The Tukujana pa Karajarri Kura Jurrar IPA has been announced under the Sea Country IPA Program, extending from the existing Karajarri IPA into the sea off the south-west Kimberley coast (DCCEEW, 2023b). The area includes a network of coastal habitats, such as intertidal and subtidal reefs, mangrove systems, lagoons and tidal creeks, and connects the Ramsar sites of Roebuck Bay and Eighty-mile Beach (DCCEEW, 2023b).

12.1.5.3 Yawuru IPA

The Yawuru IPA was dedicated by Yawuru people in 2017, covering 2109 km² of Yawuru coastal and inland country (YRNTBC, 2014). The Yawuru people are the Native Title holders of their land and sea–-their ancestors have lived along the foreshores of Roebuck Bay, across the Pindan Plains and inland along the fringes of the Great Sandy Desert for thousands of years (NIAA, n.d.-a).

The Yawuru IPA is managed under the Walyjalajala nagulagabu birrangun buru Plan of Management for 2017-2026 (YRNTBC, 2014). The plan includes eight targets for management, being:

- Yawuru cultural knowledge and practice
- Yawuru significant areas
- Yawuru rights and responsibilities
- Niyamarri – sand dunes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Bilarra – wetlands
- Birra – bush and pindan country
- Nagulagun – saltwater country (deep water and intertidal)
- seasonal resources and biodiversity.

Cultural values include Yawuru named sites, tracks and areas, historical sites associated with pearling and pastoral industries, archaeological sites and traditional bush/sea resources. Ecological values include reefs and seagrass beds that provide habitat for dugongs (*Dugong dugon*) and EPBC Act-listed threatened sea turtle species including hawksbill turtle (*Eretmochelys imbricata*), loggerhead turtle (*Caretta caretta*), green turtle (*Chelonia mydas*) and flatback turtle (*Nataden depressus*). Roebuck Bay is a Ramsar site and has a known population of snubfin dolphins (*Orcaella heinsohni*) (Figure 7-6). Other ecological values include pearl shell beds for pearl oysters and habitat for a range of EPBC Act listed threatened species (YRNTBC, 2014).

12.1.5.4 Bardi Jawi IPA

Bardi Jawi IPA is located 160 km north of Broome and covers 1269.9 km² of land and sea country (NIAA, n.d.-b). The main communities on Bardi country are Djarindjin, Lombadina and Ardyaloon (One Arm Point). Bardi people live on the mainland of the Dampier Peninsula and islands immediately offshore from Ardyaloon. Jawi people call the islands further east, including Iwany (Sunday Island), their traditional country. Today people live in outstations spread along the mainland Peninsula coastline (KLC/BJNAC RNTBC, 2013).

During the IPA consultation process, The Bardi Jawi rangers guided meetings with individual family groups to identify what they considered important to look after. An IPA steering committee was formed, who contributed cultural knowledge to the Bardi Jawi Indigenous Protected Area Management Plan (2013–2023). They were assisted by The Nature Conservancy in Conservation Action Planning (CAP). This plan highlights targets to be protected on country:

- marnany (fringing reefs)
- aarli (fish)
- odorr (dugong) and goorlil (turtle)
- significant sites, language, law and culture
- traditional oola (water) places
- indigenous plant resources (KLC/ BJNAC RNTBC, 2013).

Jardagarr (coastal country) is classed under IUCN Category 4, and Niimidiman (inland country) is classed under Category 6. Niimidiman harbours many plant and animal species of high cultural value. For example, Irrgil trees are used for making boomerangs and Marrga, Joolgirr and Bilimangard trees are used for making shields. Some Niimidiman areas feature traditional Oola (water) places and stories attached to these places are culturally important. Ecological values of the Jardagarr (coastal) country includes many species of native garrabal (birds), including eastern curlews and fork-tailed swifts (KLC/ BJNAC RNTBC, 2013).

12.1.5.5 Dambimangari IPA

Dambimangari IPA is located between Broome and Darwin, stretching east to the Prince Regent area. It covers 6,422.94 km² of landscape, including open grasslands, eucalyptus woodlands, intertidal flats and rocky reefs and shoals (NIAA, n.d.-c). Dambimangari is the traditional home of the Worrarra people. Dambimangari peoples' identity is interwoven with the sea and its reefs and islands. Reefs are important hunting grounds for jaya (saltwater fish) and warliny (dugong).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The targets for protection are identified in the Dambimangari Healthy Country Plan 2012–2022 as:

- cultural sites
- reefs, beaches and islands
- saltwater fish
- turtle and dugong
- whales and dolphins
- rivers, waterholes, waterfalls and wetlands (freshwater systems)
- culturally important native animals
- bush fruits and medicine plants
- right-way fire (DAC, 2012).

Jurluwarra (saltwater-turtle) and warliny (dugong) are culturally important to Dambimangari people as a food source. Cultural sites include rock art sites, stone arrangements, burial sites and important camping beaches that were used for resting when travelling through saltwater country (DAC, 2012).

12.1.5.6 Uunguu IPA

Stage one of the Uunguu IPA was declared on May 23, 2011, coinciding with the Native Title Determination and release of the Healthy Country Plan. The IPA covers 7,598.06 km². It has been home to the Wunambal Gaambera people for many thousands of years and is part of the Wanjina Wunggurr culture. Wunambal Gaambera people call their country Uunguu – 'our living home'. Two of the reserves extend to the low water mark at Bougainville Peninsula, Vansittart Bay, Anjo Peninsula, Napier Broome Bay and islands in Rothsay Water (WGAC, 2017). A Saltwater IPA Plan of Management was created in 2017 as a sub-plan for the Wunambal Gaambera Healthy Country Plan (WGAC, 2017)[21].

Ten targets identified in the Wunambal Gaambera Healthy Country Plan are:

- Wanjina Wunggurr Law – our culture,
- right way fire,
- aamba (kangaroos and wallabies) and other meat foods,
- Wulo (rainforest),
- Yawal (waterholes),
- bush plants,
- rock art,
- cultural places on islands,
- fish and other seafoods,
- mangguru (marine turtles) and balguja (dugong) (WGAC, 2010).

The Uunguu Rangers look after land and sea country through pest control, visitor management, cultural heritage conservation, monitoring flora and fauna and fire management (NIAA, n.d.-c).

[21] Marine areas were proposed to be added to the Uunguu IPA as an International Union for Conservation of Nature (IUCN) Category VI (Managed Resource) Protected Area, early in 2018.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

12.1.5.7 Balanggarra IPA

The Balanggarra IPA was dedicated on August 7, 2013. The IPA spans over one million hectares of land and sea country in the Kimberley region and has been home to the Balanggarra people for thousands of years. The five big rivers of the north Kimberley intersect on Balanggarra country. These rivers include the King River, Forest River, Pentecost River, Durack River and Ord River. The region also borders the Cambridge Gulf and Timor Sea. Three species of vulnerable sawfish are found in the waters of this region (Kimberley Land Council, n.d).

Nine targets identified in the Balanggarra Healthy Country Plan 2012–2022 are:

- Balanggarra law and culture
- our gra or country (land, sea, rivers, islands)
- cultural sites (rock art sites, burial sites, heritage places)
- native animals
- accessible bush tucker / medicine plants
- right way fire
- freshwater (places and freshwater fish)
- saltwater fish and seafood
- migratory saltwater species (turtle, dugong, whales, dolphins).

The Balanggarra Rangers manage 1000 km of river and sea frontage on their country to manage and protect and enhance the unique biodiversity values of their country (Balanggarra Aboriginal Corporation, 2011).

12.1.5.8 Wilinggin IPA

The Wilinggin IPA spans over 2.4 million hectares of remote country in the central north Kimberley region and was declared in 2013. It included basalt ranges and sandstone cliffs which rise 250 m high. The area has wooded grasslands, pockets of rainforest, extensive mangrove systems, tidal mudflats, rivers, creeks and billabongs. The Ngarinyin people are the traditional owners of this area and have lived on Wilinggin country for thousands of years (NIAA, n.d-d). Wilinggin Country is mostly landlocked, apart from two small saltwater areas which include Walcott Inlet and Prince Frederick Harbour.

Seven targets identified in the Wilinggin Healthy Country Plan 2023–2032 are:

- becoming strong on country
- food and medicine plants
- bushfire
- law and culture sites
- law and culture
- freshwater places
- wildlife and bush meats.

The Wunggurr Rangers are caretakers of the unique natural and cultural values of Wilinggin country (Wilinggin Aboriginal Corporation, 2022).

12.1.6 First Nations Cultural Heritage

Woodside understands that communal cultural connection exists between Traditional Custodians and land and waters. It is understood from the onshore archaeological record that First Nations people have occupied the Australian continent for at least 65,000 years (Clarkson et al., 2017) and in many places maintain a strong continuing connection that is said to extend back in Indigenous cosmology to the beginning of time.

Archaeological sites identified onshore with the potential to exist in intertidal or submerged locations include petroglyphs, fish traps and artefact scatters or burials contained within sand dunes. As archaeological sites, these features have archaeological value which relates to the preservation of their fabric (i.e. the tangible features) and their context (i.e. their location and relationship to other archaeological and natural features). Archaeological sites may also have intangible dimensions (ICOMOS, 2013) cultural value that exist in addition to their archaeological or scientific value.

Intangible values are a living expression of cultural heritage that is prevalent across generations. These values can be traditional, and they can also be new and living at the same time. An understanding of the intangible cultural heritage of different First Nations communities helps with intercultural dialogue and encourages mutual respect (UNESCO, 2011). Intangible cultural heritage is safeguarded through practicing and passing on knowledge or expressions by the people to whom it belongs to (NNTC, n.d). Figure 12-5 provides context to common intangible themes that exist in First Nations communities.

Table 12-2: Intangible heritage values associated with Sea Country

Value	Details
Songlines	Oral songlines are often described by First Nations people as the law of the land and make up part of the Dreaming (Neale and Kelly, 2020:30). Songlines are viewed in Western academia as a framework for relating people to land and consist of a series of invisible, interconnected routes across the landscape that mark significant sites for First Nations people (Higgins, 2021:723). Songlines demonstrate First Nations peoples' strong connections to land by revealing sacred knowledge that is place-specific (Roberts, 2023:5). The land's physical features are instrumental in maintaining songlines because this is how ancestral spirits journeyed through, and interacted with, the physical landscape leaving sacred knowledge behind. The interconnection between the physical and spiritual is where songlines become intrinsically tied to significant places across Country. As a result, geographical landforms are recorded within songlines and become sacred places. Such landforms can include inter alia: rocks, mountains, rivers, caves and hills (Higgins, 2021:724). Songlines can become lost, fragmented or broken when there is a loss of Country or forced removal from Country (Neale and Kelly, 2020:30). Physical sites that have been identified as comprising a component of a songline are important to protect to prevent the fragmenting or breaking apart of songlines and loss of sacred cultural knowledge. In Australia, songlines can stretch thousands of kilometres, making up a complex and organic network of stories containing cultural knowledge of First Nations communities across the land (Neale and Kelly, 2020:35). Songlines can also extend out to Sea Country and contain cultural knowledge that is tied to geographic features, atmospheric phenomena and marine plants and animals. Often songlines containing references to a seascape or Sea Country make mention of mythical events occurring around marine life, fishing areas, submerged rocks or coral. Songlines that embody seascapes can reflect how a group may relate to, or value, Sea Country—for example, connections to nearby islands that they once inhabited in their songlines (Smyth and Isherwood, 2016:307). Songlines can also be used as proof of long-standing connection to land and support a legal entitlement to land rights (Higgins, 2021:74). Examples where songlines contain strong references to Sea Country are more common in Pacific Islander and Torres Strait Islander communities, who often refer to seascapes and skylines in their songlines in order to communicate sacred knowledge that assists in safe navigation of the ocean (Neale and Kelly, 2020:83-84).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Value	Details
Creation/dreaming sites, sacred sites and ancestral beings	The only published sources located by Woodside with detailed descriptions of the location of ancestral beings or creation/dreaming/sacred sites place these on land, or within inland water sources such as rivers or pools. However, some ancestral beings are noted to live within or originate from the sea generally, and some creation stories talk to the creation of features from or in the sea. Additionally, every place on shore or at sea must be assumed to have been created on some level in First Nations cosmology.
Cultural obligations to care for Country	Caring for Country collectively refers to the cultural obligations of individuals and groups, as well as rituals and ceremonies required for the physical and spiritual health of the environment. In the literature reviewed by Woodside, caring for Country was noted to include, but is not limited to, maintenance of the physical environment and ecosystem. It may also have cultural, spiritual and ritual dimensions such as caring for ancestral beings or ensuring cultural safety. Thalu are places where what are known as “increase ceremonies” are performed to enhance or maintain populations of plants, animals or phenomena. All mentions of active ceremonial sites were confined to onshore locations, though the values may extend offshore where e.g., a thalu relates to marine species populations.
Knowledge of Country/customary law and transfer of knowledge	Knowledge of and familiarity with the features of Sea Country is itself a value. The inherent potential for restricted or secret knowledge makes this difficult to assess even through consultation with Traditional Custodians. However, aspects such as limitations on access to sites or disruption/relocation of First Nations communities may have implications for the preservation of First Nations knowledge. Further, connection to Country may be damaged where people are displaced or disrupted (e.g. during colonisation) or where there is a loss of technical skills or environmental knowledge (McDonald and Phillips, 2021). Transfer of knowledge includes continuing traditional practices to pass on practical skills. This transfer of knowledge may be integral to managing a group’s intangible cultural heritage (UNESCO, 2003).
Connection to Country	Describes the multi-faceted relationship between First Nations people and the landscape, which is envisioned as having personhood and spirit. It is also an aspect of personal identity for many First Nations people. In the case of Sea Country this can mean identifying as a Saltwater person, where “essence of being a 'Saltwater' person is ontological… it is about how people relate spiritually to the sea and engage with spiritual forces that created it, the marine flora and fauna and people” (McDonald and Phillips, 2021).
Access to Country, including Sea Country	Access is necessary for the continuation of other values including caring for Country, carrying out cultural practices and the transfer of traditional knowledge. Being on Country can be an important way of expressing or maintaining connection to Country (Australian Indigenous HealthInfoNet, n.d.). Access is also a value in its own right, as a continuation of traditional Sea Country access and use.
Kinship systems and totemic species	Individuals may have kinship to specific species (Smyth, 2008; Juluwarlu, 2004) and/or a responsibility to care for species (Muller, 2008). Kinship arises from totemic associations within First Nations “skin group” systems. It is forbidden for an individual to kill or eat a species who is from the same “skin group” (Juluwarlu, 2004). They may also have certain obligations linked to the discussion of caring for Country above. It is assumed that marine species may have kinship/totemic relationships to Traditional Custodians, but it is understood that these relationships do not prohibit people outside of that “skin group” from hunting or eating that same species (Juluwarlu, 2004).
Resource collection	A number of marine species are identified through consultation and literature as important resources, particularly as food sources (see Section 12.1.4). In addition to their immediate value as sustenance, the gathering and preparation of these resources is informed by cultural knowledge, and an inability to use these resources may result in a loss of ability to transfer that knowledge to future generations.

On 15 November 2023, the *Aboriginal Heritage Act 1972* (WA) was restored as the legislation that manages Aboriginal heritage in Western Australia (DPLH, 2024). Under section 17 of that Act it is an offence to excavate, destroy, damage, conceal or alter any Aboriginal site without authorisation. Where there is a risk of injury or desecration to a significant Aboriginal area, even where permitted under the AHA, any Aboriginal person may apply to the federal Environment Minister for a declaration under sections 9 or 10 of the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984 (Cth)* for the protection and preservation of that area.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

12.1.6.1 Submerged Cultural Heritage

It is understood that the sea level has risen significantly during the 65,000 years of Indigenous occupation, and areas that were once inhabited are now submerged on the continental shelf (Veth et al., 2019; UWA, 2021). At its lowest level during Indigenous occupation, the sea level was between 125 m (O'Leary et al., 2020; Veth et al., 2019; Williams et al., 2018) and 130 m below current levels (Benjamin et al., 2020; Benjamin et al., 2023; UWA, 2021).

Archaeological material preserved on the Ancient Landscape has the potential to provide further information about the earliest periods of human occupation (Veth et al., 2019; UWA, 2021).

Recent archaeological discoveries demonstrate that the now submerged landscape was occupied and inhabited, and can retain archaeological material from this time (Benjamin et al., 2020; Benjamin et al., 2023; see Ward et al., 2022 for an opposing view).

Certain landscapes have been identified as archaeologically prospective on the submerged Ancient Landscape, including:

- submerged water sources (rivers, waterholes, tidal channels and seeps) which have an increased likelihood of use or habitation as past generations used the associated resources (UWA, 2021)
- submerged calcarenite ridges younger than human occupation of the continent which may have formed over and protected artefacts in-situ (Veth, 2019)
- prominent landscape features (e.g. hills, particularly of igneous rock formations) that may have been foci for cultural activity (UWA, 2021)
- karst depressions and other "catch points" where artefacts may accumulate following disturbances caused by inundation (UWA, 2021; Nutley, 2022; Nutley, 2023a)
- Madeleine Shoals has been specifically identified by Murujuga Aboriginal Corporation (MAC) as an archaeologically prospective feature due to its igneous rock formations which have the potential to contain petroglyphs.

The sites considered most likely to survive inundation, based on the review of existing literature, were logically the more robust forms including:

- midden and artefacts within cemented dunes, relict water holes, and beach rock deposits
- quarry outcrops, extraction pits, and associated reduction debris in fine-grained volcanic outcrops
- curvilinear stone structures and standing stones sitting on volcanic pavements and jammed into volcanic rock piles
- lag deposits of artefacts and possibly midden on hardpan in suitable landscape contexts with good preservation conditions (e.g. shallow declination shorelines in sheltered passages of the inner archipelago or on the leeward side of hard-rock/fringing reef cause-ways adjacent to the outer islands)
- small overhangs and shelters with preserved deposits, facing away from the dominant wave and wind action (Veth et al., 2019).

In recognition of this, Woodside considers the Ancient Landscape between the mainland and the ancient coastline KEF as an area where potential First Nations archaeological material may exist on the seabed, as this covers the full extent of this possible occupation. Known places including archaeological sites may be protected subject to declarations under the *Aboriginal and Torres Strait Islander Heritage Protection Act 1984*, *Underwater Cultural Heritage Act 2018* or EPBC Act. However, these Acts only extend protection to First Nations heritage places specified by declaration or otherwise included on a statutory list. Woodside understands that there is currently no First

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Nations archaeology known to exist anywhere within Commonwealth waters and no areas subject to declarations or prescriptions under these Acts.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

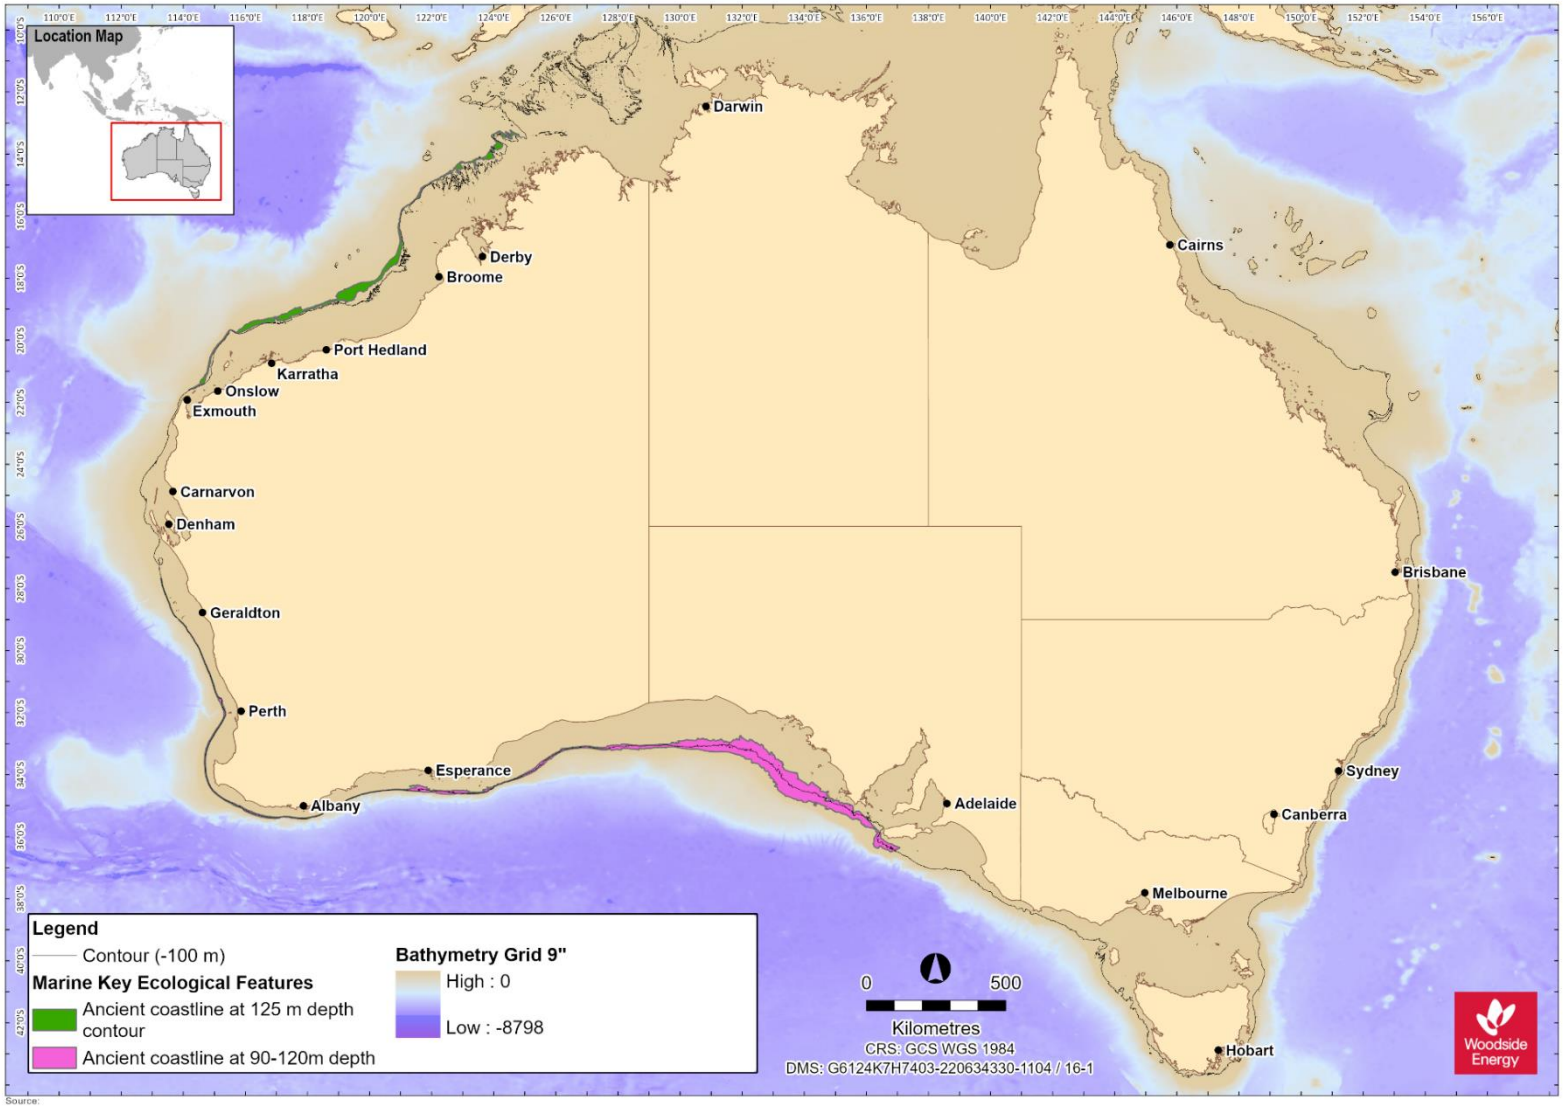

Figure 12-5: Indicative bathymetry of the ancient submerged landscape (data source: GA, 2024; DCCEEW, 2024d

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

12.1.6.2 First Nations Sites of Significance

Murujuga (the Burrup Peninsula) has a very high density of significant Indigenous heritage sites and places with tangible and intangible heritage values. The area has one of the largest, densest, and most diverse collections of rock art in the world. It is estimated that the peninsula and surrounding islands contain over a million petroglyphs (rock engravings) covering a broad range of styles and subjects. The landscape also contains quarries, middens, fish traps, rock shelters, ceremonial sites, artefact scatters, grinding patches and stone arrangements that evidence tens of thousands of years of human occupation. These places are linked to First Nations cosmology, Dreaming stories and songs through the stories, knowledge and customs that are still held by Traditional Custodians.

In 2007 the Dampier Archipelago (including the Burrup Peninsula) was included on the National Heritage List due to outstanding heritage values relating to Australia's cultural history contained in the large number, density, diversity, distribution and fine execution of rock art. Within the National Heritage Place, the Murujuga National Park covers 4913 ha and is co-managed by the Murujuga Aboriginal Corporation and the Department of Biodiversity, Conservation and Attractions. The Murujuga Cultural Landscape was also added to Australia's Tentative World Heritage List in 2020, with full World Heritage Listing anticipated in 2024.

The Department of Planning, Lands and Heritage maintains a register of registered sites and heritage places. There are over 1600 registered sites on Murujuga and the Dampier Archipelago with around 1100 other heritage places. This register is not comprehensive and will be complemented by heritage surveys where necessary. Protection of National and World Heritage values is also legislated through various provisions of the EPBC Act. Murujuga National Park is managed under the *Conservation and Land Management Act 1984* (WA).

12.1.7 Historic Sites of Significance

Places of historic cultural significance are protected under Commonwealth, State and local regimes. Places inscribed on the National or World Heritage list are protected through various provisions of the EPBC Act. Historic places may also be protected under the *Heritage Act 2018* (WA); under section 129 of this Act the prohibited alteration, demolition, damage, despoilment or removal of objects from a registered place may result in a fine of A$1 million. Protection of heritage by local government typically emanates from local planning schemes produced under Part 5 of the *Planning and Development Act 2005* (WA).

Historical sites of significance and heritage value are found along adjacent foreshores of the SWMR, NWMR and NWR.

12.1.8 Historic Underwater Heritage

The remains of vessels and aircraft in Commonwealth waters, along with any associated article, are automatically protected under the *Underwater Cultural Heritage Act 2018* (Cth) after 75 years. This is applicable whether the existence or location of the article is known or unknown, as per section 16 of the Act. Other articles of underwater cultural heritage may be declared for protection as outlined in section 17 of the Act. Remains and relics of any ship lost, wrecked or abandoned in Western Australian waters before 1900 are protected by the *Maritime Archaeology Act 1973* (WA).

There are no known National Heritage listed shipwrecks in the NWMR and NMR (Table 12-3 and Table 12-4). The only known National heritage listed shipwrecks are within the SWMR and include:

- the *HMAS Sydney II*
- the *HSK Kormoran*
- the *Batavia*.

Information on National Heritage listed shipwrecks in the SWMR can be found in Table 12-5.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Known historical shipwreck sites in Western Australian waters are listed in the WA Maritime Museum Shipwreck Database. Known historical shipwreck sites in Commonwealth waters are listed in Australasian Underwater Cultural Heritage Database. These databases only cover known historical sites. Known shipwrecks listed in these databases for the NWMR, NMR and SWMR are shown in Figure 12-6, Figure 12-7 and Figure 12-8 respectively.

12.1.9 World, National and Commonwealth Listed Heritage Places

The EPBC Act protects the heritage values of National Heritage Listed and World Heritage Listed places. Any action that will have or is likely to have a significant impact on the heritage values of these places are offences under Part 3, Division 1 of the EPBC Act unless the action is permitted under one of the mechanisms of the EPBC Act. These mechanisms include a number of exceptions set out in Part 4, approvals granted under Part 9 and ministerial decisions under Division 2 Part 7.

Australia's National Heritage Sites are those of outstanding natural, historic and/or Indigenous significance to Australia. Indigenous Protected Areas and National Heritage places classed as natural are discussed in Section 11.3. Historic and/or Indigenous National Heritage Listed Places of the NWMR and SWMR include:

- Dampier Archipelago (including Burrup Peninsula)
- Dirk Hartog Landing Site/Cape Inscription
- *HMAS Sydney II*, *HSK Kormoran* Shipwreck Sites
- *Batavia* Shipwreck Site and Survivor Camps Area 1629 – Houtman Abrolhos
- Cheetup Rock Shelter.

Commonwealth Heritage Places are a collection of sites recognised for their Indigenous, historical and/or natural values, which are owned or controlled by the Australian Government. A number of these sites are owned or controlled by the Department of Defence, as well as Government agencies relating to maritime safety, customs and communication. Commonwealth Heritage places classed as natural are discussed in Section 11.3. Listed Heritage Places in the NWMR are all natural with two related to defence activities which include:

- Yampi Defence Area (Table 11-6)
- Learmonth Air Weapons Range Facility (Table 11-6).

World Heritage Properties are those sites that hold universal value which transcends any value that may be held by any one nation. These sites and their qualities are detailed in the Convention concerning the Protection of the World Cultural and Natural Heritage (the World Heritage Convention), to which Australia is a founding member. The Protected Matters Search Report (Appendix A) lists two natural World Heritage Properties in the NWMR (refer Section 11.2). There are no cultural heritage listings located within the NWMR.

Summary tables of heritage places for NWMR, SWMR and NMR are presented in Table 12-3, Table 12-4, and Table 12-5.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Table 12-3: Heritage Places (Indigenous and historic) within the NWMR

Heritage Places	Woodside Activity Area			Class	Description	Conservation Values
	Browse	NWS/S	NW Cape			
National Heritage Properties						
Dampier Archipelago (including Burrup Peninsula)	-	✓	-	Indigenous	The Dampier Archipelago (including the Burrup Peninsula) contains one of the densest concentrations of rock engravings in Australia with some sites containing thousands or tens of thousands of images.	The rock engravings comprise images of avian, marine and terrestrial fauna, schematised human figures, figures with mixed human and animal characteristics and geometric designs. At a national level it has an exceptionally diverse and dynamic range of schematised human figures some of which are arranged in complex scenes. The fine execution and dynamic nature of the engravings, particularly some of the composite panels, exhibit a degree of creativity that is unusual in Australian rock engravings.
Dirk Hartog Landing Site 1616 – Cape Inscription Area	-	-	✓	Historic	Cape Inscription is the site of the oldest known landings of Europeans on the WA coastline.	The Cape Inscription area displays uncommon aspects of Australia's cultural history because of the cumulative effect its association with these explorers and surveyors had on growing knowledge of the great southern continent in Europe. The association of the site with these early navigators stimulated the development of the European view of the great southern continent at a time when they began to look at the world with a modern scientific outlook.
Commonwealth Heritage Properties						
None

Commonwealth Heritage Properties			
None			

Table 12-5: Heritage Places (Indigenous and historic) within the SWMR

Heritage Places	Class	Description	Conservation Values
National Heritage Properties			
Cheetup Rock Shelter	Indigenous	Cheetup, meaning "place of the birds", is the name of a spacious rock shelter located in Cape Le Grand National Park, about 55 km east of Esperance in WA. First Nations people associated with the place identify themselves as Nyungar/Noongar, Ngadju (shortened from Ngadjunmaia) or Mirning.	Cheetup rock shelter provides outstanding evidence for the antiquity of processing and use of cycad seeds by First Nations people. The seeds of the cycad are extremely toxic and can cause speedy death if eaten fresh without proper preparation to remove the toxins. The presence of *Macrozamia riedlei* seeds in a pit lined with Xanthorrhoea (grass tree) leaf bases indicates that First Nations people in the Esperance region had the knowledge to remove the toxins of this important source of carbohydrate and protein at least 13,200 years ago.
Batavia Shipwreck Site and Survivor Camps Area 1629 – Houtman Abrolhos	Historic	The Batavia and its associated sites hold an important place in the discovery and delineation of the WA coastline. The wreck of the Batavia, and other Dutch ships like her, convinced the VOC (Dutch East India Company) of the necessity of more accurate charts of the coastline and resulted in the commissioning of Vlamingh's 1696 voyage.	Because of its relatively undisturbed nature the archaeological investigation of the wreck itself has revealed a range of objects of considerable value as well as to artefact specialists and historians.

Heritage Places	Class	Description	Conservation Values
HMAS Sydney II and HSK Kormoran Shipwreck Sites	Historic	The naval battle fought between the Australian warship HMAS Sydney II and the German commerce raider HSK Kormoran off the WA coast during World War II was a defining event in Australia's cultural history. HMAS Sydney II was Australia's most famous warship of the time and this battle has forever linked the stories of these warships to each other. The loss of HMAS Sydney II along with its entire crew of 645 following the battle with HSK Kormoran, remains as Australia's worst naval disaster.	The shipwreck sites of HMAS Sydney II and HSK Kormoran have outstanding heritage value to the nation because of their importance in a defining event in Australia's cultural history and for their part in development of the process of the defence of Australia.
Commonwealth Heritage Properties			
Cliff Point Historic Sites	Historic	Cliff Head is a limestone bluff on the east coast of Garden Island. Evidence of occupation has been reported from the beach just north of the head, the immediate hinterland, the ridge above and on the south face of the ridge.	The Cliff Point Historic Site, individually significant within the area of Garden Island, is important as the first site inhabited by Governor Stirling's party in 1829 when founding the colony of WA, and as WA's first official non-convict settlement. The site was occupied in the first instance by Captain Charles Fremantle before the arrival of Captain Stirling. The party occupied the site for two months before a move was made to the Swan River settlement on the mainland.
HMAS Sydney II and HSK Kormoran Shipwreck Sites	Historic	As above.	As above.
J Gun Battery	Historic	J Battery comprised two 155 mm long range guns, the other similar battery being at Cape Peron on the mainland at the entrance to Cockburn Sound. Located in the dune systems at the north-western corner of Garden Island, elements of the J Battery complex are now covered in part by sand.	J Gun Battery (1942) is individually significant within the area of Garden Island (Register No. 019544) and is historically important as the first gun battery constructed on Garden Island and as one of two long range gun batteries which played a strategic role in the coastal defences of Cockburn Sound and Fremantle following the entry of Japan into the Second World War (1939–45).

12.2 Socio-Economic Values

Socio-economic values include commercial and traditional fishing, tourism and recreation, shipping, oil and gas activities and defense activities.

12.2.1 Commercial Fisheries – Commonwealth and State

The Australian Fisheries Management Authority (AFMA) manages fisheries on behalf of the Commonwealth Government and is bound by objectives under the *Fisheries Management Act 1991* (Cth).

WA State commercial fisheries are managed by the WA Department of Primary Industries and Regional Development (WA DPIRD) under the *Fish Resources Management Act 1994* (WA), *Fisheries Resources Management Regulations 1995* (WA), relevant gazetted notices and licence conditions, and applicable Fishery Management Plans.

Commonwealth and State managed fisheries that are licensed to operate within the NWMR are summarised in Table 12-6.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Table 12-6: Commonwealth and State managed fisheries

Fishery	Woodside Activity Area			Description			
	Browse	NWS/S	NWC				
Commonwealth Managed Fisheries							
Southern Bluefin Tuna Fishery	✓	✓	✓	**Management area:**	The Southern Bluefin Tuna Fishery covers the entire EEZ around Australia, out to 200 NM from the coast. They do not fish in the Woodside activity area.		
				Species targeted	**Fishing methods**	**Fishing depth**	
				Southern bluefin tuna (*Thunnus maccoyii*)	Longline, purse seine fishing, and minor line (troll and poling).	Southern bluefin tuna is a pelagic species which can be found to depths of 500 m (AFMA, 2021a).	
				Fishing effort	Most of the Australian fishing effort is by purse-seine vessels in the Great Australian Bight and waters off South Australia during summer months, and by longline off the New South Wales coastline during winter months (Patterson and Dylewski, 2023a). The Southern Bluefin Tuna Fishery is shared amongst countries. Australia currently has a 35% share of the total global allowable catch. Whilst wild capture fishing in Australia to sell directly to market can occur anywhere throughout the fisheries range, currently most of that quota is value-added through ranching (on-growing the wild captured fish for an extra five to six months). Ranching requires significant infrastructure, a resident labour force, plus proximity to a fishery able to supply a large quantity of natural feed/sardines (40,000+ tonnes). North-west WA is critically important regardless of how the quota is fished because of the proximity to the single spawning ground of this global roaming species. Young fish (one to four years of age) move from the spawning ground in the north-east Indian Ocean into the Australian EEZ and southwards along the Western Australian coast (Patterson and Dylewski, 2023). The stock is classified as not overfished (Patterson and Dylewski, 2023a). A total of 5972 t bluefin tuna catch was recorded for the 2021–22 fishing season, an increase from 5646 t in the 2020–21 period (Patterson and Dylewski, 2023a). Of the total catch, 4957 t were collected using purse seine and 1015 from pelagic longline.	
				Active licences/ vessels	Eight purse seine vessels and 22 longline vessels, an increase from seven purse seine vessels and 20 longline vessels in the 2020–21 period (Patterson and Dylewski, 2023a).

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
Western Skipjack Tuna Fishery	✓	✓	✓	**Management area:**	The combined western and eastern skipjack tuna (*Katsuwonus pelamis*) fisheries encompass the entire Australian EEZ. The Western Skipjack Tuna Fishery extends westward from the SA/ Victorian border across the Great Australian Bight and around the west coast of WA to the Cape York Peninsula.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western skipjack tuna (*Katsuwonus pelamis*)		Fishers use purse seine gear (about 98% of catch) and sometimes pole and line when fishing for skipjack tuna.	Western skipjack tuna is a pelagic species that can be found to depths of 260 m (AFMA, 2021b).
				Fishing effort:	The Skipjack Tuna Fishery has not been actively fished since the 2008–09 fishing season (Patterson and Delewski, 2023b). The management arrangements for this fishery will be reviewed if active boats re-enter the fishery.		
				Active licences/ vessels:	No active vessels operating since 2009 (Patterson and Delewski, 2023b).		
Western Tuna and Billfish Fishery	✓	✓	✓	**Management area:**	The Western Tuna and Billfish Fishery extends to the Australian EEZ boundary in the Indian Ocean.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Key species caught in the fishery are bigeye tuna (*Thunnus obesus*), yellowfin tuna (*T. albacares*) and swordfish (*Xiphias gladius*). Striped marlin (*Kajikia audax*) is a minor component of the catch. Catch of albacore (*T. alalunga*), a non-quota species, can approach levels similar to yellowfin tuna catch in some years (Blake et al., 2022a).		Fishers mainly use pelagic longline fishing gear to catch the targeted species. Minor line (including handline, troll, rod and reel) can also be used, and purse seine.	Species have a broad depth distribution, with tuna occurring at 150–300 m, striped marlin at 150 m and swordfish at up to 600 m (BRS, 2007).
				Fishing effort:	The fishery operates in Australia's EEZ and high seas of the Indian Ocean. Fishing effort in recent years has been concentrated off south-west WA, with occasional activity off SA (Patterson et al., 2023). A total of 145 t catch was landed in the 2021–22 seasons, a decrease from 252 t in the 2020–21 period (Patterson et al., 2023). The striped marlin, bigeye tuna, and yellowfin tuna are classified as subject to overfishing (Patterson et al., 2023).

<tr><th rowspan="2">Fishery</th><th colspan="3">Woodside Activity Area</th><th colspan="4" rowspan="2">Description</th></tr>
<tr><th>Browse</th><th>NWS/IS</th><th>NWC</th></tr>
<tr><td rowspan="5">Pilbara Fish Trawl (Interim) Managed Fishery</td><td rowspan="5"></td><td rowspan="5">✓</td><td rowspan="5"></td><td>Management area:</td><td colspan="3">The Pilbara Trawl (Interim) Managed Fishery is a high intensity fishery divided into two zones and an area governed by Schedule 5 (prohibited to trawling). In addition to the Prohibited Trawl Fishing area, no fish trawl units are allocated for use in Zone 1 or Areas 3 and 6 of Zone 2 (which comprises six management areas) (Newman et al., 2021a).</td></tr>
<tr><td colspan="2">Species targeted</td><td>Fishing methods</td><td>Fishing depth</td></tr>
<tr><td colspan="2">The fishery targets more than 50 scalefish species.
The main demersal scalefish species landed by the fisheries in the Pilbara region are bluespotted emperor, red emperor and rankin cod (Newman et al., 2021a). The key species caught by the Pilbara Trawl (Interim) Managed Fishery include crimson snapper, bluespotted emperor trevally and threadfin bream (DPIRD, 2020).</td><td>Demersal trawl. The fishery operates with standard stern trawling gear (single net with extension sweeps) (Newman et al., 2021a).</td><td>The fishery operates in waters between 50 and 200 m water depth (Allen et al., 2014; Newman et al., 2015).</td></tr>
<tr><td>Fishing effort:</td><td colspan="3">Based on State of the Fisheries annual reports provided by DPIRD, catch trends were seen to be increasing over the past reporting years, until the past two seasons.
The Pilbara Trawl (Interim) Managed Fishery catch was 1784 t in 2022,1928 t in 2021, 2087 t in 2020, 2142 t in 2019, 1996 t in 2018, 1780 t in 2017, 1529 t in 2016, 1172 t in 2015 and 1105 t in 2014 (Wakefield et al., 2023a). The fishery landed 72% of total commercial catches of the demersal scale fish in the Pilbara in 2022. Increasing catch rates and fishing mortality spawning biomass estimates indicate that imposed effort reductions since 2008 have resulted in increased fish abundance and stock rebuilding in the fishery (Wakefield et al., 2023a).
In 2021, the total catch of the indicator species red emperor in the Pilbara Demersal Scalefish Fisheries (includes trawl, trap and line sectors) was 192 t, which is within the acceptable catch range (Wakefield et al., 2023).
The biological stocks for the Pilbara Demersal Scalefish Fisheries are classified as sustainable-adequate (Wakefield et al., 2023a).</td></tr>
<tr><td>Active licences/ vessels:</td><td colspan="3">Four active vessels in the trawl sector in 2022 (Wakefield et al., 2023a).</td></tr>
</table>

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
Pilbara Line Managed Fishery		✓	✓	**Management area:**	The Pilbara Line Managed Fishery boat licences are permitted to operate anywhere within 'Pilbara water', bounded by a line commencing at the intersection of 21° 56'S latitude and the high-water mark on the western side of the North-west Cape on the mainland of WA; west along the parallel to the intersection of 21° 56'S latitude and the boundary of the AFZ and north to longitude 120°E.		
				Species targeted		**Fishing method**	**Fishing depths**
				The Pilbara Line Managed Fishery catch is made up around 45–50 different fish species. The fishery targets similar demersal species to the Pilbara Trap and Trawl fisheries, as well as some deeper offshore species such as ruby snapper and eightbar grouper (DPIRD, 2020).		Demersal long line.	Information not available.
				Fishing effort:	Based on State of the Fisheries annual reports provided by DPIRD, catch trends are as follows: The Pilbara Line Managed Fishery caught 104 t in 2022, 124 t in 2021, 167 t in 2020, 148 t in 2019, 93 t in 2018, 143 t in 2017, 126 t in 2016, 97 t in 2015 and 40 t in 2014 (Wakefield et al., 2023a). The total catch of 104 t in 2022 made up 4% of the total catch by the Pilbara Demersal Scalefish Fishery and was within the acceptable catch range (Wakefield et al., 2023a).		
				Active licences/ vessels:	Four active vessels in 2022 (Wakefield et al., 2023a).		
Mackerel Managed Fishery	✓	✓	✓	**Management area:**	The commercial fishery extends from the West Coast Bioregion to the WA/NT border. There are three managed fishing areas: Area 1: Kimberley (121º E to the WA/NT border); Area 2: Pilbara (114º E to 121º E) and Area 3: Gascoyne (27º S to 114º E) and West Coast (Cape Leeuwin to 27º S) (Lewis et al., 2020).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Spanish mackerel (*Scomberomorus commerson*), grey mackerel (*S. semifasciatus*), other species from the genus *Scomberomorus*.		Trolling, baits or lures cast, jigging (Lewis et al., 2020).	Information not available.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Fishing effort:	Total catch for the Marine Aquarium Fish Managed Fishery in 2022 was 98,694 fishes and invertebrates, 17.83 t of coral, live rock, and living sand, and 39 L of marine plants and live feed. (Newman et al., 2023a). In 2021, the total catch for the Marine Aquarium Fish Managed Fishery was 92,227 fishes (including syngnathids, invertebrates and sponges), 27.97 t of coral, live rock and living sand, and 42 L of marine plants and live feed (Newman et al., 2023). In 2020 was 89,925 fishes, 32.12 t of coral, live rock and living sand and <20 L of marine plants and live feed (Newman et al., 2021b). Dominant fish species caught in 2022 include spotted blenny (*Istiblennius meleagris*), scribbled angelfish (*Chaetodontoplus duboulayi*), black-axil chromis (*Chromis atripectoralis*), stripey (*Microcanthus strigatus*), Vachell's glassfish (*Ambassis vachellii*), margined coralfish (*Chelmon marginalis*), black-axil chromis (*Chromis atripectoralis*), and blue and yellow wrasse (*Anampses lennardi*) (Newman et al., 2023a). The breeding stocks of landed species are classified as sustainable-adequate (Newman et al., 2023a)		
				Active licences/ vessels:	13 licences were active in 2022 across the Marine Aquarium Fish Managed Fishery and the Hermit Crab Fishery (Newman et al., 2023a).		
Western Australian Sea Cucumber Fishery (formerly Beche-de-mer Fishery)	✓	✓	✓	**Management area:**	Fishing occurs mostly in the northern half of WA from Exmouth Gulf to the NT border and is managed under Ministerial Exemptions. Shark Bay was fished for the first time in 2020 (Hart et al., 2023a) and again in 2021 (Newman et al., 2022).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Two main species: sandfish (*Holothuria scabra*) and redfish (*Actinopyga echinites*).		Diving and wading. Collected by hand.	The targeted species typically inhabit nearshore in shallow depths.
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The Western Australian Sea Cucumber Fishery caught 56.5 t in 2022, 41.3 t in 2021 3.6 t in 2020, 6.9 t in 2019, 62 t in 2018 (Gaughan and Santoro, 2020), 135 t in 2017, 93 t in 2016 and 38 t in 2015. In 2022, 45.2 t of the total catch consisted of sandfish (*Holothuria scabra*), 10.8 t deepwater redfish (*Actinopyga echinites*), and 0.5 t of black teatfish (*Holothuria whitmaei*) (Newman et al., 2023d). Sandfish were collected from the Kimberley only, which was last fished in 2017 (Hart et al., 2023). Deepwater redfish and black teatfish were harvested from Shark Bay (under an exception licence granted to native title holders), which was the second time this stock had been fished (Hart et al., 2023). The stock status of sandfish, in the Kimberly, and red fish species landed are considered to be sustainable- adequate, while the sandfish in the Pilbara are not sustainable – inadequate. (Hart et al., 2023f).

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Active licences/ vessels:	Two operating vessels operating in 2022 (Hart et al., 2023f).		
Onslow Prawn Managed Fishery		✓		**Management area:**	The Onslow Prawn Managed Fishery encompasses a portion of the continental shelf off the Pilbara.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western king prawns (*Penaeus esculentus*), brown tiger prawns (*Penaeus esculentus*), blue endeavour prawns (*Metapenaeus endeavouri.*		Low opening, otter prawn trawl systems.	Fishery and or fishing activity overlaps the Beadon Creek dredging scope (Sporer et al., 2015).
				Fishing effort:	The total landings for the Onslow Prawn Managed Fishery in 2022 are not available due to data confidentiality (Wilkin, et al. 2023b). In 2021 were less than the target catch range of 60 t (Kangas et al.,2023a). 37 days of fishing took place in 2021, compared to 13 days in 2020 (Kangas et al., 2023a). The breeding stocks of banana, brown tiger, and western king prawns are considered sustainable-adequate (Kangas et al., 2023a).		
				Active licences/ vessels:	One vessel active in 2021 (Kangas et al., 2023a).		
Pearl Oyster Managed Fishery	✓	✓	✓	**Management area:**	The Pearl Oyster Managed Fishery is located in shallow coastal waters, designated by four zones extending from Exmouth to Kununurra and the seaward boundary demarcated by the 200 NM EEZ. The fishery is currently managed under the *Pearling Act 1990* (Hart et al., 2023b).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Silver lipped pearl oysters (*Pinctada maxima*).		Drift diving.	Fishing effort is mostly focused in shallow coastal waters (10–15 m depth), with a maximum depth of 35 m (Lulofs et al., 2002).
				Fishing effort:	In 2021, catch was taken from Zones 2 and 3 only with no fishing in Zone 1, which has not been fished from 2017 to 2021 (Hart et al., 2023b). In 2022, the number of wild-caught pearl oysters was 756,531 (Hart et al., 2023d). Total dive hours increased in 2022 from 8175 hours in 2021 to 10,906 hours due to a 28% increase in harvest. (Hart et al., 2023d). Zones one to three are all considered to be sustainable – adequate (Hart et al., 2023b).

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Active licences/ vessels:	Six active vessels in 2022 (Hart et al., 2023b).		
Pilbara Crab Managed Fishery		✓	✓	**Management area:**	The Pilbara Crab Managed Fishery covers inshore waters from Onslow to Port Hedland (between longitudes 115° 5’ 60” E and 120° E), with most activity around Nickol Bay (Johnston et al., 2020b). Areas of the fishery north and east of Exmouth and nearshore are currently closed as per Schedule 2 of the Draft Management Plan for the Pilbara Crab Managed Fishery (DPIRD, 2018b).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Blue swimmer crab (*Portunus armatus)* (Johnston et al*.,* 2021).		Hourglass traps (Johnston et al., 2021).	Up to 50m deep (Johnston et.al., 2020a).
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: Catch for the Pilbara Crab Managed Fishery was 11.2 t in 2022, 9.7 t in 2021, 0.6 t in 2020 and 19.3 t in 2019 (Johnston et al., 2023a). The total catch in 2021 was a substantial increase from the 2.1 t caught in 2020, which was the lowest landed catch in 20 years (Johnston et al., 2023a). In 2022 the blue swimmer crab catch accounted for 2% of the State commercial catch, all taken by the fishery (Johnston et al., 2023a). The blue swimmer crab stock status is considered sustainable – adequate (Johnston et al., 2023a).		
				Active licences/ vessels:	No information available currently.		
South West Coast Salmon Managed Fishery	✓	✓	✓	**Management area:**	The South-west Coast Salmon Managed Fishery operates on various beaches south of the metropolitan area and includes all WA waters north of Cape Beaufort except Geographe Bay.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western Australian salmon (*Arripis truttaceus*).		Beach seine nets.	Information not available.
				Fishing effort:	No fishing occurs north of the Perth metropolitan area, despite the managed fishery boundary extending to Cape Beaufort (WA/Northern Territory border), as advised by WAFIC. The commercial catch for the entire West Coast Nearshore and Estuarine Finfish resource was 302.5 t in 2022. The total catch of Western Australian salmon was 82.9 t in 2022, a decrease from 88.5 t in 2021. The Western Australian Salmon stock status is considered sustainable – adequate. (Duffy et al., 2023c).

<tr><th rowspan="2">Fishery</th><th colspan="3">Woodside Activity Area</th><th colspan="4" rowspan="2">Description</th></tr>
<tr><th>Browse</th><th>NWS/IS</th><th>NWC</th></tr>
<tr><td></td><td></td><td></td><td></td><td>Active licences/vessels:</td><td colspan="3">The number of active vessels or licences in 2021 is unknown, however there were approximately 12 commercial fishers employed in 2018 (Duffy et al., 2023)</td></tr>
<tr><td rowspan="5">Specimen Shell Managed Fishery</td><td rowspan="5">✓</td><td rowspan="5">✓</td><td rowspan="5">✓</td><td>Management area:</td><td colspan="3">The Specimen Shell Managed Fishery encompasses the entire WA coastline, but effort is concentrated in areas adjacent to the population centres such as Broome, Exmouth, Shark Bay, Geraldton, Perth, Mandurah, the Capes area and Albany (Hart et al., 2023c). There are several closed areas where the fishery is not permitted to operate. These include various marine parks and aquatic reserves, such as Ningaloo Marine Park. The Perth metropolitan area is also important because of its populations of two rare cowrie species (Hart et al., 2023c).</td></tr>
<tr><td colspan="2">Species targeted</td><td>Fishing methods</td><td>Fishing depth</td></tr>
<tr><td colspan="2">The Specimen Shell Managed Fishery targets the collection of specimen shells for display, collection, cataloguing and sale.
About 200 species of specimen shell are collected each year. There is some focus of effort on mollusc families that are most popular with shell collectors, such as cowries, cones, murexes and volutes (Hart et al., 2023c).</td><td>Collection is predominantly by hand when diving to wading in shallow, coastal waters, though in deeper water collection may be conducted by remotely operated vehicles (limited to one per licence).</td><td>For collection by hand, (diver-based) this typically restricts effort to safe diving depths (less than 30 m).
ROV collection could enable depths up to 300 m (Hart et al., 2023c).</td></tr>
<tr><td>Fishing effort:</td><td colspan="3">A total of 5074 specimen shells were collected in 2022, distributed over 200 species (Hart et al., 2023f). A total of 5443 specimen shells were collect distributed over 200 species in 2021 (Hart et al., 2023b). Total number of specimen shells collected in 2020 was 4258 shells, across 206 species (Hart et al., 2021c).
Stocks of landed species in the Specimen Shell Managed Fishery are classified as sustainable – adequate (Hart et al., 2023f).</td></tr>
<tr><td>Active licences/ vessels:</td><td colspan="3">An exemption for the trial of remotely operated underwater vehicles (limited to one per licence) was in place during 2021 (Hart et al., 2023c).
There was a total of 30 licences in the fishery, of which 16 licences were fished in 2022 (Hart et al., 2023f). Effort in 2022 was 388 days (Hart et al., 2023f).</td></tr>

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
West Australian Abalone Fishery	✓	✓	✓	**Management area:**	The Western Australian Abalone Managed Fishery includes all coastal waters from the WA and SA border to the WA and NT border. The fishery is concentrated on the south coast and the west coast. It is divided into eight management areas. The fishery for Greenlip and Brownlip abalone operates in areas 1–4 and the Roe's abalone fishery operates in areas 1, 2, 5, 6, 7 and 8 (DoF, 2011).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Greenlip abalone (*Haliotis laevigata*), brownlip abalone (*Haliotis conicopora*), Roe's abalone (*Haliotis roei*).		Divers.	Distribution to 5 m depth for Roe's abalone and 40 m depth for greenlip/brownlip abalone (DOF, 2011).
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The total catch for greenlip and brownlip abalone in 2022 was 40.1 t whole weight (26.6 t greenlip and 13.5 t brownlip), (Strain et al., 2023d), an increase from 2021 which was 39 t whole weight (greenlip 25.9 t and brownlip 13.1 t) (Strain et al., 2023a). The total catch in 2021 was the lowest catch recorded for greenlip/brownlip in 53 years (Strain et al., 2023d). The Roe's abalone resource catch for 2022 was 28.9 t, a 2.6% decrease from the previous season (Strain et al., 2023c). In 2021 was 29.7 t whole weight, an increase from 18.2 t whole weight in 2020 (Strain et al., 2023a). The stock status of greenlip abalone is considered inadequate and brownlip abalone is adequate (Strain et al., 2023a). The stock status of the Roe's abalone is considered adequate (Strain et al., 2023c).		
				Active licences/ vessels:	There were 16 registered vessels in 2022 for the Greenlip and Brownlip Abalone Fishery (Strain et al., 2023d) and 21 for Roe's, however only a small proportion were active (Strain et al., 2023c).		
Western Australia Joint Authority Northern Shark Fishery	✓			**Management area:**	The Western Australia Joint Authority Northern Shark Fishery extends from longitude 12'° 45'E to the Northern Territory border.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Blacktip shark (*Carcharhinus tilstoni*), spot-tail shark (*Carcharhinus sorrah*).		Gillnets and longlines.	Information not available.
				Fishing effort:	Since 2005, 60% of the waters have been closed to finishing and limited on the number of fishing days. No catch has been reported since 2008/2009 (Braccini and Watt, 2023).		
				Active licences/ vessels:	Information not available.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The Abrolhos Islands and Mid-West Trawl Fishery did not fish in 2022 due to the stock being environmentally limited. (Wilkin et al., 2023a) The fishery landed 123.1 t meat weight (615.1 t whole weight) in 2021, 238.6 t meat		
				Active licences/ vessels:	The number of vessels is unreported. There were 10 licences in 2021 (Kangas et al., 2023b).		
Broome Prawn Managed Fishery	✓			**Management area:**	The Broome Prawn Managed Fishery operates off Broome and forms part of the North Coast Prawn Fishery.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western king prawn (*Penaeus latisulcatus*), brown tiger prawns (*Penaeus esculentus*), blue endeavour prawns (*Metapenaeus endeavouri*).		Low opening, otter prawn trawl systems	Trawling is generally in waters between 30 and 60 m deep, however can occur down to 100 m (DOEH, 2004).
				Fishing effort:	The DPIRD state of State of the Fisheries annual reports indicate that no fishing efforts occurred in 2022 and extremely low fishing effort occurred in 2021, 2020 and 2019 (Wilkin et al., 2023b). The stock status of western king prawns is considered sustainable – adequate (Kangas et al., 2023a).		
				Active licences/ vessels:	No boats undertook trial fishing activities in 2022 (Wilkin et al., 2023b).		
Exmouth Gulf Prawn Managed Fishery			✓	**Management area:**	The Exmouth Gulf Prawn Managed Fishery operates within the sheltered waters of Exmouth Gulf. The fishery occupies a total area of 4000 km², with only half of this area being trawled (Fletcher and Santoro, 2015).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western king prawn (*Penaeus latisulcatus*), brown tiger prawn (*Penaeus esculentus*), blue endeavour prawn (*Metapenaeus endeavouri*), banana prawn (*Penaeus merguinensis*).		The fishery uses low opening, otter prawn trawl systems (Kangas et.al., 2021c).	Information not available.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Active licences/ vessels:	Ten vessels fished during 2022, six of which fished for more than 10 days during peak pink snapper season (Jackson et al., 2023c).		
Kimberley Crab Managed Fishery (formerly Kimberley Developing Mud Crab Fishery)	✓			**Management area:**	Kimberley Crab Managed Fishery is one of two small trap-based crab fisheries that exist in the North Coast Bioregion between Cambridge Gulf and Broome (Gaughan and Santoro, 2018). In November 2018, the fishery transitioned from developing to fully managed (Johnston et al., 2020b).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Brown mud crab (*Scylla olivacea*), green mud crab (*Scylla serrata*).		Trap. Exemption holders use crab traps and drop nets in waters adjacent to native title lands (Johnston et al., 2023).	Information not available.
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The total crab landed was 13.6 t in 2022, 9.7 t in 2021, 1.5 t in 2020, 3.2 t in 2018 and 7.4 t in 2019. In 2022, Kimberley Crab Managed Fishery landed a total catch of 2.4 t of brown mud crab represented the entire reported commercial mud crab catch (Johnston et al., 2023a). Mud crab species in the managed fishery is considered sustainable – adequate (Johnston et al., 2023a).		
				Active licences/ vessels:	There is an allocation of 1200 units (equivalent to 600 traps) to licence holders (Johnston et al., 2023). An equivalent allocation of 600 traps for commercial purposes was provided to Traditional Owner groups through the granting of non-transferable Instruments of Exemption under the *Fish Resources Management Act 1994*. Two people were employed in 2022 between August and October (Johnston et al., 2023a).		
Nickol Bay Prawn Managed Fishery		✓		**Management area:**	The Nickol Bay Prawn Managed Fishery operates in nearshore and offshore waters of the Pilbara region along the NWS. Trawling has been reported to occur at several locations along the Pilbara coast to the east of the Burrup Peninsula, including within the waters of Nickol Bay (Fletcher and Santoro, 2015).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Banana prawn (*Penaeus merguiensis*), western king prawn (*Penaeus latisulcatus*), brown tiger prawn (*Penaeus esculentus*), blue endeavour prawn (*Metapenaeus endeavouri*).		Low opening, otter prawn trawl systems.	Information not available.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The Nickol Bay Prawn Managed Fishery landed 51 t in 2022, 123.4 t in 2021, 202.4 t in 2020, 254 t in 2019 and 81 t in 2018 (Wilkin et al., 2023b). Of the total landings in 2022, landings were dominated by 42 t banana prawns and 7 t brown tiger, and 2 t blue endeavour (Wilkin et al., 2023b). Fishing effort was 62 boat days, a decrease from 175 days in 2021 (Wilkin et al., 2023b). The banana prawn stock status within the Nickol Bay Prawn Managed Fishery is considered sustainable-adequate (Wilkin et al., 2023b).		
				Active licences/ vessels:	There were three participating vessels in 2022 (Wilkin et al., 2023b).		
Northern Demersal Scalefish Managed Fishery	✓			**Management area:**	The Northern Demersal Scalefish Managed Fishery is divided into two fishing areas: an inshore sector (Area 1) and an offshore sector (Area 2) (Newman et al., 2018). Area 1 permits line fishing only, between the high-water mark and the 30 m isobath. Area 2 permits handline, dropline and fish trap fishing methods and is further divided into zones. Zone A is an inshore area, Zone B comprises the area with most historical fishing activity, and Zone C is an offshore deep slope area representing waters deeper than 200 m (Fletcher et al., 2017).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Goldband snapper (*Pristipomoides multidens*), blue-spotted emperor (*Lethrinus punctulantus*), red emperor (*Lutjanus sebae*), rankin cod (*Epinephelus multinotatus*).		Handline, dropline and fish trap.	Information not available.
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The Northern Demersal Scalefish Managed Fishery landed 1458 t in 2022, 1544 t in 2021, 1419 t in 2020, 1507 t in 2019, and 1297 t in 2018. In 2022, the majority of the catch was landed from Zone B, with 1235 t in 2022. The 2022 catch of jobfish group (*Pristipomoides spp*.) was 552 t, 91% of which was goldband snapper (Wakefield et al., 2023a). The stock status of landed species in the managed fishery is classified as sustainable – adequate (Wakefield et al., 2023a).		
				Active licences/ vessels:	Eight active vessels in 2022 (Wakefield et al., 2023a).		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
Octopus Interim Managed Fishery	-	-	-	**Management area:**	The Octopus Interim Managed Fishery operates from Kalbarri Cliffs in the north to Esperance in the south.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Octopus djinda, which is closely related to *Octopus tetricus*.		Primary method is baited octopus trap (combination of active trapping via trigger mechanisms, and passive trapping – shelter traps) (Hart et al., 2023d).	In inshore waters to a depth of 70 m (DPIRD, 2018a).
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: Commercial catch for the Octopus Interim Managed Fishery was 744 t in 2022, 487 t in 2021, 254 t in 2020, 453 t in 2019, 314 t in 2018, 257 t in 2017 and 252 t in 2016 (Hart et al., 2023g). In 2022, the total catch of octopus was 744 t live weight, which was 53% higher than 2021 with a total catch of 487 t (Hart et al., 2023g). Octopus stock status in 2022 is considered sustainable-adequate (Hart et al., 2023g).		
				Active licences/ vessels:	27 active vessels in 2022 (Hart et al., 2023g).		
Shark Bay Beach Seine and Mesh Net Managed Fishery	-	-	-	**Management area:**	The Shark Bay Beach Seine and Mesh Net Managed Fishery operates from Denham.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Whiting (yellowfin *Sillago schomburgkii*), sea mullet (*Mugil cephalus*), tailor (*Pomatomus saltatrix*), western yellowfin bream (*Acanthopagrus australis*).		Beach seine and mesh net.	Information not available.
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: Total catch was 131 t in 2022,135 t in 2021, 171 t in 2020, 175 t in 2019 and 176 t in 2018. Of the total catch in 2022, 78 t consisted of whiting, 25 t of sea mullet, 16 t of western yellowfin bream, 6 t of tailor, and 1.5 t of pink snapper (Jackson et al., 2023b). The stock status of targeted species is sustainable - adequate (Jackson et al., 2023b).		
				Active licences/ vessels:	Five vessels were active in 2022 (Jackson et al., 2023b).

Shark Bay Crab Managed Fishery	-	-	-	**Management area:**	The Shark Bay Crab Managed Fishery operates within the NWMR. It is based primarily in Carnarvon but operates throughout the waters of Shark Bay.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Blue swimmer crab (*Portunus armatus*)		Trap and trawl.	Information not available.
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The fishery landed 401 t in 2022, 549 t in 2020–21, 638 t in 2019–20, 529 t in 2018–19 and 518 t in 2017–18. The fishery closed for a period of 18 months in 2012 and 2013 to promote stock recovery, following a series of adverse environmental conditions between 2010 and 2011 (Chandrapavan et al., 2023). Limited commercial fishing resumed under a national quota management system between 2013 and 2017 (Chandrapavan et al., 2023). The current stock status is sustainable-adequate (Chandrapavan et al., 2023).		
				Active licences/ vessels:	In the trawl sector in 2022 there were 10 licenced vessels based in Carnarvon with an additional eight vessels traveling to Carnarvon. There were three trap vessels (Chandrapavan et al., 2023a).		
Shark Bay Prawn and Scallop Managed Fishery	-	-	-	**Management area:**	The Shark Bay Prawn Managed Fishery is the highest producing WA fishery for prawns. The Shark Bay Scallop Managed Fishery is usually Western Australia's most valuable scallop fishery (Kangas et al., 2021b).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western king prawn (*Penaeus latisulcatus*), brown tiger prawn (*Penaeus esculentus*), endeavour prawns (*Metapenaeus endeavouri*), coral prawns (*Metapenaeopsis sp.*), saucer scallop (*Amusium balloti*).		Low-opening otter trawls.	Information not available.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
South-west Trawl Managed Fishery	-	-	-	**Management area:**	The South-west Trawl Managed Fishery is a multi-species fishery and includes two of WA's smaller scallop fishing grounds at Fremantle and north of Geographe Bay (Fairclough and Walters, 2018).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Scallops (*Ylistrum balloti,* formerly *Amusium balloti*) and associated by-products. In years of low scallop catches, licencees may use trawl gear to target fin-fish species.		Trawl.	Information not available.
				Fishing effort:	Catch levels are unavailable for recent years. The fishery was not active in 2015 or 2016 (Fairclough and Walters, 2018). Effort in the fishery is highly variable and typically fluctuates in response to recruitment variability in saucer scallops and prawns. In 2021 <1% of the allowable area was trawled in the South-west Trawl Managed Fishery (Kangas et al., 2023b). The stock status of scallops is considered sustainable-adequate (Wilkin et al., 2023a).		
				Active licences/ vessels:	One vessel fished in 2022 (Wilkin et al., 2023a).		
The South Coast Salmon Managed Fishery	-	-	-	**Management area:**	The South Coast Salmon Managed Fishery is one of two fisheries operating in the South Coast Bioregion that target nearshore and estuarine finfish.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Western Australian salmon (*Arripis truttaceus*), southern school whiting (*Sillago bassensis*), Australian herring (*Arripis georgianus*), King George whiting (*Sillaginodes punctatus*), sea mullet (*Mugil cephalus*), estuary cobbler (*Cnidoglanis macrocephalus*), black bream (*Acanthopagrus butcheri*).		Beach seines, haul nets and gill nets.	Information not available.

Fishery	Woodside Activity Area			Description			
	Browse	NWS/IS	NWC				
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: Total catch for the South Coast Estuarine and Nearshore Scalefish and Invertebrates Resource was 267.6 t for 2022, 275.1 t in 2021 and 334 t in 2020. Of this, the South Coast Salmon Managed Fishery landed 48.5 t of Western Australian salmon in 2021, 76 t in 2020 and 56.5 t in 2019. The stock status of target species is sustainable-adequate (Duffy et al., 2023b).		
				Active licences/ vessels:	Catch was recorded against eight licences in 2022 (Duffy et al., 2023d).		
West Coast Beach (Beach Bait Fish Net) Managed Fishery	-	-	-	**Management area:**	Primarily active in the Bunbury areas in the SWMR, operates between 26º and 33º S.		
				Species targeted		**Fishing methods**	**Fishing depth**
				Whitebait.		Beach-based haul nets.	Information not available.
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The total catch of whitebait in 2022 was 23.3 t, an increase from 21.3 t in 2021 (Duffy et al., 2023c). The fishery continues to be environmentally limited with stocks recovering from the 2010/11 marine heat wave (Duffy et al., 2023a). The stock status is inadequate – environmentally limited (Duffy et al., 2023c).		
				Active licences/ vessels:	The number of active vessels in 2021 is unknown, however five licensees reported landings of whitebait in 2011 (Smith et al., 2011)		
West Coast Demersal Gillnet and Demersal Longline (Interim) Managed Fishery	-	-	-	**Management area:**	The West Coast Demersal Gillnet and Demersal Longline (Interim) Managed Fishery is part of the Temperate Demersal Gillnet and Demersal Longline Fishery, which operates between 26° and 33° S, and the Joint Authority Southern Demersal Gillnet and Demersal Longline Managed Fishery, which operates from 33° S to the WA/SA border (Braccini and Blay, 2020).		
				Species targeted		**Fishing methods**	**Fishing depth**
				Gummy shark (*Mustelus antarcticus*), dusky shark (*Carcharhinus obscurus*), whiskery shark (*Furgaleus macki*). Sandbar shark (*C. plumbeus*) Scalefish are a byproduct.		Gillnet and longline.	Information not available.

Fishery	Woodside Activity Area			Description	
	Browse	NWS/IS	NWC		
				Fishing effort:	Previous years catch based on State of the Fisheries annual reports provided by DPIRD: The total catch for the West Coast Rock Lobster Fishery was 6342 t in 2022 (De Lestang and Walsh, 2023). Due to COVID-19 related logistics and marketing issues, the 2020–21 season was extended from 12 to 18 months. Since the current extended season is still in progress, data has been reported on a 12-month period (15 Jan 2021 to 14 Jan 2022) (How and Wiberg, 2023a). Landings for the 12-month (2021–22) season was 6334 t and the 18-month 2020–21 season was 9132 t. Commercial landings over the traditional 12-month season (15 Jan 2020 to 14 Jan 2021) were 5696 t. The fishery landed 6397 t in 2019 and 6400 t in 2018 and 2017. The stock status for the western rock lobster is classified as sustainable – adequate (How and Wiberg, 2023a).
				Active licences/ vessels:	218 vessels were active in the 2022 season (De Lestang and Walsh, 2023).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

12.2.2 Fish Habitat Protection Areas

Fish Habitat Protection Areas (FHPAs) are areas of special protection and management in Western Australian waters. They are established in areas identified as having a particular value for the protection of fish and their habitats, education and/or aquaculture and which is considered to require a higher level of protection than other parts of the marine environment (DPIRD, 2013). They are set under section 115 of the *Fish Resources Management Act 1994* (WA) for:

- the conservation and protection of fish, fish breeding areas, fish fossils or the aquatic eco-system
- the culture and propagation of fish and experimental purposes related to that culture and propagation, or
- the management of fish and activities relating to the appreciation or observation of fish.

Under the Act, fish can include a range of organisms including finfish, crustaceans, molluscs, corals, seagrass and algae at all stages of their life cycles. FHPAs and a marine reserve declared under the *Conservation and Land Management Act 1984* (WA) cannot exist in the same area (DPIRD, 2013).

Management of an FHPA is designed and carried out to achieve the purposes outlined in a Plan of Management. FHPAs may restrict non-fishing related activities, such as the use of anchors, if they are considered to be inconsistent with the purpose of the FHPA; for example, if there is a risk to damage of fragile marine formations such as coral reefs. Protection may also involve the management of human activities such as dredging, draining of wetlands, and fishing or diving near sensitive marine habitats (DPIRD, 2013). Western Australia has six FHPAs (four within the NWMR and two within the SWMR):

- Abrolhos Islands
- Kalbarri Blue Holes
- Miaboolya Beach
- Point Quobba
- Cottesloe Reef
- Lancelin Island Lagoon.

12.2.2.1 FHPAs Within the NWMR

Abrolhos Islands

The Houtman Abrolhos Islands (Abrolhos) is an archipelago of up to 210 small islands and associated reefs located approximately 65–90 km offshore from Geraldton, Western Australia (WA) (Evans et al., 2022). The Abrolhos FHPA includes all waters from the high-water mark of the Abrolhos Islands out to three nautical miles; an area of about 2500 km² (Evans et al., 2022).

The islands and waters of the Abrolhos are of significance for both land-based (e.g. seabird breeding, migratory shorebirds, carpet pythons, tammar wallabies, and significant flora and vegetation) and marine-based values (e.g. diverse and unique range of fish and marine aquatic species, significant commercial and recreational fisheries, aquaculture and marine tourism) (Evans et al., 2022). The reefs of the Abrolhos are extremely diverse, with approximately 184 species of coral, 295 species of marine algae and 389 species of fish (Evans et al., 2022).

The Abrolhos Includes specific regulations such as:

- temporal (seasonal) closures (e.g. closed season for baldchin groper, *Choerodon rubescens*, between 1 November and 31 January)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- spatial closures (e.g. Reef Observation Areas ~64.3km^2 or 2.6% of Abrolhos FHPA)
- recreational fishing specific bag and possession limits (Evans et al., 2022).

The marine state territorial waters of the Abrolhos continue to be managed by the Department of Primary Industries and Regional Development.

Kalbarri Blue Holes

The Blues Holes form part of an inshore coastal limestone reef system to the west of the town of Kalbarri. The northern boundary of the FHPA is located immediately west of the northern end of the Blue Holes car park and extends south from this point for approximately 420 m. The width of the FHPA varies from around 130 m wide at the southern end, to approximately 140 m wide at the northern end (DoF, 2007).

The Kalbarri Blue Holes FHPA includes part of a near-shore limestone reef system, which stretches intermittently from Red Bluff in the South to the Murchison River Mouth in the North (DoF, 2007). To First Nations people, access to the reef system – near to the river mouth – is likely to have made it a significant site for hunting fish and gathering seafood. The river mouth beside Kalbarri, is called 'Wudumalu' or 'Wutumalu' by the local Nhanda language group (DoF, 2014a).

The reef provides a base for a range of recreational activities including swimming, scuba diving and snorkelling. There is an abundance of finfish, shellfish, crustaceans, corals, seagrasses and sponges living there. There are up to 70 species of finfish, 10 types of sponge, and 11 species of coral found in the reef system (DoF, 2014a).

Regulations for protection of Kalbarri Blue Holes include:

- All marine life is protected, and no fishing activities are permitted.
- The use of all motorised vessels (boats and jet skis) is prohibited within the FHPA's waters (DoF, 2014a).

Miaboolya Beach

Miaboolya Beach is an area of the Gascoyne River delta near Carnarvon. The FHPA covers the nearshore waters and extends north to South Bejaling and south to the northern side of the Gascoyne River mouth. In addition, it includes the adjoining mangrove system, associated seasonal creeks and salt marshes (DoF, 2003).

The Miaboolya system has regional importance as a fish nursery and general fish habitat. Native fauna includes juvenile finfish species such as tailor (*Pomatomus saltatrix*), mulloway (*Argyrosomus spp.*) and sand whiting (*Sillago ciliata*), and various crab species including mud crabs, blue swimmer and green mud crabs (family *Portunidae*). The fish and crab stocks use this environment for breeding, growth and development. Resident and migratory populations of birds, marine turtles and dolphins also exist within the area and contribute to its environmental value (DoF, 2003).

The Miaboolya area is of important cultural and historical value to the Gnulli native title group. The area is a place for traditional food collection and gathering for social occasions (DoF, 2003).

Recreational fishing is permitted however there are restrictions in place by the Department of Fisheries (DoF, 2014b).

Point Quobba

The Point Quobba FHPA adjoins the well-known 'Blowholes' tourist attraction at Quobba Station, 75 km north-west of Carnarvon WA, at the northernmost point of Shark Bay (DoF, 2004).

The marine life and habitats of the area are of considerable scientific and recreational interest and are highly valued in the local community. However, the area is at risk from a high level of use and conflict between users, due to the area's proximity to popular tourism sites, the boat ramp, camping and settlement areas (DoF, 2004).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The marine habitat at Point Quobba is in a transition zone between tropical and temperate climatic zones and is therefore highly diverse. It contains a mix of endemic temperate south-west Australian species and tropical and temperate Indo-Pacific species. The FHPA provides relatively sheltered breeding and feeding habitat for more than 100 species (DoF, 2015)

Point Quobba lies within the traditional area of the Baiyungu people, who are members of the Gnulli Group. The Baiyungu people use the area regularly, sometimes to collect trochus for consumption at Point Quobba and Black Rock (DoF, 2004).

There is a designated 'restricted area' within the FHPA to protect vulnerable habitats and fish species from human activity. Within this area commercial and recreational fishing and jet-skiing are prohibited. Restrictions on fishing in the rest of the FHPA are defined by the Department of Fisheries (DoF, 2015).

12.2.2.2 FHPAs Within the SWMR

Cottesloe Reef

The Cottesloe reef system stretches intermittently for approximately 4.4 km from a point 300 m south of the artificial surfing reef at the Cable Station to North Street, Cottesloe. It is located on a limestone shelf, which is known locally as the Cottesloe Fringing Bank. This shelf extends approximately 1.5 km offshore from the beach. Limestone pinnacles, elevated platforms, and water-eroded limestone outcrops form most of the surface reef structure. In places, sea-grass patches and kelp beds occur within 100 m of the shoreline (DoF, 2001a).

The reef is readily accessible to the public and intensively used by locals and other Perth metropolitan residents and is therefore vulnerable to human impacts. The reef system and its waters are highly popular for recreational activities including surfing, windsurfing, swimming, paddle skiing, line fishing, spear fishing, snorkelling and scuba diving.

The Cottesloe Reef system contains a unique and diverse range of marine habitats. These include sand, sand with seagrass, limestone reef with large kelp and macroalgae, sponge beds and garden bottoms. In deeper water, corals, sea cucumbers and sponge gardens thrive and the slope of the reef platform at Mudurup Rocks provides habitat for animals such as feather stars and small molluscs, which are protected from heat and drying during low summer tides. An abundance of finfish can be found in and around the reef system, including herring, tailor, skipjack (silver trevally), whiting, morwong and tarwhine (silver bream). The reef is also a breeding ground for squid, Port Jackson sharks and other elasmobranchs including stingrays (DoF, 2001a; DoF 2010).

Regulations for protection of Cottesloe Reef include:

- Spearfishing is prohibited throughout the FHPA.
- Commercial fishing is prohibited throughout the FHPA.
- Recreational fishing (except net fishing) for fish such as tailor, herring, whiting, skipjack and garfish is permitted in the FHPA, subject to recreational fishing rules for the West Coast region.
- Anchoring of any craft in the FHPA is prohibited.
- Five yellow moorings have been provided within the FHPA for use by boats up to 12 m. These moorings are removed during winter (April–November) to prevent damage from winter storms (DoF, 2010).

Lancelin Island Lagoon

Lancelin Island is an emergent limestone feature of the coastal marine environment of the mid-west coast of Western Australia. The island is located approximately 110 km north of Perth and 800 m offshore from the Lancelin town site (DoF, 2001b).

The Lancelin Island Lagoon is a small area of reef habitat on the western side of Lancelin Island and

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

a popular snorkelling and diving destination. Water depth ranges from less than 0.3 m on the intertidal reefs to less than 3 m on the sand or seagrass-covered bottom. The area has a diverse array of benthic marine habitat. During a marine survey of the area, over 200 flora and fauna species were positively identified, with more remaining unidentified due to the diversity of species (DoF, 2001a).

The management strategy for the Lancelin Island Lagoon includes the following regulations:

- Prohibit all recreational and commercial fishing, aquaculture and collecting in the FHPA.
- Prohibit boat anchorage within the FHPA.
- Investigate the means to prohibit mining and exploration within the FHPA and in adjacent areas where the environmental values of the FHPA may be compromised (DoF, 2001a).

12.2.3 Aquaculture

Aquaculture operations in the northwest are typically restricted to inland and shallow coastal waters.

12.2.3.1 West Coast Bioregion

Aquaculture activities in the West Coast bioregion, defined by the Department of Primary Industries and Regional Development (DPIRD) (as the government body responsible management of primary industries in WA) are focused on blue mussels and edible oysters (mainly in Cockburn Sound) and marine algae for production of beta-carotene, used as a food additive and as a nutritional supplement. Offshore marine finfish production is also being developed, initially focusing on yellowtail kingfish near Geraldton.

There is also an emerging black pearl industry (from the *Pinctada margaritifera* oyster) in the Abrolhos Islands. As well as expansion in the production of Akoya pearls (small white pearls from *Pinctada fucata martensi*), *Pinctada albina* (small, yellow pearls) and *Pteria penguin*, which are often used to produce half (mabe) pearls in pink and bluish shades.

Aquaculture licences for producing coral and live rock (pieces of old coral reefs colonised by marine life, such as beneficial bacteria, for aquariums) at the Abrolhos Islands have also been issued and other applications are being assessed (DPIRD, 2023).

12.2.3.2 Gascoyne Coast Bioregion

In the Gascoyne Coast bioregion, aquaculture activities are focused on the blacklip oyster (*Pinctada margaritifera*) and Akoya pearl oyster (*Pinctada imbricata*) (Gaughan and Santoro, 2020). Several hatcheries supply P. margaritifera juveniles to the region's developing black pearl farms.

Other aquaculture developments in the Gascoyne Coast bioregion include emerging producers of coral and live rock species for aquariums (DPIRD, 2023).

12.2.3.3 North Coast Bioregion

Aquaculture activities in the North Coast bioregion is dominated by the production of pearls (from the *Pinctada margaritifera* oyster). A large number of pearl oysters for seeding are obtained from wild stocks and supplemented by hatchery produced oysters, with major hatcheries operating at Broome and around the Dampier Peninsula (DPIRD, 2023). Primary spawning of the pearl oyster occurs from mid-October to December. A smaller secondary spawning occurs in February and March (Gaughan and Santoro, 2020).

Finfish aquaculture in the Kimberley region is dominated by Barramundi located in the Kimberley Aquaculture Development Zone which lies approximately 200 km north-east of Broome. Rock oyster trials are nearing completion near Karratha in the Pilbara region, however there is no commercial production of the species in this region at this stage (DPIRD, 2023).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

There is one indigenous project at One Arm Point that operates a marine hatchery that focuses on a variety of ornamental and edible marine species (DPIRD, 2023).

12.2.3.4 South Coast Bioregion

Aquaculture activities in the South Coast bioregion is dominated by the production of edible oysters (Akoya and rock oysters) and mussels within King George Sound in Albany. Other forms of private aquaculture in the region include sea cage farming of abalone, which are restricted to the South Coast near Augusta (Flinders Bay) and Esperance (Wylie Bay) (DPIRD, 2023).

12.3 Fisheries – Traditional

Traditional or customary fisheries are typically restricted to shallow coastal waters and/or areas with structures such as reef. The Western Australia Recreational Fishing Guide (2024) states that First Nations people do not need a recreational fishing licence in any waters if it is in accordance with continuing tradition and for individual or familial consumption, not for a commercial purpose.

Dugong, fish and marine turtles that move between coastal and Commonwealth waters are important components of the First Nations people's culture and diet. First Nations people continue to actively manage their sea country in coastal waters of WA in order to protect and manage the marine environment, its resources and cultural values.

Indonesian fishers can fish within designated areas under the Australia-Indonesia Memorandum of Understanding regarding the Operations of Indonesian Traditional Fishermen in Areas of the Australian Fishing Zone and Continental Shelf – 1974 (MoU 74). Traditional fishing is allowed within the MoU Box (Figure 12-9), which encompasses: Ashmore Reef (Pulau Pasir), Cartier Island (Pulau Baru), Seringapatam Reef (Afringan), Scott Reef (Pulau Dato) and Browse Island (Berselan). Restrictions have since been introduced around Ashmore Reef and Cartier Island following their designation as Nature Reserves under the Commonwealth's *National Parks and Wildlife Conservation Act 1975* in 1983 and 2000, respectively.

The MoU allows Indonesian fishers to fish in designated areas using traditional methods only. These methods include reef gleaning, free-diving, hand lining and other non-mechanised methods. Scott Reef is currently the principal reef in the MoU 74 Box and is utilised seasonally by Indonesian fishers to harvest trepang, trochus shells and other reef species. The peak season is July to October due to more favourable wind conditions, and to allow fishers to sun dry their catch on their boat decks (ERM, 2009). Browse Island is also frequently visited by shark fishers who mostly fish along the eastern margin of the MoU 74 Box.

The Agreement between the Government of Australia and the Government of the Republic of Indonesia Relating to Cooperation in Fisheries (*1992 Fisheries Cooperation Agreement*) provides the framework for fisheries and marine cooperation between Australia and Indonesia. Cooperation under the Agreement today takes place under the auspices of the Working Group on Marine Affairs and Fisheries. Research reports on reef top species in the MoU Box indicate that stocks in the area are severely depleted. In 2009 the Working Group on Marine Affairs and Fisheries agreed to a Roadmap for MoU Box Cooperative Management (DAWE, 2020a).

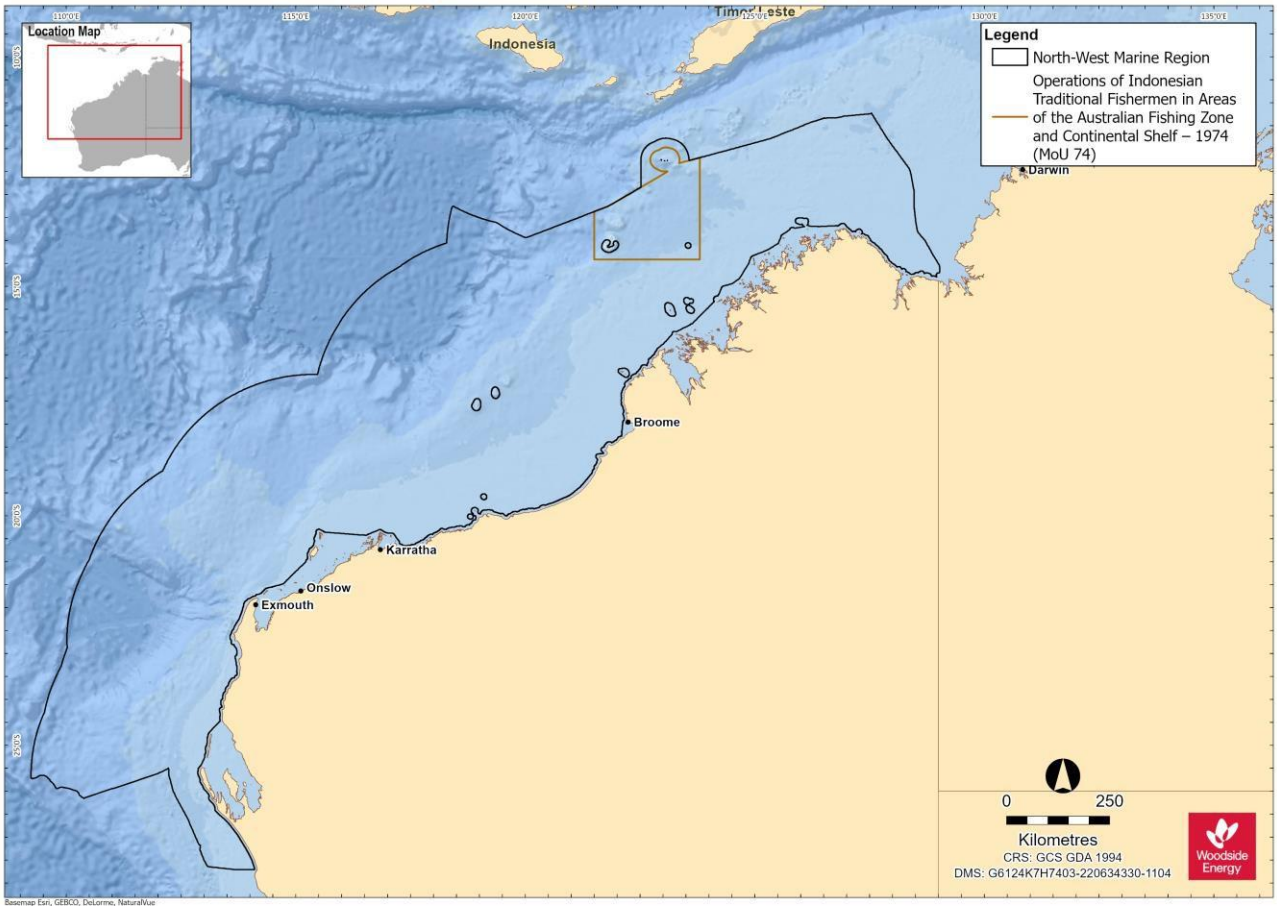

Figure 12-9: MOU 74 Box: operations of Indonesian traditional fishermen in areas of the Australian Fishing Zone and Continental Shelf – 1974

12.4 Tourism and Recreation

Western Australia's tourism sector is important to industry and the economy. In 2022–23, tourism accounted for 6.8% of WA's total jobs and generated a gross total value added of $11.9 billion (Tourism Western Australia, 2024a).

The Kimberley, Pilbara and Gascoyne regions are popular visitor destinations for Australian and international tourists. Tourism is concentrated in the vicinity of population centres. including Broome, Dampier, Exmouth, Coral Bay and Shark Bay. Recreational and tourism activities include charter fishing, recreational fishing, diving, snorkelling, marine fauna watching, and yachting (Tourism Western Australia, 2024b).

Australia's Coral Coast and North West had a 27% and 22% growth respectively, in intrastate spend compared to 2019. The state's highest intrastate spend on record occurred with WA residents spending $9.3 billion on trips within the state (Tourism Western Australia, 2024b).

12.4.1 Gascoyne Region

Tourism has the fourth largest economic output of all the major industries of the Gascoyne region (GDC, 2023). It contributes significantly to the local economy in terms of both income and employment. In 2022, the region had over 271,100 overnight visitors and tourism had an average economic output of $182 million between 2021 and 2022 (GDC, 2023).

The COVID-19 pandemic disrupted the tourism industry of the Gascoyne region in previous years, particularly by reducing availability of the overseas workforce. However, the phasing out of restrictions has increased interstate and international travel, and visitor numbers have remained high

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

with inter-state tourism numbers increasing in 2021 in comparison to 2020 (GDC, 2022). The main attraction of the coastline for tourists is the quality of marine life. The region supports extensive scuba diving, snorkelling and fishing and specialised eco-tourism activities include whale shark and manta ray observation at Ningaloo, and dolphin and dugong viewing in Shark Bay (Newman et al., 2023b). In 2018–19, the Ningaloo region (Ningaloo Reef and the surrounding coastal region Exmouth Gulf, communities of Exmouth and Coral Bay, and adjacent proposed southern coastal reserves and pastoral leases) contributed an estimated $110 million in value added to the WA economy (DCBA, 2020). Ningaloo's economic contribution to WA is attributed to four key types of economic activity, tourism expenditure by international, interstate and WA visitors to the Ningaloo region, commercial fishing in the Exmouth Gulf, recreation activity involving the Reef by residents of the Ningaloo region and management and research relating to the Reef (DCBA, 2020). More than 90% of this value added is attributed to the domestic and international tourists who visit Ningaloo each year (DCBA, 2020). Dark sky tourism flourished in 2023 with an influx of visitors coming together in Exmouth to witness a rare hybrid solar eclipse (GDC, 2023). The natural phenomena brought thousands of visitors both interstate and international to the region in April 2023.

The first Cultural Tourism experience was launched in 2022 on the Ningaloo Coast. Departing from Coral Bay, the Cultural Tour provides visitors the opportunity to experience a unique perspective on the coastline's rich cultural heritage and unique environment. The main marine nature-based tourist activities are concentrated around and within the Ningaloo WHA (GDC, 2022). The Aboriginal AstroTourism Project was launched where First Nations people were consulted on night sky constellations and trained in dark sky tourism. Through this program star gazing experiences were successfully delivered to approximately 665 visitors over 10 nights during the Ningaloo Eclipse (GDC, 2023).

12.4.2 Pilbara Region

Recreation and tourism activities within the Pilbara are of high social value. Tourism is a key economic driver for the Pilbara with more than 1 million visitors to the region every year. Tourism visitation continued to grow in 2022, with the number of visitors to Karajini National Park in 2022 having doubled in comparison to 2020 (PDC, 2022). Multi-year tourism infrastructure development funding has been provided for the Niminjarra Highway to provide easier access to the Karlamilyi National Park and enhance cultural tourism opportunities and to the Whim Creek Hotel to re-establish a tourism destination between Karratha and Hedland (PDC, 2023).

Recreational fishing within the Pilbara region tends to be concentrated in State waters adjacent to population centres. Recreational fishing is known to occur around the Dampier Archipelago with boats launched from boat ramps around Dampier and Karratha. Once at sea, charter vessels may also frequent the waters surrounding the Montebello Islands (Williamson et al., 2006).

12.4.3 Kimberley Region

Tourism is one of the main industries in the Kimberley region, alongside resources, construction, agriculture and retail (KDC, 2022).

Recreation and tourism activities in the Kimberley region occur predominantly in WA State waters (extending offshore 3 NM from the mainland), adjacent to coastal population centres (e.g. Broome), with a peak in activity during the winter months (dry season). These activities include recreational fishing, diving, snorkelling, wildlife watching and boating (Newman et al., 2023b).

Primary dive locations in the Kimberley region include the Rowley Shoals, including Mermaid Reef AMP, Scott Reef, Seringapatam Reef, Ashmore Reef AMP and Cartier Island (Newman et al., 2023b).

12.5 Shipping

Commercial shipping traffic is high within the NWMR with vessel activities including commercial

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

fisheries, tourism such as cruises, international shipping and oil and gas operations. There are 12 ports adjacent to the NWMR, including the major ports of Dampier, Port Hedland and Broome, which are operated by their respective port authorities. These ports handle large tonnages of iron ore and petroleum exports in addition to salt, manganese, feldspar chromite and copper (DEWHA, 2008).

Heavy vessel traffic exists within the Pilbara Port Authority management area which recorded 9594 vessel movements in the Port of Dampier, 6,786 vessel movements in the Port of Port Hedland, and 807 vessel movements in the Port of Ashburton in the 2022/23 reporting period (PPA, 2023). Twenty-six designated anchorages for bulk carriers, petroleum and gas tankers, drilling rigs, offshore platforms, and pipelay vessels are located offshore of Rosemary Island.

In 2012, AMSA established a network of shipping fairways off the northwest coast of Australia. The shipping fairways, while not mandatory, aim to reduce the risk of collision between transiting vessels and offshore infrastructure. The fairways are intended to direct large vessels such as bulk carriers and LNG ships trading to the major ports into pre-defined routes to keep them clear of existing and planned offshore infrastructure (AMSA, 2013).

12.6 Petroleum Basins

The NWMR supports a number of industries including petroleum exploration and production.

Within the NWMR there are seven sedimentary petroleum basins: Northern and Southern Carnarvon basins, Perth, Browse, Roebuck, Offshore Canning and Bonaparte basins (GA, 2023). Of these, the Northern Carnarvon, Browse and Bonaparte basins hold large quantities of gas and comprise most of Australia's reserves of natural gas (DEWHA, 2008), which is reflected by the level of development in the area. In addition to existing facilities, there are proposed developments in the region. This includes proposals to develop gas and condensate from a number of fields within the NWMR.

In addition to the oil and gas industry, other land-based industries depend upon the marine environment in the nearshore area. These include ports, salt mines such as Karratha and Onslow, LNG onshore processing facilities such as Burrup Hub, Thevenard Island, Barrow Island, Varanus Island, and small-scale desalination plants at Barrow Island, Burrup, Cape Preston and Onslow.

12.7 Defence

Key Australian Department of Defence (DoD) operational areas and facilities areas of the NWMR for training and operational activities, include:

- An operating logistics base has been established in Dampier to support vessels patrolling the waters around offshore oil and gas facilities. A dedicated navy administrative support facility is also being constructed at the nearby township of Karratha (DEWHA, 2008).
- The Taylor Barracks are the headquarters of the Pilbara regiment, one of three Regional Force Surveillance Units conducting surveillance and reconnaissance of remote areas of northern Australia. This base is located in Karratha (DoD, n.d.).
- The Royal Australian Air Force currently maintains two 'bare bases' in remote areas of WA that are used for military exercises. One of these is the Royal Australian Air Force Base in Learmonth. The Royal Australian Air Force maintains the Commonwealth Heritage listed Learmonth Air Weapons Range Facility, which is located between Ningaloo Station and the Cape Range National Park. The air training area associated with the Learmonth base extends over the offshore region.
- The Royal Australian Air Force Base Curtin is located on the north coast of WA, south-east of Derby and 170 km east of Broome. It provides support for land, air and sea operations aimed to support Australia's northern approaches.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Naval Communications Station Harold E. Holt is located ~6 km north of Exmouth. The main role of the station is to communicate at very low frequencies (19.8 kHz) with Australian and United States submarines and ships in the eastern Indian Ocean and the western Pacific Ocean (DEWHA, 2008).
- Areas may be subject to Unexploded Ordnance (UXO) as a result of military activities. These are offshore sites where ammunition and explosives have been dumped, or which have been used as live bombing or firing ranges. Defence maintains a record of sites confirmed as, or reasonably suspected of being affected by UXO. There are several suspected UXO sites in the NWMR (Australian Government Defence, n.d.).

APPENDIX A. PROTECTED MATTER SEARCH REPORTS FOR NWMR, SWMR AND NMR

The PMST tool conducts searches on a grid-based function. Accordingly, the PMST results can indicate features or species that do not actually intersect or have a presence in the area. To validate search results, comprehensive literature and scientific expertise is used. As such, only species considered relevant to the scope of this document have been described.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 06-Jun-2024 Summary

Details

Matters of NES

Other Matters Protected by the EPBC Act Extra Information

Caveat Acknowledgements

Figure 1: NWMR PMST subarea 1

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	2
National Heritage Places:	5
Wetlands of International Importance (Ramsar	2
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	9
Listed Threatened Ecological Communities:	1
Listed Threatened Species:	105
Listed Migratory Species:	97

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	65
Commonwealth Heritage Places:	5
Listed Marine Species:	174
Whales and Other Cetaceans:	34
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	29
Habitat Critical to the Survival of Marine Turtles:	5

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	78
Regional Forest Agreements:	None
Nationally Important Wetlands:	8
EPBC Act Referrals:	317
Key Ecological Features (Marine):	13
Biologically Important Areas:	92
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

World Heritage Properties [Resource Information]

Name	State	Legal Status
Shark Bay, Western Australia	WA	Declared property
The Ningaloo Coast	WA	Declared property

National Heritage Places [Resource Information]

Name	State	Legal Status
Historic		
Dirk Hartog Landing Site 1616 - Cape Inscription Area	WA	Listed place
Indigenous		
Dampier Archipelago (including Burrup Peninsula)	WA	Listed place
Natural		
Shark Bay, Western Australia	WA	Listed place
The Ningaloo Coast	WA	Listed place
The West Kimberley	WA	Listed place

Wetlands of International Importance (Ramsar Wetlands) [Resource Information]

Ramsar Site Name	Proximity
Eighty-mile beach	Within Ramsar site
Roebuck bay	Within 10km of Ramsar site

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Listed Threatened Ecological Communities [Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.
Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.

Community Name	Threatened Category	Presence Text
Monsoon vine thickets on the coastal sand dunes of Dampier Peninsula	Endangered	Community likely to occur within area

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Anous tenuirostris melanops Australian Lesser Noddy [26000]	Vulnerable	Breeding known to occur within area
Aphelocephala leucopsis Southern Whiteface [529]	Vulnerable	Species or species habitat known to occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Species or species habitat may occur within area
Erythrotriorchis radiatus Red Goshawk [942]	Endangered	Species or species habitat may occur within area
Erythrura gouldiae Gouldian Finch [413]	Endangered	Species or species habitat known to occur within area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat known to occur within area
Falcunculus frontatus whitei Crested Shrike-tit (northern), Northern Shrike-tit [26013]	Vulnerable	Species or species habitat likely to occur within area
Geophaps smithii blaauwi Partridge Pigeon (western) [66501]	Vulnerable	Species or species habitat likely to occur within area
Leipoa ocellata Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Endangered	Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Species or species habitat may occur within area
Malurus leucopterus edouardi White-winged Fairy-wren (Barrow Island), Barrow Island Black-and-white Fairy-wren [26194]	Vulnerable	Species or species habitat likely to occur within area
Malurus leucopterus leucopterus White-winged Fairy-wren (Dirk Hartog Island), Dirk Hartog Black-and-White Fairy-wren [26004]	Vulnerable	Species or species habitat likely to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area
Pezoporus occidentalis Night Parrot [59350]	Endangered	Species or species habitat may occur within area
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]	Endangered	Species or species habitat may occur within area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Breeding known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Polytelis alexandrae Princess Parrot, Alexandra's Parrot [758]	Vulnerable	Species or species habitat may occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Species or species habitat may occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Tyto novaehollandiae kimberli Masked Owl (northern) [26048]	Vulnerable	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Zanda latirostris listed as Calyptorhynchus latirostris
Carnaby's Black Cockatoo, Short-billed Black-cockatoo [87737] Endangered Species or species habitat likely to occur within area

FISH

Milyeringa veritas
Cape Range Cave Gudgeon, Blind Gudgeon [66676] Vulnerable Species or species habitat known to occur within area

Ophisternon candidum
Blind Cave Eel [66678] Vulnerable Species or species habitat known to occur within area

Thunnus maccoyii
Southern Bluefin Tuna [69402] Conservation Dependent Breeding known to occur within area

MAMMAL

Balaenoptera borealis
Sei Whale [34] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Balaenoptera musculus
Blue Whale [36] Endangered Migration route known to occur within area

Balaenoptera physalus
Fin Whale [37] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Bettongia lesueur Barrow and Boodie Islands subspecies
Boodie, Burrowing Bettong (Barrow and Boodie Islands) [88021] Vulnerable Species or species habitat known to occur within area

Bettongia lesueur lesueur
Burrowing Bettong (Shark Bay), Boodie [66659] Vulnerable Species or species habitat known to occur within area

Bettongia penicillata ogilbyi
Woylie [66844] Endangered Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Dasyurus geoffroii Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat may occur within area
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat known to occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Species or species habitat likely to occur within area
Isoodon auratus auratus Golden Bandicoot (mainland) [66665]	Vulnerable	Species or species habitat likely to occur within area
Isoodon auratus barrowensis Golden Bandicoot (Barrow Island) [66666]	Vulnerable	Species or species habitat known to occur within area
Lagorchestes conspicillatus conspicillatus Spectacled Hare-wallaby (Barrow Island) [66661]	Vulnerable	Species or species habitat known to occur within area
Lagorchestes hirsutus bernieri Rufous Hare-wallaby (Bernier Island) [66662]	Vulnerable	Species or species habitat known to occur within area
Lagorchestes hirsutus Central Australian subspecies Mala, Rufous Hare-Wallaby (Central Australia) [88019]	Endangered	Translocated population known to occur within area
Lagorchestes hirsutus dorreae Rufous Hare-wallaby (Dorre Island) [66663]	Vulnerable	Species or species habitat known to occur within area
Lagostrophus fasciatus fasciatus Banded Hare-wallaby, Merrnine, Marnine, Munning [66664]	Vulnerable	Species or species habitat known to occur within area
Leporillus conditor Wopilkara, Greater Stick-nest Rat [137]	Vulnerable	Translocated population known to occur within area

Scientific Name	Threatened Category	Presence Text
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat known to occur within area
Macrotis lagotis Greater Bilby [282]	Vulnerable	Species or species habitat known to occur within area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Species or species habitat may occur within area
Osphranter robustus isabellinus Barrow Island Wallaroo, Barrow Island Euro [89262]	Vulnerable	Species or species habitat likely to occur within area
Perameles bougainville Shark Bay Bandicoot [278]	Endangered	Species or species habitat known to occur within area
Petrogale concinna monastria Nabarlek (Kimberley) [87607]	Endangered	Species or species habitat known to occur within area
Petrogale lateralis lateralis Black-flanked Rock-wallaby, Mororong, Black-footed Rock Wallaby [66647]	Endangered	Species or species habitat known to occur within area
Phascogale tapoatafa kimberleyensis Kimberley brush-tailed phascogale, Brush-tailed Phascogale (Kimberley) [88453]	Vulnerable	Species or species habitat likely to occur within area
Pseudomys fieldi Shark Bay Mouse, Djoongari, Alice Springs Mouse [113]	Vulnerable	Species or species habitat likely to occur within area
Rhinonicteris aurantia (Pilbara form) Pilbara Leaf-nosed Bat [82790]	Vulnerable	Species or species habitat known to occur within area
Saccolaimus saccolaimus nudicluniatus Bare-rumped Sheath-tailed Bat, Bare-rumped Sheathtail Bat [66889]	Vulnerable	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Trichosurus vulpecula arnhemensis Northern Brushtail Possum [83091]	Vulnerable	Species or species habitat likely to occur within area
Xeromys myoides Water Mouse, False Water Rat, Yirrkoo [66]	Vulnerable	Species or species habitat may occur within area
PLANT		
Caladenia barbarella Small Dragon Orchid, Common Dragon Orchid [68686]	Endangered	Species or species habitat may occur within area
Caladenia hoffmanii Hoffman's Spider-orchid [56719]	Endangered	Species or species habitat likely to occur within area
Eucalyptus beardiana Beard's Mallee [18933]	Vulnerable	Species or species habitat likely to occur within area
Minuria tridens Minnie Daisy [13753]	Vulnerable	Species or species habitat known to occur within area
REPTILE		
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat known to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Ctenotus zastictus Hamelin Ctenotus [25570]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur
Egernia stokesii badia Western Spiny-tailed Skink, Baudin Island Spiny-tailed Skink [64483]	Endangered	Species or species habitat known to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Congregation or aggregation known to occur within area
Lerista nevinae Nevin's Slider [85296]	Endangered	Species or species habitat known to occur within area
Liasis olivaceus barroni Pilbara Olive Python [66699]	Vulnerable	Species or species habitat known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Tiliqua scincoides intermedia Northern Blue-tongued Skink [89838]	Critically Endangered	Species or species habitat known to occur within area
Varanus mertensi Mertens' Water Monitor, Mertens's Water Monitor [1568]	Endangered	Species or species habitat known to occur within area
Varanus mitchelli Mitchell's Water Monitor [1569]	Critically Endangered	Species or species habitat likely to occur within area
SHARK		
Carcharias taurus (west coast population) Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area

Scientific Name	Threatened Category	Presence Text
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat known to occur within area
Centrophorus uyato Little Gulper Shark [68446]	Conservation Dependent	Species or species habitat likely to occur within area
Glyphis garricki Northern River Shark, New Guinea River Shark [82454]	Endangered	Breeding likely to occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Breeding known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat known to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Breeding known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area
SPIDER		
Idiosoma nigrum Shield-backed Trapdoor Spider, Black Rugose Trapdoor Spider [66798]	Vulnerable	Species or species habitat known to occur within area

Listed Migratory Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds	Anous stolidus Common Noddy [825]	Species or species habitat likely to occur within area
	Apus pacificus Fork-tailed Swift [678]	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Foraging, feeding or related behaviour likely to occur within area
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Species or species habitat may occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Breeding known to occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Species or species habitat may occur within area
Onychoprion anaethetus Bridled Tern [82845]		Breeding known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons Little Tern [82849]		Breeding known to occur within area
Sula dactylatra Masked Booby [1021]		Breeding known to occur within area
Sula leucogaster Brown Booby [1022]		Breeding known to occur within area
Sula sula Red-footed Booby [1023]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Species or species habitat may occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species		
Anoxypristis cuspidata Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat known to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Dugong dugon Dugong [28]		Breeding known to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Species or species habitat likely to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Isurus paucus Longfin Mako [82947]		Species or species habitat likely to occur within area
Lamna nasus Porbeagle, Mackerel Shark [83288]		Species or species habitat may occur within area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Congregation or aggregation known to occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Breeding known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat known to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Breeding known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sousa sahulensis as Sousa chinensis Australian Humpback Dolphin [87942]		Breeding known to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Migratory Terrestrial Species		
Cecropis daurica Red-rumped Swallow [80610]		Species or species habitat may occur within area
Cuculus optatus Oriental Cuckoo, Horsfield's Cuckoo [86651]		Species or species habitat may occur within area
Hirundo rustica Barn Swallow [662]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Motacilla cinerea		
Grey Wagtail [642]		Species or species habitat known to occur within area
Motacilla flava		
Yellow Wagtail [644]		Species or species habitat known to occur within area
Migratory Wetlands Species		
Acrocephalus orientalis		
Oriental Reed-Warbler [59570]		Species or species habitat may occur within area
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Arenaria interpres		
Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Calidris acuminata		
Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris alba		
Sanderling [875]		Roosting known to occur within area
Calidris canutus		
Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris melanotos		
Pectoral Sandpiper [858]		Species or species habitat known to occur within area
Calidris pugnax as Philomachus pugnax		
Ruff [91256]		Roosting known to occur within area
Calidris ruficollis		
Red-necked Stint [860]		Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris subminuta Long-toed Stint [861]		Species or species habitat known to occur within area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Roosting known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area
Glareola maldivarum Oriental Pratincole [840]		Roosting known to occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat known to occur within area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting known to occur within area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area
Thalasseus bergii Greater Crested Tern [83000]		Breeding known to occur within area
Tringa brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola Wood Sandpiper [829]		Species or species habitat known to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area
Tringa totanus Common Redshank, Redshank [835]		Roosting known to occur within area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Listed Marine Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
Bird		

Scientific Name	Threatened Category	Presence Text
Acrocephalus orientalis Oriental Reed-Warbler [59570]		Species or species habitat may occur within area overfly marine area
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops Australian Lesser Noddy [26000]	Vulnerable	Breeding known to occur within area
Anseranas semipalmata Magpie Goose [978]		Species or species habitat may occur within area overfly marine area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Foraging, feeding or related behaviour likely to occur within area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris alba Sanderling [875]		Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat known to occur within area overfly marine area
Calidris pugnax as Philomachus pugnax Ruff [91256]		Roosting known to occur within area overfly marine area
Calidris ruficollis Red-necked Stint [860]		Roosting known to occur within area overfly marine area
Calidris subminuta Long-toed Stint [861]		Species or species habitat known to occur within area overfly marine area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area overfly marine area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat known to occur within area
Cecropis daurica as Hirundo daurica Red-rumped Swallow [80610]		Species or species habitat may occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat known to occur within area overfly marine area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Charadrius ruficapillus Red-capped Plover [881]		Roosting known to occur within area overfly marine area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Roosting known to occur within area overfly marine area
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]		Breeding known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Species or species habitat may occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Breeding known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area overfly marine area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Glareola maldivarum Oriental Pratincole [840]		Roosting known to occur within area overfly marine area
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
Himantopus himantopus Pied Stilt, Black-winged Stilt [870]		Roosting known to occur within area overfly marine area
Hirundo rustica Barn Swallow [662]		Species or species habitat known to occur within area overfly marine area
Hydroprogne caspia as Sterna caspia Caspian Tern [808]		Breeding known to occur within area
Larus pacificus Pacific Gull [811]		Breeding known to occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area overfly marine area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area overfly marine area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Species or species habitat may occur within area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat known to occur within area overfly marine area
Motacilla flava Yellow Wagtail [644]		Species or species habitat known to occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting known to occur within area overfly marine area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Endangered		Species or species habitat may occur within area
Golden Bosunbird [26021]		
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area
Pterodroma macroptera Great-winged Petrel [1035]		Foraging, feeding or related behaviour known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Puffinus assimilis Little Shearwater [59363]		Foraging, feeding or related behaviour known to occur within area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area overfly marine area
Stercorarius antarcticus as Catharacta skua Brown Skua [85039]		Species or species habitat may occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Sternula albifrons as Sterna albifrons		
Little Tern [82849]		Breeding known to occur within area

Sternula nereis as Sterna nereis
Fairy Tern [82949] Breeding known to occur within area

Stiltia isabella
Australian Pratincole [818] Roosting known to occur within area overfly marine area

Sula dactylatra
Masked Booby [1021] Breeding known to occur within area

Sula leucogaster
Brown Booby [1022] Breeding known to occur within area

Sula sula
Red-footed Booby [1023] Breeding known to occur within area

Thalassarche carteri
Indian Yellow-nosed Albatross [64464] Vulnerable Species or species habitat may occur within area

Thalassarche cauta
Shy Albatross [89224] Endangered Species or species habitat may occur within area

Thalassarche impavida
Campbell Albatross, Campbell Black-browed Albatross [64459] Vulnerable Species or species habitat may occur within area

Thalassarche melanophris
Black-browed Albatross [66472] Vulnerable Species or species habitat may occur within area

Thalassarche steadi
White-capped Albatross [64462] Vulnerable Species or species habitat may occur within area

Thalasseus bengalensis as Sterna bengalensis
Lesser Crested Tern [66546] Breeding known to occur within area

Thalasseus bergii as Sterna bergii
Greater Crested Tern [83000] Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Tringa brevipes as Heteroscelus brevipes		
Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola		
Wood Sandpiper [829]		Species or species habitat known to occur within area overfly marine area
Tringa nebularia		
Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area overfly marine area
Tringa stagnatilis		
Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area
Tringa totanus		
Common Redshank, Redshank [835]		Roosting known to occur within area overfly marine area
Xenus cinereus		
Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area overfly marine area
Fish Acentronura australe		
Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area
Acentronura larsonae		
Helen's Pygmy Pipehorse [66186]		Species or species habitat may occur within area
Bhanotia fasciolata		
Corrugated Pipefish, Barbed Pipefish [66188]		Species or species habitat may occur within area
Bulbonaricus brauni		
Braun's Pughead Pipefish, Pug-headed Pipefish [66189]		Species or species habitat may occur within area
Campichthys galei		
Gale's Pipefish [66191]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Campichthys tricarinatus Three-keel Pipefish [66192]		Species or species habitat may occur within area
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
Choeroichthys latispinosus Muiron Island Pipefish [66196]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
Corythoichthys amplexus Fijian Banded Pipefish, Brown-banded Pipefish [66199]		Species or species habitat may occur within area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
Corythoichthys intestinalis Australian Messmate Pipefish, Banded Pipefish [66202]		Species or species habitat may occur within area
Corythoichthys schultzi Schultz's Pipefish [66205]		Species or species habitat may occur within area
Cosmocampus banneri Roughridge Pipefish [66206]		Species or species habitat may occur within area
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Doryrhamphus multiannulatus Many-banded Pipefish [66717]		Species or species habitat may occur within area
Doryrhamphus negrosensis Flagtail Pipefish, Masthead Island Pipefish [66213]		Species or species habitat may occur within area
Festucalex scalaris Ladder Pipefish [66216]		Species or species habitat may occur within area
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area
Halicampus nitidus Glittering Pipefish [66224]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus breviceps Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area
Hippocampus subelongatus West Australian Seahorse [66722]		Species or species habitat may occur within area
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area
Lissocampus fatiloquus Prophet's Pipefish [66250]		Species or species habitat may occur within area
Maroubra perserrata Sawtooth Pipefish [66252]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Mitotichthys meraculus Western Crested Pipefish [66259]		Species or species habitat may occur within area
Nannocampus subosseus Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area
Phoxocampus belcheri Black Rock Pipefish [66719]		Species or species habitat may occur within area
Phycodurus eques Leafy Seadragon [66267]		Species or species habitat may occur within area
Phyllopteryx taeniolatus Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area
Pugnaso curtirostris Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Stigmatopora argus Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Stigmatopora nigra Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Urocampus carinirostris Hairy Pipefish [66282]		Species or species habitat may occur within area
Vanacampus margaritifer Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area
Mammal Dugong dugon Dugong [28]		Breeding known to occur within area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Species or species habitat may occur within area
Reptile Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered within area	Species or species habitat known to occur
Aipysurus duboisii Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered within area	Species or species habitat known to occur

Scientific Name	Threatened Category	Presence Text
Aipysurus fuscus Dusky Sea Snake [1119]		Species or species habitat known to occur within area
Aipysurus laevis Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area
Aipysurus mosaicus as Aipysurus eydouxii Mosaic Sea Snake [87261]	Species or species habitat may occur within area	
Aipysurus pooleorum Shark Bay Sea Snake [66061]	Species or species habitat may occur within area	
Aipysurus tenuis Brown-lined Sea Snake, Mjoberg's Sea Snake [1121]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus johnstoni Freshwater Crocodile, Johnston's Crocodile, Johnstone's Crocodile [1773]		Species or species habitat may occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Ephalophis greyae as Ephalophis greyi Mangrove Sea Snake [93738]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis coggeri Cogger's Sea Snake [25925]		Species or species habitat may occur within area
Hydrophis czeblukovi Fine-spined Sea Snake [59233]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis hardwickii as Lapemis hardwickii Spine-bellied Sea Snake [93516]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis peronii as Acalyptophis peronii		
Horned Sea Snake [93509]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus		
Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii		
Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Hydrophis zweiffei as Enhydrina schistosa		
Australian Beaked Sea Snake [93514]		Species or species habitat may occur within area
Lepidochelys olivacea		
Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Congregation or aggregation known to occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera acutorostrata		
Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera bonaerensis		
Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis		
Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Balaenoptera musculus Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Species or species habitat likely to occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Globicephala melas Long-finned Pilot Whale [59282]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Indopacetus pacificus Longman's Beaked Whale [72]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Lagenodelphis hosei Fraser's Dolphin, Sarawak Dolphin [41]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]	Breeding known to occur within area	
Mesoplodon densirostris Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
Mesoplodon ginkgodens Gingko-toothed Beaked Whale, Gingko-toothed Whale, Gingko Beaked Whale [59564]		Species or species habitat may occur within area
Mesoplodon grayi Gray's Beaked Whale, Scamperdown Whale [75]		Species or species habitat may occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Breeding known to occur within area	
Orcinus orca Killer Whale, Orca [46]	Species or species habitat may occur within area	
Peponocephala electra Melon-headed Whale [47]	Species or species habitat may occur within area	
Physeter macrocephalus Sperm Whale [59]	Species or species habitat may occur within area	
Pseudorca crassidens False Killer Whale [48]	Species or species habitat likely to occur within area	
Sousa sahulensis Australian Humpback Dolphin [87942]	Breeding known to occur within area	
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Ancient coastline at 90-120m depth	South-west
Canyons linking the Argo Abyssal Plain with the Scott Plateau	North-west
Canyons linking the Cuvier Abyssal Plain and the Cape Range Peninsula	North-west
Commonwealth waters adjacent to Ningaloo Reef	North-west
Continental Slope Demersal Fish Communities	North-west
Exmouth Plateau	North-west
Glomar Shoals	North-west
Mermaid Reef and Commonwealth waters surrounding Rowley Shoals	North-west
Seringapatam Reef and Commonwealth waters in the Scott Reef Complex	North-west
Wallaby Saddle	North-west
Western demersal slope and associated fish communities	South-west
Western rock lobster	South-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Dolphins		
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Breeding	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 06-Jun-2024 Summary

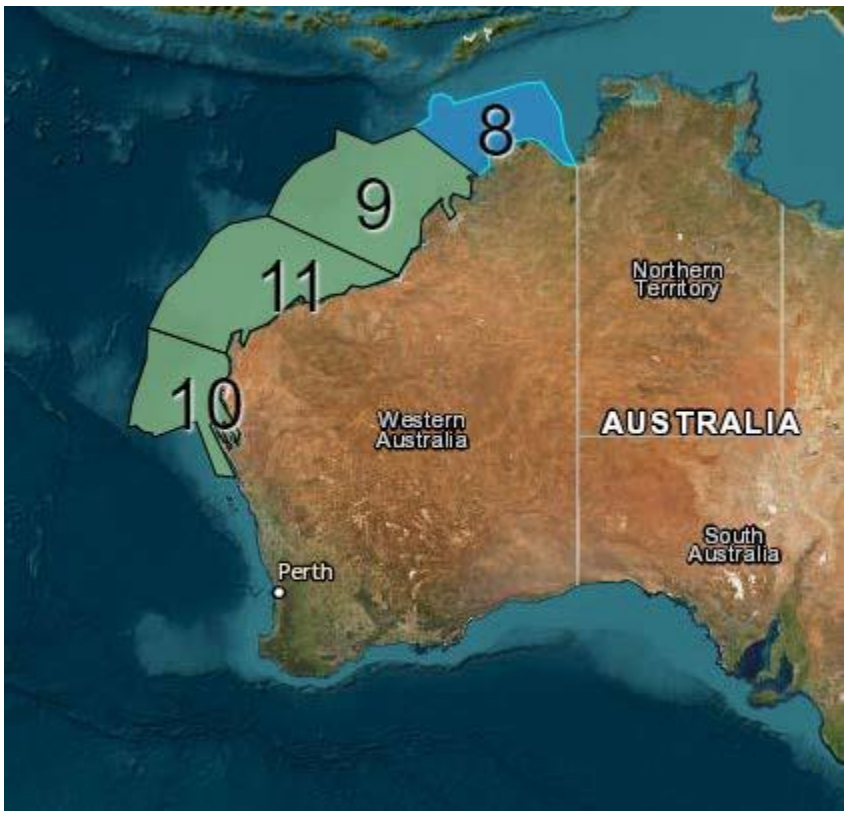
Details

Matters of NES

Other Matters Protected by the EPBC Act Extra Information

Caveat Acknowledgements

NWMR PMST sub area 2 (North area)



Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	None
National Heritage Places:	1
Wetlands of International Importance (Ramsar	2
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	8
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	53
Listed Migratory Species:	64

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	3
Commonwealth Heritage Places:	1
Listed Marine Species:	107
Whales and Other Cetaceans:	27
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	7
Habitat Critical to the Survival of Marine Turtles:	3

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	14
Regional Forest Agreements:	None
Nationally Important Wetlands:	1
EPBC Act Referrals:	118
Key Ecological Features (Marine):	7
Biologically Important Areas:	57
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

National Heritage Places [Resource Information]

Name	State	Legal Status
Natural		
The West Kimberley	WA	Listed place

Wetlands of International Importance (Ramsar Wetlands) [Resource Information]

Ramsar Site Name	Proximity
Ashmore reef national nature reserve	Within Ramsar site
Ord river floodplain	Within 10km of Ramsar site

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Scientific Name	Threatened Category	Presence Text
Acanthophis hawkei Plains Death Adder [83821]	Vulnerable	Species or species habitat may occur within area
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Tiliqua scincoides intermedia Northern Blue-tongued Skink [89838]	Critically Endangered	Species or species habitat known to occur within area
Varanus mertensi Mertens' Water Monitor, Mertens's Water Monitor [1568]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Varanus mitchelli Mitchell's Water Monitor [1569]	Critically Endangered	Species or species habitat likely to occur within area
SHARK		
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Glyphis garricki Northern River Shark, New Guinea River Shark [82454]	Endangered	Species or species habitat known to occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat likely to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species		[Resource Information]

Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
[Pandion haliaetus](#)		
Osprey [952]		Breeding known to occur within area
[Thalasseus bergii](#)		
Greater Crested Tern [83000]		Breeding known to occur within area
[Tringa nebularia](#)		
Common Greenshank, Greenshank [832]	Endangered	Species or species habitat likely to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Campichthys tricarinatus Three-keel Pipefish [66192]		Species or species habitat may occur within area
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
Corythoichthys amplexus Fijian Banded Pipefish, Brown-banded Pipefish [66199]		Species or species habitat may occur within area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
Corythoichthys intestinalis Australian Messmate Pipefish, Banded Pipefish [66202]		Species or species habitat may occur within area
Corythoichthys schultzi Schultz's Pipefish [66205]		Species or species habitat may occur within area
Cosmocampus banneri Roughridge Pipefish [66206]		Species or species habitat may occur within area
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]	Species or species habitat may occur within area	
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]	Species or species habitat may occur within area	
Halicampus spinirostris Spiny-snout Pipefish [66225]	Species or species habitat may occur within area	
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]	Species or species habitat may occur within area	
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammal Dugong dugon Dugong [28]	Breeding known to occur within area	
Reptile Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered within area	Species or species habitat known to occur
Aipysurus duboisii Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat may occur within area
Aipysurus fuscus Dusky Sea Snake [1119]	Species or species habitat known to occur within area	
Aipysurus laevis Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area
Aipysurus mosaicus as Aipysurus eydouxii Mosaic Sea Snake [87261]	Species or species habitat may occur within area	
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus johnstoni Freshwater Crocodile, Johnston's Crocodile, Johnstone's Crocodile [1773]		Species or species habitat may occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis atriceps Black-headed Sea Snake [1101]		Species or species habitat may occur within area
Hydrophis coggeri Cogger's Sea Snake [25925]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis hardwickii as Lapemis hardwickii Spine-bellied Sea Snake [93516]		Species or species habitat may occur within area
Hydrophis inornatus Plain Sea Snake [1107]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis platura as Pelamis platurus		
Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii		
Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Hydrophis zweiffei as Enhydrina schistosa		
Australian Beaked Sea Snake [93514]		Species or species habitat may occur within area
Lepidochelys olivacea		
Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera borealis		
Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus		
Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus		
Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis		
Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
Lagenodelphis hosei Fraser's Dolphin, Sarawak Dolphin [41]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mesoplodon densirostris Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Breeding known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Sousa sahulensis Australian Humpback Dolphin [87942]	Breeding known to occur within area	
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]	Species or species habitat may occur within area	
Steno bredanensis Rough-toothed Dolphin [30]	Species or species habitat may occur within area	
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat likely to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]	Species or species habitat may occur within area	
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Ashmore Reef and Cartier Island and surrounding Commonwealth waters	North-west
Carbonate bank and terrace system of the Sahul Shelf	North-west
Continental Slope Demersal Fish Communities	North-west
Pinnacles of the Bonaparte Basin	North
Pinnacles of the Bonaparte Basin	North-west
Seringapatam Reef and Commonwealth waters in the Scott Reef Complex	North-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Dolphins		
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Breeding	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Calving	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Foraging	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Foraging (high density prey)	Known to occur

Scientific Name	Behaviour	Presence
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Resting	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Breeding	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Breeding	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Calving	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Calving	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging (high density prey)	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging (high density prey)	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Significant habitat	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Significant habitat - unknown behaviour	Likely to occur
Tursiops aduncus Indo-Pacific/Spotted Bottlenose Dolphin [68418]	Calving	Known to occur
Tursiops aduncus Indo-Pacific/Spotted Bottlenose Dolphin [68418]	Foraging	Known to occur
Dugong Dugong dugon Dugong [28]	Breeding	Known to occur

Scientific Name		Behaviour	Presence
Dugong dugon	Dugong [28]	Calving	Known to occur
Dugong dugon	Dugong [28]	Foraging	Known to occur
Dugong dugon	Dugong [28]	Foraging (high density seagrass beds)	Known to occur
Dugong dugon	Dugong [28]	Nursing	Known to occur
Marine Turtles Caretta caretta	Loggerhead Turtle [1763]	Foraging	Known to occur
Chelonia mydas	Green Turtle [1765]	Foraging	Likely to occur
Chelonia mydas	Green Turtle [1765]	Foraging	Known to occur
Chelonia mydas	Green Turtle [1765]	Internesting buffer	Known to occur
Chelonia mydas	Green Turtle [1765]	Internesting buffer	Likely to occur
Chelonia mydas	Green Turtle [1765]	Mating	Likely to occur
Chelonia mydas	Green Turtle [1765]	Nesting	Known to occur
Chelonia mydas	Green Turtle [1765]	Nesting	Likely to occur
Eretmochelys imbricata	Hawksbill Turtle [1766]	Foraging	Likely to occur
Eretmochelys imbricata	Hawksbill Turtle [1766]	Internesting buffer	Likely to occur

Scientific Name	Behaviour	Presence
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting buffer	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Likely to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur
Seabirds Ardenna pacifica Wedge-tailed Shearwater [84292]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur
Fregata minor Greater Frigatebird [1013]	Breeding	Known to occur
Phaethon lepturus White-tailed Tropicbird [1014]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sternula albifrons sinensis Little Tern [82850]	Breeding	Known to occur
Sternula albifrons sinensis Little Tern [82850]	Resting	Known to occur

Scientific Name	Behaviour	Presence
Sula leucogaster Brown Booby [1022]	Breeding	Known to occur
Sula sula Red-footed Booby [1023]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Sharks Rhincodon typus Whale Shark [66680]	Foraging	Known to occur
Whales Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Distribution	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Foraging	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Migration	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Calving	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Migration	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Nursing	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Resting	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements
This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:
-Office of Environment and Heritage, New South Wales

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 11-Jul-2024 Summary

Details

Matters of NES

Other Matters Protected by the EPBC Act Extra Information

Caveat Acknowledgements

Figure 1: NMR PMST area

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	3
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	82
Listed Migratory Species:	82

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	6
Commonwealth Heritage Places:	None
Listed Marine Species:	145
Whales and Other Cetaceans:	25
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	21
Habitat Critical to the Survival of Marine Turtles:	5

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	25
Regional Forest Agreements:	None
Nationally Important Wetlands:	7
EPBC Act Referrals:	80
Key Ecological Features (Marine):	10
Biologically Important Areas:	26
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name Commonwealth Marine Areas (EPBC Act)

Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act)

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		

Arenaria interpres
Ruddy Turnstone [872] Vulnerable Roosting known to occur within area

Calidris acuminata

Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area
Falcunculus frontatus whitei Crested Shrike-tit (northern), Northern Shrike-tit [26013]	Vulnerable	Species or species habitat likely to occur within area
Gallinago hardwickii Latham's Snipe, Japanese Snipe [863]	Vulnerable	Species or species habitat may occur within area
Geophaps smithii smithii Partridge Pigeon (eastern) [64441]	Vulnerable	Species or species habitat known to occur within area
Hirundapus caudacutus White-throated Needletail [682]	Vulnerable	Species or species habitat may occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat likely to occur within area
Limosa lapponica baueri Nunivak Bar-tailed Godwit, Western Alaskan Bar-tailed Godwit [86380]	Endangered	Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Melanodryas cucullata melvillensis Tiwi Islands Hooded Robin, Hooded Robin (Tiwi Islands) [67092]	Critically Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat likely to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area
Probosciger aterrimus macgillivrayi Palm Cockatoo (Australian) [67033]	Vulnerable	Species or species habitat likely to occur within area
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Tyto novaehollandiae kimberli Masked Owl (northern) [26048]	Vulnerable	Species or species habitat known to occur within area
Tyto novaehollandiae melvillensis Tiwi Masked Owl, Tiwi Islands Masked Owl [26049]	Endangered	Species or species habitat known to occur within area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area
FISH		
Thunnus maccoyii Southern Bluefin Tuna [69402]	Conservation Dependent	Species or species habitat may occur within area
MAMMAL		
Antechinus bellus Fawn Antechinus [344]	Vulnerable	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Conilurus penicillatus Brush-tailed Rabbit-rat, Brush-tailed Tree-rat, Pakooma [132]	Vulnerable	Species or species habitat known to occur within area
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat known to occur within area
Hipposideros semoni Semon's Leaf-nosed Bat, Greater Wart-nosed Horseshoe-bat [180]	Vulnerable	Species or species habitat may occur within area
Isoodon auratus auratus Golden Bandicoot (mainland) [66665]	Vulnerable	Species or species habitat known to occur within area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat likely to occur within area
Mesembriomys gouldii gouldii Black-footed Tree-rat (Kimberley and mainland Northern Territory), Djintamoonga, Manbul [87618]	Endangered	Species or species habitat likely to occur within area
Mesembriomys gouldii melvillensis Black-footed Tree-rat (Melville Island) [87619]	Vulnerable	Species or species habitat known to occur within area
Mesembriomys gouldii rattoides Black-footed Tree-rat (north Queensland), Shaggy Rabbit-rat [87620]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Notomys aquilo Northern Hopping-mouse, Woorrentinta [123]	Endangered	Species or species habitat may occur within area
Petrogale concinna canescens Nabarlek (Top End) [87606]	Endangered	Species or species habitat may occur within area
Phascogale pirata Northern Brush-tailed Phascogale [82954]	Vulnerable	Species or species habitat likely to occur within area
Rhinolophus robertsi Large-eared Horseshoe Bat, Greater Large-eared Horseshoe Bat [87639]	Vulnerable	Species or species habitat may occur within area
Saccolaimus saccolaimus nudicluniatus Bare-rumped Sheath-tailed Bat, Bare-rumped Sheathtail Bat [66889]	Vulnerable	Species or species habitat likely to occur within area
Sminthopsis butleri Butler's Dunnart [302]	Vulnerable	Species or species habitat known to occur within area
Trichosurus vulpecula arnhemensis Northern Brushtail Possum [83091]	Vulnerable	Species or species habitat known to occur within area
Xeromys myoides Water Mouse, False Water Rat, Yirrkoo [66]	Vulnerable	Species or species habitat known to occur within area
PLANT		
Bruguiera x hainesii Haines's Orange Mangrove [91351]	Critically Endangered	Species or species habitat may occur within area
Burmannia championii listed as Burmannia sp. Bathurst Island (R.Fensham 1021) [93461] Endangered (listed as Burmannia sp. Bathurst Island		Species or species habitat likely to occur within area
Calophyllum bicolor [11371]	Vulnerable	Species or species habitat may occur within area

Cosmocampus maxweberi Maxweber's Pipefish [66209]	Species or species habitat may occur within area	
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Festucalex cinctus Girdled Pipefish [66214]	Species or species habitat may occur within area	
Filicampus tigris Tiger Pipefish [66217]	Species or species habitat may occur within area	
Halicampus brocki Brock's Pipefish [66219]	Species or species habitat may occur within area	
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]	Species or species habitat may occur within area	
Halicampus macrorhynchus Whiskered Pipefish, Ornate Pipefish [66222]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
[Haliichthys taeniophorus](#) Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area
[Hippichthys cyanospilos](#) Blue-speckled Pipefish, Blue-spotted Pipefish [66228]		Species or species habitat may occur within area
[Hippichthys heptagonus](#) Madura Pipefish, Reticulated Freshwater Pipefish [66229]		Species or species habitat may occur within area
[Hippichthys parvicarinatus](#) Short-keel Pipefish, Short-keeled Pipefish [66230]		Species or species habitat may occur within area
[Hippichthys penicillus](#) Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
[Hippichthys spicifer](#) Belly-barred Pipefish, Banded Freshwater Pipefish [66232]		Species or species habitat may occur within area
[Hippocampus angustus](#) Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
[Hippocampus histrix](#) Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
[Hippocampus kuda](#) Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
[Hippocampus planifrons](#) Flat-face Seahorse [66238]		Species or species habitat may occur within area
[Hippocampus spinosissimus](#) Hedgehog Seahorse [66239]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area
Hippocampus zebra Zebra Seahorse [66241]		Species or species habitat may occur within area
Micrognathus brevirostris thorntail Pipefish, Thorn-tailed Pipefish [66254]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Microphis brachyurus Short-tail Pipefish, Short-tailed River Pipefish [66257]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammal		

Scientific Name	Threatened Category	Presence Text
Dugong dugon		
Dugong [28]	Species or species habitat known to occur within area	
Reptile Aipysurus apraefrontalis		
Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area
Aipysurus duboisii		
Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area
Aipysurus laevis		
Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area
Aipysurus mosaicus as Aipysurus eydouxii		
Mosaic Sea Snake [87261]	Species or species habitat may occur within area	
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus johnstoni		
Freshwater Crocodile, Johnston's Crocodile, Johnstone's Crocodile [1773]		Species or species habitat may occur within area
Crocodylus porosus		
Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Congregation or aggregation known to occur within area
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis atriceps Black-headed Sea Snake [1101]	Species or species habitat may occur within area	
Hydrophis caerulescens Dwarf Sea Snake [1103]	Species or species habitat may occur within area	
Hydrophis coggeri Cogger's Sea Snake [25925]	Species or species habitat may occur within area	
Hydrophis czeblukovi Fine-spined Sea Snake [59233]	Species or species habitat may occur within area	
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis hardwickii as Lapemis hardwickii Spine-bellied Sea Snake [93516]	Species or species habitat may occur within area	
Hydrophis inornatus Plain Sea Snake [1107]	Species or species habitat may occur within area	
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]	Species or species habitat may occur within area	
Hydrophis_macdowelli_as_Hydrophis_mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis melanosoma Black-banded Robust Sea Snake [1109]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis pacificus Pacific Sea Snake, Large-headed Sea Snake [1112]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Hydrophis vorisi Estuarine Sea Snake [25927]		Species or species habitat may occur within area
Hydrophis zweiffei as Enhydrina schistosa Australian Beaked Sea Snake [93514]		Species or species habitat may occur within area
Laticauda colubrina Yellow-lipped Sea Krait [1092]		Species or species habitat may occur within area
Laticauda laticaudata a sea krait [1093]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Breeding known to occur within area
Microcephalophis gracilis as Hydrophis gracilis Graceful Small-headed Sea Snake, Slender Sea Snake [87375]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Parahydrophis mertoni Arafura Smooth Sea Snake, Northern Mangrove Sea Snake [1090]		Species or species habitat may occur within area

Whales and Other Cetaceans [Resource Information]

Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Species or species habitat likely to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Species or species habitat known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Sousa sahulensis Australian Humpback Dolphin [87942]		Breeding known to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Carbonate bank and terrace system of the Sahul Shelf	North-west
Carbonate bank and terrace system of the Van Diemen Rise	North
Gulf of Carpentaria basin	North
Gulf of Carpentaria coastal zone	North
Pinnacles of the Bonaparte Basin	North-west
Pinnacles of the Bonaparte Basin	North
Plateaux and saddle north-west of the Wellesley Islands	North
Shelf break and slope of the Arafura Shelf	North
Submerged coral reefs of the Gulf of Carpentaria	North
Tributary Canyons of the Arafura Depression	North

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Dolphins		
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Breeding	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging	Likely to occur
Tursiops aduncus Indo-Pacific/Spotted Bottlenose Dolphin [68418]	Breeding	Likely to occur
Marine Turtles	Caretta caretta	
Loggerhead Turtle [1763]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Foraging	Likely to occur
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting	Likely to occur
Dermochelys coriacea Leatherback Turtle [1768]	Internesting	Likely to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting	Likely to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Likely to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Internesting	Likely to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting	Likely to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Seabirds		

Scientific Name	Behaviour	Presence
Anous stolidus Common Noddy [825]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Foraging	Likely to occur
Onychoprion anaethetus Bridled Tern [82845]	Breeding	Known to occur
Onychoprion anaethetus Bridled Tern [82845]	Breeding (high numbers)	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding (high numbers)	Known to occur
Sula leucogaster Brown Booby [1022]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Thalasseus bergii Crested Tern [83000]	Breeding	Known to occur
Thalasseus bergii Crested Tern [83000]	Breeding (high numbers)	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 10-Jun-2024 Summary

Details

Matters of NES

Other Matters Protected by the EPBC Act Extra Information

Caveat Acknowledgements

Figure 1: SWMR PMST sub area 1 (labelled '2')

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	3
Wetlands of International Importance (Ramsar	6
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	3
Listed Threatened Ecological Communities:	9
Listed Threatened Species:	141
Listed Migratory Species:	84

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	240
Commonwealth Heritage Places:	4
Listed Marine Species:	123
Whales and Other Cetaceans:	39
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	29
Habitat Critical to the Survival of Marine Turtles:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	63
Regional Forest Agreements:	1
Nationally Important Wetlands:	5
EPBC Act Referrals:	131
Key Ecological Features (Marine):	11
Biologically Important Areas:	33
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

World Heritage Properties [Resource Information]

Name	State	Legal Status
Australian Convict Sites (Fremantle Prison)	WA	Declared property

National Heritage Places [Resource Information]

Name	State	Legal Status
Historic		
Fremantle Prison (former)	WA	Listed place
Indigenous		
Cheetup Rock Shelter	WA	Listed place
Natural		
Fitzgerald River National Park	WA	Listed place

Wetlands of International Importance (Ramsar Wetlands) [Resource Information]

Ramsar Site Name	Proximity
Becher point wetlands	Within Ramsar site
Forrestdale and thomsons lakes	Within 10km of Ramsar site
Lake gore	Within Ramsar site
Lake warden system	Within 10km of Ramsar site
Peel-yalgorup system	Within Ramsar site
Vasse-wonnerup system	Within Ramsar site

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act)

Listed Threatened Ecological Communities [Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.
Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.

Community Name	Threatened Category	Presence Text
Aquatic Root Mat Community 3 in Caves of the Leeuwin Naturaliste Ridge	Endangered	Community known to occur within area
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Empodisma peatlands of southwestern Australia	Endangered	Community likely to occur within area
Honeymyrtle shrubland on limestone ridges of the Swan Coastal Plain Bioregion	Critically Endangered	Community likely to occur within area
Proteaceae Dominated Kwongkan Shrublands of the Southeast Coastal Floristic Province of Western Australia	Endangered	Community likely to occur within area
Sedgelands in Holocene dune swales of the southern Swan Coastal Plain	Endangered	Community known to occur within area
Subtropical and Temperate Coastal Saltmarsh	Vulnerable	Community likely to occur within area
Thrombolite (microbial) community of coastal freshwater lakes of the Swan Coastal Plain (Lake Richmond)	Endangered	Community known to occur within area
Tuart (Eucalyptus gomphocephala) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Anous tenuirostris melanops Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area
Aphelocephala leucopsis Southern Whiteface [529]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna grisea Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Atrichornis clamosus Noisy Scrub-bird, Tjimiluk [654]	Endangered	Species or species habitat known to occur within area
Botaurus poiciloptilus Australasian Bittern [1001]	Endangered	Species or species habitat known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area
Calyptorhynchus banksii naso Forest Red-tailed Black-Cockatoo, Karrak [67034]	Vulnerable	Species or species habitat known to occur within area
Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978]	Vulnerable	Breeding known to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Dasyornis longirostris Western Bristlebird [515]	Endangered	Species or species habitat known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area
Halobaena caerulea Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area
Leipoa ocellata Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Pachyptila turtur subantarctica Fairy Prion (southern) [64445]	Vulnerable	Species or species habitat known to occur within area
Pezoporus flaviventris Western Ground Parrot, Kyloring [84650]	Critically Endangered	Species or species habitat may occur within area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat known to occur within area
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area
Psophodes nigrogularis nigrogularis Western Heath Whipbird [64449]	Endangered	Species or species habitat known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area
Thalassarche chrysostoma Grey-headed Albatross [66491]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area
Zanda baudinii listed as Calyptorhynchus baudinii Baudin's Cockatoo, Baudin's Black-Cockatoo, Long-billed Black-cockatoo [87736]	Endangered	Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Zanda latirostris listed as Calyptorhynchus latirostris		
Carnaby's Black Cockatoo, Short-billed Black-cockatoo [87737]	Endangered	Breeding known to occur within area
CRUSTACEAN		
Engaewa pseudoreducta		
Margaret River Burrowing Crayfish [82674]	Critically Endangered	Species or species habitat may occur within area
Engaewa reducta		
Dunsborough Burrowing Crayfish [82675]	Critically Endangered	Species or species habitat may occur within area
FISH		
Galaxias truttaceus (Western Australian population)		
Western Trout Minnow [89857]	Endangered	Species or species habitat known to occur within area
Galaxiella nigrostriata		
Blackstriped Dwarf Galaxias, Black-stripe Minnow [88677]	Endangered	Species or species habitat known to occur within area
Hoplostethus atlanticus		
Orange Roughy, Deep-sea Perch, Red Roughy [68455]	Conservation Dependent	Species or species habitat likely to occur within area
Nannatherina balstoni		
Balston's Pygmy Perch [66698]	Vulnerable	Species or species habitat known to occur within area
Thunnus maccoyii		
Southern Bluefin Tuna [69402]	Conservation Dependent	Species or species habitat known to occur within area
INSECT		
Hesperocolletes douglasi		
Douglas' Broad-headed Bee, Rottnest Bee [66734]	Critically Endangered	Species or species habitat may occur within area
Trioza barrettae		
Banksia brownii plant louse [87805]	Endangered	Species or species habitat known to occur within area
MAMMAL		

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Bettongia penicillata ogilbyi Woylie [66844]	Endangered	Species or species habitat known to occur within area
Dasyurus geoffroii Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat known to occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat may occur within area
Myrmecobius fasciatus Numbat [294]	Endangered	Species or species habitat may occur within area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Parantechinus apicalis Dibbler [313]	Endangered	Species or species habitat known to occur within area
Petrogale lateralis hacketti Recherche Rock-wallaby [66849]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Petrogale lateralis lateralis Black-flanked Rock-wallaby, Moororong, Black-footed Rock Wallaby [66647]	Endangered	Translocated population known to occur within area
Phascogale calura Red-tailed Phascogale, Red-tailed Wambenger, Kenngoor [316]	Vulnerable	Species or species habitat may occur within area
Potorous gilbertii Gilbert's Potoroo, Ngilkat [66642]	Critically Endangered	Species or species habitat known to occur within area
Pseudocheirus occidentalis Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Breeding known to occur within area
Pseudomys shortridgei Heath Mouse, Dayang, Heath Rat [77]	Endangered	Species or species habitat likely to occur within area
Setonix brachyurus Quokka [229]	Vulnerable	Species or species habitat known to occur within area
OTHER		
Westralunio carteri Carter's Freshwater Mussel, Freshwater Mussel [86266]	Vulnerable	Species or species habitat known to occur within area
PLANT		
Adenanthos dobagii Fitzgerald Woollybush [21253]	Endangered	Species or species habitat likely to occur within area
Adenanthos ellipticus Oval-leaf Adenanthos [4570]	Vulnerable	Species or species habitat likely to occur within area
Andersonia gracilis Slender Andersonia [14470]	Endangered	Species or species habitat may occur within area
Andersonia pinaster Two Peoples Bay Andersonia [67444]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Anigozanthos bicolor subsp. minor Little Kangaroo Paw, Two-coloured Kangaroo Paw, Small Two-colour Kangaroo Paw [21241]	Endangered	Species or species habitat likely to occur within area
Banksia brownii Brown's Banksia, Feather-leaved Banksia [8277]	Critically Endangered	Species or species habitat known to occur within area
Banksia nivea subsp. uliginosa Swamp Honeypot [82766]	Endangered	Species or species habitat may occur within area
Banksia squarrosa subsp. argillacea Whicher Range Dryandra [82769]	Vulnerable	Species or species habitat likely to occur within area
Banksia verticillata Granite Banksia, Albany Banksia, River Banksia [8333]	Vulnerable	Species or species habitat known to occur within area
Boronia clavata Bremer Boronia [5538]	Endangered	Species or species habitat may occur within area
Brachyscias verecundus Ironstone Brachyscias [81321]	Critically Endangered	Species or species habitat may occur within area
Caladenia busselliana Bussell's Spider-orchid [24369]	Endangered	Species or species habitat likely to occur within area
Caladenia caesarea subsp. maritima Cape Spider-orchid [64856]	Endangered	Species or species habitat known to occur within area
Caladenia excelsa Giant Spider-orchid [56717]	Endangered	Species or species habitat likely to occur within area
Caladenia granitora [65292]	Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Caladenia harringtoniae Harrington's Spider-orchid, Pink Spider-orchid [56786]	Vulnerable	Species or species habitat may occur within area
Caladenia huegelii King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid [7309]	Endangered	Species or species habitat known to occur within area
Caladenia lodgeana Lodge's Spider-orchid [68664]	Critically Endangered	Species or species habitat likely to occur within area
Caladenia procera Carbunup King Spider Orchid [68679]	Critically Endangered	Species or species habitat known to occur within area
Caladenia viridescens Dunsborough Spider-orchid [56776]	Endangered	Species or species habitat known to occur within area
Calectasia cyanea Blue Tinsel Lily [7669]	Critically Endangered	Species or species habitat likely to occur within area
Chamelaucium lullfitzii listed as Chamelaucium sp. Gingin (N.G.Marchant 6) Gingin Wax [92777]	Endangered (listed as Chamelaucium sp. Gingin	Species or species habitat likely to occur within area
Chamelaucium sp. S coastal plain (R.D.Royce 4872) Royce's Waxflower [87814]	Vulnerable	Species or species habitat likely to occur within area
Chordifex abortivus Manypeaks Rush [64868]	Endangered	Species or species habitat likely to occur within area
Commersonia apella Many-flowered Commersonia [86877]	Critically Endangered	Species or species habitat known to occur within area
Coopernookia georgei Mauve Coopernookia [21218]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Daviesia obovata Paddle-leaf Daviesia [17311]	Endangered	Species or species habitat likely to occur within area
Diuris drummondii Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat likely to occur within area
Diuris micrantha Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat known to occur within area
Diuris purdiei Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat may occur within area
Drakaea elastica Glossy-leafed Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat likely to occur within area
Drakaea micrantha Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat likely to occur within area
Eucalyptus argutifolia Yanchep Mallee, Wabling Hill Mallee [24263]	Vulnerable	Species or species habitat may occur within area
Eucalyptus insularis Twin Peak Island Mallee [3057]	Endangered	Species or species habitat likely to occur within area
Eucalyptus x phylacis Meelup Mallee [87817]	Endangered	Species or species habitat known to occur within area
Gastrolobium papilio Butterfly-leaved Gastrolobium [78415]	Endangered	Species or species habitat may occur within area
Grevillea elongata Ironstone Grevillea [64578]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Grevillea infundibularis Fan-leaf Grevillea [5772]	Endangered	Species or species habitat likely to occur within area
Isopogon uncinatus Albany Cone Bush, Hook-leaf Isopogon [20871]	Endangered	Species or species habitat likely to occur within area
Kennedia glabrata Northcliffe Kennedia [16452]	Vulnerable	Species or species habitat known to occur within area
Lambertia echinata subsp. echinata Prickly Honeysuckle [56729]	Endangered	Species or species habitat known to occur within area
Lambertia echinata subsp. occidentalis Western Prickly Honeysuckle [64528]	Endangered	Species or species habitat may occur within area
Morelotia australiensis listed as Tetraria australiensis Southern Tetraria [92784]	Vulnerable	Species or species habitat may occur within area
Petrophile latericola Laterite Petrophile [64532]	Endangered	Species or species habitat may occur within area
Phaius australis Lesser Swamp-orchid [5872]	Endangered	Species or species habitat may occur within area
Reedia spathacea Reedia [2995]	Critically Endangered	Species or species habitat may occur within area
Ricinocarpos trichophorus Barrens Wedding Bush [19931]	Endangered	Species or species habitat may occur within area
Sphenotoma drummondii Mountain Paper-heath [21160]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Stylidium galioides		
Yellow Mountain Triggerplant [4666]	Vulnerable	Species or species habitat may occur within area
Synaphea sp. Fairbridge Farm (D.Papenfus 696)		
Selena's Synaphea [82881]	Critically Endangered	Species or species habitat may occur within area
Verticordia crebra		
[55678]	Vulnerable	Species or species habitat likely to occur within area
Verticordia densiflora var. pedunculata		
Long-stalked Featherflower [55689]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. ananeotes		
Tufted Plumed Featherflower [23871]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. vassensis		
Vasse Featherflower [55804]	Endangered	Species or species habitat may occur within area
Wurmbea calcicola		
Naturaliste Nancy [64691]	Endangered	Species or species habitat known to occur within area

REPTILE

Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
[Natator depressus](#) Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

SHARK

[Carcharias taurus (west coast population)](#) Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area
[Carcharodon carcharias](#) White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
[Centrophorus uyato](#) Little Gulper Shark [68446]	Conservation Dependent	Species or species habitat likely to occur within area
[Galeorhinus galeus](#) School Shark, Eastern School Shark, Snapper Shark, Tope, Soupfin Shark [68453]	Conservation Dependent	Species or species habitat may occur within area
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
[Rhincodon typus](#) Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
[Sphyrna lewini](#) Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
[Anous stolidus](#) Common Noddy [825]		Species or species habitat likely to occur within area
[Apus pacificus](#) Fork-tailed Swift [678]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Onychoprion anaethetus
Bridled Tern [82845] Breeding known to occur within area

Phaethon rubricauda
Red-tailed Tropicbird [994] Breeding known to occur within area

Phoebetria fusca
Sooty Albatross [1075] Vulnerable Species or species habitat likely to occur within area

Sterna dougallii
Roseate Tern [817] Breeding known to occur within area

Sternula albifrons
Little Tern [82849] Species or species habitat may occur within area

Thalassarche carteri
Indian Yellow-nosed Albatross [64464] Vulnerable Species or species habitat likely to occur within area

Thalassarche cauta
Shy Albatross [89224] Endangered Foraging, feeding or related behaviour likely to occur within area

Thalassarche chrysostoma
Grey-headed Albatross [66491] Endangered Species or species habitat may occur within area

Thalassarche impavida
Campbell Albatross, Campbell Black-browed Albatross [64459] Vulnerable Species or species habitat may occur within area

Thalassarche melanophris
Black-browed Albatross [66472] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]	Species or species habitat likely to occur within area	
Lagenorhynchus obscurus Dusky Dolphin [43]	Species or species habitat likely to occur within area	
Lamna nasus Porbeagle, Mackerel Shark [83288]	Species or species habitat likely to occur within area	
Megaptera novaeangliae Humpback Whale [38]	Foraging, feeding or related behaviour known to occur within area	
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]	Species or species habitat known to occur within area	
Mobula birostris as Manta birostris Giant Manta Ray [90034]	Species or species habitat known to occur within area	
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Orcinus orca Killer Whale, Orca [46]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
[Physeter macrocephalus](#) Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
[Rhincodon typus](#) Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Migratory Terrestrial Species [Motacilla cinerea](#) Grey Wagtail [642]		Species or species habitat known to occur within area
Migratory Wetlands Species [Actitis hypoleucos](#) Common Sandpiper [59309]		Species or species habitat known to occur within area
[Arenaria interpres](#) Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
[Calidris acuminata](#) Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
[Calidris alba](#) Sanderling [875]		Roosting known to occur within area
[Calidris canutus](#) Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
[Calidris ferruginea](#) Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
[Calidris melanotos](#) Pectoral Sandpiper [858]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris pugnax as Philomachus pugnax Ruff [91256]		Roosting known to occur within area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Gallinago megala
Swinhoe's Snipe [864] Roosting likely to occur within area

Gallinago stenura
Pin-tailed Snipe [841] Roosting likely to occur within area

Glareola maldivarum
Oriental Pratincole [840] Species or species habitat known to occur within area

Limicola falcinellus
Broad-billed Sandpiper [842] Roosting known to occur within area

Limosa lapponica
Bar-tailed Godwit [844] Species or species habitat known to occur within area

Limosa limosa
Black-tailed Godwit [845] Endangered Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area

Numenius minutus
Little Curlew, Little Whimbrel [848] Roosting likely to occur within area

Numenius phaeopus
Whimbrel [849]Roosting known to occur within area

Pandion haliaetus
Osprey [952] Breeding known to occur within area

Phalaropus lobatus
Red-necked Phalarope [838] Roosting known to occur within area

Pluvialis fulva
Pacific Golden Plover [25545] Roosting known to occur within area

Pluvialis squatarola
Grey Plover [865] Vulnerable Roosting known to occur within area

Thalasseus bergii
Greater Crested Tern [83000] Breeding known to occur within area

Tringa brevipes
Grey-tailed Tattler [851] Roosting known to occur within area

Tringa glareola
Wood Sandpiper [829] Roosting known to occur within area

Tringa nebularia
Common Greenshank, Greenshank Endangered Species or species habitat known to occur within area [832]

Tringa stagnatilis
Marsh Sandpiper, Little Greenshank Roosting known to occur within area [833]

Tringa totanus
Common Redshank, Redshank [835] Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Xenus cinereus		
Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Listed Marine Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Bird		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus		
Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops		
Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea as Puffinus griseus Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris as Puffinus tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris alba Sanderling [875]		Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text

Calidris melanotos
Pectoral Sandpiper [858] Species or species habitat known to occur within area overfly marine area

Calidris pugnax as Philomachus pugnax
Ruff [91256] Roosting known to occur within area overfly marine area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area overfly marine area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area overfly marine area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area overfly marine area

Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978] Vulnerable Breeding known to occur within area overfly marine area

Chalcites osculans as Chrysococcyx osculans
Black-eared Cuckoo [83425] Species or species habitat likely to occur within area overfly marine area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area overfly marine area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Charadrius ruficapillus
Red-capped Plover [881] Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]	Breeding known to occur within area	
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Eudyptula minor Little Penguin [1085]		Breeding known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area overfly marine area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area overfly marine area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text

Haliaeetus leucogaster
White-bellied Sea-Eagle [943] Species or species habitat known to occur within area

Halobaena caerulea
Blue Petrel [1059] Vulnerable Species or species habitat may occur within area

Himantopus himantopus
Pied Stilt, Black-winged Stilt [870] Roosting known to occur within area overfly marine area

Hydroprogne caspia as Sterna caspia
Caspian Tern [808] Breeding known to occur within area

Larus dominicanus
Kelp Gull [809] Breeding known to occur within area

Larus pacificus
Pacific Gull [811] Breeding known to occur within area

Limicola falcinellus
Broad-billed Sandpiper [842] Roosting known to occur within area overfly marine area

Limosa lapponica
Bar-tailed Godwit [844] Species or species habitat known to occur within area

Limosa limosa
Black-tailed Godwit [845] Endangered Roosting known to occur within area overfly marine area

Macronectes giganteus
Southern Giant-Petrel, Southern Giant Petrel [1060] Endangered Species or species habitat may occur within area

Macronectes halli
Northern Giant Petrel [1061] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat known to occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area overfly marine area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pachyptila turtur Fairy Prion [1066]		Species or species habitat known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pelagodroma marina White-faced Storm-Petrel [1016]		Breeding known to occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Phalacrocorax fuscescens Black-faced Cormorant [59660]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Phalaropus lobatus Red-necked Phalarope [838]		Roosting known to occur within area
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area
Pterodroma macroptera Great-winged Petrel [1035]		Breeding known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Puffinus assimilis Little Shearwater [59363]		Breeding known to occur within area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area overfly marine area
Stercorarius antarcticus as Catharacta skua Brown Skua [85039]		Species or species habitat may occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Sternula nereis as Sterna nereis Fairy Tern [82949]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area
Thalassarche chrysostoma Grey-headed Albatross [66491]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Thalasseus bergii as Sterna bergii Greater Crested Tern [83000]		Breeding known to occur within area
Thinornis cucullatus as Thinornis rubricollis Hooded Plover, Hooded Dotterel [87735]		Species or species habitat known to occur within area overfly marine area
Tringa brevipes as Heteroscelus brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola Wood Sandpiper [829]		Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
[Tringa nebularia](#) Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area overfly marine area
[Tringa stagnatilis](#) Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area
[Tringa totanus](#) Common Redshank, Redshank [835]		Roosting known to occur within area overfly marine area
[Xenus cinereus](#) Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area overfly marine area
Fish [Acentronura australe](#) Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area
[Campichthys galei](#) Gale's Pipefish [66191]		Species or species habitat may occur within area
[Choeroichthys suillus](#) Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
[Halicampus brocki](#) Brock's Pipefish [66219]		Species or species habitat may occur within area
[Heraldia nocturna](#) Upside-down Pipefish, Eastern Upside-down Pipefish, Eastern Upside-down Pipefish [66227]		Species or species habitat may occur within area
[Hippocampus angustus](#) Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
[Hippocampus breviceps](#) Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus subelongatus West Australian Seahorse [66722]	Species or species habitat may occur within area	
Histiogamphelus cristatus Rhino Pipefish, Macleay's Crested Pipefish, Ring-back Pipefish [66243]		Species or species habitat may occur within area
Leptoichthys fistularius Brushtail Pipefish [66248]	Species or species habitat may occur within area	
Lissocampus caudalis Australian Smooth Pipefish, Smooth Pipefish [66249]		Species or species habitat may occur within area
Lissocampus fatiloquus Prophet's Pipefish [66250]	Species or species habitat may occur within area	
Lissocampus runa Javelin Pipefish [66251]	Species or species habitat may occur within area	
Maroubra perserrata Sawtooth Pipefish [66252]	Species or species habitat may occur within area	
Mitotichthys meraculus Western Crested Pipefish [66259]	Species or species habitat may occur within area	
Nannocampus subosseus Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area
Notiocampus ruber Red Pipefish [66265]	Species or species habitat may occur within area	
Phycodurus eques Leafy Seadragon [66267]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Phyllopteryx taeniolatus Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area
Pugnaso curtirostris Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Stigmatopora argus Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area
Stigmatopora nigra Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Urocampus carinirostris Hairy Pipefish [66282]		Species or species habitat may occur within area
Vanacampus margaritifer Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area
Vanacampus phillipi Port Phillip Pipefish [66284]		Species or species habitat may occur within area
Vanacampus poecilolaemus Longsnout Pipefish, Australian Long- snout Pipefish, Long-snouted Pipefish [66285]		Species or species habitat may occur within area
Mammal Arctocephalus forsteri Long-nosed Fur-seal, New Zealand Fur-seal [20]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Reptile Aipysurus pooleorum Shark Bay Sea Snake [66061]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Berardius arnuxii Arnoux's Beaked Whale [70]		Species or species habitat may occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Globicephala melas Long-finned Pilot Whale [59282]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area

Hyperoodon planifrons
Southern Bottlenose Whale [71] Species or species habitat may occur within area

Kogia breviceps
Pygmy Sperm Whale [57] Species or species habitat may occur within area

Kogia sima
Dwarf Sperm Whale [85043] Species or species habitat may occur within area

Lagenorhynchus obscurus
Dusky Dolphin [43] Species or species habitat likely to occur within area

Lissodelphis peronii
Southern Right Whale Dolphin [44] Species or species habitat may occur within area

Megaptera novaeangliae
Humpback Whale [38] Foraging, feeding or related behaviour known to occur within area

Mesoplodon bowdoini
Andrew's Beaked Whale [73] Species or species habitat may occur within area

Mesoplodon densirostris Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
Mesoplodon ginkgodens Gingko-toothed Beaked Whale, Gingko-toothed Whale, Gingko Beaked Whale [59564]		Species or species habitat may occur within area
Mesoplodon grayi Gray's Beaked Whale, Scamperdown Whale [75]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Mesoplodon hectori Hector's Beaked Whale [76]		Species or species habitat may occur within area
Mesoplodon layardii Strap-toothed Beaked Whale, Strap-toothed Whale, Layard's Beaked Whale [25556]		Species or species habitat may occur within area
Mesoplodon mirus True's Beaked Whale [54]		Species or species habitat may occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Tasmacetus shepherdi Shepherd's Beaked Whale, Tasman Beaked Whale [55]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]	Species or species habitat may occur within area	
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Albany Canyons group and adjacent shelf break	South-west
Ancient coastline at 90-120m depth	South-west
Cape Mentelle upwelling	South-west

Name	Region
Commonwealth marine environment surrounding the Recherche Archipelago	South-west
Commonwealth marine environment within and adjacent	South-west to Geographe Bay
Commonwealth marine environment within and adjacent	South-west to the west coast inshore lagoons
Diamantina Fracture Zone	South-west
Naturaliste Plateau	South-west
Perth Canyon and adjacent shelf break, and other west coast canyons	South-west
Western demersal slope and associated fish communities	South-west
Western rock lobster	South-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Seabirds		
Ardenna carneipes Flesh-footed Shearwater [82404]	Aggregation	Known to occur
Ardenna carneipes Flesh-footed Shearwater [82404]	Foraging (in high numbers)	Known to occur
Ardenna pacifica Wedge-tailed Shearwater [84292]	Foraging (in high numbers)	Known to occur
Ardenna tenuirostris Short-tailed Shearwater [82652]	Foraging (in high numbers)	Known to occur
Eudyptula minor Little Penguin [1085] (provisioning young)	Foraging	Known to occur
Hydroprogne caspia Caspian Tern [808] (provisioning young)	Foraging	Known to occur
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Former Range

Scientific Name	Behaviour	Presence
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Known to occur
Onychoprion anaethetus Bridled Tern [82845]	Foraging (in high numbers)	Known to occur
Onychoprion fuscata Sooty Tern [82847]	Foraging	Known to occur
Pelagodroma marina White-faced Storm petrel [1016]	Foraging (in high numbers)	Known to occur
Phalacrocorax fuscescens Black-faced Cormorant [59660]	Foraging	Known to occur
Pterodroma macroptera macroptera Great-winged Petrel (macroptera race) [1035]	Foraging (provisioning young)	Known to occur
Pterodroma mollis Soft-plumaged Petrel [1036]	Foraging (in high numbers)	Known to occur
Puffinus assimilis tunneyi Little Shearwater [59363]	Foraging (in high numbers)	Known to occur
Sterna dougallii Roseate Tern [817]	Foraging	Known to occur
Sternula nereis Fairy Tern [82949]	Foraging (in high numbers)	Known to occur
Thalassarche chlororhynchos bassi Indian Yellow-nosed Albatross [85249]	Foraging (in high numbers)	Known to occur
Seals Neophoca cinerea Australian Sea Lion [22]	Foraging (male)	Likely to occur

Physeter macrocephalus Sperm Whale [59]	Foraging (abundant food source)	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements
This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 10-Jun-2024

Summary Details
Matters of NES
Other Matters Protected by the EPBC Act Extra Information
Caveat Acknowledgements

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	3
Wetlands of International Importance (Ramsar	6
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	3
Listed Threatened Ecological Communities:	9
Listed Threatened Species:	141
Listed Migratory Species:	84

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	240
Commonwealth Heritage Places:	4
Listed Marine Species:	123
Whales and Other Cetaceans:	39
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	29
Habitat Critical to the Survival of Marine Turtles:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	63
Regional Forest Agreements:	1
Nationally Important Wetlands:	5
EPBC Act Referrals:	131
Key Ecological Features (Marine):	11
Biologically Important Areas:	33
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

World Heritage Properties [Resource Information]

Name	State	Legal Status
Australian Convict Sites (Fremantle Prison)	WA	Declared property

National Heritage Places [Resource Information]

Name	State	Legal Status
Historic		
Fremantle Prison (former)	WA	Listed place
Indigenous		
Cheetup Rock Shelter	WA	Listed place
Natural		
Fitzgerald River National Park	WA	Listed place

Wetlands of International Importance (Ramsar Wetlands) [Resource Information]

Ramsar Site Name	Proximity
Becher point wetlands	Within Ramsar site
Forrestdale and thomsons lakes	Within 10km of Ramsar site
Lake gore	Within Ramsar site
Lake warden system	Within 10km of Ramsar site
Peel-yalgorup system	Within Ramsar site
Vasse-wonnerup system	Within Ramsar site

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act)

Listed Threatened Ecological Communities [Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.
Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.

Community Name	Threatened Category	Presence Text
Aquatic Root Mat Community 3 in Caves of the Leeuwin Naturaliste Ridge	Endangered	Community known to occur within area
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Empodisma peatlands of southwestern Australia	Endangered	Community likely to occur within area
Honeymyrtle shrubland on limestone ridges of the Swan Coastal Plain Bioregion	Critically Endangered	Community likely to occur within area
Proteaceae Dominated Kwongkan Shrublands of the Southeast Coastal Floristic Province of Western Australia	Endangered	Community likely to occur within area
Sedgelands in Holocene dune swales of the southern Swan Coastal Plain	Endangered	Community known to occur within area
Subtropical and Temperate Coastal Saltmarsh	Vulnerable	Community likely to occur within area
Thrombolite (microbial) community of coastal freshwater lakes of the Swan Coastal Plain (Lake Richmond)	Endangered	Community known to occur within area
Tuart (Eucalyptus gomphocephala) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Anous tenuirostris melanops Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area
Aphelocephala leucopsis Southern Whiteface [529]	Vulnerable	Species or species habitat may occur within area

Daviesia obovata Paddle-leaf Daviesia [17311]	Endangered	Species or species habitat likely to occur within area
Diuris drummondii Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat likely to occur within area
Diuris micrantha Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat known to occur within area
Diuris purdiei Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat may occur within area
Drakaea elastica Glossy-leafed Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat likely to occur within area
Drakaea micrantha Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat likely to occur within area
Eucalyptus argutifolia Yanchep Mallee, Wabling Hill Mallee [24263]	Vulnerable	Species or species habitat may occur within area
Eucalyptus insularis Twin Peak Island Mallee [3057]	Endangered	Species or species habitat likely to occur within area
Eucalyptus x phylacis Meelup Mallee [87817]	Endangered	Species or species habitat known to occur within area
Gastrolobium papilio Butterfly-leaved Gastrolobium [78415]	Endangered	Species or species habitat may occur within area
Grevillea elongata Ironstone Grevillea [64578]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Grevillea infundibularis Fan-leaf Grevillea [5772]	Endangered	Species or species habitat likely to occur within area
Isopogon uncinatus Albany Cone Bush, Hook-leaf Isopogon [20871]	Endangered	Species or species habitat likely to occur within area
Kennedia glabrata Northcliffe Kennedia [16452]	Vulnerable	Species or species habitat known to occur within area
Lambertia echinata subsp. echinata Prickly Honeysuckle [56729]	Endangered	Species or species habitat known to occur within area
Lambertia echinata subsp. occidentalis Western Prickly Honeysuckle [64528]	Endangered	Species or species habitat may occur within area
Morelotia australiensis listed as Tetraria australiensis Southern Tetraria [92784]	Vulnerable	Species or species habitat may occur within area
Petrophile latericola Laterite Petrophile [64532]	Endangered	Species or species habitat may occur within area
Phaius australis Lesser Swamp-orchid [5872]	Endangered	Species or species habitat may occur within area
Reedia spathacea Reedia [2995]	Critically Endangered	Species or species habitat may occur within area
Ricinocarpos trichophorus Barrens Wedding Bush [19931]	Endangered	Species or species habitat may occur within area
Sphenotoma drummondii Mountain Paper-heath [21160]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Stylidium galioides		
Yellow Mountain Triggerplant [4666]	Vulnerable	Species or species habitat may occur within area
Synaphea sp. Fairbridge Farm (D.Papenfus 696)		
Selena's Synaphea [82881]	Critically Endangered	Species or species habitat may occur within area
Verticordia crebra		
[55678]	Vulnerable	Species or species habitat likely to occur within area
Verticordia densiflora var. pedunculata		
Long-stalked Featherflower [55689]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. ananeotes		
Tufted Plumed Featherflower [23871]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. vassensis		
Vasse Featherflower [55804]	Endangered	Species or species habitat may occur within area
Wurmbea calcicola		
Naturaliste Nancy [64691]	Endangered	Species or species habitat known to occur within area

REPTILE

Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
[Natator depressus](#) Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

SHARK

[Carcharias taurus (west coast population)](#) Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area
[Carcharodon carcharias](#) White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
[Centrophorus uyato](#) Little Gulper Shark [68446]	Conservation Dependent	Species or species habitat likely to occur within area
[Galeorhinus galeus](#) School Shark, Eastern School Shark, Snapper Shark, Tope, Soupfin Shark [68453]	Conservation Dependent	Species or species habitat may occur within area
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
[Rhincodon typus](#) Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
[Sphyrna lewini](#) Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
[Anous stolidus](#) Common Noddy [825]		Species or species habitat likely to occur within area
[Apus pacificus](#) Fork-tailed Swift [678]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Onychoprion anaethetus
Bridled Tern [82845] Breeding known to occur within area

Phaethon rubricauda
Red-tailed Tropicbird [994] Breeding known to occur within area

Phoebetria fusca
Sooty Albatross [1075] Vulnerable Species or species habitat likely to occur within area

Sterna dougallii
Roseate Tern [817] Breeding known to occur within area

Sternula albifrons
Little Tern [82849] Species or species habitat may occur within area

Thalassarche carteri
Indian Yellow-nosed Albatross [64464] Vulnerable Species or species habitat likely to occur within area

Thalassarche cauta
Shy Albatross [89224] Endangered Foraging, feeding or related behaviour likely to occur within area

Thalassarche chrysostoma
Grey-headed Albatross [66491] Endangered Species or species habitat may occur within area

Thalassarche impavida
Campbell Albatross, Campbell Black-browed Albatross [64459] Vulnerable Species or species habitat may occur within area

Thalassarche melanophris
Black-browed Albatross [66472] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]	Species or species habitat likely to occur within area	
Lagenorhynchus obscurus Dusky Dolphin [43]	Species or species habitat likely to occur within area	
Lamna nasus Porbeagle, Mackerel Shark [83288]	Species or species habitat likely to occur within area	
Megaptera novaeangliae Humpback Whale [38]	Foraging, feeding or related behaviour known to occur within area	
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]	Species or species habitat known to occur within area	
Mobula birostris as Manta birostris Giant Manta Ray [90034]	Species or species habitat known to occur within area	
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Orcinus orca Killer Whale, Orca [46]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
[Physeter macrocephalus](#) Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
[Rhincodon typus](#) Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Migratory Terrestrial Species [Motacilla cinerea](#) Grey Wagtail [642]	Species or species habitat known to occur within area	
Migratory Wetlands Species [Actitis hypoleucos](#) Common Sandpiper [59309]		Species or species habitat known to occur within area
[Arenaria interpres](#) Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
[Calidris acuminata](#) Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
[Calidris alba](#) Sanderling [875]		Roosting known to occur within area
[Calidris canutus](#) Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
[Calidris ferruginea](#) Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
[Calidris melanotos](#) Pectoral Sandpiper [858]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris pugnax as Philomachus pugnax Ruff [91256]		Roosting known to occur within area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Gallinago megala
Swinhoe's Snipe [864] Roosting likely to occur within area

Gallinago stenura
Pin-tailed Snipe [841] Roosting likely to occur within area

Glareola maldivarum
Oriental Pratincole [840] Species or species habitat known to occur within area

Limicola falcinellus
Broad-billed Sandpiper [842] Roosting known to occur within area

Limosa lapponica
Bar-tailed Godwit [844] Species or species habitat known to occur within area

Limosa limosa
Black-tailed Godwit [845] Endangered Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area

Numenius minutus
Little Curlew, Little Whimbrel [848] Roosting likely to occur within area

Numenius phaeopus
Whimbrel [849]Roosting known to occur within area

Pandion haliaetus
Osprey [952] Breeding known to occur within area

Phalaropus lobatus
Red-necked Phalarope [838] Roosting known to occur within area

Pluvialis fulva
Pacific Golden Plover [25545] Roosting known to occur within area

Pluvialis squatarola
Grey Plover [865] Vulnerable Roosting known to occur within area

Thalasseus bergii
Greater Crested Tern [83000] Breeding known to occur within area

Tringa brevipes
Grey-tailed Tattler [851] Roosting known to occur within area

Tringa glareola
Wood Sandpiper [829] Roosting known to occur within area

Tringa nebularia
Common Greenshank, Greenshank Endangered Species or species habitat known to occur within area [832]

Tringa stagnatilis
Marsh Sandpiper, Little Greenshank Roosting known to occur within area [833]

Tringa totanus
Common Redshank, Redshank [835] Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Xenus cinereus		
Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Listed Marine Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Bird		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus		
Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops		
Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea as Puffinus griseus Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris as Puffinus tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris alba Sanderling [875]		Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat known to occur within area overfly marine area
Calidris pugnax as Philomachus pugnax Ruff [91256]		Roosting known to occur within area overfly marine area
Calidris ruficollis Red-necked Stint [860]		Roosting known to occur within area overfly marine area
Calidris subminuta Long-toed Stint [861]		Roosting known to occur within area overfly marine area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area overfly marine area
Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978]	Vulnerable	Breeding known to occur within area overfly marine area
Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat likely to occur within area overfly marine area
Charadrius bicinctus Double-banded Plover [895]		Roosting known to occur within area overfly marine area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Charadrius ruficapillus Red-capped Plover [881]		Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]	Breeding known to occur within area	
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Eudyptula minor Little Penguin [1085]		Breeding known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area overfly marine area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area overfly marine area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text

Haliaeetus leucogaster
White-bellied Sea-Eagle [943] Species or species habitat known to occur within area

Halobaena caerulea
Blue Petrel [1059] Vulnerable Species or species habitat may occur within area

Himantopus himantopus
Pied Stilt, Black-winged Stilt [870] Roosting known to occur within area overfly marine area

Hydroprogne caspia as Sterna caspia
Caspian Tern [808] Breeding known to occur within area

Larus dominicanus
Kelp Gull [809] Breeding known to occur within area

Larus pacificus
Pacific Gull [811] Breeding known to occur within area

Limicola falcinellus
Broad-billed Sandpiper [842] Roosting known to occur within area overfly marine area

Limosa lapponica
Bar-tailed Godwit [844] Species or species habitat known to occur within area

Limosa limosa
Black-tailed Godwit [845] Endangered Roosting known to occur within area overfly marine area

Macronectes giganteus
Southern Giant-Petrel, Southern Giant Petrel [1060] Endangered Species or species habitat may occur within area

Macronectes halli
Northern Giant Petrel [1061] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat known to occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area overfly marine area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pachyptila turtur Fairy Prion [1066]		Species or species habitat known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pelagodroma marina White-faced Storm-Petrel [1016]		Breeding known to occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Phalacrocorax fuscescens Black-faced Cormorant [59660]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Phalaropus lobatus Red-necked Phalarope [838]		Roosting known to occur within area
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area
Pterodroma macroptera Great-winged Petrel [1035]		Breeding known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Puffinus assimilis Little Shearwater [59363]		Breeding known to occur within area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area overfly marine area
Stercorarius antarcticus as Catharacta skua Brown Skua [85039]		Species or species habitat may occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Sternula nereis as Sterna nereis Fairy Tern [82949]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area
Thalassarche chrysostoma Grey-headed Albatross [66491]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Thalasseus bergii as Sterna bergii Greater Crested Tern [83000]		Breeding known to occur within area
Thinornis cucullatus as Thinornis rubricollis Hooded Plover, Hooded Dotterel [87735]		Species or species habitat known to occur within area overfly marine area
Tringa brevipes as Heteroscelus brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola Wood Sandpiper [829]		Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
[Tringa nebularia](#) Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area overfly marine area
[Tringa stagnatilis](#) Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area
[Tringa totanus](#) Common Redshank, Redshank [835]		Roosting known to occur within area overfly marine area
[Xenus cinereus](#) Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area overfly marine area
Fish [Acentronura australe](#) Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area
[Campichthys galei](#) Gale's Pipefish [66191]		Species or species habitat may occur within area
[Choeroichthys suillus](#) Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
[Halicampus brocki](#) Brock's Pipefish [66219]		Species or species habitat may occur within area
[Heraldia nocturna](#) Upside-down Pipefish, Eastern Upside-down Pipefish, Eastern Upside-down Pipefish [66227]		Species or species habitat may occur within area
[Hippocampus angustus](#) Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
[Hippocampus breviceps](#) Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus subelongatus West Australian Seahorse [66722]	Species or species habitat may occur within area	
Histiogamphelus cristatus Rhino Pipefish, Macleay's Crested Pipefish, Ring-back Pipefish [66243]		Species or species habitat may occur within area
Leptoichthys fistularius Brushtail Pipefish [66248]	Species or species habitat may occur within area	
Lissocampus caudalis Australian Smooth Pipefish, Smooth Pipefish [66249]		Species or species habitat may occur within area
Lissocampus fatiloquus Prophet's Pipefish [66250]	Species or species habitat may occur within area	
Lissocampus runa Javelin Pipefish [66251]	Species or species habitat may occur within area	
Maroubra perserrata Sawtooth Pipefish [66252]	Species or species habitat may occur within area	
Mitotichthys meraculus Western Crested Pipefish [66259]	Species or species habitat may occur within area	
Nannocampus subosseus Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area
Notiocampus ruber Red Pipefish [66265]	Species or species habitat may occur within area	
Phycodurus eques Leafy Seadragon [66267]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Phyllopteryx taeniolatus Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area
Pugnaso curtirostris Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Stigmatopora argus Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area
Stigmatopora nigra Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Urocampus carinirostris Hairy Pipefish [66282]		Species or species habitat may occur within area
Vanacampus margaritifer Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area
Vanacampus phillipi Port Phillip Pipefish [66284]		Species or species habitat may occur within area
Vanacampus poecilolaemus Longsnout Pipefish, Australian Long- snout Pipefish, Long-snouted Pipefish [66285]		Species or species habitat may occur within area
Mammal Arctocephalus forsteri Long-nosed Fur-seal, New Zealand Fur-seal [20]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Reptile Aipysurus pooleorum Shark Bay Sea Snake [66061]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur

Current Scientific Name	Status	Type of Presence
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Berardius arnuxii Arnoux's Beaked Whale [70]		Species or species habitat may occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Globicephala melas Long-finned Pilot Whale [59282]		Species or species habitat may occur

Current Scientific Name	Status	Type of Presence
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area

Hyperoodon planifrons
Southern Bottlenose Whale [71] Species or species habitat may occur within area

Kogia breviceps
Pygmy Sperm Whale [57] Species or species habitat may occur within area

Kogia sima
Dwarf Sperm Whale [85043] Species or species habitat may occur within area

Lagenorhynchus obscurus
Dusky Dolphin [43] Species or species habitat likely to occur within area

Lissodelphis peronii
Southern Right Whale Dolphin [44] Species or species habitat may occur within area

Megaptera novaeangliae
Humpback Whale [38] Foraging, feeding or related behaviour known to occur within area

Mesoplodon bowdoini
Andrew's Beaked Whale [73] Species or species habitat may occur within area

Mesoplodon densirostris Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
Mesoplodon ginkgodens Gingko-toothed Beaked Whale, Gingko-toothed Whale, Gingko Beaked Whale [59564]		Species or species habitat may occur within area
Mesoplodon grayi Gray's Beaked Whale, Scamperdown Whale [75]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Mesoplodon hectori Hector's Beaked Whale [76]		Species or species habitat may occur within area
Mesoplodon layardii Strap-toothed Beaked Whale, Strap-toothed Whale, Layard's Beaked Whale [25556]		Species or species habitat may occur within area
Mesoplodon mirus True's Beaked Whale [54]		Species or species habitat may occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Tasmacetus shepherdi Shepherd's Beaked Whale, Tasman Beaked Whale [55]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]	Species or species habitat may occur within area	
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Albany Canyons group and adjacent shelf break	South-west
Ancient coastline at 90-120m depth	South-west
Cape Mentelle upwelling	South-west

Name	Region
Commonwealth marine environment surrounding the Recherche Archipelago	South-west
Commonwealth marine environment within and adjacent	South-west to Geographe Bay
Commonwealth marine environment within and adjacent	South-west to the west coast inshore lagoons
Diamantina Fracture Zone	South-west
Naturaliste Plateau	South-west
Perth Canyon and adjacent shelf break, and other west coast canyons	South-west
Western demersal slope and associated fish communities	South-west
Western rock lobster	South-west

Biologically Important Areas			[Resource Information]
Scientific Name	Behaviour	Presence	
Seabirds			
Ardenna carneipes Flesh-footed Shearwater [82404]	Aggregation	Known to occur	
Ardenna carneipes Flesh-footed Shearwater [82404]	Foraging (in high numbers)	Known to occur	
Ardenna pacifica Wedge-tailed Shearwater [84292]	Foraging (in high numbers)	Known to occur	
Ardenna tenuirostris Short-tailed Shearwater [82652]	Foraging (in high numbers)	Known to occur	
Eudyptula minor Little Penguin [1085]	Foraging (provisioning young)	Known to occur	
Hydroprogne caspia Caspian Tern [808]	Foraging (provisioning young)	Known to occur	
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Former Range	

Scientific Name	Behaviour	Presence
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Known to occur
Onychoprion anaethetus Bridled Tern [82845]	Foraging (in high numbers)	Known to occur
Onychoprion fuscata Sooty Tern [82847]	Foraging	Known to occur
Pelagodroma marina White-faced Storm petrel [1016]	Foraging (in high numbers)	Known to occur
Phalacrocorax fuscescens Black-faced Cormorant [59660]	Foraging	Known to occur
Pterodroma macroptera macroptera Great-winged Petrel (macroptera race) [1035]	Foraging (provisioning young)	Known to occur
Pterodroma mollis Soft-plumaged Petrel [1036]	Foraging (in high numbers)	Known to occur
Puffinus assimilis tunneyi Little Shearwater [59363]	Foraging (in high numbers)	Known to occur
Sterna dougallii Roseate Tern [817]	Foraging	Known to occur
Sternula nereis Fairy Tern [82949]	Foraging (in high numbers)	Known to occur
Thalassarche chlororhynchos bassi Indian Yellow-nosed Albatross [85249]	Foraging (in high numbers)	Known to occur
Seals	Neophoca cinerea	
Australian Sea Lion [22]	Foraging (male)	Likely to occur

Scientific Name	Behaviour	Presence
Neophoca cinerea Australian Sea Lion [22]	Foraging (male and female)	Known to occur
Neophoca cinerea Australian Sea Lion [22]	Foraging (male and female)	Likely to occur
Sharks Carcharodon carcharias White Shark [64470]	Foraging	Known to occur
Whales Balaenoptera musculus Blue and Pygmy Blue Whale [36]	Foraging (abundant food source)	Known to occur
Balaenoptera musculus Blue and Pygmy Blue Whale [36]	Foraging (high density)	Known to occur
Balaenoptera musculus Blue and Pygmy Blue Whale [36]	Foraging (on migration)	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Distribution	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Foraging Area (annual high use area)	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Known Foraging Area	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Migration	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Migration (north)	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Migration (north and south)	Known to occur

Scientific Name	Behaviour	Presence
Megaptera novaeangliae		
Humpback Whale [38]	Migration (south)	Known to occur
Physeter macrocephalus		
Sperm Whale [59]	Foraging (abundant food source)	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

APPENDIX B. SUPPORTING FIGURES FOR SECTION 2.3 METEOROLOGY AND OCEANOGRAPHY

Browse

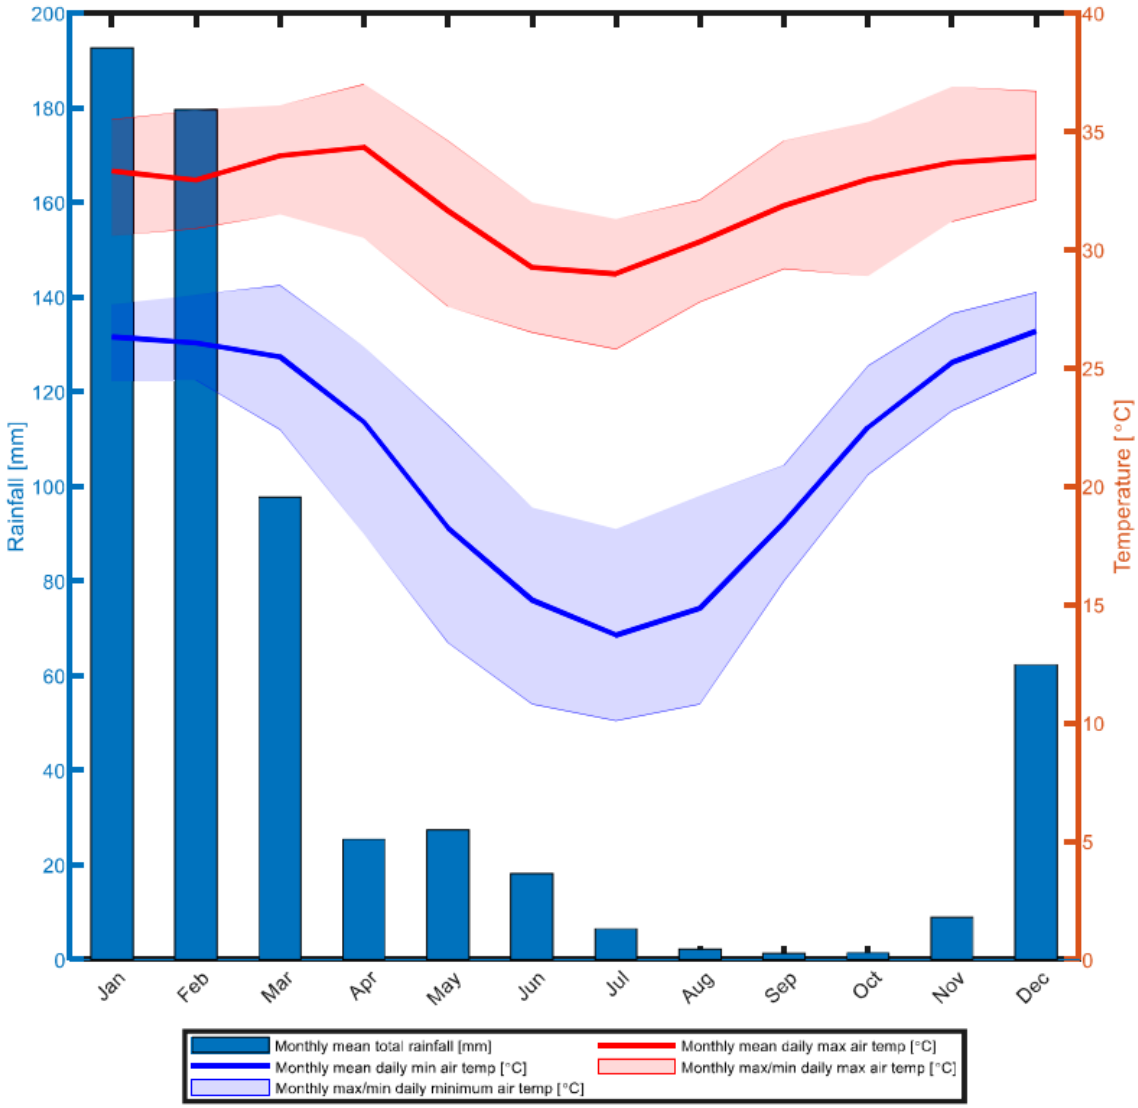

Figure 1. Monthly average total rainfall [mm] and air temperature [°C], calculated based on observations at the Broome Airport weather station from 1939-2020 (Bureau of Meteorology 2020). Bars show the monthly average total rainfall values, and thick blue and red lines denote monthly average daily minimum and maximum air temperatures, respectively. Shaded blue and red areas denote monthly recorded extremes of daily minimum and maximum air temperature, respectively.

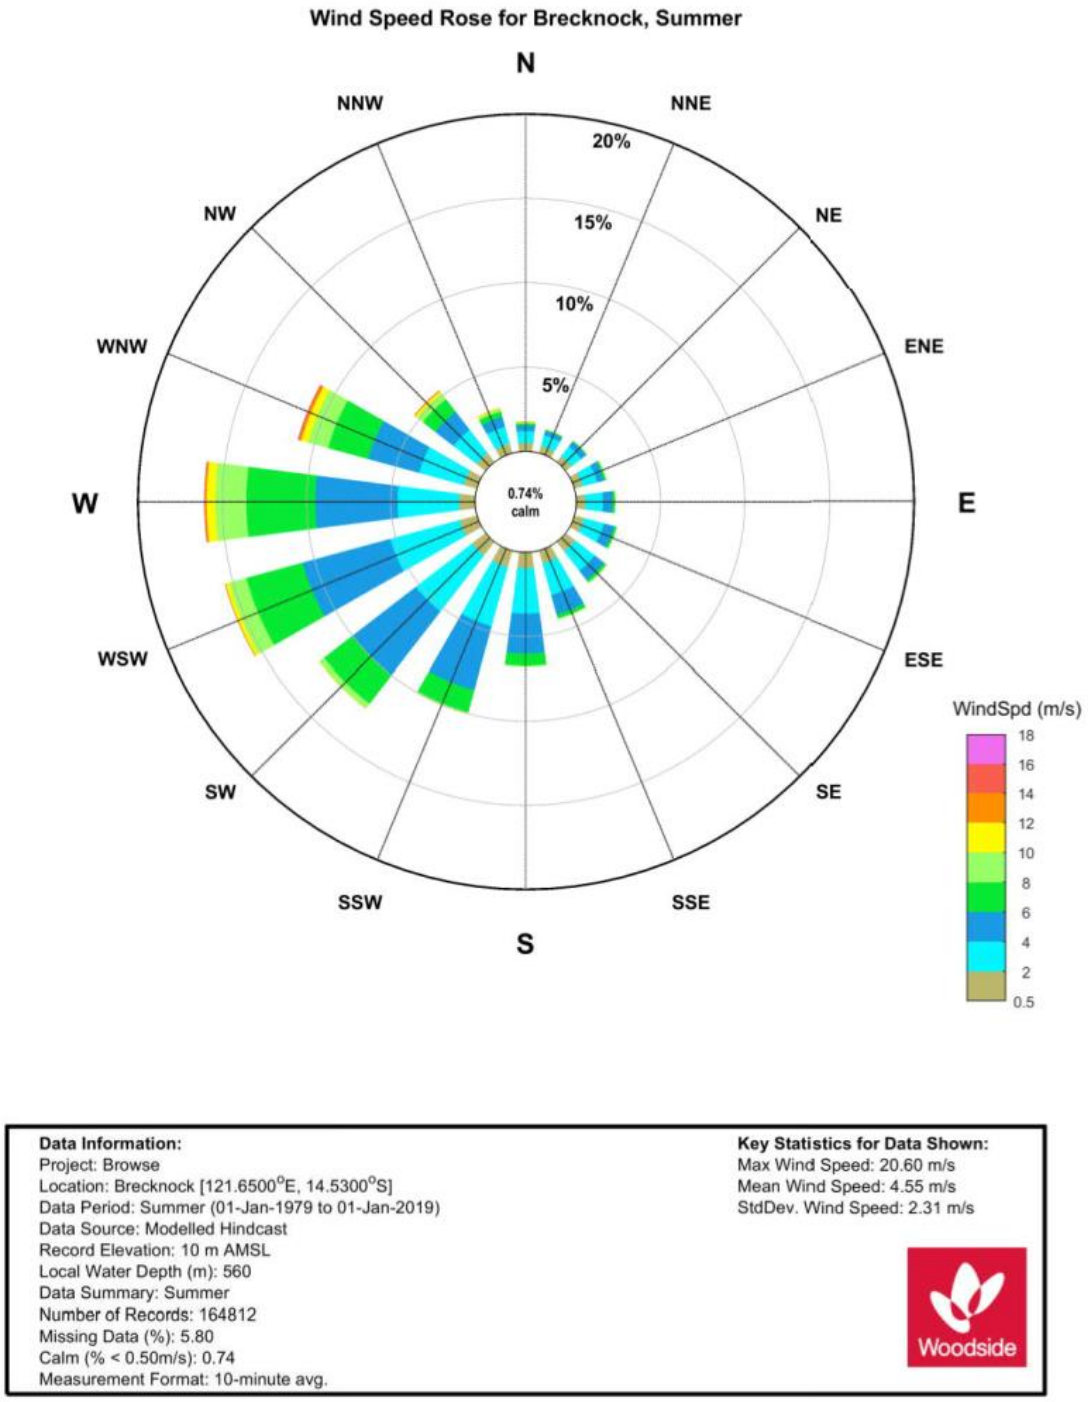

Figure 2. Summer distributions of 10-minute average wind speeds by 22.5° directional sectors at the Brecknock site (Metocean Solutions Ltd, 2019). Note tropical cyclone events were not included in this distribution. Winds at Brecknock in summer are predominantly from the WNW to SW due to the North West Monsoon (WEL, 2019).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

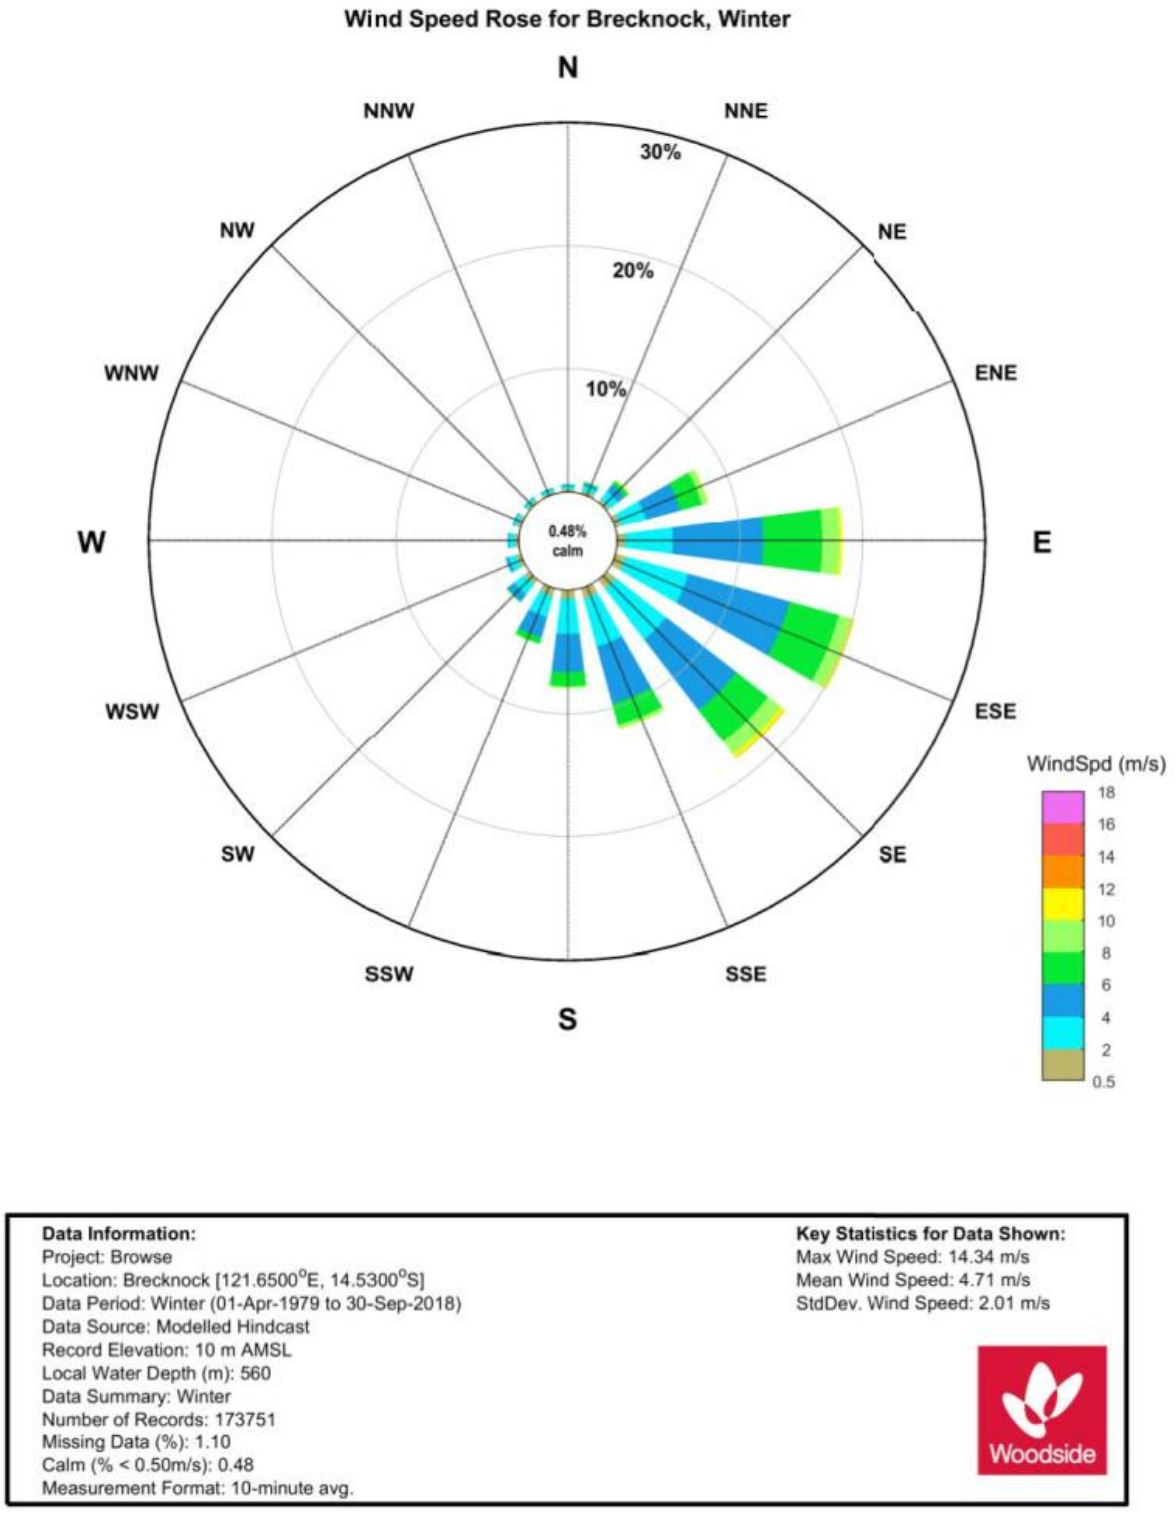

Figure 3. Winter distributions of 10-minute average wind speeds by 22.5° directional sectors at the Brecknock site (Metocean Solutions Ltd, 2019). Note tropical cyclone events were not included in this distribution. Winds at Brecknock in winter are predominantly from the E to SE due to the South East Trade Winds coming from the Australian mainland (WEL, 2019).

North west Shelf/Scarborough

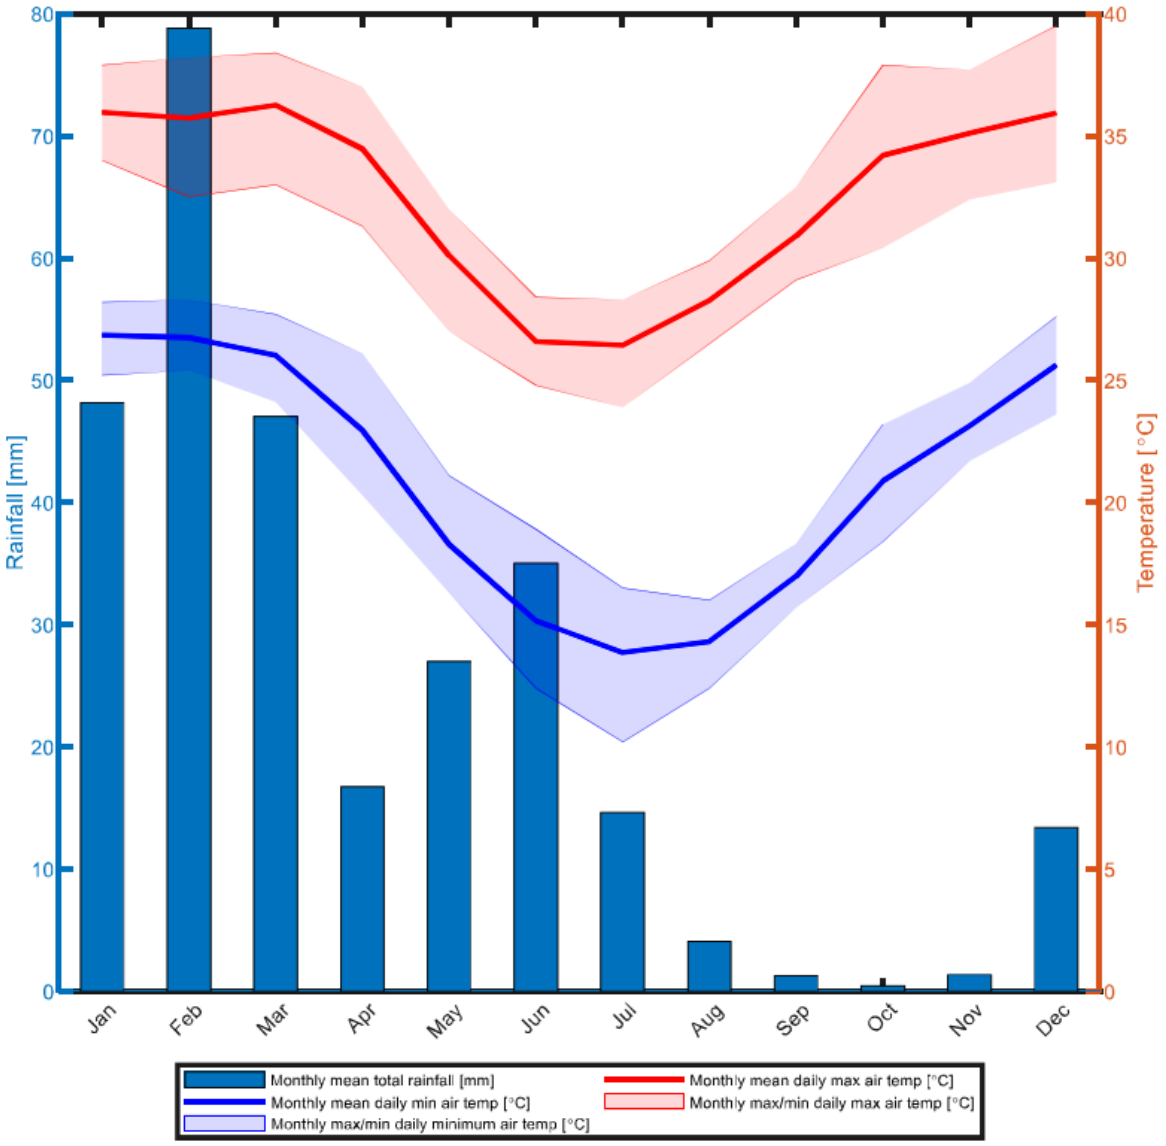

Figure 1. Monthly average total rainfall [mm] and air temperature [°C], calculated based on observations at the Karratha Aero weather station from 1972-2020 and 1993-2020 respectively (Bureau of Meteorology 2020). Bars show the monthly average total rainfall values, and thick blue and red lines denote monthly average daily minimum and maximum air temperatures, respectively. Shaded blue and red areas denote monthly recorded extremes of daily minimum and maximum air temperature, respectively.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

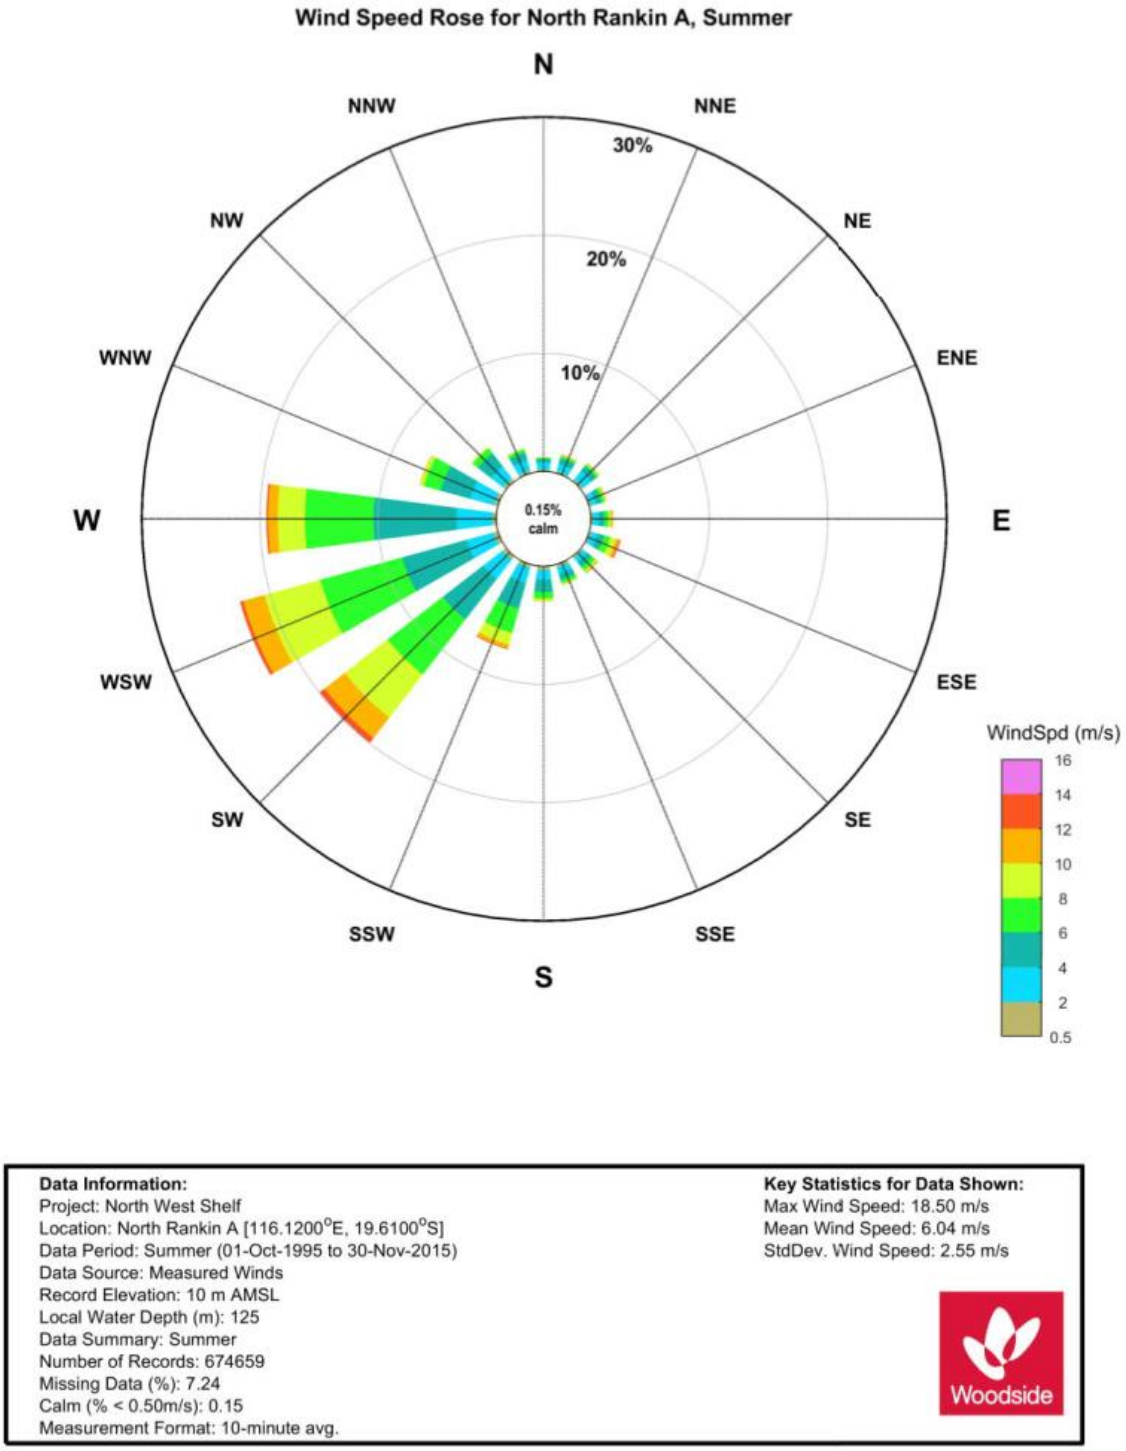

Figure 2. Summer distributions of 10-minute average wind speeds by 22.5° directional sectors at the North Rankin A site (WEL, 2015). Note tropical cyclone events were not included in this distribution. Winds at North Rankin A in summer are characterised by W to SW driven by the North West Monsoon (RPS, 2016).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

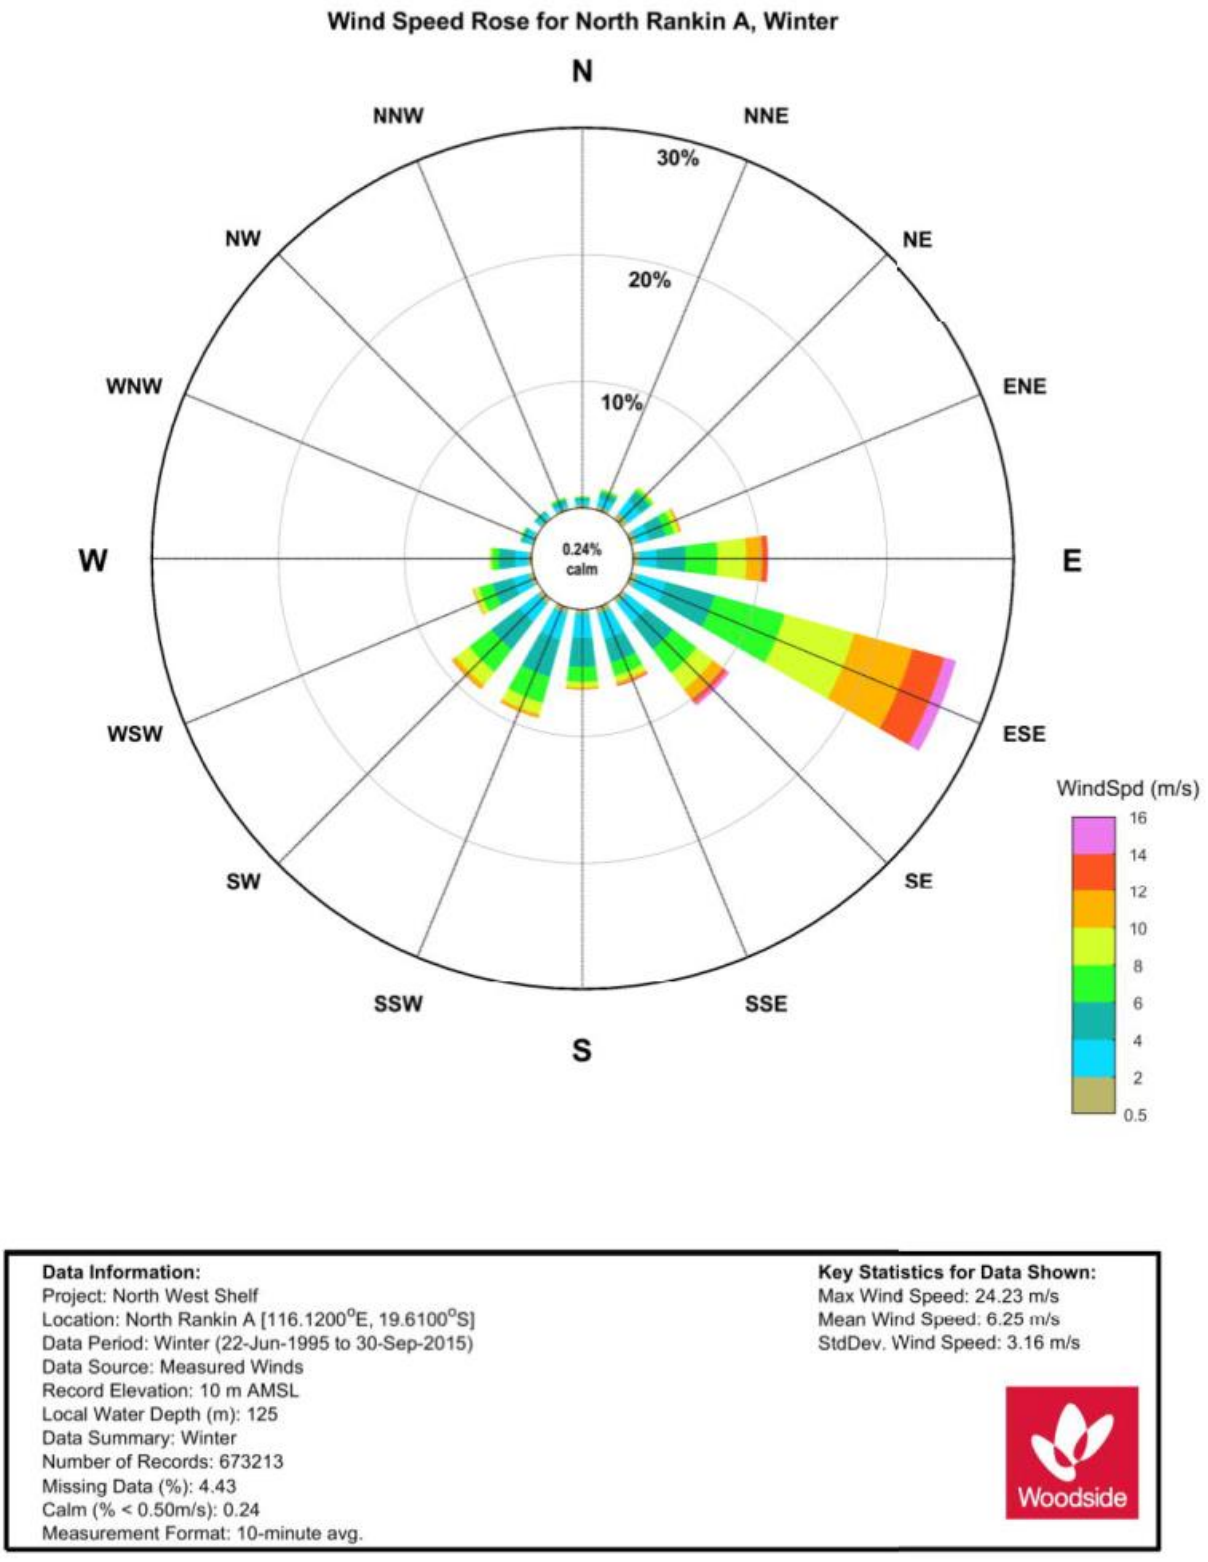

Figure 3. Winter distributions of 10-minute average wind speeds by 22.5° directional sectors at the North Rankin A site (WEL, 2015). Note tropical cyclone events were not included in this distribution. Winds at North Rankin in winter are predominantly influenced by the South East Trade Winds over Australia (RPS, 2016).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Scarborough

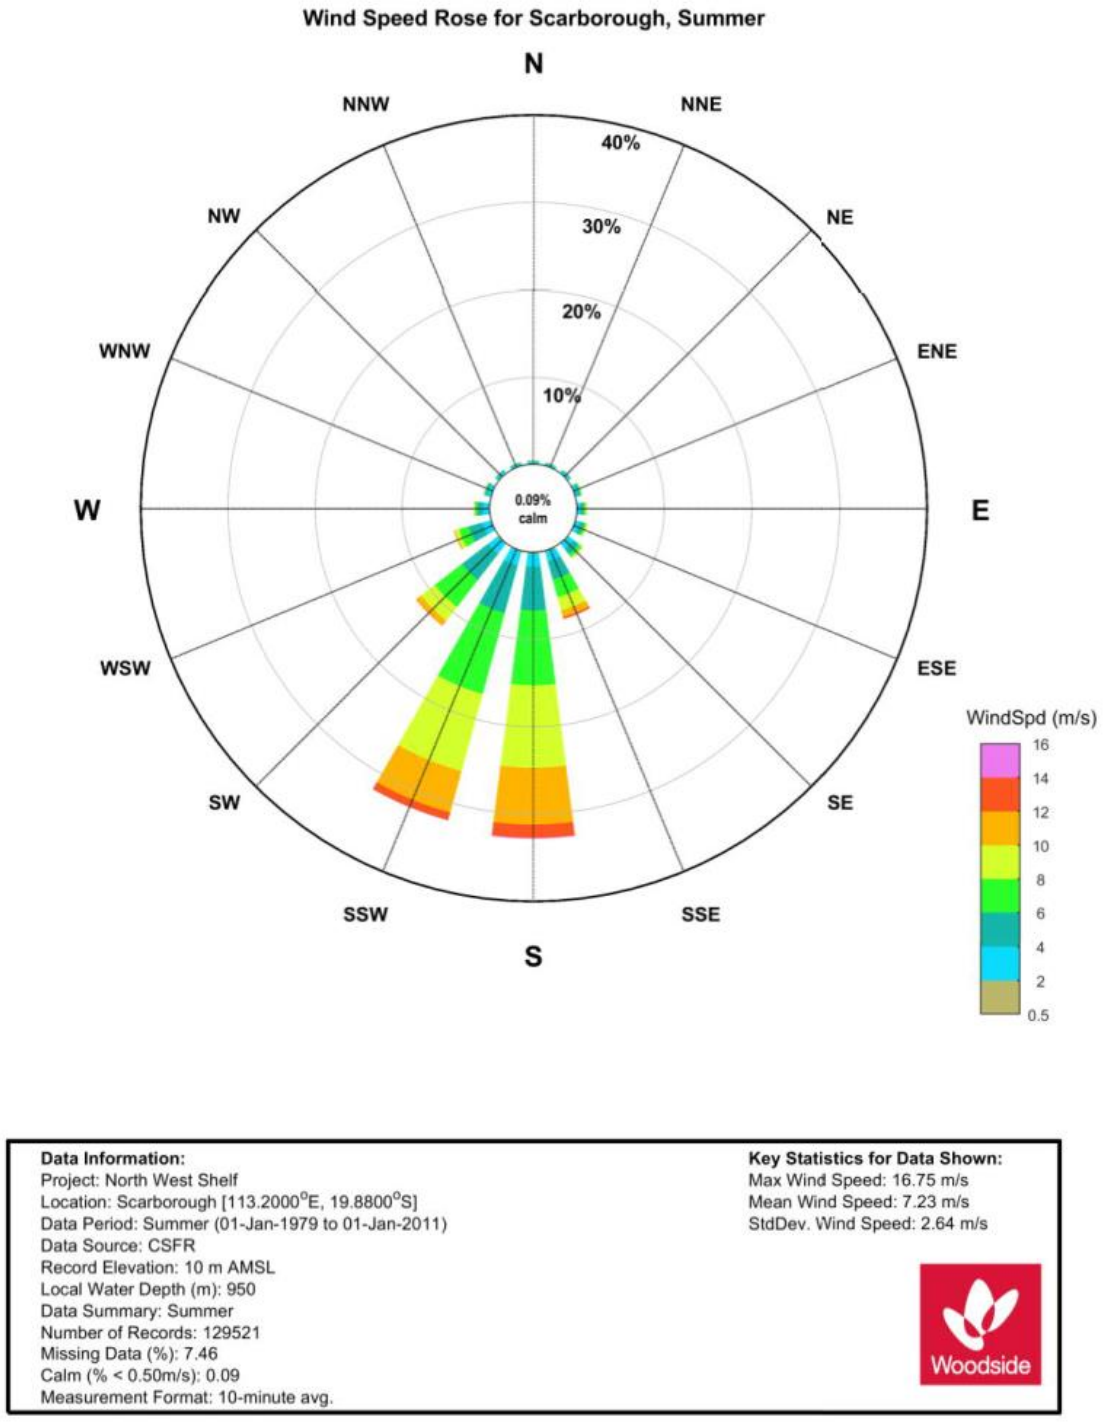

Figure 1. Summer distributions of wind speeds (10-minute at 10m ASL) by 22.5° directional sectors at the Scarborough site (WEL, 2018). Note tropical cyclone events were not included in this distribution. Winds at Scarborough in summer are predominantly from the S to SSW due to a Pilbara Heat Low forming over the northwest coast of Western Australia [R8] SW winds are also experienced at this site due to the monsoon trough.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

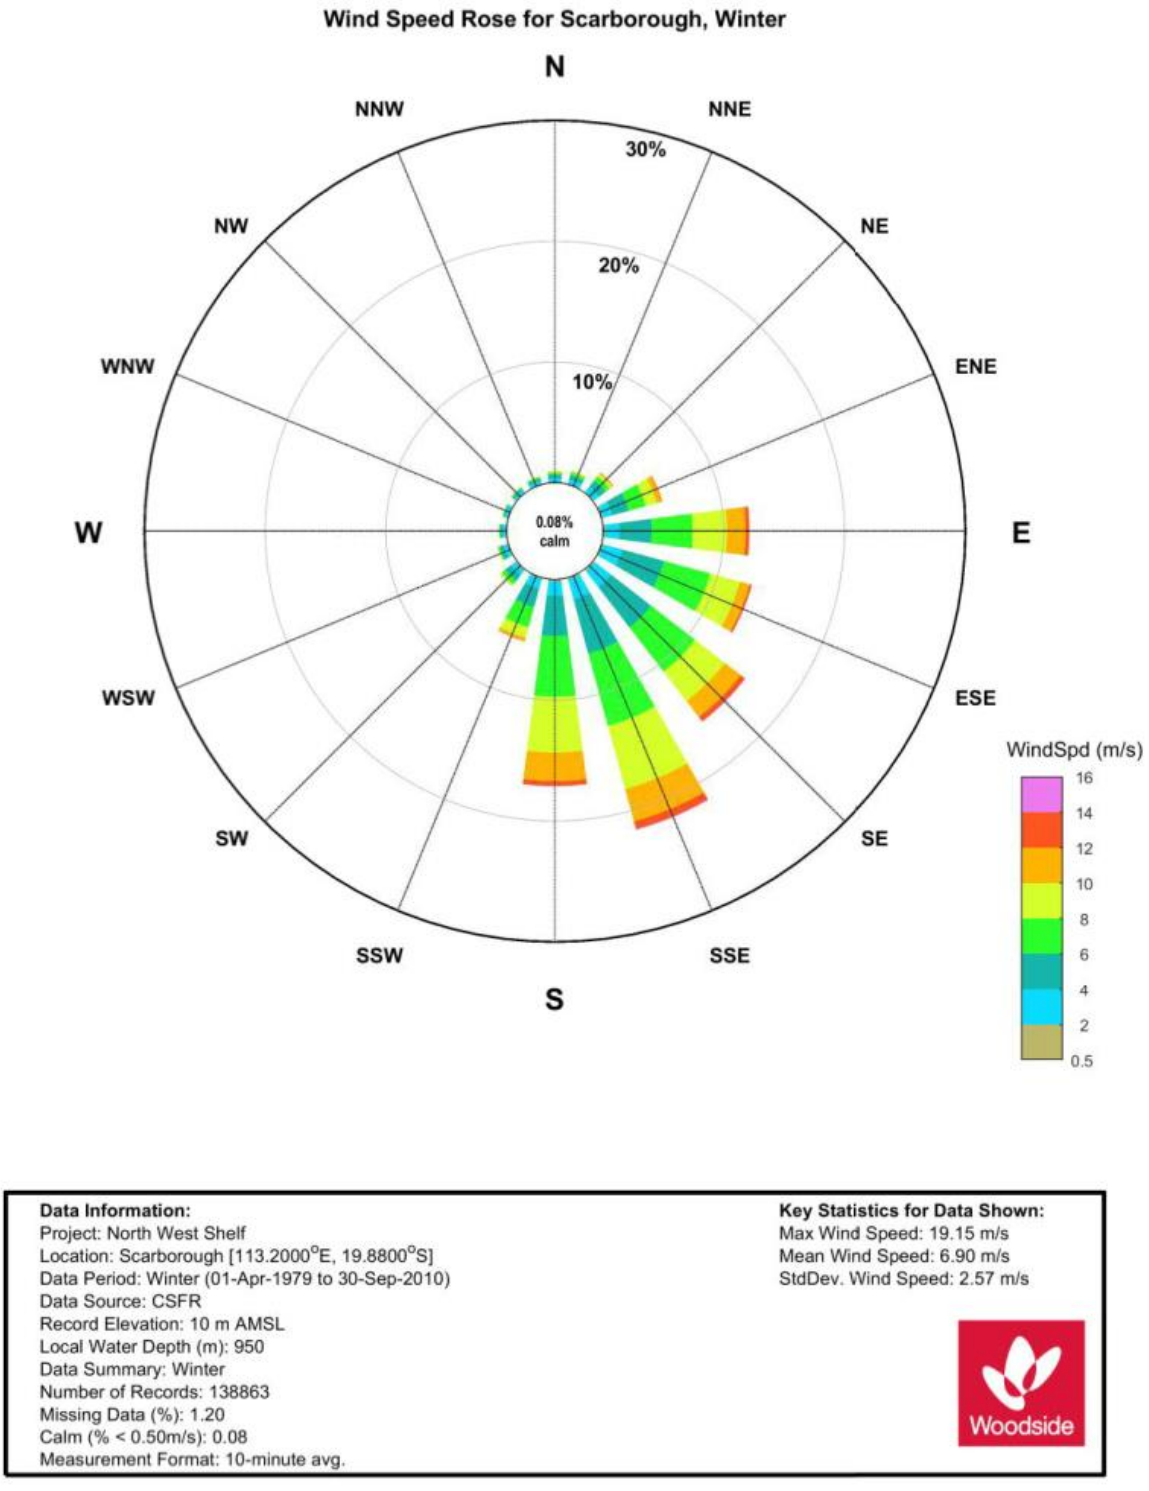

Figure 2. Winter distributions of wind speeds (10-minute at 10 m ASL) by 22.5° directional sectors at the Scarborough site (WEL, 2018). Note tropical cyclone events were not included in this distribution. Winds at Scarborough in winter are predominantly from the S to E driven by the South East Trade Winds over Australia (RPS, 2016)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

North-west Shelf

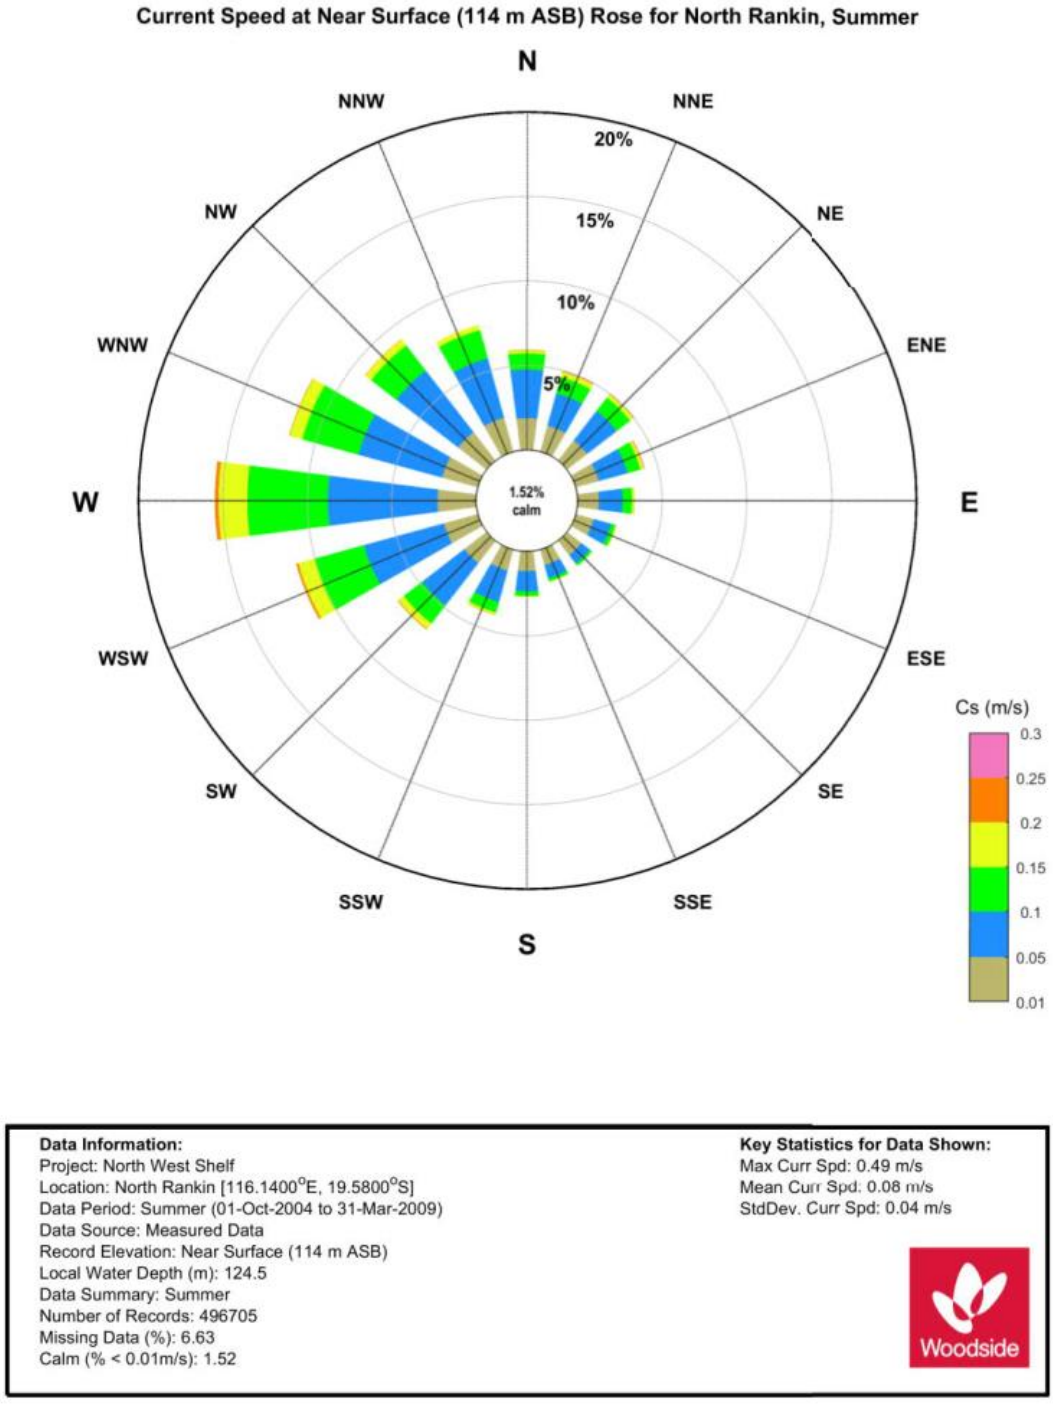

Figure 1. Summer (Nov-Apr) near surface combined frequency of 1-minute mean current speed and direction (towards) measured at the North Rankin location (cyclones removed) (WEL, 2011).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

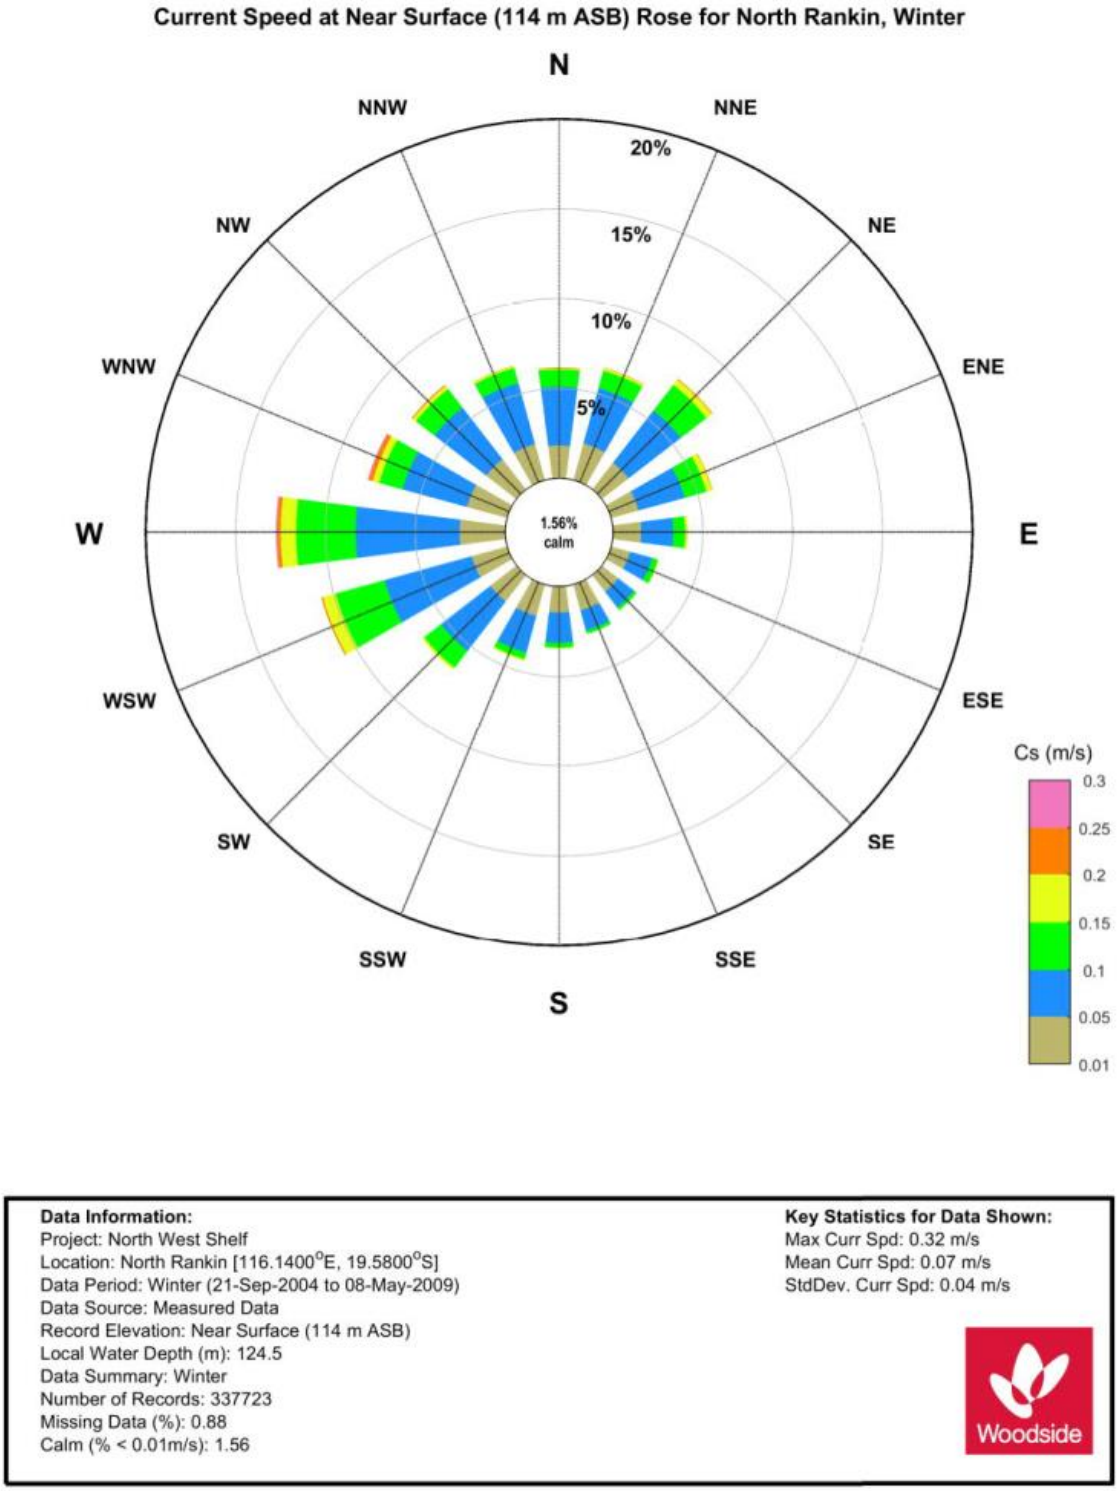

Figure 2. Winter (May-Sep) near surface combined frequency of 1-minute mean current speed and direction (towards) measured at the North Rankin location (cyclones removed) (WEL, 2011).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Scarborough

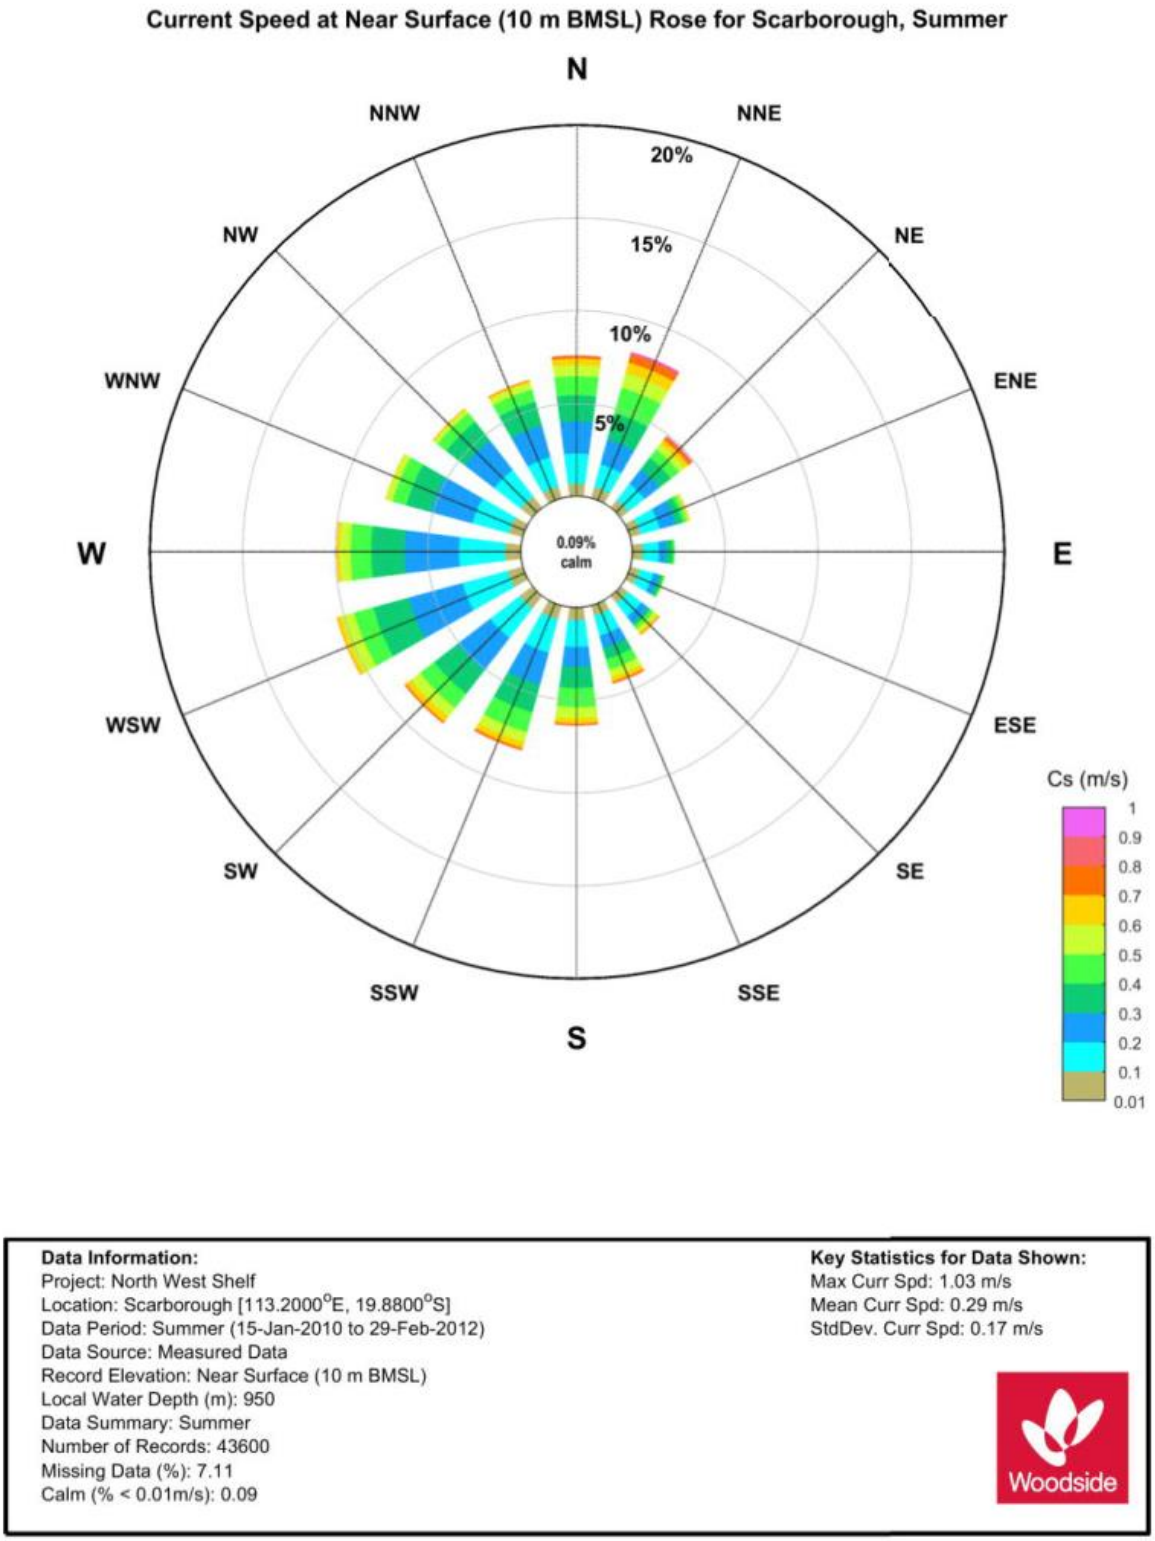

Figure 1. Summer (Nov - April) near surface combined frequency of 1-minute mean current speed and direction (towards) measured at the Scarborough location (cyclones removed) (WEL, 2018).

North-west Cape

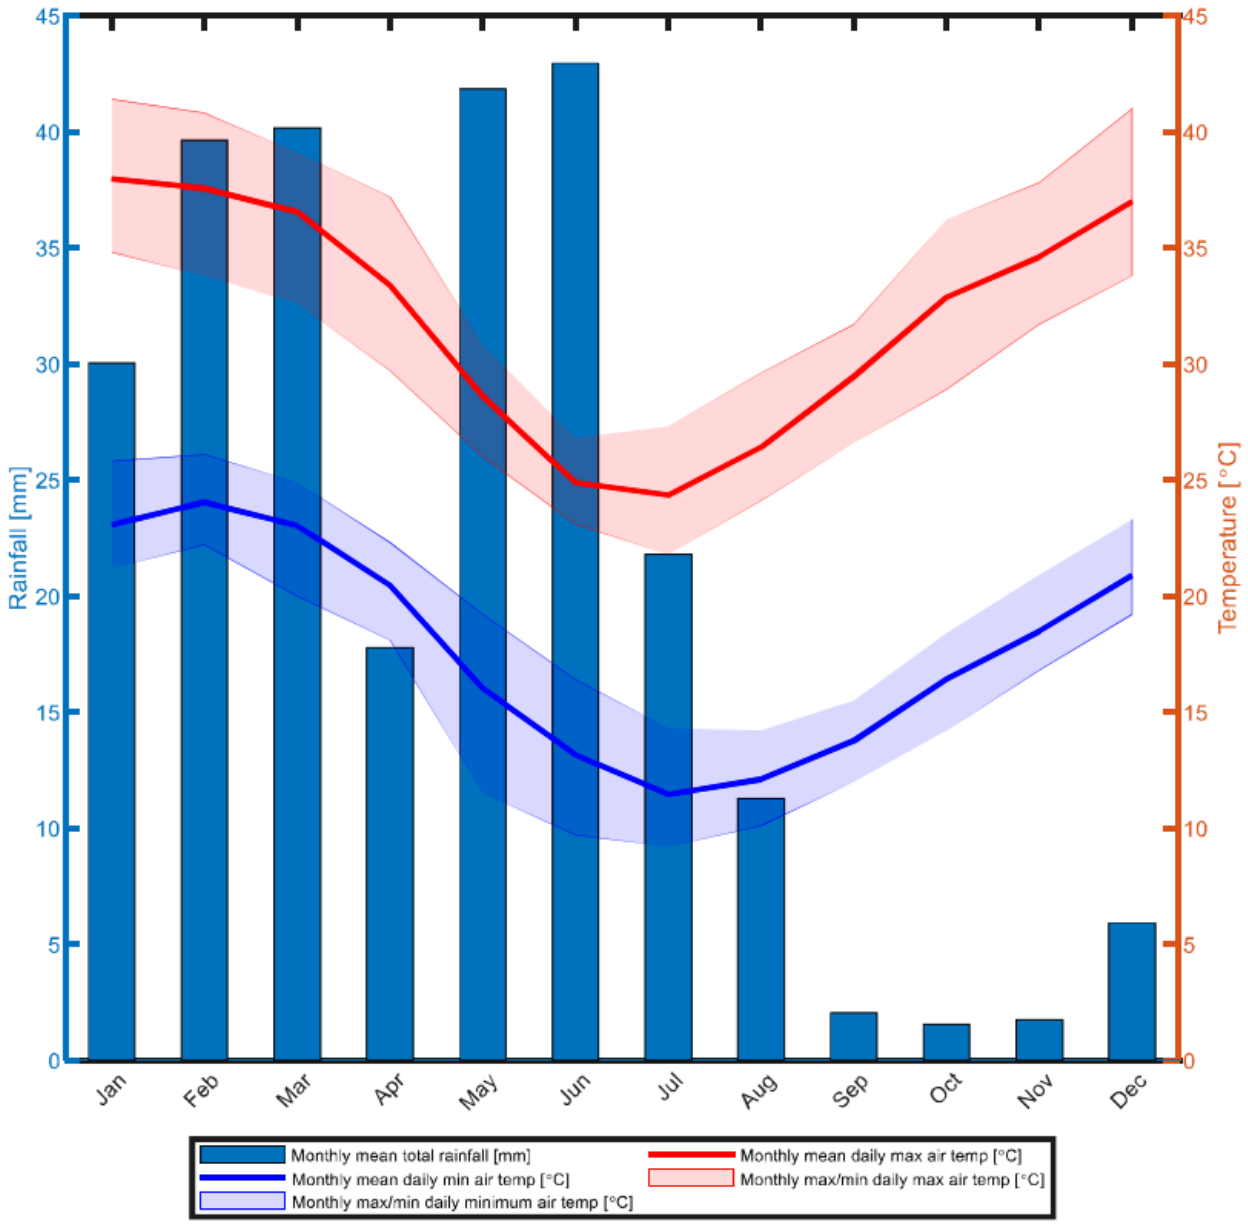

Figure 1. Monthly average total rainfall [mm] and air temperature [°C], calculated based on observations at the Learmonth Airport weather station from 1945-2020 and 1975-2020 respectively (Bureau of Meteorology 2020). Bars show the monthly average total rainfall values, and thick blue and red lines denote monthly average daily minimum and maximum air temperatures, respectively. Shaded blue and red areas denote monthly recorded extremes of daily minimum and maximum air temperature, respectively.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

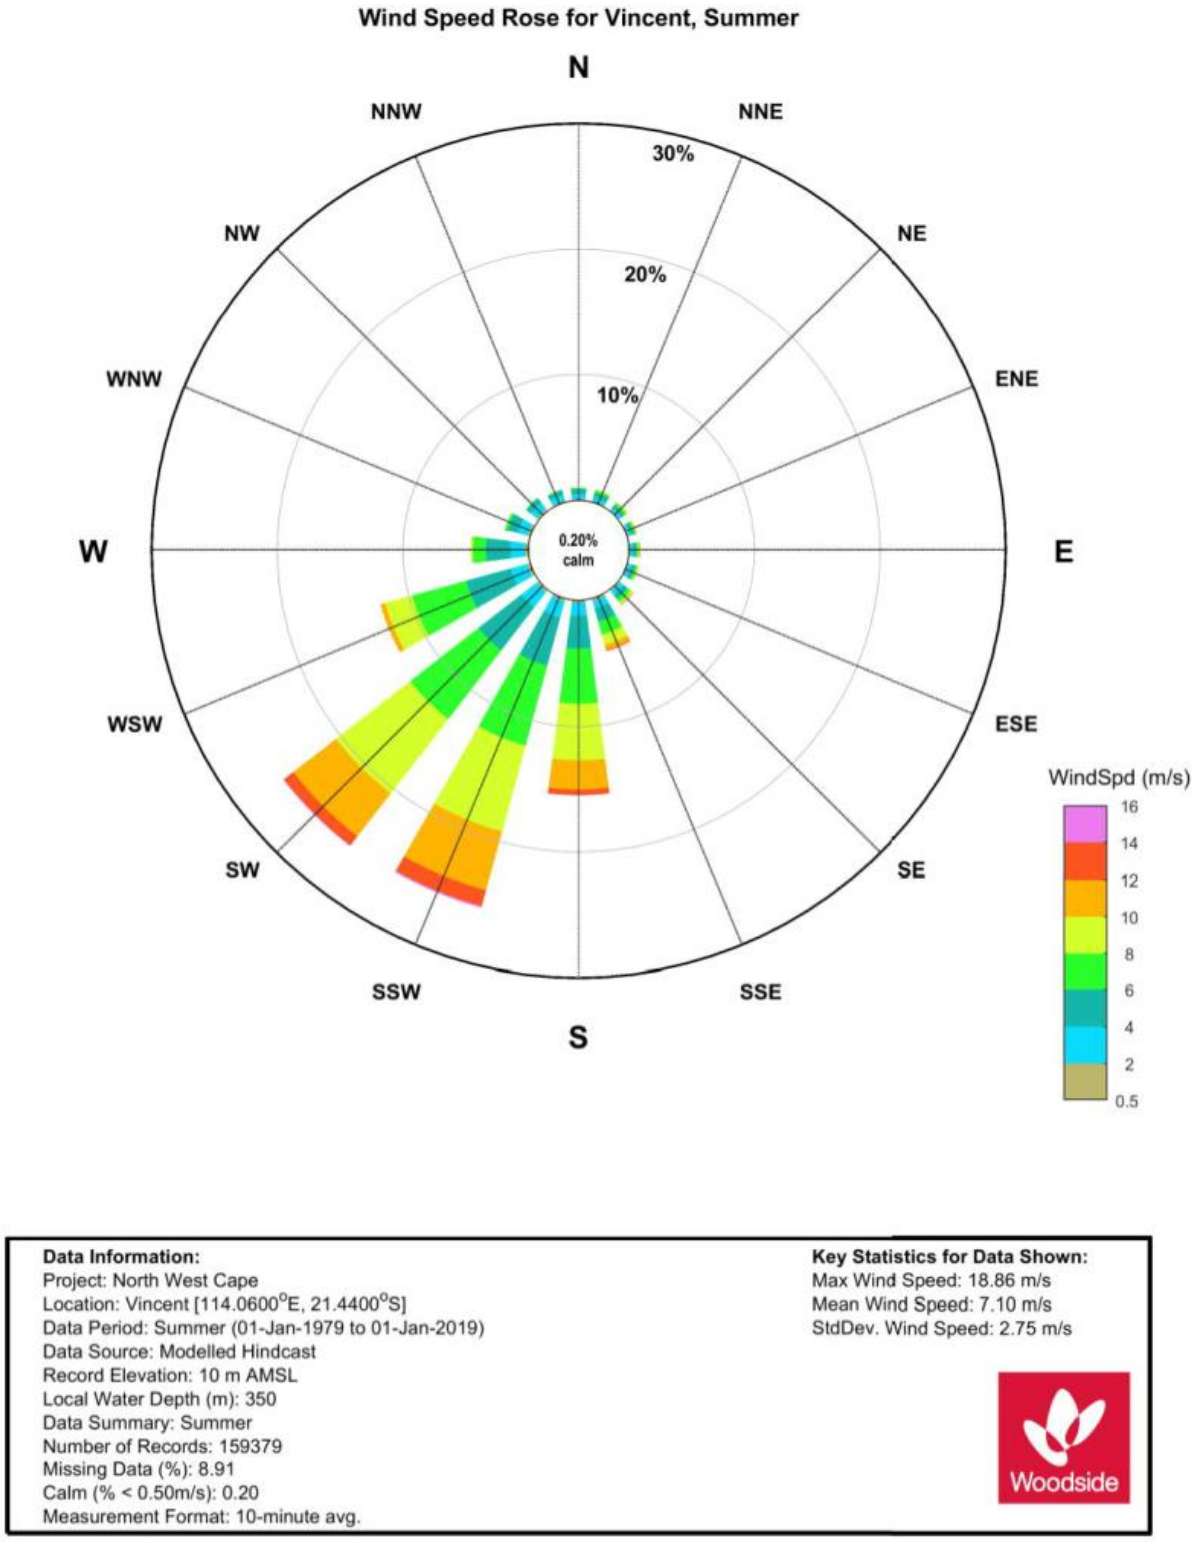

Figure 2. Summer distributions of wind speeds (10-minute at 10 m ASL) by 22.5° directional sectors at the Vincent site (Vincent Metocean). Note tropical cyclone events were not included in this distribution. Winds at Vincent in summer are predominantly from the SW to SSW in summer due to the presence of the Pilbara Heat Low (MetOcean Engineers, 2005).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

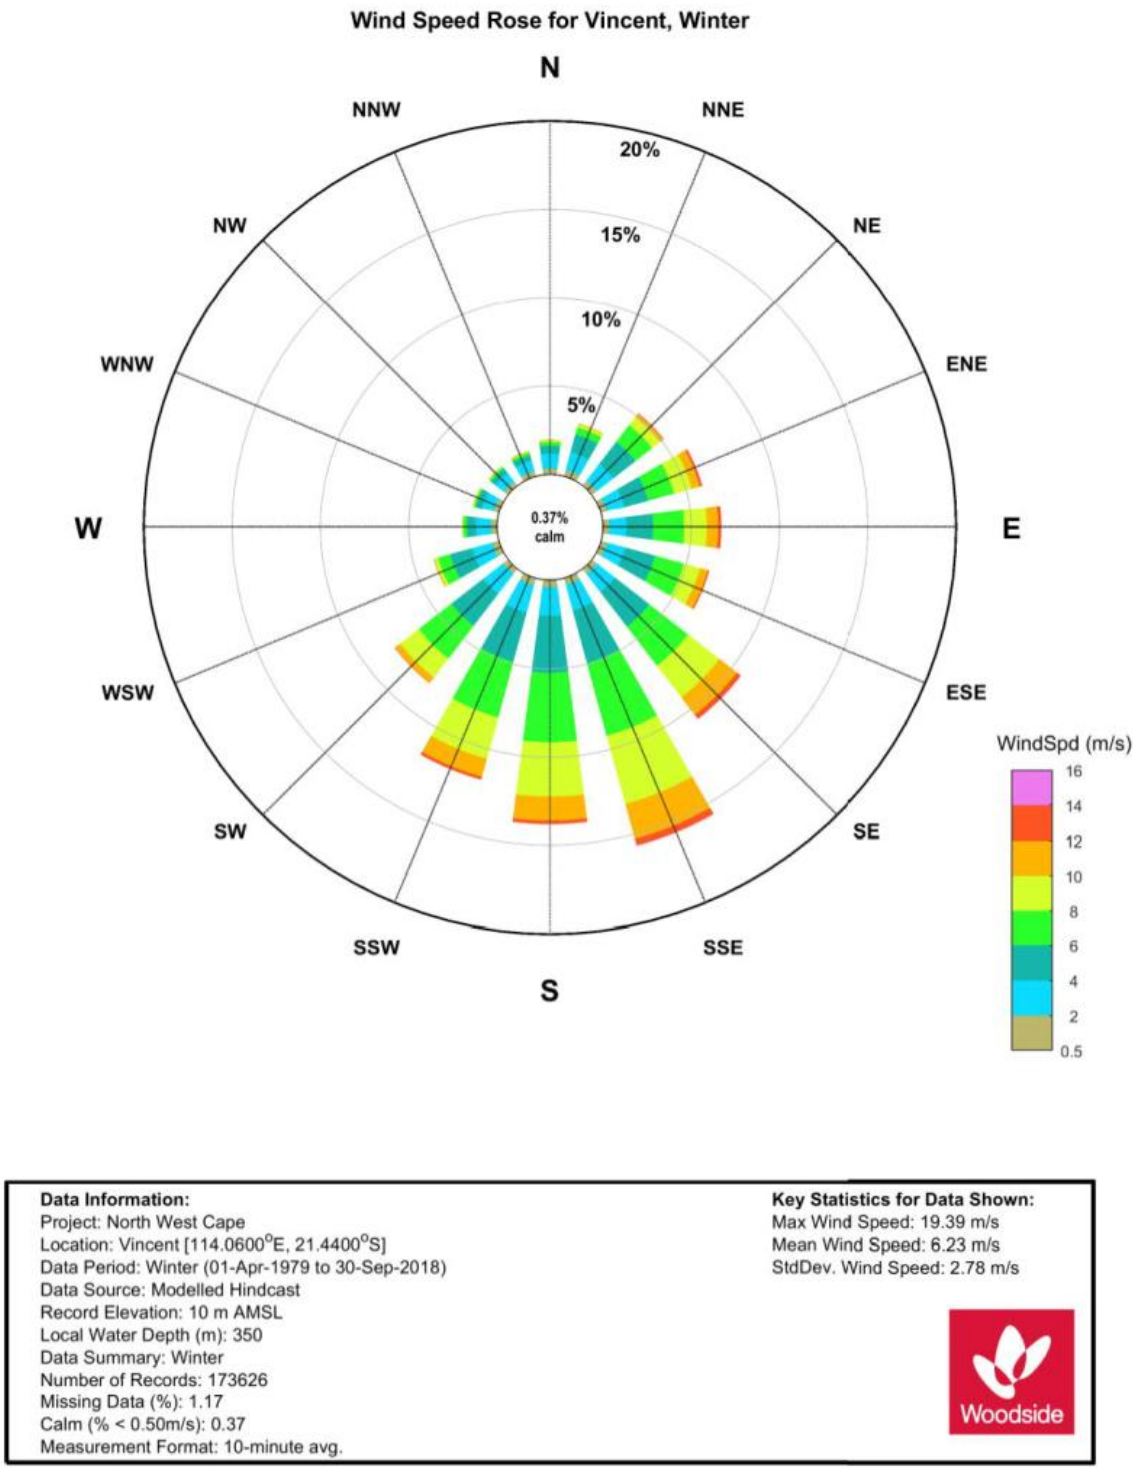

Figure 3. Winter distributions of wind speeds (10-minute at 10 m ASL) 22.5° directional sectors at the Vincent site (Vincent Metocean). Note tropical cyclone events were not included in this distribution. In winter, winds at are predominantly from the S to SE, associated with the South East Trades. Easterly gales are experienced at the Vincent location due to high pressure systems generating from the Great Australian Bight area to the site (MetOcean Engineers, 2005).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

EPBC Act Protected Matters Report - EMBA

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 03-Feb-2025

Summary
Details
- Matters of NES
- Other Matters Protected by the EPBC Act
- Extra Information

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	1
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	4
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	52
Listed Migratory Species:	67

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	5
Commonwealth Heritage Places:	3
Listed Marine Species:	113
Whales and Other Cetaceans:	32
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	11
Habitat Critical to the Survival of Marine Turtles:	4

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	31
Regional Forest Agreements:	None
Nationally Important Wetlands:	2
EPBC Act Referrals:	201
Key Ecological Features (Marine):	7
Biologically Important Areas:	39
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act)
Commonwealth Marine Areas (EPBC Act)
Commonwealth Marine Areas (EPBC Act)
Commonwealth Marine Areas (EPBC Act)

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act.
Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Calidris acuminata		
Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area
Calidris canutus		
Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Erythrotriorchis radiatus Red Goshawk [942]	Endangered	Species or species habitat may occur within area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat known to occur within area
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Endangered	Species or species habitat known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Malurus leucopterus edouardi White-winged Fairy-wren (Barrow Island), Barrow Island Black-and-white Fairy-wren [26194]	Vulnerable	Species or species habitat likely to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area
Pezoporus occidentalis Night Parrot [59350]	Endangered	Species or species habitat may occur within area
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Breeding known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat likely to occur within area
CRUSTACEAN		
Kumonga exleyi Cape Range Remipede [86875]	Vulnerable	Species or species habitat likely to occur within area
FISH		
Milyeringa veritas Cape Range Cave Gudgeon, Blind Gudgeon [66676]	Vulnerable	Species or species habitat known to occur within area
Ophisternon candidum Blind Cave Eel [66678]	Vulnerable	Species or species habitat known to occur within area
MAMMAL		

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Bettongia lesueur Barrow and Boodie Islands subspecies Boodie, Burrowing Bettong (Barrow and Boodie Islands) [88021]	Vulnerable	Species or species habitat known to occur within area
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat may occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Species or species habitat likely to occur within area
Isoodon auratus barrowensis Golden Bandicoot (Barrow Island) [66666]	Vulnerable	Species or species habitat known to occur within area
Lagorchestes conspicillatus conspicillatus Spectacled Hare-wallaby (Barrow Island) [66661]	Vulnerable	Species or species habitat known to occur within area
Lagorchestes hirsutus Central Australian subspecies Mala, Rufous Hare-Wallaby (Central Australia) [88019]	Endangered	Translocated population known to occur within area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat likely to occur within area
Osphranter robustus isabellinus Barrow Island Wallaroo, Barrow Island Euro [89262]	Vulnerable	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Petrogale lateralis lateralis		
Black-flanked Rock-wallaby, Mororong, Black-footed Rock Wallaby [66647]	Endangered	Species or species habitat known to occur within area
Rhinonicteris aurantia (Pilbara form)		
Pilbara Leaf-nosed Bat [82790]	Vulnerable	Species or species habitat known to occur within area
REPTILE		
Aipysurus apraefrontalis		
Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus foliosquama		
Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat known to occur within area
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Ctenotus zastictus		
Hamelin Ctenotus [25570]	Vulnerable	Species or species habitat known to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Eretmochelys imbricata		
Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
SHARK		
Carcharias taurus (west coast population)		
Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area

Scientific Name	Threatened Category	Presence Text
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat known to occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat likely to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Species or species habitat likely to occur within area
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat likely to occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat may occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Onychoprion anaethetus Bridled Tern [82845]		Breeding known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Breeding known to occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons Little Tern [82849]		Breeding known to occur within area
Sula dactylatra Masked Booby [1021]		Breeding known to occur within area
Sula leucogaster Brown Booby [1022]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Thalassarche impavida		
Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species		
Anoxypristis cuspidata		
Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat known to occur within area
Balaenoptera bonaerensis		
Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis		
Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus		
Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus		
Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Carcharhinus longimanus		
Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharias taurus		
Grey Nurse Shark [64469]		Congregation or aggregation known to occur within area
Carcharodon carcharias		
White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat known to occur within area
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Dugong dugon Dugong [28]		Breeding known to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Species or species habitat likely to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Isurus paucus Longfin Mako [82947]		Species or species habitat likely to occur within area
Lamna nasus Porbeagle, Mackerel Shark [83288]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Species or species habitat known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat likely to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sousa sahulensis as Sousa chinensis Australian Humpback Dolphin [87942]		Species or species habitat known to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Migratory Terrestrial Species		
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area
Motacilla flava Yellow Wagtail [644]		Species or species habitat may occur within area
Migratory Wetlands Species		
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Limosa lapponica		
Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Numenius madagascariensis		
Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Pandion haliaetus		
Osprey [952]		Breeding known to occur within area
Thalasseus bergii		
Greater Crested Tern [83000]		Breeding known to occur within area
Tringa nebularia		
Common Greenshank, Greenshank [832]	Endangered	Species or species habitat likely to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Commonwealth Land Name	State
Defence	
Defence - EXMOUTH VLF TRANSMITTER STATION [50123]	WA
Defence - EXMOUTH VLF TRANSMITTER STATION [50122]	WA
Defence - LEARMONTH - AIR WEAPONS RANGE [50193]	WA
Defence - LEARMONTH RADAR SITE - VLAMING HEAD EXMOUTH [50001]	WA
Unknown	
Commonwealth Land - [52236]	WA

Bird		
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Species or species habitat likely to occur within area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat likely to occur within area
Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat known to occur within area overfly marine area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area overfly marine area
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]		Breeding known to occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat may occur within area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area overfly marine area
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area overfly marine area
Hydroprogne caspia as Sterna caspia Caspian Tern [808]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Larus pacificus Pacific Gull [811]		Breeding known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area
Motacilla flava Yellow Wagtail [644]		Species or species habitat may occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Papasula abbotti Abbott's Booby [59297]	Endangered	Species or species habitat may occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Breeding known to occur within area
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]	Endangered	Species or species habitat may occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area overfly marine area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Breeding known to occur within area
Sternula nereis as Sterna nereis Fairy Tern [82949]		Breeding known to occur within area
Sula dactylatra Masked Booby [1021]		Breeding known to occur within area
Sula leucogaster Brown Booby [1022]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Thalassarche impavida		
Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalasseus bengalensis as Sterna bengalensis		
Lesser Crested Tern [66546]		Breeding known to occur within area
Thalasseus bergii as Sterna bergii		
Greater Crested Tern [83000]		Breeding known to occur within area
Tringa nebularia		
Common Greenshank, Greenshank [832]	Endangered	Species or species habitat likely to occur within area overfly marine area
Fish		
Acentronura larsonae		
Helen's Pygmy Pipehorse [66186]		Species or species habitat may occur within area
Bhanotia fasciolata		
Corrugated Pipefish, Barbed Pipefish [66188]		Species or species habitat may occur within area
Bulbonaricus brauni		
Braun's Pughead Pipefish, Pug-headed Pipefish [66189]		Species or species habitat may occur within area
Campichthys tricarinatus		
Three-keel Pipefish [66192]		Species or species habitat may occur within area
Choeroichthys brachysoma		
Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
Choeroichthys latispinosus		
Muiron Island Pipefish [66196]		Species or species habitat may occur within area
Choeroichthys suillus		
Pig-snouted Pipefish [66198]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Corythoichthys amplexus Fijian Banded Pipefish, Brown-banded Pipefish [66199]		Species or species habitat may occur within area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
Corythoichthys intestinalis Australian Messmate Pipefish, Banded Pipefish [66202]		Species or species habitat may occur within area
Corythoichthys schultzi Schultz's Pipefish [66205]		Species or species habitat may occur within area
Cosmocampus banneri Roughridge Pipefish [66206]		Species or species habitat may occur within area
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Doryrhamphus multiannulatus Many-banded Pipefish [66717]		Species or species habitat may occur within area
Doryrhamphus negrosensis Flagtail Pipefish, Masthead Island Pipefish [66213]		Species or species habitat may occur within area
Festucalex scalaris Ladder Pipefish [66216]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area
Halicampus nitidus Glittering Pipefish [66224]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Phoxocampus belcheri Black Rock Pipefish [66719]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammal

Dugong dugon Dugong [28]		Breeding known to occur within area
Reptile		
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus duboisii Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus laevis Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area
Aipysurus mosaicus as Aipysurus eydouxii Mosaic Sea Snake [87261]		Species or species habitat may occur within area
Aipysurus tenuis Brown-lined Sea Snake, Mjoberg's Sea Snake [1121]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area
Ephalophis greyae as Ephalophis greyi Mangrove Sea Snake [93738]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis czeblukovi Fine-spined Sea Snake [59233]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area

Whales and Other Cetaceans [Resource Information]

Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Eubalaena australis Southern Right Whale [40]	Endangered	Species or species habitat likely to occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Indopacetus pacificus Longman's Beaked Whale [72]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
Lagenodelphis hosei Fraser's Dolphin, Sarawak Dolphin [41]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mesoplodon densirostris Blainville's Beaked Whale, Dense-beaked Whale [74]		Species or species habitat may occur within area
Mesoplodon ginkgodens Gingko-toothed Beaked Whale, Gingko-toothed Whale, Gingko Beaked Whale [59564]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Species or species habitat known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Sousa sahulensis Australian Humpback Dolphin [87942]		Species or species habitat known to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Tursiops aduncus (Arafura/Timor Sea populations)		
Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Tursiops truncatus s. str.		
Bottlenose Dolphin [68417]		Species or species habitat may occur within area
Ziphius cavirostris		
Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Australian Marine Parks [Resource Information]

Park Name	Zone & IUCN Categories
Gascoyne	Habitat Protection Zone (IUCN IV)
Argo-Rowley Terrace	Multiple Use Zone (IUCN VI)
Argo-Rowley Terrace	Multiple Use Zone (IUCN VI)
Eighty Mile Beach	Multiple Use Zone (IUCN VI)
Gascoyne	Multiple Use Zone (IUCN VI)
Montebello	Multiple Use Zone (IUCN VI)
Mermaid Reef	National Park Zone (IUCN II)
Ningaloo	National Park Zone (IUCN II)
Ningaloo	Recreational Use Zone (IUCN IV)
Ningaloo	Recreational Use Zone (IUCN IV)
Argo-Rowley Terrace	Special Purpose Zone (Trawl) (IUCN VI)

Habitat Critical to the Survival of Marine Turtles [Resource Information]

Scientific Name	Behaviour	Presence
Aug - Sep		
Natator depressus		
Flatback Turtle [59257]	Nesting	Known to occur
Dec - Jan		

Scientific Name	Behaviour	Presence
Chelonia mydas Green Turtle [1765]	Nesting	Known to occur
Nov-Feb		
Caretta caretta Loggerhead Turtle [1763]	Nesting	Known to occur
Nov - May		
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Known to occur

EPBC Act Referrals			[Resource Information]
Title of referral	Reference	Referral Outcome	Assessment Status
Browse to North West Shelf Development, Indian Ocean, WA	2018/8319		Approval
Gorgon Gas Development	2003/1294		Post-Approval
Ningaloo Lighthouse Development, 17km north west Exmouth, Western Australia	2020/8693		Post-Approval
Project Highclere Cable Lay and Operation	2022/09203		Completed

Action clearly unacceptable

Title of referral	Reference	Referral Outcome	Assessment Status
Action clearly unacceptable			
Highlands 3D Marine Seismic Survey	2012/6680	Action Clearly Unacceptable	Completed
Controlled action			
'Van Gogh' Petroleum Field Development	2007/3213	Controlled Action	Post-Approval
Construct and operate LNG & domestic gas plant including onshore and offshore facilities - Wheatston	2008/4469	Controlled Action	Post-Approval
Develop Jansz-Io deepwater gas field in Permit Areas WA-18-R, WA-25-R and WA-26-	2005/2184	Controlled Action	Post-Approval
Development of Angel gas and condensate field, North West Shelf	2004/1805	Controlled Action	Post-Approval
Development of Browse Basin Gas Fields (Upstream)	2008/4111	Controlled Action	Completed
Development of Coniston/Novara fields within the Exmouth Sub-basin	2011/5995	Controlled Action	Post-Approval
Development of Stybarrow petroleum field incl drilling and facility installation	2004/1469	Controlled Action	Post-Approval
Echo-Yodel Production Wells	2000/11	Controlled Action	Post-Approval
Enfield full field development	2001/257	Controlled Action	Post-Approval
Equus Gas Fields Development Project, Carnarvon Basin	2012/6301	Controlled Action	Completed
Gorgon Gas Development 4th Train Proposal	2011/5942	Controlled Action	Post-Approval
Gorgon Gas Revised Development	2008/4178	Controlled Action	Post-Approval
Greater Enfield (Vincent) Development	2005/2110	Controlled Action	Post-Approval
Greater Gorgon Development - Optical Fibre Cable, Mainland to Barrow Island	2005/2141	Controlled Action	Completed
Light Crude Oil Production	2001/365	Controlled Action	Post-Approval
Mardie Project, 80 km south west of Karratha, WA	2018/8236	Controlled Action	Post-Approval

Title of referral	Reference	Referral Outcome	Assessment Status
Controlled action			
Pluto Gas Project	2005/2258	Controlled Action	Completed
Pluto Gas Project Including Site B	2006/2968	Controlled Action	Post-Approval
Pyrenees Oil Fields Development	2005/2034	Controlled Action	Post-Approval
Simpson Development	2000/59	Controlled Action	Completed
Simpson Oil Field Development	2001/227	Controlled Action	Post-Approval
The Scarborough Project - FLNG & assoc subsea infrastructure, Carnarvon Basin	2013/6811	Controlled Action	Post-Approval
Vincent Appraisal Well	2000/22	Controlled Action	Post-Approval
Yardie Creek Road Realignment Project	2021/8967	Controlled Action	Assessment Approach
Not controlled action			
'Goodwyn A' Low Pressure Train Project	2003/914	Not Controlled Action	Completed
'Van Gogh' Oil Appraisal Drilling Program, Exploration Permit Area WA-155-P(1)	2006/3148	Not Controlled Action	Completed
Airlie Island soil and groundwater investigations, Exmouth Gulf, offshore Pilbara coast	2014/7250	Not Controlled Action	Completed
Baniyas-1 Exploration Well, EP-424, near Onslow	2007/3282	Not Controlled Action	Completed
Barrow Island 2D Seismic survey	2006/2667	Not Controlled Action	Completed
Bollinger 2D Seismic Survey 200km North of North West Cape WA	2004/1868	Not Controlled Action	Completed
Bultaco-2, Laverda-2, Laverda-3 and Montesa-2 Appraisal Wells	2000/103	Not Controlled Action	Completed
Carnarvon 3D Marine Seismic Survey	2004/1890	Not Controlled Action	Completed
Cazadores 2D seismic survey	2004/1720	Not Controlled Action	Completed

Title of referral	Reference	Referral Outcome	Assessment Status
Not controlled action			
Construction and operation of an unmanned sea platform and connecting pipeline to Varanus Island for	2004/1703	Not Controlled Action	Completed
Controlled Source Electromagnetic Survey	2007/3262	Not Controlled Action	Completed
Development of Halyard Field off the west coast of WA	2010/5611	Not Controlled Action	Completed
Development of Mutineer and Exeter petroleum fields for oil production, Permit	2003/1033	Not Controlled Action	Completed
Drilling of an exploration well Gats-1 in Permit Area WA-261-P	2004/1701	Not Controlled Action	Completed
Eagle-1 Exploration Drilling, North West Shelf, WA	2019/8578	Not Controlled Action	Completed
Echo A Development WA-23-L, WA-24-L	2005/2042	Not Controlled Action	Completed
Exploration drilling well WA-155-P(1)	2003/971	Not Controlled Action	Completed
Exploration of appraisal wells	2006/3065	Not Controlled Action	Completed
Exploration Well (Taunton-2)	2002/731	Not Controlled Action	Completed
Exploration Well in Permit Area WA-155-P(1)	2002/759	Not Controlled Action	Completed
Exploratory drilling in permit area WA-225-P	2001/490	Not Controlled Action	Completed
Extension of Simpson Oil Platforms & Wells	2002/685	Not Controlled Action	Completed
HCA05X Macedon Experimental Survey	2004/1926	Not Controlled Action	Completed
Hess Exploration Drilling Programme	2007/3566	Not Controlled Action	Completed
Huascaran-1 exploration well (WA-292-P)	2001/539	Not Controlled Action	Completed
Improving rabbit biocontrol: releasing another strain of RHDV, sthrn two thirds of Australia	2015/7522	Not Controlled Action	Completed
Infill Production Well (Griffin-9)	2001/417	Not Controlled Action	Completed

Title of referral	Reference	Referral Outcome	Assessment Status
Not controlled action			
Jansz-2 and 3 Appraisal Wells	2002/754	Not Controlled Action	Completed
Klammer 2D Seismic Survey	2002/868	Not Controlled Action	Completed
Maia-Gaea Exploration wells	2000/17	Not Controlled Action	Completed
Manaslu - 1 and Huascaran - 1 Offshore Exploration Wells	2001/235	Not Controlled Action	Completed
Mermaid Marine Australia Desalination Project	2011/5916	Not Controlled Action	Completed
Montesa-1 and Bultaco-1 Exploration Wells	2000/102	Not Controlled Action	Completed
North Rankin B gas compression facility	2005/2500	Not Controlled Action	Completed
Pipeline System Modifications Project	2000/3	Not Controlled Action	Completed
Project Highclere Geophysical Survey	2021/9023	Not Controlled Action	Completed
Searipple gas and condensate field development	2000/89	Not Controlled Action	Completed
Spool Base Facility	2001/263	Not Controlled Action	Completed
Subsea Gas Pipeline From Stybarrow Field to Griffin Venture Gas Export Pipeline	2005/2033	Not Controlled Action	Completed
sub-sea tieback of Perseus field wells	2004/1326	Not Controlled Action	Completed
Telstra North Rankin Spur Fibre Optic Cable	2016/7836	Not Controlled Action	Completed
Thevenard Island Retirement Project	2015/7423	Not Controlled Action	Completed
To construct and operate an offshore submarine fibre optic cable, WA	2014/7373	Not Controlled Action	Completed
WA-295-P Kerr-McGee Exploration Wells	2001/152	Not Controlled Action	Completed
Wanda Offshore Research Project, 80 km north-east of Exmouth, WA	2018/8293	Not Controlled Action	Completed

Title of referral	Reference	Referral Outcome	Assessment Status
Not controlled action			
Western Flank Gas Development	2005/2464	Not Controlled Action	Completed
Wheatstone 3D seismic survey, 70km north of Barrow Island	2004/1761	Not Controlled Action	Completed
Not controlled action (particular manner)			
'Kate' 3D marine seismic survey, exploration permits WA-320-P and WA-345-P, 60km	2005/2037	Not Controlled Action (Particular Manner)	Post-Approval
'Tourmaline' 2D marine seismic survey, permit areas WA-323-P, WA-330-P and WA-32	2005/2282	Not Controlled Action (Particular Manner)	Post-Approval
"Leanne" offshore 3D seismic exploration, WA-356-P	2005/1938	Not Controlled Action (Particular Manner)	Post-Approval
2D and 3D seismic surveys	2005/2151	Not Controlled Action (Particular Manner)	Post-Approval
2D marine seismic survey	2012/6296	Not Controlled Action (Particular Manner)	Post-Approval
2D seismic survey	2008/4493	Not Controlled Action (Particular Manner)	Post-Approval
2D Seismic Survey	2005/2146	Not Controlled Action (Particular Manner)	Post-Approval
2D Seismic Survey Permit Area WA-352-P	2008/4628	Not Controlled Action (Particular Manner)	Post-Approval
2D seismic survey within permit WA-291	2007/3265	Not Controlled Action (Particular Manner)	Post-Approval
3D marine seismic survey	2008/4281	Not Controlled Action (Particular Manner)	Post-Approval

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Canyons linking the Cuvier Abyssal Plain and the Cape Range Peninsula	North-west
Commonwealth waters adjacent to Ningaloo Reef	North-west

Name	Region
Continental Slope Demersal Fish Communities	North-west
Exmouth Plateau	North-west
Glomar Shoals	North-west
Mermaid Reef and Commonwealth waters surrounding Rowley Shoals	North-west

Biologically Important Areas		[Resource Information]
Scientific Name	Behaviour	Presence
Dugong		
Dugong dugon Dugong [28]	Breeding	Known to occur
Dugong dugon Dugong [28]	Calving	Known to occur
Dugong dugon Dugong [28]	Foraging (high density seagrass beds)	Known to occur
Dugong dugon Dugong [28]	Nursing	Known to occur
Marine Turtles		
Caretta caretta Loggerhead Turtle [1763]	Foraging	Known to occur
Caretta caretta Loggerhead Turtle [1763]	Internesting buffer	Known to occur
Caretta caretta Loggerhead Turtle [1763]	Nesting	Known to occur
Chelonia mydas Green Turtle [1765]	Aggregation	Known to occur
Chelonia mydas Green Turtle [1765]	Basking	Known to occur
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur

Scientific Name	Behaviour	Presence
Chelonia mydas Green Turtle [1765]	Internesting	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting buffer	Known to occur
Chelonia mydas Green Turtle [1765]	Mating	Known to occur
Chelonia mydas Green Turtle [1765]	Nesting	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Foraging	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting buffer	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Mating	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Known to occur
Natator depressus Flatback Turtle [59257]	Aggregation	Known to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Natator depressus Flatback Turtle [59257]	Mating	Known to occur

Scientific Name	Behaviour	Presence
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur
Seabirds		
Ardenna pacifica Wedge-tailed Shearwater [84292]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur
Phaethon lepturus White-tailed Tropicbird [1014]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sternula albifrons sinensis Little Tern [82850]	Resting	Known to occur
Sternula nereis Fairy Tern [82949]	Breeding	Known to occur
Sula leucogaster Brown Booby [1022]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Sharks		
Rhincodon typus Whale Shark [66680]	Foraging	Known to occur
Rhincodon typus Whale Shark [66680]	Foraging (high density prey)	Known to occur
Whales		
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Foraging	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Migration	Known to occur

Scientific Name	Behaviour	Presence
Megaptera novaeangliae Humpback Whale [38]	Migration (north and south)	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Resting	Known to occur

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data is available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance on the contents of this report.

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions when time permits.

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded breeding sites; and
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements

This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

-Office of Environment and Heritage, New South Wales

EPBC Act Protected Matters Report - Operational Areas

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 03-Feb-2025

Summary
Details
- Matters of NES
- Other Matters Protected by the EPBC Act
- Extra Information

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	1
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	23
Listed Migratory Species:	36

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	None
Commonwealth Heritage Places:	None
Listed Marine Species:	60
Whales and Other Cetaceans:	23
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None
Habitat Critical to the Survival of Marine Turtles:	1

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	None
Regional Forest Agreements:	None
Nationally Important Wetlands:	None
EPBC Act Referrals:	35
Key Ecological Features (Marine):	2
Biologically Important Areas:	5
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act)

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act.
Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat may occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat may occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]	Endangered	Species or species habitat may occur within area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
[Sternula nereis nereis](#) Australian Fairy Tern [82950]	Vulnerable	Species or species habitat may occur within area

[Caretta caretta](#) Loggerhead Turtle [1763]	Endangered	Species or species habitat likely to occur within area
[Chelonia mydas](#) Green Turtle [1765]	Vulnerable	Species or species habitat likely to occur within area
[Dermochelys coriacea](#) Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Species or species habitat likely to occur within area
[Eretmochelys imbricata](#) Hawksbill Turtle [1766]	Vulnerable	Species or species habitat likely to occur within area
[Natator depressus](#) Flatback Turtle [59257]	Vulnerable	Congregation or aggregation known to occur within area
SHARK		

Scientific Name	Threatened Category	Presence Text
Carcharias taurus (west coast population)		
Grey Nurse Shark (west coast population) [68752]	Vulnerable	Species or species habitat likely to occur within area
Carcharodon carcharias		
White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Pristis pristis		
Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
Pristis zijsron		
Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus		
Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sphyrna lewini		
Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat likely to occur within area

Listed Migratory Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
Anous stolidus		
Common Noddy [825]		Species or species habitat may occur within area
Calonectris leucomelas		
Streaked Shearwater [1077]		Species or species habitat likely to occur within area
Fregata ariel		
Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat likely to occur within area
Fregata minor		
Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
[Phaethon lepturus](#) White-tailed Tropicbird [1014]		Species or species habitat likely to occur within area
Migratory Marine Species		
[Anoxypristis cuspidata](#) Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat known to occur within area
[Balaenoptera borealis](#) Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
[Balaenoptera edeni](#) Bryde's Whale [35]		Species or species habitat likely to occur within area
[Balaenoptera musculus](#) Blue Whale [36]	Endangered	Migration route known to occur within area
[Balaenoptera physalus](#) Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
[Carcharhinus longimanus](#) Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
[Carcharias taurus](#) Grey Nurse Shark [64469]		Species or species habitat likely to occur within area
[Carcharodon carcharias](#) White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
[Caretta caretta](#) Loggerhead Turtle [1763]	Endangered	Species or species habitat likely to occur within area
[Chelonia mydas](#) Green Turtle [1765]	Vulnerable	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Species or species habitat likely to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat likely to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Isurus paucus Longfin Mako [82947]		Species or species habitat likely to occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat likely to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat likely to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Congregation or aggregation known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Pristis pristis		
Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
Pristis zijsron		
Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus		
Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Tursiops aduncus (Arafura/Timor Sea populations)		
Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat may occur within area
Migratory Wetlands Species		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat may occur within area
Calidris acuminata		
Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat may occur within area
Calidris canutus		
Red Knot, Knot [855]	Vulnerable	Species or species habitat may occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
Calidris melanotos		
Pectoral Sandpiper [858]		Species or species habitat may occur within area
Numenius madagascariensis		
Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area

Other Matters Protected by the EPBC Act

Listed Marine Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
Bird		
Actitis hypoleucos Common Sandpiper [59309]		Species or species habitat may occur within area
Anous stolidus Common Noddy [825]		Species or species habitat may occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat may occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat may occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area overfly marine area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area overfly marine area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat likely to occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat likely to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat may occur within area

Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Reptile		
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus duboisii Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat likely to occur within area
Aipysurus laevis Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Aipysurus mosaicus as Aipysurus eydouxii Mosaic Sea Snake [87261]		Species or species habitat may occur within area
Aipysurus tenuis Brown-lined Sea Snake, Mjoberg's Sea Snake [1121]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Species or species habitat likely to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Species or species habitat likely to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Species or species habitat likely to occur within area
Ephalophis greyae as Ephalophis greyi Mangrove Sea Snake [93738]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat likely to occur within area
Hydrophis czeblukovi Fine-spined Sea Snake [59233]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis macdowelli as Hydrophis mcdowelli		
MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area
Hydrophis major as Disteira major		
Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus		
Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii		
Horned Sea Snake [93509]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus		
Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii		
Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Congregation or aggregation known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera borealis		
Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus		
Blue Whale [36]	Endangered	Migration route known to occur within area

Current Scientific Name	Status	Type of Presence
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat may occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat may occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Glomar Shoals	North-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Marine Turtles		

Scientific Name	Behaviour	Presence
[Natator depressus](#) Flatback Turtle [59257]	Internesting buffer	Known to occur
Seabirds		
[Ardenna pacifica](#) Wedge-tailed Shearwater [84292]	Breeding	Known to occur
Sharks		
[Rhincodon typus](#) Whale Shark [66680]	Foraging	Known to occur
Whales		
[Balaenoptera musculus brevicauda](#) Pygmy Blue Whale [81317]	Migration	Known to occur
[Megaptera novaeangliae](#) Humpback Whale [38]	Migration (north and south)	Known to occur

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data is available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance on the contents of this report.

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions when time permits.

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded breeding sites; and
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements

This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

-Office of Environment and Heritage, New South Wales

1. CONSULTATION APPROACH

Consultation under regulation 25 of the OPGGS(E) Regulations provides that a titleholder must consult each relevant person (regulation 25(1)), must give each relevant person sufficient information to allow the relevant person to make an informed assessment of the possible consequences of the activity on the functions, interests or activities of the relevant person (regulation 25(2)), and must allow a relevant person a reasonable period for consultation (regulation 25(3)).

A titleholder must also give a relevant person a reasonable opportunity to consult – this means that a titleholder will need to demonstrate that what it did constituted consultation appropriate and adapted to the nature of the interests of the relevant person (see Tipakalippa Full Court paragraph 104). The EP must contain a report that contains an assessment of the merits of any objection or claim about the adverse impact of each activity to which the EP relates, and a statement of the titleholder's response, or proposed response, if any, to each objection or claim (regulation 24(b)).

The criteria for acceptance of an EP includes that the EP demonstrates that the measures (if any) that the titleholder has adopted, or proposes to adopt, because of the consultations are appropriate (regulation 34(g)).

For the North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan (EP), Woodside has taken a broad and proactive tiered consultation approach over a period of thirteen months.

This approach was aimed at raising public awareness of the consultation opportunity and to enable self-identification. It included a social media campaign and advertising in national, state, regional and Indigenous newspapers.

The tiered consultation approach discharges regulation 25 of the Environment Regulations' requirements. The approach is proactive, extended, has enabled self-identification, and has raised broad awareness of Woodside's activities related to this EP.

1.1 Tiered consultation approach

Regulation 25	Woodside's consultation approach assessed and identified relevant persons, enabled two-way dialogue and engagement, and included email and phone call follow up. The approach taken comfortably satisfies the requirements of regulation 25: to give relevant persons sufficient information and allow a reasonable period of time for consultation (see Section 5 in the EP).
Proactive	To raise awareness of the consultation process, and to enable grass-roots consultation, Woodside undertook advertised regional consultation roadshows and facilitated consultation at regional community events.
Self-Identification	Broad communication activities were undertaken to build awareness of consultation and enable self-identification, supported by targeted education materials.
Broad Understanding	Broad proactive communication activities were undertaken with the public to raise awareness of Woodside's activities.

1.2 Building on the existing consultation approach

For this EP, Woodside has built on its consultation methodology and undertaken additional consultation activities throughout the consultation period to ensure a reasonable period of time and sufficient information has been provided to relevant persons so that they can make an informed assessment of the possible consequences of the activity on their functions, interests or activities.

The approach for this included:

- a consultation period of up to thirteen months.
- undertaking proactive consultation activities to provide sufficient information to relevant persons.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- raising awareness of the consultation process and opportunity to provide feedback.
- driving participation in the consultation process.

An overview of this approach is shown below:

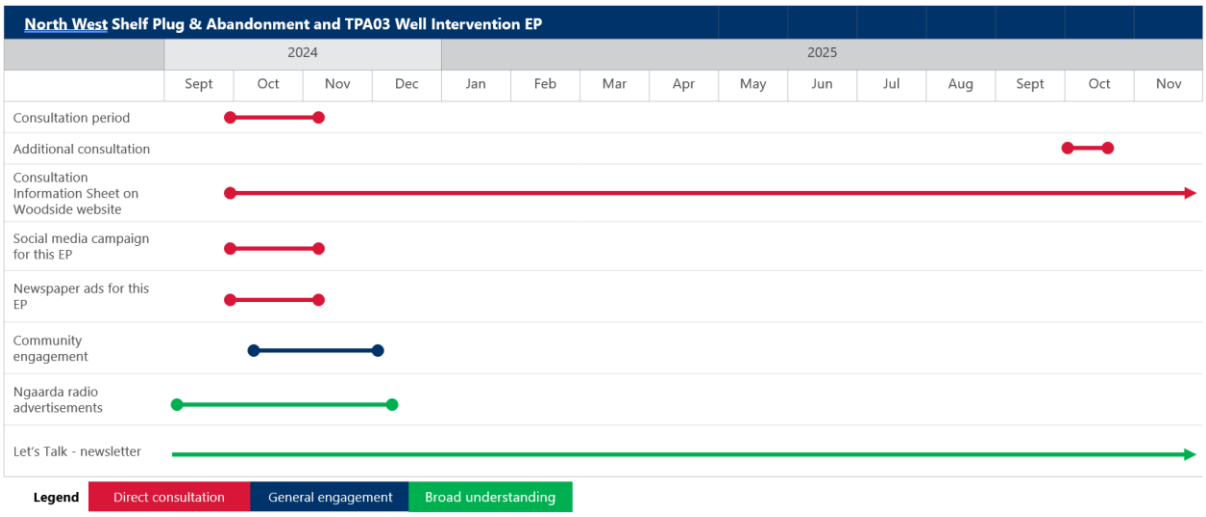

Figure 1-1: North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan consultation activity

1.3 Traditional Custodian consultation approach

Woodside has meaningful long-term relationships with relevant Traditional Custodians specifically tailored to provide for effective engagement which is continuous and is not confined to individual EPs, instead covering all EPs and other issues that are relevant at the time of engagement.

To this end, consultation on any particular EP, including the North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention EP, happens before, during and after the designated consultation period in a more holistic manner allowing for an understanding of the bigger picture and accommodating cultural requirements. Ongoing consultation remains an important part of consulting with Traditional Custodians based on availability, cultural protocols and the preferred method of consultation for each relevant person.

1.4 NGO consultation approach

Woodside has an established history of consulting with environmental non-government organisations (NGOs) as part of its EP consultation. In its methodology (Section 5.3.4, Table 5-2), NGOs are considered “Other non-government groups or organisations” and “Research institutes and local conservation groups or organisations”. Relevant person identification for these categories is based on registered non-government groups or organisations with current targeted public website material specific to the proposed activity at the time of developing the EP and who have demonstrated functions, interests or activities relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation.

So that NGOs were given sufficient information and a reasonable period of time to consult, Woodside:

- advertised the consultation period (social and traditional media)
- directly consulted NGOs
- participated in regional community events (which were advertised) in the Pilbara and Gascoyne which could be attended by any NGOs including local groups.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

1.5 NGO response

Woodside consulted with nine NGOs for the North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention EP. One NGO, The Wilderness Society (TWS), responded within the four-week consultation period. Table 2 summarises the consultation that occurred between Woodside and TWS with a summary provided of TWS' feedback, objections or claims and Woodside's assessment and response to these.

No other responses were received from NGOs during consultation for the North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

2. RELEVANCY ASSESSMENT

2.1 Assessment of relevant persons for the proposed activity

The result of Woodside's assessment of relevant persons in accordance with regulation 25 (1) of the Environment Regulations is outlined below at Table 1 and Table 2.

Persons or organisations that Woodside assessed as not relevant but nonetheless chose to contact at its discretion in accordance with Section 5.3.4 in the EP or self-identified and Woodside assessed as not relevant are summarised below at Table 1 and Table 3.

As per Woodside's methodology (Section 5 in the EP), assessment of relevant persons is informed by the environment that may be affected (EMBA), shown in Figure 2-1.

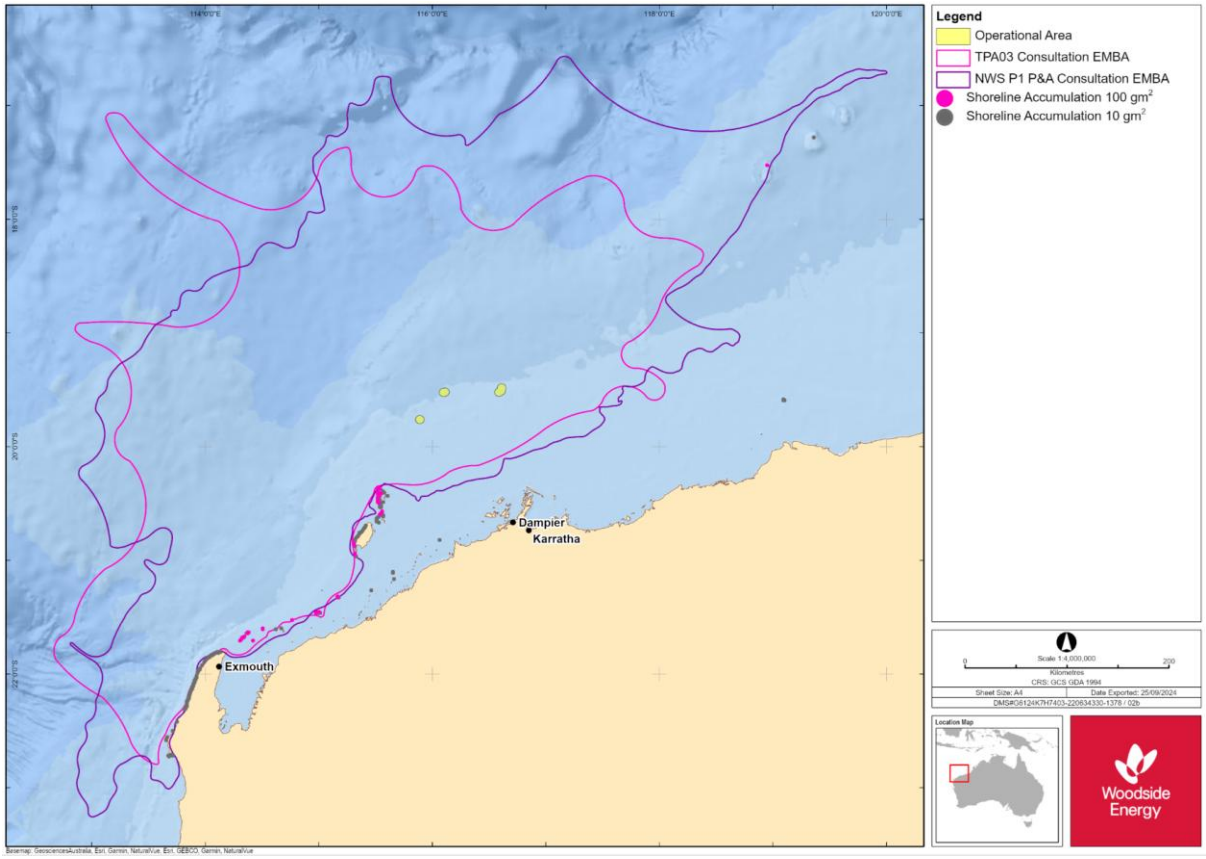

Figure 2-1: Operational Areas and EMBA for this EP

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

2.2 Table 1: Assessment of relevance

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Commonwealth and WA State Government Departments or Agencies – Marine			
Australian Border Force (ABF)	Responsible for coordinating maritime security	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. ABF's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Australian Communications and Media Authority (ACMA)	Regulator for communications and media	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. ACMA's responsibilities may be relevant to the activity as there maybe telecommunications lines that intersect the Operational Area	Yes
Australian Fisheries Management Authority (AFMA)	Responsible for managing Commonwealth fisheries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. The North West Slope Trawl Fishery and Western Deepwater Trawl Fishery are active in the EMBA.	Yes
Australian Hydrographic Office (AHO)	Responsible for maritime safety and Notices to Mariners	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AHO's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Australian Maritime Safety Authority (AMSA) – Marine Pollution	Legislated responsibility for oil pollution response in Commonwealth waters	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AMSA – Marine Pollution's responsibilities may be relevant to the activity as the proposed activity has a hydrocarbon spill risk which may require AMSA response in Commonwealth waters.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Australian Maritime Safety Authority (AMSA) – Marine Safety	Statutory agency for vessel safety and navigation	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AMSA – Marine Safety's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries	Responsible for implementing Commonwealth policies and programs to support agriculture, fishery, food and forestry industries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. The North West Slope Trawl Fishery and Western Deepwater Trawl Fishery are active in the EMBA. DAFF – Fisheries responsibilities may be relevant to the activity as the North West Slope Trawl Fishery and Western Deepwater Trawl Fishery are active in the EMBA.	Yes
Department of Defence (DoD)	Responsible for defending Australia and its national interests.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. DoD's responsibilities may be relevant to the activity as defence training areas lie within the EMBA.	Yes
Department of Planning, Lands and Heritage (DPLH)	Responsible for state level land use planning and management, and oversight of Aboriginal cultural heritage and built heritage matters.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. There is known Maritime Cultural Heritage overlapping the EMBA.	Yes
Department of Primary Industries and Regional Development (DPIRD)	Responsible for managing State fisheries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The Mackerel Managed Fishery, Pilbara Trawl Managed Fishery, Pilbara Trap Managed Fishery and Pilbara Line Fishery are active in the Operational Area. The West Australian Sea Cucumber Managed Fishery, Exmouth Gulf Managed Fishery, Gascoyne Demersal Scalefish Managed Fishery, Mackerel Managed Fishery,	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Northern Demersal Scalefish Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Trawl Managed Fishery, Pilbara Trap Managed Fishery, Pilbara Line Fishery, Specimen Shell Managed Fishery, West Coast Deep Sea Crustacean Managed Fishery have been active in the EMBA within the last 5 years. DPIRD's responsibilities may be relevant to the activity as the government department responsible for State fisheries.	
Department of Transport (DoT) *(Now the Department of Transport and Major Infrastructure)*	Legislated responsibility for oil pollution response in State waters	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has a hydrocarbon spill risk, which may require DoT response in State waters.	Yes
Pilbara Ports Authority (PPA) *(Now Pilbara Ports)*	PPA encompasses the Ports of Ashburton, Dampier, Port Hedland and Varanus Island.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Pilbara Ports Authority's responsibilities as the EMBA overlaps the Pilbara Ports Authority's area of responsibility.	Yes
Commonwealth and WA State Government Departments or Agencies – Environment			
Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)	DAFF administers, implements and enforces the Biosecurity Act 2015. The Department requests to be consulted where an activity has the potential to transfer marine pests. DAFF also has inspection and reporting requirements to ensure that all conveyances (vessels, installations and aircraft) arriving in Australian territory comply with international health	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DAFF – Biosecurity's responsibilities may be relevant to the proposed activities in the EMBA in the prevention of introduced marine species.	Yes

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
	regulations and that any biosecurity risk is managed. The Dept requests to be consulted where an activity involves the movement of aircraft or vessels between Australia and offshore petroleum activities either inside or outside Australian territory.		
Department of Biodiversity, Conservation and Attractions (DBCA)	Responsible for managing WA's parks, forests and reserves to achieve wildlife conservation and provide sustainable recreation and tourism opportunities.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. The DBCA's responsibilities may be relevant to the activity as the EMBA overlaps WA parks, forests or reserves. Activities have the potential to impact marine tourism in the EMBA.	Yes
Department of Climate Change, Energy, the Environment and Water (DCCEEW)	Responsible for implementing Commonwealth policies and programs to support climate change, sustainable energy use, water resources, the environment and our heritage. Administers the Underwater Cultural Heritage Act 2018 in collaboration with the States, Northern Territory and Norfolk Island, which is responsible for the protection of shipwrecks, sunken aircraft and other types of underwater heritage and their associated artefacts in Commonwealth waters.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DCCEEW's responsibilities may be relevant to the proposed activities in the EMBA as there are potential environmental impacts from the proposed activity. There is known Maritime Cultural Heritage overlapping the EMBA.	Yes
Director of National Parks (DNP)	Responsible for the management of Commonwealth parks and conservation zones.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DNP's responsibilities may be relevant to the activity as DNP requires an awareness of activities that occur within	Yes

		Australian Marine Parks (AMPs), and an understanding of potential impacts and risks to the values of parks (NOPSEMA guidance note: N-04750-GN1785 A620236, June 2020). Titleholders are required to consult DNP on offshore petroleum activities if they occur in, or may impact on the values of marine parks, including where potential spill response activities may occur in the event of a spill (i.e. scientific monitoring).	
Ningaloo Coast World Heritage Advisory Committee (NCWHAC)	Supports the DBCA to manage the Ningaloo Coast World Heritage Area	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. The NCWHAC's responsibilities may be relevant to the activity as the EMBA overlaps the Ningaloo Marine Park.	Yes
Commonwealth and State Government Departments or Agencies – Industry			
Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) *(Now the Department of Mines, Petroleum and Exploration)*	Department of relevant State Minister	Required to be consulted under regulation 25(1)(c) of the Environment Regulations.	Yes
Department of Industry, Science and Resources (DISR)	Department of relevant Commonwealth Minister.	Required to be consulted under regulation 25(1)(a) of the Environment Regulations.	Yes
Commonwealth commercial fisheries and peak representative bodies			
Australian Southern Bluefin Tuna Industry Association (ASBTIA)	Represents the interests of the Southern Bluefin Tuna Fishery and Western Skipjack Fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Southern Bluefin Tuna Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Southern Bluefin Tuna Fishery, the ASBTIA has also been assessed as not relevant. On advice from AFMA, Woodside chose to contact ASBTIA at its discretion in line with Section 5.3.7.	No

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Commonwealth Fisheries Association (CFA)	Represents the interests of commercial fishers with licences in Commonwealth waters	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The North West Slope Trawl Fishery and Western Deepwater Trawl Fishery are active in the EMBA. CFA's functions may be relevant to the activity as the North West Slope Trawl Fishery and Western Deepwater Trawl Fishery are active in the EMBA.	Yes
North West Slope Trawl Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.	Yes
Pearl Producers Association (PPA)	Peak representative organisation of The Australian South Sea Pearling Industry, with members in Western Australia and the Northern Territory	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Pearl Oyster Managed Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Pearl Oyster Managed Fishery, the PPA has also been assessed as not relevant.	No
Southern Bluefin Tuna Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years.	No

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		Woodside does not consider that the proposed activity will present a risk to licence holders, given since 1992, the majority of Australian catch has concentrated in south-eastern Australia. (Patterson et al., 2022). In addition, given fishing methods by licence holders for species fished in this fishery (Australia has a 35% share of total global allowable catch of Southern Bluefin Tuna, which is value-added through tuna ranching near Port Lincoln (South Australia), or fishing effort in New South Wales (Australian Southern Bluefin Tuna Industry Association). On advice from Tuna Australia, Woodside chose to contact licence holders at its discretion in line with Section 5.3.7.	
Tuna Australia	Represents the interests of the Western Tuna and Billfish Fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Western Tuna and Billfish Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Western Tuna and Billfish Fishery, Tuna Australia has also been assessed as not relevant. On advice from AFMA, Woodside chose to contact Tuna Australia at its discretion in line with Section 5.3.7.	No
Western Deepwater Trawl Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps EMBA and has been active in the EMBA within the last 5 years.	Yes
Western Skipjack Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak	No

		representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years. Woodside does not consider that the activity will present a risk to licence holders, given the fishery spans the Australian Fishing Zone west of Victoria and the Torres Strait. The Fishery is not currently active and no fishing has occurred since 2009 (Patterson et al., 2022). In addition, interactions are not expected given the species' pelagic distribution fishing methods for species fished by licence holders. On advice from Tuna Australia, Woodside chose to contact licence holders at its discretion in line with Section 5.3.7.	
Western Tuna and Billfish Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years. On advice from Tuna Australia, Woodside chose to contact licence holders at its discretion in line with Section 5.3.7.	No
State commercial fisheries and peak representative bodies			
Western Australian Fishing Industry Council (WAFIC)	Represents the interests of commercial fishers with licences in State waters.	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Mackerel Managed Fishery, Pilbara Trawl Managed Fishery, Pilbara Trap Managed Fishery and Pilbara Line Fishery have been active in the Operational Area within the last 5 years.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		The West Australian Sea Cucumber Managed Fishery, Exmouth Gulf Managed Fishery, Gascoyne Demersal Scalefish Managed Fishery, Mackerel Managed Fishery, Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Northern Demersal Scalefish Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Trawl Managed Fishery, Pilbara Trap Managed Fishery, Pilbara Line Fishery, Specimen Shell Managed Fishery, West Coast Deep Sea Crustacean Managed Fishery have been active in the EMBA within the last 5 years. Under an agreement WAFIC issued consultation materials to relevant commercial fisheries licence holders. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would be undertaken only in the event of an unplanned emergency scenario.	
Aquaculture Council of Western Australia	Peak body for the state's aquaculture industry	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. ACWA's members are active within the EMBA. As the peak body for WA's aquaculture industry, ACWA's functions may be relevant to the activity as ACWA members are active in the EMBA.	Yes
Abalone Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, the fishery has not been active in the Operational Area or EMBA in the last 5 years.	No

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Greenpeace Australia Pacific (GAP)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations or individuals' under regulation 25(1)(d) of the Environment Regulations to determine Greenpeace Australia Pacific's relevance for the proposed activity. Woodside has assessed that Greenpeace Australia Pacific does not have a publicly available statement (or purpose), website or social media material that demonstrates its functions, interests or activities are relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.3.4). Woodside chose to contact Greenpeace at its discretion in line with Section 5.3.7.	No
Australasian Centre for Corporate Responsibility (ACCR)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations or individuals' under regulation 25(1)(d) of the Environment Regulations to determine Australasian Centre for Corporate Responsibility's relevance for the proposed activity. Woodside has assessed that Australasian Centre for Corporate Responsibility does not have a publicly available statement (or purpose), website or social media material that demonstrates its functions, interests or activities are relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.3.4). Woodside chose to contact ACCR at its discretion in line with Section 5.3.7.	No
Market Forces	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations or individuals' under regulation 25(1)(d) of the Environment Regulations to determine Market Forces relevance for the proposed activity.	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		Woodside has assessed that Market Forces does not have a publicly available statement (or purpose), website or social media material that demonstrates its functions, interests or activities are relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.3.4). Woodside chose to contact Market Forces at its discretion in line with Section 5.3.7.	
Friends of the Earth Australia	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations or individuals' under regulation 25(1)(d) of the Environment Regulations to determine Friends of the Earth's relevance for the proposed activity. Woodside has assessed that Friends of the Earth Australia has a publicly available statement (or purpose), website or social media material that demonstrates that its functions, interests or activities may be relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.3.4).	Yes
The Wilderness Society (TWS)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations or individuals' under regulation 25(1)(d) of the Environment Regulations to determine The Wilderness Society's relevance for the proposed activity. Woodside initially assessed that The Wilderness Society did not have a publicly available statement (or purpose), website or social media material that demonstrated its functions, interests or activities are relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.3.4).	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		Woodside initially chose to contact The Wilderness Society at its discretion in line with Section 5.3.7. The Wilderness Society responded to Woodside demonstrating how its functions, interest and activities could be potentially impacted by the proposed activities under the EP and Woodside has assessed The Wilderness Society as relevant for this EP.	
Environs Kimberley	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that Environs Kimberley's public website material demonstrates an interest in the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2 of the EP).	Yes
Maritime Union of Australia (MUA)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations or individuals' under regulation 25(1)(d) of the Environment Regulations to determine Maritime Union of Australia's relevance for the proposed activity. Woodside has assessed that the Maritime Union of Australia does not have a publicly available statement (or purpose), website or social media material that demonstrates that its functions, interests or activities may be relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.3.4). Woodside chose to contact the MUA at its discretion in line with Section 5.3.7 of the EP.	No
Telstra	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations to determine Telstra's relevance for the proposed activity.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		There are known Telstra communication cables that intersect within the Operational Area.	
Vocus	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations to determine Vocus' relevance for the proposed activity. There are no known communication cables that intersect within the Operational Area.	No
Research institutes and local conservation groups or organisations			
Australian Institute of Marine Science (AIMS)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There may be research being undertaken by AIMS that intersects within the EMBA. Woodside chose to contact AIMS at its discretion in line with Section 5.3.7 of the EP.	Yes
Commonwealth Scientific and Industrial Research Organisation (CSIRO)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There is no known research being undertaken by the insert name CSIRO that intersects within the EMBA. Woodside chose to contact CSIRO at its discretion in line with Section 5.3.7 of the EP.	No
Western Australian Marine Science Institution (WAMSI)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There is no known research being undertaken by the WAMSI that intersects within the EMBA. Woodside chose to contact WAMSI at its discretion in line with Section 5.3.7 of the EP.	No

3. CONSULTATION ACTIVITIES

3.1 North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan EP consultation activities

Woodside has been conducting extensive consultation with relevant persons and other parties for this EP since September 2024 when consultation commenced with interested and affected stakeholders as part of a planned, integrated and consistent approach to stakeholder engagement for Woodside's proposed opportunities.

A broad consultation process has been undertaken with relevant persons for the North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan. Consultation aims to be inclusive, transparent, voluntary, respectful and two-way. Consultation was undertaken by email, letter, phone call and/or meetings and through advertising.

3.2 Discharging Regulation 25 of the Environment Regulations

Woodside advertised the planned activities proposed for this EP in national, state and relevant local newspapers (see Record of Consultation, reference 6.4). Regional newspapers do not require subscription and are available directly to households. All communities within or adjacent to the EMBA had access to this information via this media.

No direct comments or feedback were received from the advertisements.

Newspaper	Coverage	Publication dates
The Australian	National	30 September 2024
The West Australian	Regional (WA)	30 September 2024
Pilbara News	Local (WA)	2 October 2024
North West Telegraph	Local (WA)	2 October 2024
Midwest Times	Local (WA)	1 October 2024
Broome Advertiser	Local (WA)	3 October 2024
Kimberley Echo	Local (WA)	3 October 2024
Koori Mail	Indigenous	2 October 2024
National Indigenous Times	Indigenous	24 September 2024

A Consultation Information Sheet was provided to relevant persons and persons Woodside chose to contact (see Section 5.3.4 in the EP), which included details such as an activity overview, maps, a summary of key risks and/or impacts and management measures (Record of Consultation, reference 6.1.1).

Since the commencement of the initial consultation period (September 2024), the Consultation Information Sheet has been available on Woodside's website and the updated Consultation Information Sheet since October 2024. The Woodside Consultation Information Sheets include a 1800 phone number and Woodside's feedback email address (consultation@feedback.woodside.com).

The Woodside Consultation Activities webpage (accessible on the Consultation Information Sheet via a QR code, banners at community events and via social media content and advertisements) includes Consultation Information Sheets for the EPs on which Woodside is currently consulting, including this EP. The website page also features a subscribe field for EP-focussed communications from Woodside.

Additional targeted information was provided to select relevant persons based on their roles and responsibilities such as a vessel density map (Record of Consultation, reference 6.1.5), GIS shape

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

files, shipwreck information (Record of Consultation, reference 6.1.6), a submarine communication cable map (Record of Consultation, reference 6.1.7) and a defence zone map (Record of Consultation, reference 6.1.4).

Where appropriate, Woodside conducted phone calls and meetings with relevant persons.

Where appropriate, targeted follow-up emails were sent to relevant persons who had not provided a response prior to the close of the target feedback period.

Woodside considered relevant person responses and assessed the merits and relevance of objections and claims about the potential adverse impact of the proposed activity set out in the EP, in accordance with the intended outcome of consultation (see Section 5.2 in the EP).

Consultation activities undertaken with relevant persons are summarised at Appendix F, Table 2.

Engagement undertaken with persons or organisations Woodside assessed as not relevant but chose to contact (see Section 5.3.4 in the EP) or self-identified and Woodside assessed as not relevant are summarised at Appendix F, Table 3.

From September 2024, Woodside commenced a geotargeted sponsored social media campaign (Record of Consultation, reference 6.5) covering various local government authorities within, or coastally adjacent to, the EMBA for the proposed activities. The campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations on how they can find out about Woodside's proposed activities by visiting Woodside's website.

Platform	Geotargeted Reach	Post Dates	Impact	Feedback
Meta - Facebook & Instagram	265,173	4 – 30 October 2024	Reach: 265,173 Frequency: 10.02 Impressions: 2,658,246 Clicks: 2,896 Click Through Rate%: 0.10%	• 31 comments • 0 comments relevant to EP • 75 likes • 17 sad • 7 shares

3.3 Proactive consultation

3.3.1 Community engagement

The Community Information Sessions or community events that Woodside has conducted or attended are outlined below and captured in more detail in (Record of Consultation, reference 6.7). Woodside published advertisements ahead of these sessions and events in relevant local newspapers and on social media to support attendance.

Date	Location	Event (if applicable)
12 October 2024	Dampier	Dampier Beachside Markets
2 November 2024	Dampier	Dampier Beachside Markets
14 November 2024	Exmouth	Community Pop-up Exmouth Mall
18 March 2025	Dampier	Who's Who in the Hood
6 April 2025	Dampier	Dampier Beachside Markets
4 May 2025	Dampier	Dampier Beachside Markets
15 & 16 May 2025	Karratha	Red Earth Arts Festival
15 June 2025	Dampier	Dampier Beachside Markets
28 June 2025	Exmouth	Ningaloo Sky Festival

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Date	Location	Event (if applicable)
2 to 3 August 2025	Karratha	FeNaCING Festival
5 October 2025	Exmouth	Exmouth Community Markets
18 October 2025	Dampier	Dampier Beachside Markets

3.3.2 Community Liaison Group engagement

The Exmouth and Karratha Community Liaison Groups (CLGs) represent the interests of a range of local government, industry and community organisations in relation to oil and gas matters in the Exmouth and Karratha region. Woodside regularly meets with the two CLGs to discuss a range of issues including consultation of specific EPs. For this EP, see 4.13.2 for consultation with Exmouth CLG and 4.13.3 for Karratha CLG.

3.3.3 Newsletters

Woodside's EP focussed newsletter *Let's Talk* is designed to reach existing and potential stakeholders and encourage self-identification about Woodside's EP-related activities. The newsletter provides quarterly updates about EP consultation activities, case studies on effective consultation with relevant persons and other EP related information such as forthcoming events where Woodside personnel will be consulting with the local community. *Let's Talk* is distributed in a variety of locations as well as across digital platforms including Woodside's website and social media channels. People can also subscribe to receive it on Woodside's website. (Record of Consultation, reference 6.8.1).

Woodside also publishes the Karratha Community Update newsletter quarterly which includes a QR code and encourages people to go to the Consultation Activities page on Woodside's website to subscribe and find information about EPs. (Record of Consultation, reference 6.8.2).

3.4 Traditional Custodian specific consultation

In addition to the approaches above including community information sessions, additional activities were undertaken with relevant Traditional Custodians, which were specifically designed to provide for effective engagement with Traditional Custodians and so that information was provided in a form that was readily accessible and appropriate (see Section 6.1.2 in the EP).

Consultation undertaken specifically with Traditional Custodians for this EP includes direct engagement with nominated representative bodies via the contact listed on the Office of the Registrar of Indigenous Corporations (ORIC) website, requesting advice on how they would like to be engaged and asking whether other members and/or individuals should be consulted. This has resulted in:

- the EP's Summary Information Sheet, was provided to relevant Traditional Custodian groups (Record of Consultation, reference 6.1.2). The resource is developed and reviewed by subject matter experts with knowledge and experience in Indigenous affairs, in collaboration with technical experts to ensure content is appropriate to the intended recipients
- meetings with directors, Elders and any nominated representatives, at a time and location nominated by them
- the exchange of written feedback and correspondence
- telephoning relevant persons to provide context, if requested and/or required
- invitations to and/or attendance at community monthly luncheons for Traditional Custodians.

Ongoing efforts were made to engage and develop relationships with these bodies via a variety of means such as email, phone calls, alternative contacts, texts, social media and, in some cases, physical visits.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Consultation meetings with attendees decided by Traditional Custodian groups and supported by senior Woodside representatives, subject matter experts and First Nations relations advisers with skills and experience in community engagement. Meetings are developed through a two-way consultation process to ensure effective information sharing via:

- mutually agreed agenda avoiding time pressure
- encouraging Traditional Custodian attendees to control the pace of the meeting and pause at any time to ask questions, seek clarification or provide feedback
- visual aids such as posters, presentations, simplified technical videos and real-world pictures and footage
- emphasis on potential planned and unplanned risks and impacts of the activity
- ample opportunity for questions and feedback
- discussion about ongoing relationship development and opportunities
- distribution of hard-copy Consultation Information Sheets (Record of Consultation, reference 6.1.1) and Summary Consultation Information Sheets (Record of Consultation, reference 6.1.2) are available at face-to-face consultation
- meeting costs such as sitting fees, travel, legal support and executive support and other support required
- advertising in Indigenous publications such as the National Indigenous Times (24 September 2024) and Koori Mail (2 October 2024) (Record of Consultation, reference 6.4.1.8 – 6.4.1.9)
- advertising on Ngaarda radio, the only licensed Aboriginal broadcaster in the Pilbara (26 August 2024 – 30 November 2024). (Record of Consultation, reference 6.5)

Newspaper	Coverage	Publication dates
Koori Mail	Indigenous	2 October 2024
National Indigenous Times	Indigenous	24 September 2024
Ngaarda Radio	National	26 August 2024 – 30 November 2024

Woodside also ran a geotargeted sponsored social media campaign (Record of Consultation, reference 6.6.1) to various communities that are coastally adjacent to the EMBA for the proposed activities. Social media is a highly effective means to engage Indigenous audiences as covered in the book Indigenous Digital Life: The Practice and Politics of Being Indigenous on Social Media (Bronwyn Carlson and Ryan Frazer, 2021).

The campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations how they can learn more about Woodside's proposed activities by visiting Woodside's website. The advertisements linked to Woodside's website, which details the intent of consultation with relevant persons under the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth).

Woodside uses a diverse range of techniques to reach relevant persons and build awareness of the proposed activity and how it may affect their functions, interests or activities and to understand how to provide feedback. The combination of Prescribed Bodies Corporate (PBC) engagement meetings, traditional print media, social media and face-to face community interaction provides a wide-ranging opportunity to consult.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4. TABLE 2: CONSULTATION REPORT WITH RELEVANT PERSONS OR ORGANISATIONS

The black numbering **(N)** in the 'Summary of information provided and record of consultation for this EP' in Table 2 denotes an item raised by a stakeholder. The green numbering **(N)** in this section denotes Woodside's response to that item.

4.1 Commonwealth and WA State Government departments or agencies – marine

4.1.1 Australian Border Force (ABF)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed ABF advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 October 2024, Woodside emailed ABF an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed ABF an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with ABF for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ABF sufficient information to allow ABF to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to ABF on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed ABF a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to ABF advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ABF 30 days for consultation.
- Consultation for this EP commenced 13 months ago in September 2024.
- In this context, Woodside allowed ABF a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with ABF is appropriate and adapted to the nature of interests of ABF:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with ABF.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding ABF of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as ABF did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The measures and controls described in this EP address the potential impact from the proposed activity on ABF's functions, interests or activities.

4.1.2 Australian Communications and Media Authority (ACMA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed ACMA advising of the proposed activity (Record of Consultation, reference 6.1.12), provided a Consultation Information Sheet, a map of the submarine communication cables and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed ACMA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 17 October 2024, ACMA emailed to thank Woodside for the opportunity to comment (SI Report, reference 1.1) and:
  - **(1)** confirmed the Operational Area is not in the vicinity of existing ACMA protection zones.
  - **(2)** noted the Operational Area maybe in the vicinity of cables operated by Telstra and Vocus and recommended contacting them.
  - **(3)** recommended contacting AHO for navigational materials which can assist in identifying submarine cables in Australian waters. **(3)** Woodside has consulted with AHO on this EP. AHO has requested notification on any activities impacting maritime safety and final positions of permanent features for charting which has been incorporated into this EP.
  - **(4)** advised no additional consultation for activity was needed.
- On 28 October 2024, Woodside responded to ACMA (SI Report, reference 1.2) and:
  - **(1)** confirmed the advice on the ACMA protection zones.
  - **(2)** confirmed Woodside's awareness of the cable infrastructure owned by Telstra and Vocus.
  - **(4)** acknowledged that ACMA did not require further consultation on the EP.
- On 3 October 2025, Woodside emailed ACMA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Operational areas are not in the vicinity of any existing protection zones.	**(1)** **Woodside assessment:** Woodside noted ACMA's confirmation that the operational areas were not in the vicinity of existing protection zones. Woodside has consulted Telstra as a relevant person for this EP. There are no Vocus cables within the Operational	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Areas and therefore not relevant for this EP **Woodside response:** Woodside acknowledged the advice regarding existing protection zones.	
(2) Operational areas are in the vicinity of submarine cables.	**(2)** **Woodside assessment:** Woodside noted ACMA's advice that the operational areas were in the vicinity of submarine cables. **Woodside response:** Woodside confirmed it had consulted with Telstra and noted Vocus cable infrastructure.	**(2)** Communications infrastructure located in the vicinity of the operational areas is set out in Section 4.9.7 of the EP.
(3) Contact AHO for navigational materials information.	**(3)** **Woodside assessment:** Woodside noted ACMA's recommendation to contact the AHO for navigational materials to assist in identifying further assistance identifying cables. **Woodside response:** Woodside has consulted with AHO on this EP and AHO has requested notification on any activities impacting maritime safety and the final positions of permanent features for charting.	**(3)** Not required.
(4) No further consultation required for this activity**.**	**(4)** **Woodside assessment:** Woodside accepts that ACMA does not require further consultation. **Woodside response:** Woodside noted that ACMA does not require further consultation.	**(4)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with ACMA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ACMA sufficient information to allow ACMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to ACMA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided ACMA with information tailored to ACMA by including a map of submarine communication cables.
- On 17 October 2024, ACMA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable ACMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided ACMA with further information in response to ACMA's feedback (email of 28 October 2024).

Reasonable Period

Woodside allowed ACMA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to ACMA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ACMA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed ACMA a reasonable period for consultation in preparation of the EP as evidenced by its response on 17 October 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with ACMA is appropriate and adapted to the nature of interests of ACMA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with ACMA.
- Woodside considers a reasonable opportunity was provided to ACMA as evidenced by its response on 17 October 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- ACMA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from ACMA.
  - Made no changes or inclusions to the EP as a result of consultation with ACMA because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.3 Australian Fisheries Management Authority (AFMA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed AFMA advising of the proposed activity (Record of Consultation, reference 6.1.15), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed AFMA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.2).
- On 3 October 2025, Woodside emailed AFMA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 14 October 2025, AFMA responded to Woodside (SI Report, reference 47.1) thanking Woodside for the updates. AFMA:
  - **(1)** confirmed that it did not have any comments.
  - **(2)** Requested to be included in future consultation regarding the EP.
  - **(3)** encouraged Woodside to engage directly with Commonwealth fishing operators in the area as Relevant Persons, if this had not already occurred, and identified the following associations, recommending direct engagement with them:
    - Commonwealth Fisheries Association;
    - Tuna Australia; and
    - Australian Southern Bluefin Tuna Industry Association.
- On 22 October 2025, Woodside replied to AFMA (SI Report, reference 47.2) and:
  - **(1)** noted AFMA's confirmation that it had no comments on the EP.
  - **(2)** confirmed that AFMA would be included in future consultation regarding the EP and would be notified prior to the commencement of activities.
  - **(3)** confirmed that consultation materials had been provided to Commonwealth Fisheries Association, Australian Southern Bluefin Tuna Fishery Association, and Tuna Australia, in line with AFMA's advice.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Confirmed that AFMA did not have any comments on the EP	**(1)** **Woodside assessment:** Woodside understands that AFMA does not have any comments on the EP. **Woodside response:** Woodside noted that AFMA did not have any comments on the EP.	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(2) Requested to be included in future consultation on this EP	**(2)** **Woodside assessment:** Woodside accepts AFMA's request to be included in future consultation on this EP. **Woodside response:** Woodside confirmed that AFMA would be included in future consultation regarding the EP and would be notified prior to the commencement of activities.	**(2)** Woodside has assessed the potential for interaction with Commonwealth managed fisheries in Section 4.9.2 of this EP. Woodside will provide notifications to AFMA, CFA, DAFF – Fisheries, and individual Commonwealth relevant fishery licence holders (see Table 7-5 of this EP) ten days before activity commences, and following completion of activities, as referenced as PS 1.5 of this EP.
(3) Encouraged Woodside to engage with Commonwealth fishing operators in the area and identified a number of associations, recommending direct engagement with them.	**(3)** **Woodside assessment:** Woodside has provided consultation information to Commonwealth Fisheries Association, Australian Southern Bluefin Tuna Fishery Association, and Tuna Australia. **Woodside response:** Woodside confirmed that consultation materials had been provided to Commonwealth Fisheries Association, Australian Southern Bluefin Tuna Fishery Association, and Tuna Australia, in line with AFMA's advice.	**(3)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.
Summary Report – Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AFMA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given AFMA sufficient information to allow AFMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to AFMA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 14 October 2025, AFMA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AFMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided AFMA with further information in response to AFMA's feedback (email of 22 October 2025).

Reasonable Period

Woodside allowed AFMA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AFMA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AFMA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed AFMA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AFMA is appropriate and adapted to the nature of interests of AFMA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AFMA.
- Woodside considers a reasonable opportunity was provided to AFMA as evidenced by its response on 14 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AFMA provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from AFMA.
  - Made no changes or inclusions to the EP as a result of consultation with AFMA because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.4 Australian Hydrographic Office (AHO)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed AHO advising of the proposed activity (Record of Consultation, reference 6.1.10), provided a Consultation Information Sheet, a shipping lanes map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 1 October 2024, AHO responded to Woodside (SI Report, reference 2.1) and acknowledged receipt of Woodside's email for this EP and:
  - **(1)** noted it had no further comments but requested updates on any activities impacting maritime safety and final positions of permanent features for charting.
  - **(2)** advised a fact sheet on reporting requirements would be provided at a later date.
- On 4 October 2024, Woodside replied (SI Report, reference 2.2) noting:
  - **(1)** AHO had no further comments on this EP and advised Woodside will notify AHO at the start and completion of activities for reporting the final position of permanent features for charting.
  - **(2)** AHO is developing a fact sheet for reporting requirements and will advise once this is available.
- On 11 October 2024, Woodside emailed AHO an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(3)** On 11 October 2024, AHO replied acknowledging Woodside's email had been received. AHO advised the data supplied would be used for the preparation of AHO's navigational charting products (SI Report, reference 2.3). **(3)** Woodside noted AHO's feedback but no response was required.
- On 3 October 2025, Woodside emailed AHO an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 7 October 2025, AHO responded to Woodside (SI Report, reference 2.6) and acknowledged receipt of Woodside's email for this EP and:
  - **(1)** noted it had no concerns but requested notifications when activities commence and finish.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– **(4)** requested to be informed of any changes to surface and seabed infrastructure following the completion of activities.

- On 11 November 2025, Woodside responded to AHO (SI Report, reference 2.7) and:
  – **(1)** noted that AHO had no concerns and advised it would notify AHO at the start and completion of activities.
  – **(4)** confirmed that Woodside would advise AHO of any changes to seabed infrastructure location following completion of the activities and also noted that no changes to surface infrastructure were proposed.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Requested updates on any activities impacting maritime safety and final positions of permanent features for charting.	**(1)** **Woodside assessment:** Woodside notifies AHO of activities to enable AHO to report final position of permanent features for charting. **Woodside response:** Woodside advised it will notify AHO at the start and completion of activities for reporting the final position of permanent features for charting.	**(1)** Woodside will notify the AHO no less than four working weeks before operations commence and after the activities are completed, as referenced in PS 1.3 in this EP. No additional measures or controls are required.
(2) A fact sheet on reporting requirements would be provided at a later date.	**(2)** **Woodside assessment:** Woodside noted that a fact sheet on reporting requirements would be provided by AHO at a later date. **Woodside response:** Woodside confirmed it had noted an AHO fact sheet on reporting requirements would be provided at a later date.	**(2)** Not required.
(3) Acknowledged receipt of consultation email and advised on updates to its navigational charting products.	**(3)** **Woodside assessment:** Woodside acknowledges AHO has received data regarding the activity and has no specific feedback for this activity. **Woodside response:** Woodside noted AHO's acknowledgement of its email and that it would use data supplied to update its navigational charting products.	**(3)** Not required.
(4)	**(4)** **Woodside assessment:** Woodside notifies AHO of	**(4)** Woodside will notify the AHO of any changes to seabed

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Requested to be informed of any changes to surface and seabed infrastructure following the completion of activities.	any changes to seabed infrastructure following the completion of activities. **Woodside response**: Woodside advised it will notify AHO of any changes to seabed infrastructure location following completion of the activities and noted that no changes to surface infrastructure were proposed.	infrastructure location following completion of the activities, as referenced in PS 1.4.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AHO for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AHO sufficient information to allow AHO to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to AHO on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Regulations).

- In addition to the Consultation Information Sheet, Woodside provided AHO with information tailored to AHO by including a shipping lanes map relevant to the activity.
- On 1 October 2024 and 7 October 2025, AHO consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AHO to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided AHO with further information in response to AHO's feedback (email of 4 October 2024 and 11 November 2025).

Reasonable Period

Woodside allowed AHO a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AHO advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AHO 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed AHO a reasonable period for consultation in preparation of the EP as evidenced by AHO's response on 1 October 2024 and 7 October 2025.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AHO is appropriate and adapted to the nature of interests of AHO:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AHO.
- Woodside considers a reasonable opportunity was provided to AHO as evidenced by its response on 1 October 2024 and 7 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AHO provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
    - Responded to feedback from AHO.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- As a result of consultation included a notification to AHO of any changes to seabed infrastructure location following completion of the activities, as referenced in PS 1.4.

- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.5 Australian Maritime Safety Authority (AMSA) – Marine Pollution

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed AMSA – Marine Pollution advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed AMSA – Marine Pollution an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed AMSA – Marine Pollution an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Woodside has addressed oil spill preparedness and response strategy in Appendix H. No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AMSA – Marine Pollution for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given AMSA – Marine Pollution sufficient information to allow AMSA – Marine Pollution to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to AMSA – Marine Pollution on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed AMSA – Marine Pollution a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AMSA – Marine Pollution advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AMSA – Marine Pollution 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed AMSA – Marine Pollution a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AMSA – Marine Pollution is appropriate and adapted to the nature of interests of AMSA – Marine Pollution:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AMSA – Marine Pollution.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding AMSA – Marine Pollution of the opportunity to provide feedback.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as AMSA – Marine Pollution did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on AMSA – Marine Pollution's functions, interests or activities.

4.1.6 Australian Maritime Safety Authority (AMSA) – Marine Safety

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed AMSA – Marine Safety advising of the proposed activity (Record of Consultation, reference 6.1.11), provided a Consultation Information Sheet, shipping lanes map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 9 October 2024, AMSA – Marine Safety responded (SI Report, reference 3.1) to acknowledge Woodside had considered information that AMSA – Marine Safety communicates regarding navigation safety. AMSA – Marine Safety confirmed back to Woodside its commitments to:
  - **(1)** notify the AHO no less than 4 weeks before operations commence.
  - **(2)** notify AMSA's JRCC at least 24-48 hours before operations commence and end.
  - **(3)** provide updates to both the AHO and AMSA on any material changes to planned activities.
  - **(4)** ensure vessels exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.
  - **(5)** evaluate and implement adequate anti-collision measures including but not limited to installation of Automatic Identification System (AIS) units, offshore guard vessel/s that can monitor traffic, and additional warnings and/or lights to attract attention.
- On 9 October 2024, AMSA – Marine Safety provided a further follow up email (SI Report, reference 3.2) clarifying that its earlier email that day incorrectly referred to the Angel Subsea Infrastructure Removal EP. It advised all other wording in the email remained correct and still stands.
- On 11 October 2024, Woodside emailed AMSA – Marine Safety an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 11 October 2024, AMSA – Marine Safety acknowledged Woodside's activity update (SI Report, reference 3.3) and further confirmed its previous feedback from 9 October 2024 remained unchanged.
- On 6 November 2024, Woodside responded to AMSA – Marine Safety (SI Report, reference 3.4) and:
  - **(1)** confirmed it would notify AHO no less than 4 weeks before operations commence
  - **(2)** confirmed it would notify AMSA's JRCC at least 24-48 hours before operations commence and end.
  - **(3)** advised it would provide updates to both the AHO and AMSA on any material changes to planned activities.
  - **(4)** confirmed that vessels will exhibit appropriate lights and shapes to reflect the nature of operations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - (5) confirmed it will implement adequate anti-collision measures and clarified that offshore guard vessels would not be utilised as an anti-collision measure for this EP as other measures identified would mitigate the risk.
- On 3 October 2025, Woodside emailed AMSA – Marine Safety an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 13 October 2025, AMSA – Marine Safety responded (SI Report, reference 3.5) to thank Woodside for providing information on the EP and:
  - requested that Woodside:
    - **(1)** notify the AHO no less than 4 weeks before operations commence.
    - **(2)** notify AMSA's ARC at least 24-48 hours before operations commence.
    - **(4)** ensure vessels exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.
    - **(5)** evaluate and implement adequate anti-collision measures which could include installation of Automatic Identification System (AIS) units, offshore guard vessel/s that can monitor traffic, and additional warnings and/or lights to attract attention.
  - **(6)** advised that heavy vessel traffic and support craft activity would be encountered in the operational area and provided a chartlet showing the area of interest with three months of AIS data.
  - **(7)** directed Woodside to AMSA's spatial data gateway and Spatial@AMSA portal for downloading digital datasets and maps.
- On 3 November 2025, Woodside responded to AMSA – Marine Safety (SI Report, reference 3.6) Woodside:
  - (1) confirmed it would notify AHO no less than 4 weeks before operations commence.
  - (2) confirmed it would notify AMSA's ARC at least 24-48 hours before operations commence and end.
  - (4) confirmed that vessels will exhibit appropriate lights and shapes to reflect the nature of operations.
  - (5) confirmed that it did not propose to implement additional anti-collision measures, but confirmed that a support vessel would be on standby for the MODU to assist with third-party vessel interaction and noted that collision risk mitigation measures were continuously evaluated and implemented across Woodside's activities as required.
  - (6) noted AMSA's comments with regard to heavy vessel and support craft traffic confirmed receipt of the chartlet showing the area of interest with three months of AIS data.
  - (7) noted that shipping data and vessel traffic plots were available via AMSA's spatial data gateway.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Requested the AHO be contacted no less than 4 weeks before operations commence.	**(1)** **Woodside assessment:** Woodside will provide notifications to relevant stakeholders as outlined in Table 7-5 of this EP. **Woodside response:** Woodside confirmed it will notify the AHO 4 weeks before operations commence.	**(1)** Woodside will notify the AHO no less than four working weeks before operations commence, as referenced in PS 1.3 in this EP.
(2) Requested the ARC be notified 24-48 hours before operations commence.	**(2)** **Woodside assessment:** Woodside will provide notifications to relevant stakeholders as outlined in Table 7-5 of this EP. **Woodside response:** Woodside confirmed it will notify the ARC 24-48 hours before operations commence.	**(2)** Woodside will notify the ARC at least 24–48 hours before operations commence, as referenced in PS 1.6 in this EP.
(3) Requested to be advised of any material changes to planned activities.	**(3)** **Woodside assessment:** Woodside will provide notifications to relevant stakeholders as outlined in Table 7-5 of this EP. **Woodside response:** Woodside confirmed it would notify AHO of any material changes to planned activities.	**(3)** Woodside will notify the AHO of any material changes to this EP, as referenced in Table 7-5 of this EP.
(4) Vessels should exhibit appropriate lights and shapes to reflect nature of operations.	**(4)** **Woodside assessment:** Woodside complies with the International Rules for Preventing Collisions at Sea. **Woodside response:** Woodside confirmed vessels would exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.	**(4)** Section 6 of the EP contains a number of controls that address AMSA's feedback on lighting and compliance with the international rule for preventing collisions at sea, specifically safety zones are established, vessels are required to comply with marine orders and the facility's collision prevention system will be implemented.
(5) Woodside to evaluate and implement adequate anti-collision measures including offshore guard vessels.	**(5)** **Woodside assessment:** Woodside is continuously evaluating existing collision risk mitigation measures.	**(5)** Section 6 of the EP contains a number of controls that address AMSA's feedback on lighting and compliance

	Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AMSA – Marine Safety for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AMSA – Marine Safety sufficient information to allow AMSA – Marine Safety to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to AMSA – Marine Safety on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations.
- In addition to the Consultation Information Sheet, Woodside provided AMSA – Marine Safety with information tailored to AMSA – Marine Safety by including a map of shipping lanes.
- On 9 October 2024 and 13 October 2025, AMSA – Marine Safety consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AMSA – Marine Safety to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided AMSA with further information in response to AMSA's feedback (email of 6 November 2024 and 3 November 2025).

Reasonable Period

Woodside allowed AMSA – Marine Safety a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AMSA – Marine Safety advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AMSA – Marine Safety 30 days for consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed AMSA – Marine Safety a reasonable period for consultation in preparation of the EP as evidenced by AMSA – Marine Safety's response on 9 & 11 October 2024 and 13 October 2025.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AMSA – Marine Safety is appropriate and adapted to the nature of interests of AMSA – Marine Safety:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AMSA – Marine Safety.
- Woodside considers a reasonable opportunity was provided to AMSA as evidenced by its response on 9 and 11 October 2024 and 13 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AMSA – Marine Safety provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from AMSA – Marine Safety.
  - As standard practice (and as requested by AMSA – Marine Safety during consultation), Woodside will provide activity notifications to AHO and AMSA's JRCC as referenced at PS 1.2 and PS 1.5.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.7 Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries

Summary of information provided and record of consultation for this EP:

- On 4 October 2024, Woodside emailed DAFF - Fisheries advising of the proposed activity (Record of Consultation, reference 6.1.53), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed DAFF - Fisheries an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.6).
- On 3 October 2025, Woodside emailed DAFF – Fisheries an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside has consulted AFMA, DAFF – Fisheries, CFA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth managed fisheries in Section 4.9.2 of this EP. Woodside will provide notifications to AFMA, CFA, DAFF – Fisheries, and individual Commonwealth relevant fishery licence holders (see Table 7-5 of this EP) ten days before activity commences, and following completion of activities, as referenced as PS 1.5 of this EP. No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DAFF - Fisheries for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DAFF - Fisheries sufficient information to allow DAFF - Fisheries to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DAFF - Fisheries on 4 October 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The purpose of consultation and set out what was being sought through consultation.
- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed DAFF - Fisheries a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DAFF - Fisheries advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DAFF - Fisheries 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DAFF - Fisheries a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DAFF - Fisheries is appropriate and adapted to the nature of interests of DAFF - Fisheries:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DAFF - Fisheries.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding DAFF - Fisheries of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DAFF - Fisheries did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DAFF – Fisheries' functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.8 Department of Defence (DoD)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DoD advising of the proposed activity (Record of Consultation, reference 6.1.20), provided a Consultation Information Sheet, a map of the defence zones and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed DoD an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed DoD an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DoD for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DoD sufficient information to allow DoD to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DoD on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided DoD with information tailored to DoD by including a map of defence zones relevant to the activity.

Reasonable Period

Woodside allowed DoD a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DoD advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DoD 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DoD a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DoD is appropriate and adapted to the nature of interests of DoD:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DoD.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding DoD of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DoD did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DoD's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.9 Department of Planning, Lands and Heritage (DPLH)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DPLH advising of the proposed activity (Record of Consultation, reference 6.1.22), provided a Consultation Information Sheet, a list of shipwrecks and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed DPLH an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.7).
- On 3 October 2025, Woodside emailed DPLH an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 10 October 2025, DPLH responded to Woodside (SI Report, reference 48.1) referencing details about the activity and timings, as well as that comments previously provided on another EP remained applicable.
- On 10 November 2025, Woodside responded to DPLH (SI Report, reference 48.2) clarifying details related to this activity and those previously covered under the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan as well as timings. Woodside also noted DPLH's previous comments.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	The EP demonstrates that there are no known underwater heritage sites or shipwrecks within the Operational Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (Section 4.9.1 of this EP). While impacts to underwater heritage sites or shipwrecks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.7 of this EP. No additional measures or controls are required.
Summary Report – Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DPLH for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DPLH sufficient information to allow DPLH to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DPLH on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided DPLH with information tailored to DPLH by including a list of shipwrecks relevant to the EP in State waters.
- On 10 October 2025, DPLH consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DPLH to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DPLH with further information in response to DPLH's feedback (email of 10 November 2025).

Reasonable Period

Woodside allowed DPLH a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DPLH advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DPLH 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DPLH a reasonable period for consultation in preparation of the EP as evidenced by DPLH's response on 10 October 2025.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DPLH is appropriate and adapted to the nature of interests of DPLH:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DPLH as evidenced by its response on 10 October 2025 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DPLH provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DPLH.
  - Made no changes or inclusions to the EP as a result of consultation with DPLH because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.10 Department of Primary Industries and Regional Development (DPIRD)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DPIRD advising of the proposed activity (Record of Consultation, reference 6.1.21), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 11 October 2024, Woodside emailed DPIRD an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.8).
- On 23 October 2024, DPIRD responded to Woodside (SI Report, reference 19.1) advising it would like to be considered as a relevant person and would like an extension of two weeks to 13 November 2024 to review the EP consultation information. DPIRD advised its reason for the extension was due to a high volume of requests at the time.
- On 28 October 2024, Woodside responded to DPIRD (SI Report, reference 19.2) confirming its request for the consultation date to be extended to 13 November 2024 for this EP. Woodside also noted DPIRD's confirmation that it is a relevant person for this EP.
- On 12 November 2024, DPIRD responded (SI Report, reference 19.3) with the following feedback and requests prior to submission of the EP to the regulator:
  - **(1)** Consider DPIRD as a relevant person for this EP.
  - **(2)** Noted the proposed activities may have an effect on fish resources and the aquatic environment managed under WA fisheries legislation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(3)** Confirmed the commercial fishing interests as well as customary, recreational and charting fishing resources existing, or in proximity to, the areas associated with the proposed activities.
  - **(4)** Recommended Woodside initiate and maintain ongoing consultation with WAFIC, Recfishwest and Aquaculture Council of Western Australia including sending start and stop notifications and exclusion zones.
  - **(5)** Recommended contacting the relevant Traditional Owners in the area impacted by the proposed activities.
  - **(6)** Requested DPIRD is advised within 24 hours of Woodside reporting an oil spill incident to the appropriate authority.
  - **(7)** Requested when developing the Oil Spill Contingency Plan (OSCP) that there is baseline marine data included to compare against any post-spill monitoring to determine impacts. This data should be available to DPIRD upon request.
  - **(8)** Noted spawning and nursery areas for key fish species are particularly vulnerable to the impacts of spills. DPIRD requested specific strategies in the EP to mitigate these risks.
  - **(9)** Requested that DPIRD is advised within 24 hours of any suspected or confirmed marine pests or diseases from vessels. Contact details for notifications were provided and it was requested to share this with vessel operators.
  - **(10)** Requested all potential impacts to fisheries, fish resources and the aquatic environment are acknowledged in the Environment Plan with strategies to mitigate or minimise these impacts.
  - **(11)** Advised should any relevant, significant changes affecting fisheries occur prior to completion of Woodside's operations, DPIRD reserves the right to request further consultation and resolution as appropriate
  - **(12)** Provided new contact at DPIRD for further questions related the feedback provided for this EP.
- On 13 December 2024, Woodside responded to DPIRD (SI Report, reference 19.4) as follows:
  - **(1)** Confirmed DPIRD's feedback that it is a relevant person.
  - **(2)** Noted assessment of potential spatial and temporal extent for interaction with each fishery occurred by reviewing AFMA, ABARES and DPIRD Fishcube data with the Operational Area and EMBA.
  - **(3)** Confirmed the list of fisheries provided by DPIRD in its response with interest in the area of proposed activities aligned with Woodside's understanding from its data.
  - **(4)** Confirmed consultation had occurred with relevant fishery licence holders upon advice from WAFIC and was conducted by WAFIC.
  - **(4)** Advised that around annually, Woodside updated fishing licence holder contact details via DPIRD's licencing division.
  - **(4)** Confirmed consultation had occurred with Recfishwest and Aquaculture Council of Western. Information provided included specific start and end dates of the activities, and the spatial extent of the proposed activities (including any exclusion zones).
  - **(5)** Confirmed Woodside had consulted with the relevant Traditional Owners in the preparation of this EP.
  - **(6)** Confirmed Department of Transport (DoT) is notified within 2 hours of a marine pollution incident and DPIRD would be advised within 24 hours of this DoT notification as outlined in the EP. Woodside requested a dedicated role or person for this notification if this was available.
  - **(7,8)** Advised the risk of spill events was mitigated through a range of preventative controls including offshore response actions. The aim of the response is to reduce hydrocarbon contact with sensitive coastal areas, including commercially important fish species spawning and aggregation areas.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(7)** Advised Woodside is a member of the Australian Energy Producers (AEP) Joint Industry Operational and Scientific Monitoring (OSM) Framework (AEP, 2021). In the event of a spill, the OSM Framework will guide the situational awareness and response as well as undertake a suite of comprehensive science-based monitoring programs to evaluate environmental damage.
- **(9)** Advised Woodside works closely with vessel contractors to ensure compliance with DPIRD's biosecurity policy. This includes a notification to DPIRD within 24 hours of any suspected or confirmed marine pests or diseases from vessels. Woodside confirmed this information would be communicated to vessel operators.
- **(10)** Confirmed all vessels are required to comply with relevant regulations to prevent introducing invasive marine species (IMS). Vessels will be assessed and managed to prevent the introduction of IMS in accordance with Woodside's Invasive Marine Species Management Plan. This includes a risk assessment process with outcomes ensuring management measures commensurate with the risk are implemented. Confirmed potential impacts to fisheries, fish resources and the aquatic environment are considered in the EP with strategies to mitigate or minimise these impacts.
- **(11)** Acknowledged that should any significant and relevant changes affecting fisheries occur prior to the completion of our activities, DPIRD reserved the right to request further consultation and resolution, as appropriate.
- **(12)** Noted the new contact at DPIRD and advised Woodside records have been updated accordingly.

- **(13)** On 16 December 2024, DPIRD responded to Woodside (SI Report, reference 19.5) confirming receipt of Woodside's response.
- **(13)** On 18 December 2024, Woodside responded to DPIRD (SI Report, reference 19.7) confirming it had received DPIRD's response from 16 December 2024.
- On 3 October 2025, Woodside emailed DPIRD an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) DPIRD confirmed it is a relevant person.	**(1)** **Woodside assessment**: Woodside uses a methodology for identifying relevant persons in accordance with regulation 25 (1) and had identified DPIRD as a relevant person when applying the methodology for this EP. **Woodside response:** Woodside confirmed DPIRD's feedback that it is a relevant person.	**(1)** Section 5.3 in the EP defines the methodology for identifying relevant persons for consultation.
(2) The proposed activities may have an effect on fish resources and the aquatic environment managed under WA fisheries legislation.	**(2)** **Woodside assessment:** Woodside assesses for potential spatial and temporal extent for interaction with each fishery occurred by reviewing AFMA, ABARES and DPIRD Fishcube data with the Operational Area and EMBA.	**(2)** Section 5.3 in the EP defines the methodology for identifying Commonwealth and State fisheries and their representative bodies.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside confirmed assessment of potential spatial and temporal extent for interaction with each fishery occurred by reviewing AFMA, ABARES and DPIRD Fishcube data with the Operational Area and EMBA.	
(3) There are commercial fishing interests as well as customary, recreational and charting fishing resources existing, or in proximity to, the areas associated with the proposed activities.	**(3)** **Woodside assessment:** Woodside notes the list of fisheries provided by DPIRD with fishing interests in the area aligns with Woodside data. **Woodside response:** Woodside confirmed the list of fisheries provided by DPIRD in its response with interest in the area of proposed activities aligned with Woodside's understanding from its data.	**(3)** Not required.
(4) Recommended Woodside initiate and maintain ongoing consultation with WAFIC, Recfishwest and Aquaculture Council of Western Australia including sending start and stop notifications and exclusion zones.	**(4)** **Woodside assessment:** Woodside consults with WAFIC, Recfishwest and now, Aquaculture Council of Western Australia, at DPIRD's request. **Woodside response**: Woodside confirmed consultation had occurred with relevant fishery licence holders upon advice from WAFIC and was conducted by WAFIC. Confirmed consultation had occurred with Recfishwest and Aquaculture Council of Western Australia. Information provided included specific start and end dates of the activities, and the spatial extent of the proposed activities (including any exclusion zones).	**(4)** Not required.
(5) Recommended consultation with relevant Traditional Owners.	**(5)** **Woodside assessment:** Woodside consults with Traditional Custodian groups or individuals and Nominated Representative Corporations. **Woodside response:** Woodside confirmed consultation had occurred with relevant Traditional Owners in the preparation of this EP.	**(5)** Section 5.3 in the EP defines the methodology for identifying Traditional Custodians (individuals and/or groups/entity) and Nominated Representative Corporations.
(6)	**(6)**	**(6)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Requested DPIRD is advised within 24 hours of Woodside reporting an oil spill incident to the appropriate authority.	**Woodside assessment:** Woodside notes DPIRD requests within 24 hours a notification of an oil spill reporting to the appropriate authority. **Woodside response:** Woodside confirmed with DPIRD that Department of Transport (DoT) is notified within 2 hours of an oil spill and DPIRD would be advised within 24 hours if this occurred for this EP.	Woodside will consult DoT if there is a spill impacting State waters from the proposed activity, as referenced in the OSPRMA (Appendix G). Woodside will notify DPIRD within 24 hours of a notification to DoT for this EP, as referenced at Table 7-7 in this EP.
(7) Requested baseline marine data be collected to compare against post-spill monitoring. This data to be made available to DPIRD upon request.	**(7)** **Woodside assessment:** Woodside is a member of the Australian Energy Producers (AEP) Joint Industry Operational and Scientific Monitoring (OSM) Framework (AEP, 2021). In the event of a spill, the OSM Framework guides the situational awareness and response as well as undertake a suite of comprehensive science-based monitoring programs to evaluate environmental damage. **Woodside response:** Woodside responded advising the OSM Framework guides the situational awareness and response and undertakes comprehensive science-based monitoring programs to evaluate environmental damage.	**(7)** Woodside has addressed oil spill preparedness and response strategy in Appendix H.
(8) Spawning and nursery areas for key fish species are particularly vulnerable to the impacts of spills. Requested specific strategies are in the EP to mitigate these risks.	**(8)** **Woodside assessment:** Woodside notes DPIRD's request for specific strategies in the EP to mitigate risks of impact on vulnerable fish species. **Woodside response:** Woodside responded advising that mitigation of oil spill events occurs though a range of preventative controls and is particularly focused on sensitive coastal areas, including important fish species spawning and in aggregation areas.	**(8)** Woodside has addressed oil spill preparedness and response strategy in Appendix H.
(9) Requested DPIRD is advised within 24 hours of any suspected or confirmed marine pests or diseases from vessels, rigs or equipment.	**(9)** **Woodside assessment:** Woodside notes DPIRD's biosecurity policy and its request for notification within 24 hours of suspected or confirmed marine pests or diseases from vessels.	**(9)** Woodside, Qualified IMS Inspector or contractor will notify DPIRD within 24 hours of any suspected or confirmed marine pests or diseases from vessels, rigs

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside confirmed its compliance with DPIRD's biosecurity policy which includes notification within 24 hours of any suspected or confirmed marine pests or diseases from vessels.	or equipment for this EP, as referenced in Section 7.10.4.3 of this EP.
(10) All potential impacts from invasive marine species to fisheries, fish resources and the aquatic environment are acknowledged in the EP with strategies to mitigate or minimise these impacts.	**(10)** **Woodside assessment:** Woodside complies with all relevant regulations to prevent introducing of invasive marine species (IMS). Woodside noted DPIRD's request for all fisheries, fish resources and the aquatic environment to be acknowledged in the EP with strategies to mitigate or minimise impacts. **Woodside response:** Woodside advised of its compliance with all relevant regulations to prevent introducing of IMS. Woodside also advised vessels will be assessed and managed to prevent the introduction of IMS in accordance with Woodside's Invasive Marine Species Management Plan.	**(10)** Introduction and establishment of invasive marine species risk evaluation is outlined in Section 6.7.10 and Section 7.2.2 of this EP.
(11) DPIRD reserves the right to request further consultation and resolution as appropriate should there be any relevant, significant changes affecting fisheries prior to completion of Woodside's operations.	**(11)** **Woodside assessment:** Feedback and comments received from relevant persons continue to be assessed and responded to, as required, throughout the life of an EP. **Woodside response:** Woodside confirmed DPIRD reserved the right to request further consultation and resolution throughout the life of the EP.	**(11)** Woodside's ongoing consultation approach (refer to Section 7.9 of this EP), outlines that should consultation feedback be received following EP acceptance that identifies relevant new information or a measure or control that requires implementation or update to meet the intended outcome of consultation, Woodside will apply its EP Management of Knowledge process and Management of Change Process as appropriate.
(12) New DPIRD contact provided for further questions related to feedback for this EP.	**(12)** **Woodside assessment:** Woodside ensures contact details are kept up to date for all relevant persons. **Woodside response:** Woodside noted the new DPIRD contact and advised records were updated accordingly.	**(12)** Not required.
(13)	**(13)**	**(13)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside response received.	**Woodside assessment:** Woodside addressed DPIRD's feedback and DPIRD has viewed this response as evidenced by its email confirmation of this. **Woodside response:** Woodside responded confirming DPIRD had received Woodside's response.	Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DPIRD for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DPIRD sufficient information to allow DPIRD to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DPIRD on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 12 November 2024, DPIRD consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DPIRD to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DPIRD with further information in response to DPIRD's feedback (email of 13 December 2024).

Reasonable Period

Woodside allowed DPIRD a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DPIRD advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DPIRD 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DPIRD a reasonable period for consultation in preparation of the EP as evidenced by its response on 12 November 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DPIRD is appropriate and adapted to the nature of interests of DPIRD:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DPIRD as evidenced by its response on 12 November 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DPIRD provided feedback, but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DPIRD.
  - As a result of consultation included a notification to DPIRD within 24 hours of any suspected or confirmed marine pests or species as referenced in Section 7.10.4.3 of this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DPIRD's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.11 Department of Transport (DoT) *(now Department of Transport and Major Infrastructure (DTMI))*

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DoT advising of the proposed activity (Record of Consultation, reference 6.1.18), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 7 October 2024, DoT responded to Woodside (SI Report, reference 6.1) requesting that DoT is consulted if there is a risk of a spill impacting State waters as outlined in the Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements.
- **(1)** On 7 October 2024, Woodside responded to DoT (SI Report, reference 6.2) confirming if there was a risk of a spill impacting State waters from the proposed activities for this EP, the DoT would be consulted as per the Offshore Petroleum Industry Guidance Note.
- On 11 October 2024, Woodside emailed DoT an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 10 December 2024, Woodside emailed DoT (SI Report, reference 6.3) and provided the Oil Pollution First Strike Plan (FSP) and a succinct summary of the FSP as requested by DoT in previous EP correspondence unrelated to this EP.
- On 18 December 2024, DoT responded to Woodside (SI Report, reference 6.4) confirming that the information had been reviewed and that DoT had no comments.
- On 3 October 2025, Woodside emailed DTMI an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) DoT requested to be consulted if there was a risk of spill impacting State waters as outlined in the Offshore Petroleum Guidance Note.	**(1)** **Woodside assessment:** Woodside consults with DoT within two hours of a spill event occurring as described in Woodside's FSP. **Woodside response:** Woodside confirmed it would consult with DoT if there was a risk of spill impacting State waters in line with the Offshore Petroleum Industry Guidance Note.	**(1)** Woodside will consult DoT if there is a spill impacting State waters from the proposed activity, as referenced in the FSP (Appendix H).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has	Woodside will provide DoT with a copy of the accepted FSP, (Appendix H). No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DoT for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DoT sufficient information to allow DoT to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DoT on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 7 October 2024, DoT consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DoT to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DoT with further information in response to DoT's feedback (email of 7 October 2024).

Reasonable Period

Woodside allowed DoT a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DoT advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DoT 30 days for consultation.
- Consultation for this EP commenced 13 months ago.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed DoT a reasonable period for consultation in preparation of the EP as evidenced by DoT's response on 7 October 2024 and 18 December 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DoT is appropriate and adapted to the nature of interests of DoT:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DoT as evidenced by its response on 7 October 2024 and 18 December 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DoT provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and Regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DoT.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.12 Western Australian Museum (WAM)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed WA Museum advising of the proposed activity (Record of Consultation, reference 6.1.31), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed WA Museum an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.11).
- On 3 October 2025, Woodside emailed WAM an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with WA Museum for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given WA Museum sufficient information to allow WA Museum to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to WA Museum on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed WA Museum a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WA Museum advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WA Museum 30 days for consultation.
- Consultation for this EP commenced 13 months ago.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed WA Museum a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with WA Museum is appropriate and adapted to the nature of interests of WA Museum:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding WA Museum of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as WA Museum did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on WA Museum's functions, interests or activities.

4.1.13 Pilbara Ports Authority (PPA) (*now Pilbara Ports*)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed PPA advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed PPA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed Pilbara Ports an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with PPA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given PPA sufficient information to allow PPA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to PPA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed PPA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to PPA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed PPA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed PPA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with PPA is appropriate and adapted to the nature of interests of PPA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding PPA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as PPA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on PPA's functions, interests or activities.

4.2 Commonwealth and WA State Government departments or agencies – environment

4.2.1 Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DAFF - Biosecurity advising of the proposed activity (Record of Consultation, reference 6.1.13), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 October 2024, Woodside emailed DAFF - Biosecurity an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.6).
- On 3 October 2025, Woodside emailed DAFF – Biosecurity an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report – Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DAFF - Biosecurity for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DAFF - Biosecurity sufficient information to allow DAFF - Biosecurity to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DAFF - Biosecurity on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed DAFF - Biosecurity a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DAFF - Biosecurity advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DAFF - Biosecurity 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DAFF - Biosecurity a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DAFF - Biosecurity is appropriate and adapted to the nature of interests of DAFF - Biosecurity:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DAFF.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding DAFF - Biosecurity of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DAFF - Biosecurity did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DAFF - Biosecurity's functions, interests or activities.

4.2.2 Department of Biodiversity, Conservation and Attractions (DBCA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DBCA advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed DBCA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1)
- On 1 November 2024, DBCA responded (SI Report, reference 5.1) thanking Woodside for the email and consultation information. DBCA noted:
  - **(1)** The operations were in vicinity of reserves managed by DBCA under the CALM act. These include, but are not limited to, the Montebello Islands Marine Park, Ningaloo Marine Park and Thevenard Island Reserve. Given the ecological importance of areas potentially affected by a hydrocarbon release from the proposed activities, it was considered important that the baseline values and state of the potentially affected environment were appropriately understood and documented prior to operations commencing.
  - **(2)** It would like to have confidence that Woodside had established appropriate baseline survey data on the current state of areas supporting important ecological values and any current contamination if present within the area of potential impact of hydrocarbon releases.
  - **(3)** It undertakes monitoring in marine parks and reserves and published monitoring reports which are available on its website, however Woodside should be aware this monitoring is targeted to inform DBCA's values and objectives and is not necessarily suitable to provide baseline information for oil spill risk assessment and management planning and encouraged Woodside to implement a Before-After, Control-Impact (BACI) framework.
  - **(4)** It recommended Woodside refer to the Department of Climate Change, Energy, the Environment and Water's National Light Pollution Guidelines for Wildlife as a best-practice industry standard for managing potential impacts of light pollution on marine fauna.
  - **(5)** In the event of a hydrocarbon release, it was requested that Woodside notify DBCA's Pilbara regional office as soon as practicable.
  - **(6)** It would not implement an oiled wildlife management response on behalf of a petroleum operator except as part of a whole of government response mandated by regulatory decision makers.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(7)** Woodside should refer to the Department of Transport's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements. **(7)** Woodside refers to DoT's content in the development of its response plans however this was not noted in the Woodside email response to DBCA.
- On 22 November 2024, Woodside responded thanking DBCA for its feedback (SI Report, reference 5.2). Woodside:
  - **(1)** Confirmed it maintained knowledge and an understanding of areas of ecological importance within and adjacent to operational areas.
  - **(2,3)** Advised its oil spill scientific monitoring program would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release.
  - **(4)** Confirmed it had considered DCCEEW's National Light Pollution Guidelines with respect to vessel activities. The impact assessment determined that the impacts of lighting were as low as reasonably practicable.
  - **(5)** Advised it had incorporated the DBCA Pilbara regional office telephone number as part of the notifications listed in the Oil Pollution First Strike Plan.
  - **(6)** Noted that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.
- On 3 October 2025, Woodside emailed DBCA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 17 October 2025, DBCA responded to Woodside (SI Report, reference 5.3) thanking them for the email and consultation information. DBCA:
  - **(1)** Referred to previous comments made to Woodside regarding petroleum production activities near important areas including Ningaloo Marine Park, Montebello Islands Conservation Park, Montebello Islands Marine Park, Barrow Island Nature Reserve, Barrow Island Marine Management Area, and biologically important areas for several conservation significant species.
  - **(2)** Reiterated the importance of comprehensive baseline monitoring for these receptors and preparedness for oil spill response, noting that Woodside had previously responded to DBCA's advice on these matters
  - **(8)** Welcomed any additional information from Woodside regarding monitoring or oil spill response preparedness for the proposed decommissioning activities.
  - **(9)** Advised that any activities requiring access to reserves managed under the CALM Act or involving the taking or disturbance of threatened fauna listed under the BC Act in State waters may require additional approvals, and recommended early consultation with DBCA.
- On 13 November 2025, Woodside responded to DBCA (SI Report, reference 5.4) and:
  - **(1)** Acknowledged DBCA's previous comments on EPs concerning petroleum production activities near Biologically Important Areas (BIAs), marine parks, and coastal reserves. Woodside also:
    - Noted in accordance with Regulations 21(2) and 21(3) of the Environment Regulations 2023 under the Offshore Petroleum and Greenhouse Gas Storage Act, EPs described the existing environment, including BIAs, marine parks, and conservation reserves potentially affected by planned and unplanned activities. Woodside included information about environmental values and sensitivities within and near operational areas and the Environment that May Be Affected (EMBA) for impact assessment and risk evaluation.
  - **(2)** Noted DBCA's reiterated comments regarding the importance of comprehensive baseline monitoring.
  - **(2,8)** Provided information related to monitoring and oil spill response preparedness and:
    - Advised that it would have an Oil Pollution First Strike Plan (FSP) for the proposed activity, which included a commitment to notify DBCA Pilbara Region Headquarters by phone if there was potential for oiled wildlife or if a spill was expected to affect DBCA-managed land or waters.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Noted that it subscribed to the Joint Industry Operational and Scientific Monitoring Framework (AEP, 2021), which guided responses to level 2/3 pollution events and included science-based monitoring programs to assess environmental damage.
- Acknowledged DBCA's position that it would not undertake oiled wildlife management responses on behalf of petroleum operators unless mandated by a jurisdictional decision-maker and recognised that any support or advice from DBCA would be provided on a full cost recovery basis. Woodside confirmed its commitment to engage with DBCA regarding monitoring and clean-up of affected DBCA-managed areas, as required.
- Confirmed that Woodside had reviewed and incorporated guidance from the Department of Transport and Major Infrastructure (DTMI) and the *Offshore Petroleum Industry Guidance Note: Marine Oil Pollution – Response and Consultation Arrangements (July 2020*) into internal planning and regulatory engagement.

– **(9)** Acknowledged that certain activities involving DBCA-managed reserves or the taking/disturbance of threatened fauna may require additional approvals, and recommended early consultation with DBCA.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Baseline values are understood and documented prior to commencement of activities.	**(1)** **Woodside assessment:** Woodside maintains knowledge of areas of ecological importance, including marine parks and island conservation reserves adjacent to the Operational Areas. **Woodside response:** Woodside reaffirmed that areas of ecological importance in the proximity of the EP Operational Areas would be not impacted by planned activities.	**(1)** The EP demonstrates that the proposed activities are outside the boundaries of a proclaimed State Marine Park and identifies that there are no credible impacts to the values of any State Marine Parks as a result of planned activities (Section 4.8 and Section 6.7 of the EP). While impacts to Commonwealth Marine Parks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.7 of the EP.
(2) Establish the appropriate baseline survey data on the current state of the areas.	**(2)** **Woodside assessment:** Woodside confirmed it maintained knowledge and an understanding of areas of ecological importance adjacent to Operational Areas and its oil spill scientific monitoring program provides for a quantitative assessment of overall impacts in the event of an unplanned hydrocarbon release. **Woodside response:** Woodside responded that it utilises an information system to track current existing environment knowledge that is regularly updated. Woodside advised its oil spill scientific monitoring	**(2)** Under the Operational and Scientific Monitoring arrangements, an annual review and update to environmental baseline studies database is completed and documented as described in this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	program provides for a quantitative assessment of overall impacts in the event of an unplanned hydrocarbon release.	
(3) Encourages implementation of Before-After Control-Impact (BACI) framework.	**(3)** **Woodside assessment:** Woodside reviewed the request about implementing a BACI framework and noted it maintains knowledge of areas of ecological importance and its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release. **Woodside response:** Woodside advised its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release and that it maintains knowledge of areas of ecological importance within and adjacent to the Operational Areas.	**(3)** Under the Operational and Scientific Monitoring arrangements, an annual review and update to environmental baseline studies database is completed and documented as described in this EP.
(4) Refer to DCCEEW's National Light Pollution Guidelines for Wildlife.	**(4)** **Woodside assessment:** Woodside noted DCCEEW's National Light Pollution Guidelines for Wildlife and that its impact assessment for light emissions is based on these recommendations. **Woodside response:** Woodside confirmed it had considered DCCEEW's National Light Pollution Guidelines for Wildlife and that lighting associated with this EP is required as a priority for safe operation.	**(4)** Woodside's impact assessment for light emissions is based on recommendations of the National Light Pollution Guidelines for Wildlife (see Section 6.6.4).
(5) Notify DBCA's Pilbara office as soon as practicable in the event of a hydrocarbon release.	**(5)** **Woodside assessment:** Woodside noted DBCA's 'Incidents and Emergency Response' process and need to include DBCA's Pilbara's contact information in Oil Pollution First Strike Plan. **Woodside response:**	**(5)** DBCA's Pilbara phone number has been incorporated into the Oil Pollution First Strike Plan for this EP (see Appendix H).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside confirmed the DBCA Pilbara number had been incorporated as part of the Oil Pollution First Strike Plan.	
(6) No oiled wildlife management response will be implemented except as part of a mandated government response.	**(6)** **Woodside assessment:** Woodside accepts that DBCA would not implement an oiled wildlife management response and notes its own Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP. **Woodside response:** Woodside confirmed that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.	**(6)** Woodside's Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP (see Appendix G).
(7) Refer to the Department of Transport's guidance note: Marine Oil Pollution: Response and Consultation Arrangements.	**(7)** **Woodside assessment:** Woodside appreciated the recommendation to refer to DoT's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements. **Woodside response:** Woodside noted the DoT's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements.	**(7)** Not required.
(8) Welcomed any additional information from Woodside regarding monitoring or oil spill response preparedness for the proposed decommissioning activities.	**(8)** **Woodside assessment:** Woodside understands that DBCA welcomed any additional information regarding monitoring or oil spill response preparedness **Woodside response:** Woodside confirmed it would implement an Oil Pollution First Strike Plan, including notifying DBCA Pilbara Region if oiled wildlife or DBCA-managed areas could be affected. Noted that it subscribes to the Joint Industry Operational and Scientific Monitoring Framework for level 2/3 pollution events, acknowledged DBCA's cost-recovery approach to wildlife response, and committed to engage on	**(8)** Not required

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	monitoring and clean-up. Further confirmed that internal planning also incorporates guidance from DTMI.	
(9) Advised that any activities requiring access to reserves managed under the CALM Act or involving the taking or disturbance of threatened fauna listed under the BC Act in State waters may require additional approvals and recommended early consultation with DBCA.	**(9)** **Woodside assessment:** Woodside understands that there may be certain activities that involving DBCA-managed reserves or the taking/disturbance of threatened fauna may require additional approvals and that early consultation with DBCA was recommended. **Woodside response:** Woodside acknowledged that certain activities involving DBCA-managed reserves or the taking/disturbance of threatened fauna may require additional approvals and that early consultation with DBCA was recommended.	**(9)** Not required
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DBCA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DBCA sufficient information to allow DBCA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DBCA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 1 November 2024 and 17 October 2025, DBCA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DBCA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DBCA with further information in response to DBCA's feedback (email of 22 November 2024 and 13 November 2025).

Reasonable Period

Woodside allowed DBCA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DBCA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DBCA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- Woodside considers a reasonable opportunity was provided to DBCA as evidenced in its response on 1 November 2024 and 17 October 2025.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DBCA is appropriate and adapted to the nature of interests of DBCA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DBCA as evidenced by its response on 1 November 2024 and 17 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- DBCA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DBCA.
  - Made no changes or inclusions to the EP as a result of consultation with DBCA because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.2.3 Department of Climate Change, Energy, the Environment and Water (DCCEEW)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DCCEEW - Environmental Compliance advising of the proposed activity (Record of Consultation, reference 6.1.16), provided a Consultation Information Sheet, shipwreck information and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed DCCEEW - Environmental Compliance an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1)
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.4).
- On 26 November 2024, Woodside emailed DCCEEW – Underwater Cultural Heritage advising of the proposed activity (Record of Consultation, reference 6.1.17), provided a Consultation Information Sheet, shipwreck information and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 12 December 2024, as no response had been received from DCCEEW - Underwater Cultural Heritage, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.5).
- On 3 October 2025, Woodside emailed DCCEEW an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report – Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DCCEEW for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DCCEEW sufficient information to allow DCCEEW to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DCCEEW on 27 September and 26 November 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided DCCEEW with information tailored to DCCEEW by including a list of shipwrecks relevant to the EP in Commonwealth waters.

Reasonable Period

Woodside allowed DCCEEW a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DCCEEW advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DCCEEW 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DCCEEW a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DCCEEW is appropriate and adapted to the nature of interests of DCCEEW:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October and 12 December 2024, reminding DCCEEW of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DCCEEW did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DCCEEW's functions, interests or activities.

4.2.4 Director of National Parks (DNP)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed the DNP advising of the proposed activity (Record of Consultation, reference 6.1.19), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed the DNP an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received from the DNP, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.9).
- On 30 October 2024, the DNP emailed Woodside (SI Report, reference 7.1) and noted:
  - **(1)** the planned activity did not overlap any Australian Marine Parks (AMPs) therefore there were no authorisation requirements from the DNP.
  - **(2)** to assist in the preparation of an EP for petroleum activities, NOPSEMA had worked closely with Parks Australia to develop and publish a guidance note that outlined what titleholders needed to consider and evaluate. Titleholders should ensure the EP:
    - Identifies and manages all impacts and risks on Australian marine park values (including ecosystem values) and had considered all options to avoid or reduce them to as low as reasonably practicable.
    - Clearly demonstrates the activity would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
  - **(3)** it did not require further notification of progress made in relation to this activity unless details regarding the activity changed and resulted in an overlap with a marine park or new impact, or for emergency responses.
  - **(4)** it wished to clarify the operational area for this activity as per DNP's definition.
  - **(3)** the requirements for emergency responses in the event of pollution incidences.
- On 8 November 2024, Woodside responded (SI Report, reference 7.2) thanking the DNP for its email and:
  - **(1)** noted DNP's confirmation that planned activities did not overlap any AMPs and there were no authorisation requirements.
  - **(2)** confirmed Woodside had taken into consideration the 'Petroleum Activities and Australian Marine Parks' guidance note to ensure the EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

    - identified and managed all impacts and risks on AMP values (including ecosystem values) to an acceptable level.
    - clearly demonstrated that the activities would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
  - (3) confirmed Woodside would notify the DNP in relation to these activities if details regarding the activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.
  - (4) outlined in consultation information that the operational area was 90 km from Dampier marine park.
- On 3 October 2025, Woodside emailed the DNP an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 9 October 2025, DNP emailed Woodside (SI Rpeort, reference 7.3) thanking them for the opportunity to comment and noted:
  - **(1)** the planned activity did not overlap any AMPs, as the Operational Area is approximately 90kms to the Dampier Marine Park, therefore there were no authorisation requirements from the DNP.
  - **(2)** that in the preparation of an EP for petroleum activities, NOPSEMA has publish a guidance note that outlined what titleholders needed to consider and evaluate, which includes that a titleholder:
    - Identifies and manages all impacts and risks on AMP values (including ecosystem values) and had considered all options to avoid or reduce them to as low as reasonably practicable.
    - Clearly demonstrates the activity would not be inconsistent with the North-west Marine Parks Network Management Plan 2018 and that spatial information on the AMPs values is located on the Australian Marine Spatial Information System.
  - **(3)** it did not require further notification of progress made in relation to this activity unless details regarding the activity changed and resulted in an overlap with a marine park or new impact, or for emergency responses.
  - **(3)** the requirements for emergency responses in the event of pollution incidences.
  - Noted Woodside's intention to withdraw the Angel Subsea Infrastructure Removal Environment Plan from assessment by NOPSEMA.
- On 28 October 2025, Woodside held an online meeting with the DNP to discuss EP consultation (SI Report, reference 7.5), no feedback was raised on this EP.
- On 10 November 2025 (SI Report, reference 7.4), Woodside responded to the DNP thanking them for their response and:
  - (1) noted DNP's confirmation that planned activities did not overlap any AMPs and there were no authorisation requirements.
  - (2) confirmed Woodside had taken into consideration the 'Petroleum Activities and Australian Marine Parks' guidance note to ensure the EP:
    - identified and managed all impacts and risks on AMP values (including ecosystem values) to an acceptable level.
    - clearly demonstrated that the activities would not be inconsistent with the North-west Marine Parks Network Management Plan 2018 and noted that the Management Plan provided values for Dampier Marine Park and that spatial information on AMP values was available via the Australian Marine Spatial Information System.
  - (3) Noted the DNP's advice that no further updates were required unless the activity changed and resulted in overlap with or new impacts to a marine park and confirmed that in the event of an emergency response within or likely to impact a marine park, Woodside would notify the DNP and provide the requested information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Confirmed activities don't overlap AMPs.	**(1)** **Woodside assessment:** Woodside notes there were no authorisation requirements from the DNP. **Woodside response:** Woodside noted the DNP's confirmation that planned activities did not overlap AMPs and there were no authorisation requirements.	**(1)** Not required.
(2) Ensure the EP identifies and manages all impacts and risks on AMP values, and clearly demonstrates that activities will not be inconsistent with the management plan.	**(2)** **Woodside assessment:** Woodside has considered the 'Petroleum Activities and Australian Marine Parks' guidance note to assess and manage impacts and risks to AMPs. **Woodside response:** Woodside confirmed it had taken into consideration the 'Petroleum Activities and Marine Parks' guidance note to ensure the EP identified and managed all risks on AMP values and clearly demonstrated that activities would not be inconsistent with the management plan.	**(2)** The EP demonstrates how Woodside will identify and manage all impacts and risks on AMP values (including ecosystem values) to ALARP and an acceptable level and that the activity is not inconsistent with the management plan (see Sections 6.6 and 6.7 of the EP).
(3) No further notification required in relation to this activity unless the activity changed and resulted in an overlap with a marine park or new impact, or for emergency responses.	**(3)** **Woodside assessment:** Woodside notes no further notification is required for DNP unless the activity changes resulting in an overlap with a marine park or for emergency responses. **Woodside response:** Woodside confirmed it would notify DNP if details regarding the activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.	**(3)** Woodside will provide notification of significant change, as appropriate, to relevant persons as referenced in Table 7-7 in the EP. Woodside will ensure DNP is made aware of any incidences within a marine park for the activity, as per the commitment in the Oil Pollution First Strike Plan (Appendix H).
(4) Provided DNP's definition of operational areas which includes operational activities including line turns / repositioning, equipment maintenance, deployment and	**(4)** **Woodside assessment:** Woodside notes that the Operational Area is 90 km north of Dampier Marine Park. Activities including vessel repositioning,	**(4)** The EP demonstrates how Woodside will manage impacts and risks related to interaction with third-party vessels (see Section 6.6.1 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

recovery, crew change and resupply to be included in the EP as relevant risks.	maintenance, deployment and resupply are not occurring in proximity to the Dampier Marine Park. **Woodside response:** Woodside noted DNP's operational areas definition and that it had incorporated the relevant risks and mitigations for vessel activities in the EP.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DNP for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DNP sufficient information to allow DNP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DNP on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 30 October 2024, DNP consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DNP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DNP with further information in response to DNP's feedback (email of 8 November 2024).

Reasonable Period

Woodside allowed DNP a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DNP advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DNP 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DNP a reasonable period for consultation in preparation of the EP as evidenced by DNP's response on 30 October 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DNP is appropriate and adapted to the nature of interests of DNP:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DNP.
- Woodside considers a reasonable opportunity was provided to DNP as evidenced by its response on 8 November 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DNP provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DNP.
  - Made no changes or inclusions to the EP as a result of consultation with DNP because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.2.5 Ningaloo Coast World Heritage Advisory Committee (NCWHAC)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed NCWHAC advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed NCWHAC an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed NCWHAC an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with NCWHAC for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given NCWHAC sufficient information to allow NCWHAC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to NCWHAC on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed NCWHAC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to NCWHAC advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed NCWHAC 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed NCWHAC a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with NCWHAC is appropriate and adapted to the nature of interests of NCWHAC:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding NCWHAC of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as NCWHAC did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on NCWHAC's functions, interests or activities.

4.3 Commonwealth and WA State Government departments or agencies – industry

4.3.1 Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) *(now Department of Mines, Petroleum and Exploration)*

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2024, Woodside emailed DEMIRS advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed DEMIRS an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed DEMIRS an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DEMIRS for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DEMIRS sufficient information to allow DEMIRS to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DEMIRS on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed DEMIRS a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DEMIRS advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DEMIRS 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DEMIRS a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DEMIRS is appropriate and adapted to the nature of interests of DEMIRS:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding DEMIRS of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DEMIRS did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DEMIRS' functions, interests or activities.

4.3.2 Department of Industry, Science and Resources (DISR)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed DISR advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 October 2024, Woodside emailed DISR an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.10).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2025, Woodside emailed DISR an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DISR for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DISR sufficient information to allow DISR to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to DISR on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed DISR a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DISR advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed DISR 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed DISR a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DISR is appropriate and adapted to the nature of interests of DISR:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding DISR of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DISR did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DISR's functions, interests or activities.

4.4 Commonwealth commercial fisheries and peak representative bodies

4.4.1 Commonwealth Fisheries Association (CFA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed CFA advising of the proposed activity (Record of Consultation, reference 6.1.15), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed CFA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1.1).
- On 22 October 2024, as no response had been received from CFA, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.2).
- On 3 October 2025, Woodside emailed CFA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with CFA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given CFA sufficient information to allow CFA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to CFA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed CFA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to CFA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed CFA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed CFA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with CFA is appropriate and adapted to the nature of interests of CFA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 27 September 2024, reminding CFA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as CFA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on CFA's functions, interests or activities.

4.4.2 North West Slope Trawl Fishery and Western Deepwater Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed the relevant Commonwealth fisheries (North West Slope Trawl Fishery and Western Deepwater Trawl Fishery) advising of the proposed activity (Record of Consultation, reference 6.1.15), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 October 2024, Woodside emailed the relevant Commonwealth fisheries an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.10).
- On 3 October 2025, Woodside emailed the relevant Commonwealth fisheries an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with the relevant Commonwealth fisheries for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given the relevant Commonwealth fisheries sufficient information to allow the relevant Commonwealth fisheries to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to the relevant Commonwealth fisheries on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed the relevant Commonwealth fisheries a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to the relevant Commonwealth fisheries advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed the relevant Commonwealth fisheries 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed the relevant Commonwealth fisheries a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with the relevant Commonwealth fisheries is appropriate and adapted to the nature of interests of the relevant Commonwealth fisheries:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding the relevant Commonwealth fisheries of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as the relevant Commonwealth fisheries did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on the relevant Commonwealth fisheries' functions, interests or activities.

4.5 State commercial fisheries and peak representative bodies

4.5.1 Western Australian Fishing Industry Council (WAFIC)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed WAFIC advising of the proposed activity (Record of Consultation, reference 6.1.30), provided a list of the relevant WA fisheries to contact, a Consultation Information Sheet and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- **(1)** On 27 September 2024, WAFIC replied to Woodside confirming it would send the consultation information to the relevant fishery licence holders. (SI Report, reference 13.1).
- **(1)** On 30 September 2024, Woodside responded to WAFIC (SI Report, reference 13.2) confirming it would like to use Option A of the fee-for-service agreement to distribute the consultation materials to the relevant WA fisheries.
- **(1)** On 30 September 2024, WAFIC emailed the relevant fishery licence holders (SI Report, reference 13.4) advising of the proposed activity, provided a Consultation Information Sheet and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- **(1)** On 30 September 2024, WAFIC advised Woodside (SI Report, reference 13.3) that it had sent the EP consultation materials to relevant licence holders.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** On 1 October 2024, Woodside responded to WAFIC (SI Report, reference 13.5) thanking it for confirming consultation materials had been sent to the relevant licence holders.
- On 11 October 2024, Woodside emailed WAFIC an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(1)** On 15 October 2024, WAFIC emailed Woodside (SI Report, reference 13.6) to advise the update to Woodside's 30 September 2024 notification had been sent to relevant licence holders.
- **(2)** On 30 October 2024, WAFIC emailed Woodside (SI Report, reference 13.7) confirming it did not have any feedback from licence holders regarding this EP. **(2)** Woodside noted WAFIC did not have any feedback from licence holders related to this EP. WAFIC provided the following further comments and questions:
  - **(3)** What is the maximum amount of time the infrastructure will be on the seabed?
  - How far above the mudline will well infrastructure be removed? *[as a result of changes to the activities covered under this EP this feedback is no longer relevant to this EP]*
  - No infrastructures are to be left in-situ that presents a snagging risk and no material or contaminants that will present an unacceptable risk to aquatic resources or marine environment *[as a result of changes to the activities covered under this EP this feedback is no longer relevant to this EP]*
  - **(6)** Concerns around the impact of decreased water quality on commercial species from subsea discharges
  - **(6)** Has consideration been given to the cumulative impacts of decreased water quality on the marine environment?
  - **(7)** Sought confirmation on what Woodside had in place for oil spill response planning, including notifying WAFIC within 24 hours of event notification. Also offered assistance to communicate with WA fisheries should this be required.
  - **(8)** Sought confirmation that Woodside had an effective Operational and Scientific Monitoring Program (OSMP) for the purposes of determining impacts and monitoring the recovery of the marine environment
  - **(9)** Sought confirmation Woodside had a current list of WA commercial fisheries that could be impacted by an unplanned spill scenario
  - **(10)** Shared its position on consultation with the WA fishing industry for unplanned events
  - **(11)** Advised Woodside's ongoing communication with mariners regarding notices on activities was appreciated and asked to be included in any vessel operation look ahead
  - **(12)** Confirmed it had no further comments and questions related to the proposed activities. **(12)** Woodside noted WAFIC's response that it had no further comments.
- On 29 November 2024, Woodside responded to WAFIC (SI Report, reference 13.8) as follows:
  - **(3)** Well infrastructure would only be temporarily wet stored for less than a year
  - The wellheads are planned to be cut below the mudline (3-5m). There is a contingency option to cut above the mudline however this is a worst-case conservative option. If this occurs all efforts will be made to complete the cut as close as possible to the mudline (up to 1 m maximum only). The location of wellheads will be marked on navigation charts. *[as a result of changes to the activities covered under this EP this response is no longer relevant to this EP]*
  - The area that would be occupied by any remaining wellhead infrastructure is small (<6m^2) and any remaining wellhead infrastructure will degrade into seabed sediments. Any potential corrosion is only expected in trace amounts over hundreds of years. Iron is the main constituent (98) of wellhead infrastructure and not considered a significant contaminant to the marine environment. Wellhead infrastructure left in-situ assessment indicates that there will be no additional impacts to

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

benthic habitats and no impacts would occur to any protected species. *[as a result of changes to the activities covered under this EP this response is no longer relevant to this EP]*

  - **(6)** There has been a thorough impact assessment of all planned subsea discharges
  - **(6)** Impacts to water quality are expected to be negligible with no impact to protected species due to the small volume of short intermittent discharges
  - **(6)** Discharges of cement/subsea fluids indicate reduction in water quality will be temporary and subject to rapid dispersion and dilution
  - **(6)** No cumulative impacts to water quality are expected to occur.
  - **(7)** An Oil Strike Plan is in place for all EPs and contact would be made with WAFIC within 24 hours should this occur.
  - **(8)** Woodside had an effective Operational and Scientific Monitoring Program (OSMP) for the purposes of determining impacts and monitoring the recovery of the marine environment.
  - **(9)** Woodside had a current list of WA commercial fisheries that could be impacted by an unplanned spill scenario
  - **(10)** Confirmed Woodside has incorporated WAFIC's consultation guidance into its consultation methodology
  - **(11)** Confirmed activity notifications to WAFIC had been incorporated into the EP as standard controls
- On 3 October 2025, Woodside emailed WAFIC an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan, included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3), and provided a list of the relevant WA fisheries to contact.
- **(1)** On 3 October 2025, WAFIC emailed the relevant fishery licence holders (SI Report, reference 13.9) advising of the activity update and provided an updated Consultation Information Sheet.
- **(1)** On 3 October 2025, WAFIC advised Woodside (SI Report, reference 13.10) that it had sent the EP consultation materials to relevant licence holders.
- On 8 October 2025, WAFIC emailed Woodside (SI Report, reference 13.11) regarding a matter unrelated to this EP.
- On 17 October 2025, WAFIC emailed Woodside (SI Report, reference 13.12) and provided the following further comments and questions:
  - **(2)** confirmed it did not have any feedback from licence holders regarding this EP.
  - **(12)** advised that they stand by their original comments provided on 30 October 2024
  - **(13)** sought clarification on the proposed sidetrack drilling method, including associated benefits and risks.
  - **(14)** recommended that detail be added to the Consultation Information Sheet.
- On 11 November 2025, Woodside responded to WAFIC (SI Report, reference 13.13) and:
  - **(1, 2)** noted that no feedback had been received from licence holders.
  - **(12)** noted that WAFIC stands by their original comments.
  - **(13)** provided information about sidetrack drilling as an optional method:
    - explaining that it involved creating a new well path to bypass obstructions and restore access for plug and abandonment activities.
    - described the potential environmental impacts of sidetrack drilling, including the generation of formation rock cuttings, and noted that water-based mud (WBM) would be used, with cuttings and fluids returned to the MODU for separation via solids control equipment.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- confirmed that additional controls had been included in the EP as a result of this optional drilling method.
- confirmed that updates had been made to the Consultation Information Sheet to reflect the inclusion of sidetrack drilling as an option.

– **(14)** Noted WAFIC's comments in relation to the Consultation Information Sheet and that future additions will be more clearly identified.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Confirmed consultation information was sent to fisheries/licence holders.	**(1)** **Woodside assessment:** Woodside notes that consultation information had been distributed to relevant fishery licence holders via WAFIC. **Woodside response:** Woodside thanked WAFIC for distributing consultation information to relevant fishery licence holders.	**(1)** Not required.
(2) No feedback from fishery licence holders.	**(2)** **Woodside assessment:** Woodside notes that WAFIC did not receive any feedback from fishing licence holders. **Woodside response:** Woodside acknowledged that WAFIC did not receive any feedback resulting from consultation with fishery licence holders.	**(2)** Not required.
(3) Enquired how long the infrastructure will be on the seabed.	**(3)** **Woodside assessment:** Woodside temporarily stores well infrastructure on the seabed during decommissioning activities for no longer than one year. **Woodside response:** Woodside advised the well infrastructure would only be temporarily wet stored for less than a year.	**(3)** Section 3.12.5 of the EP addresses the impacts and appropriate measures when temporarily wet storing well infrastructure. Woodside will track and remove any wet stored items from the seabed within one year from conclusion of MODU activities, as referenced in PS 2.2.
(6) Concern about decreased water quality on the marine environment due to cumulative impacts	**(6)** **Woodside assessment:** After a thorough water quality impact assessment, Woodside expects there will be negligible impacts to water quality from well/drilling fluids due to small volumes of short intermittent discharges. Any reduction in water quality from cement/subsea fluids bulk discharge will be	**(6)** Section 6.6 of the EP evaluates the impact of the proposed planned activities on water quality.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	temporary and will rapidly disperse and dilute. No cumulative impacts from water quality are expected to occur. **Woodside response:** Woodside advised it had undertaken a thorough impact assessment of all planned subsea discharges. Water quality impact assessment for discharges of well/drilling fluids were expected to be negligible with no impacts to any protected species, due to the small volumes of short period intermittent discharges. Water quality impact assessment for discharges of cement/subsea fluids indicated that reduction in water quality from bulk discharges would be temporary and subject to rapid dispersion and dilution. No cumulative impacts to water quality were expected to occur, as discharged cements etc. are predicted to settle in between the plug and abandon activities for each well.	
(7) Sought confirmation on oil spill arrangements including that WAFIC would be advised within 24 hours of an event notification. Offer made to communicate with the WA fishing industry if required.	**(7)** **Woodside assessment:** Woodside has an Oil Pollution Strike Plan in place for all EPs and in the unlikely event of an unplanned hydrocarbon spill contact would be made with WAFIC within 24 hours**.** **Woodside response:** Woodside advised WAFIC it had an Oil Pollution First Strike Plan in place for this EP and confirmed in the unlikely event of an unplanned hydrocarbon spill, contact would be made with WAFIC within 24 hours. Woodside thanked WAFIC for confirming it would assist Woodside with communications with the fishing industry should this be required.	**(7)** Woodside has addressed oil spill preparedness and response strategy in Appendix H.
(8) Sought confirmation that Woodside had an effective Operational and Scientific Monitoring Program (OSMP).	**(8)** **Woodside assessment:** Woodside has a well established OSMP in place executed under the Joint Industry OSM Framework (AEP, 2021).	**(8)** The EP demonstrates Woodside has an effective OSMP in Annex C of the Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) (Appendix G).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside confirmed with WAFIC an OSMP was in place executed under the Joint Industry OSM Framework.	
(9) Sought confirmation that Woodside had a current list of WA fisheries that could be impacted by an unplanned spill scenario.	**(9)** **Woodside assessment:** Woodside retains a list of commercial fishery licence holders which is updated approximately annually. **Woodside response:** Woodside advised WAFIC it had a list of commercial fishery licence holders which was updated approximately annually.	**(9)** Woodside receives WA fisheries licence holder details annually as referenced in 5.4.1 of the EP.
(10) Shared WAFIC consultation guidance with the WA fishing industry – *Consultation for unplanned events.*	**(10)** **Woodside assessment:** Woodside accepts WAFIC's guidance on consultation with the WA fishing industry and has incorporated this into the Woodside consultation methodology. **Woodside response:** Woodside advised WAFIC it had incorporated WAFIC's consultation guidance into the Woodside consultation methodology.	**(10)** Woodside consultation methodology (see Section 5.3.4 Table 5-2 of this EP) incorporates WAFIC's consultation guidance.
(11) Asked to be included in any vessel operation look ahead associated with this EP.	**(11)** **Woodside assessment:** Woodside notifies WAFIC on activity commencement and completion as well as distances around temporary exclusion zones. **Woodside response:** Woodside advised WAFIC that activity notifications were incorporated into this EP as standard controls.	**(11)** Woodside will provide notifications to WAFIC (see Table 7-5 of this EP) prior to commencement and upon completion of activities, as referenced as PS 1.5 of the EP.
(12) No further comments related to this EP.	**(12)** **Woodside assessment:** Woodside accepts WAFIC has no further comments related to the proposed activities for this EP. **Woodside response:** Woodside noted WAFIC had no further comments related to this EP.	**(12)** Not required.
(13)	**(13)**	**(13)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sought clarification on the proposed sidetrack drilling method, including associated benefits and risks.	**Woodside assessment:** Woodside understands that WAFIC sought further clarification on the proposed sidetrack drilling method. **Woodside response:** Woodside provided WAFIC with further information on the drilling method explaining that it involved the creation of a new well path to bypass obstructions for plug and abandonment, described potential environmental impacts of sidetrack drilling with WBM and cuttings returned to the MODU for separation, and confirmed updates to the EP and Consultation Information Sheet to include this optional method and additional controls were undertaken.	
(14) Recommended that detail be added to the Consultation Information Sheet.	**(14)** **Woodside assessment:** Woodside notes WAFIC's comments and future additions to the Consultation Information Sheet will aim to be more clearly identified. **Woodside response:** Woodside noted WAFIC's comments and advised it would aim to identify additions made to the Consultation Information Sheet more clearly moving forward.	**(14)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Woodside has assessed the potential for interaction with State-managed fisheries in Section 4.9.2 of the EP. Woodside will provide notifications to DPIRD and WAFIC (see Table 7-5 of this EP) prior to the commencement and at the completion of the activity, as referenced at PS 1.5 in this EP. No additional controls or measures are required.
Summary Report – Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with WAFIC for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given WAFIC sufficient information to allow WAFIC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to WAFIC on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 30 October 2024 and 17 October 2025, WAFIC shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable WAFIC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 29 November 2024 and 11 November 2025.

Reasonable Period

Woodside allowed WAFIC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WAFIC advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WAFIC 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed WAFIC a reasonable period for consultation in preparation of the EP as evidenced by WAFIC's response on 30 October 2024 and 17 October 2025.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with WAFIC is appropriate and adapted to the nature of interests of WAFIC:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to WAFIC as evidenced by its response on 30 October 2024 and 17 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- WAFIC provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from WAFIC.
  - Made no changes or inclusions to the EP as a result of consultation with WAFIC because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.5.2 Aquaculture Council of Western Australia (ACWA)

Summary of information provided and record of consultation for this EP:

- On 21 November 2024, Woodside emailed Aquaculture Council of Western Australia advising of the proposed activity (Record of Consultation, reference 6.1.9) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 9 December 2024, as no response had been received from ACWA, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.15).
- **(1)** On 9 December 2024, ACWA responded to Woodside (SI Report, reference 20.1) to advise the proposed activities are sufficiently distant from current aquaculture activities to present any direct impacts. ACWA also:
  - **(2)** acknowledged the rare likelihood of consequences from unplanned hydrocarbon release due to the appropriate mitigation measures put in place by Woodside.
  - **(3)** advised it had no objection to the proposed activities.
- **(1)** On 17 December 2024, Woodside responded to ACWA (SI Report, reference 20.2) noting its feedback that the proposed activities are sufficiently distant from aquaculture activities to ensure no direct impacts. Woodside also:
  - **(2)** confirmed ACWA understood that appropriate mitigation measures would be in place in the event of a hydrocarbon release.
  - **(3)** noted ACWA's feedback that it had no objection to the proposed activities.
- On 4 November 2025, Woodside emailed ACWA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.4).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) Proposed activities are sufficiently distant from current aquaculture activities to present any direct impacts.	**(1)** **Woodside assessment:** Woodside notes ACWA's feedback that there is a sufficient distance from current aquaculture activities to present direct impacts. **Woodside response:** Woodside responded noting the feedback that the proposed activities are sufficiently distant from aquaculture activities to ensure no direct impacts.	**(1)** Not required.
(2) Low likelihood of consequences from unplanned hydrocarbon release due to the appropriate mitigation measures put in place.	**(2)** **Woodside assessment:** Woodside notes ACWA's feedback that there is low likelihood of consequences from unplanned hydrocarbon release due to the appropriate mitigation measures put in place. **Woodside response:** Woodside responded confirming the feedback that ACWA understood that appropriate mitigation measures would be put in place in the event of a hydrocarbon release.	**(2)** Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix H of the EP.
(3) No objection to proposed activities.	**(3)** **Woodside assessment:** Woodside accepts ACWA's feedback that it had no objections to the proposed activities for this EP. **Woodside response:** Woodside thanked ACWA for its feedback that it had no objections to proposed activities for the EP.	**(3)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with ACWA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ACWA sufficient information to allow ACWA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to ACWA on 21 November 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 9 December 2024, ACWA shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable ACWA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded to ACWA noting its feedback on 17 December 2024.

Reasonable Period

Woodside allowed ACWA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to ACWA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ACWA 30 days for consultation.
- Consultation for this EP commenced 11 months ago.
- In this context, Woodside allowed ACWA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with ACWA is appropriate and adapted to the nature of interests of ACWA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to ACWA as evidenced by its response on 7 December 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as ACWA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.5.3 Mackerel Managed Fishery (Area 2 and 3), Pilbara Line Fishery, Pilbara Trap Fishery, Pilbara Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, WAFIC, on behalf of Woodside, emailed the relevant WA fishery individual licence holders advising of the proposed activity (SI Report, reference 13.4), and provided a Consultation Information Sheet.
- On 30 October 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.7).
- On 3 October 2025, WAFIC, on behalf of Woodside, emailed the relevant WA fishery individual licence holders advising them of the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (SI Report 13.9)
- On 17 October 2025, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.12).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report – Consultation Complete
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation through WAFIC with licence holders for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically: **Sufficient Information** Woodside has given State licence holders sufficient information to allow State licence holders to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because: • The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to licence holders on 30 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included: − The purpose of consultation and set out what was being sought through consultation. − A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures. − A timeframe for consultation and the provision of feedback. − A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community* − Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations). **Reasonable Period** Woodside allowed licence holders a reasonable period for consultation in the preparation of this EP because: • A consultation period was stated in the initial correspondence to licence holders advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission. • Woodside's methodology allows a 30-day consultation period and Woodside allowed licence holders 30 days for consultation. • Consultation for this EP commenced 13 months ago. • In this context, Woodside allowed licence holders a reasonable period for consultation in preparation of the EP. **Reasonable Opportunity** A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with licence holders is appropriate and adapted to the nature of interests of licence holders: • Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation. • Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as licence holders did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on licence holders' functions, interests or activities.

4.6 Recreational marine users and peak representative bodies

4.6.1 Gascoyne Recreational Marine Users and Pilbara/Kimberley Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside sent a letter or email to individual Gascoyne and Pilbara/Kimberley Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 6.1.24 and 6.1.25), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Gascoyne and Pilbara/Kimberley Recreational Marine Users an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(1)** On 11 October 2024, a Pilbara Recreational Marine User requested to be unsubscribed from Woodside's consultation list as they were no longer involved with the fishing club (SI Report, reference 10.1)
- **(1)** On 17 October 2024, Woodside responded to the Pilbara Recreational Marine User confirming they had been removed from the consultation list (SI Report, reference 10.2).
- On 22 October 2024, as no response had been received from all but one Gascoyne or Pilbara/Kimberley Recreational Marine Users, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.13).
- On 9 January 2024, as no response had been received from Gascoyne or Pilbara/Kimberley Recreational Marine Users who were sent a letter, Woodside proactively sent a follow-up letter (Record of Consultation, reference 6.3.14).
- On 3 October 2025, Woodside sent an activity update letter or email to individual Gascoyne and Pilbara/Kimberley Recreational Marine Users regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet. (Record of Consultation, reference 6.2.2.5 and 6.2.2.3).
- **(1)** On 4 October 2025, a Gascoyne Recreational Marine User requested to be removed from Woodside's consultation list (SI Report, reference 10.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** On 6 October 2025, Woodside responded to the Gascoyne Recreational Marine User confirming they had been removed from the consultation list (SI Report, reference 10.4).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Recreational marine user advised they were no longer involved in the fishing club and asked to be removed from consultation list.	**(1)** **Woodside assessment:** Woodside noted one recreational marine user was no longer part of the relevant fishing club and therefore did not require consultation information. **Woodside response:** Woodside noted the recreational marine users request to be removed from the consultation list and confirmed they had been removed.	**(1)** Not required.
While feedback has been received, there were no objections or claims. .	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Gascoyne and Pilbara/Kimberley Recreational Marine Users for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Gascoyne and Pilbara/Kimberley Recreational Marine Users sufficient information to allow Gascoyne and Pilbara/Kimberley Recreational Marine Users to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Gascoyne and Pilbara/Kimberley Recreational Marine Users on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 17 October 2024, one recreational marine user shared its feedback regarding this activity, indicating the information provided was sufficient to enable Gascoyne and Pilbara/Kimberley Recreational Marine Users to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded to one recreational marine user confirmed its feedback had been actioned on 17 October 2024.

Reasonable Period

Woodside allowed Gascoyne and Pilbara/Kimberley Recreational Marine Users a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Gascoyne and Pilbara/Kimberley Recreational Marine Users advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Gascoyne and Pilbara/Kimberley Recreational Marine Users 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Gascoyne and Pilbara/Kimberley Recreational Marine Users a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Gascoyne and Pilbara/Kimberley Recreational Marine Users is appropriate and adapted to the nature of interests of Gascoyne and Pilbara/Kimberley Recreational Marine Users:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In the absence of feedback for the majority, Woodside sent a follow-up consultation email on 22 October 2024 and letter on 9 January 2025, reminding Gascoyne and Pilbara/Kimberley Recreational Marine Users of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Gascoyne and Pilbara/Kimberley Recreational Marine Users did not provide material feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.6.2 Marine Tourism WA

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Marine Tourism WA advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Marine Tourism WA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received from Marine Tourism WA, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed Marine Tourism WA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report – Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Marine Tourism WA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given Marine Tourism WA sufficient information to allow Marine Tourism WA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Marine Tourism WA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Marine Tourism WA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Marine Tourism WA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Marine Tourism WA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Marine Tourism WA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Marine Tourism WA is appropriate and adapted to the nature of interests of Marine Tourism WA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding Marine Tourism WA of the opportunity to provide feedback.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Marine Tourism WA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Marine Tourism WA's functions, interests or activities.

4.6.3 Recfishwest

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Recfishwest advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- **(1)** On 2 October 2024, Recfishwest responded to Woodside (SI Report, reference 11.1) acknowledging its plans to conduct this EP's activities from Q2 2025 to Q4 2026. **(1)** Woodside noted Recfishwest's response confirming timing but did not respond on this topic. Recfishwest also:
  - **(2)** advised that the proposed activities occurring 125 km north of Dampier will affect areas accessed by recreational fishers.
  - **(2)** requested updates to inform the fishing community about the 500m exclusion zones.
- On 4 October 2024, Woodside responded to Recfishwest (SI Report, reference 11.2):
  - **(2)** noting its feedback that the general area for the proposed activities is accessed by the charter industry and recreational fishers in larger vessels.
  - **(2)** committing to notifying Recfishwest of activity dates for communication to the recreational fishing community.
- On 11 October 2024, Woodside emailed Recfishwest an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 16 October 2024, Recfishwest replied to Woodside's email (SI Report, reference 11.3) to advise it had received the activity update with new co-ordinates and water depths. Recfishwest confirmed it had no additional comments to those provided on 2 October 2024.
- On 23 October 2024, Woodside replied to Recfishwest acknowledging its confirmation that it had received the revised co-ordinates and water depths for this EP. Woodside also acknowledged Recfishwest had no additional comments to make to those it had provided on 2 October 2024.
- On 3 October 2025, Woodside emailed Recfishwest an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 29 October 2025, Recfishwest thanked Woodside (SI Report, reference 11.5) for providing the update and referenced details regarding the activity and the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan. Recfishwest also confirmed that it had no additional comments to those previously provided.
- On 10 November 2025, Woodside responded to Recfishwest (SI Report, reference 11.6) noting that no additional comments were provided and clarified details regarding activities that may be covered under a future Environment Plan.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) Acknowledged plans to conduct the proposed activities from Q2 2025 to Q4 2026.	**(1)** **Woodside assessment:** Woodside plans to conduct the proposed activities for this EP from Q2 2025 to Q4 2026. **Woodside response:** Woodside noted Recfishwest understood the timing for the proposed activities for this EP.	**(1)** Not required.
(2) Proposed activities will affect areas accessed by recreational fishers and therefore requested activity updates to inform the fishing community of exclusion zones.	**(2)** **Woodside assessment:** Woodside understands the general area is accessed by the charter industry and recreational fishers in large vessels and commits to provided notifications to Recfishwest to keep this community informed of activities. **Woodside response:** Woodside advised Recfishwest it would be notified of activity dates for communication to the recreational fishing community.	**(2)** Woodside will provide notifications to Recfishwest (see Table 7-5 of this EP) ten days before activity commences, and following completion of activities, as referenced as PS 1.5 of this EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.
Summary Report – Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Recfishwest for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically: **Sufficient Information**		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given Recfishwest sufficient information to allow Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Recfishwest on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 2 October 2024, Recfishwest shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 4 October 2024 and 10 November 2025.

Reasonable Period

Woodside allowed Recfishwest a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Recfishwest advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Recfishwest 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Recfishwest a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Recfishwest is appropriate and adapted to the nature of interests of Recfishwest:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to Recfishwest as evidenced by its response on 2 October 2024 and 29 October 2025.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Recfishwest provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Recfishwest and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of Recfishwest's feedback requesting activity notifications, this was added to Section 7.9, Table 7-5 of the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.6.4 WA Game Fishing Association

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed WA Game Fishing Association advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 October 2024, Woodside emailed WA Game Fishing Association an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed WA Game Fishing Association an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report – Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with WA Game Fishing Association for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given WA Game Fishing Association sufficient information to allow WA Game Fishing Association to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to WA Game Fishing Association on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed WA Game Fishing Association a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WA Game Fishing Association advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WA Game Fishing Association 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed WA Game Fishing Association a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with WA Game Fishing Association is appropriate and adapted to the nature of interests of WA Game Fishing Association:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding WA Game Fishing Association of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as WA Game Fishing Association did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on WA Game Fishing Association's functions, interests or activities.

4.7 Titleholders and operators

4.7.1 Beagle No. 1 / Longreach Capital Investment, Bounty Oil and Gas, Carbon CQ, Coastal Oil and Gas, Finder Energy (Finder No 16), InCapture, INPEX Alpha, Jadestone Energy, JX Nippon, KATO Energy / KATO Corowa / KATO NWS / KATO Amulet, Kyushu Electric Wheatstone, OMV Australia, Pathfinder Energy, PE Wheatstone, Skye Napoleon, Vermilion Oil and Gas, Western Gas

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed titleholders advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed titleholders an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed titleholders an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report – Consultation Complete
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with titleholders for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically: **Sufficient Information** Woodside has given titleholders sufficient information to allow titleholders to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because: • The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to titleholders on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included: − The purpose of consultation and set out what was being sought through consultation. − A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures. − A timeframe for consultation and the provision of feedback. − A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community* − Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations). **Reasonable Period** Woodside allowed titleholders a reasonable period for consultation in the preparation of this EP because: • A consultation period was stated in the initial correspondence to titleholders advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission. • Woodside's methodology allows a 30-day consultation period and Woodside allowed titleholders 30 days for consultation. • Consultation for this EP commenced 13 months ago. • In this context, Woodside allowed titleholders a reasonable period for consultation in preparation of the EP. **Reasonable Opportunity** A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with titleholders is appropriate and adapted to the nature of interests of titleholders: • Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation. • Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding titleholders of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as titleholders did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on each titleholder's functions, interests or activities.

4.7.2 BP Developments Australia

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed BP advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 October 2024, Woodside emailed BP an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(1)** On 21 October 2024, BP responded to Woodside (SI Report, reference 42.1) to advise it considered the impacts and risks identified will be appropriately managed and it had no feedback or objections at this time.
- **(1)** On 23 October 2024, Woodside responded to BP (SI Report, reference 42.2) to thank it for considering the impacts and risks for this EP will be appropriately managed under the proposed measures. Woodside also noted BP had no objections or other feedback at this time.
- On 3 October 2025, Woodside emailed BP an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Considered impacts and risks identified were appropriately managed and therefore had no feedback or objections.	**(1)** **Woodside assessment:** Woodside accepts that BP has no feedback at this time as it considers impacts and risks will be appropriately managed. **Woodside response:** Woodside noted BP's feedback that risks and impacts for this EP will be appropriately	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	managed and therefore it had no feedback or objections.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with BP for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given BP sufficient information to allow BP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to BP on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 21 October 2024, BP shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable BP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded to BP noting its feedback on 23 October 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed BP a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to BP advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed BP 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed BP a reasonable period for consultation in preparation of the EP as evidenced by BP's response on 21 October 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with BP is appropriate and adapted to the nature of interests of BP:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to BP as evidenced by its response on 21 October 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- BP provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from BP and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with BP because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.3 Carnarvon Energy

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Carnarvon Energy advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** On 1 October 2024, Carnarvon Energy thanked Woodside for the information related to this EP and advised it had no comment/feedback to provide. (SI Report, reference 4.1).
- (1) On 2 October 2024, Woodside responded to Carnarvon Energy (SI Report, reference 4.2) acknowledging receipt of its email advising Carnarvon Energy had no feedback or comments to make about this EP.
- (2) On 3 October 2024, Woodside emailed Carnarvon Energy (SI Report, reference 4.3) seeking permission to include Carnarvon Energy's response in the EP (publicly available) and Sensitive Information report for NOPSEMA. This email was sent in response to a disclaimer placed on Carnarvon Energy's email.
- **(2)** On 3 October 2024, Carnarvon Energy advised Woodside (SI Report, reference 4.4) that it understood all correspondence in relation to this EP would be summarised in the EP (which is publicly available) and would also be provided to the regulator in full in a Sensitive Information report.
- On 11 October 2024, Woodside emailed Carnarvon Energy an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(3)** On 17 October 2024, Carnarvon Energy responded to Woodside (SI Report, reference 4.5) to confirm it had received the updated co-ordinates and had no additional feedback or comments for the EP.
- (3) On 13 December 2024, Woodside responded to Carnarvon Energy acknowledging Carnarvon Energy had received the updated co-ordinates and had no additional comments or feedback (SI Report, reference 4.6).
- On 3 October 2025, Woodside emailed Carnarvon Energy an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) No feedback or comments.	**(1)** **Woodside assessment:** Woodside accepted Carnarvon Energy has no feedback or comments on this EP. **Woodside response:** Woodsides noted Carnarvon Energy had no feedback or comments to make on this EP.	**(1)** Not required.
(2) Permission provided to summarise Carnarvon Energy's feedback in this EP.	**(2)** **Woodside assessment:** Carnarvon Energy's email signature had a disclaimer advising the content of the email could not be shared. Woodside therefore sought permission to summarise Carnarvon Energy's related emails in this EP.	**(2)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside confirmed it had received permission from Carnarvon Energy to summarise its feedback in this EP.	
(3) No further feedback upon receipt of the updated co-ordinates from Woodside.	**(3)** **Woodside assessment:** Woodside accepts Carnarvon Energy has no further feedback on this EP. **Woodside response:** Woodside noted Carnarvon Energy's response that it had no further feedback on this EP.	**(3)** Not required.
While feedback has been received, there were no objections or claims. .	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Carnarvon Energy for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Carnarvon Energy sufficient information to allow Carnarvon Energy to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Carnarvon Energy on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

- On 1,3 and 17 October 2024, Carnarvon Energy shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Carnarvon Energy to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 3 October 2024.

Reasonable Period

Woodside allowed Carnarvon Energy a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Carnarvon Energy advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Carnarvon Energy 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Carnarvon Energy a reasonable period for consultation in preparation of the EP as evidenced by Carnarvon Energy's responses on 1,3 and 17 October 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Carnarvon Energy is appropriate and adapted to the nature of interests of Carnarvon Energy:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to Carnarvon Energy as evidenced by its responses on 1,3 and 17 October 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Carnarvon Energy provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Carnarvon Energy and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Made no changes or inclusions to the EP as a result of consultation with Carnarvon Energy because appropriate measures are already included in the EP.

- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.4 Chevron Australia/ MidOcean Gorgon/ Osaka Gas Gorgon/ JERA Gorgon

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Chevron Australia advising of the proposed activity (Record of Consultation, reference 6.1.14), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Chevron Australia an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.18).
- **(1)** On 24 October 2024, Chevron Australia responded to Woodside (SI Report, reference 17.1) and requested a further 30 days to provide feedback for this EP due to internal resourcing
- **(1)** On 31 October 2024, Woodside responded to Chevron Australia (SI Report, reference 17.2) noting its request for a further 30 days to respond to feedback. Woodside confirmed it looked forward to receiving this feedback by 30 November 2024.
- **(2)** On 12 November 2024, Chevron Australia emailed Woodside (SI Report, reference 17.3) advising there were no issues identified related to this EP. In addition, Chevron advised:
  - **(3)** as a general comment across all proposed activities if the work plan is executed during the cyclone season, then Woodside should provide cyclone anchor configuration
  - **(4)** it is to be informed of any potential risks to its assets within the affected leases.
- **(2)** On 21 November 2024, Woodside emailed Chevron Australia (SI Report, reference 17.4) noting its feedback that there were no issues identified with the EP. Woodside also confirmed:
  - **(3)** there were no plans for activities to occur in cyclone season, however in the unlikely case this was to occur the MODU contractor and vessel contractors will implement a Cyclone Contingency Plan
  - **(3)** if there are any potential risks it will provide detailed information to Chevron Australia.
- On 3 October 2025, Woodside emailed Chevron Australia an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.1).
- On 8 October 2025, Chevron responded to Woodside regarding consultation with the Gorgon Joint Venture Partners (SI Report 17.5).
- On 9 October 2025, Woodside responded to Chevron noting their approach to consultation with the Gorgon Joint Venture Partners (SI Report 17.6).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	**(1)**	**(1)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Requested a further 30 days to provide feedback.	**Woodside assessment:** Woodside extended the consultation period an additional 30 days to give Chevron a reasonable period to make an informed assessment of the possible consequences of the proposed activity on its functions, interests or activities. **Woodside response:** Woodside confirmed it had given Chevron an additional 30 days to provide feedback on this EP.	Not required.
(2) No issues identified.	**(2)** **Woodside assessment:** Woodside accepts that Chevron identified no issues with proposed EP activities. **Woodside response:** Woodside confirmed with Chevron that it had no issues with EP activities.	**(2)** Not required.
(3) Requested information related to cyclone season.	**(3)** **Woodside assessment:** Woodside understands that Chevron would want to be informed of risks to its assets if activities progressed during cyclone season but can confirm no planned operational activities will occur during this time. **Woodside response:** Woodside confirmed that planned activities associated with the EP will not occur during cyclone season however in the unlikely case it was to occur a Cyclone Contingency Plan would be put in place and detailed information about risks provided to Chevron.	**(3)** Woodside Cyclone Contingency Plan is referenced in Section 7.11.9 of this EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP is accepted, it will be assessed and, where appropriate,	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Chevron Australia for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Chevron Australia sufficient information to allow Chevron Australia to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Chevron Australia on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- Woodside followed-up to remind Chevron Australia of consultation on 22 October 2024.
- On 12 November 2024, Chevron Australia shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Chevron Australia to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 21 November 2024.

Reasonable Period

Woodside allowed Chevron Australia a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Chevron Australia advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Chevron Australia 60 days for consultation at Chevron Australia's request.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Chevron Australia a reasonable period for consultation in preparation of the EP as evidenced by its response on 12 November 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Chevron Australia is appropriate and adapted to the nature of interests of Chevron Australia:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to Chevron Australia as evidenced by its response on 12 November 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Chevron Australia provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Chevron Australia and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with Chevron Australia because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.5 KUFPEC Australia

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed KUFPEC advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed KUFPEC an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- **(1)** On 11 November 2024, KUFPEC responded to Woodside (SI Report, reference 8.1) advising it had no objections on the proposed activities for this EP
- **(1)** On 15 November 2024, Woodside responded to KUFPEC (SI Report, reference 8.2) confirming it had received KUFPEC's feedback that it had no objections to the proposed activities for this EP.
- On 3 October 2025, Woodside emailed KUFPEC an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) No objections on the proposed activities.	**(1)** **Woodside assessment:** Woodside accepts KUFPEC had no objections to the proposed activities for this EP. **Woodside response:** Woodside noted KUFPEC's feedback that it had no objections to the proposed activities for this EP.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with KUFPEC for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given KUFPEC sufficient information to allow KUFPEC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to KUFPEC on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

- Woodside followed-up to remind KUFPEC of consultation on 22 October 2024.
- On 11 November 2024, KUFPEC shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable KUFPEC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded noting KUFPEC's feedback on 15 November 2024.

Reasonable Period

Woodside allowed KUFPEC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to KUFPEC advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed KUFPEC 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed KUFPEC a reasonable period for consultation in preparation of the EP as evidenced by its response on 11 November 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with KUFPEC is appropriate and adapted to the nature of interests of KUFPEC:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to KUFPEC as evidenced by its response on 11 November 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- KUFPEC provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from KUFPEC and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with KUFPEC because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7.6 Mobil Australia Resources Company

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Mobil advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Mobil an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 20 November 2024, Woodside provided an update to Mobil (SI Report, reference 9.1) advising that vessel movements related to this EP may occur on the periphery of the adjacent title. Woodside provided this information to Mobil as the titleholder for the adjacent title.
- On 3 October 2025, Woodside emailed Mobil an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Mobil for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Mobil sufficient information to allow Mobil to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Mobil on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Mobil a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Mobil advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Mobil 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Mobil a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Mobil is appropriate and adapted to the nature of interests of Mobil:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024 and 20 November 2024, reminding Mobil of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Mobil did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Mobil's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7.7 Santos NA Energy Holdings / Santos Ltd / Santos WA Northwest / Santos Offshore / Santos WA Southwest / Santos (BOL) / Santos WA PVG

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Santos advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Santos an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(1)** On 18 October 2024, Santos responded to Woodside (SI Report, reference 15.1) and advised that it had planned activities in the same timeframe and vicinity of survey area and requested notification of planned vessel movements.
- **(1)** On 28 October 2024, Woodside responded (SI Report, reference 15.2) noting that Santos may have planned activities during a similar timeframe and confirmed Woodside would notify Santos on planned vessel activities as well as commencement activities.
- On 18 November 2024, Woodside provided an update to Santos (SI Report, reference 15.3) advising that vessel movements related to this EP may occur on the periphery of the adjacent title.
- On 21 November 2024, Santos responded to Woodside (SI Report, reference 15.4):
  - **(2)** confirming it understood that additional information was provided regarding the possibility of temporary vessel operations within Santos' adjacent title.
  - **(3)** seeking Woodside's understanding that it wanted notification prior to any activities commencing.
  - **(4)** advising it had no objections of further comments on the planned activities and its previous input remained valid.
- On 13 December 2024, Woodside responded to Santos (SI Report, reference 15.5) and:
  - **(2)** thanked Santos for acknowledging the possibility of temporary vessel operations within Santos' adjacent title.
  - **(3)** confirmed it would provide Santos with start and end of activity notifications as requested.
  - **(4)** noted Santos had no objections or further comments related to this EP.
- On 3 October 2025, Woodside emailed Santos an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 8 October 2025, Santos responded to Woodside with a blank response (SI Report, reference 15.6).
- On 10 October 205, Woodside responded to Santos (SI Report, reference 15.7) noting that a blank response was received and requested:
  - confirmation as to whether this had been sent in error.
  - advice as to whether they intended to provide feedback on the EP.
- On 11 November 2025, Santos responded (SI reference 15.8) confirming that the response may have been sent in error and referenced their response provided on 21 November 2024.
- On 11 November 2025, Woodside thanked Santos (SI Report, reference 15.9) for the confirmation and noting a response was provided on 21 November 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Requested notification of planned vessel movements as Santos had planned activities in the same timeframe and vicinity of the area.	**(1)** **Woodside assessment:** Woodside acknowledges that Santos may have planned activities at the same time in the same vicinity of Woodside's proposed activities for this EP. Woodside accepts its responsibility to advise Santos of these planned activities. **Woodside response:** Woodside confirmed with Santos it will provide notification prior to the commencement of activities.	**(1)** Santos will be notified prior to commencement and upon completion of activities, as referenced in Table 7-5 (PS 1.5) of the EP.
(2) Confirmed understanding there is the possibility of temporary vessel operations within Santos' adjacent title.	**(2)** **Woodside assessment:** Woodside advises adjacent titleholders of the possibility of vessel movements on the periphery of their titles. **Woodside response:** Woodside acknowledged Santos' response that there was the possibility of temporary vessel operations within Santos' adjacent title.	**(2)** Not required.
(3) Requested activity notifications.	**(3)** **Woodside assessment:** Woodside acknowledges Santos's requirement for activity notifications as Santos may have planned activities in the same period and vicinity of the proposed activities for this EP. **Woodside response:** Woodside confirmed with Santos that it will receive start and end notifications for this EP as requested.	**(3)** Santos will be notified prior to commencement and upon completion of activities, as referenced in Table 7-5 (PS 1.5) of the EP.
(4) No further objections or claims.	**(4)** **Woodside assessment:** Woodside accepts that Santos has not further objections or claims related to this EP.	**(4)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside noted that Santos had no further objections or claims for this EP.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Santos for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Santos sufficient information to allow Santos to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Santos on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 18 October 2024, 21 November 2024, 8 October 2025, and 11 November 2025 Santos shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Santos to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside provided additional information on 28 October 2024, 13 December 2024, 10 October 2025, and 11 November 2025.

Reasonable Period

Woodside allowed Santos a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Santos advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Santos 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Santos a reasonable period for consultation in preparation of the EP as evidenced by Santos' response on 18 October 2024, 21 November 2024, 8 October 2025, and 11 November 2025.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Santos is appropriate and adapted to the nature of interests of Santos:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- Woodside considers a reasonable opportunity was provided to Santos as evidenced by its response on 18 October 2024, 21 November 2024, 8 October 2025, and 11 November 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Santos provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Santos and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of Santos' feedback requesting activity notifications, this was added to Section 7.9 of the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7.8 Shell Australia

Summary of information provided and record of consultation for this EP:

- On 16 December 2024, Woodside emailed Shell Australia advising of the proposed activity (Record of Consultation, reference 6.1.27), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 8 January 2025, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.16).
- On 3 October 2025, Woodside emailed Shell an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Shell Australia for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shell Australia sufficient information to allow Shell Australia to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Shell Australia on 13 December 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shell Australia a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shell Australia advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shell Australia 30 days for consultation.
- Consultation for this EP commenced 11 months ago.
- In this context, Woodside allowed Shell Australia a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shell Australia is appropriate and adapted to the nature of interests of Shell Australia:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 8 January 2025, reminding Shell Australia of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shell Australia did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shell's functions, interests or activities.

4.8 Peak industry representative bodies

4.8.1 Australian Energy Producers (AEP)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2024, Woodside emailed AEP advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed AEP an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed AEP an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AEP for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AEP sufficient information to allow AEP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to AEP on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed AEP a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AEP advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AEP 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed AEP a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AEP is appropriate and adapted to the nature of interests of AEP:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding AEP of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as AEP did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on AEP's functions, interests or activities.

4.9 Traditional custodians and nominated representative corporations

4.9.1 Buurabalayji Thalanyji Aboriginal Corporation (BTAC)

BTAC is established under the *Native Title Act 1993* by the Thalanyji people to represent the Thalanyji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Historical engagement:

- On 26 July 2023, Woodside emailed BTAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed BTAC advising of the proposed activity (Record of Consultation, reference 6.1.32), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that BTAC and its members may have within the EMBA.
  - **(1)** Details of BTAC's cultural values previously provided by BTAC to Woodside during consultation for other activities that may be relevant to the proposed activity. These cultural values include BTAC's cultural obligation to care for the environmental values of Sea Country, such as archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands.
  - **(1)** A request from Woodside that BTAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation of this EP.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how BTAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with BTAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for BTAC to provide information about the proposed activity to other individuals, as required.
  - Acknowledgement that discussions relating to Woodside's consultation framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 3 October 2024, Woodside emailed BTAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed BTAC a reminder about the proposed activity (SI Report, reference 21.1). The email included:
  - A reference to the original consultation email for this EP sent to BTAC on 30 September 2024, which included Summary and Consultation Information Sheets and listed cultural values previously provided by BTAC to Woodside.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how BTAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with BTAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for BTAC to provide information about the proposed activity to other individuals, as required.
- On 21 October 2004, Woodside received an automated 'failed delivery notice' email in response to its reminder email sent earlier on the same day (SI Report, reference 21.2).
- On 21 October 2024, Woodside resent the reminder email to BTAC and copied another BTAC nominated officer to ensure the email was successfully delivered (SI Report, reference 21.3).

Ongoing engagement:

- **(2, 3)** On 18 November 2024, following a meeting between Woodside and BTAC on 15 November 2024 to discuss matters unrelated to this activity, Woodside emailed BTAC a summary of the meeting's outcomes and further actions by both parties (SI Report, reference 21.4), which included a scope for Sea Country mapping and a ranger proposal. Outcomes and matters relevant to this EP included:
  - **(2)** Woodside confirming it would meet with BTAC's heritage teams to undertake a workshop to discuss a heritage agreement and finalise the scope for Sea Country mapping.
  - **(3)** Woodside requesting that BTAC send its ranger program proposal to Woodside for consideration.
- On 29 July 2025, Woodside emailed BTAC to progress outstanding issues (SI Report, reference 21.5). Matters relevant to this EP included:
  - **(2)** a request for a time for Woodside and BTAC's heritage teams to workshop a heritage agreement and finalise the scope for Sea Country mapping.
  - **(3)** a request for BTAC's ranger program proposal for its consideration.
- On 3 October 2025, Woodside emailed BTAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.1). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to BTAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with BTAC to understand how it would like information to be managed.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. – A request for BTAC to provide information about the proposed activity to others as required.		
Summary of Feedback, Objection or Claim	**Assessment of Merits of Feedback, Objection or Claim and Woodside's Response**	**Inclusion in Environment Plan**
(1) BTAC has a cultural obligation to care for the environmental values of Sea Country. BTAC's interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands.	**(1)** **Woodside assessment:** Woodside assessed BTAC's cultural obligation to care for environmental values of Sea Country to represent potential cultural values. The nearshore islands identified by BTAC are adjacent to the EMBA. **Woodside response:** Updated relevant sections in the EP to record interests and potential cultural values and assessed the potential impact on these and included controls. The islands may be impacted by the activities set out in the EP and Sea Country mapping will therefore continue even though consultation for this EP is closed.	**(1)** Woodside has recorded BTAC's interests and potential cultural values in Section 4.9.1: Cultural values and heritage, and assessed potential impact on these, including controls, in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(2) BTAC and Woodside discussed Sea Country mapping, resulting in BTAC requesting Woodside's support in obtaining technical advice and for Sea Country mapping.	**(2)** **Woodside Assessment:** Woodside considers it beneficial for BTAC to have technical advice to ensure the delivery of an outcome that does justice to the work involved to map and record Sea Country values. **Woodside Response:** Woodside will meet with BTAC's heritage teams will undertake a workshop to discuss a heritage agreement and finalise the scope for Sea Country mapping. Woodside has requested BTAC to advise a suitable time to meet to progress this item.	**(2)** Not required
(3) BTAC has requested support for a ranger program.	**(3)** **Woodside Assessment:** Woodside acknowledges the value in having trained rangers available in the highly unlikely event of an oil spill and agrees it would be beneficial to an immediate response in an emergency situation.	**(3)** The Program for Ongoing Engagement with Traditional Custodians (Appendix I) includes commitments to social investment to support Indigenous Ranger programs, and support for Indigenous oil spill response capabilities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside Response: Woodside has requested BTAC send its ranger program proposal for consideration. Woodside has requested BTAC provide a proposal for a ranger program for Woodside's consideration.	
Woodside has addressed objections and claims, as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with BTAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to BTAC on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of BTAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to BTAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to BTAC in September 2025.
  - A revised Consultation Information Sheet previously provided to BTAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with BTAC on 30 September 2024 and requested BTAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to BTAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified BTAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on BTAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with BTAC members as well as the BTAC Board.
  - Asked BTAC to advise how it would like Woodside to engage and whether BTAC required further information.
- Woodside offered to meet with BTAC on a number of occasions, with Woodside meeting with BTAC to discuss matters unrelated directly to the proposed activity but which resulted in conversations about ranger programs and Sea Country mapping, which have been included in this EP.
- Throughout the consultation period, Woodside and BTAC have exchanged multiple emails, had phone calls and meetings and have otherwise had direct contact lines to each other during the period.
- Woodside invites BTAC to Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- BTAC advised Woodside that it has a cultural obligation to care for the environmental values of Sea Country which include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands.
- Woodside has assessed BTAC's cultural obligation to care for environmental values of Sea Country to represent potential cultural values, and recorded these interests and potential cultural values in Section 4.9.1: Cultural values and heritage, and assessed potential impact on these, including controls, are outlined in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- During the past 13 months, BTAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.2 Gogolanyngor Aboriginal Corporation (GAC)

GAC is established under the *Native Title Act 1993* by the Jabirr Jabirr/Ngumbarl and Bindunbur people to represent the Jabirr Jabirr/Ngumbarl and Bindunbur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed GAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Please see Ngujima-Yin Floating Production Storage and Offloading Facility Operations EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed GAC advising of the proposed activity (Record of Consultation, reference 6.1.33), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that GAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how GAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with GAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for GAC to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Woodside emailed GAC a reminder about the proposed activity (SI Report, reference 22.1). The email included:
  - A reference to the original consultation email for this EP sent to GAC on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how GAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with GAC to understand how it would like information to be managed.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for GAC to provide information about the proposed activity to other individuals, as required.

Ongoing engagement:

- On 3 April 2025, Woodside met with GAC to discuss EPs not related to this activity (SI Report, reference 22.2) matters discussed relevant to this EP included:
  - **(1)** Possibility of activities causing vibrations in the water. **(1)** Woodside explained the seismic testing process (not being used for this activity) and what measures are in place to mitigate the impact on marine animals.
  - **(2)** GAC stated that funding for ranger programs was difficult to access. **(2)** Woodside provided information about ranger funding.
- **(2)** On 7 May 2025, Woodside visited GAC's office and provided an update on a ranger funding proposal (SI Report, reference 22.3)
- **(2)** On 20 May 2025, Woodside called GAC and provided information about ranger funding available from a Commonwealth government agency (SI Report, reference 22.4).
- On 3 October 2025, Woodside emailed GAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.2). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to GAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with GAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for GAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	**(1)**	**(1)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

GAC enquired about the possibility of activities causing vibrations in the water.	**Woodside assessment:** There is no seismic testing in this EP. Support vessels may generate some noise. **Woodside response:** During a meeting on 3 April 2025, Woodside explained what measures are in place to mitigate the impact of noise on marine animals.	While this EP does not include seismic activity, risk and mitigation measures for all relevant sound sources are in Section 6.6 of the EP.
(2) GAC stated that funding for ranger programs was difficult to access.	**(2)** **Woodside assessment:** Woodside sees the value of groups having ranger programs. **Woodside response:** Woodside is in the process of developing a ranger funding program. GAC's request will be evaluated in accordance with the program's criteria upon its implementation. Woodside has provided ranger information to GAC.	**(2)** No action required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Summary Report: Consultation Complete		
Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with GAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information** Sufficient information has been provided because: • On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website. • Woodside provided information to GAC on 30 September 2024 when consultation commenced. Woodside provided:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of GAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to GAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to GAC in September 2025.
  - A revised Consultation Information Sheet previously provided to GAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with GAC on 30 September 2024 and requested GAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to GAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified GAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on GAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with GAC members as well as the GAC Board.
  - Asked GAC to advise how it would like Woodside to engage and whether GAC required further information.
- Woodside offered to meet with GAC on a number of occasions.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, GAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.3 Karajarri Traditional Lands Association (KTLA) (Aboriginal Corporation)

KTLA is established under the *Native Title Act 1993* by the Karajarri people to represent the Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed KTLA Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed KTLA advising of the proposed activity (Record of Consultation, reference 6.1.34), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that KTLA and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how KTLA would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KTLA to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for KTLA to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Woodside emailed KTLA a reminder about the proposed activity (SI Report, reference 23.1). The email included:
  - A reference to the original consultation email for this EP sent to KTLA on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A request for information on how KTLA would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KTLA to understand how it would like information to be managed.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for KTLA to provide information about the proposed activity to other individuals, as required.

- On 3 October 2025, Woodside emailed KTLA an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.3). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to KTLA in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KTLA to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for KTLA to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with KTLA for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to KTLA on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of KTLA's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to KTLA on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to KTLA in September 2025.
  - A revised Consultation Information Sheet previously provided to KTLA, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with KTLA on 30 September 2024 and requested KTLA provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to KTLA for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified KTLA of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on KTLA's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
- Offered for Woodside to speak with KTLA members as well as the KTLA Board.
- Asked KTLA to advise how it would like Woodside to engage and whether KTLA required further information.

- Woodside offered to meet with KTLA on a number of occasions.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, KTLA has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.4 Kariyarra Aboriginal Corporation (KAC)

KAC is established under the *Native Title Act 1993* by Kariyarra people to represent the Kariyarra people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed KAC Woodside's Program of Ongoing Engagement with Traditional Custodians.
- On 4 September 2024, Woodside met with KAC to present information about other EPs. KAC requested:
  - Mitigation measures to be put in place for:
    - **(1)** Sea turtle nesting.
    - **(1)** Impacts to food sources.
    - **(1)** Impacts to whale migration as Elders have a connection to whale migration through Songlines.

  Woodside noted and responded at this meeting that:

  - **(1)** Similar concerns had been raised in relation to sea turtle nesting, whale migration and food source by other relevant Traditional Owner groups in the Pilbara and subsequently mitigation and avoidance measures had been included in subsequent EPs including this EP.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed KAC advising of the proposed activity (Record of Consultation, reference 6.1.34), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that KAC and its members may have within the EMBA.
  - Details of KAC's cultural values previously provided by KAC to Woodside during consultation for other activities that may be relevant to the proposed activity. These cultural values include:
    - **(1)** KAC's access Sea Country rights and duties, including:
      - looking after and protecting Sea Country
      - fishing, trapping, crabbing, catching turtle and collecting shellfish
      - hunting dugong and taking stingray barbs for spears
      - the protection of Sea Country and totems such as mythic snakes.
    - **(2)** The potential impacts on coastal landforms and coastal native vegetation.
    - **(3)** The tangible and intangible heritage associated with the coast and the ocean.
  - **(1, 2, 3)** A request for KAC to confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for the EP.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how KAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for KAC to provide information about the proposed activity to other individuals, as required.
  - Acknowledgement that discussions relating to Woodside's consultation framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 3 October 2024, Woodside emailed KAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed KAC a reminder about the proposed activity (SI Report, reference 24.1). The email included:
  - A reference to the original consultation email for this EP sent to KAC on 27 September 2024, which included Summary and Consultation Information Sheets and listed cultural values previously provided by KAC to Woodside.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how KAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KAC to understand how it would like information to be managed.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for KAC to provide information about the proposed activity to other individuals, as required.

Ongoing engagement:

- On 1 April 2025, Woodside telephoned KAC (SI Report, reference 24.2). During the discussion both parties tentatively agreed to meet on 30 April 2025 to discuss two EPs unrelated to this activity. Woodside acknowledged the importance of maintaining ongoing relationships with relevant PBCs to ensure Woodside remains aware of the cultural interests and values for each group.
- On 30 April 2025, Woodside met KAC in Port Hedland about unrelated EPs (SI Report, reference 24.3). Matters discussed relating to this EP included:
  - Woodside explained EPs, consultation processes and EMBAs.
  - Woodside presented cultural values that KAC had previously provided.
  - **(4)** KAC sought clarity of impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event. **(4)** Woodside answered questions about these issues during the meeting and offered to provide information in a written response.
  - **(5)** KAC queried the role of Traditional Owners in the event of a spill. **(5)** Woodside provided an overview on its emergency response process and how it was working with the Government to implement additional training opportunities for ranger groups.
  - **(6)** KAC queried which shipping channels are used as they wanted to understand the risks associated with ships travelling close to their determination. **(6)** Woodside took the question on notice.
  - **(7)** KAC expressed a desire to enter into a consultation agreement. **(7)** Woodside accepted this as an ongoing action noting that these discussions would not delay EP submission deadlines.
  - **(8)** Islands off the coast of Port Hedland are extremely important to KAC (Little Turtle, North Turtle and Bedout). **(8)** Woodside noted this feedback for EPs not related to this activity.
  - **(9)** KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes. **(9)** Woodside explained that since these historic incidents, governments have set up regulatory bodies including NOPSEMA to regulate industry.
- On 5 May 2025, Woodside emailed KAC to confirm matters discussed during the 30 April 2025 meeting (SI Report, reference 24.4) this included:
  - **(7)** KAC's desire to enter into a consultation agreement. **(7)** Woodside notes this as an ongoing action noting that these discussions occur in parallel to EP consultation.
  - **(4)** KAC sought clarity of impacts to the health of food sources and other marine life that could threaten sea life.
  - **(6)** KAC queried which shipping channels are used as it wanted to understand the risks associated with ships travelling closely to its determination.
  - **(5)** KAC queried contact points in the event of a spill.
  - **(9)** KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Between 20 and 27 May 2025, Woodside and KAC exchanged emails and met online to follow-up on matters raised during the 30 April 2025 meeting (SI Report, references 24.5 – 24.8).
- On 28 May 2025, Woodside and KAC spoke on the phone (SI Report, reference 24.9). Matters relevant to this EP included:
  - **(7)** KAC's desire to enter into a consultation agreement. KAC requested Woodside resend the most recent consultation agreement draft for KAC to consider and respond. **(7)** Woodside noted this as an ongoing action and confirmed that these discussions occur in parallel to EP consultation.
  - Woodside offered to host a consultation 'learning' workshop to help build an understanding of the EP consultation process.
  - Woodside noted a commitment to provide a formal response to KAC.
- On 3 June 2025, Woodside emailed KAC responses to questions raised during their meeting on 30 April 2025 (SI Report, reference 24.10). Responses included:
  - **(7)** Woodside noted that it had provided KAC with a draft consultation agreement in February 2024 and that discussions about this agreement had occurred in parallel to consultation.
  - **(4)** Woodside acknowledged KAC's connection to Sea Country and provided details about risks and mitigation measures in EPs unrelated to this activity that related to the ecological integrity of marine fauna.
  - **(5)** Woodside provided information about contact procedures in the highly unlikely event of a spill.
  - **(6)** Woodside provided information about shipping channels and that ships were sometimes required to travel from Dampier to the operational area of EPs being discussed and not related to this EP.
  - **(8)** Woodside acknowledged that islands off Port Hedland are culturally important to KAC - Little Turtle, North Turtle and Bedout. This information would be recorded in EPs.
  - **(9)** Woodside provided information about two historic incidents not related to Woodside that had been raised by KAC in the 30 April 2025 meeting. Woodside explained the role of NOPSEMA and that it took a robust and systematic approach to the environmental management of petroleum activities.
- On 21 August 2025, Woodside met with KAC in Port Hedland to consult on EPs not related to this activity (SI Report, reference 24.11). During the meeting, issues raised that are related to this EP included:
  - **(10)** KAC queried how Woodside had collated its list of KAC's cultural values. **(10)** Woodside stated it had sourced KAC's cultural values via consultation and feedback from KAC when consulting on other EPs, and desktop research using publicly available literature.
  - **(1)** KAC provided addition information on marine species identified as cultural values which include: shellfish, cockles, oysters, clam shells, con shells, mullets and sea cow (dugong), as well as the importance of **(11)** river systems as food chains **(1, 11)** Woodside acknowledged this new information and would update it records and current and future EPs accordingly.
  - **(12)** KAC asked if Woodside considered historical mapping of cultural values and prehistoric coastlines when understanding the closeness of the activity to KAC's Native Title determination. **(12)** Woodside stated that underwater archaeologists are often engaged to assess underwater marine life when undertaking its activities.
- **(10, 1, 11)** On 17 September 2025, Woodside emailed KAC updated information about its record of Cultural Values and responses to questions taken on notice during their 21 August 2025 meeting (SI Report B, reference 24.12) This included an answer to a query about consideration of cyclone events in spill modelling. Woodside provided information about how modelling captures large-scale ocean changes caused by cyclones.
- On 3 October 2025, Woodside emailed KAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.4). The email outlined:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– A reference to the original consultation information for this EP and the other activity sent to KAC in September 2024. – That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date. – That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated. – An update on the proposed activity's scope of work. – An updated Consultation Information sheet is available on Woodside's website. – A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP. – Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KAC to understand how it would like information to be managed. – Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. – A request for KAC to provide information about the proposed activity to others as required.		
Summary of Feedback, Objection or Claim	**Assessment of Merits of Feedback, Objection or Claim and Woodside's Response**	**Inclusion in Environment Plan**
(1) KAC has previously advised Woodside it has Sea Country rights and duties, including to look after and protect Sea Country and secret habitat totems. KAC has mentioned fishing, trapping, crabbing, catching turtle, hunting dugong, and using stingray barbs for spears and collecting shellfish, sea turtle nesting, impacts to food sources, and impacts to whale migration as Elders have a connection to whale migration through Songlines. Cultural Value: Marine Animals • Management of sea turtle nesting. • Impacts to whale migration (whales are connected to Songlines). Additional species identified during consultation for an unrelated EP:	**(1)** **Woodside assessment**: Woodside acknowledges KAC's feedback about Sea Country including rights and duties, marine species and impact on Songlines. Woodside also acknowledges new cultural values value identified at a meeting with KAC on 21 August 2025 about an unrelated EP. **Woodside response:** Woodside has noted KAC's cultural values and interests in Sea Country in Section 4.9. Woodside understands cultural and environmental values are intrinsically linked; in addition to the specific controls for cultural features and heritage values, the controls and performance standards in Section 6 will reduce impacts to cultural features and heritage values, including marine species and habitats. During consultation for an unrelated EP, KAC identified additional marine species. Woodside has updated its records and the EP to reflect this feedback.	**(1)** Woodside acknowledges KAC's cultural connection to Sea Country and Songlines in 4.9.1 Cultural Values and Heritage). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria. Woodside has updated Section 4.9 to record these new interests and cultural values. Whale migration and turtle nesting has been included in Section 4.9 of the EP. Controls have been adopted where appropriate in Sections 6 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• Shellfish • Cockles • Oysters • clam shells, • con shells • mullet • sea cow (dugong).		
(2) KAC has previously requested Woodside include measures to avoid impacts to coastal landforms and coastal native vegetation.	**(2)** **Woodside assessment:** Assessment of the impacts and risks associated with the Petroleum Activity is undertaken in accordance with and consistent with national and international standards and law and policies. **Woodside response:** Woodside has implemented controls to reduce potential risks and impacts on the environment to ALARP and to an acceptable level.	**(2)** Woodside acknowledges KAC's asserted connection to Sea Country (Section 4.9.1 Cultural Values and Heritage). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(3) KAC's legal representative has previously requested Woodside include measures to avoid impacts to tangible and intangible Aboriginal cultural heritage associated with the coast and the ocean.	**(3)** **Woodside assessment:** Woodside seeks to avoid damage or disturbance to cultural heritage (including intangible heritage) and assesses cultural heritage impacts, including both direct and indirect impacts and risks associated with Petroleum Activitys. Mitigation can include any measure or control aimed at supporting the viability of the intangible cultural heritage and its intergenerational transmission. **Woodside response:** Woodside understands cultural and environmental values are intrinsically linked; in addition to the specific controls for cultural features and heritage values, the controls and performance standards in Section 6 will reduce impacts to cultural features and heritage values, including marine species and habitats.	**(3)** Woodside acknowledges KAC's asserted connection to Sea Country (Section 4.9.1 Cultural Values and Heritage). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(4)	**(4)**	**(4)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

KAC sought clarity of impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event.	**Woodside assessment:** Woodside acknowledges KAC's connection to Sea Country. Woodside has identified potential impacts and risks to the ecological integrity of marine fauna and put in place mitigation measures. **Woodside response:** Woodside provided a written response to KAC explaining risks to marine life. Woodside has categorised these risks as highly unlikely events. Woodside has explained that clean up and remediation response activities would commence from the outset of an incident in line with Woodside's Oil Pollution First Strike Plan.	KAC's connection to Sea Country is identified in Section 4.9 of the EP. Risks and mitigation measures relating to marine life are details in Section 6. Measures relating to oil spills are covered in Appendix H – Oil Spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(5) KAC queried the role of Traditional Owners in the event of a spill.	**(5)** **Woodside assessment:** In the highly unlikely event of a spill, Woodside would enact its Oil Pollution First Strike Plan, which includes contacting the regulator, NOPSEMA and any relevant cultural authorities that may be affected. **Woodside response:** Woodside provided KAC with details of its Oil Pollution First Strike Plan and contact procedures.	**(5)** Measures relating to oil spills are covered in Appendix H – Oil spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(6) KAC queried which shipping channels are used as they wanted to understand the risks associated with ships travelling closely to their determination.	**(6)** **Woodside assessment:** Ships are sometimes required to travel from the mainland (Dampier) to operational areas that may be unrelated to this activity. **Woodside response:** Woodside informed KAC about the distance from KAC's Native Title claim determination to the operational area of another activity (for which this feedback was initially raised). Woodside also provided KAC with details about regulations governing vessel transport. Woodside has also provided details about its Oil Pollution First Strike Plan.	**(8)** Measures relating to vessels are in Section 3.5 of the EP. Measures relating to oil spills are covered in Appendix H – Oil spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(7) KAC expressed a desire to enter into a consultation agreement.	**(7)** **Woodside assessment:** Woodside provided KAC with a draft consultation agreement in February 2024.	**(7)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside notes that while discussions about this agreement are ongoing, a consultation agreement is not a prerequisite for consultation, and consultation for EPs occurs in parallel to consultation agreement discussions.	
(8) Islands off the coast of Port Hedland are extremely important to KAC (Little Turtle, North Turtle and Bedout).	**(8)** **Woodside assessment:** Woodside acknowledges that islands off Port Hedland have cultural value to KAC. **Woodside response:** Woodside has updated its records to reflect this and will include this information in Appendix F and Section 4.9.	**(8)** This information has been captured in Appendix F and Section 4.9 of the EP.
(9) KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes.	**(9)** **Woodside assessment:** Woodside takes an increasingly robust and systematic approach to environmental management of petroleum activities. **Woodside response:** Woodside explained that since these historic incidents, governments have set up regulatory bodies including NOPSEMA to oversee industry. In the unlikely event of a spill, Woodside would enact its Oil Pollution First Strike Plan which would include contacting NOPSEMA and any affected cultural authorities. Woodside has oil pollution emergency plans and implements training and capability building programs in the regions where it operates.	**(9)** Measures relating to oil spills are covered in Appendix H – Oil spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(10) KAC queried where Woodside had collated its list of KAC's cultural values.	**(10)** **Woodside assessment:** At the start of consultation for EPs, Woodside provides KAC with information about the Cultural Values it had collated for the group through consultation and publicly available literature. **Woodside response:** Woodside explained to KAC that it had sourced KAC's cultural values via consultation and feedback from KAC when consulting on other EPs and desktop research.	**(10)** No further action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(11) River systems are important to the food chain.	**(11)** **Feedback assessment:** While river systems are not relevant for this EP**,** Woodside assesses environmental impacts of its EPs and puts in place appropriate mitigation measures. **Feedback response:** Woodside has informed KAC that it will update it records and current and future EPs accordingly.	**(11)** River systems are not relevant for this EP. Cultural values relating to river systems are in 4.9.
(12) KAC asked if Woodside considered historical mapping of cultural values and prehistoric coastlines when understanding the closeness of the activity to KAC's Native Title determination.	**(12)** **Feedback assessment:** Woodside engages a consultant to undertake underwater cultural heritage assessment when developing EPs with seabed contact activities. **Feedback response:** Woodside informed KAC that an maritime archaeologist is engaged to assess the potential for underwater cultural heritage when undertaking its activities.	**(12)** No further action required.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report: Consultation Complete		
Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with KAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information** Sufficient information has been provided because: • On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website. • Woodside provided information to KAC on 27 September 2024 when consultation commenced. Woodside provided:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of KAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to KAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to KAC in September 2025.
  - A revised Consultation Information Sheet previously provided to KAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with KAC on 27 September 2024 and requested KAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to KAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified KAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on KAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with KAC members as well as the KAC Board.
  - Asked KAC to advise how it would like Woodside to engage and whether KAC required further information.
- Woodside offered to meet with KAC on a number of occasions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside invites KAC to Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- KAC has previously advised Woodside that:
  - It has Sea Country rights and duties, including:
    - looking after and protecting Sea Country
    - fishing, trapping and crabbing
    - catching turtle
    - hunting dugong
    - using stingray barbs for spears and
    - collecting shellfish.
  - Impacts to whale migration as Elders have a connection to whale migration through Songlines.
  - The protection of Sea Country and totems such as mythic snakes.
  - There are potential impacts on coastal landforms and coastal native vegetation.
  - There is tangible and intangible heritage associated with the coast and the ocean.
  - Woodside has recorded KAC's interests and cultural values in the proposed EP in the following sections:
    - Section 4.9.1: Cultural values and heritage records impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event; and the cultural significance of islands off the coast of Port Hedland (Little Turtle, North Turtle and Bedout).
    - Potential impacts on Cultural Features and Heritage Values (this includes cultural features and heritage values, marine species and habitats) in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- During the past 13 months, KAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.5 Murujuga Aboriginal Corporation (MAC)

MAC is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi, and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 26 July 2023, Woodside emailed MAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed MAC advising of the proposed activity (Record of Consultation, reference 6.1.36), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information, and contact details.
  - A request for information on the interests that MAC and its members may have within the EMBA.
  - Details of cultural values previously provided by MAC to Woodside during consultation for other activities that may be relevant to the proposed activity. These cultural values include:
    - **(1)** There is a potential impact on Jinna (Songlines).
    - **(2)** That any development could potentially affect the natural movement, migration and/or other behaviour of marine species, and may have an impact on the cultural interpretation of the seasonal landscape, seascape and associated cultural behaviours.
  - **(1, 2)** A request from Woodside that MAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation of this EP.
  - A request for feedback by 30 October 2024 for the purposes of preparation of the EP.
  - A request for information on how MAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with MAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for MAC to provide information about the proposed activity to other individuals, as required.
- On 3 October 2024, Woodside emailed MAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed MAC a reminder about the proposed activity (SI Report, reference 25.1). The email included:
  - A reference to the original consultation email for this EP sent to MAC on 30 September 2024, which included Summary and Consultation Information Sheets and listed cultural values previously provided by MAC to Woodside.
  - A reminder that consultation for the preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how MAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with MAC to understand how it would like information to be managed.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for MAC to provide information about the proposed activity to other individuals, as required.
- On 23 October 2024, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.3).

Ongoing engagement:

- On 21 November 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with MAC and has minimised contact as a sign of respect (SI Report, reference 25.2).
- On 4 March 2025, Woodside emailed MAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 46.5).
- On 5 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.6).
- On 24 March 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 46.8).
- On 26 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 46.9).
- On 7 April 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 46.10).
- On 8 April 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.11).
- On 22 August 2025, MAC emailed Woodside about an unrelated EP (SI Report, reference 25.3). MAC asked for clarification about Woodside's process for compiling records about Cultural Values and provided this feedback:
  - **(3)** Additional culturally valued species: stingrays, sharks, crustaceans, octopus, sea stars, sea urchins, sponges and molluscs. **(4)** Any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities.
  - **(5)** Submerged landscape: potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.
  - **(6)** Feedback that fish traps are not limited to Conzinc, Angel and Gidley as significant.
  - **(7)** Feedback that harvesting squid at Conzinc Bay is one of many subsistence activities that have been and continue to be practiced across the archipelago.
- On 22 August 2025, MAC emailed Woodside a letter about an unrelated EP (SI Report, reference 25.4). Matters relevant to this email included:
  - **(6)** MAC's view that the protection of environmental values should be assessed separately to protection of cultural values.
  - **(4)** Activities that could potentially affect the natural movement, migration and/or other behaviour of marine species (including sea birds) may have an impact on the cultural interpretation of the seasonal landscape and seascape and associated cultural behaviours.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 28 August 2025, Woodside responded by email to MAC's feedback about Cultural Values (SI Report, reference 25.6). Woodside:
  - **(3,4,5,6,7)** Provided MAC with an expanded Cultural Values table (Appendix A) which included sources of information and additional detail.
  - **(3,4,5,6,7)** Explained how Woodside sources information about Cultural Values for EPs.
  - **(3,4,5,6,7)** Invited MAC to review the Cultural Values table and provide further feedback if necessary.
- On 3 October 2025, Woodside emailed MAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.5). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to MAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with MAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for MAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) MAC have previously raised concerns lack of broader-scale bathymetric information on the submerged landscape and the potential for impact on Jinna (Songlines).	**(1)** **Woodside assessment:** Woodside acknowledges MAC's position that there is a lack of bathymetric information, which may have a potential impact on Jinna (Songlines). **Woodside response:** Woodside is working with MAC to develop a scope of works to determine further bathymetric information on the area. This proposal is under consideration by MAC and Woodside remains supportive of undertaking this work. Woodside also remains supportive of conducting further ethnographic surveys with MAC, following the initial phase of works	**(1)** Cultural features and heritage values including Jinna (Songlines) are identified and assessed in Sections Section 4.9.1: Cultural values and heritage, and Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	in 2020 which focussed on Jinna and their connection from Murujuga to inland areas.	
(2) MAC stated that any development could potentially affect the natural movement, migration and/or other behaviour of marine species, and may have an impact on the cultural interpretation of the seasonal landscape, seascape and associated cultural behaviours.	**(2)** **Woodside assessment**: Woodside considers the potential cultural impacts on marine species including impacts and associated controls for marine mammal paths and behaviour. **Woodside response**: Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research some of which are set out on Woodside's website. Woodside also committed to ongoing consultation with MAC in relation to environmental impacts including to marine life.	**(2)** Woodside has assessed impacts and risks to marine species in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(3) MAC has previously advised on the following Cultural Values: Marine species: • Whales, totemic importance. • Dolphins, cultural ceremonies. • Dugongs, food source. • Fish, cultural ceremonies. • Sea Snakes, culturally important. • Turtles, Songlines • Coral, attract fish and other species • Seagrass, provide protection for animals. Locations include Conzinc Bay, and between Angel and Gidley Islands. On 22 August 2025, MAC further advised Woodside that these species also had cultural value: • Stingrays • Sharks	**(3)** **Woodside assessment**: This value has been identified via previous consultation with MAC. **Woodside response**: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided further information about its cultural values. Woodside has amended its records and informed MAC that it would reflect these changes in current and future EPs.	**(3)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• Crustaceans • Octopus • Sea star • Sea urchins • Sponges • Molluscs		
(4) Any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities	**(4)** **Woodside assessment**: Woodside acknowledges this feedback and has updated its Cultural Values records for MAC. Woodside has also included this information in the EP. **Woodside response**: Woodside has provided MAC with details of Woodside's updated Cultural Values records.	**(4)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.
(5) Cultural Value: Submerged landscape: potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.	**(5)** **Woodside assessment**: Woodside acknowledges this feedback from AC and has updated its Cultural Values records for MAC. Woodside has also included this information in the EP. **Woodside response**: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	**(5)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.
(6) Cultural Value: Feedback that fish traps are not limited to Conzinc, Angel and Gidley as significant.	**(6)** **Woodside assessment**: Woodside acknowledges this feedback from AC and has updated its Cultural Values	**(6)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential

	records for MAC. Woodside has also included this information in the EP. **Woodside response**: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	impacts on these and where appropriate included controls, in Sections 6.
(7) Cultural Value: Feedback that harvesting squid at Conzinc Bay is one of many subsistence activities that have been and continue to be practiced across the archipelago.	**(7)** **Woodside assessment**: Woodside acknowledges this feedback from AC and has updated its Cultural Values records for MAC. Woodside has also included this information in the EP. **Woodside response**: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	**(7)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	Based on the engagement to date, no additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with MAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to MAC on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of MAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to MAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to MAC in September 2025.
  - A revised Consultation Information Sheet previously provided to MAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with MAC on 30 September 2024 and requested MAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to MAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified MAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on MAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with MAC members as well as the MAC Board.
  - Asked MAC to advise how it would like Woodside to engage and whether MAC required further information.
- Woodside offered to meet with MAC on a number of occasions.
- Throughout the consultation period, Woodside and MAC have exchanged multiple emails, had phone calls and meetings and have otherwise had direct contact lines to each other during the period.
- Woodside invites MAC to Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- MAC advised Woodside that:
  - The lack of broader-scale bathymetric information on the submerged landscape and the potential for impact on Jinna (Songlines). Woodside has assessed cultural features and heritage impacts and risks in Cultural features and heritage values including Jinna (Songlines) are identified and assessed in Sections Section 4.9.1: Cultural values and heritage, and Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
  - Any activities that could potentially affect the natural movement or behaviour of marine species may impact cultural values. Woodside has assessed impacts and risks to marine species in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- During the past 13 months, MAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.6 Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC)

NTGAC is established under the *Native Title Act 1993* by the Baiyungu people to represent the Baiyungu people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** On 15 August 2023, Woodside attended a meeting with the NTGAC Board and YMAC representatives. Matters discussed relevant to this EP include that NTGAC expressed interest in whales and whale sharks. **(1)** Woodside noted NTGAC's interest in whales and whale sharks.
- On 26 July 2023, Woodside emailed NTGAC via YMAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*, noting that Woodside's Program would complement what is proposed in NTGAC's proposed Framework.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) and Angel Facility Operations EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed NTGAC (via YMAC) advising of the proposed activity (Record of Consultation, reference 6.1.37), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that NTGAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how NTGAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NTGAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NTGAC to provide information about the proposed activity to other individuals, as required.
  - Acknowledgement that discussions relating to Woodside's consultation framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 3 October 2024, Woodside emailed NTGAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed NTGAC a reminder about the proposed activity (SI Report, reference 26.1). The email included:
  - A reference to the original consultation email for this EP sent to NTGAC on 27 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purpose of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how NTGAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NTGAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A request for NTGAC to provide information about the proposed activity to other individuals, as required.

- On 2 November 2024, a member from Woodside's First Nations team spoke with relevant persons and Elders from NTGAC at the Dampier Beachside Markets (SI Report, reference 26.2). The conversations included:
  - Information about Woodside's activities and related EPs including the proposed activity.
  - An offer to further consult and meet face to face with NTGAC and its Elders.
  - Reference to printed Summary Information Sheets for a number of Woodside activities, including the activities related to this EP.
  - Elders noted they had no feedback, objections or claims relating to the proposed activity, and were comfortable with the information being sent via NTGAC. Woodside notes and respects the feedback from Elders.
  - NTGAC noted that upcoming AGMs, Sorry Business and Lore will impact its availability to consult over the next few months.
- On 3 October 2025, Woodside emailed NTGAC (via YMAC) an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.6). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to NTGAC (via YMAC) in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NTGAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NTGAC (via YMAC) to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) NTGAC have expressed a general interest in whales and whale sharks.	**(1)** **Woodside assessment:** When developing EPs, Woodside considers potential cultural impacts on marine species including impacts and associated controls with whales and whale sharks.	**(1)** Woodside has assessed impacts and risks to marine species in Section 6 of the EP. Items relating to NTGAC appear in section 4.9.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside recognises that whales and other species of totemic importance need to be protected, including their populations and migration patterns. As assessed in Section 6, Woodside considers that when the impacts and risks to marine species, including potential totemic species, have been reduced to ALARP and an acceptable level in offshore areas, the potential impacts and risks to cultural values associated with coastal Indigenous connection with, or traditional uses of marine species and associated ecosystems in nearshore coastal waters are also reduced to ALARP and an acceptable level.	
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with NTGAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NTGAC (via YMAC) on 27 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NTGAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside provided updated information to NTGAC (via YMAC) on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to NTGAC (via YMAC) in September 2025.
  - A revised Consultation Information Sheet previously provided to NTGAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with NTGAC on 27 September 2024 and requested NTGAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to NTGAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified NTGAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on NTGAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NTGAC members as well as the NTGAC Board.
  - Asked NTGAC to advise how it would like Woodside to engage and whether NAC required further information.
- Woodside offered to meet with NTGAC on a number of occasions.
- Throughout the consultation period, Woodside and NTGAC have exchanged multiple emails, had phone calls and meetings and have otherwise had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- NTGAC has expressed an interest in Whales and Whale sharks. Woodside has assessed impacts and risks to marine species in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria of the EP. Cultural values relating to NTGAC appear in Sections Section 4.9: Cultural values and heritage.
- During the past 13 months, NTGAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.7 Ngarluma Aboriginal Corporation (NAC)

NAC is established under the *Native Title Act 1993* by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed NAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed NAC advising of the proposed activity (Record of Consultation, reference 6.1.38), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information, and contact details.
  - A request for information on the interests that NAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how NAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NAC to provide information about the proposed activity to other individuals, as required.
  - Acknowledgment that discussions relating to Woodside's consultation framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 3 October 2024, Woodside emailed NAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 10 October 2024, NAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne where Woodside presented to Traditional Owners (SI Report, reference 46.2). At the conclusion of the meeting, Traditional Owners confirmed and were satisfied that they had been consulted about the proposed activity. Matters relevant to this EP included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Consultation outcomes for Woodside EPs.
  - An explanation of State and Commonwealth regulatory requirements.
  - Discussion on EMBAs including for this EP.
  - The process Woodside undertakes to identify Traditional Owners groups.
  - How Traditional Owners can provide information to Woodside about cultural values, interests and activities.
  - If there are any other First Nations groups who should be consulted.
  - Distribution of Summary Information Sheets for current EPs including this EP.
- On 14 October 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with NAC and has minimised contact as a sign of respect (SI Report, reference 27.1).On 21 October 2024, Woodside emailed NAC a reminder about the proposed activity (SI Report, reference 27.2). The email included:
  - A reference to the original consultation email for this EP sent to NAC on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how NAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NAC to provide information about the proposed activity to other individuals, as required.
- On 23 October 2024, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.3).
- On 15 November 2024, Woodside emailed NAC to invite it to Woodside's Quarterly Heritage Meeting on 5 December 2024, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community. Woodside also requested a list attendees and attendance fees (SI Report, reference 27.3).

Ongoing engagement:

- On 21 November 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with NAC and has minimised contact as a sign of respect (SI Report, reference 27.4).
- On 5 December 2024, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 46.4). Relevant matters discussed included:
  - An overview of upcoming EPs.
  - An explanation about ongoing consultation and a reminder that Woodside accepts feedback for life of EP.
  - Reminder about monthly community luncheons.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 December 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with NAC and has minimised contact as a sign of respect (SI Report, reference 27.5).
- On 22 January 2025, Woodside emailed NAC information about Quarterly Heritage meetings scheduled for 2025 (SI Report, reference 27.6).
- On 4 March 2025, Woodside emailed NAC a reminder about the Quarterly Heritage Meeting scheduled for 13 March 2025 (SI Report, reference 27.7).
- On 4 March 2025, Woodside emailed NAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 46.5).
- On 5 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.6).
- On 13 March 2025, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 46.7). Matters discussed and/or raised relating to this EP included:
  - That consultation is open for the life of any EP and Woodside can schedule consultation meetings at times that are convenient to the community.
  - A reminder that Woodside hosts a community luncheon/yarning circle for local Traditional Owners.
- On 24 March 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 46.8).
- On 26 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 46.9).
- On 7 April 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 46.10).
- On 8 April 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.11).
- On 15 May 2025, Woodside emailed NAC an invitation to Woodside's Quarterly Heritage Meeting on 4 June 2025, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community (SI Report, reference 27.8).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 46.12). Matters discussed relevant to this EP included:
  - Woodside provided an overview the consultation process with relevant First Nations persons.
- On 5 June 2025, Woodside emailed NAC confirming the attendance of two NAC representatives at the Quarterly Heritage Meeting held the previous day (SI Report, reference 27.9).
- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 46.13). Matters discussed relating to this EP included:
  - Cultural heritage update.
  - Training and contracting opportunities.
  - Project updates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2025, Woodside emailed NAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.7). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to NAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with NAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NAC on 27 September 2024 when consultation commenced. Woodside provided:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to NAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to NAC in September 2025.
  - A revised Consultation Information Sheet previously provided to NAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with NAC on 27 September 2024 and requested NAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to NAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified NAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on NAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NAC members as well as the NAC Board.
  - Asked NAC to advise how it would like Woodside to engage and whether NAC required further information.
- Woodside offered to meet with NAC on a number of occasions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Throughout the consultation period, Woodside and NAC have exchanged multiple emails, had phone calls and meetings and have otherwise had direct contact lines to each other during the period.
- Woodside invites NAC to Quarterly Heritage Meetings and Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, NAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.8 Nimanburr Aboriginal Corporation (Nimanburr)

Nimanburr is established under the *Native Title Act 1993* by the Nimanburr people to represent the Nimanburr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historically there have been a number of challenges in sending and receiving emails between Woodside and Nimanburr, and as a result, Nimanburr have instructed Woodside to email consultation information and documents via the Broome Turf Club.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed the Broome Turf Club, requesting it print the EP documents for the proposed activity including the Summary and Consultation Information Sheets, which would also be emailed to Nimanburr. Woodside confirmed that individuals from Nimanburr would be collecting the printed materials from the club and hand delivering the documents to the Nimanburr community in due course (SI Report, reference 28.1).
- On 30 September 2024, Woodside emailed Nimanburr (via the Broome Turf Club) (see point above) advising of the proposed activity (Record of Consultation, reference 6.1.39), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that Nimanburr and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how Nimanburr would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Nimanburr to understand how it would like information to be managed.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Nimanburr to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Woodside emailed Nimanburr (via the Broome Turf Club) a reminder about the proposed activity (SI Report, reference 28.2). The email included:
  - A reference to the original consultation email for this EP sent to Nimanburr on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how Nimanburr would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Nimanburr to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Nimanburr to provide information about the proposed activity to other individuals, as required.

Ongoing engagement:

- On 3 April 2025, after several telephone calls to Nimanburr with no response, members from Woodside's First Nations Engagement team left a business card at the residence of a member of the Nimanburr community, requesting the individual contact Woodside (SI Report, reference 28.3). Woodside was then approached by a resident of the property who confirmed that Nimanburr had been receiving the previously provided EP information from Woodside. The resident also stated that a Nimanburr Board meeting was being planned for the near future and Nimanburr would be in contact to provide an invite to Woodside to speak to its Board members.
- On 3 April 2025, Nimanburr emailed Woodside thanking it for the opportunity to meet earlier the same day and to discuss future opportunities with Woodside (SI Report, reference 28.4). Nimanburr further stated that it:
  - Would review EP-related information provided by Woodside.
  - Acknowledged Woodside's request to meet with Nimanburr's Directors, confirming that the next meeting is scheduled for May 2025 and requested Woodside to confirm its interest in attending.
  - Would inform Woodside if an ad-hoc meeting would be held in April.
- On 11 April 2025, following a telephone conversation between Woodside and a member of the Nimanburr community on the 10 April 2025, Nimanburr emailed Woodside confirming that Nimanburr had received information relating to the proposed activity and EP (SI Report, reference 28.5 – 28.6).
- On 3 October 2025, Woodside emailed Nimanburr an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.8). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to Nimanburr in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
- An update on the proposed activity's scope of work.
- An updated Consultation Information sheet is available on Woodside's website.
- A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Nimanburr to understand how it would like information to be managed.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for Nimanburr to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Nimanburr for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to Nimanburr on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of Nimanburr's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to Nimanburr on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to Nimanburr in September 2025.
  - A revised Consultation Information Sheet previously provided to Nimanburr, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with Nimanburr on 30 September 2024 and requested Nimanburr provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to Nimanburr for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified Nimanburr of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on Nimanburr's preferred method of consultation, via Broome Turf Club as advised by Nimanburr, and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with Nimanburr members as well as the Nimanburr Board.
  - Asked Nimanburr to advise how it would like Woodside to engage and whether Nimanburr required further information.
- Woodside offered to meet with Nimanburr on a number of occasions.
- Throughout the consultation period, Woodside and Nimanburr have had direct contact lines to each other during the period, with Woodside telephoning Nimanburr on several occasions with no response. Woodside met with a member of the Nimanburr community who confirmed that information about the proposed activity had been exchanged and confirmed that the Summary Information Sheet and Record of Consultation email was received by Nimanburr.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- During the past 13 months, Nimanburr has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.9 Nyangumarta Karajarri Aboriginal Corporation (NKAC)

NKAC is established under the *Native Title Act 1993* by the Nyangumarta and Karajarri people to represent the Nyangumarta and Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. KLC is the Native Title Representative Body for NKAC.

Historical engagement:

- On 26 July 2023, Woodside emailed NKAC (via KLC) Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed NKAC advising of the proposed activity (Record of Consultation, reference 6.1.40), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that NKAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how NKAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NKAC AC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NKAC to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Woodside emailed NKAC (via KLC) a reminder about the proposed activity (SI Report, reference 29.1). The email included:
  - A reference to the original consultation email for this EP sent to NKAC on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A request for information on how NKAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NKAC to understand how it would like information to be managed.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for NKAC to provide information about the proposed activity to other individuals, as required.

- On 21 October 2024, NKAC (via KLC) emailed Woodside, confirming receipt of the reminder email (SI Report, reference 29.2). NKAC's email stated:
  - That there are often significant delays for third parties to receive responses from NKAC due to logistical and other complexities that Aboriginal corporations in the Kimberley face such as accessibility to emails/phones, Lore and cultural practices, compliance and management considerations, and seasonal/weather factors.
  - That Woodside is sending the EP emails via the correct channel of communication, and that information will be forwarded to NKAC's directors.
  - That NKAC will respond if and when it is in a position to do so, and appreciated Woodside's patience and understanding.
- On 3 October 2025, Woodside emailed NKAC (via KLC) an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.9). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to NKAC (via KLC) in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NKAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NKAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with NKAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NKAC on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NKAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to NKAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to NKAC in September 2025.
  - A revised Consultation Information Sheet previously provided to NKAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with NKAC on 30 September 2024 and requested NKAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to NKAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified NKAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on NKAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups, this includes consulting via KLC, which is the Native Title Representative Body for NKAC.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NKAC members as well as the NKAC Board.
  - Asked NKAC to advise how it would like Woodside to engage and whether NAC required further information.
- Woodside offered to meet with NKAC on a number of occasions.
- Throughout the consultation period, Woodside and NKAC have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, NKAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.10 Nyangumarta Warrarn Aboriginal Corporation (NWAC)

NWAC is established under the *Native Title Act 1993* by the Nyangumarta people to represent the Nyangumarta people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed NWAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed NWAC advising of the proposed activity (Record of Consultation, reference 6.1.41), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that NWAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how NWAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NWAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NWAC to provide information about the proposed activity to other individuals, as required.
  - Acknowledgement that discussions relating to Woodside's consultation framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 3 October 2024, Woodside emailed NWAC the proposed activity's Summary and Consultation Information Sheets, and confirmed that Woodside is open to paying reasonable consultation costs, and for NWAC to send a cost estimation quote to Woodside (SI Report, reference 30.1).
- On 18 October 2024, NWAC emailed Woodside confirming that NWAC's Board of Directors would like to meet with Woodside at the next Board meeting on 24 October 2024, and requested a preferred time (SI Report, reference 30.2).
- On 18 October 2024, Woodside emailed NWAC confirming attendance at the Board meeting on the 24 October 2024 at 11.30am and requested NWAC provide a quote prior to the 24 October 2024 to allow time to invoice for costs. Woodside also stated that it was available to speak on the phone about the arrangements (SI Report, reference 30.3).
- On 18 October 2024, NWAC emailed Woodside confirming that it would schedule a time for Woodside to present at the meeting and would confirm attendance ahead of time (SI Report, reference 30.4).
- On 21 October 2024, Woodside emailed NWAC a reminder about the proposed activity (SI Report, reference 30.5). The email included:
  - A reference to the original consultation email for this EP sent to NWAC on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information regarding how NWAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NWAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after the EP consultation has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NWAC to provide information about the proposed activity to other individuals, as required.
- Between 21 – 23 October 2024 Woodside and NWAC exchanged emails to arrange a meeting with NWAC Board and YMAC on 24 October 2024. The emails included information about the meeting agenda, venue location and names of Woodside representatives attending (SI Report, references 30.6 – 30.9)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 24 October 2024, Woodside met with the NWAC Board at the YMAC office to provide an overview of Woodside's consultation process and the proposed activity (SI Report, reference 30.10). Discussions included:
  - An overview of Woodside assets and activities in Western Australia.
  - Woodside's commitment to working with First Nations communities, the process for consultation, and the importance of its relationships with, Traditional Owners.
  - Information about the Commonwealth regulator, NOPSEMA.
  - EPs and decommissioning activities including:
    - Information about the proposed activity and EP including an overview, planned activities, the EMBA and Operational Area, and potential impacts and controls.
    - Questions to consider when consulting on EPs.
    - Opportunities for questions and further discussions, action items and feedback on consultation.
  - Woodside's openness to discussing ways PBCs can develop Ranger Programs through training opportunities.
  - A request for ways in which NWAC would like to be consulted on future activities, to understand concerns in relation to the proposed activities and the possible impacts they may impose on cultural interests.
  - Woodside's commitment to understanding the types of activities and interests that are important to NWAC and any possible outcomes NWAC would like to consider.

  General feedback from NWAC and YMAC included:
  - That Woodside's presentation was an information session. Woodside informed NWAC and YMAC that attendees were not obligated to provide feedback during the consultation, as feedback is welcome for the life of the EP. The NWAC Board confirmed that if it decided to provide feedback it may not be until 2025 due to other commitments taking priority but understood that the initial feedback period closed on the 1 November 2024.
  - If Woodside was in regular contact with the Traditional Owners of Murujuga. Woodside confirmed that it had a close working relationship with MAC, and in contact with Traditional Owners.

  In regard to the proposed activity:
  - Woodside discussed that the EMBA in the event of an unplanned event, provided a comprehensive overview of the activities and information on how the EMBA is formulated, and explained that the EMBA is a result of predicated modelling that considers 200 different scenarios based on a number of conditions and factors.
  - **(1)** NWAC raised questions in relation to the detection of oil leaks.
  - (1) Woodside confirmed that the wells are continually monitored, and that it would be notified in the unlikely event a leak occurred. Woodside explained there was a crisis management team and confirmed it has the capacity to have its first response team deployed and onsite within a matter of hours. Woodside stated it with corporations to develop ranger programs to ensure Traditional Owners are equipped to act in the unlikely event of spill.
  - **(2)** NWAC confirmed Traditional Owners would want their own independent monitoring processes.
  - (2) Woodside confirmed there are social investment and cultural mapping opportunities that can be utilised to support Traditional Owners independent monitoring and survey projects.
  - **(3)** NWAC Traditional Owners explained that their priority is to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians.
  - (3) Woodside explained the impacts and controls to mitigate risk for the activity and assured NWAC Woodside explained the impacts and controls to mitigate risk for the activity and assured NWAC that Eighty Mile Beach will be acknowledged as a cultural value.
  - **(4)** NWAC discussed the impacts of migrating birds, whales, turtles and vegetation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (4) Woodside acknowledged and reiterated the importance of ongoing consultation to ensure Traditional Owners are up to date with Woodsides activities.
- YMAC thanked Woodside for the information presented and confirmed that the meeting had been a good opportunity to learn about the EP consultation process and about Woodside. YMAC suggested to NWAC that it considered the presentation as an information session. Woodside stated that NWAC was not obligated to provide feedback during the presentation as consultation/feedback is open for the life of the EP.

- On 24 October 2024, Woodside emailed NWAC thanking the corporation for the opportunity to meet with Directors and Elders, and confirming if a quote for costs had been submitted to Woodside (SI Report, reference 30.11).
- Between 25 October – 2 December 2024, Woodside and NWAC exchanged emails regarding the costs related to the NWAC Board meeting on 24 October 2024 (SI Report, reference 30.12 – 30.16).
- **(5)** On 7 May 2025, NWAC (via YMAC) emailed Woodside a response to Woodside's email about an unrelated EP (SI Report, reference 30.17). NWAC stated that it wanted to develop a consultation protocol.
- **(5, 5)** Between 9 May 2025 and 22 June 2025, Woodside and NWAC (via YMAC) exchanged emails about an unrelated EP (SI Report, reference 30.18 – 30.20). Among other issues discussed, Woodside stated that a consultation protocol is not a prerequisite for EP consultation and is not required for Woodside to provide reasonable support to NWAC to enable it to participate in consultation. Woodside advised it was not inclined to enter into new negotiations for protocols at this time.
- On 3 October 2025, Woodside emailed NWAC (via KLC) an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.10). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to NWAC (via KLC) in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NWAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NWAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	**(1)**	**(1)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NWAC raised questions in relation to the detection of oil spills.	**Woodside assessment:** Woodside notes NWAC's concerns about the unlikely event of an oil spill (leak). **Woodside response:** Woodside confirmed at the NWAC meeting that wells are continually monitored, and that NWAC would be notified in the unlikely event a spill occurred. Woodside informed NWAC that it engages with relevant cultural authorities in the event of oil spills.	See Appendix G: Oil spill preparedness and response strategy selection and evaluation, and Appendix H: First Strike Plan in the EP.
(2) NWAC confirmed Traditional Owners would want their own independent monitoring processes.	**(2)** **Woodside assessment:** Woodside acknowledges that NWAC requests independent monitoring processes. **Woodside response:** Woodside confirmed there are social investment and cultural mapping opportunities that can be utilised to support Traditional Owners independently monitor and survey projects.	**(2)** Woodside's environmental controls are described in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(3) NWAC Traditional Owners explained that their priority is to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians.	**(3)** **Woodside assessment:** Woodside acknowledges NWAC's connection, and priority to protect, Eighty Mile Beach, and the cultural value to the Nyangumarta Custodians. **Woodside response:** Woodside explained the impacts and controls to mitigate risk for the activity and assured NWAC that Eighty Mile Beach will be acknowledged as a cultural value in the EP.	**(3)** Eighty Mile Beach is identified as a cultural feature and heritage value in Section 4.9.1: Cultural values and heritage, under Sea Country values in the EP.
(4) NWAC discussed the impacts to migrating birds, whales, turtles and vegetation.	**(4)** **Woodside assessment:** Woodside has developed response plans to mitigate or avoid impacts on birds and marine mammals in the highly unlikely event of a hydrocarbon response. **Woodside response:** Woodside advised the impact on animals depended on the timing, duration and extent of a spill. Response options included tracking, protective barriers, shoreline clean-up techniques, prevention of contact with wildlife and rehabilitation of wildlife where	**(4)** The potential environmental impacts of planned and unplanned activities are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	contact occurs, and long-term monitoring of species and sites after a spill.	
(5) NWAC has provided Woodside with a Communications Protocol.	**(5)** **Woodside assessment:** Woodside has adapted its consultation methods to align with the consultation protocol provided by NWAC. **Woodside response:** Woodside stated that a consultation protocol is not a prerequisite for EP consultation. Woodside advised it was not inclined to enter into new negotiations for protocols at this time.	**(5)** No additional measures or controls required.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with NWAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NWAC on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to NWAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to NWAC in September 2025.
  - A revised Consultation Information Sheet previously provided to NWAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with NWAC on 30 September 2024 and requested NWAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to NWAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified NWAC (via YMAC) of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on NWAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NWAC members as well as the NWAC Board.
  - Asked NWAC to advise how it would like Woodside to engage and whether NWAC required further information.
- Woodside offered to meet with NWAC on a number of occasions and met with NWAC to discuss the proposed activity on 24 October 2024.
- Throughout the consultation period, Woodside and NWAC have exchanged multiple emails and met on one occasion to present the proposed activity to the NWAC Board and YMAC officers, as well as direct contact lines of communication to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- NWAC provided feedback to Woodside about:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - The detection of oil spills. Woodside confirmed that wells are continually monitored, NWAC would be notified in the unlikely event a spill occurred, and that Woodside engages with relevant cultural authorities in the event of oil spills. This is outlined in Appendix G: Oil spill preparedness and response strategy selection and evaluation, and Appendix H: First Strike Plan in the EP.
  - Independent monitoring processes. Woodside advise that there are opportunities for independent monitoring. Woodside's environmental controls are described in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
  - The priority to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians. Woodside has assessed the impacts and controls to mitigate risk for the activity in Section 4.9.1: Cultural values and heritage, under Sea Country values in the EP.
  - The impacts to migrating birds, whales, turtles and vegetation. The potential environmental impacts of planned and unplanned activities are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- During the past 13 months, NWAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.11 Nyul Nyul PBC Aboriginal Corporation (Nyul Nyul)

NNAC is established under the *Native Title Act 1993* by the Nyul Nyul people to represent the Nyul Nyul people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed Nyul Nyul advising of the proposed activity (Record of Consultation, reference 6.1.42), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that Nyul Nyul and its members may have within the EMBA.
  - A request for feedback by 30 October November 2024 for the purposes of preparation of this EP.
  - A request for information on how Nyul Nyul would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Nyul Nyul to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Nyul Nyul to provide information about the proposed activity to other individuals, as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 21 October 2024, Woodside emailed Nyul Nyul a reminder about the proposed activity (SI Report, reference 31.1). The email included:
  - A reference to the original consultation email for this EP sent to Nyul Nyul on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how Nyul Nyul would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Nyul Nyul to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Nyul Nyul to provide information about the proposed activity to other individuals, as required.
- On 3 October 2025, Woodside emailed Nyul Nyul an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.11). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to Nyul Nyul in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Nyul Nyul to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Nyul Nyul to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.7.1 of this EP).	

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Nyul Nyul for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to Nyul Nyul on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of Nyul Nyul's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to Nyul Nyul on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to Nyul Nyul in September 2025.
  - A revised Consultation Information Sheet previously provided to Nyul Nyul, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with Nyul Nyul on 30 September 2024 and requested Nyul Nyul provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to Nyul Nyul for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified Nyul Nyul of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on Nyul Nyul's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with Nyul Nyul members as well as the Nyul Nyul Board.
  - Asked Nyul Nyul to advise how it would like Woodside to engage and whether Nyul Nyul required further information.
- Woodside offered to meet with Nyul Nyul on a number of occasions.
- Throughout the consultation period, Woodside and Nyul Nyul have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, Nyul Nyul has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.12 Robe River Kuruma Aboriginal Corporation (RRKAC)

RRKAC is established under the *Native Title Act 1993* by the Robe River Kuruma people to represent the Robe River Kuruma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed RRKAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.
- **(1)** On 11 January 2024, Woodside and RRKAC, had a telephone discussion, during which RRKAC advised that some Country cultural heritage is located on the coast and may potentially be affected by an oil spill or another such environmental incident. **(1)** Woodside acknowledged the feedback.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2024, Woodside emailed RRKAC advising of the proposed activity (Record of Consultation, reference 6.1.43), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that RRKAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how RRKAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with RRKAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for RRKAC to provide information about the proposed activity to other individuals, as required.
- On 27 September 2024, RRKAC emailed Woodside confirming receipt of the Record of Consultation email. RRKAC advised it was conducting fieldwork and would respond when available (SI Report, reference 32.1).
- On 3 October 2024, Woodside emailed RRKAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed RRKAC a reminder about the proposed activity (SI Report, reference 32.2). The email included:
  - A reference to the original consultation email for this EP sent to RRKAC on 27 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how RRKAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with RRKAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for RRKAC to provide information about the proposed activity to other individuals, as required.
- On 11 December 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with RRKAC and has minimised contact as a sign of respect (SI Report, reference 32.3).
- On 19 December 2024, RRKAC emailed Woodside about a number of matters relating to other activities (SI Report, reference 32.4). In relation to the proposed activity and ongoing consultation, RRKAC:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(2)** Considers its Heritage Advisory Committee (HAC) as the relevant person for the purpose of consultation and advised Woodside that RRKAC has increased capacity and will be in a position via its HAC to engage in consultation with Woodside in 2025. This involves subject matter experts reviewing the relevant material to be able to make a formal assessment and participating in meetings where Woodside present information to RRKAC.
  - **(2)** Advised Woodside that RRKAC has scheduled four HAC meetings in 2025 and invited Woodside to a meeting on 18 February 2025.
  - **(3)** Informed Woodside that RRKAC is keen to discuss a seascape scale approach to understanding the potential risks and impacts to submerged heritage values, in relation to potential management measures contained in EPs.
- **(2)** On 14 January 2025, Woodside accepted RRKAC's invitation to the HAC meeting on 18 February 2025 (SI Report, reference 32.5).
- On 14 January 2025, Woodside replied to RRKAC's email of 19 December 2024 responding to a number of claims by RRKAC relating to other activities (SI Report, reference 32.6). This included:
  - **(2)** Woodside confirmed it had complied with Commonwealth regulations by providing RRKAC with sufficient information, a reasonable opportunity and reasonable time to provide feedback for EPs.
  - **(3)** In regard to seascape mapping, Woodside stated it did not have plans to conduct bathymetric surveys but was open to meeting with RRKAC to discuss publicly available datasets and Woodside's own mapping of deeper water areas.
- **(2)** On 15 January 2025, RRKAC emailed Woodside a response to its email on 14 January 2025 and provided details relating to the planned HAC meeting (SI Report, reference 32.7).
- **(2)** On 29 January 2025, Woodside emailed RRKAC following a phone call. The email confirmed agreement between Woodside and RRKAC to defer Woodside's attendance at the HAC meeting until the May 2025 meeting (SI Report, reference 32.8).
- On 4 March 2025 Woodside emailed RRKAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 46.5).
- On 5 March 2025, Traditional Owner members from RRKAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.6).
- On 24 March 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 46.8).
- On 7 April 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 46.10).
- On 3 October 2025, Woodside emailed RRKAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.12). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to RRKAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– An updated Consultation Information sheet is available on Woodside's website. – A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP. – Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with RRKAC to understand how it would like information to be managed. – Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. – A request for RRKAC to provide information about the proposed activity to others as required.		
Summary of Feedback, Objection or Claim	**Assessment of Merits of Feedback, Objection or Claim and Woodside's Response**	**Inclusion in Environment Plan**
(1) RRKAC advised that some Country cultural heritage is located on the coast and may potentially be affected by an oil spill or another such environmental incident.	**(1)** **Woodside assessment:** Woodside acknowledges RRKAC's connection to coastal cultural heritage and the potential impact from an oil spill or other environmental incident. **Woodside response:** Woodside has considered RRKAC's claim to cultural heritage associated with its coastline, which will be included in Section 4.9 of the EP. Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.8 of the EP, and Appendix H.	**(1)** Woodside has considered RRKAC's claim to coastline cultural heritage which will be included in Section 4.9: Cultural values and heritage. Woodside has addressed oil spill preparedness and response strategy in Appendix H.
(2) RRKAC informed Woodside that it considers RRKAC's Heritage Advisory Committee (HAC) as the relevant person for the purpose of consultation and advised Woodside that RRKAC has increased capacity and will be in a position via its HAC to engage in consultation with Woodside in 2025. RRKAC also advised Woodside that RRKAC has scheduled four HAC meetings in 2025 and invited Woodside to a meeting on 18 February 2025.	**(2)** **Woodside assessment:** Woodside acknowledges that RRKAC's HAC has increased capacity to regularly meet with Woodside in 2025 for the purpose of EP consultation. Woodside has emailed RRKAC consistently throughout the period of time that this EP has been open for consultation and has provided RRKAC with sufficient information, a reasonable opportunity and reasonable time to provide feedback for EPs. **Woodside response:** Woodside has accepted RRKAC's invitation to meet with HAC throughout 2025	**(2)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	and present information about current and future EPs. Woodside also confirms that it has complied with regulation 25 of the Environment Regulations for the purposed of this activity and related EP.	
(3) RRKAC raised the potential of a bathymetric survey of the coastline, working with all relevant coastal groups.	**(3)** **Woodside assessment:** Woodside does not have plans to conduct regional bathymetric surveys but there are publicly available datasets covering coastal regions. **Woodside response:** Woodside is seeking a meeting with RRKAC to find ways to interpret existing data sets to generate information which may be useful to RRKAC.	**(3)** Not required.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report: Consultation Complete		
Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with RRKAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information** Sufficient information has been provided because: • On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website. • Woodside provided information to RRKAC on 27 September 2024 when consultation commenced. Woodside provided: – A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of RRKAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to RRKAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to RRKAC in September 2025.
  - A revised Consultation Information Sheet previously provided to RRKAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with RRKAC on 27 September 2024 and requested RRKAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to RRKAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified RRKAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on RRKAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with RRKAC members as well as the RRKAC Board.
  - Asked RRKAC to advise how it would like Woodside to engage and whether RRKAC required further information.
- Woodside offered to meet with RRKAC on a number of occasions.
- Throughout the consultation period, Woodside and RRKAC have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- RRKAC advised that some Country cultural heritage is located on the coast and may potentially be affected by an oil spill or another such environmental incident. Woodside has considered RRKAC's claim to coastline cultural heritage which will be included in Section 4.9: Cultural values and heritage. Woodside has addressed oil spill preparedness and response strategy in Appendix H.
- During the past 13 months RRKAC has provided feedback, but has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.13 Wanparta Aboriginal Corporation (Wanparta)

Wanparta is established under the *Native Title Act 1993* by the Ngarla people to represent the Ngarla people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed Wanparta Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed Wanparta advising of the proposed activity (Record of Consultation, reference 6.1.44), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information, and contact details.
  - A request for information on the interests that Wanparta and its members may have within the EMBA.
  - **(1)** Details of Wanparta's cultural values previously provided by Wanparta to Woodside during consultation for other activities that may be relevant to the proposed activity. These cultural values include:
    - That Ngarla people have a deep spiritual connection to Sea Country and a responsibility to look after and protect it.
    - The significance of Wanparta's totem species including the octopus, stingray, spiny bream fish and kestrel.
  - **(1)** A request for Wanparta to confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for the EP.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how Wanparta would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Wanparta to understand how it would like information to be managed.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Wanparta to provide information about the proposed activity to other individuals, as required.
- **(2)** On 11 October 2024, Wanparta emailed Woodside stating that there was no further information for consideration regarding the cultural values previously provided by Wanparta to Woodside, and that Woodside was not required to consult with Wanparta on the proposed activity (SI Report, reference 33.1). **(2)** Woodside noted Wanparta's feedback regarding the proposed activity and cultural values previously provided to Woodside, which would be reflected in the EP.
- On 9 May 2025, Woodside met with Wanparta to discuss an unrelated EP (SI Report, reference 33.2). Matters relevant to this EP included:
  - **(3)** Wanparta enquired about whale and turtle breeding and migration pathways. **(3)** Woodside explained that it takes factors such as these into consideration and puts mitigation measures in place in EPs to address this.
  - **(4)** Wanparta asked if Woodside records whale observations. **(4)** Woodside noted it uses available research and that staff have a duty to report wildlife sightings.
  - **(5)** Wanparta provided feedback that more visual learning material would aid consultation. **(5)** Woodside acknowledged the importance of visual aids and noted that animation videos are currently being developed to support Traditional Owners with the EP consultation process.
  - **(6)** Wanparta enquired about support for Ranger Programs. **(6)** Woodside provided a Ranger Program update.
  - **(1)** Wanparta noted that a healthy Sea Country = a healthy marine life = Ngarla food source = healthy Ngarla People. **(1)** Woodside acknowledged this feedback.
  - **(7)** Wanparta noted concerns around maintaining sustainable fish stock post operations during decommissioning. **(7)** Woodside noted that the EPs being discussed at the meeting were not in relation to decommissioning and that it assesses the environmental impacts of removing infrastructure.
  - **(8)** Wanparta questioned if Woodside monitors islands, in particular nesting shore birds. **(8)** Woodside took the question on notice.
  - **(9)** Wanparta noted that there is ethnohistorical evidence of Ngarla occupation on islands. **(9)** Woodside acknowledged this cultural value.
- On 16 May 2025, Wanparta emailed Woodside a letter that summarised outcomes of the meeting between Wanparta and Woodside on 9 May 2025 (SI Report, reference 33.3).
- On 10 June 2025, Woodside emailed Wanparta responding to its email of 16 May 2025 (SI Report, reference 33.4). The letter also included responses to questions Woodside took on notice from the consultation meeting on 9 May 2025:
  - **(8)** Wanparta asked if Woodside will monitor the islands within the Ngarla Determination Area. **(8)** Woodside noted that it does not currently monitor islands within the Ngarla Determination Area under the proposed activity program for an unrelated EP, noting that the islands are outside of the EMBA for that EP.
  - **(1)** Wanparta raised that in the Ngarla People's view, healthy Sea Country = a healthy marine life = Ngarla food source = healthy Ngarla People. **(1)** Woodside has noted these interests.
  - **(7)** Wanparta noted that Woodside should maintain sustainable fish stocks post operations. **(7)** Woodside recognises the importance of maintaining sustainable fish stocks post operations and acknowledges that offshore platforms and pipelines can become habitats for various fish species over time. Woodside also provided further details of research underway and provided details of Woodsides regulatory expectations.
  - **(8)** Wanparta queried information on research activities relating to the monitoring of shorebirds. **(8)** Woodside provided Wanparta with information on shorebirds and noted that since 2016, Woodside has partnered with BirdLife Australia on programs focused on migratory shorebirds.
  - **(6)** Wanparta queried social investment opportunities and ranger programs. **(6)** Woodside advised it is in the process of developing a Ranger Funding Program. Woodside advised that Wanparta's request will be evaluated in accordance with the Program's criteria upon its implementation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2025, Woodside emailed Wanparta an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.13). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to Wanparta in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Wanparta to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Wanparta to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Wanparta stated that water and the ocean were extremely important to them, and they had a responsibility to look after ocean and lore. They noted the bream, octopus, stingray and kestrel as totemic species.	**(1)** **Woodside assessment:** Woodside acknowledges Wanparta's interest in water and the species described to represent potential cultural values. **Woodside response:** Wanparta's interests and potential cultural values have been recorded in the EP, the potential impact on the interests and values, including controls, have been assessed.	**(1)** Woodside updated Section 4.9.1: Cultural values and heritage, to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(2) Wanparta informed Woodside that it had no further information for consideration regarding the cultural values previously provided by Wanparta to Woodside, and that Woodside was not required to consult with Wanparta on the proposed activity.	**(2)** **Woodside assessment**: Woodside acknowledges that Wanparta had no further information to share with Woodside, and it was not required to consult with Wanparta regarding the activity. **Woodside response**: Woodside accepts that Wanparta has no further feedback, claims or objections	**(2)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	to the activity. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	
(3) Wanparta enquired about whale and turtle breeding and migration pathways.	**(3)** **Woodside assessment:** Woodside assesses risks to marine life and puts in place mitigation measures. **Woodside response:** Woodside advised Wanparta that it assesses risks to marine life and puts in place mitigation measures.	**(3)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(4) Wanparta asked if Woodside records whale observations.	**(4)** **Woodside assessment:** Woodside continues to use all available research and staff have a duty to report whale sightings. **Woodside response:** Woodside explained to Wanparta how whale sightings are managed.	**(4)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(5) Wanparta provided feedback that more visual learning material would aid consultation.	**(5)** **Woodside assessment:** Woodside acknowledges the importance of visual aids and is committed to consulting with Traditional Owners in an appropriate way. **Woodside response:** Woodside welcomes this feedback and confirmed it is developing materials including animations to further support future consultation with First Nations stakeholders.	**(5)** No action required.
(6) Wanparta enquired about support for Ranger Programs.	**(6)** **Woodside assessment:** Woodside sees the value of groups having ranger programs. **Woodside response:** Woodside is in the process of developing a ranger funding program. Wanparta's	**(6)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	request will be evaluated in accordance with the program's criteria upon its implementation.	
(7) Cultural value: maintaining sustainable fish stock post operations during decommissioning**.**	**(7)** **Woodside assessment:** Woodside recognises the importance of maintaining sustainable fish stocks post operations and acknowledges that offshore platforms and pipelines can become habitats for fish over time. **Woodside response:** Woodside acknowledges Wanparta's cultural values.	**(7)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(8) Wanparta questioned if Woodside monitors islands within the Ngarla Determination area, in particular nesting shore birds	**(8)** **Woodside assessment:** Woodside does not currently monitor these islands. Woodside will include this cultural value in future EPs, here applicable. **Woodside response:** Woodside advised Wanparta that it does not currently monitor islands outside of the EMBA of an unrelated EP for which this feedback was raised.	**(8)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(9) Cultural Value: • There is ethnohistorical evidence of Ngarla occupation on islands.	**(9)** **Woodside assessment:** Dreamtime stories connected to nearshore islands particularly Solitary Island / Jarrkunpungu have been identified through Woodside's data collection processes (consultation) for EPs not related to this EP. **Woodside response:** Woodside acknowledges Wanparta's cultural values. At the beginning of consultation for EPs unrelated to this EP, Woodside provided Wanparta with a list of the cultural values known to Woodside that it believed relevant to Wanparta and invited it to make changes or provide additional information. Wanparta provided further information about this value during consultation for other EPs. Woodside has updated relevant sections of this EP to record interests and cultural values and	**(9)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	assessed the potential impact on these and included controls.	
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Wanparta for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to Wanparta on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of Wanparta's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to Wanparta on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to Wanparta in September 2025.
  - A revised Consultation Information Sheet previously provided to Wanparta, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation on this EP with Wanparta on 30 September 2024 and requested Wanparta provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to Wanparta for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified Wanparta of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on Wanparta's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with Wanparta members as well as the Wanparta Board.
  - Asked Wanparta to advise how it would like Woodside to engage and whether Wanparta required further information.
- Woodside offered to meet with Wanparta on a number of occasions.
- Throughout the consultation period, Woodside and Wanparta have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Wanparta advised Woodside that it has a cultural obligation to care for the environmental values of Sea Country.
- Woodside has assessed Wanparta's interests and potential cultural values and assessed potential impact in Section 4.9.1: Cultural values and heritage, including controls, in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- During the past 13 months, Wanparta has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- For the purposes of this EP, Wanparta stated there was no further information for consideration regarding the cultural values previously provided by Wanparta to Woodside, and that Woodside was not required to further consult with Wanparta on the proposed activity.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.14 Wirrawandi Aboriginal Corporation (WAC)

WAC is established under the *Native Title Act 1993* by the Mardudhunera and Yaburara people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed WAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed WAC advising of the proposed activity (Record of Consultation, reference 6.1.45), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that WAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how WAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with WAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for WAC to provide information about the proposed activity to other individuals, as required.
- On 30 September 2024, Woodside met with WAC (SI Report, reference 34.1) At the meeting:
  - WAC discussed administrative matters relating to resourcing plans and that it has prioritised appointing a new Board at its Annual General Meeting in November.
  - WAC noted it has recently appointed a new Trustee and is negotiating its annual budget.
  - Woodside reported that throughout September 2024, it has undertaken a number of discussions face to face and via telephone calls with WAC members and Elders about EP consultation and reasons why Woodside consults with relevant groups.
- On 1 October 2024, WAC emailed Woodside requesting that Woodside provide an overview of activities due to a number of EPs open for consultation, at the next meeting with the WAC Board. WAC advised it would prepare a quote for costs and advise of the next meeting date (SI report, reference 34.2).
- On 1 October 2024, Woodside emailed WAC confirming it was available to consult on EPs, reminding WAC about the closing date related to another activity, and suggesting that the meeting with the WAC Board occur before that closing date – with Woodside discussing next steps once the quote had been submitted (SI Report, reference 34.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2024, Woodside emailed WAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 10 October 2024, WAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne where Woodside presented to Traditional Owners (SI Report, reference 46.2). At the conclusion of the meeting, Traditional Owners confirmed and were satisfied that they had been consulted about the proposed activity. Matters relevant to this EP included:
  - Consultation outcomes for Woodside EPs.
  - An explanation of State and Commonwealth regulatory requirements.
  - An explanation of EMBAs.
  - The process Woodside undertakes to identify Traditional Owners groups.
  - How Traditional Owners can provide information to Woodside about cultural values, interests and activities.
  - If there are any other First Nations groups who should be consulted.
- On 14 October 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with WAC and has minimised contact as a sign of respect (SI Report, reference 34.4).
- On 18 October 2024, Woodside emailed WAC confirming the Woodside representative attending the WAC Board meeting on 28 October 2024, and requesting a quote for costs (SI Report, reference 34.5).
- On 21 October 2024, Woodside emailed WAC a reminder about the proposed activity (SI Report, reference 34.6). The email included:
  - A reference to the original consultation email for this EP sent to WAC on 27 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how WAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with WAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for WAC to provide information about the proposed activity to other individuals, as required.
- On 24 October 2024, WAC emailed Woodside advising that WAC preferred 2 hours for presenting on EPs, providing a quote for costs based on previous communication with Woodside in 2023, and requesting if the rates were acceptable to Woodside (SI Report, reference 34.7).
- On 28 October 2024, Woodside met with the WAC Board and Elders in Karratha to provide an overview of Woodside's consultation process and the proposed activity (SI Report, reference 34.8). The presentation included the following information:
  - An overview of Woodside assets and activities in Western Australia.
  - Woodside's commitment to working with First Nations communities, the process for consultation, and the importance of its relationships with, Traditional Owners.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Reinforcement that Woodside wants to hear from Elders and members about activities, their concerns, what we should do about them, what we need to consider regarding EPs.
  - Information about the Commonwealth regulator, NOPSEMA.
  - EPs and decommissioning activities including:
    - Information about the proposed activity and EP including an overview, planned activities, the EMBA and Operational Area, and potential impacts and controls.
    - Questions to consider when consulting on EPs.
    - Opportunities for questions and further discussions, action items and feedback on consultation.
    - Reminded attendees that consultation remains open after Woodside submits the EP – and for the life of the EP.
    - Requested if there are any other people/groups Woodside should talk to about the decommissioning activities.

  The Board asked the following general questions:

  - What type of feedback is Woodside seeking from WAC to submit to NOPSEMA. Woodside advised that EP outlines how Woodside undertakes its activities and the environment that may be impacted by an activity such as marine life, the ocean, ocean floor and offshore. Woodside consults with Traditional Owners about cultural and environmental values these are included in the EP and submitted to NOPSEMA.
  - The management and reporting of spills, and the likelihood during a decommissioning activity. Woodside stated that is required to report spills within 12 hours. Woodside includes an Oil Spill Management Plan in the EP and stated it is unlikely spills occur during decommissioning activities however outlined the processes if a spill was to occur.

  Discussions relating to the proposed activity included:

  - The decommissioning Operational Area and EMBA, including the distance and depth of the activity.
  - Potential risk for loss of containment to fix TPA03. Woodside stated it had undertaken spill modelling and it had been determined that there was an unlikely risk. Woodside also reiterated that it monitors wells.
  - Woodside discussed the planned impacts and risks, such as sound/noise impacts, as well as unplanned impacts and risk such as a spill and emergency response arrangements, vessel speeds, and impact on marine life.
  - Woodside requested if WAC had any further questions, and none were asked.

- **(1)** On 29 October 2024, WAC emailed Woodside thanking it for the presentation in-person to the WAC Board and acknowledging Woodside's professionalism. WAC confirmed that it did not have any further feedback or objections at the time to the proposed activity, however reserved the right to provide comment at a later date if any perceived environmental or cultural issues became evident. WAC stated it was satisfied that consultation had occurred (SI Report, reference 34.9). **(1)** Woodside noted that WAC had no further feedback or objections to the proposed activity, which would be reflected in the EP.
- On 2 November 2024, a member of Woodside's First Nations team spoke with relevant persons and Elders from WAC at the Dampier Beachside Markets (SI Report, reference 34.10). The conversations included:
  - Information about Woodside's activities and related EPs including the proposed activity.
  - An offer to further consult and meet face to face with WAC and its Elders.
  - Reference to printed Summary Information Sheets for a number of Woodside activities including this activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Elders noted they had no feedback, objections or claims relating to the proposed activity, and were comfortable with the information being sent via WAC. Woodside notes and respects the feedback from Elders.
  - WAC noted that upcoming AGMs, Sorry Business and Lore will impact its availability to consult over the next few months.
- On 15 November 2024, Woodside emailed WAC to invite it to Woodside's Quarterly Heritage Meeting on 5 December 2024, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community. Woodside also requested a list attendees and attendance fees (SI Report, reference 34.11).

Ongoing engagement:

- On 21 November 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with WAC and has minimised contact as a sign of respect (SI Report, reference 34.12).
- On 5 December 2024, WAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 46.4). Relevant matters discussed included:
  - An overview of upcoming EPs
  - An explanation of ongoing consultation and a reminder that Woodside accepts feedback for life of EP.
  - Reminder about monthly community luncheons.
- On 22 January 2025, Woodside emailed WAC details about Quarterly Heritage meetings in 2025 (SI Report, reference 34.13).
- On 4 March 2025, Woodside emailed WAC a reminder about the Quarterly Heritage Meeting scheduled for 13 March 2025 (SI Report, reference 34.14).
- On 4 March 2025 Woodside emailed WAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 46.5).
- On 5 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.6).
- On 13 March 2025, WAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 46.7). Matters discussed and/or raised relating to this EP included:
  - That consultation is open for the life of any EP and Woodside can schedule consultation meetings at timers that are convenient to the community.
  - A reminder that Woodside hosts a community luncheon and yarning circle for all local Traditional Owners.
- On 24 March 2025, Woodside emailed WAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 46.8).
- On 26 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 46.9).
- On 8 April 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.11).
- On 16 May 2025, Woodside emailed WAC a reminder about the Quarterly Heritage Meeting scheduled for 4 June 2025 (SI Report, reference 34.15).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 46.12). Matters discussed relevant to this EP included:
  - Woodside provided an overview the consultation process with relevant First Nations persons.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 46.13). Matters discussed relating to this EP included:
  - Cultural heritage update.
  - Training and contracting opportunities.
  - Project updates.
- On 3 October 2025, Woodside emailed WAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.14). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to WAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with WAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for WAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) WAC confirmed it had no issues or concerns relating to this EP.	**(1)** **Woodside assessment**: Woodside acknowledges that WAC had no issues or concerns, including no objections or claims, regarding this EP. **Woodside response**: Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP of this EP).	**(1)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with WAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to WAC on 27 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of WAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to WAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to WAC in September 2025.
  - A revised Consultation Information Sheet previously provided to WAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with WAC on 27 September 2024 and requested WAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has addressed and responded to WAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified WAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on WAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with WAC members as well as the WAC Board.
  - Asked WAC to advise how it would like Woodside to engage and whether WAC required further information.
- Woodside offered to meet with WAC on a number of occasions.
- Throughout the consultation period, Woodside and WAC have exchanged multiple emails, met on two occasions and have otherwise had direct contact lines to each other during the period.
- Woodside invites WAC to Quarterly Heritage Meetings and Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, WAC has provided feedback, but has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.15 Yawuru Native Title Holders Aboriginal Corporation (Yawuru)

Yawuru is established under the *Native Title Act 1993* by the Yawuru people to represent the Yawuru people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 30 September 2024, Woodside emailed Yawuru advising of the proposed activity (Record of Consultation, reference 6.1.46), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that Yawuru and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how Yawuru would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yawuru to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Yawuru to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Woodside emailed Yawuru a reminder about the proposed activity (SI Report, reference 35.1). The email included:
  - A reference to the original consultation email for this EP sent to Yawuru on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how Yawuru would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yawuru to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Yawuru to provide information about the proposed activity to other individuals, as required.
- On 8 April 2025, Traditional Owner members from Yawuru attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.11).
- On 3 October 2025, Woodside emailed Yawuru an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.15). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to Yawuru in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- An updated Consultation Information sheet is available on Woodside's website.
- A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yawuru to understand how it would like information to be managed.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for Yawuru to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Yawuru for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to Yawuru on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of Yawuru's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to Yawuru on 3 October 2025 which included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A reference to the original consultation email for this EP sent to Yawuru in September 2025.
  - A revised Consultation Information Sheet previously provided to Yawuru, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with Yawuru on 30 September 2024 and requested Yawuru provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to Yawuru for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified Yawuru of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on Yawuru's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with Yawuru members as well as the Yawuru Board.
  - Asked Yawuru to advise how it would like Woodside to engage and whether Yawuru required further information.
- Woodside offered to meet with Yawuru on a number of occasions.
- Woodside invites Yawuru to Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, Yawuru has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.16 Yindjibarndi Aboriginal Corporation (Yindjibarndi)

Yindjibarndi AC is established under the *Native Title Act 1993* by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. Yindjibarndi has formally notified Woodside that all oil and gas matters relating to Yindjibarndi are to be directed to NYFL, which is Yindjibarndi's Native Title Representative Body.

Historical engagement:

- On 26 July 2023, Woodside emailed Yindjibarndi (via the Ngarluma Yindjibarndi Foundation Ltd, or NYFL) Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.
- **(1)** On 1 August 2023, Yindjibarndi formally notified Woodside that Oil and Gas matters relating to Yindjibarndi be directed to NYFL. **(1)** Woodside acknowledged this and adjusted its consultation accordingly.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Yindjibarndi (via NYFL) advising of the proposed activity (Record of Consultation, reference 6.1.47), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that Yindjibarndi and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how Yindjibarndi would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yindjibarndi to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Yindjibarndi to provide information about the proposed activity to other individuals, as required.
- On 3 October 2024, Woodside emailed Yindjibarndi (via NYFL) an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 14 October 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with Yindjibarndi and has minimised contact as a sign of respect (SI Report, reference 36.1).
- On 21 October 2024, Woodside emailed Yindjibarndi (via NYFL) a reminder about the proposed activity (SI Report, reference 36.2). The email included:
  - A reference to the original consultation email for this EP sent to Yindjibarndi on 27 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how Yindjibarndi would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yindjibarndi to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Yindjibarndi to provide information about the proposed activity to other individuals, as required.
- **(2)** On 21 October 2024, Yindjibarndi (via NYFL) emailed Woodside asserting (SI Report, reference 36.3):
  - No formal consultation had taken place between NYFL, in its capacity as the delegated representative for Yindjibarndi, and Woodside on this EP and others.
  - Woodside's emails did not meet the standard of meaningful consultation.
  - Woodside has provided NYFL with a draft consultation agreement but had declined to agree with NYFL's estimated costs to proceed with the agreement.
  - NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
  - Woodside note in any record provided to NOPSEMA that NYFL had not been consulted on this EP and others.
- On 2 November 2024, a member from Woodside's First Nations team spoke with relevant persons and Elders from Yindjibarndi at the Dampier Beachside Markets (SI Report, reference 36.4). The conversations included:
  - Information about Woodside's activities and related EPs including the proposed activity.
  - An offer to further consult and meet face to face with Yindjibarndi and its Elders.
  - Reference to printed Summary Information Sheets for a number of Woodside activities.
  - Elders noted they had no feedback, objections or claims relating to the proposed activity, and were comfortable with the information being sent via Yindjibarndi. Woodside notes and respects the feedback from Elders.
  - Yindjibarndi noted that upcoming AGMs, Sorry Business and Lore will impact its availability to consult over the next few months.
- **(2, 2)** Between 8 – 20 November 2024, emails were exchanged between NYFL (as the delegated representative for Yindjibarndi) and Woodside regarding the 4 November 2024 email and requests to meet regarding the draft consultation agreement. Please refer to NYFL Appendix F, reference 4.11.1 and SI Report, reference 21.0 for further information.
- On 4 March 2025, Woodside emailed Yindjibarndi (via NYFL) an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 46.5).
- On 5 March 2025, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.6).
- On 24 March 2025, Woodside emailed Yindjibarndi (via NYFL) an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 46.8).
- On 26 March 2025, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 46.9).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 7 April 2025, Woodside emailed Yindjibarndi an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 46.10).
- On 8 April 2025, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.11).
- On 3 October 2025, Woodside emailed Yindjibarndi (via NYFL) an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.19). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to Yindjibarndi (via NYFL) in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yindjibarndi (via NYFL) to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for Yindjibarndi (via NYFL) to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Yindjibarndi has instructed Woodside that it will be represented by NYFL in ongoing discussion about EPs.	**(1)** **Woodside assessment**: Woodside accepts Yindjibarndi's right to be represented by NYFL. **Woodside response**: Woodside will engage with NYFL on behalf of Yindjibarndi for ongoing consultation related to this activity.	**(1)** Ongoing consultation will be undertaken as set out in Management of Change and Revision process, Section 7.7.1 of the EP.
(2) NYFL has stated that no formal consultation had taken place between NYFL, in its capacity as the delegated representative for Yindjibarndi, and Woodside on this	**(2)** **Woodside assessment:** Woodside rejects NYFL's assertion that Yindjibarndi has not been consulted on this EP. Woodside began consulting Yindjibarndi (via NYFL) on 8 July 2024 and has provided sufficient	**(2)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

EP. NYFL would progress consultation on this EP once the draft consultation agreement was finalised.	information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that a consultation agreement is not a pre-requisite for EP consultation. **Woodside response:** The information provided by Woodside meets the requirements of Regulation 25 of the Environment Regulations for the reasons set out above.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Yindjibarndi (via NYFL) for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to Yindjibarndi (via NYFL) on 27 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of Yindjibarndi's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to Yindjibarndi (via NYFL) on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to Yindjibarndi (via NYFL) in September 2025.
  - A revised Consultation Information Sheet previously provided to Yindjibarndi, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with Yindjibarndi (via NYFL) on 27 September 2024 and requested Yindjibarndi (via NYFL) provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to Yindjibarndi (via NYFL) for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified Yindjibarndi (via NYFL) of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on Yindjibarndi's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with Yindjibarndi's members as well as the Yindjibarndi Board.
  - Asked Yindjibarndi (via NYFL) to advise how it would like Woodside to engage and whether Yindjibarndi required further information.
- Woodside offered to meet with Yindjibarndi (via NYFL) on a number of occasions.
- Throughout the consultation period, Woodside and Yindjibarndi (via NYFL) have exchanged emails and have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, Yindjibarndi (via NYFL) has not raised objections or claims about the adverse impact of each activity to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.9.17 Yinggarda Aboriginal Corporation (YAC)

YAC is established under the *Native Title Act 1993* by the Yinggarda people to represent the Yinggarda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed YAC via GAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed YAC advising of the proposed activity (Record of Consultation, reference 6.1.48), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that YAC and its members may have within the EMBA.
  - Details of YAC's cultural values previously provided by YAC to Woodside during consultation for other activities that may be relevant to the proposed activity. These include:
    - **(1)** That plants, animals and the environment are inexorably linked to its culture.
    - **(2)** Concerns about potential impacts to patterns of whales and potential collisions.
    - **(3)** Advised that seagrass, mullet and dugong in Shark Bay are important resources.
  - **(1, 2, 3)** A request from Woodside that YAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for this EP.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how YAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for YAC to provide information about the proposed activity to other individuals, as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Acknowledgement that discussions relating to Woodside's framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 21 October 2024, Woodside emailed YAC a reminder about the proposed activity (SI Report, reference 37.1). The email included:
  - A reference to the original consultation email for this EP sent to YAC on 30 September 2024, which included Summary and Consultation Information Sheets and listed cultural values previously provided by YAC to Woodside.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how YAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for YAC to provide information about the proposed activity to other individuals, as required.
- On 2 November 2024, a member from Woodside's First Nations team spoke with relevant persons and Elders from YAC at the Dampier Beachside Markets (SI Report, reference 37.2). The conversations included:
  - Information about Woodside's activities and related EPs including the proposed activity.
  - An offer to further consult and meet face to face with YAC and its Elders.
  - Reference to printed Summary Information Sheets for a number of Woodside activities.
  - Elders noted they had no feedback, objections or claims relating to the proposed activity, and were comfortable with the information being sent via Yindjibarndi. Woodside notes and respects the feedback from Elders that they had no objections or claims relating to the proposed activity.
  - YAC noted that upcoming AGMs, Sorry Business and Lore will impact its availability to consult over the next few months.
- On 3 October 2025, Woodside emailed YAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.16). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to YAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YAC to understand how it would like information to be managed. – Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. – A request for YAC to provide information about the proposed activity to others as required.		
Summary of Feedback, Objection or Claim	**Assessment of Merits of Feedback, Objection or Claim and Woodside's Response**	**Inclusion in Environment Plan**
(1) YAC stated that plants, animals and the environment are inexorably linked to its culture and asked whether Woodside had undertaken environmental studies, whether these studies were ongoing and what environmental monitoring occurred after EPs were approved.	**(1)** **Woodside assessment:** Woodside acknowledges YAC's feedback that plants, animals and the environment are inexorably linked to its culture. Woodside has undertaken numerous environmental studies, has an ongoing commitment to research and conducts environmental monitoring after EPs are accepted. **Woodside response:** Woodside has advised YAC that it has undertaken numerous environmental studies, has an ongoing commitment to research and conducts environmental monitoring after EPs are accepted. Woodside has also advised YAC that it continues to take feedback for the life on an EP and will inform YAC of any new information in relation to risks.	**(1)** Woodside has updated record YAC's interests and potential cultural values in in Section 4.9.1: Cultural values and heritage. Potential impact including controls are detailed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(2) YAC expressed concern about potential impacts to patterns of whales and potential collisions.	**(2)** **Woodside assessment:** Woodside has noted YAC's interest in whales and has controls in place to minimise impacts and risks to whales. **Woodside response**: Woodside has advised YAC that controls are put in place to minimise impacts and risks to whales.	**(2)** Woodside has updated Section 4.9.1: Cultural values and heritage, to record YAC's interests and potential cultural values. Potential impact on these, including controls are detailed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(3) YAC advised that seagrass, mullet and dugong in Shark Bay are important resources.	**(3)** **Woodside assessment:** Woodside has noted YAC's interest in seagrass, mullet and dugong in Shark Bay.	**(3)** Woodside has updated Section 4.9.1: Cultural values and heritage, to record YAC's interests and potential cultural values. Potential impact on these, including controls are detailed in Section 6: Environmental

	Woodside response: Woodside has advised YAC that controls are in place to mitigate risk to seagrass, mullet and dugong in the unlikely case of an environmental incident.	impact and risk assessment, performance outcomes, standards and measurements criteria.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with YAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to YAC on 30 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of YAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to YAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to YAC in September 2025.
  - A revised Consultation Information Sheet previously provided to YAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with YAC on 30 September 2024 and requested YAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to YAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified YAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on YAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with YAC members as well as the YAC Board.
  - Asked YAC to advise how it would like Woodside to engage and whether YAC required further information.
- Woodside offered to meet with YAC on a number of occasions.
- Throughout the consultation period, Woodside and YAC have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- YAC has advised Woodside:
  - The potential impacts to the environment, and plants, animals and the environment are inexorably linked to its culture (including whales), and the environment generally, are inexorably linked to their culture and advised that seagrass, mullet and dugong in Shark Bay are important resources.
  - A concern about potential impacts to patterns of whales and potential collisions.
  - Woodside has updated Section 4.9.1: Cultural values and heritage, to record YAC's interests and potential cultural values. Potential impact on these, including controls are detailed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- During the past 13 months, YAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP of this EP).

4.10 Native Title representative bodies

4.10.1 Kimberley Land Council (KLC)

Kimberley Land Council is the Native Title Representative Body for the Kimberley region of Western Australia. As such, it is not a Prescribed Body Corporate or Registered Native Title Body Corporate but exists to assist Native Title claimants and holders.

Summary of information provided and record of consultation for this EP:

- On 30 September 2024, Woodside emailed KLC advising of the proposed activity (Record of Consultation, reference 6.1.49), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email content included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that KLC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how KLC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KLC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for KLC to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Woodside emailed KLC a reminder about the proposed activity (SI Report, reference 38.1). The email included:
  - A reference to the original consultation email for this EP sent to KLC on 30 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how KLC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KLC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A request for KLC to provide information about the proposed activity to other individuals, as required.

- On 3 October 2025, Woodside emailed KLC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.17). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to KLC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with KLC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for KLC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with KLC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to KLC on 30 September 2024 when consultation commenced. Woodside provided:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of KLC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to KLC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to KLC in September 2025.
  - A revised Consultation Information Sheet previously provided to KLC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with KLC on 30 September 2024 and requested KLC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to KLC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified KLC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on KLC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 30 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with KLC's members as well as the KLC Board.
  - Asked KLC to advise how it would like Woodside to engage and whether KLC required further information.
- Woodside offered to meet with KLC on a number of occasions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Throughout the consultation period, Woodside and KLC have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, KLC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.10.2 Yamatji Marlpa Aboriginal Corporation (YMAC)

YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate representing the cultural rights of a Traditional Custodian Community but exist to assist native title claimants and holders.

Historical engagement:

- On 25 July 2023, Woodside emailed YMAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed YMAC advising of the proposed activity (Record of Consultation, reference 6.1.50), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.

    A request for information on the interests that YMAC and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how YMAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YMAC to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for YMAC to provide information about the proposed activity to other individuals, as required.
- On 2 October 2024, YMAC and Woodside exchanged emails clarifying and confirming the correct contact details when emailing EP consultation information and materials (SI Report, reference 39.1 – 39.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2024, Woodside emailed YMAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed YMAC a reminder about the proposed activity (SI Report, reference 39.4). The email included:
  - A reference to the original consultation email for this EP sent to YMAC on 27 September 2024, which included Summary and Consultation Information Sheets and listed cultural values previously provided by YMAC to Woodside.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how YMAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YMAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for YMAC to provide information about the proposed activity to other individuals, as required.
- On 3 October 2025, Woodside emailed YMAC an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.18). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to YMAC in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YMAC to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for YMAC to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the	No additional measures or controls are required.

	EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with YMAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to YMAC on 27 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of YMAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to YMAC on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to YMAC in September 2025.
  - A revised Consultation Information Sheet previously provided to YMAC, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with YMAC on 27 September 2024 and requested YMAC provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to YMAC for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified YMAC of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on YMAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with YMAC's members as well as the YMAC Board.
  - Asked YMAC to advise how it would like Woodside to engage and whether YMAC required further information.
- Woodside offered to meet with YMAC on a number of occasions.
- Throughout the consultation period, Woodside and YMAC have had direct contact lines to each other during the period.
- Woodside invites YMAC to Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, YMAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.11 Self-identified First Nations groups

4.11.1 Ngarluma Yindjibarndi Foundation Ltd (NYFL)

NYFL was created to act as Trustee for the Trust under the *Northwest Shelf Agreement 1998* struck between the Ngarluma and Yindjibarndi registered native title claimants, the NWS JVs and Woodside, prior to the resolution of the Ngarluma and Yindjibarndi native title claim. Its purpose is to carry on the business of enterprise development, investment and social welfare.

In 1999 the Ngarluma and Yindjibarndi native title claim was settled with the Federal Court appointing, at the request of the common law native title holders, the Ngarluma Aboriginal Corporation (NAC) as PBC to represent the communal interests of the Ngarluma people and the Yindjibarndi Aboriginal Corporation as PBC to represent the communal interests of the Yindjibarndi people. Woodside consulted both NAC and Yindjibarndi as relevant persons in the course of preparing this EP. NYFL self-identified and has advised it is relevant for this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Historical engagement:

- On 26 July 2023, Woodside emailed NYFL Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please refer to Scarborough Seabed Intervention and Trunkline Installation EP *(Appendix F and SI document) for further details of this correspondence.*

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed NYFL advising of the proposed activity (Record of Consultation, reference 6.1.51), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that NYFL and its members may have within the EMBA.
  - A request for feedback by 30 October 2024 for the purposes of preparation for this EP.
  - A request for information on how NYFL would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NYFL to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NYFL to provide information about the proposed activity to other individuals, as required.
  - Acknowledgement that discussions relating to Woodside's framework agreement has been ongoing and that these discussions will progress in parallel with consultation for the proposed activity's EP.
- On 3 October 2024, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 46.1).
- On 21 October 2024, Woodside emailed NYFL a reminder about the proposed activity (SI Report, reference 40.1). The email included:
  - A reference to the original consultation email for this EP sent to NYFL on 27 September 2024, which included Summary and Consultation Information Sheets.
  - A reminder that consultation for the purposes of preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how NYFL would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NYFL to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NYFL to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, NYFL emailed Woodside (SI Report, reference 40.2). In the email NYFL stated:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(1)** No formal consultation had taken place between NYFL and Woodside on this EP and others.
  - **(1)** Woodside's emails did not meet the standard of meaningful consultation.
  - **(2)** Woodside has provided NYFL with a draft consultation agreement but had declined to agree to NYFL's estimated costs to proceed with the agreement.
  - **(2)** NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
  - **(1)** A request for Woodside to note in any record provided to NOPSEMA that NYFL had not been consulted on this EP and others.
- On 23 October 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.3)
- On 4 November 2024, Woodside emailed NYFL in response to statements and claims made in NYFL's email on 21 October 2024 (SI Report, reference 40.3). The email included the following:
  - **(2)** Woodside's continued view that NYFL's cost estimates and rates are excessive, and the rates quoted by NYFL related to the North West Shelf agreements and were not consistent with reasonable rates for enabling and supporting consultation on this EP. Woodside also noted that the rates quoted by NYFL were for an initial review of a 7-page agreement.
  - **(1)** Woodside offered to meet and discuss the issue further and would be available to meet in-person in Roebourne (Ieramugadu), the week of 18 November 2024.
  - **(1)** Woodside confirmed that its use of email as one of the methods to engage in consultation correspondence mirrored what appears to be NYFL's primary approach of emailing consultation correspondence, and that Woodside is happy to discuss this EP and the various other EPs NYFL has listed in its recent correspondence.
  - **(1)** Woodside reiterated that the ongoing negotiation of a consultation framework agreement can occur in parallel to consultation for EPs.
  - **(1)** Woodside included a table identifying the consultation status of each of the EPs referenced by NYFL, including this EP, outlining the consultation opening and closure dates.
  - Woodside advised that consultation for the purposes of preparation of this EP had closed, however it was amenable to providing an additional 30 days.
- On 8 November 2024, NYFL emailed Woodside requesting to meet on the 20 November 2024 and suggested Woodside approve an interim solution for external (legal) and internal cost estimates, until such a time a Board review is required and cost estimates can be determined (SI Report, reference 40.4).
- On 15 November 2024, Woodside emailed NYFL confirming the invitation to meet on 20 November 2024 and requested NYFL confirm with its legal provider that the cost estimates remain current for the consultation agreement (SI Report, reference 40.5).
- On 15 November 2024, NYFL emailed Woodside confirming NYFL's legal provider had advised the previous cost estimate remains current (SI Report, reference 40.6).
- On 20 November 2024, Woodside emailed NYFL thanking it for the meeting. **(2)** Woodside agreed to the amount for legal fees, as set out in its original estimate provided to Woodside by email on 19 March 2024, with the qualification that that amount is for the finalisation of the draft consultation agreement to be agreed between Woodside and NYFL executive staff for presentation to the NYFL Board for its consideration (SI Report, reference 40.7).
- On 21 November 2024, Woodside became aware that the cultural protocols associated with Sorry Business were in place. Woodside understood this information was relevant for Woodside's consultation with NYFL and has minimised contact as a sign of respect (SI Report, reference 40.8).
- **(1)** On 5 December 2024, Woodside emailed NYFL in response to its correspondence of 21 October 2024 (SI report, reference 40.9). Matters relevant to this EP included:
  - Woodside had met with NYFL on 20 November 2024 to discuss progressing the Consultation Framework Agreement and had agreed a way forward.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Woodside did not agree with NYFL's assertion that consultation for this EP and others had not commenced.
  - Woodside confirmed that consultation for this EP was complete and was now closed.
  - Woodside had continued to consult and engage with NYFL via email as this appeared to be NYFL's preferred and primary method of consulting with Woodside on EPs
  - Woodside was open to meet as part of its ongoing consultation with NYFL.
  - Woodside reiterated that ongoing negotiation of a consultation framework agreement could and continued to occur in parallel to consultation for EPs, including this EP, and that a consultation framework agreement was not a prerequisite to consultation.
  - Woodside attached a summary of the consultation that had occurred for the EP.
- Between 6 – 16 December 2024, Woodside and NYFL exchanged emails regarding matters relating to EP consultation, with NYFL stating it would progress consultation matters in due course (SI Report, reference 40.10 – 40.12).
- On 4 March 2025, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 46.5).
- On 5 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.6).
- On 24 March 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 46.8).
- On 26 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 46.9).
- **(2)** On 7 April 2025, NYFL emailed Woodside, in response to another EP, advising that NYFL will be meeting with its legal advisors regarding the consultation agreement and will send the agreement to Woodside in due course (SI Report, reference, 40.13).
- On 7 April 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 46.10).
- On 8 April 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 46.11).
- **(2)** On 10 April 2025, NYFL emailed Woodside a draft consultation agreement, previously provided by Woodside which incorporated NYFL changes (SI Report, reference 40.14).
- **(2)** On 24 April 2025, NYFL emailed Woodside regarding an unrelated EP to note that it believed that NYFL had not been consulted and explained that NYFL looks forward to consulting on EPs once the consultation agreement between NYFL and Woodside has been progressed (SI Report, reference 40.15).
- **(2)** On 28 April 2025, NYFL emailed Woodside a response to a follow-up email about an unrelated EP and another (SI Report, reference 40.16). NYFL noted it looked forward to progressing the draft consultation agreement.
- **(2)** On 15 June 2025, Woodside emailed NYFL amendments to the draft consultation agreement (SI Report, reference 40.17). In the email Woodside reiterated that consultation for the preparation of environment plans occurs concurrently with agreement negotiations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** On 16 June 2025, NYFL emailed Woodside to acknowledge receipt of Woodside's amendments to the draft consultation agreement (SI Report, reference 40.18).
- **(2)** On 16 June 2025, NYFL emailed Woodside regarding an unrelated EP. NYFL stated that a consultation agreement is the appropriate framework to engage in consultation and provided availability to discuss the consultation agreement (SI Report, reference 40.19).
- **(2)** On 19 June 2025, NYFL emailed Woodside and advised Woodside's amendments to the draft consultation were under review (SI Report, reference 40.20).
- **(2)** On 3 July 2025, NYFL emailed Woodside noting that NYFL looks forward to finalising the consultation agreement and undertaking consultation in regard to an EP not related to this activity (SI Report, reference 40.21).
- (2) On 4 July 2025, Woodside emailed NYFL to reiterate that the preparation of EPs can and does occur concurrently with agreement negotiations (SI Report, reference 40.22).
- **(2)** On 24 July 2025, NYFL emailed Woodside and suggested meeting to discuss Woodside's amendments to the draft consultation agreement (SI Report, reference 40.23).
- **(2)** On 23 September 2025, NYFL emailed Woodside to follow-up on its earlier offer to meet to discuss the consultation agreement (SI Report, reference 40.24).
- (2) On 24 September 2025, Woodside emailed NYFL to confirm an online meeting could be held to discuss the consultation agreement however Woodside would not provide funding for legal advice. Woodside reminded NYFL that negotiation towards a consultation agreement can and does occur in parallel with consultation about individual EPs (SI Report, reference 40.25).
- **(2)** On 25 September 2025, NYFL emailed Woodside thanking for the response the day before and seeking further advice on funding scope (SI Report, reference 40.26).
- On 3 October 2025, Woodside emailed NYFL an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.19). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to NYFL in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NYFL to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for NYFL to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) NYFL has stated no formal consultation had taken place between NYFL and Woodside on this EP. NYFL would progress consultation on this EP once the draft consultation agreement was finalised.	**(1)** **Woodside assessment:** Woodside rejects NYFL's assertion that has not been consulted on this EP. Woodside began consulting NYFL on 8 July 2024 and has provided sufficient information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that the consultation agreement is not required to undertake and/or consult with NYFL on EPs. **Woodside response:** The information provided by Woodside meets the requirements of regulation 25 of the Environment Regulations for the reasons set out above.	**(1)** Not required.
(2) NYFL has acknowledged it supports an agreement to enable a process of consultation.	**(2)** **Woodside assessment:** Separate from consultation under Regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for consultation, however, notes that this is not required to undertake and/or complete consultation in the course of preparing this EP. Sufficient information to allow informed assessment has already been provided by other means. Woodside has an existing engagement framework in place with NYFL which enables regular (quarterly) communication about Woodside activities. Feedback from NYFL on 27 October 2023 requested Woodside develop a draft consultation framework. **Woodside response:** Woodside sent a 7-page draft consultation framework to NYFL in March 2024 for its consideration. Consultation and meetings with NYFL about the agreement are ongoing.	**(2)** Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix I). This includes continued engagement regarding the proposed Framework Agreement which would be applied to ongoing consultation for this activity. Woodside will continue to consult following acceptance of the EP, as set out in Section 5.7 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Yindjibarndi (via NYFL) for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NYFL on 27 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NYFL's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to NYFL on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to NYFL in September 2025.
  - A revised Consultation Information Sheet previously provided to NYFL, which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation on this EP with NYFL on 27 September 2024 and requested NYFL provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to NYFL for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified NYFL of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on NYFL's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NYFL's members as well as the NYFL Board.
  - Asked NYFL to advise how it would like Woodside to engage and whether NYFL's required further information.
- Woodside offered to meet with NYFL on a number of occasions and met on 20 November 2024 to discuss unrelated matters.
- Throughout the consultation period, Woodside and NYFL have exchanged multiple emails, had phone calls and meetings and have otherwise had direct contact lines to each other during the period.
- Woodside invites NYFL to Monthly Community Luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, NYFL has not raised objections or claims about the adverse impact of each activity to which this EP relates.
- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.12 Other First Nations groups

4.12.1 Save Our Songlines (SOS)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2024, Woodside emailed SOS and/or [Individual 2] (via legal representative [Individual 3]) advising of the proposed activity (Record of Consultation, reference 6.1.52), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - A request for information on the interests that SOS and its members may have within the EMBA.
  - Details of cultural values previously provided by SOS and/or [Individual 2] to Woodside during consultation for other activities that may be relevant to the proposed activity. These cultural and environmental values include cultural features associated with:
    - **(1)** Whales, as well as marine mammals, seagrass distribution, and the meeting of freshwater and saltwater was demonstrated.
    - **(2)** Songlines, dreaming and energy lines.
  - **(1, 2)** A request that SOS and/or [Individual 2] confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for this EP.
  - A request for feedback by 30 October 2024 for the purposes of preparation of this EP.
  - A request for information on how SOS and/or [Individual 2] would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with SOS and/or [Individual 2] to understand how it would like information to be managed.
  - That feedback can continue to be provided to Woodside during the life of an EP, including after EP consultation has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for SOS and/or [Individual 2] to provide information about the proposed activity to other individuals, as required.
- On 7 October 2024, legal representative [Individual 3] emailed Woodside clarifying that correspondence regarding the Scarborough EPs are to be emailed directly to the EDO, with all other matters and EP correspondence emailed directly to [Individual 2] (SI Report, reference 41.1).
- On 21 October 2024, Woodside emailed SOS and/or [Individual 2] a reminder about the proposed activity (SI Report, reference 41.2). The email included:
  - A reference to the original consultation email for this EP sent to SOS and/or [Individual 2] on 27 September 2024, which included Summary and Consultation Information Sheets and Attachment A which listed cultural values previously provided by SOS and/or [Individual 2] to Woodside.
  - A reminder that consultation for the preparation of this EP closes on 30 October 2024.
  - An update on the activity's well location co-ordinates and water depths.
  - A request for information on how SOS and/or [Individual 2] would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with SOS and/or [Individual 2] to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A request for SOS and/or [Individual 2] to provide information about the proposed activity to other individuals, as required.
- On 30 October 2024, legal representative [Individual 3] emailed Woodside informing that SOS and/or [Individual 2] had requested consultation feedback (in an attached letter) be provided to Woodside (SI Report, reference 41.3). In the letter, SOS and/or [Individual 2], stated the comments related to the proposed activity were based on the information Woodside had provided in the Consultation Information Sheet, Summary Information Sheet and Attachment A, which were sent on 27 September 2024. The letter included the following feedback, claims or objections:
  - **(3)** SOS and/or [individual 2] was a Mardathoonera Lore woman, Elder and Traditional Custodian of Murujuga, and their connection to Murujuga had been stated in previous comments and in evidence before Federal Court and that their cultural responsibilities had been provided previously, however some were culturally sensitive and could not be shared publicly.
  - **(4)** That Woodside was aware that SOS and/or [Individual 2] opposed the existence and operation of industry on Murujuga.
  - **(5)** That SOS and/or [Individual 2] holds information that is critical for Woodside to understand the impacts of its activities and may have feedback on proposed mitigation measures.
  - **(6)** That potential impacts on cultural values were not identified or mentioned in the Consultation Information Sheet, and specifically, questioning if the cultural values outlined in Attachment A had been properly considered and mitigated in the draft EP including potential impacts on:
    - **(1)** whales, as well as marine mammals, seagrass, and the meeting of freshwater and saltwater; and
    - **(2)** Songlines, Dreaming and energy lines.
  - **(7)** Concerns that well infrastructure could remain on the seabed for a prolonged and indefinite period, which would continue to impact cultural and environmental values.
  - **(8)** Concerns about the impacts of noise and pollution from the activities in the EP on marine life.
  - **(9)** A request that the EP identify potential risks of atmospheric and greenhouse gas emissions, and appropriate measures to mitigate and manage these risks, including the resumption of the TPA03 well in the Tidepole field, be implemented.
  - **(2)** That cultural and environmental values are one, and that the Dreaming stories and Songlines can be, and are being, disrupted.
  - **(10)** That Woodside had declined to meet the costs for consultation with [Individual 2] despite their requests that Woodside pay for their attendance for in-person consultation.
- On 20 December 2024, Woodside emailed SOS and/or [Individual 2] responding to its 30 October 2024 correspondence (SI Report, reference 40.4). Woodside advised SOS and/or [Individual 2] that:
  - Consultation for this EP closed on 30 October 2024, following a consultation period that was clearly communicated and confirmed on 27 September 2024, when Woodside emailed SOS and/or [Individual 2] to seek feedback on the EP. This included the provision of the Consultation Information Sheet about the EP, a Summary Information Sheet about the EP, and an attachment outlining the information and topics [Individual 2] had provided in relation to SOS's and/or [Individual 2] cultural values relevant to this activity.
  - Feedback could continue to be provided during the life of an EP, including after consultation for the purposes of preparation of the EP had closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - Woodside continues to receive, assess and respond to feedback and comments from relevant persons throughout the life of the EP. Should feedback be received following the acceptance of an EP, that Woodside will apply its Management of Change and Review process as appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(3)** Woodside acknowledged that [Individual 2] had traditional connections to Murujuga and that Woodside maintained, as confirmed in previous correspondence with [Individual 2], that Woodside had observed consultation protocols relating to confidentiality of culturally sensitive information shared by SOS and/or [Individual 2], and that:
  - SOS and/or [Individual 2] was deciding not to share culturally sensitive information and was withholding it from consultation on this EP, and as previously advised the result may be that Woodside may not have complete information about how their functions, interests and activities may be affected.
  - That Woodside had previously raised this during consultation with SOS and/or [Individual 2] and confirmed it was an issue with implications addressed in Munkara, including that:
    - In Munkara, the Judge considered the word "new" as it relates to new information or risks arising in relation to an environment plan. Her Honour held that this word should not be construed to include "a risk that was known by the relevant person to exist at the time of the reg 11A [now section 25] consultative process, and peculiarly within the relevant person's knowledge, and yet not previously disclosed at the time of those processes by that person when afforded the opportunity…" (paragraph 228).
    - Her Honour also contemplated the mischief that could occur in instances where a "relevant person, in fact consulted, has withheld disclosure of critical information about a risk, only to disclose it after the detailed, lengthy and resource intensive processes" (paragraph 229).
  - If SOS and/or [Individual 2] did not feel comfortable sharing information with Woodside, alternatives were available including the provision of information direct to NOSPEMA and providing a link to NOPSEMA's policy, 'Managing gender-restricted information'.
- **(4)** Woodside noted SOS and/or [Individual 2]'s opposition to the existence and operation of industry on Murujuga. Woodside confirmed it had previously consulted with SOS and/or [Individual 2] over a number of years regarding Woodside's EPs, as well as ensuring that SOS and/or [Individual 2]'s feedback raised in consultation for a number of activities had been assessed and incorporated in EPs, where relevant or appropriate.
- **(5)** Woodside noted that SOS and/or [Individual 2] may have feedback on proposed mitigation measures and confirmed that SOS and/or [Individual 2]'s participation in consultation was voluntary and there was no obligation on SOS and/or [Individual 2] to provide the information to Woodside, however Woodside maintained its position as outlined above in relation to withholding information known by a relevant person.
- **(6)** Woodside acknowledged it had previously consulted extensively with SOS and/or [Individual 2] and used feedback to inform EPs, including this one, confirming SOS and/or [Individual 2] had raised:
  - **(1, 2)** Cultural features associated with whales, as well as marine mammals, seagrass, Songlines, dreaming and energy lines.
  - **(1)** The meeting of freshwater and saltwater was demonstrated.
- **(7)** Woodside noted SOS and/or [Individual 2]'s feedback, claims and objections relating to:
  - Impacts to the Earth's core. Woodside advised it considers that there will be no impacts to the Earth's core or disruption to geographical formations, as no drilling activities are contemplated in this EP.
  - Underwater Cultural Heritage (UCH), confirming that Woodside applied the *Assessing and Managing Impacts to Underwater Cultural Heritage in Australian Waters – Guidelines on the application of the Underwater Cultural Heritage Act 2018* (DCCEEW, 2024) including engaging specialists to complete archaeological assessments prior to seabed disturbance, providing UCH inductions to relevant offshore crew, and implementing an UCH Unexpected Finds Procedure.
  - Seabed disturbance, confirming Woodside would assess the potential impact or risks in Section 6 of the EP and had conducted a thorough assessment of impacts to seabed disturbance and benthic habitat. Woodside advised it had also adopted appropriate controls to mitigate risks and considered the proposed controls in this EP were appropriate to reduce environmental impact and risk to as low as reasonably practicable (ALARP) and acceptable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(5)** Woodside had complied with its decommissioning obligations under the *Offshore Petroleum and Greenhouse Gas Storage Act 2006* (OPGGS Act) through the development of this progressive decommissioning EP and would assess the potential impact or risk from the continued presence of well infrastructure in this EP.
- **(8)** Woodside had conducted a thorough assessment of impacts from the activities on marine life, in accordance with the requirements of the OPPGS regime, and referred to SOS and/or [Individual 2]'s previous feedback on other EPs, as well as feedback on this EP, to assess risks and mitigations to reduce impacts to cultural and environmental values. Woodside would assess and record those cultural and environmental values in this EP.
- **(9)** Woodside has conducted assessments of impacts from routine and non-routine atmospheric emissions, in accordance with the requirements of the OPPGS regime. Woodside would include in this EP an environment performance objective (EPO) and controls to ensure atmospheric emissions were limited to those necessary to maintain well integrity and complete the Petroleum Activities Program. Woodside confirmed the impact assessment for this EP had also determined that the potential risk of atmospheric and GHG emissions was a localised, short-term decrease in air quality and that emissions had been assessed in already approved EPs.
- **(2)** Woodside acknowledged and confirmed that culture and environment are one, and there was no separating the concepts, and confirmed that it had previously consulted with SOS and/or [Individual 2] on environmental matters relating to other EPs.
- **(2)** Woodside confirmed it had assessed and considered the information raised by SOS and/or [Individual 2] regarding Songlines and disruption to Songlines, which had been assessed in this EP and included where relevant. Woodside confirmed that risks or impacts to Songlines from this activity were anticipated to be negligible.
- **(10)** Woodside noted SOS and/or [Individual 2]'s position regarding attendance fees and confirmed Woodside's position that attendance fees would not be provided.

- On 3 October 2025, Woodside emailed SOS and/or [Individual 2] an update about the proposed activity, which also included information about activities within another decommissioning EP (Record of Consultation, reference 6.2.3.20). The email outlined:
  - A reference to the original consultation information for this EP and the other activity sent to SOS and/or [Individual 2] in September 2024.
  - That both EPs had been submitted to NOPSEMA for assessment, however Woodside had determined that the activities within the other decommissioning EP were not required until a later date.
  - That while the activities described in both EPs are stand-alone decommissioning projects, there are certain activities described in each EP that are interdependent on one another. As a result, information Woodside had provided to stakeholders during consultation about activities relating to this EP needed to be updated.
  - An update on the proposed activity's scope of work.
  - An updated Consultation Information sheet is available on Woodside's website.
  - A request for any additional feedback by 17 October 2025 for the purposes of preparation of this EP.
  - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with SOS and/or [Individual 2] to understand how it would like information to be managed.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - A request for SOS and/or [Individual 2] to provide information about the proposed activity to others as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	**(1)**	**(1)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

SOS and/or [Individual 2] has an interest in marine mammals, including the migratory patterns of whales, dugongs and turtles, seagrass distribution, and the meeting of freshwater and saltwater was demonstrated.	**Woodside assessment**: Woodside notes that some marine species hold spiritual and cultural importance to SOS and/or [Individual 2]. Woodside has considered SOS's and/or [Individual 2] topics of interest and shared relevant information in relation to a previous EP, with SOS and/or [Individual 2] relating to these interests, including controls put in place to manage risks and impacts to them. **Woodside response**: During consultation on a previous EP, Woodside discussed controls put in place to manage impacts and risks relating to their spiritual and cultural connection to the environment. Woodside has implemented controls to reduce potential risks and impacts to ecological and cultural values to ALARP and to an acceptable level.	Woodside has updated Section 4.9.1: Cultural values and heritage, to record these cultural interests. These are assessed in Section 6 with appropriate controls implemented. Assessment of potential impacts to cultural values are described in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria of the EP.
(2) SOS and/or [Individual 2] noted there were cultural features associated with Songlines, dreaming and energy lines; and that cultural and environmental values are one, and that the Dreaming stories and Songlines can be, and are being, disrupted.	**(2)** **Woodside assessment**: Woodside notes feedback from SOS and/or [Individual 2] about Songlines and energy lines. Woodside has consistently sought to understand the nature of these values to ensure impacts to these values can be minimised. SOS and/or [Individual 2] has declined to provide further information on these values. **Woodside response**: In any event, Woodside has sought to include controls that seek to reduce risks and impacts to ALARP and acceptable levels.	**(2)** Woodside has considered SOS's and/or [Individual 2] feedback and updated Section 4.9.1: Cultural values and heritage, to record topics of interest and cultural values, including Songlines and energy lines. These are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria, under Songlines with appropriate controls implemented. At this stage, Woodside has not been provided with specific information on these potential values to enable a more fulsome assessment.
(3) SOS and/or [Individual 2] stated that as a Mardathoonera Lore woman, Elder and Traditional Custodian of Murujuga, their connection and cultural responsibilities to Murujuga has previously been provided, however some were culturally sensitive and could not be shared publicly.	**(3)** **Woodside assessment**: Woodside notes SOS and/or [Individual 2]'s connection to Murujuga and concern about the sharing of culturally sensitive information. **Woodside response**: As has been confirmed in previous consultation correspondence and engagements, Woodside maintains that it has observed the consultation protocols between SOS and/or [Individual 2] and Woodside, relating to confidentiality	**(3)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	of culturally sensitive information shared by SOS and/or [Individual 2]. Woodside reiterates that if SOS and/or [Individual 2] are not comfortable with sharing information with Woodside, alternatives are available via NOPSEMA.	
(4) SOS and/or [Individual 2] are opposed to the existence and operation of industry on Murujuga.	**(4)** **Woodside assessment**: Woodside notes SOS and/or [Individual 2]'s opposition to the existence and operation of industry on Murujuga. **Woodside response**: Woodside confirms it has previously consulted with SOS and/or [Individual 2] over a number of years regarding Woodside's EPs, as well as ensuring that SOS and/or [Individual 2]'s feedback raised in consultation for a number of activities had been assessed and incorporated in EPs, where relevant or appropriate.	**(4)** Not required.
(5) SOS and/or [Individual 2] holds information that is critical for Woodside to understand the impacts of its activities and may have feedback on proposed mitigation measures.	**(5)** **Woodside assessment**: Woodside confirms it has previously consulted extensively with SOS and/or [Individual 2] over a number of years on Woodside environment matters and EPs. **Woodside response**: The information and items SOS and/or [Individual 2] has previously raised during consultation have been assessed and incorporated into this EP, where relevant or appropriate. Woodside noted that SOS and/or [Individual 2] may have feedback on proposed mitigation measures and confirmed that SOS and/or [Individual 2]'s participation in consultation was voluntary and there was no obligation on SOS and/or [Individual 2] to provide the information to Woodside, however Woodside maintained its position as outlined in **(3)** in relation to withholding information known by a relevant person.	**(5)** Any known impacts to potential to Cultural Features and Heritage Values are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria of the EP with appropriate controls adopted including Management of Change and New Knowledge processes to capture new cultural values or information provided during consultation.
(6)	**(6)**	**(6)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

SOS and/or [Individual 2] stated that the potential impacts on cultural values were not identified or mentioned in the Consultation Information Sheet, and specifically, questioned if the cultural values outlined by Woodside had been properly considered and mitigated in the draft EP including potential impacts on: • **(1)** whales, as well as marine mammals, seagrass, and the meeting of freshwater and saltwater; and • **(2)** Songlines, dreaming and energy lines.	**Woodside assessment:** Woodside disputes SOS and/or [Individual 2] assertion that it has not assessed potential impacts on marine species including whales, and Songlines. Woodside notes SOS and/or [Individual 2] have previously been consulted with extensively their feedback has been used to inform EPs, including this one. **Woodside response**: Woodside has used previous feedback on other EPs, as well as feedback on this EP, to inform Woodside on the cultural features and heritage values of the environment, and to consider and assess risks and mitigations to cultural features and heritage values.	Woodside has assessed and recorded cultural and environmental values in this EP in Section 4.9.1: Cultural values and heritage and Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(7) SOS and/or [Individual 2] are concerned that well infrastructure could remain on the seabed for a prolonged and indefinite period, which would continue to impact cultural and environmental values.	**(7)** **Woodside assessment**: Woodside notes SOS and/or [Individual 2]'s concerns regarding well infrastructure on the seabed for prolonged and indefinite periods, which could impact cultural and environmental values. **Woodside response**: In response to SOS and/or [Individual 2]'s feedback, claims and objections: • Woodside is complying with its decommissioning obligations under the OPPGS Act, through the development of this progressive decommissioning EP. • Woodside advised it considers that there will be no impacts to the Earth's core or disruption to geographical formations, as no drilling activities are contemplated in this EP. • In regards to Underwater Cultural Heritage (UCH), Woodside has applied the Assessing and *Managing Impacts to Underwater Cultural Heritage in Australian Waters – Guidelines on the application of the Underwater Cultural Heritage Act 2018 (DCCEEW, 2024*) including engaging specialists to complete archaeological assessments prior to seabed	**(7)** Woodside has assessed the potential impact or risk from the continued presence of well infrastructure in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria, in the EP. This includes controls to manage physical presence and ongoing management and maintenance of infrastructure, to reduce impacts to cultural and environmental values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	disturbance, providing UCH inductions to relevant offshore crew, and implementing an UCH Unexpected Finds Procedure. • Seabed disturbance, confirming Woodside has assessed the potential impact or risks to seabed disturbance in Section 6 of the EP and had conducted a thorough assessment of impacts to seabed disturbance and benthic habitat. Woodside advised it had also adopted appropriate controls to mitigate risks and considered the proposed controls in this EP were appropriate to reduce environmental impact and risk to as low as reasonably practicable (ALARP) and acceptable.	
(8) SOS and/or [Individual 2] are concerned about the impacts of noise and pollution from the activities in the EP on marine life.	**(8)** **Woodside assessment:** Woodside notes SOS and/or [Individual 2]'s concerns about noise and pollution on marine life and has addressed these concerns in the EP. **Woodside response**: Woodside had conducted a thorough assessment of impacts from the activities on marine life, in accordance with the requirements of the OPPGS regime and assessed risks and mitigations to reduce impacts to cultural and environmental values, which will be recorded in the EP.	**(8)** Woodside has assessed assess and recorded cultural and environmental values in this EP in Section 4.9.1: Cultural values and heritage, and Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(9) SOS and/or [Individual 2] requested that the EP identify potential risks of atmospheric and greenhouse gas emissions, and appropriate measures to mitigate and manage these risks, including the resumption of the TPA03 well in the Tidepole field, be implemented.	**(9)** **Woodside assessment**: Woodside acknowledges SOS and/or [Individual 2] request to identify the potential risks of atmospheric and greenhouse gas emissions, and appropriate measures to mitigate and manage these risks. **Woodside response**: Woodside has conducted assessments of impacts from routine and non-routine atmospheric emissions, in accordance with the requirements of the OPPGS regime. Woodside has include in this EP an Environment Performance	**(9)** This EP will include a EPO) and controls to ensure atmospheric emissions are limited to those necessary to maintain well integrity and complete the Petroleum Activities Program. See Section 6.6.5 in this EP. This EP will also build on risk, impact and control information included in the publicly available TPA03 Well Intervention Environment Plan, Revision 3, accepted by NOPSEMA on the 28 November 2023. A review of technologies for reducing GHG emissions will be considered in the ALARP assessment in this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Objective (EPO) and controls to ensure atmospheric emissions were limited to those necessary to maintain well integrity and complete the Petroleum Activities Program. Woodside confirmed the impact assessment for this EP had also determined that the potential risk of atmospheric and GHG emissions was a localised, short-term decrease in air quality and that emissions had been assessed in already approved EPs. Woodside notes that GHG emissions from the start-up and recommencement of production from TPA03 has been assessed in the following approved EPs: • TPA03 Well Intervention Environment Plan, Rev 3, accepted 28 November 2023. • Goodwyn Alpha (GWA) Facility Operations Environment Plan, Rev 12, accepted 3 March 2022.	
(10) SOS and/or [Individual 2] claimed that Woodside had declined to meet the costs for consultation despite SOS and/or [Individual 2]'s requests that Woodside pay for their attendance for in-person consultation.	**(10)** **Woodside assessment**: Woodside provides reasonable funding allocation for consultation and notes SOS and/or [Individual 2]'s position regarding attendance fees. **Woodside response**: After assessing the claims and feedback from SOS and/or [Individual 2], Woodside confirmed its position that attendance fees would not be provided.	**(10)** Not required.
Woodside has addressed feedback, objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report: Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with SOS and/or [Individual 2] for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 27 September 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to SOS and/or [Individual 2] on 27 September 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of SOS and/or [Individual 2]'s interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside provided updated information to SOS and/or [individual 2] on 3 October 2025 which included:
  - A reference to the original consultation email for this EP sent to SOS and/or [individual 2] in September 2025.
  - A revised Consultation Information Sheet previously provided to SOS and/or [individual 2], which provided updated information relating to the summary of key activities and the proposed activity's scope of work.

Reasonable Period

A reasonable period for consultation in the preparation of this EP has been provided because:

- Woodside commenced consultation on this EP with SOS and/or [Individual 2] on 27 September 2024 and requested SOS and/or [Individual 2] provide feedback by 30 October 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has addressed and responded to SOS and/or [Individual 2] for 13 months, demonstrating a "reasonable period" of consultation.
- When Woodside notified SOS and/or [Individual 2] of an activity update on 3 October 2025, Woodside provided a further 2-week period for any additional feedback for the purposes of preparation of this EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on SOS's and/or [Individual 2] preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has made information on this EP publicly available for 13 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the Koori Mail (2 October 2024) and National Indigenous Times (24 September 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 27 September 2024:
  - Included a general email address and telephone number for Woodside. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with SOS and/or [Individual 2].
  - Asked SOS and/or [Individual 2] to advise how it would like Woodside to engage and whether SOS and/or [Individual 2] required further information.
  - Woodside offered to meet with SOS and/or [Individual 2].
  - Throughout the consultation period, Woodside and SOS and/or [Individual 2] have exchanged emails and had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 13 months, SOS and/or [Individual 2] has raised objections or claims about the adverse impact of each activity to which this EP relates.
- SOS and/or [Individual 2] has advised Woodside that:
  - They have an interest in marine mammals, including the migratory patterns of whales, dugongs and turtles, seagrass distribution, and the meeting of freshwater and saltwater was demonstrated. Woodside has updated Section 4.9.1: Cultural values and heritage, to record these cultural interests. These are assessed in Section 6 with appropriate controls implemented.
  - Assessment of potential impacts to cultural values are described in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria of the EP.
  - There were cultural features associated with Songlines, dreaming and energy lines. Woodside has updated Section 4.9.1: Cultural values and heritage, to record topics of interest and cultural values, including Songlines and energy lines. These are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria, under Songlines with appropriate controls implemented.
  - They are a Mardathoonera Lore woman, Elder and Traditional Custodian of Murujuga, their connection and cultural responsibilities to Murujuga has previously been provided, however some were culturally sensitive and could not be shared publicly. Woodside maintains that it has observed the consultation protocols between SOS and/or [Individual 2] and Woodside, relating to confidentiality of culturally sensitive information shared by SOS and/or [Individual 2].
  - They are opposed to the existence and operation of industry on Murujuga. Woodside confirms it has previously consulted with SOS and/or [Individual 2] over a number of years regarding Woodside's EPs, as well as ensuring that SOS and/or [Individual 2]'s feedback raised in consultation for a number of activities had been assessed and incorporated in EPs, where relevant or appropriate.
  - They hold information that is critical for Woodside to understand the impacts of its activities and may have feedback on proposed mitigation measures. Woodside has assessed and incorporated this feedback in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria of the EP.
  - The potential impacts on cultural values were not identified or mentioned in the Consultation Information Sheet. Woodside has assessed and recorded cultural and environmental values in this EP in Section 4.9.1: Cultural values and heritage and Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Well infrastructure could remain on the seabed for a prolonged and indefinite period, which would continue to impact cultural and environmental values. Woodside maintained it is complying with its decommissioning activities under the legislation, advised there was no impact to the Earth's core, and had engaged specialists to complete archaeological assessments prior to seabed disturbance. Woodside has assessed the potential impact or risk from the continued presence of well infrastructure in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
- The EP identify potential risks of atmospheric and greenhouse gas emissions, and appropriate measures to mitigate and manage these risks. Woodside has included in the EP an environment performance objective (EPO) and controls to ensure atmospheric emissions are limited to those necessary to maintain well integrity and complete the Petroleum Activities Program. See Section 6.6.5 in this EP.

- Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).

4.13 Local government and elected parliamentary representatives, community groups or organisations

4.13.1 Broome Chamber of Commerce and Industry, Carnarvon Chamber of Commerce and Industry, Exmouth Chamber of Commerce and Industry, Karratha and Districts Chamber of Commerce and Industry, Onslow Chamber of Commerce and Industry and Port Hedland Chamber of Commerce and Industry (CCI)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed the CCIs advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed the CCIs an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed the CCIs an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with relevant CCIs for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given the CCIs sufficient information to allow the CCIs to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to the CCIs on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed the CCIs a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to relevant CCIs advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed relevant CCIs 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed the CCIs a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with relevant CCIs is appropriate and adapted to the nature of interests of the CCIs:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding the CCIs of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as the CCIs did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on the CCIs' functions, interests or activities.

4.13.2 Exmouth Community Liaison Group (Exmouth CLG)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Exmouth CLG advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Exmouth CLG an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 12 November 2024, Woodside presented to the Exmouth CLG (SI report, reference 43.1) on Woodside activities, including this EP. Woodside presented a slide listing EPs on which the CLG members had recently been consulted and EPs currently under consultation.
  - No feedback was provided on this EP.
  - 13 individuals attended the meeting representing:
    - Shire of Exmouth
    - Gascoyne Development Commission
    - Exmouth Chamber of Commerce and Industry
    - Ningaloo Coast World Heritage Advisory Council / NOPSEMA Community and Environment Reference Group
    - West Australian Country Health Service
    - Bhagwan Marine
    - PHI Helicopters
    - Exmouth Volunteer Marine Rescue
    - CSIRO

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

    - Santos.
- On 2 December 2024, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 13 March 2025, Woodside presented to the Exmouth CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 43.2).
- Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs and an overview of another EP. In addition, slides on upcoming EP's were presented to the group.
  – The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
  – 7 individuals attended the meeting representing:
    - Shire of Exmouth
    - Gascoyne Development Commission
    - Exmouth Chamber of Commerce and Industry
    - Australia's Coral Coast/Regional Development Authority
    - Exmouth community
    - PHI Helicopters
    - Santos
- No feedback was provided for this EP.
- On 22 April 2025, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 26 June 2025, Woodside presented to the Exmouth CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 43.3).
- Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs and an overview of another EP. In addition, slides on past EPs were presented to the group.
- The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
- 8 individuals attended the meeting representing:
    - Shire of Exmouth
    - Exmouth Chamber of Commerce and Industry
    - Australia's Coral Coast/Regional Development Authority
    - PHI Helicopters
    - Local councillor
    - St John Exmouth Subcentre
    - Exmouth Freight and Logistics

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Santos.

- No feedback was provided for this EP.
- On 10 July 2025, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 3 October 2025, Woodside emailed CLG members an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Exmouth CLG for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Exmouth CLG sufficient information to allow Exmouth CLG to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Exmouth CLG on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GHG Activities, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Exmouth CLG a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Exmouth CLG advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Exmouth CLG 30 days for consultation.
- It has been 13 months since consultation commenced.
- In this context, Woodside allowed Exmouth CLG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Exmouth CLG a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding Exmouth CLG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as Exmouth CLG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Exmouth CLG's functions, interests or activities.

4.13.3 Karratha Community Liaison Group (Karratha CLG)

Summary of information provided and record of consultation for this EP:

- On 20 September 2024, Woodside presented to the Karratha CLG on EP consultation requirements and provided an update on upcoming Woodside activities, including this EP (SI report, reference 44.1).
  - No feedback was provided on this EP.
  - Woodside also presented on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. The slides included a QR code and a URL to the Consultation Activities page of the Woodside website. Copies of the latest edition of *Let's Talk* were provided in hard copy and sent electronically with the minutes and pack.
  - 8 CLG members attended the meeting representing:
    - City of Karratha – staff representatives
    - Dampier Community Association

  - Pilbara Development Commission
  - Department of Education – staff representatives
  - Karratha and Districts Chamber of Commerce and Industry
  - Pilbara Ports Authority
- On 27 September 2024, Woodside emailed Karratha CLG advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Karratha CLG an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 13 October 2024 Woodside's September presentation to the CLG was emailed to the CLG regardless of their attendance at the meeting.
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 29 November 2024, Woodside presented to the Karratha CLG on EP consultation requirements (SI report, reference 44.2).
  - No feedback was provided on our consultation process.
  - Woodside also presented on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. The slides included a QR code and a URL to the Consultation Activities page of the Woodside website. Copies of the latest edition of *Let's Talk* were provided in hard copy and sent electronically with the minutes and pack.
  - 8 CLG members attended the meeting representing:
    - City of Karratha – staff representatives
    - Pilbara Development Commission
    - Murujuga Aboriginal Corporation
    - Regional Development Australia Pilbara
    - Horizon Power
- On 18 December 2024 Woodside's November presentation to the CLG was emailed to the CLG regardless of their attendance at the meeting.
- On 20 March 2025, Woodside presented to the Karratha CLG on EP consultation requirements and Woodside activities including activities for this EP (SI Report, reference 44.3).
  - Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs and an overview of another EP. In addition, slides on upcoming EP's were presented to the group.
  - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website. Copies of the latest edition of *Let's Talk* were provided in hard copy and sent electronically with the minutes and slide pack.
  - 8 CLG members attended the meeting representing:
    - City of Karratha – staff representatives
    - Murujuga Aboriginal Corporation

        - Karratha and Districts Chamber of Commerce and Industry
        - Department of Education
        - Development WA
        - Dampier Community Association
    - No feedback was provided for this EP.
- On 20 May 2025, Woodside's March presentation to the CLG was emailed to the CLG members regardless of their attendance at the meeting.
- On 20 June 2025, Woodside presented to the Karratha CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 44.4).
    - Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs and an overview of the another EP. In addition, Woodside flagged upcoming consultation on upcoming EPs.
        - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
        - 9 CLG members attended the meeting representing:
            - City of Karratha
            - Department of Education
            - Murujuga Aboriginal Corporation
            - Department of Communities
            - Development WA
            - Dampier Community Association
            - Karratha Central Healthcare
            - Karratha & Districts Chamber of Commerce and Industry
            - Community member.
    - No feedback was provided for this EP.
- On 26 September 2025, Woodside's June presentation to the CLG was emailed to the CLG members regardless of their attendance at the meeting.
- On 25 September 2025, Woodside presented to the Karratha CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 44.5).
    - Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs and an overview of the NWS Phase 1 P&A and TPA03 Well Intervention EP-Update, and other EPs.
        - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
        - 9 CLG members attended the meeting representing:
            - City of Karratha

- Pilbara Ports
- Department of Creative Industries, Tourism and Sport
- Community member x 2

– No feedback was provided for this Environment Plan.

- On 26 September 2025, the following day, Woodside's September presentation summary pack to the CLG was emailed to the CLG members regardless of their attendance at the meeting.
- On 3 October 2025, Woodside emailed CLG members an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Karratha CLG for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Karratha CLG sufficient information to allow Karratha CLG to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Karratha CLG on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GHG Activities, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Karratha CLG a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Karratha CLG advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Karratha CLG 30 days for consultation.
- It has been 13 months since consultation commenced.
- In this context, Woodside allowed Karratha CLG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Karratha CLG a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding Karratha CLG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as Karratha CLG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Karratha CLG's functions, interests or activities.

4.13.4 City of Karratha, Shire of Broome, Shire of Carnarvon and Shire of Exmouth

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2024, Woodside emailed the City of Karratha and Shires of Broome, Carnarvon and Exmouth advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed the City of Karratha and Shires of Broome, Carnarvon and Exmouth an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed the City of Karratha and Shires of Broome, Carnarvon and Exmouth an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with the City of Karratha and Shires of Broome, Carnarvon and Exmouth for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given the City of Karratha and Shires of Broome, Carnarvon and Exmouth sufficient information to allow the City of Karratha and Shires of Broome, Carnarvon and Exmouth to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to the City of Karratha and Shires of Broome, Carnarvon and Exmouth on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed the City of Karratha and Shires of Broome, Carnarvon and Exmouth a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to the Shires advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed the Shires 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed the Shires a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with the City of Karratha and Shires of Broome, Carnarvon and Exmouth is appropriate and adapted to the nature of interests of the City of Karratha and Shires of Broome, Carnarvon and Exmouth:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding the City of Karratha and Shires of Broome, Carnarvon and Exmouth of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as the City of Karratha and Shires of Broome, Carnarvon and Exmouth did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on the City of Karratha and Shires of Broome, Carnarvon and Exmouth's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.13.5 Shire of Ashburton

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed the Shire advising of the proposed activity (Record of Consultation, reference 6.1.28), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed the Shire an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.12).
- On 3 October 2025, Woodside emailed the Shire an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with the Shires for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given the Shires sufficient information to allow the Shires to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to the Shires on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed the Shires a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to the Shires advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed the Shires 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed the Shires a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with the Shires is appropriate and adapted to the nature of interests of the Shires:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding the Shires of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as the Shires did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on the Shires' functions, interests or activities.

4.13.6 Town of Port Hedland

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 15 November 2024, Woodside emailed the Town of Port Hedland advising of the proposed activity (Record of Consultation, reference 6.1.29), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 2 December 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.4).
- On 4 November 2025, Woodside emailed the Town of Port Hedland an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.4).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with the Town of Port Hedland for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given the Town of Port Hedland sufficient information to allow the Town of Port Hedland to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to the Town of Port Hedland on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed the Town of Port Hedland a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to the Town of Port Hedland advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed the Town of Port Hedland 30 days for consultation.
- Consultation for this EP commenced 12 months ago.
- In this context, Woodside allowed the Town of Port Hedland a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with the Town of Port Hedland is appropriate and adapted to the nature of interests of the Town of Port Hedland:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 2 December 2024, reminding the Town of Port Hedland of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as the Town of Port Hedland did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on the Town of Port Hedland's functions, interests or activities.

4.14 Other non-government groups or organisations (NGOs) or individuals

4.14.1 Friends of the Earth Australia (FOEA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed FOEA advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 October 2024, Woodside emailed FOEA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed FOEA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with FOEA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given FOEA sufficient information to allow FOEA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to FOEA on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed FOEA a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to FOEA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed FOEA 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed FOEA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with FOEA is appropriate and adapted to the nature of interests of FOEA:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding FOEA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as FOEA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on FOEA's functions, interests or activities.

4.14.2 The Wilderness Society

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed TWS advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 11 October 2024, Woodside emailed TWS an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 4 November 2024, TWS responded to Woodside (SI Report, reference 14.1) and advised:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** TWS was a relevant person
- **(2)** TWS has a particular interest in ensuring structures are removed during decommissioning to protect the marine environment from the risk of contamination.
- TWS objected to the proposal to leave wellheads temporarily on the seabed for later recovery. *[as a result of changes to the activities covered under this EP this feedback is no longer relevant to this EP]*
- The wellheads should be removed at the time of cutting as leaving them on the sea floor delays their removal, risking the possibility of being permanently abandoned and increases risk of contamination. *[as a result of changes to the activities covered under this EP this feedback is no longer relevant to this EP]*

- On 20 November 2024, Woodside responded to TWS (SI Report, reference 14.2) and:
  - **(1)** Thanking TWS for consulting with Woodside as a relevant person.
  - **(2)** Noted TWS' concerns that placing wellheads on the seabed risks the possibility that they may be permanently abandoned and increases risk of contamination.
  - Confirmed it planned to remove the well infrastructure from the title area.
  - *[as a result of changes to the activities covered under this EP this response is no longer relevant to this EP]* Advised the method and timing for removal and recovery of well infrastructure will be dependent on technical considerations, vessel availability, opportunities for efficiencies with other decommissioning activities, suitable weather windows and health, safety and environmental considerations.
  - *[as a result of changes to the activities covered under this EP this response is no longer relevant to this EP]* Confirmed the plan is for infrastructure to remain in situ temporarily following the first stage of the plug and abandonment (P&A) activities and noted:
    - Temporary placement will not affect future removal as this included as an activity in this EP.
    - There are no assessed new or increased impacts or risks to the environment including contamination from temporary placement on the seabed while the safe removal campaign is progressed.
    - Noted the risks and impacts associated with the activity have been reduced to ALARP and an acceptable level and this EP addresses the matters raised by TWS and contains appropriate measures.
- On 3 October 2025, Woodside emailed TWS an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) The Wilderness Society (TWS) is a relevant person.	**(1)** **Woodside assessment:** Woodside uses a methodology for identifying relevant persons in accordance with regulation 25 (1). TWS was identified as relevant when applying the methodology for this EP. **Woodside response:** Woodside confirmed with The Wilderness Society it was a relevant person for this EP.	**(1)** Not required.
(2)	**(2)**	**(2)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Advised of an interest in ensuring structures are removed during decommissioning to protect the marine environment from the risk of contamination.	**Woodside assessment:** Woodside accepts TWS feedback that it has an interest in removing subsea structures due to the risk of contamination to the marine environment. **Woodside response:** Woodside noted TWS concerns that placing wellheads on the seabed risks the possibility that they may be permanently abandoned and increases risk of contamination.	Section 1.8 of the EP details future decommissioning planning of the Angel and PoG fields. Section 3.12.5 of the EP describes the removal of five Subsea Xmas Trees as an optional activity under this EP, including the option to temporarily wet park the Subsea Xmas Trees. Removal will occur within one year from conclusion of MODU activities under this EP. Section 6.6.2 of the EP demonstrates no significant impacts on benthic habitats are expected.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with TWS for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given TWS sufficient information to allow TWS to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to TWS on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community.*
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations.

- Woodside followed up to remind TWS of consultation on 22 October 2024.
- On 4 November 2024, TWS shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable TWS to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 20 November 2024.

Reasonable Period

Woodside allowed TWS a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to TWS advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed TWS 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed TWS a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with TWS is appropriate and adapted to the nature of interests of TWS:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to TWS as evidenced by its response on 4 November 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- TWS provided an objection to leaving infrastructure on the seabed for later recovery. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to the above objection and feedback from TWS and assessed the merits of the objection about the adverse impact of activities to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– Made no changes or inclusions to the EP as a result of consultation with TWS because appropriate measures are already included in the EP. Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.14.3 Telstra

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Telstra advising of the proposed activity (Record of Consultation, reference 6.1.12), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- **(1)** On 4 October 2024, Telstra responded to Woodside (SI Report, reference 12.1) requesting verification of the co-ordinates for the proposed activities for this EP.
- On 11 October 2024, Woodside emailed Telstra an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- **(1)** On 11 October 2024, Woodside responded to Telstra (SI Report, reference 12.2). to advise an update had been sent earlier that day outlining changes to water depths and co-ordinates for this EP. The email also confirmed co-ordinates were offshore of the WA coast with the closest well to shore being approximately 125 km north of Dampier.
- On 3 October 2025, Woodside emailed Telstra an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Telstra requested verification of the co-ordinates for the proposed activities.	**(1)** **Woodside assessment:** Telstra alerted Woodside that the co-ordinates sent in Woodside's initial communication was incorrect. Woodside was required to provide an activity update with new co-ordinates and water depths. **Woodside response:** Woodside advised Telstra that an activity update had been issued with the correct co-ordinates and water depths.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation.	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Telstra for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Telstra sufficient information to allow Telstra to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Telstra on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 5 October 2024, Telstra shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Telstra to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 11 October 2024.

Reasonable Period

Woodside allowed Telstra a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Telstra advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Telstra 30 days for consultation.
- Consultation for this EP commenced 13 months ago.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed Telstra a reasonable period for consultation in preparation of the EP as evidenced by Telstra's response on 5 October 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Telstra is appropriate and adapted to the nature of interests of Telstra:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Telstra as evidenced by its response on 5 October 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Telstra provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Telstra and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with Telstra because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.14.4 Cape Conservation Group (CCG)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed relevant CCG advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed CCG an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed CCG an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with CCG for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given CCG sufficient information to allow CCG to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to CCG on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed CCG a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to CCG advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed CCG 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed CCG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with CCG is appropriate and adapted to the nature of interests of CCG:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- From 12 October 2024, Woodside held, or hosted information stalls at 12 community events in Dampier and Exmouth to raise awareness of the EP and provide another opportunity for feedback. These events were promoted in local newspapers and on social media.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding CCG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as CCG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on CCG's functions, interests or activities.

4.14.5 Environs Kimberley

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Environs Kimberley advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Environs Kimberley an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed Environs Kimberley an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.7.1 of the EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Environs Kimberley for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Environs Kimberley sufficient information to allow Environs Kimberley to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Environs Kimberley on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Environs Kimberley a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Environs Kimberley advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Environs Kimberley 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Environs Kimberley a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Environs Kimberley is appropriate and adapted to the nature of interests of Environs Kimberley:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding Environs Kimberley of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Environs Kimberley did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Environs Kimberley's functions, interests or activities.

4.15 Research institutes and local conservation groups or organisations

4.15.1 Australian Institute of Marine Science (AIMS)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed AIMS advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed AIMS an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1)
- **(1)** On 21 October 2024, AIMS emailed Woodside (SI Report, reference 16.1) to confirm the 4000m exclusion zone that will be in place around the proposed activities will be sufficient to manage the risk of any AIMS vessel movement occurring in the vicinity.
- **(1)** On 28 October 2024, Woodside responded to AIMS (SI Report, reference 16.2) confirming the 4000m exclusion zone will apply during the proposed activities. Woodside advised that marine notices will be issued prior to activity commencement to alert vessels that may be operating nearby.
- On 3 October 2025, Woodside emailed AIMS an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Confirmed Woodside's 4000m exclusion zone around the proposed activities would be sufficient to manage the risk of any AIMS vessel movement in the vicinity.	**(1)** **Woodside assessment:** Woodside acknowledges that AIMS has the information it needs to maintain safe navigation.	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside confirmed the exclusion zones will be communicated via marine notices prior to activity commencement.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AIMS for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AIMS sufficient information to allow AIMS to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to AIMS on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 21 October 2024, AIMS shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AIMS to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 28 October 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed AIMS a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AIMS advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AIMS 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed AIMS a reasonable period for consultation in preparation of the EP as evidenced by AIMS' response on 21 October 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AIMS is appropriate and adapted to the nature of interests of AIMS:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to AIMS as evidenced by its response on 21 October 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AIMS provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from AIMS and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with AIMS because appropriate measures are already included in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.15.2 Protect Ningaloo

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Protect Ningaloo advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Protect Ningaloo an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed Protect Ningaloo an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Protect Ningaloo for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Protect Ningaloo sufficient information to allow Protect Ningaloo to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since September 2024. Woodside gave this information to Protect Ningaloo on 27 September 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the Petroleum Activity, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the Community*.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Protect Ningaloo a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Protect Ningaloo advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Protect Ningaloo 30 days for consultation.
- Consultation for this EP commenced 13 months ago.
- In this context, Woodside allowed Protect Ningaloo a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Protect Ningaloo is appropriate and adapted to the nature of interests of Protect Ningaloo:

- Woodside published advertisements in 9 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 22 October 2024, reminding Protect Ningaloo of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Protect Ningaloo did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Protect Ningaloo's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5. TABLE 3: ENGAGEMENT REPORT WITH PERSONS OR ORGANISATIONS ASSESSED AS NOT RELEVANT

The black numbering **(N)** in the 'Summary of information provided and record of consultation for this EP' in Table 3 denotes an item raised by a stakeholder. The green numbering **(N)** in this section denotes Woodside's response to that item.

5.1 Commonwealth commercial fisheries and peak representative bodies

5.1.1 Australian Southern Bluefin Tuna Industry Association (ASBTIA)

Summary of information provided and record of consultation for this EP:

- On 21 October 2025, following advice provide by AFMA on 14 October 2025, Woodside emailed ASBTIA advising of the proposed activity update (Record of Consultation, reference 6.2.2.3) and provided a Consultation Information Sheet.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report – Consultation Complete		
While ASBTIA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Tuna Australia to provide feedback during the consultation process.		

5.1.2 Southern Bluefin Tuna Fishery, Western Skipjack Fishery and Western Tuna and Billfish Fishery

Summary of information provided and record of consultation for this EP:

- On 13 November 2025, following advice provide by Tuna Australia on 12 November 2025, Woodside emailed fishery licence holders advising of the proposed activity (Record of Consultation, reference 6.1.55), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Summary Report – Consultation Complete		
While these fishery licence holders are not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for fishery licence holders to provide feedback during the consultation process.		

5.1.3 Tuna Australia

Summary of information provided and record of consultation for this EP:

- On 21 October 2025, following advice provide by AFMA on 14 October 2025, Woodside emailed Tuna Australia advising of the proposed activity (Record of Consultation, reference 6.1.54), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 7 November 2025, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.19).
- On 12 November 2025, Tuna Australia responded to Woodside (SI Report, reference 49.1) thanking them for the email and:
  - **(1)** Introduced another individual who will be overseeing and managing energy sector consultation.
  - **(2)** Noted that Woodside had previously provided information regarding plug and abandonment of wells and suggested that conducting follow-up inspections after wells had been plugged and abandoned would demonstrate stronger environmental stewardship, referencing a paper which highlighted issues associated with abandoned and plugged wells.
  - **(3)** recommended that Woodside contact the Tuna Fishing Community using the latest mailing list to inform licence holders of its activities.
- On 13 November 2025, Woodside responded to Tuna Australia (SI Report, reference 49.2) thanking them for response and:
  - **(1)** Acknowledged the introduction of a new contact for EP consultation
  - **(2)** Noted Tuna Australia's comments regarding the management of permanently plugged and abandoned wells and:
    - Clarified that all five wells would be considered permanently abandoned following completion of plug and abandonment activities, pending formal abandonment acceptance from NOPSEMA and that ongoing monitoring and well integrity assurance requirements under the OPGGS (Resource Management and Administration) Regulations 2011 applied only to wells not permanently abandoned.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advised that the EP has a commitment to conduct ROV "as-left" surveys at the conclusion of activities, and that this approach aligned with regulatory expectations and industry practice.

– (3) Noted that Woodside had contacted licence holders in line with Tuna Australia's recommendation.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Introduced another individual who will be overseeing and managing energy sector consultation	**(1)** **Woodside assessment:** Woodside noted the new individuals who will be involved in EP consultation moving forward. **Woodside response:** Woodside acknowledged the introduction of a new contact for EP consultation.	**(1)** Not required
(2) Noted that Woodside had previously provided information regarding plug and abandonment of wells and suggested that conducting follow-up inspections after wells had been plugged and abandoned would demonstrate stronger environmental stewardship.	**(2)** **Woodside assessment:** Woodside noted Tuna Australia's suggestion regarding the management of permanently plugged and abandoned wells. **Woodside response:** Woodside noted Tuna Australia's comments on managing permanently plugged and abandoned wells, confirming that all five wells will be deemed permanently abandoned after plug and abandonment activities, pending NOPSEMA's formal acceptance. Woodside advised that ongoing monitoring and well integrity requirements under the OPGGS (Resource Management and Administration) Regulations 2011 apply only to wells not permanently abandoned. Woodside also confirmed the EP's commitment to ROV "as-left" surveys at activity completion, consistent with regulatory expectations and industry practice.	**(2)** The EP demonstrates that Woodside will undertake as-left surveys of the five wells following completion of the Petroleum Activity (see section 3.13 of the EP).
(3) Recommended that Woodside contact the Tuna Fishing Community using the latest mailing list to inform licence holders of its activities	**(3)** **Woodside assessment:** Woodside noted the recommendation and contacted the relevant fishery licence holders, in line with Tuna Australia's recommendation.	**(3)** Not required

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside noted that it had contacted licence holders in line with Tuna Australia's recommendation.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional controls or measures are required.
Summary Report – Consultation Complete		
While Tuna Australia is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Tuna Australia to provide feedback during the consultation process.		

5.2 Other non-government groups or organisations (NGOs) or individuals

5.2.1 Australian Conservation Foundation (ACF)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed ACF advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed ACF an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed ACF an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation
While ACF is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ACF to provide feedback during the consultation process.

5.2.2 Australian Centre for Corporate Responsibility (ACCR)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed ACCR advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed ACCR an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed ACCR an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Outcomes of Consultation		
While ACCR is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ACCR to provide feedback during the consultation process.		

5.2.3 Australian Marine Conservation Society (AMCS)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed AMCS advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed AMCS an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed AMCS an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Outcomes of Consultation

While AMCS is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for AMCS to provide feedback during the consultation process.

5.2.4 Conservation Council of Western Australia (CCWA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed CCWA advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed CCWA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed CCWA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation
While CCWA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CCWA to provide feedback during the consultation process.

5.2.5 Greenpeace Australia Pacific (GAP)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed GAP advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed GAP an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed GAP an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).
- On 3 October 2025, Woodside received an out of office response to the activity update (SI Report 50.1).
- On 7 October 2025, Woodside responded to GAP noting that an out of office response was received and forwarded the activity update and Consultation Information Sheet to GAP's generic mailbox for awareness (SI Report 50.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Outcomes of Consultation
While GAP is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for GAP to provide feedback during the consultation process.

5.2.6 Maritime Union of Australia (MUA)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2024, Woodside emailed the MUA advising of the proposed activity (Record of Consultation, reference 6.18), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed the MUA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed MUA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Outcomes of Consultation

While the MUA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for the MUA to provide feedback during the consultation process.

5.2.7 Market Forces

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Market Forces advising of the proposed activity (Record of Consultation, reference 6.18), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Market Forces an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.1).
- On 3 October 2025, Woodside emailed Market Forces an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Outcomes of Consultation		
While Market Forces is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Market Forces to provide feedback during the consultation process.		

5.3 Research institutes and local conservation groups or organisations

5.3.1 Commonwealth Scientific and Industrial Research Organisation (CSIRO)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed CSIRO advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed CSIRO an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.3).
- On 3 October 2025, Woodside emailed CSIRO an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Outcomes of Consultation		
While CSIRO is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CSIRO to provide feedback during the consultation process.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5.3.2 Western Australian Marine Science Institution (WAMSI)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed WAMSI advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed WAMSI an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.3).
- On 3 October 2025, Woodside emailed WAMSI an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Outcomes of Consultation

While WAMSI is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for WAMSI to provide feedback during the consultation process.

5.3.3 Curtin University

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Curtin University advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Curtin University an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.3).
- On 3 October 2025, Woodside emailed Curtin University an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Outcomes of Consultation		
While Curtin University is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Curtin University to provide feedback during the consultation process.		

5.3.4 Edith Cowan University

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Edith Cowan University advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Edith Cowan University an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.3).
- On 3 October 2025, Woodside emailed Edith Cowan University an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Outcomes of Consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While Edith Cowan University is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Edith Cowan University to provide feedback during the consultation process.

5.3.5 Murdoch University

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed Murdoch University advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed Murdoch University an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).
- On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.3).
- On 3 October 2025, Woodside emailed Murdoch University an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.

Outcomes of Consultation

While Murdoch University is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Murdoch University to provide feedback during the consultation process.

5.3.6 University of Western Australia (UWA)

Summary of information provided and record of consultation for this EP:

- On 27 September 2024, Woodside emailed UWA advising of the proposed activity (Record of Consultation, reference 6.1.26), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 October 2024, Woodside emailed UWA an activity update regarding well location coordinates and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.1.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• On 22 October 2024, as no response had been received, Woodside proactively sent a follow-up email (Record of Consultation, reference 6.3.3). • On 3 October 2025, Woodside emailed UWA an activity update regarding the changes made to the proposed activity as a result of the withdrawal of the Angel Subsea Infrastructure Removal Environment Plan and included an updated Consultation Information Sheet (Record of Consultation, reference 6.2.2.3).		
Summary of Feedback, Objection or Claim	**Assessment of Merits of Feedback, Objection or Claim and Woodside's Response**	**Inclusion in Environment Plan**
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.7.1 of the EP).	No additional measures or controls are required.
Outcomes of Consultation		
While UWA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for UWA to provide feedback during the consultation process.

6. RECORD OF CONSULTATION

6.1 Initial consultation

6.1.1 Consultation Information Sheet

Woodside Energy

CONSULTATION

INFORMATION SHEET

September 2024

NORTH WEST SHELF PHASE 1 WELL PLUG AND ABANDONMENT AND TPA03 WELL INTERVENTION ENVIRONMENT PLAN

CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an Environment Plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure the proposed activity is carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and to an acceptable level. We want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Overview

Woodside is submitting the North West Shelf (NWS) Phase 1 Well Plug and Abandonment (P&A) and TPA03 Well Intervention EP in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)*.

The EP covers:

- Permanent plugging and abandonment of five NWS production wells
- Well intervention on the TPA03 production well.

The plugging and abandonment and well intervention will be undertaken using a moored or hybrid (mooring and Dynamic Positioning (DP) capability) semi-submersible mobile offshore drilling unit (MODU) and associated support vessels.

Woodside is decommissioning redundant equipment in its operating fields. Infrastructure that remains in the Angel and Perseus-over-Goodwyn (PoG) fields will continue to be managed under the Angel Operations and Goodwyn Alpha (GWA) Operations EP, respectively.

Location

All wells are in Commonwealth waters around Woodside's existing production facilities. The closest well to shore is approximately 125 km north of Dampier as shown in **Figure 1**. The wells are in water depths ranging from approximately 77 m to 128 m. The locations of the wells are in **Table 2**.

Proposed activity

Activities under this EP include:

- the plugging and abandonment of the AP 2, AP 3, and AP 4 wells in the Angel field. These wells tie back to the Angel platform. Production from these wells has ceased and the wells have been shut in. Well infrastructure (Christmas trees and wellheads) above the mudline will be removed following plugging of these wells.
- Wellheads may either be recovered during the plugging and abandonment activities or temporarily placed on the seabed for later recovery. If Angel wellheads aren't removed by the MODU, removal will be conducted under the proposed Angel Subsea Infrastructure Removal Environment Plan.
- The plugging and abandonment of the PER02 and PER04 wells in the PoG field. These wells tie back to the Goodwyn platform. Production from these wells has ceased and the wells have been shut in. The Christmas trees may be removed following plugging of these wells. The trees may either be removed during the plugging and abandonment activities or temporarily placed on the seabed for later recovery. Removal of the PoG wellheads above the mudline will be included in a separate future approval.
- Well intervention activities at the TPA03 well in the Tidepole field will remediate a down-hole valve and restore production from the lower reservoir. The well is currently shut it; well start-up and production following intervention activities will be managed under the Goodwyn Alpha (GWA) Operations EP.
- Preparation and support for the above activities is also included in the EP. Preparation and support may include inspections, cleaning, laying and recovery of moorings for the MODU, and support whilst the MODU is in the Operational Area.

Timing and duration

The activities are planned to be done as a single campaign. Indicative timings and approximate durations are:

NWS Plug and Abandonment

- Preparatory activities: approximately 7–10 days per well between around Q2 2025 and Q4 2025.
- Plug and abandonment: approximately 19–33 days per well between around Q4 2025 and Q3 2026.
- Removal of well infrastructure: approximately 1–5 days per well between around Q2 2026 and Q4 2026, if removed by the MODU under this EP.
- Recovery of ancillary equipment: approximately 1–2 days per well between around Q3 2026 and Q4 2026.

TPA03 Well Intervention

- Well intervention: approximately 5–14 days between Q4 2025 and Q3 2026.

The timing and duration of the activities are subject to vessel availability, weather, and other unforeseen circumstances.

1 North West Shelf Phase 1 Well Plug and Abandonment And TPA03 Well Intervention Environment Plan | September 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Vessels

The plugging and abandonment and well intervention activities may be carried out using a moored or hybrid semi-submersible MODU. Preparation and support activities will be done by offshore support vessels.

Helicopters will be used to transfer crew and equipment between the MODU (and support vessels) and the shore.

Communications with mariners

The locations of all wells are marked on nautical charts. A 4000 m radius Operational Area will apply around each well. This includes a temporary 500 m radius exclusion zone around the MODU to manage vessel movements.

Marine notices will be issued prior to activity commencement to alert vessels which may be operating in waters nearby.

Joint Venture

Woodside operates the facilities in WA-1-L, WA-3-L, and WA-5-L on behalf of the North West Shelf Joint Venture. The participants in the North West Shelf Joint Venture are:

- Woodside Energy Ltd
- Woodside Energy (North West Shelf) Pty Ltd
- BP Developments Australia Pty Ltd
- Chevron Australia Pty Ltd
- Japan Australia LNG (MIMI) Pty Ltd
- CNOOC NWS Private Ltd
- Shell Australia Pty Ltd.

We welcome your feedback by 30 October 2024.

Table 1. Activity Summary

NWS Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan	
Location	• Production licenses WA-1-L, WA-3-L, and WA-5-L
Approximate water depth	• 77 m – 128 m
Activity summary	• Permanent plugging and abandonment of five NWS production wells • Removal of Christmas trees and wellheads, which may be recovered following removal or temporarily placed on the seabed for later recovery • Well intervention on the TPA03 production well to remediate down-hole valve • Preparation and support activities (e.g. inspections, cleaning, pre-laying of moorings, recovery of moorings)
Infrastructure	• AP 2, AP 3, and AP 4 production wells in the Angel field • PER02 and PER04 production wells in the PoG field • TPA03 production well in the Tidepole field
Commencement date	• Expected to commence around Q2 2025
Finish date	• Expected to be completed by around the end of Q4 2026
Estimated duration	**NWS Plug and Abandonment** • Preparatory activities: approximately 7–10 days per well • Plug and abandonment: approximately 19–33 days per well • Removal of well infrastructure: approximately 1–5 days per well • Recovery of ancillary equipment (e.g. mooring recovery): approximately 1–2 days **TPA03 Well Intervention** • Well intervention: approximately 5–14 days
Operational Area and exclusion zone	• Operational Area: 4000 m around each well • Temporary exclusion zone: 500 m around the MODU
Vessels	• MODU • Support vessels • Helicopters
Distance to nearest town	• Operational Area is approximately 125 km north of Dampier
Distance to nearest marine park / nature reserve	• Dampier Marine Park is approximately 90 km south of the Operational Area

Table 2. Approximate locations of wells

Wells	Approximate Water Depth (m)	Latitude	Longitude	Titles
AP 2	85	19° 29' 55" S	116° 35' 53" E	WA-3-L
AP 3	78	19° 29' 0" S	116° 36' 37" E	WA-3-L
AP 4	77	19° 30' 38" S	116° 36' 19" E	WA-3-L
PER02	127	19° 31' 12" S	116° 06' 39" E	WA-1-L
PER04	128	19° 31' 07" S	116° 05' 54" E	WA-1-L
TPA03	113	19° 45' 44" S	115° 53' 24" E	WA-5-L

Environment That May Be Affected (EMBA)

The EMBA is a mathematically modelled area of the largest possible spatial extent where the plug and abandonment and well intervention activities could potentially have an environmental consequence. The broadest extent of the model takes into consideration planned and unplanned activities. For the EP, the EMBA has been developed combining numerous modelling outputs based on scenarios involving a release of hydrocarbons to the environment. These scenarios are highly unlikely to occur. The most credible modelling scenarios that inform the EMBA are based on hydrocarbon release from a loss of well control from either the PER02, AP 3, or TPA03 wells. The EMBA is depicted in **Figure 2.**

The EMBA does not represent the extent of the predicted impact of a release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths that a hydrocarbon release could travel, depending on factors including the weather and ocean conditions at the time of the release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. Only a minimal, specific part of the EMBA will be affected and that portion will only be known at the time of the release.

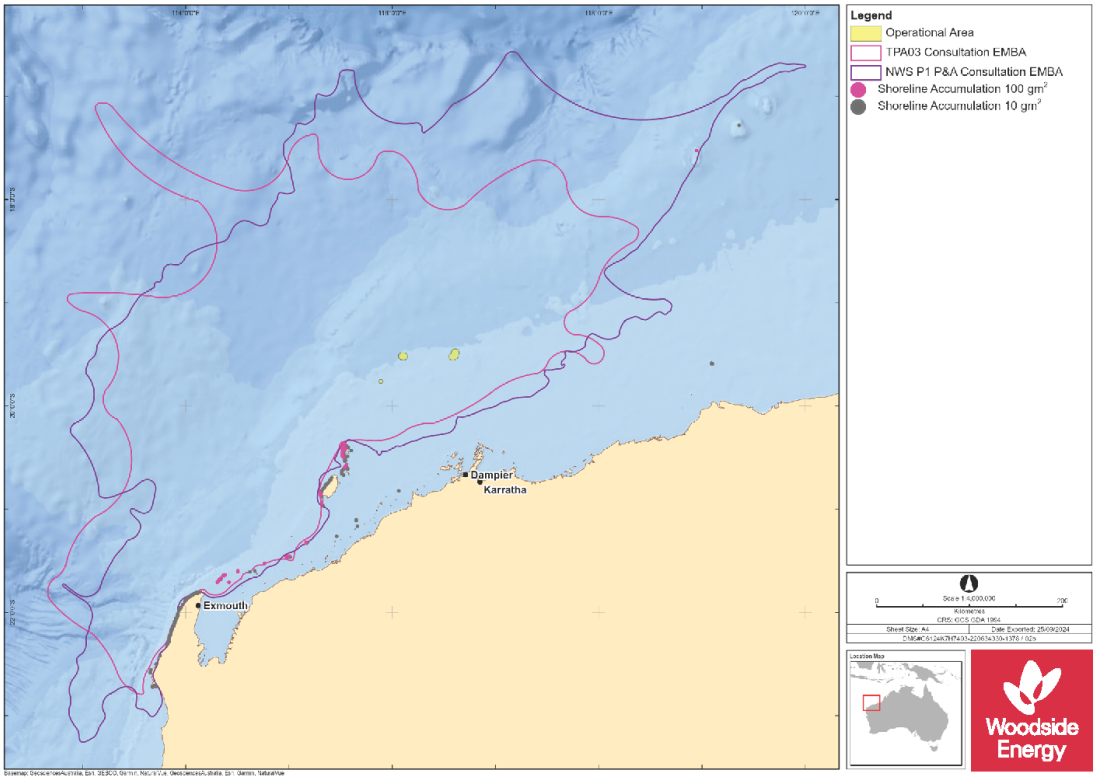

Figure 2: EMBAs for NWS Phase 1 Well P&A and TPA03 Well Intervention EPs

Mitigation and management measures

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the NWS Phase 1 Well Plug and Abandonment and TPA03 Well Intervention activities. Several mitigation and management measures for the activities are outlined in **Table 3**. Further details will be provided in the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Table 3. Summary of key risks and impacts and preliminary management measures for the activities

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Planned Activities (Routine and Non-routine)			
Physical presence: interaction with other marine users	• The MODU will plug and abandon the five production wells and perform the TPA03 well intervention. The MODU will be supported by other vessels and helicopter flights as required. • The physical presence of the MODU and project vessels within the Operational Area has the potential to displace other marine users.	• There is the potential for localised interaction with commercial fishing activities and commercial shipping. • Due to the offshore location and the localised nature of the activity, if there is an interaction it is expected to be negligible with no lasting effect.	• Vessels adhere to regulatory requirements for navigational safety. • Establish a temporary 500 m exclusion zone around the MODU which is communicated to marine users. • Notify relevant government departments, and fishing industry representative bodies prior to commencement and on completion of activities. • Notify the Australian Hydrographic Office prior to commencement of the activity so that marine users are aware of the activity. • Consult with relevant persons so they are informed of the proposed activities. • Where possible well infrastructure will be removed above the mudline once wells are permanently abandoned in accordance with applicable regulatory requirements.
Physical presence: disturbance to benthic habitat	• Installation and recovery of the MODU mooring anchors and chains will disturb the seabed. • Wellhead cleaning and removal will cause localised seabed disturbance around the wellhead. • Use of remotely operated and placement of equipment on the seabed will disturb small areas of benthic habitat. • Infrastructure deburial and short-term placement of infrastructure may be required.	• The Operational Area consists of sandy substrate, with marine growth on the subsea infrastructure. • Activities will be localised and of short duration, hence physical impacts to the seabed are expected to be negligible.	• Project specific mooring design analysis for anchored MODU to reduce the likelihood of anchor drag leading to seabed disturbance. • Well infrastructure temporarily placed on the seabed will be removed on completion of the plug and abandonment and decommissioning activities. • Subsea infrastructure to be marked on navigational charts until removal. • No anchoring of support vessels. • Comply with requirements of *Underwater Cultural Heritage Act 2018 (Cth).*

Routine acoustic emissions: vessels, helicopters, and mechanical equipment operation	• The operation of the MODU, project vessels, and positioning equipment will generate noise both in the air and underwater due to the operation of thruster engines, propellers, and the use of cutting tools subsea.
	• Helicopter noise within the Operational Area will occur during helicopter take-off and landing.
		• Elevated underwater noise may affect marine fauna, including marine mammals, turtles, and fish in the following ways:
		  • Through short-term behavioural disturbance.
		  • By masking or interfering with other biologically important sounds.
		• The Operational Area does not overlap biologically important areas for fauna sensitive to underwater noise (e.g. cetaceans). The noise emissions during the activity will not credibly cause injury to fauna, but may result in localised, short-term behavioural disturbance and masking.
			• Comply with regulatory requirements for interactions with marine fauna to prevent adverse interactions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Routine discharges: marine wastewater	• Routine discharge of sewage, grey water, and putrescible wastes to marine environment from project vessels within the Operational Area. • Routine discharge of deck and bilge water to marine environment from project vessels within the Operational Area.	• Short-term, localised decrease in water quality around the vessel.	• Marine discharges managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process.
Routine and non-routine discharges: drilling activities	• Plugging and abandonment (P&A) and well intervention will result in subsea discharges, such as cement, drilling chemicals, and residual water-based suspension and drilling fluids within the wells. • Non-routine discharge of unused bulk products at the completion of the plug and abandonment and well intervention activities.	• Localised, negligible, changes to sediment quality at the discharge locations. • Short-term, localised decrease in water quality at the discharge locations.	• Marine discharges managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. • Options for use of excess bulk cement, bentonite or barite will be managed and only discharged to the marine environment as a last option.
Atmospheric emissions and greenhouse gas (GHG) emissions	• Atmospheric emissions and GHG emissions will be associated with the MODU, project vessels, and helicopters from internal combustion engines and incineration activities. • Atmospheric emissions will be associated with venting of residual gas and contingent flaring from the MODU during P&A activities.	• Localised, short-term decrease in air quality.	• Comply with legislative and regulatory requirements for marine air pollution and GHG emissions reporting. • Flaring and venting of hydrocarbons is restricted to a duration necessary to perform the P&A activity.
Light emissions from project vessels	• Light emissions from MODU and support vessels. • Light emissions may be generated by flaring during well P&A if required. Flaring is only expected to occur for short durations (hours).	Light emissions may affect fauna (such as marine turtles and birds) in two main ways: • Behaviour: artificial lighting has the potential to create a constant level of light at night that can override natural levels and cycles. • Orientation: if an artificial light source is brighter than a natural source, the artificial light may override natural cues, leading to disorientation.	• Implementation of the Woodside Offshore Seabird Management Plan. • Lighting will be limited to the minimum required for navigation and safe operational requirements.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned Events (Accidents / Incidents)			
Unplanned hydrocarbon release – loss of well control	A loss of well control during plugging and abandonment or well intervention is extremely unlikely to occur. However, such a loss of well control, should it occur, may result in the unplanned release of hydrocarbons from a well.	• In the highly unlikely event of a loss of well control causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. • The wells within the scope of the EP are gas and condensate production wells. Any gas released would dissipate in the atmosphere. The condensates consist of relatively light molecular weight hydrocarbons that are volatile and non-persistent in nature with around 90% evaporating within the first 24 hours. • Potential impacts across the whole EMBA were assessed including receptors such as plankton, fish, marine mammals, seabirds and migratory shorebirds, tourism, recreation, and commercial fisheries (for example). • The potential biological and ecological impacts of an accidental hydrocarbon release from a loss of well control during the activities are expected to have minor, short term impacts to species and habitats, but not affecting ecosystem function.	• Plugging and abandonment and well intervention activities done in accordance with accepted well operation management plan (WOMP). The WOMP required effective barriers to always be in place to prevent the unplanned release of hydrocarbons. • Vessels adhere to regulatory requirements for navigational safety. • Establish a 500 m temporary exclusion zone around the MODU which is communicated to marine users. • Spill response arrangements supporting the Oil Pollution Emergency Plan (OPEP) will be tested to ensure the OPEP can be implemented as planned. • Emergency response activities would be implemented in line with the OPEP.
Unplanned hydrocarbon release – vessel collision	Project vessels will use marine diesel fuel, meaning a vessel collision involving a project vessel or third- party during the activity may potentially result in the release of marine diesel. For a collision to result in the worst-case scenario diesel release, several factors must occur as follows: • Identified causes of vessel interaction must result in a collision. • The collision has enough force to penetrate the vessel hull and in the exact location of the fuel tank. • The fuel tank must be full or at least of volume which is higher than the point of penetration.	• In the highly unlikely event of a vessel collision causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. • Marine diesel is a relatively volatile, non-persistent in nature hydrocarbon with around 25% evaporating within the first 24 hours. • Potential impacts across the whole EMBA were assessed including receptors such as plankton, fish, marine mammals, seabirds and migratory shorebirds, tourism, recreation, and commercial fisheries (for example). • The potential biological and ecological impacts of an accidental hydrocarbon release as a result of a vessel collision during the activities are expected to have minor, short term impacts to species and habitats, but not affecting ecosystem function.	• Comply with regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements. • Consult with relevant persons so that other marine users are informed and aware, reducing the likelihood of a collision. • Establish temporary exclusion zones around vessels which are communicated to marine users to reduce the likelihood of collision. • Spill response arrangements supporting the OPEP will be tested to ensure the OPEP can be implemented as planned. • Emergency response activities would be implemented in line with the OPEP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned hydrocarbon release - bunkering	Accidental loss of hydrocarbons to the marine environment during planned bunkering/refuelling may occur caused by partial or total failure of a bulk transfer hose or fittings due to operational stress or other integrity issues.	• The biological consequences of such a small volume spill on identified open water sensitive receptors relate to the potential for slight impacts to megafauna, plankton and fish populations that are within the spill-affected area.	• Preventing unplanned hydrocarbon release due to bunkering. • Comply with regulatory requirements for the prevention of marine pollution. • Appropriate bunkering equipment kept and maintained. • Compliance with Contractor procedures for the management of bunkering/ helicopter operations to reduce the likelihood and potential severity of a spill.
Unplanned discharge: deck spills	Accidental discharge of hydrocarbons/ chemicals from MODU or project vessel deck activities and equipment (such as cranes and winches).	• Unplanned discharges of non-process chemicals and hydrocarbons may decrease the water quality in the immediate vicinity of the release. Only small volumes (approximately <100 L) would be expected to potentially occur, resulting in very short-term impacts to water quality, and limited to the immediate release location. • No significant impacts from the accidental discharges described would be anticipated due to the offshore/open water locations, low sensitivity of surrounding water quality and high level of dilution into the open water marine environment of the Operational Area.	• Comply with regulatory requirements for the prevention of marine pollution. • Liquid chemical and fuel storage areas are bunded or secondarily contained when they are not being handled/moved temporarily. • Maintain and locate spill kits in close proximity to hydrocarbon storage areas and deck areas for use to contain and recover deck spills.
Unplanned discharge of solid hazardous / non-hazardous solid waste / equipment	• Accidental loss of hazardous or non-hazardous wastes (including dropped objects) to the marine environment. • Generation and disposal of waste from well infrastructure removal. • Dropped objects resulting in disturbance of benthic habitat.	• The potential impacts of hazardous or non-hazardous solid wastes and equipment accidentally discharged to the marine environment include contamination of the environment as well as secondary impacts relating to potential contact of marine fauna with wastes. • Incorrect classification of waste can also result in inappropriate disposal of hazardous decommissioning wastes that could contaminate non-hazardous waste streams. This has the potential to result in contamination to air, soil and water during disposal. • In the unlikely event of loss of an object being dropped into the marine environment, potential environmental effects would be limited to localised physical impacts on benthic communities.	• Comply with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes. • Disposal of waste associated with the subsea infrastructure will comply with relevant State and Commonwealth legislation. • Project vessel waste arrangements which require waste segregation, recording and safe handling of waste according to their hazard and recyclability class. • Solid waste/equipment dropped into the marine environment will be recovered where safe and practicable to do so. • The project vessels' work procedures for lifts, bulk transfers and cargo loading which require safe lifting and management of loads. • Implementation of an infrastructure disposal and resource recovery strategy that tracks waste, considers the waste hierarchy and considers contingency procedures for dealing with contaminants.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Physical presence: vessel collision with marine fauna	• Vessel movements have the potential to result in collisions between project vessel (hull and propellers) and marine fauna. • Project vessels would typically be stationary or moving at low speeds when undertaking the activity.	• Given the absence of aggregations, duration of activities within the Operational Area and the slow speeds at which project vessels operate, collisions with cetaceans, marine turtles and whale sharks are considered highly unlikely. • Collisions between vessels and marine fauna may result in injury to, or death of, marine fauna.	• Comply with regulatory requirements for interactions with marine fauna to reduce the likelihood of a collision occurring.
Accidental introduction of invasive marine species (IMS)	• Project vessels have the potential to introduce IMS to the Operational Area through marine biofouling (containing IMS) on vessels, as well as within high-risk ballast water exchange.	• The likelihood of IMS being introduced and establishing viable populations within these Operational Area or immediate surrounds is considered remote. • Introduction of IMS may result in changes to the ecology of the Operational Area and competition with existing biota.	• Project vessels will manage their ballast water using one of the approved ballast water management options, as outlined in the Australian Ballast Water Management Requirements. • Woodside's IMS risk assessment process will be applied to project vessels and immersible equipment undertaking the activities.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet please contact Woodside before **30 October 2024** via:

E: Consultation@feedback.woodside.com

Phone: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/what-we-do/consultation-activities.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* and support other regulatory submissions associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit: www.woodside.com/what-we-do/consultation-activities

6.1.2 Summary Information Sheet

Woodside Energy

CONSULTATION

SUMMARY INFORMATION SHEET

September 2024

NORTH WEST SHELF PHASE 1 WELL PLUG AND ABANDONMENT AND TPA03 WELL INTERVENTION ENVIRONMENT PLAN

CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an Environment Plan (EP) to notify them and obtain their input. This assists Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. These are the intended outcomes of consultation.

This summary information sheet provides a high-level overview of the North West Shelf (NWS) Phase 1 Well Plug and Abandonment and TPA03 Well Intervention EP.

Further details, including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures, are available within the NWS Phase 1 Well Plug and Abandonment and TPA03 Well Intervention EP Consultation Information Sheet (September 2024) which can be found at: http://www.woodside.com/what-we-do/consultation-activities

Overview

Woodside is submitting the NWS Phase 1 Well Plug and Abandonment and TPA03 Well Intervention EP. This plan covers the permanent plugging and abandonment of production wells in the Angel and Perseus-over-Goodwyn fields, and the completion of discrete technical work on the TPA03 production well in the Tidepole field.

The wells are in water depths ranging from 77 m to 128 m on the North West Shelf. The work will take place approximately 120 km north of Dampier. **Figure 1** is a map showing the location of the wells and Woodside's Operational Area for the work.

Summary of activities includes:

- Permanently plug and abandon three production wells in the Angel field and two production wells in the Perseus-over-Goodwyn field
- Complete discrete down-hole technical work at the TPA03 production well.

This work will be done using an offshore drilling rig supported by vessels and helicopters. Similar rigs, vessels and helicopters are often used in the oil and gas industry.

Woodside plans to do the work between April 2025 and December 2026. The work may take up to around 30 days per well.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

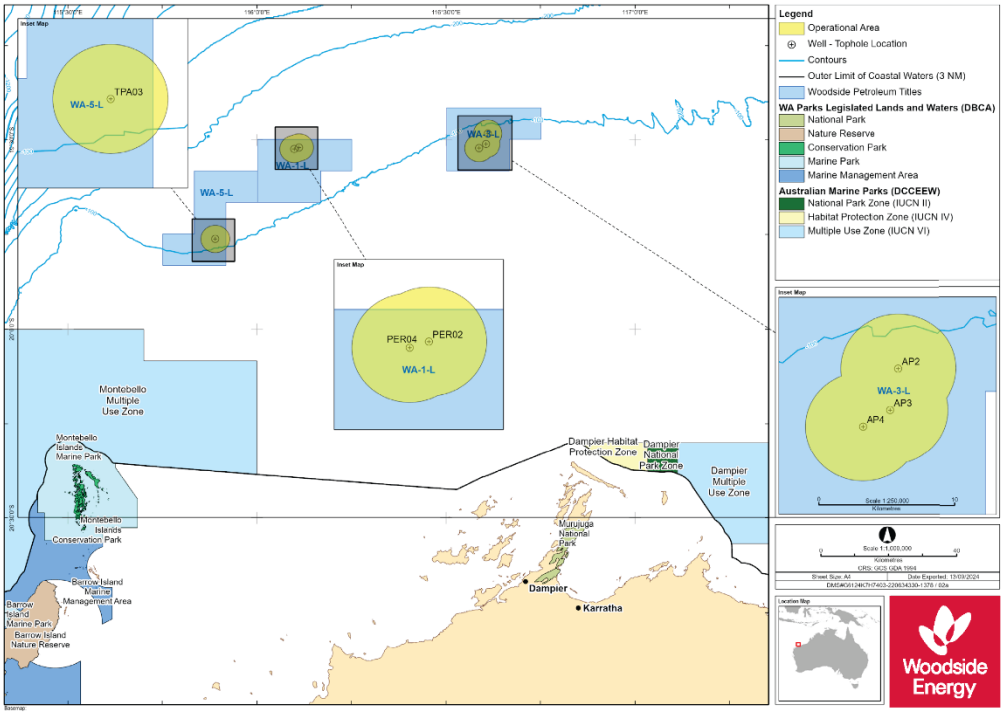

Figure 1: Wells and Operational Area for the NWS Phase 1 Well Plug and Abandonment and TPA03 Well Intervention EP

Environmental Impacts and Management

The work includes planned activities that may impact the environment. Unplanned events, such as accidents, may also result in environmental risks. Woodside manages the work to reduce impacts and risks to as low as reasonably practicable (ALARP) and to an acceptable level.

Planned activities are activities that Woodside knows will happen as part of this work program. For example, planned activities include other users of the sea being temporarily stopped from accessing the work area, or the vessels used for the work will generate underwater noise, light emissions, atmospheric emissions, and routine discharges (such as sewage, waste, and deck drainage). These planned activities will comply with legislative and regulatory requirements.

Unplanned events are not planned as part of the work program, but may be the result of an accident, incident or emergency. It is very unlikely that there will be an unplanned event. Unplanned events might include a spill of fuel or oil from a vessel collision, a spill on the deck of a vessel (such as during refuelling), unplanned seabed and/or marine life disturbance, waste entering the environment and accidental introduction of invasive species from outside the region.

A table showing all planned and unplanned activities, potential impacts and management measures for each is included in the Consultation Information Sheet (September 2024), which is available here: https://www.woodside.com/sustainability/consultation-activities.

The area over which unplanned events could have environmental impacts is shown in the map below (**Figure 2**). This is referred to as the environment that may be affected (EMBA). The location where the work will be done is known as the Operational Area. The Operational Area is also shown on the maps.

Environment that may be affected (EMBA)

The EMBA is a mathematically modelled area of the largest possible spatial extent where the NWS Phase 1 Well Plug and Abandonment and TPA03 Well Intervention EP activities could potentially have an environmental consequence. The broadest extent of the model takes into consideration planned and unplanned activities. For the EP, the EMBA has been developed combining numerous modelling outputs based on scenarios involving a release of hydrocarbons to the environment.

These scenarios are highly unlikely to occur. The most credible modelling scenarios that inform the EMBA are based on hydrocarbon release as a result of well loss of containment, subsea loss of containment and vessel collision. The EMBA is depicted in **Figure 2.**

The EMBA does not represent the extent of the predicted impact of a release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths that a hydrocarbon release could travel, depending on factors including the weather and ocean conditions at the time of the release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. Only a minimal, specific part of the EMBA will be affected and that portion will only be known at the time of the release.

Feedback

Woodside consults relevant persons in the course of preparing EPs to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region. If you would like to comment on the proposed activities outlined in this information sheet please contact Woodside before **30 October 2024** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:
www.woodside.com/what-we-do/consultation-activities

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our EP for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth) and may support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation no be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit:
www.woodside.com/what-we-do/consultation-activities

6.1.3 Updated Consultation Information Sheets

6.1.3.1 Updated Consultation Information Sheet – October 2024

Woodside Energy

CONSULTATION

INFORMATION SHEET

September 2024

NORTH WEST SHELF PHASE 1 WELL PLUG AND ABANDONMENT AND TPA03 WELL INTERVENTION ENVIRONMENT PLAN

CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an Environment Plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure the proposed activity is carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and to an acceptable level. We want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Overview

Woodside is submitting the North West Shelf (NWS) Phase 1 Well Plug and Abandonment (P&A) and TPA03 Well Intervention EP in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth).

The EP covers:

- Permanent plugging and abandonment of five NWS production wells
- Well intervention on the TPA03 production well.

The plugging and abandonment and well intervention will be undertaken using a moored or hybrid (mooring and Dynamic Positioning (DP) capability) semi-submersible mobile offshore drilling unit (MODU) and associated support vessels.

Woodside is decommissioning redundant equipment in its operating fields. Infrastructure that remains in the Angel and Perseus-over-Goodwyn (PoG) fields will continue to be managed under the Angel Operations and Goodwyn Alpha (GWA) Operations EP, respectively.

Location

All wells are in Commonwealth waters around Woodside's existing production facilities. The closest well to shore is approximately 125 km north of Dampier as shown in **Figure 1**. The wells are in water depths ranging from approximately 80 m to 128 m. The locations of the wells are in **Table 2**.

Proposed activity

Activities under this EP include:

- the plugging and abandonment of the AP 2, AP 3, and AP 4 wells in the Angel field. These wells tie back to the Angel platform. Production from these wells has ceased and the wells have been shut in. Well infrastructure (Christmas trees and wellheads) above the mudline will be removed following plugging of these wells.
- Wellheads may either be recovered during the plugging and abandonment activities or temporarily placed on the seabed for later recovery. If Angel wellheads aren't removed by the MODU, removal will be conducted under the proposed Angel Subsea Infrastructure Removal Environment Plan.
- The plugging and abandonment of the PER02 and PER04 wells in the PoG field. These wells tie back to the Goodwyn platform. Production from these wells has ceased and the wells have been shut in. The Christmas trees may be removed following plugging of these wells. The trees may either be removed during the plugging and abandonment activities or temporarily placed on the seabed for later recovery. Removal of the PoG wellheads above the mudline will be included in a separate future approval.
- Well intervention activities at the TPA03 well in the Tidepole field will remediate a down-hole valve and restore production from the lower reservoir. The well is currently shut in; well start-up and production following intervention activities will be managed under the Goodwyn Alpha (GWA) Operations EP.
- Preparation and support for the above activities is also included in the EP. Preparation and support may include inspections, clearing, laying and recovery of moorings for the MODU, and support whilst the MODU is in the Operational Area.

Timing and duration

The activities are planned to be done as a single campaign. Indicative timings and approximate durations are:

NWS Plug and Abandonment

- Preparatory activities: approximately 7–10 days per well between around Q2 2025 and Q4 2025.
- Plug and abandonment: approximately 19–33 days per well between around Q4 2025 and Q3 2026.
- Removal of well infrastructure: approximately 1–5 days per well between around Q2 2026 and Q4 2026, if removed by the MODU under this EP.
- Recovery of ancillary equipment: approximately 1–2 days per well between around Q3 2026 and Q4 2026.

TPA03 Well Intervention

- Well intervention: approximately 5–14 days between Q4 2025 and Q3 2026.

The timing and duration of the activities are subject to vessel availability, weather, and other unforeseen circumstances.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Vessels

The plugging and abandonment and well intervention activities may be carried out using a moored or hybrid semi-submersible MODU. Preparation and support activities will be done by offshore support vessels.

Helicopters will be used to transfer crew and equipment between the MODU (and support vessels) and the shore.

Communications with mariners

The locations of all wells are marked on nautical charts. A 4000 m radius Operational Area will apply around each well. This includes a temporary 500 m radius exclusion zone around the MODU to manage vessel movements.

Marine notices will be issued prior to activity commencement to alert vessels which may be operating in waters nearby.

Joint Venture

Woodside operates the facilities in WA-1-L, WA-3-L, and WA-5-L on behalf of the North West Shelf Joint Venture. The participants in the North West Shelf Joint Venture are:

- Woodside Energy Ltd
- Woodside Energy (North West Shelf) Pty Ltd
- BP Developments Australia Pty Ltd
- Chevron Australia Pty Ltd
- Japan Australia LNG (MIMI) Pty Ltd
- CNOOC NWS Private Ltd
- Shell Australia Pty Ltd.

We welcome your feedback by 30 October 2024.

Table 1. Activity Summary

NWS Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan	
Location	• Production licenses WA-1-L, WA-3-L, and WA-5-L
Approximate water depth	• 80 m – 128 m
Activity summary	• Permanent plugging and abandonment of five NWS production wells • Removal of Christmas trees and wellheads, which may be recovered following removal or temporarily placed on the seabed for later recovery • Well intervention on the TPA03 production well to remediate down-hole valve • Preparation and support activities (e.g. inspections, cleaning, pre-laying of moorings, recovery of moorings)
Infrastructure	• AP 2, AP 3, and AP 4 production wells in the Angel field • PER02 and PER04 production wells in the PoG field • TPA03 production well in the Tidepole field
Commencement date	• Expected to commence around Q2 2025
Finish date	• Expected to be completed by around the end of Q4 2026
Estimated duration	**NWS Plug and Abandonment** • Preparatory activities: approximately 7–10 days per well • Plug and abandonment: approximately 19–33 days per well • Removal of well infrastructure: approximately 1–5 days per well • Recovery of ancillary equipment (e.g. mooring recovery): approximately 1–2 days **TPA03 Well Intervention** • Well intervention: approximately 5–14 days
Operational Area and exclusion zone	• Operational Area: 4000 m around each well • Temporary exclusion zone: 500 m around the MODU
Vessels	• MODU • Support vessels • Helicopters
Distance to nearest town	• Operational Area is approximately 125 km north of Dampier
Distance to nearest marine park / nature reserve	• Dampier Marine Park is approximately 90 km south of the Operational Area

Table 2. Approximate locations of wells

Wells	Approximate Water Depth (m)	Latitude	Longitude	Titles
AP 2	80	19° 28' 59" S	116° 36' 37" E	WA-3-L
AP 3	80	19° 30' 38" S	116° 36' 18" E	WA-3-L
AP 4	90	19° 31' 18" S	116° 35' 13" E	WA-3-L
PER02	127	19° 31' 11" S	116° 6' 39" E	WA-1-L
PER04	128	19° 31' 26" S	116° 5' 53" E	WA-1-L
TPA03	113	19° 45' 43" S	115° 53' 23" E	WA-5-L

Environment That May Be Affected (EMBA)

The EMBA is a mathematically modelled area of the largest possible spatial extent where the plug and abandonment and well intervention activities could potentially have an environmental consequence. The broadest extent of the model takes into consideration planned and unplanned activities. For the EP, the EMBA has been developed combining numerous modelling outputs based on scenarios involving a release of hydrocarbons to the environment. These scenarios are highly unlikely to occur. The most credible modelling scenarios that inform the EMBA are based on hydrocarbon release from a loss of well control from either the PER02, AP 3, or TPA03 wells. The EMBA is depicted in **Figure 2.**

The EMBA does not represent the extent of the predicted impact of a release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths that a hydrocarbon release could travel, depending on factors including the weather and ocean conditions at the time of the release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. Only a minimal, specific part of the EMBA will be affected and that portion will only be known at the time of the release.

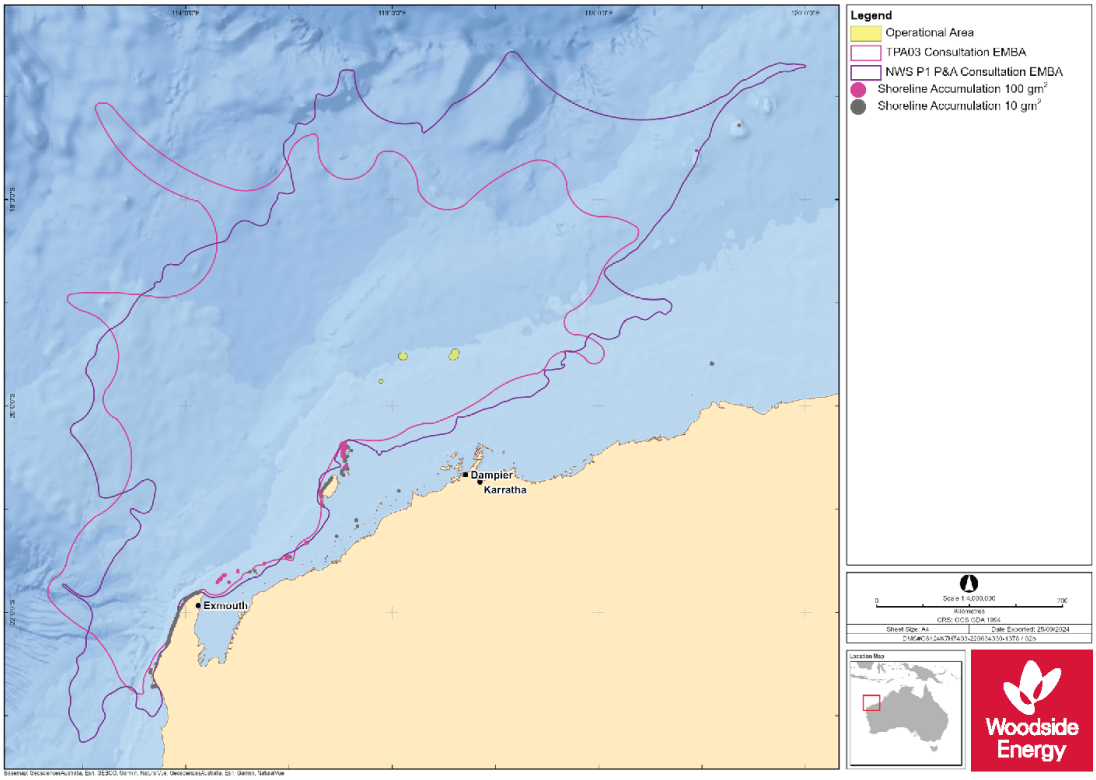

Figure 2: EMBAs for NWS Phase 1 Well P&A and TPA03 Well Intervention EPs

Mitigation and management measures

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the NWS Phase 1 Well Plug and Abandonment and TPA03 Well Intervention activities. Several mitigation and management measures for the activities are outlined in **Table 3**. Further details will be provided in the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Table 3. Summary of key risks and impacts and preliminary management measures for the activities

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Planned Activities (Routine and Non-routine)			
Physical presence: interaction with other marine users	• The MODU will plug and abandon the five production wells and perform the TPA03 well intervention. The MODU will be supported by other vessels and helicopter flights as required. • The physical presence of the MODU and project vessels within the Operational Area has the potential to displace other marine users.	• There is the potential for localised interaction with commercial fishing activities and commercial shipping. • Due to the offshore location and the localised nature of the activity, if there is an interaction it is expected to be negligible with no lasting effect.	• Vessels adhere to regulatory requirements for navigational safety. • Establish a temporary 500 m exclusion zone around the MODU which is communicated to marine users. • Notify relevant government departments, and fishing industry representative bodies prior to commencement and on completion of activities. • Notify the Australian Hydrographic Office prior to commencement of the activity so that marine users are aware of the activity. • Consult with relevant persons so they are informed of the proposed activities. • Where possible well infrastructure will be removed above the mudline once wells are permanently abandoned in accordance with applicable regulatory requirements.
Physical presence: disturbance to benthic habitat	• Installation and recovery of the MODU mooring anchors and chains will disturb the seabed. • Wellhead cleaning and removal will cause localised seabed disturbance around the wellhead. • Use of remotely operated and placement of equipment on the seabed will disturb small areas of benthic habitat. • Infrastructure deburial and short-term placement of infrastructure may be required.	• The Operational Area consists of sandy substrate, with marine growth on the subsea infrastructure. • Activities will be localised and of short duration, hence physical impacts to the seabed are expected to be negligible.	• Project specific mooring design analysis for anchored MODU to reduce the likelihood of anchor drag leading to seabed disturbance. • Well infrastructure temporarily placed on the seabed will be removed on completion of the plug and abandonment and decommissioning activities. • Subsea infrastructure to be marked on navigational charts until removal. • No anchoring of support vessels. • Comply with requirements of *Underwater Cultural Heritage Act 2018 (Cth).*

Routine acoustic emissions: vessels, helicopters, and mechanical equipment operation	• The operation of the MODU, project vessels, and positioning equipment will generate noise both in the air and underwater due to the operation of thruster engines, propellers, and the use of cutting tools subsea.
	• Helicopter noise within the Operational Area will occur during helicopter take-off and landing.
		• Elevated underwater noise may affect marine fauna, including marine mammals, turtles, and fish in the following ways:
		  • Through short-term behavioural disturbance.
		  • By masking or interfering with other biologically important sounds.
		• The Operational Area does not overlap biologically important areas for fauna sensitive to underwater noise (e.g. cetaceans). The noise emissions during the activity will not credibly cause injury to fauna, but may result in localised, short-term behavioural disturbance and masking.
			• Comply with regulatory requirements for interactions with marine fauna to prevent adverse interactions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Routine discharges: marine wastewater	• Routine discharge of sewage, grey water, and putrescible wastes to marine environment from project vessels within the Operational Area. • Routine discharge of deck and bilge water to marine environment from project vessels within the Operational Area.	• Short-term, localised decrease in water quality around the vessel.	• Marine discharges managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process.
Routine and non-routine discharges: drilling activities	• Plugging and abandonment (P&A) and well intervention will result in subsea discharges, such as cement, drilling chemicals, and residual water-based suspension and drilling fluids within the wells. • Non-routine discharge of unused bulk products at the completion of the plug and abandonment and well intervention activities.	• Localised, negligible, changes to sediment quality at the discharge locations. • Short-term, localised decrease in water quality at the discharge locations.	• Marine discharges managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. • Options for use of excess bulk cement, bentonite or barite will be managed and only discharged to the marine environment as a last option.
Atmospheric emissions and greenhouse gas (GHG) emissions	• Atmospheric emissions and GHG emissions will be associated with the MODU, project vessels, and helicopters from internal combustion engines and incineration activities. • Atmospheric emissions will be associated with venting of residual gas and contingent flaring from the MODU during P&A activities.	• Localised, short-term decrease in air quality.	• Comply with legislative and regulatory requirements for marine air pollution and GHG emissions reporting. • Flaring and venting of hydrocarbons is restricted to a duration necessary to perform the P&A activity.
Light emissions from project vessels	• Light emissions from MODU and support vessels. • Light emissions may be generated by flaring during well P&A if required. Flaring is only expected to occur for short durations (hours).	Light emissions may affect fauna (such as marine turtles and birds) in two main ways: • Behaviour: artificial lighting has the potential to create a constant level of light at night that can override natural levels and cycles. • Orientation: if an artificial light source is brighter than a natural source, the artificial light may override natural cues, leading to disorientation.	• Implementation of the Woodside Offshore Seabird Management Plan. • Lighting will be limited to the minimum required for navigation and safe operational requirements.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned Events (Accidents / Incidents)			
Unplanned hydrocarbon release – loss of well control	A loss of well control during plugging and abandonment or well intervention is extremely unlikely to occur. However, such a loss of well control, should it occur, may result in the unplanned release of hydrocarbons from a well.	• In the highly unlikely event of a loss of well control causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. • The wells within the scope of the EP are gas and condensate production wells. Any gas released would dissipate in the atmosphere. The condensates consist of relatively light molecular weight hydrocarbons that are volatile and non-persistent in nature with around 90% evaporating within the first 24 hours. • Potential impacts across the whole EMBA were assessed including receptors such as plankton, fish, marine mammals, seabirds and migratory shorebirds, tourism, recreation, and commercial fisheries (for example). • The potential biological and ecological impacts of an accidental hydrocarbon release from a loss of well control during the activities are expected to have minor, short term impacts to species and habitats, but not affecting ecosystem function.	• Plugging and abandonment and well intervention activities done in accordance with accepted well operation management plan (WOMP). The WOMP required effective barriers to always be in place to prevent the unplanned release of hydrocarbons. • Vessels adhere to regulatory requirements for navigational safety. • Establish a 500 m temporary exclusion zone around the MODU which is communicated to marine users. • Spill response arrangements supporting the Oil Pollution Emergency Plan (OPEP) will be tested to ensure the OPEP can be implemented as planned. • Emergency response activities would be implemented in line with the OPEP.
Unplanned hydrocarbon release – vessel collision	Project vessels will use marine diesel fuel, meaning a vessel collision involving a project vessel or third- party during the activity may potentially result in the release of marine diesel. For a collision to result in the worst-case scenario diesel release, several factors must occur as follows: • Identified causes of vessel interaction must result in a collision. • The collision has enough force to penetrate the vessel hull and in the exact location of the fuel tank. • The fuel tank must be full or at least of volume which is higher than the point of penetration.	• In the highly unlikely event of a vessel collision causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. • Marine diesel is a relatively volatile, non-persistent in nature hydrocarbon with around 25% evaporating within the first 24 hours. • Potential impacts across the whole EMBA were assessed including receptors such as plankton, fish, marine mammals, seabirds and migratory shorebirds, tourism, recreation, and commercial fisheries (for example). • The potential biological and ecological impacts of an accidental hydrocarbon release as a result of a vessel collision during the activities are expected to have minor, short term impacts to species and habitats, but not affecting ecosystem function.	• Comply with regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements. • Consult with relevant persons so that other marine users are informed and aware, reducing the likelihood of a collision. • Establish temporary exclusion zones around vessels which are communicated to marine users to reduce the likelihood of collision. • Spill response arrangements supporting the OPEP will be tested to ensure the OPEP can be implemented as planned. • Emergency response activities would be implemented in line with the OPEP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned hydrocarbon release - bunkering	Accidental loss of hydrocarbons to the marine environment during planned bunkering/refuelling may occur caused by partial or total failure of a bulk transfer hose or fittings due to operational stress or other integrity issues.	• The biological consequences of such a small volume spill on identified open water sensitive receptors relate to the potential for slight impacts to megafauna, plankton and fish populations that are within the spill-affected area.	• Preventing unplanned hydrocarbon release due to bunkering. • Comply with regulatory requirements for the prevention of marine pollution. • Appropriate bunkering equipment kept and maintained. • Compliance with Contractor procedures for the management of bunkering/ helicopter operations to reduce the likelihood and potential severity of a spill.
Unplanned discharge: deck spills	Accidental discharge of hydrocarbons/ chemicals from MODU or project vessel deck activities and equipment (such as cranes and winches).	• Unplanned discharges of non-process chemicals and hydrocarbons may decrease the water quality in the immediate vicinity of the release. Only small volumes (approximately <100 L) would be expected to potentially occur, resulting in very short-term impacts to water quality, and limited to the immediate release location. • No significant impacts from the accidental discharges described would be anticipated due to the offshore/open water locations, low sensitivity of surrounding water quality and high level of dilution into the open water marine environment of the Operational Area.	• Comply with regulatory requirements for the prevention of marine pollution. • Liquid chemical and fuel storage areas are bunded or secondarily contained when they are not being handled/moved temporarily. • Maintain and locate spill kits in close proximity to hydrocarbon storage areas and deck areas for use to contain and recover deck spills.
Unplanned discharge of solid hazardous / non-hazardous solid waste / equipment	• Accidental loss of hazardous or non-hazardous wastes (including dropped objects) to the marine environment. • Generation and disposal of waste from well infrastructure removal. • Dropped objects resulting in disturbance of benthic habitat.	• The potential impacts of hazardous or non-hazardous solid wastes and equipment accidentally discharged to the marine environment include contamination of the environment as well as secondary impacts relating to potential contact of marine fauna with wastes. • Incorrect classification of waste can also result in inappropriate disposal of hazardous decommissioning wastes that could contaminate non-hazardous waste streams. This has the potential to result in contamination to air, soil and water during disposal. • In the unlikely event of loss of an object being dropped into the marine environment, potential environmental effects would be limited to localised physical impacts on benthic communities.	• Comply with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes. • Disposal of waste associated with the subsea infrastructure will comply with relevant State and Commonwealth legislation. • Project vessel waste arrangements which require waste segregation, recording and safe handling of waste according to their hazard and recyclability class. • Solid waste/equipment dropped into the marine environment will be recovered where safe and practicable to do so. • The project vessels' work procedures for lifts, bulk transfers and cargo loading which require safe lifting and management of loads. • Implementation of an infrastructure disposal and resource recovery strategy that tracks waste, considers the waste hierarchy and considers contingency procedures for dealing with contaminants.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Proposed Mitigation and/or Management Measure
Physical presence: vessel collision with marine fauna	• Vessel movements have the potential to result in collisions between project vessel (hull and propellers) and marine fauna. • Project vessels would typically be stationary or moving at low speeds when undertaking the activity.	• Given the absence of aggregations, duration of activities within the Operational Area and the slow speeds at which project vessels operate, collisions with cetaceans, marine turtles and whale sharks are considered highly unlikely. • Collisions between vessels and marine fauna may result in injury to, or death of, marine fauna.	• Comply with regulatory requirements for interactions with marine fauna to reduce the likelihood of a collision occurring.
Accidental introduction of invasive marine species (IMS)	• Project vessels have the potential to introduce IMS to the Operational Area through marine biofouling (containing IMS) on vessels, as well as within high-risk ballast water exchange.	• The likelihood of IMS being introduced and establishing viable populations within these Operational Area or immediate surrounds is considered remote. • Introduction of IMS may result in changes to the ecology of the Operational Area and competition with existing biota.	• Project vessels will manage their ballast water using one of the approved ballast water management options, as outlined in the Australian Ballast Water Management Requirements. • Woodside's IMS risk assessment process will be applied to project vessels and immersible equipment undertaking the activities.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet please contact Woodside before **30 October 2024** via:

E: Consultation@feedback.woodside.com

Phone: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/what-we-do/consultation-activities.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* and support other regulatory submissions associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit: www.woodside.com/what-we-do/consultation-activities

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

6.1.3.2 Updated Consultation Information Sheet – October 2025

Woodside Energy

Consultation Information Sheet

October 2025

North West Shelf (NWS) Phase 1 Plug and Abandonment (P&A) and TPA03 Well Intervention Environment Plan

Carnarvon Basin, North-West Australia

Activity Overview

The NWS Phase 1 P&A and TPA03 Well Intervention covers:

- Plugging and abandonment of five NWS production wells (AP 2, AP 3, AP 4, PER02, & PER04).
- Well intervention on the TPA03 production well.

The P&A and well intervention will be undertaken using a moored or hybrid (mooring and Dynamic Positioning (DP) capability) semi-submersible mobile offshore drilling unit (MODU) and associated support vessels.

Location

- In Commonwealth waters ~125 km north of Dampier (Figure 2).

Water depth

- ~77 m - 128 m deep.

Timing

- Presently expected to commence around Q2 2026.
- Presently expected to be completed by around the end of Q4 2026.

Duration

NWS Plug and Abandonment

- Preparatory activities: approximately 7–10 days per well.
- Plug and abandonment: approximately 19–33 days per well.
- Removal of Christmas Trees: approximately 1 days per well, if removed by the MODU under this EP.
- Recovery of ancillary equipment (e.g. mooring recovery): approximately 1–2 days.

TPA03 Well Intervention

- Well intervention: approximately 5–14 days.

Joint Venture

- Operator – Woodside Energy Ltd.
- Joint Venture – Woodside Energy Ltd, BP Developments Australia Pty Ltd, Woodside Energy (North West Shelf) Pty Ltd, Chevron Australia Pty Ltd, Japan Australia LNG (MIMI) Pty Ltd, CNOOC NWS Private Ltd, and Shell Developments (Australia) Pty Ltd.

We would like to hear from you

We would like relevant persons whose functions, interests or activities may be affected by the proposed activity to have the opportunity to provide feedback.

Woodside must consult relevant persons when developing an Environment Plan (EP) to confirm current measures or identify additional measures, which could lessen or avoid potential adverse effects of the proposed activity on the environment.

Woodside aims to ensure the proposed activity is consistent with the principles of ecologically sustainable development, and that the activity is carried out in a manner by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and to an acceptable level.

If you are an individual, organisation or community group and believe your functions, interests or activities may be impacted by the activities under this EP, we would like your feedback by **17 October 2025**.

consultation@feedback.woodside.com
Toll free: 1800 442 977
woodside.com

A summary of the activity and location is found in **Table 1** and **2**.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's First Peoples. We acknowledge their connection to land, waters and the environment and pay our respects to ancestors and Elders, past and present. We extend this recognition and respect to First Nations peoples and communities around the world.

Activity Location

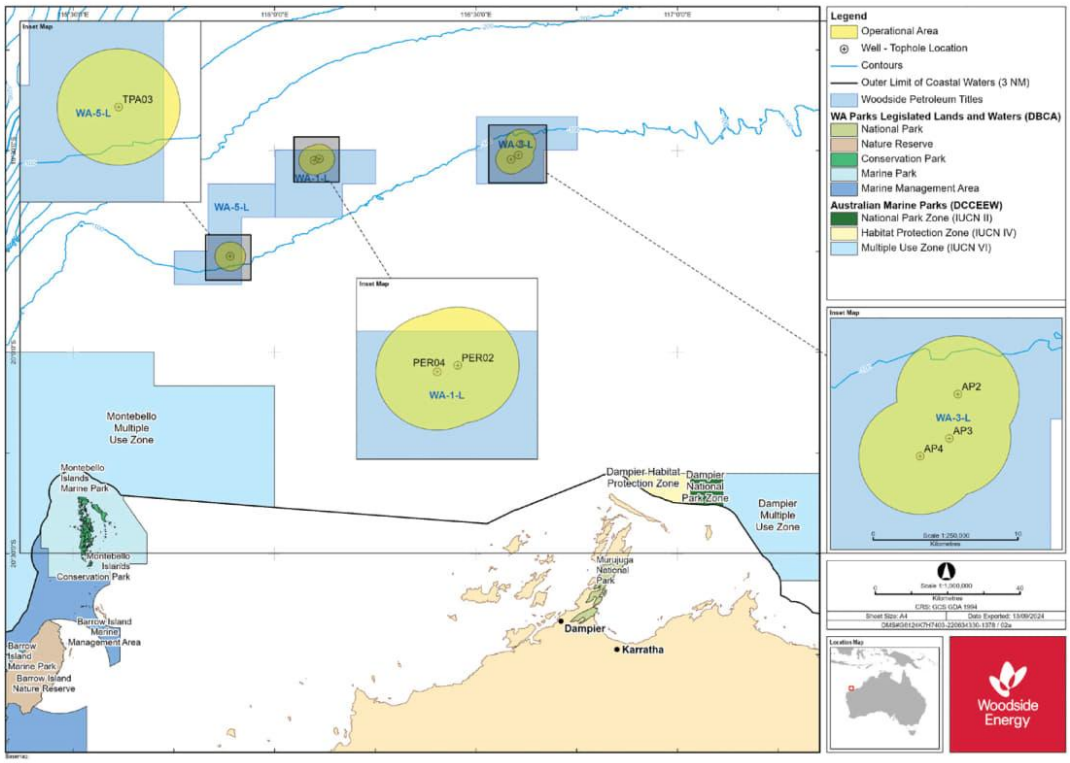

Figure 2. Location of the activity, including Operational Area and associated infrastructure

Table 1 – Activity and Location Summary

NWS Phase 1 P&A and TPA03 Well Intervention EP	
Activity details	• The plugging and abandonment of the AP 2, AP 3, and AP 4 wells in the Angel field. These wells tie back to the Angel platform. Production from these wells has ceased and the wells have been shut in. Christmas Trees may be recovered by the MODU if required to enable plug and abandonment activities or left in-situ for recovery at a later date via a suitable vessel. Removal of the Angel wellheads above the mudline will be included in a separate future approval. • The plugging and abandonment of the PER02 and PER04 wells in the PoG field. These wells tie back to the Goodwyn platform. Production from these wells has ceased and the wells have been shut in. Christmas Trees may be recovered by the MODU if required to enable plug and abandonment activities or left in-situ for recovery at a later date via a suitable vessel. Removal of the PoG wellheads above the mudline will be included in a separate future approval. • Well intervention activities at the TPA03 well in the Tidepole field will remediate a down-hole valve and restore production from the lower reservoir. The well is currently shut in; well start-up and production following intervention activities will be managed under the Goodwyn Alpha (GWA) Operations EP. • Preparation and support for the above activities is also included in the EP. Preparation and support may include inspections, cleaning, laying and recovery of moorings for the MODU, and support whilst the MODU is in the Operational Area.
Titles	• Production licenses: WA-1-L, WA-3-L and WA-5-L.
Infrastructure	• AP 2, AP 3, and AP 4 production wells in the Angel field. • PER02 and PER04 production wells in the PoG field. • TPA03 production well in the Tidepole field.
Vessels	• The plugging and abandonment and well intervention activities may be carried out using a moored or hybrid semi-submersible MODU. Preparation and support activities will be done by offshore support vessels. • Helicopters will be used to transfer crew and equipment between the MODU (and support vessels) and the shore.
Operational area and exclusion zones	• Operational Area: 4000 m around each well. • Temporary exclusion zone: 500 m around the MODU.
Communication with mariners	• Marine notices will be issued prior to activity commencement to alert vessels which may be operating in waters nearby. The locations of all wells are marked on nautical charts. A 4000 m radius Operational Area will apply around each well. This includes a temporary 500 m radius exclusion zone around the MODU to manage vessel movements.
Distance to nearest marine park/nature reserve	• Dampier Marine Park – Habitat Protection Zone (Cth) ~90 km south of the Operational Area.

Table 2 – Approximate locations of key infrastructure within the scope of the NWS Phase 1 P&A and TPA03 Well Intervention EP

Structure	Water Depth (m)	Latitude	Longitude	Titles
Well and centre locations				
AP 2	~85	19° 28' 60" S	116° 36' 37" E	WA-3-L
AP 3	~78	19° 30' 38" S	116° 36' 19" E	WA-3-L
AP 4	~77	19° 31' 18" S	116° 35' 13" E	WA-3-L
PER02	~128	19° 31' 12" S	116° 06' 39" E	WA-1-L
PER04	~128	19° 31' 27" S	116° 05' 54" E	WA-1-L
TPA03	~113	19° 45' 44" S	115° 53' 24" E	WA-5-L

Environment that May Be Affected (EMBA)

The EMBA is the largest geographic area where an unplanned event could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned activities and unplanned events. The EMBA was developed combining numerous modelling outputs based on highly unlikely releases of hydrocarbons to the environment. The modelling scenarios that inform the EMBA are loss of well containment and vessel collision. The EMBA is depicted in Figure 3.

The EMBA does not represent the extent of the predicted impact of a highly unlikely hydrocarbon release. Rather, the EMBA represents the merged area of many possible paths that a highly unlikely hydrocarbon release could travel, which depends on the weather and ocean conditions at the time of a release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known if there is a release. To learn more about an EMBA, please see the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) video on oil spill modelling at www.nopsema.gov.au.

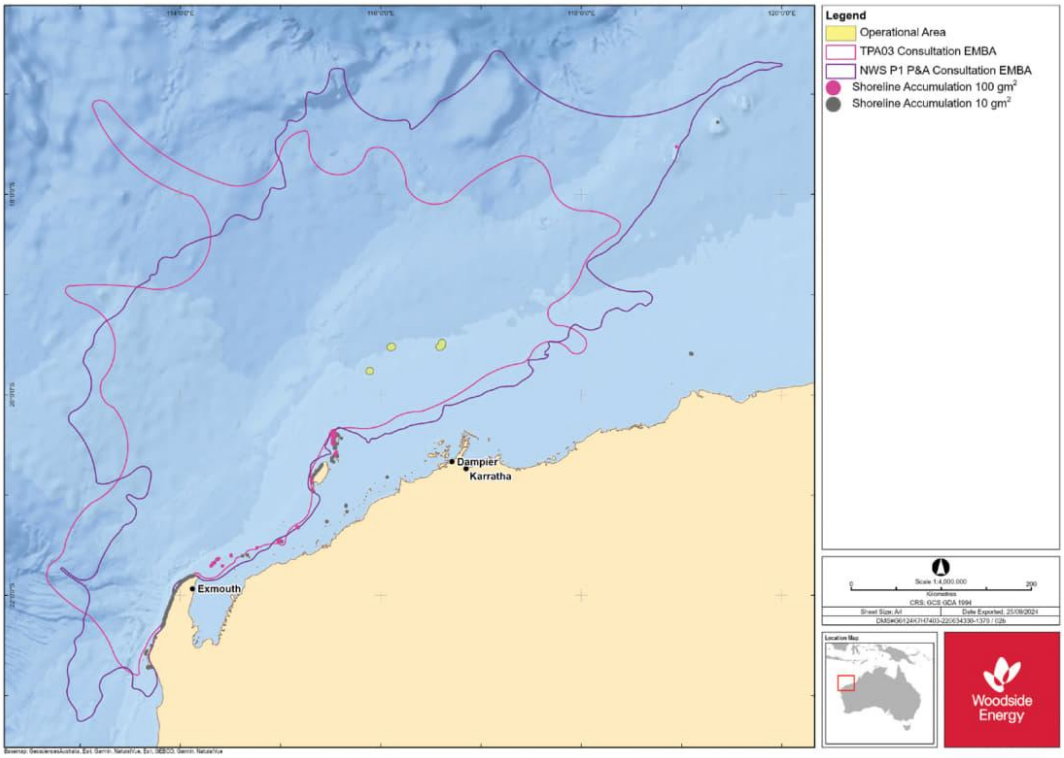

Figure 3. Environment that May Be Affected (EMBA) by NWS Phase 1 Plug and Abandonment and TPA03 Well Intervention activities

Impacts/Risks, and Mitigation and/or Management Measures

Woodside assessed the impacts and risks to the environment arising from the planned activities and unplanned events. This assessment considers the timing, duration and location of the activities. Proposed mitigation and management measures are summarised in **Table 3**. Further details will be provided in the EP.

In preparing the EP, Woodside's intent is to minimise environmental, social and cultural impacts and risks associated with the proposed activities, and Woodside seeks your feedback to inform our decision-making.

Table 3. Summary of key risks and/or impacts and preliminary management measures for the activity

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Planned activities (routine and non-routine)			
Physical presence: ***interaction with other marine users***	• The MODU will plug and abandon the five production wells and perform the TPA03 well intervention. The MODU will be supported by other vessels and helicopter flights as required. • The physical presence of the MODU and project vessels within the Operational Area has the potential to displace other marine users.	• There is the potential for localised interaction with commercial fishing activities and commercial shipping. • Due to the offshore location and the localised nature of the activity, if there is an interaction it is expected to be negligible with no lasting effect.	• Vessels adhere to regulatory requirements for navigational safety. • Establish a temporary 500 m exclusion zone around the MODU which is communicated to marine users. • Notify relevant government departments, and fishing industry representative bodies prior to commencement and on completion of activities. • Notify the Australian Hydrographic Office prior to commencement of the activity so that marine users are aware of the activity. • Consult with relevant persons so they are informed of the proposed activities.
Physical presence: ***disturbance to benthic habitat***	• Installation and recovery of the MODU mooring anchors and chains will disturb the seabed. • Use of remotely operated and placement of equipment on the seabed will disturb small areas of benthic habitat. • Infrastructure deburial and short-term placement of infrastructure may be required.	• The Operational Area consists of sandy substrate, with marine growth on the subsea infrastructure. • Activities will be localised and of short duration, hence physical impacts to the seabed are expected to be negligible.	• Project specific mooring design analysis for anchored MODU to reduce the likelihood of anchor drag leading to seabed disturbance. • Well infrastructure temporarily placed on the seabed will be removed on completion of the plug and abandonment. • Subsea infrastructure to be marked on navigational charts until removal. • No anchoring of support vessels • Comply with requirements of Underwater Cultural Heritage Act 2018 (Cth).

Routine acoustic emissions: ***vessels, helicopters, and mechanical equipment operation***	• The operation of the MODU, project vessels, and positioning equipment will generate noise both in the air and underwater due to the operation of thruster engines, propellers, and the use of cutting tools subsea.
	• Helicopter noise within the Operational Area will occur during helicopter take-off and landing.
		• Elevated underwater noise may affect marine fauna, including marine mammals, turtles, and fish in the following ways:
		  - Through short-term behavioural disturbance.
		  - By masking or interfering with other biologically important sounds.
		• The Operational Area does not overlap biologically important areas for fauna sensitive to underwater noise (e.g. cetaceans). The noise emissions during the activity will not credibly cause injury to fauna, but may result in localised, short-term behavioural disturbance and masking.
			• Comply with regulatory requirements for interactions with marine fauna to prevent adverse interactions.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Routine discharges: *marine wastewater*	· Routine discharge of sewage, grey water, and putrescible wastes to marine environment from project vessels within the Operational Area. · Routine discharge of deck and bilge water to marine environment from project vessels within the Operational Area.	· Short-term, localised decrease in water quality around the vessel.	· Marine discharges managed according to regulatory requirements. · Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process.
Routine and non-routine discharges: *drilling activities*	· Plugging and abandonment (P&A) and well intervention will result in subsea discharges, such as cement, swarf, cuttings, drilling chemicals, and residual water-based suspension and drilling fluids within the wells. · Non-routine discharge of unused bulk products at the completion of the plug and abandonment and well intervention activities.	· Localised, negligible, changes to sediment quality at the discharge locations. · Short-term, localised decrease in water quality at the discharge locations.	· Marine discharges managed according to regulatory requirements. · Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. · Displacement, brine, intervention, or returned well fluids containing hydrocarbons will be treated prior to discharge or contained. If discharge specification cannot be met the fluid will be returned to shore, and disposed of appropriately. · Solids Control Equipment (SCE) used to treat drill cuttings returned to the MODU prior to discharge. · Options for use of excess bulk cement, bentonite or barite will be managed and only discharged to the marine environment as a last option.
Routine and non-routine atmospheric and Greenhouse Gas (GHG) emissions	· Atmospheric emissions and GHG emissions will be associated with the MODU, project vessels, and helicopters from internal combustion engines and incineration activities. · Atmospheric emissions will be associated with venting of residual gas and contingent flaring from the MODU during P&A activities.	· Localised, short-term decrease in air quality.	· Comply with legislative and regulatory requirements for marine air pollution and GHG emissions reporting. · Flaring and venting of hydrocarbons is restricted to a duration necessary to perform the P&A activity. · Contractors engaged on energy/GHG emissions efficiencies and opportunities identified are implemented where feasible.
Routine light emissions	· Light emissions from MODU and support vessels. · Light emissions may be generated by flaring during well P&A if required. Flaring is only expected to occur for short durations (hours).	Light emissions may affect fauna (such as marine turtles and birds) in two main ways: · Behaviour: artificial lighting has the potential to create a constant level of light at night that can override natural levels and cycles. · Orientation: if an artificial light source is brighter than a natural source, the artificial light may override natural cues, leading to disorientation.	· Implementation of the Woodside Offshore Seabird Management Plan. · Lighting will be limited to the minimum required for navigation and safe operational requirements.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Solid Waste Generation and Management	· Removal of the subsea equipment will result in the generation of waste products.	· Generation of waste products that require appropriate management.	· Comply with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes. · Disposal of waste associated with the subsea infrastructure will comply with relevant State and Commonwealth legislation. · Drilling and Completions/ project vessel waste arrangements which require waste segregation, recording and safe handling of waste according to their hazard and recyclability class. · Implementation of an infrastructure disposal and resource recovery strategy that tracks waste, considers the waste hierarchy and considers contingency procedures for dealing with contaminants. · Waste management contractor evaluation and selection will include a preference for contractors who are able to achieve recycling targets and minimise waste volumes disposed to landfill. · Environmental awareness induction to MODU / vessel crew will include project waste management requirements.
Unplanned events (accidents / incidents)			
Unplanned hydrocarbon release: ***loss of well control***	· A loss of well control during plugging and abandonment or well intervention is extremely unlikely to occur. However, such a loss of well control, should it occur, may result in the unplanned release of hydrocarbons from a well.	· In the highly unlikely event of a loss of well control causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. · The wells within the scope of the EP are gas and condensate production wells. Any gas released would dissipate in the atmosphere. The condensates consist of relatively light molecular weight hydrocarbons that are volatile and non-persistent in nature with around 90% evaporating within the first 24 hours. · Potential impacts across the whole EMBA were assessed including receptors such as plankton, fish, marine mammals, seabirds and migratory shorebirds, tourism, recreation, and commercial fisheries (for example). · The potential biological and ecological impacts of an accidental hydrocarbon release from a loss of well control during the activities are expected to have minor, short term impacts to species and habitats, but not affecting ecosystem function.	**Preventing loss of well control** · Plugging and abandonment and well intervention activities done in accordance with accepted well operation management plan (WOMP). The WOMP required effective barriers to always be in place to prevent the unplanned release of hydrocarbons. · Vessels adhere to regulatory requirements for navigational safety. · Establish a 500 m temporary exclusion zone around the MODU which is communicated to marine users. **Spill response arrangements** · In the event of a spill emergency response activities implemented in accordance with the Oil Pollution Emergency Plan (OPEP). · First Strike Plan. · Arrangements supporting the activities in the OPEP will be tested so that the OPEP can be implemented as planned.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned hydrocarbon release: ***vessel collision***	Project vessels will use marine diesel fuel, meaning a vessel collision involving a project vessel or third- party during the activity may potentially result in the release of marine diesel. For a collision to result in the worst-case scenario diesel release, several factors must occur as follows: · Identified causes of vessel interaction must result in a collision. · The collision has enough force to penetrate the vessel hull and in the exact location of the fuel tank. · The fuel tank must be full or at least of volume which is higher than the point of penetration.	· In the highly unlikely event of a vessel collision causing a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. · Marine diesel is a relatively volatile, non-persistent in nature hydrocarbon with around 25% evaporating within the first 24 hours. · Potential impacts across the whole EMBA were assessed including receptors such as plankton, fish, marine mammals, seabirds and migratory shorebirds, tourism, recreation, and commercial fisheries (for example). · The potential biological and ecological impacts of an accidental hydrocarbon release as a result of a vessel collision during the activities are expected to have minor, short term impacts to species and habitats, but not affecting ecosystem function.	**Preventing vessel collision** · Comply with regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements. · Consult with relevant persons so that other marine users are informed and aware, reducing the likelihood of a collision. · Establish temporary exclusion zones around vessels which are communicated to marine users to reduce the likelihood of collision. **Spill response arrangements** · In the event of a spill emergency response activities implemented in accordance with the Oil Pollution Emergency Plan (OPEP). · First Strike Plan. · Arrangements supporting the activities in the OPEP will be tested so that the OPEP can be implemented as planned.
Unplanned hydrocarbon release: ***bunkering***	Accidental loss of hydrocarbons to the marine environment during planned bunkering/refuelling may occur caused by partial or total failure of a bulk transfer hose or fittings due to operational stress or other integrity issues.	· The biological consequences of such a small volume spill on identified open water sensitive receptors relate to the potential for slight impacts to megafauna, plankton and fish populations that are within the spill-affected area.	**Preventing unplanned hydrocarbon release due to bunkering** · Comply with regulatory requirements for the prevention of marine pollution. · Appropriate bunkering equipment kept and maintained. · Compliance with Contractor procedures for the management of bunkering/helicopter operations to reduce the likelihood and potential severity of a spill.
Unplanned discharges: ***hydrocarbon and chemicals***	Accidental discharge of hydrocarbons/chemicals from MODU or project vessel deck activities and equipment (such as cranes and winches). Accidental discharge of drilling/intervention fluids such as brine, Water Based Mud (WBM) or NWBM to marine environment due to failure of MODU pipework, bulk transfer hose/fitting, emergency disconnect sequence or from routine MODU operations.	· Unplanned discharges of non- process chemicals and hydrocarbons may decrease the water quality in the immediate vicinity of the release. Only small volumes (approximately <100 L) would be expected to potentially occur, resulting in very short-term impacts to water quality, and limited to the immediate release location. · No significant impacts from the accidental discharges described would be anticipated due to the offshore/open water locations, low sensitivity of surrounding water quality and high level of dilution into the open water marine environment of the Operational Area.	**Preventing deck and subsea spills** · Comply with regulatory requirements for the prevention of marine pollution. · Liquid chemicals and fuel storage areas are bunded or have secondary containment when they are not being used / handled temporarily. · Maintain and locate spill kits in close proximity to hydrocarbon storage areas and deck areas for use to contain and recover deck spills. · Chemicals selected with the lowest practicable environmental impacts subject to technical constraints and approved through the Woodside chemical assessment process. **Spill response arrangements** · In the event of a spill emergency response activities implemented in accordance with the Ship Oil Pollution Emergency Plan (SOPEP).

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned discharges: ***hazardous and non-hazardous waste management***	· Accidental loss of hazardous or non-hazardous wastes (including dropped objects) to the marine environment. · Generation and disposal of waste from well infrastructure removal. · Dropped objects resulting in disturbance of benthic habitat.	· The potential impacts of hazardous or non-hazardous solid wastes and equipment accidentally discharged to the marine environment include contamination of the environment as well as secondary impacts relating to potential contact of marine fauna with wastes. · Incorrect classification of waste can also result in inappropriate disposal of hazardous decommissioning wastes that could contaminate non-hazardous waste streams. This has the potential to result in contamination to air, soil and water during disposal. · In the unlikely event of loss of an object being dropped into the marine environment, potential environmental effects would be limited to localised physical impacts on benthic communities.	· Comply with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes. · Drilling and Completions/ project vessel waste arrangements which require waste segregation, recording and safe handling of waste according to their hazard and recyclability class. · Solid waste/equipment dropped into the marine environment will be recovered where safe and practicable to do so. · The project vessels' work procedures for lifts, bulk transfers and cargo loading which require safe lifting and management of loads. · Environmental awareness induction to MODU / vessel crew will include material to raise crew awareness of dropped object prevention.
Physical presence: ***interactions with marine fauna***	· Accidental collision between support vessel and marine fauna.	· Potential injury or death of marine fauna (single animal), including protected species.	· Comply with *EPBC Regulations 2000 – Part 8 Division 8.1 Interacting with Cetaceans.*
Physical presence: ***introduction of invasive marine species (IMS)***	· Invasive species in vessel ballast or on vessels / submersible equipment.	· Potential introduction of IMS possibly resulting in an alteration of the localised environment and reduction in native species through predation, competition or interspecies breeding.	· Ballast water and biofouling will be managed according to the Australian Ballast Water Management Requirements and the Australian Biofouling Management Requirements as applicable. · Woodside's IMS risk assessment process will be applied to vessels and immersible equipment entering the operational area.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities.

If you would like to comment on the proposed activities outlined in this information sheet, please provide feedback to Woodside by **17 October 2025** via:

consultation@feedback.woodside.com
Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:
woodside.com/what-we-do/consultation-activities

Please note that stakeholder feedback will be communicated to NOPSEMA as required under legislation. Woodside will communicate any material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit:
woodside.com/what-we-do/consultation-activities

Woodside is planning to submit the North West Shelf (NWS) Phase 1 Well Plug and Abandonment and TPA03 Well Intervention Environment Plan (EP) which involves the permanent plug and abandonment (P&A) of five NWS production wells located in proposed activities in Production Licenses WA-1-L, WA-3-L and the well intervention of the TPA03 production well in WA-5-L. The activities are located in Commonwealth waters around Woodside's existing Angel and Goodwyn production facilities, with the closest well to shore approximately 125 kilometres (km) north of Dampier, Western Australia.

Overview

The activities under the NWS Phase 1 Well P&A and TPA03 Well Intervention EP will be undertaken using a moored or hybrid (mooring and Dynamic Positioning (DP) capability) semi-submersible mobile offshore drilling unit (MODU) and associated support vessels in water depths between approximately 77 metres (m) to 128 m.

The proposed activity includes:

- The P&A of the AP 2, AP 3, and AP 4 wells in the Angel field. These wells tie back to the Angel platform. Production from these wells has ceased and the wells have been shut in. Well infrastructure (Christmas trees and wellheads) above the mudline will be removed following plugging of these wells. Wellheads may either be recovered during the P&A activities or temporarily placed on the seabed for later recovery. If Angel wellheads are not removed by the MODU, removal will be conducted under the Angel Subsea Infrastructure Removal EP.
- The P&A of the PER02 and PER04 wells in the Perseus-over-Goodwyn (PoG) field. These wells tie back to the Goodwyn platform. Production from these wells has ceased and the wells have been shut in. The Christmas trees may be removed following plugging of these wells. The trees may either be removed during the P&A activities or temporarily placed on the seabed for recovery later. Removal of the PER02 and PER04 wellheads above the mudline will be included in a separate future approval.
- Well intervention activities at the TPA03 well in the Tidepole field to remediate a down-hole valve and restore production from the lower reservoir. The well is currently shut in. Well start-up and production following intervention activities will be managed under the Goodwyn Alpha (GWA) Operations EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

These activities are planned to commence around Q2 2025 and are expected to be completed at the end of Q4 2026.

Environment that May Be Affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP, is determined by modelling a release of hydrocarbons from a loss of well control from either the PER02, AP3, or TPA03 wells. A release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a loss of well control does occur, the whole EMBA will not be affected.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Activity: North West Shelf (NWS) Phase 1 Well Plug and Abandonment (P&A) and TPA03 Well Intervention EP

North West Shelf (NWS) Phase 1 Well Plug and Abandonment (P&A) and TPA03 Well Intervention Environment Plan	
Summary	Permanent plugging and abandonment of five NWS production wells, and well intervention on the TPA03 production well
Permit Area	Production Licenses WA-1-L, WA-3-L and WA-5-L
Location	AP2 - 19° 29' 55" S, 116° 35' 53" E AP3 - 19° 29' 0" S, 116° 36' 37" E AP4 - 19° 30' 38" S, 116° 36' 19" E PER02 - 19° 31' 12" S, 116° 06' 39" E PER04 - 19° 31' 07" S, 116° 05' 54" E TPA03 - 19° 45' 44" S, 115° 53' 24" E
Approx. Water Depth (m)	77-128 m
Timing	Expected commencement date: Q2 2025 Expected finish date: Q4 2026
Duration	NWS Phase 1 Well P&A: • Preparatory activities: approximately 7–10 days per well • P&A: approximately 19–33 days per well

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	• Removal of well infrastructure: approximately 1–5 days per well • Recovery of ancillary equipment (e.g. mooring recovery): approximately 1–2 days. TPA03 Well Intervention: • Approximately 5–14 days.
Operational Area/exclusion zones	• Operational area: 4000 m around each well • Temporary exclusion zone: 500 m around the MODU.
Infrastructure	• AP 2, AP 3, and AP 4 production wells in the Angel field • PER02 and PER04 production wells in the Perseus-over-Goodwyn (PoG) field • TPA03 production well in the Tidepole field.
Vessels	MODU, support vessels and helicopters.

Feedback
If you have feedback specific to the proposed activities described under the proposed EP, we welcome your feedback via email at consultation@feedback.woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **30 October 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

Woodside Energy Consultation

6.1.9 Email sent to Aquaculture Council of Western Australia – 21 November 2024

I am following up on your conversation with [Individual 1] on Tuesday on a Woodside decommissioning activity and our Environment Plan consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside is planning to submit the North West Shelf (NWS) Phase 1 Well Plug and Abandonment and TPA03 Well Intervention Environment Plan (EP) which involves the permanent plug and abandonment (P&A) of five NWS production wells located in Production Licenses WA-1-L, WA-3-L and the well intervention of the TPA03 production well in WA-5-L. The activities are located in Commonwealth waters around Woodside's existing Angel and Goodwyn production facilities, with the closest well to shore approximately 125 kilometres (km) north of Dampier, Western Australia.

Overview

The activities under the NWS Phase 1 Well P&A and TPA03 Well Intervention EP will be undertaken using a moored or hybrid (mooring and Dynamic Positioning (DP) capability) semi-submersible mobile offshore drilling unit (MODU) and associated support vessels in water depths between approximately 80 metres (m) to 128 m.

The proposed activity includes:

- The P&A of the AP 2, AP 3, and AP 4 wells in the Angel field. These wells tie back to the Angel platform. Production from these wells has ceased and the wells have been shut in. Well infrastructure (Christmas trees and wellheads) above the mudline will be removed following plugging of these wells. Wellheads may either be recovered during the P&A activities or temporarily placed on the seabed for later recovery. If Angel wellheads are not removed by the MODU, removal will be conducted under the Angel Subsea Infrastructure Removal EP.
- The P&A of the PER02 and PER04 wells in the Perseus-over-Goodwyn (PoG) field. These wells tie back to the Goodwyn platform. Production from these wells has ceased and the wells have been shut in. The Christmas trees may be removed following plugging of these wells. The trees may either be removed during the P&A activities or temporarily placed on the seabed for recovery later. Removal of the PER02 and PER04 wellheads above the mudline will be included in a separate future approval.
- Well intervention activities at the TPA03 well in the Tidepole reservoir to remediate a down-hole valve and restore production from the lower reservoir. The well is currently shut in. Well start-up and production following intervention activities will be managed under the Goodwyn Alpha (GWA) Operations EP.

These activities are planned to commence around Q2 2025 and are expected to be completed at the end of Q4, 2026.

Operational area / exclusion zones

The activity Operational Area will consist of a 4000 m radius around each well. This area is where the MODU and activity vessels can be expected to be operating whilst undertaking P&A and well intervention activities There are no restrictions to other vessels within the Operational Area apart from being advised to take care. A temporary 500 m exclusion zone will be established around the MODU while undertaking activities at each well location. The exclusion zone is established for navigational safety and fishing vessels are not allowed to enter the exclusion zone.

Environment that May Be Affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration

planned and unplanned activities, and for this EP, is determined by modelling a release of hydrocarbons from a loss of well control from either the PER02, AP3, or TPA03. A release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a loss of well control does occur, the whole EMBA will not be affected.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Woodside is providing this information to the Aquaculture Council of Western Australia as our mapping data shows the EMBA for this EP overlaps with pearl farm leases in the Montebello Islands and an aquaculture site in the Mackerel Islands.

Please let us know if you require notification prior to and on completion of the proposed activities.

Goodwyn production facilities, with the closest well to shore approximately 125 kilometres (km) north of Dampier, Western Australia.

Overview
The activities under the NWS Phase 1 Well P&A and TPA03 Well Intervention EP will be undertaken using a moored or hybrid (mooring and Dynamic Positioning (DP) capability) semi-submersible mobile offshore drilling unit (MODU) and associated support vessels in water depths between approximately 77 metres (m) to 128 m.

The proposed activity includes:

- The P&A of the AP 2, AP 3, and AP 4 wells in the Angel field. These wells tie back to the Angel platform. Production from these wells has ceased and the wells have been shut in. Well infrastructure (Christmas trees and wellheads) above the mudline will be removed following plugging of these wells. Wellheads may either be recovered during the P&A activities or temporarily placed on the seabed for later recovery. If Angel wellheads are not removed by the MODU, removal will be conducted under the Angel Subsea Infrastructure Removal EP.
- The P&A of the PER02 and PER04 wells in the Perseus-over-Goodwyn (PoG) field. These wells tie back to the Goodwyn platform. Production from these wells has ceased and the wells have been shut in. The Christmas trees may be removed following plugging of these wells. The trees may either be removed during the P&A activities or temporarily placed on the seabed for recovery later. Removal of the PER02 and PER04 wellheads above the mudline will be included in a separate future approval.
- Well intervention activities at the TPA03 well in the Tidepole field to remediate a down-hole valve and restore production from the lower reservoir. The well is currently shut in. Well start-up and production following intervention activities will be managed under the Goodwyn Alpha (GWA) Operations EP.

These activities are planned to commence around Q2 2025 and are expected to be completed at the end of Q4 2026.

Environment that May Be Affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP, is determined by modelling a release of hydrocarbons from a loss of well control from either the PER02, AP3, or TPA03 wells. A release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a loss of well control does occur, the whole EMBA will not be affected.
