr advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 6 October 2023, Woodside phoned Nimanburr who invited them to visit their community on the 10 October 2023.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 6 October 2023, KLC emailed Woodside with a formal invitation to meet and present at their Nimanburr Director’s meeting on the 13 October 2023.

Summary of information provided and record of consultation for this EP:

- On 10 October 2023, Woodside met with Nimanburr in person on Country and hand delivered the below documents and explained the proposed activity. At this meeting Woodside also:
 - Provided a Consultation Information Sheet and explained the proposed activity.
 - Explained the EMBA and how it was developed.
 - Asked if there were any cultural values, they wished to share with Woodside, noting that information could be kept confidential.
 - Asked if there were any relevant persons that Woodside should consult with to which Nimanburr replied; no.
 - (1)** Asked if Nimanburr had any further questions or concerns for this EP, to which Nimanburr replied; no.
 - Confirmed that Nimanburr would like to be consulted on a quarterly basis about Woodside activities with consultation to take place out on Nimanburr community.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Nimanburr has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023. When asked on 10 October 2023, Nimanburr had no questions or concerns for the EP.</p>	<p>(1) Woodside accepts that Nimanburr has no feedback or concerns for this EP.</p> <p>Sufficient information to allow informed assessment has already been provided including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members, and a face-to-face meeting on 10 October 2023.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Existing controls considered sufficient as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Nimanburr as part of ongoing engagement (Section 7.10 of the EP).</p>

Nyul Nyul PBC Aboriginal Corporation (NNAC)

NNAC is established under the Native Title Act 1993 by the Nyul Nyul people to represent the Nyul Nyul people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NNAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NNAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to NNAC over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked NNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NNAC functions, interests or activities.

Historical Engagement

- On 20 July 2023, Woodside emailed NNAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside emailed NNAC advising of the proposed activity (Record of Consultation, reference 1.97) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that NNAC and its members may have within the EMBA, information on how NNAC would like to engage, and requested that NNAC provide information to other individuals as required.
- On 26 October 2023, Woodside emailed NNAC/KLC requesting an opportunity to meet with NNAC and consult on EPs, informing that they were happy to pay reasonable sitting costs.
- **(1)** On 26 October 2023, NNAC/KLC emailed Woodside thanking them for their email and informed Woodside that the NNAC Board would like to meet for a consultation workshop.
- On 1 November 2023, Woodside emailed NNAC/KLC and responded that they would be happy to coordinate and fund the consultation workshop and requested a 3–4-hour time slot.
- **(1)** On 6 November 2023, NNAC/KLC emailed Woodside informing that they would seek confirmation from NNAC, but that Woodside should expect a meeting date suggesting February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) NNAC proposed a meeting date suggesting February 2024 to discuss Environment Plans, in response to Woodside’s requests to meet and offer to pay reasonable meeting costs.</p> <p>NNAC has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.</p>	<p>(1) Sufficient information to allow informed assessment has already been provided including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members. Woodside looks forward to continuing engagement with NNAC in February 2024 and will pay reasonable costs as offered to NNAC.</p> <p>Woodside accepts that NNAC has no feedback on the activity at this time.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with NNAC as part of ongoing engagement (Section 7.10 of the EP).</p> <p>Existing controls considered sufficient, as described in Section 6 and 7.</p>

Wanjina-Wunggurr (Native Title) Aboriginal Corporation (WWNAC)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

WWAC is established under the Native Title Act 1993 by the Wanjina and Wunggur people to represent the Wanjina and Wunggur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on WWAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to WWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan."
- Advised that WWAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to WWAC over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked WWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WWAC functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Historical engagement:

- On 19 July 2023, Woodside emailed WWAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that WWAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed WWAC advising of the proposed activity (Record of Consultation, reference 1.80) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that WWAC and its members may have within the EMBA, information on how WWAC would like to engage, and requested that WWAC provide information to other individuals as required.
- On 13 October 2023, Woodside sent an email to the Kimberley Land Council (KLC) on behalf of WWAC enquiring about the best contact person at WWAC as Woodside had not received a response from its initial email. A copy of the initial email was attached.
- On 25 October 2023, Woodside emailed KLC enquiring if the KLC was the best point of contact.
- On 26 October 2023, KLC responded thanking Woodside for its email and confirmed Woodside had sent the information to the correct email address for WWAC. KLC noted that Corporation responses could be somewhat delayed or timely due to various factors including opportunities for meetings and discussions, cultural or other corporation commitments and obligations, governance considerations, and more, and that it trusted someone would be in touch in due course.
- On 30 October 2023, KLC responded to Woodside’s email from 25 October 2023 and provided a link to the Office of the Registrar of Indigenous Corporations (ORIC).
- On 2 November 2023, Woodside emailed KLC thanking them for their response and informing them that they had exhausted all contacts listed on ORIC which is why they contacted KLC. Woodside also noted that it appreciated this time of the year was very busy and was understanding why making contact with PBCs may be difficult.
- On 2 November 2023, KLC emailed Woodside confirming that they would pass on Woodside’s email to WWAC.
- On 23 January 2024, Woodside emailed WWAC about this activity and informed WWAC that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with WWAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
---	---	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>WWAC has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.</p>	<p>Woodside accepts that WWAC has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with WWAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to WWAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with WWAC as part of ongoing engagement (Section 7.10 of the EP).</p>
---	--	---

Karajarri Traditional Lands Association (Aboriginal Corporation) (KTLA)

KTLA is established under the Native Title Act 1993 by the Karajarri people to represent the Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KTLA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on KTLA’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KTLA. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that KTLA can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to KTLA over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked KTLA if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KTLA functions, interests or activities.

Historical Engagement

- On 24 July 2023, Woodside emailed KTLA NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that KTLA advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed KTLA Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed KTLA advising of the proposed activity (Record of Consultation, reference 1.81) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KTLA and its members may have within the EMBA, information on how KTLA would like to engage, and requested that KTLA provide information to other individuals as required.
- On 13 October 2023, Woodside sent a follow up email seeking to confirm the best contact person at KTLA as Woodside had not received a response to its initial email. A copy of the initial email was attached.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 14 November 2023, Woodside sent a follow up email enquiring if there is any further information needed and attached a copy of the Environment Plan Summary sheet. Woodside also requested for the opportunity to meet.
- On 23 January 2024, Woodside emailed KTLA informed KTLA that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with KTLA at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>KTLA has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.</p>	<p>Woodside accepts that KTLA has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with KTLA (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to KTLA will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with KTLA as part of ongoing engagement (Section 7.10 of the EP).</p> <p>Existing controls considered sufficient, as described in Section 6 and 7.</p>

Mayala Inninalang Aboriginal Corporation (MIAC)

MIAC is established under the Native Title Act 1993 by the Mayala people to represent the Mayala people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MIAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on MIAC's preferred method of consultation. Woodside has offered to hold meetings at the location and time of MIAC's choosing, with MIAC's nominated representatives (including face-to-face meetings with the Board). These meetings did not occur due to a lack of response to Woodside's requests. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25(1) of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to MIAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that MIAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with MIAC in October 2023. Woodside has addressed and responded to MIAC over 5 months demonstrating a "reasonable" period of consultation.

Woodside asked MIAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MIAC functions, interests or activities.

Historical Engagement:

Kimberley Land Council (KLC) is the nominated Representative of MIAC.

- On 19 July 2023, Woodside emailed KLC to request they forward an email from Woodside to MIAC about guidelines and policies released by NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 19 July 2023, Woodside emailed MIAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that MIAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 8 August 2023, MIAC (via NOPSEMA) emailed Woodside enclosing a letter relating to among other things:
 - Culturally appropriate consultation processes,
 - Information that will support free, prior and informed consent.
 - **(2)** Financial support to bring together the right people to ensure appropriate consultations.

Summary of information provided and record of consultation for this EP:

- **(1)** On 13 October 2023, Woodside emailed MIAC advising of the proposed activity (Record of Consultation, reference 1.82) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MIAC and its members may have within the EMBA, information on how MIAC would like to engage, and requested that MIAC provide information to other individuals as required.
- On 16 October 2023, Woodside emailed MIAC introducing a new Woodside focal point and offering the opportunity for feedback by meeting in person with the Board and members.
- On 18 October 2023, Woodside emailed KLC asking if previous correspondence had been received and passed on to MIAC.
- On 26 October 2023, KLC emailed Woodside advising that their email had been forwarded to the relevant corporation.
- On 27 October 2023, Woodside emailed MIAC following up on previous emails, informing MIAC that Woodside would cover meeting costs including flights and accommodation if they wished to meet in Perth. Alternatively, Woodside suggested an online Teams meeting if that was the preferred method of consultation. No response has been received.
- On 23 January 2024, Woodside emailed MIAC to inform them that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with MIAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.
- On 23 January 2024, KLC emailed Woodside advising that the contact person for MIAC had forwarded on Woodside's email to the PBC.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
MIAC has not provided feedback, objections to date or claims in response to the activity information provided since consultation began in October 2023. (1) In the 8 August 2023 letter regarding consultation on another activity, MIAC stated that they are not	Woodside accepts that MIAC has no feedback on the activity at this time. (1) Woodside has responded to MIAC's financial requests in the 8 August 2023 letter and have offered financial support for ongoing consultation on	Existing controls considered sufficient, as described in Section 6 and 7. (1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will

Nyangumarta Warrarn Aboriginal Corporation (NWAC)

NWAC is established under the Native Title Act 1993 by the Nyangumarta people to represent the Nyangumarta people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NWAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that NWAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to NWAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked NWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NWAC functions, interests or activities.

Historical Engagement

- On 18 July 2023, Woodside emailed NWAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that NWAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed NWAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed NWAC advising of the proposed activity (Record of Consultation, reference 1.83) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that NWAC and its members may have within the EMBA, information on how NWAC would like to engage, and requested that NWAC provide information to other individuals as required.
- On 11 October 2023, Woodside emailed seeking an alternative NWAC contact to arrange a meeting.
- On 12 October 2023, Woodside phoned NWAC’s Operations Manager but there was no answer.
- On 18 October 2023, Woodside emailed an alternative YMAC contact seeking an opportunity to speak to the contact person for NWAC.
- On 18 October 2023, NWAC sent a mobile text message asking Woodside to call back on the 19 October 2023.
- On 19 October 2023, Woodside phoned NWAC. Both parties have committed to future engagements.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 19 October 2023, Woodside emailed NWAC with a request for a cost estimation and offered to meet at a time and place that was suitable to NWAC. No response has been received.
- On 24 November 2023, Woodside emailed NWAC (via YMAC) introducing themselves and submitted a set of questions requesting their response in an effort to enhance their relationship. Woodside queried best contact details regarding consultation matters.
- On 24 November 2023, NWAC (via YMAC) emailed Woodside their communications protocol. NWAC noted additional expenses would be involved and committed to preparing a budget for Woodside's consideration.
- On 27 November 2023, Woodside emailed NWAC (via YMAC) thanking them for their response and re-iterating that Woodside would meet at the place and time suitable to NWAC.
- On 11 December 2023, Woodside met with NWAC, Woodside:
 - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities open for consultation.
 - Woodside provided an overview of this activity, explaining that these were floating vessels and not permanent rigs.
 - Woodside explained the difference between crude, gas and condensate.
 - Described the types of vessels involved.
 - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
 - Displayed and spoke to the EMBA and how they are developed.
 - Stated that Woodside wanted to understand how the functions, activities, or interests of NWAC and the people it represents may be impacted by any of those activities.
 - Specifically asked the following:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
 - **(1)** NWAC asked what it would mean if a spill reached Eighty Mile Beach. Woodside responded that they would bring other subject experts to future meetings.
 - **(2)** Senior Elder said she would like to speak with other Elders following this meeting.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (2) NWAC said they believe future meetings would be required.
- Woodside advised that it would continue to take feedback from NWAC for the life of the EP.
- On 11 December 2023, Woodside emailed NWAC (via YMAC) thanking them for the meeting and sharing contact details.
- On 11 December 2023, Woodside emailed NWAC (via YMAC) thanking them for their availability to attend Woodside’s presentation. Woodside provided a copy of the presentation given at the meeting and followed up on key topics discussed in the meeting and offered to provide further information regarding the activity.
- On 14 December 2023, Woodside emailed YMAC attaching the Program of Ongoing Consultation and advised that Woodside wanted to progress negotiations on consultation frameworks with groups represented by YMAC (including NWAC). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide NWAC with the information NWAC requires to make free, prior and informed decisions about Woodside’s EPs.
 - Agreement as to how NWAC will provide feedback and how that can best be represented in EPs.
 - An agreed schedule of rates for NWAC’s participation in consultation.
 - How the outputs of the consultations will be managed.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>During a face-to-face meeting NWAC asked:</p> <p>(1) What would happen if an oil spill reached Eighty Mile Beach.</p> <p>(2) NWAC Elder advised she would speak to other elders about the information and NWAC said that further meetings should take place.</p>	<p>(1) Woodside noted that they would bring subject experts to future meetings.</p> <p>(2) Separate from consultation under regulation 25 of the Environment Regulations. Woodside supports ongoing engagement with NWAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to NWAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside</p>	<p>(1) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>(2) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with NWAC as part of ongoing engagement (Section 7.10 of the EP). and continue to progress with establishing a Framework Agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (Appendix G). This includes resourcing NWAC for any reasonable request via the Framework Agreement.</p>

will apply its Management of Change and Revision process (see Section 7.1.16).

Nyangumarta Karajarri Aboriginal Corporation (NKAC)

NKAC is established under the Native Title Act 1993 by the Nyangumarta and Karajarri people to represent the Nyangumarta and Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NKAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that NKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to NKAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked NKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NKAC functions, interests or activities.

Historical Engagement

- On 24 July 2023, Woodside emailed NKAC/KLC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that NKAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed NKAC/KLC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.

Summary of information provided and record of consultation for this EP:

- On 13 October 2023, Woodside emailed NKAC (via KLC) advising of the proposed activity (Record of Consultation, reference 1.84) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required.
- On 18 October 2023, Woodside emailed NKAC (via KLC) confirming if the email sent from Woodside on 13 October 2023, had been received and passed along to Nyangumarta Karajarri Aboriginal Corporation.
- On 26 October 2023, KLC (representing NKAC) emailed Woodside to confirm receipt of emails and stated that they would pass on relevant information. KLC did note that turnaround times could be timely and delayed due to several factors.
- On 27 October 2023, Woodside emailed KLC asking for advice on forwarding a meeting request on to NKAC.
- On 23 January 2024, Woodside emailed NKAC (via KLC) advising that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with NKAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.
- On 23 January 2024, KLC (representing NKAC) emailed Woodside to confirm receipt of emails and stated they would pass on relevant information. KLC noted that turnaround times could be timely and delayed due to several factors.

Yawuru Native Title Holders Aboriginal Corporation (Yawuru)

Yawuru is established under the Native Title Act 1993 by the Yawuru people to represent the Yawuru people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Yawuru for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Yawuru’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Yawuru. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Yawuru can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Yawuru over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked Yawuru if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yawuru functions, interests or activities.

Historical Engagement

- On 18 July 2023, Woodside emailed Yawuru (NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Yawuru advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed Yawuru advising of the proposed activity (Record of Consultation, reference 1.85) and provided a a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Yawuru and its members may have within the EMBA, information on how Yawuru would like to engage, and requested that Yawuru provide information to other individuals as required.
- On 24 January 2024, Woodside sent a follow up email to Yawuru informing them that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Yawuru at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>No feedback, objections or claims have been received in response to the information since consultation commenced in October 2023, despite follow up.</p>	<p>Woodside accepts that Yawuru has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Yawuru (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to Yawuru will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Yawuru as part of ongoing engagement (Section 7.10 of the EP).</p>

Dambimangari Aboriginal Corporation (DAC)

DAC is established under the Native Title Act 1993 by the Dambimangari people to represent the Dambimangari people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient information:

- Woodside sought direction on DAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to DAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that DAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to DAC over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked DAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on DAC functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed DAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that DAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed DAC advising of the proposed activity (Record of Consultation, reference 1.76) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that DAC and its members may have within the EMBA, information on how DAC would like to engage, and requested that DAC provide information to other individuals as required.
- On 13 October 2023 Woodside phoned DAC's general landline but there was no answer. Woodside left a message for the CEO.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 16 October 2023, Woodside emailed DAC providing information about Woodside’s consultation along the coastline of Western Australia, Northern Territory and Victoria and enquiring about the opportunity to connect with the Board in the near future.
- On 18 October 2023, Woodside emailed DAC’s deputy CEO introducing the Woodside focal point and asking to listen to any feedback on Woodside activities.
- On 25 October 2023, Woodside emailed KLC seeking the most recent contact details for DAC.
- On 30 October 2023, KLC emailed Woodside acknowledging Woodside’s previous email and advising Woodside that the ORIC website would have the relevant contact details.
- On 2 November 2023, Woodside emailed KLC, notifying KLC that Woodside had previously tried all available contacts listed on ORIC site. Woodside advised that they would be interested to meet members and were flexible with meeting dates and logistics.
- On 2 November, KLC emailed Woodside stating they would pass Woodside’s email onto their contacts at the relevant organisations.
- On 8 November 2023, Woodside emailed the DAC CEO requesting the opportunity for a ‘meet & greet’, highlighting the purpose for the meeting was to explain the current EPs as they related to the Dambimangari Traditional Owners. Woodside attached an offer to meet document alongside the relevant EP to the email.
- On 8 November 2023, Woodside visited the DAC offices in Derby in person to meet and greet and seek feedback on EPs. The activity was discussed, and the purpose of consultation was communicated to DAC. Woodside gave an overview of the EMBA and provided the link to NOPSEMA regarding First Nations engagement. Woodside asked if DAC had any questions or would like to provide feedback and if there was anyone else, they should speak to or to speak with to make introductions. Woodside was advised that the DAC CEO was the best person to organise further contact. DAC provided a contact for a ranger project and gave the CEO contact details.
- On 11 November 2023, Woodside wrote to DAC requesting a meeting with the CEO and Board, at a time, date and location of DAC’s choosing. Woodside offered to pay reasonable costs for the meeting. No response has been received.
- On 23 January 2024, Woodside emailed DAC following up on previous attempts to consult and meet with DAC about this activity. Woodside informed DAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with DAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
DAC has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023, despite follow-up.	Woodside accepts that DAC has no feedback on the activity at this time. Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with DAC (Section 7.10). As outlined in the consultation summary above,	Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to DAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>to engage with DAC as part of ongoing engagement (Section 7.10 of the EP).</p>
--	--	---

Bardi and Jawi Niimidiman Aboriginal Corporation (BJNAC)

BJNAC is established under the Native Title Act 1993 by the Bardi and Jawi People to represent the Bardi and Jawi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BJNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient information:

- Woodside sought direction on BJNAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to BJNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that BJNAC can request that particular information provided in the consultation not be published (to align with 25(4)).

Reasonable Period:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside has addressed and responded to BJNAC over a 5-month period.

Woodside asked BJNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.14 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BJNAC'S functions, interests or activities.

Historical Engagement

- **(1)** On 14 April 2023, BJNAC emailed Woodside, advising that that BJNAC would be unable to engage with Woodside on a goodwill basis via attending and coordinating meetings, or with general correspondence and requested that Woodside factor in the values that are outlined in BJNAC's Joint Management Plan for the Park, into Woodside's EP plan for projects. BJNAC noted that there may be cases where BJNAC will simply want to make Woodside aware of the Bardi and Jawi Marine Park and will be requesting that Woodside factor in the values that are outlined in the Joint Management Plan for the Park, into Woodside's EP plan for projects. In other cases, BJNAC may want to respond with more detailed information if a project is likely to have a greater effect on Bardi and Jawi sea country. BJNAC stated that it will provide Woodside with a resourcing protocol within 28 days and objected to Woodside progressing matters with the PBC or making a submission to NOPSEMA.
- **(2)** On 5 June 2023, BJNAC emailed Woodside a draft resourcing protocol for consideration and stated it would await comments from Woodside.
- On 18 July 2023, Woodside emailed BJNAC thanking them for the draft protocol and restated Woodside's objectives for consultation. In the email, Woodside included a summary sheet for another activity unrelated to this EP along with NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that BJNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 8 August 2023, BJNAC (via NOPSEMA) emailed Woodside enclosing a letter relating to among other things:
 - Culturally appropriate consultation processes,
 - Information that will support free, prior and informed consent.
 - Financial support to bring together the right people to ensure appropriate consultations.
- **(1)** On 13 October 2023, Woodside met face-to-face with BJNAC in a meeting on implementing an engagement framework. A framework draft was reviewed, and edits proposed. It was agreed that both parties were on the same page for ongoing consultation. BJNAC commended Woodside for how they engage and consult

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

with First Nations peoples. BJNAC's preferred methods of consultation, including the use of animated videos, were discussed with suggestions agreed to by both parties.

Summary of information provided and record of consultation for this EP:

- On 23 November 2023, Woodside emailed BJNAC advising of the proposed activity (Record of Consultation, reference 1.99) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that BJNAC and its members may have within the EMBA, information on how BJNAC would like to engage, and requested that BJNAC provide information to other individuals as required.
- On 23 November 2023, Woodside telephoned BJNAC, there was no answer.
- On 14 December 2023, Woodside emailed BJNAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians. Woodside noted that Woodside's contracting team had not settled the Agreement Protocol yet but noted the following inclusions:
 - Agreement between Woodside and BJNAC and as representatives of the Bardi Jawi people (together "BJNAC") to consult in a meaningful and genuine manner.
 - The basic procedure Woodside will follow when a submission requires consultation – notification and invitation to meet.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide BJNAC the information BJNAC requires to make a free, prior and informed decisions.
 - Agreement as to how BJNAC will provide feedback and how we can best represent BJNAC's feedback in our submissions.
 - An agreed schedule of rates.
 - How the outputs of the consultation are managed.
- On 15 December 2023, emails were exchanged between Woodside and BJNAC seeking a date to meet.
- On 18 January 2024, emails were exchanged between Woodside and BJNAC seeking a time to meet. 25 January 2024 was discussed and agreed between BJNAC and Woodside.
- **(3)** On 25 January 2024, BJNAC emailed and sent a letter to Woodside making the following points (among others):
 - Will seek technical advice about the activities proposed in the EP.
 - Will seek advice on potential environmental implications of the activity in the EP.
 - Advice on potential impact on cultural heritage and rights under law and custom.
 - Consideration of reports which contain the above advice.
 - Funding requirement to allow for the above undertakings by relevant experts.
- On 2 February 2023, Woodside emailed BJNAC confirming a meeting for the week of 5 February 2024 and offering to pay costs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 February 2024, BJNAC emailed Woodside confirming availability and responding that they did not require costs to be paid to meet at this time.
- **(4)** On 5 February 2024, Woodside met with BJNAC's, Executive Officer who confirmed that BJNAC had no issues with this activity and no comments to make.
- **(4)** On 8 February 2024, BJNAC emailed Woodside stating they do not see themselves being affected. BJNAC requested that Woodside consult with them in the event changes occur to the oil spill scenario.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) BJNAC previously advised it has values that are outlined in the Joint Management Plan for the Bardi and Jawi Marine Park, which it may require to be noted in particular Eps.</p> <p>(2) BJNAC has requested that Woodside enter into a resourcing protocol. BJNAC has set out conditions it requires for ongoing engagement.</p> <p>(3) BJNAC advised it would seek technical advice on the proposed activity and advice on potential environmental and cultural heritage implications.</p> <p>(4) BJNAC confirmed it had no issues or comments to make about this activity.</p>	<p>(1) Woodside accepts BJNAC's feedback regarding the values outlined in the Joint Management Plan for the Bardi Jawi Gaarra Marine Park. Woodside has updated the EP to reflect BJNAC's interests in the Bardi Jawi Gaarra Marine Park, whilst noting that the Marine Park falls outside the EMBA for this EP.</p> <p>(2) Woodside is committed to resourcing BJNAC through an agreed resourcing protocol as part of ongoing consultation as required by the implementation strategy as set out regulation 22(15) of the Environment Regulations. Request by BJNAC to fund independent experts would also be agreed through the resourcing protocol.</p> <p>(3, 4) Woodside accepts BJNAC has no issues or comments to make about this activity.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.14).</p>	<p>(1) Woodside has updated Section 7.6 of the EP to reflect BJNAC's feedback and note that the Bardi Jawi Gaarra Marine Park falls outside the EMBA for this EP.</p> <p>(2, 4) As identified in Sections 6 and 7 of this EP, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in regulation 22(15) of the Environment Regulations and continue to progress with establishing a framework agreement as part of Woodside's Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p> <p>(3) Not required.</p>

Balanggarra Aboriginal Corporation (BAC)

BAC is established under the Native Title Act 1993 by the Balanggarra People to represent the Balanggarra People (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Balanggarra Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient information:

- Woodside sought direction on BAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to BAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that BAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to BAC over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked BAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BAC functions, interests or activities.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 July 2023, Woodside emailed BAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that BAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed BAC advising of the proposed activity (Record of Consultation, reference 1.75) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that BAC and its members may have within the EMBA, information on how BAC would like to engage, and requested that BAC provide information to other individuals as required.
- On 13 October 2023, Woodside phoned BAC to make contact. No response was received.
- On 13 October 2023, Woodside contacted BAC via an alternative email address to seek advice on making contact with the BAC board or contact person.
- On 25 October 2023, Woodside phoned BAC via the registered number listed on ORIC. Call was taken but Woodside was informed that this was not the correct number for BAC.
- On 25 October 2023, Woodside emailed the Kimberley Land Council enquiring about the best method of contact for the Balangarra Aboriginal Corporation. No response was received.
- On 2 November 2023, Woodside sent a follow up email to Balangarra Aboriginal Corporation providing information about the proposed activity, enquiring about the best point of contact, confirming if any further information is required regarding this EP, and advising Woodside is available to meet as suits the CEO and Board of Directors. No response was received.
- On 23 November 2023, Woodside emailed BAC requesting an opportunity to make introductions, answer any questions and listen to feedback. No response has been received.
- On 23 January 2024, Woodside emailed BAC informing them that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with them at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
BAC has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.	Woodside accepts that BAC has no feedback on the activity at this time. Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with BAC (Section 7.10). As	Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>to engage with BAC as part of ongoing engagement (Section 7.10 of the EP).</p>
<p>Esperance Tjaltjraak Native Title Aboriginal Corporation (ETNTAC)</p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with ETNTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p>Sufficient Information:</p> <ul style="list-style-type: none"> • Woodside sought direction on ETNTAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to ETNTAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan. • Advised that ETNTAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). <p>Reasonable Period:</p>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to ETNTAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked ETNTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on ETNTAC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed ETNTAC advising of the proposed activity (Record of Consultation, reference 1.86) and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that ETNTAC and its members may have within the EMBA. Woodside also provided a link to NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” alongside NOPSEMA’s contact details.
- On 3 October 2023, ETNTAC emailed Woodside to confirm receipt of the email and noted the link to the detailed Consultation Information Sheet wasn’t allowing access.
- On 3 October 2023, Woodside responded with a new link for the detailed Consultation Information Sheet.
- On 3 October 2023, ETNTAC responded thanking Woodside for the link and asked:
 - **(1)** Woodside to summarise why it was seeking to engage with ETNTAC regarding the project.
 - **(2)** Why the limit of potential impact is Ravensthorpe and whether this is based on the potential impacts to coastal areas from a release of hydrocarbons as far east as Ravensthorpe, or another factor impacting inland areas as well.
- On 3 October 2023, Woodside responded and:
 - Explained the methodology behind the EMBA and that the coast of Esperance falls within the catchment area.
 - Provided some common Questions and Answers regarding what constitutes a relevant person and how an EMBA is determined. Woodside noted that following a Federal Court decision, it now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.
 - Provided direction and a link to the NOPSEMA website for further information on consultation guidelines and oil spilling modelling.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 24 October 2023, Woodside sent a follow-up email enquiring if ETNTAC had any questions relating to this EP and offered consultation sessions with the members and/or board of ETNTAC. No response has been received.
- On 8 December 2023, Woodside emailed ETNTAC following up on previous correspondence and offering opportunity for consultation sessions with members and/or Board of ETNT during the festive period.
- On 19 December 2023, Woodside emailed ETNTAC wishing a happy festive season, thanking ETNTAC for their contributions throughout the year and offering availability for consultation sessions.
- On 22 December, ETNTAC emailed Woodside apologising for the lack of communication and advising Woodside of when to expect future correspondence from ETNTAC.
- On 9 January 2024, Woodside emailed ETNTAC following up on previous correspondence offering to meet and discuss the EP. Woodside included contact information of the best contact person following 31 January 2024.
- On 2 February 2024, Woodside emailed ETNTAC links to NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. The email informed ETNTAC that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with ETNTAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>ETNTAC sought clarification on:</p> <p>(1) Why Woodside was consulting with ETNTAC.</p> <p>(2) The reasons for the limits of potential impact in the EMBA.</p>	<p>(1, 2) Woodside provided a written response advising ETNTAC of the methodology behind the EMBA, which for this EP includes the coast of Esperance, and confirmed that based on a Federal Court decision, Woodside now consults more broadly with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity. Woodside also provided some further Q&As about the development of the EMBA.</p> <p>Woodside accepts that ETNTAC has no further feedback at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with ETNTAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have</p>	<p>(1, 2) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with ETNTAC as part of ongoing engagement (Section 7.10 of the EP).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to ETNTAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	---	--

Bundi Yamatji Aboriginal Corporation (BYAC)
 BYAC is established under the Native Title Act 1993 by the Bundi Yamatji people to represent the Bundi Yamatji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Bundi Yamatji AC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Consultation Information Sheet publicly available on the Woodside website since September 2023.
- Provided Consultation Information Sheet and Summary Information Sheet to BYAC on 11 October 2023 based on their function, interest and activities. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Woodside sought direction on BYAC’s preferred method of consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.

- Advised that BYAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to BYAC over 5 months, demonstrating a “reasonable period” of consultation.
- Woodside asked BYAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BYAC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside sent two emails to BYAC advising of the proposed activity (Record of Consultation, reference 1.87) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that BYAC and its members may have within the EMBA, information on how BYAC would like to engage, and requested that BYAC provide information to other individuals as required.
- **(1)** On 1 November 2023, BYAC emailed Woodside thanking it for the information and advising there was no need for BYAC to provide a response in relation to connections to the area, noting that if any particular area was impacted by oil or spills then there would be a need to consult with BYAC.
- On 2 February 2024, Woodside emailed BYAC links to NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also informed BYAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside asked if BYAC would like to provide further feedback and gave contact information for direct feedback. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
---	---	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>(1) BYAC advised it had no need to respond regarding this activity. BYAC advised that if there were spills or oil impacting BYAC's area of interest then BYAC should be consulted.</p>	<p>(1) Woodside accepts BYAC's feedback. In line with the Oil Pollution First Strike Plan, in the highly unlikely event a hydrocarbon release was to impact BYAC's area of interest, Woodside will contact BYAC.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with BYAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to BYAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) The Oil Spill First Strike Plan (Appendix I) includes a requirement to contact Traditional Owners who may be affected by a spill.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with BYAC as part of ongoing engagement (Section 7.10 of the EP).</p>
---	---	---

Ngadju Native Title Aboriginal Corporation (Ngadju)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NNTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Ngadju's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Ngadju. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Ngadju can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Ngadju over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked Ngadju if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by Regulation 25(1), throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Ngadju functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 16 October 2023, Woodside emailed Ngadju advising of the proposed activity (Record of Consultation, reference 1.74) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Ngadju and its members may have within the EMBA, information on how Ngadju would like to engage, and requested that Ngadju provide information to other individuals as required.
- On 20 October 2023, Woodside phoned Ngadju and left a message asking for its call to be returned.
- On 20 October 2023, Ngadju returned Woodside's phone call.
- On 20 October 2023, in follow-up to the phone call, Woodside emailed a different representative from Ngadju, advising of the proposed activity and again provided the Summary Information Sheet and links to detailed information sheets. Woodside also provided a link to NOPSEMA's Consultation Brochure as well as their contact details.
- On 31 October 2023, Woodside sent a follow up email asking whether Ngadju would like any further information on the environment plan and advising it was available to meet in Perth on 2 November 2023 or 8 November 2023. No response was received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 7 December 2023, Woodside sent a follow up email asking whether Ngadju would like any further information on the environment plan and advising there was availability to meet in Perth on 11 December 2023. No response was received.
- On 19 December 2023, Woodside emailed Ngadju wishing them a safe festive season and offered assistance on the environment plan.
- On 25 January 2024, Woodside phoned Ngadju corporation and left a message requesting a return call, no response was received.
- On 2 February 2024, Woodside emailed Ngadju NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Ngadju advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>Ngadju has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.</p>	<p>Woodside accepts that Ngadju has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Ngadju (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to Ngadju will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with NNTAC as part of ongoing engagement (Section 7.10 of the EP).</p>

Gnaala Karla Booja Aboriginal Corporation (GKB)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with GKB for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on GKB'S preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to GKB. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that GKB can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to GKB over 5 months, demonstrating a "reasonable period" of consultation.
- Woodside asked GKB if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by Regulation 25, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GKB functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed GKB advising of the proposed activity (Record of Consultation, reference 1.88) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that GKB and its members may have within the EMBA, information on how GKB would like to engage, and requested that GKB provide information to other individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 October 2023, Woodside emailed GKB following up on the 11 October 2023 email, offering to meet and asking whether any further information was required and whether there were any other individuals or groups that Woodside should consult with. No response has been received.
- On 7 December 2023, Woodside received a letter from GKB stating:
 - (1) Woodside should inform GKB as soon as possible once an unplanned event occurs.
 - (2) Woodside to update GKB on the progress of the Ngujima-Yin operations.
 - (2) GKB will inform Woodside if there are matters relating to the operations that GKB believe Woodside should know.
 - (3) There are no additional matters that GKB wishes to provide in response to the EP.
- On 2 February 2024, Woodside emailed GKB NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email acknowledged that Woodside would keep GKB up to date on this activity and that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>GKB has given the following feedback:</p> <p>(1) They should be informed as soon as possible following an unplanned event.</p> <p>(2) They should be kept up to date with activity on this EP.</p> <p>(2) They will make Woodside aware of any matters that affect GKB arising from the activity.</p> <p>(3) They currently have no further matters to relate to Woodside about this activity.</p>	<p>(1) In line with the Oil Pollution First Strike Plan, in the highly unlikely event a hydrocarbon release was to impact GKB's area of interest, Woodside would contact GKB.</p> <p>(2) Woodside will keep GKB informed about progress on the activity.</p> <p>(3) Woodside accepts the feedback from GKB.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with GKB (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to GKB will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be</p>	<p>(1) The Oil Spill Response First Strike Plan (Appendix I) includes a requirement to notify Traditional Owners who may be affected by a spill.</p> <p>(2) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with GKB as part of ongoing engagement (Section 7.10 of the EP).</p> <p>(3) Existing controls considered sufficient, as described in Section 6 and 7.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	---	--

Karri Karrak Aboriginal Corporation (KKAC)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on KKAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that KKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to KKAC over 4 months, demonstrating a “reasonable period” of consultation.
- Woodside asked KKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KKAC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed KKAC advising of the proposed activity (Record of Consultation, reference 1.89) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KKAC and its members may have within the EMBA, information on how KKAC would like to engage, and requested that KKAC provide information to other individuals as required.
- On 12 October 2023, KKAC emailed Woodside noting they would call to discuss arrangements for feedback.
- On 14 October 2023, KKAC telephoned Woodside inviting them to attend a meeting with the KKAC Cultural Advice Committee on 18 October 2023.
- On 18 October 2023, Woodside met with the KKAC Cultural Advice Committee comprised of senior knowledge holders, Woodside:
 - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities open for consultation.
 - Woodside provided an overview of this activity.
 - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
 - Displayed and spoke to the EMBA and how they are developed.
 - Stated that Woodside wanted to understand how the functions, activities, or interests of KKAC and the people it represents may be impacted by any of those activities.
 - Specifically asked the following:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
 - KKAC said:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** They expected to be kept informed about the activities.
- **(2)** That Woodside should advise KKAC in the case of an unplanned event arising from the activities.
- **(3)** That KKAC would prefer their rangers to be prepared for, and included, in a response to an unplanned event within the area of their Indigenous Land Use Agreement.
- Woodside advised that they take feedback from KKAC for the life of the EP.
- On 26 October 2023, Woodside emailed KKAC following up on the meeting of 18 October, confirming outcomes and seeking to understand if KKAC would like to meet further.
- On 29 October 2023, KKAC emailed Woodside acknowledging receipt of the meeting overview and indicating that an invoice would be sent shortly.
- On 2 February 2024, Woodside emailed KKAC informing them the opportunity for consultation closes on 23 February 2024. Woodside also attached links to NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. Woodside noted they would keep KKAC informed of progress on this activity, they noted that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>In a face-to-face meeting, KKAC requested that:</p> <ul style="list-style-type: none"> – (1) Woodside keeps KKAC informed of progress on the activity. – (2) Woodside as soon as reasonably practical advises KKAC in the case of an unplanned event arising from the activities. – (3) Their rangers be prepared for, and included, in a response to an unplanned event within the area of their Indigenous Land Use Agreement. 	<p>(1) Woodside has undertaken to keep KKAC informed about progress on the activity.</p> <p>(2) In line with the Oil Pollution First Strike Plan, in the highly unlikely event a hydrocarbon release was to impact KKAC’s area of interest, Woodside will contact KKAC.</p> <p>(3) Woodside will continue to discuss ranger programs in line with Woodside’s Program for Ongoing Engagement.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with KKAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to KKAC will be for the purpose of ongoing engagement.</p>	<p>(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with KKAC as part of ongoing engagement (Section 7.10 of the EP).</p> <p>(2) The Oil Spill Response First Strike Plan (Appendix I) includes a requirement to notify Traditional Owners who may be affected by a spill.</p> <p>(3) Woodside is implementing a program to actively support Traditional Custodians’ capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	---	--

Wagyl Kaip Southern Noongar Aboriginal Corporation (Wagyl Kaip)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wagyl Kaip for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Wagyl Kaip’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Wagyl Kaip. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that Wagyl Kaip can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Wagyl Kaip over 4 months, demonstrating a “reasonable period” of consultation.
- Woodside asked Wagyl Kaip if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wagyl Kaip functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 31 October 2023, Woodside emailed Wagyl Kaip advising of the proposed activity (Record of Consultation, reference 1.90) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Wagyl Kaip and its members may have within the EMBA, information on how Wagyl Kaip would like to engage, and requested that Wagyl Kaip provide information to other individuals as required.
- On 7 November 2023, Woodside emailed Wagyl Kaip following up on the 31 October 2023 email, offering to meet and asking whether any further information was required and whether there were any other individuals or groups that Woodside should consult with. No response was received.
- On 22 December 2023, Woodside phoned Wagyl Kaip and left a message asking for a return call.
- On 22 December 2023, Woodside sent a follow up email requesting the opportunity to meet and answer any questions regarding the EP that Wagyl Kaip may have.
- **(1)** On 8 January 2024, Wagyl Kaip emailed Woodside advising the EP will have no effect on Wagyl Kaip Aboriginal Corporation heritage or cultural values.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Wagyl Kaip has provided feedback stating the proposed activity will have no effect on Wagyl Kaip Aboriginal Corporation heritage or cultural values.</p>	<p>(1) Woodside accepts that Wagyl Kaip’s feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Wagyl Kaip (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to Wagyl Kaip will be for the purpose of ongoing engagement.</p>	<p>(1) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Wagyl Kaip as part of ongoing engagement (Section 7.10 of the EP).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	---	--

Whadjuk Aboriginal Corporation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Whadjuk AC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- **Sufficient Information:**
 - Woodside sought direction on Whadjuk AC preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
 - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Whadjuk AC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
 - Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
 - Articulated planned and unplanned environmental risks and impacts, with proposed controls.
 - Asked for the consultation and information sheets to be distributed to members and individuals as required.
 - Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans”
 - Advised that Whadjuk AC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

- **Reasonable Period:**
 - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
 - Woodside has addressed and responded to Whadjuk AC over 5 months, demonstrating a “reasonable period” of consultation.
 - Woodside asked Whadjuk AC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Whadjuk AC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 9 October 2023, Woodside telephoned Whadjuk AC advising them that Woodside would be sending consultation information regarding this EP, requesting that they review the information and respond with any feedback.
- On 9 October 2023, Woodside emailed Whadjuk AC advising of the proposed activity (Record of Consultation, reference 1.91) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Whadjuk AC and its members may have within the EMBA, information on how Whadjuk AC would like to engage, and requested that Whadjuk AC provide information to other individuals as required.
- On 7 November 2023, Woodside emailed Whadjuk AC requesting any feedback regarding this activity and offering to meet with Whadjuk. No response was received.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>Whadjuk has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023, despite follow-up.</p>	<p>Woodside accepts that Whadjuk has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Whadjuk (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to Whadjuk will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including</p>	<p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Whadjuk as part of ongoing engagement (Section 7.10 of the EP).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
<p>Yued Aboriginal Corporation (Yued)</p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Yued Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <ul style="list-style-type: none"> • Sufficient Information: <ul style="list-style-type: none"> • Woodside sought direction on Yued’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Yued. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan. • Advised that Yued can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). <p>Reasonable Period:</p> <ul style="list-style-type: none"> • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Woodside has addressed and responded to Yued over 5 months, demonstrating a “reasonable period” of consultation. • Woodside asked Yued if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. 		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yued functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside met with Yued regarding other matters and advised Yued that Woodside would be sending Yued consultation information for this Environment Plan. Yued noted they had previously been consulted regarding another Woodside EP.
- On 9 October 2023, Woodside emailed Yued advising of the proposed activity (Record of Consultation, reference 1.92) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Yued and its members may have within the EMBA, information on how Yued would like to engage, and requested that Yued provide information to other individuals as required.
- On 13 October 2023, Yued responded requesting maps overlaying the extent of oil spill modelling and the Yued ILUA area.
- On 18 October 2023, Woodside emailed Yued providing the requested map and offering to meet or answer any questions.
- On 8 November 2023, Woodside emailed Yued offering the opportunity for feedback.
- **(1)** On 9 November 2023, Yued emailed Woodside advising that at present they had no feedback, and there did not appear to be any adverse impacts in the Yued area. Yued advised that they would endeavour to contact Woodside after their election cycle.
- On 10 November 2023, Woodside emailed Yued thanking them for the response and advising Woodside would take feedback at any time as part of Woodside’s approach to ongoing consultation.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) Yued advised that they have no feedback on this activity, and they would endeavour to contact Woodside after their election cycle.</p>	<p>(1) Woodside accepts that Yued has no feedback on the activity at this time. Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Yued (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement</p>	<p>(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Yued as part of ongoing engagement (Section 7.10 of the EP).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>with and support offered to Yued will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	--	--

Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang (MG Corp)

MG Corp is established under the Native Title Act 1993 by the Miriuwung and Gajerrong people to represent the Miriuwung and Gajerrong people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MG Corp for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on MG Corp’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to MG Corp. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that MG Corp can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

- Woodside commenced consultation with MG Corp in October 2023. Woodside has addressed and responded to MG Corp over 5 months, demonstrating a “reasonable” period of consultation.

Woodside asked MG Corp if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MG Corp’s functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed MG Corp NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that MG Corp advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed MG Corp an agenda and presentation in advance of a meeting planned for 18 September to discuss unrelated activities as well as this activity.
- On 18 September 2023, Woodside met with the MG Corp Chair and Directors and presented on this activity along with others. Woodside:
 - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA’s role as regulator and general contents of EPs.
 - Displayed a map of the EMBA and discussed how the EMBA is developed.
 - Gave an overview of the activity.
 - Specifically, Woodside asked the following:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
 - MG Corp noted:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> ▪ (1) That native title exists on Lacrosse Island and is closer to shore in relation to impacts from this activity. ▪ (2) There are registered sites on Lacrosse Island to be aware of. ▪ (3) That Balanggarra should be involved in future discussions. Woodside said that they had made attempts to contact Balanggarra. <ul style="list-style-type: none"> • On 13 October 2023, Woodside emailed MG Corp advising of the proposed activity (Record of Consultation, reference 1.114) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that MG Corp and its members may have within the EMBA, information on how MG Corp would like to engage, and requested that MG Corp provide information to other individuals as required. • On 1 November 2023, Woodside emailed MG Corp following up on the activity summary sheets and asking if there was any feedback or further information required. No response was received. • On 25 January 2024, Woodside phoned MG Corp and was advised to send an email. Woodside emailed MG Corp following up on this activity, re-attaching the Summary Information sheet sent in October 2023, and offering to provide further information if required. Woodside stated they would submit this EP to NOPSEMA in February 2024, re-iterating feedback from MG Corp is open for the life of the EP.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>During face-to-face engagement related to this activity and others MG Corp noted the following related to this proposed activity:</p> <p>(1) Native title exists on Lacrosse Island and is closer to shore in terms of impacts.</p> <p>(2) There are registered sites on Lacrosse Island.</p> <p>(3) Balanggarra should be involved in future discussions.</p> <p>MG Corp has not provided further feedback or objections since consultation information sheets were sent in October 2023, despite follow-up.</p>	<p>(1, 2, 3) Woodside responded to questions and feedback on the activity in a face-to-face meeting, including advising that Woodside had attempted to contact Balanggarra.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with MG Corp (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to MG Corp will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it</p>	<p>(1, 2, 3) Existing controls considered sufficient, as described in Section 6 and 7</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with MG Corp as part of ongoing engagement (Section 7.10 of the EP).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	
<p>Mirning Traditional Lands Aboriginal Corporation RNTBC (MTLAC) MTLAC is established under the Native Title Act 1993 by the Mirning people to represent the Mirning people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MTLAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p>Sufficient Information:</p> <ul style="list-style-type: none"> • Woodside sought direction on MTLAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to MTLAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided links to NOPSEMA’s Guideline “Guideline: Consultation in the course of preparing an environment plan. • Advised that MTLAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). <p>Reasonable Period:</p> <ul style="list-style-type: none"> • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Woodside has addressed and responded to MTLAC over 5 months, demonstrating a “reasonable period” of consultation. • Woodside asked MTLAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. 		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MTLAC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 4 October 2023, Woodside emailed MTLAC advising of the proposed activity (Record of Consultation, reference 1.95) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MTLAC and its members may have within the EMBA, information on how MTLAC would like to engage, and requested that MTLAC provide information to other individuals as required.
- On 24 October 2023, Woodside emailed MTLAC following up on the activity. No response was received.
- On 8 December, Woodside sent a follow up email offering to answer any questions relating to the proposed EP's. Woodside advised of their availability to schedule a consultation session.
- On 19 December 2023, Woodside emailed MTLAC thanking them for their contributions throughout the year and offering opportunity for consultation regarding Woodside projects.
- On 9 January 2024, Woodside emailed MTLAC following up on previous correspondence and offering the opportunity to meet via MTLAC's preferred method of consultation.
- On 9 January 2024, MTLAC emailed Woodside advising acceptance of a meeting, enquiring the purpose of the meeting and requesting a date suitable to Woodside.
- On 10 January 2024, Woodside emailed MTLAC informing them of the aim of the meeting and advising a calendar invite would be sent out later that day.
- **(1)** On 22 January 2024, Woodside met with MTLAC, Woodside:
 - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of the EMBA and discussed how the EMBA is developed.
 - Gave an overview of the activity including that woodside will continue to produce crude oil.
 - Spoke about routine inspections, monitoring maintenance and repairs associated with the subsea infrastructure.
 - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
 - Specifically, Woodside asked the following:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> ▪ How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values? ▪ What are your concerns about the proposed activities and what do you think we should do about them? ▪ Is there anything you would like included in the EPs before submission? ▪ Is there anyone else Woodside should consult with about the activities? <ul style="list-style-type: none"> - Advised that Woodside will continue to take feedback from MTLAC for the life of the EP. - Discussed ranger programs and initiatives that Woodside has partnered on. - MTLAC noted: <ul style="list-style-type: none"> ▪ (1) That due to the location of the activity it was unlikely that Mirning country would be impacted. - Discussion on cultural heritage and sea country mapping took place and Woodside noted that there would be an opportunity to talk further on sea country mapping. <ul style="list-style-type: none"> • On 31 January 2024, Woodside emailed MTLAC thanking them for the meeting that occurred on 22 January 2024. Woodside noted that it was unclear if they would need to consult with MTLAC on future environment plans and attached Woodside’s program of ongoing consultation.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) During face-to-face engagement on this activity, MTLAC noted that due to the location of the activity it was unlikely that Mirning country would be impacted.</p>	<p>(1) Woodside accepts that MTLAC’s feedback that due to the location of the activity it was unlikely Mirning country would be impacted.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with MTLAC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to MTLAC will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. 	<p>any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
<p>Kunin (Native Title) Aboriginal Corporation (Kunin) Kunin (Native Title) Aboriginal Corporation is established under the Native Title Act 1993 by the Yawuru people to represent the Djugan and Yawuru people in the northern Yawuru claim area known as Kunin (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kunin for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p>Sufficient Information:</p> <ul style="list-style-type: none"> • Woodside sought direction on Kunin preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Kunin. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Confirmed the purpose of consultation and set out in detail what was being sought through consultation. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”. • Advised that Kunin can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). <p>Reasonable Period:</p> <ul style="list-style-type: none"> • Consultation Information Sheet publicly available on the Woodside website since September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023). 		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation with Kunin in October 2023. Woodside has addressed and responded to Kunin over 5 months, demonstrating a “reasonable” period of consultation.
- Woodside asked Kunin if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Kunin’s functions, interests or activities.

Historical Engagement

- On 18 July 2023, Woodside emailed Kunin (via Yawuru AC) NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Yawuru advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed Kunin (via Yawuru AC) advising of the proposed activity (Record of Consultation, reference 1.93) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Kunin and its members may have within the EMBA, information on how Kunin would like to engage, and requested that Kunin provide information to other individuals as required.
- Kunin members are fully represented within Yawuru.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
Kunin/Yawuru AC has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in October 2023.	Woodside accepts that Kunin/Yawuru AC has no feedback on the activity. Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Kunin/Yawuru AC (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to Kunin/Yawuru AC will be for the purpose of ongoing engagement.	Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Kunin/Yawuru AC as part of ongoing engagement (Section 7.10 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>

Wilinggin Aboriginal Corporation (Wilinggin)

Wilinggin Aboriginal Corporation is established under the Native Title Act 1993 by the Ngarinyin people to represent the Ngarinyin people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wirrawandi Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Wilinggin’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Wilinggin. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that Wilinggin can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

- Woodside commenced consultation with Wilinggin in October 2023. Woodside has addressed and responded to Wilinggin over 5 months, demonstrating a “reasonable” period of consultation.

Woodside asked Wilinggin if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wilinggin’s functions, interests or activities.

Historical engagement:

- On 18 July 2023, Woodside emailed KLC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that KLC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 13 October 2023, Woodside emailed Wilinggin advising of the proposed activity (Record of Consultation, reference 1.94) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Wilinggin and its members may have within the EMBA, information on how Wilinggin would like to engage, and requested that Wilinggin provide information to other individuals as required.
- On 25 October 2023, Woodside emailed KLC introducing themselves and querying the best point of contact for Wilinggin (along with some other PBC’s).
- On 30 October 2023, KLC responded to Woodside’s email advising Woodside of the appropriate contact details for Wilinggin.
- On 2 November 2023, Woodside emailed KLC thanking them for providing the best contact details in their email on 30 October 2023 and explained how Woodside had tried all available contacts provided to them by KLC. Woodside also stated that they were flexible and will support Wilinggin’s preferred method of consultation (dates and locations).
- On 2 November 2023, KLC emailed Woodside confirming email receipts and affirmed that they would pass onto relevant persons.
- On 2 November 2023, Woodside emailed Wilinggin introducing themselves and enquiring the best point of contact. Woodside also queried if there was availability for a meeting or if any follow up information was required for this activity.
- On 16 November 2023, Woodside sent a follow up email to Wilinggin enquiring the best contact to reach the Chief Executive Officer for the Wilinggin Aboriginal Corporation. Woodside also offered the opportunity to meet and discuss Woodside activities with the Wilinggin Aboriginal Corporation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 24 November 2023, Woodside emailed Wilinggin requesting the opportunity to meet and answer any questions relating to the EP. Woodside again provided the Summary Information Sheets that were originally sent in October 2023 and asked whether Wilinggin had any feedback on the activity, noting that consultation was open for the life of the EP.
- On 23 January 2024, Woodside emailed Wilinggin to inform Wilinggin that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Wilinggin at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>Wilinggin has not provided feedback, objections to date or claims in response to the information provided since consultation commenced in February 2023. KLC has acknowledged receipt of emails.</p>	<p>Woodside accepts that Wilinggin has no feedback on the activity at this time.</p> <p>Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Wilinggin (Section 7.10). As outlined in the consultation summary above, sufficient information and a reasonable period have been provided to demonstrate that consultation for the purpose of regulation 25 of the Environment Regulations is complete. Any further engagement with and support offered to MCG will be for the purpose of ongoing engagement.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Wilinggin as part of ongoing engagement (Section 7.10 of the EP).</p>

Wunambal Gaambera Aboriginal Corporation (WGAC)

WGAC is established under the Native Title Act 1993 by the Wunambal Gaambera people to represent the Wunambal Gaambera people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information:

- Woodside sought direction on WGAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to WGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that WGAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with WGAC in October 2023. Woodside has addressed and responded to WGAC over 5 months, demonstrating a “reasonable” period of consultation.

Woodside asked WGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WGAC’s functions, interests or activities.

Historical Engagement

- On 18 July 2023, Woodside emailed WGAC/KLC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that WGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 October 2023, Woodside emailed WGAC advising of the proposed activity (Record of Consultation, reference 1.96) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that WGAC and its members may have within the EMBA, information on how WGAC would like to engage, and requested that WGAC provide information to other individuals as required. On 18 October 2023, Woodside emailed WGAC to identify the best contact details regarding consultation matters.
- On 18 October 2023, Woodside emailed WGAC seeking points of contact for consultation.
- On 18 October 2023, WGAC emailed Woodside with contact details.
- On 18 October 2023, Woodside emailed WGAC seeking to meet with the WGAC Board to provide information and seek feedback on Woodside activities.
- On 15 November 2023, Woodside emailed WGAC following up on previous correspondence and again requesting an opportunity to discuss current activities.
- On 23 November 2023, Woodside emailed WGAC offering a meet and greet to discuss potential funding of future arrangements for meetings and talk through the EP process.
- On 23 January 2024, Woodside emailed to inform WGAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with WGAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments received post 23 February 2024.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

	will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	
--	--	--

Daly River Port Keats Aboriginal Land Trust (DRPKALT)

DRPKALT holds land on behalf of the Traditional Owners from each estate in the Thamarrurr Region of the Northern Territory. Under Thamarrurr, all land-owning groups have traditional rights and responsibilities over their land.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DRPKALT for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside Sought direction on DRPKALT’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to DRPKALT. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans”
- Advised that DRPKALT can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with DRPKALT in December 2023. Woodside has addressed and responded to DRPKALT over 2 months, demonstrating a “reasonable” period of consultation.
- Woodside asked DRPKALT if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on DRPKALT functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 18 December 2023, Woodside emailed DRPKALT via Northern Land Council (NLC) advising of the proposed activity (Record of Consultation, reference 1.110) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that DRPKALT and its members may have within the EMBA, information on how DRPKALT would like to engage, and requested that DRPKALT provide information to other individuals as required.
- On 11 January 2024, Woodside phoned the Thamarrurr Development Corporation seeking to contact DRPKALT.
- On 11 January 2024, Woodside emailed the consultation information (sent on 18 December 2023 via NLC) directly to DRPKALT. Woodside advised it was happy to discuss the EP further on the phone or during a meeting in person while in the Northern Territory.
- On 12 January 2024, Woodside phoned Thamarrurr Development Corporation to follow up on its email however there was no answer.
- **(1)** On 12 January 2024, Woodside phoned the ranger team Manager, who confirmed they were the correct person to speak with regarding EPs. The Manager advised they had looked at the summary sheet for this EP and that they were not concerned as it did not go near DRPKALT Country.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
(1) DRPKALT confirmed it had reviewed the consultation information and did not have concerns due to the location of the activities which is not near their Country.	(1) Woodside accepts DRPKALT has no specific feedback on this activity. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	(1) Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with LAC as part of ongoing engagement (Section 7.10 of the EP).

Larrakia Development Corporation (LDC)

LDC is incorporated under ASIC and is led by the Traditional Owner group of Darwin, the Larrakia people.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Larrakia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on LDC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to LDC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that LDC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with LDC in December 2023. Woodside has addressed and responded to LDC over 2 months, demonstrating a "reasonable" period of consultation.
- Woodside asked LDC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on LDC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 15 November 2023, Woodside telephoned Larrakia Nation seeking the appropriate body to consult with. Woodside were directed to LDC.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 17 November 2023, LDC telephoned Woodside providing an email address for contact purposes.
- On 15 December 2023, Woodside emailed LDC advising of the proposed activity (Record of Consultation, reference 1.111) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that LDC and its members may have within the EMBA, information on how LDC would like to engage, and requested that LDC provide information to other individuals as required.
- On 24 January 2024, Woodside phoned LDC to follow up on the consultation material. LDC advised it had no real concerns but would have another look at the summary information sheet.
- **(1)** On 29 January 2024, LDC emailed Woodside to confirm that if the EMBA was as per the map, it was not LDC Country, and therefore activities would not affect LDC unless operations included Darwin and the Greater Darwin Region.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
(1) LDC advised that based on the location of EMBA, the proposed activities would not affect Larrakia.	(1) Woodside noted that the EMBA did not reach LDC Country and therefore they had no concerns. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	(1) Not required. Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with LDC as part of ongoing engagement (Section 7.10 of the EP).

Top End (Default) Aboriginal Corporation (TE(D)AC)

TE(D)AC is established under the Native Title Act 1993 by a large number of determinations to represent the Bardi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. For more information of the groups search the National Native Title Tribunal Register. (<http://www.nntt.gov.au/searchRegApps/NativeTitleRegisters/Pages/Search-National-Native-Title-Register.aspx>)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with TE(D)AC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on TE(D)AC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post-regulation 25 consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to TE(D)AC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that TE(D)AC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with TE(D)AC in December 2023, providing TE(D)AC with the opportunity to provide feedback over a 2-month period.
- Woodside asked TE(D)AC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by Regulation 25(1), throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on TE(D)AC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 25 October 2023, Woodside emailed TE(D)AC via NLC requesting an opportunity to meet, as Woodside was travelling to the Northern Territory.
- Between 12- 29 November 2023, Woodside and TE(D)AC via NLC exchanged emails in an attempt to schedule a meeting that would work best for both parties.
- On 18 December 2023, Woodside emailed TE(D)AC via NLC advising of the proposed activity (Record of Consultation, reference 1.112) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that TE(D)AC and its members may have within the EMBA, information on how TE(D)AC would like to engage and requested that TE(D)AC provide information to other individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 17 January 2024, Woodside emailed TE(D)AC via NLC advising of the extended response time. Woodside re-iterated that comments can be made throughout the life of the environment plan. Woodside offered to pay reasonable consultation fees to EMBA relevant Aboriginal Corporations.
- On 18 January 2024, TE(D)AC via NLC emailed Woodside confirming receipt of the email and advising they will be in touch soon. No response has been received.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or concerns to date in response to the information provided since consultation commenced in December 2023.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with TE(D)AC as part of ongoing engagement (Section 7.10 of the EP).

Native Title Representative Bodies

Yamatji Marlpa Aboriginal Corporation (YMAC)

YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with YMAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. YMAC has indicated that it will not provide substantive comment on EPs:

Sufficient Information:

- Woodside sought direction on YMAC’s preferred method of consultation. This resulted in meetings being coordinated at location of YMAC’s choosing, with YMAC nominated representatives. These meetings included Woodside presenting information in a format and style that was readily accessible and appropriate.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to YMAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.

Reasonable Period:

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

- Woodside commenced consultation with YMAC in August 2023. Woodside has addressed and responded to YMAC over 5 months, demonstrating a “reasonable period” of consultation.

Woodside asked YMAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YMAC functions, interests or activities.

Historical engagement:

- On 13 March 2023, Woodside emailed YMAC as to whether YMAC considers itself a ‘relevant person’ under regulation 25 of the Environment Regulations for the purposes of consultation on EPs and, if so, whether that relevance is limited to a facilitation function in its capacity as a representative of Traditional Owner groups/corporations that overlap or adjacent to the environment that may be affected (EMBA) of a particular activity.
- On 15 March 2023, Woodside emailed YMAC to request a response as to whether YMAC considers itself a ‘relevant person’ under relevant sections of the Environment Regulations for the purposes of consultation in EPs.
- **(1)** On 20 March 2023, YMAC replied to confirm that in its view it is a ‘relevant person’ under regulation 25(1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation. YMAC does not intend to provide substantive comment on the content of EPs.
- On 20 March 2023, Woodside emailed YMAC to thank it for its reply and to advise that that this assessment would be included in Woodside’s EPs.
- On 20 March 2023, YMAC emailed Woodside confirming that they agree to their advice being included in reporting (YMAC is the representative for NTGAC and Nanda Aboriginal Corporation and was the representative for Yinggarda Aboriginal Corporation until April 2023).
- **(2)** On 12 June 2023, YMAC emailed Woodside on behalf of itself and its clients. The email attached:
 - A proposal to fund in-house expertise to support consultations and administration of the consultation framework.
 - A draft consultation framework.
- On 12 June 2023, Woodside emailed YMAC, thanking them for the documents and informing them that Woodside would respond shortly.
- On 25 July 2023, Woodside emailed YMAC:
 - Agreeing in principle to the draft consultation framework and funding proposal but seeking further discussion on details.
 - Stating that Woodside is open to considering an industry funded position at YMAC to support the work they are facilitating.
 - Attaching Woodside’s Program for Ongoing Engagement with Traditional Custodians.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Seeking a meeting with YMAC in relation to the draft consultation framework at YMAC's earliest convenience.

Summary of information provided and record of consultation for this EP:

- On 23 October 2023, Woodside emailed YMAC advising of the proposed activity (Record of Consultation, reference 1.109) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that YMAC and its members may have within the EMBA, information on how YMAC would like to engage, and requested that YMAC provide information to other individuals as required.
- On 13 November 2023, Woodside emailed YMAC noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet.
- On 14 December 2023, Woodside emailed YMAC re-attaching the Program of Ongoing Consultation and advising that Woodside would like to progress negotiations on consultation frameworks with groups represented by YMAC. Woodside proposed the protocol would include (among other things):
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide the information groups requires to make free, prior and informed decisions about Woodside's EPs.
 - Agreement as to how groups will provide feedback and how that can best be represented in EPs.
 - An agreed schedule of rates for groups participation in consultation.
 - How to manage the outputs of the consultations.
- On 21 December 2023, Woodside emailed YMAC providing a list of upcoming activities as requested by YMAC.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) YMAC has provided feedback that in its view it is a 'relevant person' under regulation 25(1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation and does not intend to provide substantive comment on the content of EPs.</p> <p>(2) YMAC has provided feedback that it is seeking an industry funded position to support consultations for this and other activities. YMAC has provided a</p>	<p>(1) Woodside accepts YMAC's feedback that it is a relevant person only in relation to its facilitation and coordination function as a representative body. Woodside has consulted with YMAC in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation, and it has responded that it does not intend to provide substantive comment on the content of EPs.</p> <p>(2) Woodside has assessed the Program of Ongoing Engagement with Traditional Custodians will support ongoing consultation with YMAC and/or the groups it represents. This can address appropriate support for</p>	<p>(1) Not required.</p> <p>(2) Woodside will continue to engage with YMAC in relation to its request for an industry funded position and has put a proposal to YMAC in December 2023 for a Framework Agreement. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G).</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KLC functions, interests or activities.

Historical engagement:

- **(1)** On 16 February 2023, Woodside emailed KLC following a telephone discussion about EP consultations confirming that the KLC don't wish to be consulted on EPs but will facilitate consultation with PBC's that they support.
- **(2)** On 11 May 2023, Woodside spoke with KLC to discuss a workshop for spill response training for rangers that would include other industry members and Traditional Custodian groups. KLC stated they were very interested in this and would test with relevant groups to see availability.
- **(2)** On 23 June 2023, Woodside spoke to KLC at the NOPSEMA Summit. KLC confirmed they were still interested in the ranger workshop but would be unavailable for a couple of weeks.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed KLC advising of the proposed activity (Record of Consultation, reference 1.77 and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required.
- From 25 October to 2 November 2023, Woodside exchanged email correspondence with KLC wanting to get the best point of contact for Wunjina-Wunggurr AC, Wilinggin AC, Wunambal Gaambera AC and Dambimangari ACs and members for Woodside to provide updates and information regarding upcoming EP's.

Woodside has been engaging with KLC on behalf of its represented groups as described in relevant sections above.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) The KLC has previously stated they do not want to be consulted but will facilitate consultations with relevant PBCs.</p> <p>(2) The KLC has previously stated they are seeking support for regional ranger programs and oil spill response training.</p>	<p>(1) Woodside accepts that KLC has no feedback for this activity. KLC is the Native Title Representative Body for the Kimberley regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate representing the cultural rights of a Traditional Custodian Community but exist to assist native title claimants and holders. Woodside has consulted with KLC in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation.</p>	<p>(1) Existing controls considered sufficient, as described in Section 6 and 7.</p> <p>(2) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with KLC through ongoing engagement and continue engaging with KLC in relation to its request for a ranger workshop, as described in Section 7.10.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>The KLC was formed in 1978 by Kimberley Aboriginal people as a political land rights organisation and are now the peak Indigenous body in the Kimberley region working with Aboriginal people to secure native title, conduct conservation and land management activities and develop cultural business enterprises. Woodside has consulted with relevant PBCs, facilitated by KLC.</p> <p>(2) Woodside has an ongoing engagement with KLC to explore models for ranger spill response.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	
--	---	--

Northern Land Council (NLC)
 NLC is the Native Title Representative Body for the northern region of the Northern Territory – including the Tiwi Islands and Groote Eylandt. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NLC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

- Sufficient Information:**
- Woodside sought direction on NLC preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25(1) consultation.
 - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NLC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
 - Articulated planned and unplanned environmental risks and impacts, with proposed controls.

- Reasonable Period:**
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Woodside has addressed and responded to NLC over 3 months, demonstrating a “reasonable period” of consultation.
- Woodside asked NLC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by Regulation 25(1), throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NLC functions, interests or activities.

Summary of information provided and record of consultation for this EP:

- On 16 August 2023, Woodside and NLC exchanged email correspondence attempting to set up a time and date to meet.
- On 12 September 2023, Woodside and NLC exchanged correspondence planning the best suitable time for both parties to set up a virtual meeting.
- On 13 September 2023, Woodside had a teams meeting with NLC to speak generally about processes for informing relevant corporations through the NLC.
- On 13 September 2023, Woodside emailed NLC thanking them for the advice provided in the meeting earlier that day.
- On 15 November 2023, Woodside phoned NLC and left a message asking for its call to be returned.
- **(1)** On 18 December 2023, Woodside emailed NLC advising of the proposed activity (Record of Consultation, reference 1.113) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that NLC and its members may have within the EMBA, information on how NLC would like to engage, and requested that NLC provide information to other individuals as required.
- On 17 January 2024, Woodside sent a follow up email to NLC about the proposed activity. Woodside advised NLC that comments can be made over the life of the EP and offered to pay reasonable fees to consult with relevant corporations.
- On 18 January 2024, NLC emailed Woodside confirming receipt of Woodside’s previous email and advising the information provided will be reviewed.
- On 18 January 2024, Woodside emailed NLC thanking them for their response.
- On 6 February 2024, NLC emailed Woodside apologising for the delay in response and provided the best contact moving forward.
- **(1)** On 7 February 2024, Woodside emailed NLC thanking them for their response and reached out to the new contact. No response has been received.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
(1) No feedback, objections or claim received despite follow up in response to the information provided since consultation commenced in December 2023.	(1) Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will	(1) Existing controls considered sufficient, as described in Section 6 and 7. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will

	apply its Management of Change and Revision process (see Section 7.1.16).	continue to engage with LAC as part of ongoing engagement (Section 7.10 of the EP).
--	---	---

Self-identified First Nations Groups
Ngarluma Yindjibarndi Foundation Ltd (NYFL)
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NYFL for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p>Sufficient Information:</p> <ul style="list-style-type: none"> • Sought direction on NYFL’s preferred method of consultation. NYFL requested consultation material suitable for Traditional Custodian audience, which was developed and provided. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. • Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to NYFL. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Confirmed purpose of consultation and set out in detail what is being sought through consultation. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan. • Advised that NYFL can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). <p>Reasonable Period:</p> <ul style="list-style-type: none"> • Woodside published advertisements in national, state, and relevant local newspapers including, the North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023). • Woodside commenced consultation with NYFL in October 2023. Woodside has responded to NYFL over 5 months, demonstrating a “reasonable period” of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside asked NYFL it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NYFL functions, interests, or activities.

Historical engagement:

- **(1)** On 29 June 2023, in relation to other activities, NYFL confirmed they considered themselves a 'relevant person' and noted they were looking to agree on the next steps in agreeing appropriate consultation frameworks in relation to oil and gas activities.
- **(2)** On 10 July 2023, in relation to other activities, NYFL stated that they would not consult on any activities as they were waiting for the First Nations Sea Country Summit at which a national framework for consultation between industry and First Nations be resolved before they consulted on Environment Plans. NYFL stated that they did not agree with the facilitators record of the NOPSEMA Summit, particularly that there would be parallel ongoing consultation in relation to current EPs prior to the proposed National Summit of Indigenous Groups and Traditional Owners. The national Summit took place in November 2023.
- On 19 July 2023, Woodside emailed NYFL NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NYFL advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.
- On 26 July 2023, Woodside emailed NYFL Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- **(3)** On 26 July 2023, NYFL emailed Woodside in response to Woodside's planned Program of Ongoing Engagement with Traditional Custodians, noting it was a good start particularly with the inclusion of Traditional Owner feedback and indicating that assistance with resourcing and internal capacity would be required. NYFL noted their expectations about resourcing as a relevant person.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed NYFL regarding the proposed activity (Record of Consultation, reference 1.71) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NYFL and its members may have within the EMBA, information on how NYFL would like to engage, and requested that NYFL provide information to other individuals as required.
- **(4)** On 27 October 2023, NYFL provided NYFL's position statement regarding industry consultation which was a change of position from its advice on 29 June 2023. NYFL noted that it expects an updated proposal regarding consultation to be provided by Woodside. NYFL advised that it does not have the capacity to respond adequately to EPs or other consultation material sent by proponents nor did it feel the process results in a fair representation of Traditional Owner interests.
- On 3 November 2023, Woodside responded to NYFL stating that Woodside would respond regarding the concerns raised on in the 27 October email. Woodside offered to meet to discuss short term solutions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 7 November 2023, Woodside emailed NYFL offering to meet to discuss the issues raised, after the National Sea Country Summit taking place on 6-8 November. Woodside offered to meet the week of 20th November.
- **(4)** On 19 November 2023, NYFL emailed Woodside, stating that they were awaiting an updated consultation framework from Woodside and were not able to meet as they didn't have resources to apply to developing a framework but looked forward to providing feedback on an updated framework.
- On 20 November 2023, Woodside emailed NYFL acknowledging their email of 19 November 2023.
- On 4 December 2023, Woodside emailed NYFL:
 - seeking clarification about changes in recent correspondence, noting that NYFL had indicated on several occasions over a number of months that they wished to await outcomes of the First Nations Sea Country Summit in Darwin and would be involved in the development of the National First Nations Led Framework on consultation.
 - Woodside indicated that they had requested to meet face to face with NYFL in November as Woodside wanted to understand NYFL's expectations and discuss the outcomes of the Summit.
 - Woodside also wanted to discuss the strategic sponsorship funding request noting they required a business case to understand what NYFL was suggesting and how it would align with NYFL's strategic objectives.
- On 6 December 2023, NYFL emailed Woodside noting that:
 - At the meeting of 30 August 2023 there was discussion about challenges and proposed solutions to progress EP consultation.
 - **(4)** NYFL operate in a resource-constrained environment.
 - A proposal to NYFL responding to issues raised at the above meeting was expected.
 - **(2)** The Summit had been referred to as a potential useful resource for developing an updated framework.
 - **(3)** NYFL had agreed to progress the Program of Ongoing Engagement with Traditional Custodians.
 - Social investment and capacity building funding should remain separate to consultation regarding EPs and other environment and heritage matters.
- On 14 December 2023, Woodside emailed NYFL, following up on previous emails about consultation on EPs, acknowledging NYFL's resource constraints and limitations that can be allocated to consultation on the EPs. Woodside proposed/noted the following to support consultation activities that would provide NYFL with the ability to engage and provide input and feedback:
 - Woodside intends engaging a senior Ngarluma person in an advisory/liason capacity, which will include facilitating consultation with NYFL members in relation to EPs.
 - A consultation framework on EPs which includes:
 - Agreement between Woodside and NYFL to consult in a meaningful and genuine manner.
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to relevant Woodside EPs and the senior Ngarluma person's role in facilitating those consultations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Agreement as to how Woodside will provide NYFL with the information NYFL requires to make free, prior and informed decisions about Woodside's EPs.
 - Agreement as to how NYFL will provide feedback and how that can best represent NYFL's feedback to NOPSEMA or other relevant organisations.
 - An agreed schedule of rates for NYFL's participation in consultation regarding Woodside's EPs.
 - How to manage the outputs of consultation.
 - Agreement on an approach to minimise duplication of consultation activities conducted with NAC, Yindjibarndi and NYFL.
- An EP Consultation Working Group with representation from Woodside and NYFL.
 - Suggested further discussion on the proposal at the NYFL/Woodside Quarterly meeting on 19 December 2023.

NYFL is also consulted through its membership on the Karratha Community Liaison Group (KCLG) and the Quarterly Heritage Group.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) NYFL self-identified and advised Woodside they are a relevant person for activities.</p> <p>(2) NYFL wished to pause consultation on activities until after the First Nations National Summit was held and a framework for consultation developed. NYFL noted they were working with First Nations Organisations and representative Bodies to develop a framework for consultation. This has not yet been proposed to Woodside. The summit took place in Darwin in November 2023.</p> <p>(3) NYFL have noted they operate in a restrained resource environment.</p> <p>(4) NYFL have acknowledged they support an agreement to enable a process of consultation. They have previously indicated they were working with other organisations to develop a consultation framework, more recently they have indicated they are waiting on Woodside to put forward a proposal.</p>	<p>(1) Woodside has responded to NYFL's self-identification and consulted with them as a relevant person. NYFL was created to act as Trustee for the Northwest Shelf Agreement 1998. NYFL's membership is made up of Ngarluma people and Yindjibarndi people, membership is not open to any person who is not accepted as Ngarluma or Yindjibarndi. Woodside has also consulted with Ngarluma and Yindjibarndi Aboriginal Corporations individually. Ngarluma and Yindjibarndi Aboriginal Corporations were appointed by the Federal Court, at the request of the Ngarluma and Yindjibarndi common law native title holders as PBCs to represent the communal interests of the Ngarluma and Yindjibarndi people respectively. Ngarluma and Yindjibarndi Aboriginal Corporations are representative of all Ngarluma and Yindjibarndi people regardless of membership.</p> <p>(2) Woodside did not consider the proposal that consultation be paused until the proposed First Nations National Summit was reasonable. Woodside continued to offer to meet to progress discussions with NYFL, a meeting was held on 30 August 2023 and further meetings were proposed by Woodside over the following months during September to December but were not taken up. Separate from</p>	<p>(1) NYFL has been consulted with in accordance with the methodology described in Section 5 of the EP.</p> <p>(2) Not required.</p> <p>(3) The proposed Framework Agreement will address appropriate NYFL resourcing.</p> <p>(4) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes continued engagement regarding the proposed Framework Agreement which would be applied to ongoing consultation for this activity.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>consultation under regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for consultation, however, notes that this is not required to undertake and/or complete consultation while preparing this EP. The framework could be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff. Woodside has an existing engagement framework in place with NYFL via the Quarterly Heritage Group which enables regular communication about Woodside activities.</p> <p>(3) Woodside assesses that the proposed Framework Agreement would be an effective mechanism to address resourcing for ongoing consultation. Woodside supports reasonable requests for resourcing.</p> <p>(4) NYFL had on several occasions informed Woodside they were working with other organisations to develop a consultation framework which would inform both Traditional Owners and Industry. Recently NYFL indicated that they are waiting on Woodside to put forward a proposal. Woodside have put the framework of a proposal to NYFL and expect discussions with NYFL to settle the proposal in early 2024.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>

Local government and community representative groups or organisations

Shire of Exmouth

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Exmouth for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Exmouth on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Exmouth with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed Shire of Exmouth advising of the proposed activity (Record of Consultation, reference 1.18) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Exmouth following up on the proposed activity (Record of Consultation, reference 2.1).

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shire of Ashburton

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Ashburton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers on 13 September 2023 advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Ashburton on 15 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Shire of Ashburton over a 5-month period.

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside emailed Shire of Ashburton advising of the proposed activity (Record of Consultation, reference 1.16) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 2 October 2023, Shire of Ashburton responded thanking Woodside for its correspondence and noting its support of the significant contribution the oil and gas sector makes to the community. The Shire asked for consideration of the following comments:
 - **(1)** The Shire confirmed it had no objections to the proposed activities.
 - **(2)** The Shire expects that Woodside will identify, manage and mitigate all possible impacts and risks in line with relevant regulatory frameworks.
 - **(3)** The Aboriginal Cultural Heritage Inquiry System (ACHIS) should be consulted to ensure site of significance are not impacted without consents.
 - **(4)** The Shire requires Woodside to brief the Shire's Local and District Emergency Management Committee's on its planned responses to such events before any activities commence.
 - **(5)** Asks that Woodside has communicated with appropriate emergency management agencies at either/or National, State, District and Local levels on potential hazards and risks around the activity; collaboration and/or cooperation on risk mitigation; considered impacted areas response capacity and capability and sustainability of response activities and escalation triggers.
 - **(6)** The Shire anticipates that Woodside has undertaken their own emergency management planning to mitigate risk and recover from a risk related incident, has engaged with external emergency management agencies to ensure emergency management plans are aligned with outcomes to respond and/or recovery from the incident.
 - **(7)** The Shire anticipates that Woodside has engaged with the community regarding what may happen in areas that are affected by the proposed activities.
 - The Shire proposes that Woodside consider the Shire-operated Pilbara Regional Waste Management Facility (PRWMF) for its decommissioning, recycling and waste disposal purposes.
 - **(8)** The Shire appreciates the opportunity to comment on the proposed activities and requests that Woodside provide the Shire with further updates as the proposal progresses.
- On 6 November 2023, Woodside responded thanking Shire of Ashburton for its feedback and noted:
 - That Woodside is required to manage environmental impacts and risks to the environment that may be affected (EMBA) by its proposed activities to As Low As Reasonably Practicable (ALARP) and to an acceptable level, as required by the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations), through the implementation of the EP. Woodside's proposed EPs will be submitted to the National Offshore Petroleum Safety Environmental Management Authority (NOPSEMA) for assessment and acceptance.
 - Woodside routinely utilises the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development process and includes the results of these inquiry system searches as an appendix to each EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside was looking forward to presenting to the Shire at its Local and District Emergency Management Committee (LEMC) on 21 November 2023 on its approach to managing a hydrocarbon release in the highly unlikely event this occurs. Woodside confirmed it would welcome questions regarding this EP during the presentation. Woodside also sought to clarify the Shire's request to provide a briefing prior to activities commencing as this would potentially mean Woodside is providing frequent briefings on the same issue.
- Woodside has an Oil Pollution First Strike Plan in place for all EPs which details potential impacts, notifications and response mitigations that may be executed to manage an emergency event.
- In the course of developing EPs, Woodside develops oil spill preparedness and response positions tailor for individual projects, and consults with the relevant external emergency management agencies.
- Woodside consults relevant persons in the course of preparing an EP in accordance with regulation 11A (now regulation 25)of the Environment Regulations, and as per Woodside's ongoing consultation approach, feedback and comments received from relevant persons continue to be assessed and responded to, as required, throughout the life of an EP.
- Woodside notes the Shire's interest in ongoing local content opportunities and aims to work with local business through employment and contracting opportunities, where practical, to create and building community capacity and capability.
- On 14 November 2023, Shire of Ashburton responded and, regarding Woodside's query seeking clarification on LEMC briefing requirements, confirmed:
 - **(9)** Woodside is not required to give a briefing on its response capability every time it undertakes an activity that has a risk of a hydrocarbon release.
 - **(10)** It is proposed that Woodside, when operating in an area, provides a briefing that covers its program of activities over a period of time, which can be determined by Woodside's own assessment of the need and liaising with the relevant LEMC/DEMC.
 - **(11)** The word briefing should not be confused with advising stakeholders of any assessed high-risk activity where it is appropriate to inform those who may be impacted or involved in a response or recovery process.
- On 21 November 2023, Woodside presented at the Shire of Ashburton LEMC meeting and provided:
 - An overview of proposed activities relevant to the Shire including this EP.
 - An outline of the consultation approach and explanation of the EMBA as a modelling process of the broadest extent a diesel could spread based on a number of conditions.
 - Details of the oil spill response approach in the highly unlikely event of a hydrocarbon spill.
 - Woodside's key steps when activating an oil spill response plan.
 - Shire of Ashburton thanked Woodside for presenting to the committee and no questions or concerns were raised.
- On 22 November 2023, Woodside responded thanking the Shire for its email from 14 November 2023 and confirmed:
 - It noted the Shire's advice that it was not required to provide a briefing on its response capability every time it undertakes an activity that has a risk of a hydrocarbon release.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> - It accepted the Shire’s proposal to provide briefings that cover its program of activities over a period of time, as determined by Woodside’s own assessment of need and in liaison with the relevant LEMC. - It will provide notifications to relevant stakeholders if required as per Woodside’s oil spill response arrangements. 		
Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) The Shire of Ashburton advised it had no objections to the proposed activity.</p> <p>The Shire also noted a number of expectations around:</p> <p>(2) Identifying, managing and mitigating all possible impacts and risks.</p> <p>(3) Consulting the ACHIS.</p> <p>(4) Briefing the Shire’s Local and District Emergency Management Committee before activities commence.</p> <p>(5) Ensuring Woodside is communicating with appropriate national and state emergency management agencies.</p> <p>(6) Assuming Woodside has emergency management planning in place.</p> <p>(7) Woodside has engaged with the community.</p> <p>(8) Provide updates as activities progress.</p> <p>(9) Amended its advice regarding the timing of briefings to the LEMC.</p> <p>(10) Proposed Woodside give briefings that cover its program of activities over a period of time.</p> <p>(11) Clarified the need for stakeholders to be advised of any assessed high-risk activity.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted the Shire of Ashburton had no objections to the activity.</p> <p>(2) Woodside confirmed it was required to manage environmental impacts and risks to the environment by the proposed activities to As Low As Reasonably Practicable (ALARP), as per the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations).</p> <p>(3) Woodside advised it routinely utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development.</p> <p>(4) Woodside noted it was looking forward to presenting to the Shire of Ashburton’s LEMC meeting on 21 November 2023 regarding its approach to managing a hydrocarbon release in the highly unlikely event this occurred, and would be happy to take questions regarding this EP during the presentation. On 21 November 2023, Woodside presented at the Shire of Ashburton’s LEMC on oil spill responses.</p> <p>(5) Woodside confirmed it had an Oil Pollution First Strike Plan in place for this EP which detailed potential impacts, notifications and response mitigations that may be executed to manage an emergency event.</p> <p>(6) Woodside confirmed that in the course of developing EPs, it developed oil spill preparedness and response positions tailored for individual projects. - Woodside has provided Shire of East Pilbara with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 02 October 2023, Woodside emailed Shire of East Pilbara advising of the proposed activity (Record of Consultation, reference 1.52) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 24 October 2023, Woodside sent a reminder email to Shire of East Pilbara following up on the proposed activity (Record of Consultation, reference 2.8).

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shire of Broome

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Broome for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Broome on 18 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Shire of Broome over a 5-month period.

Summary of information provided and record of consultation:

- On 18 September 2023, Woodside emailed Shire of Broome advising of the proposed activity (Record of Consultation, reference 1.21) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 22 September 2023, Shire of Broome responded to Woodside and:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (1) Confirmed it had no comment on the proposal due to the significant distance from Broome.
- (2) Noted it looked forward to receiving referrals related to proposals closer to Broome.
- On 5 October 2023, Woodside responding thanking Shire of Broome for its email. Woodside noted Shire of Broome had no comment on the environment plan and confirmed it would continue to consult the Shire on activities closer to Broome.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>Shire of Broome advised:</p> <p>(1) Due to the distance from Broome, it had no comment on the proposal.</p> <p>(2) It looked forward to receiving referrals related to proposals closer to Broome.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted the Shire of Broome had no comments on the proposal.</p> <p>(2) Woodside confirmed it would continue to consult Shire of Broome on proposals closer to Broome.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1, 2) Not required.</p> <p>No additional measures or controls are required.</p>

Shire of Shark Bay

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Shark Bay for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Shark Bay on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Shire of Shark Bay over a 5-month period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed Shire of Shark Bay advising of the proposed activity (Record of Consultation, reference 1.28) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Shark Bay following up on the proposed activities (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 October 2023, Woodside met with the Shire of Shark Bay during a community information session in Denham. The discussion with the Shire included:
 - Woodside explaining the purpose of consultation for EPs.
 - Woodside noting that consultation is based on the EMBA and no activities are planned in Shark Bay.
 - Woodside providing an overview of activities including this EP.
 - The Shire advising it would provide a list of other potentially relevant persons to consult.
- On 18 October 2023, the Shire of Shark Bay emailed Woodside thanking it for the meeting. The Shire:
 - **(1)** Recommended a list of contacts in Shark Bay who might be interested in providing feedback on the proposed activity and expressed an interest in setting up a meeting with interested contacts in the future. Woodside has sent consultation information to these contacts.
 - **(2)** Provided advice on the best consultation channels for the broader Shark Bay community.
 - **(3)** Advised that as a local government, Shire of Shark Bay could not post Woodside content on its website but could share graphics containing consultation information on its Facebook page on behalf of Woodside.
- On 20 October 2023, Woodside sent an email thanking Shire of Shark Bay for the meeting and:
 - Confirmed it would consult the stakeholders recommended by the Shire.
 - Thanked the Shire for its advice on the best consultation methods for reaching the broader community.
 - Provided information, including links to the Consultation Information Sheet, for this EP and a separate Woodside EP which the Shire had shown interest in.
 - Explained the environment that may be affected (EMBA) and how it affected the Shire of Shark Bay for this EP and the separate Woodside EP.
 - Confirmed Woodside looked forward to meeting with the Shire in the future.
- On 31 October 2023, Woodside sent an email to three Shire of Shark Bay representatives providing another overview of the proposed activity (Record of Consultation, reference 1.60).
- On 15 December 2023, Woodside sent a reminder email to three Shire of Shark Bay representatives following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

<p>Shire of Shark Bay:</p> <p>(1) Provided Woodside with a list of contacts who may be interested in providing feedback on the activities proposed in this EP.</p> <p>(2) Provided advice on consultation channels for Shark Bay.</p> <p>(3) Advised it could share Woodside consultation graphics on its Facebook page.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside assessed the Shire of Shark Bay's feedback regarding potentially relevant persons for this EP and provided consultation information to those stakeholders.</p> <p>(2) Woodside noted Shire of Shark Bay's advice for the best consultation channels for the broader community and will action this approach for consultation on future EPs where relevant.</p> <p>(3) Woodside noted the Shire of Shark Bay's advice regarding sharing consultation information on Facebook on behalf of Woodside.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1) Woodside updated its Assessment of Relevance (see Appendix F, Table 1) to include the stakeholders Shire of Shark Bay identified as potentially relevant.</p> <p>(2, 3) Not required.</p> <p>No additional measures or controls are required.</p>
--	---	--

Shire of Christmas Island

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Christmas Island for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Christmas Island on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Shire of Christmas Island over a 5-month period.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed Shire of Christmas Island advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 16 October 2023, Woodside sent a reminder email to Shire of Christmas Island following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 25 October 2023, Woodside emailed Shire of Christmas Island to provide details for its contact for First Nations Peoples and seek contact details for the Christmas Island Malay Peoples.
- On 2 November 2023, Woodside sent a follow-up email regarding contacts for the Christmas Island Malay Peoples and explaining its intention to provide an overview of Woodside Energy and its projects to the community and broader Shire.
- On 3 November 2023, Woodside had a phone call with Shire of Christmas Island to discuss consultation opportunities. During the discussion:
 - Woodside provided an overview of role responsibilities and points of contact with First Nations communities and Corporations in WA and NT.
 - Woodside discussed the recent changes to consultation and engagement as a result of the Santos Tiwi Island matter.
 - The Shire provided history and context about the island and Shire roles.
 - **(1)** The Shire noted it was unaware of prior correspondence regarding this EP.
 - Woodside explained the process for determining the EMBA for this EP and confirmed why Christmas Island had been consulted.
 - **(2)** The Shire noted it appreciated and supported Woodside's methodology for identifying and including First Nations stakeholder input.
 - **(3)** The Shire identified other Malay and Chinese contacts that Woodside should consider including in future engagements where relevant.
 - **(4)** The Shire welcomed the opportunity for a potential meeting with Woodside on Christmas Island and provided information about flight availability.
- On 3 November 2023, Woodside sent an email in follow-up to the phone call. Woodside noted:
 - It wanted to ensure Shire of Christmas Island has an opportunity to hear about Woodside Energy projects in the region and to take feedback.
 - Potential opportunities to meet with Shire of Christmas Island during November or December.
- On 3 November 2023, Shire of Christmas Island responded thanking Woodside for its email and:
 - **(4)** Provided information about flight availability to Christmas Island during December for a potential meeting.
 - **(1)** Advised it had checked previous correspondence between Woodside and Christmas Island and noted a series of emails for licenced fishers about a separate Woodside drilling project earlier in 2023.
- On 6 November 2023, Woodside responded thanking Shire of Christmas Island for its email and advised it was also looking to organise a consultation session with Cocos (Keeling) Islands.
- On 6 November 2023, the Shire of Christmas Island responded and confirmed flights were available from Christmas Island to Cocos (Keeling) Islands.
- On 15 December 2023, Woodside emailed Shire of Christmas Island Fisheries Management Committee (FMC) advising of the proposed activity (Record of Consultation, reference 1.103) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 9 January 2024, Woodside sent a reminder email to the FMC following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.
- On 19 January 2024, the FMC responded thanking Woodside for the opportunity to provide feedback. The FMC:
 - **(5)** Stated its experience of emergency communications in the external Indian Ocean Territories (IOTs) during times of widespread natural disasters that impacted the WA coastline and IOTs simultaneously was less than satisfactory, and advised it would like to submit to Woodside that dedicated communication, care and mitigation plans needed to be committed to for Christmas Island and the neighbouring Cocos (Keeling) Islands.
 - **(6)** Noted that while the mainland had a larger population and potentially greater economic impact from a significant failure at the facility, the livelihoods of residents in the external territories also needed careful consideration, and the recent 2022 declaration of the Christmas Island and Cocos (Keeling) Islands Marine Parks further underscored the importance of addressing the unique concerns and circumstances of the external territories. The FMC further stated it would welcome a dedicated emergency plan from Woodside for the IOT territories of Christmas Island and Cocos (Keeling) Islands and would like to underline the dramatic effect on life on the islands in the event their waters sustained effects from an unwanted event at the Woodside facilities. The FMC asked that mitigation plans be discussed and workshopped with relevant stakeholders in the Commonwealth, local government and emergency services in the IOTs to ensure a planned response was on file.
- On 5 February 2024, Woodside phoned the Shire of Christmas Island following up on discussions regarding a potential meeting. The Shire advised that it had provided written feedback via its FMC. Woodside thanked the Shire and confirmed it would respond to the Shire via its FMC.
- On 12 February 2024, Woodside responded thanking the FMC for its correspondence and for seeking clarification on oil spill responses. Woodside:
 - Confirmed its process for oil spill response planning included the following steps:
 - Assess the credible spill risk for the activity.
 - Establish areas that may be contacted by an oil spill based on the outputs of computer simulation modelling, which use credible spill information together with weather and oceanographic data.
 - Select appropriate oil spill response clean-up methods for the credible spill event.
 - Develop an activity-specific Oil Pollution First Strike Plan to set out the steps to take if an oil spill does occur.
 - Regularly test, train and assure the First Strike Plan.
 - Advised that for Ngujima-Yin operations, the computer oil spill simulation modelling predicted a minimum contact time at Christmas Island of 44 days in the event of a highly unlikely oil spill. This was considered to be a significant lead time to mount appropriate spill response measures.
 - Noted that while oil spill response within the IOTs fell under the jurisdiction of AMSA, Woodside would make resources available to the response effort via oil spill response contractors and that Woodside maintained an equipment stockpile and trained staff on the mainland that could be deployed if required during a spill event.
 - Advised that Woodside, together with other Australian energy companies, had developed a suite of site-specific 'tactical response plans' (TRPs) which were shared across the industry. Woodside noted:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The plans provided information on suitable clean-up equipment required closest stockpiles, local infrastructure, specific sensitivities, and other pertinent information to improve efficiency during a spill.
 - As a result of FMC's feedback, Woodside had sought advice from an oil spill contractor on the development of a TRP appropriate for Christmas Island and understood a request had also been made for the contractor to develop a TRP for Cocos (Keeling) Islands.
 - Woodside would provide an update to FMC once it had received information from the oil spill contractor on an appropriate way forward for the Christmas Island TRP and may seek inputs for the TRP's development.
- Advised that further to the proposed TRPs for Christmas and Cocos (Keeling) Islands, it could add a relevant contact for Christmas and Cocos (Keeling) Islands into the notifications table within the First Strike Plan for this activity, which would ensure timely notifications were made to relevant parties if a spill event occurred that risked contacting Christmas and Cocos (Keeling) Islands. Woodside asked that if this would be considered useful, the FMC provide relevant contact information.
 - Sought additional advice on whether further consultation with Christmas Island's Malay community was requested. Woodside noted that a member of its First Nations Engagement team had received advice that the point of contact for the Malay community and the FMC were the same.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>Shire of Christmas Island:</p> <p>(1) Noted it was unaware of Woodside consultation correspondence related to this EP prior to the phone call from Woodside on 3 November 2023, but had seen a series of emails for fishery licence holders regarding a separate Woodside EP earlier in 2023.</p> <p>(2) Noted it appreciated and supported Woodside's methodology for identifying and including First Nations stakeholder input.</p> <p>(3) Identified Malay and Chinese communities on Christmas Island that Woodside should consider engaging for future EPs.</p> <p>(4) Welcomed the opportunity for a potential meeting with Woodside and provided information about flight schedules and bookings.</p> <p>(5) The Shire's Fishing Management Committee (FMC) provided feedback and described its</p>	<p>(1) Woodside noted Shire of Christmas Island's feedback that it had not seen the email correspondence regarding this EP and that the Shire appreciated Woodside's phone call regarding the proposed activity and welcomed the opportunity to meet in-person to discuss Woodside Energy projects.</p> <p>(2) Woodside noted the Shire's support for its methodology and efforts in identifying and seeking input from First Nations stakeholders.</p> <p>(3) Woodside noted the Shire's advice regarding Malay and Chinese communities on Christmas Island who may be interested in providing feedback on Woodside activities in the future and would consider the additional stakeholders during relevancy assessments for future EPs. As part of ongoing consultation, Woodside would also continue to consult following acceptance of this EP.</p> <p>(4) Woodside confirmed it would like to ensure Christmas Island had an opportunity to hear about Woodside Energy projects and</p>	<p>(1, 2) Not required.</p> <p>(3) Woodside will consider the relevancy of additional stakeholders identified by the Shire of Christmas Island for future EPs.</p> <p>(4) As identified in Section 7.10 of this EP, Woodside will continue to consult following acceptance of the EP, as requirement by the implementation strategy as set out regulation 22(15) of the Environment Regulations.</p> <p>(5) Woodside's process for identifying potential response options for hydrocarbon release scenarios is described in the OSPRMA (Appendix H).</p> <p>(6) At FMC's discretion, Woodside will include a relevant Christmas Island contact in the notification table for the Oil Pollution First Strike Plan for this activity (Appendix I).</p> <p>No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>experience of emergency communications during natural disasters as less than satisfactory and advised it would like to submit to Woodside that dedicated communication, care and mitigation plans needed to be committed to for Christmas and Cocos (Keeling) Islands. While feedback has been received, there were no objections or claims.</p> <p>(6) The FMC also noted that the livelihoods of residents in the external territories needed careful and unique consideration and stated it would welcome a dedicated emergency plan from Woodside for Christmas and Cocos (Keeling) Islands. While feedback has been received, there were no objections or claims.</p>	<p>would work towards dates in late November or December for a potential meeting.</p> <p>(5) Woodside assessed the feedback from the FMC and provided a explanation of its process for oil spill response planning. Woodside advised that in the highly unlikely event of an oil spill, simulation modelling predicted a minimum contact time at Christmas Island of 44 days, which was considered to be significant lead time to mount appropriate spill response measures. Woodside noted that while oil spill response in the IOTs fell under the jurisdiction of AMSA, Woodside would make resources available to the response effort. Woodside confirmed it maintained an equipment stockpile and trained staff on the mainland that could be deployed if required.</p> <p>(6) As a result of FMC's feedback, Woodside sought advice from an oil spill response contractor on the development of a TRP for Christmas Island, and understands a TRP is also being developed for Cocos (Keeling) Islands. Woodside advised it would provide an update to the FMC once it received information on an appropriate way forward for the Christmas Island TRP. Woodside also advised it could include relevant contacts in its First Strike Plan, and for Christmas Island to provide contact information if this would be useful.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>

City of Greater Geraldton

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Greater Geraldton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to City of Greater Geraldton based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided City of Greater Geraldton with the opportunity to provide feedback over 5-month period.

Summary of information provided and record of consultation:

- On 19 September 2023, Woodside emailed City of Greater Geraldton advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to City of Greater Geraldton following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shire of Augusta Margaret River

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Augusta Margaret River for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Augusta Margaret River on 21 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up seeking feedback on the proposed activities.
- Woodside has provided Shire of Augusta Margaret River with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Shire of Augusta Margaret River advising of the proposed activity (Record of Consultation, reference 1.35) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Augusta Margaret River following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shire of Chapman Valley

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Chapman Valley for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.

- Woodside has addressed and responded to Shire of Cocos (Keeling) Islands over 5-month period.

Summary of information provided and record of consultation:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 15 September 2023, Woodside telephoned the Shire of Cocos (Keeling) Islands seeking details for the best person to contact regarding consultation with the Cocos Island Malays. Woodside was advised the Shire CEO was the best person to speak to, however they were on leave.
- On 21 September 2023, Woodside emailed Shire of Cocos (Keeling) Islands advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 4 October 2023, Woodside telephoned Shire of Cocos (Keeling) Islands following up on the 15 September 2023 phone call regarding the Cocos Malays.
- On 4 October 2023, Woodside emailed the Shire CEO to provide information on this EP and to request feedback on interests/concerns.
- On 18 October 2023, Woodside sent a reminder email to Shire of Cocos (Keeling) Islands following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.
- On 24 October 2023, Woodside sent a follow-up email and reconfirmed its offer to conduct a consultation meeting or to provide additional project information.
- On 3 November 2023, Woodside telephoned Shire of Cocos (Keeling) Islands to confirm if the Cocos Island Malays considered themselves relevant persons as defined by NOPSEMA. The Shire CEO advised:
 - **(1)** The Commonwealth does not currently recognise the Cocos Malays as First Nations peoples, but the Shire CEO would speak to the Shire President and respond to Woodside via email. Woodside advised that if Cocos Malays did not wish to be consulted for this EP, they were welcome to contact Woodside in the future.
- **(2)** On 6 November 2023, the Shire emailed Woodside to confirm that as mapping showed the Cocos (Keeling) Islands may, while highly unlikely, be impacted by hydrocarbon release, it would like to have a roundtable discussion – preferably on-site but at a minimum online - with the Cocos Malays, Parks Australia, and the council, to fully understand the EMBA.
- On 6 November 2023, Woodside emailed the Shire and acknowledged the request for a meeting. Woodside enquired about availability and preferred dates/times over the following weeks and confirmed it would discuss logistics for the meeting, with a face-to-face meeting preferred if possible.
- On 7 November 2023, Woodside emailed the Shire noting it had spoken to the travel advisor on the island and proposing potential meeting dates in late November or early December, or February if the 2023 dates did not align with the Shire's schedule.
- On 14 November 2023, Woodside emailed to follow up on potential dates for a meeting.
- On 5 February 2024, Woodside telephoned Shire of Cocos (Keeling) Islands to organise arrangements for an online meeting on 15 February 2024.
- On 15 February 2024, Woodside met with Shire of Cocos (Keeling) Islands via MS Teams. Woodside provided information about three EPs including this one and described how the EMBA was developed and why it extended to the Cocos (Keeling) Islands. During the meeting:
 - **(3)** The Shire noted it appreciated Woodside's consultation and the explanation of the EMBA, and had no comments or concerns specific to this EP.
 - The Shire advised many groups on the island had strong interests in environmental matters and suggested a further meeting with additional Shire representatives regarding Woodside activities. Woodside and the Shire agreed to arrange another meeting to address this.
 - Woodside advised that it welcomed feedback throughout the life of an EP.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) The Shire advised that the Commonwealth did not recognise the Cocos Malays as First Nations peoples, but the Shire would advise if the Cocos Malays wished to be consulted for this EP.</p> <p>(2) The Shire confirmed that while highly unlikely, the Cocos Island could be impacted by a hydrocarbon release, it would like a consultation meeting with Woodside.</p> <p>(3) Following a Teams meeting between Woodside and the Shire, the Shire thanked Woodside for its explanation of the EMBA and how it related to the Shire. The Shire had no specific comments or concerns on this EP.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside noted the Shire's advice that the Commonwealth did not recognise the Cocos Malays as First Nations peoples, but advised that should the Cocos Malays consider themselves to be relevant persons as defined by NOPSEMA, they were welcome to contact Woodside in the future.</p> <p>(2) Woodside acknowledged the Shire's request for a meeting. Woodside proposed potential meeting dates in November and December, and advised the meeting could be pushed back until February if the 2023 dates didn't align. The meeting took place on 15 February 2024.</p> <p>(3) Woodside noted the Shire had no specific comments or concerns regarding this EP.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).</p>	<p>(1, 2, 3) Woodside engages in ongoing consultation with relevant persons as described in Section 7.10 of the EP.</p> <p>No additional measures or controls are required.</p>

Shire of Coorow

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Coorow for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Coorow on 21 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Coorow with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Shire of Coorow advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Coorow following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shire of Denmark

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Denmark for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Denmark on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided Shire of Denmark with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Shire of Denmark advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Denmark following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Augusta Chamber of Commerce and Industry

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Augusta Chamber of Commerce and Industry for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Augusta Chamber of Commerce and Industry on 27 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Augusta Chamber of Commerce and Industry with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 27 September 2023, Woodside emailed Augusta Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Augusta Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Christmas Island Business Association

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Christmas Island Business Association for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Christmas Island Business Association on 15 December 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Christmas Island Business Association with the opportunity to provide feedback over a 2-month period.

Summary of information provided and record of consultation:

- On 15 December 2023, Woodside emailed Christmas Island Business Association advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Christmas Island Business Association following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Indian Ocean Territories Regional Development Organisation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Indian Ocean Territories Regional Development Organisation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Indian Ocean Territories Regional Development Organisation on 15 December 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Indian Ocean Territories Regional Development Organisation with the opportunity to provide feedback over a 2-month period.

Summary of information provided and record of consultation:

- On 15 December 2023, Woodside emailed Indian Ocean Territories Regional Development Organisation advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Indian Ocean Territories Regional Development Organisation following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Research institutes and local conservation groups or organisations

Cape Conservation Group (CCG)

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Cape Conservation Group (CCG) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Cape Conservation Group on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Cape Conservation Group with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Cape Conservation Group advising of the proposed activity (Record of Consultation, reference 1.35) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Cape Conservation Group following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Protect Ningaloo

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Protect Ningaloo for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Protect Ningaloo on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Protect Ningaloo with the opportunity to provide feedback over a 5-month period.

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Protect Ningaloo advising of the proposed activity (Record of Consultation, reference 1.35) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Protect Ningaloo following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Table 3: Engagement Report with Persons or Organisations Assessed as Not Relevant

Commonwealth, Western Australia and Northern Territory Government Departments of Agencies – Marine
Department of Territory Families, Housing and Communities (TFHC) – Heritage Branch
<p>Summary of information provided and record of consultation:</p> <ul style="list-style-type: none"> • On 15 December 2023, Woodside emailed TFHC – Heritage Branch advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 9 January 2024, Woodside sent a reminder email to TFHC – Heritage Branch following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside’s website. • (1) On 10 January 2024, TFHC – Heritage Branch emailed Woodside asking for clarification on whether any works would occur within Northern Territory waters. • On 12 January 2024, Woodside responded thanking TFHC – Heritage Branch for its email. Woodside: <ul style="list-style-type: none"> – Advised that the Operational Area for the EP was near Exmouth in Western Australia and therefore no planned activities would occur in NT waters. – Following changes to Commonwealth EP consultation, Woodside is now consulting persons or organisations in the EMBA. The EMBA for this EP extends into NT waters. – Provided a close-up map showing where the EMBA extends into NT waters. • On 15 January 2024, TFHC – Heritage Branch responded thanking Woodside for highlighting where the EMBA extends into NT waters. TFHC – Heritage Branch: <ul style="list-style-type: none"> – (2) Noted that Woodside’s report made no comment on the potential impact of hydrocarbon release for underwater cultural heritage (UCH) and that it appeared the impact would only affect marine life. If correct, TFHC – Heritage Branch had no further comments at this time. • On 7 February 2024, Woodside responded thanking TFHC – Heritage Branch for its response regarding the potential impact of hydrocarbon release on UCH. Woodside advised: <ul style="list-style-type: none"> – In the highly unlikely event of a hydrocarbon release, Woodside’s Oil Pollution First Strike Plan included a requirement to contact relevant persons throughout the response period. – Woodside has an Unexpected Finds Procedure within the EP which describes the actions to take should potential UCH be discovered during activities. This included engaging a maritime archaeologist to assess the potential UCH and, if confirmed, informing relevant stakeholders such as Traditional Custodians, DCCEEW and the WA Museum.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside is aware there are numerous known shipwrecks within the EMBA for the EP, including both protected and more recent shipwrecks. However, the EMBA does not overlap any shipwrecks currently listed on the Australian National Shipwreck Database within NT waters, with the closest shipwreck in NT waters identified as the Editha, 98km to the south-east of the EMBA.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) TFHC – Heritage Branch asked for clarification on whether any works would occur in NT waters.</p> <p>(2) TFHC – Heritage Branch noted that if there were no potential impacts of a hydrocarbon release on UCH, it had no further comments at this time.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside confirmed to TFCH – Heritage Branch that there were no planned activities in NT waters, however it had been consulted because the EMBA for the EP extends into NT waters.</p> <p>(2) Woodside advised the EMBA for the EP did not overlap any known shipwrecks within NT waters. In the unlikely event of a hydrocarbon release, Woodside’s Oil Pollution First Strike Plan included a requirement to notify relevant persons, and Woodside had an Unexpected Finds Procedure which describes the actions to take should potential UCH be discovered during activities.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>(1) Not required.</p> <p>(2) The potential environmental impacts of planned and unplanned activities are assessed in Section 6.6, 6.7 and 6.8 of this EP. Woodside’s Unexpected Finds Procedure for Underwater Cultural Heritage is described in Section 7.5. No additional measures or controls are required.</p>

Commonwealth Commercial fisheries and representative bodies

Australian Southern Bluefin Tuna Industry Association (ASBTIA)

Summary of information provided and record of consultation:

- On 03 October 2023, Woodside emailed ASBTIA advising of the proposed activity (Record of Consultation, reference 1.56) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 01 November 2023, Woodside sent a reminder email to ASBTIA following up on the proposed activity (Record of Consultation, reference 2.13) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA and Tuna Australia. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. No additional measures or controls are required.

Western Australian Commercial fisheries and representative bodies

Pilbara Trap Managed Fishery

Summary of information provided and record of consultation:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed Pilbara Line Fishery advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required for the Pilbara Line Fishery.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		No additional measures or controls are required.
Northern Territory commercial fisheries and representative bodies		
Northern Territory Seafood Council (NTSC)		
Summary of information provided and record of consultation:		
<ul style="list-style-type: none"> On 15 December 2023, Woodside emailed NTSC advising of the proposed activity (Record of Consultation, reference 1.104) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. On 9 January 2024, Woodside sent a reminder email to NTSC following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.
Northern Territory Aquarium Fish/Display Fish Fishery		
Summary of information provided and record of consultation:		
<ul style="list-style-type: none"> On 22 September 2023, Woodside sent a letter to Northern Territory Aquarium Fish/Display Fish Fishery advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. On 16 October 2023, Woodside sent a reminder letter to Northern Territory Aquarium Fish/Display Fish Fishery following up on the proposed activity (Record of Consultation, reference 2.5) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Woodside has assessed the potential for interaction with Northern Territory managed commercial fisheries in Section 4.10.1 of this EP. No additional measures or controls are required.
Northern Territory Demersal Fishery		
Summary of information provided and record of consultation:		
<ul style="list-style-type: none"> On 22 September 2023, Woodside sent a letter to Northern Territory Demersal Fishery advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. On 16 October 2023, Woodside sent a reminder letter to Northern Territory Demersal Fishery following up on the proposed activity (Record of Consultation, reference 2.5) and included a QR code link to the Consultation Information Sheet on Woodside's website. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted NT Fisheries and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has assessed the potential for interaction with Northern Territory managed commercial fisheries in Section 4.10.1 of this EP. No additional measures or controls are required.
Northern Territory Mud Crab Fishery		
Summary of information provided and record of consultation:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 22 September 2023, Woodside sent a letter to Northern Territory Mud Crab Fishery advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Mud Crab Fishery following up on the proposed activity (Record of Consultation, reference 2.5) and included a QR code link to the Consultation Information Sheet on Woodside's website.
- On 20 October 2023, a licence holder from the Northern Territory Mud Crab Fishery responded thanking Woodside for the opportunity to be consulted. It explained its business undertakings related to sea country activities and enquired about:
 - (1) The process of reporting accidental waste discharged into the environment.
 - (2) The process for reporting damage to sea life on the sea floor, such as giant clams and any other protected or endangered species.
 - (3) Opportunities for local Aboriginal sea rangers to work on the activities associated with this EP or other activities.
 - (4) Opportunities for the licence holder to work with Woodside on any activities.
- On 17 November 2023, Woodside responded and thanked the licence holder for its feedback. Woodside:
 - Advised that activities that occur under this EP have requirements for reporting to NOPSEMA which includes accidental waste discharged to the environment. The Environment Regulations specify when and what Woodside would need to report depending on the severity of the incident. There may also be requirements for reporting to other regulators that Woodside would follow, for example, to the Australian Maritime Safety Authority.
 - Advised that activities associated with this EP are located where the sea floor is predominantly soft, sandy seabed and sea life such as giant clams and other protected or endangered species are not known to occur. However, if the activities described in the EP result in the unintentional death of or injury to a fauna species listed as Threatened or Migratory, and the activity was not authorised by a permit, this would be reported to the Department of Climate Change, Energy, Environment and Water
 - Noted the Aboriginal Sea Company's interest in opportunities for local Aboriginal sea rangers and broader opportunities between Woodside and the Traditional Owners and advised Woodside was currently looking to work through both the Northern Land Council and Tiwi Land Council.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>An individual licence holder asked for information on:</p> <p>(1) The process for reporting the discharge of accidental waste.</p> <p>(2) The process for reporting damage to the sea life on the sea floor.</p> <p>(3) Opportunities for local Aboriginal sea rangers on the activity.</p>	<p>(1) Woodside assessed the licence holder's feedback and provided information on the process for reporting accidental waste discharged into the environment.</p> <p>(2) Woodside assessed the licence holder's feedback and provided information on the sea floor where the activities associated with this EP were located, and on the process for reporting the unintentional death of or</p>	<p>(1, 2) Existing controls considered sufficient as described in Sections 6 and 7 of the EP.</p> <p>(3, 4) Not required.</p> <p>Woodside has assessed the potential for interaction with Northern Territory managed commercial fisheries in Section 4.10.1 of this EP.</p> <p>No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>(4) Opportunities for the licence holder to work with Woodside on broader activities.</p> <p>While feedback has been received, there were no objections or claims.</p>	<p>injury to a fauna species listed as Threatened or Migratory.</p> <p>(3, 4) Woodside noted ASC's interest in opportunities for local Aboriginal sea rangers and broader opportunities between Woodside and the Traditional Owners. Woodside advised it was currently looking to work through both the Northern Land Council and Tiwi Land Council and was open to further discussion with ASC.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	Woodside has assessed the potential for interaction with Northern Territory managed commercial fisheries in Section 4.10.1 of this EP. No additional measures or controls are required.

Recreational marine users and representative bodies

Shark Bay marine users		
<p>Summary of information provided and record of consultation:</p> <ul style="list-style-type: none"> On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Shark Bay marine, dive and charter operators that may be potentially relevant persons for this EP. On 31 October 2023, Woodside emailed the Shark Bay marine users advising of the proposed activities (Record of Consultation, reference 1.63) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. On 15 December 2023, Woodside sent a reminder email to Shark Bay marine users following up on the proposed activity (Record of Consultation 2.19) and included a link to the Consultation Information Sheet on Woodside's website. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.
---	---	--

Amateur Fishermen’s Association of the NT

Summary of information provided and record of consultation:

- On 15 December 2023, Woodside emailed Amateur Fishermen’s Association of the NT advising of the proposed activity (Record of Consultation, reference 1.101) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Amateur Fishermen’s Association of the NT following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Northern Territory Guided Fishing Industry Association (NTGFIA)

Summary of information provided and record of consultation:

- On 18 December 2023, Woodside telephoned NTGFIA advising of the proposed activity and seeking guidance on whether it was necessary to consult individual operators.
- On 18 December 2023, Woodside emailed NTGFIA with further information about the proposed activity (Record of Consultation, reference 1.104) and provided a Consultation Information Sheet, a close-up map of where the EMBA extends into NT waters (Record of Consultation, reference 1.105), and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 20 December 2023, NTGFIA responded thanking Woodside for the email. NTGFIA:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> - (1) Noted that given the very limited portion of NT waters impacted and the unlikelihood of its members operating in those areas, it had no comment at this time. • On 21 December 2023, Woodside responded thanking NTGFIA for its feedback. Woodside: <ul style="list-style-type: none"> - Noted the unlikelihood of members operating in those areas and that the NTGFIA therefore had no comment at this time. - Advised that on that basis, Woodside would not consult individual operators for this activity. 		
Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) NTGFIA advised that due to the limited portion of NT waters impacted and the unlikelihood of its members operating in those areas, it had no comment at this time. While feedback has been received, there were no objections or claims.</p>	<p>(1) Woodside assessed NTGFIA’s feedback and noted the unlikelihood of its members operating in the EMBA and that NTGFIA therefore had no comment. Woodside advised NTGFIA that on that basis it would not consult individual operators.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>(1) Not required. No additional measures or controls are required.</p>

Peak Industry Representative bodies

National Energy Resource Australia (NERA)

Summary of information provided and record of consultation:

- On 5 October 2023, Woodside emailed NERA advising of the proposed activity (Record of Consultation, reference 1.55) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 30 October 2023, Woodside sent a reminder email to NERA following up on the proposed activity (Record of Consultation, reference 2.11) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Local government and community representative groups of organisations

Shire of Ravensthorpe

Summary of information provided and record of consultation:

- On 21 September 2023, Woodside emailed Shire of Ravensthorpe advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Ravensthorpe following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shark Bay Community Resource Centre

Summary of information provided and record of consultation:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Shark Bay Community Resource Centre as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Shark Bay Community Resource Centre advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Shark Bay Community Resource Centre following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

RAC Monkey Mia Dolphin Resort

- Summary of information provided and record of consultation:**
- On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified RAC Monkey Mia Dolphin Resort as a potentially relevant person for this EP.
 - On 31 October 2023, Woodside emailed RAC Monkey Mia Dolphin Resort advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
 - On 15 December 2023, Woodside sent a reminder email to RAC Monkey Mia Dolphin Resort following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Dirk Hartog Island

- Summary of information provided and record of consultation:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Dirk Hartog Island as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Dirk Hartog Island advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Dirk Hartog Island following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Shark Bay Aviation

- Summary of information provided and record of consultation:**
- On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Shark Bay Aviation as a potentially relevant person for this EP.
 - On 31 October 2023, Woodside emailed Shark Bay Aviation advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
 - On 15 December 2023, Woodside sent a reminder email to Shark Bay Aviation following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Naturetime Tours

Summary of information provided and record of consultation:

- On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Naturetime Tours as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Naturetime Tours advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Naturetime Tours following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Wula Gula Nyinda Eco Cultural Tours

Summary of information provided and record of consultation:

- On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Wula Gula Nyinda Eco Cultural Tours as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Wula Gula Nyinda Eco Cultural Tours advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Wula Gula Nyinda Eco Cultural Tours following up on the proposed activity (Record of Consultation, reference 2.19) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate,	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	
Shark Bay Coastal Tours		
Summary of information provided and record of consultation:		
<ul style="list-style-type: none"> On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Shark Bay Coastal Tours as a potentially relevant person for this EP. --	--	--

Cocos Island Malay Community

Summary of information provided and record of consultation:

- On 15 September 2023, Woodside telephoned the Shire of Cocos (Keeling) Islands seeking how best to engage with the Cocos Island Malay Community.
- On 4 October 2023, Woodside telephoned the Shire following up on the phone call with regards to contacting the Cocos Island Malay Community.
- On 4 October 2023, Woodside emailed the Shire advising that it was seeking to establish Woodside’s relationship with the Cocos Island Traditional Owner group, the Cocos Malays.
- On 24 October 2023, Woodside emailed the Shire and offered to conduct a consultation meeting or provide additional information to the Cocos Island Malay Community.
- On 3 November, Woodside phoned the Shire to ask whether the Cocos Malays considered themselves relevant persons.
- On 6 November 2023, the Shire emailed Woodside and advised it would like to organise a meeting with Woodside and it would be good to include the Cocos Malay community.
- On 15 February 2024, Woodside held an online meeting with the Shire of Cocos (Keeling) Islands, in which the Shire confirmed it would like to arrange a further meeting regarding Woodside activities with other Shire representatives including members of the Malay community.

Summary of Feedback, Objection or Claim	Woodside Energy’s Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.

Malay Association of Christmas Island

Summary of information provided and record of consultation:

- On 25 October 2023, in an email to the Shire of Christmas Island, Woodside sought contact details for the Malay Association of Christmas Island.
- On 2 November 2023, Woodside sent a follow-up email regarding contacts for the Malay Association of Christmas Island and explaining its intention to provide an overview of Woodside Energy and its projects to the community and broader Shire.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> On 3 November 2023, Woodside had a phone call with Shire of Christmas Island to discuss consultation opportunities. During the discussion: <ul style="list-style-type: none"> The Shire noted it appreciated and supported Woodside's methodology for identifying and including First Nations stakeholder input. The Shire identified other Malay contacts that Woodside should consider including in future engagements where relevant. On 5 February 2024, Woodside phoned the Shire of Christmas Island following up on whether the Malay community wished to meet. The Shire advised the best point of contact for the Malay Association of Christmas Island and noted it was the same contact who had provided feedback to Woodside via the Shire's Fisheries Management Committee (FMC). On 12 February 2024, in an email to the FMC on separate feedback, Woodside noted that it was aware the FMC contact was also the best contact for the Malay association, and enquired as to whether consultation was requested with the Malay community. 		
Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
No feedback, objections or claims receive despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No feedback, objections or claims received.

Research institutes and local conservation groups or organisations

Australian Institute of Marine Science (AIMS)

Summary of information provided and record of consultation:

- On 13 September 2023, Woodside emailed AIMS advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 28 September 2023, AIMS responded thanking Woodside for its email and confirming no AIMS activities were impacted by the ongoing venture.
- On 02 October 2023, Woodside responded thanking AIMS for its email.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan

No additional measures or controls are required.

Other
Member of the public
Summary of information provided and record of consultation:
<ul style="list-style-type: none"> (1) On 14 September 2023, a member of the public phoned Woodside's feedback line and raised concerns regarding the clarity of the map in the advertisement for consultation on this EP which appeared in the West Australian newspaper on 13 September 2023 (Record of Consultation, reference 3.1). On 14 September 2023, Woodside phoned the member of the public to discuss their concerns. Woodside: <ul style="list-style-type: none"> Advised it had reviewed the advertisement and the Operational Area and EMBA were clear in the map, and that the advertisement had also run in numerous other newspapers where the map was clear. Offered to email a copy of the map to the member of the public, however the offer was declined.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	Inclusion in Environment Plan
<p>(1) A member of the public phoned Woodside with concerns regarding the clarity of the map in a newspaper advertisement regarding consultation for this EP.</p>	<p>(1) Woodside assessed the member of the public's feedback and reviewed the map, which clearly showed the Operational Area and EMBA. Woodside offered to email a copy of the map to the member of the public however the offer was declined.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).</p>	<p>(1) Not required.</p> <p>Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on the member of the public's functions, interests or activities.</p> <p>No additional measures or controls are required.</p>

1. Initial Consultation

1.1 Consultation Information Sheet

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an environment plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure activities are carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and of an acceptable level. Woodside want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to identify themselves and provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Woodside is consulting for both the:

- Pyrenees Floating Production, Storage and Offloading (FPSO) and associated subsea infrastructure (Pyrenees Facilities) Operations EP; and
- Ngujima-Yin Floating Production, Storage and Offloading (FPSO) and associated subsea infrastructure (Ngujima-Yin Facilities) Operations EP, together as their operations and associated activities are similar, and located 13 km apart in adjacent title areas.

Overview

Woodside will submit a five year revision of the Operations EPs for the Pyrenees and Ngujima-Yin Facilities located in Commonwealth waters, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (regulations).

Operations began in 2008 for the Ngujima-Yin Facilities and 2010 for Pyrenees Facilities.

Activity Overview

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Facilities.

The activities that will continue at the Pyrenees and Ngujima-Yin Facilities are:

- Routine oil production, crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.

In addition to the above, the revised Ngujima-Yin Facility EP will also include:

- Production from an additional two wells via a subsea tieback to existing infrastructure and the operation of a new fuel gas flowline. The proposed wells will be located within the Operational Area (Figure 2). The location of the proposed flowline can be seen in Figure 2 and will originate from either the Pyrenees or Macedon field.

Drilling, construction and installation activities associated with the Ngujima-Yin tieback and fuel gas project will be subject to separate future EPs.

Stylised figures showing the existing Pyrenees Facilities are shown in Figure 3. Figure 4 shows the existing Ngujima-Yin Facilities. These figures are not to scale and are for illustration purposes.

Future decommissioning of infrastructure will be subject to separate future EPs.

Vessels

During normal operations, vessels will typically be limited to supply/support vessels and IMMR vessels. The vessel size and type will be dependent on the work scope. Vessels are not planned to anchor/moor on the seabed except in emergency situations. Offtake tankers will be used for offloading operations in both fields. It is anticipated vessels will operate 24 hours per day for the duration of activities.

Location and Operations

The Pyrenees FPSO is located about 45 km north of Exmouth, Western Australia, with the subsea facilities located within the Production Licenses WA-42-L and WA-43-L, and in water depths ranging from approximately 180 to 215 m (Figure 1). The Pyrenees FPSO is connected to the adjacent Macedon gas field located approximately 6 km southeast of the FPSO. The Macedon field is also operated by Woodside, and the connection allows gas to be supplied from the Macedon gas field for fuel gas on the FPSO, or produced via the Macedon subsea infrastructure to the onshore Macedon Gas Plant for domestic gas production.

The Ngujima-Yin FPSO is located about 57 km north of Exmouth, Western Australia, with the subsea facilities located within Production Licenses WA-28-L, WA-59-L and Pipeline License WA-28-PL, in water depths ranging from approximately 340 to 850 m (Figure 2).

Communication with mariners

The locations of the Pyrenees FPSO and the Ngujima-Yin FPSO as well as associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. The Ngujima-Yin FPSO petroleum safety zone is measured from the riser turret mooring at the bow of the vessel. Vessels are not permitted within the exclusion zone without permission. In addition, a 2.5 nm (4.6 km) radius cautionary zone is also marked on nautical charts around both FPSOs.

Assessment

Woodside has undertaken an assessment of the potential impacts and risks to the environment, as well as to relevant persons arising from the planned activities and unplanned events. This assessment considers timing, duration and location of activities and events. A number of mitigation and management measures will be implemented and are summarised in Table 3. Further details will be provided in each EP being revised to manage proposed activities.

In preparing the EPs, our intent is to minimise environmental, social or cultural impacts associated with the proposed activities, and Woodside are seeking any interest or comments you may have to inform our decision making.

Environment That May Be Affected (EMBA)

The environment that may be affected (EMBA) is the largest spatial extent where the Pyrenees Facility Operations activities and the Ngujima-Yin Facility Operations activities could potentially have an environmental consequence (direct or indirect). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these EPs, is determined by modelling the highly unlikely event of a hydrocarbon release. The worst-case credible spill scenario for these EPs is a release from a loss of well control or a vessel collision with the FPSO with enough force to breach the hull, releasing crude to the environment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected - the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

Figure 5 displays the EMBA for the Ngujima-Yin EP and Figure 5 displays the EMBA for the Pyrenees EP.

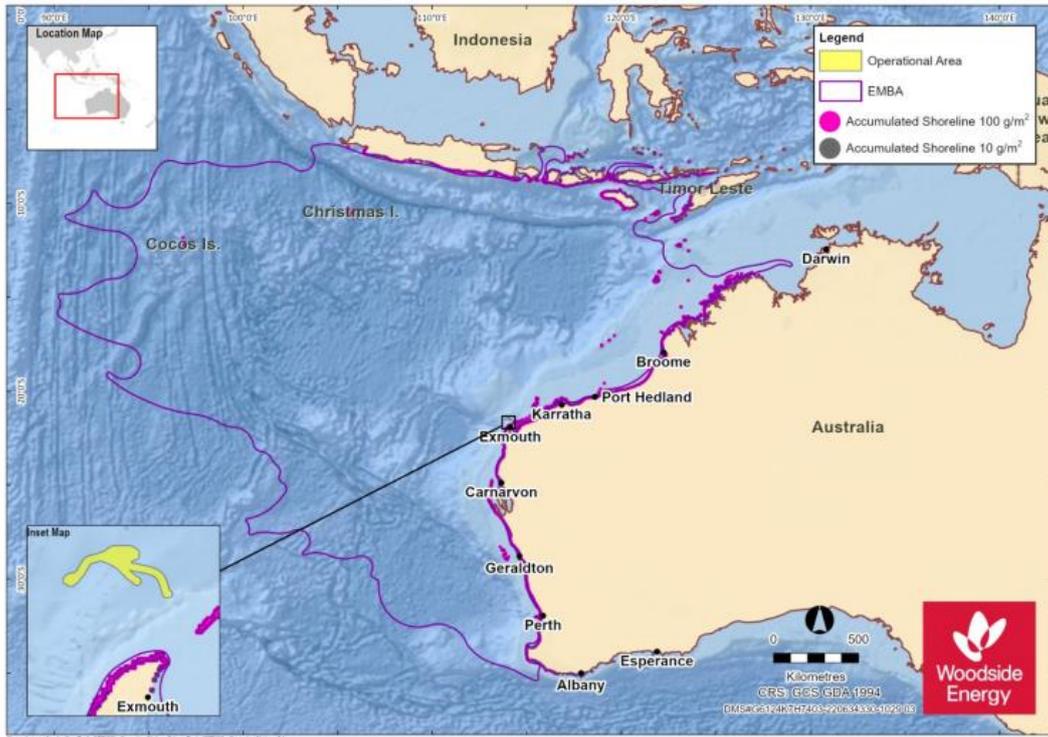

Figure 5. Ngujima-Yin FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/ incident during the Petroleum Activities Program.

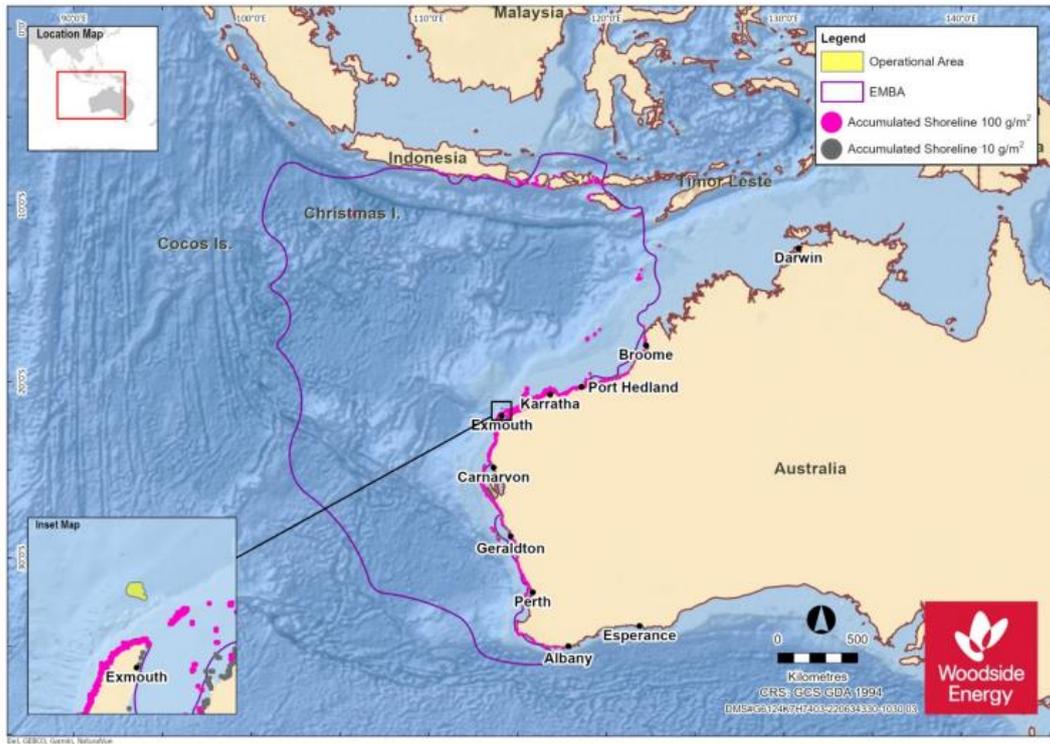

Figure 6. Pyrenees FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

Mitigation and management measures

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the Pyrenees and Ngujima-Yin facilities operations activity, including IMMR activities and other contingent activities. A number of mitigation and management measures for the activity are outlined in Table 4. Further details will be provided in the EPs.

Table 4. Summary of key risks and/or impacts and preliminary management measures for the Activity*

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/ Risks	Proposed Mitigation and/or Management Measure
Planned Activities (Routine and Non-routine)			
Physical Presence: Interaction with other Marine Users, Cultural Values & Heritage	<ul style="list-style-type: none"> The presence of FPSOs, other vessels and subsea infrastructure has the potential to exclude and/or displace other users from the Pyrenees or Ngujima-Yin Petroleum Safety Zone and Operational Areas respectively. Physical presence of project vessels and activities may have potential to impact cultural values and heritage. 	<ul style="list-style-type: none"> Localised displacement of commercial fishing from the Operational Area. Displacement of recreational fishing activity is likely to be low level due to the distance from boating facilities, lack of natural attractions (e.g. reefs or shoals) and water depth of Operational Area. The presence of support vessels could cause temporary disruption to commercial shipping. No recognised shipping lanes overlap the Operational Areas. Tourism and recreation within the Operational Areas is expected to be infrequent due to the lack of emergent features or natural attractions (eg. reefs or shoals) and water depth. 	<ul style="list-style-type: none"> Vessels adhere to regulatory requirements for navigational safety. Maintain a permanent Petroleum Safety Zone around the FPSO. Notify Australian Hydrographic Office (AHO) of locations of new permanent infrastructures to enable update of maritime charts. Consult with relevant persons so that they are informed of the proposed activities. FPSO collision prevention system implemented to alert marine vessels of the facility location. Woodside will actively support the capacity of Traditional Custodians for ongoing engagement and consultation on environment plans, for the purpose of avoiding impacts to cultural heritage values.
Physical Presence: Seabed disturbance	<p>Seabed disturbance may result from the following activities:</p> <ul style="list-style-type: none"> Presence of FPSO, wells and subsea infrastructure (including moorings) modifying marine habitats. Subsea operations, inspection, maintenance and repair activities resulting. Anchoring as required in emergency conditions. 	<ul style="list-style-type: none"> Localised modification of seabed habitat within the Operational area through seabed scouring around subsea infrastructure or formation of artificial reef. The infrastructure provides hard substrate for marine organisms and a fouling community. This may result in local increase biological productivity and diversity within the Operational Area. During IMMR activities, a localised and temporary decline in water quality due to an increase of suspended sediment concentration and sediment deposition may occur. 	<ul style="list-style-type: none"> Monitoring and maintenance of all subsea infrastructure completed as per IMMR process. Any new subsea infrastructure to have an as-left survey completed and location to be recorded.
Routine Light Emissions: Light Emissions from FPSO, Vessel Operations and Operational Flaring	<ul style="list-style-type: none"> The FPSOs, vessels (including IMMR) and Remote Operation Vehicles (ROV) will use external lighting to conduct safe operations. Light emissions from FPSO during flaring. 	<ul style="list-style-type: none"> Light emissions have the potential to temporarily affect fauna such as fish, marine reptiles and seabirds by influencing changes in their behaviour or impacting orientation in close proximity to the FPSOs or vessels. 	<ul style="list-style-type: none"> Lighting limited to the minimum required for navigational and safety requirements, except for emergency events. Flare management through reinjection to reduce flare intensity. Implementation of appropriate measures based on recommendations of the National Light Pollution Guidelines for Wildlife Including Marine Turtles, Seabirds and Migratory Shorebirds.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Routine Acoustic Emissions: Generation of Noise During Routine Operations	<p>Noise generated within the Operational Areas from:</p> <ul style="list-style-type: none"> FPSOs and associated subsea infrastructure; Vessels; Helicopters; and IMMR activities (e.g. ROVs, AUVs, side scan sonar, echo sounder, vessels on DP). 	<ul style="list-style-type: none"> Elevated underwater noise can potentially disturb marine fauna, including marine mammals, turtles, and fish through behavioural effects, masking or interfering with other biologically important sounds (echolocation, vocal communication, signals, and sounds produced by predators or prey) or as direct physical damage. The migration corridor (Biologically Important Area (BIA)) for pygmy blue whales and humpback whales overlaps with a small portion of the Operational Areas and may expose the mammals to underwater noise during seasonal migrations. Given the underwater noise levels and low likelihood of the whales being present in the Operational Area, the potential for impact is considered highly unlikely. 	<ul style="list-style-type: none"> Comply with regulatory requirements for interactions with marine megafauna in attempt to prevent adverse interactions.
Routine and Non-routine Atmospheric and Greenhouse Gas (GHG) Emissions	<ul style="list-style-type: none"> Atmospheric emission and GHG emissions generated through fuel combustion from FPSO, vessels and helicopters, FPSO operational flaring and fugitive emissions (e.g. compressors, generators etc.). 	<ul style="list-style-type: none"> Emissions could result in temporary, localised reductions in air quality in the immediate vicinity. Contribution to GHG emissions. 	<ul style="list-style-type: none"> Comply with regulatory requirements for GHG emissions and reporting. Monitoring, review and optimisation of facility fuel and flaring emissions where possible.
Routine and Non-Routine Discharges: Subsea Operations and Activities	<ul style="list-style-type: none"> Discharge of subsea control fluids from the actuation of valves or during subsea operations and activities. Potential discharge of hydrocarbons or chemicals remaining in subsea pipework and equipment due to subsea intervention works (including pigging) and/or IMMR activities. 	<ul style="list-style-type: none"> Localised, short-term decrease in water quality around the subsea system within Operational Area due to relatively small volumes discharged and rapid dilution of release. Any impacts to fauna should be minor and the potential for bioaccumulation in organisms or accumulation in sediments is considered negligible. The Operational Area overlaps Key Ecological Features (KEFs), namely the Continental Slope Demersal Fish Communities and Canyons Linking the Cuvier Abyssal Plain and the Cape Range Peninsula. Discharges are not likely to have impacts to the ecosystem function of the KEFs. 	<ul style="list-style-type: none"> Marine discharges managed according to regulatory requirements. Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. Subsea infrastructure flushed and isolated where practicable during IMMR activities.
Routine and Non-routine Discharges: Utility Systems and Drains	<ul style="list-style-type: none"> Discharge of sewage, grey water and putrescible waste from FPSOs or vessels to the marine environment. Discharge of deck, bilge and drain water from FPSOs or vessels to marine environment. 	<ul style="list-style-type: none"> Potential slight, short-term, localised ongoing increase in nutrients and oxygen demand around FPSOs and vessels with no lasting effect. Potential slight, short-term, localised ongoing decrease in water quality at discharge location. Discharges are not likely to impact on the overlapping KEFs in the Operational Areas. 	<ul style="list-style-type: none"> Marine discharges managed according to regulatory requirements. Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. Onboard treatment and open / closed draining systems are monitored and maintained.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/ Risks	Proposed Mitigation and/or Management Measure
Routine and Non-Routine Discharges: FPSO production waste (Pyrenees only)	<ul style="list-style-type: none"> Discharge of production waste from Pyrenees FPSO (produced water). Note: All produced water from Ngujima-Yin FPSO is reinjected to the reservoir and discharge is not permitted in this EP. 	<ul style="list-style-type: none"> Overboard discharges causing localised changes in water quality may result in potential environmental impacts to biota within the Operational Areas 	<ul style="list-style-type: none"> Marine discharges managed according to regulatory requirements. Continuous measurements and monitoring of Produced Water (PW) Systems. Diversion of PW if measurements exceed acceptable baseline levels. Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. Maximise the reinjection of produced water.

Unplanned Events (Accidents / Incidents)

Unplanned Hydrocarbon or Chemical Release: Hydrocarbon release during Bunkering / Refuelling and Chemical release during transfer, storage, and use	<ul style="list-style-type: none"> Accidental spill of hydrocarbons (diesel) to the marine environment during bunkering / refuelling. Chemical release to marine environment during transfer, storage and use. 	<ul style="list-style-type: none"> Potential to cause localised and temporary changes to water quality from a marine diesel or chemical spill. Marine diesel is a relatively volatile, nonpersistent hydrocarbon with up to approximately 40% evaporating within the first 24 hours for a surface spill. Potential impacts across the EMBA may include injury/mortality to seabirds, fish, plankton, marine mammals and marine reptiles. Mortality of larger fauna is not expected to occur. No impacts to KEFs are expected, as these KEFs are mainly benthic and will therefore not be affected by a small surface release. 	<ul style="list-style-type: none"> Vessels compliant with regulatory guidelines for safe operations including bunkering / refuelling and emergency response. Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. Safe storage of chemicals with spill clean-up equipment available. Equipment for bunkering / refuelling regularly inspected / maintained and replaced as required. Reporting of unplanned releases.
Unplanned Hydrocarbon Release: Loss of Hazardous and Non-Hazardous Waste / Equipment	<ul style="list-style-type: none"> Incorrect disposal or accidental discharge of non-hazardous and hazardous waste / equipment from FPSOs or vessels to the marine environment. 	<ul style="list-style-type: none"> The potential impacts of waste accidentally discharged to the marine environment include localised direct pollution and contamination of the environment, and secondary impacts potentially leading to injury and/or death to marine fauna (e.g. entanglement or ingestion). The temporary or permanent loss of waste materials/equipment into the marine environment is not likely to have a significant environmental impact, based on the location of the Operational Area, the types, size and frequency of waste that could occur and species present. 	<ul style="list-style-type: none"> Compliance with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes (i.e. Marine Orders 95 and 94). Compliance with Waste Management Plans for the storage, handling and transportation of wastes. Attempted recovery of dropped waste objects where safe and practicable.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/ Risks	Proposed Mitigation and/or Management Measure
Physical Presence (Unplanned): Vessel Collision with Marine Fauna	<ul style="list-style-type: none"> Vessel movements have the potential to result in collisions between the vessel (hull and propellers) and marine fauna. 	<ul style="list-style-type: none"> Vessel interaction presents a potential threat to marine mammals, marine reptiles and fish, sharks and rays. Whilst a portion of both Operational Areas overlap the pygmy blue whale and humpback whale migration BIAs, this overlap represents a very small proportion of the BIA. Given the slow speeds at which project vessels generally operate, interactions with whales are considered unlikely. Whale shark presence in the Operational Areas is likely during their migrations to and from Ningaloo Reef. Whale sharks are only expected in the area for short durations and their presence would be migratory. The Pyrenees Operational Area overlaps BIAs for sensitive turtle areas but given the water depth and absence of potential for nesting, turtles are likely to only use the area infrequently for transit. Vessel activities are unlikely to result in a consequence greater than short-term disruption to fauna, with no expected impact on critical habitat. 	<ul style="list-style-type: none"> Comply with regulatory requirements for interactions (e.g., EPBC Regulations 2000 - Part 8 Division 8.1) with marine fauna to reduce the likelihood of a collision occurring.
Physical Presence (Unplanned): Introduction of Invasive Marine Species (IMS)	<ul style="list-style-type: none"> Vessels transiting to the Operational Area may be subject to marine fouling whereby organisms attach to the vessel hull. Organisms can also be drawn into ballast tanks during onboarding of ballast water. IMS can also be present as biofouling on subsea structures. 	<ul style="list-style-type: none"> Transfer of IMS from infected vessels to the Operational Areas and establishment on the seafloor or subsea infrastructure is not likely due to the deep offshore waters which are not conducive to the settlement and establishment of IMS. There is potential for IMS to transfer from infected vessels and attach to FPSO or turret. Risk is considered remote that IMS will secondarily transfer from the FPSO or turret to another vessel given the offshore open ocean environment. 	<ul style="list-style-type: none"> Ballast water and biofouling will be managed according to regulatory requirements, including the Australian Ballast Water Management Requirements, and the Australian Biofouling Management Requirements, as applicable. Woodside's IMS risk assessment process applied to project vessels and immersible equipment entering the Operational Areas. Inspection of FPSOs by IMS Inspector prior to return from international sail away.
Unplanned Hydrocarbon Release: Subsea Infrastructure	<ul style="list-style-type: none"> Accidental release of hydrocarbons resulting from loss of containment of subsea infrastructure. 	<p>Potential significant impacts to marine environment including:</p> <ul style="list-style-type: none"> Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. Disruption to marine fauna, including protected species. Potential interference with or displacement of other sea users including fisheries and tourism and recreation. 	<ul style="list-style-type: none"> Compliance with Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. The Subsea Infrastructure design includes a range of measures that specifically aid in minimising the risk of external damage. Woodside management system implemented during operations to maintain infrastructure integrity, communication systems and safety instrumented systems to an acceptable standard. Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. Maintain a permanent Petroleum Safety Zone around FPSO. Reporting of unplanned releases.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Unplanned Hydrocarbon Release: Offtake Operations	<ul style="list-style-type: none"> Release of hydrocarbons from FPSO offloading equipment to the marine environment and atmosphere during offloading / transferring operations. 	<ul style="list-style-type: none"> Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. Disruption to marine fauna, including protected species. Potential interference with or displacement of other sea users including fisheries and tourism and recreation 	<ul style="list-style-type: none"> Compliance to Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. Implemented offloading procedures and all offtake tankers vetted to ensure they meet Woodside requirements. Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. Maintain a permanent Petroleum Safety Zone around FPSO. Reporting of unplanned releases.
Unplanned Hydrocarbon Release: Loss of Containment of Crude Oil from FPSO	<ul style="list-style-type: none"> Release of hydrocarbons from FPSO to the marine environment due to loss of containment from bulk storage, topsides processing equipment, non-process topsides equipment or loss of structural integrity. 	<ul style="list-style-type: none"> Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. Disruption to marine fauna, including protected species. Potential interference with or displacement of other sea users including fisheries and tourism and recreation. 	<ul style="list-style-type: none"> Compliance to Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. Maintain a permanent Petroleum Safety Zone around FPSO. Maintenance of facility as per Performance Standard requirements. Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. Reporting of unplanned releases.

**These mitigation and management measures are subject to change through the consultation and subsequent assessment process and may not represent content in the publicly available EP or in the final plan once accepted.*

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **27 October 2023** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/sustainability/consultation-activities.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.

Please note that your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

CONSULTATION

SUMMARY INFORMATION SHEET

September 2023

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

CARNARVON BASIN, NORTH-WEST AUSTRALIA

When preparing an environment plan (EP), Woodside needs to notify relevant persons and obtain their input. This helps confirm current measures or identify additional measures, that may need to be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. Woodside wants to give relevant persons whose functions, interests or activities may be affected by the proposed activity the opportunity to identify themselves and provide feedback on our proposed activity.

This summary information sheet provides a high-level overview of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees FPSO Operations environment plans. Further details, including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures, are available within the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plan Consultation Information Sheet (September 2023) which can be found at:

www.woodside.com/sustainability/consultation-activities

Overview

Woodside plans to submit a five-year revision of the Operations EPs for the Pyrenees and the Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The Pyrenees FPSO and associated production infrastructure is located in water depths ranging from -180 m to 215 m, in Commonwealth waters around 45 km north of Exmouth, Western Australia. Crude oil is produced on the Pyrenees FPSO from the Ravensworth, Crosby, Stickle, Tanglehead, Wild Bull and Moondyne reservoirs.

The Ngujima-Yin FPSO and associated production infrastructure is located in water depths ranging from -340 m to 850 m, in Commonwealth waters around 57 km north of Exmouth, Western Australia. Crude oil is produced on the Ngujima-Yin FPSO from the Vincent reservoir and the Greater Enfield development, which includes the Norton-over-Laverda, Laverda Canyon Reservoir and Cimatti fields.

Crude oil from both operations will be offloaded using Offtake Tankers. Other activities that will occur include surveys, inspection, maintenance, monitoring and repair activities, and other contingent activities.

Maps showing the location of the activities are provided below.

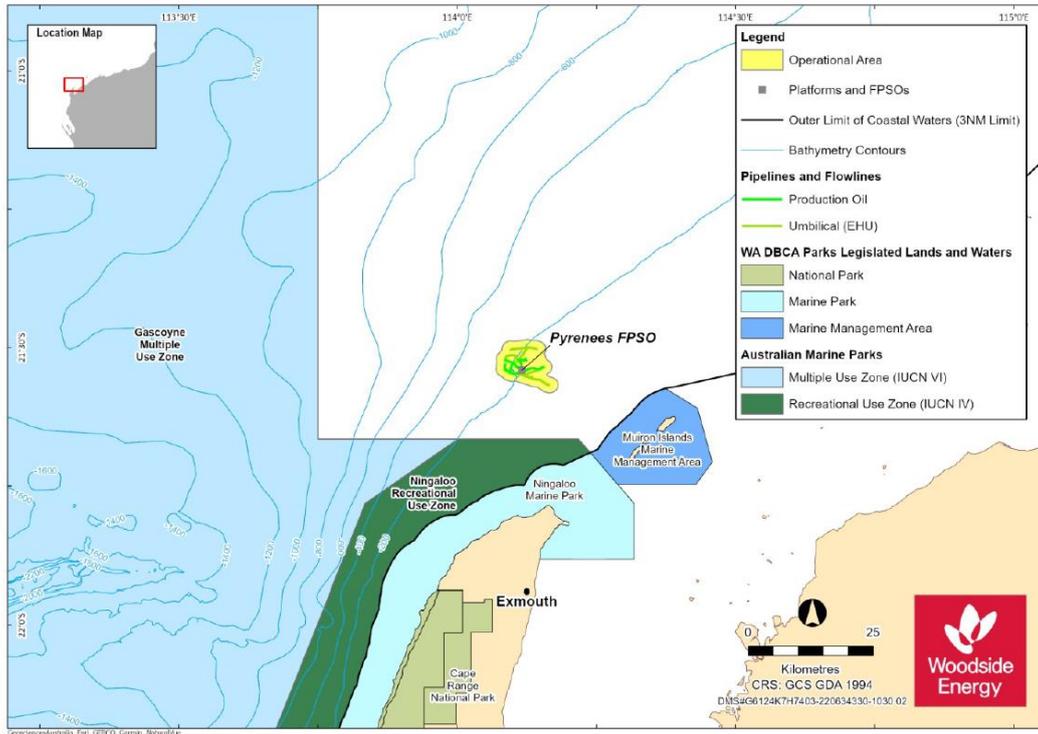

Figure 1. Pyrenees FPSO Location and Operational Area

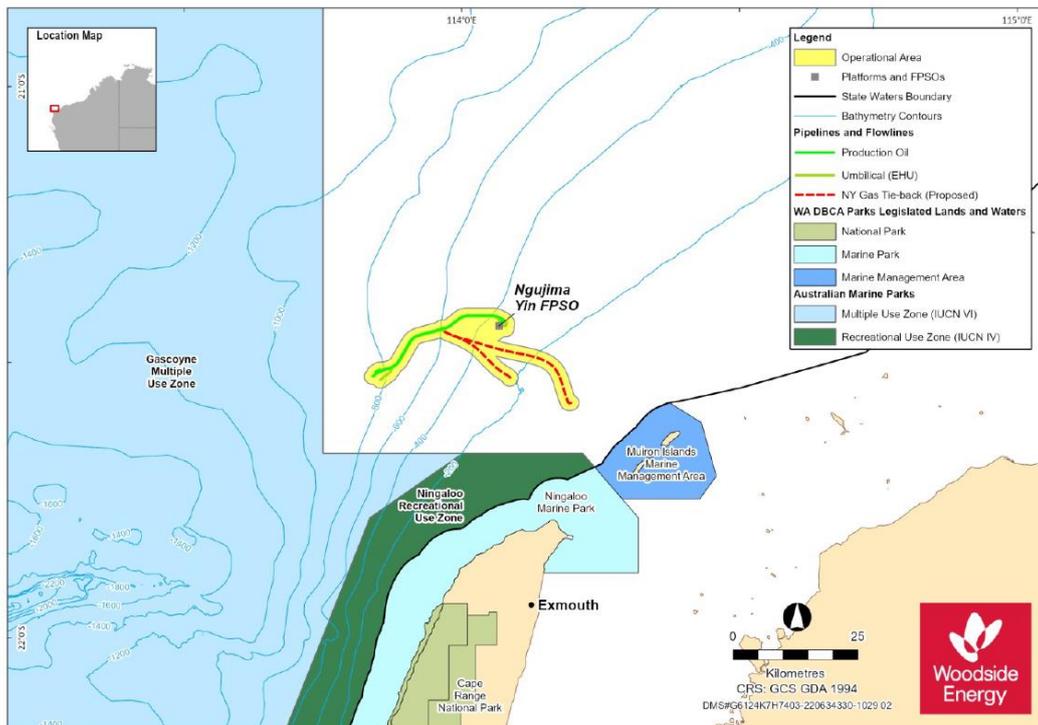

Figure 2. Ngujima-Yin FPSO Location and Operational Area

Work Method

Key features of the Floating Production Storage and Offloading (FPSO) facilities include:

- Floating hull with integrated storage tanks.
- Connected to the seabed and subsea production system through turret mooring system which includes risers, umbilicals and chain mooring systems illustrated schematically in Figure 3 and 4.
- Above the water there will be supporting processing systems and equipment, flare systems, utilities, cranes, laydown and storage areas, utility buildings, living quarters and helideck.
- The FPSO provides oil processing to make the oil suitable for offloading to an Offtake Tanker.

- For Ngujima-Yin, two potential future development activities may include production from an additional two wells via a subsea tieback to existing subsea infrastructure and the operation of a new fuel gas flowline. Drilling, construction and installation activities associated with the tieback and fuel gas project will be subject to separate future EPs.

During normal operations, vessels will typically be limited to supply/support vessels and Inspection, Monitoring, Maintenance and Repair (IMMR) vessels. Offtake tankers will be used for offloading operations in both fields. It is anticipated vessels will operate 24 hours per day for the duration of activities.

Summary of key activities includes:

- Routine production operations involve the offloading of crude oil to Offtake Tankers.
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.
- Other activities include surveys, inspection, maintenance, monitoring, and repair (IMMR) activities on the FPSO and subsea infrastructure, and other contingent activities.

Environment That May Be Affected (EMBA)

The environment that may be affected (EMBA) is the largest spatial extent where the Pyrenees Floating Production, Storage and Offloading (FPSO) Operations and the Ngujima-Yin FPSO Operations' activities could potentially have an environmental consequence (direct or indirect). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these EPs, is determined by modelling the highly unlikely event of a hydrocarbon release. The worst-case credible spill scenario for these EPs is a release from a loss of well control or a vessel collision with the FPSO with enough force to breach the hull, releasing crude to the environment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected - the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

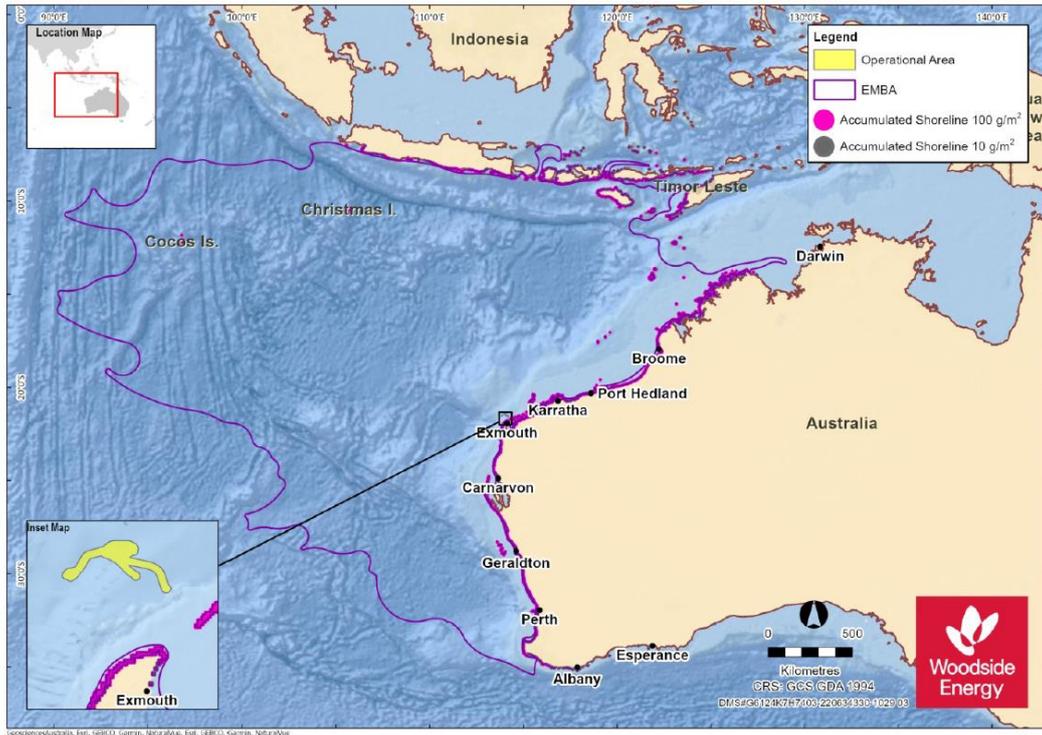

Figure 4. Ngujima-Yin FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

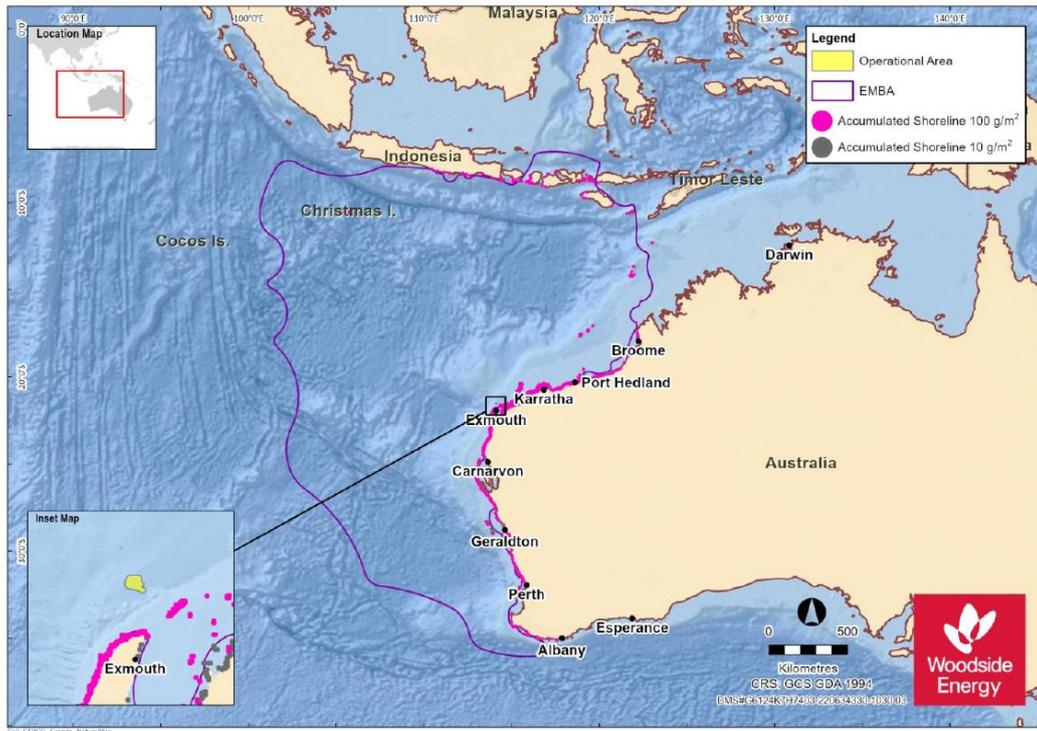

Figure 5. Pyrenees FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **27 October 2023** via:

E: Feedback@woodside.com
Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/sustainability/consultation-activities

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.

Please note that your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

1.3 Email sent to Australian Border Force (ABF), Department of Foreign Affairs and Trade (DFAT), Department of Transport (DoT), Ningaloo Coast World Heritage Advisory Committee (NCWHAC), Department of Biodiversity, Conservation and Attractions (DBCAs), Department of Industry, Science and Resources (DISR), Department of Mines, Industry Regulation and Safety (DMIRS), Australian Energy Producers (AEP) (Formerly Australian Petroleum Production and Exploration Association), University of Western Australia (UWA), Western Australian Marine Science Institution (WAMSI), Australian Institute of Marine Science (AIMS), Commonwealth Scientific and Industrial Research Organisation (CSIRO) - 13 September 2023

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200

Uncontrolled when printed. Refer to electronic version for most up to date information.

times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.4 Email sent to Shire of Carnarvon (13 September 2023)

Dear Shire of Carnarvon,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.6 Email sent to Exmouth Recreational Marine Users, Karratha Recreational Marine Users, Christmas Island Recreational Marine Users, Recfishwest, Marine Tourism Association, WA Game Fishing Association – 14 September 2023

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 471 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)*. Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.7 Email sent to Department of Defence (DoD) (15 September 2023)

Dear Department of Defence,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)* (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 475 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

1.9 Email sent to Department of Climate Change, Energy, the Environment and Water (DCCEE) (15 September 2023)

Dear Department of Climate Change, Energy, the Environment and Water,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and

Page 483 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). **Also attached is a list of shipwrecks in State waters within the EMBA.** You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.11 Email sent to Department of Planning, Lands and Heritage (DPLH) (15 September 2023)

Dear DPLH

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 487 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.12 Email sent to Chevron Australia Osaka Gas Gorgon, Tokyo Gas Gorgon, JERA Gorgon (15 September 2023)

Dear Chevron,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 491 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

We would be grateful if you could please forward this consultation information to your Joint Venture participants Osaka Gas Gorgon, Tokyo Gas Gorgon and JERA Gorgon for feedback.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.13 Email sent to Australian Hydrographic Office (AHO), Australian Maritime Safety Authority (AMSA) – Marine Safety (15 September 2023)

Dear AHO / AMSA

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 495 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). **A shipping lane map is also attached. A GIS Shape File will be emailed to you separately.** You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

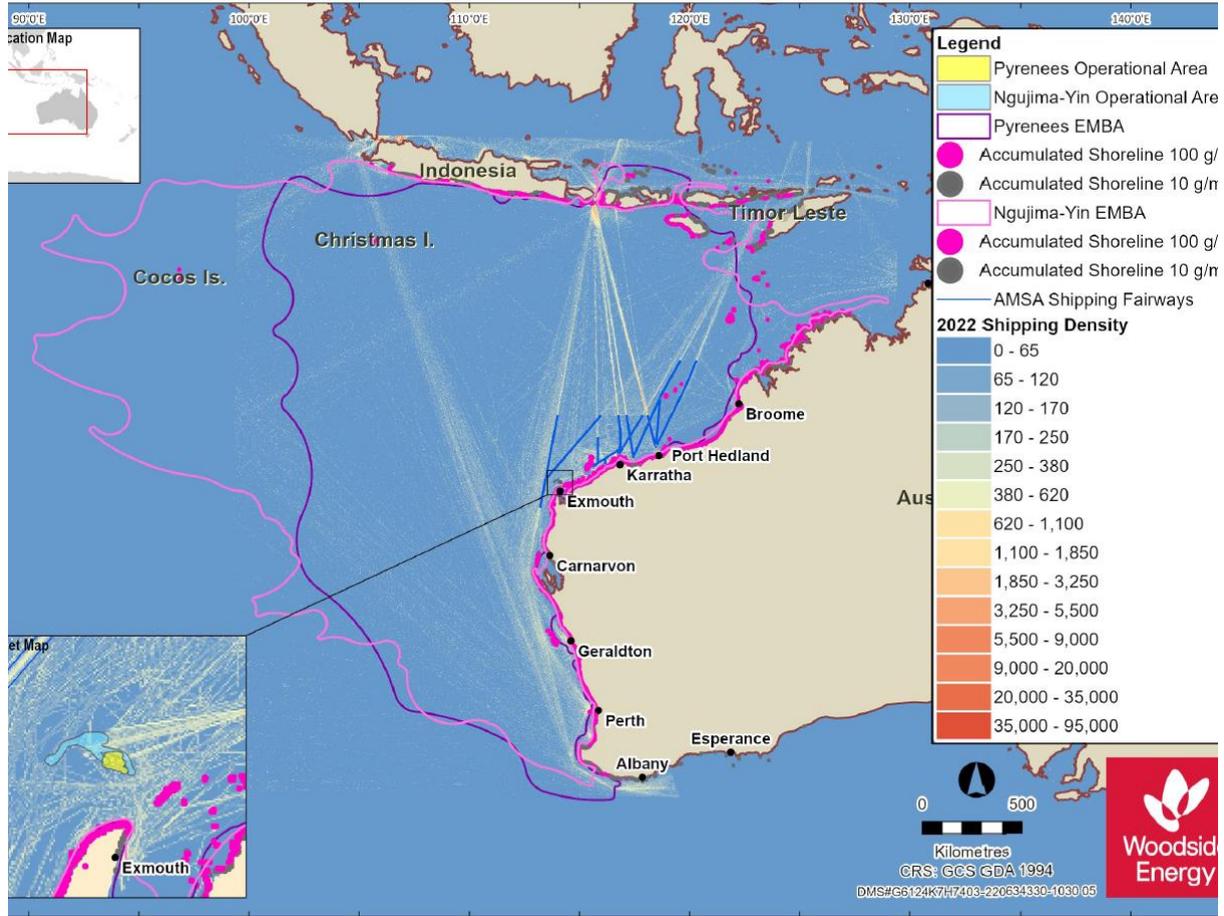

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.14 Shipping lane map sent to AHO and AMSA

1.15 Email sent to Australian Maritime Safety Authority (AMSA) – Marine Pollution (15 September 2023)

Dear [REDACTED]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 500 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.16 Email sent to Onslow Chamber of Commerce and Industry (15 September 2023)

Dear [REDACTED]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)*. Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.17 Email sent to Shire of Ashburton (15 September 2023)

Dear Shire of Ashburton,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)* (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 508 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.18 Email sent to Shire of Exmouth (15 September 2023)

Dear [REDACTED],

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 512 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.19 Email to City of Karratha (15 September 2023)

Dear [REDACTED],

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 516 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.20 Email to Town of Port Hedland (15 September 2023)

Dear Town of Port Hedland,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 520 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.21 Email sent to Shire of Broome (18 September 2023)

Dear [REDACTED]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 524 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.22 Email sent to Broome Chamber of Commerce and Industry (18 September 2023)

Dear Broome Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 528 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.23 Email sent to Carnarvon Chamber of Commerce and Industry (18 September 2023)

Dear Carnarvon Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 532 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.24 Email sent to Shire of Derby/West Kimberley (18 September 2023)

Dear [REDACTED]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 536 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.25 Email sent to Exmouth Community Liaison Group (18 September 2023)

Dear Exmouth Community Liaison Group,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 540 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.26 Email sent to Karratha Community Liaison Group (18 September 2023)

Dear Karratha Community Liaison Group,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 544 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.27 Email sent to Port Hedland Chamber of Commerce and Industry (18 September 2023)

Dear Port Hedland Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 548 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.28 Email sent to Derby Chamber of Commerce and Industry, Mid West Chamber of Commerce and Industry, East Kimberley Chamber of Commerce and Industry (18 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.29 Email sent to Shire of Wyndham/East Kimberley, Shire of Shark Bay, City of Greater Geraldton, Shire of Chapman Valley, Shire of Dandaragan, Shire of Gingin, Shire of Northampton, Shire of Christmas Island, Pilbara Ports Authority, Kimberley Ports Authority, Mid West Ports Authority (19 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 556 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.30 Email sent to Director of National Parks (DNP) (19 September 2023)

Dear Director of National Parks

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 560 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Australian Marine Parks

We note Australian Government Guidance on consultation activities and confirm that:

- The proposed activities are outside the boundaries of any proclaimed Australian Marine Parks (AMPs).
 - The Pyrenees FPSO Petroleum Activity Area is located approximately 14 km from the northern boundary of the Commonwealth Ningaloo Marine Park, approximately 138 km south-west of the Barrow Island Marine Park and approximately 179 km south-west of the Montebello Island Marine Park.
 - The Ngujima-Yin FPSO Petroleum Activity Area is located approximately 26 km from the northern boundary of the Commonwealth Ningaloo Marine Park, approximately 140 km south-west of the Barrow Island Marine Park and approximately 180 km south-west of the Montebello Island Marine Park.
- We have assessed potential impacts to AMPs in the development of the proposed EP revisions and believe that planned activities have no potential to impact the values of the Marine Parks.
- For these EPs, the worst-case credible spill scenario is a hydrocarbon release from a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull, releasing crude oil to the environment. Through review of hydrocarbon spill modelling, and with consideration of a 50 ppb dissolved and 100 ppb entrained hydrocarbon threshold, the following AMPs may be contacted in the event of a spill:
 - Ningaloo Marine Park
 - Gascoyne Marine Park
 - Montebello Marine Park
 - Dampier Marine Park
 - Shark Bay Marine Park
 - Carnarvon Canyon Marine Park
 - Argo-Rowley Terrace
 - Abrolhos
 - Eighty Mile Beach Marine Park
 - Mermaid Reef Marine Park
 - Kimberley Marine Park
 - Roebuck Marine Park
 - Jurien Marine Park
 - Two Rocks Marine Park
 - Perth Canyon Marine Park
 - Geographe Marine Park
 - South-west Corner Marine Park

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Ashmore Reef Marine Park
- A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities, which will include notification to relevant agencies and organisations as to the nature and scale of the event, as soon as practicable following an occurrence. The Director of National Parks will be advised if an environmental incident occurs that may impact on the values of any Marine Park.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.31 Email sent to WAFIC (20 September 2023)

Hi [REDACTED],

Please see below for consultation information regarding the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans. The consultation period is due to close on 27 October 2023. I've also attached the consultation information sheet.

Under fee for service, could WAFIC please provide the consultation information to:

- Mackerel Managed Fishery (Schedule 2- Area 2) – Both activities
- Marine Aquarium Fish Managed Fishery – Both activities
- Pilbara Line Fishery (Condition) – Both activities
- West Coast Deep Sea Crustacean Managed Fishery – Both activities
- Specimen Shell Managed Fishery – Pyrenees
- Pilbara Trap Managed Fishery – Pyrenees

If this could go out today or tomorrow it would be much appreciated – this was the one from last Friday however it wasn't finalised at that time.

Kind regards,

[REDACTED]

Woodside Feedback

Dear Commercial Licence Holders

WAFIC is contacting you regarding activities Woodside is proposing in Commonwealth waters across the North West Shelf of WA. WAFIC is now working with Woodside to strategically streamline consultation with the commercial fishing industry.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia.

Overview of Activities:

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

The table below provides a summary of the proposed activities under this EP. The attached Information Sheet provides additional information including a map of impacted areas, summaries of potential impacts and risks relating to the proposed activities, and associated management measures. These are also available on Woodside's [website](#).

1.33 Email sent to Department of Agriculture Fisheries and Forestry (DAFF) – Fisheries (20 September 2023)

Dear DAFF – Fisheries and Biosecurity,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

--	--	---

Biosecurity

With respect to biosecurity matters, please note the following information below:

Environment description

The Pyrenees Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 180 to 215 m on the outer continental shelf of the North West Shelf Province, approximately 45 km north of Exmouth. The seabed is generally flat and featureless, with some minor depressions and comprises primarily of soft sediment, which is consistent with the wider North West Shelf Province.

The Ngujima-Yin Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 340 to 850 m on the outer continental shelf and continental slope of the North West Shelf Province, approximately 57km north of Exmouth. The seabed in the north-east half of the Operational Area is relatively flat and featureless and comprises primarily of soft sediment which is consistent with the wider North West Shelf Province. The seabed in the south-west of the Operational Area intersects the Canyons linking the Cuvier Abyssal Plain Key Ecological Feature. A survey was undertaken in 2015 of the Enfield Canyon observed that the canyon comprised flat unconsolidated sediments composed of sand- and mud-sized particles and that the canyon does not appear significantly different than the surrounding region, with seabed habitats and deep-water biota being typical and representative in the wider region.

As such, the sediment throughout the Ngujima-Yin Operational Area are broadly consistent with those in the North West Shelf Province, which are characterised by fine to medium sediment (silts and sands) with patches of coarser sediments (shells/gravels).

Potential IMS risk

IMS risk mitigation management

Accidental introduction and establishment of invasive marine species

All vessels are required to comply with *the Australian Biosecurity Act 2015*, specifically the Australian Ballast Water Management Requirements (as defined under the Act) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing Invasive Marine Species (IMS).

Vessels entering the Operation Areas for Pyrenees and Ngujima-Yin will have Woodside's IMS risk assessment process applied, including for immersible equipment entering the Operation Area. Based on the outcomes of each IMS risk assessment, management measures commensurate with the risk (such as the

Uncontrolled when printed. Refer to electronic version for most up to date information.

treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced. Inspection of the FPSOs will be completed by a qualified IMS Inspector prior to return from international sail away.

Feedback

If you have feedback specific to the proposed activities described under the EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 **by 27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.34 Email sent to Australian Fisheries Management Authority (AFMA) (20 September 2023)

Dear AFMA,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 579 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

1.35 Email sent to Protect Ningaloo, Cape Conservation Group (21 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

There are some questions and answers at the bottom of this email explaining why you have received this email.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be

Uncontrolled when printed. Refer to electronic version for most up to date information.

affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
<p>Summary</p>	<p>Continuation of activities:</p> <ul style="list-style-type: none"> • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. 	<p>Continuation of activities:</p> <ul style="list-style-type: none"> • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. <p>Future development activities are being considered for the Ngujima-Yin FPSO including:</p> <ul style="list-style-type: none"> • A subsea tie back of two new wells to existing subsea infrastructure; and

		<ul style="list-style-type: none"> A new flowline to provide fuel gas from a neighboring field to the facility. <p>The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline.</p> <p>The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.</p>

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Questions and Answers

Why have I received this email?

Your organisation has been identified by Woodside as potentially being relevant to consult with for Environment Plans relating to our operations of the Pyrenees Floating Production Storage and Offloading (FPSO) Facility and Ngujima-Yin FPSO Facility, located off Exmouth, WA.

Woodside consults relevant persons to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential effects of the operations on the environment. This is the intended outcome of consultation.

But I'm not located near Exmouth?

Late last year a Federal Court decision looked at the way the Australian offshore energy industry consults relevant persons. Upon the establishment of this new case law, Woodside now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

Woodside uses the environment that may be affected or 'EMBA' to help identify who may be a relevant person. This brochure from the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has more information regarding consultation on offshore petroleum environment plans.

What is an EMBA?

The environment that may be affected or EMBA is the largest area where unplanned events from the operations off Exmouth could have an environmental consequence (impact) based on modelling.

For the Pyrenees and Ngujima-Yin Facility Operations Environment Plans, the EMBA represents the merged area of many possible modelled paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of release. This is based on oil trajectory modelling.

What does oil trajectory modelling involve and why is the EMBA so big?

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Page 592 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

The process of identifying and mapping out an EMBA for each petroleum activity is primarily for assessment of potential impacts and oil spill response planning purposes. As the events that may lead to a spill are unknown, for planning purposes, the worst case credible spill scenario is identified. This looks at the worst case credible volume, location, timing etc, and modelling is undertaken to understand where the oil may go, if unmitigated (i.e. if no response strategies are applied).

To account for weather and ocean current variables, the spill scenario is modelled multiple times (typically 100 to 200 times) to see where the weather and ocean currents may take the oil.

All the modelled spill trajectories are then merged to create an EMBA. This means in the highly unlikely event a hydrocarbon release does occur, the entire EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

In order to be able to pre-prepare, response plans are built around the potential impacts resulting from a selection of the worst case modelling runs.

Where can I get more information?

For more information on consultation and oil spill modelling visit the [NOPSEMA website](#).

1.37 Email sent to Tuna Australia, Commonwealth Fisheries Association (CFA), North West Slope and Trawl Fishery, Western Deepwater Trawl Fishery, Western Tuna and Billfish Fishery, Northern Prawn Fishery, Christmas Island Line Fishery (22 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

1.38 Email sent to Department of Primary Industries and Regional Development (DPIRD) (22 September 2023)

Dear [REDACTED],

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200

Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.39 Email sent to NT Fisheries (22 September 2023)

Dear NT Fisheries,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and

associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

22 September 2023

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 613 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website at woodside.com. You can also choose to receive updates on our consultation activities by subscribing on our website.

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	<p>Continuation of activities:</p> <ul style="list-style-type: none"> Routine oil production, crude oil offloading and associated activities; Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. 	<p>Continuation of activities:</p> <ul style="list-style-type: none"> Routine oil production, crude oil offloading and associated activities; Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. <p>Future development activities are being considered for the Ngujima-Yin FPSO including:</p> <ul style="list-style-type: none"> A subsea tie back of two new wells to existing subsea infrastructure; and A new flowline to provide fuel gas from a neighboring field to the facility. <p>The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline.</p>

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website at woodside.com. You can also choose to receive updates on our consultation activities by subscribing on our website.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA. The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

22 September 2023

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website woodside.com. You can also subscribe to receive updates on our consultation activities by subscribing on our website.

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

1.44 Email sent to 350 Australia (350A), Greenpeace Australia Pacific (GAP), Australian Conservation Foundation (ACF), Australian Marine Conservation Society (AMCS), Conservation Council of Western Australia (CCWA), Sea Shepherd Australia (SSA) (26 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.45 Email sent to Pearl Producers Association (26 September 2023)

Dear Stakeholder,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 629 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Dear Titleholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. 1.47 Email sent to Skye Napoleon; Petroleum; Resources (27 September 2023)

Dear Titleholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.48 Email sent to New Zealand Oil and Gas (NZOG) Compass (27 September 2023)

Dear Titleholder,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 642 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.49 Email sent to Karratha and Districts Chamber of Commerce and Industry (27 September 2023)

Dear Karratha and Districts Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 646 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.50 Email sent to Exmouth Chamber of Commerce and Industry (27 September 2023)

Dear Exmouth Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: V0000AH0500

Revision: 0

Page 650 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Controlled Ref No: V0000AH0500

Revision: 0

Page 654 of 892

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

There are some questions and answers at the bottom of this email explaining why you have received this email.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing. Estimated End of Field Life: 2035.	Production Commenced: 2008. Routine Operations: Ongoing. Estimated End of Field Life: 2028.
Exclusionary/ Cautionary Zone	The location of the Pyrenees FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.	The location of the Ngujima-Yin FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.
Infrastructure	Key infrastructure includes, but is not limited to: <ul style="list-style-type: none"> • 1 FPSO • 1 Disconnectable Turret Mooring system, incorporating the risers • 11 flexible risers and 2 umbilical risers distributed across 4 Midwater Arches and 1 flexible riser with buoyancy modules • 27 Xmas trees/wells • 10 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible Flowlines and Jumpers 	Key infrastructure includes, but is not limited to: <ul style="list-style-type: none"> • 1 FPSO • 1 Disconnectable Turret Mooring system, incorporating the risers • 6 flexible risers with buoyancy modules • 28 Xmas trees/wells • 4 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible and Rigid Flowlines and Jumpers • Multi-Phase Pumps • Subsea pig launch and receiver facility

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Questions and Answers

Why have I received this email?

Your organisation has been identified by Woodside as potentially being relevant to consult with for Environment Plans relating to our operations of the Pyrenees Floating Production Storage and Offloading (FPSO) Facility and Ngujima-Yin FPSO Facility, located off Exmouth, WA.

Woodside consults relevant persons to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential effects of the operations on the environment. This is the intended outcome of consultation.

But I'm not located near Exmouth?

Late last year a Federal Court decision looked at the way the Australian offshore energy industry consults relevant persons. Upon the establishment of this new case law, Woodside now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

Woodside uses the environment that may be affected or 'EMBA' to help identify who may be a relevant person. This [brochure](#) from the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has more information regarding consultation on offshore petroleum environment plans.

What is an EMBA?

The environment that may be affected or EMBA is the largest area where unplanned events from the operations off Exmouth could have an environmental consequence (impact) based on modelling.

For the Pyrenees and Ngujima-Yin Facility Operations Environment Plans, the EMBA represents the merged area of many possible modelled paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of release. This is based on oil trajectory modelling.

What does oil trajectory modelling involve and why is the EMBA so big?

The process of identifying and mapping out an EMBA for each petroleum activity is primarily for assessment of potential impacts and oil spill response planning purposes. As the events that may lead to a spill are unknown, for planning purposes, the worst case credible spill scenario is identified. This looks at the worst case credible volume, location, timing etc, and modelling is undertaken to understand where the oil may go, if unmitigated (i.e. if no response strategies are applied).

To account for weather and ocean current variables, the spill scenario is modelled multiple times (typically 100 to 200 times) to see where the weather and ocean currents may take the oil.

All the modelled spill trajectories are then merged to create an EMBA. This means in the highly unlikely event a hydrocarbon release does occur, the entire EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

In order to be able to pre-prepare, response plans are built around the potential impacts resulting from a selection of the worst case modelling runs.

Where can I get more information?

For more information on consultation and oil spill modelling visit the [NOPSEMA website](#).

1.52 Email sent to Shire of East Pilbara (02 October 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.
