Recfishwest		
Summary of information provided and record of consultation for this EP:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 14 September 2023, Woodside emailed Recfishwest advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Recfishwest following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 25 October 2023, Recfishwest responded (SI Report, reference 16.1) thanking Woodside for its email and:
  - (1) Advised it had no objection to the proposed activities.
  - (2) Requested to be kept informed as activities progressed, given that the areas surrounding the operations were accessed by recreational fishers.
  - Noted another EP (consulted in conjunction with this EP) included production from an additional two wells and the operation of a new fuel gasline, with associated drilling, construction and installation activities to be subject to separate future EPs.
- On 1 November 2023, Woodside responded (SI Report, reference 16.2) thanking Recfishwest for its feedback. Woodside:
  - (1) Noted Recfishwest had no objections to the proposed activities.
  - (2) Confirmed it would continue to inform Recfishwest on the activities' progression.
  - Confirmed it would consult Recfishwest on future EPs related to the other operations EP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Recfishwest had no objection to the proposed activities.	(1) <b>Woodside assessment:</b> Woodside noted Recfishwest had no objections. <b>Woodside response:</b> Woodside acknowledged that Recfishwest had no objections to the activity.	(1) Not required.
(2) Recfishwest requested to be kept informed as activities progressed, given the areas surrounding the operations were accessed by recreational fishers.	(2) <b>Woodside assessment:</b> Woodside accepts that Recfishwest should be kept informed as activities progress. <b>Woodside response:</b> Woodside confirmed it would keep Recfishwest informed as the activities progressed, given that the areas surrounding the operation were accessed by recreational fishers.	(2) Woodside engages in ongoing consultation throughout the life of an EP and will provide notification of significant change, as appropriate, to Recfishwest as referenced in Section 7.13.3.1 of the EP.

<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside has consulted Recfishwest, Marine Tourism Association of WA, WA Game Fishing Association and relevant individual recreational marine users.</p> <p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.</p> <p>No additional measures or controls are required.</p>
--	--	---

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Recfishwest for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Recfishwest on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Recfishwest over a 10-month period.

**Marine Tourism WA**

**Summary of information provided and record of consultation for this EP:**

- On 14 September 2023, Woodside emailed Marine Tourism WA advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Marine Tourism WA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BP Developments for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to BP Developments on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to BP Developments Australia over a 10-month period.

**Carnarvon Energy**

**Summary of information provided and record of consultation for this EP:**

- On 14 September 2023, Woodside emailed Carnarvon Energy advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 28 September 2023, Carnarvon Energy responded thanking Woodside for its email and confirming it had no further request for information after reviewing the consultation material (SI Report, reference 18.1).

<ul style="list-style-type: none"> <li>(1) On 29 September 2023, Woodside responded thanking Carnarvon Energy for its email and noted it had no further requests for information (SI Report, reference 18.2).</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Carnarvon Energy advised it had no further requests for information.	(1) <b>Woodside assessment:</b> Woodside noted Carnarvon Energy has no comments. <b>Woodside response:</b> Woodside thanked Carnarvon Energy and noted it had no further requests for information.	(1) Not required.
Whilst feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.
<b>Outcomes of consultation</b>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Carnarvon Energy for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:</p> <ul style="list-style-type: none"> <li>Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.</li> <li>Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.</li> <li>Consultation Information provided to Carnarvon Energy on 14 September 2023 based on their function, interest and activities.</li> <li>Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.</li> <li>Woodside has addressed and responded to Carnarvon Energy over a 10-month period.</li> </ul>

**INPEX Alpha**

**Summary of information provided and record of consultation for this EP:**

- On 14 September 2023, Woodside emailed INPEX Alpha advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to INPEX Alpha following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with INPEX Alpha for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to INPEX Alpha on 14 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided INPEX Alpha with the opportunity to provide feedback over a 10-month period.

**JX Nippon O&G Exploration (Australia)**

**Summary of information provided and record of consultation for this EP:**

- On 14 September 2023, Woodside emailed JX Nippon O&G Exploration (Australia) advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to JX Nippon O&G Exploration (Australia) following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with JX Nippon O&G Exploration (Australia) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to JX Nippon O&G Exploration (Australia) on 14 September 2023 based on their function, interest and activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided JX Nippon O&G Exploration (Australia) with the opportunity to provide feedback over a 10-month period.

**Vermilion Oil & Gas**

**Summary of information provided and record of consultation for this EP:**

- On 14 September 2023, Woodside emailed Vermilion Oil & Gas advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Vermilion Oil & Gas following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Vermilion Oil & Gas for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Vermilion Oil & Gas on 14 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

--	--	---

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Energy Producers (AEP) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to AEP on 13 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided AEP with the opportunity to provide feedback over a 10-month period.

**Traditional Custodians and nominated representative corporations**

**Murujuga Aboriginal Corporation (MAC)**  
 MAC is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.

**Historical Engagement**

- On 18 July 2023, Woodside emailed MAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that MAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 23.1).
- On 26 July 2023, Woodside emailed MAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 23.2).

- **(1)** On 1 September 2023, MAC emailed a letter to Woodside responding to Woodside’s query regarding consultation (SI Report, reference 23.3). MAC clarified the following:
  - MAC consulted with women appointed to their Circle of Elders regarding the query.
  - MAC is comfortable that the women in the Circle of Elders are the right people to be consulted about these matters.
  - MAC notes that it would be extremely unusual for knowledge to be held by an individual without surrounding groups knowing about it.
  - The Circle of Elders themselves represent the Ngarda-Ngarli; the collective term for the Traditional Custodians who look after Murujuga Country.
- **(1)** Woodside accepts the information provided by MAC.

**Summary of information provided and record of consultation for this EP:**

- On 17 November 2023, Woodside emailed MAC advising of the proposed activity (Record of Consultation, reference 1.63) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that MAC and its members may have within the EMBA, information on how MAC would like to engage, and requested that MAC provide information to other individuals as required.
- **(2)** On 17 November 2023, MAC emailed Woodside confirming receipt of materials and informed that they would send off for review (SI Report reference, 23.4).
- **(2)** On 5 January 2024, Woodside emailed MAC a table displaying the status of Woodside’s outstanding EP consultations with MAC. Woodside offered to set up a consultation meeting to work through this table with MAC. No response has been received for this activity. Continued correspondence has occurred in relation to other activities (SI Report, reference 23.5).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> On 1 September 2023, MAC clarified that they were the appropriate body corporate and cultural authority over Murujuga.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside accepts and respects MAC’s position as the appropriate body corporate and cultural authority over Murujuga. <b>Woodside response:</b> Woodside continues to consult and engage with MAC as the appropriate body corporate and cultural authority over Murujuga.</p>	<p><b>(1)</b> Not required.</p>
<p><b>(2)</b> MAC confirmed it had received the consultation materials for this EP but has not provided further feedback, questions or objections to the activity.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside accepts MAC has no feedback on the activity at this time. <b>Woodside response:</b> Woodside accepts MAC has no feedback on the activity at this time. Woodside continues to consult and engage with MAC as the</p>	<p><b>(2)</b> Not required.</p>

	appropriate body corporate and cultural authority over Murujuga.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on MAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Summary Information Sheets developed by Indigenous staff to MAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that MAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation with MAC in November 2023. Woodside has addressed and responded to MAC over eight months, demonstrating a “reasonable” period of consultation.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MAC’s functions, interests or activities.

#### **Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC)**

NTGAC is established under the Native Title Act 1993 by the Baiyungu people to represent the Baiyungu people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical engagement:**

- (1) On 17 July 2023, in response to consultation requests on activities not relevant to this EP, NTGAC/YMAC provided Woodside with a proposed consultation framework for PBC’s to consult with oil and gas companies. (SI Report, reference 24.1) They requested that Woodside run a strategic planning workshop with NTGAC to develop the benefits that Woodside can provide under the consultation agreement, to discuss the consultation framework and determine the best way to implement it.
- On 19 July 2023, Woodside emailed NTGAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that NTGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 24.2)
- (1) On 24 July 2023, Woodside replied to NTGAC/YMAC’s email of 17 July 2023 confirming they would be happy to use the workshop to discuss the consultation framework, identification of opportunities and relationship building while also consulting on activities not relevant to this EP. (SI Report, reference 24.3) Woodside also suggested the workshop be jointly run and not run by Woodside as suggested in the email of 17 July 2023 and requested a meeting to prepare.
- (1) On 25 July 2023, Woodside emailed NTGAC/YMAC indicating support of a sustainable consultation framework and attaching Woodside’s planned Program of Ongoing Engagement with Traditional Custodians. (SI Report, reference 24.4)
- (1) On 26 July 2023, Woodside emailed NTGAC/YMAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 24.5).
- (1) On 15 August 2023, Woodside presented to NTGAC/YMAC about several activities unrelated to this EP (SI Report, reference 24.6). At the meeting, a proposed framework for consultation was discussed, involving Woodside funding a General Project Report to be written by an independent suitably qualified and experienced consultant, to be provided by NTGAC/YMAC initially, and then onto Woodside. Terms for ongoing engagement were discussed, including frequency, participation, and content in the context of the proposed General Project Report.
- (1) On 31 August 2023, Woodside emailed NTGAC/YMAC confirming outcomes of a meeting held on 15 August 2023, on activities not relevant to this EP, including that YMAC would provide a first draft of a consultation agreement. (SI Report, reference 24.7)

#### **Summary of information provided and record of consultation for this EP:**

- On 23 October 2023, Woodside emailed NTGAC (via YMAC) advising of the proposed activity (Record of Consultation, reference 1.64) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that

NTGAC and its members may have within the EMBA, information on how NTGAC would like to engage, and requested that NTGAC provide information to other individuals as required.

- On 13 November 2023, Woodside emailed NTGAC (via YMAC) noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet (SI Report, reference 24.8).

**Ongoing engagement:**

- (1) On 14 December 2023, Woodside emailed YMAC (SI Report, reference 24.9) attaching the Program of Ongoing Consultation and advised that Woodside wanted to progress negotiations on consultation frameworks with groups represented by YMAC (including NTGAC). Woodside proposed the protocol would include (among other things):
  - The procedures Woodside will follow when a submission requires consultation.
  - Initial and ongoing consultation in relation to activities.
  - Agreement as to how Woodside will provide NTGAC with the information NTGAC requires to make free, prior and informed decisions about Woodside’s Eps.
  - Agreement as to how NTGAC will provide feedback and how that can best be represented in Eps.
  - An agreed schedule of rates for NTGAC’s participation in consultation.
  - How the outputs of the consultations will be managed.
- On 21 December 2023, Woodside emailed NTGAC/YMAC with a list of activities, as requested, including this activity (SI Report, reference 24.10).
- (1) On 28 February 2024, Woodside emailed NTGAC/YMAC with a letter (SI Report, reference 24.11) setting out the draft terms of an agreement between NTGAC and Woodside, the agreement (among other things) included the following topics:
  - Sufficient Information
  - Reasonable Period.
  - Provision of Information
  - Objection or claims
  - Publications
  - Cost and termination.
- On 29 February 2024, NTGAC/YMAC emailed Woodside acknowledging receipt of the information (SI Report, reference 24.12).
- No response has been received for this activity. Continued correspondence has occurred in relation to other activities.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
(1) NTGAC via YMAC to develop first draft of a Consultation Agreement.	(1) <b>Woodside assessment:</b> Woodside is supportive of a sustainable consultation framework and has a	(1) Woodside is implementing a program to actively support Traditional Custodians’ capacity for ongoing engagement

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>commitment to ongoing consultation with Traditional Custodians for the life of an EP.</p> <p><b>Woodside response:</b> Separate from consultation for this activity under regulation 25 of the Environment Regulations, Woodside has sent a draft agreement to NTGAC via YMAC in February 2024. This would be used to frame ongoing consultation to occur as part of Woodside’s commitment to consultation post regulation 25 of the Environment Regulations. The draft agreement is under review by NTGAC/YMAC.</p>	<p>and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes continued engagement regarding NTGAC’s proposed Consultation Framework and General Report which will be applied to ongoing consultation.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NTGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on NTGAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Summary Information Sheets developed by Indigenous staff to NTGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that NTGAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with NTGAC in October 2023. Woodside has addressed and responded to NTGAC over eight months, demonstrating a “reasonable” period of consultation.

Woodside asked NTGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NTGAC’s functions, interests or activities.

#### **Buurabalayji Thalanyji Aboriginal Corporation (BTAC)**

BTAC is established under the Native Title Act 1993 by the Thalanyji people to represent the Thalanyji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical Engagement:**

- On 20 February 2023, BTAC sent a letter to Woodside (SI Report, reference 25.1), in relation to another project, confirming that:
  - (1) BTAC, on behalf of Thalanyji people, had interests in archaeological sites on nearshore islands including the Montebello islands, Barrow Island and Mackerel Islands, and had a cultural obligation to care for sea country and environmental values.
  - (2) BTAC had not specifically developed values regarding Sea Country into a format that could be articulated for consultation.
  - (3) BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.
  - (4) BTAC proposed that Woodside enter into a consultation or engagement framework agreement to set out a process for ongoing consultation.
- (4) On 14 June 2023, Woodside emailed BTAC draft consultation framework principles and seeking opportunity to work with BTAC on progressing the principles (SI Report, reference 25.2).
- (4) On 10 July 2024, following a telephone conversation on 7 July 2023, Woodside met and emailed BTAC requesting feedback to a number of Woodside activities and EPs, not related to this activity, that were due to be submitted to NOPSEMA, and Woodside’s commitment to ongoing consultation governed by a framework agreement (SI Report, reference 25.3).

- **(4)** On 10 July 2023, BTAC emailed a letter to Woodside regarding collaboration between the two parties to develop a framework agreement and what would be addressed in the agreement, that Woodside would provide pictorial map-based presentations relating to a number of EPs and Woodside activities, and that BTAC reserved the right to make contact with NOPSEMA relating to BTAC's interest and values which may be affected by Woodside's activities (SI Report, reference 25.4).
- **(4)** On 14 July 2023, Woodside emailed BTAC confirming receipt of the 10 July letter and reiterated Woodside's commitment to ongoing consultation regarding EPs, progressing the draft consultation framework, queries relating to other activities and informing that BTAC could make representations directly to NOPSEMA (SI Report, reference 25.5).
- On 19 July 2023, Woodside emailed BTAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that BTAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 25.6).
- **(6)** On 20 July 2023, Woodside emailed BTAC post a meeting on 10 July 2023, reiterating Woodside's commitment to ongoing consultation with BTAC regarding EPs. Woodside reinforced that BTAC can make representations directly with NOPSEMA concerning EPs and ongoing consultation (SI Report, reference 25.7).
- **(4)** On 26 July 2023, Woodside emailed BTAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 25.8).
- On 26 July 2023, Woodside emailed BTAC to confirm a proposed meeting on Friday on 28 July 2023 and included the draft presentation to be delivered by Woodside at the meeting (SI Report, reference 25.9).
- On 28 July 2023, BTAC emailed Woodside post a meeting to discuss ongoing consultation and engagement (SI Report, reference 25.10). Key matters discussed were:
  - **(5)** Woodside has allocated funding for engagement with BTAC
  - **(5)** Woodside is agreeable in-principle for entering a Costs Acceptance Letter with BTAC
  - **(6)** Woodside seeks a meeting with BTAC Board to discuss offshore activities and EPs
  - **(2,4)** Woodside prepare a draft framework agreement for BTAC's consideration which includes cultural values mapping of offshore areas, capacity building for BTAC and consultation framework.
- **(2, 3, 4)** On 31 July 2023, Woodside emailed BTAC in response to the 28 July 2023 email to clarify a meeting outcomes about another activity and would be oncoitic about the draft framework agreement in due course (SI Report, reference 25.11). The email included three attachment – consent for grant of license, proposal for ethnographic assessment of sea country values in relation to woodside activities, and activity relating to another project.
- On 15 August 2023, Woodside emailed BTAC regarding the email correspondence on 31 July including the three original attachments (SI Report, reference 25.12).
- On 22 August 2023, BTAC emailed Woodside in response to the 31 July and 15 August emails and attachments, to confirm that BTAC would organise a meeting in due course to discuss content, issues and feedback (SI Report, reference 25.13).
- On 23 August 2023, Woodside emailed BTAC to confirm the 22 August email, reinforcing that some matters were pressing and required discussion as soon as possible. Woodside also noted that matters for discussion included support by Woodside of BTAC's capacity and priority areas previously identified by BTAC (SI Report, reference 25.14).

**Summary of information provided and record of consultation for this EP:**

- On 11 October 2023, Woodside emailed BTAC advising of the proposed activity (Record of Consultation, reference 1.65) and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that BTAC and its members may have within the EMBA.
- **(4)** On 13 October 2023, legal practice Banks-Smith and Associates emailed Woodside confirming they acted for BTAC on NOPSEMA matters. Among other things, they noted, they required an indemnity clause in the proposed framework agreement against any court action that arose from a claim against BTAC in regard to the consultation they engaged on with Woodside EP's (SI Report, reference 25.15).
- **(4)** On 31 October 2023, BTAC (via legal representative) emailed Woodside, requesting a response to the email about indemnifying BTAC (SI Report, reference 25.16).
- On 1 November 2023, BTAC (via legal representative) emailed Woodside inviting Woodside to present on Woodside activities at a 1-hour slot in the BTAC Common Law Holders meeting on 27 November 2023 (SI Report, reference 25.17).
- On 1 November 2023, Woodside emailed BTAC (via legal representative) accepting the offer to present at the Common Law Holders meeting and offering to pay costs for the meeting (SI Report, reference 25.18).
- **(4)** On 2 November 2023, Woodside emailed BTAC (via legal representative) noting they would not agree to the request to indemnify BTAC against any court proceedings as a result of consultation they engage in with Woodside on EPs (SI Report, reference 25.19). Woodside re-iterated their wish to progress the framework agreement to build their relationship with BTAC. Woodside again noted that they wish to progress other matters, including the commitment to mapping BTAC's sea country values.
- **(4)** On 2 November 2023, BTAC (via legal representative) emailed Woodside requesting more detail about Woodside not supporting the indemnity request (SI Report, reference 25.20).
- On 3 November 2023, BTAC (via legal representative) emailed Woodside confirming that BTAC would like Woodside to present to a BTAC members meeting on 27 November 2023 in Carnarvon (SI Report, reference 25.21).
- On 18 November 2023, Woodside emailed BTAC (via legal representative) with further information about why they will not indemnify BTAC as requested in the 13 October 2023 email (SI Report, reference 25.22). Woodside explained that it could harm genuine engagement, may promote behaviours in others who may become aware of the indemnity by Woodside, and it would not be good practice to provide an indemnity in relation to the act or omission of other parties that Woodside would not necessarily engage with. Woodside again noted their commitment to build an ongoing relationship with BTAC.
- **(3, 4)** On 27 November 2023, Woodside attended and presented at the BTAC Common Law Holders meeting (SI Report, reference 25.23). The one-hour timeslot did not allow for taking feedback in relation to EPs, but the Common Law Holders meeting were made aware that Woodside had been attempting to meet since January 2023 on activities and had agreed to pay for reasonable consultation costs as well as fund Sea Country mapping but that these offers had not been taken up. BTAC members were very interested in an ongoing relationship and discussed sea country mapping, which Woodside had responded to in writing earlier in 2023, Woodside agreed to re-send the relevant correspondence to the new CEO. BTAC noted they would invite Woodside to attend a meeting with BTAC early in 2024, a collaborative agreement will be settled and further ongoing consultation on all relevant Eps will continue in order of priority for BTAC and Woodside.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 7 December 2023, Woodside emailed BTAC (via legal representative) requesting a response to the email of 18 November 2023 in relation to their request and Woodside's response on indemnification (SI Report, reference 25.24). Woodside noted that the framework agreement has not been finalised to date but would include the following:
  - Agreement between parties to consult in a meaningful and genuine manner.
  - Procedure Woodside will follow when a submission requires consultation, which would include notification and an invitation to meet.
  - Initial and ongoing consultation about activities.
  - How Thalanyji provides feedback and how to represent that feedback in submissions.
  - Agreed schedule of rates.
  - How to manage the outputs of consultation.
  - Woodside requested to meet to progress discussions with BTAC.
- (1) On 7 December 2023, Woodside emailed BTAC forwarding correspondence received from and correspondence sent to the previous CEO dated 20 February 2023 and dated 17 March 2023, confirming support for recording sea country values and confirming anthropological support (SI Report, reference 25.25). Woodside confirmed support to pay reasonable costs for ethnographic/anthropological support for mapping and recording sea country values. Woodside requested to be contacted to enable progress on the above matters. BTAC's letter of 20 February 2023 in relation to other activities noted interests in archaeological sites on nearshore islands including the Montebello and Barrow Islands, they noted a cultural obligation to care for sea country and environmental values.
- (3) On 7 December 2023, BTAC emailed Woodside accepting the offer to take up sea country mapping and research. BTAC requested a meeting in the week of 15 January 2024 to plan for upcoming activities (SI Report, reference 25.26).
- (5) On 8 December 2023, BTAC (via legal representative) emailed Woodside in relation to settling finance matter, noting they would wait to schedule a meeting with BTAC once financials sorted (SI Report, reference 25.27).
- On 8 December 2023, Woodside emailed BTAC (via legal representative) requesting further details on finances for the framework agreement, noting that Woodside's policies require itemised estimates for services (SI Report, reference 25.29).
- (5) On 11 December 2023, BTAC (via legal representative) emailed acknowledging costs estimates would be provided shortly and requesting availability to meet with BTAC during January, February and March 2024 (SI Report, reference 25.29).
- On 12 December 2023, BTAC emailed Woodside asking if 17 January 2024 was a suitable date to meet (SI Report, reference 25.30).
- On 12 December 2023, Woodside emailed BTAC (via legal representative) noting that BTAC had suggested a meeting during the week of 15 January 2024 to discuss sea country mapping. Woodside suggested that they would include time to progress the framework agreement and present on the status of current EPs (SI Report, reference 25.31).
- On 15 December 2023, BTAC (via legal representative) emailed Woodside requesting a copy of the slide presentation from the meeting of 27 November 2023 (SI Report, reference 25.32).
- On 18 December 2023, Woodside emailed BTAC (via legal representative) a copy of the slide presentation as requested from the meeting of 27 November 2023 (SI Report, reference 25.33).

- (5) On 19 December 2023, Woodside emailed BTAC agreeing to meet on 17 January 2024, Woodside provided an example of costings provided by other PBCs and noted they would not be able to pay legal fees if the framework agreement and EPs were not discussed. Woodside requested other meeting dates if the 17 January 2024 meeting was only to discuss sea country mapping (SI Report, reference 25.34).
- (4,5) On 19 December 2023, BTAC (via legal representative) emailed Woodside noting that they had an understanding that the EP consultation and framework agreement would be discussed at the 17 January 2024 meeting (SI Report, reference 25.35). BSA queried the detail of the information being sought by Woodside on funding.
- (5) On 20 December 2023, Woodside emailed BTAC (via legal representative) noting that they were seeking a cost estimate and required this prior to BSA being present at the BTAC meeting if they wished to be funded for attendance (SI Report, reference 25.36).
- (5) On 9 January 2024, Woodside emailed BTAC confirming a meeting on 17 January 2024 to discuss sea country mapping, requesting logistics and cost coverage estimate (SI Report, reference 25.37).
- On 16 January 2024, BTAC (via legal representative) emailed Woodside confirming meeting of 17 January 2024 with BTAC and requesting the names of Woodside attendees (SI Report, reference 25.38).
- On 16 January 2024, Woodside emailed BTAC (via legal representative) with the names of Woodside attendees, as requested (SI Report, reference 25.39).
- On 17 January 2024, Woodside met with BTAC and discussed (among other things) (SI Report, reference 25.40):
  - (2,3) Sea country mapping, confirming:
  - BTAC choose their own experts for ethnographic survey.
  - BTAC retain intellectual property of material and may request information not be provided.
  - Fieldwork required with a preferred commencement in April, with Woodside personnel in attendance as guided by BTAC.
  - (6) BTAC prefer early notice on EPs, if possible.
  - (7) BTAC keen on employment/training opportunities and opportunities for rangers.
  - (6) BTAC to form a committee for consultation on EPs.
- (7) On 17 January 2024, Woodside emailed BTAC information about training pathways as discussed at the meeting with BTAC on 17 January 2024 (SI Report, reference 25.41).
- (2,3) On 8 February 2024, Woodside emailed BTAC confirming support in articulating Sea Country values and requesting an update on the planned fieldwork (relating to another activity) proposed in April. Woodside also provided information about a site inspection relating to another activity (SI Report, reference 25.42).
- (2) On 8 February 2024, BTAC emailed Woodside informing that a scope of work would be generated to inform identifying and articulating Sea Country values and that the proposed dates for the site inspection relating to another activity were agreeable with BTAC (SI Report, reference 25.43).
- On 8 February 2024, Woodside emailed BTAC, thanking for the update (SI Report, reference 25.44).

- (4) On 28 February 2024, Woodside emailed BTAC a draft consultation agreement for BTAC’s consideration which included the aims of consultation, proposed consultation agreement details and a consultation meeting framework (SI Report, reference 25.45). Woodside invites BTAC to propose a schedule of rates and other details relating to ongoing engagements.
- (4) (4) Between 28 February – 5 March July 2024, Woodside and BTAC (via legal representative) exchanged emails to progress the draft consultation framework (SI Report, reference 25.46 – 25.48).
- (6) On 6 March 2024, Woodside emailed BTAC (via legal representative) to confirm a face to face meeting regarding another activity and corresponding EP (SI Report, reference 25.49).
- On 11 March 2024, BTAC (via legal representative) emailed Woodside to discuss Woodside meeting with two new BTAC committees to progress discussions relating to Woodside activities and EP consultation and engagement. BTAC requested available dates for Woodside representatives to attend committee meetings (SI Report, reference 25.50).
- On 25 March 2024, Woodside emailed BTAC (via legal representative) to confirm representation at BTAC committee meetings and that Woodside was agreeable to the dates that suited BTAC needs (SI Report, reference 25.51).
- On 15 April 2024, BTAC emailed Woodside to confirm that BTAC Board would be meeting on 23 May and possible dates for committee meetings was between 20 – 22 May – and for Woodside to advise of availability (SI Report, reference 25.52).
- On 15 April 2024, Woodside emailed BTAC requesting meeting face to face on 22 May 2024 (SI Report, reference 25.53).
- On 17 April 2024, BTAC emailed Woodside to confirm the 22 May meeting and would confirm meeting venue and time (SI Report, reference 25.54).
- On 22 April 2024, BTAC emailed Woodside to confirm meeting date, venue and time, and to advise of who from Woodside would be in attendance (SI Report, reference 25.55).
- (2) (3) On 22 May 2024, Woodside met with BTAC about this EP and others. Among topics not related to this EP, Woodside reiterated its commitment to supporting BTAC articulate Sea Country Values (SI Report, reference 25.56). Woodside has provided proposals to BTAC and is waiting for a response.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) BTAC have stated that their interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands, and BTAC has a cultural obligation to care for the environmental values of Sea Country.</p>	<p>(1) <b>Woodside assessment:</b> Given the EMBA for this activity extends to nearshore areas coastally adjacent to the Thalanyji native title determination area, these values may be relevant in the event of an unplanned hydrocarbon release. Woodside will engage with Traditional Custodians whose interests may be affected in the event of a hydrocarbon release, as outlined in Appendix I.</p>	<p>(1) Woodside updated Section 4.9.5 to record BTAC’s interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p><b>Woodside response:</b> Woodside has sought to engage BTAC in further assessments of sea country values. BTAC has not provided further detail regarding heritage value of places or cultural features of the Operational Area or the EMBA.</p>	
<p><b>(2)</b> BTAC have not specifically developed values regarding Sea Country into a format that could be articulated for consultation. BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Completion of an ethnographic assessment is not required to undertake or complete consultation under regulation 25 of the Environment Regulations and/or for a comprehensive description of the environment. Opportunity to undertake this work continues under the proposed Collaboration Agreement (see <b>(4)</b> below) as part of ongoing engagement. Woodside has been able to develop a robust understanding of Thalanyji Sea Country cultural values and features in absence of this assessment. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP). <b>Woodside response:</b> Woodside agreed to support the articulation and recording of sea country values. This offer has been taken up and progress has commenced towards the desired outcome. The draft Collaboration Agreement at <b>(4)</b> below includes support for recording and articulation of Sea Country values.</p>	<p><b>(2)</b> Woodside has taken all reasonable steps to identify cultural features and heritage features of Thalanyji people within the EMBA. This is described in Section 4.9.5. The proposed Collaboration Agreement <b>(4)</b> enables an ethnographic survey to be undertaken at a later date. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>
<p><b>(3)</b> Requested Woodside supports BTAC in obtaining technical advice relating to the proposed activities which were sent to BTAC.</p>	<p><b>(3)</b> <b>Woodside assessment:</b> In February 2024, BTAC engaged a consultant who is completing a scope of work to inform BTAC of costings for articulating sea country values. Woodside considers it beneficial for Thalanyji to have technical advice to ensure the delivery of an outcome that does justice to the work involved to record the sea country values.</p>	<p><b>(3)</b> No additional measures or controls are required.</p>

	<p><b>Woodside response:</b> Woodside has offered reasonable financial support for technical advice and other support this has now been taken up. The draft Collaboration Agreement at (4) below includes technical support for recording of sea country values.</p>	
<p>(4) BTAC proposed a Collaboration Agreement as an appropriate mechanism to provide ongoing feedback to Woodside regarding its activities.</p>	<p>(4) <b>Woodside assessment:</b> Woodside is committed to ongoing consultation with acknowledges BTAC proposal for a Collaboration Agreement <b>Woodside response:</b> Separate from consultation under regulation 25 of the Environment Regulations, Woodside has drafted a Collaboration Agreement with BTAC and is awaiting final internal review. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p>	<p>(4) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes continued engagement regarding the Collaboration Agreement that Woodside seeks with BTAC, a draft of which includes support for BTAC to define and articulate sea values, provision of ongoing feedback and cost recovery. No additional measures or controls are required.</p>
<p>(5) BTAC does not endorse any consultation without appropriate cost recovery.</p>	<p>(5) <b>Woodside Assessment:</b> Woodside assesses that the proposed Collaboration Agreement is an appropriate mechanism for addressing appropriate cost recovery for BTAC. <b>Woodside response:</b> Woodside and BTAC have agreed on a Costs Acceptance Letter. Woodside has already offered BTAC support for technical advice (3), and informed BTAC that it will financially support consultation meetings.</p>	<p>(5) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes continued engagement regarding the Collaboration Agreement that Woodside seeks with BTAC, a draft of which includes support for BTAC to define and articulate sea values, provision of ongoing feedback and cost recovery. No additional measures or controls are required.</p>

<p>BTAC requested early notification on EPs and are interested in forming a committee for ongoing consultation on EPs.</p>	<p><b>Woodside assessment:</b> Woodside supports ongoing consultation being conducted in the most appropriate way for BTAC.</p> <p><b>Woodside response:</b> Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes continued engagement regarding the Collaboration Agreement that Woodside seeks with BTAC, a draft of which includes support for BTAC to define and articulate sea values, provision of ongoing feedback and cost recovery. No additional measures or controls are required.</p>
<p>(7) BTAC expressed desire to be involved in local emergency response capability, potentially via an Indigenous Ranger Program. Interested in opportunities for employment/training.</p>	<p>(7) <b>Woodside assessment:</b> Woodside considers value in having rangers on the ground, trained up in the highly unlikely event of a spill. It would be beneficial to an immediate response in an emergency situation.</p> <p><b>Woodside response:</b> Woodside has offered to support BTAC In January 2024 Woodside provided BTAC with information about a training/employment program.</p>	<p>(7) The Program for Ongoing Engagement with Traditional Custodians (Appendix G) includes commitments to social investment to support Indigenous Ranger programs, and support for Indigenous oil spill response capabilities. Based on engagement to date, no additional measures or controls are required.</p>
<p>Woodside has addressed objections and claims as noted above.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on BTAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheet and Summary Information Sheet developed by Indigenous staff to BTAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.</li> </ul>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that BTAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with BTAC in October 2023.
- Woodside has addressed and responded to BTAC over nine months, demonstrating a "reasonable" period of consultation.

Woodside asked BTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BTAC's functions, interests or activities.

**Yinggarda Aboriginal Corporation (YAC)**

YAC is established under the Native Title Act 1993 by the Yinggarda people to represent the Yinggarda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical engagement:**

- On 19 July 2023, Woodside emailed YAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that YAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 26.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 26 July 2023, Woodside emailed YAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 26.2).
- On 4 August 2023, Banks-Smith and Associates (BSA) emailed Woodside ((SI Report, reference 26.3) and confirmed it:
  - (1) Acted for YAC on NOPSEMA matters. Among other things it requested Woodside submit a consultation agreement for YAC's consideration.
  - (2) Requested Woodside reimburse YAC for legal fees relating to consultation activities.
- (1) On 14 September 2023, Woodside emailed YAC and BSA a consultation framework/agreement for consideration (SI Report, reference 26.4).

**Summary of information provided and record of consultation for this EP:**

- On 11 October 2023, Woodside emailed YAC advising of the proposed activity (Record of Consultation, reference 1.66) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that YAC and its members may have within the EMBA, information on how YAC would like to engage, and requested that YAC provide information to other individuals as required.
- (1) On 13 October 2023 BSA emailed Woodside confirming they acted for YAC on NOPSEMA matters. Among other things, they noted, they required an indemnity and hold harmless clause be included in the Framework Agreement to protect against potential exposure to activist litigation (SI Report, reference 26.5).
- (1) On 2 November 2023, Woodside emailed BSA advising they would not agree to the request to indemnify YAC against any court proceedings as a result of consultation they engage in with Woodside on Eps (SI Report, reference 26.6).
- (1) On 2 November 2023, BSA emailed Woodside requesting information on the reason for Woodside's position not to include indemnification in the consultation agreement (SI Report, reference 26.7).
- (1) On 18 November 2023, Woodside emailed BSA with further information about why they would not indemnify YAC as requested in the 13 October 2023 email. Woodside explained that it could harm genuine engagement, may promote behaviours in others who may become aware of the indemnity by Woodside, and it would not be good practice to provide an indemnity in relation to the act or omission of other parties that Woodside would not necessarily engage with (SI Report, reference 26.8).
- On 28 December 2023, Woodside emailed YAC following up on the initial email sent on 11 October 2023. Woodside advised YAC the timeframe in which the EP will be submitted and requested the opportunity for consultation. No response has been received (SI Report, reference 26.9).
- On 12 February 2024, Woodside emailed YAC informing YAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024. Woodside sent links to NOPSEMA's NOPEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information (SI Report, reference 26.10).
- (1) On 8 March 2024, Woodside emailed YAC s draft consultation agreement for YAC's consideration, including the aims of consultation, proposed consultation agreement details and a consultation meeting framework (SI Report, reference 26.11).
- (2) On 12 March 2024, YAC (via legal representative) emailed Woodside a proposed schedule of rates, to be approved by the YAC Board (SI Report, reference 26.12).

- (2) On 27 March 2024, Woodside emailed YAC confirming the receipt of the 12 March email and would enquire on the status of YAC's proposed schedule of rates (SI Report, reference 26.13).
- (2) On 4 April 2024, Woodside emailed YAC (via legal representative) confirming it had reviewed the schedule of rates provided by YAC with amendments to present to the YAC Board, and requested the date of the next Board meeting (SI Report, reference 26.14).
- (2) On 8 April 2024, YAC (via legal representative) confirmed the YAC Board meeting was scheduled for 9 May 2024 and queried if Woodside wished to raise any matters with the Board, noting that the Board would seek financial compensation associated with legal and expert advice provided (SI Report, reference 26.15).
- On 10 May 2024, Woodside emailed YAC (via legal representative) apologising for not responding in time for a meeting on 9 May and proposing topics for discussion at a future meeting. These topics included environmental plan consultation (SI Report, reference 26.16).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p>(1) YAC requested a consultation agreement with Woodside and stated that they are unable to respond substantially until Woodside has provided a draft Consultation Framework Agreement which includes suggested timeframes to settle the agreement and timeframes for ongoing consultation with the Board.</p>	<p>(1) <b>Woodside assessment:</b> An agreement with YAC aligns with Woodside's Program of Ongoing Engagement with Traditional Custodians and will frame ongoing consultation processes. <b>Woodside response:</b> Woodside will finalise an agreement with YAC, although Woodside does not consider YAC's request for a consultation agreement as a pre-requisite for consultation under regulation 25 of the Environment Regulations. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff. Woodside has also provided a reasonable period and opportunity for consultation. The draft agreement sent to YAC in September 2023, will be used to frame ongoing consultation during the life of the EP. Woodside are waiting on a response from YAC.</p>	<p>(1) Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented, the draft agreement with YAC (among other things) will set out the process for ongoing engagement. This is described further in the Program of Ongoing Engagement with Traditional Custodians (Appendix G). No additional measures or controls are required.</p>
<p>(2) YAC requested resourcing to engage in ongoing consultation.</p>	<p>(2) <b>Woodside assessment:</b> Woodside supports reasonable requests for resourcing. <b>Woodside response:</b> The proposed agreement outlined in (1), would be an effective mechanism to</p>	<p>(2) The Consultation Agreement will support any reasonable requests for funding for the purposes of consultation. No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	address resourcing for ongoing consultation.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls required.

<b>Outcomes of consultation</b>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with YAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on YAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to YAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> <li>• Asked for the consultation and information sheets to be distributed to members and individuals as required.</li> <li>• Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.</li> <li>• Advised that YAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).</li> </ul> <p><b>Reasonable Period:</b></p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.</li> <li>• Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.</li> </ul>		

- Woodside has addressed and responded to YAC over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked YAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YAC functions, interests or activities.

### **Kariyarra Aboriginal Corporation (Kariyarra)**

Kariyarra is established under the Native Title Act 1993 by Kariyarra people to represent the Kariyarra people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical engagement:**

- On 18 July 2023, Woodside emailed Kariyarra NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Kariyarra advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 27.1).
- On 26 July 2023, Woodside emailed Kariyarra Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 27.2).
- On 22 September 2023, Kariyarra (via legal representative) emailed Woodside and attached a letter setting out the following (SI Report, reference 27.3):
  - (1) Requesting a meeting with Kariyarra at a suitable time with an agreed agenda be arranged, including preparation of “co-management agreement”.
  - (1) An agreement which provides the most effective tool for the effective and ongoing consultation by Woodside with Kariyarra.
  - (2) An agreed budget to fund (among other things) preparation of Agreement, meetings, and specialist advice.
  - (3) Noting that Kariyarra asserted sea rights in their native title claim. (Note: Native title was found by the Federal Court not to exist in the sea in the Kariyarra determination).
  - Contact protocols going forward.
- (2) On 28 September 2023, Kariyarra’s legal representative emailed Woodside (SI Report, reference 27.4) and provided a single figure non-itemised quote. The email attached a letter dated 22 September, referring to another activity more broadly setting out:
  - (1) Proposed negotiations for a consultation protocol and co-management agreement.
  - (3) Referring to values and interests in sea country.
  - (3) Traditional fishing and gathering rights in the ocean.
  - (3) Presence of mythic snakes.

#### **Summary of information provided and record of consultation for this EP:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 October 2023, Woodside emailed Kariyarra advising of the proposed activity (Record of Consultation, reference 1.67) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KAC and its members may have within the EMBA, information on how KAC would like to engage, and requested that KAC provide information to other individuals as required.
- **(2)** **(2)** Between 20-23 October 2023, several emails were exchanged in relation to costs and Woodside reiterated the need for a reasonable quote (SI Report, reference 27.5 – 27.10).
- **(2)** On 26 October 2023, Kariyarra (via legal representative) emailed Woodside in relation to meeting with Kariyarra about EPs, stating Woodside's proposed cost structure was inadequate and would confer with EDO the Traditional Owners that have taken court action (SI Report, reference 27.11).
- **(2)** On 14 November 2023, Kariyarra (via legal representative) emailed Woodside in relation to costs of consultation meetings noting that they had taken their concerns to the EDO (SI Report, reference 27.12).
- **(1, 2)** On 22 November, Woodside emailed Kariyarra (via legal representative) reiterating a preparedness to fund consultation for consultation meetings and noting that Woodside were looking at implementing further environmental controls in relation to operations to reduce or remove any potential impact to Kariyarra sea country. Woodside said they wished to progress the framework agreement and suggested a full day meeting with Kariyarra. The agreement could set out a protocol for ongoing consultation on EPs where consultation for purposes of developing an EP is closed, and for consultation on development of EPs for new activities (SI Report, reference 27.13).
- **(1)** On 23 November 2023, Kariyarra (via legal representative) emailed Woodside agreeing to Woodside's proposal in the email of 22 November 2023, requesting a draft protocol and suggesting dates for a meeting between Kariyarra and Woodside (SI Report, reference 27.14).
- **(2)** On 23 November 2023, Kariyarra (via legal representative) emailed Woodside seeking costs already incurred by his services to Kariyarra (SI Report, reference 27.15).
- **(2)** On 29 November 2023, Kariyarra (via legal representative) emailed Woodside following a phone conversation with Woodside, confirming a meeting of 5 December 2023 in Karratha with Kariyarra and included quotes for meeting costs (SI Report, reference 27.16).
- **(1)** On 29 November 2023, Kariyarra (via legal representative) emailed Woodside with details of meeting with Kariyarra, request for proposed protocol and suggested Agenda for the meeting (SI Report, reference 27.17).
- **(1, 2)** On 29 November 2023, Woodside emailed Kariyarra (via legal representative) attaching Woodside's Program of Ongoing Consultation, a revised Agenda and suggesting the protocol between KAC and Woodside would set out (SI Report, reference 27.18):
  - How Woodside and Kariyarra would consult, the basic procedure for initial and ongoing consultation in relation to activities
  - Agreement as to how Woodside would provide Kariyarra information.
  - How KAC would provide feedback and how Woodside represents that into submissions.
  - Agreed schedule of rates.
  - How the outputs of the consultations are managed.
- On 29 November 2023, Kariyarra (via legal representative) emailed Woodside with an amended proposed Agenda for the upcoming meeting (SI Report, reference 27.19).

- On 5 December 2023, Woodside and Kariyarra met in Port Hedland (SI Report, reference 27.20). At the meeting Woodside:
  - (1) Presented on an Engagement Protocol.
  - What Woodside plan to do to protect the environment.
  - Presented the regulatory context.
  - Spoke about the biological studies that are carried out through different times of the year.
  - Discussed why Woodside were talking to Kariyarra.
  - Displayed the EMBA and how it was developed.
  - Showed projects open for ongoing consultation.
  - Spoke to what Woodside were seeking to understand from Kariyarra:
    - (3) How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - (4) Kariyarra asked how Woodside maintain the validity of controls over periods of times, sighting turtles as an example in terms of whether current controls would be sufficient into the future.
    - (4) Woodside noted that there is ongoing monitoring and Woodside would apply its Management of Change and Revision process to address controls.
    - Noted the EP's subject of ongoing consultation, including this EP.
    - Spoke to planned and unplanned risks.
  - (3) Kariyarra gave a presentation to Woodside on their sea country rights and duties:
    - Accessing sea country for fishing, trapping, crabbing catching turtle, hunting dugong, using stingray barbs for spears and collecting shellfish.
    - Visiting offshore islands at low tide.
    - Passing on traditional knowledge to children.
    - Secret habitat totems.
    - Having duties to look after and protect all of Kariyarra's sea country.
  - (1,2,3) Kariyarra outlined their consultation requirements to Woodside:
    - Co-designed and co-managed approach to protecting sea country.
    - On-going input into EPs.

- An agreement with Woodside.
  - Funding for sea rangers.
  - A positive and collaborative relationship.
- (1) On 13 December 2023, Kariyarra (via legal representative) emailed Woodside with outcomes of the 5 December meeting, confirming availability for a workshop in March 2024 and that KAC and Woodside aim to reach agreement on an engagement protocol by mid-2024 (SI Report, reference 27.21).
  - (1,2,3) On 20 December 2023, Woodside emailed Kariyarra (via legal representative) confirming the process for ongoing consultation, noting information to be included in this EP provided by Kariyarra and noting that Woodside looks forward to reaching agreement with Kariyarra on consultation process (SI Report, reference 27.22).
  - (3) On 20 December 2023, Kariyarra (via legal representative) emailed Woodside noting further information regarding sea country features and values Kariyarra wish noted within EPs (SI Report, reference 27.23).
  - (1) On 20 December 2023, Kariyarra (via legal representative) emailed Woodside acknowledging they looked forward to progressing an agreement in 2024 between Kariyarra and Woodside (SI Report, reference 27.24).
  - (1) On 13 January 2024, Kariyarra (via legal representative) emailed Woodside a letter expressing interest in signing a consultation agreement with Woodside. Kariyarra informed Woodside that the letter has been approved for signing by the Corporation Chair and waits for Woodside's response (SI Report, reference 27.25).
  - (1) On 22 January 2024, Kariyarra (via legal representative) emailed Woodside following up on previous correspondence (13 January 2024) and again expressing interest in signing a consultation agreement with Woodside (SI Report, reference 27.26).
  - (1) On 21 February 2024, Woodside emailed Kariyarra (via legal representative) thanking them for their email and attaching a draft consultation agreement letter outlining the objectives, terms and conditions, and proposed consultation schedule with Kariyarra (SI Report, reference 27.27).
  - On 21 February 2024, Kariyarra (via legal representative) emailed Woodside requesting a Word version of the letter sent on 21 February 2024 (SI Report, reference 27.28).
  - On 22 February 2024, Woodside emailed Kariyarra (via legal representative) attaching the requested version of the letter (SI Report, reference 27.29).
  - (1) On 12 March 2024, Kariyarra (via legal representative) emailed to Woodside an edited draft agreement for consideration (SI Report, reference 27.30).
  - On 12 March 2024, Woodside emailed Kariyarra (via legal representative) confirming receipt of draft agreement (SI Report, reference 27.31).
  - (1) On 4 April 2024, Woodside emailed KAC (via legal representative) with edits to the draft agreement and included comments for requests for further information (SI Report, reference 27.32).
  - (1) On 4 April 2024, Kariyarra (via legal representative) emailed Woodside raising concerns regarding Woodside's edits and would seek further instruction from KAC. No further response from Kariyarra regarding this matter (SI Report, reference 27.33).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	(1) <b>Woodside assessment:</b> An agreement with Kariyarra	(1)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>Kariyarra have noted that they want to engage on matters with Woodside and would like to develop an Engagement Protocol for (among other things) ongoing input into EP's and a collaborative relationship with Woodside.</p>	<p>aligns with Woodside's Program of Ongoing Engagement with Traditional Custodians and will frame ongoing consultation processes.</p> <p><b>Woodside response:</b> Woodside will finalise the draft agreement with Kariyarra which was sent to Kariyarra in February 2024. It will be used to frame ongoing consultation during the life of the EP. Woodside and Kariyarra have agreed to hold a workshop in early 2024 to progress towards finalising the agreement between Kariyarra and Woodside.</p>	<p>Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented. The draft agreement with Kariyarra (among other things) will set out the process for ongoing engagement. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). Woodside will continue to consult following acceptance of the EP, as set out in Section 7.13.3.1 of the EP.</p>
<p><b>(2)</b> Kariyarra has indicated they require costs to be met for Kariyarra to be engaged in consultations with Woodside.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> The proposed Agreement (See Point <b>(1)</b> above), would be an effective mechanism to address resourcing for ongoing consultation.</p> <p><b>Woodside response:</b> Woodside supports reasonable requests for resourcing. Woodside has agreed to fund reasonable costs and funded the 5 December 2023 meeting. Woodside will fund future meetings on an agreed costs basis to be set out in the draft agreement, sent to Kariyarra in February 2024.</p>	<p><b>(2)</b> Not required.</p>
<p><b>(3)</b> Kariyarra has informed Woodside about its Sea Country rights including during a face-to-face meeting on 5 December 2023, It mentioned:  Fishing, trapping, crabbing catching turtle, hunting dugong, and using stingray barbs for spears and collecting shellfish.  Visiting offshore islands at low tide.  Secret habitat tokens.  Having a duty to look after and protect sea country.</p>	<p><b>(3)</b> <b>Woodside assessment:</b> Woodside accepts that Kariyarra may have Sea Country values within the EMBA for the EP.</p> <p><b>Woodside response:</b> Woodside has noted the Kariyarra's values and interests in Sea Country in Section 4.9.</p>	<p><b>(3)</b> Woodside recognises KAC's connection to Sea Country (Section 4.9). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6.10 of the EP.</p>
<p><b>(4)</b> Kariyarra has asked how the validity of current controls are maintained and appropriate into the future.</p>	<p><b>(4)</b> <b>Woodside assessment:</b> Management of changes are in accordance with regulations 38 and 39 of the</p>	<p><b>(4)</b></p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>Environment Regulations. Appropriate controls and currency of those controls remain valid through applying new advice from external stakeholders and understanding changes in the environment.</p> <p><b>Woodside response:</b> Woodside applies its Management of Change and Revision process to address controls.</p>	<p>Management of Change and Revision process (refer to Section 7.5.1 of the EP). No additional measures or controls are required.</p>
<p>Woodside has addressed objections and claims as noted above.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kariyarra for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Kariyarra preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Kariyarra. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that Kariyarra can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Kariyarra over nine months, demonstrating a “reasonable period” of consultation.

Woodside asked Kariyarra if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP). Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Kariyarra functions, interests or activities.

#### **Wirrawandi Aboriginal Corporation (WAC)**

WAC is established under the Native Title Act 1993 by the Mardudhunera and Yaburara people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical engagement:**

- On 18 July 2023, Woodside emailed WAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that WAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 28.1).
- On 26 July 2023, Woodside emailed WAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 28.2).
- (1) On 31 August 2023, WAC emailed a letter to Woodside proposing a framework agreement to provide a streamlined, formalised approach to consultation between WAC and Woodside (SI Report, reference 28.3).
- (1) On 11 September 2023, WAC emailed Woodside with a copy of the letter of 31 August, commenting on EPs not relevant to this activity and requesting that Woodside and WAC enter into a framework agreement to provide for ongoing meaningful consultation with WAC and YM members on EPs on terms suitable to both parties within a reasonable period (nominally within the next 2-3 months) (SI Report, reference 28.4).
- (1) On 12 September 2023, Woodside emailed WAC confirming receipt of the email of 11 September (SI Report, reference 28.5).

#### **Summary of information provided and record of consultation for this EP:**

- On 3 October 2023, Woodside emailed WAC advising of the proposed activity (Record of Consultation, reference 1.68) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that WAC and its members may have within the EMBA, information on how WAC would like to engage, and requested that WAC provide information to other individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2023, Woodside and WAC exchanged email correspondence on the logistics of booking a meeting to discuss the environment plan. Woodside offered to meet WAC at a location suitable to them (SI Report, reference 28.6 – 28.9).
- On 20 October 2023, WAC and Woodside met (SI Report, reference 28.10) and discussed:
  - Current EPs and how parties intended to support each other through the process.
  - (1) Woodside’s intention to ensure that WAC was adequately consulted on all EPs.
  - WAC’s current corporate restructure and the impact of this on ability to engage in consultation.
  - (1) WAC’s interest in discussing a Framework Agreement once the new CEO was settled in.
- On 24 October 2023, Woodside sent a follow-up email enquiring if WAC had any questions relating to this EP and offering to schedule a consultation session with the members and/or Board of WAC (SI Report, reference 28.11).
- On 3 November 2023, Woodside emailed WAC following up regarding feedback on this activity and again attaching the Summary Information Sheet (Record of Consultation, reference 1.2). Woodside advised WAC it could take some additional time to consider the consultation. Woodside asked WAC to advise if it would like to set up a consultation meeting. No response has been received (SI Report, reference 28.12).
- On 19 December 2023, Woodside emailed WAC wishing a happy festive season, thanking WAC for their contributions throughout the year and offering availability for consultation sessions (SI Report, reference 28.13).
- On 19 December 2023, WAC emailed Woodside noting its thanks for Woodside support (SI Report, reference 28.14).
- (1) On 6 March 2024, Woodside emailed WAC a draft consultation framework for consideration relating to EPs and Woodside’s ongoing activities, including the aims of consultation, proposed consultation agreement details and a consultation meeting framework. Woodside invites WAC to propose a schedule of rates and other details relating to its engagements (SI Report, reference 28.15).
- On 6 March 2024, WAC emailed Woodside confirming receipt of the draft consultation framework and requesting a Word version (SI Report, reference 28.16).
- On 6 March 2024, Woodside emailed WAC the Word version of the draft consultation framework (SI Report, reference 28.17).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) WAC has requested that Woodside and WAC enter into a framework agreement to provide for ongoing meaningful consultation a desire for ongoing engagement and partnership through a Framework Agreement.</p>	<p>(1) <b>Woodside Assessment:</b> Woodside has confirmed and accepts that WAC is seeking to establish a framework agreement for the purposes of ongoing consultation with Woodside. <b>Woodside Response:</b> Separate from consultation under regulation 25 of the Environment Regulations, Woodside has sent a draft consultation agreement in March 2024 and will work with WAC to finalise the agreement.</p>	<p>(1) Although consultation for the purpose of regulations 25 of the Environment Regulations is complete, Woodside will continue to engage with WAC through ongoing engagement and continue to progress the consultation agreement as part of Woodside’s Program of Ongoing Engagement (Appendix G). No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>
--	--	---

<p><b>Outcomes of consultation</b></p>
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wirrawandi Aboriginal Corporation (WAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on WAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to WAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> <li>• Asked for the consultation and information sheets to be distributed to members and individuals as required.</li> <li>• Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.</li> <li>• Advised that WAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).</li> </ul> <p><b>Reasonable Period:</b></p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.</li> <li>• Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.</li> <li>• Woodside has addressed and responded to WAC over nine months, demonstrating a “reasonable period” of consultation.</li> <li>• Woodside asked WAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.</li> </ul>

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WAC functions, interests or activities.

#### **Robe River Kuruma Aboriginal Corporation (RRKAC)**

RRKAC is established under the Native Title Act 1993 by the Robe River Kuruma people to represent the Robe River Kuruma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical engagement:**

- On 18 July 2023, Woodside emailed RRKAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. Woodside requested that RRKAC advise of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 29.1).
- On 26 July 2023, Woodside emailed RRKAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 29.2).
- (1) On 11 August 2023, RRKAC emailed Woodside in response to another matter and in addition requesting ongoing consultation and training opportunities for rangers to prepare rangers for caring for sea and coastal country (SI Report, reference 29.3).
- (1) On 14 August 2023, Woodside emailed RRKAC thanking them for their response and requesting to meet to discuss training opportunities for rangers (SI Report, reference 29.4).
- On 14 August 2023, RRKAC emailed Woodside agreeing to a meeting and indicating they would arrange a suitable time for a discussion (SI Report, reference 29.5).
- (1) On 10 September 2023, Woodside emailed RRKAC's ranger focal point to organise a meeting to discuss training opportunities for rangers. Woodside also offered financial support to fund a marine scientist for another activity unrelated to this EP (SI Report, reference 29.6).
- On 10 September 2023, RRKAC and Woodside exchanged emails on an October date, time and location for a ranger meeting (SI Report, references 29.7 – 29.8).
- (2) On 15 September 2023, RRKAC emailed Woodside in relation to another activity and advised that they were not resourced to adequately respond to these matters, and would require Woodside to fund additional resources (SI Report, reference 29.9).
- (2) On 18 September 2023, Woodside sent two emails to RRKAC clarifying that Woodside can provide funding to support consultation activities and requested RRKAC provide quotes and attached a Proposed Program of Ongoing Engagement with Traditional Custodians. An email was also sent from our SAP system a vendor onboarding process (SI Report, reference 29.10 – 29.11).
- (1) On 3 October 2023, Woodside met with RRKAC to discuss opportunities for Woodside to support ranger programs (SI Report, reference 29.12).

#### **Summary of information provided and record of consultation for this EP:**

- On 3 October 2023, Woodside emailed RRKAC advising of the proposed activity (Record of Consultation, reference 1.69) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that RRKAC and its members may have within the EMBA, information on how RRKAC would like to engage, and requested that RRKAC provide information to other individuals as required.

- On 24 October 2023, Woodside sent a follow-up email enquiring if RRKAC had any questions relating to this EP and offering to schedule a consultation session with the members and/or board of RRKAC. No response has been received (SI Report, reference 29.13).
- **(2)** On 14 November 2023, Woodside emailed RRKAC following up on the offer for Woodside to provide support to RRKAC for EP consultation (SI Report, reference 29.14).
- On 14 November 2023, RRKAC emailed Woodside advising that it would put Woodside in touch with the most appropriate team member to progress discussions (SI Report, reference 29.15).
- On 16 November 2023, Woodside emailed RRKAC with thanks and advice that Woodside will wait to hear from the nominated individual (SI Report, reference 29.16).
- On 19 December 2023, Woodside emailed RRKAC wishing a happy festive season, thanking RRKAC for their contributions throughout the year and offering availability for consultation sessions (SI Report, reference 29.17).
- On 9 January 2024, Woodside emailed RRKAC following up on this activity and offering an opportunity for discussion. Woodside advised RRKAC of the best contact after 31 January 2024 (SI Report, reference 29.18).
- On 11 January 2024, Woodside and RRKAC (SI Report, reference 29.19), held a telephone discussion:
  - **(2)** RRKAC have recently employed new personnel, RRKAC noted that once the new employees were settled in, RRKAC would be happy to consult with Woodside on relevant EPs.
  - **(3)** RRKAC noted that some RRKAC country is on the coast (and would be affected by an oil spill or another such environmental incident), they feel that EMBA's are far too broad, and the areas covered by EMBA's are far too big and unfeasible.
- **(1,2)** On 20 March 2024, Woodside and RRKAC held an online meeting. Woodside outlined the purpose of engagement with Traditional Owner groups and PBC's, consultation on Environment Plans, feedback on heritage and cultural values, opportunities for social investment programs such as rangers and opportunities for future meetings (SI Report, reference 29.20).
- **(2)** On 26 March 2024, Woodside emailed RRKAC to follow up on the meeting, and to outline the upcoming activities for consultation, that reasonable financial support is available for meetings for the purpose of consultation, to ask for guidance on their preferred next steps, and to provide Woodside's Program of Ongoing Engagement (SI Report, reference 29.21).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> RRKAC is interested in training opportunities for rangers.</p>	<p><b>(1)</b> <b>Woodside Assessment:</b> Woodside considers value in having rangers on the ground, trained up in the highly unlikely event of a spill. It would be beneficial to an immediate response in an emergency situation. <b>Woodside Response:</b> Separate from consultation under regulation 25 of the Environment regulations, Woodside has responded to RRKAC's interest with information on ranger programs.</p>	<p><b>(1)</b> Ongoing interest in a ranger program is able to be addressed under Woodside's Program of Ongoing Engagement (Appendix G). Based on the engagement to date, no additional measures or controls are required.</p>

<p><b>(2)</b> RRKAC noted that they are insufficiently resourced to fully engage and respond regarding EPs.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside supports ongoing engagement for the life of an EP. <b>Woodside response:</b> Woodside supports reasonable requests for resourcing and has provided support for meetings for the purpose of consultation.</p>	<p><b>(2)</b> Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). No additional measures or controls are required.</p>
<p><b>(3)</b> In response to a previous activity, RRKAC noted that some RRKAC country is on the coast (and would be affected by an oil spill or another such environmental incident), they feel that EMBA are far too broad, and the areas covered by EMBA are far too big and unfeasible.</p>	<p><b>(3)</b> <b>Woodside assessment:</b> Woodside aligns with industry guidance in developing the EMBA. Many replicate model simulations are completed to understand the potential behaviour of the worst-case release under various wind, wave and current conditions and these are combined to create an overall EMBA. <b>Woodside response:</b> Woodside considers it adopts appropriate controls, as demonstrated in Sections 6.8 and 6.9 of the EP, and Appendix I.</p>	<p><b>(3)</b> Woodside has addressed oil spill response in Appendix I. Appropriate controls are demonstrated in Sections 6.8 and 6.9. No additional measures or controls are required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation Robe River Kuruma Aboriginal Corporation (RRKAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on RRKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to RRKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> </ul>		

- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that RRKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to RRKAC over nine months, demonstrating a "reasonable period" of consultation.
- Woodside asked RRKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on RRKAC functions, interests or activities.

**Ngarluma Aboriginal Corporation (NAC)**

NAC is established under the Native Title Act 1993 by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

- On 18 July 2023, Woodside emailed NAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 30.1).
- On 26 July 2023, Woodside emailed NAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 30.2).
- (1) On 18 September 2023, NAC emailed Woodside proposing the establishment of a joint working group to manage the consultation process for Woodside's environmental plans. NAC explained the purpose of the group and noted the positions and roles of the NAC representatives that would be included in the working group. NAC also discussed seeking funding from Woodside to support the formation of this new working group and pointed out key actions moving forward, the timeframe of events and attached a budget summary (SI Report, reference 30.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (1) On 10 October 2023, Woodside emailed NAC approving the proposal in principle and affirming that Woodside is looking forward to ongoing consultation. Woodside stated that some administrative process still needed to be arranged and asked for NAC's availability to schedule a meeting (SI Report, reference 30.4).
- On 19 October 2023, Woodside emailed NAC following up on previous correspondence and asking for a response to the email sent on 10 October 2023 (SI Report, reference 30.5).
- On 19 October 2023, NAC emailed Woodside confirming receipt of Woodside's 19 October email and that the draft engagement letter would be circulated. NAC also requested an expected agenda for future meetings/sessions and if there were urgent matters pending (SI Report, reference 30.6).
- On 2 November 2023, Woodside emailed NAC with a list of priorities for discussion and EPs that require consultation. Woodside requested who would be participating in the discussions (SI Report reference, 30.7).
- On 3 November 2023, Woodside emailed NAC with a revised list of EPs for consultation, in order of priority, with proposed submission dates (SI Report reference 30.8).
- (1) On 3 November 2023, NAC emailed Woodside informing that it would share the draft engagement protocol on that day and would address the matters via a working group. NAC also requested the timeframe to work through the EP due for consultation (SI Report reference, 30.9).
- (1) On 3 November 2023, NAC emailed Woodside a draft engagement protocol letter and stated that they look forward to closing out this matter and scheduling a meeting (SI Report reference 30.10).
- (1) On 13 November 2023, NAC emailed Woodside following a telephone discussion about other unrelated matters to this EP noting a lack of availability to consult on EPs prior to 25 November 2023 and requesting a response to the draft Engagement Protocol (SI Report, reference 30.11).
- (1) On 13 November 2023, Woodside emailed NAC acknowledging that Woodside noted that NAC were not available for consultation prior to 25 November 2023, noting that Woodside would respond to the draft engagement protocol as soon as possible (SI Report reference, 30.12).

**Summary of information provided and record of consultation for this EP:**

- On 17 November 2023 Woodside emailed NAC advising of the proposed activity (Record of Consultation, reference 1.70) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NAC and its members may have within the EMBA, information on how NAC would like to engage, and requested that NAC provide information to other individuals as required.
- (1) On 1 March 2024, Woodside emailed NAC a draft consultation framework agreement for review (SI Report reference, 30.13).
- On 17 April 2024 NYFL emailed Woodside noting they were attending to sorry business and as per cultural protocols would require time within the community and engagement would be delayed until appropriate to re-commence (SI Report reference, 30.14).
- On 26 April 2024, Woodside emailed NAC reminding that Woodside had sent a draft consultation agreement to NAC for review and comment, and requesting a status of the review (SI Report, reference 30.15).

**Quarterly Heritage Meetings:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>Woodside convenes a quarterly meeting of Traditional Custodian representatives from the Representative Aboriginal Corporations involved in historical native title claims over the Burrup Peninsula, including NAC. Individual attendees are nominated by their representative Aboriginal Corporations. These meetings are summarised separately in this table.</p>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> During prior engagement, NAC proposed establishing a Joint Working Group to engage in meetings with Woodside for ongoing consultation. NAC noted it had they have capacity issues and require resourcing to cover costs of meeting.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> An agreement with NAC aligns with Woodside's Program of Ongoing Engagement with Traditional Custodians and will frame ongoing consultation processes, including with the NAC Working Group. <b>Woodside response:</b> Woodside will finalise an agreement with NAC to work with the NAC Working Group. The draft agreement sent to NAC in March 2024, will be used to frame ongoing consultation during the life of the EP.</p>	<p><b>(1)</b> Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented, the draft agreement with NAC (among other things) will set out the process for ongoing engagement. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). No additional measures or controls are required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on NAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> </ul>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to NAC over eight months, demonstrating a "reasonable period" of consultation.
- Woodside asked NAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NAC functions, interests or activities.

**Yindjibarndi Aboriginal Corporation**

Yindjibarndi is established under the Native Title Act 1993 by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical engagement:**

- On 26 July 2023, Woodside emailed Yindjibarndi Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 31.1).
- (1) On 1 August 2023, Yindjibarndi emailed Woodside acknowledging 26 July 2023 email, and advising that NYFL would manage Oil and Gas matters on behalf of Yindjibarndi (SI Report, reference 31.2). (1) Woodside accepts Yindjibarndi's right to be represented at their own choosing and will engage with NYFL for ongoing consultation.

**Summary of information provided and record of consultation for this EP:**

- On 19 October 2023, Woodside emailed Yindjibarndi (via NYFL) of the proposed activity (Record of Consultation, reference 1.71) and provided a Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

information on the interests that Yindjibarndi and its members may have within the EMBA, information on how Yindjibarndi would like to engage, and requested that Yindjibarndi provide information to other individuals as required.

See NYFL on behalf of Yindjibarndi below for record of further engagement.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> Yindjibarndi has instructed Woodside that it will be represented by NYFL in ongoing discussion about EPs.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside accepts Yindjibarndi's right to be represented at their own choosing. <b>Woodside response:</b> Woodside will engage with NYFL on behalf of Yindjibarndi for ongoing consultation related to this activity.</p>	<p><b>(1)</b> Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation Yindjibarndi Aboriginal Corporation (YAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Yindjibarndi's preferred method of consultation. Yindjibarndi instructed Woodside that it will be represented by NYFL. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Yindjibarndi. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Asked for the information and request for feedback be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that Yindjibarndi can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with Yindjibarndi in October 2023. Woodside has responded to Yindjibarndi/NYFL over nine months, demonstrating a "reasonable period" of consultation.

Woodside asked Yindjibarndi if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yindjibarndi functions, interests, or activities.

**Wanparta Aboriginal Corporation**

Wanparta is established under the Native Title Act 1993 by the Ngarla people to represent the Ngarla people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

- On 18 July 2023, Woodside emailed Wanparta NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Wanparta advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 32.1).
- On 26 July 2023, Woodside emailed Wanparta Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 32.2).
- **(1)** On 31 August 2023, Woodside met with the Wanparta Board on another activity, at that meeting Wanparta stated their sea country values noting that water and the ocean was extremely important to them, and they had a responsibility to look after ocean and lore. They noted the bream, octopus, stingray and kestrel as totemic species (SI Report, reference 32.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 4 October 2023, Woodside phoned Wanparta to check in and consult on upcoming matters (SI Report, reference 32.4).
- On 4 October 2023, Woodside emailed Wanparta (SI Report, reference 32.5) following up with a summary of the previous phone call. The outcomes of the phone discussion included:
  - (2) Wanparta's interest in a Wanparta Ranger program.
  - (3) EP funding.
  - Wanparta's interest in a Karratha Gas Plant visit, as well as possible school visits and Perth Office visits.
  - Wanparta's request for updates on EPs unrelated to this one.
  - Woodside's query into Wanparta's thoughts on a formal authorisation/consent/endorsement process regarding future EPs.

**Summary of information provided and record of consultation for this EP:**

- On 5 October 2023, Woodside emailed Wanparta advising of the proposed activity (Record of Consultation, reference 1.72) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Wanparta and its members may have within the EMBA, information on how Wanparta would like to engage, and requested that Wanparta provide information to other individuals as required.
- On 6 October 2023, Wanparta emailed Woodside thanking them for the previous summary email (5 October 2023) and stated that it will bring all the 4 October 2023 items to the Board for further consideration and would revert shortly after (SI Report, reference 32.6).
- On 7 November 2023, Woodside emailed Wanparta following up previous correspondence (6 October 2023) and to check if there was any further information Wanparta would like from Woodside regarding this EP. No response was received (SI Report, reference 32.7).

**Ongoing engagement:**

- (3) On 13 November 2023, Wanparta emailed Woodside requesting funding to assist with ongoing consideration of Woodside EPs. Wanparta noted the consultation meeting to be held between Wanparta and Woodside in February 2023 (SI Report, reference 32.8).
- (3) On 22 November, Woodside acknowledged Wanparta's requests and agreed to seek out available options for funding (SI Report, reference 32.9).
- From 24 - 28 November 2023, Woodside and Wanparta exchanged emails seeking availability for a phone call (SI Report, reference 32.10 – 32.13).
- On 30 November 2023, Wanparta emailed Woodside in relation to a financial matter unrelated to this EP, also suggesting a date for a directors' meeting for the purposes of ongoing consultation across EPs in Karratha on 23 February 2024 (SI Report, reference 32.14).
- On 23 February 2024, Wanparta emailed Woodside to confirm availability for a meeting on 23-24 April 2024 (SI Report, reference 32.15).
- On 26 February 2024, Woodside emailed Wanparta to confirm the 23-24 April dates for a meeting, confirming the process regarding names, accommodation and travel logistics (SI Report, reference 32.16).
- Between 16-22 April, Woodside and Wanparta exchanged emails regarding logistics and funding for a meeting for consultation on another activity and a site visit with the Wanparta Board, including a draft agenda for the meeting and Wanparta emailing to Woodside its Ngarla Ranger Program Proposal (SI Report, references 32.17 – 32.25).

<ul style="list-style-type: none"> <li>• <b>(2)</b> On 24 April 2024, Woodside met with Wanparta at Murujuga. Woodside presented an overview of EPs and ongoing consultation in 2024, and provided information on another activity, Aboriginal employment, and ranger programs. Wanparta informed Woodside that there were no issues following the discussion (SI Report, reference 32.26).</li> <li>• On 6 May 2024, Wanparta emailed Woodside following the meeting on 24 April 2024 (SI Report, reference 32.27). Matters relevant to this EP include:             <ul style="list-style-type: none"> <li>– <b>(1)</b> The Ngarla People have a deep spiritual connection to sea country.</li> <li>– <b>(1)</b> The Ngarla peoples' totem species – the octopus, stingray, spiny bream fish and kestrel are of great significance.</li> <li>– <b>(1)</b> The protection and management of marine life and healthy ocean plays a significant role in their lore, culture and customs.</li> </ul> </li> <li>• <b>(1)</b> On 30 May 2024, Woodside emailed Wanparta thanking for the opportunity to meet the Board and acknowledges and supports the significance of the Ngarla's People totem species, the continue protection and management of marine life, and their right to practice lore, culture and custom (SI Report, reference 32.28).</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> Wanparta stated that water and the ocean were extremely important to them, and they had a responsibility to look after ocean and lore. They noted the bream, octopus, stingray and kestrel as totemic species.</p>	<p><b>(1)</b> <b>Woodside Assessment:</b> Woodside assessed Wanparta's interest in water to represent potential cultural values. <b>Woodside Response:</b> Wanparta's interests and potential cultural values have been recorded in the EP, the potential impact on the interests and values, including controls, have been assessed.</p>	<p><b>(1)</b> Woodside updated Section 4.9 to record WAC's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7. Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians (Appendix G).  This includes continued engagement regarding the proposed Framework Agreement which will be applied to ongoing consultation. No additional measures or controls are required.</p>
<p><b>(2)</b> Wanparta has expressed interest in a range of social investment opportunities including a ranger program and have provided a Ranger Program proposal for Woodside's consideration.</p>	<p><b>Woodside Assessment:</b> A framework agreement is an effective mechanism for social investment opportunities, including for a ranger program and ongoing consultation. It aligns with Woodside's Program of Ongoing Engagement with Traditional Custodians. Ranger program funding may allow Traditional Custodians to be involved in spill response. <b>Woodside Response:</b> Woodside is continuing to work with Wanparta regarding social investment opportunities.</p>	<p><b>(2)</b> Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented, an agreement with Wanparta (among other things) could address social investment in ranger programs and would set out the process for ongoing engagement. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). No additional measures or controls are required</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p><b>(3)</b> Wanparta requested funding to participate in ongoing consultation.</p>	<p><b>(3)</b> <b>Woodside Assessment:</b> Woodside supports reasonable funding for Traditional Custodians to allow for consultation on proposed activities. <b>Woodside Response:</b> Woodside has agreed to provide support to Wanparta for consultation purposes.</p>	<p><b>(3)</b> Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wanparta Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Wanparta’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Wanparta. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that Wanparta can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside has provided Wanparta Aboriginal Corporation with the opportunity to provide feedback over nine months, demonstrating a “reasonable” period of consultation.
- Woodside asked Wanparta Aboriginal Corporation if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wanparta Aboriginal Corporation’s functions, interests or activities.

#### **Malgana Aboriginal Corporation (Malgana)**

Malgana is established under the Native Title Act 1993 by the Malgana people to represent the Malgana people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical engagement:**

- On 19 July 2023, Woodside emailed Malgana NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Malgana advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, references 33.1).
- On 26 July 2023, Woodside emailed Malgana Woodside’s planned Program of Ongoing Engagement with Traditional Custodians SI Report, references 33.2).
- **(1)** On 1 August 2023, Malgana emailed Woodside with thanks for information requested about another activity noting that Malgana was looking to get an environmental consultant to provide advice to their Board, noting they were seeking quotes and would come back to Woodside for cost approval (SI Report, references 33.3).
- **(1)** On 3 August 2023, Woodside emailed Malgana notifying about another activity and requesting to meet to discuss matters, including the issue raised by Malgana about getting an environmental consultant to give advice to their Board (SI Report, reference 33.4). Woodside also said it was available to catch up over the phone. Malgana did not reply.

#### **Summary of information provided and record of consultation for this EP:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 October 2023, Woodside emailed Malgana advising of the proposed activity (Record of Consultation, reference 1.73) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Malgana and its members may have within the EMBA, information on how Malgana would like to engage, and requested that Malgana provide information to other individuals as required.
- On 20 October 2023, Woodside emailed an alternate contact at Malgana (the registered contact person), requesting feedback/further information about activities that Malgana had previously been notified about by Woodside and offered assistance to Malgana for consultation if required. Woodside re-attached earlier emails and requested the information be forwarded to any members and other individuals or groups who may have interests SI Report, references 33.5).
- On 26 October 2023, Woodside attempted to call Malgana on the phone number listed on the website of the Office of the Registrar of Indigenous Corporations (ORIC) but the number was not connected. Woodside emailed Malgana following up on the proposed activities and requesting feedback and re-iterating an offer of assistance if required by Malgana about the activities SI Report, references 33.6).
- On 2 November 2023, Woodside again emailed Malgana following up on proposed activities and requesting feedback SI Report, references 33.7).
- On 2 February 2024, Woodside emailed Malgana referencing previous emails sent by Woodside in October and November 2023 about this activity. Woodside informed Malgana that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Malgana at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments received post 23 February 2024. (SI Report, references 33.8).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> During previous consultation in relation to separate activities Malgana noted that its funding was restricted for these types of engagement and requested funding support, including an environmental consultant to advise the Board.</p>	<p><b>(1)</b> <b>Woodside Assessment:</b> Woodside supports ongoing engagement and have responded to Malgana’s advice about the limitations on their resources. Woodside is implementing a program to actively support Traditional Custodians’ capacity for ongoing engagement and consultation on EPs. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). This includes addressing Malgana’s resourcing issue for ongoing consultation via a Consultation Agreement. <b>Woodside Response:</b> Woodside has offered to support Malgana however these offers have not been taken up as of yet.</p>	<p><b>(1)</b> Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Malgana through ongoing engagement and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (Appendix G). This includes addressing Malgana’s resourcing issue for ongoing consultation via a Framework Agreement. No additional measures or controls are required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and,</p>	<p>No additional measures or controls required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p>where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Malgana for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on Malgana’s preferred method of consultation. This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Malgana's functions, interests or activities.

### **Nanda Aboriginal Corporation**

Nanda is established under the Native Title Act 1993 by the Nanda people to represent the Nanda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

### **Historical Engagement:**

- On 21 July 2023, Woodside emailed Nanda NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Nanda advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, references 34.1).
- On 25 July 2023, Woodside emailed Nanda (via YMAC) Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, references 34.2).

### **Summary of information provided and record of consultation for this EP:**

- On 23 October 2023, Woodside emailed Nanda (via YMAC) advising of the proposed activity (Record of Consultation, reference 1.78) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that Nanda and its members may have within the EMBA, information on how Nanda would like to engage, and requested that Nanda provide information to other individuals as required.
- On 13 November 2023, Woodside emailed YMAC noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet (SI Report, references 34.3).
- On 14 December 2023, Woodside emailed YMAC (SI Report, references 34.4) attaching the Program of Ongoing Consultation and advising that Woodside would like to progress negotiations on consultation frameworks with groups represented by YMAC (including Nanda). Woodside proposed the protocol would include (among other things):
  - The procedures Woodside would follow when a submission required consultation.
  - Initial and ongoing consultation in relation to activities.
  - Agreement as to how Woodside would provide Nanda with the information Nanda required to make free, prior and informed decisions about Woodside's Environmental Plans.
  - Agreement as to how Nanda would provide feedback and how that could best be represented in EPs.
  - On an agreed schedule of rates for Nanda's participation in consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- How to manage the outputs of the consultations.
- On 21 December 2023, Woodside emailed Nanda (via YMAC) providing a list of Woodside’s upcoming activities as requested (SI Report, references 34.5).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Nanda Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Nanda’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Nanda. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that Nanda can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Woodside has addressed and responded to Nanda over eight months, demonstrating a “reasonable period” of consultation.
- Woodside asked Nanda if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nanda functions, interests or activities.

#### **Gogolanyngor Aboriginal Corporation (GAC)**

GAC is established under the Native Title Act 1993 by the Jabirr Jabirr/Ngumbarl and Bindunbur people to represent the Jabirr Jabirr/Ngumbarl and Bindunbur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical engagement:**

- On 18 July 2023, Woodside emailed GAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that GAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, references 35.1).
- On 26 July 2023, Woodside emailed GAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, references 35.2).

#### **Summary of information provided and record of consultation for this EP:**

- On 6 October 2023, Woodside emailed GAC advising of the proposed activity (Record of Consultation, reference 1.79) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that GAC and its members may have within the EMBA, information on how GAC would like to engage, and requested that GAC provide information to other individuals as required. The email requested information on the interests that GAC and its members may have within the EMBA. Woodside also suggested a lunch meeting in Broome the following week.
- On 7 October 2023, GAC responded thanking Woodside for its email and confirming it would be available to meet in Broome the following week (SI Report, references 35.3).
- On 7 October 2023, Woodside thanked GAC for its email and confirmed it would try to line up a meeting in Broome (SI Report, references 35.4).
- On 18 October 2023, Woodside emailed GAC to follow up if there were any questions regarding the EP and requested a suitable time to call (SI Report, references 35.5).
- On 19 October 2023, GAC emailed Woodside and confirmed it had briefly seen the consultation material and would follow up SI Report, references 35.6). No response has been received.

- On 3 November 2023, Woodside emailed GAC following up on previous correspondence and requesting to meet in person in Broome the following week (SI Report, references 35.7). No response has been received.
- On 4 April 2024, Woodside telephoned GAC, and both parties agreed to meet on 5 April 2024 (SI Report, references 35.8).
- On 5 April 2024, Woodside met face to face with GAC, where no issues were raised concerning EPs and GAC invited Woodside to attend GAC Board meeting in late April (SI Report, references 35.8).
- On 26 April 2024, Woodside spoke with GAC for estimated quote to speak at Board meeting on 26 April 2024 (SI Report, references 35.9).
- On 26 April 2024, Woodside attended the GAC Board meeting to discuss other Woodside activities and answer questions. There was no specific presentation regarding this activity or related questions raised (SI Report, references 35.10).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with GAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on GAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to GAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.

- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that GAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to GAC over nine months, demonstrating a "reasonable period" of consultation.
- Woodside asked GAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GAC functions, interests or activities.

**Nimanburr Aboriginal Corporation**

Nimanburr is established under the Native Title Act 1993 by the Nimanburr people to represent the Nimanburr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement:**

- On 18 July 2023, Woodside emailed KLC on behalf of Nimanburr NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Nimanburr advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, references 36.1).
- On 6 October 2023, Woodside phoned Nimanburr who invited them to visit their community on the 10 October 2023 (SI Report, references 36.2).
- On 6 October 2023, KLC emailed Woodside with a formal invitation to meet and present at their Nimanburr Director's meeting on the 13 October 2023 (SI Report, references 36.3).

**Summary of information provided and record of consultation for this EP:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 10 October 2023, Woodside met with Nimanburr in person on Country and hand delivered the below documents and explained the proposed activity (SI Report, references 36.4). At this meeting Woodside also:
  - Provided a Consultation Information Sheet and explained the proposed activity.
  - Explained the EMBA and how it was developed.
  - Asked if there were any cultural values, they wished to share with Woodside, noting that information could be kept confidential.
  - Asked if there were any relevant persons that Woodside should consult with to which Nimanburr replied; no.
  - **(1)** Asked if Nimanburr had any further questions or concerns for this EP, to which Nimanburr replied; no. **(1)** Woodside noted the response.
  - Confirmed that Nimanburr would like to be consulted on a quarterly basis about Woodside activities with consultation to take place out on Nimanburr community.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> Nimanburr advised it had no questions or concerns for the EP.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside accepts that Nimanburr has no feedback or concerns for this EP. <b>Woodside response:</b> Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p><b>(1)</b> Existing controls considered sufficient as described in Section 6 and 7.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Nimanburr for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on Nimanburr's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Nimanburr. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Nimanburr can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Nimanburr over nine months, demonstrating a "reasonable period" of consultation.
- Woodside asked Nimanburr if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nimanburr functions, interests or activities.

**Nyul Nyul PBC Aboriginal Corporation**

NNAC is established under the Native Title Act 1993 by the Nyul Nyul people to represent the Nyul Nyul people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 20 July 2023, Woodside emailed NNAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 37.1).

**Summary of information provided and record of consultation for this EP:**

- On 6 October 2023, Woodside emailed NNAC advising of the proposed activity (Record of Consultation, reference 1.96) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NNAC and its members may have within the EMBA, information on how NNAC would like to engage, and requested that NNAC provide information to other individuals as required.
- On 26 October 2023, Woodside emailed NNAC/KLC requesting an opportunity to meet with NNAC and consult on EPs, informing that they were happy to pay reasonable sitting costs (SI Report, reference 37.2).
- On 26 October 2023, NNAC/KLC emailed Woodside thanking them for their email and informed Woodside that the NNAC Board would like to meet for a consultation workshop (SI Report, reference 37.3).
- On 1 November 2023, Woodside emailed NNAC/KLC and responded that they would be happy to coordinate and fund the consultation workshop and requested a 3–4-hour time slot (SI Report, reference 37.4).
- On 6 November 2023, NNAC/KLC emailed Woodside informing that they would seek confirmation from NNAC, but that Woodside should expect a meeting date suggesting February 2024 (SI Report, reference 37.5).
- On 22 February 2024, Woodside presented to the NNAC Board and its legal representative on Woodside activities, including this EP (SI Report, reference 37.6). Woodside presented slides which discussed NOPSEMA, EPs including addressing EPs currently under consultation. Woodside also presented on how Woodside consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBA's, and next steps in consultation processes. Woodside explained that the Pyrenees Operations EP is a 5-year revision plan, which has been operating since 2010. The Chair expressed that there didn't seem to be an issue with this EP. The Board requested a further workshop with Woodside for corporation members. Woodside confirmed it was available as needed for future requests.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

### Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

#### Sufficient Information:

- Woodside sought direction on NNAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NNAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

#### Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to NNAC over nine months, demonstrating a "reasonable period" of consultation.
- Woodside asked NNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NNAC functions, interests or activities.

### Karajarri Traditional Lands Association (Aboriginal Corporation) (KTLA)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

KTLA is established under the Native Title Act 1993 by the Karajarri people to represent the Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

- On 24 July 2023, Woodside emailed KTLA NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that KTLA advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 39.1).
- On 26 July 2023, Woodside emailed KTLA Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 39.2).

**Summary of information provided and record of consultation for this EP:**

- On 2 October 2023, Woodside emailed KTLA advising of the proposed activity (Record of Consultation, reference 1.81) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that KTLA and its members may have within the EMBA, information on how KTLA would like to engage, and requested that KTLA provide information to other individuals as required.
- On 13 October 2023, Woodside sent a follow up email seeking to confirm the best contact person at KTLA as Woodside had not received a response to its initial email. A copy of the initial email was attached (SI Report, reference 39.3).
- On 14 November 2023, Woodside sent a follow up email enquiring if there is any further information needed and attached a copy of the Environment Plan Summary sheet. Woodside also requested for the opportunity to meet (SI Report, reference 39.4).
- On 23 January 2024, Woodside emailed KTLA informed KTLA that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with KTLA at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 39.5).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KTLA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**Sufficient Information:**

- Woodside sought direction on KTLA’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KTLA. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that KTLA can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to KTLA over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked KTLA if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KTLA functions, interests or activities.

**Wanjina-Wunggurr (Native Title) Aboriginal Corporation**

WWAC is established under the Native Title Act 1993 by the Wanjina and Wunggurr people to represent the Wanjina and Wunggurr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**Historical engagement:**

- On 19 July 2023, Woodside emailed WWAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that WWAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 38.1).

**Summary of information provided and record of consultation for this EP:**

- On 2 October 2023, Woodside emailed WWAC advising of the proposed activity (Record of Consultation, reference 1.80) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that WWAC and its members may have within the EMBA, information on how WWAC would like to engage, and requested that WWAC provide information to other individuals as required.
- On 13 October 2023, Woodside sent an email to the Kimberley Land Council (KLC) on behalf of WWAC enquiring about the best contact person at WWAC as Woodside had not received a response from its initial email. A copy of the initial email was attached (SI Report, reference 38.2).
- On 25 October 2023, Woodside emailed KLC enquiring if the KLC was the best point of contact (SI Report, reference 38.3).
- On 26 October 2023, KLC responded thanking Woodside for its email and confirmed Woodside had sent the information to the correct email address for WWAC. KLC noted that Corporation responses could be somewhat delayed or timely due to various factors including opportunities for meetings and discussions, cultural or other corporation commitments and obligations, governance considerations, and more, and that it trusted someone would be in touch in due course (SI Report, reference 38.4).
- On 30 October 2023, KLC responded to Woodside’s email from 25 October 2023 and provided a link to the Office of the Registrar of Indigenous Corporations (ORIC) (SI Report, reference 38.5).
- On 2 November 2023, Woodside emailed KLC thanking them for their response and informing them that they had exhausted all contacts listed on ORIC which is why they contacted KLC. Woodside also noted that it appreciated this time of the year was very busy and was understanding why making contact with PBCs may be difficult (SI Report, reference 38.6).
- On 2 November 2023, KLC emailed Woodside confirming that they would pass on Woodside’s email to WWAC (SI Report, reference 38.7).
- On 23 January 2024, Woodside emailed WWAC about this activity and informed WWAC that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with WWAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 38.8).
- On 13 March 2024, Woodside emailed WWAC requesting who to contact regarding EPs and Woodside activities (SI Report, reference 38.9).
- On 16 April 2024, Woodside emailed WWAC (via KLC) requesting that attached email correspondence regarding EPs be forwarded to WWAC, and that Woodside was available to meet face to face or telephone to discuss further (SI Report, reference 38.10).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>No feedback objections or claims received despite follow-up.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>
---	--	---

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on WWAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to WWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that WWAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to WWAC over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked WWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WWAC functions, interests or activities.

### **Mayala Inninalang Aboriginal Corporation**

MIAC is established under the Native Title Act 1993 by the Mayala people to represent the Mayala people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

### **Historical Engagement:**

Kimberley Land Council (KLC) is the nominated Representative of MIAC.

- On 19 July 2023, Woodside emailed KLC to request they forward an email from Woodside to MIAC about guidelines and policies released by NOPSEMA (SI Report, reference 40.1).
- On 19 July 2023, Woodside emailed MIAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that MIAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 40.2).
- On 8 August 2023, MIAC (via NOPSEMA) emailed Woodside (SI Report, reference 40.3) enclosing a letter relating to among other things:
  - Culturally appropriate consultation processes,
  - Information that will support free, prior and informed consent.
  - **(1)** Financial support to bring together the right people to ensure appropriate consultations.

### **Summary of information provided and record of consultation for this EP:**

- On 13 October 2023, Woodside emailed MIAC advising of the proposed activity (Record of Consultation, reference 1.82) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MIAC and its members may have within the EMBA, information on how MIAC would like to engage, and requested that MIAC provide information to other individuals as required.
- On 16 October 2023, Woodside emailed MIAC introducing a new Woodside focal point and offering the opportunity for feedback by meeting in person with the Board and members (SI Report, reference 40.4).
- On 18 October 2023, Woodside emailed KLC asking if previous correspondence had been received and passed on to MIAC (SI Report, reference 40.5).
- On 26 October 2023, KLC emailed Woodside advising that their email had been forwarded to the relevant corporation (SI Report, reference 40.6).
- **(1)** On 27 October 2023, Woodside emailed MIAC following up on previous emails, informing MIAC that Woodside would cover meeting costs including flights and accommodation if they wished to meet in Perth. Alternatively, Woodside suggested an online Teams meeting if that was the preferred method of consultation. No response has been received (SI Report, reference 40.7).

<ul style="list-style-type: none"> <li>On 23 January 2024, Woodside emailed MIAC to inform them that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with MIAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 40.8).</li> <li>On 23 January 2024, KLC emailed Woodside advising that the contact person for MIAC had forwarded on Woodside's email to the PBC (SI Report, reference 40.9).</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p>(1) MIAC stated that they are not funded and required financial support for ongoing consultation.</p>	<p>(1) <b>Woodside assessment:</b> Woodside supports reasonable funding for costs associated with consultation. <b>Woodside response:</b> Woodside has responded to MIAC's financial requests in the 8 August 2023 letter and have offered financial support for ongoing consultation on 27 October 2023, which has not yet been taken up by MIAC. Sufficient information to allow informed assessment on this activity has been provided, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p>	<p>(1) Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MIAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>Woodside sought direction on MIAC's preferred method of consultation. Woodside has offered to hold meetings at the location and time of MIAC's choosing, with MIAC's nominated representatives (including face-to-face meetings with the Board). These meetings did not occur due to a lack of response to Woodside's requests.</li> </ul>		

As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25(1) of the Environment Regulations consultation.

- Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to MIAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that MIAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with MIAC in October 2023. Woodside has addressed and responded to MIAC over nine months demonstrating a “reasonable” period of consultation.

Woodside asked MIAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MIAC functions, interests or activities.

**Nyangumarta Warrarn Aboriginal Corporation (NWAC)**

NWAC is established under the Native Title Act 1993 by the Nyangumarta people to represent the Nyangumarta people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 July 2023, Woodside emailed NWAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NWAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 41.1).
- On 26 July 2023, Woodside emailed NWAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 41.2).

**Summary of information provided and record of consultation for this EP:**

- On 2 October 2023, Woodside emailed NWAC advising of the proposed activity (Record of Consultation, reference 1.83) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NWAC and its members may have within the EMBA, information on how NWAC would like to engage, and requested that NWAC provide information to other individuals as required.
- On 11 October 2023, Woodside emailed seeking an alternative NWAC contact to arrange a meeting (SI Report, reference 41.3).
- On 18 October 2023, Woodside emailed an alternative YMAC contact, after attempting to contact NWAC's Operations Manager by telephone, to seek an opportunity to speak to the contact person for NWAC (SI Report, reference 41.4). NWAC sent a mobile text message asking Woodside to call back on the 19 October 2023.
- On 19 October 2023, Woodside emailed NWAC, after contacting NWAC by telephone, with a request for a cost estimation and offered to meet at a time and place that was suitable to NWAC (SI Report, reference 41.5). No response was received.
- On 24 November 2023, Woodside emailed NWAC (via YMAC) introducing itself and submitted a set of questions requesting NWAC's response in an effort to enhance their relationship. Woodside queried best contact details regarding consultation matters (SI Report, reference 41.6).
- **(1)** On 24 November 2023, NWAC (via YMAC) emailed Woodside its communications protocol. **(2)** NWAC noted additional expenses would be involved and committed to preparing a budget for Woodside's consideration (SI Report, reference 41.7).
- On 27 November 2023, Woodside emailed NWAC (via YMAC) thanking them for their response and re-iterating that Woodside would meet at the place and time suitable to NWAC (SI Report, reference 41.8).
- On 11 December 2023, Woodside met with NWAC (SI Report, reference 41.9), Woodside:
  - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities open for consultation.
  - Woodside provided an overview of this activity, explaining that these were floating vessels and not permanent rigs.
  - Woodside explained the difference between crude, gas and condensate.
  - Described the types of vessels involved.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Displayed and spoke to the EMBA and how they are developed.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Stated that Woodside wanted to understand how the functions, activities, or interests of NWAC and the people it represents may be impacted by any of those activities.
- Specifically asked the following:
  - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
  - What are your concerns about the proposed activities and what do you think we should do about them?
  - Is there anything you would like included in the EPs before submission?
  - Is there anyone else Woodside should consult with about the activities?
- (3) NWAC said they believe future meetings would be required.
- Woodside advised that it would continue to take feedback from NWAC for the life of the EP.
- On 11 December 2023, Woodside emailed NWAC (via YMAC) thanking them for the meeting and sharing contact details (SI Report, reference 41.10).
- On 11 December 2023, Woodside emailed NWAC (via YMAC) thanking them for their availability to attend Woodside’s presentation. Woodside provided a copy of the presentation given at the meeting and followed up on key topics discussed in the meeting and offered to provide further information regarding the activity (SI Report, reference 41.11).
- (1) On 14 December 2023, Woodside emailed YMAC attaching the Program of Ongoing Consultation and advised that Woodside wanted to progress negotiations on consultation frameworks with groups represented by YMAC (including NWAC) (SI Report, reference 41.12). Woodside proposed the protocol would include (among other things):
  - The procedures Woodside will follow when a submission requires consultation.
  - Initial and ongoing consultation in relation to activities.
  - Agreement as to how Woodside will provide NWAC with the information NWAC requires to make free, prior and informed decisions about Woodside’s EPs.
  - Agreement as to how NWAC will provide feedback and how that can best be represented in EPs.
  - (2) An agreed schedule of rates for NWAC’s participation in consultation.
  - How the outputs of the consultations will be managed.
- (3) On 13 February 2024, Woodside emailed NWAC (via YMAC) seeking opportunities for EP consultations for upcoming activities in first half of 2024 (SI Report, reference 41.13).
- (1) On 28 February 2024, Woodside emailed NWAC (via YMAC) draft consultation agreements for consideration that include aims of consultation, proposed consultation agreement details and a consultation meeting framework. (2) Woodside invites YMAC to propose a schedule of rates and other details relating to its engagements (SI Report, reference 41.14).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>(1) NWAC has provided Woodside with a Communications Protocol.</p>	<p>(1) <b>Woodside assessment:</b> An agreement with NWAC aligns with Woodside’s Program of Ongoing Engagement with Traditional Custodians and will frame ongoing consultation processes. <b>Woodside response:</b> Woodside will finalise the draft agreement with NWAC which was sent to NWAC via YMAC in February 2024. It will be used to frame ongoing consultation during the life of the EP.</p>	<p>(1) Woodside’s program to actively support Traditional Custodians’ capacity for ongoing engagement and consultation on EPs is currently being implemented. The draft agreement with NWAC (among other things) will set out the process for ongoing engagement. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G). Woodside will continue to consult following acceptance of the EP, as set out in Section 7.13.3.1 of the EP. No additional measures or controls are required.</p>
<p>(2) NWAC has sought funding for expenses relating to communications/consultation.</p>	<p>(2) <b>Woodside assessment:</b> The draft consultation agreement would be an effective mechanism to address resourcing for ongoing consultation. <b>Woodside response:</b> Woodside supports reasonable requests for resourcing. Woodside has invited NWAC via YMAC to propose a schedule of rates and other details as part of the draft consultation agreement.</p>	<p>(2) Not required.</p>
<p>(3) NWAC has requested further meetings with Woodside.</p>	<p>(3) <b>Woodside assessment:</b> Woodside engages in ongoing consultation throughout the life of an EP. This consultation can take the form of meetings. <b>Woodside Response:</b> Woodside has provided NWAC with a draft consultation agreement which includes proposed consultation agreement details and a consultation meeting framework.</p>	<p>(3) Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<b>Outcomes of consultation</b>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on NWAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> <li>• Asked for the consultation and information sheets to be distributed to members and individuals as required.</li> <li>• Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.</li> <li>• Advised that NWAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).</li> </ul> <p><b>Reasonable Period:</b></p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet publicly available on the Woodside website since 12 September 2023</li> <li>• Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.</li> <li>• Woodside has addressed and responded to NWAC over nine months, demonstrating a “reasonable period” of consultation.</li> <li>• Woodside asked NWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.</li> <li>• Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</li> <li>• Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NWAC functions, interests or activities.</li> </ul>

**Nyangumarta Karajarri Aboriginal Corporation**

NKAC is established under the Native Title Act 1993 by the Nyangumarta and Karajarri people to represent the Nyangumarta and Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

- On 24 July 2023, Woodside emailed NKAC/KLC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that NKAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 42.1).
- On 26 July 2023, Woodside emailed NKAC/KLC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 42.2).

**Summary of information provided and record of consultation for this EP:**

- On 13 October 2023, Woodside emailed NKAC (via KLC) advising of the proposed activity (Record of Consultation, reference 1.84) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required.
- On 18 October 2023, Woodside emailed NKAC (via KLC) confirming if the email sent from Woodside on 13 October 2023, had been received and passed along to Nyangumarta Karajarri Aboriginal Corporation (SI Report, reference 42.3).
- On 26 October 2023, KLC (representing NKAC) emailed Woodside to confirm receipt of emails and stated that they would pass on relevant information. KLC did note that turnaround times could be timely and delayed due to several factors (SI Report, reference 42.4).
- On 27 October 2023, Woodside emailed KLC asking for advice on forwarding a meeting request on to NKAC (SI Report, reference 42.5).
- On 23 January 2024, Woodside emailed NKAC (via KLC) advising that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with NKAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 42.6).
- On 23 January 2024, KLC (representing NKAC) emailed Woodside to confirm receipt of emails and stated they would pass on relevant information. KLC noted that turnaround times could be timely and delayed due to several factors (SI Report, reference 42.7).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside	No additional measures or controls required.

	will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	
Outcomes of consultation		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on NKAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NKAC. **Yawuru Native Title Holders Aboriginal Corporation (Yawuru)**

Yawuru is established under the Native Title Act 1993 by the Yawuru people to represent the Yawuru people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

- On 18 July 2023, Woodside emailed Yawuru (NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that Yawuru advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 43.1).

**Summary of information provided and record of consultation for this EP:**

- On 19 October 2023, Woodside emailed Yawuru advising of the proposed activity (Record of Consultation, reference 1.85) and provided a a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Yawuru and its members may have within the EMBA, information on how Yawuru would like to engage, and requested that Yawuru provide information to other individuals as required.
- On 24 January 2024, Woodside sent a follow up email to Yawuru informing them that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Yawuru at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 43.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Yawuru for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Yawuru’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.

- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Yawuru. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Yawuru can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Yawuru over nine months, demonstrating a "reasonable period" of consultation.
- Woodside asked Yawuru if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yawuru functions, interests or activities.

**Dambimangari Aboriginal Corporation (DAC)**

DAC is established under the Native Title Act 1993 by the Dambimangari people to represent the Dambimangari people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical engagement:**

- On 18 July 2023, Woodside emailed DAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that DAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 44.1).

**Summary of information provided and record of consultation for this EP:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 October 2023, Woodside emailed DAC advising of the proposed activity (Record of Consultation, reference 1.76) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that DAC and its members may have within the EMBA, information on how DAC would like to engage, and requested that DAC provide information to other individuals as required.
- On 16 October 2023, following a telephone call and voicemail message to the CEO on 13 October 2023, Woodside emailed DAC providing information about Woodside's consultation along the coastline of Western Australia, Northern Territory and Victoria and enquiring about the opportunity to connect with the Board in the near future (SI Report, reference 44.2).
- On 18 October 2023, Woodside emailed DAC's deputy CEO introducing the Woodside focal point and asking to listen to any feedback on Woodside activities (SI Report, reference 44.3).
- On 25 October 2023, Woodside emailed KLC seeking the most recent contact details for DAC (SI Report, reference 44.4).
- On 30 October 2023, KLC emailed Woodside acknowledging Woodside's previous email and advising Woodside that the ORIC website would have the relevant contact details (SI Report, reference 44.5).
- On 2 November 2023, Woodside emailed KLC, notifying KLC that Woodside had previously tried all available contacts listed on ORIC site. Woodside advised that they would be interested to meet members and were flexible with meeting dates and logistics (SI Report, reference 44.6).
- On 2 November, KLC emailed Woodside stating they would pass Woodside's email onto their contacts at the relevant organisations (SI Report, reference 44.7).
- On 8 November 2023, Woodside emailed the DAC CEO requesting the opportunity for a 'meet & greet', highlighting the purpose for the meeting was to explain the current EPs as they related to the Dambimangari Traditional Owners. Woodside attached an offer to meet document alongside the relevant EP to the email (SI Report, reference 44.8).
- On 8 November 2023, Woodside visited the DAC offices in Derby in person to meet and greet and seek feedback on EPs. The activity was discussed, and the purpose of consultation was communicated to DAC. Woodside gave an overview of the EMBA and provided the link to NOPSEMA regarding First Nations engagement. Woodside asked if DAC had any questions or would like to provide feedback and if there was anyone else, they should speak to or to speak with to make introductions. Woodside was advised that the DAC CEO was the best person to organise further contact. DAC provided a contact for a ranger project and gave the CEO contact details (SI Report, reference 44.9).
- On 11 November 2023, Woodside wrote to DAC requesting a meeting with the CEO and Board, at a time, date and location of DAC's choosing. Woodside offered to pay reasonable costs for the meeting. No response has been received (SI Report, reference 44.10).
- On 23 January 2024, Woodside emailed DAC following up on previous attempts to consult and meet with DAC about this activity. Woodside informed DAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with DAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 44.11).
- (1) On 12 March 2024, DAC emailed Woodside to confirm Woodside meeting with DAC Board between 10 – 11 April 2024. DAC Board also requested Woodside provide full disclosure of any environmental issues or incidents, including from current operations in the region, and how Woodside manages these issues and incidents. DAC will confirm agenda and meeting details in due course (SI Report, reference 44.12).

- On 12 March 2024, Woodside emailed DAC acknowledging receipt of email regarding DAC Board meeting and to confirm if the advisor is the contact (SI Report, reference 44.13).
- On 12 March 2024, DAC emailed Woodside to confirm that the advisor is the contact for meeting logistics and other matters need to channelled via DAC and its Board (SI Report, reference 44.14).
- On 26 March 2024, DAC emailed Woodside to confirm Woodside’s attendance at DAC Board meeting on 10 April 2024 in Derby (SI Report, reference 44.15).
- On 26 March 2024, Woodside emailed DAC with an offer to provide reasonable financial support for the meeting and would require a cost estimation before the meeting. Woodside stated it would email separately new EPs and activities since last correspondence with DAC, and would also provide and information pack to be presented at the meeting (SI Report, reference 44.16).
- On 4 April 2024, DAC emailed Woodside providing a cost estimation towards the meeting and requesting confirmation, with an invoice to follow (SI Report, reference 44.17).
- On 4 April 2024, Woodside emailed DAC agreeing to the cost estimation and requesting paperwork to ensure prompt processing (SI Report, reference 44.18).
- On 9 April 2024, Woodside emailed DAC querying if there would be online meeting links for external Woodside advisors to answers question as they arise. Woodside confirmed attendance of 3 people (SI Report, reference 44.19).
- On 9 April 2024, DAC emailed Woodside with link to online Board meeting (SI Report, reference 44.20).
- On 10 April 2024, Woodside emailed DAC the presentations for the meeting about Browse Stakeholder Consultation, scheduled for 10 April 2024. The presentation included information about other Woodside activities and Environmental Plan consultation (SI Report, reference 44.21).
- **(1)** On 10 April 2024, Woodside met with DAC to discuss other Woodside activities and EP consultation. Woodside discussed the Browse Project, history of the project at James Price Point, Woodside’s First Nations Engagement Team, Woodside Energy overview and EP consultation relating to other activities, not related to this EP. Woodside reaffirmed that it would remain in contact regarding any follow conversations in regard to this meeting and future EP discussions (SI Report, reference 44.22).
- On 12 April 2024, Woodside emailed DAC thanking for the opportunity to the meet the Board the previous day. Woodside followed up with information about two separate activities and related EPs, as well as reinforcing that Woodside is legally required to provide information about projects relevant to DAC, and appreciate and respect the busy schedules of members. Woodside reaffirmed its commitment to working with DAC and providing support as required (SI Report, reference 44.23).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> DAC Board requested Woodside provide full disclosure of any environmental issues or incidents, including from current operations in the region, and how Woodside manages these issues and incidents.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside acknowledges the importance of providing information to Traditional Custodians in a timely manner.</p>	<p><b>(1)</b> Not required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<p><b>Woodside response:</b> Woodside met with DAC Board to provide information about EP consultations relating to other activities in the region and reaffirmed its commitment to continue engagement with DAC.</p>	
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient information:</b></p> <ul style="list-style-type: none"> <li>• Woodside sought direction on DAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> <li>• Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to DAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> <li>• Asked for the consultation and information sheets to be distributed to members and individuals as required.</li> <li>• Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.</li> <li>• Advised that DAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).</li> </ul> <p><b>Reasonable Period:</b></p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.</li> <li>• Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.</li> </ul>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to DAC over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked DAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on DAC functions, interests or activities.

#### **Bardi and Jawi Niimidiman Aboriginal Corporation (BJNAC)**

BJNAC is established under the Native Title Act 1993 by the Bardi and Jawi People to represent the Bardi and Jawi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

#### **Historical Engagement**

- **(1)** On 14 April 2023, BJNAC emailed Woodside, advising that that BJNAC would be unable to engage with Woodside on a goodwill basis via attending and coordinating meetings, or with general correspondence and requested that Woodside factor in the values that are outlined in BJNAC’s Joint Management Plan for the Park, into Woodside’s EP plan for projects. BJNAC noted that there may be cases where BJNAC will simply want to make Woodside aware of the Bardi and Jawi Marine Park and will be requesting that Woodside factor in the values that are outlined in the Joint Management Plan for the Park, into Woodside’s EP plan for projects. In other cases, BJNAC may want to respond with more detailed information if a project is likely to have a greater effect on Bardi and Jawi sea country. BJNAC stated that it will provide Woodside with a resourcing protocol within 28 days and objected to Woodside progressing matters with the PBC or making a submission to NOPSEMA (SI Report, reference 45.1).
- **(2)** On 5 June 2023, BJNAC emailed Woodside a draft resourcing protocol for consideration and stated it would await comments from Woodside (SI Report, reference 45.2).
- **(2)** On 18 July 2023, Woodside emailed BJNAC thanking them for the draft protocol and restated Woodside’s objectives for consultation. In the email, Woodside included a summary sheet for another activity unrelated to this EP along with NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that BJNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 45.3).
- **(3)** On 8 August 2023, BJNAC (via NOPSEMA) emailed Woodside (SI Report, reference 45.4) enclosing a letter relating to among other things:
  - Culturally appropriate consultation processes,
  - Information that will support free, prior and informed consent.
  - **(2)** Financial support to bring together the right people to ensure appropriate consultations.
- **(3)** On 13 October 2023, Woodside met face-to-face with BJNAC in a meeting on implementing an engagement framework. A framework draft was reviewed, and edits proposed. It was agreed that both parties were on the same page for ongoing consultation. BJNAC commended Woodside for how they engage and consult with First Nations peoples. BJNAC’s preferred methods of consultation, including the use of animated videos, were discussed with suggestions agreed to by both parties (SI Report, reference 45.5).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**Summary of information provided and record of consultation for this EP:**

- On 23 November 2023, Woodside emailed BJNAC advising of the proposed activity (Record of Consultation, reference 1.98) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that BJNAC and its members may have within the EMBA, information on how BJNAC would like to engage, and requested that BJNAC provide information to other individuals as required. Woodside followed up with a telephone call, there was no answer.
- **(2,3)** On 14 December 2023, Woodside emailed BJNAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 45.6). Woodside noted that Woodside's contracting team had not settled the Agreement Protocol yet but noted the following inclusions:
  - Agreement between Woodside and BJNAC and as representatives of the Bardi Jawi people (together "BJNAC") to consult in a meaningful and genuine manner.
  - The basic procedure Woodside will follow when a submission requires consultation – notification and invitation to meet.
  - Initial and ongoing consultation in relation to activities.
  - Agreement as to how Woodside will provide BJNAC the information BJNAC requires to make a free, prior and informed decisions.
  - Agreement as to how BJNAC will provide feedback and how we can best represent BJNAC's feedback in our submissions.
  - An agreed schedule of rates.
  - How the outputs of the consultation are managed.
- On 15 December 2023, emails were exchanged between Woodside and BJNAC seeking a date to meet (SI Report, reference 45.7).
- On 18 January 2024, emails were exchanged between Woodside and BJNAC seeking a time to meet. The 25 January 2024 was discussed and agreed between BJNAC and Woodside (SI Report, reference 45.8 – 45.11).
- **(4)** On 25 January 2024, BJNAC emailed and sent a letter to Woodside (SI Report, reference 45.12) making the following points (among others):
  - Will seek technical advice about the activities proposed in the EP.
  - Will seek advice on potential environmental implications of the activity in the EP.
  - Advice on potential impact on cultural heritage and rights under law and custom.
  - Consideration of reports which contain the above advice.
  - **(2)** Funding requirement to allow for the above undertakings by relevant experts.
- On 2 February 2023, Woodside emailed BJNAC confirming a meeting for the week of 5 February 2024 and offering to pay costs (SI Report, reference 45.13).
- On 2 February 2024, BJNAC emailed Woodside confirming availability and responding that they did not require costs to be paid to meet at this time (SI Report, reference 45.14).
- **(5)** On 5 February 2024, Woodside met with BJNAC's, Executive Officer who confirmed that BJNAC had no issues with this activity and no comments to make (SI Report, reference 45.15).

- (5) On 8 February 2024, BJNAC emailed Woodside stating they do not see themselves being affected. BJNAC requested that Woodside consult with them in the event changes occur to the oil spill scenario (SI Report, reference 45.16).
- On 9 February 2024, Woodside emailed BJNAC thanking for the response (SI Report, reference 45.17).
- (3) On 28 February 2024, Woodside emailed BJNAC with a letter (SI Report, reference 45.18) setting out the draft terms of a consultation agreement between BJNAC and Woodside, the agreement (among other things) included the following topics:
  - Sufficient Information
  - Reasonable Period.
  - Provision of Information
  - Objection or claims
  - Publication
  - (2) Arrangements regarding reasonable costs and expenses
  - How the agreement may be terminated
- On 3 April 2024, Woodside met BJNAC for lunch during which BJNAC invited Woodside to its board meeting on 2 May 2024 (SI Report, reference 45.19).
- (3) On 4 April 2024, Woodside emailed BJNAC enquiring if BJNAC had reviewed the draft consultation agreement sent on 28 February 2024 (SI Report, reference 45.20).
- (3) On 15 April 2024, BJNAC emailed Woodside advising it would respond to the draft consultation agreement by the end of the week (SI Report, reference 45.21)
- (3) On 23 April 2024, Woodside phoned BJNAC to confirm an earlier arranged meeting with the BJNAC Board on 2 May. BJNAC informed Woodside that it would be unable to meet until the consultation agreement was in place (SI Report, reference 45.22).
- (2,3) On 3 May 2024, BJNAC emailed Woodside a draft protocol which included a Schedule of Rates and Consultation Schedule (SI Report, reference 45.23).
- On 3 May 2024, BJNAC emailed Woodside in relation to an invoice for a social investment funding proposal not related to this EP (SI Report, reference 45.24).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) BJNAC previously advised it has values that are outlined in the Joint Management Plan for the Bardi and Jawi Marine Park, which it may require to be noted in particular EPs.</p>	<p>(1) <b>Woodside assessment:</b> Woodside accepts BJNAC’s feedback regarding the values outlined in the Joint Management Plan for the Bardi Jawi Gaarra Marine Park. <b>Woodside response:</b> Woodside has updated the EP to reflect BJNAC’s interests in the Bardi Jawi Gaarra</p>	<p>(1) Woodside has updated Table 4.9.5 of the EP to reflect BJNAC’s feedback and note that the Bardi Jawi Gaarra Marine Park falls outside the EMBA for this EP.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Marine Park, whilst noting that the Marine Park falls outside the EMBA for this EP.	
<p><b>(2)</b> BJNAC has requested that Woodside enter into a resourcing protocol. BJNAC has set out conditions it requires for ongoing engagement.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside supports reasonable requests for funding to aid consultation activities. <b>Woodside response:</b> Woodside is committed to resourcing BJNAC through an agreed resourcing protocol as part of ongoing consultation as required by the implementation strategy as set out regulation 22(15) of the Environment Regulations.</p>	<p><b>(2)</b> As identified in Sections 6 and 7 of this EP, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in regulation 22(15) of the Environment Regulations and continue to progress with establishing a framework agreement as part of Woodside's Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>
<p><b>(3)</b> BJNAC supports implementing an engagement framework. The framework would include preferred methods of consultation</p>	<p><b>(3)</b> <b>Woodside assessment:</b> Woodside is committed to culturally appropriate consultation processes. <b>Woodside response:</b> Woodside provided BJNAC with a draft consultation agreement in February 2024. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.</p>	<p><b>(3)</b> Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G).</p>
<p><b>(4)</b> BJNAC advised it would seek technical advice on the proposed activity and advice on potential environmental and cultural heritage implications. BJNAC seeks funding from Woodside for this.</p>	<p><b>(4)</b> <b>Woodside assessment:</b> Woodside acknowledges BJNAC plans to seek technical advice on the proposed activity and advice on potential environmental and cultural heritage implications. <b>Woodside response:</b> The draft consultation agreement includes arrangements regarding reasonable costs and expenses.</p>	<p><b>(4)</b> Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G).</p>
<p><b>(5)</b> BJNAC confirmed it had no issues or comments to make about this activity.</p>	<p><b>(5)</b> <b>Woodside assessment:</b> Woodside accepts BJNAC has no issues or comments to make about this activity.</p>	<p><b>(5)</b> As identified in Sections 6 and 7 of this EP, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in</p>

	<p><b>Woodside response:</b> Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>regulation 22(15) of the Environment Regulations and continue to progress with establishing a framework agreement as part of Woodside’s Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>
<p>Woodside addressed objections and claims as noted above.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional controls or measures required.</p>

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BJNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient information:**

- Woodside sought direction on BJNAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to BJNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.
- Advised that BJNAC can request that particular information provided in the consultation not be published (to align with 25(4)).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

- Woodside has addressed and responded to BJNAC over an eight-month period.

Woodside asked BJNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BJNAC'S functions, interests or activities.

### Esperance Tjaltjraak Native Title Aboriginal Corporation (ETNTAC)

#### Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed ETNTAC advising of the proposed activity (Record of Consultation, reference 1.86) and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that ETNTAC and its members may have within the EMBA. Woodside also provided a link to NOPSEMA's brochure "Consultation on offshore petroleum environment plans" alongside NOPSEMA's contact details.
- On 3 October 2023, ETNTAC emailed Woodside to confirm receipt of the email and noted the link to the detailed Consultation Information Sheet wasn't allowing access (SI Report, reference 47.1).
- On 3 October 2023, Woodside responded with a new link for the detailed Consultation Information Sheet (SI Report, reference 47.2).
- On 3 October 2023, ETNTAC responded (SI Report, reference 47.3) thanking Woodside for the link and asked:
  - (1) Woodside to summarise why it was seeking to engage with ETNTAC regarding the project.
  - (2) Why the limit of potential impact is Ravensthorpe and whether this is based on the potential impacts to coastal areas from a release of hydrocarbons as far east as Ravensthorpe, or another factor impacting inland areas as well.
- On 3 October 2023, Woodside responded (SI Report, reference 47.4) and:
  - (1, 2) Explained the methodology behind the EMBA and that the coast of Esperance falls within the catchment area.
  - (1) Provided some common Questions and Answers regarding what constitutes a relevant person and how an EMBA is determined. Woodside noted that following a Federal Court decision, it now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.
  - Provided direction and a link to the NOPSEMA website for further information on consultation guidelines and oil spilling modelling.
- On 24 October 2023, Woodside sent a follow-up email enquiring if ETNTAC had any questions relating to this EP and offered consultation sessions with the members and/or board of ETNTAC (SI Report, reference 47.5). No response has been received.
- On 8 December 2023, Woodside emailed ETNTAC following up on previous correspondence and offering opportunity for consultation sessions with members and/or Board of ETNT during the festive period (SI Report, reference 47.6).

- On 19 December 2023, Woodside emailed ETNTAC wishing a happy festive season, thanking ETNTAC for their contributions throughout the year and offering availability for consultation sessions (SI Report, reference 47.7).
- On 22 December, ETNTAC emailed Woodside apologising for the lack of communication and advising Woodside of when to expect future correspondence from ETNTAC (SI Report, reference 47.8).
- On 9 January 2024, Woodside emailed ETNTAC following up on previous correspondence offering to meet and discuss the EP. Woodside included contact information of the best contact person following 31 January 2024 (SI Report, reference 47.9).
- On 2 February 2024, Woodside emailed ETNTAC links to NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. The email informed ETNTAC that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with ETNTAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 47.10).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> ETNTAC has sought clarification on why Woodside is consulting with it on this activity.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside acknowledges ETNTAC needs information about why it is relevant to this activity. <b>Woodside response:</b> Woodside provided a written response advising ETNTAC of the methodology behind the EMBA, which for this EP includes the coast of Esperance, and confirmed that based on a Federal Court decision, Woodside now consults more broadly with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity. Woodside also provided some further Q&amp;As about the development of the EMBA.</p>	<p><b>(1)</b> Not required.</p>
<p><b>(2)</b> ETNTAC has queried why the limit of potential impact is Ravensthorpe.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside has determined potential impacts through the development of an EMBA. <b>Woodside response:</b> Woodside provided a written response advising ETNTAC of the methodology behind the EMBA, which for this EP includes the</p>	<p><b>(2)</b> Not required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	coast of Esperance, Woodside also provided some further Q&As about the development of the EMBA.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section ).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with ETNTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on ETNTAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to ETNTAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that ETNTAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to ETNTAC over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked ETNTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on ETNTAC functions, interests or activities.

**Bundi Yamatji Aboriginal Corporation (BYAC)**

BYAC is established under the Native Title Act 1993 by the Bundi Yamatji people to represent the Bundi Yamatji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Summary of information provided and record of consultation for this EP:**

- On 11 October 2023, Woodside sent two emails to BYAC advising of the proposed activity (Record of Consultation, reference 1.87) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that BYAC and its members may have within the EMBA, information on how BYAC would like to engage, and requested that BYAC provide information to other individuals as required (SI Report, reference 48.1).
- **(1)** On 1 November 2023, BYAC emailed Woodside thanking it for the information and advising there was no need for BYAC to provide a response in relation to connections to the area, noting that if any particular area was impacted by oil or spills then there would be a need to consult with BYAC (SI Report, reference 48.2).
- On 2 February 2024, Woodside emailed BYAC links to NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also informed BYAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside asked if BYAC would like to provide further feedback and gave contact information for direct feedback. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference, 48.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> BYAC advised it had no need to respond regarding this activity. BYAC advised that if there were spills or oil impacting BYAC’s area of interest then BYAC should be consulted.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside accepts BYAC’s feedback. <b>Woodside response:</b> In the highly unlikely event a hydrocarbon release was to impact BYAC’s area of interest, Woodside will contact BYAC.</p>	<p><b>(1)</b> The Oil Spill First Strike Plan (Appendix I) includes a requirement to contact Traditional Owners who may be affected by a spill.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
--	--	---

<p><b>Outcomes of consultation</b></p>
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Bundi Yamatji AC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet publicly available on the Woodside website since September 2023.</li> <li>• Provided Consultation Information Sheet and Summary Information Sheet to BYAC on 11 October 2023 based on their function, interest and activities. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.</li> <li>• Woodside sought direction on BYAC’s preferred method of consultation.</li> <li>• Articulated planned and unplanned environmental risks and impacts, with proposed controls.</li> <li>• Confirmed the purpose of consultation and set out in detail what is being sought through consultation.</li> <li>• Asked for the consultation and information sheets to be distributed to members and individuals.</li> <li>• Woodside has provided NOPSEMA’s brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan”.</li> <li>• Advised that BYAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).</li> </ul> <p><b>Reasonable Period:</b></p> <ul style="list-style-type: none"> <li>• Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.</li> <li>• Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.</li> <li>• Woodside has addressed and responded to BYAC over nine months, demonstrating a “reasonable period” of consultation.</li> <li>• Woodside asked BYAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.</li> </ul>

- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BYAC functions, interests or activities.

**Gnaala Karla Booja Aboriginal Corporation (GKB)**

**Summary of information provided and record of consultation for this EP:**

- On 11 October 2023, Woodside emailed GKB advising of the proposed activity (Record of Consultation, reference 1.88) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that GKB and its members may have within the EMBA, information on how GKB would like to engage, and requested that GKB provide information to other individuals as required.
- On 27 October 2023, Woodside emailed GKB following up on the 11 October 2023 email, offering to meet and asking whether any further information was required and whether there were any other individuals or groups that Woodside should consult with. No response has been received (SI Report, reference 50.1).
- On 7 December 2023, Woodside received a letter from GKB (SI Report, reference 50.2) stating:
  - (1) Woodside should inform GKB as soon as possible once an unplanned event occurs.
  - (2) Woodside to update GKB on the progress of the Pyrenees operations.
  - (2) GKB will inform Woodside if there are matters relating to the operations that GKB believe Woodside should know.
  - There are no additional matters that GKB wishes to provide in response to the EP.
- On 2 February 2024, Woodside emailed GKB NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email acknowledged that Woodside would keep GKB up to date on this activity and that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 50.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) GKB has stated it should be informed as soon as possible following an unplanned event.</p>	<p>(1) <b>Woodside assessment:</b> Woodside acknowledges that GKB should be informed as soon as possible following an unplanned event. <b>Woodside response:</b> In line with the Oil Pollution First Strike Plan, in the highly unlikely event a</p>	<p>(1) The Oil Spill Response First Strike Plan (Appendix I) includes a requirement to notify Traditional Owners who may be affected by a spill.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	hydrocarbon release was to impact GKB's area of interest, Woodside would contact GKB.	
(2) GKB requires regular updates about the activity and will share relevant information with Woodside about the activity.	(2) <b>Woodside assessment:</b> Woodside acknowledges GKB's requirement to be regularly updated about the activity and i commitment to informing Woodside about relevant matters.. <b>Woodside response:</b> Woodside will keep GKB informed about progress on the activity and will accept all feedback as part of ongoing engagement explained in 7.12.3.1 of the EP.	(2) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G).
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with GKB for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on GKB'S preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to GKB. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.

- Advised that GKB can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to GKB over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked GKB if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by Regulation 25, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GKB functions, interests or activities.

**Karri Karrak Aboriginal Corporation (KKAC)**

**Summary of information provided and record of consultation for this EP:**

- On 11 October 2023, Woodside emailed KKAC advising of the proposed activity (Record of Consultation, reference 1.89) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that KKAC and its members may have within the EMBA, information on how KKAC would like to engage, and requested that KKAC provide information to other individuals as required.
- On 12 October 2023, KKAC emailed Woodside noting they would call to discuss arrangements for feedback (SI Report, reference 51.1).
- On 18 October 2023, following a telephone conversation with Woodside on 14 October 2023 inviting Woodside to attend a KKAC Cultural Advice Committee meeting, Woodside met with the KKAC Cultural Advice Committee (SI Report, reference 51.2) comprised of senior knowledge holders, Woodside:
  - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA’s role as regulator and general contents of EPs.
  - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities open for consultation.
  - Woodside provided an overview of this activity.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.

- Displayed and spoke to the EMBA and how they are developed.
- Stated that Woodside wanted to understand how the functions, activities, or interests of KKAC and the people it represents may be impacted by any of those activities.
- Specifically asked the following:
  - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
  - What are your concerns about the proposed activities and what do you think we should do about them?
  - Is there anything you would like included in the EPs before submission?
  - Is there anyone else Woodside should consult with about the activities?
- KKAC said:
  - **(1)** They expected to be kept informed about the activities.
  - **(2)** That Woodside should advise KKAC in the case of an unplanned event arising from the activities.
  - **(3)** That KKAC would prefer their rangers to be prepared for, and included, in a response to an unplanned event within the area of their Indigenous Land Use Agreement.
- Woodside advised that they take feedback from KKAC for the life of the EP.
- On 26 October 2023, Woodside emailed KKAC following up on the meeting of 18 October, confirming outcomes and seeking to understand if KKAC would like to meet further (SI Report, reference 51.3).
- On 29 October 2023, KKAC emailed Woodside acknowledging receipt of the meeting overview and indicating that an invoice would be sent shortly (SI Report, reference 51.4).
- On 2 February 2024, Woodside emailed KKAC informing them the opportunity for consultation closes on 23 February 2024. Woodside also attached links to NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. Woodside noted they would keep KKAC informed of progress on this activity, they noted that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 51.5).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> KKAC requires Woodside to inform it about the activity’s progress.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside acknowledges KKAC’s requirement to be informed about the activity’s progress. <b>Woodside response:</b> Woodside has undertaken to keep KKAC informed about progress on the activity.</p>	<p><b>(1)</b> Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with KKAC as part of ongoing engagement (Section 7.13.3.1 of the EP).</p>

<p><b>(2)</b> KKAC requires Woodside to inform it as soon as reasonably practical in the case of an unplanned event arising from the activities.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside acknowledges KKAC's requirement to be informed in the case of an unplanned event. <b>Woodside response:</b> In line with the Oil Pollution First Strike Plan (Appendix I), in the highly unlikely event a hydrocarbon release was to impact KKAC's area of interest, Woodside will contact KKAC.</p>	<p><b>(2)</b> The Oil Spill Response First Strike Plan (Appendix I) includes a requirement to notify Traditional Owners who may be affected by a spill.</p>
<p><b>(3)</b> KKAC requests rangers be prepared for, and included, in a response to an unplanned event within the area of their Indigenous Land Use Agreement.</p>	<p><b>(3)</b> <b>Woodside assessment:</b> Woodside considers value in having rangers on the ground, trained up in the highly unlikely event of a spill. It would be beneficial to an immediate response in an emergency situation. <b>Woodside response:</b> Woodside will continue to discuss ranger programs in line with Woodside's Program for Ongoing Engagement.</p>	<p><b>(3)</b> Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians (Appendix G).</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: <b>Sufficient Information:</b></p>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on KKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that KKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to KKAC over nine months, demonstrating a "reasonable period" of consultation.
- Woodside asked KKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KKAC functions, interests or activities.

**Wagyl Kaip Southern Noongar Aboriginal Corporation (Wagyl Kaip)**

**Summary of information provided and record of consultation for this EP:**

- On 31 October 2023, Woodside emailed Wagyl Kaip advising of the proposed activity (Record of Consultation, reference 1.90) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email

<p>requested information on the interests that Wagyl Kaip and its members may have within the EMBA, information on how Wagyl Kaip would like to engage, and requested that Wagyl Kaip provide information to other individuals as required.</p> <ul style="list-style-type: none"> <li>On 7 November 2023, Woodside emailed Wagyl Kaip following up on the 31 October 2023 email, offering to meet and asking whether any further information was required and whether there were any other individuals or groups that Woodside should consult with (SI Report, reference 52.1). No response was received.</li> <li>On 22 December 2023, Woodside phoned Wagyl Kaip and left a message asking for a return call (SI Report, reference 52.2).</li> <li>On 22 December 2023, Woodside sent a follow up email requesting the opportunity to meet and answer any questions regarding the EP that Wagyl Kaip may have (SI Report, reference 52.3).</li> <li><b>(1)</b> On 8 January 2024, Wagyl Kaip emailed Woodside advising the EP would have no effect on Wagyl Kaip Aboriginal Corporation heritage or cultural values (SI Report, reference 52.4).</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> Wagyl Kaip has provided feedback stating the proposed activity will have no effect on Wagyl Kaip Aboriginal Corporation heritage or cultural values.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside accepts that Wagyl Kaip’s feedback on the activity at this time.  <b>Woodside response:</b> Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Wagyl Kaip (Section 7.12.3.1).</p>	<p><b>(1)</b> Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Wagyl Kaip as part of ongoing engagement (Section 7.13.3.1 of the EP).</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wagyl Kaip for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:</p> <p><b>Sufficient Information:</b></p> <ul style="list-style-type: none"> <li>Woodside sought direction on Wagyl Kaip’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.</li> </ul>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Wagyl Kaip. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan."
- Advised that Wagyl Kaip can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Wagyl Kaip over eight months, demonstrating a "reasonable period" of consultation.
- Woodside asked Wagyl Kaip if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wagyl Kaip functions, interests or activities.

**Whadjuk Aboriginal Corporation**

**Summary of information provided and record of consultation for this EP:**

- On 9 October 2023, Woodside telephoned Whadjuk AC advising them that Woodside would be sending consultation information regarding this EP, requesting that they review the information and respond with any feedback.
- On 9 October 2023, Woodside emailed Whadjuk AC advising of the proposed activity (Record of Consultation, reference 1.91) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email

<p>requested information on the interests that Whadjuk AC and its members may have within the EMBA, information on how Whadjuk AC would like to engage, and requested that Whadjuk AC provide information to other individuals as required.</p> <ul style="list-style-type: none"> <li>On 7 November 2023, Woodside emailed Whadjuk AC requesting any feedback regarding this activity and offering to meet with Whadjuk. No response was received.</li> </ul>

- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Whadjuk AC functions, interests or activities.

### Yued Aboriginal Corporation

#### Summary of information provided and record of consultation for this EP:

- On 9 October 2023, Woodside emailed Yued advising of the proposed activity (Record of Consultation, reference 1.92) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Yued and its members may have within the EMBA, information on how Yued would like to engage, and requested that Yued provide information to other individuals as required.
- **(1)** On 13 October 2023, Yued responded requesting maps overlaying the extent of oil spill modelling and the Yued ILUA area (SI Report, reference 54.1).
- **(1)** On 18 October 2023, Woodside emailed Yued providing the requested map and offering to meet or answer any questions (SI Report, reference 54.2).
- On 8 November 2023, Woodside emailed Yued offering the opportunity for feedback (SI Report, reference 54.3).
- **(2)** On 9 November 2023, Yued emailed Woodside advising that at present it had no feedback, and there did not appear to be any adverse impacts in the Yued area. Yued advised that they would endeavour to contact Woodside after their election cycle (SI Report, reference 54.4).
- **(2)** On 10 November 2023, Woodside emailed Yued thanking them for the response and advising Woodside would take feedback at any time as part of Woodside’s approach to ongoing consultation (SI Report, reference 54.5).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<b>(1)</b> Yued requested maps overlaying the extent of oil spill modelling and the Yued ILUA area.	<b>(1)</b> <b>Woodside assessment:</b> Woodside acknowledged that Yued required further information.	<b>(1)</b> Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<b>Woodside response:</b> Woodside provided Yued with relevant mapping.	
<b>(2)</b> Yued advised that they have no feedback on this activity, and they would endeavour to contact Woodside after their election cycle.	<b>(2)</b> <b>Woodside assessment:</b> Woodside accepts that Yued has no feedback on the activity at this time. <b>Woodside response:</b> Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Yued (Section 7.12.3.1).	<b>(2)</b> Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Yued Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Yued’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Yued. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that Yued can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside has addressed and responded to Yued over nine months, demonstrating a “reasonable period” of consultation.
- Woodside asked Yued if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.
- Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).
- Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yued functions, interests or activities.

**Wilinggin Aboriginal Corporation (Wilinggin)**

Wilinggin Aboriginal Corporation is established under the Native Title Act 1993 by the Ngarinyin people to represent the Ngarinyin people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical engagement:**

- On 18 July 2023, Woodside emailed KLC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that KLC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 57.1).

**Summary of information provided and record of consultation for this EP:**

- On 13 October 2023, Woodside emailed Wilinggin advising of the proposed activity (Record of Consultation, reference 1.93) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Wilinggin and its members may have within the EMBA, information on how Wilinggin would like to engage, and requested that Wilinggin provide information to other individuals as required.
- On 25 October 2023, Woodside emailed KLC introducing themselves and querying the best point of contact for Wilinggin (along with some other PBC’s) (SI Report, reference 57.2).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 30 October 2023, KLC responded to Woodside's email advising Woodside of the appropriate contact details for Wilinggin (SI Report, reference 57.3).
- On 2 November 2023, Woodside emailed KLC thanking them for providing the best contact details in their email on 30 October 2023 and explained how Woodside had tried all available contacts provided to them by KLC. Woodside also stated that they were flexible and will support Wilinggin's preferred method of consultation (dates and locations) (SI Report, reference 57.4).
- On 2 November 2023, KLC emailed Woodside confirming email receipts and affirmed that they would pass onto relevant persons (SI Report, reference 57.5).
- On 2 November 2023, Woodside emailed Wilinggin introducing themselves and enquiring the best point of contact. Woodside also queried if there was availability for a meeting or if any follow up information was required for this activity (SI Report, reference 57.6).
- On 16 November 2023, Woodside sent a follow up email to Wilinggin enquiring the best contact to reach the Chief Executive Officer for the Wilinggin Aboriginal Corporation. Woodside also offered the opportunity to meet and discuss Woodside activities with the Wilinggin Aboriginal Corporation (SI Report, reference 57.7).
- On 24 November 2023, Woodside emailed Wilinggin requesting the opportunity to meet and answer any questions relating to the EP. Woodside again provided the Summary Information Sheets that were originally sent in October 2023 and asked whether Wilinggin had any feedback on the activity, noting that consultation was open for the life of the EP (SI Report, reference 57.8).
- On 23 January 2024, Woodside emailed Wilinggin to inform Wilinggin that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Wilinggin at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 57.9).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wilinggin Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on Wilinggin's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Wilinggin. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.

- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that Willinggin can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with Willinggin in October 2023. Woodside has addressed and responded to Willinggin over nine months, demonstrating a "reasonable" period of consultation.

Woodside asked Willinggin if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Willinggin's functions, interests or activities.

**Wunambal Gaambera Aboriginal Corporation (WGAC)**

WGAC is established under the Native Title Act 1993 by the Wunambal Gaambera people to represent the Wunambal Gaambera people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical Engagement**

- On 18 July 2023, Woodside emailed WGAC/KLC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that WGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 58.1).

**Summary of information provided and record of consultation for this EP:**

- On 2 October 2023, Woodside emailed WGAC advising of the proposed activity (Record of Consultation, reference 1.95) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

information on the interests that WGAC and its members may have within the EMBA, information on how WGAC would like to engage, and requested that WGAC provide information to other individuals as required. On 18 October 2023, Woodside emailed WGAC to identify the best contact details regarding consultation matters.

- On 18 October 2023, Woodside emailed WGAC seeking points of contact for consultation (SI Report, reference 58.2).
- On 18 October 2023, WGAC emailed Woodside with contact details (SI Report, reference 58.3).
- On 18 October 2023, Woodside emailed WGAC seeking to meet with the WGAC Board to provide information and seek feedback on Woodside activities (SI Report, reference 58.4).
- On 15 November 2023, Woodside emailed WGAC following up on previous correspondence and again requesting an opportunity to discuss current activities (SI Report, reference 58.5).
- On 23 November 2023, Woodside emailed WGAC offering a meet and greet to discuss potential funding of future arrangements for meetings and talk through the EP process (SI Report, reference 58.6).
- On 23 January 2024, Woodside emailed to inform WGAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with WGAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments received post 23 February 2024 (SI Report, reference 58.7).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objects or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on WGAC’s preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to WGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.

- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that WGAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with WGAC in October 2023. Woodside has addressed and responded to WGAC over nine months, demonstrating a "reasonable" period of consultation.

Woodside asked WGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WGAC's functions, interests or activities.

**Native Title Representative Bodies**

**Yamatji Marlpa Aboriginal Corporation (YMAC)**

YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.

**Historical engagement:**

- On 13 March 2023, Woodside emailed YMAC as to whether YMAC considers itself a 'relevant person' under regulation 25 of the Environment Regulations for the purposes of consultation on EPs and, if so, whether that relevance is limited to a facilitation function in its capacity as a representative of Traditional Owner groups/corporations that overlap or adjacent to the environment that may be affected (EMBA) of a particular activity (SI Report, reference 60.1).
- On 15 March 2023, Woodside emailed YMAC to request a response as to whether YMAC considers itself a 'relevant person' under relevant sections of the Environment Regulations for the purposes of consultation in EPs (SI Report, reference 60.2).
- **(1)** On 20 March 2023, YMAC replied to confirm that in its view it is a 'relevant person' under regulation 25(1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation. YMAC does not intend to provide substantive comment on the content of EPs (SI Report, reference 60.3 and 60.4).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (1) On 20 March 2023, Woodside emailed YMAC to thank it for its reply and to advise that that this assessment would be included in Woodside's EPs (SI Report, reference 60.5).
- On 20 March 2023, YMAC emailed Woodside confirming that they agree to their advice being included in reporting (YMAC is the representative for NTGAC and Nanda Aboriginal Corporation and was the representative for Yinggarda Aboriginal Corporation until April 2023) (SI Report, reference 60.6).
- (2) On 12 June 2023, YMAC emailed Woodside on behalf of itself and its clients (SI Report, reference 60.7). The email attached:
  - A proposal to fund in-house expertise to support consultations and administration of the consultation framework.
  - A draft consultation framework.
- On 12 June 2023, Woodside emailed YMAC, thanking them for the documents and informing them that Woodside would respond shortly (SI Report, reference 60.8).
- (2) On 25 July 2023, Woodside emailed YMAC (SI Report, reference 60.9):
  - Agreeing in principle to the draft consultation framework and funding proposal but seeking further discussion on details.
  - Stating that Woodside is open to considering an industry funded position at YMAC to support the work they are facilitating.
  - Attaching Woodside's Program for Ongoing Engagement with Traditional Custodians.
  - Seeking a meeting with YMAC in relation to the draft consultation framework at YMAC's earliest convenience.

**Summary of information provided and record of consultation for this EP:**

- On 23 October 2023, Woodside emailed YMAC advising of the proposed activity (Record of Consultation, reference 1.104) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that YMAC and its members may have within the EMBA, information on how YMAC would like to engage, and requested that YMAC provide information to other individuals as required.
- On 13 November 2023, Woodside emailed YMAC noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet (SI Report, reference 60.10).
- (2) On 14 December 2023, Woodside emailed YMAC re-attaching the Program of Ongoing Consultation and advising that Woodside would like to progress negotiations on consultation frameworks with groups represented by YMAC (SI Report, reference 60.11). Woodside proposed the protocol would include (among other things):
  - The procedures Woodside will follow when a submission requires consultation.
  - Initial and ongoing consultation in relation to activities.
  - Agreement as to how Woodside will provide the information groups requires to make free, prior and informed decisions about Woodside's EPs.
  - Agreement as to how groups will provide feedback and how that can best be represented in EPs.
  - An agreed schedule of rates for groups participation in consultation.
  - How to manage the outputs of the consultations.
- On 21 December 2023, Woodside emailed YMAC providing a list of upcoming activities as requested by YMAC (SI Report, reference 60.12).

<ul style="list-style-type: none"> <li>• <b>(2)</b> On 28 February 2024, Woodside emailed YMAC draft consultation agreements for consideration including aims of consultation, proposed consultation agreement details and a consultation meeting framework. Woodside invites YMAC to propose a schedule of rates and other details relating to its engagements (SI Report, reference 60.13).</li> <li>• On 29 February 2024, YMAC emailed Woodside acknowledging receipt of email and draft consultation agreement for review (SI Report, reference 60.14).</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p><b>(1)</b> YMAC has provided feedback that in its view it is a ‘relevant person’ under regulation 25(1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation and does not intend to provide substantive comment on the content of EPs.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside accepts YMAC’s feedback that it is a relevant person only in relation to its facilitation and coordination function as a representative body. <b>Woodside response:</b> Woodside has consulted with YMAC in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation, and it has responded that it does not intend to provide substantive comment on the content of EPs.</p>	<p><b>(1)</b> Not required.</p>
<p><b>(2)</b> YMAC has provided feedback that it is seeking an industry funded position to support consultations for this and other activities. YMAC has provided a draft consultation framework to assist the consultation process.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside has assessed the Program of Ongoing Engagement with Traditional Custodians will support ongoing consultation with YMAC and/or the groups it represents. This can address appropriate support for resourcing, separate from consultation under regulation 25 of the Environment Regulations. Sufficient information to allow informed assessment has already been provided by other means. <b>Woodside response:</b> In December 2023, Woodside emailed YMAC draft consultation agreements for consideration. Woodside has invited YMAC to propose a schedule of rates and other details relating to its engagements.</p>	<p><b>(2)</b> Woodside will continue to engage with YMAC in relation to its request for an industry funded position and has put a proposal to YMAC in December 2023 for a Framework Agreement. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix G).</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has</p>	<p>No additional measures or controls are required.</p>

	<p>been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.5.1 of the EP).</p>	
--	---	--

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with YMAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. YMAC has indicated that it will not provide substantive comment on EPs:

**Sufficient Information:**

- Woodside sought direction on YMAC’s preferred method of consultation. This resulted in meetings being coordinated at location of YMAC’s choosing, with YMAC nominated representatives. These meetings included Woodside presenting information in a format and style that was readily accessible and appropriate.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to YMAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with YMAC in August 2023. Woodside has addressed and responded to YMAC over nine months, demonstrating a “reasonable period” of consultation.

Woodside asked YMAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YMAC functions, interests or activities.

**Kimberley Land Council (KLC)**

**Historical engagement:**

- (1) On 16 February 2023, Woodside emailed KLC following a telephone discussion about EP consultations confirming that the KLC does not wish to be consulted on EPs but will facilitate consultation with Aboriginal Corporations it supports (SI Report, reference 61.1).

**Summary of information provided and record of consultation for this EP:**

- On 19 October 2023, Woodside emailed KLC advising of the proposed activity (Record of Consultation, reference 1.77 and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required.
- On 25 October 2023, Woodside emailed KLC by way of introduction to Woodside’s First Nations engagement team. Woodside requested the point of contact for WWAC, Williggin AC, WGAC and DAC and associated members to provide updates and information on Woodside activities and listen to feedback (SI Report, reference 61.2).
- On 30 October 2023, KLC emailed Woodside providing advice on point of contact for ACs via an online website (SI Report, reference 61.3).
- (1) On 2 November 2023, Woodside emailed KLC confirming that Woodside had attempted to contact Aboriginal Corporations via website. Woodside reinforced that it was available to have discussions with each Aboriginal Corporation and was accommodating to meet their needs regarding dates and locations (SI Report, reference 61.4).
- (1) On 2 November 2023, KLC emailed Woodside stating it would pass on Woodside contact details to relevant organisations (SI Report, reference 61.5).

Woodside has been engaging with KLC on behalf of its represented groups as described in relevant sections above.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) KLC does not wish to be consulted on EPs but will facilitate consultation with Aboriginal Corporations it supports.</p>	<p>(1) <b>Woodside assessment:</b> Woodside acknowledges that KLC does not wish to be consulted on EPs but will facilitate consultation with Aboriginal Corporations it supports. <b>Woodside response:</b> Woodside has consulted with KLC in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation.</p>	<p>(1) No additional measures or controls are required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KLC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Woodside sought direction on KLC's preferred method of consultation. This resulted in meetings being coordinated at location of KLC's choosing, with KLC nominated representatives. These meetings included Woodside presenting information in a format and style that was readily accessible and appropriate.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to KLC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with KLC in August 2023. Woodside has addressed and responded to KLC over ninemonths, demonstrating a "reasonable period" of consultation.

Woodside asked KLC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KLC functions, interests or activities.

**Self-identified First Nations Groups**

**Ngarluma Yindjibarndi Foundation Ltd (NYFL)**

**Historical engagement:**

- (1) On 29 June 2023, in relation to other activities, NYFL confirmed they considered themselves a 'relevant person' and noted they were looking to agree on the next steps in agreeing appropriate consultation frameworks in relation to oil and gas activities (SI Report, reference 62.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 July 2023, Woodside emailed NYFL NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that NYFL advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email (SI Report, reference 62.2).
- On 26 July 2023, Woodside emailed NYFL Woodside's planned Program of Ongoing Engagement with Traditional Custodians (SI Report, reference 62.3).
- **(2)** On 26 July 2023, NYFL emailed Woodside in response to Woodside's planned Program of Ongoing Engagement with Traditional Custodians, noting it was a good start particularly with the inclusion of Traditional Owner feedback and indicating that assistance with resourcing and internal capacity would be required. NYFL noted its expectations about resourcing as a relevant person (SI Report, reference 62.4).
- On 1 August 2023, NYFL emailed Woodside acknowledging receipt of Program of Ongoing Engagement with Traditional Custodians and instructing Woodside to direct oil and gas relating to YAC to NYFL (SI Report, reference 62.5).
- **(1)** On 18 August, NYFL emailed Woodside confirming it would like to meet with Woodside to discuss future consultation and engagement processes and suggested a 30 April date (SI Report, reference 62.6).
- **(1)** On 28 August 2023, Woodside emailed NYFL confirming the involvement of a consultant in the consultation and engagement process (SI Report, reference 62.7).
- **(1,2)** On 28 August 2023, Woodside emailed NYFL thanking NYFL for enabling Woodside to meet and discuss future consultation and engagement process and suggest a 30 August 2023 meeting (SI Report, reference 62.8).
- On 28 August 2023, Woodside emailed NYFL to confirm agenda for 30 April 2023 meeting (SI Report, reference 62.9).

**Summary of information provided and record of consultation for this EP:**

- On 19 October 2023, Woodside emailed NYFL regarding the proposed activity (Record of Consultation, reference 1.71) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NYFL and its members may have within the EMBA, information on how NYFL would like to engage, and requested that NYFL provide information to other individuals as required.
- **(1)** On 27 October 2023, NYFL provided NYFL's position statement regarding industry consultation which was a change of position from its advice on 29 June 2023. NYFL noted that it expects an updated proposal regarding consultation to be provided by Woodside. NYFL advised that it does not have the capacity to respond adequately to EPs or other consultation material sent by proponents nor did it feel the process results in a fair representation of Traditional Owner interests (SI Report, reference 62.10).
- **(1)** On 3 November 2023, Woodside responded to NYFL stating that Woodside would respond regarding the concerns raised on in the 27 October email. Woodside offered to meet to discuss short term solutions (SI Report, reference 62.11).
- On 7 November 2023, Woodside emailed NYFL offering to meet to discuss the issues raised, after the National Sea Country Summit taking place on 6-8 November. Woodside offered to meet the week of 20 November (SI Report, reference 62.12).
- **(1, 2)** On 19 November 2023, NYFL emailed Woodside, stating that they were awaiting an updated consultation framework from Woodside and were not able to meet as they didn't have resources to apply to developing a framework but looked forward to providing feedback on an updated framework (SI Report, reference 63.13).

- On 20 November 2023, Woodside emailed NYFL acknowledging their email of 19 November 2023. (SI Report, reference 62.14)
- On 4 December 2023, Woodside emailed NYFL (SI Report, reference 62.15):
  - seeking clarification about changes in recent correspondence, noting that NYFL had indicated on several occasions over a number of months that they wished to await outcomes of the First Nations Sea Country Summit in Darwin and would be involved in the development of the National First Nations Led Framework on consultation.
  - Woodside indicated that they had requested to meet face to face with NYFL in November as Woodside wanted to understand NYFL's expectations and discuss the outcomes of the Summit.
  - Woodside also wanted to discuss the strategic sponsorship funding request noting they required a business case to understand what NYFL was suggesting and how it would align with NYFL's strategic objectives.
- On 6 December 2023, NYFL emailed Woodside (SI Report, reference 62.16) noting that:
  - At the meeting of 30 August 2023 there was discussion about challenges and proposed solutions to progress EP consultation.
  - **(2)** NYFL operate in a resource-constrained environment.
  - A proposal to NYFL responding to issues raised at the above meeting was expected.
  - The Summit had been referred to as a potential useful resource for developing an updated framework.
  - **(1)** NYFL had agreed to progress the Program of Ongoing Engagement with Traditional Custodians.
  - Social investment and capacity building funding should remain separate to consultation regarding EPs and other environment and heritage matters.
- **(1,2)** On 14 December 2023, Woodside emailed NYFL, following up on previous emails about consultation on EPs, acknowledging NYFL's resource constraints and limitations that can be allocated to consultation on the EPs (SI Report, reference 62.17). Woodside proposed/noted the following to support consultation activities that would provide NYFL with the ability to engage and provide input and feedback:
  - Woodside intends engaging a senior Ngarluma person in an advisory/liaison capacity, which will include facilitating consultation with NYFL members in relation to EPs.
  - A consultation framework on EPs which includes:
    - Agreement between Woodside and NYFL to consult in a meaningful and genuine manner.
    - The procedures Woodside will follow when a submission requires consultation.
    - Initial and ongoing consultation in relation to relevant Woodside EPs and the senior Ngarluma person's role in facilitating those consultations.
    - Agreement as to how Woodside will provide NYFL with the information NYFL requires to make free, prior and informed decisions about Woodside's EPs.
    - Agreement as to how NYFL will provide feedback and how that can best represent NYFL's feedback to NOPSEMA or other relevant organisations.
    - An agreed schedule of rates for NYFL's participation in consultation regarding Woodside's EPs.
    - How to manage the outputs of consultation.

- Agreement on an approach to minimise duplication of consultation activities conducted with NAC, Yindjibarndi and NYFL.
  - An EP Consultation Working Group with representation from Woodside and NYFL.
  - Suggested further discussion on the proposal at the NYFL/Woodside Quarterly meeting on 19 December 2023.
- On 9 January 2024, Woodside emailed NYFL following up if NYFL would like to discuss the current activities and EPs (SI Report, reference 62.18).
- (1) On 6 March 2024, Woodside emailed NYFL a draft consultation agreement for EPs (SI Report, reference 62.19).
- On 14 March 2024, NYFL emailed Woodside confirming receipt of draft consultation agreement (SI Report, reference 62.20).
- (1,2) On 19 March 2024, NYFL emailed Woodside an estimate for initial review of Woodside’s draft consultation agreement (SI Report, reference 62.21).
- On 17 April 2024, NYFL emailed Woodside noting they were attending to sorry business and as per cultural protocols would require time within the community and engagement would be delayed until appropriate to re-commence (SI Report, reference 62.22).
- (2) On 10 May 2024, Woodside emailed NYFL discussing the intent of the consultation framework in the relation to EPs, how information would be presented and the costs Woodside is prepared to for meet for consultation. Woodside stated it looked forward to NYFL’s advice for the preferred manner of consultation and an understanding of the costs NYFL preferred Woodside cover (SI Report, reference 62.23).

NYFL is also consulted through its membership on the Karratha Community Liaison Group (KCLG) and the Quarterly Heritage Group.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) NYFL has self-identified as a relevant person for activities. NYFL seeks consultation frameworks in relation to oil and gas activities.</p>	<p>(1) <b>Woodside assessment:</b> Woodside has responded to NYFL’s self-identification and consulted with them as a relevant person. Woodside is working with NYFL To finalise a draft consultation agreement. <b>Woodside response:</b> Woodside sent NYFL a draft consultation agreement in March 2024.</p>	<p>(1) Not required.</p>
<p>(2) NYFL have noted they operate in a restrained resource environment.</p>	<p>(2) <b>Woodside assessment:</b> Woodside supports reasonable requests for resourcing relating to consultation. <b>Woodside response:</b> The draft consultation agreement provided to NYFL in March 2024 would be an effective mechanism to address resourcing for ongoing consultation.</p>	<p>(2) The proposed Framework Agreement will address appropriate NYFL resourcing.</p>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
--	---	---

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NYFL for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

**Sufficient Information:**

- Sought direction on NYFL’s preferred method of consultation. NYFL requested consultation material suitable for Traditional Custodian audience, which was developed and provided. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to NYFL. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA’s Brochure “Consultation on offshore petroleum environment plans” and Guideline “Guideline: Consultation in the course of preparing an environment plan.
- Advised that NYFL can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

**Reasonable Period:**

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state, and relevant local newspapers including, the North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with NYFL in October 2023. Woodside has responded to NYFL over ninemonths, demonstrating a “reasonable period” of consultation.
- Woodside asked NYFL it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NYFL functions, interests, or activities.

**Local government and elected Parliamentary representatives, community groups or organisations**

**Shire of Exmouth**

**Summary of information provided and record of consultation for this EP:**

- On 15 September 2023, Woodside emailed Shire of Exmouth advising of the proposed activity (Record of Consultation, reference 1.18) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Exmouth following up on the proposed activity (Record of Consultation, reference 2.1).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Exmouth for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Exmouth on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Exmouth with the opportunity to provide feedback over a 10-month period.

### Shire of Ashburton

#### Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed Shire of Ashburton advising of the proposed activity (Record of Consultation, reference 1.17) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 2 October 2023, Shire of Ashburton responded thanking Woodside for its correspondence and noting its support of the significant contribution the oil and gas sector makes to the community (SI Report, reference 63.1). The Shire asked for consideration of the following comments:
  - (1) The Shire confirmed it had no objections to the proposed activities.
  - (2) The Shire expects that Woodside will identify, manage and mitigate all possible impacts and risks in line with relevant regulatory frameworks.
  - (3) The Aboriginal Cultural Heritage Inquiry System (ACHIS) should be consulted to ensure site of significance are not impacted without consents.
  - (4) The Shire requires Woodside to brief the Shire's Local and District Emergency Management Committee's on its planned responses to such events before any activities commence.
  - (5) Asks that Woodside has communicated with appropriate emergency management agencies at either/or National, State, District and Local levels on potential hazards and risks around the activity; collaboration and/or cooperation on risk mitigation; considered impacted areas response capacity and capability and sustainability of response activities and escalation triggers.
  - (6) The Shire anticipates that Woodside has undertaken their own emergency management planning to mitigate risk and recover from a risk related incident, has engaged with external emergency management agencies to ensure emergency management plans are aligned with outcomes to respond and/or recovery from the incident.
  - (7) The Shire anticipates that Woodside has engaged with the community regarding what may happen in areas that are affected by the proposed activities.
  - The Shire proposes that Woodside consider the Shire-operated Pilbara Regional Waste Management Facility (PRWMF) for its decommissioning, recycling and waste disposal purposes.
  - (8) The Shire appreciates the opportunity to comment on the proposed activities and requests that Woodside provide the Shire with further updates as the proposal progresses.
- On 6 November 2023, Woodside responded thanking Shire of Ashburton for its feedback (SI Report, reference 63.2) and noted:
  - (1) That Woodside was required to manage environmental impacts and risks to the environment that may be affected (EMBA) by its proposed activities to As Low As Reasonably Practicable (ALARP) and to an acceptable level, as required by the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations), through the implementation of the EP. Woodside's proposed EPs will be submitted to the National Offshore Petroleum Safety Environmental Management Authority (NOPSEMA) for assessment and acceptance.
  - (2) Woodside routinely utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development process and included the results of these inquiry system searches as an appendix to each EP.

- **(3)** Woodside was looking forward to presenting to the Shire at its Local and District Emergency Management Committee (LEMC) on 21 November 2023 on its approach to managing a hydrocarbon release in the highly unlikely event this occurs. Woodside confirmed it would welcome questions regarding this EP during the presentation. Woodside also sought to clarify the Shire's request to provide a briefing prior to activities commencing as this would potentially mean Woodside is providing frequent briefings on the same issue.
- **(4)** Woodside has an Oil Pollution First Strike Plan in place for all EPs which details potential impacts, notifications and response mitigations that may be executed to manage an emergency event.
- **(5)** In the course of developing EPs, Woodside develops oil spill preparedness and response positions tailor for individual projects, and consults with the relevant external emergency management agencies.
- **(6)** Woodside consults relevant persons in the course of preparing an EP in accordance with regulation 11A (now regulation 25 )of the Environment Regulations, and as per Woodside's ongoing consultation approach, feedback and comments received from relevant persons continue to be assessed and responded to, as required, throughout the life of an EP.
- **(7)** Woodside notes the Shire's interest in ongoing local content opportunities and aims to work with local business through employment and contracting opportunities, where practical, to create and building community capacity and capability.
- **(8)** Woodside would continue to provide the Shire with significant updates when relevant.
- On 14 November 2023, Shire of Ashburton responded (SI Report, reference 63.3) and, regarding Woodside's query seeking clarification on LEMC briefing requirements, confirmed:
  - **(9)** Woodside was not required to give a briefing on its response capability every time it undertook an activity that had a risk of a hydrocarbon release.
  - **(10)** It was proposed that Woodside, when operating in an area, provided a briefing that covered its program of activities over a period of time, which could be determined by Woodside's own assessment of the need and liaising with the relevant LEMC/DEMC.
  - **(11)** The word briefing should not be confused with advising stakeholders of any assessed high-risk activity where it is appropriate to inform those who might be impacted or involved in a response or recovery process.
- **(4)** On 21 November 2023, Woodside presented at the Shire of Ashburton LEMC meeting (SI Report, reference 63.4) and provided:
  - An overview of proposed activities relevant to the Shire including this EP.
  - An outline of the consultation approach and explanation of the EMBA as a modelling process of the broadest extent a diesel could spread based on a number of conditions.
  - Details of the oil spill response approach in the highly unlikely event of a hydrocarbon spill.
  - Woodside's key steps when activating an oil spill response plan.
  - Shire of Ashburton thanked Woodside for presenting to the committee and no questions or concerns were raised.
- On 22 November 2023, Woodside responded thanking the Shire for its email from 14 November 2023 and confirmed:
  - **(9)** It noted the Shire's advice that it was not required to provide a briefing on its response capability every time it undertakes an activity that has a risk of a hydrocarbon release.

<ul style="list-style-type: none"> <li>- (10) It accepted the Shire’s proposal to provide briefings that cover its program of activities over a period of time, as determined by Woodside’s own assessment of need and in liaison with the relevant LEMC.</li> <li>- (11) It will provide notifications to relevant stakeholders if required as per Woodside’s oil spill response arrangements.</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
(1) No objections to the proposed activity.	(1) <b>Woodside assessment:</b> Woodside notes the Shire has no objections. <b>Woodside response:</b> Woodside acknowledged that the Shire of Ashburton had no objections to the activity.	(1) Not required.
(2) Identifying, managing and mitigating all possible impacts and risks.	(2) <b>Woodside assessment:</b> Woodside has assessed environment impacts and risks as well as mitigation and management measures in the EP. <b>Woodside response:</b> Woodside confirmed it was required to manage environmental impacts and risks to the environment by the proposed activities to As Low As Reasonably Practicable (ALARP), as per the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations).	(2) Existing controls considered sufficient as described in Section 6 of this EP.
(3) Consulting the ACHIS.	(3) <b>Woodside assessment:</b> Woodside has utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System for this EP. <b>Woodside response:</b> Woodside confirmed it routinely utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development.	(3) A search of DPLH’s Aboriginal Cultural Heritage Inquiry System was undertaken for this EP (see Appendix G of this EP).
(4) Briefing the Shire’s Local and District Emergency Management Committee before activities commence.	(4) <b>Woodside assessment:</b> Woodside agrees there is merit in briefing the LEMC given its role and function. <b>Woodside response:</b> Woodside noted it was looking forward to presenting to the Shire of Ashburton’s LEMC meeting on 21 November 2023 regarding its approach to managing a hydrocarbon release in the highly unlikely event this occurred and would be happy to take questions regarding this EP during the presentation.	(4) Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	However, Woodside sought clarification on the frequency of the briefings and whether they were needed for each activity.	
<b>(5)</b> Ensuring Woodside is communicating with appropriate national and state emergency management agencies.	<b>(5)</b> <b>Woodside assessment:</b> Woodside's oil spill preparedness and response plans for this EP include communication with appropriate agencies. <b>Woodside response:</b> Woodside confirmed it had an Oil Pollution First Strike Plan in place for this EP which detailed potential impacts, notifications and response mitigations that may be executed to manage an emergency event.	<b>(5)</b> In the course of developing this EP, Woodside has developed oil spill preparedness and response positions and an Oil Pollution First Strike Plan (see Appendix H and I of this EP).
<b>(6)</b> Assuming Woodside has emergency management planning in place.	<b>(6)</b> <b>Woodside assessment:</b> Woodside has developed oil spill preparedness and first response plans for this EP. <b>Woodside response:</b> Woodside confirmed that in the course of developing EPs, it developed oil spill preparedness and response positions tailored for individual projects. Woodside consults with the relevant external management agencies to ensure all emergency management plans are aligned with effective outcomes.	<b>(6)</b> In the course of developing this EP, Woodside has developed oil spill preparedness and response positions and an Oil Pollution First Strike Plan (see Appendix H and I of this EP).
<b>(7)</b> Ensuring Woodside has engaged with the community.	<b>(7)</b> <b>Woodside assessment:</b> Woodside has consulted relevant persons whose functions, interests or activities may be impacted by the activity, in line with regulation 25 of the Environment Regulations. <b>Woodside response:</b> Woodside advised it consulted relevant persons in the course of preparing an EP, and as per Woodside's ongoing consultation approach, feedback and comments from relevant persons continued to be assessed and responded to, as required, throughout the life of an EP.	<b>(7)</b> Woodside complies with regulation 25 of the Environment Regulations and consults relevant persons in the course of developing an EP, as described in Section 5.3 of this EP. Woodside also engages in ongoing consultation throughout the life of an EP as described in Section 7.13.3.1 of the EP.
<b>(8)</b> Provide updates as activities progress.	<b>(8)</b> <b>Woodside assessment:</b> Woodside will provide the Shire with significant updates with respect to the activity, as appropriate. <b>Woodside response:</b> Woodside confirmed it would continue to provide the Shire with significant updates with respect to the proposed activities when relevant.	<b>(8)</b> Woodside will provide notification of significant change to relevant persons as referenced in Section 7.13.3.1 of the EP.
<b>(9)</b>	<b>(9)</b>	<b>(9)</b>

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Amended its advice regarding the timing of briefings to the LEMC.	<p><b>Woodside assessment:</b> Woodside accepts the LEMC's updated advice regarding briefing requirements.</p> <p><b>Woodside response:</b> Woodside noted the Shire's advice regarding the frequency of briefings to the LEMC.</p>	Not required.
(10) Proposed Woodside give briefings that cover its program of activities over a period of time.	<p>(10) <b>Woodside assessment:</b> Woodside accepts the Shire's proposal for Woodside to deliver briefings that cover its program of activities in an area over a period of time.</p> <p><b>Woodside response:</b> Woodside confirmed it accepted the Shire's proposal to deliver briefings that cover its program of activities in an area over a period of time.</p>	(10) Not required.
(11) Clarified the need for stakeholders to be advised of any assessed high-risk activity.	<p>(11) <b>Woodside assessment:</b> Woodside will notify relevant stakeholders if required.</p> <p><b>Woodside response:</b> Woodside confirmed it would notify relevant stakeholders if required as per Woodside's oil spill response arrangements.</p>	(11) The Oil Pollution First Strike Plan (Appendix I) for this EP includes a requirement to notify stakeholders who may be affected by a spill.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Ashburton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers on 13 September 2023 advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Ashburton on 15 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Shire of Ashburton over a 10-month period.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Broome for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Broome on 18 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Shire of Broome over a 10-month period.

**Shire of Shark Bay**

**Summary of information provided and record of consultation for this EP:**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 19 September 2023, Woodside emailed Shire of Shark Bay advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Shark Bay following up on the proposed activities (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.
- On 17 October 2023, Woodside met with the Shire of Shark Bay during a community information session in Denham (SI Report. The discussion with the Shire included:
  - (1) An overview of this EP and its consultation process, noting that consultation was based on the EMBA and that no activities were planned in Shark Bay.
  - (2) The Shire advising it would provide a list of other potentially relevant persons to consult.
- On 18 October 2023, the Shire of Shark Bay emailed Woodside thanking it for the meeting (SI Report, reference 66.1). The Shire:
  - (2) Recommended a list of contacts in Shark Bay who might be interested in providing feedback on the proposed activity and expressed an interest in setting up a meeting with interested contacts in the future. Woodside has sent consultation information to these contacts.
  - (3) Provided advice on the best consultation channels for the broader Shark Bay community and advised that as a local government, Shire of Shark Bay could not post Woodside content on its website but could share graphics containing consultation information on its Facebook page on behalf of Woodside.
- On 20 October 2023, Woodside sent an email thanking Shire of Shark Bay for the meeting (SI Report, reference 66.2) and:
  - (2) Confirmed it would consult the stakeholders recommended by the Shire.
  - (3) Thanked the Shire for its advice on the best consultation methods for reaching the broader community.
  - (1) Provided further information, including links to the Consultation Information Sheet, for this EP and two separate Woodside EPs in which the Shire had shown interest.
  - (1) Explained the environment that may be affected (EMBA) and how it affected the Shire of Shark Bay for this EP and the separate Woodside EP.
  - (1) Confirmed Woodside looked forward to meeting with the Shire in the future.
- On 31 October 2023, Woodside sent an email to three Shire of Shark Bay representatives providing another overview of the proposed activity (Record of Consultation, reference 1.60).
- On 15 December 2023, Woodside sent a reminder email to three Shire of Shark Bay representatives following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
(1) Explanation of Woodside’s consultation process, the activities associated with this EP, and the EMBA.	(1) <b>Woodside assessment:</b> Woodside welcomes engagement with the Shire of Shark Bay which has been assessed as a relevant person for this EP.	(1) Not required.

	<p><b>Woodside response:</b> Woodside provided an explanation of the EP, EMBA and consultation process during a discussion with Shire of Shark Bay at a community information session. Woodside had previously provided consultation information to the Shire via email, and, following the meeting, Woodside emailed consultation information to additional Shark Bay representatives.</p>	
<p>(2) Provided a list of contacts who may be interested in providing feedback on the activities proposed in this EP.</p>	<p>(2) <b>Woodside assessment:</b> Woodside reviewed the Shire of Shark Bay's feedback regarding potentially relevant persons for this EP and provided consultation information to those stakeholders. <b>Woodside response:</b> Woodside confirmed it would provide consultation information to the stakeholders recommended by Shire of Shark Bay.</p>	<p>(2) Woodside updated its Assessment of Relevance (see Appendix F, Table 1) to include the stakeholders Shire of Shark Bay identified as potentially relevant.</p>
<p>(3) Provided advice on consultation channels for Shark Bay.</p>	<p>(3) <b>Woodside assessment:</b> Woodside notes Shire of Shark Bay's advice on consultation channels for the community and will incorporate this approach into future EPs where relevant. <b>Woodside response:</b> Woodside noted Shire of Shark Bay's advice for the best consultation channels for the broader community and will action this approach for consultation on future EPs where relevant.</p>	<p>(3) Not required.</p>
<p>(4) Advised it could share Woodside consultation graphics on its Facebook page.</p>	<p>(4) <b>Woodside assessment:</b> Woodside notes the Shire of Shark Bay can share information on its Facebook page on behalf of Woodside. <b>Woodside response:</b> Woodside noted the Shire of Shark Bay's advice regarding sharing consultation information on Facebook on behalf of Woodside.</p>	<p>(4) Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Shark Bay for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Shark Bay on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Shire of Shark Bay over a 10-month period.

**City of Greater Geraldton**

**Summary of information provided and record of consultation for this EP:**

- On 19 September 2023, Woodside emailed City of Greater Geraldton advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to City of Greater Geraldton following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Greater Geraldton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to City of Greater Geraldton based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided City of Greater Geraldton with the opportunity to provide feedback over 10-month period.

**Shire of Augusta Margaret River**

**Summary of information provided and record of consultation for this EP:**

- On 21 September 2023, Woodside emailed Shire of Augusta Margaret River advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Augusta Margaret River following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Augusta Margaret River for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information provided to Shire of Augusta Margaret River on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up seeking feedback on the proposed activities.
- Woodside has provided Shire of Augusta Margaret River with the opportunity to provide feedback over a 10-month period.

**Shire of Dandaragan**

**Summary of information provided and record of consultation for this EP:**

- On 19 September 2023, Woodside emailed Shire of Dandaragan advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Dandaragan following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Dandaragan for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Dandaragan on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Dandaragan with the opportunity to provide feedback over a 10-month period.

**Shire of Gingin**

**Summary of information provided and record of consultation for this EP:**

- On 19 September 2023, Woodside emailed Shire of Gingin advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Gingin following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Gingin for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Gingin on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Gingin with the opportunity to provide feedback over a 10-month period.

**Shire of Northampton**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**Summary of information provided and record of consultation for this EP:**

- On 19 September 2023, Woodside emailed Shire of Northampton advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Northampton following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Northampton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Northampton on 19 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Northampton with the opportunity to provide feedback over a 10-month period.

**Shire of Christmas Island**

**Summary of information provided and record of consultation for this EP:**

- On 19 September 2023, Woodside emailed Shire of Christmas Island advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

- On 16 October 2023, Woodside sent a reminder email to Shire of Christmas Island following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 25 October 2023, Woodside emailed Shire of Christmas Island to provide details for its contact for First Nations Peoples and seek contact details for the Christmas Island Malay Peoples (SI Report, reference 67.1).
- On 2 November 2023, Woodside sent a follow-up email regarding contacts for the Christmas Island Malay Peoples and explaining its intention to provide an overview of Woodside Energy and its projects to the community and broader Shire (SI Report, 67.2).
- On 3 November 2023, Woodside had a phone call with Shire of Christmas Island to discuss consultation opportunities (SI Report, 67.3). During the discussion:
  - Woodside provided an overview of role responsibilities and points of contact with First Nations communities and Corporations in WA and NT.
  - Woodside discussed the recent changes to consultation and engagement as a result of the Santos Tiwi Island matter.
  - The Shire provided history and context about the island and Shire roles.
  - **(1)** The Shire noted it was unaware of prior correspondence regarding this EP.
  - Woodside explained the process for determining the EMBA for this EP and confirmed why Christmas Island had been consulted.
  - **(2)** The Shire noted it appreciated and supported Woodside's methodology for identifying and including First Nations stakeholder input.
  - **(3)** The Shire identified other Malay and Chinese contacts that Woodside should consider including in future engagements where relevant.
  - **(4)** The Shire welcomed the opportunity for a potential meeting with Woodside on Christmas Island and provided information about flight availability.
- On 3 November 2023, Woodside sent an email in follow-up to the phone call (SI Report, reference 67.4). Woodside noted:
  - **(1)** It wanted to ensure Shire of Christmas Island had an opportunity to hear about Woodside Energy projects in the region and to take feedback.
  - **(2)** It appreciated the engagement with the Shire and its support for Woodside's methodology.
  - **(3)** Its approach to consultation in line with Regulation 25 including changes in relation to First Nations groups following recent court matters.
  - **(4)** Potential opportunities to meet with Shire of Christmas Island during November or December.
- On 3 November 2023, Shire of Christmas Island responded thanking Woodside for its email (SI Report, reference 67.5) and:
  - **(4)** Provided information about flight availability to Christmas Island during December for a potential meeting.
  - **(1)** Advised it had checked previous correspondence between Woodside and Christmas Island and noted a series of emails for licenced fishers about a separate Woodside drilling project earlier in 2023.
- On 6 November 2023, Woodside responded thanking Shire of Christmas Island for its email and advised it was also looking to organise a consultation session with Cocos (Keeling) Islands (SI Report, reference 67.6).
- On 6 November 2023, the Shire of Christmas Island responded and confirmed flights were available from Christmas Island to Cocos (Keeling) Islands (SI Report, reference 67.7).

- On 15 December 2023, Woodside emailed Shire of Christmas Island's Fisheries Management Committee (FMC) advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 9 January 2024, Woodside sent a reminder email to the Shire's FMC following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.
- On 19 January 2024, the FMC responded thanking Woodside for the opportunity to provide feedback (SI Report, reference 67.8). The FMC:
  - (5) Stated its experience of emergency communications in the external Indian Ocean Territories (IOTs) during times of widespread natural disasters that impacted the WA coastline and IOTs simultaneously was less than satisfactory, and advised it would like to submit to Woodside that dedicated communication, care and mitigation plans needed to be committed to for Christmas Island and the neighbouring Cocos (Keeling) Islands.
  - (6) Noted that while the mainland had a larger population and potentially greater economic impact from a significant failure at the facility, the livelihoods of residents in the external territories also needed careful consideration, and the recent 2022 declaration of the Christmas Island and Cocos (Keeling) Islands Marine Parks further underscored the importance of addressing the unique concerns and circumstances of the external territories. The FMC further stated it would welcome a dedicated emergency plan from Woodside for the IOT territories of Christmas Island and Cocos (Keeling) Islands and would like to underline the dramatic effect on life on the islands in the event their waters sustained effects from an unwanted event at the Woodside facilities. The FMC asked that mitigation plans be discussed and workshopped with relevant stakeholders in the Commonwealth, local government and emergency services in the IOTs to ensure a planned response was on file.
- On 5 February 2024, Woodside phoned the Shire of Christmas Island following up on discussions regarding a potential meeting (SI Report, reference 67.9). The Shire advised that it had provided written feedback via its FMC. Woodside thanked the Shire and confirmed it would respond to the Shire via its FMC.
- On 12 February 2024, Woodside responded thanking the Shire's FMC for its correspondence and for seeking clarification on oil spill responses (SI Report, reference 67.10). Woodside:
  - (5) Confirmed its process for oil spill response planning included the following steps:
    - Assess the credible spill risk for the activity.
    - Establish areas that may be contacted by an oil spill based on the outputs of computer simulation modelling, which use credible spill information together with weather and oceanographic data.
    - Select appropriate oil spill response clean-up methods for the credible spill event.
    - Develop an activity-specific Oil Pollution First Strike Plan to set out the steps to take if an oil spill does occur.
    - Regularly test, train and assure the First Strike Plan.
  - (5) Advised that for Pyrenees operations, the computer oil spill simulation modelling predicted a minimum contact time at Christmas Island of 44 days in the event of a highly unlikely oil spill. This was considered to be a significant lead time to mount appropriate spill response measures.
  - (5) Noted that while oil spill response within the IOTs fell under the jurisdiction of AMSA, Woodside would make resources available to the response effort via oil spill response contractors and that Woodside maintained an equipment stockpile and trained staff on the mainland that could be deployed if required during a spill event.

- (6) Advised that Woodside, together with other Australian energy companies, had developed a suite of site-specific ‘tactical response plans’ (TRPs) which were shared across the industry. Woodside noted:
  - The plans provided information on suitable clean-up equipment required closest stockpiles, local infrastructure, specific sensitivities, and other pertinent information to improve efficiency during a spill.
  - As a result of FMC’s feedback, Woodside had sought advice from an oil spill contractor on the development of a TRP appropriate for Christmas Island and understood a request had also been made for the contractor to develop a TRP for Cocos (Keeling) Islands.
  - Woodside would provide an update to FMC once it had received information from the oil spill contractor on an appropriate way forward for the Christmas Island TRP and may seek inputs for the TRP’s development.
- (6) Advised that further to the proposed TRPs for Christmas and Cocos (Keeling) Islands, it could add a relevant contact for Christmas and Cocos (Keeling) Islands into the notifications table within the First Strike Plan for this activity, which would ensure timely notifications were made to relevant parties if a spill event occurred that risked contacting Christmas and Cocos (Keeling) Islands. Woodside asked that if this would be considered useful, the FMC provide relevant contact information.
- (2, 3) Sought additional advice on whether further consultation with Christmas Island’s Malay community was requested. Woodside noted that a member of its First Nations Engagement team had received advice that the point of contact for the Malay community and the FMC were the same.
- On 11 June 2024, Woodside emailed the Shire’s FMC and attached a copy of the newly developed TRP for Christmas Island ((SI Report, reference 67.11). Woodside:
  - (6) Recapped that Woodside, together with other Australian energy companies, had a suite of site-specific ‘tactical response plans’ (TRPs) which were shared across the industry.
  - (6) Advised that as a result of the FMC’s feedback, Woodside had approached the oil spill contractor and a TRP had now been developed for Christmas Island.
  - (6) Provided an overview of the contents of the TRP and confirmed a copy of the TRP was also attached.
  - (6) Noted that it understood the oil spill contractor had also been approached regarding the development of a TRP for Cocos (Keeling) Islands.
- On 11 June 2024, Shire of Christmas Island responding thanking Woodside for forwarding the TRP for Christmas Island (SI Report, reference 67.12). The Shire:
  - (7) Suggested an update to the Area Description and Site Location details in the TRP, based on:
    - The Minister for Environment gazetted the Christmas Island Marine National Park in 2022, and while the draft management plan was still to finalised, zones had been determined.
    - The current Area Description only included the terrestrial national park and should be updated to include the marine park.
- On 14 June 2024, Woodside responded thanking the Shire for its feedback (SI Report, reference 67.13). Woodside:
  - (7) Confirmed it had updated the TRP to include the marine national park in the area description and site location sections.
  - (7) Attached a copy of the updated TRP.
- (7) On 14 June 2024, Shire of Christmas Island responded to confirm it had received the update (SI Report, reference 67.14). (7) Woodside noted the Shire had received the updated version of the TRP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> The Shire advised it was unaware of Woodside consultation correspondence related to this EP prior to a phone call from Woodside on 3 November 2023, but had seen a series of emails for fishery licence holders regarding a separate Woodside EP earlier in 2023.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside has provided sufficient information to Shire of Christmas Island in line with regulation 25(2) of the Environment Regulations but notes the Shire's preference for phone or face-to-face consultation in future. <b>Woodside response:</b> Woodside noted Shire of Christmas Island's feedback that it had not seen the email correspondence regarding this EP and that the Shire appreciated Woodside's phone call regarding the proposed activity and welcomed the opportunity to meet in-person to discuss Woodside Energy projects.</p>	<p><b>(1)</b> Not required.</p>
<p><b>(2)</b> Support for Woodside's methodology for identifying and including First Nations stakeholder input.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside welcomes engagement with the Shire and First Nations groups on Christmas Island. <b>Woodside response:</b> Woodside noted the Shire's support for its methodology and efforts in identifying and seeking input from First Nations stakeholders.</p>	<p><b>(2)</b> Not required.</p>
<p><b>(3)</b> Identification of Malay and Chinese communities on Christmas Island that Woodside should consider engaging for future EPs.</p>	<p><b>(3)</b> <b>Woodside assessment:</b> Woodside complies with regulation 25 of the Environment Regulations in regard to the consultation process. For this EP, the Malay community of Christmas Island has been assessed as not a relevant person based on its functions, interests or activities, although Woodside chose to seek to contact the organisation at its discretion in line with Section 5.3.7. <b>Woodside response:</b> Woodside noted the Shire's advice regarding Malay and Chinese communities on Christmas Island who may be interested in providing feedback on Woodside activities in the future and advised it would consider the additional stakeholders during relevancy assessments for future EPs. As part of ongoing consultation, Woodside would also continue to consult following acceptance of this EP.</p>	<p><b>(3)</b> Woodside has assessed the relevancy of the Malay community of Christmas Island in Appendix F, Table 1 of the EP.</p>
<p><b>(4)</b></p>	<p><b>(4)</b></p>	<p><b>(4)</b> As identified in Section 7.13.3.1 of this EP, Woodside will continue to consult following</p>

<p>Opportunity welcomed for a potential meeting with Woodside and provided information about flight schedules and bookings.</p>	<p><b>Woodside assessment:</b> Woodside welcomes the opportunity to consult with the Shire regarding Woodside activities and accepts feedback throughout the life of an EP.</p> <p><b>Woodside response:</b> Woodside confirmed it would like to ensure Christmas Island had an opportunity to hear about Woodside Energy projects and would work towards dates in late November or December for a potential meeting.</p>	<p>acceptance of the EP, as requirement by the implementation strategy as set out regulation 22(15) of the Environment Regulations.</p>
<p><b>(5)</b> The Shire's Fishing Management Committee (FMC) described its experience of emergency communications during natural disasters as less than satisfactory and advised it would like to submit to Woodside that dedicated communication, care and mitigation plans needed to be committed to for Christmas Island.</p>	<p><b>(5)</b> <b>Woodside assessment:</b> Woodside's hydrocarbon release simulation modelling predicts a minimum contact time at Christmas Island of 44 days which provides a significant lead time to mount appropriate spill response measures.</p> <p><b>Woodside response:</b> Woodside assessed the feedback from the FMC and provided an explanation of its process for oil spill response planning. Woodside advised that in the highly unlikely event of an oil spill, simulation modelling predicted a minimum contact time at Christmas Island of 44 days, which was considered to be significant lead time to mount appropriate spill response measures. Woodside noted that while oil spill response in the IOTs fell under the jurisdiction of AMSA, Woodside would make resources available to the response effort. Woodside confirmed it maintained an equipment stockpile and trained staff on the mainland that could be deployed if required.</p>	<p><b>(5)</b> Woodside's process for identifying potential response options for hydrocarbon release scenarios is described in the OSPRMA (Appendix H).</p>
<p><b>(6)</b> The FMC noted that the livelihoods of residents in the external territories needed careful and unique consideration and stated it would welcome a dedicated emergency plan from Woodside for Christmas Island.</p>	<p><b>(6)</b> <b>Woodside assessment:</b> Woodside sought advice from an oil spill contractor on the development of a response plan for Christmas Island and the plan has now been developed.</p> <p><b>Woodside response:</b> As a result of FMC's feedback, Woodside confirmed it would seek advice from an oil spill response contractor on the development of a TRP for Christmas Island. Woodside advised it would provide an update to the FMC once it received information on an appropriate way forward for the Christmas Island TRP. In June 2024, Woodside forwarded a copy of the newly developed TRP to the FMC.</p> <p>Woodside also advised it could include relevant contacts in its First Strike Plan, and for Christmas Island to provide contact information if this would be useful.</p>	<p><b>(6)</b> At FMC's discretion, Woodside will include a relevant Christmas Island contact in the notification table for the Oil Pollution First Strike Plan for this activity (Appendix I).</p>

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Port Hedland Chamber of Commerce and Industry on 18 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Port Hedland Chamber of Commerce and Industry with the opportunity to provide feedback over a 10-month period.

**Carnarvon Chamber of Commerce and Industry**

**Summary of information provided and record of consultation for this EP:**

- On 18 September 2023, Woodside emailed Carnarvon Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.23) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Carnarvon Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Carnarvon Chamber of Commerce and Industry for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Carnarvon Chamber of Commerce and Industry on 18 September 2023 based on their function, interest and activities.

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Carnarvon Chamber of Commerce and Industry with the opportunity to provide feedback over a 10-month period.

**Karratha and Districts Chamber of Commerce and Industry**

**Summary of information provided and record of consultation for this EP:**

- On 27 September 2023, Woodside emailed Karratha and Districts Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.49) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Karratha and Districts Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

**Summary of Feedback, Objection or Claim**

**Assessment of Merits of Feedback, Objection or Claim and Woodside's Response**

**Inclusion in Environment Plan**

No feedback, objections or claims received despite follow-up.

Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Karratha and Districts Chamber of Commerce and Industry for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Karratha and Districts Chamber of Commerce and Industry on 27 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.

**Summary of information provided and record of consultation for this EP:**

- On 21 September 2023, Woodside emailed Protect Ningaloo advising of the proposed activity (Record of Consultation, reference 1.35) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Protect Ningaloo following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

<b>Summary of Feedback, Objection or Claim</b>	<b>Assessment of Merits of Feedback, Objection or Claim and Woodside's Response</b>	<b>Inclusion in Environment Plan</b>
No feedback, objections or claims received despite follow-up.	Woodside has provided a reasonable period in which to receive feedback which is consistent with the intended outcome of consultation (see Section 5.4 of this EP).  Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.

**Outcomes of consultation**

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Protect Ningaloo for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Protect Ningaloo on 21 September 2023 based on their function, interest and activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up email seeking feedback on the proposed activities.
- Woodside has provided Protect Ningaloo with the opportunity to provide feedback over a 10-month period.

While Northern Territory Demersal Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Demersal Fishery to provide feedback during the consultation process.		
<b>Northern Territory Mud Crab Fishery</b>		
<b>Summary of information provided and record of consultation for this EP and the other operations EP:</b>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 22 September 2023, Woodside sent a letter to Northern Territory Mud Crab Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Mud Crab Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside’s website.
- On 20 October 2023, a licence holder from the Northern Territory Mud Crab Fishery responded thanking Woodside for the opportunity to be consulted (SI Report, reference 70.1). It explained its business undertakings related to sea country activities and enquired about:
  - (1) The process of reporting accidental waste discharged into the environment.
  - (2) The process for reporting damage to sea life on the sea floor, such as giant clams and any other protected or endangered species.
  - (3) Opportunities for local Aboriginal sea rangers to work on the activities associated with this EP or other activities.
  - (4) Opportunities for the licence holder to work with Woodside on any activities.
- On 17 November 2023, Woodside responded and thanked the licence holder for its feedback (SI Report, reference 70.2). Woodside:
  - (1) Advised that activities that occurred under this EP had requirements for reporting to NOPSEMA which included accidental waste discharged to the environment. The Environment Regulations specified when and what Woodside would need to report depending on the severity of the incident. There may also be requirements for reporting to other regulators that Woodside would follow, for example, to the Australian Maritime Safety Authority.
  - (2) Advised that activities associated with this EP were located where the sea floor was predominantly soft, sandy seabed and sea life such as giant clams and other protected or endangered species were not known to occur. However, if the activities described in the EP resulted in the unintentional death of or injury to a fauna species listed as Threatened or Migratory, and the activity was not authorised by a permit, this would be reported to the Department of Climate Change, Energy, Environment and Water
  - (3, 4) Noted the Aboriginal Sea Company’s interest in opportunities for local Aboriginal sea rangers and broader opportunities between Woodside and the Traditional Owners and advised Woodside was currently looking to work through both the Northern Land Council and Tiwi Land Council.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
(1) The process for reporting the discharge of accidental waste.	(1) <b>Woodside assessment:</b> Woodside complies with NOPSEMA’s reporting requirements. <b>Woodside response:</b> Woodside provided information on the process for reporting accidental waste discharged into the environment.	(1) Existing controls considered sufficient as described in Sections 6.6 and 6.7 of the EP.
(2) The process for reporting damage to the sea life on the sea floor.	(2) <b>Woodside assessment:</b> Woodside complies with NOPSEMA’s reporting requirements.	(2) Existing controls considered sufficient as described in Sections 6.6 and 6.7 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	<b>Woodside response:</b> Woodside provided information on the sea floor where the activities associated with this EP are located, and on the process for reporting the unintentional death of or injury to a fauna species listed as Threatened or Migratory.	
<b>(3)</b> Opportunities for local Aboriginal sea rangers on the activity.	<b>(3)</b> <b>Woodside assessment:</b> Woodside notes ASC's interest in opportunities for local Aboriginal sea rangers. <b>Woodside response:</b> Woodside advised it was currently looking to work through both the Northern Land Council and Tiwi Land Council and was open to further discussion with ASC.	<b>(3)</b> Not required.
<b>(4)</b> Opportunities for the licence holder to work with Woodside on broader activities.	<b>(4)</b> <b>Woodside assessment:</b> Woodside notes ASC's interest in broader opportunities between Woodside and Traditional Owners. <b>Woodside response:</b> Woodside advised it was currently looking to work through both the Northern Land Council and Tiwi Land Council and was open to further discussion with ASC.	<b>(4)</b> Not required.
While feedback has been received, there were no objections or claims.	Woodside has consulted NT Fisheries and individual licence holders.  Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.
<b>Outcomes of consultation</b>		
While Northern Territory Mud Crab Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Mud Crab Fishery to provide feedback during the consultation process.		
<b>Northern Territory Mollusc Fishery</b>		
<b>Summary of information provided and record of consultation for this EP and the other operations EP:</b>

No additional measures or controls are required.
<b>Outcomes of consultation</b>		
While Shark Bay Marine Users is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Marine Users to provide feedback during the consultation process.		
<b>Amateur Fishermen's Association of the NT</b>		
<b>Summary of information provided and record of consultation for this EP and the other operations EP:</b>		

- On 15 December 2023, Woodside emailed Amateur Fishermen’s Association of the NT advising of the proposed activity (Record of Consultation, reference 1.99) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Amateur Fishermen’s Association of the NT following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.

**Outcomes of consultation**

While Amateur Fishermen’s Association of the NT is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Amateur Fishermen’s Association of the NT to provide feedback during the consultation process.

**Peak Industry Representative Bodies**

**National Energy Resource Australia (NERA)**

- Summary of information provided and record of consultation for this EP:**
- On 5 October 2023, Woodside emailed NERA advising of the proposed activity (Record of Consultation, reference 1.55) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
  - On 30 October 2023, Woodside sent a reminder email to NERA following up on the proposed activity (Record of Consultation, reference 2.10) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.5.1 of the EP).	
--	--	--

**Outcomes of consultation**

While NERA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for NERA to provide feedback during the consultation process.

**Traditional Custodians and nominated representative corporations**

**Balanggarra Aboriginal Corporation**

BAC is established under the Native Title Act 1993 by the Balanggarra People to represent the Balanggarra People (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

**Historical engagement:**

- On 18 July 2023, Woodside emailed BAC NOPSEMA’s Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside’s request that BAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 46.1).

**Summary of information provided and record of consultation for this EP and the other operations EP:**

- On 2 October 2023, Woodside emailed BAC advising of the proposed activity (Record of Consultation, reference 1.75) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that BAC and its members may have within the EMBA, information on how BAC would like to engage, and requested that BAC provide information to other individuals as required.
- On 13 October 2023, following an attempt by Woodside to telephone BAC, Woodside contacted BAC via an alternative email address to seek advice on making contact with the BAC board or contact person (SI Report, reference 46.2).
- On 25 October 2023, Woodside phoned BAC via the registered number listed on ORIC. Call was taken but Woodside was informed that this was not the correct number for BAC. Subsequently, Woodside emailed the Kimberley Land Council enquiring about the best method of contact for BAC (SI Report, reference 46.3). No response was received.
- On 2 November 2023, Woodside sent a follow up email to Balanggarra Aboriginal Corporation providing information about the proposed activity, enquiring about the best point of contact, confirming if any further information is required regarding this EP, and advising Woodside is available to meet as suits the CEO and Board of Directors (SI Report, reference 46.4). No response was received.
- On 23 November 2023, Woodside emailed BAC requesting an opportunity to make introductions, answer any questions and listen to feedback (SI Report, reference 46.5). No response has been received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

<ul style="list-style-type: none"> <li>On 23 January 2024, Woodside emailed BAC informing them that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with them at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 46.6).</li> <li>On 13 March 2024, Woodside emailed BAC requesting an opportunity to meet and discuss Woodside’s energy activities (SI Report, reference 46.7). No response has been received.</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.
<b>Outcomes of consultation</b>		
While BAC is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for BAC to provide feedback during the consultation process.		
<b>Ngadju Native Title Aboriginal Corporation (Ngadju)</b>		
<p><b>Summary of information provided and record of consultation for this EP and the other operations EP:</b></p> <ul style="list-style-type: none"> <li>On 16 October 2023, Woodside emailed Ngadju advising of the proposed activity (Record of Consultation, reference 1.74) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Ngadju and its members may have within the EMBA, information on how Ngadju would like to engage, and requested that Ngadju provide information to other individuals as required.</li> <li>On 20 October 2023, Woodside telephoned Ngadju and left a message asking for its call to be returned (SI Report, reference 49.1). Ngadju returned Woodside’s call.</li> <li>On 20 October 2023, in follow-up to the phone call, Woodside emailed a different representative from Ngadju, advising of the proposed activity and again provided the Summary Information Sheet and links to detailed information sheets. Woodside also provided a link to NOPSEMA’s Consultation Brochure as well as their contact details (SI Report, reference 49.2).</li> <li>On 31 October 2023, Woodside sent a follow up email asking whether Ngadju would like any further information on the environment plan and advising it was available to meet in Perth on 2 November 2023 or 8 November 2023 (SI Report, reference 49.3). No response was received.</li> <li>On 7 December 2023, Woodside sent a follow up email asking whether Ngadju would like any further information on the environment plan and advising there was availability to meet in Perth on 11 December 2023 (SI Report, reference 49.4). No response was received.</li> </ul>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 19 December 2023, Woodside emailed Ngadju wishing them a safe festive season and offered assistance on the environment plan (SI Report, reference 49.5).
- **(1)** On 3 January 2024, Woodside met face to face with Ngadju to discuss the Ngadju Native Title Aboriginal Corporation's (NNTAC) recent elections and appointment of new CEO, and transfer of ranger group and conservation projects to new NNTAC CEO and Board. Ngadju expressed it is keen to continue working with Woodside on activities. No concerns were raised regarding the Pyrenees EP (SI Report, reference 46.1).
- On 25 January 2024, Woodside phoned Ngadju corporation and left a message requesting a return call, no response was received (SI Report, reference 49.7).
- On 2 February 2024, Woodside emailed Ngadju NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that Ngadju advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 49.8).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> Ngadju is keen to continue working with Woodside and had no concerns about this activity.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside acknowledges Ngadju's feedback. <b>Woodside response:</b> Woodside is committed to further consultation and engagement with Ngadju on other activities.</p>	<p><b>(1)</b> Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>While Ngadju is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Ngadju to provide feedback during the consultation process.</p>		
<p><b>Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang (MGC) (MG Corp)</b> MG Corp is established under the Native Title Act 1993 by the Miriuwung and Gajerrong people to represent the Miriuwung and Gajerrong people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>		
<p><b>Historical engagement:</b></p>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 July 2023, Woodside emailed MG Corp NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that MG Corp advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 55.1).

**Summary of information provided and record of consultation for this EP and the other operations EP:**

- On 15 September 2023, Woodside emailed MG Corp an agenda and presentation in advance of a meeting planned for 18 September to discuss unrelated activities as well as this activity (SI Report, reference 55.2).
- On 18 September 2023, Woodside met with the MG Corp Chair and Directors and presented on this activity along with others (SI Report, reference 55.3). Woodside:
  - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
  - Displayed a map of the EMBA and discussed how the EMBA is developed.
  - Gave an overview of the activity.
  - Specifically, Woodside asked the following:
    - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - MG Corp noted:
    - **(1)** That native title exists on Lacrosse Island and is closer to shore in relation to impacts from this activity.
    - **(1)** There are registered sites on Lacrosse Island to be aware of.
    - **(2)** That Balanggarra should be involved in future discussions. Woodside said that they had made attempts to contact Balanggarra.
- On 13 October 2023, Woodside emailed MG Corp advising of the proposed activity (Record of Consultation, reference 1.105) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MG Corp and its members may have within the EMBA, information on how MG Corp would like to engage, and requested that MG Corp provide information to other individuals as required.
- On 1 November 2023, Woodside emailed MG Corp following up on the activity summary sheets and asking if there was any feedback or further information required (SI Report, reference 55.4). No response was received.
- On 25 January 2024, Woodside phoned MG Corp and was advised to send an email (SI Report, reference 55.5). Woodside emailed MG Corp following up on this activity, re-attaching the Summary Information sheet sent in October 2023, and offering to provide further information if required. Woodside stated they would submit this EP to NOPSEMA in February 2024, re-iterating feedback from MG Corp is open for the life of the EP (SI Report, reference 55.6).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
<p><b>(1)</b> MG Corp advised Woodside that Native title exists on Lacrosse Island and is closer to shore in terms of impacts, as well as there are registered sites on the island.</p>	<p><b>(1)</b> <b>Woodside assessment:</b> Woodside acknowledges MG Corp advice that Native title exists on Lacrosse Island and there are registered sites on the island. <b>Woodside response:</b> Woodside informed MG Corp that Lacrosse Island did not fall in the EMBA for this activity.</p>	<p><b>(1)</b> Not required.</p>
<p><b>(2)</b> Balangarra should be involved in future discussions.</p>	<p><b>(2)</b> <b>Woodside assessment:</b> Woodside acknowledges MG Corp advice that Balangarra should be involved in future discussions. <b>Woodside response:</b> Woodside has made a number of attempts to contact Balangarra regarding this activity. To date no response has been received.</p>	<p><b>(2)</b> Not required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).</p>	<p>No additional measures or controls are required.</p>
<p><b>Outcomes of consultation</b></p>		
<p>While MG Corp is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for MG Corp to provide feedback during the consultation process.</p>		
<p><b>Mirning Traditional Lands Aboriginal Corporation RNTBC (MTLAC)</b> MTLAC is established under the Native Title Act 1993 by the Mirning people to represent the Mirning people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.</p>		
<p><b>Summary of information provided and record of consultation for this EP and the other operations EP:</b></p>		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 4 October 2023, Woodside emailed MTLAC advising of the proposed activity (Record of Consultation, reference 1.94) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MTLAC and its members may have within the EMBA, information on how MTLAC would like to engage, and requested that MTLAC provide information to other individuals as required.
- On 24 October 2023, Woodside emailed MTLAC following up on the activity (SI Report, reference 56.1). No response was received.
- On 8 December, Woodside sent a follow up email offering to answer any questions relating to the proposed EP's. Woodside advised of their availability to schedule a consultation session (SI Report, reference 56.2).
- On 19 December 2023, Woodside emailed MTLAC thanking them for their contributions throughout the year and offering opportunity for consultation regarding Woodside projects (SI Report, reference 56.3).
- On 9 January 2024, Woodside emailed MTLAC following up on previous correspondence and offering the opportunity to meet via MTLAC's preferred method of consultation (SI Report, reference 56.4).
- On 9 January 2024, MTLAC emailed Woodside advising acceptance of a meeting, enquiring the purpose of the meeting and requesting a date suitable to Woodside (SI Report, reference 56.5).
- On 10 January 2024, Woodside emailed MTLAC informing them of the aim of the meeting and advising a calendar invite would be sent out later that day (SI Report, reference 56.6).
- On 22 January 2024, Woodside met with MTLAC (SI Report, reference 56.7), Woodside:
  - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
  - Displayed a map of the EMBA and discussed how the EMBA is developed.
  - Gave an overview of the activity including that woodside will continue to produce crude oil.
  - Spoke about routine inspections, monitoring maintenance and repairs associated with the subsea infrastructure.
  - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
  - Specifically, Woodside asked the following:
    - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
    - What are your concerns about the proposed activities and what do you think we should do about them?
    - Is there anything you would like included in the EPs before submission?
    - Is there anyone else Woodside should consult with about the activities?
  - Advised that Woodside will continue to take feedback from MTLAC for the life of the EP.
  - Discussed ranger programs and initiatives that Woodside has partnered on.

- MTLAC noted:
  - (1) That due to the location of the activity it was unlikely that Mirning country would be impacted.
- Discussion on cultural heritage and sea country mapping took place and Woodside noted that there would be an opportunity to talk further on sea country mapping.
- On 31 January 2024, Woodside emailed MTLAC thanking them for the meeting that occurred on 22 January 2024. Woodside noted that it was unclear if they would need to consult with MTLAC on future environment plans and attached Woodside’s program of ongoing consultation (SI Report, reference 56.8).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
<p>(1) During face-to-face engagement on this activity, MTLAC noted that due to the location of the activity it was unlikely that Mirning country would be impacted.</p>	<p>(1) <b>Woodside assessment:</b> Feedback has been received but this is an exchange of information, no objections or claims. <b>Woodside response:</b> Woodside accepts that MTLAC’s feedback that due to the location of the activity it was unlikely Mirning country would be impacted.</p>	<p>(1) No additional measures or controls are required.</p>
<p>While feedback has been received, there were no objections or claims.</p>	<p>Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).</p>	<p>No additional measures or controls are required.</p>

**Outcomes of consultation**

While MTLAC is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for MTLAC to provide feedback during the consultation process.

**Local government and elected Parliamentary representatives, community groups or organisations**

**Shire of Wyndham-East Kimberley**

**Summary of information provided and record of consultation for this EP and the other operations EP:**

- On 19 September 2023, Woodside emailed Shire of Wyndham-East Kimberley advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Wyndham-East Kimberley following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.

**Outcomes of consultation**

While Shire of Wyndham-East Kimberley is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Wyndham-East Kimberley to provide feedback during the consultation process.

**Shire of Derby/West Kimberley**

**Summary of information provided and record of consultation for this EP and the other operations EP:**

- On 18 September 2023, Woodside emailed Shire of Derby/West Kimberley advising of the proposed activity (Record of Consultation, reference 1.24) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a follow-up email to the Shire of Derby/West Kimberley (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website)
- On 24 October 2023, Shire of Derby/West Kimberley responded (SI Report, reference 64.1) and:
  - Confirmed it had no specific feedback regarding the unlikely oil spill impacts.
  - **Advised** it expected to be notified as part of any oil spill response needed.
- On 03 November 2023, Woodside responded thanking Shire of Derby/West Kimberley for its feedback (SI Report, reference 64.2). Woodside:
  - Noted the Shire had no specific feedback regarding the proposed activity.
  - Confirmed that in the highly unlikely event a hydrocarbon release was to enter the Shire’s area of responsibility, Woodside would at that time contact the Shire with respect to response arrangements.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional controls or measures are required.
<b>Outcomes of consultation</b>		
While Shire of Derby/West Kimberley is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Derby/West Kimberley to provide feedback during the consultation process.		
<b>Shire of Chapman Valley</b>

**Shire of Cocos (Keeling) Islands**

**Summary of information provided and record of consultation for this EP and the other operations EP:**

- On 21 September 2023, Woodside emailed Shire of Cocos (Keeling) Islands advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 4 October 2023, Woodside emailed the Shire CEO to provide further information on EP consultation and to request feedback on interests/concerns. Woodside also enquired whether the Shire wished for Woodside to consult with the Cocos Malay community (SI Report, reference 68.1).
- On 18 October 2023, Woodside sent a reminder email to Shire of Cocos (Keeling) Islands following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside’s website.
- On 24 October 2023, Woodside sent a follow-up email and reconfirmed its offer to conduct a consultation meeting or to provide additional project information (SI Report, reference 68.2).
- On 6 November 2023, the Shire emailed Woodside to confirm that as mapping (for the other operations EP) showed the Cocos (Keeling) Islands may, while highly unlikely, be impacted by hydrocarbon release, it would like to have a roundtable discussion – preferably on-site but at a minimum online - to fully understand EMBA’s (SI Report, reference 68.3).
- On 6 November 2023, Woodside emailed the Shire and acknowledged the request for a meeting (SI Report, reference 69.4). Woodside enquired about availability and preferred dates/times over the following weeks and confirmed it would discuss logistics for the meeting, with a face-to-face meeting preferred if possible.
- On 7 November 2023, Woodside emailed the Shire noting it had spoken to the travel advisor on the island and proposing potential meeting dates in late November or early December, or February if the 2023 dates did not align with the Shire’s schedule (SI Report, reference 68.5).
- On 14 November 2023, Woodside emailed to follow up on potential dates for a meeting (SI Report, reference 68.6).
- On 5 February 2024, Woodside telephoned Shire of Cocos (Keeling) Islands to organise arrangements for an online meeting on 15 February 2024.
- On 15 February 2024, Woodside met with Shire of Cocos (Keeling) Islands via MS Teams (SI Report, reference 68.7). Woodside provided information about three EPs including this one and described how EMBA’s were developed. Woodside noted that consultation for this EP had been combined with another Operations EP, therefore Woodside had chosen to consult the Shire for both EPs although the EMBA for this EP did not reach the Cocos (Keeling) Islands. During the meeting:
  - (1) The Shire noted it appreciated Woodside’s consultation and the explanation of the EMBA, and had no comments or concerns specific to this EP.
  - (1) Woodside thanked the Shire for its feedback on consultation and noted it had no concerns on this specific EP.
  - The Shire advised many groups on the island had strong interests in environmental matters and suggested a further meeting with additional Shire representatives regarding Woodside activities. Woodside and the Shire agreed to arrange a future meeting to address this.
  - Woodside advised that it welcomed feedback throughout the life of an EP.

**Summary of Feedback, Objection or Claim**

**Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response**

**Inclusion in Environment Plan**

While Shark Bay Community Resource Centre not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Community Resource Centre to provide feedback during the consultation process.

**RAC Monkey Mia Dolphin Resort**

**Summary of information provided and record of consultation for this EP:**

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified RAC Monkey Mia Dolphin Resort as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed RAC Monkey Mia Dolphin Resort advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to RAC Monkey Mia Dolphin Resort following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.

**Outcomes of consultation**

While RAC Monkey Mia Dolphin Resort is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for RAC Monkey Mia Dolphin Resort to provide feedback during the consultation process.

**Dirk Hartog Island**

**Summary of information provided and record of consultation for this EP:**

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Dirk Hartog Island as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Dirk Hartog Island advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Dirk Hartog Island following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside’s website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.
<b>Outcomes of consultation</b>		
While Dirk Hartog Island is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Dirk Hartog Island to provide feedback during the consultation process.		
<b>Shark Bay Aviation</b>		
<p><b>Summary of information provided and record of consultation for this EP:</b></p> <ul style="list-style-type: none"> <li>On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Shark Bay Aviation as a potentially relevant person for this EP.</li> <li>On 31 October 2023, Woodside emailed Shark Bay Aviation advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.</li> <li>On 15 December 2023, Woodside sent a reminder email to Shark Bay Aviation following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.</li> </ul>		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of this EP).	No additional measures or controls are required.
<b>Outcomes of consultation</b>		
While Shark Bay Aviation is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Aviation to provide feedback during the consultation process.

<b>Commonwealth Scientific and Industrial Research Organisation (CSIRO)</b>		
<b>Summary of information provided and record of consultation for this EP:</b>		
<ul style="list-style-type: none"> <li>On 13 September 2023, Woodside emailed CSIRO advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA’s brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.</li> <li>On 16 October 2023, Woodside sent a reminder email to CSIRO following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside’s website.</li> </ul>		
<b>Summary of Feedback, Objection or Claim</b>	<b>Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response</b>	<b>Inclusion in Environment Plan</b>
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).	No additional measures or controls are required.
<b>Outcomes of consultation</b>		
While CSIRO is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CSIRO to provide feedback during the consultation process.		
<b>Other</b>		
<b>Member of the public [Individual 63]</b>		
<b>Summary of information provided and record of consultation for this EP:</b>		
<ul style="list-style-type: none"> <li>(1) On 14 September 2023, [Individual 63]phoned Woodside’s feedback line and raised concerns regarding the clarity of the map in the advertisement for consultation on this EP which appeared in the West Australian newspaper on 13 September 2023 (Record of Consultation, reference 3.1.2).</li> <li>On 14 September 2023, Woodside phoned [Individual 63] to discuss their concerns (SI Report, reference 73.1). Woodside:</li> </ul>

## 1. Initial Consultation

### 1.1 Consultation Information Sheet

# NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

## CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an environment plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure activities are carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and of an acceptable level. Woodside want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to identify themselves and provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Woodside is consulting for both the:

- Pyrenees Floating Production, Storage and Offloading (FPSO) and associated subsea infrastructure (Pyrenees Facilities) Operations EP; and
- Ngujima-Yin Floating Production, Storage and Offloading (FPSO) and associated subsea infrastructure (Ngujima-Yin Facilities) Operations EP, together as their operations and associated activities are similar, and located 13 km apart in adjacent title areas.

### Overview

Woodside will submit a five year revision of the Operations EPs for the Pyrenees and Ngujima-Yin Facilities located in Commonwealth waters, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (regulations).

Operations began in 2008 for the Ngujima-Yin Facilities and 2010 for Pyrenees Facilities.

### Activity Overview

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Facilities.

The activities that will continue at the Pyrenees and Ngujima-Yin Facilities are:

- Routine oil production, crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.

In addition to the above, the revised Ngujima-Yin Facility EP will also include:

- Production from an additional two wells via a subsea tieback to existing infrastructure and the operation of a new fuel gas flowline. The proposed wells will be located within the Operational Area (Figure 2). The location of the proposed flowline can be seen in Figure 2 and will originate from either the Pyrenees or Macedon field.

Drilling, construction and installation activities associated with the Ngujima-Yin tieback and fuel gas project will be subject to separate future EPs.

Stylised figures showing the existing Pyrenees Facilities are shown in Figure 3. Figure 4 shows the existing Ngujima-Yin Facilities. These figures are not to scale and are for illustration purposes.

Future decommissioning of infrastructure will be subject to separate future EPs.

### Vessels

During normal operations, vessels will typically be limited to supply/support vessels and IMMR vessels. The vessel size and type will be dependent on the work scope. Vessels are not planned to anchor/moor on the seabed except in emergency situations. Offtake tankers will be used for offloading operations in both fields. It is anticipated vessels will operate 24 hours per day for the duration of activities.

### Location and Operations

The Pyrenees FPSO is located about 45 km north of Exmouth, Western Australia, with the subsea facilities located within the Production Licenses WA-42-L and WA-43-L, and in water depths ranging from approximately 180 to 215 m (Figure 1). The Pyrenees FPSO is connected to the adjacent Macedon gas field located approximately 6 km southeast of the FPSO. The Macedon field is also operated by Woodside, and the connection allows gas to be supplied from the Macedon gas field for fuel gas on the FPSO, or produced via the Macedon subsea infrastructure to the onshore Macedon Gas Plant for domestic gas production.

The Ngujima-Yin FPSO is located about 57 km north of Exmouth, Western Australia, with the subsea facilities located within Production Licenses WA-28-L, WA-59-L and Pipeline License WA-28-PL, in water depths ranging from approximately 340 to 850 m (Figure 2).

### Communication with mariners

The locations of the Pyrenees FPSO and the Ngujima-Yin FPSO as well as associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. The Ngujima-Yin FPSO petroleum safety zone is measured from the riser turret mooring at the bow of the vessel. Vessels are not permitted within the exclusion zone without permission. In addition, a 2.5 nm (4.6 km) radius cautionary zone is also marked on nautical charts around both FPSOs.

### Assessment

Woodside has undertaken an assessment of the potential impacts and risks to the environment, as well as to relevant persons arising from the planned activities and unplanned events. This assessment considers timing, duration and location of activities and events. A number of mitigation and management measures will be implemented and are summarised in Table 3. Further details will be provided in each EP being revised to manage proposed activities.

In preparing the EPs, our intent is to minimise environmental, social or cultural impacts associated with the proposed activities, and Woodside are seeking any interest or comments you may have to inform our decision making.

Revision: 1

Page 426 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

For the potential impacts, Woodside has defined an ‘Operational Area’ within which the impacts from planned activities could occur.

Both the Pyrenees FPSO and Ngujima-Yin FPSO Operational Areas comprises a 1500 m radius around the FPSO to allow for offtake activities, as well as an area within 1500 m of the subsea infrastructure including wells, flowlines, umbilicals and pipeline (for Ngujima-Yin only).

The Operational Area for the Ngujima-Yin FPSO also includes an area around the potential installation of a flowline, with two options, one with

the flowline originating from Pyrenees field and one originating from Macedon field. No infrastructure exists within the area currently, and if installed, the infrastructure would be added to nautical charts, including the introduction of any associated petroleum safety zone.

**Joint Venture**

Woodside is the Operator for both the Pyrenees and Ngujima-Yin Facilities, on behalf of Joint Ventures comprising of Santos and Inpex for Pyrenees Facilities and Mitsui for Ngujima-Yin Facilities.

**Environment That May Be Affected (EMBA)**

The environment that may be affected (EMBA) is the largest spatial extent where the Pyrenees Facility Operations activities and the Ngujima-Yin Facility Operations activities could potentially have an environmental consequence (direct or indirect). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these EPs, is determined by modelling the highly unlikely event of a hydrocarbon release. The worst-case credible spill scenario for these EPs is a release from a loss of well control or a vessel collision with the FPSO with enough force to breach the hull, releasing crude to the environment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected - the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

Figure 5 displays the EMBA for the Ngujima-Yin EP and Figure 5 displays the EMBA for the Pyrenees EP.

**Mitigation and management measures**

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the Pyrenees and Ngujima-Yin facilities operations activity, including IMMR activities and other contingent activities. A number of mitigation and management measures for the activity are outlined in Table 4. Further details will be provided in the EPs.

**Table 4. Summary of key risks and/or impacts and preliminary management measures for the Activity\***

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/ Risks	Proposed Mitigation and/or Management Measure
<b>Planned Activities (Routine and Non-routine)</b>			
<b>Physical Presence: Interaction with other Marine Users, Cultural Values &amp; Heritage</b>	<ul style="list-style-type: none"> <li>The presence of FPSOs, other vessels and subsea infrastructure has the potential to exclude and/or displace other users from the Pyrenees or Ngujima-Yin Petroleum Safety Zone and Operational Areas respectively.</li> <li>Physical presence of project vessels and activities may have potential to impact cultural values and heritage.</li> </ul>	<ul style="list-style-type: none"> <li>Localised displacement of commercial fishing from the Operational Area.</li> <li>Displacement of recreational fishing activity is likely to be low level due to the distance from boating facilities, lack of natural attractions (e.g. reefs or shoals) and water depth of Operational Area.</li> <li>The presence of support vessels could cause temporary disruption to commercial shipping. No recognised shipping lanes overlap the Operational Areas.</li> <li>Tourism and recreation within the Operational Areas is expected to be infrequent due to the lack of emergent features or natural attractions (eg. reefs or shoals) and water depth.</li> </ul>	<ul style="list-style-type: none"> <li>Vessels adhere to regulatory requirements for navigational safety.</li> <li>Maintain a permanent Petroleum Safety Zone around the FPSO.</li> <li>Notify Australian Hydrographic Office (AHO) of locations of new permanent infrastructures to enable update of maritime charts.</li> <li>Consult with relevant persons so that they are informed of the proposed activities.</li> <li>FPSO collision prevention system implemented to alert marine vessels of the facility location.</li> <li>Woodside will actively support the capacity of Traditional Custodians for ongoing engagement and consultation on environment plans, for the purpose of avoiding impacts to cultural heritage values.</li> </ul>
<b>Physical Presence: Seabed disturbance</b>	<p>Seabed disturbance may result from the following activities:</p> <ul style="list-style-type: none"> <li>Presence of FPSO, wells and subsea infrastructure (including moorings) modifying marine habitats.</li> <li>Subsea operations, inspection, maintenance and repair activities resulting.</li> <li>Anchoring as required in emergency conditions.</li> </ul>	<ul style="list-style-type: none"> <li>Localised modification of seabed habitat within the Operational area through seabed scouring around subsea infrastructure or formation of artificial reef.</li> <li>The infrastructure provides hard substrate for marine organisms and a fouling community. This may result in local increase biological productivity and diversity within the Operational Area.</li> <li>During IMMR activities, a localised and temporary decline in water quality due to an increase of suspended sediment concentration and sediment deposition may occur.</li> </ul>	<ul style="list-style-type: none"> <li>Monitoring and maintenance of all subsea infrastructure completed as per IMMR process.</li> <li>Any new subsea infrastructure to have an as-left survey completed and location to be recorded.</li> </ul>
<b>Routine Light Emissions: Light Emissions from FPSO, Vessel Operations and Operational Flaring</b>	<ul style="list-style-type: none"> <li>The FPSOs, vessels (including IMMR) and Remote Operation Vehicles (ROV) will use external lighting to conduct safe operations.</li> <li>Light emissions from FPSO during flaring.</li> </ul>	<ul style="list-style-type: none"> <li>Light emissions have the potential to temporarily affect fauna such as fish, marine reptiles and seabirds by influencing changes in their behaviour or impacting orientation in close proximity to the FPSOs or vessels.</li> </ul>	<ul style="list-style-type: none"> <li>Lighting limited to the minimum required for navigational and safety requirements, except for emergency events.</li> <li>Flare management through reinjection to reduce flare intensity.</li> <li>Implementation of appropriate measures based on recommendations of the National Light Pollution Guidelines for Wildlife Including Marine Turtles, Seabirds and Migratory Shorebirds.</li> </ul>

**Feedback**

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **27 October 2023** via:

**E: [Feedback@woodside.com](mailto:Feedback@woodside.com)**

**Toll free: 1800 442 977**

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

[www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities).

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.

Please note that your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)* and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

## 1.2 Summary Consultation Sheet

# NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

## CARNARVON BASIN, NORTH-WEST AUSTRALIA

When preparing an environment plan (EP), Woodside needs to notify relevant persons and obtain their input. This helps confirm current measures or identify additional measures, that may need to be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. Woodside wants to give relevant persons whose functions, interests or activities may be affected by the proposed activity the opportunity to identify themselves and provide feedback on our proposed activity.

This summary information sheet provides a high-level overview of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees FPSO Operations environment plans. Further details, including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures, are available within the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plan Consultation Information Sheet (September 2023) which can be found at:

[www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities)

### Overview

Woodside plans to submit a five-year revision of the Operations EPs for the Pyrenees and the Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The Pyrenees FPSO and associated production infrastructure is located in water depths ranging from -180 m to 215 m, in Commonwealth waters around 45 km north of Exmouth, Western Australia. Crude oil is produced on the Pyrenees FPSO from the Ravensworth, Crosby, Stickle, Tanglehead, Wild Bull and Moondyne reservoirs.

The Ngujima-Yin FPSO and associated production infrastructure is located in water depths ranging from -340 m to 850 m, in Commonwealth waters around 57 km north of Exmouth, Western Australia. Crude oil is produced on the Ngujima-Yin FPSO from the Vincent reservoir and the Greater Enfield development, which includes the Norton-over-Laverda, Laverda Canyon Reservoir and Cimatti fields.

Crude oil from both operations will be offloaded using Offtake Tankers. Other activities that will occur include surveys, inspection, maintenance, monitoring and repair activities, and other contingent activities.

Maps showing the location of the activities are provided below.

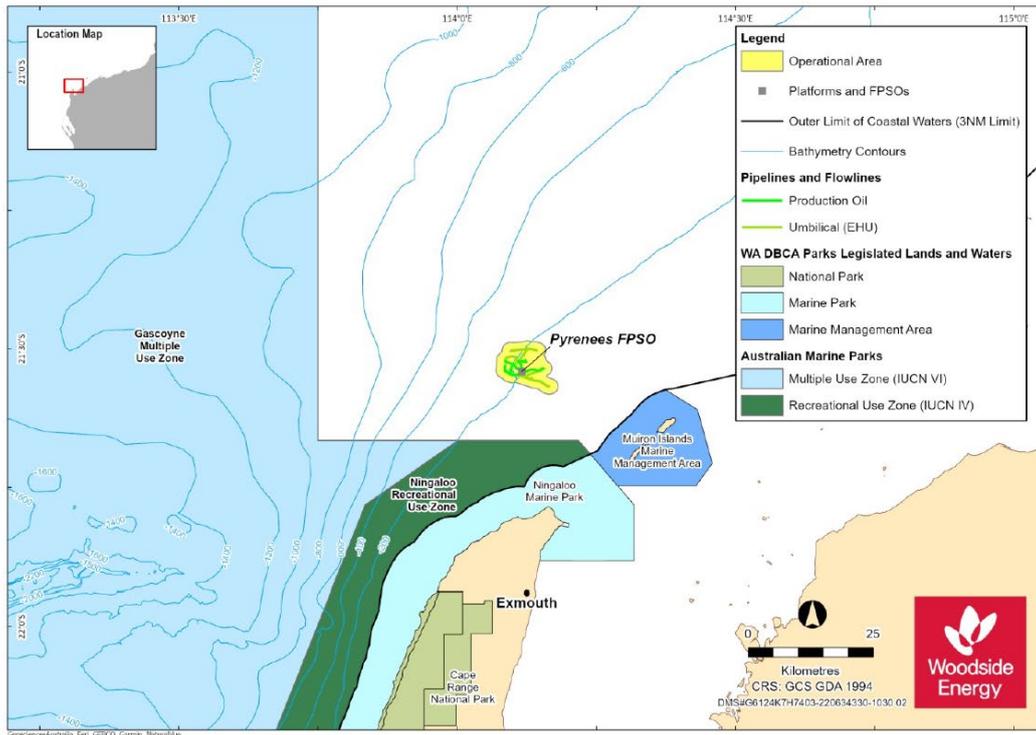

Figure 1. Pyrenees FPSO Location and Operational Area

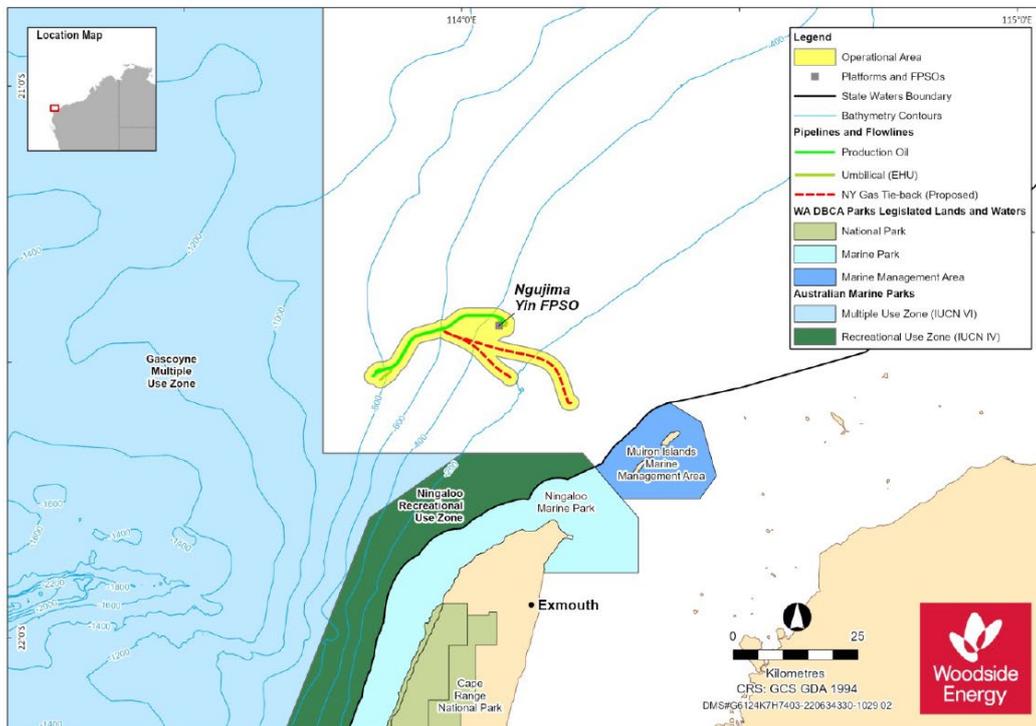

Figure 2. Ngujima-Yin FPSO Location and Operational Area

**Work Method**

**Key features of the Floating Production Storage and Offloading (FPSO) facilities include:**

- Floating hull with integrated storage tanks.
- Connected to the seabed and subsea production system through turret mooring system which includes risers, umbilicals and chain mooring systems illustrated schematically in Figure 3 and 4.
- Above the water there will be supporting processing systems and equipment, flare systems, utilities, cranes, laydown and storage areas, utility buildings, living quarters and helideck.
- The FPSO provides oil processing to make the oil suitable for offloading to an Offtake Tanker.

**Summary of key activities includes:**

- Routine production operations involve the offloading of crude oil to Offtake Tankers.
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.
- Other activities include surveys, inspection, maintenance, monitoring, and repair (IMMR) activities on the FPSO and subsea infrastructure, and other contingent activities.

- For Ngujima-Yin, two potential future development activities may include production from an additional two wells via a subsea tieback to existing subsea infrastructure and the operation of a new fuel gas flowline. Drilling, construction and installation activities associated with the tieback and fuel gas project will be subject to separate future EPs.

During normal operations, vessels will typically be limited to supply/support vessels and Inspection, Monitoring, Maintenance and Repair (IMMR) vessels. Offtake tankers will be used for offloading operations in both fields. It is anticipated vessels will operate 24 hours per day for the duration of activities.

**Environment That May Be Affected (EMBA)**

The environment that may be affected (EMBA) is the largest spatial extent where the Pyrenees Floating Production, Storage and Offloading (FPSO) Operations and the Ngujima-Yin FPSO Operations' activities could potentially have an environmental consequence (direct or indirect). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these EPs, is determined by modelling the highly unlikely event of a hydrocarbon release. The worst-case credible spill scenario for these EPs is a release from a loss of well control or a vessel collision with the FPSO with enough force to breach the hull, releasing crude to the environment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected - the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

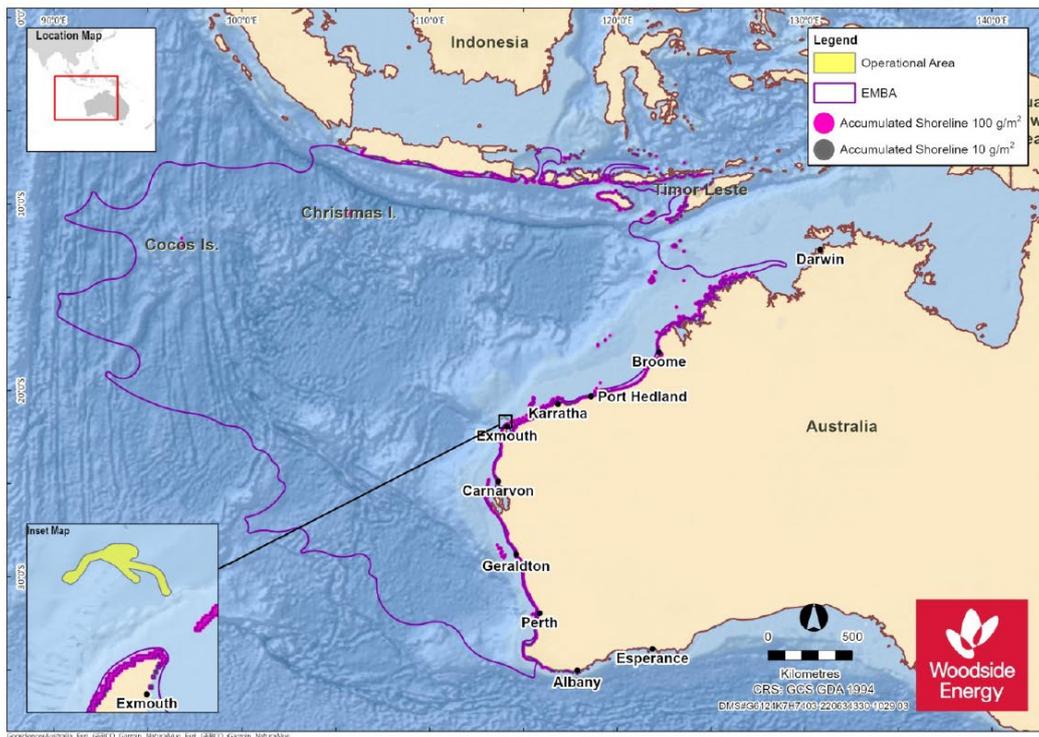

Figure 4. Ngujima-Yin FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

### Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **27 October 2023** via:

**E: [Feedback@woodside.com](mailto:Feedback@woodside.com)**

**Toll free: 1800 442 977**

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

[www.woodside.com/sustainability/consultation-activities](http://www.woodside.com/sustainability/consultation-activities)

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.

Please note that your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

**1.3 Email sent to Australian Border Force (ABF), Department of Foreign Affairs and Trade (DFAT), Department of Transport (DoT), Ningaloo Coast World Heritage Advisory Committee (NCWHAC), Department of Biodiversity, Conservation and Attractions (DBCA), Department of Industry, Science and Resources (DISR), Department of Mines, Industry Regulation and Safety (DMIRS), Australian Energy Producers (AEP) (Formerly Australian Petroleum Production and Exploration Association), University of Western Australia (UWA), Western Australian Marine Science Institution (WAMSI), Australian Institute of Marine Science (AIMS), Commonwealth Scientific and Industrial Research Organisation (CSIRO) - 13 September 2023**

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

Revision: 1

Page 446 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

#### 1.4 Email sent to Shire of Carnarvon (13 September 2023)

Dear Shire of Carnarvon,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Dear Titleholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. ## Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### **1.6 Email sent to Exmouth Recreational Marine Users, Karratha Recreational Marine Users, Christmas Island Recreational Marine Users, Recfishwest, Marine Tourism Association, WA Game Fishing Association – 14 September 2023**

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

## Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

## Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

Page 457 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

### Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for](#)

### 1.7 Email sent to Department of Defence (DoD) (15 September 2023)

Dear Department of Defence,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

### 1.10 Email sent to Western Australian Museum (15 September 2023)

Dear Western Australian Museum,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). **Also attached is a list of shipwrecks in State waters within the EMBA.** You can also choose to receive updates on our consultation activities by subscribing [here](#).

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.11 Email sent to Department of Planning, Lands and Heritage (DPLH) (15 September 2023)**

Dear DPLH

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,

## 1.12 Email sent to Chevron Australia Osaka Gas Gorgon, Tokyo Gas Gorgon, JERA Gorgon (15 September 2023)

Dear Chevron,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. **1.13 Email sent to Australian Hydrographic Office (AHO), Australian Maritime Safety Authority (AMSA) – Marine Safety (15 September 2023)**

Dear AHO / AMSA

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 479 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). **A shipping lane map is also attached. A GIS Shape File will be emailed to you separately.** You can also choose to receive updates on our consultation activities by subscribing [here](#).

**Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans**

### Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.14 Shipping lane map sent to AHO and AMSA

### 1.15 Email sent to Australian Maritime Safety Authority (AMSA) – Marine Pollution (15 September 2023)

Dear [Individual 4]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 483 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.17 Email sent to Shire of Ashburton (15 September 2023)**

Dear Shire of Ashburton,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

### Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations

### Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for](#)

### 1.18 Email sent to Shire of Exmouth (15 September 2023)

Dear [– Individual 6]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**1.19 Email to City of Karratha (15 September 2023)**

Dear [Individual 7] and [Individual 8],

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.20 Email to Town of Port Hedland (15 September 2023)

Dear Town of Port Hedland,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.21 Email sent to Shire of Broome (18 September 2023)**

Dear [Individual 9]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

## 1.22 Email sent to Broome Chamber of Commerce and Industry (18 September 2023)

Dear Broome Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

**1.23 Email sent to Carnarvon Chamber of Commerce and Industry (18 September 2023)**

Dear Carnarvon Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

### Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for](#)

the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

#### 1.24 Email sent to Shire of Derby/West Kimberley (18 September 2023)

Dear [Individual 10]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

### 1.26 Email sent to Karratha Community Liaison Group (18 September 2023)

Dear Karratha Community Liaison Group,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.27 Email sent to Port Hedland Chamber of Commerce and Industry (18 September 2023)**

Dear Port Hedland Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

### Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.30 Email sent to Director of National Parks (DNP) (19 September 2023)

Dear Director of National Parks

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Australian Marine Parks

We note Australian Government Guidance on consultation activities and confirm that:

- The proposed activities are outside the boundaries of any proclaimed Australian Marine Parks (AMPs).
  - The Pyrenees FPSO Petroleum Activity Area is located approximately 14 km from the northern boundary of the Commonwealth Ningaloo Marine Park, approximately 138 km south-west of the Barrow Island Marine Park and approximately 179 km south-west of the Montebello Island Marine Park.
  - The Ngujima-Yin FPSO Petroleum Activity Area is located approximately 26 km from the northern boundary of the Commonwealth Ningaloo Marine Park, approximately 140 km south-west of the Barrow Island Marine Park and approximately 180 km south-west of the Montebello Island Marine Park.
- We have assessed potential impacts to AMPs in the development of the proposed EP revisions and believe that planned activities have no potential to impact the values of the Marine Parks.
- For these EPs, the worst-case credible spill scenario is a hydrocarbon release from a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull, releasing crude oil to the environment. Through review of hydrocarbon spill modelling, and with consideration of a 50 ppb dissolved and 100 ppb entrained hydrocarbon threshold, the following AMPs may be contacted in the event of a spill:
  - Ningaloo Marine Park

- Gascoyne Marine Park
- Montebello Marine Park
- Dampier Marine Park
- Shark Bay Marine Park
- Carnarvon Canyon Marine Park
- Argo-Rowley Terrace
- Abrolhos
- Eighty Mile Beach Marine Park
- Mermaid Reef Marine Park
- Kimberley Marine Park
- Roebuck Marine Park
- Jurien Marine Park
- Two Rocks Marine Park
- Perth Canyon Marine Park
- Geographe Marine Park
- South-west Corner Marine Park
- Ashmore Reef Marine Park
- A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities, which will include notification to relevant agencies and organisations as to the nature and scale of the event, as soon as practicable following an occurrence. The Director of National Parks will be advised if an environmental incident occurs that may impact on the values of any Marine Park.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

## Feedback

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.31 Email sent to WAFIC (20 September 2023)

Hi [Individual 11],

Please see below for consultation information regarding the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans. The consultation period is due to close on 27 October 2023. I've also attached the consultation information sheet.

Could WAFIC please provide the consultation information to:  
Mackerel Managed Fishery (Schedule 2- Area 2) – Both activities  
Marine Aquarium Fish Managed Fishery – Both activities  
Pilbara Line Fishery (Condition) – Both activities  
West Coast Deep Sea Crustacean Managed Fishery – Both activities  
Specimen Shell Managed Fishery – Pyrenees  
Pilbara Trap Managed Fishery – Pyrenees

If this could go out today or tomorrow it would be much appreciated – this was the one from last Friday however it wasn't finalised at that time.

Kind regards,  
Woodside Feedback

\*\*\*

Dear Commercial Licence Holders

**WAFIC is contacting you regarding activities Woodside is proposing in Commonwealth waters across the North West Shelf of WA. WAFIC is now working with Woodside to strategically streamline consultation with the commercial fishing industry.**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 540 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia.

**Overview of Activities:**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

The table below provides a summary of the proposed activities under this EP. The attached Information Sheet provides additional information including a map of impacted areas, summaries of potential impacts and risks relating to the proposed activities, and associated management measures. These are also available on Woodside’s [website](#).

**Activity: Pyrenees Facility Operations, and Ngujima-Yin Facility Operations Environment Plans**

**Feedback**

Please provide any feedback specific to the proposed activities to [Individual 11] at WAFIC [[Individual 11](mailto:Individual11@wafic.org.au)][@wafic.org.au](mailto:Individual11@wafic.org.au) by **27 October 2023**.

Your feedback and Woodside’s response will be included in the Environment Plan which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the proposed activities (which may or may not be confidential). Please advise if you would like any information to remain confidential and Woodside will make this known to NOPSEMA upon submission of the Environment Plan.

To receive updates on Woodside’s consultation activities, please subscribe [here](#).

Best regards

**1.33 Email sent to Department of Agriculture Fisheries and Forestry (DAFF) – Fisheries (20 September 2023)**

Dear DAFF – Fisheries and Biosecurity,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 547 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

**Biosecurity**

With respect to biosecurity matters, please note the following information below:

**Environment description**

The Pyrenees Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 180 to 215 m on the outer continental shelf of the North West Shelf Province, approximately 45 km north of Exmouth. The seabed is generally flat and featureless, with some minor depressions and comprises primarily of soft sediment, which is consistent with the wider North West Shelf Province.

The Ngujima-Yin Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 340 to 850 m on the outer continental shelf and continental slope of the North West Shelf Province, approximately 57km north of Exmouth. The seabed in the north-east half of the Operational Area is relatively flat and featureless and comprises primarily of soft sediment which is consistent with the wider North West Shelf Province. The seabed in the south-west of the Operational Area intersects the Canyons linking the Cuvier Abyssal Plain Key Ecological Feature. A survey was undertaken in 2015 of the Enfield Canyon observed that the canyon comprised flat unconsolidated sediments composed of sand- and mud-sized particles and that the canyon does not appear significantly different than the surrounding region, with seabed habitats and deep-water biota being typical and representative in the wider region.

As such, the sediment throughout the Ngujima-Yin Operational Area are broadly consistent with those in the North West Shelf Province, which are characterised by fine to medium sediment (silts and sands) with patches of coarser sediments (shells/gravels).

**Potential IMS risk                      IMS risk mitigation management**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Accidental introduction and establishment of invasive marine species

All vessels are required to comply with *the Australian Biosecurity Act 2015*, specifically the Australian Ballast Water Management Requirements (as defined under the Act) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing Invasive Marine Species (IMS).

Vessels entering the Operation Areas for Pyrenees and Ngujima-Yin will have Woodside's IMS risk assessment process applied, including for immersible equipment entering the Operation Area. Based on the outcomes of each IMS risk assessment, management measures commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced.

Inspection of the FPSOs will be completed by a qualified IMS Inspector prior to return from international sail away.

### Feedback

If you have feedback specific to the proposed activities described under the EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.34 Email sent to Australian Fisheries Management Authority (AFMA) (20 September 2023)

Dear AFMA,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 552 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

### Feedback

If you have feedback specific to the proposed activities described under the EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 **by 27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.35 Email sent to Protect Ningaloo, Cape Conservation Group (21 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Revision: 1

Page 556 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**There are some questions and answers at the bottom of this email explaining why you have received this email.**

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected

## Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

## Questions and Answers

### Why have I received this email?

Your organisation has been identified by Woodside as potentially being relevant to consult with for Environment Plans relating to our operations of the Pyrenees Floating Production Storage and Offloading (FPSO) Facility and Ngujima-Yin FPSO Facility, located off Exmouth, WA.

Woodside consults relevant persons to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 1

Page 563 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

avoid potential effects of the operations on the environment. This is the intended outcome of consultation.

### **But I'm not located near Exmouth?**

Late last year a Federal Court decision looked at the way the Australian offshore energy industry consults relevant persons. Upon the establishment of this new case law, Woodside now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

Woodside uses the environment that may be affected or 'EMBA' to help identify who may be a relevant person. This [brochure](#) from the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has more information regarding consultation on offshore petroleum environment plans.

### **What is an EMBA?**

The environment that may be affected or EMBA is the largest area where unplanned events from the operations off Exmouth could have an environmental consequence (impact) based on modelling.

For the Pyrenees and Ngujima-Yin Facility Operations Environment Plans, the EMBA represents the merged area of many possible modelled paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of release. This is based on oil trajectory modelling.

### **What does oil trajectory modelling involve and why is the EMBA so big?**

The process of identifying and mapping out an EMBA for each petroleum activity is primarily for assessment of potential impacts and oil spill response planning purposes. As the events that may lead to a spill are unknown, for planning purposes, the worst case credible spill scenario is identified. This looks at the worst case credible volume, location, timing etc, and modelling is undertaken to understand where the oil may go, if unmitigated (i.e. if no response strategies are applied).

To account for weather and ocean current variables, the spill scenario is modelled multiple times (typically 100 to 200 times) to see where the weather and ocean currents may take the oil.

All the modelled spill trajectories are then merged to create an EMBA. This means in the highly unlikely event a hydrocarbon release does occur, the entire EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

In order to be able to pre-prepare, response plans are built around the potential impacts resulting from a selection of the worst case modelling runs.

### **Where can I get more information?**

For more information on consultation and oil spill modelling visit the [NOPSEMA website](#).

## **1.37 Email sent to Tuna Australia, Commonwealth Fisheries Association (CFA), North West Slope and Trawl Fishery, Western Deepwater Trawl Fishery, Western Tuna and Billfish Fishery, Northern Prawn Fishery, Christmas Island Line Fishery (22 September 2023)**

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 564 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

**Feedback**

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.38 Email sent to Department of Primary Industries and Regional Development (DPIRD) (22 September 2023)**

Dear [Individual 12] and [Individual 13]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 568 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 1

Page 569 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.40 Email sent to Northern Territory Department of Industry, Tourism and Trade (DITT) – Mining and Energy; Northern Territory Department of Environment, Parks and Water Security (DEPWS); Northern Territory Environment Protection Authority (NTEPA) (22 September 2023)**

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Dear Stakeholder,

**NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

22 September 2023

Dear Stakeholder,

**NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA. The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Regards,

22 September 2023

Dear Stakeholder,

### **NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 591 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website woodside.com. You can also subscribe to receive updates on our consultation activities by subscribing on our website.

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

### Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

26 September 2023

Dear Titleholder,

## NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website [woodside.com](http://woodside.com). You can also subscribe to receive updates on our consultation activities by subscribing on our website.

### 1.47 Email sent to Skye Napoleon; Petroleum; Resources (27 September 2023)

Dear Titleholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.48 Email sent to New Zealand Oil and Gas (NZOG) Compass (27 September 2023)**

Dear Titleholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

**1.49 Email sent to Karratha and Districts Chamber of Commerce and Industry (27 September 2023)**

Dear Karratha and Districts Chamber of Commerce and Industry,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 613 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**There are some questions and answers at the bottom of this email explaining why you have received this email.**

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for

## Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

## Questions and Answers

### Why have I received this email?

Your organisation has been identified by Woodside as potentially being relevant to consult with for Environment Plans relating to our operations of the Pyrenees Floating Production Storage and Offloading (FPSO) Facility and Ngujima-Yin FPSO Facility, located off Exmouth, WA.

Woodside consults relevant persons to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential effects of the operations on the environment. This is the intended outcome of consultation.

### But I'm not located near Exmouth?

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Late last year a Federal Court decision looked at the way the Australian offshore energy industry consults relevant persons. Upon the establishment of this new case law, Woodside now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

Woodside uses the environment that may be affected or 'EMBA' to help identify who may be a relevant person. This [brochure](#) from the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has more information regarding consultation on offshore petroleum environment plans.

### **What is an EMBA?**

The environment that may be affected or EMBA is the largest area where unplanned events from the operations off Exmouth could have an environmental consequence (impact) based on modelling.

For the Pyrenees and Ngujima-Yin Facility Operations Environment Plans, the EMBA represents the merged area of many possible modelled paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of release. This is based on oil trajectory modelling.

### **What does oil trajectory modelling involve and why is the EMBA so big?**

The process of identifying and mapping out an EMBA for each petroleum activity is primarily for assessment of potential impacts and oil spill response planning purposes. As the events that may lead to a spill are unknown, for planning purposes, the worst case credible spill scenario is identified. This looks at the worst case credible volume, location, timing etc, and modelling is undertaken to understand where the oil may go, if unmitigated (i.e. if no response strategies are applied).

To account for weather and ocean current variables, the spill scenario is modelled multiple times (typically 100 to 200 times) to see where the weather and ocean currents may take the oil.

All the modelled spill trajectories are then merged to create an EMBA. This means in the highly unlikely event a hydrocarbon release does occur, the entire EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

In order to be able to pre-prepare, response plans are built around the potential impacts resulting from a selection of the worst case modelling runs.

### **Where can I get more information?**

For more information on consultation and oil spill modelling visit the [NOPSEMA website](#).

## **1.52 Email sent to Shire of East Pilbara (2 October 2023)**

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 625 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

03 October 2023

Dear Stakeholder,

### **NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 1

Page 630 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website woodside.com. You can also subscribe to receive updates on our consultation activities by subscribing on our website.

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

03 October 2023

Dear Stakeholder,

**NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account

Uncontrolled when printed. Refer to electronic version for most up to date information.

for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website at [woodside.com](http://woodside.com). You can also choose to receive updates on our consultation activities by subscribing on our website.

**Feedback**

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA. The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

## Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **06 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,  
Woodside Feedback

### 1.56 Email sent to Australian Southern Blue Tuna Industry Association (ASBTIA) (12 October 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

## Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by [subscribing here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

## Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

### 1.57 Email sent to Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (16 October 2023)

Dear DAFF – Biosecurity,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

## Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

## Exclusionary / Cautionary Zones

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 646 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

----------------------------------	--	---

**Biosecurity**

With respect to biosecurity matters, please note the following information below:

**Environment description**

The Pyrenees Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 180 to 215 m on the outer continental shelf of the North West Shelf Province, approximately 45 km north of Exmouth. The seabed is generally flat and featureless, with some minor depressions and comprises primarily of soft sediment, which is consistent with the wider North West Shelf Province.

The Ngujima-Yin Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 340 to 850 m on the outer continental shelf and continental slope of the North West Shelf Province, approximately 57km north of Exmouth. The seabed in the north-east half of the Operational Area is relatively flat and featureless and comprises primarily of soft sediment which is consistent with the wider North West Shelf Province. The seabed in the south-west of the Operational Area intersects the Canyons linking the Cuvier Abyssal Plain Key Ecological Feature. A survey was undertaken in 2015 of the Enfield Canyon observed that the canyon comprised flat unconsolidated sediments composed of sand- and mud-sized particles and that the canyon does not appear significantly different than the surrounding region, with seabed habitats and deep-water biota being typical and representative in the wider region.

As such, the sediment throughout the Ngujima-Yin Operational Area are broadly consistent with those in the North West Shelf Province, which are characterised by fine to medium sediment (silts and sands) with patches of coarser sediments (shells/gravels).

**Potential IMS risk                      IMS risk mitigation management**

<p>Accidental introduction and establishment of invasive marine species</p>	<p>All vessels are required to comply with <i>the Australian Biosecurity Act 2015</i>, specifically the Australian Ballast Water Management Requirements (as defined under the Act) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing Invasive Marine Species (IMS).                   Vessels entering the Operation Areas for Pyrenees and Ngujima-Yin will have Woodside's IMS risk assessment process applied, including for immersible equipment entering the Operation Area. Based on the outcomes of each IMS risk assessment, management measures</p>

commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced.

Inspection of the FPSOs will be completed by a qualified IMS Inspector prior to return from international sail away.

### Feedback

If you have feedback specific to the proposed activities described under the EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 **by 15 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,  
Woodside Feedback

### 1.58 Email sent to Northern Prawn Fishery Industry Pty Ltd (18 October 2023)

Dear Northern Prawn Fishery Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

We are consulting you on the recommendation of AFMA. We are also consulting individual licence holders in the Northern Prawn Fishery.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 651 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

**Feedback**

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **17 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,  
Woodside Feedback

**1.59 Email sent to Western Rock Lobster Council (30 October 2023)**

Dear [Individual 14],

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 656 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

**Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans**

**Feedback**

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **20 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for*

Woodside Feedback

#### **1.60 Email sent to Shire of Shark Bay (31 October 2023)**

Dear [Individual 15], [- Individual 16] and [Individual 17],

Following Woodside's recent visit, please find an overview of proposed Woodside activities you may be interested in providing feedback on.

Also below is the previous email we sent to [admin@sharkbay.wa.gov.au](mailto:admin@sharkbay.wa.gov.au) on 16 October regarding the Ngujima-Yin FPSO Facility Operations and Pyrenees Facility Operations Environment Plans.

#### **Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):**

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees. Woodside is planning to submit five-year revisions of the Ngujima-Yin FPSO Facility Operations and Pyrenees Facility Operations EPs:

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Scarborough Offshore Facility and Trunkline Operations EP:**

Woodside is planning to submit the Scarborough Offshore Facility and Trunkline Operations Environment Plan which involves the installation of a Floating Production Unit (FPU) and complete subsequent hook-up and commissioning activities, prior to start-up and operations within Production Licences WA-61-L and WA-62-L. Gas from the FPU will be transferred through the gas export trunkline (the Trunkline - Pipeline Licence WA-32-PL) to the Pluto LNG Plant for further processing.

The FPU will be installed and connected to a pre-installed 20-point suction-piled mooring system and the riser pull-in(s) carried out. Hook-up and connection to subsea infrastructure will also occur, prior to commissioning.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 661 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The commissioning activity involves:

- Dewatering and commissioning of the subsea production system, comprising wellheads, manifolds, flowlines, umbilicals, and communication lines.
- Activities to confirm the integrity of the entire interconnected facility, so it is ready for start-up (RFSU) with the introduction of reservoir hydrocarbons.

The FPU start-up consists of initiating the subsea production system and FPU to allow reservoir gas and processing equipment to reach operational pressures and temperatures, as well as obtaining sufficient and stable equipment inlet flow to enable the equipment to perform to design criteria. Well clean-up and commissioning will also be carried out and gas export trunkline pressurisation and nitrogen (N<sub>2</sub>) removal.

Routine production operations involve transfer of reservoir fluids, including gas and produced water from the reservoir, along with Mono Ethylene Glycol (MEG) injection at the wells, through the subsea infrastructure to the FPU; and gas export via the Trunkline.

Other activities include gravimetry surveys for the purposes of reservoir monitoring, as well as IMMR activities on the FPU, subsea infrastructure (excluding well intervention or well workover activities) and gas export trunkline, and other contingent activities.

### Consultation Information Sheets

Consultation Information Sheets are attached, which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. ### Feedback

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **13 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,

### Woodside Feedback

#### 1.63 Email sent to Murujuga Aboriginal Corporation (MAC) (17 November 2023)

Hi there [Individual 20]

I'm not sure if you have received this information already so my apologies if this is a double up.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 666 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

## Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

**Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

The summary information sheet explaining the activities we plan to undertake can be found [here](#), and detailed consultation information sheets can be found on the external Woodside website <https://www.woodside.com/sustainability/consultation-activities>

Woodside is seeking to understand the nature of the interests that MAC and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know as soon as possible. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [\*Consultation on offshore petroleum environment plans – Information for the Community\*](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to MAC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with MAC members, the MAC Board, Elders and office holders and any other interested parties.

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake.

Woodside is seeking to understand the nature of the interests that **WAC** and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by **2nd November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to WAC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with WAC members, the WAC Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist WAC in any way to participate in these processes.

### 1.69 Email sent to Robe River Kuruma Aboriginal Corporation (RRKAC) (3 October 2023)

Good morning [Individual 27],

*My name is [Individual 28], and I will be acting as the contact person for RRAK and for the rest of the groups in the Pilbara. [Individual 29] will now be focused on supporting the Corporations in the Northern Territory, so if there is anything you need, please reach out.*

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

**Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

-  [Summary Information Sheet - Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations EPs.pdf](#)

Woodside is seeking to understand the nature of the interests that **RRKAC** and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached

Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by **2<sup>nd</sup> November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to Feedback@woodside.com.au, by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to communications@nopsema.gov.au or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to **RRAC** members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with **RRAC** members, the **RRAC** Board, elders and office holders and other interested parties.

As always, please be in contact if you require further information and if Woodside can assist **RRAC** in any way to participate in these processes.

I really look forward to working with yourself and the RRAC community Anthony. So, please contact me any time if you would like to discuss this or any other matter.

Regards,

#### **1.70 Email sent to Ngarluma Aboriginal Corporation (NAC) (17 November 2023)**

Hi there [Individual 30]

My name is [Individual 31]. It's great to virtually meet you. I understand NAC is under significant pressure at the moment and [Individual 32] has informed me that all EP related interactions will cease until after your AGM. I send this to you as information for your consideration and don't expect to hear back from you until the end of the month at the earliest. I have highlighted this EP as one to discuss and provided a link to the information sheet to [Individual 32] previously.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

We look forward to hearing from you and all the best for the AGM.

As always, please be in contact if you require further information and if Woodside can assist NAC in any way to participate in these processes.

Kind regards

**1.71 Email sent to NYFL on behalf of both NYFL and Yindjibarndi Aboriginal Corporation (19 October 2023)**

Good afternoon, [Individual 33],

It was great to see you [Individual 34] and [Individual 35] last week. As mentioned, we still need to continue to progress our Environmental Plans while the agreement modernisation project takes place. I have spoken with [Individual 29], and he mentioned that you had sent through a proposal on a new consultation framework. Are you available to meet in the next few weeks so we can sit with [Individual 29] and discuss?

I have attached information relating to our most recent EP which I have provided for the benefit of both NYFL and YAC. If you have any questions or would like to schedule a consultation session, please let me know.

Regards

### **1.73 Email sent to Malgana Aboriginal Corporation (11 October 2023)**

Dear [Individual 37]

I hope this message finds you well. I write regarding Woodside's Pyrenees and Ngujima-Yin operations, located 45 and 57km north off the Exmouth coast.

Woodside is planning to submit five-year revisions of the Ngujima-Yin and Pyrenees operations environment plans (EPs). Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively, and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected (EMBA) by these activities that have not yet been afforded the opportunity to provide information that may inform the management of the activities.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

#### 1.74 Email sent to Ngadju Native Title Aboriginal Corporation (16 October 2023)

Hi [Individual 39]

I left a voice message earlier and after speaking with [Individual 40], I understand you are currently very busy. I am happy to talk you through the below information and if preferred, meet with Ngadju Native Title Aboriginal Corporation in Norseman or Perth to explain the new NOPSEMA guidelines, EMBA (Environment May Be Affected) and the Environment Plans (EP's).

Under the new NOPSEMA guidelines, Woodside Energy is required to engage with relevant PBC's that are included in an Environment Plan EMBA. These EMBA's are created using modelling of around 200 different scenarios and then a line is drawn around, to capture the 200 scenarios which in turn creates a large EMBA. The EMBA is West of Esperance however we generally reach out to Aboriginal Corporations that sit close by and the coastal Ngadju ILUA (East of Cape Adrid) is the reason we are sending Ngadju Native Title Aboriginal Corporation the EP information.

The attached Environment plan is for existing operating FPSO's and not for a new project, Ngujima-Yin commenced operation in 2008 and Pyrenees 2010, however Woodside are required to submit 5 yearly revision plans.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's), we are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.**

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 684 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

[https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00\\_5](https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00_5)

Woodside is seeking to understand the nature of the interests that Ngadju Native Title Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by 15-November 2023 and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to Ngadju Native Title Aboriginal Corporation and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Ngadju Native Title Aboriginal Corporation members, the Ngadju Native Title Aboriginal Corporation Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist Ngadju Native Title Aboriginal Corporation in any way to participate in these processes.

### 1.75 Email sent to Balangarra Aboriginal Corporation (2 October 2023)

Good afternoon Balangarra Aboriginal Corporation,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

**Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance, and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

[Ngujima-Yin & Pyrenees Floating Production Storage and Offloading \(FPSO\) Facility Operations](#)

Woodside is seeking to understand the nature of the interests that Balangarra Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by Wednesday, **1 November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to Balanggarra Aboriginal Corporation Members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Balanggarra Aboriginal Corporation Members, the Balanggarra Aboriginal Corporation Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist Balanggarra Aboriginal Corporation in any way to participate in these processes.

Kind regards

### 1.76 Email sent to Dambimangari Aboriginal Corporation (2 October 2023)

Good afternoon Dambimangari Aboriginal Corporation,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

### 1.77 Email sent to Kimberley Land Council (19 October 2023)

Dear [Individual 41]

Nice to be writing to you although in a very different context to our past communications. As you see I am currently consulting with Woodside, it would be lovely to catch up at some stage when I am in Broome.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are due to the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

**Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to KLC, members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with KLC members, the KLC Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist KLC in any way to participate in these processes.

Kind regards

[Individual 42]

### **1.78 Email sent to Nanda Aboriginal Corporation (23 October 2023)**

Hi there [Individual 21] and [Individual 22]

You would have received my previous email in relation to the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees EPs. This email contains the same information for you to provide to Nanda Aboriginal Corporation.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

[Individual 31]

### 1.79 Email sent to Gogolanyngor Aboriginal Corporation (GAC) (6 October 2023)

Hi [Individual 43]

Hope all is well mate.

I will be up in Broome next week and if you are in Broome on R&R, maybe we can have lunch.

The attached Environment plan is for existing operating FPSO's and not for a new project. Ngujima-Yin commenced operation in 2008 and Pyrenees 2010, however Woodside are required to submit 5 yearly revision plans.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's), we are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.**

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,

## 1.80 Email sent to Wanjina-Wunggurr (Native Title) Aboriginal Corporation (WWAC) (2 October 2023)

Good afternoon Wanjina-Wunggurr (Native Title) Aboriginal Corporation,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

**Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance, and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

[Ngujima-Yin & Pyrenees Floating Production Storage and Offloading \(FPSO\) Facility Operations](#)

Woodside is seeking to understand the nature of the interests that Wanjina-Wunggurr (Native Title) Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to Wanjina-Wunggurr (Native Title) Aboriginal Corporation Members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Wanjina-Wunggurr (Native Title) Aboriginal Corporation Members, the Wanjina-Wunggurr (Native Title) Aboriginal Corporation Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist Wanjina-Wunggurr (Native Title) Aboriginal Corporation in any way to participate in these processes.

Kind regards  
[Individual 44]

### **1.81 Email sent to Karajarri Traditional Lands Association (Aboriginal Corporation) (KTLA) (2 October 2023)**

Good afternoon Karajarri Traditional Lands Association,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 695 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance, and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

[Ngujima-Yin & Pyrenees Floating Production Storage and Offloading \(FPSO\) Facility Operations](#)

Woodside is seeking to understand the nature of the interests that Karajarri Traditional Lands Association and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns.
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by Wednesday, 1 November 2023 and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to Karajarri Traditional Lands Association Members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Karajarri Traditional Lands Association Members, the Karajarri Traditional Lands Association Board, elders and office holders and other interested parties.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

#### **1.85 Email sent to Yawuru Native Title Holders Aboriginal Corporation (19 October 2023)**

Dear [Individual 45]

Hello, we haven't spoken in a while, I am currently consulting with Woodside and will be the focal for Yawuru Prescribed Body Corporate (Yawuru PBC). I very much look forward to us meeting up again.

Below is information for Yawuru PBC in relation to some planned Woodside activities.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are due to the industry required 5-year revisions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

### **1.86 Email sent to Esperance Tjaltjraak Native Title Aboriginal Corporation (ETNTAC) (3 October 2023)**

Good morning [Individual 46],

As mentioned, Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

**Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 703 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

-  [Summary Information Sheet - Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations EPs.pdf](#)

Woodside is seeking to understand the nature of the interests that **ETNTAC** and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by **2<sup>nd</sup> November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to **ETNTAC** members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with **ETNTAC** members, the **ETNTAC** Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist **ETNTAC** in any way to participate in these processes.

Regards,  
[Individual 28]

### 1.87 Email sent to Bundi Yamatji Aboriginal Corporation (11 October 2023)

Dear [Individual 47]

Further to our correspondence below about Woodside's decommissioning and project activities, I write regarding Woodside's Pyrenees and Ngujima-Yin operations, located 45 and 57km north of the Exmouth coast.

Woodside is planning to submit five-year revisions of the Ngujima-Yin and Pyrenees operations environment plans (EPs). Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively, and the EPs being submitted are the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected (EMBA) by these activities that have not yet been afforded the opportunity to provide information that may inform the management of the activities.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached a summary information sheet that explains the activities we plan to undertake, and a detailed consultation information sheet can be found at the link below:

[https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00\\_5](https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00_5)

Woodside is seeking to understand the nature of the interests that BYAC and its members may have in the 'environment that may be affected' (EMBA) by the activities. The EMBA is the total area over

which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information and consultation information sheet. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by 11 November 2023, and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to BYAC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with BYAC members, the BYAC Board, elders and office holders and other interested parties.

We look forward to hearing from you, and as always, please be in contact if you require further information and if Woodside can assist BYAC in any way to participate in these processes.

Yours sincerely

#### **1.88 Email to Gnaala Karla Booja Aboriginal Corporation (11 October 2023)**

Dear [Individual 48]

Further to our discussion earlier today, I write regarding Woodside's Pyrenees and Ngujima-Yin operations, located 45 and 57km north of the Exmouth coast.

Woodside is planning to submit five-year revisions of the Ngujima-Yin and Pyrenees operations environment plans (EPs). Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively, and the EPs being submitted are the industry required 5 year revisions. While these operations are located in the Pilbara region, modelling can indicate that the 'environment that may be affected' (EMBA) from an unlikely unplanned event associated with Woodside's offshore activities could, depending on the currents, wind and tide for example, extend to the south of WA.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected (EMBA) by these activities that have not yet been afforded the opportunity to provide information that may inform the management of the activities.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

By way of introduction my name is [Individual 29] and I work in Woodside's First Nations Relations Team. I hope this messages finds you well.

[Individual 46] from Esperance Tjaltjraak Native Title Aboriginal Corporation was kind enough to share your contact details with us.

I write regarding Woodside's Pyrenees and Ngujima-Yin operations, located 45 and 57km north of the Exmouth coast.

Woodside is planning to submit five-year revisions of the Ngujima-Yin and Pyrenees operations environment plans (EPs). Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively, and the EPs being submitted are the industry required 5 year revisions. While these operations are located in the Pilbara region, modelling can indicate that the 'environment that may be affected' (EMBA) from an unlikely unplanned event associated with Woodside's offshore activities could, depending on the currents, wind and tide for example, extend to the south of WA. These EMBA's are created using modelling of approximately 200 various scenarios and then a line is drawn around these 200 scenarios, which in turn creates a large EMBA.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected (EMBA) by these activities that have not yet been afforded the opportunity to provide information that may inform the management of the activities.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

Please also forward this email and the attached documents to WKSAN AC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with WKSAN AC members, the WKSAN AC Board, elders and office holders and other interested parties.

We look forward to hearing from you, and please be in contact if you require further information and if Woodside can assist WKSAN AC in any way to participate in these processes.

Yours sincerely,

#### **1.91 Email sent to Whadjuk Aboriginal Corporation (9 October 2023)**

Hello [Individual 51] and [Individual 52]

I hope you are both well.

Woodside is seeking to consult with Whadjuk Aboriginal Corporation with regards to two Environment Plans, for continued operation of existing operating facilities that are located north of Exmouth.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 711 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry-required 5 year revisions.

I am writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached the summary information sheet that explains the activities we plan to undertake, and detailed consultation information sheets can be found at the link below:

[Individual 53]

### 1.92 Email sent to Yued Aboriginal Corporation (9 October 2023)

Hello [Individual 54],

As discussed last week, Woodside is seeking to consult with Yued with regards to a further two Environment Plans. Both of these EPs are for continued operation of existing operating facilities that are located north of Exmouth.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry-required 5 year revisions.

I am writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached the summary information sheet that explains the activities we plan to undertake, and detailed consultation information sheets can be found at the link below:

- [Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations EPs](#)

Woodside is seeking to understand the nature of the interests that Yued Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by **10 November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [\*Consultation on offshore petroleum environment plans – Information for the Community\*](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700. Please also feel free to forward this email and the attached documents to Yued AC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Yued members, the Yued Board, Cultural Advice Committee, office holders and other interested parties.

I look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist Yued AC in any way to participate in these processes.

Kind regards,

### 1.93 Email to Wilinggin Aboriginal Corporation (13 October 2023)

Good afternoon Wilinggin Aboriginal Corporation,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5-year revisions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 714 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance, and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

### [Ngujima-Yin & Pyrenees Floating Production Storage and Offloading \(FPSO\) Facility Operations](#)

Woodside is seeking to understand the nature of the interests that Wilinggin Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns.
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by Monday, **13 November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *[Consultation on offshore petroleum environment plans – Information for the Community](#)* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Uncontrolled when printed. Refer to electronic version for most up to date information.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700. Please also feel free to forward this email and the attached documents to Wilinggin Aboriginal Corporation Members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Wilinggin Aboriginal Corporation Members, the Wilinggin Aboriginal Corporation Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist Wilinggin Aboriginal Corporation in any way to participate in these processes.

Kind regards

#### **1.94 Email to Mirning Traditional Lands Aboriginal Corporation (4 October 2023)**

Dear [Individual 55]

By way of introduction, I work with Woodside in the company's First Nations relationships team. Woodside is a global energy company headquartered in Perth, with projects and operations off the north west coast of Western Australia, and onshore in the Pilbara at Onslow and Murujuga (Burrup Peninsula).

Further information about Woodside and the company's activities can be found here <https://www.woodside.com/sustainability/consultation-activities>.

I am writing to seek to establish Woodside's relationship with the Mirning People and to ask whether and how the group may like to consult with Woodside about some of the company's offshore activities. I have spoken to your Executive Assistant who kindly recommended I send through this information for your review and feedback. If you have any questions at all, please don't hesitate to reach out as I am more than happy to assist. I am available to meet in person or via Teams, whichever is more suitable to you and your team.

While Woodside's activities are located in the Pilbara region, our modelling can indicate that the 'environment that may be affected' (EMBA) from a highly unlikely unplanned event associated with our offshore activities could, depending on the currents, wind and tide for example, extend to the south of WA. Considering this, we are seeking to establish our relationship with the Mirning People as the basis for consulting about these activities, particularly in relation to the nature of Mirning People interests in the EMBA by some of Woodside's activities, cultural values in the EMBA that you may like to inform Woodside about, any concerns you may have, suggested management measures, and whether there are other people and organisations that you think Woodside should consult with.

The EMBA by our Pyrenees and Ngujima-Yin oil operations, located 45 and 57km north of the Exmouth coast, are two examples of where the EMBA by Woodside's activities extends to the south of WA.

Woodside started operating Pyrenees in 2010, and Ngujima-Yin in 2008, and is planning to submit a five-yearly revision of the Environment Plans (EPs) for these operations to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). I have attached for your review a summary information sheet and a link to the more detailed consultation information sheet, both of which contain information about the EMBA by these operations and inviting consultation and feedback. The EMBA associated with these activities extends to the east of Albany.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 716 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

[https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00\\_5](https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00_5)

In the first instance, we are seeking to understand whether the Mirning People would like to consult with Woodside about the EMBA by the Pyrenees and Ngujima-Yin operations, and if you would like to consult, your expectations of Woodside in conducting consultation and how you would like consultation to be conducted. We would also like to know whether there are other individuals or organisations that you think Woodside should consult with about these matters. We are seeking this initial feedback by the **3<sup>rd</sup> November 2023**. Alternatively, you can provide feedback to NOPSEMA at [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or by calling **(08) 6188 8700**. If you require any assistance from Woodside to undertake consultation, please let me know. **Woodside would be pleased to support consultations by way of paying the Mirning People's reasonable costs, and providing other support that the group may require.**

I will telephone you next week to introduce myself, discuss these matters, and to answer any initial questions. In the meantime, please feel free to contact me on the details below. I have also provided a link below to the NOPSEMA consultation guidelines that provide important context in relation to these matters.

[Guideline: Consultation in the course of preparing an environment plan \(nopsema.gov.au\)](https://www.nopsema.gov.au)

I look forward to talking with you next week and thank you for taking the time to consider this correspondence.

Warm regards,

#### **1.95 Email sent to Wunambal Gaambera Aboriginal Corporation (WGAC) (2 November 2023)**

Good afternoon Wunambal Gaambera Aboriginal Corporation,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5-year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

#### **1.99 Email sent to Amateur Fishermen's Association of the NT (15 December 2023)**

Dear Amateur Fishermen's Association of the NT,  
Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

### Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

## Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **19 January 2024**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,  
Woodside Energy Feedback

### **1.100 Email sent to Northern Territory Department of Infrastructure, Planning and Logistics (DIPL) - Marine Safety; Department of Infrastructure, Tourism and Trade (DITT) - Aquatic Biosecurity; Indian Ocean Territories Regional Development Organisation; Port of Christmas Island; Christmas Island Business Association (15 December 2023)**

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

## Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

### Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **19 January 2024**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,  
Woodside Energy Feedback

### 1.102 Email sent to Northern Territory Seafood Council (NTSC) (15 December 2023)

Dear Northern Territory Seafood Council,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 735 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

#### Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 1

Page 736 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,  
Woodside Energy Feedback

### **1.103 Email sent to Port of Cocos (Keeling) Island (18 December 2023)**

Dear [Individual 59], on behalf of Port of Cocos (Keeling) Island,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

### 1.104 Email sent to Yamatji Marlpa Aboriginal Corporation (YMAC) (23 October 2023)

Hi there [Individual 21] and [Individual 22]

I hope you are both well.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

#### Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began** in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

The summary information sheet explaining the activities we plan to undertake can be found [here](#), and detailed consultation information sheets can be found on the external Woodside website <https://www.woodside.com/sustainability/consultation-activities>

Woodside is seeking to understand the nature of the interests that NTGAC and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.
- 

If you would like to speak with us, please let us know by **20 November 2023** please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700. Please also feel free to forward this email and the attached documents to NTGAC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with NTGAC members, the NTGAC Board, Elders and office holders and any other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist NTGAC in any way to participate in these processes.

Many thanks

### 1.105 Email sent to Yawoorroong Miriuwung Gajerrong Yirrggeb Noong Dawang (MG Corp)

Dear [Individual 60]

Hope all is well [Individual 60] and once again, thank you for allowing [Individual 44] and I to meet 18-September with yourself and directors.

The attached Environment plan is for existing operating FPSO's and not for a new project. Ngujima-Yin commenced operation in 2008 and Pyrenees 2010, however Woodside are required to submit 5 yearly revision plans.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's), we are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

## Overview

Both EPs are being revised and resubmitted for the continued production of oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.**

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

[https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00\\_5](https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00_5)

Woodside is seeking to understand the nature of the interests that MG Corp and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by 6-November 2023 and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au), by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to [communications@nopsema.gov.au](mailto:communications@nopsema.gov.au) or (08) 6188 8700. Please also feel free to forward this email and the attached documents to MG Corp and other people and organisations who you think may be interested as required. Woodside would be happy to speak with MG Corp members, the MG Corp Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist MG Corp in any way to participate in these processes.

## 2. Additional Consultation

16 October 2023

Dear Stakeholder,

**NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside previously consulted you (correspondence dated 22 September 2023) regarding its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

**Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

**Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs. For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

**Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull. The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean

conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

Woodside is writing to you to follow up on feedback with respect to the proposed activities. You were previously sent a Consultation Information Sheet which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures.

The Consultation Information Sheet is available on our website [www.woodside.com](http://www.woodside.com) and can be accessed through the QR code below:

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Should you require notification prior to, and on completion of, the proposed activities, or have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

## 2.7 Email sent to Shire of East Pilbara (24 October 2023)

Dear Stakeholder,

Woodside previously consulted you on its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Information on the proposed activities is provided in the email below and in the Consultation Information Sheet which is available on our [website](#). Also in the email below are some questions and answers explaining why we are consulting you for these EPs.

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by 01 November 2023.

Please let us know if your feedback for this activity is sensitive and we will make this known to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

Kind regards,  
Woodside Feedback

E: [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au)

24 October 2023

Dear Stakeholder,

### **NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside previously consulted you (correspondence dated 22 September 2023) regarding its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs. For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull. The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean

conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

Woodside is writing to you to follow up on feedback with respect to the proposed activities. You were previously sent a Consultation Information Sheet which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures.

The Consultation Information Sheet is available on our website [www.woodside.com](http://www.woodside.com) and can be accessed through the QR code below:

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **02 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

Regards,

24 October 2023

Dear Stakeholder,

### **NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside previously consulted you (correspondence dated 22 September 2023) regarding its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs. For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull. The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean

## 2.10 National Energy Resources Australia (NERA) (30 October 2023)

Dear Stakeholder,

Woodside previously consulted you on its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Information on the proposed activities is provided in the email below and in the Consultation Information Sheet which is available on our [website](#).

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by 06 November 2023.

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

Kind regards,  
Woodside Feedback

## 2.11 Email sent to Tuna Australia (31 October 2023)

Dear [Individual 61] and [Individual 62]

Woodside previously consulted you on its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Information on the proposed activities is provided in the email below and in the Consultation Information Sheet which is available on our [website](#).

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by 07 November 2023.

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 1

Page 761 of 819

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside has noted your response regarding consultation processes in respect to an activity update for the TPA03 Well Intervention Environment Plan.

In relation to the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations EPs, AFMA data shows there are no active tuna fisheries within the Operational Areas. The Western Tuna and Billfish Fishery is active within the EMBA. As per AFMA's expectations, we have consulted individual operators in this fishery as well as Tuna Australia and the Commonwealth Fisheries Association as the relevant industry associations and representative bodies.

Kind regards,  
Woodside Feedback

## **2.12 Email sent to Australian Southern Bluefin Tuna Industry Association (ASBTIA) (1 November 2023)**

Dear Stakeholder,

Woodside previously consulted you on its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Information on the proposed activities is provided in the email below and in the Consultation Information Sheet which is available on our [website](#).

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by 11 November 2023.

Please let us know if your feedback for this activity is sensitive and we will make this known to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

Kind regards,  
Woodside Feedback

## **2.13 Email to Northern Prawn Fishery Industry (2 November 2023)**

Dear Northern Prawn Fishery Industry,

Woodside previously consulted you on its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

### **NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside previously consulted you (correspondence dated 22 September 2023) regarding its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

#### **Overview**

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

#### **Exclusionary / Cautionary Zones**

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs. For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

#### **Environment that May Be Affected (EMBA)**

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull. The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean

**2.18 Email sent to [Individual 1], Shark Bay Aviation, Mac Attack Fishing Charters, Shark Bay Charters, Shark Bay Coastal Tours, Naturetime Tours, Perfect Nature Cruises, Shark Bay Community Resource Centre, Wula Gula Nyinda Eco Cultural Tours, Ocean Park, Tidal Moon, RAC Monkey Mia, Dirk Hartog Island; Shire of Shark Bay; Department of Biodiversity, Conservation and Attractions Shark Bay office (15 December 2023)**

Dear Stakeholder,

Woodside previously consulted you regarding its plans to submit:

1. Five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans:
  - The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
  - The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L;
2. The Scarborough Offshore Facility and Trunkline Operations Environment Plan, which involves the installation of a Floating Production Unit (FPU) and complete subsequent hook-up and commissioning activities, prior to start-up and operations within Production Licences WA-61-L and WA-62-L. Gas from the FPU will be transferred through the gas export trunkline (the Trunkline - Pipeline Licence WA-32-PL) to the Pluto LNG Plant for further processing.

Information on the proposed activities is provided in the email below and in the Consultation Information Sheets which are available on our website [here](#) (Ngujima-Yin FPSO Facility and Pyrenees Facility Operations) and [here](#) (Scarborough Offshore Facility and Trunkline Operations).

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **22 December 2023**.

Please let us know if your feedback for this activity is sensitive and we will make this known to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

Kind regards,

Woodside Energy Feedback

Dear

Woodside previously consulted you on its plans to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Information on the proposed activities is provided in the email below and in the Consultation Information Sheet which is available on our [website](#).

If you have feedback specific to the proposed activities, we would welcome your feedback at [Feedback@woodside.com.au](mailto:Feedback@woodside.com.au) or 1800 442 977 by **19 January 2024**.

Please let us know if your feedback for this activity is sensitive and we will make this known to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

Kind regards,  
Woodside Energy Feedback

# Security alert: UK puts China spies on notice

STEVEN SWINFORD  
BILLY KENDER  
LONDON

China faces being formally designated a threat to Britain under security laws after a Tory parliamentary researcher was arrested on suspicion of spying.

Under pressure from China hawks, Deputy Prime Minister Oliver Dowden told parliament on Monday that there was a strong case for including China in the enhanced tier of the Foreign Influence Registration Scheme, whereby China would be designated as a "potential risk to UK safety or interests".

"Anyone working 'at the direction' of China or state-linked Chinese companies would be required to register with the government and disclose their activities. Failure to do so would be a criminal offence carrying a five-year jail sentence."

Chris Cash, the director of an influential group on Beijing founded by Security Minister Tom Tugendhat, was arrested in March on suspicion of breaching the Official Secrets Act. He was also employed as a researcher by Alica Kearns, chairwoman of the Commons foreign affairs committee.

His arrest, reported for the first time at the weekend, has intensified debate on whether Britain needs to be more robust in its dealings with Beijing.

Mr Cash, who studied in China before working in Westminster, released a statement on Monday insisting he was "completely innocent".

He said the allegations were "against everything I stand for", adding that he had spent his career "trying to educate others about the challenges and threats presented by the Chinese Communist Party". China called the claims malicious slander.

Mr Cash, 28, and a man in his 30s who was arrested at the same time are on police bail until next month.

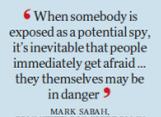

Chris Cash ... allegations 'against everything I stand for'

Xu Yanqun ... lured to Belgium and arrested

Oliver Dowden: 'Absolutely clear'

Rishi Sunak: 'Emphatic'

Prime Minister Rishi Sunak said on Monday that he had been "emphatic" with Chinese Premier Li Qiang that the government would never tolerate actions that undermined British democracy. Mr Sunak, who spoke to Mr Li at the G20 meeting in India at the weekend, said he was clear that the "sanctity" of parliament must be protected.

Mark Sabahl, of the Committee for Freedom in Hong Kong Foundation, told Times Radio he had met Mr Cash several times. "He was an important cog in the China aspect ... in Westminster," he said. Calling the allegations terrifying, he added: "I have no evidence or proof whatsoever that he did anything wrong. "However, when somebody is exposed as a potential spy, it's inevitable that people immediately get afraid ... they themselves may be in danger."

## West spooked into action to thwart Beijing espionage

RICHARD SPENCER  
ANALYSIS

China has been trying to "catch up" with the West, using all means within its power to do so for decades.

Some methods are legitimate, of course, such as the nation's economic growth. At the other end of the scale, Beijing, Washington and London have deployed old-fashioned spies against each other for years.

However, in recent years Western nations have begun to take measures against a range of "grey" tactics, from industrial espionage to the "snoozing" of public discussion of issues such as Taiwan or human rights.

A year ago, MI6 director-general Ken McCallum and FBI director Christopher Wray gave an unprecedented joint address to business leaders and academics, saying they needed to join forces to prevent China undermining the West's security and democratic values.

Microsoft gave a specific example in May that a state-

sponsored Chinese hacking group had compromised critical US infrastructure. Cyber espionage groups run by the People's Liberation Army are suspected of targeting civilian companies, including Google, on far back as 2002. Google and other firms supplying software to companies and government departments provide a "back door" into their computer systems.

There is wider concern about China gaining access to political "influencers", using Chinese students or even unwitting diplomats to prevent discussion of sensitive issues on campuses. Britain's National Security Act, which became law in July, introduced a foreign influence registration scheme - based on laws passed in Australia in 2018 to combat the growing influence of China. Lobbyists working there on behalf of foreign states are required to register with the government within 14 days of undertaking their activities or face prison sentences of up to five years.

The US is ahead of Britain in several ways. It has banned federal employees from downloading TikTok on government-issued electronic devices. And 28 states have banned officials from using TikTok at all.

The US is ahead of Britain in several ways. It has banned federal employees from downloading TikTok on government-issued electronic devices. And 28 states have banned officials from using TikTok at all.

The buying of agricultural land in the US by Chinese companies has stoked fears it may be being used by the Chinese government to spy on US military installations. Last week, China was accused of sending citizens posing as tourists to test security at military installations by trying to enter them "by mistake".

A striking case was that of an expert in advanced engineering working for American giant GE, who was asked to lecture at a Chinese university in 2002. It was only later the FBI told him he had unwittingly allowed himself to become a Chinese spy. The man who invited him was not a university representative but an agent of Chinese State Security Ministry Xu Yanqun, who lured him for information. The FBI "turned" the engineer, asking him to feed information to the Chinese and, eventually, lure Xu to Belgium, where he was arrested and extradited.

After his trial, Xu was shown to have also targeted French aviation experts and recruited a Chinese student who managed to earn in the US Army Reserve. Sentenced to 20 years' jail, it was a rare case of a spy master, not just a spy, being jailed.

THE TIMES

# NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

Woodside consults so that feedback from relevant persons is considered and used to inform the revision of two operations Environment Plans for the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations.

## Our activities

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Floating Production Storage and Offloading (FPSO) facilities and is submitting a five-year revision to the operational Environment Plans. The Environment Plans for the Pyrenees FPSO and Ngujima-Yin FPSO facilities will cover operations including offloading and associated activities, inspection, maintenance, monitoring, and repair of the FPSOs and subsea infrastructure, disconnection and sail-away of the FPSO facilities when required, and production from two proposed additional wells from the Ngujima-Yin FPSO.

The Pyrenees FPSO is located about 45 km northwest of Exmouth, Western Australia. Production began in 2010 and is scheduled to end in 2035. The Ngujima-Yin FPSO is about 50 km, northwest of Exmouth, Western Australia. Production began in 2008 and is scheduled to end in 2028.

We are seeking input from relevant persons whose functions, interests or activities may be affected by continued operations.

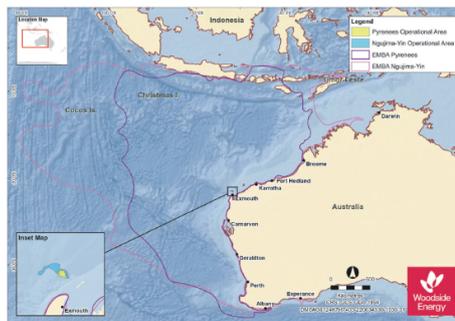

## The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these two Environmental Plans, is determined by modelling a highly unlikely release of hydrocarbons from loss of well control or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible modelled paths that a highly unlikely hydrocarbon release could travel if left unmitigated and depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

## We want to hear from you

If you are an individual, organisation or community group and believe your functions, interests or activities may be impacted by our activities, we would like to hear from you by Friday, 27 October 2023 to identify you as a relevant person.

## Want to know more or provide input?

## Power pole fire arrest pair in court

Two men are facing charges for allegedly causing a Western Power pole to go up in flames.

Detectives from WA Police's State security investigation group recently charged the pair, aged 32 and 21, after damage was caused to electrical wiring on a power pole, causing it to set fire, in May.

The fire caused extensive damage to the pole and the wiring.

As part of the investigation, detectives searched a property in Banksia Grove last month.

The two men, both of Banksia Grove, were subsequently charged with a count of unlawful damage each.

They are due to appear in Jondalup Magistrates Court on October 2.

The incident in May happened after an unrelated incident involving a high-voltage transmission tower, also in Pinjar, which police believe was knocked down in an act of vandalism on April 20.

Police believe those involved may have been dressed as workers or technicians so as to not draw attention to themselves.

"They may have been dressed as to not raise suspicion," Det-Insp. Gary Butler said in April. Police continue to appeal for information.

ent former partner that he thought about using his gun to shoot himself but that he could never do that because he would have to go to work to get it.

A couple of months later, he joined the traffic motorcycle group based in Midland and was allowed to take home his bike and his gun. The inquest was told his superior, Sen. Sgt Simon Baxter, gave Const. Fyfe verbal approval to store the weapon at home after he provided an email with photographs of his safe.

However, WA Police policy was that an inspection should be carried out. Sen. Sgt Baxter was investigated over the technical breach but was exonerated by internal affairs.

A month after he received approval, Const. Fyfe took his own life after a night of heavy drinking. The inquest was told he had messaged and called his family and friends just before he shot himself.

His devastated father made the heartbreaking discovery the following day.

Det-Const. Greg Holt, who carried out an investigation into Const. Fyfe's death, said it was clear the young officer had hidden his mental health issues from the force.

He said officers he spoke to were not aware of the severity of Const. Fyfe's depression or his comments about suicide.

He also said his police file did not contain any evidence that he had sought internal psychological counselling services.

When asked if it appeared he kept his mental health strug-

gles hidden because of fears he would be stood down from operational duties, Det-Const. Holt said it did. "I think people have concerns others will find out," he said.

Det-Sen. Sgt Glenn Swannell testified there was stigma about seeking help from the mental health services provided by police. However he was not aware of any police-employed psychologist betraying the confidence of an individual.

# Cops have to sleep in swags

Facilities crude at West Daly

Annabel Bowles and Zizi Averill

Northern Territory police have been sleeping in swags while deployed to the remote West Daly region as part of ongoing efforts to quell years of gang violence and unrest.

Police Commissioner Michael Murphy recently revealed emergency response groups had been asked to camp in Peppimenarti, a community about 330km from Darwin.

"At the moment, I've got police officers who go out there and actually stay for six weeks to three months," Mr Murphy said on Friday.

"And the task force operators, they take their swags out with them."

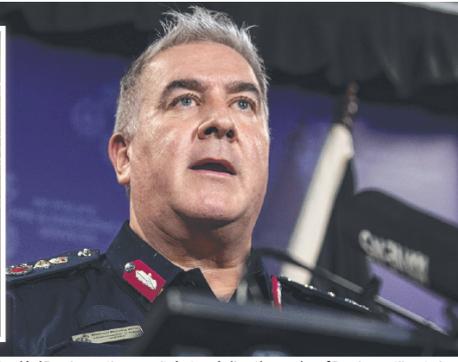

"They don't look for comfort too much."

Mr Murphy visited the troubled town last week as part of an increased police presence which led to the arrest of 10 people.

Community members said the Peppimenarti police sta-

Police Commissioner Michael Murphy visited the troubled Peppimenarti community last week; (Inset) a member of Peppimenarti's notorious Jovi Boys gang. Main picture: Pema Tamang Pakhrin. Inset: Supplied

tion had been broken into six times in the past year.

NT Police Association president Nathan Finn said the police compound in nearby Wadeye had also been repeatedly broken into, "with (alleged) offenders stealing impounded cars and smashing through the perimeter fence on a number of occasions".

He said the issue of police sleeping in swags was not isolated to Peppimenarti and

something the union had been pushing the NT government and senior police executive to address "for years".

"This is the reality for police sent to Peppimenarti to support the two officers permanently stationed there," he said.

"There are many remote stations where relieving members receive a camping allowance to sleep in swags, in the absence of suitable accommodation."

Mr Finn described the Peppimenarti station as a "rusting, rotting shipping container" left over from the Intervention era.

"(It's) totally lacking adequate security measures to protect our members," he said.

"What has gone wrong with a community when offenders think it's acceptable to break into and damage a police compound - where members and their families live?"

Mr Finn said police were

"regularly attacked" with axes, machetes, spears and rocks - not just in the West Daly region but across the Territory.

Police Minister Kate Worden was contacted for comment but a government spokesman responded, saying a \$19m new station for Peppimenarti was progressing.

"The new Peppimenarti permanent police complex will include a new contemporary police station, detention facil-

ties, government employee housing and visiting officers' quarters to support a permanent police presence in Peppimenarti," he said.

"Discussions are well underway between the NT government and land council to identify an appropriate site for the new station."

"Following the identification of a site, work on design and construction processes can then begin."

"There is currently a review into police resourcing underway which includes assessing staffing at remote stations."

Mr Finn said while the new station would be welcomed, construction was not expected to start until the second half of next year.

"If (the) government considered remote policing investment a priority, it would have built the Peppimenarti complex years ago, instead of spending \$13m on a police station in the Chief Minister's electorate that is nothing more than glorified office space, with no frontline response capabilities," he said.

NT Police has previously refused to confirm any details about break-ins at the Peppimenarti police compound and when asked again on Tuesday, a spokeswoman said they would "aim" to respond later in the week.

## NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

# Indonesia lifts live cattle ban

KIMBERLEY CAINES

Indonesia has resumed imports of live cattle from WA and other parts of the country — ending more than a month of trade suspensions over fears of lumpy skin disease.

Livestock producers and exporters in WA can again start sending their live cattle to the nation's northern neighbour as of Saturday, with the ban on seven yards — three from the State — being lifted with immediate effect.

Australian and Indonesian officials reached the agreement following a week of meetings in Jakarta to come up with a resolution.

Acting chief veterinary officer Dr Beth Cookson led the discussions and had to satisfy Indonesia that Australia is lumpy skin disease-free.

Prime Minister Anthony Albanese spoke directly with Indonesian President Joko Widodo about the matter while in Jakarta on Thursday — as did Foreign Minister Penny Wong with her counterpart.

Mr Albanese thanked the ministers, departmental staff and officials and technical experts who worked for the positive outcome.

"I am delighted that following the bilateral meeting Minister Wong and I had with President Widodo earlier this week at the East Asia Summit, Indonesia will lift its suspension of Australian live cattle and buffalo exports," he said on Saturday.

"I thank President Widodo and

Indonesia has resumed imports of live cattle from WA and other parts of the country. Picture: Petermooy

his officials for working to resolve this issue."

The Australian Livestock Exporters' Council welcomed the resumption of trade with relief, noting cattle trade had been longstanding between the two nations.

"Indonesia is Australia's largest market for cattle and Indonesian families rely on Australian cattle

for a consistent supply of high-quality affordable beef, so a swift, unencumbered return to trade was always in the interests of both countries," ALEC chair David Galvin said.

"The trade is a longstanding one that benefits both of us and I firmly believe that strong relationship meant a mutually beneficial

solution would always be found."

Agriculture Minister Murray Wait said Saturday's announcement was "a testament to our calm and considered approach in response to this issue". "We have always maintained that Australia is free of lumpy skin disease, demonstrated by the results of extensive testing undertaken across

northern Australia," he said.

Senator Watt told reporters in Brisbane on Saturday surveillance measures for lumpy skin disease had been placed on Australia and that a "delegation of Indonesian quarantine officials" would land in northern Australia in coming weeks so they can "physically inspect the premises involved".

Livestock producers and exporters in WA can again start sending their live cattle to the nation's northern neighbour as of Saturday, with the ban on seven yards — three from the State — being lifted with immediate effect.

Australian and Indonesian officials reached the agreement following a week of meetings in Jakarta to come up with a resolution.

Acting chief veterinary officer Dr Beth Cookson led the discussions and had to satisfy Indonesia that Australia is lumpy skin disease-free.

Prime Minister Anthony Albanese spoke directly with Indonesian President Joko Widodo about the matter while in Jakarta on Thursday — as did Foreign Minister Penny Wong with her counterpart.

Mr Albanese thanked the ministers, departmental staff and officials and technical experts who worked for the positive outcome.

"I am delighted that following the bilateral meeting Minister Wong and I had with President Widodo earlier this week at the East Asia Summit, Indonesia will lift its suspension of Australian live cattle and buffalo exports," he said on Saturday.

"I thank President Widodo and

Indonesia has resumed imports of live cattle from WA and other parts of the country. Picture: Petermooy

his officials for working to resolve this issue."

The Australian Livestock Exporters' Council welcomed the resumption of trade with relief, noting cattle trade had been longstanding between the two nations.

"Indonesia is Australia's largest market for cattle and Indonesian families rely on Australian cattle

for a consistent supply of high-quality affordable beef, so a swift, unencumbered return to trade was always in the interests of both countries," ALEC chair David Galvin said.

"The trade is a longstanding one that benefits both of us and I firmly believe that strong relationship meant a mutually beneficial

solution would always be found." Agriculture Minister Murray Watt said Saturday's announcement was "a testament to our calm and considered approach in response to this issue". "We have always maintained that Australia is free of lumpy skin disease, demonstrated by the results of extensive testing undertaken across

northern Australia," he said. Senator Watt told reporters in Brisbane on Saturday surveillance measures for lumpy skin disease had been placed on Australia and that a "delegation of Indonesian quarantine officials" would land in northern Australia in coming weeks so they can "physically inspect the premises involved".

## NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

Woodside consults so that feedback from relevant persons is considered and used to inform the revision of two operations Environment Plans for the **Ngujima-Yin Floating Production Storage and Offloading Facility Operations** and **Pyrenees Facility Operations**.

### Our activities

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Floating Production Storage and Offloading (FPSO) facilities and is submitting a five-year revision to the operational Environment Plans. The Environment Plans for the Pyrenees FPSO and Ngujima-Yin FPSO facilities will cover operations including offloading and associated activities, inspection, maintenance, monitoring, and repair of the FPSOs and subsea infrastructure, disconnection and sail-away of the FPSO facilities when required, and production from two proposed additional wells from the Ngujima-Yin FPSO.

The Pyrenees FPSO is located about 45 km northwest of Exmouth, Western Australia. Production began in 2010 and is scheduled to end in 2035. The Ngujima-Yin FPSO is about 50 km, northwest of Exmouth, Western Australia. Production began in 2008 and is scheduled to end in 2028.

We are seeking input from relevant persons whose functions, interests or activities may be affected by continued operations.

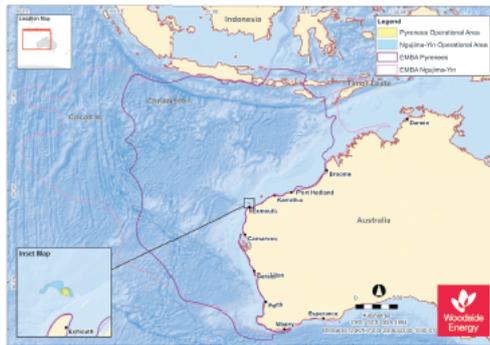

### The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these two Environmental Plans, is determined by modeling a highly unlikely release of hydrocarbons from loss of well control or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible modelled paths that a highly unlikely hydrocarbon release could travel if left unmitigated and depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

### We want to hear from you

If you are an individual, organisation or community group and believe your functions, interests or activities may be impacted by our activities, we would like to hear from you by **Friday, 27 October 2023** to identify you as a relevant person.

# candidates for elections

**Carnarvon shire president hopeful Paul Kelly.**

**Exmouth shire president candidate Matthew Nikkula.**

**Carnarvon Shire president Eddie Smith. Picture: Jamie Thannoo**

from 2017-2021, when the council voted Cr Allston into the top role.

Three candidates for three vacancies have been elected unopposed and all are newcomers to the council — Todd Bennett, Kai Broedner, and Kristy Devereux.

Cr's Heather Lake and Mark Lucas, whose terms expire next month, are not contesting their positions.

Three candidates for four vacancies have been elected unopposed in Three Springs, including deputy president Christopher Connaughton, and Crs Julia Ennor and Nadine Eva.

In Shark Bay, four candidates have filled all the vacancies and

been elected unopposed — Shire president Cheryl Cowell and Crs Greg Ridley, Mark Smith and Peter Stubberfield.

Out of three vacancies in Yalgoo, only one has been filled, by Cr Raul Valenzuela.

According to the Australian Electoral Commission, if there are not enough nominations to fill vacancies, an extraordinary election must be held at a later date.

If no nominations are made, the council may appoint someone to the role, permitted they are eligible and willing to accept it.

Local government elections will be held on Saturday, October 21.

# Avocado orchard part of study

MELISSA PEDELT

A Pemberton avocado orchard is one of three involved in a national research project designed to help improve the robustness of avocados.

The national project will develop tools to guide calcium applications

to help deliver the best-quality avocados, boosting orchard potential and growers' business resilience and profitability.

The Department of Primary Industries and Regional Development is supporting the three-year Queensland Department of Agriculture and Fisheries project to in-

crease fruit quality, funded by Hort Innovation's Avocado Fund.

Research scientist Declan McCauley said the department was now in the second year of the project, exploring several options to refine calcium applications to optimise fruit quality. "There seems to be a 12-week

window after flowering where applying calcium can improve the robustness of the fruit," Mr McCauley said.

"The department is doing trials with three commercial Hass avocado orchards at Pemberton, Busselton and Carabooda to evaluate various rates and timing of calci-

um applications to improve fruit robustness.

The first harvest from the Carabooda site showed variability in fruit robustness between trees, suggesting variability between trees may be a driver of whether fruit robustness is adequate or not.

DPIRD research scientist Declan McCauley is working on a national project to improve the robustness of avocados.

# Shock at abattoir's closure

AIDAN SMITH

The phone is dead, the doors are closed, and Esperance livestock producers are wondering what to do with 60,000 lambs after Minerva Foods Australia suddenly halted operations at its Shark Lake abattoir to undertake "a review of operations".

ASHEEP grower group president and Scadden farmer David Vandenberghe said while MFA chief executive Iain Mars was undertaking a review "to fully analyse what further investment is needed" in the meat processing plant, he doubted it would reopen.

"It certainly makes it difficult for producers who have been battling all year to get sheep processed," Mr Vandenberghe said.

"It takes whatever they kill each week out of the system, and producers who have old-season lambs booked in now have to find alternative arrangements."

Mr Vandenberghe said producers found WAMMCO at Katanning was "booked out" and they had had to freight sheep to V&V Walsh at Bunbury, pushing up transport costs by \$5-\$7 per head.

Salmon Gums mixed farmer Greg Kenney said he had 500 lambs scheduled for processing at the facility next week and would have to "hold them on-farm" through the summer because.

He feared by the time he found alternative processing, they would have become hoggets, worth \$60 per head less.

"At least we have sufficient feed

and water on hand to carry them through," Mr Kenney said.

"We'll also be able to shear them as they'll have about eight months wool by then."

Mr Kenney said the sudden decision by MFA would remove much-needed "cash flow" from his normal spring operation.

He didn't expect the abattoir to reopen, but said "at least" MFA had

invested money into it for a new owner to take over and open the doors immediately.

Mr Mars closed the plant on September 11, about 14 months after opening it as part of a joint venture with the Saudi Agricultural and Livestock Investment Company, which was a surprise to its 150 employees as well as WA suppliers.

He said staff would be rede-

ployed to other facilities within the MFA group where possible, with "a small number taking up redundancies".

The South American-owned MFA is expected to fulfil all existing meat orders through its operations at the Great Eastern Abattoir at Tammin, and Colac in Victoria. The Esperance facility had the

capacity to process about 9000 lambs a week, while 5000 head could also be processed at Tammin, with 90 per cent of the total product exported mostly to the Middle East.

Pastoralists and Graziers Association of WA Livestock Committee chair and Eneabba sheep producer Chris Patmore said the MFA decision highlighted how difficult it was to operate an abattoir.

"It's disappointing to see a reduction in sheep processing in WA," Mr Patmore said.

"It's not an easy business to be in. Hopefully it is a temporary situation and not a permanent closure."

Mr Patmore said the WA sheep industry needed "all the competition it could get" within the processing sector, especially at a time when the Federal Government was working to phase out live sheep exports.

MFA originally sought to invest \$50 million in the WA processing sector to boost its Australian operations, mainly because of the presence of the Saudi Agricultural Livestock Investment Company, which purchased a 211,000ha portfolio of farmland from John Nicolletti in 2019.

SALIC operates under the Merredin Farms brand and would sell lambs to MFA as part of the arrangement.

MFA is the second South American entity after JBS to invest in Australian meat processing.

# Fight for Indigenous language

SARAH CRAWFORD

It's morning tea at the Kimberley Language Resource Centre in Halls Creek and five-year-old Matthew Henry is more interested in the Tim Tams on the table than his aunties' conversation in the local language of Jaru.

In his community of Kundat Djaru, Ringer Soak, 170km southeast of Halls Creek, Jaru is spoken at home and taught at school so the children are proficient in the local language.

However, KLRC project and office co-ordinator, Jacqueline Cox, can see some of the dozens of languages spoken across the Kimberley getting, "watered down due to the two different worlds," that young Aboriginal people live in.

"Our old people would speak fluent language but over the years it is breaking down," Ms Cox said.

"When we go back to community we have to speak our native, natural tongue and then we have to switch when we come back into the Western world. So because of that, our old people speak fluent language, whereas we only pick up bits and pieces of it."

The KLRC is working to keep native tongues strong through their State of Language Continuation in the Kimberley project. Part of the project involves surveying 250 people to find out which Kimberley languages are thriving, which ones are, "sleeping," and what needs to be done to keep people speaking them.

There are 47 known languages from the Kimberley. Some lan-

The Kimberley Language Resource Centre is surveying people in the East Kimberley to try to find out which languages are still alive and which ones are "sleeping." Local ladies Judy Tchooga, Fiona Macale, Pauline Mandjarra, Clara Yundi, Mary Seela, Barbara Seela and Florence Long. Picture: Jackson Findell

guages, such as Walmajarri, south of Fitzroy Crossing, and Kukatja, around Lake Gregory, are strong and have more than 1000 speakers.

Other languages such as Miwa, Wila Wila and Gurwuj, once used in the north of the Kimberley, have had no speakers in living memory.

Survey leader Rowan James-Albert said his field research so far around Halls Creek showed the local language of Jaru to be strong.

"The number of people I have

spoken to here, there are a good amount of Jaru speakers, they do speak fluently, and they have not lost their language," he said.

Mr James-Albert is a Bardi speaker from Lombadina on the Dampier Peninsula.

He said in the West Kimberley the local languages were not as strong as in the East Kimberley.

"We are a bit more half and half, but there are language revival programs, just enough to keep the language alive," he said.

At the centre this morning Mr James-Albert is interviewing Halls Creek men, Stewart Moreton, who speaks Nyinnin Jaru, Eric Leeria, who speaks Guniyandi and Tony Chungulla of Billiluna, who speaks Walmajarri.

Mr Moreton, 81, an old stockman, said the traditional Nyinnin Jaru he spoke as a young person was now changing.

"They are losing it a little but we want to try to get that thing back before the older people go. People

here are real law people we want to keep their law strong," he said.

Ms Cox said despite the encroachment of English she was confident Kimberley languages would be spoken by future generations.

"Teaching the young people to continue language is the main importance of the language centre because language is a part of their culture. If they lose their language they will lose their culture," she said.

## NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

Woodside consults so that feedback from relevant persons is considered and used to inform the revision of two operations Environment Plans for the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations.

### Our activities

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Floating Production Storage and Offloading (FPSO) facilities and is submitting a five-year revision to the operational Environment Plans. The Environment Plans for the Pyrenees FPSO and Ngujima-Yin FPSO facilities will cover operations including offloading and associated activities, inspection, maintenance, monitoring, and repair of the FPSOs and subsea infrastructure, decommission and sail-away of the FPSO facilities when required, and production from two proposed additional wells from the Ngujima-Yin FPSO.

The Pyrenees FPSO is located about 45 km northwest of Exmouth, Western Australia. Production began in 2010 and is scheduled to end in 2035. The Ngujima-Yin FPSO is about 50 km, northwest of Exmouth, Western Australia. Production began in 2008 and is scheduled to end in 2028.

We are seeking input from relevant persons whose functions, interests or activities may be affected by continued operations.

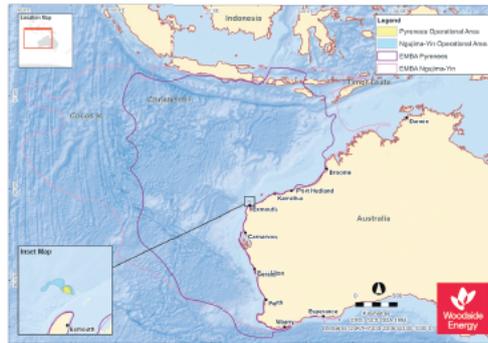

### The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these two Environment Plans, is determined by modelling a highly unlikely release of hydrocarbons from loss of well control or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible modelled paths that a highly unlikely hydrocarbon release could travel if left unmitigated and depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

# Councillor protests hub expense

Community Centre to cost \$780,000 a year  
SEAN VAN DER WIELEN

A Capel Shire councillor has argued she "in good conscience" cannot vote to progress plans to build a \$10.9m community hub in Dalryellup after running costs for the facility were estimated at \$780,000 per year.

But Shire president Doug Kitchen has claimed the figure is a "high-level" guess and the council already spent nearly half of that amount on services for the growing community.

The Dalryellup Multipurpose Community and Youth Centre is set to be the heart of the Shire's presence in the area and will include a digital technology hub, new library and expanded council services.

Cr Kaara Andrews questioned the estimated \$780,000 a year cost of running the facility and said she could not "in good conscience" vote for any items to do with the centre until more community consultation was held.

"Before we go much further, we have to have a really serious conversation about what it's going to cost us a year to run this and actually have a conversation with the community about whether or not they consider this a worthwhile project to be putting that kind of money into year-on-year for the next 25 years," she said.

"It's not our money, it's their money and there needs to be a hell

An artist's impression of the Dalryellup Multipurpose Community and Youth Centre. Picture: Shire of Capel

of a lot of community buy-in — not just at the warm and fuzzy thoughts about how great it's going to be but the actual pragmatism on how we're going to pay for it."

She claimed the centre was a project which got "dumped on" the council after an \$8m State Government funding commitment at the last election and the operating costs would result in an 8 per cent rate rise for residents.

While describing Cr Andrew's operating cost concerns as "definitely valid", Cr Kitchen said the centre had been in the council's long-term financial plan "for probably near on a decade" and the operating costs were an estimate.

"(It) is quite a high-level study at this point of time and some of those things are made on assumptions," he said.

"We're actually already spending about \$355,000 per year running our current library and other services in Dalryellup. These will be moved across into this building so

we'll no longer be paying a lease. "Some staffing requirements will increase in this building but that's because there is a different offering there."

The debate over the centre's running costs overshadowed the council's move to contribute an additional \$500,000 from reserves funding towards the project in the hope it would attract additional funding.

Deputy Shire president Sebastian Schiano supported the move, noting the area's growing population.

"There is a level of staffing, support, facilities and services that currently doesn't exist in Dalryellup and this building ... is also about making the Shire present within the community," he said.

The vote was carried 6-1, with Cr Andrews the dissenting vote.

The additional contribution still leaves the precinct more than \$1m short.

## NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENTAL PLANS

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

Woodside consults so that feedback from relevant persons is considered and used to inform the revision of two operations Environment Plans for the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations.

### Our activities

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Floating Production Storage and Offloading (FPSO) facilities and is submitting a five-year revision to the operational Environment Plans. The Environment Plans for the Pyrenees FPSO and Ngujima-Yin FPSO facilities will cover operations including offloading and associated activities, inspection, maintenance, monitoring, and repair of the FPSOs and subsea infrastructure, disconnection and sail-away of the FPSO facilities when required, and production from two proposed additional wells from the Ngujima-Yin FPSO.

The Pyrenees FPSO is located about 45 km northwest of Exmouth, Western Australia. Production began in 2010 and is scheduled to end in 2035. The Ngujima-Yin FPSO is about 50 km, northwest of Exmouth, Western Australia. Production began in 2008 and is scheduled to end in 2028.

We are seeking input from relevant persons whose functions, interests or activities may be affected by continued operations.

### The environment that may be affected (EMBA)

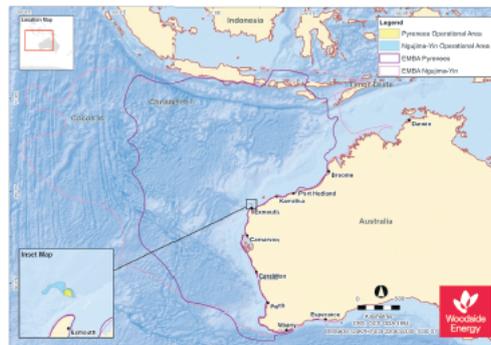

The EMBA is the largest area where activities could potentially have a direct or indirect impact.

The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these two Environmental Plans, is determined by modelling a highly unlikely release of hydrocarbons from loss of well control or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible modelled paths that a highly unlikely hydrocarbon release could travel if left unmitigated and depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

### We want to hear from you

If you are an individual, organisation or community group and believe your functions, interests or activities may be impacted by our activities, we would like to hear from you by **Friday, 27 October 2023** to identify you as a relevant person.

### Want to know more or provide input?

A feedback form and more information can be found at:

A 3D rendering of the Kimberley Marine Support Base.

# Marine base to buoy shipping

CAIN ANDREWS

The long-awaited Kimberley Marine Support Base is set to begin construction before the end of the year with the new infrastructure expected to drive significant economic development in the region.

The \$200m privately funded infrastructure project will help tackle operational challenges associated with Broome's big tide variations by implementing a new innovative floating wharf design. The design will eliminate the need for dredging, leveraging naturally occurring deep waters to create a berth pocket of at least 17m deep at low tide.

The 9900sqm floating wharf project is estimated to create 260 jobs during construction and sustain 1650 jobs once in operation.

In Broome to announce the project update, Ports Minister David Michael said the infrastructure would help diversify the local economy. "The \$200m project will be constructed over the next two years by the private proponent, which will allow for greater diversification of trade in and out of Broome Port," he said.

"Importantly, more cruise ships will be able to berth at Broome and it's a real win-win for the Kimberley Port Authority at the Port of

Broome with many services being used by the proponent which will assist the existing facilities here at Broome too.

"It'll allow for diversification and so oil and gas, agriculture, as well as those critical minerals like Kimberley Mineral Sands, will also be able to use this facility.

"It's also important for the resilience of the Kimberley to be able to bring in containers to assist with resilience and food security in the wet season."

Government of Western Australia  
WA Country Health Service

## Interested in health?

Would you like to contribute to health care in your community?

WA Country Health Service invites you to join our East Kimberley District Health Advisory Council (DHAC). This covers the towns of Kununurra, Wyndham and Halls Creek. Our health service is unique, and listening to the voices of our community will help us shape the future of our service.

### Why join?

Partnering with, and listening to consumers, carers, and the community, leads to better health care.
