E64933	06/02/2025	Info Session		N/A	N/A	Requested consultation The webinar covered Well Completions and Interventions activities. RP queried if there is any overlap from the Well Completions and Interventions EP operational area into South Australian waters. Beach confirmed there is no overlap. RP asked if the crossover in a worst-case scenario would be minimal. Beach explained the planning area is based on over 200 modelling scenarios. RP requested an explanation on gas versus oil, and Beach confirmed no crude oil is targeted. RP asked how Beach connects and disconnects infrastructure and whether divers are used. Beach explained it uses hydraulic latches and ROVs, not divers.	N/A no objections or claims made	N/A no objections or claims made

Relevant matter	RP has provided Beach consultation and negotiation plan for offshore activities. Beach will await further correspondence on 15th November	

E62824	15/11/2024	Email	Incoming	Other	N/A	Raised objection or claim RP referred to Beach's previous letters and email dated 31 October 2024. RP stated, and in some instances restated, the following: 1. RP requests that Beach provide its views and comments on the consultation plan, 2. RP advised that GMTOAC and Gunditjmara native title holders would like to use their regular native title meeting in February 2025 to meet with proponents and decide how to progress consultation with proponents in the Otway Basin, 3. RP requests that Beach agree to fund specific matters related to consultation, 4. RP requests that Beach provide plain English presentations and summaries of any environment plan for which Beach may have a duty to consult the RPs including all potential risks and impacts to RPs functions, activities, rights and interests, whether Beach has started to address this, and the source of such information, 5. RP advised that the distribution of the consultation plan before it had been authorised by the full group of Gunditjmara would not have been culturally appropriate and may have breached legislative requirements held by the RP, 6. RP acknowledged the delay to consultation that has occurred on their end, and reminded Beach of the reasons, including that it is dealing with multiple, concurrent and complex EPs, future acts under the Native Title Act and other matters relating to activities on, in, or at risk of impacting upon Gunditjmara Country, 7. RP outlined a titleholder's consultation obligations, 8. RP advised that they do not view these consultation obligations as being fulfilled by Beach to date, 9. RP, on behalf of the Gunditjmara people, seeks to establish a relationship to progress consultation and seeks consultation to include the cumulative impacts of other activities	Objection or claim does not have merit 1. This information does not constitute an objection or claim requiring an assessment of merit. Beach has provided its views on the protocol as requested by EJA, and has confirmed that it will have regard to the protocol in future consultation with GMTOAC and Gunditjmara native title holders. 2.This is not an objection or claim and requires no assessment of merit. Beach has accepted the invitation to meet with GMTOAC and Gunditjmara native title holders in the February 2025 meeting. Beach outlined the topics that Beach considers ought to be discussed at this meeting, in accordance with GMTOAC's request. 3. This is not an objection or claim and requires no assessment of merit. Beach has indicated to EJA that it is prepared to discuss funding or other support that it may be able to offer, for example reimbursing the reasonable costs of holding consultation meetings, and that it is otherwise not in a position to fund technical assessments which may be undertaken by GMTOAC. 4.This request for information does not constitute an objection or claim requiring an assessment of merit. Beach has previously provided the information requested to the EJA to provide to GMTOAC and Gunditjmara people. The materials provided include sufficient information for GMTOAC and its members to understand both the geographical extent of the environment that may be affected by activities under the EP, and the potential risks and impacts in relation to that environment. This information is sufficient to allow GMTOAC and its members to make an informed assessment of the potential consequences of the activity on any of their functions, interests or activities, including in relation to cultural risks or impacts. In any event, Beach has provided responses to the requests for further information provided. 5. This is not an objection or claim and requires no assessment of merit. Beach has noted this information. 6. This is not an objection or claim and requires no assessment of merit. Beach has noted this information. In any event, Beach has had regard to that context	A copy of Beach's response to the RP is E57203. See also previous column which provides Beach's response to its consideration of each objection or claim., ,	

						occurring temporally and spatially in the Otway Basin.	throughout its consultation period. Beach acknowledges that GMTOAC does not consider it is appropriately resourced, and has had regard to GMTOAC's specific circumstances throughout its consultation with GMTOAC. Beach has made multiple offers to support GMTOAC in participation in consultation, including by offering to organise a joint proponent meeting. Over the consultation period, Beach has sought guidance from GMTOAC on when and how GMTOAC would like to be consulted and has made itself and its representatives available to GMTOAC to consult throughout the consultation period. 7. This is not an objection or claim and requires no assessment of merit. Beach is cognisant of its consultation obligations and is comfortable that consultation to date has met Beach's regulatory obligations. The consultation process between Beach and GMTOAC was guided by GMTOAC. Beach took direction from GMTOAC on how it wished to be consulted and with whom Beach should consult. Beach has otherwise afforded a reasonable opportunity to GMTOAC to engage in consultation with Beach. Refer to sections 4.15 of the EP. 8. Beach considers this assertion does not have merit. Beach has closely considered its obligations for consultation with GMTOAC and Gunditjmara people under Regulation 25 and considers that it has discharged these obligations and that consultation with GMTOAC and Gunditjmara people for the purposes of Regulation 25 is complete. For further information, please see section 4.15, and in particular 4.15.3 of the EP. 9. This is not an objection or claim and requires no assessment of merit. Beach has reiterated its commitment to establishing a meaningful and ongoing working relationship with GMTOAC and the wider Gunditjmara community. Beach considers that it has met its consultation obligations and has provided sufficient information, including in relation to cumulative impacts. In any event, Beach reminded		

							GMTOAC and Gunditjmara native title holders of the opportunities available to engage with Beach within the remainder of the supplementary consultation period, and made a further offer to GMTOAC and Gunditjmara native title holders to meet with Beach within that period if they wish to discuss information provided to date or are concerned there may be potential risks or impacts to their functions, interests or activities that Beach is not already aware of. This opportunity was not taken up.		
E62825	02/12/2024	Email	Incoming		N/A	Requested further information GMTOAC's legal representative emailed Beach, and requested Beach provide its client with GIS data (or similar file types) for: - Beach's Otway Basin Petroleum title areas, project areas and operational areas , - Environments that might be affected by the above, including all biologically important areas for threatened and endangered species, - IPAs, Commonwealth and/or State marine parks, and any other regulated areas in relation to the above. GMTOAC's legal representative advised that its reason for asking is that GMTOAC plan to create a map incorporating all Otway Basin EPs so native title holders can visualise the extent of various projects affecting Gunditjmara Country and Sea Country. E62826	03/12/2024	Email	Outgoing	Other	N/A	N/A outgoing engagement Beach's response to RP's Consultation and Negotiation Protocol (E62822) and correspondence dated 15 November 2024 (E62824). Beach responded as follows: 1. Beach welcomed GMTOAC's desire to establish a meaningful working relationship with Beach, 2. Beach provided its comments on the GMTOAC Consultation and Negotiation Protocol, and stated that its consultation with GMTOAC to date has been largely consistent with the principles contained in that Protocol, and that Beach will have regard to the Protocol in developing consultation processes moving forward,	Objection or claim does not have merit Beach's response to RP's Consultation and Negotiation Protocol (E62822 and correspondence dated 15 November 2024 E62824). Beach responded as follows: 1. Beach welcomed GMTOAC's desire to establish a meaningful working relationship with Beach, 2. Beach provided its comments on the GMTOAC Consultation and Negotiation Protocol, and stated that its consultation with GMTOAC to date has been largely consistent with the principles contained in that Protocol, and that Beach will have regard to the Protocol in developing consultation processes moving forward 3. Beach agreed to meet with GTMOAC and Gunditjmara native title holders in	Beach has provided a written response addressing the claims made by RP in its correspondence dated 11 and 15 November 2024 (E62822 and E62824). Refer to sensitive records for a copy of the response letter. Beach has provided a further assessment of the claims in sections 4.15 of the EP.	

						3. Beach agreed to meet with GTMOAC and Gunditjmara native title holders in February 2025, as requested, to discuss the OGV project overview, further consultation on the Well Completions & Interventions EP, and other topics that RP wishes to raise with Beach. 4. Acknowledging the short notice, Beach offered to present at the meeting of Gundijtmara native title holders on 6 December, and reiterated Beach's previous offers to otherwise meet with GMTOAC and Gundijtmara native title holders 5. Beach provided a further update and request to consult in respect of the separate Well Completions & Interventions EP, 6. Beach responded to RP's request for funding for technical advice, and advised that Beach is prepared to discuss funding or other support that may assist RP in consulting with Beach, but is not in a position to fund such technical assessments at this time. Beach noted, from RP's letter, that it appears RP has already obtained technical advice in respect of Beach's activities. 7. Beach responded to RP's request to discuss agreement making, and advised that Beach considers that agreement making goes beyond the requirements of the OPGGS(E) Regulations and so Beach does not see the utility of does so at this time.	February 2025, as requested, to discuss the OGV project overview, further consultation on the Well Completions & Interventions EP, and other topics that RP wishes to raise with Beach. 4. For the avoidance of doubt, Beach noted that the purpose of this meeting would not be to consult further on the Drilling EP, and advised RP, as previously communicated, the consultation period for the Drilling EP will close on 9 December 2024. 5. Beach responded to RP's request for information, and noted that Beach has previously provided this information, and referred RP to sections of the Drilling EP provided previously in response to RP's queries. 6. Beach acknowledged the matters raised in RP's in relation to their views that consultation has not yet been lawfully carried out with RP. Beach advised RP that it considers its consultation on the Drilling EP has satisfied its obligations under the OPGGS(E) Regulations, and provided RP with a summary of consultation to date. 7. Acknowledging the short notice, Beach offered to present at the meeting of Gundijtmara native title holders on 6 December, and reiterated Beach's previous offers to otherwise meet with GMTOAC and Gundijtmara native title holders within the time remaining in the consultation period for the Drilling EP, up to 9 December. 7. Beach provided a further update and request to consult in respect of the separate Well Completions & Interventions EP. 8. Beach responded to RP's request for funding for technical advice, and advised that Beach is prepared to discuss funding or other support that may assist RP in consulting with Beach, but is not in a position to fund such technical assessments at this time. Beach noted, from RP's letter, that it appears RP has already obtained technical advice in respect of Beach's activities. 9. 							time. , , 10. Noting the close of the supplementary consultation period on 9 December 2024, Beach requested RP respond to the matters raised in section 3.3 of this correspondence by 5pm on Wednesday 4 December, and noted in the absence of such response Beach will proceed on the basis that RP does not intend to take up any further opportunity to for further consultation on the Drilling EP. ,

E62828	11/12/2024	Email	Incoming	N/A	N/A	Raised objection or claim RP referred to Beach's email and letter dated 3 December 2024, where in response to complaints made by the RP, Beach offered additional consultation prior to the end of the supplementary consultation period notwithstanding its views that consultation obligations had been met. RP responded to the offer for a meeting as follows: 1. RP considers it would not have been culturally appropriate to invite Beach to a meeting with short notice to GMTOAC and without notice to native title holders, and that agendas and notices are required to be sent to native title holders 3 weeks in advance, 2. RP advised sufficient time is required ahead of a meeting to prepare and consult in an appropriate manner according to traditional law and custom, 3. RP reiterated that they do not wish to be consulted via the methods made available by Beach. 4. RP asserted that they have a right to be consulted via specific and standalone consultation meetings convened via their own processes in accordance with the Consultation & Negotiation Plan, which are appropriate and adapted to their interests, 5. RP noted it considered Beach's 3 December 2024 letter at a native title holder meeting on 6 December and	Objection or claim does not have merit 1. Beach has proceeded on the basis that this assertion has merit, noting GMTOAC's role in facilitating culturally appropriate consultation. In any event, as expressed in Beach's letter, Beach's offer was made on the basis that it would be either accepted or not accepted by GMTOAC as appropriate, and did not mandate any course of action by GMTOAC. As stated in Beach's letter, Beach's offer to make representatives available to attend the 6 December 2024 meeting or to hold a meeting, was to provide additional opportunity for further consultation with GMTOAC and the Gunditjmara people. Beach has closely considered its obligations for consultation with GMTOAC and Gunditjmara people under Regulation 25 and considers that it has discharged these obligations and that consultation with GMTOAC and Gunditjmara people for the purposes of Regulation 25 is complete. 2. Beach refers to and repeats its response to #1 above. In any event, Beach has noted this information. 3. This is a personal view and does not require any assessment of merit. Beach has noted this view. The fact that the RP does not wish to make use of the opportunities provided by Beach does not negate the existence of those opportunities in the assessment of whether Beach has satisfied its obligations under s 25.	A copy of Beach's response to the RP is E62826. See also previous column which provides Beach's response to its consideration of each objection or claim.1	

						will be in touch with further instructions to progress consultation as soon as possible.	4. Beach does not consider that this assertion has merit. Provided that it satisfies the requirements of s 25 as expressed in Tipakalippa, Beach has decisional choice in how to consult with GMTOAC and Gunditjmara people. Beach is comfortable that its obligations to consult with GMTOAC and Gunditjmara people have been met, including that consultation has been appropriate and adapted to the RPs interests. While Beach has taken GMTOAC's views into account during consultation, s 25 does not require Beach to consult in a manner that is dictated by a relevant person, or in a manner that complies with the Native Title Act 1993 (Cth). 5. This is not an objection or claim and requires no assessment of merit. Any further response from EJA regarding Beach's approach to consultation will be considered in relation to Beach's future consultation with GMTOAC and Gunditjmara people.		
E62829	13/12/2024	Email	Outgoing	Other	N/A	Requested further information Outgoing engagement in response to incoming engagement E62825 Beach responded to RPs email dated 2 December 2024, in which RP requested certain data from Beach., Beach advised RP that: - Beach notes that it has previously provided the information RP requests, including maps, operational areas, planning areas and overlays of environment receptors, Maps of Beachs petroleum titles, operational areas, planning areas and EMBAs have been available on Beachs consultation hub, Engage Beach. Other data requested by the RP is publicly available and managed by regulatory and government authorities, such as marine datasets and petroleum title areas. - The requested information must be interpreted correct and in the proper context, and is otherwise at risk of being applied incorrectly, misinterpreted, and misunderstood. Beach requests EJA convey to the RP the relevant context to the data, including that not all activities carried out in the Otway Basin occur simultaneously or continuously (and	N/A no response received	N/A no response received	

						in fact many will occur sequentially), and that RP must take care not to solely consider the impacts of those activities on a purely compounded or aggregated basis (which would be misleading). Beach also advised that the nature of risks that may affect the environment are in many cases both temporary and variable. A map overlaying all Otway Basin Eps has the potential to create an inaccurate and misleading overview of the impact of activities and risks in the Otway Basin, unless the correct context is properly understood and applied. Notwithstanding Beach's concerns about the use of the data, Beach is prepared to provide the information requested in your email on the expectation it will be used appropriately and not misrepresented by your client., Beach advised that it will take into consideration further dealings with RP as part of Beachs ongoing engagement as part of its implementation strategy for the Drilling EP, as required by regulation 22(15) of the OPGGS(E) Regulations.

Reminded RP that Beach commenced consultation for the Well completions and Interventions EP on the 16th September 2024. Advised RP that submission timeframes (Febraury 16th 2025) inttersects with GMTOAC's proposed full group meeting, Beach would be available to consult on the Well compeltions and Interventions EP at that meeting, and requested EJA confirm final date for the meeting and Beachs proposal to present at the meeting will be accommodated. Beach summarised the consultation undertaken to date for Well completions and Interventions, including: - Providing links to online consultation hub, which inlcudes maps, diagrams and risk and impact tables,	N/A no response received	N/A no response received

E62645	24/12/2024	Email	Incoming	Other	N/A	Requested consultation RP advised that: 1. In RP's view it maintains that consultation has not occurred in accordance with the regulations. RP advised that it is not helpful to further ventilate the issue, which can be discuss at further meetings. 2. RP provided Beach with the relevant context for a Native Title meeting including costs, time required to provide materials, material expectation (i.e different forms, in plain english). RP Advised that materials need to be provided atleast 28 days prior to meeting. RP advied that their client GMTOAC is experiencing a number of propnents seeking consultation and their client have limited capacity to respond to each company, RP advised Beach they are no longer in a position to meet with Beach in Feb 2025, as they are now meeting with other propoenents. RP tentatively proposed an alternative date to meet, mid March and will confrim in Jan 2025, RP advised that they will provide a cost estimate in for the porposed meeting as soon as possible.	Objection or claim does not have merit 1. Beach does not consider that this assertion has merit. Provided that it satisfies the requirements of s 25 as expressed in Tipakalippa, Beach has decisional choice in how to consult with GMTOAC and Gunditjmara people, and Beach is comfortable that its obligations to consult with GMTOAC and Gunditjmara people have been met, including that consultation has been appropriate and adapted to the RPs interests. While Beach has taken GMTOAC's views into account during consultation, s 25 does not require Beach to consult in a manner that is dictated by a relevant person, or in a manner that complies with the Native Title Act 1993 (Cth). 2. Beach has noted this view and made arrangements to meet with the RP in mid-March 2025, as requested. RP later confirmed that it was no longer available for that meeting. The fact that the RP does not wish to make use of the opportunities provided by Beach does not negate the existence of those opportunities in the assessment of whether Beach has satisfied its obligations under s 25. E62732	28/01/2025	Email	Outgoing	Other	Project update - general	N/A outgoing engagement Beach responded to engagement ID E62645. Beach conveyed its disappointment that RP is unable to meet with Beach in February 2025. Beach advised that it was now now possible to meet in-person with the RP during the consultation period prior to closure on 14 February 2025. However, Beach advised that it was prepared to make special arrangements to meet with RP as suggested by the RP in March 2025 for the purpose of consultation in respect of the Well Completions EP. Beach noted that RP's proposed consultation process (which is akin to native title authorisation meetings) is not appropriate in the context of consultation in the preparation of an Environment Plan. Beach advised that, should a meeting in March 2025, the RP let Beach know so that Beach can make alternative arrangements to consult with RP in the time available. Beach advised RP of two further dedicated First Nations webinars, and two open community information webinars to be held between 5 and 7 February 2025. Beach encouraged RP to attend. Beach confirmed that it has sought to meet with RP over the course of the 5-month consultation period for the purpose of consultation in the manner preferred by RP. Beach advised that it is in the final stages of preparation of the EP but that Beach remains available to meet with RP for the purpose of ongoing engagement on the progress of Beach's activities. Beach also confirmed it remained committed to building a meaningful working relationship with RP. Given that an in-person meeting is no longer possible, Beach provided a variety of project information (including risk assessments, cumulative impact assessments and summaries of first nations values and sensitivities) in response to RP's lawyers' anticipation of instructions to request such information on 15 November 2024. E54507	19/11/2024	Phone	Incoming	N/A	N/A	Raised objection or claim Advised their only concern was the potential for loss of fishing gear due to drill rig and supply vessel routes.	Objection or claim has merit Concerns about the risk of lost fishing gear has merit.	Beach has successfully managed setting and communicating vessel routes in its last drilling campaign and will put this measure in place for the Completions EP.	Existing measures in EP address potential impacts Updated CM03: Consultation for Implementation of EP to address potential impacts, with existing control measure modified to include communication of supply vessel navigation corridors.

E54696	20/11/2024	Phone	Outgoing	N/A	N/A	Beach called RP to advise they have written to SA Marine Scalefish licence holders regarding consultation on Drilling and P&A EP and Well Completions EP. RP advised they have no concerns provided that Beach had a compensation policy in the event of a release of hydrocarbons that affected SA marine scalefish.	Relevant matter	Beach has a compensation procedure that would apply to commercial fishers in the event of a direct impact from Beach's offshore activities.	Existing measures in EP address potential impacts CM04: Beach Fair Ocean Access Procedure
