OM3: Hydrocarbon in sediment assessment*	Refer to OMP: Hydrocarbon properties and weathering behaviour at sea resourcing* (all sites)		OSRL OSM Supplementary Service Agreement Woodside Contracted Vessel Providers
OM5: Rapid marine fauna surveillance	1 team to conduct aerial surveys for spill site, Dampier Unit and Karratha Unit (2 observers per aircraft) **Total 1 team** *Note: Fauna related SMPs are likely to be initiated simultaneously or following aerial assessment with vessel and ground based fauna surveys carried out as part of the relevant fauna SMP.*		OSRL OSM Supplementary Service Agreement Woodside Contracted Vessel Providers Aviation contractors
OM6: Shoreline clean-up assessment	Detail on resources required for shoreline clean-up assessment is presented in Section 5.8.1		Australian Marine Oil Spill Centre (AMOSC) Master Services Agreement (MSA) and/or OSRL OSM Supplementary Service Agreement Woodside Contracted Vessel Providers State/Territory Response Teams and AMSA National Response Team
OM7: Air quality modelling (responder health and safety)	1 model	1 model	3rd party modelling provider / OSRO
Total number of teams	**3 teams**	**5 teams**	

[#] *Specific monitoring units are mentioned for planning and guidance purposes based on a worst-case planning approach. In the event of an actual spill, other locations and/or receptors may be contacted and the ability to access these locations (i.e. with consideration of safety and simultaneous operations (SIMOPS)) would be assessed. This would be identified and managed as part of implementation as per the guidance in Section 13 of the BIP.*

** Initial co-mobilisation between OMP: Hydrocarbon properties and weathering behaviour at sea, OMP: Water quality assessment, and OMP: Sediment quality assessment*

^ These resources may not be required if relevant scientific monitoring components' initiation criteria have been triggered.

Table C-9: Resources required for initially implementing scientific monitoring plans for NRC activity spills[#]

SMP	Week 1 (total)	Week 2 (total)	Arrangement
SM1: Water quality impact assessment *^	1 team (spill site and surrounds) 1 team Dampier Unit[#]	1 team (spill site and surrounds) 2 teams Dampier Unit	OSRL OSM Supplementary Service Agreement Woodside Contracted Vessel Providers

ANNEX D: TACTICAL RESPONSE PLANS

TACTICAL RESPONSE PLANS
Exmouth
Mangrove Bay
Turquoise Bay
Yardie Creek
Muiron Islands
Jurabi to Lighthouse Beaches Exmouth
Ningaloo Reef – Refer to Mangrove/ Turquoise Bay and Yardie Creek
Exmouth Gulf
Shark Bay Area 1: Carnarvon to Wooramel
Shark Bay Area 2: Wooramel to Petite Point
Shark Bay Area 3: Petite Point to Dubaut Point
Shark Bay Area 4: Dubaut Point to Herald Bight
Shark Bay Area 5: Herald Bight to Eagle Bluff
Shark Bay Area 6: Eagle Bluff to Useless Loop
Shark Bay Area 7: Useless Loop to Cape Bellefin
Shark Bay Area 8: Cape Bellefin to Steep Point
Shark Bay Area 9: Western Shores of Edel Land
Shark Bay Area 10: Dirk Hartog Island
Shark Bay Area 11: Bernier and Dorre Islands
Abrolhos Islands: Pelseart Group
Abrolhos Islands: Wallabi Group
Abrolhos Islands: Easter Group
Dampier
Rankin Bank & Glomar Shoals
Barrow and Lowendal Islands
Pilbara Islands – Southern Island Group
Montebello Island – Stephenson Channel Nth TRP
Montebello Island – Champagne Bay and Chippendale channel TRP
Montebello Island – Claret Bay TRP
Montebello Island – Hermite/Delta Island Channel TRP
Montebello Island – Hock Bay TRP
Montebello Island – North and Kelvin Channel TRP
Montebello Island – Sherry Lagoon Entrance TRP
Withnell Bay
Holden Bay
King Bay
No Name Bay / No Name Beach
Enderby Island – Dampier
Rosemary Island – Dampier
Legendre Island – Dampier

NOPSEMA
Australia's offshore energy regulator

FORM

Recordable Environmental Incident Monthly Report

Document No: N-03300-FM0928 A198750

Date: 10/01/2024

Due Date: By the 15th day of the following month.

Send completed form to: submissions@nopsema.gov.au via secure file transfer at https://securefile.nopsema.gov.au/filedrop/submissions

Reference: Regulation 50

Please check the following boxes if applicable to this report **Nil Incident Report:** ☐ **Final report for this activity:** ☐

Titleholder name:		**Titleholder business address:**		**Title of environment plan for the activity:**	
Activity type: (e.g. drilling, seismic, production)		**Month, Year:**		**Facility name and type :** (e.g. MODU, Seismic Vessel, FPSO)	
Contact person:		**Email:**		**Phone:**	
Incident date	**All material facts and circumstances** (including release volumes to environment if applicable)	**Performance outcome(s) and/or standard(s) breached**	**Action taken to avoid or mitigate any adverse environmental impacts of the incident**	**Corrective action taken, or proposed, to stop, control or remedy this incident**	**Action taken, or proposed, to prevent a similar incident occurring in future**

Note 1: As at 28 February 2014, amendments to the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations changed from environmental performance objective to environmental performance outcome. If you are reporting against an EP accepted under the old Regulations please report against the environmental performance objective for that activity.

Note 2: This form may be submitted in conjunction with the 'Injuries and Fatalities – Monthly Summary Report' Form available at www.nopsema.gov.au

Privacy Notice

NOPSEMA collects your contact details for the purpose of administering the OPGGSA and associated regulations. NOPSEMA will not use or disclose your personal information for any other purpose without your consent, unless it is required or authorised by law, or relates to NOPSEMA's enforcement activities. Your personal information may be disclosed to the following organisations, entities or individuals:

- individuals who make a request under the *Freedom of Information Act 1982*
- the Australian National Audit Office and other privately appointed auditors
- NOPSEMA's legal advisors.

NOPSEMA may occasionally be required to disclose information to overseas recipients in order to discharge its functions or exercise its powers, or to perform its necessary business activities. Information about how you can access, or seek correction to, your personal information is contained in NOPSEMA's APP Privacy Policy at www.nopsema.gov.au/privacy. If you have an enquiry or a complaint about your privacy, please contact NOPSEMA's Privacy Contact Officer on 08 6188 8700 or by email at privacy@nopsema.gov.au.

FORM

Report of an accident, dangerous occurrence or environmental incident

Document No: N-03300-FM0831 A159980

Date: 07/09/2023

For instructions and general guidance in the use of this form, please see the last page.

Part 1 is required within 3 days of a notified incident.
Part 2 is required within 30 days of notified incident.

What was the date and time of the initial verbal incident notification to NOPSEMA?			
Date		**Time**	

NOTE: It is a requirement to request permission to interfere with the site of an accident or dangerous occurrence. Refer OPGGS(S)R, Reg. 2.49.

What is the date and time of this written incident report?			
Date		**Time**	

What type of incident is being reported?	*Please tick appropriate incident type*	
Accident or dangerous occurrence	☐	Complete parts 1A, 1B & part 2
Environmental Incident	☐	Complete parts 1A, 1C
BOTH (Accident or dangerous occurrence AND environmental incident)	☐	Complete ALL parts (1A, 1B, 1C, 2)

Please tick all applicable (one or more categories) *To use electronically: MS Word 2007-10 – click in check box*

Categories *Please select one or more*	Accidents	Death or Serious injury Lost time injury ≥3 days	☐ ☐
	Dangerous occurrences	Hydrocarbon release >1 kg or ≥80 L (gas or liquid) Fire or explosion Collision marine vessel and facility Could have caused death, serious injury or LTI Damage to safety-critical equipment Unplanned event – implement ERP Pipeline incident Well kick >50 barrels Other _____	☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐
	Environmental incidents	Hydrocarbon release Chemical release Drilling fluid/mud release Fauna Incident Other _____	☐ ☐ ☐ ☐ ☐

Part 1A – Information required within 3 days of an accident, dangerous occurrence or environmental incident

General information – all incidents

1.	**Where did the incident occur?**	Facility / field / title name		
		Site name and location *Latitude/longitude*		
2.	**Who is the registered operator/titleholder or other person that controls the works site or activity?**	Name		
		Business address		
		Business phone no.		
3.	**When did the incident occur?**	Time and time zone		
		Date		
4.	**Did anyone witness the incident?**	Yes or No *If yes, provide details below*		
	Witness details	Witness no. 1	Witness no. 2	Witness no. 3
	Full name			
	Phone no. (Business hours)			
	Phone no. (Home) (Mobile)			
	Email (Business) (Private)			
	Postal address			
	NB: If more witnesses, copy and insert this section (4) here, and add extra witness numbers appropriately			
5.	**Details of person submitting this information**	Name		
		Position		
		Email		
		Telephone no.		
6.	**Brief description of incident**			
7.	**Work or activity being undertaken at time of incident**			

Part 1A – Information required within 3 days of an accident, dangerous occurrence or environmental incident

General information – all incidents

8.	**What are the internal investigation arrangements?**					
9.	**Was there any loss of containment of any fluid (liquid or gas)?**	Yes or No *If Yes, provide details below*				
		Type of fluid (liquid or gas) *If hydrocarbon release, please complete item no.15 as well*	Hydrocarbon ☐ *Please specify*_____ Non-hydrocarbon ☐ *Please specify*_____			
		Estimated quantity *Liquid (L), Gas (kg)*				
		Estimation details	Calculation	☐	Measurement	☐
			*Please specify*_____			
		Composition *Percentage and description*				
		Known toxicity to people and/or environment	Toxicity to people			
			Toxicity to environment			
		How was the leak/spill detected?	F&G detection ☐ CCTV ☐		Visual ☐ Other ☐	
		Did ignition occur?	No ☐ Yes ☐		Immediate ☐ Delayed ☐	
			If yes, what was the likely ignition source		Hotwork ☐ Spark electrical source ☐ Spark metallic contact ☐ Hot surface ☐ Other ☐	
10.	**Has the release been stopped and/or contained?**	Yes or No				
		Duration of the release *hh:mm:ss*				
		Estimated rate of release *Litres or kg per hour*				
11.	**Location of release**	What or where is the location of the release?				
		What equipment was involved in the release?				
		Is this functional location listed as safety-critical equipment?				

Part 1A – Information required within 3 days of an accident, dangerous occurrence or environmental incident

General information – all incidents

12.	**Weather conditions** *Please complete as appropriate*	Ambient temperature C°				
		Relative humidity %				
		Wind speed m/s *NB: for enclosed areas use* Air change per hour				
		Wind direction e.g. from SW				
		Significant wave height m				
		Swell m				
		Current speed m/s				
		Current direction e.g. from SW				
13.	**Hydrocarbon release details** *If hydrocarbon fluid (liquid or gas) was released, please complete this section as well*	System of hydrocarbon release	Process ☐ Drilling ☐ Subsea / Pipeline ☐		Utilities ☐ Well related ☐ Marine ☐	
		Estimated inventory in the isolatable system *Litres or kg*				
		System pressure and size of piping or vessel *diameter (d in mm)* *length (l in m)* *or volume (V in L)*	Pressure MPag			
			Size Piping (d) and Piping (l) or Vessel (V)			
		Estimated equivalent hole diameter *d in mm*				

Part 1B - Complete for accidents or dangerous occurrences

Accidents and dangerous occurrences information

	Was NOPSEMA notified through the dedicated notification phone line? *Phone No.* 1300 674 472		Yes	☐	No	☐
15.	**Action taken to make the work-site safe**	Was permission given by a NOPSEMA inspector to interfere with the site? OPGGS(S)R 2.49.	Yes	☐	No	☐
		Action taken				
		Details of any disturbance of the work site				

Part 1B - Complete for accidents or dangerous occurrences

Accidents and dangerous occurrences information

16.	**Was an emergency response initiated?**		Yes	☐	No	☐
		Type of response	Manual Automatic alarm	☐ ☐	Muster Evacuation	☐ ☐
		How effective was the emergency response?				

17.	**Was anyone killed or injured?** *Provide details below*		Yes	☐	No	☐		
	Injured persons (IP)	**Casualty no. 1**						
	If different from item 2. Employer name		Employer address					
	Employer phone no.		Employer email					
	IP full name							
	IP date of birth		Sex	M	☐	F	☐	
	IP residential address							
	IP phone no. (Work)		IP phone no. (Home) (Mobile)					
	IP occupation/job title		Contractor or core crew					
	Details of injury							
	Based on TOOCS (refer last page) Nature of injury	a. Intracranial injury b. Fractures c. Wounds, lacerations, amputations, internal organ damage	☐ ☐ ☐	d. Burn e. Nerve or spinal cord injury f. Joint, ligament, muscle or tendon injury g. Other _____	☐ ☐ ☐ ☐			
	Part of body	G1. Head or face G2. Neck G3. Trunk G4. Shoulder or arm	☐ ☐ ☐ ☐	G5. Hip or leg G6. Multiple locations G7. Internal systems G8. Other _____	☐ ☐ ☐ ☐			
	Mechanism of injury	G0. Falls, stepping, kneeling, sitting on object G1. Hitting object G2. Being hit or trapped	☐ ☐ ☐	G3. Exposure to sound or pressure G4. Muscular stress G5. Heat, cold or radiation G6/7 Chemical, biological substance G8. Other _____	☐ ☐ ☐ ☐ ☐			
	Agency of injury	1. Machinery or fixed plant 2. Mobile plant or transport 3. Powered equipment 4. Non-power equipment	☐ ☐ ☐ ☐	5/6. Chemicals, materials, substances 7. Environmental agencies 8. Human or animal agencies 9. Other _____	☐ ☐ ☐ ☐			

Part 1B - Complete for accidents or dangerous occurrences

Accidents and dangerous occurrences information

	Details of job being undertaken					
	Day and hour of shift	Day *e.g. 5th day of 7 (5 / 7)*		Hour *e.g. 3rd hour of 12 (3 / 12)*		
	NB: If more casualties, please copy/paste this section (19) for each additional casualty and insert here					
18.	**Was there any serious damage?** *Provide details below*			Yes	☐	No ☐
	Details	**Item 1**		**Item 2**		**Item 3**
	Equipment damaged					
	Extent of damage					
19.	**Will the equipment be shut down?** *Yes or No*					
	If yes, for how long?					
	NB: If more equipment seriously damaged, please copy/paste this section as required					
20.	**Will the facility be shut down?**	Yes or No *If yes provide details below*				
	Facility shutdown	Date				dd/mm/yyyy
		Time				24-hour clock
		Duration				days / hours / minutes
21.	**Immediate action taken/intended, if any, to prevent recurrence of incident.**	**Action**		**Responsible party**		**Completion date** *Actual or intended*
22.	**What were the immediate causes of the incident?**					

Attachments

Are you attaching any documents?			Yes or No *If yes, provide details below*	
No.	**ID**	**Revision**	**Date**	**Title/description**

Insert or delete rows as required

Part 1C – Complete for environmental incidents

Environmental Impacts

23.	**What is the current environment plan for this incident?**	Environment plan		
24.	**Has the incident resulted in an impact to the environment?**	Yes or No *If yes, provide details below*		
		Incident details *e.g. estimated area of impact, nature/significance of impact*		
		ENVIRONMENTAL RECEPTORS		
		Open ocean ☐ Shoreline ☐ Population centre ☐ Stakeholders ☐ Other sensitivity ☐ *e.g. conservation area, nesting beach*	Macroalgae ☐ Coral Reef ☐ Benthic invertebrates ☐ Seagrass ☐ Mangrove ☐	
		Further details		

	Details	**Environment 1**	**Environment 2**	**Environment 3**
	Location of receiving environments *Lat/Long*			
	Date & time of impact			
	Action taken to minimise exposure			
	Specify each matter protected under Part 3 of the EPBC Act impacted			

NB: If more environments were damaged, please copy/paste this section (Item E3) and add extra data

25.		Yes or No *If yes, provide details*	

Part 1C – Complete for environmental incidents

Environmental Impacts

	Are any environments at risk? ***Including as a result of spill response measures***	Details *e.g. zone of potential impact*				
		AT RISK ENVIRONMENTS				
		Open ocean	☐	Macroalgae	☐	
		Shoreline	☐	Coral Reef	☐	
		Population Centre	☐	Benthic Invertebrates	☐	
		Stakeholders	☐	Seagrass	☐	
		Other sensitivity *e.g. conservation area, nesting beach*	☐	Mangrove	☐	

	Details	**Environment 1**	**Environment 2**	**Environment 3**
	Estimated location of 'at-risk' environments			
	Estimated impact date & time			
	Action required to minimise exposure			
	Specify each matter protected under Part 3 of the EPBC Act at risk			
	NB: If more environments at risk of damage, please copy/paste this section (Item E2) and add extra data			
26.	**Was an oil pollution emergency plan activated?**	Yes or No		
		If yes, what action has been implemented /planned?		
		If yes, how effective is/was the spill response?		
27.	**Was an environmental monitoring program initiated?**	Yes or No		
		If yes, what actions have been implemented and/or planned?		
28.	**Did the incident result in the death or injury of any fauna?**	Yes or No (If yes provide details of species in the table below)		
	Injured fauna	**Species 1**	**Species 2**	**Species 3**
	Species name (common or scientific name)			
	Number of individuals killed or injured	Killed: Injured:	Killed: Injured:	Killed: Injured:
	NB: If more species were injured or killed, please copy/paste this section (Item E4) and add extra data			
29.	**Actions taken to avoid or mitigate any adverse**	**Action**	**Responsible party**	**Completion date** *Actual or intended*

Part 1C – Complete for environmental incidents

Environmental Impacts

	environmental impacts of the incident.			
	NB: If more actions, please add extra rows as required			
30.	**Corrective actions taken, or proposed, to stop, control or remedy the incident.**	**Action**	**Responsible party**	**Completion date** *Actual or intended*
	NB: If more actions, please add extra rows as required			
31.	**Actions taken, or proposed, to prevent a similar incident occurring in the future.**	**Action**	**Responsible party**	**Completion date** *Actual or intended*
	NB: If more actions, please add extra rows as required			

Attachments

Are you attaching any documents?			Yes or No *If yes, provide details below*	
No.	**ID**	**Revision**	**Date**	**Title/Description**
Insert or delete rows as required				

Part 2 – Information required within 30 days of accident or dangerous occurrence

NOPSEMA acknowledges that in many circumstances an operator may not have completed an investigation within 3 days of an accident or first detection of a dangerous occurrence and agrees that these items must be provided within 30 days unless otherwise agreed, in writing with NOPSEMA. In circumstances where an investigation has been completed within 3 days, and these items are available (supplemented, as required by any attachments) this part should also be completed at that time.

32.	**Has the investigation been completed?**	Yes or No	
	Root cause analysis *What were the root causes?*	Root cause 1	
		Root cause 2	
		Root cause 3	
		Other root causes	
	Full report *Describe investigation in detail, including who conducted the investigation and in accordance with what standard/procedure with reference to attachments listed in the 'attachments table' (following) as applicable*		

33.	**Actions to prevent recurrence of same or similar incident**	**Action**	**Responsible party**	**Completion date** *Actual or intended*
	NB: Add or delete rows as appropriate			

Attachments (Insert/delete rows as required)

Are you attaching any documents?			Yes or No *If yes, provide details below*	
No.	**ID**	**Revision**	**Date**	**Title/description**

Instructions and general guidance for use:

1. The use of this form is voluntary and is provided to assist operators and titleholders to comply with their obligations to give notice and provide reports of incidents to NOPSEMA under the applicable legislation.
2. Accidents, dangerous occurrences or environmental incidents can all be reported using this same form.
3. The applicable legislation for incident reporting is:
    a. Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009 [OPGGS(S)R]; and
    b. Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 [OPGGS(E)R], for facilities located in Commonwealth waters; or
    c. for facilities located in designated coastal waters, the relevant State or Territory Act and associated Regulations where there is a current conferral of powers to NOPSEMA.
4. In the context of this form an incident is a reportable incident as defined under:
    a. OPGGSA, Schedule 3, Clause 82.
    b. OPGGS(E)R, regulation 4.
5. This form should be used in conjunction with NOPSEMA Guidance Notes available on the NOPSEMA website:
    a. N-03300-GN0099 Notification and Reporting of Accidents and Dangerous Occurrences
    b. N-03300-GN0926 Notification and Reporting of Environmental Incidents
6. Part 1 requires completion for all incidents; then ALSO complete part 2 if the incident is an accident or dangerous occurrence.
7. NOPSEMA considers that a full report will contain copies of documentary material referenced and/or relied on in the course of completing this form, which may include (but not be limited to) as appropriate: witness statements, management system documents, drawings, diagrams and photographs, third party reports (audit, inspection, material analysis etc.), internal records and correspondence.
8. This form is intended to be completed electronically using Microsoft Word by completing the unshaded cells which will expand as required to accept the information required and the check boxes where relevant (NB: check boxes may appear shaded and have reduced functionality in MS Word versions prior to 2010).
9. The completed version of this form (and any attachments, where applicable) should be emailed to:

    submissions@nopsema.gov.au

    or submitted via secure file transfer at: https://securefile.nopsema.gov.au/filedrop/submissions as soon as practicable, but in any case, within three days of the incident.

6.5 Community Newsletters 488

1. CONSULTATION APPROACH

Consultation under regulation 25 of the OPGGS(E) Regulations provides that a titleholder must consult each relevant person (regulation 25(1)), must give each relevant person sufficient information to allow the relevant person to make an informed assessment of the possible consequences of the activity on the functions, interests or activities of the relevant person (regulation 25(2)), and must allow a relevant person a reasonable period for consultation (regulation 25(3)).

A titleholder must also give a relevant person a reasonable opportunity to consult – this means that a titleholder will need to demonstrate that what it did constituted consultation appropriate and adapted to the nature of the interests of the relevant person (see Tipakalippa Full Court paragraph 104). The EP must contain a report that contains an assessment of the merits of any objection or claim about the adverse impact of each activity to which the EP relates and a statement of the titleholder's response, or proposed response, if any, to each objection or claim (regulation 24(b)).

The criteria for acceptance of an EP includes that the EP demonstrates that the measures (if any) that the titleholder has adopted, or proposes to adopt, because of the consultations are appropriate (regulation 34(g)).

For the North Rankin Complex Operations Environment Plan (EP), Woodside has taken a broad and proactive tiered consultation approach over a period of 18 months.

This approach was aimed at raising public awareness of the consultation opportunity and to enable self-identification. It included a social media campaign and advertising in national, state, regional and Indigenous newspapers.

The tiered consultation approach discharges regulation 25 of the Environment Regulations' requirements. The approach is proactive, has enabled self-identification, and has raised broad awareness of Woodside's activities related to this EP.

1.1 Tiered consultation approach

Regulation 25	Woodside's consultation approach assessed and identified relevant persons, enabled two-way dialogue and engagement, and included email and phone call follow up. The approach taken comfortably satisfies the requirements of regulation 25: to give relevant persons sufficient information and allow a reasonable period of time for consultation (see Section 5 of the EP).
Proactive	To raise awareness of the consultation process, and to enable grass-roots consultation, Woodside undertook advertised regional consultation roadshows and facilitated consultation at regional community events.
Self-Identification	Broad communication activities were undertaken to build awareness of consultation and enable self-identification, supported by targeted education materials.
Broad Understanding	Broad proactive communication activities were undertaken with the public to raise awareness of Woodside's activities.

1.2 Building on the existing consultation approach

For this EP, Woodside has built on its consultation methodology and undertaken additional consultation activities throughout the consultation period to ensure a reasonable period of time and sufficient information has been provided to relevant persons so that they can make an informed assessment of the possible consequences of the activity on their functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The approach for this included:

- a consultation period of about 18 months
- undertaking proactive consultation activities to provide sufficient information to relevant persons
- raising awareness of the consultation process and opportunity to provide feedback
- driving participation in the consultation process.

1.3 Traditional Custodian consultation approach

Woodside has meaningful long-term relationships with relevant Traditional Custodians specifically tailored to provide for effective engagement which is continuous and is not confined to individual EPs, instead covering all EPs and other issues that are relevant at the time of engagement.

To this end, consultation on any particular EP, including the North Rankin Complex Operations EP, happens before, during and after the designated consultation period in a more holistic manner. This helps enable an understanding of the bigger picture and accommodates cultural requirements. Ongoing consultation remains an important part of consulting with Traditional Custodians based on availability, cultural protocols and the preferred method of consultation for each relevant person.

Since early 2024, where requested, Woodside has been working with nominated representative bodies to develop Consultation Framework Agreements which seek input from groups to outline their preferred method of consultation.

1.4 NGO consultation approach

Woodside has an established history of consulting with environmental non-government organisations (NGOs) as part of its EP consultation. In its methodology (Section 5.3.4, Table 5-2), NGOs are considered “Other non-government groups or organisations” and “Research institutes and local conservation groups or organisations”. Relevant person identification for these categories is based on registered non-government groups or organisations with current targeted public website material specific to the proposed activity at the time of developing the EP and who have demonstrated functions, interests or activities relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation.

So that NGOs were given sufficient information and a reasonable period of time to consult, Woodside:

- advertised the consultation period (social and traditional media)
- directly consulted NGOs
- participated in regional community events (which were advertised) in the Pilbara and Gascoyne which could be attended by any NGOs including local groups (if NGOs attended these sessions, they did not identify themselves).

2. RELEVANCY ASSESSMENT

2.1 Assessment of relevant persons for the proposed activity

The result of Woodside's assessment of relevant persons in accordance with regulation 25 (1) of the Environment Regulations is outlined below at Table 1 and Table 2.

Persons or organisations that Woodside assessed as not relevant but nonetheless chose to contact at its discretion in accordance with Section 5.3.4 in the EP or self-identified and Woodside assessed as not relevant are summarised below at Table 1 and Table 3.

As per Woodside's methodology (Section 5 in the EP), assessment of relevant persons is informed by the EMBA, shown in Figure 1-1.

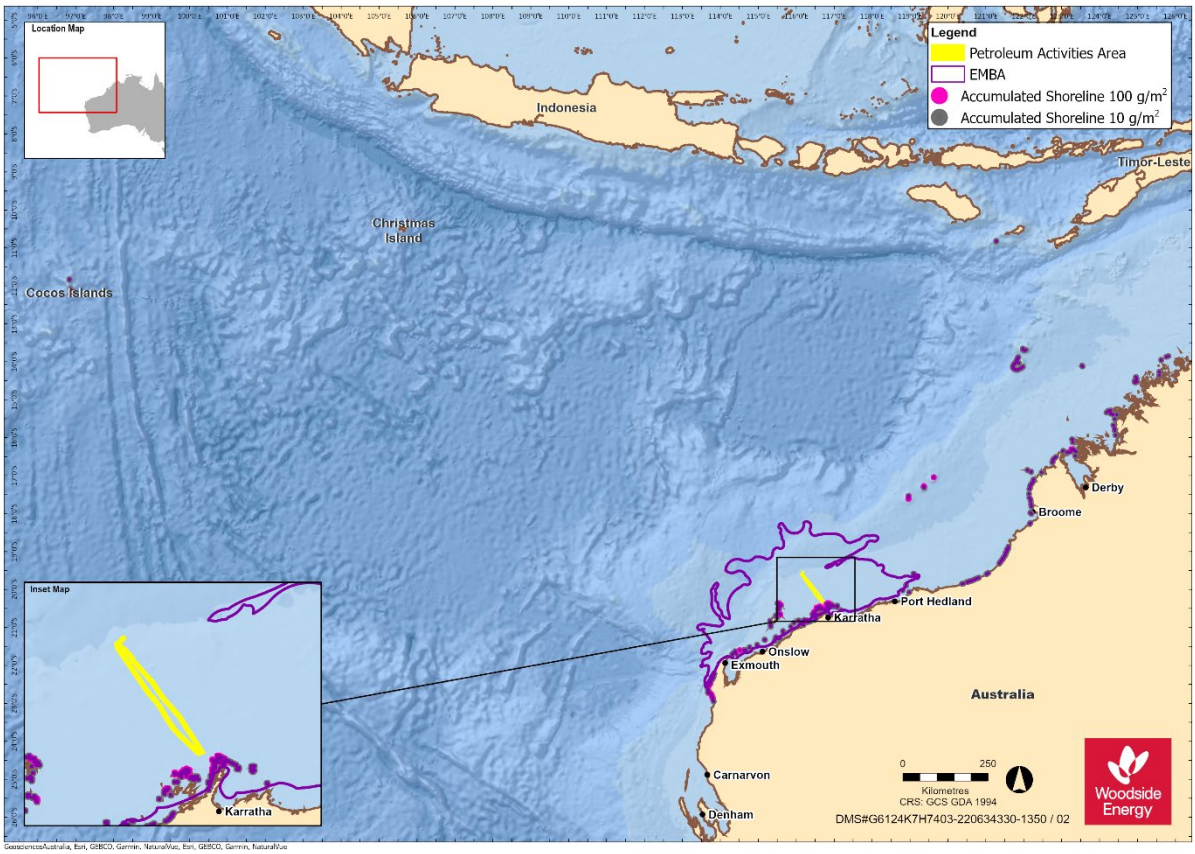

Figure 1-1: Petroleum Activities Area and EMBA for this EP

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

2.2 Table 1: Assessment of relevance

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Commonwealth and WA State Government Departments or Agencies – Marine			
Australian Border Force (ABF)	Responsible for coordinating maritime security	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. ABF's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Department of Foreign Affairs and Trade (DFAT)	Responsible for promoting and protecting Australia's interests internationally and contributes to global stability and economic growth. DFAT manages Australia's relationships and interaction with the governments of our neighbouring countries.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. DFAT has no direct role in the management of the Commonwealth marine area but has an interest in ensuring that consultation with foreign entities, both private and government, is effective and is aligned with Australia's interests. DFAT manages Australia's relationships and interaction with the governments of our neighbouring countries. The proposed activity has the potential to impact DFAT's functions, interests or activities as the EMBA overlaps Indonesian waters.	Yes
Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA)	Responsible for managing fisheries within 12 nm of Christmas Island and Cocos (Keeling) Island	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a). The Cocos (Keeling) Island Marine Aquarium Fishery is active in the EMBA. DITRDCA's responsibilities may be relevant to the activity as the above mentioned fishery is active in the EMBA.	Yes
Australian Communications and Media Authority (ACMA)	Regulator for communications and media	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. ACMA's responsibilities may be relevant to the activity as there may be telecommunications lines that intersect the Operational Area.	Yes
Australian Fisheries Management Authority (AFMA)	Responsible for managing Commonwealth fisheries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. The North West Slope Trawl and Western Deepwater Trawl Fishery are active in the EMBA.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		AFMA's responsibilities may be relevant to the activity as the abovementioned fisheries are active in the EMBA.	
Australian Hydrographic Office (AHO)	Responsible for maritime safety and Notices to Mariners	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AHO's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Australian Maritime Safety Authority (AMSA) – Marine Safety	Statutory agency for vessel safety and navigation	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AMSA – Marine Safety's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Australian Maritime Safety Authority (AMSA) – Marine Pollution	Legislated responsibility for oil pollution response in Commonwealth waters	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AMSA – Marine Pollution's responsibilities may be relevant to the activity as the proposed activity has a hydrocarbon spill risk which may require AMSA response in Commonwealth waters.	Yes
Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries	Responsible for implementing Commonwealth policies and programs to support agriculture, fishery, food and forestry industries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. The North West Slope Trawl and Western Deepwater Trawl Fishery are active in the EMBA. DAFF – Fisheries responsibilities may be relevant to the activity as the abovementioned fisheries are active in the EMBA.	Yes
Department of Defence (DoD)	Responsible for defending Australia and its national interests.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. DoD's responsibilities may be relevant to the activity as defence training areas lie within the EMBA.	Yes
Department of Primary Industries and Regional Development (DPIRD)	Responsible for managing State fisheries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The Mackerel Managed Fishery, Marine Aquarium Fish Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Fish Trawl Managed Fishery, Pilbara Trap Managed Fishery, Pilbara Line Fishery, Specimen Shell Managed Fishery are active in the Operational Area.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		The Exmouth Gulf Prawn Managed Fishery, Kimberley Crab Managed Fishery, Kimberley Gillnet and Barramundi Managed Fishery, Kimberley Prawn Managed Fishery, Mackerel Managed Fishery, Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Northern Demersal Scalefish Managed Fishery, Onslow Prawn Managed Fishery, Pearl Oyster Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Fish Trawl (Interim) Managed Fishery, Pilbara Trap Managed Fishery, Pilbara Line Fishery, Specimen Shell Managed Fishery, West Coast Deep Sea Crustacean Managed Fishery, Cocos (Keeling) Islands Marine Aquarium Fishery have been active in the EMBA within the last 5 years. DPIRD's responsibilities may be relevant to the activity as the government department responsible for State fisheries.	
Department of Transport (DoT) As of 1 July 2025, Department of Transport and Major Infrastructure (DTMI)	Legislated responsibility for oil pollution response in State waters	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has a hydrocarbon spill risk, which may require DoT/DTMI response in State waters.	Yes
Department of Planning, Lands and Heritage (DPLH)	Responsible for state level land use planning and management, and oversight of Aboriginal cultural heritage and built heritage matters.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. There is known Maritime Cultural Heritage overlapping the EMBA.	Yes
Western Australian Museum	Manages 200 shipwreck sites of the 1,500 known to be located off the Western Australian coast.	Woodside has applied its methodology for 'Historical cultural heritage groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There are known shipwrecks overlapping the EMBA which the Western Australian Museum may be responsible for.	Yes
Pilbara Ports Authority	PPA encompasses the Ports of Ashburton, Dampier, Port Hedland and Varanus Island.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Pilbara Ports Authority's responsibilities as the EMBA overlaps the Pilbara Ports Authority's area of responsibility.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
	PPA oversees the operation of the greenfield ports of Anketell, Balla Balla, Cape Preston East, Cape Preston West and Urala. PPA oversees the Shipping and Pilotage Act 1967 (SPA) ports of Barrow Island, Cape Preston, Onslow and Port Walcott.		
Port of Cocos (Keeling) Island	Responsible for the operation of the Port of Cocos (Keeling) Island.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The EMBA does not overlap Port of Cocos (Keeling) Island's area of responsibility. Woodside chose to contact Port of Cocos (Keeling) Island at its discretion in line with Section 5.3.7.	No
Kimberley Ports Authority	Responsible for the operation of the Port of Broome.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Kimberley Ports Authority's responsibilities as the EMBA overlaps Kimberley Ports Authority's area of responsibility.	Yes
Commonwealth and WA State Government Departments or Agencies – Environment			
Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)	DAFF administers, implements and enforces the Biosecurity Act 2015. The Department requests to be consulted where an activity has the potential to transfer marine pests. DAFF also has inspection and reporting requirements	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DAFF – Biosecurity's responsibilities may be relevant to the proposed activities in the EMBA in the prevention of introduced marine species.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
	to ensure that all conveyances (vessels, installations and aircraft) arriving in Australian territory comply with international health regulations and that any biosecurity risk is managed. The Dept requests to be consulted where an activity involves the movement of aircraft or vessels between Australia and offshore petroleum activities either inside or outside Australian territory.		
Department of Climate Change, Energy, the Environment and Water (DCCEEW)	Responsible for implementing Commonwealth policies and programs to support climate change, sustainable energy use, water resources, the environment and our heritage. Administers the *Underwater Cultural Heritage Act 2018* in collaboration with the States, Northern Territory and Norfolk Island, which is responsible for the	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DCCEEW's responsibilities may be relevant to the proposed activities in the EMBA as there are potential environmental impacts from the proposed activity. There is known Maritime Cultural Heritage overlapping the EMBA.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
	protection of shipwrecks, sunken aircraft and other types of underwater heritage and their associated artefacts in Commonwealth waters.		
Director of National Parks (DNP)	Responsible for the management of Commonwealth parks and conservation zones.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DNP's responsibilities may be relevant to the activity as DNP requires an awareness of activities that occur within AMPs, and an understanding of potential impacts and risks to the values of parks (NOPSEMA guidance note: N-04750-GN1785 A620236, June 2020). Titleholders are required to consult DNP on offshore petroleum activities if they occur in, or may impact on the values of marine parks, including where potential spill response activities may occur in the event of a spill (i.e. scientific monitoring).	Yes
Ningaloo Coast World Heritage Advisory Committee (NCWHAC)	Supports the DBCA to manage the Ningaloo Coast World Heritage Area.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. The NCWHAC's responsibilities may be relevant to the activity as the EMBA overlaps the Ningaloo Marine Park.	Yes
Department of Biodiversity, Conservation and Attractions (DBCA)	Responsible for managing WA's parks, forests and reserves to achieve wildlife conservation and provide sustainable recreation and tourism opportunities.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. The DBCA's responsibilities may be relevant to the activity as EMBA overlaps WA parks, forests or reserves. Activities have the potential to impact marine tourism in the EMBA.	Yes
Commonwealth and State Government Departments or Agencies – Industry			
Department of Industry, Science and Resources (DISR)	Department of relevant Commonwealth Minister.	Required to be consulted under regulation 25(1)(a) of the Environment Regulations.	Yes
Department of Energy, Mines,	Department of relevant State Minister	Required to be consulted under regulation 25(1)(c) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Industry Regulation and Safety (DEMIRS) As of 1 July 2025, Department of Mines, Petroleum and Exploration (DMPE)			
Commonwealth Commercial fisheries and representative bodies			
North West Slope Trawl Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.	Yes
Southern Bluefin Tuna Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years. Woodside does not consider that the proposed activity will present a risk to licence holders, given since 1992, the majority of Australian catch has concentrated in south-eastern Australia. (Patterson et al., 2022). In addition, given fishing methods by licence holders for species fished in this fishery (Australia has a 35% share of total global allowable catch of Southern Bluefin Tuna, which is value-added through tuna ranching near Port Lincoln (South Australia), or fishing effort in New South Wales (Australian Southern Bluefin Tuna Industry Association).	No
Western Deepwater Trawl Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps EMBA and has been active in the EMBA within the last 5 years.	Yes
Western Skipjack Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years.	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		Woodside does not consider that the activity will present a risk to licence holders, given the fishery spans the Australian Fishing Zone west of Victoria and the Torres Strait. The Fishery is not currently active and no fishing has occurred since 2009 (Patterson et al., 2022). In addition, interactions are not expected given the species' pelagic distribution fishing methods for species fished by licence holders.	
Western Tuna and Billfish Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years.	No
Commonwealth Fisheries Association (CFA)	Represents the interests of commercial fishers with licences in Commonwealth waters	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. No fisheries are active in the Operational Area. The North West Slope Trawl Fishery and Western Deepwater Trawl Fishery are active in the EMBA. CFA's functions may be relevant to the activity as the above mentioned fisheries are active in the EMBA.	Yes
Australian Southern Bluefin Tuna Industry Association (ASBTIA)	Represents the interests of the Southern Bluefin Tuna Fishery and Western Skipjack Fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Southern Bluefin Tuna Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Southern Bluefin Tuna Fishery, the ASBTIA has also been assessed as not relevant.	No
Tuna Australia	Represents the interests of the Western Tuna and Billfish Fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Western Tuna and Billfish Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Western Tuna and Billfish Fishery, Tuna Australia has also been assessed as not relevant.	No
Pearl Producers Association (PPA)	Peak representative organisation of The Australian South Sea Pearling Industry, with members in Western	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Pearl Oyster Managed Fishery is active within the EMBA.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
	Australia and the Northern Territory	PPA's functions may be relevant to the activity as the Pearl Oyster Managed Fishery is active in the EMBA.	
State Commercial fisheries and representative bodies			
Marine Aquarium Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
South West Coast Salmon Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, the fishery has not been active in the Operational Area or EMBA within the last 5 years. Woodside does not consider that the activity will present a risk to licence holders, given fishers are active south of Perth and from the beach (previous WAFIC advice). Further, no fishing occurs north of the Perth Metropolitan Area and therefore, no effort occurs within the Operational Area or EMBA.	No
Mackerel Managed Fishery (Area 2)	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area (Area 2) and EMBA (Area 1, 2 and 3) and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	
Pilbara Crab Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
West Coast Deep Sea Crustacean Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area, it has not been active in the Operational Area within the last 5 years. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No
Specimen Shell Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. While Woodside assessed the fishery as relevant in the Operational Area and EMBA, WAFIC has advised there is no need to consult this fishery given the proposed activities. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
		EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	
Abalone Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, the fishery has not been active in the Operational Area or EMBA within the last 5 years.	No
Pearl Oyster Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area, it has not been active in the Operational Area within the last 5 years. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No
Land Hermit Crab Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area or the EMBA.	No
Onslow Prawn Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes

		EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	
West Coast Rock Lobster Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. Although the fishery overlaps the EMBA, the fishery has not been active in the EMBA within the last 5 years. Woodside does not consider that the activity will present a risk to licence holders, given fishers are active south of Perth and from the beach (previous WAFIC advice). Further, no fishing occurs north of the Perth Metropolitan Area and therefore, no effort occurs within the Operational Area or EMBA.	No
Nickol Bay Prawn Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No
Kimberley Crab Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No

3. CONSULTATION ACTIVITIES

3.1 North Rankin Complex Operations EP consultation activities

Woodside has been conducting extensive consultation with relevant persons and other parties for this EP since June 2024 when consultation commenced with interested and affected stakeholders as part of a planned, integrated and consistent approach to stakeholder engagement for Woodside's proposed opportunities.

A broad consultation process has been undertaken with relevant persons for the North Rankin Complex Operations EP. Consultation aims to be inclusive, transparent, voluntary, respectful and two-way. Consultation was undertaken by email, letter, phone call and/or meetings and through advertising.

3.2 Discharging Regulation 25 of the Environment Regulations

Woodside advertised the planned activities proposed for this EP in national, state and relevant local newspapers including (see Record of Consultation, reference 6.3). Regional newspapers do not require subscription and are available directly to households. All communities within or adjacent to the EMBA had access to this information via this information.

Newspaper	Coverage	Publication dates
The Australian	National	17 June 2024
The West Australian	Regional (WA)	17 June 2024
Pilbara News	Local (WA)	19 June 2024
Broome Advertiser	Local (WA)	20 June 2024
Kimberley Echo	Local (WA)	20 June 2024
North West Telegraph	Local (WA)	19 June 2024
Koori Mail	Indigenous	19 June 2024
National Indigenous Times	Indigenous	28 June 2024

A Consultation Information Sheet was provided to relevant persons and persons Woodside chose to contact (see Section 5.3.7 in the EP), which included details such as an activity overview, maps, a summary of key risks and/or impacts and management measures (Record of Consultation, reference 6.1.1).

Since the commencement of the initial consultation period (June 2024), the stakeholder Consultation Information Sheet has been available on Woodside's website. The Woodside Consultation Information Sheets include a toll-free 1800 phone number and Woodside's feedback email address (feedback@woodside.com).

The Woodside Consultation Activities webpage (accessible on the Consultation Information Sheet via a QR code, banners at community events and via social media content and advertisements) includes Consultation Information Sheets for the EPs on which Woodside is currently consulting, including this EP. The website page also features a subscribe field for EP-focused communications from Woodside.

Additional targeted information was provided to relevant marine users including AHO and AMSA – Marine Safety. This information included maps and additional information (such as GIS shape files) relevant to the specific category of persons. The relevant persons had a 30-day period in which to provide feedback.

Where appropriate, Woodside conducted phone calls and meetings with relevant persons.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Where appropriate, targeted follow-up emails were sent to relevant persons who had not provided a response prior to the close of the target feedback period.

Woodside considered relevant person responses and assessed the merits and relevance of objections and claims about the potential adverse impact of the proposed activity set out in the EP, in accordance with the intended outcome of consultation (see Section 5.2 in the EP).

Consultation activities undertaken with relevant persons are summarised at Appendix F, Table 2.

Engagement undertaken with persons or organisations Woodside assessed as not relevant but chose to contact (see Section 5.3.4 in the EP) or self-identified and Woodside assessed as not relevant are summarised at Appendix F, Table 3.

From 17 June 2024, Woodside commenced a geotargeted sponsored social media campaign covering various local government authorities within, or coastally adjacent to, the EMBA for the proposed activities. The campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations on how they can find out about Woodside's proposed activities by visiting Woodside's website.

Platform	Geotargeted Reach	Post Dates	Impact
Facebook	80km radius around – Broome – Derby – Exmouth – Onslow – Port Hedland – Roebourne – Karratha Age: 18-65+	17 June 2024 to 19 July 2024	Reach: 254,218 Frequency: 2.33 Impressions: 592,614 Clicks: 2,139 Click Through Rate%: 0.08%
Instagram			Reach: 116,698 Frequency: 1.62 Impressions: 189,101 Clicks: 146 Click Through Rate %: 0.08%

3.3 Proactive consultation

3.3.1 Community engagement

The Community Information Sessions or community events that Woodside has conducted or attended are outlined below and captured in more detail in (Record of Consultation, reference 6.4). Woodside published advertisements ahead of these sessions and events in relevant local newspapers and on social media to support attendance.

Date (2024)	Location	Event (if applicable)
15 June	Dampier	WA Day Celebrations
25 & 26 June	Karratha	Pilbara Summit
26 July	Karratha	Community pop-up at Lo's Café
3 & 4 August	Karratha	FeNaCING Festival
26 to 28 August	Karratha	Developing Northern Australian Conference
12 October	Dampier	Dampier Beachside Markets
2 November	Dampier	Dampier Beachside Markets
14 November	Exmouth	Community Pop-up Exmouth Mall
Date (2025)	**Location**	**Event (if applicable)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

18 March	Dampier	Who's Who in the Hood
6 April	Dampier	Dampier Beachside Markets
4 May	Dampier	Dampier Beachside Markets
15 & 16 May 2025	Karratha	Red Earth Arts Festival (REAF) @ The Quarter
2 & 3 August 2025	Karratha	FeNaClNG Festival

3.3.2 Community Liaison Group engagement

The Exmouth and Karratha Community Liaison Groups (CLGs) represent the interests of a range of local government, industry and community organisations in relation to oil and gas matters in the Exmouth and Karratha region. Woodside regularly meets with the two CLGs to discuss a range of issues including consultation of specific EPs.

3.3.3 Let's Talk – EP Newsletter

Woodside's EP focussed newsletter *Let's Talk* is designed to reach existing and potential stakeholders and encourage self-identification about Woodside's EP-related activities. The newsletter provides quarterly updates about EP consultation activities, case studies on effective consultation with relevant persons and other EP related information such as forthcoming events where Woodside personnel will be consulting with the local community. *Let's Talk* is distributed in a variety of locations as well as across digital platforms including Woodside's website and social media channels. People can also subscribe to receive it on Woodside's website. (Record of Consultation, reference 6.5.2).

Woodside also publishes the *Karratha Community Update* newsletter quarterly which includes a QR code and encourages people to go to the Consultation Activities page on Woodside's website to subscribe and find information about EPs. (Record of Consultation, reference 6.5.1).

3.4 Self-identification

Social media campaign - Are you a relevant person?

In October 2023, Woodside commenced a targeted social media campaign, both organic and sponsored, aimed at community members of key towns within the Kimberley, Pilbara, Gascoyne and Murchison regions. The campaign delivered targeted information to several profiled relevant person groups via story and feed content with text and a short accessible video (Record of Consultation, reference 6.3.3).

The campaign aimed to support self-identification and provided information about Woodside's consultation with relevant persons when preparing EPs and encouraged participation in the consultation process.

Six different videos with specific information to potential relevant persons groups were launched on Facebook and Instagram:

- Local communities – volunteering
- Local communities – apprentices/trainees
- Commercial fishing
- Recreational fishing
- Recreational marine users
- Traditional Owners.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Results of final campaign at June 2024 are as follows:

Categories	Reach	Frequency	Impressions	Clicks	Click-through rate %
Marine Users	251,479	2.73	687,641	640	0.09%
Volunteering	97,934	1.76	171,908	180	0.10%
Apprentices & trainees	79,950	1.70	136,183	200	0.15%
Commercial Crab Fisheries	199,619	2.07	412,298	323	0.08%
Traditional Owner Groups	257,203	2.49	641,572	574	0.09%
Commercial Fisheries Demersal	260,274	2.65	689,876	546	0.08%

The commercial fisheries, recreational fisheries and Traditional Owners videos are available on the Woodside Consultation Activities webpage.

3.5 Traditional Custodian specific consultation

In addition to the approaches above including community information sessions, additional activities were undertaken with relevant Traditional Custodians, which were specifically designed to provide for effective engagement with Traditional Custodians and so that information was provided in a form that was readily accessible and appropriate (see Section 5.5 in the EP). Consultation undertaken specifically with Traditional Custodians for this EP includes direct engagement with nominated representative bodies via the contact listed on the Office of the Registrar of Indigenous Corporations (ORIC) website, requesting advice on how they would like to be engaged and asking whether other members and/or individuals should be consulted. This has resulted in:

- meetings with directors, Elders and any nominated representatives, on country or in Perth
- requests and offers of resourcing to enable and support consultation
- exchange of written feedback and correspondence
- summary Consultation Information Sheet, developed and reviewed by Indigenous representatives in collaboration with technical experts to ensure content is appropriate to the intended recipients, was provided to relevant Traditional Custodian groups (Record of Consultation, reference 6.1.2) and phone calls to provide context to the consultation made.

Ongoing efforts were made to engage and develop relationships with these bodies via a variety of means such as email, phone calls, alternative contacts, texts, social media and, in some cases, physical visits.

Consultation meetings with attendees decided by Traditional Custodian groups and supported by senior Woodside representatives, subject matter experts and First Nations Relations advisers with skills and experience in community engagement. Meetings are developed through a two-way consultation process to ensure effective information sharing via:

- mutually agreed agenda avoiding time pressure

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- encouraging Traditional Custodian attendees to control the pace of the meeting and pause at any time to ask questions, seek clarification or provide feedback
- visual aids such as posters, presentations, simplified technical videos and real-world pictures and footage
- emphasis on potential planned and unplanned risks and impacts of the activity
- ample opportunity for questions and feedback
- discussion about ongoing relationship development and opportunities
- distribution of hard-copy Consultation Information Sheets and Summary Information Sheets
- meeting all costs such as sitting fees, travel, legal support and executive support and other support required
- advertising in Indigenous publications such as the National Indigenous Times and Koori Mail.

Woodside also ran a geotargeted sponsored social media campaign (Record of Consultation, reference 6.3.2) to various communities that are coastally adjacent to the EMBA for the proposed activities.

The wide-reaching campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations how they can find out about Woodside's proposed activities by visiting Woodside's website, which details the intent of consultation with relevant persons under the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth).

These social media posts were developed with input from Indigenous representatives. Social media is a highly effective means to engage Indigenous audiences as outlined in Indigenous Digital Life (Professor Carlson, 2021). Advertisements used language and information appropriate to Indigenous audiences and feedback from community engagements indicates a high level of penetration for this process.

Woodside has employed a diverse range of techniques to allow relevant persons to become aware of the proposed activity and how it may affect their functions, activities or interests, and to understand their ability to provide feedback. The combination of PBC engagement meetings, traditional print media, social media and face-to face community interaction was designed with input from Indigenous representatives and adapted to the audience, so that it provides a wide-ranging opportunity to consult.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4. TABLE 2: CONSULTATION REPORT WITH RELEVANT PERSONS OR ORGANISATIONS

The black numbering **(N)** in the 'Summary of information provided and record of consultation for this EP' in Table 2 denotes an item raised by a stakeholder. The green numbering **(N)** in this section denotes Woodside's response to that item.

4.1 COMMONWEALTH AND WA STATE GOVERNMENT DEPARTMENTS OR AGENCIES – MARINE

4.1.1 Australian Border Force (ABF)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed ABF advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to ABF, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with ABF for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ABF sufficient information to allow ABF to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to ABF on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed ABF a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to ABF advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ABF 30 days for consultation. For consultation on EPs, 30 days is the usual period for ABF.
- In this context, Woodside allowed ABF a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with ABF is appropriate and adapted to the nature of interests of ABF:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with ABF.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding ABF of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as ABF did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on ABF's functions, interests or activities.

4.1.2 Australian Communications and Media Authority (ACMA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed ACMA advising of the proposed activity (Record of Consultation, reference 6.2.4), provided a Consultation Information Sheet, a submarine cables map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 July 2024, Woodside sent an email reminder to ACMA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 12 July 2024, ACMA responded and thanked Woodside for the opportunity to comment on this EP (SI Report, reference 48.1) and:
  - **(1)** confirmed the operational areas are not in the vicinity of existing protection zones.
  - **(2)** noted Woodside is aware of submarine cables in the area operated by Telstra and recently installed cables operated by Vocus.
  - **(3)** recommended that Woodside contact the AHO for further assistance identifying submarine cables that may be impacted by the proposed activities.
  - **(4)** advised no additional consultation is required for this activity.
- On 18 July 2024, Woodside emailed ACMA (SI Report 3.2) and:
  - **(1)** acknowledged the advice regarding the protection zones.
  - **(2)** confirmed consultation information was provided to Telstra and Vocus.
  - **(3)** noted that AHO can be contacted for further assistance identifying submarine cables.
  - **(4)** noted that ACMA does not require additional consultation for this activity.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) Operational areas are not in the vicinity of any existing protection zones.	**(1)** **Woodside assessment**: Woodside noted ACMA's confirmation that the operational areas are not in the vicinity of existing protection zones. **Woodside response:** Woodside acknowledged the advice regarding existing protection zones.	**(1)** As referenced in Section 4.10.6 of the EP.
(2) Operational areas are in the vicinity of submarine cables.	**(2)** **Woodside assessment:** Woodside noted ACMA's advice that the operational areas are in the vicinity of submarine cables. **Woodside response:** Woodside confirmed it consulted with Telstra and Vocus.	**(2)** Not required.
(3) Contact the AHO for further assistance identifying cables.	**(3)** **Woodside assessment:** Woodside noted ACMA's recommendation to contact the AHO for further assistance identifying cables. **Woodside response**: Woodside confirmed that the AHO could be contacted should further assistance be required to identify submarine cables.	**(3)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(4) No further consultation required for this activity.	**(4)** **Woodside assessment:** Woodside accepts that ACMA does not require further consultation. **Woodside response**: Woodside noted that ACMA does not require further consultation.	**(4)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with ACMA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ACMA sufficient information to allow ACMA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to ACMA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided ACMA with information tailored to ACMA by including a map of submarine communication cables.
- On 12 July 2024, ACMA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable ACMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided ACMA with further information in response to ACMA's feedback (email of 18 July 2024).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed ACMA a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to ACMA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ACMA 30 days for consultation.
- In this context, Woodside allowed ACMA a reasonable period for consultation in preparation of the EP as evidenced by its response on 12 July 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with ACMA is appropriate and adapted to the nature of interests of ACMA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with ACMA.
- Woodside considers a reasonable opportunity was provided to ACMA as evidenced by its response on 12 July 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- ACMA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from ACMA.
  - Made no changes or inclusions to the EP as a result of consultation with ACMA because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.3 Australian Fisheries Management Authority (AFMA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed AFMA advising of the proposed activity (Record of Consultation, reference 6.2.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to AFMA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with AFMA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AFMA sufficient information to allow AFMA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to AFMA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed AFMA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AFMA advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AFMA 30 days for consultation. For consultation on EPs, 30 days is the usual period for AFMA.
- In this context, Woodside allowed AFMA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AFMA is appropriate and adapted to the nature of interests of AFMA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AFMA.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding AFMA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as AFMA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on AFMA's functions, interests or activities.

4.1.4 Australian Hydrographic Office (AHO)

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed AHO advising of the proposed activity (Record of Consultation, reference 6.2.5), provided a Consultation Information Sheet, shipping lanes map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to AHO, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with AHO for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AHO sufficient information to allow AHO to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to AHO on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided AHO with information tailored to AHO by including a map of shipping lanes.

Reasonable Period

Woodside allowed AHO a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AHO advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AHO 30 days for consultation. For consultation on EPs, 30 days is the usual period for AHO.
- In this context, Woodside allowed AHO a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AHO is appropriate and adapted to the nature of interests of AHO:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AHO.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding AHO of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as AHO did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on AHO's functions, interests or activities.

4.1.5 Australian Maritime Safety Authority (AMSA) – Marine Safety

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed AMSA advising of the proposed activity (Record of Consultation, reference 6.2.6), provided a Consultation Information Sheet, a shipping lane map, GIS shapefiles and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to AMSA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 19 July 2024, AMSA emailed Woodside (SI Report, reference 52.1) and:
  - **(1)** provided a map of vessel traffic plot for the area and noted heavy vessel traffic would be encountered in the area.
  - **(2)** noted Woodside's considerations in the consultation email, including:
    - requested Woodside notify AMSA's Response Centre (ARC) 24-48 hours before operations commenced.
    - reminded Woodside to contact the AHO no less than four working weeks before operations commenced.
    - reminded Woodside that vessels should exhibit appropriate lights and shapes to reflect the nature of operation.
    - advised that Woodside should evaluate and implement adequate anti-collision measures.
- On 30 July 2024, Woodside thanked AMSA for its feedback (SI Report, reference 52.2) and:
  - **(1)** noted the map provided and the contact details to obtain shipping data.
  - **(2)** confirmed it will update the EP with AMSA's ARC for notifications.
- **(2)** On 9 August 2024, Woodside emailed AMSA (SI Report, reference 52.3) and:
  - confirmed it will notify AMSA's ARC and JRCC regarding vessel activities
  - confirmed it will notify AHO with details relevant to the operations
  - noted the advice regarding anti-collision measures.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1)	**(1)**	**(1)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Provided a map of vessel traffic and contact details for obtaining shipping data.	**Woodside assessment:** Woodside noted AMSA's spatial data gateway and the map provided. **Woodside response:** Woodside thanked AMSA for providing the map and noted the contract vessels will comply with Marine Orders for safe vessel operations.	Not required.
(2) Safe vessel operations considerations.	**(2)** **Woodside assessment:** Woodside ensures vessels are compliant with Marine Orders for safe vessel navigation. **Woodside response:** Woodside confirmed it updated AMSA's ARC as contact for notifications.	**(2)** Section 6 of the EP contains a number of controls that address AMSA's feedback on lighting and compliance with the international rule for preventing collisions at sea, specifically safety zones are established, vessels are required to comply with marine orders and the facility's collision prevention system will be implemented.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with AMSA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given AMSA sufficient information to allow AMSA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to AMSA on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided AMSA with information tailored to AMSA by including a map of submarine communication cables and shipping lanes.
- On 19 July 2024, AMSA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AMSA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided AMSA with further information in response to AMSA's feedback (email of 30 July and 9 August 2024).

Reasonable Period

Woodside allowed AMSA a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to AMSA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- In this context, Woodside allowed AMSA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AMSA is appropriate and adapted to the nature of interests of AMSA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AMSA.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding AMSA of the opportunity to provide feedback.
- Woodside considers a reasonable opportunity was provided to AMSA as evidenced by its response on 19 July 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AMSA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from AMSA.
  - As standard practice (and as requested by AMSA during consultation), Woodside will provide activity notifications to AHO and AMSA's ARC as referenced at PS 1.3 and PS 1.5.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.6 Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DAFF advising of the proposed activity (Record of Consultation, reference 6.2.8), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DAFF, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with DAFF for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DAFF sufficient information to allow DAFF to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DAFF on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed DAFF a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DAFF advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DAFF 30 days for consultation. For consultation on EPs, 30 days is the usual period for DAFF.
- In this context, Woodside allowed DAFF a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DAFF is appropriate and adapted to the nature of interests of DAFF:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DAFF.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DAFF of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DAFF did not provide feedback for these EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DAFF's functions, interests or activities.

4.1.7 Department of Defence (DoD)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DoD advising of the proposed activity (Record of Consultation, reference 6.2.3), provided a Consultation Information Sheet, a defence zone map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DoD, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with DoD for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DoD sufficient information to allow DoD to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DoD on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided DoD with information tailored to DoD by including a map of defence zones relevant to the activity.

Reasonable Period

Woodside allowed DoD a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DoD advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DoD 30 days for consultation. For consultation on EPs, 30 days is the usual period for DoD.
- In this context, Woodside allowed DoD a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DoD is appropriate and adapted to the nature of interests of DoD:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DoD.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DoD of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DoD did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DoD's functions, interests or activities.

4.1.8 Department of Foreign Affairs and Trade (DFAT)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DFAT advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 18 June 2024, the email bounced back as the email address no longer exists.
- On 3 July 2024, Woodside emailed DFAT advising of the proposed activity, provided a Consultation Information Sheet and sought to confirm the best contact for consultation (SI Report, reference 3.1).
- On 10 July 2024, DFAT emailed Woodside (SI Report, reference 3.2) and:
  - confirmed the best contact for EP consultations.
  - **(1)** confirmed the Indonesia Branch had no feedback on this EP.
- **(1)** On 15 July 2024, Woodside thanked DFAT for its feedback (SI Report, reference 3.3).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) The Indonesia Branch has no feedback for this EP.	**(1)** **Woodside assessment:** Woodside accepts DFAT has no feedback on this EP.	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside thanked DFAT for confirming it has no feedback.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DFAT for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given DFAT sufficient information to allow DFAT to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DFAT on 3 July 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 10 July 2024, DFAT consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DFAT to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed DFAT a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to DFAT advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed DFAT 30 days for consultation.
- In this context, Woodside allowed DFAT a reasonable period for consultation in preparation of the EP as evidenced by its response on 10 July 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DFAT is appropriate and adapted to the nature of interests of DFAT:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DFAT.
- Woodside considers a reasonable opportunity was provided to DFAT as evidenced by its response on 10 July 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DFAT provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DFAT.
  - Made no changes or inclusions to the EP as a result of consultation with DFAT because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.9 Australian Maritime Safety Authority (AMSA) – Marine Pollution

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed AMSA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to AMSA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 20 August 2024, Woodside emailed AMSA and provided a copy of the oil Pollution First Strike Plan (SI Report, reference 57.1).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with AMSA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given AMSA sufficient information to allow AMSA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to AMSA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- In addition to the information in the Consultation Information Sheet, Woodside provided AMSA – Marine Pollution with the Oil Pollution First Strike Plan for the EP and reminded AMSA of the opportunity to provide feedback on the EP (email of 20 August 2024).

Reasonable Period

Woodside allowed AMSA a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to AMSA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AMSA 30 days for consultation.
- In this context, Woodside allowed AMSA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AMSA is appropriate and adapted to the nature of interests of AMSA:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 6 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with AMSA.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding AMSA of the opportunity to provide feedback.
- Woodside considers a reasonable opportunity was provided to AMSA as evidenced by its response on 5 May 2024 when it acknowledged the email.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as AMSA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on AMSA – Marine Pollution's functions, interests or activities.

4.1.10 Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DITRDCA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 18 June 2024, DITRDCA emailed Woodside (SI Report, Reference 4.1) and:
  - **(1)** confirmed it had no comments in relation to the project.
  - **(2)** asked if other areas of the Department had been consulted.
- **(1,2)** On 25 June 2024, Woodside thanked DITRDCA for its feedback and confirmed it had consulted AMSA for this EP (SI Report, reference 4.2).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) No comments in relation to this EP.	**(1)** **Woodside assessment:** Woodside noted DITRDCA's feedback. **Woodside response:** Woodside thanked DITRDCA for confirming it has no feedback.	**(1)** Not required.
(2) Consult other areas of the Department.	**(2)**	**(2)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside assessment: Woodside searched for other branches of DITRDCA. **Woodside response:** Woodside confirmed it consulted AMSA for this EP.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DITRDCA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given DITRDCA sufficient information to allow DITRDCA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DITRDCA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 18 June 2024, DITRDCA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable , DITRDCA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed DITRDCA a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to DITRDCA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DITRDCA 30 days for consultation.
- In this context, Woodside allowed DITRDCA a reasonable period for consultation in preparation of the EP as evidenced by its response on 18 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DITRDCA is appropriate and adapted to the nature of interests of DITRDCA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DITRDCA as evidenced by its response on 18 June 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DITRDCA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DITRDCA.
  - Made no changes or inclusions to the EP as a result of consultation with DITRDCA because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.11 Department of Planning, Lands and Heritage (DPLH)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DPLH advising of the proposed activity (Record of Consultation, reference 6.2.16), provided a Consultation Information Sheet, a list of state shipwrecks and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DPLH, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process *(*see section 7.2.5 of this EP of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DPLH for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given DPLH sufficient information to allow DPLH to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DPLH on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided DPLH with information tailored to DPLH by including a list of shipwrecks relevant to the EP in State waters.

Reasonable Period

Woodside allowed DPLH a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to DPLH advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DPLH 30 days for consultation.
- In this context, Woodside allowed DPLH a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DPLH is appropriate and adapted to the nature of interests of DPLH:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DPLH of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DPLH did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DPLH's functions, interests or activities.

4.1.12 Department of Primary Industries and Regional Development (DPIRD)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DPIRD advising of the proposed activity (Record of Consultation, reference 6.2.11), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DPIRD, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DPIRD for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given DPIRD sufficient information to allow DPIRD to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DPIRD on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed DPIRD a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to DPIRD advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DPIRD 30 days for consultation.
- In this context, Woodside allowed DPIRD a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DPIRD is appropriate and adapted to the nature of interests of DPIRD:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DPIRD of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DPIRD did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DPIRD's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.13 Department of Transport (DoT) (now Department of Transport and Major Infrastructure) (DTMI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DoT/DTMI advising of the proposed activity (Record of Consultation, reference 6.2.10), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to DoT/DTMI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 20 August 2024, Woodside emailed DoT/DTMI and provided a copy of the oil Pollution First Strike Plan (SI Report, reference 58.1).
- On 25 September 2024, DoT/DTMI emailed Woodside confirming it reviewed the oil pollution FSP and provided comments (SI Report, reference 58.2).
- On 25 September 2024, Woodside responded to DoT/DTMI and confirmed it amended the list of Control Agencies to align to the August 2024 update to the *State Hazard Plan – Maritime Environmental Emergencies* (SI Report, reference 58.3).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DoT/DTMIfor the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given DoT/DTMI sufficient information to allow DoT/DTMI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DoT/DTMI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 25 September 2024, DoT/DTMI consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DoT/DTMI to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DoT/DTMI with further information in response to DoT's/DTMI'S feedback (email of 25 September 2024).

Reasonable Period

Woodside allowed DoT/DTMI a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to DoT/DTMI advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DoT/DTMI 30 days for consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DoT/DTMI is appropriate and adapted to the nature of interests of DoT/DTMI:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DoT/DTMI as evidenced by its response on 25 September 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DoT/DTMI provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and Regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DoT/DTMI.
  - As a result of DoT's/DTMI's feedback, updated the list of Control Agencies.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.14 Kimberley Ports Authority (KPA)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed KPA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to KPA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with KPA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given KPA sufficient information to allow KPA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to KPA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed KPA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to KPA advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed KPA 30 days for consultation. For consultation on EPs, 30 days is the usual period for KPA.
- In this context, Woodside allowed KPA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with KPA is appropriate and adapted to the nature of interests of KPA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding KPA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as KPA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on KPA's functions, interests or activities.

4.1.15 Pilbara Ports Authority (PPA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed PPA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to PPA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with PPA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given PPA sufficient information to allow PPA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to PPA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed PPA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to PPA advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed PPA 30 days for consultation. For consultation on EPs, 30 days is the usual period for PPA.
- In this context, Woodside allowed PPA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with PPA is appropriate and adapted to the nature of interests of PPA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding PPA of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as PPA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on PPA's functions, interests or activities.

4.1.16 Western Australian Museum (WAM)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed WAM advising of the proposed activity (Record of Consultation, reference 6.2.17), provided a Consultation Information Sheet, a list of state shipwrecks and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to WAM, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with WAM for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given WAM sufficient information to allow WAM to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to WAM on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed WAM a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WAM advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WAM 30 days for consultation. For consultation on EPs, 30 days is the usual period for WAM.
- In this context, Woodside allowed WAM a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with WAM is appropriate and adapted to the nature of interests of WAM:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding WAM of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as WAM did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on WAM's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.2 COMMONWEALTH AND WA STATE GOVERNMENT DEPARTMENTS OR AGENCIES – ENVIRONMENT

4.2.1 Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DAFF advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DAFF, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with DAFF for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DAFF sufficient information to allow DAFF to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DAFF on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed DAFF a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DAFF advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DAFF 30 days for consultation. For consultation on EPs, 30 days is the usual period for DAFF.
- In this context, Woodside allowed DAFF a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DAFF is appropriate and adapted to the nature of interests of DAFF:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DAFF.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DAFF of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DAFF did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DAFF's functions, interests or activities.

4.2.2 Department of Biodiversity, Conservation and Attractions (DBCA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DBCA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DBCA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 16 July 2024, DBCA responded thanking Woodside for providing information on this EP (SI Report, reference 50.1). DBCA noted:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** the operations were in the vicinity of reserves managed by DBCA and given the ecological importance of areas potentially affected by a hydrocarbon release from the proposed activities, it was considered important that the baseline values and state of the potentially affected environment are appropriately understood and documented prior to operations commencing.
- **(2)** it would like to have confidence that Woodside had established appropriate baseline survey data on the current state of areas supporting important ecological values and any current contamination if present within the area of potential impact of hydrocarbon releases.
- **(3)** it undertook monitoring in marine parks and reserves and published monitoring reports which were available on its website, however Woodside should be aware this monitoring was targeted to inform DBCA's values and objectives and was not necessarily suitable to provide baseline information for oil spill risk assessment and management planning.
- **(4)** it recommended Woodside refer to the Department of Climate Change, Energy, the Environment and Water's *National Light Pollution Guidelines for Wildlife* as a best-practice industry standard for managing potential impacts of light pollution on marine fauna.
- **(5)** in the event of a hydrocarbon release, it was requested that Woodside notify DBCA's Pilbara regional office as soon as practicable on (08) 9182 2000.
- **(6)** it would not implement an oiled wildlife management response on behalf of a petroleum operator except as part of a whole of government response mandated by regulatory decision makers.
- **(7)** Woodside should refer to the Department of Transport's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled *Marine Oil Pollution: Response and Consultation Arrangements*. **(7)** Not required. Woodside noted and referred to DoT's/DTMI's web content.

- On 22 July 2024, Woodside responded thanking DBCA for its feedback (SI Report, reference 50.2). Woodside:
  - **(1)** Confirmed it maintained knowledge and an understanding of areas of ecological importance within and adjacent to operational areas.
  - **(2,3)** Advised its oil spill scientific monitoring program would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release.
  - **(4)** Confirmed it had considered DCCEEW's National Light Pollution Guidelines with respect to vessel activities. The impact assessment determined that the impacts of lighting were as low as reasonably practicable.
  - **(5)** Advised it had incorporated the DBCA Pilbara regional office telephone number as part of the notifications listed in the Oil Pollution First Strike Plan.
  - **(6)** Noted that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) Baseline values are understood and documented prior to commencement of activities.	**(1)** **Woodside assessment:** Woodside determined that areas of ecological importance, including marine parks and island conservation reserves, would not be impacted by planned activities. **Woodside response:** Woodside reaffirmed that areas of ecological importance in the proximity of the EP Operational Areas would be not impacted by planned activities.	**(1)** The EP demonstrates that the proposed activities are outside the boundaries of a proclaimed State Marine Park and identifies that there are no credible impacts to the values of any State Marine Parks as a result of planned activities (Section 4.8 and Section 6.7 of the EP). While impacts to Commonwealth Marine Parks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		unlikely event of a hydrocarbon spill, as demonstrated in Section 6 of the EP.
(2) Establish the appropriate baseline survey data on the current state of the areas.	**(2)** **Woodside assessment**: Woodside maintains knowledge of areas of ecological importance adjacent to Operational Areas and its oil spill scientific monitoring program provides for a quantitative assessment of overall impacts in the event of an unplanned hydrocarbon release. **Woodside response:** Woodside responded that it utilises an information system to track current existing environment knowledge that is regularly updated. Woodside advised its oil spill scientific monitoring program provides for a quantitative assessment of overall impacts in the event of an unplanned hydrocarbon release.	**(2)** Under the Oil Spill Scientific Monitoring Program preparedness, an annual review and update to environmental baseline studies database is completed and documented as described in this EP.
(3) Acquire the necessary information to implement a Before-After Control Impact (BACI) framework.	**(3)** **Woodside assessment:** Woodside reviewed the request about implementing a BACI framework and noted its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release. **Woodside response:** Woodside advised its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors.	**(3)** an annual review and update to environmental baseline studies database is completed and documented as described in this EP.
(4) Refer to DCCEEW's National Light Pollution Guidelines for Wildlife.	**(4)** **Woodside assessment:** Woodside noted DCCEEW's National Light Pollution Guidelines for Wildlife and that its impact assessment for light emissions is based on these recommendations. **Woodside response:** Woodside confirmed it had considered DCCEEW's National Light Pollution Guidelines for Wildlife and that lighting associated with this EP is required as a priority for safe operation.	**(4)** Woodside's impact assessment for light emissions is based on recommendations of the National Light Pollution Guidelines for Wildlife.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(5) Notify DBCA's Pilbara office as soon as practicable in the event of a hydrocarbon release.	**(5)** **Woodside assessment**: Woodside noted DBCA's 'Incidents and Emergency Response' process and need to include DBCA's Pilbara's contact information in Oil Pollution First Strike Plan. **Woodside response:** Woodside confirmed the DBCA Pilbara phone number had been incorporated as part of the Oil Pollution First Strike Plan.	**(5)** DBCA's Pilbara phone number has been incorporated into the Oil Pollution First Strike Plan for this EP (see Appendix G).
(6) No oiled wildlife management response will be implemented except as part of a mandated government response.	**(6)** **Woodside assessment**: Woodside accepts that DBCA would not implement an oiled wildlife management response and notes its own Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP. **Woodside response:** Woodside confirmed that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.	**(6)** Woodside's Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP (see Appendix D).
(7) Refer to the Department of Transport's guidance note: Marine Oil Pollution: Response and Consultation Arrangements.	**(7)** **Woodside assessment:** Woodside appreciated the recommendation to refer to the DoT's/DTMI's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements. **Woodside response:** Woodside noted the DoT's/DTMI's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements.	**(7)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DBCA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given DBCA sufficient information to allow DBCA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DBCA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 16 July 2024, DBCA consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DBCA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DBCA with further information in response to DBCA's feedback (email of 22 July 2024).

Reasonable Period

Woodside allowed DBCA a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to DBCA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DBCA 30 days for consultation.
- Woodside considers a reasonable opportunity was provided to DBCA as evidenced by its response on 16 July 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DDBCA is appropriate and adapted to the nature of interests of DBCA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to DBCA as evidenced by its response on 16 July 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DBCA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DBCA.
  - Made no changes or inclusions to the EP as a result of consultation with DBCA because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable

4.2.3 Department of Climate Change, Energy, the Environment and Water (DCCEEW)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DCCEEW advising of the proposed activity (Record of Consultation, reference 6.2.15), provided a Consultation Information Sheet, a list of Commonwealth shipwrecks and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DCCEEW, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with DCCEEW for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given DCCEEW sufficient information to allow DCCEEW to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DCCEEW on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided DCCEEW with information tailored to DCCEEW by including a list of shipwrecks relevant to the EP in Commonwealth waters.

Reasonable Period

Woodside allowed DCCEEW a reasonable period for consultation in the preparation of this EP because:

- A consultation period was notified in the initial correspondence to DCCEEW advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DCCEEW 30 days for consultation. For consultation on EPs, 30 days is the usual period for DCCEEW.
- In this context, Woodside allowed DCCEEW a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DCCEEW is appropriate and adapted to the nature of interests of DCCEEW:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DCCEEW.
- In the absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DCCEEW of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DCCEEW did not provide feedback for this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DCCEEW's functions, interests or activities.

4.2.4 Director of National Parks (DNP)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DNP advising of the proposed activity (Record of Consultation, reference 6.2.9), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DNP, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 11 July 2024, DNP emailed Woodside (SI report, reference 47.1) and noted:
  - **(1)** the planned activity did not overlap any Australian Marine Parks (AMPs) therefore there were no authorisation requirements from the DNP.
  - **(2)** to assist in the preparation of an EP for petroleum activities, NOPSEMA had worked closely with Parks Australia to develop and publish a guidance note that outlined what titleholders needed to consider and evaluate. Titleholders should ensure the EP:
    - Identifies and manages all impacts and risks on Australian marine park values (including ecosystem values) and had considered all options to avoid or reduce them to as low as reasonably practicable.
    - Clearly demonstrates the activity would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
  - **(3)** it did not require further notification of progress made in relation to this activity unless details regarding the activity changed and resulted in an overlap with a marine park or new impact, or for emergency responses.
  - **(4)** it wished to clarify the operational areas for this activity.
  - **(3)** the requirements for emergency responses.
- On 16 July 2024, Woodside responded thanking DNP for its emails (SI report, reference 47.2) and:
  - **(1)** noted DNP's confirmation that planned activities did not overlap any AMPs and there were no authorisation requirements.
  - **(2)** Confirmed Woodside had taken into consideration the 'Petroleum Activities and Australian Marine Parks' guidance note to ensure the EP:
    - Identified and managed all impacts and risks on AMP values (including ecosystem values) to an acceptable level.
    - Clearly demonstrated that the activities would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
  - **(3)** confirmed the location of the PAA and noted that support vessels were managed under the EP once they enter the PAA
  - **(4)** Confirmed Woodside would notify DNP in relation to these activities if details regarding the activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) Planned activities do not overlap any Australian Marine Parks and there are therefore no authorisation requirements from the DNP.	**(1)** **Woodside assessment**: Woodside noted there were no authorisation requirements from the DNP. **Woodside response**: Woodside noted the DNP's confirmation that planned activities did not overlap AMPs and there are no authorisation requirements.	**(1)** Not required.
(2) Ensure the EP identifies and manages all impacts and risks on AMP values, and clearly demonstrates that activities will not be inconsistent with the management plan.	**(2)** **Woodside assessment:** Woodside has considered the 'Petroleum Activities and Australian Marine Parks' guidance note to assess and manage impacts and risks to AMPs. **Woodside response:** Woodside confirmed it had taken into consideration the 'Petroleum Activities and Marine Parks' guidance note to ensure the EP identified and managed all risks on AMP values and clearly demonstrated that activities would not be inconsistent with the management plan.	**(2)** The EP demonstrates how Woodside will identify and manage all impacts and risks on Australian Marine Park values (including ecosystem values) to an ALARP and acceptable level and that the activity is not inconsistent with the management plan (see Section 6.8 of the EP).
(3) It does not require further notification of progress unless details regarding the activity change and result in an overlap with a marine park or new impact, or for emergency responses.	**(3)** **Woodside assessment:** Woodside will notify DNP in the event of relevant changes to the activity, or for emergency responses. **Woodside response**: Woodside confirmed it would notify DNP if activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.	**(3)** Woodside will provide notification of significant change, as appropriate, to relevant persons as referenced in Table 7-7 of the EP. Woodside will ensure DNP is made aware of any incidences within a marine park for the activity, as per the commitment in the Oil Pollution First Strike Plan (Appendix G).
(4) Clarify the operational areas for this activity.	**(4)** **Woodside assessment:** The PAA included two operational areas and is 7km at its closest point to an AMP, Dampier Marine Park. **Woodside response**: Woodside confirmed the location of the PAA and noted that support vessels were managed under the EP once they enter the PAA.	**(4)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate,	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DNP for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given DNP sufficient information to allow DNP to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DNP on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 11 July 2024, DNP consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DNP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- In addition to the information provided in the Consultation Information Sheet, Woodside provided DNP with further information in response to DNP's feedback (email of 16 July 2024).

Reasonable Period

Woodside allowed DNP a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to DNP advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DNP 30 days for consultation.
- In this context, Woodside allowed DNP a reasonable period for consultation in preparation of the EP as evidenced by DNP's response on 11 July 2024.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DNP is appropriate and adapted to the nature of interests of DNP:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In line with NOPSEMA's guideline for engagement with Commonwealth government departments or agencies, Woodside used email for its consultation with DNP.
- Woodside considers a reasonable opportunity was provided to DNP as evidenced by its response on 11 July 2024 when it provided feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DNP provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DNP.
  - Made no changes or inclusions to the EP as a result of consultation with DNP because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.2.5 Ningaloo Coast World Heritage Advisory Committee (NCWHAC)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed NCWHAC advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to NCWHAC, following up on the proposed activity (Record of Consultation, reference 6.2.50 and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with NCWHAC for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given NCWHAC sufficient information to allow NCWHAC to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to NCWHAC on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed NCWHAC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to NCWHAC advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed NCWHAC 30 days for consultation. For consultation on EPs, 30 days is the usual period for NCWHAC.
- In this context, Woodside allowed NCWHAC a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with NCWHAC is appropriate and adapted to the nature of interests of NCWHAC:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding NCWHAC of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- No additional measures were considered as a result of consultation as NCWHAC did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on NCWHAC's functions, interests or activities.

4.3 COMMONWEALTH AND STATE GOVERNMENT DEPARTMENTS OR AGENCIES – INDUSTRY

4.3.1 Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) (now Department of Mines, Petroleum and Exploration) (DMPE)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DEMIRS/DMPE advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to DEMIRS/DMPE, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with DEMIRS/DMPE for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DEMIRS/DMPE sufficient information to allow DEMIRS/DMPE to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DEMIRS/DMPE on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed DEMIRS/DMPE a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DISR advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DEMIRS/DMPE 30 days for consultation. For consultation on EPs, 30 days is the usual period for DEMIRS/DMPE.
- In this context, Woodside allowed DEMIRS/DMPE a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DEMIRS/DMPE is appropriate and adapted to the nature of interests of DEMIRS/DMPE:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DEMIRS/DMPE of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DEMIRS/DMPE did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DEMIRS's/DMPE's functions, interests or activities.

4.3.2 Department of Industry, Science and Resources (DISR)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed DISR advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DISR, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with DISR for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DISR sufficient information to allow DISR to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to DISR on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed DISR a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DISR advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed DISR 30 days for consultation. For consultation on EPs, 30 days is the usual period for DISR.
- In this context, Woodside allowed DISR a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with DISR is appropriate and adapted to the nature of interests of DISR:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding DISR of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as DISR did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on DISR's functions, interests or activities.

4.4 COMMONWEALTH COMMERCIAL FISHERIES AND REPRESENTATIVE BODIES

4.4.1 Commonwealth Fisheries Association (CFA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed CFA advising of the proposed activity (Record of Consultation, reference 6.2.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 11 July 2024, Woodside sent an email reminder to CFA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with CFA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given CFA sufficient information to allow CFA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to CFA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed CFA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to CFA advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed CFA 30 days for consultation. For consultation on EPs, 30 days is the usual period for CFA.
- In this context, Woodside allowed CFA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with CFA is appropriate and adapted to the nature of interests of CFA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding CFA of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as CFA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on CFA's functions, interests or activities.

4.4.2 North West Slope Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed North West Slope Trawl Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 6.2.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to North West Slope Trawl Fishery individual licence holders, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with North West Slope Trawl Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given North West Slope Trawl Fishery sufficient information to allow North West Slope Trawl Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to North West Slope Trawl Fishery on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed North West Slope Trawl Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence North West Slope Trawl Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed North West Slope Trawl Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for North West Slope Trawl Fishery.
- In this context, Woodside allowed North West Slope Trawl Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with North West Slope Trawl Fishery is appropriate and adapted to the nature of interests of North West Slope Trawl Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding North West Slope Trawl Fishery of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as North West Slope Trawl Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on North West Slope Trawl Fishery's functions, interests or activities.

4.4.3 Pearl Producers Association (PPA)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed PPA advising of the proposed activity (Record of Consultation, reference 6.2.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to PPA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with PPA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given PPA sufficient information to allow PPA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to PPA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed PPA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to PPA advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed PPA 30 days for consultation. For consultation on EPs, 30 days is the usual period for PPA.
- In this context, Woodside allowed PPA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with PPA is appropriate and adapted to the nature of interests of PPA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding PPA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as PPA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on PPA's functions, interests or activities.

4.4.4 Western Deepwater Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Western Deepwater Trawl Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 6.2.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Western Deepwater Trawl Fishery individual licence holders, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Western Deepwater Trawl Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Western Deepwater Trawl Fishery sufficient information to allow Western Deepwater Trawl Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Western Deepwater Trawl Fishery on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Western Deepwater Trawl Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Western Deepwater Trawl Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Western Deepwater Trawl Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Western Deepwater Trawl Fishery.
- In this context, Woodside allowed Western Deepwater Trawl Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Western Deepwater Trawl Fishery is appropriate and adapted to the nature of interests of Western Deepwater Trawl Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Western Deepwater Trawl Fishery of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Western Deepwater Trawl Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Western Deepwater Trawl Fishery's functions, interests or activities.

4.5 STATE COMMERCIAL FISHERIES AND REPRESENTATIVE BODIES

4.5.1 Western Australian Fishing Industry Council (WAFIC)

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed WAFIC advising of the proposed activity and to initiate consultation with relevant individual licence holders for this activity (SI Report, reference 13.1).
- **(1)** On 21 June 2024, WAFIC emailed individual licence holders advising of the proposed activity and copied Woodside (SI Report, reference 13.2).
- **(1)** On 21 June 2024, WAFIC emailed Woodside to confirm the list of fisheries that were contacted and confirmed it will provide feedback after consultation period closes (SI Report, reference 13.3).
- On 28 June 2024, Woodside acknowledged the information was distributed to individual licence holders (SI Report, reference 13.4).
- On 23 May 2024, WAFIC sent an email to Woodside (SI Report, reference 13.5) and:
  - **(1)** confirmed it had not received any feedback or concerns from its industry regarding the EP.
  - **(2)** advised it appreciated Woodside's ongoing communication with mariners regarding issuing notices on activity commencement and distances around temporary exclusion zones, and WAFIC asked to be included in any vessel look-ahead associated with this EP.
  - asked for confirmation that in the event of an unplanned event, Woodside would:
    - **(3)** include WAFIC as contact in the oil spill response planning documents to ensure contact is made within 24 hours of the event notification.
    - **(4)** maintain a list of WA commercial fisheries that could potentially be impacted.
    - **(5)** have a suitable OSMP in place.
  - **(6)** expressed minor concerns regarding the impacts of decreased water quality from the proposed activities.
  - **(7)** It had no further comments regarding the proposed activity at this stage.
- On 31 July 2024, Woodside responded thanking WAFIC for its email (SI Report, reference 13.6). Woodside:
  - **(1)** noted there were no concerns from industry regarding the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** confirmed it would keep WAFIC informed regarding activities and vessel movements where vessels would be in the Operational Area for more than 3 weeks.
- **(3)** confirmed it would, at the relevant time, engage with relevant persons or organisations as appropriate and in alignment with the OSPRMA for this EP.
- **(4)** confirmed it maintains a list of WA commercial fisheries that have a potential for interaction within the PAA and the EMBA.
- **(5)** confirmed it had a well-established OSMP.
- **(6)** confirmed it had considered the cumulative impact on water quality from all operational discharges associated with the activity.
- **(7)** noted WAFIC had no other comments on the activity at this stage.

- **(7)** On 1 August 2024, WAFIC emailed Woodside to confirm it has no further comments on the proposed activities (SI Report, reference 13.7).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) Consultation material delivered to relevant fisheries.	**(1)** **Woodside assessment:** Woodside noted that consultation information had been distributed to relevant fishery licence holders via WAFIC. **Woodside response:** Woodside thanked WAFIC for distributing consultation information to relevant fishery licence holders and noted there was no feedback or concerns from industry.	**(1)** Not required.
(2) Ongoing communication with mariners.	**(2)** **Woodside assessment:** Woodside will provide WAFIC with notifications regarding activities and vessel movements. **Woodside response:** Woodside confirmed it would keep WAFIC updated in relation to activities and vessel movements.	**(2)** Woodside will provide notifications to WAFIC as set out in Section 7.10 of the EP.
(3) WAFIC as contact in the OSPRMA.	**(3)** **Woodside assessment:** The OSPRMA references commercial fisheries to receive notifications in the event of an unplanned event. **Woodside response:** Woodside confirmed it would, at the relevant time, engage with relevant persons or organisations as appropriate and in alignment with the OSPRMA.	**(3)** Refer to Appendix D.
(4) Retain a list of WA commercial fisheries.	**(4)**	**(4)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside assessment: Woodside maintains a list of WA commercial fisheries that have a potential for interaction within the PAA and the EMBA. **Woodside response:** Woodside confirmed it maintained a list of WA commercial fisheries that had a potential for interaction within the PAA and the EMBA.	
(5) Have a suitable OSMP in place.	**(5)** **Woodside assessment:** Woodside has a well established OSMP and is a founding member of the iOSMP. **Woodside response:** Woodside confirmed it had an OSMP in place.	**(5)** Refer to Appendix D.
(6) Consider cumulative impacts of decreased water quality.	**(6)** **Woodside assessment:** Section 6 of the EP covers the assessment. **Woodside response:** Woodside confirmed it considered the cumulative impacts of decreased water quality in the EP.	**(6)** Refer to Section 6 of the EP.
(7) No further comments.	**(7)** **Woodside assessment:** Woodside accepts that WAFIC has no other feedback on the proposed activity. **Woodside response:** Woodside noted WAFIC had no further comments on the proposed activity at this stage.	**(7)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside has assessed the potential for interaction with State-managed fisheries in Section 4.10 of this EP. No additional measures or controls are required.
Summary Report - Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WAFIC for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient information

Woodside has given WAFIC sufficient information to allow WAFIC to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to WAFIC on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 21 June 2024, WAFIC consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable WAFIC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed WAFIC a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to WAFIC advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WAFIC 30 days for consultation.
- In this context, Woodside allowed WAFIC a reasonable period for consultation in preparation of the EP as evidenced by WAFIC's response on 28 June 2024

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with WAFIC is appropriate and adapted to the nature of interests of WAFIC:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to WAFIC as evidenced by its response on 21 June 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- WAFIC provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from WAFIC.
  - Made no changes or inclusions to the EP as a result of consultation with WAFIC because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.5.2 Mackerel Managed Fishery (Area 2)

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Mackerel Managed Fishery (Area 2) individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Mackerel Managed Fishery (Area 2) for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Mackerel Managed Fishery (Area 2) sufficient information to allow Mackerel Managed Fishery (Area 2) to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Mackerel Managed Fishery (Area 2) on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Mackerel Managed Fishery (Area 2) a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Mackerel Managed Fishery (Area 2) advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Mackerel Managed Fishery (Area 2) 30 days for consultation. For consultation on EPs, 30 days is the usual period for Mackerel Managed Fishery (Area 2).
- In this context, Woodside allowed Mackerel Managed Fishery (Area 2) a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Mackerel Managed Fishery (Area 2) is appropriate and adapted to the nature of interests of Mackerel Managed Fishery (Area 2):

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Mackerel Managed Fishery (Area 2) did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Mackerel Managed Fishery (Area 2)'s functions, interests or activities.

4.5.3 Marine Aquarium Managed Fishery

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Marine Aquarium Managed Fishery individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Marine Aquarium Managed Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Marine Aquarium Managed Fishery sufficient information to allow Marine Aquarium Managed Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Marine Aquarium Managed Fishery on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Marine Aquarium Managed Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Marine Aquarium Managed Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Marine Aquarium Managed Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Marine Aquarium Managed Fishery.
- In this context, Woodside allowed Marine Aquarium Managed Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Marine Aquarium Managed Fishery is appropriate and adapted to the nature of interests of Marine Aquarium Managed Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Marine Aquarium Managed Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
  - The measures and controls described in this EP address the potential impact from the proposed activity on Marine Aquarium Managed Fishery's functions, interests or activities.

4.5.4 Onslow Prawn Managed Fishery

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Onslow Prawn Managed Fishery individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Onslow Prawn Managed Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given Onslow Prawn Managed Fishery sufficient information to allow Onslow Prawn Managed Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Onslow Prawn Managed Fishery on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Onslow Prawn Managed Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Onslow Prawn Managed Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Onslow Prawn Managed Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Onslow Prawn Managed Fishery.
- In this context, Woodside allowed Onslow Prawn Managed Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Onslow Prawn Managed Fishery is appropriate and adapted to the nature of interests of Onslow Prawn Managed Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Onslow Prawn Managed Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Onslow Prawn Managed Fishery's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.5.5 Pilbara Crab Managed Fishery

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Pilbara Crab Managed Fishery individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Pilbara Crab Managed Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Pilbara Crab Managed Fishery sufficient information to allow Pilbara Crab Managed Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Pilbara Crab Managed Fishery on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Pilbara Crab Managed Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Pilbara Crab Managed Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Pilbara Crab Managed Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Pilbara Crab Managed Fishery.
- In this context, Woodside allowed Pilbara Crab Managed Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Pilbara Crab Managed Fishery is appropriate and adapted to the nature of interests of Pilbara Crab Managed Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Pilbara Crab Managed Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Pilbara Crab Managed Fishery's functions, interests or activities.

4.5.6 Pilbara Line Fishery

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Pilbara Line Managed Fishery individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Pilbara Line Managed Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Pilbara Line Managed Fishery sufficient information to allow Pilbara Line Managed Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Pilbara Line Managed Fishery on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Pilbara Line Managed Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Pilbara Line Managed Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Pilbara Line Managed Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Pilbara Line Managed Fishery.
- In this context, Woodside allowed Pilbara Line Managed Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Pilbara Line Managed Fishery is appropriate and adapted to the nature of interests of Pilbara Line Managed Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Pilbara Line Managed Fishery did not provide feedback for this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
  - The measures and controls described in this EP address the potential impact from the proposed activity on Pilbara Line Managed Fishery's functions, interests or activities.

4.5.7 Pilbara Trap Fishery

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Pilbara Trap Managed Fishery individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Pilbara Trap Managed Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Pilbara Trap Managed Fishery sufficient information to allow Pilbara Trap Managed Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Pilbara Trap Managed Fishery on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Pilbara Trap Managed Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Pilbara Trap Managed Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Pilbara Trap Managed Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Pilbara Trap Managed Fishery.
- In this context, Woodside allowed Pilbara Trap Managed Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Pilbara Trap Managed Fishery is appropriate and adapted to the nature of interests of Pilbara Trap Managed Fishery:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Pilbara Trap Managed Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Pilbara Trap Managed Fishery's functions, interests or activities.

4.5.8 Pilbara Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 31 June 2024, WAFIC, on behalf of Woodside, emailed Pilbara Trawl Managed Fishery individual licence holders advising of the proposed activity (SI Report, reference 13.2), and provided a Consultation Information Sheet.
- On 19 July 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 13.5).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Pilbara Trawl Managed Fishery for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Pilbara Trawl Managed Fishery sufficient information to allow Pilbara Trawl Managed Fishery to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information, via WAFIC, to Pilbara Trawl Managed Fishery on 31 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Pilbara Trawl Managed Fishery a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Pilbara Trawl Managed Fishery advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Pilbara Trawl Managed Fishery 30 days for consultation. For consultation on EPs, 30 days is the usual period for Pilbara Trawl Managed Fishery.
- In this context, Woodside allowed Pilbara Trawl Managed Fishery a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Pilbara Trawl Managed Fishery is appropriate and adapted to the nature of interests of Pilbara Trawl Managed Fishery:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Pilbara Trawl Managed Fishery did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Pilbara Trawl Managed Fishery's functions, interests or activities.

4.6 RECREATIONAL MARINE USERS AND REPRESENTATIVE BODIES

4.6.1 Gascoyne Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside sent a letter to individual Gascoyne Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 6.2.13), provided a Consultation Information Sheet, and a QR code to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 18 June 2024, Woodside emailed individual Gascoyne Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 6.2.12), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 11 July 2024, Woodside sent a follow up to individual Gascoyne Recreational Marine Users (SI Report, reference 6.2.50).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Gascoyne Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given Gascoyne Recreational Marine Users sufficient information to allow Gascoyne Recreational Marine Users to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Gascoyne Recreational Marine Users on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Gascoyne Recreational Marine Users a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Gascoyne Recreational Marine Users advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Gascoyne Recreational Marine Users 30 days for consultation. For consultation on EPs, 30 days is the usual period for Gascoyne Recreational Marine Users.
- In this context, Woodside allowed Gascoyne Recreational Marine Users a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Gascoyne Recreational Marine Users is appropriate and adapted to the nature of interests of Gascoyne Recreational Marine Users:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside proactively sent a follow-up on 11 July 2024, reminding Gascoyne Recreational Marine Users of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Gascoyne Recreational Marine Users did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The measures and controls described in this EP address the potential impact from the proposed activity on Gascoyne Recreational Marine Users' functions, interests or activities.

4.6.2 Marine Tourism WA

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Marine Tourism WA advising of the proposed activity (Record of Consultation, reference 6.2.12), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Marine Tourism WA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Marine Tourism WA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Marine Tourism WA sufficient information to allow Marine Tourism WA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Marine Tourism WA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed Marine Tourism WA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Marine Tourism WA advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Marine Tourism WA 30 days for consultation. For consultation on EPs, 30 days is the usual period for Marine Tourism WA.
- In this context, Woodside allowed Marine Tourism WA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Marine Tourism WA is appropriate and adapted to the nature of interests of Marine Tourism WA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Marine Tourism WA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Marine Tourism WA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Marine Tourism WA's functions, interests or activities.

4.6.3 Pilbara/Kimberley Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside sent a letter to individual Pilbara/Kimberley Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 6.2.13), provided a Consultation Information Sheet, and a QR code to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 18 June 2024, Woodside emailed individual Pilbara/Kimberley Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 6.2.12), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 11 July 2024, Woodside sent a follow up to individual Pilbara/Kimberley Recreational Marine Users (SI Report, reference 6.2.50).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Pilbara/Kimberley Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Pilbara/Kimberley Recreational Marine Users sufficient information to allow Pilbara/Kimberley Recreational Marine Users to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Pilbara/Kimberley Recreational Marine Users on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Pilbara/Kimberley Recreational Marine Users a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Pilbara/Kimberley Recreational Marine Users advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Pilbara/Kimberley Recreational Marine Users 30 days for consultation. For consultation on EPs, 30 days is the usual period for Pilbara/Kimberley Recreational Marine Users.
- In this context, Woodside allowed Pilbara/Kimberley Recreational Marine Users a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Pilbara/Kimberley Recreational Marine Users is appropriate and adapted to the nature of interests of Pilbara/Kimberley Recreational Marine Users:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In the absence of feedback, Woodside proactively sent a follow-up on 11 July 2024, reminding Pilbara/Kimberley Recreational Marine Users of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Pilbara/Kimberley Recreational Marine Users did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Pilbara/Kimberley Recreational Marine Users' functions, interests or activities.

4.6.4 Lombadina Aboriginal Corporation

Lombadina Aboriginal Corporation have been identified as a relevant person through their functions, activities or interests as a Pilbara/Kimberley Recreational Marine User, as identified in Table 1. Lombadina Aboriginal Corporation is not a Prescribed Body Corporate under the *Native Title Act 1993* and associated regulations.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Lombadina advising of the proposed activity (Record of Consultation, reference 6.2.48), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Lombadina and its members may have within the EMBA, information on how Lombadina would like to engage, and requested that Lombadina provide information to other individuals as required.
- On 5 July 2024, Woodside emailed Lombadina a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference,43.1).

Ongoing engagement:

- On 3 October 2024, Woodside emailed Lombadina about an administrative matter relating to vendor payments (SI Report, reference 43.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (*see section 7.2.5 of this EP*).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with Lombadina for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Lombadina's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside subject matters experts reviewed the activity's Consultation Information Sheet and Summary Information Sheet, which were provided to Lombadina. These documents set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that Lombadina can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Lombadina in June 2024. Woodside has addressed and responded to Lombadina over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked Lombadina if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.5 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Lombadina's functions, interests, or activities.

4.6.5 Recfishwest

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Recfishwest advising of the proposed activity (Record of Consultation, reference 6.2.12), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 28 June 2024, Recfishwest emailed Woodside (SI Report, reference 9.1) and:
  - **(3)** noted some structures may be suitable as artificial reefs.
  - **(2)** advised it had no concerns.
  - **(1)** advised it would like to be kept informed as operations continue.
- **(1,2,3)** On 25 June 2024, Woodside thanked Recfishwest for its feedback, confirmed it will keep Recfishwest informed and advised decommissioning activities will be the subject of another EP (SI Report, reference 9.2).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) Recfishwest requested to be kept informed as operations continue.	**(1)** **Woodside assessment:** Woodside acknowledges Recfishwest's request to be informed as operations continue. **Woodside response**: Woodside confirmed it would keep Recfishwest informed as operations continue.	**(1)** Woodside will provide notifications to Recfishwest as set out in Section 7.10 of the EP.
(2) Recfishwest confirmed having no concerns for this activity.	**(2)** **Woodside assessment:** Woodside noted Recfishwest has no concerns regarding this activity. **Woodside response:** Woodside thanked Recfishwest for its feedback.	**(2)** Not required.
(3) Consider some structures as artificial reefs.	**(3)** **Woodside assessment:** Woodside noted Recfishwest's position on the potential for structures to become artificial reefs. **Woodside response:** Woodside advised decommissioning activities would be the subject of a future EP.	**(3)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Recfishwest for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient information

Woodside has given Recfishwest sufficient information to allow Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Recfishwest on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 28 June 2024, Recfishwest consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Recfishwest a reasonable period for consultation in the preparation of this EP because:

- Consultation for this EP commenced 18 months ago in June 2024.
- A consultation period was stated in the initial correspondence to Recfishwest advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Recfishwest 30 days for consultation.
- In this context, Woodside allowed Recfishwest a reasonable period for consultation in preparation of the EP as evidenced by Recfishwest's response on 28 June 2024

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Recfishwest is appropriate and adapted to the nature of interests of Recfishwest:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Recfishwest as evidenced by its response on 28 June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Recfishwest provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 of the EP and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Recfishwest.
  - Made no changes or inclusions to the EP as a result of consultation with Recfishwest because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.6.6 WA Game Fishing Association

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed WA Game Fishing Association advising of the proposed activity (Record of Consultation, reference 6.2.12), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to WA Game Fishing Association, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with WA Game Fishing Association for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given WA Game Fishing Association sufficient information to allow WA Game Fishing Association to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to WA Game Fishing Association on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed WA Game Fishing Association a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WA Game Fishing Association advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WA Game Fishing Association 30 days for consultation. For consultation on EPs, 30 days is the usual period for WA Game Fishing Association.
- In this context, Woodside allowed WA Game Fishing Association a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with WA Game Fishing Association is appropriate and adapted to the nature of interests of WA Game Fishing Association:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding WA Game Fishing Association of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as WA Game Fishing Association did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on WA Game Fishing Association's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7 TITLEHOLDERS AND OPERATORS

4.7.1 Beagle No.1

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Beagle No.1 advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Beagle No.1, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Beagle No 1 for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Beagle No 1 sufficient information to allow Beagle No 1 to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Beagle No 1 on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed Beagle No 1 a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Beagle No 1 advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Beagle No 1 30 days for consultation. For consultation on EPs, 30 days is the usual period for Beagle No 1.
- In this context, Woodside allowed Beagle No 1 a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Beagle No 1 is appropriate and adapted to the nature of interests of Beagle No 1:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Beagle No 1 of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Beagle No 1 did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Beagle No 1's functions, interests or activities.

4.7.2 Bounty Oil and Gas

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Bounty Oil and Gas advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Bounty Oil and Gas, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Bounty Oil and Gas for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Bounty Oil and Gas sufficient information to allow Bounty Oil and Gas to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Bounty Oil and Gas on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Bounty Oil and Gas a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Bounty Oil and Gas advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Bounty Oil and Gas 30 days for consultation. For consultation on EPs, 30 days is the usual period for Bounty Oil and Gas.
- In this context, Woodside allowed Bounty Oil and Gas a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Bounty Oil and Gas is appropriate and adapted to the nature of interests of Bounty Oil and Gas:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Bounty Oil and Gas of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Bounty Oil and Gas did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Bounty Oil and Gas's functions, interests or activities.

4.7.3 BP Developments Australia

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed BP Developments Australia advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to BP Developments Australia, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 15 July 2024, BP Developments Australia emailed Woodside and confirmed it had no objections (SI Report, reference 49.1).
- **(1)** On 22 July 2024, Woodside thanked BP Developments Australia for its feedback (SI Report, reference 49.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No objections.	**(1)** **Woodside assessment:** Woodside noted BP's feedback. **Woodside response:** Woodside thanked BP for confirming it had no feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and	Woodside considers the measures and controls in the EP are appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Revision process (see section 7.2.5 of this EP of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with BP Developments for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given BP Developments sufficient information to allow BP Developments to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to BP Developments on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 15 July 2024, BP Developments consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed BP Developments a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to BP Developments advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed BP Developments 30 days for consultation. For consultation on EPs, 30 days is the usual period for BP Developments.
- In this context, Woodside allowed BP Developments a reasonable period for consultation in preparation of the EP as evidenced by its response on 15 July 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with BP Developments is appropriate and adapted to the nature of interests of BP Developments:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding BP Developments of the opportunity to provide feedback.
- Woodside considers a reasonable opportunity was provided to BP Development as evidenced by its response on 15 July 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from BP Developments.
- Made no changed or inclusions in the EP as a result of consultation with BP Developments because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.4 Carnarvon Energy

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Carnarvon Energy advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 21 June 2024, Carnarvon Energy emailed Woodside and confirmed it had no feedback on the EP (SI Report, reference 2.1).
- **(1)** On 25 June 2024, Woodside thanked Carnarvon Energy for its feedback (SI Report, reference 2.2).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) No feedback for this EP.	**(1)** **Woodside assessment:** Woodside noted Carnarvon Energy's feedback. **Woodside response:** Woodside thanked Carnarvon Energy for confirming it had no feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Carnarvon Energy for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Carnarvon Energy sufficient information to allow Carnarvon Energy to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Carnarvon Energy on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 21 June 2024, Carnarvon Energy consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Carnarvon Energy a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Carnarvon Energy advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Carnarvon Energy 30 days for consultation. For consultation on EPs, 30 days is the usual period for Carnarvon Energy.
- In this context, Woodside allowed Carnarvon Energy a reasonable period for consultation in preparation of the EP as evidenced by its response on 21 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Carnarvon Energy is appropriate and adapted to the nature of interests of Carnarvon Energy:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Carnarvon Energy as evidenced by its response on 21 June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Carnarvon Energy.
- Made no changed or inclusions in the EP as a result of consultation with Carnarvon Energy because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.5 Chevron Australia/ Osaka Gas Gorgon/ MidOcean Gorgon/ JERA Gorgon

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Chevron advising of the proposed activity (Record of Consultation, reference 6.2.19), provided a Consultation Information Sheet, GIS shape files and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.* Woodside asked that the consultation information be forwarded to Chevron's Joint Venture participants Osaka Gas Gorgon, MidOcean Gorgon and Jera Gorgon for feedback.
- On 11 July 2024, Woodside sent an email reminder to Chevron, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Chevron Australia for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Chevron Australia sufficient information to allow Chevron Australia to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Chevron Australia on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided Chevron with information tailored to Chevron by including GIS shapefiles.

Reasonable Period

Woodside allowed Chevron Australia a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Chevron Australia advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Chevron Australia 30 days for consultation. For consultation on EPs, 30 days is the usual period for Chevron Australia.
- In this context, Woodside allowed Chevron Australia a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Chevron Australia is appropriate and adapted to the nature of interests of Chevron Australia:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Chevron Australia of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Chevron Australia did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Chevron Australia's functions, interests or activities.

4.7.6 Coastal Oil and Gas / Fox Resources

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Coastal Oil and Gas advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Coastal Oil and Gas, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Coastal Oil and Gas for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Coastal Oil and Gas sufficient information to allow Coastal Oil and Gas to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Coastal Oil and Gas on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Coastal Oil and Gas a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Coastal Oil and Gas advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Coastal Oil and Gas 30 days for consultation. For consultation on EPs, 30 days is the usual period for Coastal Oil and Gas.
- In this context, Woodside allowed Coastal Oil and Gas a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Coastal Oil and Gas is appropriate and adapted to the nature of interests of Coastal Oil and Gas:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Coastal Oil and Gas of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Coastal Oil and Gas did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Coastal Oil and Gas's functions, interests or activities.

4.7.7 Eni Australia

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Eni Australia advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- **(1)** On 18 June 2024, Eni Australia emailed Woodside to advise it had no concerns regarding the activity and **(2)** requested to be updated of any material changes (SI Report, reference 6.1).
- **(1,2)** On 25 June 2024, Woodside thanked Eni Australia for its feedback and confirmed it would provide Eni Australia with significant updates with respect to the proposed activities when relevant (SI Report, reference 6.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) No concerns regarding the activity.	**(1)** **Woodside assessment:** Woodside noted Eni Australia has no concerns regarding this activity. **Woodside response:** Woodside thanked Eni Australia for its feedback.	**(1)** Not required.
(2) Requested to be updated of any material changes.	**(2)** **Woodside assessment:** Woodside will provide notifications to Eni and relevant stakeholders as outlined in Table 7-7 of this EP. **Woodside response:** Woodside confirmed it would contact Eni Australia with activity updates when relevant.	**(2)** Woodside will provide notification of significant change, as appropriate, to Eni Australia, as referenced in Table 7-7 of the EP.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Eni Australia for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Eni Australia sufficient information to allow Eni Australia to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Eni Australia on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Eni Australia consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Eni Australia a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Eni Australia advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Eni Australia 30 days for consultation. For consultation on EPs, 30 days is the usual period for Eni Australia.
- In this context, Woodside allowed Eni Australia a reasonable period for consultation in preparation of the EP as evidenced by its response on 18 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Eni Australia is appropriate and adapted to the nature of interests of Eni Australia:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Eni Australia as evidenced by its response on 18 June 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Eni Australia.
- Made no changed or inclusions in the EP as a result of consultation with Eni Australia because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.8 Exxon Mobil Australia Resources Company

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Exxon Mobil Australia Resources Company advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Exxon Mobil Australia Resources Company, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Exxon Mobil Australia Resources Company for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Exxon Mobil Australia Resources Company sufficient information to allow Exxon Mobil Australia Resources Company to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Exxon Mobil Australia Resources Company on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Exxon Mobil Australia Resources Company a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Exxon Mobil Australia Resources Company advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Exxon Mobil Australia Resources Company 30 days for consultation. For consultation on EPs, 30 days is the usual period for Exxon Mobil Australia Resources Company.
- In this context, Woodside allowed Exxon Mobil Australia Resources Company a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Exxon Mobil Australia Resources Company is appropriate and adapted to the nature of interests of Exxon Mobil Australia Resources Company:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Exxon Mobil Australia Resources Company of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Exxon Mobil Australia Resources Company did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Exxon Mobil Australia Resources Company's functions, interests or activities.

4.7.9 Finder Energy

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Finder Energy advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 18 June 2024, Finder Energy emailed Woodside to advise it has no comment or objections to the planned activities (SI Report, reference 7.1).
- **(1,2)** On 25 June 2024, Woodside thanked Finder Energy for its feedback (SI Report, reference 7.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No comments or objections to the planned activities.	**(1)** **Woodside assessment:** Woodside noted Finder Energy had no comment or objections to the planned activities. **Woodside response:** Woodside thanked Finder Energy for its feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been	Woodside considers the measures and controls in the EP are appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Finder Energy for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Finder Energy sufficient information to allow Finder Energy to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Finder Energy on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 25 June 2024, Finder Energy consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Finder Energy a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Finder Energy advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Finder Energy 30 days for consultation. For consultation on EPs, 30 days is the usual period for Finder Energy.
- In this context, Woodside allowed Finder Energy a reasonable period for consultation in preparation of the EP as evidenced by its response on 25 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Finder Energy is appropriate and adapted to the nature of interests of Finder Energy:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Finder Energy as evidenced by its response on 25 June 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Finder Energy.
- Made no changed or inclusions in the EP as a result of consultation with Finder Energy because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.10 INPEX Alpha

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed INPEX advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to INPEX, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with INPEX Alpha for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given INPEX Alpha sufficient information to allow INPEX Alpha to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to INPEX Alpha on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed INPEX Alpha a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to INPEX Alpha advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed INPEX Alpha 30 days for consultation. For consultation on EPs, 30 days is the usual period for INPEX Alpha.
- In this context, Woodside allowed INPEX Alpha a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with INPEX Alpha is appropriate and adapted to the nature of interests of INPEX Alpha:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding INPEX Alpha of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as INPEX Alpha did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on INPEX Alpha's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7.11 Jadestone

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Jadestone advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Jadestone, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Jadestone for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Jadestone sufficient information to allow Jadestone to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Jadestone on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Jadestone a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Jadestone advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Jadestone 30 days for consultation. For consultation on EPs, 30 days is the usual period for Jadestone.
- In this context, Woodside allowed Jadestone a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Jadestone is appropriate and adapted to the nature of interests of Jadestone:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Jadestone of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Jadestone did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Jadestone's functions, interests or activities.

4.7.12 JX Nippon O&G Exploration (Australia)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed JX Nippon O&G Exploration (Australia) advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to JX Nippon O&G Exploration (Australia), following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with JX Nippon O&G for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given JX Nippon O&G sufficient information to allow JX Nippon O&G to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to JX Nippon O&G on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed JX Nippon O&G a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to JX Nippon O&G advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months agocommenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed JX Nippon O&G 30 days for consultation. For consultation on EPs, 30 days is the usual period for JX Nippon O&G.
- In this context, Woodside allowed JX Nippon O&G a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with JX Nippon O&G is appropriate and adapted to the nature of interests of JX Nippon O&G:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding JX Nippon O&G of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as JX Nippon O&G did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on JX Nippon O&G's functions, interests or activities.

4.7.13 KATO Energy / KATO Corowa/ KATO NWS / KATO Amulet

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed KATO advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to KATO, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with KATO for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given KATO sufficient information to allow KATO to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to KATO on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The purpose of consultation and set out what was being sought through consultation.
- A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed KATO a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to KATO advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months agocommenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed KATO 30 days for consultation. For consultation on EPs, 30 days is the usual period for KATO.
- In this context, Woodside allowed KATO a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with KATO is appropriate and adapted to the nature of interests of KATO:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding KATO of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as KATO did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on KATO's functions, interests or activities.

4.7.14 KUFPEC

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed KUFPEC advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to KUFPEC, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 9 August 2024, KUFPEC emailed Woodside and confirmed it had no objections (SI Report, reference 56.1).
- **(1)** On 13 August 2024, Woodside thanked KUFPEC for its feedback (SI Report, reference 56.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No objections.	**(1)** **Woodside assessment:** Woodside noted KUFPEC's feedback. **Woodside response:** Woodside thanked KUFPEC for confirming it had no feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with KUFPEC for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given KUFPEC sufficient information to allow KUFPEC to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to KUFPEC on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

- On 9 August 2024, KUFPEC consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed KUFPEC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to KUFPEC advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months agocommenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed KUFPEC 30 days for consultation. For consultation on EPs, 30 days is the usual period for KUFPEC.
- In this context, Woodside allowed KUFPEC a reasonable period for consultation in preparation of the EP as evidenced by its response on 9 August 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with KUFPEC is appropriate and adapted to the nature of interests of KUFPEC:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to KUFPEC as evidenced by its response on 9 August 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from KUFPEC.
- Made no changed or inclusions in the EP as a result of consultation with KUFPEC because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.15 Kyushu Electric Wheatstone

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed Kyushu Electric Wheatstone advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Kyushu Electric Wheatstone, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Kyushu Electric Wheatstone for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Kyushu Electric Wheatstone sufficient information to allow Kyushu Electric Wheatstone to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Kyushu Electric Wheatstone on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Kyushu Electric Wheatstone a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Kyushu Electric Wheatstone advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months agocommenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed Kyushu Electric Wheatstone 30 days for consultation. For consultation on EPs, 30 days is the usual period for Kyushu Electric Wheatstone.
- In this context, Woodside allowed Kyushu Electric Wheatstone a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Kyushu Electric Wheatstone is appropriate and adapted to the nature of interests of Kyushu Electric Wheatstone:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Kyushu Electric Wheatstone of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Kyushu Electric Wheatstone did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Kyushu Electric Wheatstone's functions, interests or activities.

4.7.16 OMV Australia / Sapura OMV Upstream

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed OMV advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to OMV, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with OMV for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given OMV sufficient information to allow OMV to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to OMV on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed OMV a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to OMV advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months agocommenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed OMV 30 days for consultation. For consultation on EPs, 30 days is the usual period for OMV.
- In this context, Woodside allowed OMV a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with OMV is appropriate and adapted to the nature of interests of OMV:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding OMV of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as OMV did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on OMV's functions, interests or activities.

4.7.17 PE Wheatstone

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed PE Wheatstone advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to PE Wheatstone, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with PE Wheatstone for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given PE Wheatstone sufficient information to allow PE Wheatstone to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to PE Wheatstone on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed PE Wheatstone a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to PE Wheatstone advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months agocommenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed PE Wheatstone 30 days for consultation. For consultation on EPs, 30 days is the usual period for PE Wheatstone.
- In this context, Woodside allowed PE Wheatstone a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with PE Wheatstone is appropriate and adapted to the nature of interests of PE Wheatstone:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding PE Wheatstone of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as PE Wheatstone did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on PE Wheatstone's functions, interests or activities.

4.7.18 Santos NA Energy Holdings / Santos Ltd / Santos WA Northwest / Santos Offshore / Santos WA Southwest / Santos (BOL) / Santos WA PVG

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed Santos advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Santos, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 1 August 2024, Santos emailed Woodside to advise it has no feedback regarding this activity (SI Report, reference 53.1).
- **(1)** On 1 August 2024, Woodside thanked Santos for its feedback (SI Report, reference 53.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No feedback regarding the activity.	**(1)** **Woodside assessment:** Woodside noted Santos has no feedback regarding the activities. **Woodside response:** Woodside thanked Santos for its feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Santos for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Santos sufficient information to allow Santos to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Santos on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

- On 1 August 2024, Santos consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Santos a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Santos advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Santos 30 days for consultation. For consultation on EPs, 30 days is the usual period for Santos.
- In this context, Woodside allowed Santos a reasonable period for consultation in preparation of the EP as evidenced by its response on 1 August 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Santos is appropriate and adapted to the nature of interests of Santos:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Santos as evidenced by its response on 1 August 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Santos.
- Made no changed or inclusions in the EP as a result of consultation with Santos because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.19 Shell Australia

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed Shell advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Shell, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shell Australia for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shell Australia sufficient information to allow Shell Australia to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shell Australia on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shell Australia a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shell Australia advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shell Australia 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shell Australia.
- In this context, Woodside allowed Shell Australia a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shell Australia is appropriate and adapted to the nature of interests of Shell Australia:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Shell Australia of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shell Australia did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shell Australia's functions, interests or activities.

4.7.20 Vermilion Oil & Gas

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Vermilion Oil & Gas advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Vermilion Oil & Gas, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Vermilion Oil & Gas for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Vermilion Oil & Gas sufficient information to allow Vermilion Oil & Gas to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Vermilion Oil & Gas on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Vermilion Oil & Gas a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Vermilion Oil & Gas advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Vermilion Oil & Gas 30 days for consultation. For consultation on EPs, 30 days is the usual period for Vermilion Oil & Gas.
- In this context, Woodside allowed Vermilion Oil & Gas a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Vermilion Oil & Gas is appropriate and adapted to the nature of interests of Vermilion Oil & Gas:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Vermilion Oil & Gas of the opportunity to provide feedback.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Vermilion Oil & Gas did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Vermilion Oil & Gas's functions, interests or activities.

4.7.21 Western Gas

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Western Gas advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Western Gas, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Western Gas for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Western Gas sufficient information to allow Western Gas to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Western Gas on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Western Gas a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Western Gas advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Western Gas 30 days for consultation. For consultation on EPs, 30 days is the usual period for Western Gas.
- In this context, Woodside allowed Western Gas a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Western Gas is appropriate and adapted to the nature of interests of Western Gas:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Western Gas of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Western Gas did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Western Gas' functions, interests or activities.

4.8 PEAK INDUSTRY REPRESENTATIVE BODIES

4.8.1 Australian Energy Producers (AEP)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed AEP advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to AEP, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with AEP for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AEP sufficient information to allow AEP to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to AEP on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed AEP a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AEP advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed AEP 30 days for consultation. For consultation on EPs, 30 days is the usual period for AEP.
- In this context, Woodside allowed AEP a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AEP is appropriate and adapted to the nature of interests of AEP:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding AEP of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as AEP did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on AEP's functions, interests or activities.

4.9 TRADITIONAL CUSTODIANS AND NOMINATED REPRESENTATIVE CORPORATIONS

4.9.1 Balanggarra Aboriginal Corporation

Balanggarra Aboriginal Corporation (BAC) is established under the *Native Title Act 1993* by the Balanggarra People to represent the Balanggarra People (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed BAC advising of the proposed activity (Record of Consultation, reference 6.2.20), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that BAC and its members may have within the EMBA, information on how BAC would like to engage, and requested that BAC provide information to other individuals as required. The email included a date to provide feedback.
- On 19 June 2024, Woodside emailed BAC a follow-up about the proposed activity, which included a Summary Information Sheet and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*, as per the 18 June 2024 email (SI Report, reference 14.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 5 July 2024, Woodside emailed BAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details and a closing date to submit feedback about the proposed activity (SI Report, reference 14.2).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with BAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on BAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside provided NOPSEMA's Brochure "*Consultation on offshore petroleum environment plans*" and Guideline "*Guideline: Consultation in the course of preparing an environment plan".*
- Woodside advised that BAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with BAC in June 2024. Woodside has addressed and responded to BAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked BAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BAC's functions, interests, or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.2 Bardi and Jawi Niimidiman Aboriginal Corporation

Bardi and Jawi Niimidiman Aboriginal Corporation (BJNAC) is established under the *Native Title Act 1993* by the Bardi and Jawi People to represent the Bardi and Jawi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 14 December 2023, Woodside emailed BJNAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed BJNAC advising of the proposed activity (Record of Consultation, reference 6.2.21), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that BJNAC and its members may have within the EMBA, information on how BJNAC would like to engage, and requested that BJNAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed BJNAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details and a closing date to submit feedback about the proposed activity (SI Report, reference 15.1). Woodside also advised that it would be available to meet face-to-face to discuss the activity.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with BJNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on BJNAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside advised that BJNAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback...
- Woodside commenced consultation with BJNAC in June 2024. Woodside has addressed and responded to BJNAC over 18 months, demonstrating a “reasonable period” of consultation.

Woodside asked BJNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BJNAC’s functions, interests, or activities.

4.9.3 Buurabalayji Thalanyji Aboriginal Corporation

Buurabalayji Thalanyji Aboriginal Corporation (BTAC) is established under the *Native Title Act 1993* by the Thalanyji people to represent the Thalanyji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 20 February 2023, BTAC emailed Woodside a letter in relation to another project but relevant to all Woodside activities, including the footprint of this. BTAC stated that the Thalanyji people:
  - **(1)** BTAC on behalf of the Thalanyji people had an enduring deep connection to Sea Country north of Onslow, extending out to islands off the Pilbara coast such as the Montebello, Barrow Island and the Mackerel Islands.
  - **(2)** BTAC sought support from Woodside to enable it to define and articulate is Sea Country values in a manner that could be more clearly understood by the offshore sector.
- On 26 July 2023, Woodside emailed BTAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- **(1, 2)** On 31 July 2023, in response to BTAC’s request for support, Woodside emailed 3 letters to BTAC, one of which outlined support for an ethnographic assessment to:
  - Identify Sea Country values generally sufficient to inform all Woodside EPs.
  - Identify any work necessary to clarify or define the offshore areas that are relevant to the Thalanyji People.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed BTAC advising of the proposed activity (Record of Consultation, reference 2.22), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside’s website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that BTAC and its members may have within the EMBA, information on how BTAC would like to engage, and requested that BTAC provide information to other individuals as required. The email included a date to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** On 19 June 2024, BTAC emailed Woodside a letter in response to the offer to support work to articulate Sea Country values (SI Report, reference 16.1). The letter outlined:
  - A proposed cultural mapping program to translate cultural values associated with the Thalanyji Area of Interest and appropriately manage potential impacts to Sea Country.
  - That Thalanyji hold 'data sovereignty' of the cultural mapping.
  - A scope of works.
  - A request that Woodside provide a draft agreement to formalise the cultural mapping program.
- **(2)** On 19 June 2024, Woodside emailed BTAC to provide a focal person for the work on Sea Country (SI Report, reference 16.2).
- **(2)** On 5 July 2024, BTAC emailed Woodside to follow-up on its email/letter of 19 June 2024 (SI Report, reference 16.3).
- **(2)** On 5 July 2024, Woodside replied to BTAC's email and advised it would respond to BTAC's email/letter of 19 June 2024 by the end of the month (SI Report, reference 16.4).
- On 5 July 2024, Woodside emailed BTAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 16.5).
- **(2)** On 23 July 2024, BTAC emailed Woodside acknowledging that Woodside would be responding to its mapping project proposal by the end of July 2024 (SI Report, reference 16.6).
- **(2)** On 31 July 2024, Woodside emailed BTAC acknowledging and thanking BTAC for submitting its Thalanyji Cultural Mapping Project proposal (SI Report, reference 16.7). Woodside stated:
  - The proposed cultural mapping project addresses the whole of Thalanyji country including onshore and offshore areas, and areas extending into an adjacent Native Title determination area, and as such, the scope is broader than Woodside had expected and that can be supported.
  - As communicated in 2023, Woodside's expectation is that an ethnographic assessment, focused on clarifying or defining the offshore areas that are relevant to the Thalanyji people and recording Sea Country values, can effectively inform EPs.
  - Woodside supports engaging of an anthropologist, agreed by the parties, for the purpose of an ethnographic assessment, and will consider further phases upon completion of the first agreement.
  - Woodside seeks an opportunity to develop a brief for the initial agreement with BTAC.

Ongoing engagement:

- On 9 September 2024, Woodside invited BTAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 59.1).
- On 3 October 2024, Woodside invited BTAC to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 59.3).
- On 18 November 2024, Woodside emailed BTAC following a meeting about a matter unrelated to EP consultation (SI Report, reference 16.8). Matters raised in the email that are relevant included:
  - **(3)** BTAC would send a ranger program proposal to Woodside. **(3)** Woodside would consider the proposal.
  - **(1, 2)** Woodside and BTAC would hold a workshop to finalise the sea country mapping scope.
- On 29 July 2025, Woodside emailed BTAC to progress outstanding issues (SI Report, reference 16.9). Matters relevant to this EP included:
  - **(2)** a request for a time for Woodside and BTAC's heritage teams to workshop a heritage agreement and finalise the scope for Sea Country mapping.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– **(3)** a request for BTAC's ranger program proposal for Woodside's consideration.		
Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) BTAC stated that its interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands.	**(1)** **Woodside assessment**: Given EMBAs may extend to nearshore areas coastally adjacent to the Thalanyji native title determination area, these values may be relevant in the event of an unplanned hydrocarbon release. Woodside will engage with Traditional Custodians whose interests may be affected in the event of a hydrocarbon release, as outlined in Appendix H. **Woodside response**: Woodside has sought to engage BTAC in further assessments of Sea Country values. BTAC has not provided further detail regarding heritage value of places or cultural features of the Operational Area or the EMBA.	**(1)** Existing controls considered sufficient as described in Section 6.10 and Appendix H.
(2) BTAC has a cultural obligation to care for the environmental values of Sea Country but needs support to articulate these in a format suitable for consultation.	**(2)** **Woodside assessment**: Woodside assessed BTAC's cultural obligation to care for the environmental values of Sea Country to represent potential cultural values. **Woodside response**: Woodside updated relevant sections in the EP to record BTAC's interests and potential cultural values, assessed the potential impact on these and included controls.	**(2)** Woodside updated Section 4.9 to record BTAC's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.10.
(3) BTAC will send a ranger proposal to Woodside.	**(3)** **Woodside Assessment:** Woodside is supportive of ongoing engagement with Traditional Custodians through ranger programs. **Woodside Response:** Woodside is in the process of developing a ranger funding program. BTAC's request will be evaluated in accordance with the program's criteria upon its implementation.	**(3)** Ranger programs are able to be addressed as part of Woodside's Program of Ongoing Engagement (Appendix H)
Woodside has addressed objections and claims as noted above.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with BTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on BTAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that BTAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with BTAC in June 2024. Woodside has addressed and responded to BTAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked BTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers that the measures and controls described in this EP address the potential impact from the proposed activity on BTAC's functions, interests, and activities.

4.9.4 Dambimangari Aboriginal Corporation

Dambimangari Aboriginal Corporation (DAC) established under the *Native Title Act 1993* by the Dambimangari people to represent the Dambimangari people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DAC advising of the proposed activity (Record of Consultation, reference 6.2.23), and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that DAC and its members may have within the EMBA, information on how DAC would like to engage, and requested that DAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed DAC a reminder about the proposed activity, offered an opportunity to discuss the activity further and included a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 17.1). No response has been received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with DAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on DAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that DAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with DAC in June 2024. Woodside has addressed and responded to DAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked DAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on DAC's functions, interests, or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.5 Gogolanyngor Aboriginal Corporation

Gogolanyngor Aboriginal Corporation (GAC) is established under the *Native Title Act 1993* by the Jabirr Jabirr/Ngumbarl and Bindunbur people to represent the Jabirr Jabirr/Ngumbarl and Bindunbur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed GAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 16 June 2024, Woodside emailed GAC advising of the proposed activity (Record of Consultation, reference 6.2.24), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that GAC and its members may have within the EMBA, information on how GAC would like to engage, and requested that GAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed GAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference, 18.1).
- On 3 April 2025, Woodside met with GAC to discuss unrelated EPs (SI Report, reference 18.2). Matters discussed relevant to this EP included:
  - **(1)** Possibility of activities causing vibrations in the water. **(2)** Woodside explained the seismic testing process (not being used for this activity) and what measures are in place to mitigate the impact on marine animals.
  - **(2)** GAC stated that funding for ranger programs was difficult to access. **(2)** Woodside provided information about ranger funding.
- **(2)** On 7 May 2025, Woodside visited GAC's office and provided an update on a ranger funding proposal (SI Report, reference 18.3).
- **(2)** On 20 May 2025, Woodside called GAC and provided information about ranger funding available from a Commonwealth government agency (SI Report, reference 18.4).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) GAC enquired about the possibility of activities causing vibrations in the water.	**(1)** **Woodside assessment:** There is no seismic testing in this EP. Support vessels may generate some noise. **Woodside response:** During a meeting on 3 April 2025 about another EP, Woodside explained what measures are in place to mitigate the impact of noise on marine animals.	**(1)** While this EP does not include seismic activity, risk and mitigation measures for all relevant sound sources are in Section 6.6 of the EP.
(2) GAC stated that funding for ranger programs was difficult to access.	**(2)** **Woodside assessment:** Woodside is supportive of ongoing engagement with Traditional Custodians through ranger programs.	**(2)** Ranger programs are able to be addressed as part of Woodside's Program of Ongoing Engagement (Appendix H).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside is in the process of developing a ranger funding program. GAC's request will be evaluated in accordance with the program's criteria upon its implementation. Woodside has provided ranger information to GAC.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	Based on the engagement to date, no additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with GAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on GAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that GAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with GAC in June 2024. Woodside has addressed and responded to GAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked GAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GAC's functions, interests, or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.6 Karajarri Traditional Lands Association (Aboriginal Corporation)

Karajarri Traditional Lands Association (KTLA) is established under the *Native Title Act 1993* by the Karajarri people to represent the Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement

- On 26 July 2023, Woodside emailed KTLA Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed KTLA advising of the proposed activity (Record of Consultation, reference 6.2.25), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that KTLA and its members may have within the EMBA, information on how KTLA would like to engage, and requested that KTLA provide information to other individuals as required. The email included a date to provide feedback.
- On 21 June 2024, Woodside emailed KTLA the original Record of Consultation, as per the 19 June 2024 email (SI Report, reference 19.1).
- On 5 July 2024, Woodside emailed KTLA a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 19.2).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with KTLA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on KTLA's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside advised that KTLA can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with KTLA in June 2024. Woodside has addressed and responded to KTLA over 18 months, demonstrating a “reasonable period” of consultation.

Woodside asked KTLA if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KTLA’s functions, interests, or activities.

4.9.7 Kariyarra Aboriginal Corporation

Kariyarra Aboriginal Corporation (KAC) is established under the *Native Title Act 1993* by Kariyarra people to represent the Kariyarra people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed KAC Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- On 5 December 2023, Woodside and KAC met in Port Hedland. At the meeting KAC gave a presentation to Woodside on its Sea Country rights and duties:
  - **(1)** Accessing Sea Country for fishing, trapping, crabbing catching turtle, hunting dugong, using stingray barbs for spears and collecting shellfish.
  - **(1)** Visiting offshore islands at low tide.
  - Passing on traditional knowledge to children.
  - **(2)** Totems.
  - **(3)** Intangible heritage including the Yinta (associated with Sea Country).
  - **(1)** Having duties to look after and protect all KAC’s Sea Country.
  - **(1, 2, 3)** Woodside acknowledged KAC’s views on consultation requirements.
- On 20 December 2023, KAC emailed Woodside (via legal representative) requesting Woodside to note its:
  - **(4)** cultural interest in coastal landforms and coastal native vegetation. **(4)** Woodside has assessed impacts and risks to coastal landforms and coastal native vegetation in the EP.
  - **(3)** cultural interest in cultural heritage sites and intangible cultural heritage associated with the coast and the ocean. **(3)** Woodside avoids disturbance to cultural heritage sites and values. Heritage values, risks and mitigation measures are recorded in the EP.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation for this EP:

- On 17 June 2024, Woodside emailed KAC advising of the proposed activity (Record of Consultation, reference 6.2.26), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that KAC and its members may have within the EMBA, information on how KAC would like to engage, and requested that KAC provide information to other individuals as required. The email included a date to provide feedback.
- On 26 June 2023, Woodside emailed KAC (via legal representative) following-up on a previous email regarding the status of a consultation draft agreement (SI Report, reference 20.1).
- On 3 July 2024, Woodside and KAC (via legal representative) exchanged emails about a draft consultation agreement. KAC's legal representative informed Woodside that the matter would be handled by KAC's in-house counsel (SI Report, references 20.2, 20.3, 20.4, 20.5, 20.6).
- On 5 July 2024, Woodside emailed KAC (via legal representative) to remind KAC that consultation for this EP was due by 19 July 2024 (SI Report, reference 20.7).

Ongoing engagement:

- On 5 December 2024, Woodside emailed KAC an update on this activity (SI Report, reference 20.8). Woodside:
  - Informed KAC that Woodside would resubmit this EP for further assessment by NOPSEMA.
  - Notified KAC that consultation for the preparation this EP would close on 19 December 2024 and that feedback provided by that date would be reflected in the EP and considered by NOPSEMA.
  - Acknowledged discussions relating to framework agreements had been ongoing since September 2023 but consultation had occurred in parallel for this EP.
  - Woodside stated that KAC was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
  - Woodside explained feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
  - **(1, 2, 3, 4)** Woodside provided an attachment (Attachment A) detailing feedback KAC had provided previously about Cultural Values and where relevant information about these values could be found on in the published EP on the NOPSEMA website.
- On 1 April 2025, Woodside telephoned KAC (SI Report, reference 20.9). During the discussion both parties tentatively agreed to meet on 30 April 2025 to discuss two EPs unrelated to this activity. Woodside acknowledged the importance of maintaining ongoing relationships with relevant PBCs to ensure Woodside remains aware of the cultural interests and values for each group.
- On 30 April 2025, Woodside met KAC in Port Hedland about unrelated EPs (SI Report, reference 20.10). Matters discussed relating to this EP include:
  - Woodside explained EPs, consultation processes and EMBAs.
  - Woodside presented cultural values that KAC had previously provided.
  - **(5)** KAC sought clarity of impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event. **(5)** Woodside answered questions about these issues during the meeting and offered to provide information in a written response.
  - **(6)** KAC queried the role of Traditional Owners in the event of a spill. **(6)** Woodside provided an overview on its emergency response process and how it was working with the Government to implement additional training opportunities for ranger groups.
  - **(7)** KAC queried which shipping channels are used as they wanted to understand the risks associated with ships travelling close to their determination. **(7)** Woodside took the question on notice.
  - **(8)** KAC expressed a desire to enter into a consultation agreement. **(8)** Woodside accepted this as an ongoing action noting that these discussions would not delay EP submission deadlines.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(9)** Islands off the coast of Port Hedland are extremely important to KAC (Little Turtle, North Turtle and Bedout). **(9)** Woodside noted this feedback for EPs not related to this activity.
  - **(10)** KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes. **(10)** Woodside explained that since these historic incidents, governments have set up regulatory bodies including NOPSEMA to regulate industry.
- On 5 May 2025, Woodside emailed KAC to confirm matters discussed during the 30 April 2025 meeting (SI Report, reference 20.11). This included:
  - **(8)** KAC's desire to enter into a consultation agreement. **(8)** Woodside notes this as an ongoing action noting that these discussions occur in parallel to EP consultation.
  - **(5)** KAC sought clarity of impacts to the health of food sources and other marine life that could threaten sea life.
  - **(7)** KAC queried which shipping channels are used as it wanted to understand the risks associated with ships travelling close to its determination.
  - **(6)** KAC queried contact points in the event of a spill.
  - **(10)** KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes.
- Between 20 and 27 May 2025, Woodside and KAC exchanged emails and met online to follow-up on matters raised during the 30 April 2025 meeting (SI Report, references 20.12 – 20.15).
- On 28 May 2025, Woodside and KAC spoke on the phone (SI Report, reference 20.16) where the following items relevant to this EP were discussed:
  - **(8)** KAC's desire to enter into a consultation agreement. KAC requested Woodside resend the most recent consultation agreement draft for KAC to consider and respond. **(8)** Woodside notes this as an ongoing action noting that these discussions occur in parallel to EP consultation.
  - Woodside offered to host a consultation 'learning' workshop to help build an understanding of the EP consultation process.
  - Woodside committed to provide a formal response to KAC.
- On 3 June 2025, Woodside emailed KAC responses to questions raised during their meeting on 30 April 2025 (SI Report, reference 20.17). Responses included:
  - **(8)** Woodside noted that it had provided KAC with a draft consultation agreement in February 2024 and that discussions about this agreement had occurred in parallel to consultation for EPs.
  - **(5)** Woodside acknowledged KAC's connection to Sea Country and provided details about risks and mitigation measures that related to the ecological integrity of marine fauna.
  - **(6)** Woodside provided information about contact procedures in the highly unlikely event of a spill.
  - **(7)** Woodside provided information about shipping channels, and confirmed that ships were sometimes required to travel from Dampier.
  - **(9)** Woodside acknowledged that islands off Port Hedland are culturally important to KAC - Little Turtle, North Turtle and Bedout. This information would be recorded in EPs including this EP.
  - **(10)** Woodside provided information about two historic incidents not related to Woodside that had been raised by KAC in the 30 April 2025 meeting. Woodside explained the role of NOPSEMA and that it took a robust and systematic approach to the environmental management of petroleum activities.
- On 29 July 2025, in response to Woodside sending information about different EPs, KAC emailed Woodside and requested a consultation meeting with its Board (SI Report, reference 20.18).
- On 30 July 2025, KAC emailed Woodside a quote for a consultation meeting scheduled for 21 August 2025 and its meeting policy (SI Report, reference 20.19).
- On 6 August 2025, Woodside emailed KAC confirming its consultation meeting quote had been accepted (SI Report, reference 20.20).
- From 11-20 August 2025, KAC and Woodside exchanged emails and phone calls about arrangements for the 21 August 2025 meeting (SI Report, references 20.21-20.32)
- On 21 August 2025, Woodside met with KAC to consult on two different Eps (SI Report, reference 20.33). During the meeting:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside provided an explanation of EPs and regulatory requirements.
- Woodside discussed how modelling was used to determine EMBAs.
- **(11)** KAC enquired about EMBAs regarding extreme weather events such as cyclones and spill response times. **(11)** Woodside stated that there are many factors that affect spill modelling for EMBAs including weather conditions, ocean currents, and the type of vessels. Woodside took the query about cyclone data being included in EMBA modelling on notice.
- **(12)** KAC queried where Woodside had collated its list of KAC's cultural values. **(12)** Woodside stated it had sourced KAC's cultural values via consultation and feedback from KAC when consulting on other EPs and desktop research.
- **(1)** KAC provided additional information on marine species identified as cultural values which include: shellfish, cockles, oysters, clam shells, con shells, mullets and sea cow (dugong), as well as the importance of **(13)** river systems as food chains and reiterated the importance in maintaining healthy river systems. **(1,13)** Woodside acknowledged this new information and advised it would update current and future EPs accordingly.

- On 26 August 2025, Woodside and KAC exchanged emails about meeting details (SI Report, reference 20.34-20.35).
- **(12)** On 17 September 2025, Woodside emailed KAC updated information about its record of Cultural Values and responses to questions taken on notice during their 21 August 2025 meeting (SI Report, reference 20.36) **(11)** This included an answer to a query about consideration of cyclone events in spill modelling. Woodside provided information about how modelling captures large-scale ocean changes caused by cyclones.

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*
(1) KAC has outlined its Sea Country rights and duties, including: Looking after and protecting Sea Country, mentioning fishing, trapping, crabbing, catching turtle, hunting dugong, and using stingray barbs for spears and collecting shellfish.	**(1)** **Woodside assessment:** Woodside accepts that KAC may have Sea Country values within EMBAs for EPs. **Woodside response:** Woodside understands cultural and environmental values are intrinsically linked; in addition to the specific controls for cultural features and heritage values outlined in Section 6.10, the controls and performance standards in Section 6.6, 6.7 and 6.8 will ensure impacts to cultural features and heritage values, including marine species and habitats, are acceptable and ALARP.	**(1)** Woodside recognises that KAC holds Sea Country rights and interests that need to be protected (Section 4.9). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6.10 of the EP.
(2) At a face-to-face meeting on 5 December 2023, KAC gave a presentation about its Sea Country rights and duties, including its cultural obligation to look after and protect Sea Country and secret habitat totems such as mythic snakes.	**(2)** **Woodside assessment:** Woodside respects KAC's position that it has cultural obligations to look after country and cultural knowledge about Sea Country including totems. **Woodside response:** Woodside has noted KAC's values and interests in Sea Country in Section 4.9.4.	**(2)** Woodside recognises KAC's connection to Sea Country (Section 4.9). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6.10 of the EP.
(3) On 20 December 2023, KAC mentioned:	**(3)** **Woodside assessment:** Woodside seeks to avoid damage or disturbance to cultural heritage (including intangible heritage) and assesses cultural heritage impacts, including both direct and	**(3)** Woodside recognises that KAC holds Sea Country rights and interests that need to be protected (Section 4.9). Potential

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Tangible and intangible heritage associated with the coast and the ocean.	indirect impacts and risks associated with PAPs. Mitigation can include any measure or control aimed at ensuring the viability of the intangible cultural heritage and its intergenerational transmission. **Woodside response:** Woodside understands cultural and environmental values are intrinsically linked; in addition to the specific controls for cultural features and heritage values, the controls and performance standards in Section 6 will reduce impacts to cultural features and heritage values, including marine species and habitats.	impacts on Cultural Features and Heritage Values are assessed in Section 6.10 of the EP.
(4) On 20 December 2023, KAC mentioned: Impacts on coastal landforms and coastal native vegetation.	**(4)** **Woodside assessment:** Woodside accepts that KAC has an interest in the impacts on coastal landforms and coastal native vegetation. **Woodside response:** Assessment of the impacts and risks associated with coastal landforms and coastal native vegetation have been captured in Section 4.9 and Section 6.10.	**(4)** Woodside recognises that KAC holds Sea Country rights and interests that need to be protected (Section 4.9). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6.10 of the EP.
(5) KAC sought clarity of impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event.	**(5)** **Woodside assessment:** Woodside acknowledges KAC's connection to Sea Country. Woodside has identified potential impacts and risks to the ecological integrity of marine fauna and put in place mitigation measures. **Woodside response:** Woodside has provided a written response to KAC explaining risks to marine life relating to another EP. Woodside has categorised these risks as highly unlikely events. Woodside has explained that clean up and remediation response activities would commence from the outset of an incident in line with Woodside's Oil Pollution First Strike Plan.	**(5)** KAC's connection to Sea Country is identified in Section 4.9 of the EP. Risks and mitigation measures relating to marine life are details in Section 6.6, 6.7 and 6.8 Measures relating to oil spills are covered in Appendix D – Oil Spill Preparedness and Response and Appendix G – Oil Pollution First Strike Plan.
(6) KAC queried the role of Traditional Owners in the event of a spill.	**(6)** **Woodside assessment:** In the highly unlikely event of a spill, Woodside would enact its Oil Pollution First Strike Plan, which includes contacting the regulator, NOPSEMA and any relevant cultural authorities that may be affected. **Woodside response:** Woodside provided KAC with details of its Oil Pollution First Strike Plan and contact procedures.	(6) Measures relating to oil spills are covered in Appendix D– Oil Spill Preparedness and Response and Appendix G – Oil Pollution First Strike Plan.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(7) KAC queried which shipping channels are used as they wanted to understand the risks associated with ships travelling closely to their determination.	**(7)** **Woodside assessment:** Ships are sometimes required to travel from the mainland (Dampier) to operational areas. **Woodside response:** Woodside informed KAC about the distance from KAC's Native Title claim determination to the operational area of another activity not related to this EP (for which this feedback was initially raised). Woodside also provided KAC with details about regulations governing vessel transport. Woodside has also provided details about its First Strike Plan.	**(7)** Measures relating exclusion zones and vessels are in Section 3.9 of the EP. Measures relating to oil spills are covered in Appendix D – Oil Spill Preparedness and Response and Appendix G – Oil Pollution First Strike Plan.
(8) KAC expressed a desire to enter into a consultation agreement.	**(8)** **Woodside assessment:** Woodside provided KAC with a draft consultation agreement in February 2024. **Woodside response:** Woodside notes that while discussions about this agreement are ongoing, a consultation agreement is not a prerequisite for consultation, and consultation for EPs have occurred in parallel.	**(8)** No action required.
(9) Islands off the coast of Port Hedland are extremely important to KAC (Little Turtle, North Turtle and Bedout).	**(9)** **Woodside assessment:** Woodside acknowledges that islands off Port Hedland have cultural value to KAC. **Woodside response:** Woodside has updated its records to reflect this and will include this information in Section 4.9.	**(9)** This information has been captured in Section 4.9 of the EP.
(10) KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes.	**(10)** **Woodside assessment:** Woodside takes a robust and systematic approach to environmental management of petroleum activities. **Woodside response:** Woodside explained that since these historic incidents, governments have set up regulatory bodies including NOPSEMA to oversee industry. In the unlikely event of a spill, Woodside would enact its Oil Pollution First Strike Plan which would include contacting NOPSEMA and any affected cultural authorities. Woodside has oil pollution emergency plans and implements training and capability building programs in the regions where it operates.	**(10)** Measures relating to oil spills are covered in Appendix D – Oil Spill Preparedness and Response
(11)	**(11)**	**(11)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

KAC enquired about EMBAs in regards to extreme weather events such as cyclones and spill response times.	**Woodside assessment:** Spill modelling for EMBAS includes assessment of weather conditions, ocean currents and vessel types. **Woodside response:** Woodside provided information about EMBA spill modelling during its meeting on 21 August 2025, further information was provided via email on 17 September 2025.	Measures relating to oil spills are covered in Appendix D - Oil spill Preparedness and Response and Appendix G – Oil Pollution First Strike Plan.
(12) KAC queried where Woodside had collated its list of KAC's cultural values	**(12)** **Woodside assessment:** At the start of consultation, Woodside provided KAC with information Cultural Values it had collated for the group through consultation and publicly available literature. **Woodside response:** Woodside explained to KAC that it had sourced KAC's cultural values via consultation and feedback from KAC when consulting on other EPs and desktop research.	**(12)** No further action required.
(13) River systems are important to the food chain.	**(13)** **Woodside assessment:** Woodside assesses environmental impacts in its EPs and puts in place appropriate mitigation measures. Woodside notes that river systems are not considered relevant for this EP. **Woodside response:** Woodside has informed KAC that it will update it records and current and future EPs accordingly.	**(13)** River systems are not relevant for this EP. Cultural values relating to river systems are in 4.9.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report - Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with KAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information:** • Woodside sought direction on KAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls. • Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Woodside asked for the consultation and information sheets be distributed to members and individuals as required. • Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". • Woodside advised that KAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations). **Reasonable Period:** • Consultation Information Sheet publicly available on the Woodside website since June 2024. • Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback. • Woodside commenced consultation with KAC in June 2024. Woodside has addressed and responded to KAC over 18 months, demonstrating a "reasonable period" of consultation. Woodside asked KAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP). Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KAC's functions, interests, or activities.	

4.9.8 Mayala Inninalang Aboriginal Corporation

Mayala Inninalang Aboriginal Corporation (MIAC) is established under the *Native Title Act 1993* by the Mayala people to represent the Mayala people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. Kimberley Land Council (KLC) is the nominated Representative of MIAC.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed MIAC advising of the proposed activity (Record of Consultation, reference 6.2.27), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that MIAC and its members may have within the EMBA, information on how MIAC would like to engage, and requested that MIAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed MIAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 21.1).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been	No additional measures or controls required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with MIAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on MIAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that MIAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with MIAC in June 2024. Woodside has addressed and responded to MIAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked MIAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MIAC's functions, interests, or activities.

4.9.9 Murujuga Aboriginal Corporation

Murujuga Aboriginal Corporation (MAC) is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi, and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.

Historical engagement:

- **(1)** On 1 September 2023, MAC emailed a letter to Woodside noting the following:
  - MAC is comfortable that the women in the Circle of Elders are the right people to be consulted with.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- MAC notes that it would be extremely unusual for knowledge to be held by an individual without surrounding groups knowing about it.
- Members of the Circle of Elders themselves represent the Ngarda-Ngarli; the collective term for the Traditional Custodians who look after Murujuga Country.

- **(1)** On 14 December 2023, Woodside met with the MAC Board and Circle of Elders and CEO in Karratha to discuss accepted EPs as well as upcoming EPs being submitted in 2024. The meeting also reconfirmed MAC as the cultural authority over Murujuga and spoke to the specific authority of its senior law men and women.
- On 23 April 2024, MAC emailed Woodside and raised the following:
  - **(2)** The lack of broader-scale bathymetric information on the submerged landscape and the potential for impact on jinna (Songlines).
  - **(3)** That MAC has no specific knowledge of tangible or intangible heritage that may be impacted.
  - **(4)** EMBAs and management procedures in place to protect cultural values in addition to environmental values.
  - **(5)** That EPs captures a process for engaging with MAC to protect cultural, heritage and Outstanding Universal Values in the event of an incident.
  - **(6)** That it recommends Woodside also consult Ngarluma Aboriginal Corporation.
- On 8 May 2024, Woodside emailed MAC to provide further information including:
  - **(2)** Woodside's continued support to work with MAC to undertake mapping of areas significant to MAC.
  - **(2)** Woodside's continued support to undertake further ethnographic surveys focused on jinna at MAC's convenience.
  - **(3)** That Woodside welcomed MAC's advice on identifying cultural features and values in the absence of information from further surveys and mapping.
  - **(4)** How the EMBA is determined.
  - **(5)** How Woodside uses modelling to develop response plans in the unlikely event of an incident, including notification requirements to Traditional Custodians.
  - **(6)** That Woodside has also consulted with Ngarluma Aboriginal Corporation on this activity.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed MAC advising of the proposed activity (Record of Consultation, reference 6.2.28), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that MAC and its members may have within the EMBA, information on how MAC would like to engage, and requested that MAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed MAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 22.1).

Ongoing engagement:

- On 2 August 2024, MAC emailed Woodside a letter relating to another EP (SI Report, reference 22.2). Matters relating to this EP include:
  - **(7)** MAC's advice that activities that could potentially affect the natural movement or behaviour of marine species may impact cultural values.
  - **(8)** MAC's request that the protection of environmental values be assessed separately from the protection of cultural values.
  - **(5)** That MAC expects to be consulted about any activity located near Murujuga and informed if there is an environmental incident whereby Murujuga falls within the possible impact zone.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(5)** On 2 August 2024, Woodside responded to MAC's email confirming it would inform MAC of all projects located near Murujuga and in the very unlikely case of an environment incident (SI Report, reference 22.3).
- On 9 September 2024, Woodside invited MAC to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners (SI Report, reference 59.1).
- On 17 September 2024, Woodside emailed MAC responses to matters raised in correspondence on 2 August 2024 (SI Report, reference 22.4). The letter stated:
  - **(7,8)** Woodside assesses potential cultural impacts on marine species including controls for mammal migration paths and behaviour collaboratively with environmental impacts.
  - **(5)** Woodside actively seeks ongoing engagement and consultation with MAC on its cultural interests, activities and functions.
  - Woodside is available to meet with MAC.
- On 25 September 2024, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.2).
- On 3 October 2024, Woodside invited MAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 59.3).
- On 23 October 2024, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.4).
- On 21 November 2024, NYFL emailed Woodside a letter advising that due to the passing of a Senior Elder, Sorry Business was underway in the Roebourne area (SI Report, reference 22.5).
- On 4 March 2025, Woodside invited MAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 59.5).
- On 5 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.6).
- On 24 March 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 59.7).
- On 26 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 59.8).
- On 7 April 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 59.9).
- On 8 April 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.10).
- On 22 August 2025, MAC responded to an email sent by Woodside about an unrelated EP and clarified cultural values provided by MAC (SI Report, reference 22.6). Matters relevant to this EP included:
  - **(9)** Additional culturally valued species: stingrays, sharks, crustaceans, octopus, sea starts, sea urchins, sponges and molluscs.
  - **(7)**Any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities.
  - **(2)** Submerged landscape: potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(10)** Feedback that fish traps are not limited to Conzinc, Angel and Gidley locations as significant.
- **(11)** Feedback that harvesting squid at Conzinc Bay is one of many subsistence activities that have been and continue to be practiced across the archipelago.

- On 22 August 2025, MAC emailed Woodside a letter about an unrelated EP (SI Report, reference 22.7). Matters relevant to this email included:
  - **(8)** Protection of environmental values should be assessed separately to protection of cultural values.
  - **(7)** Activities that could potentially affect the natural movement, migration and/or other behaviour of marine species (including sea birds) may have an impact on the cultural interpretation of the seasonal landscape and seascape and associated cultural behaviours.
  - **(5)** MAC expects to be consulted on future projects located closer to Murujuga. **(5)** Woodside consults MAC on EPs when the EMBA overlaps or is adjacent to the Murujuga cultural landscape.
- On 28 August 2025, Woodside responded by email to MAC's feedback about Cultural Values (SI Report, reference 22.8). Woodside:
  - **(2,5,7,10,11)** Provided MAC with an expanded Cultural Values table (Appendix A) which included sources of information and additional detail.
  - **(2,5,7,10,11)** Explained how Woodside sources information about Cultural Values for EPs.
  - **(2,5,7,10,11)** Invited MAC to review the Cultural Values table and provide further feedback if necessary.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) MAC advised Woodside that it was the appropriate body corporate and cultural authority over Murujuga.	**(1)** **Woodside assessment**: Woodside accepts and respects MAC's position as the appropriate body corporate and cultural authority over Murujuga. **Woodside response**: Woodside continues to consult and engage with MAC as the appropriate body corporate and cultural authority over Murujuga.	**(1)** Not required.
(2) MAC raised that there was a lack of broader-scale bathymetric information for the trunkline area and the impact on jinna (Songlines). On 22 August MAC provided this additional detail: Potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.	**(2)** **Woodside assessment**: Woodside acknowledges MAC's position that there is a lack of bathymetric information. Woodside notes that the EP is for continued operation of existing infrastructure. The EP includes the Unexpected Finds Procedure (Section 7.6) which addresses the risk of discovery of potential underwater cultural material. **Woodside response**: Woodside has previously proposed to MAC that MAC work to determine a scope of works to determine further bathymetric information on the area. This proposal is under consideration by MAC and Woodside remains supportive of undertaking this work. Woodside also remains supportive of conducting further ethnographic surveys with MAC, following the initial phase of works in 2020 which focused on Jinna and their connection from Murujuga to inland areas.	**(2)** Cultural features and heritage values including jinna (Songlines) are identified and assessed in Sections 4.9 and 6.10 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	
(3) On 23 April 2024, MAC advised it has no specific knowledge of tangible or intangible heritage that might be impacted.	**(3)** **Woodside assessment**: Woodside uses multiple sources of information including publicly available literature, heritage databases and feedback from consultation in order to identify tangible and intangible cultural features of the environment, as described in Sections 4.9 and 6.10. **Woodside response**: Woodside recognises the difficulty MAC faces in identifying tangible and intangible heritage on the submerged continental shelf in the absence of bathymetric mapping and ethnographic assessment of the results. In June 2023 Woodside proposed a project to MAC that would undertake mapping of areas identified by MAC as a priority in understanding this landscape. MAC has not accepted this proposal and through several meetings with MAC between July 2023 and February 2024 Woodside understands that MAC intends to issue a modified proposal to conduct this work.	**(3)** Cultural features and heritage values are identified and assessed in Sections 4.9 and 6.10 of the EP.
(4) On 23 April 2024, MAC noted the size of the EMBA and management procedures in place to protect cultural values.	**(4)** **Woodside assessment**: Woodside aligns with industry guidance in developing the EMBA. Many replicate model simulations are completed to understand the potential behaviour of the worst-case release under various wind, wave and current conditions and these are combined to create an overall EMBA. Woodside welcomes any advice MAC provides on identifying cultural features or heritage values within the EMBA. **Woodside response**: The EMBA for this activity is determined by a highly unlikely release of marine diesel as the result of damage to the production facility or vessel collision. Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Sections 6.9 of the EP, and Appendix D.	**(4)** Woodside has addressed oil spill preparedness and response strategy in Appendix D.
(5) MAC expects to be consulted about any activity located near Murujuga and in the event of an unplanned incident.	**(5)** **Woodside assessment**: Woodside consults MAC on activities located near Murujuga and accepts MAC's advice on the need for engagement in the event of an incident.	**(5)** Woodside has addressed oil spill preparedness and response strategy in Appendix D.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Consultation with relevant Traditional Custodian representatives, including MAC, in the event of an incident is already anticipated under our oil spill response plan.	
(6) On 23 April 2024, MAC advised that Woodside should consult with Ngarluma Aboriginal Corporation.	**(6)** **Woodside assessment**: Woodside accepts MAC's advice on the need to consult with NAC. **Woodside response**: Woodside has consulted with NAC as a relevant person for this EP.	**(6)** Woodside has consulted with NAC as outlined in Appendix F.
(7) MAC stated that any development could potentially affect the natural movement, migration and/or other behaviour of marine species, and may have an impact on the cultural interpretation of the seasonal landscape, seascape and associated cultural behaviours.	**(7)** **Woodside assessment:** Woodside considers the potential cultural impacts on marine species including impacts and associated controls for marine mammal paths and behaviour. **Woodside response:** Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research some of which are set out on Woodside's website. Woodside also committed to ongoing consultation with MAC in relation to environmental impacts including to marine life.	**(7)** Items relating to MAC appear in section 4.9. Woodside has assessed impacts and risks to marine species in Section 6.6, 6.7 and 6.8: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(8) During ongoing engagement, MAC stated that the protection of environmental values should be assessed separately from the protection of cultural values in EPs.	**(8)** **Woodside assessment:** Woodside undertakes assessments for both environmental and cultural values. These are considered individually and collaboratively. **Woodside response:** Woodside has responded to MAC and informed it that environmental and cultural impacts have been assessed both individually and collaboratively.	**(8)** Woodside's First Nations Cultural Features and Heritage Values Assessment is in section 6.10.
(9) MAC has provided Woodside with updated information about marine species that have cultural value: • Whales, totemic importance. • Dolphins, cultural ceremonies. • Dugongs, food source. • Fish, cultural ceremonies. • Sea Snakes, culturally important. • Turtles, Songlines.	**(9)** **Woodside assessment:** These values have been collected through Woodside's data collection processes (consultation) and updated following new information provided by MAC on 22 August 2025. **Woodside response:** Woodside has amended the EP and its records to reflect this new information.	**(9)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.6 and 6.7, 6.8 and 6.10 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• Coral, attract fish and other species. • Seagrass, provide protection for animals. • Stingrays. • Sharks. • Crustaceans. • Octopus. • Sea stars. • Sea urchins. • Sponges. • Molluscs		
(10) Cultural Value: Fish traps in Conzinc Bay, and Angel and Gidley Islands. During ongoing consultation MAC queried why this had been noted by Woodside as a cultural value.	**(10)** **Woodside assessment:** This value has been identified through Woodside's data collection processes (publicly available literature). **Woodside response:** Woodside has explained its data collection processes to MAC.	**(10)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.6, 6.7, 6.8 and 6.10 of the EP.
(11) Cultural Value: Harvesting squid around Conzinc Bay. During ongoing consultation MAC queried why this had been noted by Woodside as a cultural value.	**(11)** **Woodside assessment:** This value has been identified through Woodside's data collection processes (publicly available literature). **Woodside response:** Woodside has explained its data collection processes to MAC.	**(11)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.6, 6.7, 6.8 and 6.10 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with MAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on MAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that MAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with MAC in June 2024. Woodside has addressed and responded to MAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked MAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. MAC indicated NAC should be consulted. Woodside has consulted with NAC.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MAC's functions, interests, or activities.

4.9.10 Ngarluma Aboriginal Corporation

Ngarluma Aboriginal Corporation (NAC) is established under the *Native Title Act 1993* by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed NAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 19 June 2024, Woodside emailed NAC advising of the proposed activity (Record of Consultation, reference 6.2.30), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information.* The email requested information on the interests that NAC and its members may have within the EMBA, information on how NAC would like to engage, and requested that NAC provide information to other individuals as required. The email included a date to provide feedback.
- On 15 July 2024, Woodside emailed NAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 23.1).

Ongoing engagement:

- On 5 September 2024, Woodside emailed NAC to invite it to Woodside's Quarterly Heritage Meetings, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community. Woodside also requested a list attendees and attendance fees (SI Report, reference 23.2).
- On 9 September 2024, Woodside invited NAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 59.1).
- On 22 September 2024, Woodside emailed NAC about an administrative matter relating to the Quarterly Heritage Meetings (SI Report, reference 23.3).
- On 25 September 2024, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference **5**9.2).
- On 3 October 2024, Woodside invited NAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 59.3).
- On 10 October 2024, NAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne where Woodside presented to Traditional Owners (SI Report, reference 60.1). Matters relevant to this EP included:
  - Consultation outcomes for Woodside EPs.
  - An explanation of State and Commonwealth regulatory requirements.
  - An explanation of EMBAs.
  - The process Woodside undertakes to identify Traditional Owners groups.
  - How Traditional Owners can provide information to Woodside about cultural values, interests and activities.
  - If there are any other First Nations groups who should be consulted.
- On 14 October 2024, Woodside was notified that the cultural protocols associated with Sorry Business were in place, and that industry and government stakeholders had been asked to minimise contact with Traditional Owner groups including NAC as a sign of respect (SI Report, reference 23.4).
- On 23 October 2024, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.4).
- On 15 November 2024, Woodside emailed NAC an invitation to a Quarterly Heritage meeting in December (SI Report, reference 60.2).
- On 5 December 2024, NAC attended Woodside's Quarter 4 Heritage Meeting in Karratha (SI Report, reference 59.3). Relevant matters discussed included:
  - An overview of upcoming EPs
  - An explanation of ongoing consultation.
  - Reminder about monthly community luncheons.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 December 2024, Woodside became aware through social media about the passing of two significant Elders. This news was relevant to NAC (SI Report, reference 23.5).
- On 22 January 2025, Woodside emailed NAC information about Quarterly Heritage meetings scheduled for 2025 (SI Report, reference 23.6).
- On 4 March 2025, Woodside emailed NAC a reminder about the Quarterly Heritage meeting scheduled for 13 March 2025 (SI Report, reference 23.7).
- On 4 March 2025, Woodside invited NAC to share stories and receive updates from Woodside at its monthly community luncheon for Traditional Owners to be held in Roebourne on 5 March 2025(SI Report, reference 59.5).
- On 5 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.6).
- On 13 March 2025, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 60.4). Matters discussed and/or raised relating to this EP included:
  - That consultation is open for the life of any EP and Woodside can schedule consultation meetings at timers that are convenient to the community.
  - A reminder that Woodside hosts a community luncheon and yarning circle for all local Traditional Owners.
- On 24 March 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 59.7).
- On 26 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 59.8).
- On 7 April 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 59.9).
- On 8 April 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.10).
- On 15 May 2025, Woodside emailed NAC an invitation to Woodside's Quarterly Heritage Meeting on 4 June 2025, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community (SI Report, reference 23.8).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 60.5). Matters discussed relevant to this EP included:
  - Woodside provided an overview the consultation process with relevant First Nations persons.
- On 5 June 2025, Woodside emailed NAC confirming the attendance of two NAC representatives at the Quarterly Heritage Meeting held the previous day (SI Report, reference 23.9).
- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 60.6). Matters discussed relevant to this EP included:
  - Woodside reminded attendees that it accepts feedback for the life of an EP.
  - Woodside is available to schedule meetings for EP consultation.
  - Cultural heritage updates.
- On 3 December 2025, Wong GooTtOo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 60.7). Matters discussed relevant to this EP included:
  - Woodside showed a video explaining EP consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

– Woodside said it may develop more videos to aid consultation.		
Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with NAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that NAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NAC in June 2024. Woodside has addressed and responded to NAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked NAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NAC's functions, interests, or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.11 Nganhurra Thanardi Garrbu Aboriginal Corporation

Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC) is established under the *Native Title Act 1993* by the Baiyungu people to represent the Baiyungu people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed NTGAC via YMAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed NTGAC advising of the proposed activity (Record of Consultation, reference 2.29), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that NTGAC and its members may have within the EMBA, information on how NTGAC would like to engage, and requested that NTGAC provide information to other individuals as required. The email included a date to provide feedback.
- Between 27 June and 1 July 2024, Woodside and NTGAC (via YMAC) exchanged emails about a draft consultation agreement provided by Woodside in February 2024. **(1)** NTGAC (via YMAC) expressed an interest in finalising the agreement. **(1)** Woodside approved cost estimates provided by NTGAC (via YMAC) to review the document and agreed to meet to discuss the agreement further (SI Report, references 24.1, 24.2, 24.3).
- On 5 July 2024, Woodside emailed NTGAC (via YMAC) a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 24.4).
- On 5 July 2024, on receipt of an out of office reply to its previous email about this EP, Woodside emailed a NTGAC representative a reminder about the proposed activity (SI Report, reference 24.5).

Ongoing engagement:

- On 10 July 2024, NTGAC (via YMAC) emailed Woodside about the draft consultation agreement (SI Report, reference 24.6).
- Between 30 July and 20 August 2024, NTGAC (via YMAC) and Woodside exchanged emails to arrange a half day meeting on 12 September 2024 in Carnarvon (SI Report, references 24.7, 24.8).
- On 6 September 2024, Woodside spoke to NTGAC on the phone (SI Report, reference 24.9). Matters discussed relevant to this EP include:
  - The agenda for the 12 September 2024 meeting including EPs intended to be presented.
  - NTGAC thanked Woodside for efforts in making a personal connection.
- Between 10 September and 11 September 2024, Woodside and NTGAC via YMAC exchanged emails about meeting on 12 September 2024 (SI Report, references 24.10, 24.11, 24.12, 24.13, 24.14, 24.15).
- On 12 September 2024, Woodside and NTGAC/YMAC met (SI Report, reference 24.16). Matters discussed that were relevant to this EP include:
  - Woodside confirmed attendees were familiar with EPs and NOPSEMA. Attendees acknowledged they were.
  - Woodside displayed a map of its activities in WA.
  - Woodside explained the EP consultation process.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 3 October 2024, Woodside emailed NTGAC an invitation to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners (SI Report, reference 59.3).
- On 5 December 2024, Woodside emailed NTGAC/YMAC an update on this activity (SI Report, reference 24.17). Woodside:
  - Informed NTGAC/YMAC that Woodside would resubmit this EP for further assessment by NOPSEMA.
  - Notified NTGAC/YMAC that consultation for this EP would close on 19 December 2024 and that feedback provided by that date would be reflected in the EP and considered by NOPSEMA.
  - Acknowledged discussions relating to framework agreements had been ongoing since August 2023 but consultation had occurred in parallel for this EP.
  - Provided an attachment (Attachment A) outlining:
  - **(2)** NTGAC had requested information about whale sightings and response
  - **(2)** Woodside provided an EP reference to potential impacts to marine fauna.
  - **(3)** NTGAC had requested information about ballast water discharges.
  - **(3)** Woodside provided an EP reference to potential impacts from ballast water transfer.
  - Woodside stated:
  - That NTGAC/YMAC was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
  - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.
- On 10 March 2025, Woodside emailed NTGAC/YMAC to correct EP references provided in its email on 5 December 2024 (SI Report 24.18). Woodside:
  - Directed NTGAC/YMAC to the published EP on NOPSEMA's website and provided correct references to:
  - **(2)** Whale sighting reporting and controls.
  - **(3)** Woodside's assessment of potential impacts from ballast water transfer.
  - Explained that there could be slight changes to the numbering of these references when Woodside submits an updated version of the EP to NOPSEMA.
  - Explained that while consultation had closed for the purposes of preparing the plan, feedback could continue to be provided during the life
  - Invited NTGAC/YMAC to contact Woodside for more information.
- On 19 August 2025, NTGAC via YMAC emailed Woodside new contact information for NTGAC, Woodside responded to acknowledge this and confirm it had amended its records (SI Report, reference 24.19 and 24.20).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) In February 2024, NTGAC via YMAC has expressed an interest in finalising a draft consultation agreement provided by Woodside.	**(1)** **Woodside assessment**: Woodside is supportive of a sustainable consultation framework and has a commitment to ongoing consultation with Traditional Custodians for the life of an EP.	**(1)** Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs (Appendix H). This includes continued engagement regarding NTGAC and Woodside's proposed

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Separate from consultation for this activity under regulation 25 of the Environment Regulations, Woodside has sent a draft agreement to NTGAC via YMAC in February 2024. This would be used to frame ongoing consultation to occur as part of Woodside's commitment to consultation post regulation 25 of the Environment Regulations. The draft agreement is under review by NTGAC/YMAC.	draft Consultation Agreement and potential opportunities for alignment with NTGAC's Strategic Plan. Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in regulation 35(7) of the Environment Regulations.
(2) During consultation about previous EPs, NTGAC requested information about whale sightings and response.	**(2)** **Woodside assessment:** Woodside has incorporated NTGAC's feedback into this EP. **Woodside response:** Woodside has informed NTGAC about how this feedback has been incorporated into the EP. On 10 March 2025, Woodside directed NTGAC to the published EP on NOPSEMA's website and provided correct references to whale sighting reporting and controls.	**(2)** Woodside has described whale sighting reporting in Section 7.11.3.2 in the published EP on the NOPSEMA website and 7.11.3.2 in this submission to NOPSEMA. Controls in response to whale sightings are listed in Section 6.8.3 in the published EP on the NOPSEMA website and 6.8.3 in this submission to NOPSEMA.
(3) During consultation about previous EPs, NTGAC requested information about ballast water discharges.	**(3)** **Woodside assessment:** Woodside has incorporated NTGAC's feedback into this EP. **Woodside response:** Woodside has informed NTGAC about how this feedback has been incorporated into the EP. On 10 March 2025, Woodside directed NTGAC to the published EP on NOPSEMA's website and provided correct references to potential impacts from ballast water transfer.	**(3)** Woodside has addressed potential impacts from ballast water transfer in Section 6.8.4 of the published EP on the NOPSEMA website and 6.8.4 in this submission to NOPSEMA.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report - Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with NTGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information:** • Woodside sought direction on NTGAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. • Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that NTGAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NTGAC in June 2024. Woodside has addressed and responded to NTGAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked NTGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NTGAC's functions, interests, or activities.

4.9.12 Nimanburr Aboriginal Corporation

Nimanburr Aboriginal Corporation (Niminburr) is established under the *Native Title Act 1993* by the Nimanburr people to represent the Nimanburr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed Kimberley Land Council (KLC) on behalf of Niminburr, NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- Between 3 and 9 July 2024, Woodside contacted Nimanburr by phone requesting to visit the community on Country or to meet with a representative in Broome to advise of the proposed activity including providing a Summary Information Sheet and to request information on the interests that Nimanburr and its members may have within the EMBA, information on how Nimanburr would like to engage, and requested that Nimanburr provide information to other individuals as required (SI Report, reference 25.1).
- On 10 July 2024, Woodside met with Nimanburr and explained the proposed activity (SI Report, reference 25.2). **(1)** Nimanburr indicated that it understood the proposed activity and EP and did not object however would consult other members. **(1)** Woodside acknowledged Nimanburr's response.
- **(1)** On 14 August 2024, Woodside telephone Nimanburr and left a message regarding the activity. Nimanburr returned the call and stated it had no issues with the EP (SI Report, reference 25.3).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) Nimanburr advised it had no issues or concerns for this EP.	**(1)** **Woodside assessment**: Woodside accepts that Nimanburr had no issues or concerns for this EP. **Woodside response**: Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	**(1)** Existing controls considered sufficient as described in Section 6.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with Nimanburr for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Nimanburr's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside advised that Nimanburr can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Nimanburr in July 2024. Woodside has addressed and responded to Nimanburr over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked Nimanburr if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nimanburr's functions, interests, or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.9.13 Nyangumarta Karajarri Aboriginal Corporation (NKAC)

Nyangumarta Karajarri Aboriginal Corporation (NKAC) is established under the *Native Title Act 1993* by the Nyangumarta and Karajarri people to represent the Nyangumarta and Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement

- On 26 July 2023, Woodside emailed NKAC (via KLC) Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed NKAC advising of the proposed activity (Record of Consultation, reference 6.2.31), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that NKAC and its members may have within the EMBA, information on how NKAC would like to engage, and requested that NKAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed NKAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference, 26.1).

Ongoing relationship:

- On 3 October 2024, Woodside emailed NKAC about an administrative matter relating to vendor payments (SI Report, reference 26.2).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with NKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that NKAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in a national, state and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NKAC in June 2024. Woodside has addressed and responded to NKAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked BJNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NKAC's functions, interests, or activities.

4.9.14 Nyangumarta Warrarn Aboriginal Corporation

Nyangumarta Warrarn Aboriginal Corporation (NWAC) is established under the *Native Title Act 1993* by the Nyangumarta people to represent the Nyangumarta people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement

- On 26 July 2023, Woodside emailed NWAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed NWAC advising of the proposed activity (Record of Consultation, reference 6.2.32), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that NWAC and its members may have within the EMBA, information on how NWAC would like to engage, and requested that NWAC provide information to other individuals as required. The email included a date to provide feedback.
- On 27 June 2024, Woodside emailed NWAC (via YMAC) seeking an update on YMAC's review of a consultation framework agreement provided by Woodside in February 2024 (SI Report, reference 27.1).
- On 5 July 2024, Woodside emailed NWAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 27.2).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 10 July 2024, NWAC (via YMAC) emailed Woodside confirming receipt of the draft consultation agreement (SI Report, reference 27.3).

Ongoing relationship:

- From 15 to 23 October 2024, Woodside and NWAC exchanged emails about meeting on 24 October 2024 (SI Report, references 27.4 – 27.12).
- On 24 October 2024, Woodside and NWAC met (SI Report, reference 27.13). Matters discussed relevant to this EP included:
  - Woodside's activities in WA.
  - Woodside's consultation process.
  - Woodside sought advice about how NWAC wanted to be consulted in future.
  - **(1)** NWAC Traditional Owners explained that their priority is to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians.
  - (1) Woodside explained the impacts and controls to mitigate risk for the activity and assured NWAC that Eighty Mile Beach will be acknowledged as a cultural value.
  - **(2)** NWAC discussed the impacts of migrating birds, whales, turtles and vegetation.
  - (2) Woodside assured NWAC that it considers impacts to cultural values.
- Between 24 October and 2 December 2024, Woodside and NWAC exchanged emails about an administrative matter relating to costs associated with the 24 October 2024 meeting (SI Report, references 27.14 – 27.17).
- **(3)** On 7 May 2025, NWAC (via YMAC) emailed Woodside a response to Woodside's email about an unrelated EP (SI Report, reference 27.18). NWAC stated that it wanted to develop a consultation protocol.
- (3) Between 9 May 2025 and 22 June 2025, Woodside and NWAC (via YMAC) exchanged emails about an unrelated EP (SI Report, reference 27.19 – 27.21). Among other issues discussed, Woodside stated that a consultation protocol is not a prerequisite for consultation and is not required for Woodside to provide reasonable support to NWAC to enable it to participate in consultation. Woodside advised it was not inclined to enter into new negotiations for consultation protocols at this time.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) NWAC Traditional Owners explained that their priority is to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians.	**(1)** **Woodside assessment:** Woodside acknowledges NWAC's connection, and priority to protect, Eighty Mile Beach, and the cultural value to the Nyangumarta Custodians. **Woodside response:** Woodside will acknowledge this as a cultural value in the EP.	**(1)** Eighty Mile Beach is identified as a cultural feature and heritage value in Section 4.9.
(2) NWAC discussed the impacts to migrating birds, whales, turtles and vegetation.	**(2)** **Woodside assessment:** Woodside has developed response plans to mitigate or avoid impacts on birds and marine mammals in the highly unlikely event of a hydrocarbon response. **Woodside response:** Woodside advised the impact on animals depended on the timing, duration and extent of a spill. Response options included tracking, protective barriers, shoreline clean-up techniques, prevention of contact with wildlife	**(2)** The potential environmental impacts of planned and unplanned activities are assessed in Section 6.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	and rehabilitation of wildlife where contact occurs, and long-term monitoring of species and sites after a spill.	
(3) NWAC has stated it wants to develop a consultation protocol.	**(3)** **Woodside assessment:** Discussions about communications protocols occur parallel to EP consultation. Woodside has met all regulatory requirements relating to consultation with NWAC. **Woodside response:** Woodside has stated to NWAC that a communications protocol is not a perquisite for consultation and is not required for Woodside to provide reasonable support to NWAC to enable it to participate in consultation.	**(3)** Woodside will continue to consult following acceptance of the EP. No additional measures or controls are required.
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with NWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NWAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that NWAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NWAC in June 2024. Woodside has addressed and responded to NWAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked NWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NWAC's functions, interests, or activities.

4.9.15 Nyul Nyul PBC Aboriginal Corporation

Nyul Nyul Aboriginal Corporation (NNAC) is established under the *Native Title Act 1993* by the Nyul Nyul people to represent the Nyul Nyul people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed NNAC advising of the proposed activity (Record of Consultation, reference 6.2.33), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Nyul Nyul and its members may have within the EMBA, information on how Nyul Nyul would like to engage, and requested that Nyul Nyul provide information to other individuals as required. The email included a date to provide feedback.
- On 18 June 2024, NNAC emailed Woodside acknowledging receipt of email, which will be forwarded to the Board at its next meeting (SI Report, reference 28.1).
- On 18 June 2024, Woodside emailed NNAC to offer the opportunity to meet with the Board to discuss the activity and EP (SI Report, reference 28.2).
- On 5 July 2024, Woodside emailed NNAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 28.3). No response has been received.

Ongoing engagement:

- On 5 December 2024, Woodside emailed NNAC an update on this activity (SI Report, reference 28.4). Woodside:
  - Informed NNAC that Woodside would resubmit this EP for further assessment by NOPSEMA.
  - Notified NNAC that consultation for this EP would close on 19 December 2024 and that feedback provided by that date would be reflected in the EP and considered by NOPSEMA.
  - Woodside stated:
    - That NNAC was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
    - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been	No additional measures or controls required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with NNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NNAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that NNAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NNAC in June 2024. Woodside has addressed and responded to NNAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked NNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NNAC's functions, interests, or activities.

4.9.16 Robe River Kuruma Aboriginal Corporation (RRKAC)

Robe River Kuruma Aboriginal Corporation (RRKAC) is established under the *Native Title Act 1993* by the Robe River Kuruma people to represent the Robe River Kuruma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed RRKAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 17 June 2024, Woodside emailed RRKAC advising of the proposed activity (Record of Consultation, reference 6.2.34), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that RRKAC and its members may have within the EMBA, information on how RRKAC would like to engage, and requested that RRKAC provide information to other individuals as required. The email included a date to provide feedback.
- On 3 July 2024, Woodside sent RRKAC a follow-up email and offered to meet with RRKAC's members or relevant Traditional Owners to discuss the activity further (SI Report, reference 29.1).
- On 4 July 2024, RRKAC emailed Woodside (SI Report, reference 29.2) a response to its request for feedback on this EP. RRKAC stated:
  - **(1)** RRKAC is facing issues of resourcing and could not engage and consult in detail.
  - **(2)** At a previous meeting, RRKAC raised the possibility of a bathymetric survey of the coastal shelf as a large-scale project with all affected groups, that unites all groups with an interest asking if Woodside would be prepared to include this in the consultation process.
- **(1, 2)** On 5 July 2024, Woodside emailed RRKAC acknowledging the challenges of resourcing and recruiting, and advised it would forward the query about a joint/inclusive bathymetric survey with the relevant persons in Woodside. In addition, Woodside requested RRKAC advise how best to consult with its members including meeting face-to-face with members and relevant Traditional Owners (SI Report, reference 29.3).
- **(2)** On 29 July 2024, Woodside emailed RRKAC regarding bathymetric surveys and suggested that RRKAC and Woodside meet to discuss opportunities to use publicly available data to assist in generating information that might be useful to RRKAC (SI Report, reference 29.4)

Ongoing engagement:

- On 5 December 2024, Woodside emailed RRKAC an update on this activity (SI Report, reference 29.5). Woodside:
  - Informed RRKAC that Woodside would resubmit this EP for further assessment by NOPSEMA.
  - Notified RRKAC that consultation for this EP would close on 19 December 2024 and that feedback provided by that date would be reflected in the EP and considered by NOPSEMA.
  - Woodside stated:
    - That RRKAC was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
    - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.
- On 11 December 2024, RRKAC emailed Woodside a response to its letter of 5 December 2024 (SI Report, reference 29.6). In the email RRKAC stated:
  - **(1)** Due to capacity limitations, it was not in a position to consult on this EP, RRKAC may be in a position to engage in consultation the future.
  - **(3)** RRKAC does not consider emails or meetings to constitute formal consultation.
  - **(4)** RRKAC requests that any reference to consultation with RRKAC be removed from Woodside's register.
- On 18 December 2024, Woodside emailed RRKAC a response to its email of 11 December 2024 (SI Report, reference 29.7). In the email:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(3, 4)** Woodside confirmed it had consulted with RRKAC in relation to the preparation of this EP in accordance with Commonwealth regulations.
  - **(3, 4)** Woodside summarised its correspondence to RRKAC about this EP.
  - **(4)** Woodside confirmed it is a requirement that it provide full copies of all consultation correspondence to NOPSEMA.
  - **(1)** Woodside acknowledged RRKAC's capacity limitations and offered to discuss how Woodside might be able to further support RRKAC with the consultation process.
  - Woodside offered to meet RRKAC to discuss the EP.
  - Woodside explained that feedback could be provided for the life of the EP, including after consultation for the EP had closed, during EP assessment and after an EP had been accepted by NOPSEMA.
- On 19 December 2024, RRKAC emailed Woodside (SI Report, reference 29.8). RRKAC stated:
  - **(3)** RRKAC does not consider emails or meetings to constitute formal consultation.
  - **(5)** Under the regulations, a relevant person must be provided with sufficient information and a reasonable period for consultation. RRKAC considers the 'relevant person' in this matter to be the RRKAC Heritage Advisory Committee (HAC). RRKAC invited Woodside to the next HAC meeting on 18 February 2025.
  - **(4)** RRKAC requested Woodside remove any reference to 'consultation' with RRKAC in the EP.
  - **(2)** RRKAC is keen to discuss a seascape scale approach to heritage values.
  - **(1)** RRKAC has capacity limitations but will be in a position to engage in consultation in 2025.
- On 14 January 2025, Woodside replied to RRKAC's email of 19 December 2024 (SI Report, reference 29.9). The email stated:
  - **(3)** Woodside disagrees that formal consultation has not occurred in relation to the EP and has complied with regulations by providing RRKAC with sufficient information, a reasonable opportunity and reasonable time to provide feedback.
  - **(5)** In accordance with Woodside's methodology, Woodside contacted RRKAC as a relevant person and requested it forward information to its members and other relevant people and organisations. Woodside reiterated its availability to meet RRKAC and other interested members.
  - **(3)** Woodside communicated clear dates for RRKAC to submit feedback for consideration ahead of submitting the EP.
  - **(5)** Woodside accepts RRKAC's invitation to the HAC meeting on 18 February 2025 and notes consultation has closed for the purposes of preparation of this EP and its attendance would form part of ongoing consultation.
  - **(3)** Woodside welcomes an opportunity to meet with RRKAC to discuss reasonable ways to customise its consultation process.
  - **(5)** Woodside requests a quote for its attendance at the HAC meeting.
  - **(4)** Woodside has assessed RRKAC as a relevant person for this EP and it is a regulatory obligation to provide full copies of all consultation correspondence to NOPSEMA.
  - **(2)** Woodside does not have plans to conduct bathymetric surveys but is open to meeting with RRKAC to discuss publicly available datasets and Woodside's own mapping of deeper water areas.
  - **(1)** Woodside again acknowledges RRKAC's capacity limitations and as previously discussed provides reasonable funding for consultation activities relating to EPs.
- **(5)** On 15 January 2025, RRKAC emailed Woodside about the HAC meeting on 18 February 2024 (SI Report, reference 29.10).
- **(5)** On 22 January 2025, Woodside phoned RRKAC to discuss the upcoming HAC meeting, RRKAC did not answer the call (SI Report, reference 29.11).
- **(5)** On 29 January 2025, following a call between Woodside and RRKAC, Woodside emailed RRKAC confirming the telephone discussion where it was agreed that Woodside would not attend the 18 February HAC meeting and would instead attend the HAC meeting in May 2025 (this meeting has not been rescheduled). Woodside confirmed that it consulted for the life of EPs and welcomed further feedback in relation to this EP (SI Report, reference 29.12).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 4 March 2025, Woodside invited RRKAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 59.5).
- On 5 March 2025, Traditional Owner members from RRKAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.6).
- On 24 March 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 59.7).
- On 7 April 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 59.9).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) RRKAC noted that it is insufficiently resourced to fully engage and respond regarding EPs.	**(1)** **Woodside assessment**: Woodside supports ongoing engagement for the life of an EP. **Woodside response**: Woodside supports reasonable requests for resourcing and has provided support for meetings for the purpose of consultation.	**(1)** Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix H).
(2) RRKAC raised the potential of a bathymetric survey of the coastline, working with all relevant coastal groups.	**(2)** **Woodside assessment**: Woodside does not have plans to conduct regional bathymetric surveys but there are publicly available datasets covering coastal regions. **Woodside response**: Woodside is seeking a meeting with RRKAC to find ways to interpret existing data sets to generate information which may be useful to RRKAC.	**(2)** Not required.
(3) RRKAC does not consider emails or meetings to constitute formal consultation.	**(3)** **Woodside Assessment:** Woodside rejects RRKAC's assertion that emails or meetings do not constitute formal consultation. Woodside has consulted with RRKAC in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth) (Regulations). Woodside has provided RRKAC sufficient information, a reasonable period and reasonable opportunity to provide feedback about this EP. Woodside Response: Woodside has informed RRKAC that it has consulted with RRKAC in accordance with the Regulations. Woodside has provided RRKAC a summary of the consultation that has occurred for this EP and offered to discuss the EP further.	**(3)** Not required

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(4) RRKAC has requested that Woodside remove any reference to consultation in its register.	**(4)** **Woodside Assessment:** Woodside rejects RRKAC'S assertion that consultation has not occurred on this EP. **Woodside Response:** Woodside has provided a summary to RRKAC of consultation that has occurred and has informed RRKAC that Woodside is required to provide a record of this correspondence to NOPSEMA.	**(6)** Not required
(5) Under the regulations, a relevant person must be provided with sufficient information and a reasonable period for consultation. RRKAC considers the 'relevant person' in this matter to be the RRKAC Heritage Advisory Committee (HAC). RRKAC invited Woodside to the next HAC meeting on 18 February 2025. This meeting was rescheduled to May 2025 but did not go ahead.	**(5)** **Woodside Assessment:** In accordance with Woodside's consultation methodology, Woodside assessed RRKAC in its capacity as a nominated representative corporation as a 'relevant person' for this EP. Woodside initially contacted RRKAC about this EP on 5 March 2024 and requested RRKAC to forward information to its members and other relevant people and organisations. Woodside provided sufficient information, a reasonable period and reasonable opportunity for consultation on this EP. **Woodside Response:** Woodside accepted RRKAC's invitation to the HAC meeting however this meeting has not gone ahead. Woodside has reminded RRKAC that consultation for the purposes of preparing this EP has closed and attendance at the HAC meeting will form part of ongoing consultation.	**(5)** Not required
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with RRKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information:** • Woodside sought direction on RRKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. • On 17 June 2024, Woodside commenced consulting with RRKAC on this EP. Woodside's email to RRKAC included: – A Summary Information sheet developed specifically for First Nations groups and reviewed by a First Nations staff member. This sheet included: ▪ An overview of the activity		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

    - Maps showing the location and EMBA
    - Diagrams
    - Details about how to provide feedback.
  - The purpose of consultation, and what was being sought by Woodside through consultation including understanding the nature of RRKAC's interests and how the activity could impact those interests.
  - That Woodside had undertaken assessments to identify potential impacts and risks to the marine environment and developed mitigation and management measures.
  - Woodside invited RRKAC to speak to Woodside. Woodside provided contact details including a general email address and telephone number for Woodside as well as the direct email address and telephone number of the assigned Woodside focal person. Woodside also provided AC NOPSEMA's contact information.
  - Woodside asked RRKAC to forward the information to its members and offered to speak to RRKAC members as well as the RRKAC Board.
  - Woodside offered to provide more specific information, maps and images to RRKAC if required.
- Woodside advised RRKAC that reasonable financial support was available for meetings for the purpose of consultation.
- that RRKAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with RRKAC in June 2024. Woodside has addressed and responded to RRKAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked RRKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on RRKAC's functions, interests, or activities.

4.9.17 Wanjina-Wunggurr (Native Title) Aboriginal Corporation (WWAC)

Wanjina- Wunggur (Native Title) Aboriginal Corporation (WWAC) is established under the *Native Title Act 1993* by the Wanjina and Wunggur people to represent the Wanjina and Wunggur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed WWAC advising of the proposed activity (Record of Consultation, reference 6.2.35), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that WWAC and its members may have within the EMBA, information on how WWAC would like to engage, and requested that WWAC provide information to other individuals as required. The email included a date to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 5 July 2024, Woodside emailed WWAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 30.1).

Ongoing engagement:

- On 29 August 2024, Woodside emailed WWAC about an administrative matter relating to vendor payments (SI Report, reference 30.2).

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with WWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on WWAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that WWAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with WWAC in June 2024. Woodside has addressed and responded to WWAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked WWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WWAC's functions, interests, or activities.

4.9.18 Wanparta Aboriginal Corporation

Wanparta Aboriginal Corporation (Wanparta) is established under the *Native Title Act 1993* by the Ngarla people to represent the Ngarla people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed Wanparta its planned *Program of Ongoing Engagement with Traditional Custodians*.
- On 7 May 2024, Wanparta emailed Woodside and advised:
  - **(1)** The Ngarla people have a deep spiritual connection to Sea Country. Woodside recognises Wanparta's interests and potential cultural values and these have been recorded in the EP.
  - **(2)** The Ngarla peoples' totem species – the octopus, stingray, spiny bream fish and kestrel – are of great significance. **(1, 2)** Woodside recognises Wanparta's interests and potential cultural values.
  - **(1)** The protection and management of marine life and healthy ocean plays a significant role in their lore, culture and customs.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Wanparta advising of the proposed activity (Record of Consultation, reference 6.2.36), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the *NOPSEMA Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Wanparta and its members may have within the EMBA, information on how Wanparta would like to engage, and requested that Wanparta provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed Wanparta a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 31.1).

Ongoing engagement:

- Between 9 and 23 August 2024, Woodside and Wanparta exchanged emails about a Board meeting on 28 August 2024 (SI Report, references 31.2 – 31.5).
- On 28 August 2024, Woodside met with Wanparta to discuss a number of activities including the proposed activity and EP (SI Report, reference 31.6). At the meeting:
  - **(3**) Wanparta enquired about a ranger program proposal. **(3)** Woodside said the proposal was under assessment.
  - **(4)** Wanparta acknowledged the activity and EP, raising no claims or objections, and committing to providing written feedback in due course.
  - **(4)** Woodside acknowledged Wanparta's feedback at the meeting, noting it had no claims or objections.
- **(4)** On 29 August 2024, Wanparta emailed Woodside a letter confirming it had no comments on or issues with this EP (SI Report, reference 31.7). **(4)** Woodside confirms and accepts that Wanparta has no concerns regarding the activity.
- On 9 May 2025, Woodside met with Wanparta to discuss an unrelated EP (SI Report, reference 31.8). Matters relevant to this EP included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(5)** Wanparta enquired about whale and turtle breeding and migration pathways. **(5)** Woodside explained that it takes factors such as these into consideration and puts mitigation measures in place in the EP to address this.
- **(6)** Wanparta asked if Woodside records whale observations. **(6)** Woodside noted it uses available research and that staff have a duty to report wildlife sightings.
- **(7)** Wanparta provided feedback that more visual learning material would aid consultation. **(7)** Woodside acknowledged the importance of visual aids and noted that animation videos are currently being developed to support Traditional Owners with the EP consultation process.
- **(3)** Wanparta enquired about support for Ranger Programs. **(3)** Woodside provided a Ranger Program update.
- **(1)** Wanparta noted that a healthy Sea Country = a healthy marine life = Ngarla food source = healthy Ngarla People. **(1)** Woodside acknowledged this feedback.
- **(8)** Wanparta noted concerns around maintaining sustainable fish stock post operations during decommissioning. **(8)** Woodside noted that the EPs being discussed at the meeting were not related to decommissioning and that Woodside assesses the environmental impacts of removing infrastructure.
- **(9)** Wanparta questioned if Woodside monitors islands, in particular nesting shore birds. **(9)** Woodside took the question on notice.
- **(1)** Wanparta noted that there is ethnohistorical evidence of Ngarla occupation on islands. **(11)** Woodside acknowledged this cultural value.

- On 16 May 2025, Wanparta emailed Woodside a letter that summarised outcomes of a meeting between Wanparta and Woodside on 9 May 2025 (SI Report reference 31.9).
- On 10 June 2025, Woodside emailed Wanparta responding to its email of 16 May 2025 (SI Report, reference 31.10). The letter included Woodside's responses to the summarised outcomes raised by Wanparta, as well as questions Woodside took on notice from the consultation meeting on 9 May 2025:
  - **(9)** Wanparta asked if Woodside will monitor the islands within the Ngarla Determination Area. **(9)** Woodside noted that it does not currently monitor islands within the Ngarla Determination Area under the proposed activity program for an unrelated EP, noting that the islands are outside of the EMBA for that EP.
  - **(1)** Wanparta raised that in the Ngarla People's view healthy Sea Country = a healthy marine life = Ngarla food source = healthy Ngarla People. **(1)** Woodside has noted these interests.
  - **(9)** Wanparta noted that Woodside should maintain sustainable fish stocks post operations. **(9)** Woodside recognises the importance of maintaining sustainable fish stocks post operations and acknowledges that offshore platforms and pipelines can become habitats for various fish species over time. Woodside also provided further details of research underway and provided details of Woodsides regulatory expectations.
  - **(10)** Woodside took a question on notice to seek more information on research activities relating to the monitoring of shorebirds. **(10)** Woodside provided Wanparta with information on shorebirds and noted that since 2016, Woodside has partnered with BirdLife Australia on programs focused on migratory shorebirds.
  - **(3)** Woodside took a question on notice to continue discussion on social investment opportunities and ranger programs. **(3)** Woodside is in the process of developing a Ranger Funding Program. Woodside noted that Wanparta's request will be evaluated in accordance with the Program's criteria upon its implementation.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) The Ngarla people have a deep spiritual connection to Sea Country, water is extremely important to Ngarla people, and they feel a responsibility to look after the ocean and lore.	**(1)** **Woodside assessment**: Woodside assessed Wanparta's interest in water to represent potential cultural values. **Woodside response**: Wanparta's interests and potential cultural values have been recorded in EPs, the potential impact on the interests and values, including controls, have been assessed.	**(1)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(2) On 7 May 2024, Wanparta advised of the significance of its totem species including the octopus, stingray, spiny bream fish and kestrel.	**(2)** **Woodside assessment**: Woodside respects Wanparta's cultural connections and knowledge, including its totem species. **Woodside response**: Woodside has noted the Wanparta's values and interests in its totem species in Section 4.9.4.	**(2)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values.
(3) Wanparta has expressed interest in a range of social investment opportunities including a ranger program and has provided a ranger program proposal for Woodside's consideration.	**(3)** **Woodside assessment:** Woodside is supportive of ongoing engagement with Traditional Custodians through ranger programs.. **Woodside response:** Woodside is assessing Wanparta's proposal.	**(3)** Ranger programs are able to be addressed as part of Woodside's Program of Ongoing Engagement (Appendix H).
(4) Wanparta raised no claims or objections regarding the activity or related EP at a meeting on 28 August 2024.	**(4)** **Woodside assessment**: Woodside confirms and accepts that Wanparta has no concerns regarding the activity or related EP. **Woodside response**: Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	**(4)** No additional measures or controls are required.
(5) Wanparta enquired about whale and turtle breeding and migration pathways.	**(5)** **Woodside assessment:** Woodside assesses risks to marine life and puts in place mitigation measures. **Woodside response:** Woodside advised Wanparta that it assesses risks to marine life and puts in place mitigation measures.	**(5)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.6, 6.7, 6.8 and 6.10.
(6) Wanparta asked if Woodside records whale observations.	**(6)** **Woodside assessment:** Woodside continues to use all available research and staff have a duty to report whale sightings. **Woodside response:** Woodside explained to Wanparta how whale sightings are managed.	**(6)** Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.6, 6.7, 6.8 and 6.10.
(7) Wanparta provided feedback that more visual learning material would aid consultation.	**(7)** **Woodside assessment:** Woodside welcomes this feedback and is committed to consulting with Traditional Owners in an appropriate way.	**(7)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside acknowledged the importance of visual aids and confirmed it is developing materials such as animations to further support future consultation.	
(8) Wanparta noted concerns around maintaining sustainable fish stock post operations during decommissioning.	**(8)** **Woodside assessment:** Woodside recognises the importance of maintain sustainable fish stocks post operations and acknowledges that offshore platforms and pipelines can become habitats for fish over time. **Woodside response:** This EP does not include decommissioning. Consistent with regulatory expectations, Woodside is committed to removing infrastructure, unless a thorough assessment determines that leaving certain infrastructure in place would deliver better overall environmental outcomes.	**(8)** No action required.
(9) Wanparta questioned if Woodside monitors islands within the Ngarla Determination area, in particular nesting shore birds.	**(9)** **Woodside assessment:** Woodside recognises the environmental significance of the islands and the critical role they play as nesting and foraging habitats for resident and migratory shorebirds. **Woodside response:** Woodside funds and participates in research and monitoring activities relevant to island environments and shorebird populations. Woodside has provided Wanparta with details of recent partnerships with BirdLife Australia. While Woodside's operational footprint does not extend to these Islands, its EPs consider the potential for indirect impacts on island-nesting shorebirds.	**(9)** Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Section 6.6, 6.7, 6.8 and 6.10 of the EP.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with Wanparta for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information:**		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on Wanparta's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that Wanparta can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Wanparta in June 2024. Woodside has addressed and responded to Wanparta over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked Wanparta if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wanparta's functions, interests, or activities.

4.9.19 Wilinggin Aboriginal Corporation

Wilinggin Aboriginal Corporation (Wilinggin) is established under the *Native Title Act 1993* by the Ngarinyin people to represent the Ngarinyin people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Wilinggin advising of the proposed activity (Record of Consultation, reference 6.2.37), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Wilinggin and its members may have within the EMBA, information on how Wilinggin would like to engage, and requested that Wilinggin provide information to other individuals as required. The email included a date to provide feedback.
- **(1)** On 19 June 2024, Wilinggin emailed Woodside to inform the area of activity was outside the Wilinggin determination area and advised that Wilinggin does not need to be consulted regarding the activity's Environment Plan (SI Report, reference 32.1).
- **(1)** On 19 June 2024, Woodside emailed Wilinggin acknowledging receipt of the email informing Woodside that the proposed activity was outside Wilinggin's determination area, and noted that Woodside would refrain from sending further information about the activity to Wilinggin (SI Report, reference 32.2).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*
(1) Wilinggin informed Woodside that the area of activity (EMBA) was outside the Wilinggin determination area and advised Woodside that the corporation does not need to be consulted on the activity's EP.	**(1)** **Woodside assessment**: Woodside acknowledges Wilinggin's feedback that the proposed activity is outside its determination area. **Woodside response**: Woodside will accept feedback for the life of the EP. Should Wilinggin decide to provide feedback at a future date Woodside will assess this and where appropriate, apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	**(1)** No additional measures or controls are required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with Wilinggin for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Wilinggin's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that Wilinggin can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Wilinggin in June 2024. Woodside has addressed and responded to Wilinggin over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked Wilinggin if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wilinggin's functions, interests, or activities.

4.9.20 Wirrawandi Aboriginal Corporation (WAC)

Wirrawandi Aboriginal Corporation (WAC) is established under the *Native Title Act 1993* by the Mardudhunera and Yaburara people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 17 June 2024, Woodside emailed WAC advising of the proposed activity (Record of Consultation, reference 6.2.38), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that WAC and its members may have within the EMBA, information on how WAC would like to engage, and requested that WAC provide information to other individuals as required. The email included a date to provide feedback.
- On 25 June 2024, WAC attended Woodside's Quarter 2 Heritage Meeting (SI Report, reference 33.1), where the proposed activity was discussed and the following was raised:
  - **(1)** WAC raised no concerns regarding the activity or related EP.
  - **(1)** Woodside acknowledged WAC's feedback.
- On 15 July 2024, Woodside met with WAC to discuss three EPs including the proposed activity (SI Report, reference 33.2). At this meeting:
  - **(1)** WAC agreed there were no concerns with the EPs as they were revisions. **(1)** Woodside acknowledged the feedback in the meeting.
  - WAC expressed gratitude for Woodside's support and availability to discuss the material in person.
  - **(2)** WAC stated it was keen to participate in Sea Country mapping and to discuss possible sponsorship and commercial opportunities with industry once a General Manager is recruited. **(2)** Woodside noted the interest in the meeting.
  - WAC are committed to ensuring cultural governance is the foundation of consultation with industry.
- On 15 July 2024, following a meeting on the same day, WAC emailed Woodside about the three EPs submitted to WAC for feedback and consultation including the proposed activity (SI Report, reference 33.3). WAC stated it appreciated the information provided and was grateful for the opportunity to be consulted, and noted:
  - WAC was in the process of recruiting a General Manager.
  - **(1)** WAC was satisfied that the three activities including the proposed activity in this EP would have minimal impact to Sea and Country within WAC's determination and therefore WAC had no concerns.
  - The WAC Board was eager to meet and consult with Woodside for future EPs.

Ongoing engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 9 September 2024, Woodside invited WAC to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners (SI Report, reference 59.1).
- On 25 September 2024, WAC attended Woodside's Monthly Luncheon for Traditional Owners. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.2).
- On 30 September 2024, Woodside had a meeting with WAC (SI Report, reference 33.4). During the meeting:
  - WAC confirmed it has one employee who is attending to consultation.
  - WAC confirmed its priority was appointing a new Board at its AGM in November.
- On 1 October 2024, WAC emailed Woodside and suggested Woodside attend its next Board meeting to discuss EPs (SI Report, reference 33.5).
- On 3 October 2024, Woodside invited WAC to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners (SI Report, reference 59.3).
- On 10 October 2024, WAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne (SI Report, reference 60.1). Matters relevant to this EP included:
  - Consultation for Woodside EPs including an explanation of State and Commonwealth regulatory requirements.
  - An explanation of EMBAs and the process Woodside undertakes to identify Traditional Owners groups.
  - How Traditional Owners could provide information to Woodside about cultural values, interests and activities.
- On 14 October 2024, Woodside was notified that Sorry Business was taking place in the Roebourne and Karratha area (SI Report, reference 33.6).
- On 18 October 2024, Woodside emailed WAC to discuss Woodside's attendance at the next WAC Board meeting (SI Report, reference 33.7).
- On 28 October 2024, Woodside attended WAC's Board meeting (SI Report, reference 33.8). Matters discussed that were relevant to this EP include:
  - Woodside's consultation processes.
  - **(3)** WAC asked about oil spill reporting. **(3)** Woodside responded that Woodside conducts an internal investigation and abides by an Oil Spill Management Plan.
- On 21 November 2024, NYFL emailed Woodside to advise that Sorry Business was taking place in the Roebourne Community (SI Report, reference 33.9).
- On 5 December 2024, WAC attended Woodside's Quarter 4 Heritage Meeting in Karratha (SI Report, reference 60.3). Matters discussed relevant to this EP included:
  - Woodside reminded the meeting attendees about ongoing consultation.
- On 11 December 2024, Woodside became aware via a social media post from RRKAC that due to the recent passings of two significant Elders cultural grieving protocols were underway (SI Report, reference 33.10).
- On 22 January 2025, Woodside emailed WAC a schedule for the 2025 Quarterly Heritage Meetings. WAC replied to acknowledge the email (SI Report, references 33.11, 33.12).
- On 4 March 2025, Woodside emailed WAC a reminder for the Quarterly Heritage meeting on 13 March 2025 (SI Report, reference 33.14).
- On 4 March 2025, Woodside invited WAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 59.5).
- On 5 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.6).
- On 13 March 2025, WAC hosted Woodside's Quarterly Heritage Meeting (SI Report, reference 60.4). Matters discussed and/or raised relating to this EP included:
  - That consultation is open for the life of an EP and Woodside can schedule consultation meetings at times that are convenient to the community.
  - A reminder that Woodside hosts a community luncheon/yarning circle for all local Traditional Owners.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 24 March 2025, Woodside emailed WAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 59.7).
- On 26 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 59.8).
- On 8 April 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.10).
- On 16 May 2025, Woodside emailed WAC a reminder about the Quarterly Heritage Meeting scheduled for 4 June 2025 (SI Report, reference 33.15).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 60.5). Matters discussed relevant to this EP included:
  - Woodside provided an overview the consultation process with relevant First Nations persons.
- On 22 July 2025, Woodside met with WAC to discuss two unrelated EPs (SI Report reference 33.16). Matters relevant to this EP included:
  - **(4)** WAC asked if a piece of cultural heritage is identified, how would Traditional Owners be informed. **(4)** Woodside explained this process to WAC and confirmed that relevant Traditional Owner groups would be notified.
  - **(3)** WAC mentioned a recent incident in the Exmouth Gulf involving hydrocarbon release during decommissioning and questioned the discrepancy between the reported media spill volume and the reported Woodside spill volume. **(3)** Woodside explained the response and mitigation measures and acknowledged the complexity of spill calculations.
  - **(3)** WAC asked if there was an investigation from the regulator regarding the hydrocarbon release and queried the outcome. **(3)** Woodside took the question on notice.
  - **(5)** WAC asked about the mitigation measures for whales including how whales are spotted at night. **(5)** Woodside explained mitigation measures for noise, whale and marine sightings, and vessel maintenance.
  - **(6)** WAC asked about potential damage to mangroves in the event of a spill and asked about mangrove research. **(6)** Woodside explained mitigation measures and that EPs include impact assessments on mangroves and nursery habitats.
  - **(7)** WAC expressed interest in being involved in ranger programs and the potential for ranger fee-for-service opportunities. **(7)** Woodside acknowledged this and encouraged WAC to remain in contact with Woodside.
- On 29 July 2025, WAC emailed Woodside to follow up on the consultation meeting (SI Report, reference 33.17). Matters relevant to this EP included:
  - **(8)** WAC stated that its Board confirmed a position that WAC should be consulted by proponents in respect of EPs where the relevant EMBA intersects within a general radius of 120km from the mouth of the Fortescue River.
  - **(7)** WAC sought Woodside's support to further build the capacity of its ranger team so that YM people can be involved in the identification of cultural values, monitoring of risks associated with activities under the EP. WAC requested details of the appropriate person within Woodside to write a letter in support of implementing WAC ranger activities.
  - **(9)** WAC stated a preference for holistic, rather than piecemeal engagement and requested Woodside undertake bespoke rather than generalised engagement with WAC. **(9)** Woodside notes this feedback.
  - **(3)** On 11 August 2025, Woodside emailed WAC to provide further information about an unrelated incident raised during the 22 July 2025 meeting, not relevant to this EP. (SI Report, reference 33.18). Woodside also requested the recording of the consultation meeting taken by WAC.
- On 22 August 2025, WAC and Woodside exchanged emails about provision of the recording of the consultation meeting (SI Report, references 33.19 and 33.20).
- On 28 August 2025, Woodside emailed WAC a response in relation to its email sent on 29 July 2025 (SI Report, reference 33.21). Items relevant to this EP include:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(8)** Woodside noted that a radius of 120km from the mouth of the Fortescue River is significantly beyond the Yaburara and Mardudhunera Native Title determination and therefore is not consistent with Woodside's methodology for determining interested persons for the purposes of consultation on the EPs.
- **(7)** Woodside stated that it is developing a Ranger Funding Program to support Traditional Owner groups in areas associated with Woodside activities and WAC's request will be assessed in line with the Program's criteria once implemented.

- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 60.6). Matters discussed relating to this EP included:
  - Woodside reminded attendees that it accepts feedback for the life of an EP.
  - Woodside is available to schedule meetings for EP consultation.
  - Cultural heritage updates.
- On 1 October 2025, WAC emailed Woodside a response to its email dated 28 August 2025 (SI Report, reference 33.22). Items relevant to this EP included:
  - WAC appreciates the constructive relationship with Woodside.
  - **(10)** WAC is supportive of a consultation framework agreement.
  - **(8)** WAC reiterated its request to be considered a relevant person for the purpose of consultation for EPs where the EMBA intersects a radius of approximately 120km from the mouth of the Fortescue River.
- **(8,10)** On 2 October 2025, Woodside emailed WAC stating that a full response would follow after a staff member returned from planned leave (SI Report, reference 33.23).
- On 16 October 2025, Woodside emailed WAC requesting a meeting to progress the Woodside and WAC relationship (SI Report, reference 33.24).
- On 20 October 2025, Woodside emailed WAC a response to its email dated 1 October 2025 (SI Report, reference 33.25). Items relevant to this EP include:
  - **(10)** Woodside noted WAC's request for a consultation framework agreement and noted it is not a pre-requisite for consultation. Woodside advised that it will continue to reasonably support WAC to participate in consultation for EPs and was not inclined to continue negotiations for a framework agreement at this time.
  - **(8)** Woodside reiterated that WAC's request relating to the methodology for determining relevant persons for EPs was outside of the established methodology used by Woodside and was unable to be accommodated.
- On 20 October 2025, Woodside emailed WAC to follow up on its request for a meeting to progress the Woodside and WAC relationship (SI Report, reference 33.26).
- On 3 December 2025, Wong GooTt Oo, WAC and NAC attended Woodside's Quarter 4 Heritage Meeting in Karratha (SI Report, reference 60.7). Matters discussed relevant to this EP included:
  - Woodside showed a video explaining EP consultation.
  - Woodside said it may develop more videos to aid consultation.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) WAC raised no concerns regarding the activity or related EP.	**(1)** **Woodside assessment**: Woodside confirms and accepts that WAC has no concerns regarding the activity or related EP. **Woodside response**: Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed	**(1)** No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	
(2) WAC is keen to participate in Sea mapping and to discuss possible sponsorship and commercial opportunities with industry.	**(2)** **Woodside assessment:** Woodside recognises WAC's interest to participate in Sea mapping, and to discuss sponsorship and commercial opportunities with industry. **Woodside response:** Woodside notes WAC's interest to participate in Sea mapping along with other opportunities with industry, and will continue to liaise with WAC when discussing future EPs.	**(2)** No additional measures or controls are required.
(3) During ongoing consultation, WAC asked Woodside about oil spill reporting.	**(3)** **Woodside assessment:** Woodside aligns with industry guidance about oil spill reporting. **Woodside response:** Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Sections 6.7 and 6.8 of the EP, and Appendix D.	**(3)** Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix D and its First Strike Plan is in Appendix G.
(4) WAC asked if a piece of cultural heritage is identified, how would Traditional Owners be informed.	**(4)** **Woodside assessment:** Woodside has processes in place to notify Traditional Owners if a piece of cultural heritage is identified during an activity. **Woodside response:** Woodside explained this process to WAC and confirmed that relevant Traditional Owner groups would be notified.	**(4)** Processes relating to informing Traditional Owners are in Section 7.6 (Unexpected Finds Procedure)
(5) WAC asked about the mitigation measures for whales including how whales are spotted at night.	**(5)** **Woodside assessment:** Woodside includes mitigation measures for impacts on whales in its EPs. **Woodside response:** Woodside explained mitigation measures for noise, whale and marine sightings, and vessel maintenance.	**(5)** Mitigation measures relating to interactions with whales are in Section 6.6, 6.7 and 6.8 and routine reporting of whales in Section 7.11.
(6) During consultation, WAC asked about potential damage to mangroves in the event of a spill and asked about mangrove research.	**(6)** **Woodside assessment:** Woodside has addressed mangroves in this EP.	**(6)** Woodside addresses mangroves in Section 6.7 and 6.10 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside explained mitigation measures and that EPs include impact assessments on mangroves and nursery habitats.	Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix D and its First Strike Plan is in Appendix G.
(7) WAC expressed interest in being involved in ranger programs and the potential for ranger fee-for-service opportunities.	**(7)** **Woodside assessment**: Woodside is supportive of ongoing engagement with Traditional Custodians through ranger programs. **Woodside response:** Woodside is in the process of developing a ranger funding program. WAC's request will be evaluated in accordance with the program's criteria upon its implementation. Woodside has provided ranger information to WAC.	**(7)** Ranger programs are able to be addressed as part of Woodside's Program of Ongoing Engagement (Appendix H)
(8) WAC should be consulted by proponents in respect of EPs where the relevant EMBA intersects within a general radius of 120km from the mouth of the Fortescue River.	**(8)** **Woodside assessment:** Woodside understands that this area extends significantly beyond the YM Native Title determination. **Woodside response:** Woodside emailed WAC noting that this request is not consistent with Woodside's methodology for determining interested persons for the purposes of consultation on the EPs.	**(8)** No action required.
(9) During engagement about unrelated EPs, WAC stated a preference for holistic, rather than piecemeal engagement and requested Woodside undertake bespoke rather than generalised engagement with WAC.	**(9)** **Woodside assessment:** During Woodside's initial engagement with WAC on 17 June 2024 about this EP (6.2.38). Woodside requested WAC advise Woodside of its preferred method of consultation and if there was any support or specific information that WAC required as part of engagement. **Woodside response:** Woodside has met regulatory requirements for sufficient information, reasonable time, and reasonable opportunity for consultation. Woodside will respond to WAC's request.	**(9)** No action required.
(10) WAC is supportive of a framework agreement for consultation.	**(10)** **Woodside assessment:** Woodside is currently assessing the effectiveness of negotiating framework agreements with stakeholders. To date, no framework agreements have been finalised. Woodside notes that this is not required to undertake and/or complete consultation in the course of preparing this EP**.** **Woodside response:**. Woodside provided WAC a draft framework agreement on 6 March 2024 for consideration by WAC and notes it has not yet been actioned.	**(10)** Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the Program of Ongoing Engagement with Traditional Owners, (Appendix H).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with WAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on WAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that WAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with WAC in June 2024. Woodside has addressed and responded to WAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked WAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WAC's functions, interests, or activities.

4.9.21 Wunambal Gaambera Aboriginal Corporation

Wunambal Gaambera Aboriginal Corporation (WGAC) is established under the *Native Title Act 1993* by the Wunambal Gaambera people to represent the Wunambal Gaambera people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed WGAC advising of the proposed activity (Record of Consultation, reference 6.2.39), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that WGAC and its members may have within the EMBA, information on how WGAC would like to engage, and requested that WGAC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed WGAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 34.1).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback, objects or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with WGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on WGAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that WGAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with WGAC in June 2024. Woodside has addressed and responded to WGAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked WGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WGAC's functions, interests, or activities.

4.9.22 Yawoorroong Miriwoong Galirrawoong Yirrgeh Noong Dawang Aboriginal Corporation (MG Corp)

MG Corp is established under the *Native Title Act 1993* by the Miriuwung and Gajerrong people to represent the Miriuwung and Gajerrong people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed MG Corp advising of the proposed activity (Record of Consultation, reference 6.2.40), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that MG Corp and its members may have within the EMBA, information on how MG Corp would like to engage, and requested that MG Corp provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed MG Corp a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, and confirmed a date to submit feedback about the activity (SI reference, 35.1).

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*
No feedback, objects or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with MG Corp for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient information:

- Woodside sought direction on MG Corp's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that MG Corp can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with MG Corp in June 2024. Woodside has addressed and responded to MG Corp over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked MG Corp if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MG Corp 's functions, interests, or activities.

4.9.23 Yawuru Native Title Holders Aboriginal Corporation

Yawuru Native Title Holders Aboriginal Corporation (Yawuru) is established under the *Native Title Act 1993* by the Yawuru people to represent the Yawuru people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Yawuru advising of the proposed activity (Record of Consultation, reference 6.2.41), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Yawuru and its members may have within the EMBA, information on how Yawuru would like to engage, and requested that Yawuru provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed Yawuru a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI reference, 36.1).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete
Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with Yawuru for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information:** • Woodside sought direction on Yawuru's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. • Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls. • Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Woodside asked for the consultation and information sheets to be distributed to members and individuals as required. • Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". • Woodside advised that Yawuru can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations). **Reasonable Period:** • Consultation Information Sheet publicly available on the Woodside website since June 2024. • Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback. • Woodside commenced consultation with Yawuru in June 2024. Woodside has addressed and responded to Yawuru over 18 months, demonstrating a "reasonable period" of consultation. Woodside asked Yawuru if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received. Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP). Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yawuru's functions, interests, or activities.

4.9.24 Yindjibarndi Aboriginal Corporation

Yindjibarndi Aboriginal Corporation (Yindjibarndi) is established under the *Native Title Act 1993* by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement
• On 26 July 2023, Woodside emailed Yindjibarndi (via the Ngarluma Yindjibarndi Foundation Ltd, or NYFL) Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*. • **(1)** On 1 August 2023, Yindjibarndi emailed Woodside advising NYFL would manage oil and gas matters on its behalf. • **(1)** On 9 August 2024, as directed by Yindjibarndi, Woodside emailed NYFL regarding Woodside's EPs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 17 June 2024, Woodside emailed Yindjibarndi advising of the proposed activity (Record of Consultation, reference 6.2.42), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Yindjibarndi and its members may have within the EMBA, information on how Yindjibarndi would like to engage, and requested that Yindjibarndi provide information to other individuals as required. The email included a date to provide feedback.

See NYFL on behalf of Yindjibarndi for record of further engagement.

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) Yindjibarndi has instructed Woodside that it will be represented by NYFL in ongoing discussion about EPs.	**(1)** **Woodside assessment**: Woodside accepts Yindjibarndi's right to be represented at its own choosing. **Woodside response**: Woodside will engage with NYFL on behalf of Yindjibarndi for ongoing consultation related to this activity.	**(1)** Ongoing consultation will be undertaken as set out in Section 7.10 of the EP.
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	No additional controls or measure required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with Yindjibarndi (via NYFL) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Yindjibarndi's (via NYFL) preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside advised that Yindjibarndi (via NYFL) can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Yindjibarndi (via NYFL) in June 2024. Woodside has addressed and responded to Yindjibarndi (via NYFL) over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked Yindjibarndi (via NYFL) if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yindjibarndi's (via NYFL) functions, interests, or activities.

4.9.25 Yinggarda Aboriginal Corporation (YAC)

Yinggarda Aboriginal Corporation (YAC) is established under the *Native Title Act 1993* by the Yinggarda people to represent the Yinggarda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. Gumala Aboriginal Corporation provides administrative support to YAC.

Historical engagement:

- On 26 July 2023, Woodside emailed YAC (via Gumala Aboriginal Corporation) Woodside's planned *Program of Ongoing Engagement with Traditional Custodians (SI Report*.

  Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed YAC advising of the proposed activity (Record of Consultation, reference 6.2.43), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that YAC and its members may have within the EMBA, information on how YAC would like to engage, and requested that YAC provide information to other individuals as required. The email included a date to provide feedback.
- On 20 June 2024, Woodside emailed YAC to offer the opportunity to meet with the Board to discuss the activity and requested YAC forward cost estimates to Woodside (SI Report, reference 38.1).
- Between 20 June and 16 July 2024, Woodside and YAC (via legal representative) exchanged emails about Woodside's attendance at the YAC Board meeting on 18 July 2024 (SI Report, references 38.2, 38.3, 38.4, 38.5, 38.6, 38.7)
- On 18 July 2024, Woodside met with YAC (SI Report, reference 38.8) to discuss this EP and other unrelated EPs. Matters discussed relating to this EP included:
  - **(1)** Possibility of setting up workshops to discuss the formalisation of an agreement between Woodside and YAC.
  - **(2)** Support for education and training including ranger programs and spill response training.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(3)** Potential impact to marine life. **(3)** Woodside responded to questions about marine life including turtles, whales, sharks to the satisfaction of YAC and undertook to provide follow up information.
- **(2)** YAC's interest in employment/training opportunities.

- On 26 July 2024, Woodside wrote to YAC (SI Report, reference 38.9) to respond to matters including:
  - **(1)** Woodside's commitment to ongoing consultation about EPs and continuing to build relationship with YAC including YAC providing feedback on the consultation framework.
  - **(2)** Woodside said it would look forward to hearing from YAC about YAC's plans for a ranger program and will keep YAC informed about Woodside's consideration of ranger initiatives and training opportunities.
  - **(3)** Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research some of which are set out on Woodside's website. Woodside also committed to ongoing consultation with YAC in relation to environmental impacts including to marine life.

Ongoing engagement

- On 5 December 2024, Woodside emailed YAC an update on this activity (SI Report, reference 38.10). Woodside:
  - Informed YAC that Woodside would resubmit this EP for further assessment by NOPSEMA.
  - Notified YAC that consultation for this EP would close on 19 December 2024 and that feedback provided by that date would be reflected in the EP and considered by NOPSEMA.
  - Acknowledged discussions relating to framework agreements had been ongoing since September 2023 but consultation had occurred in parallel for this EP.
  - **(3)** Provided an appendix (Appendix A) detailing feedback YAC had previously provided about marine life and Woodside's response to this feedback.
  - Woodside stated:
    - That YAC was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
    - That Feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.
- On 26 August 2025, YAC emailed Woodside new contact details, Woodside replied acknowledging the information (SI Report, references 38.11-38.12).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) YAC requested a consultation agreement with Woodside and stated it was unable to respond substantially until Woodside had provided a draft Consultation Framework Agreement which includes suggested timeframes to settle the agreement and timeframes for ongoing consultation with the Board.	**(1)** **Woodside assessment**: An agreement with YAC aligns with Woodside's Program of Ongoing Engagement with Traditional Custodians and will frame ongoing consultation processes. **Woodside response**: Woodside will finalise an agreement with YAC, although Woodside does not consider YAC's request for a consultation agreement as a pre-requisite for consultation under regulation 25 of the Environment Regulations. Sufficient	**(1)** Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is being implemented, the draft agreement with YAC (among other things) will set out the process for ongoing engagement. This is described further in the Program of Ongoing Engagement with Traditional Custodians (Appendix H).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff. Woodside has also provided a reasonable period and opportunity for consultation. The draft agreement sent to YAC in September 2023, will be used to frame ongoing consultation during the life of the EP. Woodside is waiting on a response from YAC.	
(2) YAC has enquired about support for education and training including ranger programs, including desire to be involved in local emergency response capability, potentially via an Indigenous Ranger Program. Interested in opportunities for employment/training.	**(2)** **Woodside assessment**: Woodside is supportive of ongoing engagement with Traditional Custodians through ranger programs. **Woodside response:** Woodside looks forward to hearing about YAC's plans for a ranger program and will keep YAC informed about Woodside's consideration of ranger initiatives.	**(2)** Ranger programs are addressed as part of Woodside's Program of Ongoing Engagement (Appendix H).
(3) YAC queried about the potential impact to marine life.	**(3)** **Woodside assessment:** Woodside accepts that YAC has an interest in the potential impacts on marine life. **Woodside response**: Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research some of which are set out on Woodside's website. Woodside also committed to ongoing consultation with YAC in relation to environmental impacts including to marine life.	**(3)** Woodside has considered topics raised by YAC and updated Section 4.9 to record these. These are assessed in Section 6.6, 6.7, 6.8 and 6.10 of the EP with appropriate controls implemented.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Summary Report - Consultation Complete		
Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with YAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information:** • Woodside sought direction on YAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. • Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls. • Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that YAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with YAC in June 2024 with a further consultation period in December 2024. Woodside has addressed and responded to YAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked YAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YAC's functions, interests, or activities.

4.10 NATIVE TITLE REPRESENTATIVE BODIES

4.10.1 Kimberley Land Council (KLC)

KLC is the Native Title Representative Body for the Kimberley region of Western Australia. As such, it is not a Prescribed Body Corporate or Registered Native Title Body Corporate but exists to assist Native Title claimants and holders.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed KLC to advise that Woodside would be emailing KLC three separate emails regarding the activity, to be forwarded to the relevant PBCs under KLC's jurisdiction (SI Report, reference 39.1).
- On 19 June 2024, Woodside emailed KLC advising of the proposed activity (Record of Consultation, reference 6.2.44), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required. The email included a date to provide feedback.
- On 5 July 2024, Woodside emailed KLC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 39.2).

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with KLC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on KLC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that KLC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with KLC in June 2024. Woodside has addressed and responded to KLC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked KLC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KLC's functions, interests, or activities.

4.10.2 Yamatji Marlpa Aboriginal Corporation (YMAC)

YMAC is the Native Title Representative Body (NTRB) for the Yamatji and Pilbara regions. NTRBs exist to provide assistance to native title claimants and holders in regard to their Native Title rights.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 15 March 2023, Woodside emailed YMAC requesting a position on whether YMAC considers itself a 'relevant person' under the Environment Regulations for the purposes of consultation in EPs.
- **(1)** On 20 March 2023, YMAC replied to confirm that it is a 'relevant person' under regulation 25(1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a NTRB under applicable federal legislation. YMAC does not intend to provide substantive comment on the content of EPs. **(1)** Woodside noted this feedback.
  - On 25 July 2023, Woodside emailed YMAC Woodside's *Program for Ongoing Engagement with Traditional Custodians*.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed YMAC advising of the proposed activity (Record of Consultation, reference 6.2.45), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the *NOPSEMA Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that YMAC and its members may have within the EMBA, information on how YMAC would like to engage, and requested that YMAC provide information to other individuals as required. The email included a date to provide feedback.
- On 19 June 2024, Woodside emailed NTGAC (via YMAC) requesting an opportunity to meet with the NTGAC board to discuss EPs relating to the proposed activity and other EPs (SI Report, reference 40.1).
- **(2)**, **(2)** Between 27 June and 10 July 2024, Woodside and YMAC exchanged emails about the status of YMAC's review of the Consultation Framework Agreement, provided to the organisation on 25 February 2024. The agreement related to Nanda Aboriginal Corporation (NAC), Nyangumarta Warrarn Aboriginal Corporation (NWAC) and NTGAC (SI Report, references (40.2, 40.3, 40.4, 40.5).
- On 16 July 2024, Woodside emailed YMAC a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 40.6).
- On 16 July 2024, Woodside phoned YMAC to confirm the contact details for EP information and inform about the closing dates for consultations. Woodside offered to provide additional information or to consult with Traditional Owners, noting that current consultation activities are part of five-year revisions (SI Report, reference 40.7).
- On 30 July 2024, YMAC emailed Woodside confirming the NTGAC representative's contact details and suggested meeting date for NTGAC (SI Report, reference 40.8).
- **(2)** On 30 July 2024, Woodside emailed YMAC acknowledging the NTGAC meeting date to be confirmed and identifying the Woodside representative to discuss the consultation agreement framework. (SI Report, reference 40.9).
- On 31 July 2024, YMAC emailed Woodside acknowledging receipt of email (SI Report, reference 40.10).
- On 31 July 2024, Woodside emailed YMAC accepting the NGTAC Board's offer to meet in September 2024 and offering to provide any information required (SI Report, reference 40.11).

  Please see NTGAC for further details about correspondence relating to the NTGAC including details of the September 2024 NTGAC Board meeting.

Ongoing engagement:

- On 5 December 2024, Woodside emailed YMAC an update on this activity (SI Report, reference 40.12). Woodside:
  - Informed YMAC that Woodside would resubmit this EP for further assessment by NOPSEMA.
  - Notified YMAC that consultation for this EP would close on 19 December 2024 and that feedback provided by that date would be reflected in the EP and considered by NOPSEMA.
  - Acknowledged discussions relating to framework agreements had been ongoing since August 2023 but consultation had occurred in parallel for this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside stated:
  - That NTGAC/YMAC was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
  - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.
- On 6 March 2025, YMAC emailed Woodside to advise of a change in staffing relating to NTGAC representation (SI Report, reference 40.13).
- On 10 March 2025, Woodside emailed YMAC to correct EP references provided to YMAC on 5 December 2024. These references referred to feedback from NTGAC (see NTGAC for further details) (SI Report, reference 40.14).

Summary of Feedback, Objection or Claim	*Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response*	*Inclusion in Environment Plan*
(1) YMAC has provided feedback that in its view it is a 'relevant person' under regulation 25 of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation and does not intend to provide substantive comment on the content of EPs.	**(1)** **Woodside assessment**: Woodside accepts YMAC's feedback that it is a relevant person only in relations to its facilitation and coordination function as a representative body. **Woodside response**: Woodside has consulted with YMAC in relation to its facilitation and coordination as a Native Title Representative Body under applicable federal legislation and has accepted YMAC's advice that it does not intend to provide substantive comment on the content of EPs.	**(1)** Not required.
(2) YMAC is reviewing a draft consultation framework to assist the consultation process.	**(2)** **Woodside assessment**: Woodside has assessed that its Program of Ongoing Engagement with Traditional Custodians will support ongoing consultation with YMAC and/or the groups it represents. **Woodside response**: In February 2024, Woodside sent a draft framework agreement to YMAC as the representative of NTGAC and two other groups. The agreement would frame ongoing consultation, address appropriate support for resourcing, separate from consultation under regulation 25 of the Environment Regulations.	**(2)** Woodside will continue to engage with YMAC in relation to its request for an industry funded position and put a proposal to YMAC in December 2023 for a Framework Agreement, and in February 2024 sent the draft terms of agreement between NTGAC and two other groups represented by YMAC and Woodside. This is described further in the Program of Ongoing Engagement with Traditional Custodians, Appendix H.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with YMAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on YMAC's clients' preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that YMAC can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with YMAC in June 2024, with a further consultation period in December 2024. Woodside has addressed and responded to YMAC over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked YMAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YMAC's functions, interests, or activities.

4.11 SELF-IDENTIFIED FIRST NATION GROUPS

4.11.1 Ngarluma Yindjibarndi Foundation Ltd

Ngarluma Yindjibarndi Foundation Ltd (NYFL) was created to act as Trustee for the Trust under the *Northwest Shelf Agreement 1998* struck between the Ngarluma and Yindjibarndi registered Native Title claimants, the NWS JVs and Woodside, prior to the resolution of the Ngarluma and Yindjibarndi Native Title claim. Its purpose is to carry on the business of enterprise development, investment and social welfare.

Historical engagement:

- On 26 July 2023, Woodside emailed NYFL Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 17 June 2024, Woodside emailed NYFL advising of the proposed activity (Record of Consultation, reference 6.2.46), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that NYFL and its members may have within the EMBA, information on how NYFL would like to engage, and requested that NYFL provide information to other individuals as required. The email included a date to provide feedback.
- On 17 June 2024, NYFL emailed Woodside acknowledging receipt of the activity's record of consultation and responded in a letter (SI Report, reference 41.1), which outlined the following: In the letter NYFL noted:
  - **(1)** That an interim Consultation Agreement remained the appropriate mechanism for consultation between Woodside and NYFL.
  - **(2)** It is seeking progress of the estimate of costs for the proposed consultation agreement.
  - **(2)** That Woodside had declined to provide funding requested by NYFL to complete an initial review of the proposed consultation agreement.
- **(1,2)** On 3 July 2024, Woodside emailed NYFL acknowledging the issues raised in the letter dated 17 June 2024. Woodside reassured NYFL that it was fully committed to consulting with NYFL's members and relevant Traditional Owners and would like to arrange a meeting to discuss how Woodside can work with the organisation to effectively engage in consultation and discuss other matters (SI Report, reference 41.2).
- **(2)** On 3 July 2024, NYFL emailed Woodside advising that it has provided Woodside with an estimate of costs to review and progress Woodside's proposed consultation agreement (SI Report, reference 41.3).

Ongoing engagement:

- On 9 September 2024, Woodside invited NYFL to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners on 25 September 2024 (SI Report, reference 59.1).
- On 25 September 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.2).
- On 3 October 2024, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners on 23 October 2024 (SI Report, reference 59.3).
- On 21 October 2024, NYFL emailed Woodside (SI Report, reference 41.4). In the email NYFL stated:
- **(3)** No formal consultation had taken place between NYFL and Woodside on this EP and others.
- **(1)** Woodside has provided NYFL with a draft consultation agreement.
- **(1)** NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
- On 23 October 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Lunch for Traditional Owners. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.4).
- On 4 November 2024, Woodside emailed NYFL in response to statements made in NYFL's email on 21 October 2024 (SI Report, reference 41.5). The email:
  - **(3)** Confirmed Woodside had consulted with NYFL via email as this appeared to be NYFL's primary method of communicating with Woodside on EPs and offered to meet as part of ongoing consultation. Woodside also confirmed that consultation had closed for this EP.
  - **(1, 3)** Reiterated that the ongoing negotiation of a consultation framework agreement can and continues to occur in parallel to consultation for EPs.
- On 8 November 2024, NYFL emailed Woodside requesting to meet on 20 November 2024 (SI Report, reference 41.6).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 15 November 2024, Woodside and NYFL exchanged emails confirming the invitation to meet on 20 November 2024. Woodside stated it would separately email NYFL about the remaining EPs outlined in the 21 October 2024 correspondence (SI Report, references 41.7, 41.8).
- On 20 November 2024, Woodside met with NYFL. Woodside emailed NYFL a summary of its meeting earlier that day (SI Report, reference 41.9). Matters relevant to this EP included:
  - Administrative matters relating to NYFL's review of the draft consultation agreement including providing funding for NYFL's legal fees with the qualification that this funding was the for the finalisation of the draft agreement for presentation to the NYFL Board.
  - Woodside seeking time to present to the NYFL Board on EPs.
- On 21 November 2024, NYFL advised Woodside about the passing of a Senior Yindjibarndi Elder and founding member of NYFL. The NYFL Board advised that Sorry Business was underway, and the community was commencing a period of mourning (SI Report, reference 41.10).
- On 5 December 2024, Woodside emailed NYFL a response to its letter of 21 October 2024 (SI Report, reference 41.11). In the letter Woodside:
  - Invited NYFL to provide further feedback about this EP no later than 19 December 2024 and that any feedback, opinions and comments provided by that date would be reflected in the EP and considered by NOPSEMA
  - Attached a summary of consultation that had occurred for this EP.
  - Woodside stated:
  - **(3)** It did not agree that consultation had not occurred for this EP and others. Woodside had consulted NYFL in accordance with regulations.
  - **(3)** that discussions about a draft consultation agreement had occurred in parallel to consultation on EPs.
  - NYFL was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
  - Woodside welcomed the opportunity to speak with Elders, office holders and other interested parties about this activity.
  - Woodside provides various forms of assistance to organisations, Traditional Custodian groups and individuals to support participation in consultation.
  - Woodside manages gender-restricted or other culturally sensitive information carefully and would work with NYFL to understand how it would like its information to be managed.
  - Feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.
  - NYFL could forward this email and the attached document to members of the NYFL, Traditional Owners and other people and organisations who may be interested.
  - NYFL was welcome to call or email Woodside if it would like to discuss consultation for this EP and other EPs further.
- Between 6 – 16 December 2024, Woodside and NYFL exchanged emails regarding matters relating to the draft consultation agreement, with NYFL stating it would progress consultation matters in due course (SI Report, references 41.12 – 41.13).
- On 4 March 2025, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 59.5).
- On 5 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.6).
- On 24 March 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 59.7).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 26 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 59.8).
- **(1)** On 7 April 2025, NYFL emailed Woodside, in response to another EP, advising that NYFL will be meeting with its legal advisers regarding the draft consultation agreement and will send an updated agreement to Woodside in due course (SI Report, reference, 41.14).
- On 7 April 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 59.9).
- On 8 April 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 59.10).
- **(1)** On 10 April 2025, NYFL emailed Woodside a draft consultation agreement, previously provided by Woodside which incorporated NYFL changes (SI Report, reference 41.15).
- **(1)** On 24 April 2025, NYFL emailed Woodside about an unrelated EP stating it believed that NYFL had not been consulted and explained that NYFL looks forward to consulting on EPs once the consultation agreement between NYFL and Woodside has been progressed (SI Report, reference 41.16).
- **(1)** On 28 April 2025, NYFL emailed Woodside a response to a follow-up email about an unrelated EP and another (SI Report, reference 41.17). NYFL noted it looked forward to progressing the draft consultation agreement.
- **(1)** On 15 June 2025, Woodside emailed NYFL amendments to a draft consultation agreement (SI Report, reference 41.18). In the email Woodside reiterated that consultation for the preparation of environment plans occurs concurrently with agreement negotiations.
- **(1)** On 16 June 2025, NYFL emailed Woodside to acknowledge receipt of Woodside's amendments to the draft consultation agreement (SI Report, reference 41.19).
- **(1)** On 16 June 2025, NYFL emailed Woodside about an unrelated EP and stated that a consultation agreement is the appropriate framework to engage in consultation and provided availability to discuss the draft consultation agreement (SI Report, reference 41.20).
- **(1)** On 19 June 2025, NYFL emailed Woodside and advised Woodside's amendments to a draft consultation were under review (SI Report, reference 41.21).
- **(1)** On 3 July 2025, NYFL emailed Woodside noting that NYFL looks forward to finalising the consultation agreement and undertaking consultation in regard to an EP not related to this activity (SI Report, reference 41.22).
- **(1)** On 4 July 2025, Woodside emailed NYFL to state that the preparation of EPs can and does occur concurrently with agreement negotiations (SI Report, reference 41.23).
- **(1)** On 24 July 2025, NYFL emailed Woodside and suggested meeting to discuss Woodside's amendments to the draft consultation agreement. NYFL requested Woodside support funding of the meeting including for legal representatives to attend (SI Report, reference 41.24).
- **(1)** On 23 September 2025, NYFL emailed Woodside to follow-up on its earlier offer to meet to discuss the consultation agreement (SI Report, reference 41.25).
- **(1)** On 24 September 2025, Woodside emailed NYFL to confirm an online meeting could be held to discuss the consultation agreement, however Woodside were unable to provide further funding for legal advice or otherwise in order to close out the agreement. Woodside again reminded NYFL that negotiation towards a consultation agreement can and does occur in parallel with consultation for EPs (SI Report, reference 41.26).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) NYFL supports a consultation agreement with Woodside.	**(1)** **Woodside assessment**: Separate from consultation under regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for	**(1)** Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	consultation, however, notes that this is not required to undertake and/or complete consultation in the course of preparing this EP. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff. Woodside has an existing engagement framework in place with NYFL which enables regular (quarterly) communication about Woodside activities. Woodside supports reasonable requests for resourcing. A consultation agreement would be an effective mechanism to address resourcing. **Woodside response**: Woodside and NYFL continue working to finalise a consultation agreement. Woodside has reiterated to NYFL that consultation for this EP and others has and continues to occur in parallel to discussions about the agreement.	further in the Program of Ongoing Engagement with Traditional Custodians, (Appendix H). This includes continued engagement regarding the proposed Framework Agreement which would be applied to ongoing consultation for this activity. Woodside will continue to consult following acceptance of the EP, as set out in Section 7.10 of the EP.
(2) NYFL has stated that it requires resourcing for expert advice. It has also provided Woodside with a quote for costs relating to reviewing Woodside's draft consultation agreement.	**(2)** **Woodside assessment:** The draft consultation agreement (See point **(1)** above), would be an effective mechanism to address resourcing for expert advice as agreed between NYFL and Woodside. Woodside supports reasonable requests for resourcing to support consultation. Woodside has reviewed a quote provided by NYFL to review the draft consultation agreement and believes it is excessive. **Woodside response**: Woodside supports reasonable requests to engage experts. Woodside has sought a meeting with NYFL to discuss how Woodside can reasonably ensure NYFL is adequately resourced for consultation. So far NYFL has declined this invitation.	**(2)** See point **(1)** above. The proposed agreement may address any reasonable requests for funding.
(3) NYFL stated no formal consultation had taken place on this EP and others.	**(3)** **Woodside assessment:** Woodside rejects NYFL's assertion that it has not been consulted on this EP. Woodside began consulting NYFL on 17 June 2024 and has provided sufficient information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that the consultation agreement is not required to undertake and/or consult with NYFL on EPs.	**(3)** Not required

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: The information provided by Woodside meets the requirements of regulation 25 of the Environment Regulations for the reasons set out above.	
While feedback has been received, there were no objections of claims.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of this EP).	Based on the engagement to date, no additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with NYFL for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NYFL's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- On 17 June 2024, Woodside commenced consulting with NYFL on this EP. Woodside's email to NYFL included:
  - A Summary Information sheet developed specifically for First Nations groups and reviewed by a First Nations staff member. This sheet included:
    - An overview of the activity
    - Maps showing the location and EMBA
    - Diagrams
    - Details about how to provide feedback.
  - The purpose of consultation, and what was being sought by Woodside through consultation including understanding the nature of NYFL's interests and how the activity could impact those interests.
  - That Woodside had undertaken assessments to identify potential impacts and risks to the marine environment and developed mitigation and management measures.
  - Woodside invited NYFL to speak to Woodside. Woodside provided contact details including a general email address and telephone number for Woodside as well as the direct email address and telephone number of the assigned Woodside focal person. Woodside also provided NOPSEMA's contact information.
  - Woodside asked NYFL to forward the information to its members and offered to speak to NYFL members as well as the NYFL Board.
  - Woodside offered to provide more specific information, maps and images to NYFL if required.
  - Woodside advised NYFL that reasonable financial support was available for meetings for the purpose of consultation.
  - Woodside advised that NYFL can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NYFL in June 2024. Woodside has addressed and responded to NYFL over 18 months, demonstrating a "reasonable period" of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Opportunity:

- NYFL was established in order to receive payments relating to the Northwest Shelf Agreement 1998 (not this EP) on behalf of its members.
- Woodside has consulted NYFL's membership on this EP.
- Woodside asked for NYFL's input into how NYFL would like to engage in consultation. In accordance with previous consultations and communications which have occurred via emails and meetings, Woodside and has consulted in a way that Woodside understands is appropriate for NYFL and First Nations groups.
- Woodside invites NYFL to Quarterly Heritage Meetings and monthly luncheons.
- Woodside and NYFL continue to negotiate a framework consultation agreement. Despite this ongoing negotiation, Woodside has made it clear that consultation for this EP can and has occurred in parallel with the ongoing negotiations relating to the framework consultation agreement. This has most recently been communicated on 4 November 2024 and 5 December 2024.
- Woodside asked NYFL if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.4 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NYFL's functions, interests, or activities.

4.12 LOCAL GOVERNMENT AND ELECTED PARLIAMENTARY REPRESENTATIVES, COMMUNITY GROUPS OR ORGANISATIONS

4.12.1 Broome Chamber of Commerce and Industry (Broome CCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Broome CCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Broome CCI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Broome CCI for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Broome CCI sufficient information to allow Broome CCI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Broome CCI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Broome CCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Broome CCI advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Broome CCI 30 days for consultation. For consultation on EPs, 30 days is the usual period for Broome CCI.
- In this context, Woodside allowed Broome CCI a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Broome CCI is appropriate and adapted to the nature of interests of Broome CCI:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Broome CCI of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- No additional measures were considered as a result of consultation as Broome CCI did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Broome CCI' functions, interests or activities.

4.12.2 Carnarvon Chamber of Commerce and Industry (Carnarvon CCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Carnarvon CCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Carnarvon CCI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Carnarvon CCI for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Carnarvon CCI sufficient information to allow Carnarvon CCI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Carnarvon CCI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Carnarvon CCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Carnarvon CCI advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Carnarvon CCI 30 days for consultation. For consultation on EPs, 30 days is the usual period for Carnarvon CCI.
- In this context, Woodside allowed Carnarvon CCI a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Carnarvon CCI is appropriate and adapted to the nature of interests of Carnarvon CCI:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Carnarvon CCI of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Carnarvon CCI did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Carnarvon CCI' functions, interests or activities.

4.12.3 City of Karratha

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed City of Karratha advising of the proposed activity (Record of Consultation, reference 6.2.2), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to City of Karratha, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with City of Karratha for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given City of Karratha sufficient information to allow City of Karratha to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to City of Karratha on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed City of Karratha a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to City of Karratha advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed City of Karratha 30 days for consultation. For consultation on EPs, 30 days is the usual period for City of Karratha.
- In this context, Woodside allowed City of Karratha a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with City of Karratha is appropriate and adapted to the nature of interests of City of Karratha :

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding City of Karrath of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as City of Karratha did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on City of Karrath ' functions, interests or activities.

4.12.4 Derby Chamber of Commerce and Industry (Derby CCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Derby CCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Derby CCI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Derby CCI for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given Derby CCI sufficient information to allow Derby CCI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Derby CCI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Derby CCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Derby CCI advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Derby CCI 30 days for consultation. For consultation on EPs, 30 days is the usual period for Derby CCI.
- In this context, Woodside allowed Derby CCI a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Derby CCI is appropriate and adapted to the nature of interests of Derby CCI:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Derby CCI of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Derby CCI did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The measures and controls described in this EP address the potential impact from the proposed activity on Derby CCI' functions, interests or activities.

4.12.5 East Kimberley Chamber of Commerce and Industry (East Kimberley CCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed East Kimberley CCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 18 June 2024, East Kimberley CCI emailed Woodside and invited it to the East Kimberley Economic Forum as an opportunity to engage with the community (SI Report, reference 5.1).
- (1) On 28 June 2024, Woodside thanked East Kimberley CCI for the response and declined the invitation (SI Report, reference 5.2).
- **(2)** On 10 July 2024, East Kimberley CCI emailed Woodside to offer becoming a member or paying a small advertising fee to facilitate consultation (SI Report, reference 5.3).
- (2) On 22 July 2024, Woodside emailed East Kimberley CCI to advise it has directly consulted with stakeholders in the Kimberley and declined the offer (SI Report, reference 5.4).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) Participate in the East Kimberley Economic Forum.	**(1)** **Woodside assessment:** Woodside directly consulted relevant persons in the Kimberley for this EP. **Woodside response:** Woodside declined the invitation.	**(1)** Not required.
(2) Become a member of the CCI or pay an advertising fee for consultation purposes.	**(2)** **Woodside assessment:** Woodside directly consulted with stakeholders in the Kimberley. **Woodside response:** Woodside declined the offer.	**(2)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with East Kimberley CCI for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given East Kimberley CCI sufficient information to allow East Kimberley CCI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to East Kimberley CCI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 18 June 2024, East Kimberley CCI consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed East Kimberley CCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to East Kimberley CCI advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed East Kimberley CCI 30 days for consultation. For consultation on EPs, 30 days is the usual period for East Kimberley CCI.
- In this context, Woodside allowed East Kimberley CCI a reasonable period for consultation in preparation of the EP as evidenced by its response on 18 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with East Kimberley CCI is appropriate and adapted to the nature of interests of East Kimberley CCI:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to East Kimberley CCI as evidenced by its response on 18 June 2024.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from East Kimberley CCI.
- Made no changed or inclusions in the EP as a result of consultation with East Kimberley CCI because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.12.6 Exmouth Community Liaison Group (Exmouth CLG)

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Exmouth CLG advising of the proposed activity (Record of Consultation, reference 6.2.2), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Exmouth CLG, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 July 2024, Woodside presented to the Exmouth CLG on Woodside activities, including this EP. Woodside presented a slide which listed Environment Plans on which the CLG members had recently been consulted and Environment Plans currently under consultation (SI report, reference 54.1). No feedback was provided on this EP.
- On 17July 2024, Woodside presented to the Exmouth CLG on Woodside activities, including this EP. Woodside presented a slide listing EPs on which the CLG members had recently been consulted and EPs currently under consultation (SI report, reference 54.1).
  - No feedback was provided on this EP.
  - 13 individuals attended the meeting representing:
    - Exmouth Volunteer Marine Rescue
    - Gascoyne Development Commission
    - Shire of Exmouth
    - PHI Helicopters
    - Exmouth Chamber of Commerce and Industry
    - Ningaloo Coast World Heritage Advisory Council / NOPSEMA Community and Environment Reference Group
    - Santos
    - AIMS
    - Department of Health
  - No questions were raised by CLG members in attendance at the meeting.
- On 12 November 2024, Woodside presented to the Exmouth CLG on Woodside activities, including on this EP. Woodside presented a slide listing EPs on which the CLG members had recently been consulted and EPs currently under consultation (SI report, reference 54.2).
  - 13 individuals attended the meeting representing:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

    - Shire of Exmouth
    - Gascoyne Development Commission
    - Exmouth Chamber of Commerce and Industry
    - Ningaloo Coast World Heritage Advisory Council / NOPSEMA Community and Environment Reference Group
    - West Australian Country Health Service
    - Bhagwan Marine
    - PHI Helicopters
    - Exmouth Volunteer Marine Rescue
    - CSIRO.
    - Santos.
- On 13 March 2025, Woodside presented to the Exmouth CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 54.3).
- Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. Slides on upcoming EP's were presented to the group.
    - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
    - 7 individuals attended the meeting representing:
        - Shire of Exmouth
        - Gascoyne Development Commission
        - Exmouth Chamber of Commerce and Industry
        - Australia's Coral Coast/Regional Development Authority
        - Exmouth community
        - PHI Helicopters
        - Santos
- No feedback was provided for this EP.
- On 22 April 2025, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 26 June 2025, Woodside presented to the Exmouth CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 54.4).
- Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. Slides on upcoming EPs were presented to the group.
    - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
    - 8 individuals attended the meeting representing:
        - Shire of Exmouth
        - Exmouth Chamber of Commerce and Industry

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Australia's Coral Coast/Regional Development Authority
- PHI Helicopters
- Local councillor
- St John Exmouth Subcentre
- Exmouth Freight and Logistics
- Santos.

- No feedback was provided for this EP.
- On 10 July 2025, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Exmouth CLG for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Exmouth CLG sufficient information to allow Exmouth CLG to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Exmouth CLG on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed Exmouth CLG a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Exmouth CLG advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Exmouth CLG 30 days for consultation. For consultation on EPs, 30 days is the usual period for Exmouth CLG.
- In this context, Woodside allowed Exmouth CLG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Exmouth CLG is appropriate and adapted to the nature of interests of Exmouth CLG:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Exmouth CLG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Exmouth CLG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Exmouth CLG's functions, interests or activities.

4.12.7 Indian Ocean Territories Regional Development Organisation (IOTRDO)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed IOTRDO advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to IOTRDO, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with IOTRDO for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given IOTRDO sufficient information to allow IOTRDO to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to IOTRDO on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed IOTRDO a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to IOTRDO advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed IOTRDO 30 days for consultation. For consultation on EPs, 30 days is the usual period for IOTRDO.
- In this context, Woodside allowed IOTRDO a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with IOTRDO is appropriate and adapted to the nature of interests of IOTRDO:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding IOTRDO of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as IOTRDO did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on IOTRDO' functions, interests or activities.

4.12.8 Karratha Community Liaison Group (Karratha CLG)

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Karratha CLG advising of the proposed activity (Record of Consultation, reference 6.2.2), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Karratha CLG, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 21 June 2024, Woodside presented to the Karratha CLG on EP consultation requirements and provided an update on upcoming Woodside activities, including this the North Rankin Complex Operations EP (SI report, reference 55.1). No feedback was provided on this EP. Woodside also presented on how Woodside consults relevant persons in the course of preparing our EPs and provided information on relevant persons and EMBA' s. The slides included a QR and URL to Consultation Activities page of the Woodside website and copies of the latest edition of Let's Talk were provided in hard copy and sent electronically with the minutes and pack. No feedback was provided on this EP. 8 CLG members attended the meeting representing:
  - City of Karratha – Council representatives and staff representatives
  - Karratha Central Health Care
  - Dampier Community Association
  - Pilbara Development Commission
  - Department of Education – staff representatives
- On 20 September 2024, Woodside presented to the Karratha CLG on EP consultation requirements and provided an update on upcoming Woodside activities (SI report, reference 55.2).
  - No feedback was provided on this EP.
  - Woodside also presented on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. The slides included a QR code and a URL to the Consultation Activities page of the Woodside website. Copies of the latest edition of *Let's Talk* were provided in hard copy and sent electronically with the minutes and pack.
  - 8 CLG members attended the meeting representing:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

    - City of Karratha – staff representatives
    - Dampier Community Association
    - Pilbara Development Commission
    - Department of Education – staff representatives
    - Karratha and Districts Chamber of Commerce and Industry
    - Pilbara Ports Authority.
- On 29 November 2024, Woodside presented to the Karratha CLG on EP consultation requirements and provided an update on upcoming Woodside activities, (SI report, reference 55.3).
    - No feedback was provided on this EP.
    - Woodside also presented on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. The slides included a QR code and a URL to the Consultation Activities page of the Woodside website. Copies of the latest edition of Let's Talk were provided in hard copy and sent electronically with the minutes and pack.
- On 20 March 2025, Woodside presented to the Karratha CLG on EP consultation requirements (SI Report, reference 55.4).
    - No feedback was provided on our consultation process.
    - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website. Copies of the latest edition of Let's Talk were provided in hard copy and sent electronically with the minutes and slide pack.
    - 8 CLG members attended the meeting representing:
        - City of Karratha – staff representatives
        - Murujuga Aboriginal Corporation
        - Regional Development Australia Pilbara
        - Karratha and Districts Chamber of Commerce and Industry
        - Department of Education
        - Development WA
        - Dampier Community Association.
    - No feedback was provided for this EP.
- On 20 May 2025, Woodside's March presentation to the CLG was emailed to the CLG regardless of their attendance at the meeting.
- On 20 June 2025, Woodside presented to the Karratha CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 55.5).
    - Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBAs. Woodside also flagged upcoming consultation for other EPs.
    - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website.
    - 9 CLG members attended the meeting representing:
        - City of Karratha

– No feedback was provided for this EP.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Karratha CLG for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Karratha CLG sufficient information to allow Karratha CLG to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Karratha CLG on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed Karratha CLG a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Karratha CLG advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Karratha CLG 30 days for consultation. For consultation on EPs, 30 days is the usual period for Karratha CLG.
- In this context, Woodside allowed Karratha CLG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Karratha CLG is appropriate and adapted to the nature of interests of Karratha CLG:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Karratha CLG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Karratha CLG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Karratha CLG' functions, interests or activities.

4.12.9 Onslow Chamber of Commerce and Industry (Onslow CCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Onslow CCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Onslow CCI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Onslow CCI for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Onslow CCI sufficient information to allow Onslow CCI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Onslow CCI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Onslow CCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Onslow CCI advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Onslow CCI 30 days for consultation. For consultation on EPs, 30 days is the usual period for Onslow CCI.
- In this context, Woodside allowed Onslow CCI a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Onslow CCI is appropriate and adapted to the nature of interests of Onslow CCI:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Onslow CCI of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Onslow CCI did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Onslow CCI' functions, interests or activities.

4.12.10 Port Hedland Chamber of Commerce and Industry (Port Hedland CCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Port Hedland CCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Port Hedland CCI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Port Hedland CCI for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given Port Hedland CCI sufficient information to allow Port Hedland CCI to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Port Hedland CCI on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Port Hedland CCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Port Hedland CCI advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Port Hedland CCI 30 days for consultation. For consultation on EPs, 30 days is the usual period for Port Hedland CCI.
- In this context, Woodside allowed Port Hedland CCI a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Port Hedland CCI is appropriate and adapted to the nature of interests of Port Hedland CCI:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Port Hedland CCI of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Port Hedland CCI did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Port Hedland CCI' functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.12.11 Shire of Ashburton

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Shire of Ashburton advising of the proposed activity (Record of Consultation, reference 6.2.18), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Shire of Ashburton, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Ashburton for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Ashburton sufficient information to allow Shire of Ashburton to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Ashburton on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shire of Ashburton a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Shire of Ashburton advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Ashburton 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Ashburton.
- In this context, Woodside allowed Shire of Ashburton a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Ashburton is appropriate and adapted to the nature of interests of Shire of Ashburton:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Shire of Ashburton of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shire of Ashburton did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shire of Ashburton' functions, interests or activities.

4.12.12 Shire of Broome

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Shire of Broome advising of the proposed activity (Record of Consultation, reference 6.2.2), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 26 June 2024, Shire of Broome emailed Woodside to confirm it had no comment on the proposal (SI Report, reference 11.1)
- **(1)** On 25 June 2024, Woodside thanked Shire of Broome for its feedback (SI Report, reference 11.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No comment on the proposal.	**(1)**	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside assessment: Woodside noted Shire of Broome's feedback. **Woodside response**: Woodside thanked the Shire of Broome for its feedback.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Broome for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Broome sufficient information to allow Shire of Broome to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Broome on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 26 June 2024, Shire of Broome consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Shire of Broome a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shire of Broome advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Broome 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Broome.
- In this context, Woodside allowed Shire of Broome a reasonable period for consultation in preparation of the EP as evidenced by its response on 26 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Broome is appropriate and adapted to the nature of interests of Shire of Broome:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Shire of Broome as evidenced by its response on 26 June 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Shire of Broome.
- Made no changed or inclusions in the EP as a result of consultation with Shire of Broome because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.12.13 Shire of Carnarvon

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Shire of Carnarvon advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Shire of Carnarvon, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see section 7.2.5 of this EP).	

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Carnarvon for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Carnarvon sufficient information to allow Shire of Carnarvon to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Carnarvon on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shire of Carnarvon a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shire of Carnarvon advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Carnarvon 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Carnarvon.
- In this context, Woodside allowed Shire of Carnarvon a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Carnarvon is appropriate and adapted to the nature of interests of Shire of Carnarvon:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Shire of Carnarvon of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shire of Carnarvon did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shire of Carnarvon's functions, interests or activities.

4.12.14 Shire of Cocos (Keeling) Islands

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Shire of Cocos (Keeling) Islands advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Shire of Cocos (Keeling) Islands, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Cocos (Keeling) Islands for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Cocos (Keeling) Islands sufficient information to allow Shire of Cocos (Keeling) Islands to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Cocos (Keeling) Islands on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shire of Cocos (Keeling) Islands a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shire of Cocos (Keeling) Islands advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Cocos (Keeling) Islands 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Cocos (Keeling) Islands.
- In this context, Woodside allowed Shire of Cocos (Keeling) Islands a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Cocos (Keeling) Islands is appropriate and adapted to the nature of interests of Shire of Cocos (Keeling) Islands:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Shire of Cocos (Keeling) Islands of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shire of Cocos (Keeling) Islands did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shire of Cocos (Keeling) Islands' functions, interests or activities.

4.12.15 Shire of Derby/West Kimberley

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 19 June 2024, Woodside emailed Shire of Derby/West Kimberley advising of the proposed activity (Record of Consultation, reference 6.2.2), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- **(1)** On 26 June 2024, Shire of Derby/West Kimberley emailed Woodside to confirm it has no specific comments on the EP (SI Report, reference 12.1)
- **(1)** On 25 June 2024, Woodside thanked Shire of Derby/West Kimberley for its feedback (SI Report, reference 12.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No comment on the EP.	**(1)** **Woodside assessment:** Woodside noted Shire of Derby/West Kimberley feedback. **Woodside response**: Woodside thanked the Shire of Derby/West Kimberley for its feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Derby/West Kimberley for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Derby/West Kimberley sufficient information to allow Shire of Derby/West Kimberley to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Derby/West Kimberley on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

- On 26 June 2024, Shire of Derby/West Kimberley consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Shire of Derby/West Kimberley a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shire of Derby/West Kimberley advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Derby/West Kimberley 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Derby/West Kimberley.
- In this context, Woodside allowed Shire of Derby/West Kimberley a reasonable period for consultation in preparation of the EP as evidenced by its response on 26 June 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Derby/West Kimberley is appropriate and adapted to the nature of interests of Shire of Derby/West Kimberley:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Shire of Derby/West Kimberley as evidenced by its response on 26 June 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Shire of Derby/West Kimberley.
- Made no changed or inclusions in the EP as a result of consultation with Shire of Derby/West Kimberley because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.12.16 Shire of Exmouth

Summary of information provided and record of consultation for this EP:

- On 19 June 2024, Woodside emailed Shire of Exmouth advising of the proposed activity (Record of Consultation, reference 6.2.2), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 July 2024, Woodside sent an email reminder to Shire of Exmouth, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Exmouth for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Exmouth sufficient information to allow Shire of Exmouth to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Exmouth on 19 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shire of Exmouth a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shire of Exmouth advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Exmouth 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Exmouth.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed Shire of Exmouth a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Exmouth is appropriate and adapted to the nature of interests of Shire of Exmouth:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Shire of Exmouth of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shire of Exmouth did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shire of Exmouth' functions, interests or activities.

4.12.17 Shire of Wyndham-East Kimberley

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Shire of Wyndham-East Kimberley advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Shire of Wyndham-East Kimberley, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Shire of Wyndham-East Kimberley for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Shire of Wyndham-East Kimberley sufficient information to allow Shire of Wyndham-East Kimberley to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Shire of Wyndham-East Kimberley on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Shire of Wyndham-East Kimberley a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Shire of Wyndham-East Kimberley advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Shire of Wyndham-East Kimberley 30 days for consultation. For consultation on EPs, 30 days is the usual period for Shire of Wyndham-East Kimberley.
- In this context, Woodside allowed Shire of Wyndham-East Kimberley a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Shire of Wyndham-East Kimberley is appropriate and adapted to the nature of interests of Shire of Wyndham-East Kimberley:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Shire of Wyndham-East Kimberley of the opportunity to provide feedback.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Shire of Wyndham-East Kimberley did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Shire of Wyndham-East Kimberley' functions, interests or activities.

4.12.18 Town of Port Hedland

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Town of Port Hedland advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Town of Port Hedland, following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 15 July 2024, Town of Port Hedland emailed Woodside to advise it had no comments on the proposal (SI Report, reference 46.1).
- **(1)** On 25 June 2024, Woodside thanked Town of Port Hedland for its feedback (SI Report, reference 46.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No comments on the proposal.	**(1)** **Woodside assessment:** Woodside noted Town of Port Hedland had no comments. **Woodside response:** Woodside thanked Town of Port Hedland for its feedback.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Town of Port Hedland for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Town of Port Hedland sufficient information to allow Town of Port Hedland to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Town of Port Hedland on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- On 15 July 2024, Town of Port Hedland consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Town of Port Hedland a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Town of Port Hedland advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Town of Port Hedland 30 days for consultation. For consultation on EPs, 30 days is the usual period for Town of Port Hedland.
- In this context, Woodside allowed Town of Port Hedland a reasonable period for consultation in preparation of the EP as evidenced by its response on 15 July 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Town of Port Hedland is appropriate and adapted to the nature of interests of Town of Port Hedland:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Town of Port Hedland as evidenced by its response on 15 July 2024.

Outcomes of Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Town of Port Hedland.
- Made no changed or inclusions in the EP as a result of consultation with Town of Port Hedland because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.13 OTHER NON-GOVERNMENT GROUPS OR ORGANISATIONS (NGOs)

4.13.1 Friends of Australian Rock Art (FARA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed FARA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to FARA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.
- On 12 September 2024, NOPSEMA provided Woodside with correspondence from FARA, sent to NOPSEMA on 1 July 2024, regarding information FARA considered relevant to the NWS Project Extension appeals (SI Report, reference 61.1). Woodside notes the information provided by FARA relates to the NWS Project Extension, however, considered the use of Selective Catalytic Reduction (SCR) in Section 6.6.8 of the EP. Woodside did not respond to FARA in the context of the North Rankin Complex Operations EP, however, Woodside provided a response to FARA in the context of another EP on 25 October 2024.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with FARA for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given FARA sufficient information to allow FARA to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information directly to FARA on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed FARA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to FARA advising when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period in the preparation of the EP and Woodside allowed FARA with 30 days for consultation.
- In this context, Woodside allowed FARA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with FARA is appropriate and adapted to the nature of interests of FARA:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This is appropriate and adapted to FARA because Woodside notes FARA regularly uses social media as a means to share its views. This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside engaged with FARA in the manner that FARA has consulted in previous consultations, that is, by email.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding FARA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Based on FARA's feedback, as forwarded by NOPSEMA, Woodside assessed the feasibility of SCR in section 6.6.8. of the EP. No new measures were adopted as a result of FARA's feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.13.2 Save Our Songlines

Historical engagement:

- On 25 July 2023, Woodside met with Environmental Defenders Office (EDO), Save our Songlines (SoS), and/or [Individual 1] about an activity not relevant to this activity. During the meeting, SoS and/or [Individual 1] stated that they are broadly concerned about:
  - **(1)** Impacts on whales and other animals.
  - **(2)** The Songlines (unspecified) and the energy lines (unspecified).
- **(3)** On 25 July 2023, EDO on behalf of SoS, and/or [Individual 1] emailed Woodside in response to another activity not related to this activity requesting a response to questions relating to the depth of wells, freshwater, migratory patterns of whales, dugongs and turtles, and seagrass distribution.
- **(1, 3)** On 27 July 2023, Woodside responded to EDO's email of 25 July 2023 in relation to another activity providing information in response to the interest SoS, and/or [Individual 1] had in marine mammals, seagrass, and the meeting of saltwater and freshwater.
- **(2)** From 2022 to 2023, Woodside consulted SoS and /or [Individual 1] on the Scarborough D&C and Pluto EPs. A number of issues raised by SoS during consultation on those EPs was addressed and responded to, which Woodside considers relevant to this EP, including:
  - Acknowledged [Individual 1] was a Mardudhunera person, a Traditional Custodian of Murujuga and opposed to industry at Murujuga.
  - The management of emissions under a range of Federal and State legislation and Woodside's support of the monitoring of emissions in relation to rock art.
  - The assessment of emissions and the controls in EPs to reduce GHG emissions to ALARP and acceptable levels.
  - The commitment to facilitating access to Murujuga to Traditional Custodians.
  - The consideration of climate change impacts through the assessment of GHG emissions.
  - The consideration of tangible and intangible heritage in EPs.
  - Woodside's efforts to understand and record the nature of the cultural values provided through consultation.
  - Woodside's willingness to consult with Traditional Custodians, including those who self-identify as relevant.
  - That consultation of relevant persons needs to be consistent.
  - That the environment and cultural values are one, that Dreaming stories come from the animals depicted on the rock art and will live forever, that the connection and Songlines are being disrupted.

Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed SoS and/or [Individual 1] advising of the proposed activity (Record of Consultation, reference 6.2.47), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the NOPSEMA *Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that SoS and/or [Individual 1] and its members may have within the EMBA, information on how SoS and/or [Individual 1] would like to engage and requested that SoS provide information to other individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 12 July 2024, Woodside emailed SoS and/or [Individual 1] a reminder about the proposed activity, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 42.1). No response has been received.

Ongoing engagement:

- On 7 October 2024, EDO emailed Woodside about an administrative matter relating to email correspondence about EPs (SI Report, reference 42.2).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
(1) In a previous unrelated EP, cultural features associated with whales were raised.	**(1)** **Woodside Assessment**: Woodside understands that some species hold spiritual and cultural importance to SoS and/or [Individual 1]. **Woodside Response**: During consultation on a previous EP, Woodside discussed controls put in place to manage impacts and risks relating to their spiritual and cultural connection to the environment. Woodside has implemented controls to reduce potential risks and impacts to ecological and cultural values to ALARP and to an acceptable level.	**(1)** Assessment of potential impacts to cultural values are described in Section 6 of the EP.
(2) In a previous unrelated EP, it was noted there were cultural features associated with Songlines, dreaming and energy lines.	**(2)** **Woodside Assessment**: Woodside understands that Songlines and energy lines to hold personal spiritual and cultural value individually (rather than communally) to SoS and/or [Individual 1]. Woodside has consistently sought to understand the nature of these values to ensure impacts to these values can be minimised. SoS and/or [name redacted] has declined to provide further information on these values. **Woodside Response**: In any event, Woodside has sought to include controls that seek to reduce risks and impacts to ALARP and acceptable levels.	**(2)** Woodside has considered SoS's and/or [Individual 1] feedback and updated Section 4.9 to record topics of interest and cultural values, including Songlines and energy lines. These are assessed in Section 6.10 under Songlines with appropriate controls implemented. At this stage, Woodside has not been provided with specific information on these potential values to enable a more fulsome assessment.
(3) In a previously unrelated EP, an interest in marine mammals, seagrass, and the meeting of freshwater and saltwater was demonstrated.	**(3)** **Woodside Assessment**: SoS and/or [Individual 1] has not expressly confirmed their interests, rather, have raised topics of interest to them during consultation for another activity. Woodside has considered SoS's and/or [Individual 1] topics of interest and shared relevant information in relation to a previous EP, with SoS and/or [Individual 1] relating to these interests, including controls put in place to manage risks and impacts to them.	**(3)** Woodside has considered topics raised by SoS and/or [Individual 1] and updated Section 4.9 to record these. These are assessed in Section 6 with appropriate controls implemented.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside Response: Woodside has updated Section 4.9 to record the interests and assessed them in Section 6.10 implementing appropriate controls.	
Woodside has addressed objections and claims as noted above.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.5 of this EP).	Woodside has assessed the objections or claims raised by SoS and/or [Individual 1]. No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environmental Regulations and consultation with SoS and/or [Individual 1] for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction from SoS and/or [Individual 1] as to their preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Woodside articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Woodside confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Woodside asked for the consultation and information sheets be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Woodside advised that SoS and/or [Individual 1] can request that particular information provided in the consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since June 2024.
- Woodside published advertisements in national, state, and relevant local newspapers advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with SoS and/or [Individual 1] in June 2024. Woodside has addressed and responded to SoS and/or [Individual 1] over 18 months, demonstrating a "reasonable period" of consultation.

Woodside asked SoS and/or [Individual 1] if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.5 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on SoS and/or [Individual 1] functions, interests, or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.13.3 Telstra

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Telstra advising of the proposed activity (Record of Consultation, reference 6.2.4), provided a Consultation Information Sheet, a submarine cables map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Telstra, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Telstra for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Telstra sufficient information to allow Telstra to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Telstra on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided Telstra with information tailored to Telstra by including a map of submarine communication cables.

Reasonable Period

Woodside allowed Telstra a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Telstra advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Telstra 30 days for consultation. For consultation on EPs, 30 days is the usual period for Telstra.
- In this context, Woodside allowed Telstra a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Telstra is appropriate and adapted to the nature of interests of Telstra:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Telstra of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Telstra did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Telstra's functions, interests or activities.

4.13.4 Vocus

Summary of information provided and record of consultation for this EP:

- On 18 July 2024, Woodside emailed Vocus advising of the proposed activity (Record of Consultation, reference 6.2.4.1), provided a Consultation Information Sheet, a submarine cables map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 22 July 2024, Vocus emailed Woodside to advise it has no concerns regarding the activity (SI Report, Reference 51.1).
- **(1)** On 23 July 2024, Woodside thanked Vocus for its feedback (SI Report, reference 51.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No concerns regarding the activity.	**(1)**	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside assessment: Woodside noted Vocus has no concerns regarding this activity. **Woodside response:** Woodside thanked Vocus for its feedback.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Vocus for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Vocus sufficient information to allow Vocus to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Vocus on 18 July 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).
- In addition to the Consultation Information Sheet, Woodside provided Vocus with information tailored to Vocus by including a map of submarine communication cables.
- On 22 July 2024, Vocus consulted and shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

Reasonable Period

Woodside allowed Vocus a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Vocus advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Vocus 30 days for consultation. For consultation on EPs, 30 days is the usual period for Vocus.
- In this context, Woodside allowed Vocus a reasonable period for consultation in preparation of the EP as evidenced by its response on 22 July 2024.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Vocus is appropriate and adapted to the nature of interests of Vocus:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside considers a reasonable opportunity was provided to Vocus as evidenced by its response on 22 July 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Responded to feedback from Vocus.
- Made no changed or inclusions in the EP as a result of consultation with Vocus because appropriate measures are already included in the EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.14 RESEARCH INSTITUTES AND LOCAL CONSERVATION GROUPS OR ORGANISATIONS

4.14.1 Cape Conservation Group (CCG)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed CCG advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to CCG, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with CCG for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given CCG sufficient information to allow CCG to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to CCG on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed CCG a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to CCG advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed CCG 30 days for consultation. For consultation on EPs, 30 days is the usual period for CCG.
- In this context, Woodside allowed CCG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with CCG is appropriate and adapted to the nature of interests of CCG:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding CCG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as CCG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on CCG's functions, interests or activities.

4.14.2 Protect Ningaloo

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Protect Ningaloo advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 11 July 2024, Woodside sent an email reminder to Protect Ningaloo, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations, and consultation with Protect Ningaloo for the purpose of regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given Protect Ningaloo sufficient information to allow Protect Ningaloo to make an informed assessment of the possible consequences of the activity on its functions, interests and activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since Friday 14 June 2024. Woodside provided this information to Protect Ningaloo on 18 June 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timeframe of the activity, receiving environment, impacts and risks associated with the PAP, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Protect Ningaloo a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Protect Ningaloo advising of consultation as well as when consultation would close for the purposes of preparing the EP. This enabled Woodside to assess feedback before EP submission.
- Consultation for this EP commenced 18 months ago in June 2024.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Protect Ningaloo 30 days for consultation. For consultation on EPs, 30 days is the usual period for Protect Ningaloo.
- In this context, Woodside allowed Protect Ningaloo a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Protect Ningaloo is appropriate and adapted to the nature of interests of Protect Ningaloo:

- Woodside published advertisements in 8 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- Woodside ran 1 targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and also of consultation.
- In absence of feedback, Woodside proactively sent a follow-up consultation email on 11 July 2024, reminding Protect Ningaloo of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Protect Ningaloo did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.
- The measures and controls described in this EP address the potential impact from the proposed activity on Protect Ningaloo's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5. TABLE 3: ENGAGEMENT REPORT WITH PERSONS OR ORGANISATIONS ASSESSED AS NOT RELEVANT

The black numbering **(N)** in the 'Summary of information provided and record of consultation for this EP' in Table 3 denotes an item raised by a stakeholder. The green numbering **(N)** in this section denotes Woodside's response to that item.

5.1 COMMONWEALTH AND WA STATE GOVERNMENT DEPARTMENTS OR AGENCIES – MARINE

5.1.1 Port of Cocos (Keeling) Islands (PCI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed PCI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to PCI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

While PCI is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for PCI to provide feedback during the consultation process.

5.2 TRADITIONAL CUSTODIANS AND NOMINATED REPRESENTATIVE CORPORATIONS

5.2.1 Walalakoo Aboriginal Corporation

Historical engagement:

- Between 3 – 26 April 2024, Woodside made a number of attempts to contact Walalakoo via telephone and text message to advise that Woodside would be visiting the Kimberley region and would like to meet in Broome or Derby to discuss activities and EPs. On the 10 April 2024, Woodside visited the Walalakoo office, which was unattended.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 10 May 2024, Woodside informed KLC that it had been unable to contact Walalakoo by phone or text message and that on two occasions when visiting Derby, the Walalakoo office was closed. KLC confirmed the Walalakoo contact number was correct and provided an alternative contact number.

  Please see North Rankin Complex Facility Operations EP (Submitted on 30 August 2024 and available on NOPSEMA website) App F and SI for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Walalakoo Aboriginal Corporation (Walalakoo) advising of the proposed activity (Record of Consultation, reference 6.2.49), providing a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website), and links to the *NOPSEMA Consultation Brochure and Guidelines, and Draft Policy for Managing Gender-Restricted Information*. The email requested information on the interests that Walalakoo and its members may have within the EMBA, information on how Walalakoo would like to engage, and requested that Walalakoo provide information to other individuals as required.
- On 15 July 2024, Woodside emailed Walalakoo a reminder about the proposed activity and to offer an opportunity to discuss the activity further, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report reference, 44.1). No response has been received.

Ongoing engagement:

- On 3 October 2024, Woodside emailed Walalakoo about an administrative matter relating to vendor payments (SI Report, reference 44.2).

Summary of Feedback, Objection or Claim	***Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
While Walalakoo is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Walalakoo to provide feedback during the consultation process.		

5.3 OTHER NON-GOVERNMENT GROUPS OR ORGANISATIONS (NGOs)

5.3.1 350 Australia (350A)

- Summary of information provided and record of consultation for this EP:
- On 18 June 2024, Woodside emailed 350A advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• On 11 July 2024, Woodside sent an email reminder to 350A, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
While 350A is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for 350A to provide feedback during the consultation process.		

5.3.2 Australian Conservation Foundation (ACF)

Summary of information provided and record of consultation for this EP: • On 18 June 2024, Woodside emailed ACF advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.* • On 11 July 2024, Woodside sent an email reminder to ACF, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
While ACF is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ACF to provide feedback during the consultation process.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5.3.3 Australian Marine Conservation Society (AMCS)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed AMCS advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to AMCS, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

While AMCS is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for AMCS to provide feedback during the consultation process.

5.3.4 Australasian Centre for Corporate Responsibility (ACCR)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed ACCR advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to ACCR, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report - Consultation Complete
While ACCR is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ACCR to provide feedback during the consultation process.

5.3.5 Conservation Council of Western Australia (CCWA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed CCWA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to CCWA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete
• While CCWA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CCWA to provide feedback during the consultation process.

5.3.6 Doctors for the Environment Australia (DEA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed DEA advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to DEA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
While DEA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for DEA to provide feedback during the consultation process.		

5.3.7 Environs Kimberley

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Environs Kimberley advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Environs Kimberley, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
While Environs Kimberley is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Environs Kimberley to provide feedback during the consultation process.		

5.3.8 Greenpeace Australia Pacific (GAP)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 June 2024, Woodside emailed GAP advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to GAP, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

While GAP is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for GAP to provide feedback during the consultation process.

5.3.9 Market Forces

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Market Forces advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Market Forces, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While Market Forces is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Market Forces to provide feedback during the consultation process.

5.4 OTHER

5.4.1 Individual

Summary of information provided and record of consultation for this EP:

- **(1)** On 21 June 2024, a member of the public emailed Woodside to express interest in finding out more about this EP (SI Report, reference 8.1).
- (1) On 25 June 2024, Woodside thanked the individual for its email and provided information about this EP (SI Report, reference 8.2).

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
(1) Request for information on this EP.	**(1)** **Woodside assessment:** Woodside is willing to provide information on this EP to interested individuals. **Woodside response:** Woodside provided information on this EP.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.
Summary Report - Consultation Complete		
While this individual is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period to provide feedback during the consultation process.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5.5 RESEARCH INSTITUTES AND LOCAL CONSERVATION GROUPS OR ORGANISATIONS

5.5.1 Australian Institute of Marine Science (AIMS)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed AIMS advising of the proposed activity (Record of Consultation, reference 6.2.14), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 21 June 2024, AIMS emailed Woodside (SI Report, reference 1.1) and:
  - **(1)** confirmed it has no concerns regarding the activities.
  - **(2)** requested appropriate communications to be conducted with vessels.
- **(1,2)** On 4 July 2024, Woodside thanked AIMS for its feedback and confirmed vessels will comply with marine orders for safe vessel operations (SI Report, reference 1.2).

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
(1) No operational concerns regarding the activities.	**(1)** **Woodside assessment:** Woodside noted AIMS feedback. **Woodside response:** Woodside thanked AIMS for confirming it has no concerns regarding the activities.	**(1)** Not required.
(2) Vessel communication.	**(2)** **Woodside assessment:** Section 6.6.1 of the EP outlines anti-collision measures for safe vessel operations. **Woodside response:** Woodside confirmed vessels will comply with marine orders for safe vessel operations.	**(2)** Refer to Section 6.6.1 of the EP.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP of this EP).	Woodside considers the measures and controls in the EP are appropriate.
Summary Report - Consultation Complete		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• While AIMS is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for AIMS to provide feedback during the consultation process.

5.5.2 Commonwealth Scientific and Industrial Research Organisation (CSIRO)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed CSIRO advising of the proposed activity (Record of Consultation, reference 6.2.14), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to CSIRO, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

- While CSIRO is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CSIRO to provide feedback during the consultation process.

5.5.3 Western Australian Marine Science Institution (WAMSI)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed WAMSI advising of the proposed activity (Record of Consultation, reference 6.2.1), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to WAMSI, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
• While WAMSI is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for WAMSI to provide feedback during the consultation process.		

5.5.4 University of Western Australia (UWA)

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed UWA advising of the proposed activity (Record of Consultation, reference 6.2.14), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to UWA, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	***Assessment of Merits of Feedback, Objection or Claim and Woodside's Response***	***Inclusion in Environment Plan***
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.
Summary Report - Consultation Complete		
• While UWA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for UWA to provide feedback during the consultation process.		

5.5.5 Curtin University

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Curtin University advising of the proposed activity (Record of Consultation, reference 6.2.14), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 July 2024, Woodside sent an email reminder to Curtin University, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

- While Curtin University is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Curtin University to provide feedback during the consultation process.

5.5.6 Murdoch University

Summary of information provided and record of consultation for this EP:

- On 18 June 2024, Woodside emailed Murdoch University advising of the proposed activity (Record of Consultation, reference 6.2.14), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community.*
- On 11 July 2024, Woodside sent an email reminder to Murdoch University, following up on the proposed activity (Record of Consultation, reference 6.2.50) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	*Assessment of Merits of Feedback, Objection or Claim and Woodside's Response*	*Inclusion in Environment Plan*
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see section 7.2.5 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

- While Murdoch University is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Murdoch University to provide feedback during the consultation process.

6.1 Information sheets

6.1.1 Consultation Information Sheet

Woodside Energy

CONSULTATION

INFORMATION SHEET

June 2024

NORTH RANKIN COMPLEX OPERATIONS ENVIRONMENT PLAN

CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside Energy Ltd (Woodside) consults relevant persons in the course of preparing an environment plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure the activity is carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and of an acceptable level. We want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Overview

Woodside is submitting a five-year revision of the Operations EP for the North Rankin Complex (NRC) facility and associated subsea infrastructure in Commonwealth waters, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth) (regulations). The EP covers the NRC facility, which is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The EP also covers two trunklines (1TL and 2 TL) that transports hydrocarbons from the NRC facility to the Karratha Gas Plant for processing.

Location and Operations

The NRC facility is located in Production License WA-1-L and the export pipelines (trunklines) in Pipeline Licenses WA-1-PL and WA-10-PL (see **Figure 1**). The NRC facility is in Commonwealth waters on the North West Shelf approximately 135 km north-west of Dampier in 125 m of water.

The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure. The produced gas and condensate from the facility is exported via two 130 km trunklines for processing at the Karratha Gas Plant.

Activity Overview

Woodside plans to continue producing hydrocarbons at the NRC facility and includes the following main activities to be undertaken during the next five-year operational period:

- Routine dry gas and condensate production, including processing, exportation and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) activities of the NRC facility and associated subsea infrastructure.

Decommissioning is not planned during the next five years. Any wells or production systems that reach end of useful life will be the subject of a separate future EP.

Production

The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

Inspection

Inspection of subsea infrastructure is the process of physical verification and assessment of subsea components to detect changes compared to its installed state. Typical site inspection activities include visual surveys via a remotely operated vehicle, side scan sonar surveillance, cathodic protection measurements and ultrasonic pipe condition checks.

Monitoring

Monitoring is the surveillance of the physical and chemical environment around subsea infrastructure. Monitoring activities may include process composition, corrosion probes, corrosion mitigation checks, and metocean and geological monitoring.

Maintenance

Maintenance of infrastructure is required at regular intervals to maintain performance reliability and prevent deterioration or failure of equipment. Maintenance activities may include cycling of valves and leak pressure testing.

Repair

Repair activities are those required when a subsea system or component is degraded or damaged as defined by design codes. Typical subsea repair activities include subsea control module replacement, riser or flowline replacement, scour prevention installation, and corrosion protection.

Support Vessels

Vessels will be used to support the NRC facility, undertake inspection, monitor, maintenance and repair of subsea infrastructure and to carry out standby duties during helicopter operations. An accommodation vessel may also be required for short periods for planned maintenance campaigns.

Support vessels will operate on dynamic positioning (DP) or potentially moored in the case of a semi-submersible accommodation support vessel. However, vessels are equipped with an anchor to be deployed in the event of an emergency.

Support vessels visit the facility on average once a week. Approximately 14 helicopter trips per fortnight are undertaken.

Table 1 provides a summary of the activities to be managed under the NRC Operations EP.

Table 2 provides the approximate locations of key infrastructure related to the North Rankin Complex.

Communications with mariners

The location of the NRC facility is marked on nautical charts and the platforms are surrounded by a 500 m radius petroleum safety zone (PSZ).

The Petroleum Activity Area (PAA) consists of two Operational Areas:

1. The Export Trunkline Operational Area is:
   - An area within 1500 m of 1TL and 2TL (between the NRC and the State waters boundary).
2. The Offshore Facility Operational Area includes:
   - An area within a 500 m radius around the NRC platforms.
   - An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL).
   - An area within 1500 m of Persephone (PSP) subsea infrastructure.

1 North Rankin Complex Operations Environment Plan | June 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Commercial fishers and other marine users are permitted to use the Operational Areas but are prohibited from entering the PSZ unless authorised by Woodside to avoid interactions between vessels and the NRC facility operations. All wells will continue to be marked on navigational charts.

Assessment

Woodside has undertaken an assessment of the potential impacts and risks to the environment as well as to potential risks to relevant persons arising from the planned activities as well as unplanned events. This assessment considers the timing, duration, and location of the activities.

Mitigation and management measures that will be implemented and are summarized in **Table 3**. Further details will be provided in the EP.

In preparing the EP, the intent is to minimise environmental, social and cultural impacts associated with the proposed activities and Woodside seeks your feedback to inform our decision making.

Joint Venture

Woodside Energy Ltd is the Titleholder for this activity on behalf of its joint venture partners, Shell Australia Pty Ltd, BP Developments Australia Pty Ltd, Chevron Australia Pty Ltd, CNOOC NWS Private Ltd, and Japan Australia LNG (MIMI) Pty Ltd.

We welcome your feedback by 19 July 2024.

Table 1. Activity Summary

North Rankin Complex Operations Environment Plan	
Facility type	Single integrated facility of two platforms (North Rankin A platform and North Rankin B platform)
Production License Areas	WA-1-L
Pipeline Licenses	WA-1-PL, WA-10-PL.
Approximate water depth	~ 30 – 125 m
Activities Summary	• Routine production. • Routine IMMR of the platforms and associated subsea infrastructure. • Platform well intervention, workovers and well control activities. • Well clean-up. • Non-routine and unplanned activities and incidents associated with the above.
Infrastructure	• Single integrated facility of two platforms including platform based wells. • Two export trunklines running from the NRC to the State waters boundary. • Two subsea Xmas trees, a manifold, a flowline and umbilicals associated with the Persephone reservoir subsea wells.
Vessels	Platform support vessels, subsea support vessels, possible accommodation support vessels and others appropriate to nature of petroleum activities.
Key dates	• Production commenced: 1984 • Routine operations: Ongoing • Estimated End of Field life: operational until at least 2036/37
Approximate duration	Operation of the NRC facility occurs 24 hours a day, 365 days a year. Temporary IMMR activities also occur as required to support day-to-day operations. The duration of IMMR activities are typically in the order of days to weeks. The End of Field Life of the NRC facility is not predicted during the life of this EP. Future decommissioning or drilling will be subject to a separate EP.
Operational Areas and Exclusion zones	The Petroleum Activities Area, delineating the spatial extent of the Petroleum Activities Program, consists of two Operational Areas: 1. The Export Trunklines Operational Area which includes an area within 1500 m of 1TL and 2TL (between the NRC and the State waters boundary). 2. The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC platforms; • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL); and • An area within 1500 m of Persephone (PSP) subsea infrastructure.
Distance to nearest town	~ 135 km north-west of Dampier
Distance to nearest marine park/nature reserve	The closest marine park to the NRC facility operational area is Montebello Marine Park, which is ~ 58 km from the PAA. The closest marine park to the trunkline operational area is Dampier Marine Park, which is ~ 7 km from the PAA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Table 2. Approximate locations of key infrastructure related to the North Rankin Complex Operations Petroleum Activities Program

Structure	Approximate Water depth (m)[1]	Latitude	Longitude	Petroleum Titles
Platforms				
North Rankin A (NRA) Platform	125	19° 35' 03.23" S	116° 08' 17.06'E	WA-1-L
North Rankin B (NRB) Platform	125	19° 35' 02.52" S	116° 08' 11.32'E	WA-1-L
Export Trunklines				
Export Trunkline 1TL start (at platform)	125	19° 35' 03.12" S	116° 08' 19.88" E	WA-1-PL
Export Trunkline 1TL end (at State waters boundary)	30	20° 20' 49.49" S	116° 42' 40.80" E	WA-1-PL
Export Trunkline 2TL start (at platform)	125	19° 35' 07.94" S	116° 08' 05.06" E	WA-10-PL
Export Trunkline 2TL end (at State waters boundary)	30	20° 20' 20.26" S	116° 43' 54.17" E	WA-10-PL
Subsea Infrastructure				
Persephone flowline start (at PSA02 well)	125	19°32'24.30"S	116°10'49.96"E	WA-1-L
Persephone flowline end (at platform)	125	19° 35' 03.23" S	116° 08' 17.06'E	WA-1-L
Subsea Wells				
PSA01 Well	125	19°32'25.02"S	19°32'25.02"S	WA-1-L
PSA02 Well	125	19°32'24.30"S	116°10'49.96"E	WA-1-L
Platform Wells				
22 platform wells from the North Rankin reservoir	125	19° 35' 03.23" S	116° 08' 17.06'E	WA-1-L
7 platform wells from the Perseus reservoir	125	19° 35' 03.23" S	116° 08' 17.06'E	WA-1-L

Environment That May Be Affected (EMBA)

The EMBA is the largest spatial extent where the NRC Operations EP activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities. For this EP, the EMBA has been developed combining numerous modelling outputs based on highly unlikely releases of hydrocarbons to the environment. The modeling scenarios that inform the EMBA are well or subsea loss of containment. The EMBA is depicted in **Figure 2**.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths that a highly unlikely hydrocarbon release could travel, depending on the weather and ocean conditions at the time of the release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

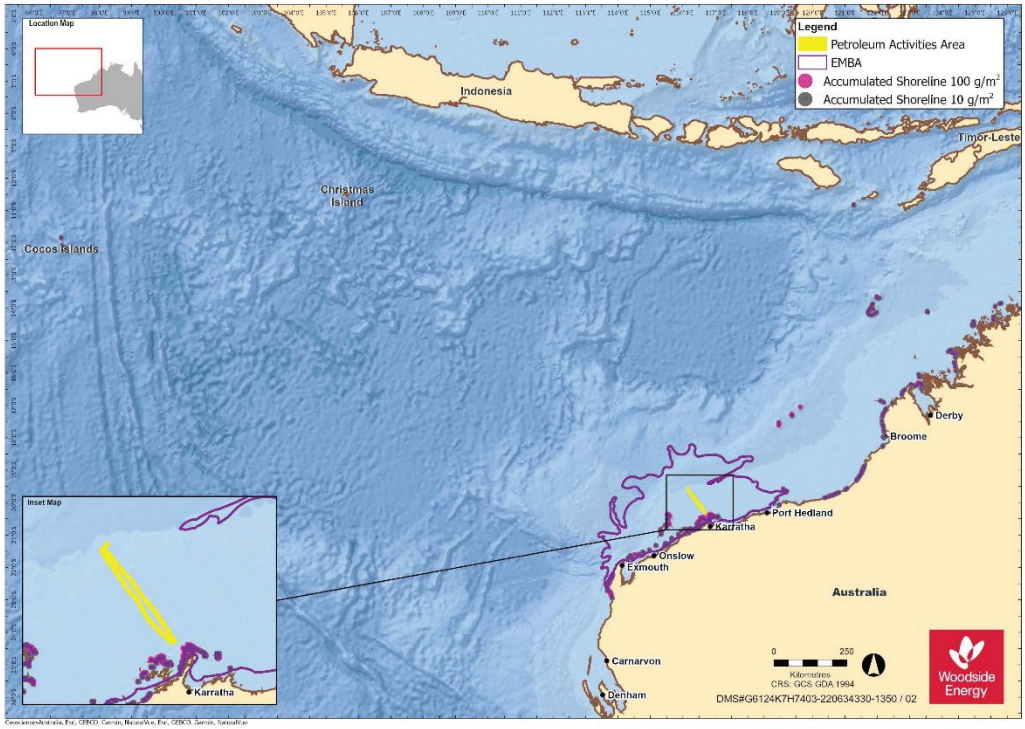

Figure 2: Environment that May Be Affected (EMBA) by the North Rankin Complex Operations Petroleum Activities Program

Mitigation and management measures

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the proposed activities considering timing, duration, location. A number of mitigation and management measures for proposed activities are outlined in **Table 3**. Further details will be provided in the EP.

Table 3. Summary of key risks and/or impacts and management measures associated with North Rankin Complex Operations.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Planned Activities (Routine and Non-routine)			
Physical Presence: Interaction with Other Marine Users	• Presence of NRC platforms and subsea infrastructure excluding and/or displacing other users from Petroleum Safety Zone and Operational Areas respectively.	• Potential isolated social impact resulting from interference with other sea users (e.g. commercial and recreational fishing, and shipping).	• Maintain a permanent 500m PSZ around the platforms. • Vessels adhere to regulatory requirements for navigational safety. • Notifying the Australian Hydrographic Office (AHO) of location of permanent new infrastructure to enable update of maritime charts. • Consult with relevant persons so that they are informed of the proposed activity.
Physical Presence: Disturbance to Seabed	• Presence of NRC and subsea infrastructure modifying marine habitats. • Subsea operations, inspection, maintenance and repair activities resulting in disturbance to seabed.	• Localised modification of seabed habitat (formation of artificial reef) within Operational Area with no lasting effect. • Localised modification of seabed habitat within Operational Area.	• Anchoring within the PSZ is prohibited except in emergency situations or under issuing of a specific permit. • Monitoring and maintenance of all subsea infrastructure will be completed as per IMMR process.
Routine Acoustic Emissions: Generation of Noise during Routine Operations	Noise generated within the Operational Area from: • facility and associated infrastructure • vessel and subsea IMMR activities • helicopters.	• Localised behavioural impacts to marine fauna around and within the Operational Area with no lasting effect.	• Comply with regulatory requirements to limit interaction with marine fauna.
Routine and Non-Routine Discharges: Subsea Operations and Activities	• Discharge of subsea control fluids. • Discharge of hydrocarbons remaining in subsea pipework and equipment as a result of subsea intervention works. • Discharge of chemicals remaining in subsea pipework and equipment or the use of chemicals for subsea IMMR activities. • Discharge of minor fugitive hydrocarbon/chemicals from subsea equipment.	• Localised decrease in water quality around subsea system within Operational Area with no lasting effect. • Potential localised decrease in water quality at release location during IMMR activities with no lasting effect. • Localised decrease in water quality at release location during IMMR activities with no lasting effect. • Potential localised decrease in water quality around subsea system within Operational Area with no lasting effect.	• Marine discharges will be managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. • Monitor subsea control fluid use, investigating material discrepancies to support identification of potential integrity failures.
Routine and Non-Routine Discharges: Produced Water	• Discharge of produced water from the facility.	• Slight short-term, localised decrease in water quality, marine sediments and marine biota.	• Marine discharges will be managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. • Online monitoring and procedural controls in place to monitor and control produced water discharge volume and oil in water (OIW) concentrations and prevent discharge of produced water with high OIW concentrations. • Routine chemical and ecotoxicity testing of produced water to assess environmental impact and allow for implementation of adaptive management.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Routine and Non-Routine Marine Wastewater Discharges: Utility Systems and Drains	• Discharge of sewage, grey water and putrescible waste from vessels and NRC to the marine environment. • Discharge of deck, bilge and drain water from vessels and NRC to the marine environment. • Discharge of reverse osmosis brine from vessels and NRC to the marine environment. • Discharge of cooling water from vessels and NRC to the marine environment.	• Localised decrease in water quality (increased nutrients and biological oxygen demand) with no lasting effect. • Localised decrease in water quality at the discharge location with no lasting effect. • Localised decrease in water quality at the discharge location with no lasting effect. • Localised increase in salinity at the discharge location with no lasting effect.	• Marine discharges managed according to regulatory requirements. • Chemicals selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. • Putrescible waste and sewage will be macerated before discharged.
Routine and Non-routine Atmospheric and Greenhouse Gas (GHG) Emissions: Fuel combustion, Flaring and Fugitives	• Direct emissions (Scope 1 and 2) associated with NRC fuel combustion and exhaust emissions, operational flaring and fugitive emissions, and vessel emissions (including incinerators). • Consideration of indirect (Scope 3) emissions associated with onshore processing, third party transportation, regassification and combustion by end users.	• Potential localised decrease in air quality due to direct emissions, limited to the airshed local to the facility. • Emissions associated with gas processing onshore (considered as indirect impacts) could result in temporary, localised reductions in air quality and are linked to concerns from some stakeholders that these emissions may lead to potential impacts on rock art. • Direct and indirect GHG emissions.	• Comply with legislative and regulatory requirements for marine air pollution, emissions (including NGERS and NPI) reporting and air emissions management. • Apply for and manage net direct and indirect GHG emissions to within the relevant baseline under the National Greenhouse and Energy Reporting (Safeguard Mechanism) Rule 2015. • Forecast, measure, monitor and estimate facility GHG emissions to inform optimisation management practices and minimise environmental impact of direct NRC and indirect onshore processing emissions. • Comply with legislative and regulatory requirements applicable to onshore gas processing, including operational licences, Ministerial Conditions and associated management plans covering greenhouse gas emissions, air quality, and cultural heritage • Monitor market developments related to the contribution of natural gas in the energy transition.
Routine Light Emissions: Light Emissions from Platform, Vessel Operations and Operational Flaring	• Light emissions from NRC and vessels. • Light emissions from NRC during flaring.	• Localised potential for behavioural disturbance of species in close proximity to riser platform and vessels with no lasting effect.	• Lighting limited to the minimum required for navigational and safety requirements, except for emergency events.
Unplanned Events (Accidents / Incidents)			
Unplanned Hydrocarbon or Chemical Release: Hydrocarbon Release During Bunkering/ Refuelling and Chemical Release During Transfer, Storage and Use	• Accidental release of hydrocarbons to the marine environment during bunkering. • Accidental discharge of chemicals to the marine environment during transfer, storage or use.	• Potential minor short-term disruption to marine fauna, including protected species and/or localised impacts to water quality. • Potential slight short-term impacts to the marine fauna, and localised temporary impacts to water quality and marine sediments.	• Contract vessels to comply with regulatory requirements for safe vessel operations and to reduce the risk of accidental hydrocarbon release during vessel operations and transfer. • Implementation of bunkering procedures. • Safe storage of chemicals and diesel to prevent discharge.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Unplanned Discharges: Hazardous and Waste Management	• Incorrect disposal or accidental discharge of non hazardous and hazardous waste to the marine environment.	• Potential slight shortterm impacts to the marine fauna, and localised temporary impacts to water quality and marine sediments.	• Compliance with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes (i.e. Marine Orders 95 and 94). • Compliance with Waste Management Plans for the storage, handling and transportation of wastes. • Attempted recovery of dropped waste objects where safe and practicable.
Physical Presence: Interactions with Marine Fauna	• Physical presence of vessels resulting in collision with marine fauna.	• Potential injury or death of marine fauna (single animal), including protected species.	• Comply with regulatory requirements for interactions (e.g., EPBC Regulations 2000 – Part 8 Division 8.1) with marine fauna to reduce the likelihood of a collision occurring.
Physical Presence: Introduction of Invasive Marine Species (IMS)	• Invasive species in vessel ballast tanks or on vessels/submersible equipment.	• Potential introduction of invasive marine species possibly resulting in an alteration of the localised environment.	• Ballast water and biofouling will be managed according to regulatory requirements, including the Australian Ballast Water Management Requirements, and the Australian Biofouling Management Requirements, as applicable. • Woodside's IMS risk assessment process will be applied to project vessels and immersible equipment entering the PAA.
Unplanned Hydrocarbon Release: Loss of Well Containment	• Release of hydrocarbons resulting from loss of platform well containment. • Release of hydrocarbons resulting from loss of subsea well containment.	Potential significant impacts to the marine environment: • long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. • disruption to marine fauna, including protected species. • potential short-term interference with or displacement of other sea users.	Preventing loss of well containment: • Well operated in compliance with the accepted safety case and well operation management plan (WOMP) including implementation of barriers to prevent a loss of well control. • Emergency response activities would be implemented in line with the OPEP.
Unplanned Hydrocarbon Release: Subsea Equipment Loss of Containment	• Release of hydrocarbons resulting from subsea equipment loss of containment within the NRC exclusion zone. • Release of hydrocarbons resulting from subsea equipment loss of containment outside the NRC exclusion zone.	Potential significant impacts to the marine environment: • long-term impacts to sensitive offshore and nearshore areas. • disruption to marine fauna, including protected species. • potential short-term interference with or displacement of other sea users.	Preventing subsea equipment loss of containment: • Subsea equipment operated in compliance with the accepted safety case. • Emergency response activities would be implemented in line with the OPEP.
Unplanned Hydrocarbon Release: Topsides Loss of Containment	• Hydrocarbon release from topside process equipment to the marine environment and atmosphere. • Hydrocarbon release from topsides non-process equipment to the marine environment.	Potential significant impacts to the marine environment: • medium-term impacts to sensitive offshore and nearshore areas. • disruption to marine fauna, including protected species. • potential short-term interference with or displacement of other sea users.	Preventing topsides loss of containment: • Activity is operated in compliance with the accepted safety case. • Emergency response activities would be implemented in line with the OPEP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Unplanned Hydrocarbon Release: Loss of Structural Integrity	• Hydrocarbon release from platform well to the marine environment and atmosphere. • Hydrocarbon release from subsea equipment to the marine environment and atmosphere. • Hydrocarbon release from topsides equipment to the marine environment and atmosphere. • Marine environment footprint and associated hydrocarbon and chemical release associated with structural collapse of NRC.	Potential significant impacts to the marine environment: • long-term impacts to sensitive offshore and nearshore areas. • disruption to marine fauna, including protected species. • potential short-term interference with or displacement of other sea users.	Preventing loss of structural integrity: • Activity is operated in compliance with the accepted safety case. • Emergency response activities would be implemented in line with the OPEP.
Unplanned Hydrocarbon Release: Loss of Marine Vessel Separation	• Hydrocarbon release from platform well to the marine environment and atmosphere. • Hydrocarbon release from subsea equipment to the marine environment and atmosphere. • Hydrocarbon release from topsides equipment to the marine environment and atmosphere. • Marine environment footprint and associated hydrocarbon and chemical release associated with structural collapse of NRC.	Potential significant impacts to the marine environment: • long-term impacts to sensitive offshore and nearshore areas. • disruption to marine fauna, including protected species. • potential short-term interference with or displacement of other sea users.	Preventing loss of marine vessel separation: • Activity is operated in compliance with the accepted safety case. • Compliance with regulatory requirements for safe vessel operations (i.e. Marine Orders 21, 27 and 30). • Notify relevant stakeholders as required, prior to commencement and on completion of activities. • Emergency response activities would be implemented in line with the OPEP.
Unplanned Hydrocarbon Release: Loss of Control of Suspended Load from NRC Platform(s) Lifting Operations	• Hydrocarbon release from subsea equipment to the marine environment and atmosphere. • Hydrocarbon release from topsides equipment to the marine environment and atmosphere.	Potential significant impacts to the marine environment: • long-term impacts to sensitive offshore and nearshore areas. • disruption to marine fauna, including protected species. • potential short-term interference with or displacement of other sea users.	Preventing loss of control of suspended load: • Activity is operated in compliance with the accepted safety case. • Emergency response activities would be implemented in line with the OPEP.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **19 July 2024** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/what-we-do/consultation-activities.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as relevant and appropriate.

Your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to the NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA .

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit: www.woodside.com/what-we-do/consultation-activities

6.1.2 Summary Information Sheet

Woodside Energy

CONSULTATION

SUMMARY INFORMATION SHEET

June 2024

NORTH RANKIN COMPLEX OPERATIONS ENVIRONMENT PLAN

NORTH WEST SHELF, NORTH-WEST AUSTRALIA

In the course of preparing an Environment Plan (EP), Woodside Energy Ltd (Woodside) consults relevant persons to notify them and obtain their input. This assists Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. Woodside wants to give relevant persons whose functions, interests or activities may be affected by the proposed activity the opportunity to identify themselves and provide feedback on our proposed activity.

This summary information sheet provides a high-level overview of the North Rankin Complex Operations Environment Plan. Further details, including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures, are available within the North Rankin Operations Environment Plan Consultation Information Sheet (June 2024) which can be found at: www.woodside.com/what-we-do/consultation-activities

Overview

Woodside is submitting a five-year revision of the EP for the North Rankin Complex (NRC) facility.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields.

The NRC facility is located in Commonwealth waters in 125 m water depth and associated subsea infrastructure in water depths ranging from -30 m to 125 m. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure. The gas and condensate are transported onshore for processing at the onshore Karratha Gas Plant via two 130 km trunklines.

A map showing the location of the activities is provided below.

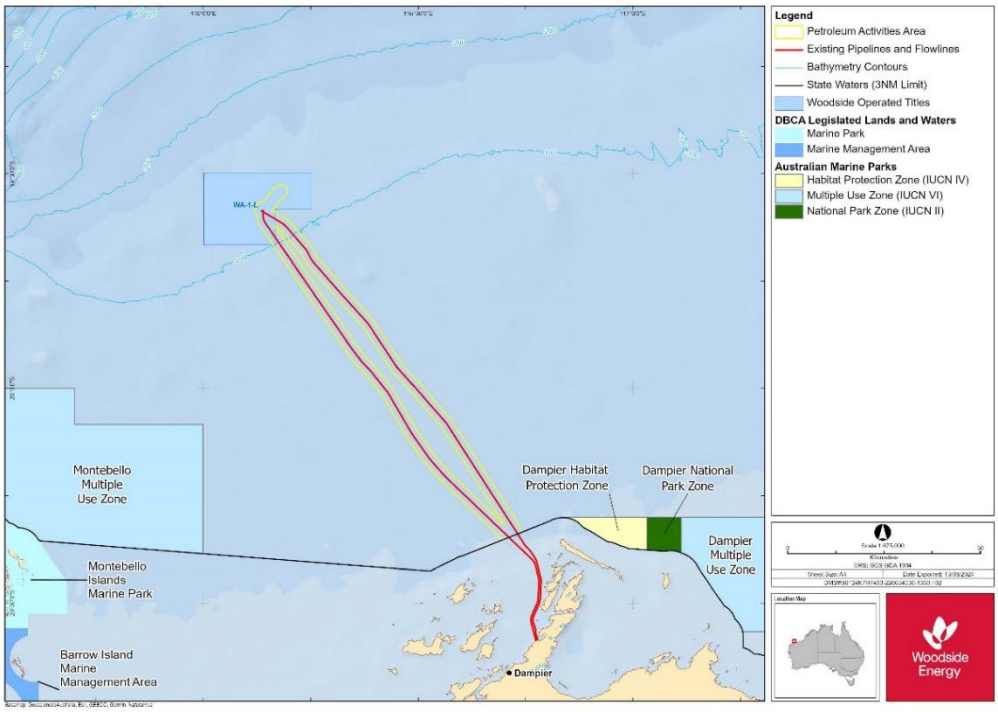

Figure 1: North Rankin Complex Operational Areas

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Work method

Key features of the North Rankin Complex Operations include:

- Two fixed platforms: NRA and NRB. The platforms stand in water depth of approximately 125 m. The NRA platform includes process facilities, utilities, drilling equipment, temporary refuge, and a helideck. The NRB platform comprise of process facilities, accommodation and the Central Control Room. The NRB platform provides gas compression and condensate pumping for the well fluids produced from the NRA wells.
- Two export pipelines (trunklines) in water depth ranging between 30 m and 125 m, extending from the offshore platform to the onshore Karratha Gas plant.

Summary of key activities includes:

- Routine production
- Routine inspection, monitoring, maintenance, and repair (IMMR) of the platform and associated subsea infrastructure
- Well clean-up
- Platform well intervention, workovers and well control activities
- Non-routine and unplanned activities and incidents associated with the above.

During normal operations, vessels will typically be limited to support vessels and IMMR vessels. Vessels will operate 24 hours per day for the duration of activities. Platform support vessels will operate once weekly, the accommodation support vessel may be required for short periods, heavy lift vessels will be used for the removal of equipment, and helicopter support occurs approximately 14 trips fortnightly.

Production of gas and condensate began in 1984 and is expected to continue until at least 2036/37.

Figure 2: North Rankin Complex Facility

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment That May Be Affected (EMBA)

The EMBA is the largest spatial extent where the North Rankin Complex Operations EP activities could potentially have an environmental consequence (Figure 3). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP, is determined by modelling the highly unlikely event of a hydrocarbon release. The modeling scenarios that inform the EMBA for this EP are well or subsea loss of containment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on various factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected at one time. The specific and minimal part of the EMBA that is affected will be only known at the time of the release.

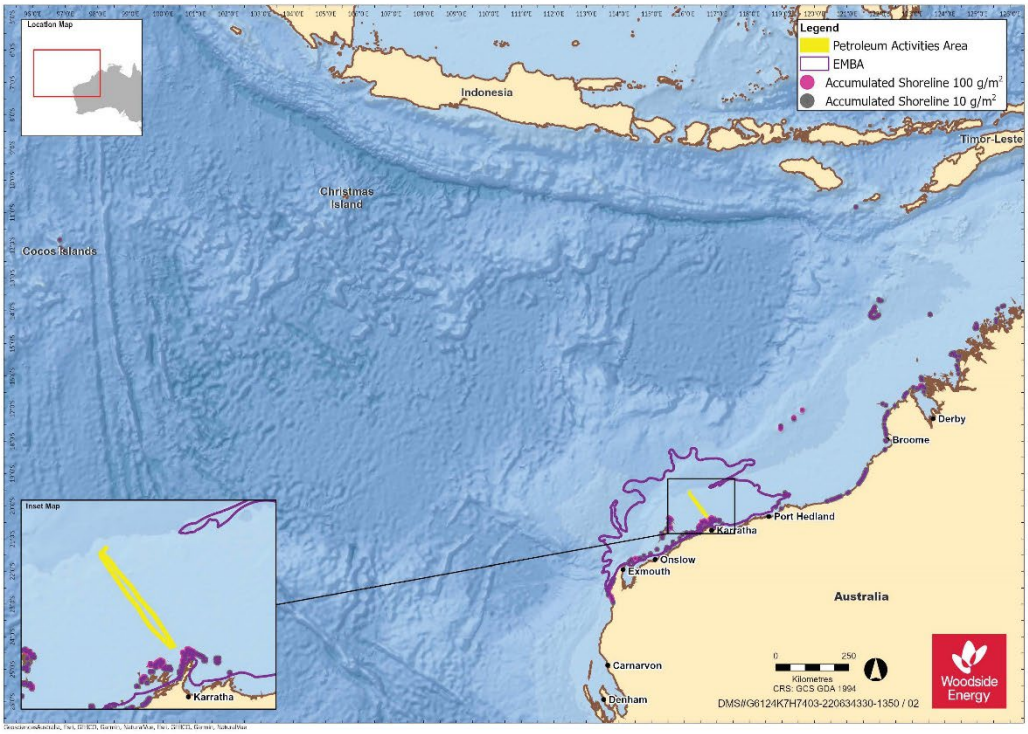

Figure 3: Environment that May Be Affected (EMBA) by the North Rankin Complex Operations Petroleum Activities Program

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **19 July 2024** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:
www.woodside.com/what-we-do/consultation-activities

Please note that feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our Environment Plan for the proposed activities, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* and may support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA .

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit:

6.2 Initial Consultation

6.2.1 Email sent on 18 June 2024 to: Australian Border Force (ABF), Department of Foreign Affairs and Trade (DFAT) , Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA), Australian Maritime Safety Authority (AMSA) – Marine Pollution, Pilbara Ports Authority, Port of Cocos (Keeling) Island, Kimberley Ports Authority, Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel), Ningaloo Coast World Heritage Advisory Committee (NCWHAC) , Department of Biodiversity, Conservation and Attractions (DBCA), Department of Industry, Science and Resources (DISR), Department of Energy, Mines, Industry Regulation and Safety (DEMIRS – now Department of Mines, Petroleum and Exploration (DMPE)), Western Gas, Exxon Mobil Australia Resources Company, Shell Australia, BP Developments Australia, Carnarvon Energy, PE Wheatstone, Kyushu Electric Wheatstone, Eni Australia, Finder Energy (Finder No 16), Jadestone, KUFPEC, Vermilion Oil & Gas, Santos NA Energy Holdings / Santos Ltd / Santos WA Northwest / Santos Offshore / Santos WA Southwest / Santos (BOL) / Santos WA PVG, Coastal Oil and Gas / Fox Resources, Bounty Oil and Gas, OMV Australia, KATO Energy / KATO Corowa / KATO NWS / KATO Amulet, INPEX Alpha, JX Nippon O&G Exploration (Australia), Beagle No. 1, Australian Energy Producers (AEP), Shire of Carnarvon, Town of Port Hedland, Shire of Wyndham-East Kimberley, Shire of Cocos (Keeling) Islands, Indian Ocean Territories Regional Development Organisation, Port Hedland Chamber of Commerce and Industry, Carnarvon Chamber of Commerce and Industry, East Kimberley Chamber of Commerce and Industry, Derby Chamber of Commerce and Industry, Broome Chamber of Commerce and Industry, Australian Conservation Foundation (ACF), Australian Marine Conservation Society (AMCS), Conservation Council of Western Australia (CCWA), Greenpeace Australia Pacific (GAP), 350 Australia (350A), Australasian Centre for Corporate Responsibility (ACCR), Doctors for the Environment Australia (DEA), Friends of Australian Rock Art. Inc (FARA), Market Forces, Environs Kimberley, Cape Conservation Group (CCG), Protect Ningaloo, Western Australia Marine Science Institution (WAMSI)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Activity: North Rankin Complex Operations

Environment Plan	North Rankin Complex Operations Environment Plan
Summary of activities	Continued dry gas and condensate production at series of reservoirs.
Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is: • An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Platform support vessels, subsea support vessels, possible accommodation support vessels and others appropriate to nature of petroleum activities.

Feedback:
If you have feedback specific to the proposed activities, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.2.2 Email sent on 19 June 2024 to: Exmouth Community Liaison Group (CLG), Karratha Community Liaison Group (CLG), Onslow Chamber of Commerce and Industry, Shire of Derby/West Kimberley, Shire of Broome, Shire of Exmouth, City of Karratha

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

6.2.3 Email sent on 18 June 2024 to: Department of Defence (DoD)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please also find attached a defence area map in the areas surrounding the operational area.

Activity: North Rankin Complex Operations

Environment Plan	North Rankin Complex Operations Environment Plan
Summary of activities	Continued dry gas and condensate production at series of reservoirs.
Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is:

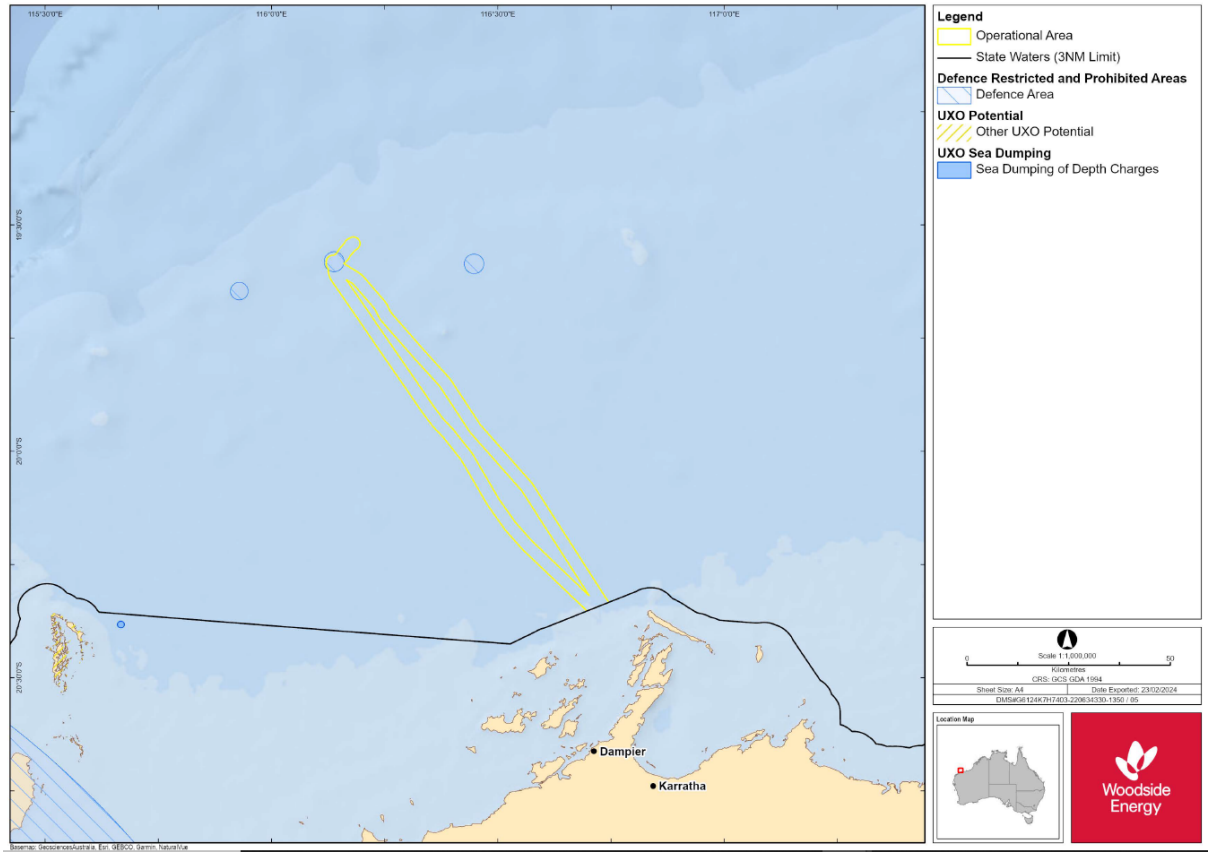
	• An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).
Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

Feedback:
If you have feedback specific to the proposed activities described under the NRC Operations EP, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).



Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.2.3.1 Attachment: Defence zone map

6.2.4 Email sent on 18 June 2024 to: Telstra, Australian Communications and Media Authority (ACMA)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information

It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please also find attached a vessel density map and GIS shape files.

Please note that Woodside will:
- Notify the AHO no less than 4 weeks before operations commence,
- Notify AMSA's JRCC at least 24-48 hours before operations commence,
- Notify AMSA's JRCC when operations end,
- Provide updates to both the AHO and AMSA on any material changes to planned activities,
- Ensure vessels exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea,
- Evaluate and implement adequate anti-collision measures including but not limited to installation of Automatic Identification System (AIS) units, offshore guard vessel/s that can monitor traffic, and additional warnings and/or lights to attract attention.

6.2.6.1 Attachment: Shipping lanes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

6.2.7 Email sent on 18 June 2024 to: Australian Fisheries Management Authority (AFMA), North West Slope Trawl Fishery, Western Deepwater Trawl Fishery, Commonwealth Fisheries Association (CFA), Pearl Producers Association (PPA)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview

The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Operational Areas and Exclusion Zones
The Petroleum Activities Area (PAA), delineating the spatial extent of the Petroleum Activities Program, consists of two Operational Areas:

The Offshore Facility Operational Area includes:

- An area within a 500 m radius around the NRC facility.
- An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL).
- An area within 1500 m of Persephone (PSP) subsea infrastructure.

The Export Trunkline Operational Area is:

- An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please note that Woodside has provided consultation information directly to licence holders it has assessed as 'relevant persons' for this EP, as well as relevant fishery representative bodies.

Please let us know if you require notification prior to and on completion of the proposed activities.

6.2.8 Email sent on 18 June 2024 to: Department of Agriculture, Fisheries and Forestry (DAFF) - Fisheries

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Operational Areas and Exclusion Zones
The Petroleum Activities Area (PAA), delineating the spatial extent of the Petroleum Activities Program, consists of two Operational Areas:

The Offshore Facility Operational Area includes:

- An area within a 500 m radius around the NRC facility.
- An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL).
- An area within 1500 m of Persephone (PSP) subsea infrastructure.

The Export Trunkline Operational Area is:

- An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is: • An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).
Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Fisheries	**Commonwealth fisheries** Offshore Facility and Export Trunklines Operational Areas: No active fishery. EMBA: North West Slope Trawl Fishery and Western Deepwater Trawl.

Biosecurity:
With respect to biosecurity matters, please note the following information below:

Environment description:

The operational areas for North Rankin Complex routine operations are located in water depths of approximately 30-162 m in the North West Shelf Province (NWS Province) within North-West Marine Region (NWMR). The NWS Province includes the continental shelf between the North West Cape and Cape Bougainville and characterised by sand and gravel to mud seabed habitats.

Potential IMS risk	***IMS risk mitigation management***
Accidental introduction and establishment of invasive marine species	All vessels will manage their ballast water in compliance with Australian Ballast Water Management Requirements under the *Biosecurity Act 2015*) to prevent the introduction of IMS. Internationally sourced project vessels will manage their biosecurity risk associated with biofouling in compliance with Australian Biofouling Management Requirements. Woodside's IMS risk assessment process will be applied to MODU, project vessels and relevant immersible equipment undertaking the Petroleum Activities Program. Based on the outcomes of each IMS risk assessment, management measures commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced.

Feedback:
If you have feedback specific to the proposed activities described under the NRC Operations EP, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.2.9 Email sent on 18 June 2024 to: Director of National Parks (DNP)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Activity: North Rankin Complex Operations

Environment Plan	North Rankin Complex Operations Environment Plan
Summary of activities	Continued dry gas and condensate production at series of reservoirs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

Australian Marine Parks

We note Australian Government Guidance on consultation activities and confirm that:

- No AMP overlaps with the Operational Areas with the closest being Dampier AMP ~7 km from the Operational Areas
- We have assessed potential impacts to AMPs in the development of the revised EP and believe that impacts from planned activities are reduced to ALARP and Acceptable levels.
- Through review of new hydrocarbon spill modelling the following AMPs may be contacted in the event of a spill at either 50 ppb dissolved or 100 ppb entrained hydrocarbon thresholds:
    - Gascoyne
    - Dampier
    - Montebello
    - Ningaloo
    - Eighty Mile Beach

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Mermaid Reef
- Cocos (Keeling) Islands

A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities. This plan will include details on notification to relevant agencies and organisations as soon as practicable following an occurrence. The Director of National Parks will be advised if an environmental incident occurs that may impact the values of any Marine Park.

Feedback:
If you have feedback specific to the proposed activities described under the NRC Operations EP, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

6.2.11 Email sent on 18 June 2024 to: Department of Primary Industries and Regional Development (DPIRD)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Operational Areas and Exclusion Zones
The Petroleum Activities Area (PAA), delineating the spatial extent of the Petroleum Activities Program, consists of two Operational Areas:

The Offshore Facility Operational Area includes:

- An area within a 500 m radius around the NRC facility.
- An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL).
- An area within 1500 m of Persephone (PSP) subsea infrastructure.

The Export Trunkline Operational Area is:

- An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please note that Woodside has provided consultation information directly to licence holders it has assessed as 'relevant persons' for this EP, as well as relevant fishery representative bodies.

Please let us know if you require notification prior to and on completion of the proposed activities.

Dear Stakeholder

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview

The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Operational Areas and Exclusion Zones

The Petroleum Activities Area (PAA), delineating the spatial extent of the Petroleum Activities Program, consists of two Operational Areas:

The Offshore Facility Operational Area includes:

- An area within a 500 m radius around the NRC facility.
- An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL).
- An area within 1500 m of Persephone (PSP) subsea infrastructure.

The Export Trunkline Operational Area is:

- An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is enclosed, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please let us know if you require notification prior to and on completion of the proposed activities.

Activity: North Rankin Complex Operations

Environment Plan	**North Rankin Complex Operations Environment Plan**
Summary of activities	Continued dry gas and condensate production at series of reservoirs.
Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility (PSZ). • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is: • An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).
Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

6.2.14 Email sent on 18 June 2024 to: University of Western Australia (UWA), Curtin University, Murdoch University, Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australian Institute of Marine Science (AIMS)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Woodside is seeking your advice regarding any research activities that your institution may be undertaking that may overlap with our proposed activities.

Activity: North Rankin Complex Operations

Environment Plan	North Rankin Complex Operations Environment Plan
Summary of activities	Continued dry gas and condensate production at series of reservoirs.
Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is: • An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).
Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

Feedback:
If you have feedback specific to the proposed activities described under the NRC Operations EP, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

6.2.16 Email sent on 18 June 2024 to: Department of Planning, Lands and Heritage (DPLH)

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:
- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please also find attached the details of WA shipwrecks that are relevant for this EP.

Given the proximity of the proposed activities to Marine Parks, Woodside is consulting with the Department of Biodiversity, Conservation and Attractions (DBCA) for this EP. Woodside is also consulting with the Western Australian Museum and provided it with relevant shipwreck information for this EP.

6.2.17 Email sent on 18 June 2024 to: Western Australian Museum

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview

The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Please also find attached the details of WA shipwrecks that are relevant for this EP.

As per the *Underwater Cultural Heritage Act 2018 (Cwth),* Woodside will contact the Commonwealth regulator, the Department of Climate Change, Energy, the Environment and Water (DCCEEW), regarding this EP.

Woodside also refers to the Commonwealth Government's Underwater Cultural Heritage (UCH) Guidance document regarding assessments and the draft Guidelines for Working in Near and Offshore Environment to Protect Underwater Cultural Heritage.

Activity: North Rankin Complex Operations

Environment Plan	North Rankin Complex Operations Environment Plan
Summary of activities	Continued dry gas and condensate production at series of reservoirs.
Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is: • An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).
Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

Feedback:
If you have feedback specific to the proposed activities described under the NRC Operations EP, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

6.2.18 Email sent on 19 June 2024 to: Shire of Ashburton

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview
The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Woodside is required to manage environmental impacts and risks to the EMBA by its proposed activities to As Low As Reasonably Practicable (ALARP) and to an acceptable level, as required by the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Environment Regulations), through the implementation of the EP. Woodside will submit the proposed EP to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Preparedness and Response
In the course of developing the EP, Woodside will develop the oil spill preparedness and response position tailored to this activity including the drafting of the Oil Pollution First Strike Plan which details the potential impacts, notifications and response mitigations that may be executed to manage an emergency event. Woodside consults with the relevant jurisdictional authorities and controlling agencies, including the Western Australian Department of Transport (DoT), the Australian Maritime Safety Agency (AMSA) and, in some circumstances, relevant port authorities, during the plan drafting process to inform mitigation management measures in place for the proposed activities. Woodside may also consult with other relevant external emergency management agencies, including LEMC, to ensure emergency management plans are aligned with effective outcomes.

In addition to the jurisdictional authorities and controlling agencies, the plan includes standard emergency notifications to agencies including NOPSEMA, the Department of Climate Change, Energy, the Environment and Water (DCCEEW), the Director of National Parks (DNP), and the WA Department of Biodiversity, Conservation and Attractions (DBCA). Where applicable, notification information for relevant Shires is also included in the Oil Pollution First Strike Plan.

Cultural heritage
Woodside routinely utilises the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development process and includes the results of these inquiry system searches as an appendix to each EP.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. It is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

Activity: North Rankin Complex Operations

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment Plan	North Rankin Complex Operations Environment Plan
Summary of activities	Continued dry gas and condensate production at series of reservoirs.
Permit Area	Activities will occur within Production License WA-1-IL and WA-10-PL.
Location	The NRC facility is located ~135 km north west of Dampier, Western Australia in water depths of ~125 m. Subsea infrastructure is located in water depths from ~30-125 with two export trunklines extending 105 km to the State waters boundary.
Approx. Water Depth (m)	30-125 m
Schedule	Production Commenced: 1984 Routine Operations: Ongoing
Operational Areas and Exclusion Zones	The Petroleum Activity Area (PAA) consists of two Operational Areas: The Offshore Facility Operational Area includes: • An area within a 500 m radius around the NRC facility. • An area within 1500 m of NRC subsea infrastructure (excluding 1TL and 2TL). • An area within 1500 m of Persephone (PSP) subsea infrastructure. The Export Trunkline Operational Area is: • An area within 1500 m of 1TL and 2TL (between the NRC facility and the State waters boundary).
Infrastructure	Key infrastructure includes, but is not limited to: • Two interconnected platforms, NRA and NRB. • Export trunklines (1TL and 2TL) (Commonwealth waters). • Subsea infrastructure (Xmas-trees, manifolds, flowlines and umbilicals).
Vessels	Support vessels will be used for platform support, subsea support vessels to undertake IMMR activities, accommodation support.

Feedback:
If you have feedback specific to the proposed activities described under the NRC Operations EP, we welcome your feedback via email at Feedback@woodside.com, via phone call at 1800 442 977 or via the feedback form on our website by **19 July 2024.**

Your feedback and our response will be included in our EP, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment)*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Regulations 2023 (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

As per Woodside's ongoing consultation approach, feedback and comments received from relevant persons continue to be assessed and responded to, as required, throughout the life of an EP, including during its assessment and once accepted, in accordance with the intended outcome of consultation.

NOPSEMA has published the brochure *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Please let us know if the Shire would like to receive start- and end-of-activity notifications.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.2.19 Email sent on 19 June 2024 to: Chevron

Woodside is planning to submit a five-year revision of the Operations Environment Plan (EP) for the North Rankin Complex (NRC) facility.

Overview

The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

The following proposed activities will continue at the facility:

- Routine production
- Routine inspection, monitoring, maintenance and repair (IMMR)
- Platform well intervention, workovers, and well control activities
- Well clean-up
- Non-routine and unplanned activities and incidents associated with the above.

Environment that May be Affected (EMBA)
Woodside consults persons or organisations located within the EMBA and whose functions, interests or activities may be affected by a proposed petroleum activity.

The EMBA is the largest spatial extent where activities could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this EP is determined by a highly unlikely release of hydrocarbons to the environment due to a well or subsea loss of containment.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated

6.2.20 Email sent to Balanggarra Aboriginal Corporation – 18 June 2024

Dear [Individual 2]

Woodside Energy (Woodside) advises Balanggarra Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Balanggarra Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Balanggarra Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of the Balanggarra Aboriginal Corporation, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards,

6.2.21 Email sent to Bardi and Jawi Niimidiman Aboriginal Corporation – 19 June 2024

Hi [Individual 4]

Not sure if you have heard, but [Individual 5] has resigned, so I will be taking back the being the focal person with the Kimberley groups. I tried to call you earlier, however if your require more info than the previous email I sent, please reach out.

Woodside Energy (Woodside) advises Bardi Jawi Niimidiman Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Bardi Jawi Niimidiman Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Bardi Jawi Niimidiman Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

6. How could these activities impact your cultural values, interests, and activities?
1. Does protecting the environment do enough to protect your cultural values?
2. What are your concerns about the proposed activities and how can we resolve those issues?
3. What other elements should be considered in the Environmental Plan?
4. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of the Bardi Jawi Niimidiman Aboriginal Corporation, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on how and when we can engage.

Kind regards,

6.2.22 Email sent to Burrabalayji Thalanyji Aboriginal Corporation (BTAC) – 19 June 2024

Hi [Individual 6]

Woodside Energy (Woodside) advises Buurabalayji Thalanyji Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Buurabalayji Thalanyji Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Buurabalayji Thalanyji Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

5. How could these activities impact your cultural values, interests, and activities?
6. Does protecting the environment do enough to protect your cultural values?
1. What are your concerns about the proposed activities and how can we resolve those issues?
2. What other elements should be considered in the Environmental Plan?
3. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards,

6.2.23 Email sent to Dambimangari Aboriginal Corporation – 18 June 2024

Dear [Individual 7]

I hope all is well.

Woodside Energy (Woodside) advises Dambimangari Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in **1984** and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Dambimangari Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Dambimangari Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of the Dambimangari Aboriginal Corporation, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on how you would like to engage.

Kind regards,

6.2.24 Email sent to Gogolanyngor Aboriginal Corporation – 16 June 2024

Hi [Individual 8]

Hope all is well mate. I will give you a call this week.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy (Woodside) advises Gogolanyngor Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations

Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan

EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Gogolanyngor Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Gogolanyngor Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

6. How could these activities impact your cultural values, interests, and activities?
1. Does protecting the environment do enough to protect your cultural values?
2. What are your concerns about the proposed activities and how can we resolve those issues?
3. What other elements should be considered in the Environmental Plan?
4. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. 6.2.25 Email sent to Karajarri Traditional Lands Association (Aboriginal Corporation) – 19 June 2024

Dear Karajarri Lands Trust Association

Woodside Energy (Woodside) advises Karajarri Lands Trust Association of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Karajarri Lands Trust Association .

Consultation with Woodside

Woodside wishes to discuss the interests that Karajarri Lands Trust Association and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

5. How could these activities impact your cultural values, interests, and activities?
1. Does protecting the environment do enough to protect your cultural values?
2. What are your concerns about the proposed activities and how can we resolve those issues?
3. What other elements should be considered in the Environmental Plan?

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

6.2.26 Email sent to Kariyarra Aboriginal Corporation – 17 June 2024

Dear [Individual 9],

My name is [Individual 10], and I am a First Nations Engagement Advisor at Woodside for the Pilbara Region. I am just returning from maternity leave and wanted to provide some information to the Kariyarra Community on an Environmental Plan that may be of relevance.

Woodside Energy (Woodside) advises **Kariyarra Aboriginal Corporation** of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with **Kariyarra Aboriginal Corporation.**

Consultation with Woodside

Woodside wishes to discuss the interests that **Kariyarra Aboriginal Corporation** and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

6.2.28 Email sent to Murujuga Aboriginal Corporation – 18 June 2024

Hi [Individual 11]

I hope all is well.

The attached environment plan is a 5 year revision plan for an existing asset which commenced in 1984.

Woodside Energy (Woodside) advises Murujuga Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Murujuga Aboriginal Corporation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Consultation with Woodside

Woodside wishes to discuss the interests that Murujuga Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. 6.2.29 Email sent to Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC) – 19 June 2024

Hi [Individual 12]

Woodside Energy (Woodside) advises Nganhurra Thanardi Garrbu Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:
- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Nganhurra Thanardi Garrbu Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Nganhurra Thanardi Garrbu Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards,

6.2.30 Email sent to Ngarluma Aboriginal Corporation – 19 June 2024

Dear [Individual 13]

Thank you for sending through the NAC protocols for communication. The document doesn't explicitly deal with Environment Plan-related discussions so for the avoidance of doubt I have cc'd in all parties referred to therein.

Woodside Energy (Woodside) advises Ngarluma Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Ngarluma Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Ngarluma Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA. We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by 19 July 2024 via:

- Email to Feedback@woodside.com
- Call 1800 442 977.

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. 6.2.35 Email sent to Wanjina-Wanggurr (Native Title) Aboriginal Corporation – 18 June 2024

Dear [Individual 20]

Woodside Energy (Woodside) advises Wanjina Wunggurr Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Wanjina Wunggurr Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Wanjina Wunggurr Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

Woodside Energy (Woodside) advises Wanparta Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Wanparta Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Wanparta Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of the Wanparta Aboriginal Corporation, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on engagement.

Kind regards,

6.2.37 Email sent to Wilinggin Absorbingly Corporation – 19 June 2024

Dear Wilinggin Aboriginal Corporation

6.2.38 Email sent to Wirrawandi Aboriginal Corporation – 17 June 2024

Hi [Individual 22],

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside have an Environmental Plan that may be relevant to the Mardudhunera and Yaburara people so I wanted to send it through in case the group would like further information or an opportunity to consult. I have included all the relevant information but please do not hesitate to contact me if you would like to discuss this further.

Woodside Energy (Woodside) advises **Wirrawandi Aboriginal Corporation** of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with **Wirrawandi Aboriginal Corporation.**

Consultation with Woodside

Woodside wishes to discuss the interests that **Wirrawandi Aboriginal Corporation** and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?

Kind regards,

6.2.40 Email sent to Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang (MG Corp) – 18 June 2024

Hi [Individual 24]

I hope all is well with you.

Woodside Energy (Woodside) advises Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang Aboriginal Corporation (MG Corporation) of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:
- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with MG Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that MG Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

Kind regards,

6.2.41 Email sent to Yawuru Native Title Holders Aboriginal Corporation – 18 June 2024

Hi [Individual 25]

I hope all is well with you.

I believe you caught up with [Individual 26] recently. Unfortunately [Individual 26] has left due to [Individual 26] work load, hence I am now providing information to Nyamba Buru Yawuru.

Woodside Energy (Woodside) advises Nyamba Buru Yawuru of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:
- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Nyamba Buru Yawuru .

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Consultation with Woodside

Woodside wishes to discuss the interests that Nyamba Buru Yawuru and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards,

6.2.42 Email sent to Yindjibarndi Aboriginal Corporation – 17 June 2024

Dear [Individual 27],

As the delegated representative for **Yindjibarndi Aboriginal Corporation** please see included information relating to the ***North Rankin Complex Operation Environmental Plan***.

Woodside Energy (Woodside) advises **Yindjibarndi Aboriginal Corporation** of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:
- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or

- discuss further ways to consult and engage with **Yindjibarndi Aboriginal Corporation.**

Consultation with Woodside

Woodside wishes to discuss the interests that **Yindjibarndi Aboriginal Corporation** and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **9th July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19th July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please feel free to forward this email and the attached document to members of the **Yindjibarndi Aboriginal Corporation**, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards

6.2.43 Email sent to Yinggarda Aboriginal Corporation (YAC) – 18 June 2024

Dear [Individual 28],

I hope all is travelling well.

Woodside Energy (Woodside) advises Yinggarda Aboriginal Corporation (YAC) of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures. The Consultation Information Sheet is attached and can be found here: nrc-facility-ep.pdf (woodside.com).

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with YAC.

Consultation with Woodside

Woodside wishes to discuss the interests that YAC and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA. We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Contacting me directly on the details below
- Email to Feedback@woodside.com
- Call 1800 442 977

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. - **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of YAC, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards

6.2.44 Email sent to Kimberley Land Council (KLC) – 19 June 2024

Hi [Individual 29]

I hope all is well.

Once again, I am sending Kimberley Land Council (KLC) a copy of the environment plan we have been providing to the EMBA relevant Kimberley PBC's.

Woodside Energy (Woodside) advises KLC of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity. The NRC environment plan is a five year revision on an asset near Dampier, WA which commenced in 1984.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with KLC.

Consultation with Woodside

Woodside wishes to discuss the interests that KLC and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
1. Does protecting the environment do enough to protect your cultural values?
2. What are your concerns about the proposed activities and how can we resolve those issues?
3. What other elements should be considered in the Environmental Plan?
4. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of the KLC, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on next steps if you would like to understand the environment plan further.

Kind regards,

6.2.45 Email sent to Yamatji Marlpa Aboriginal Corporation (YMAC) – 19 June 2024

Hi [Individual 12]

Woodside Energy (Woodside) advises Nganhurra Thanardi Garrbu Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Nganhurra Thanardi Garrbu Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Nganhurra Thanardi Garrbu Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

5. How could these activities impact your cultural values, interests, and activities?
1. Does protecting the environment do enough to protect your cultural values?
2. What are your concerns about the proposed activities and how can we resolve those issues?
3. What other elements should be considered in the Environmental Plan?
4. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

6.2.47 Email sent to Save our Songlines – 18 June 2024

Dear [Individual 1],

Woodside Energy (Woodside) advises you and Save our Songlines of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with yourself and Save our Songlines.

Consultation with Woodside
Woodside wishes to discuss the interests that you and Save our Songlines and its members may have regarding NRC Operations.
We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA. We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.
If you would like to provide feedback and/or speak with us, please let us know by 19 July 2024 via:

- Email to Feedback@woodside.com
- Call 1800 442 977.

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Kind regards,

6.2.48 Email sent to Lombadina Aboriginal Corporation – 18 June 2024

Hi [Individual 30]

I hope all is well.
The attached environment plan is a five year revision plan for the North Rankin Complex project which commenced operation in 1984 and is not a new project.

Woodside Energy (Woodside) advises Lombadina Aboriginal Corporation of its planned activities relating to the **North Rankin Complex Operations (NRC Operations) Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Lombadina Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Lombadina Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Please feel free to forward this email and the attached document to members of the Lombadina Aboriginal Corporation, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on how Lombadina would like us to engage.

Kind regards,

6.2.49 Email sent to Walalakoo Aboriginal Corporation – 18 June 2024

Dear [Individual 31], [Individual 32]

Woodside Energy (Woodside) advises Walalakoo Aboriginal Corporation RNTBC of its planned activities relating to the **North Rankin Complex Operations Environment Plan**. This includes engaging and consulting with relevant stakeholders that may be affected by the activity.

To comply with legislative and regulatory requirements, Woodside must submit Environment Plans (EP) that relate to activities within Australia's Commonwealth Waters to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA).

Overview of NRC Operations
Woodside is submitting a five-year revision of the EP for the NRC Operations facility. The NRC facility began operation in 1984 and is expected to continue until at least 2036/37. The facility operates 24 hours a day, 365 days a year.

The EP covers the facility located 135 km north-west of Dampier, Western Australia. It is comprised of two fixed platforms, the North Rankin A (NRA) platform and the North Rankin B (NRB) platform, and subsea infrastructure connected to the North Rankin, Persephone and Perseus fields. The NRC facility produces dry gas and condensate from a series of reservoirs and associated subsea infrastructure.

The attached Summary Information Sheet provides a high-level overview of the NRC Operations Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

Environment Plan
EPs include evidence of comprehensive and rigorous consultation with relevant agencies, corporations, communities and individuals. This includes Traditional Owners, Aboriginal corporations, and First Nations peoples and communities.

The purpose of this email is to:

- inform you about Woodside's plans for the North Rankin Complex (NRC) Operations;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with Walalakoo Aboriginal Corporation.

Consultation with Woodside

Woodside wishes to discuss the interests that Walalakoo Aboriginal Corporation and its members may have regarding NRC Operations.

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environmental Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by NOPSEMA.

We are also open to speaking with Elders, office holders and other interested parties as requested about this specific Woodside activity, as well as discussing how you would like to build a relationship with Woodside for future contribution to other EPs.

Please advise of us of your preferred method of consultation and if there is any support or specific information that you require as part of our engagement. This includes the opportunity to meet with you face to face.

Ongoing Feedback
It is important to know that we will continue to accept feedback from you for the life of the EP.

If you would like to provide feedback and/or speak with us, please let me know by **19 July 2024** via:

- Email to Feedback@woodside.com
- Call 1800 442 977.
- Email to [Individual 3]

Please inform us if specific information that you provide in the consultation is not to be published. If so, we will make your request known to NOPSEMA.

Further information about NOPSEMA

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Feedback can also be submitted directly to NOPSEMA via email communications@nopsema.gov.au or telephone (08) 6188 8700. If providing feedback directly to NOPSEMA, the final submission date is **19 July 2024**.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs. Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

Woodside previously consulted you on its plans to submit the North Rankin Complex (NRC) Environment Plan (EP).

The NRC facility is in Production Licence WA-1-IL, located in Commonwealth waters approximately 135 km north west of Dampier, Western Australia.

Woodside plans to continue producing dry gas and condensate from a series of reservoirs. The gas and condensate are transported onshore via two 130 km long export trunklines. Operations began in 1984 and are expected to continue until at least 2036/37.

Information on the EP is provided in the email below and in the Consultation Information Sheet, which is available on Woodside's website.

If you have feedback specific to the activities and the proposed EP, Woodside welcomes it at Feedback@woodside.com or 1800 442 977 by **19 July 2024**.

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)*. Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

Israel pauses fighting to allow in aid

GAZA STRIP: Israel's military said on Sunday it would "pause" fighting around a south Gaza route daily to facilitate aid deliveries, following months of warnings of famine in the besieged Palestinian territory.

The announcement of a "local, tactical pause of military activity" during daylight hours in an area of Rafah came a day after eight Israeli soldiers were killed in a blast near the far-southern city and three more troops killed elsewhere, in one of the heaviest losses for the army in its war against Hamas militants.

UN agencies and aid groups have repeatedly sounded the alarm of dire shortages of food and other essentials in the Gaza Strip, caused mainly by overland access restrictions and the closure of the key Rafah crossing with Egypt since Israeli forces seized it in early May. Israel has long defended its efforts to let aid into Gaza including via its Kerem Shalom border near Rafah, blaming militants for looting supplies and humanitarian workers for failing to distribute them to civilians.

"A local, tactical pause of military activity for humanitarian purposes will take place from 8am until 7pm every day until further notice along the road that leads from the Kerem Shalom crossing to the Salah al-Din road and then northwards," the military said.

A map released by the army showed the declared humanitarian route extending until Rafah's European Hospital, about 10km from Kerem Shalom.

The military said the soldiers killed on Saturday were in a Namer armoured vehicle that exploded near Rafah, where troops are engaged in fierce street battles.

Military spokesman Daniel Hagari told a televised briefing that the blast was "apparently from an explosive device planted in the area or from the firing of an anti-tank missile".

Saturday's losses were among the heaviest for the military since it began its ground offensive in Gaza on October 27 and took its overall toll since then to 306 deaths.

In the single largest loss of life for the army, 21 soldiers were killed on January 22 when rocket-propelled grenade fire hit a tank near two buildings they were preparing to blow up.

Israeli Prime Minister Benjamin Netanyahu paid tribute to the soldiers who had lost their lives. "Our hearts are shattered before this terrible loss," he said. "Despite the heavy and unsettling price, we must cling to the goals of the war."

At the weekly protest in Tel Aviv against his government's handling of the war, protester Graciela Barchilon, 68, said she felt "a lot of anger and disappointment". "I believe this government is not working and we have to go to elections now," she said.

In Rafah, witnesses reported clashes between militants and Israeli troops in the city's west, and artillery fire towards a refugee camp in the city centre.

The UN says about one million people have fled Rafah since early May, when Israel began ground operations in the city in pursuit of Hamas militants.

In Gaza City, in the north of the territory, the civil defence agency reported recovering 10 bodies from three separate homes hit by Israeli strikes.

The Gaza war began after Hamas's October 7 attack on southern Israel, which resulted in the deaths of 1134 people, mostly civilians. The militants also seized 251 hostages. Of these, 116 remain in Gaza, although the army says 41 are dead. Israel's retaliatory offensive has killed at least 37,296 people in Gaza, also mostly civilians, according to the health ministry in the Hamas-ruled territory.

Fears of the war spilling over into a broader Middle East conflict have been rekindled in recent days by an escalation of tit-for-tat violence between Israel and Lebanese militant group Hezbollah, a Hamas ally. Hezbollah said Islamic strikes since Wednesday were retaliation for Israel's killing of one of its commanders.

Israel's army responded with shelling, the military said, also announcing airstrikes on Hezbollah infrastructure across the border.

The two top UN officials in Lebanon called on all sides to cease fire. "The danger of miscalculation leading to a sudden and wider conflict is very real," they said in a joint statement.

During a Middle East trip this week to push a Gaza truce plan, US Secretary of State Antony Blinken said "the best way" to help resolve the Hezbollah-Israel violence was "a resolution of the conflict in Gaza and getting a ceasefire".

That has not happened.

Hamas has insisted on the complete withdrawal of Israeli forces from Gaza and a permanent ceasefire – demands Israel has repeatedly rejected. Mr Blinken has said Israel backs the Islamist foe, but Mr Netanyahu, whose far-right coalition partners are strongly opposed to a ceasefire, has not publicly endorsed it. AFP

'Our hearts are shattered before this terrible loss. Despite the heavy and unsettling price, we must cling to the goals of the war'

BENJAMIN NETANYAHU
ISRAELI PRIME MINISTER

Cargo ship hit by Houthi rebels abandoned: US

WASHINGTON: The crew of a bulk cargo carrier that was damaged in a missile attack by Yemen's Houthi rebels in the Gulf of Aden has abandoned the ship, the US military said overnight Saturday.

The Houthis have been launching attacks in the Red Sea and Gulf of Aden since November 2023 in attacks they say are in solidarity with Palestinians during the Israel-Hamas war in the Gaza Strip.

Those attacks ramped in the week.

The crew of the MV Verbena – a Palauan-flagged, Ukrainian-owned, Polish-operated ship – has said a distress call because it could not control fires started by the attack with two cruise missiles from the Iran-backed rebels on Thursday, US Central Command said.

Another cargo ship rescued the crew, CENTCOM said on X.

"The Iranian Brigade IRGC Iranian weapons eight nautical miles from M/V Verbena and did not respond to the distress call," CENTCOM said. The missile attack severely injured a sailor, who was evacuated by US forces.

Another cargo ship, the M/V Tutor, was abandoned after it was struck by a sea drone off the rebel-held city of Hodeida on Wednesday, causing serious flooding, said the UK Maritime Trade Operations, which is run by the British navy. The vessel is adrift in the Red Sea.

Referring to the Verbena and the Tutor on Saturday, a Houthi spokesman said the "operations are dedicated ... to our brothers fighting in Gaza". The group also renewed its "warning to all companies about the consequences of dealing with Israel".

The Houthis seized Yemen's capital Sanaa in 2014, prompting a Saudi-led military intervention in support of the government the next year. Yemen's war has left hundreds of thousands of people dead, through fighting, disease or lack of food, with most of the population dependent on aid. AFP

Swedes freed in Iranian exchange

BENOIT FAUCON
LAURENCE NORMAN

Iran on Saturday released two Swedish citizens, including an EU official, in exchange for an Iranian convicted in Stockholm of executing three criminals for his role in the 1988 mass executions in the Islamic Republic.

The move comes during a transition in Iran, with presidential elections due this month, after the death of president Ebrahim Raisi in a May helicopter crash. Iran has released several European prisoners in recent months, somewhat easing tensions with the EU over Iran's military support for Russia and its nuclear program advances.

Iran has consistently used hostage diplomacy since its 1979 Islamic Revolution in negotiations with the West.

In a deal between Sweden and Iran mediated by Oman, Tehran freed Swedish diplomat Johan Floderus, who was working for the EU's foreign service until and had previously served as a senior official in the EU's executive arm.

Iran also released Iran-Swedish national Saeid Azizi, who had recently been jailed for five years by a Tehran court on charges of "insanity and collusion against national security".

"Delighted at the news our Swedish colleague, Johan Floderus, and his compatriot Saeid Azizi have been released from unjustified Iranian custody," said European Commission president Ursula von der Leyen. While EU officials had repeatedly pressed Iranian authorities to release the Swedish citizens, Sweden largely handled the case.

In exchange for its citizens, Sweden released Hamid Noori, who had been arrested in Sweden in 2019 and convicted for his role in the 1988 executions of political prisoners. Noori was an aide to a deputy prosecutor who ordered some of the killings.

Iran called his captivity "illegal and illegitimate". A spokesman for the Mujahedin-e Khalq, an anti-regime group whose members were killed in large numbers in the 1988 executions, called Noori's release "shameful and unjustifiable", and said it would encourage "blackmail".

On Thursday, Iran also freed a French national who had been imprisoned in Tehran since September 2022 on allegations he had joined the widespread protests that erupted that month across Iran. The family of Frenchman Louis Arnaud has also said he was a tourist travelling through Iran as part of a global tour.

Iran didn't give a reason for releasing Arnaud, but the previous day French police raided the offices of Mojahedin-e Khalq in a Paris suburb, part of tighter oversight from French authorities. Iran has long protested the presence in European countries of the MEK. It welcomed this week's French raid.

Tehran is also lobbying the French government to release one of its nationals, a former state television journalist detained in France for what Iran says was posting anti-Israeli propaganda. France's Interior Ministry hasn't commented on the arrest and couldn't immediately comment on Saturday.

Iran has used past prisoner exchanges to free its citizens or sometimes to receive money or sanctions relief in return. Iran held up to 30 EU citizens last year, EU officials said, but several have since been released.

Last year, Belgium freed an Iranian diplomat convicted of a Paris bomb plot in exchange for a Belgian aid worker detained in Tehran. How over Iran still holds several Westerners, including two French trade unionists accused of links with Iranian teachers campaigning for better pay.

Floderus was detained in 2022, weeks before a Swedish court sentenced Noori to life in prison. Last week's prisoner release came as a volatile time in Iran following the death of Raisi.

Tehran is also facing growing Western concern about Iran's advances in its nuclear program and its support for regional proxies across the Middle East as the war in Gaza drags on.

Last September, Iran released four Americans from prison as part of a prisoner swap, which also saw Washington agree to unfreeze billions of dollars of Iranian oil revenues trapped overseas under US sanctions.

THE WALL STREET JOURNAL

NORTH RANKIN COMPLEX
OPERATIONS ENVIRONMENT PLAN

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

Woodside consults relevant persons so that feedback is considered and appropriate measures are adopted in response to objections or claims received from relevant persons and used to inform the revision of the **North Rankin Complex (NRC) Operations Environment Plan.**

Our activities

Woodside plans to continue producing dry gas and condensate at the NRC facility and is submitting a five-year revision of the Operations Environment Plan. The Environment Plan for NRC Operations will cover routine production, well clean-up as well as inspection, maintenance, monitoring and repair of subsea infrastructure.

The NRC facility is located ~ 135 km north west of Dampier, Western Australia and began operation in 1984. The facility operates 24 hours a day, 365 days a year.

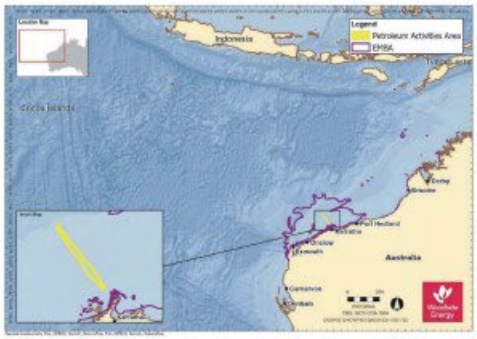
The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for the Environment Plan, is determined by a highly unlikely release of hydrocarbons from loss of well control or loss of containment of a pipeline.

The EMBA represents the largest area of ocean possible paths a hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected at one time.

We want to hear from you

If you are an individual, organisation or community group and think that the Environment, Interests or Activities may be affected by the activities under this Environment Plan, we would like to hear from you by **19 July 2024.**



Want to know more or provide input?

A feedback form and more information can be found at: **www.woodside.com/what-we-do/consultation-activities**

You can also subscribe via our website to receive future information on upcoming activities.

E: Feedback@woodside.com Toll free: 1800 442 977 woodside.com

We are seeking input from relevant persons whose functions, interests or activities may be affected by the proposed activities within the environment that may be affected (EMBA).

Hajj pilgrims 'stone the devil' as Muslims mark Eid al-Adha

SAHAR AL ATTAR
MENA

Pilgrims perform the last major ritual of the hajj, the "stoning of the devil", in western Saudi Arabia on Sunday, as Muslims the world over celebrate the Eid al-Adha holiday.

Beginning at dawn, the 1.8 million Muslims undertaking the pilgrimage this year will throw seven times at each of three concrete walls symbolising the devil in the Mina valley, located outside Mecca, the holiest city in Islam.

The ritual commemorates Abraham's stoning of the devil at the three spots where it is said Satan tried to dissuade him from obeying God's order to sacrifice his son.

The stoning ritual has been witness to multiple stampedes over the years, most recently in 2015 when up to 2300 worshippers were killed in the worst hajj disaster. The site has been revamped since then to streamline the movement of the large crowds.

On Saturday night, pilgrims collected stones and slept under the stars in the plain of Muzdalifah, located halfway between Mina and Arafat, where they had spent the day praying outside in heat that reached 46C. "It was very, very hot," said Ruby Daimo, a 60-year-old Gambian living in the US. "Alhamdulillah (thank God), I put a lot of water on my head and I was OK."

Worshippers have tried to take the gruelling conditions in stride, saying what for many is a once-in-a-lifetime chance to pray at Islam's holiest shrines.

A Muslim pilgrim prays at dawn on Mount Arafat AFP

"I am so happy that I can't describe my feelings," said Amal Mahrouzi, a 55-year-old woman from Egypt. "This place shows us that we are all equal, that there are no differences between Muslims around the world."

One of the five pillars of Islam, the hajj must be performed at least once by all Muslims with the means.

This year's figure of 1.8 million pilgrims is similar to last year's, and Saudi authorities said on Saturday that 1.6 million of them came from abroad.

The stoning ritual coincides with the feast of the sacrifice, or Eid al-Adha, which honours Abraham's willingness to sacrifice his son before God offered a sheep instead. Worshippers typically slaughter a sheep and offer part of the meat to the needy.

This year's hajj and Eid al-Adha holiday have been clouded by the war between Israel and Hamas in the Gaza Strip.

"We are very sad for the Palestinians, and we have prayed a lot for them," said Intisar, a 25-year-old Syrian living in Saudi Arabia, who declined to give her surname.

King Salman invited 2000 Palestinians to the hajj at his own expense, half of whom are family members of victims in Gaza who have sought refuge elsewhere.

Saudi authorities have warned that no political slogans would be tolerated during the pilgrimage.

That has not stopped many worshippers from voicing solidarity with Palestinians. "Pray for our brothers in Palestine, in Gaza ... may God give victory to the Muslims," one pilgrim shouted on Mount Arafat on Saturday.

In a message to hajj pilgrims on Saturday, Iranian supreme leader Ayatollah Ali Khamenei said "the ironclad resistance of Palestine and the patient, oppressed people of Gaza ... must be fully supported in every way". AFP

New Caledonia airport to reopen

NOUMEA: New Caledonia's main international airport will reopen from Monday after being shut last month during a spate of deadly protests, the high commission in the French Pacific territory said, adding a curfew would also be reduced.

The commission said on Sunday it had "decided to reopen the airport during the day" and to "push back to 6pm (from 4pm) the start of the curfew as of Monday".

The measures had been introduced after violence broke out on May 13 over a voting reform that would have allowed long-term residents to participate in local elections. The archipelago's Indigenous Kanaks feared the move would dilute their vote, fuelling hopes for winning independence out of reach. Barricades, skirmishes with the police and looting left nine dead and hundreds injured, and inflicted hundreds of millions of dollars in damage.

The full resumption of flights at Tontouta airport was made possible by the reopening of an expressway linking it to the capital Nouméa that had been blocked by demonstrators.

Previously the airport was only handling a small number of flights with special exemptions.

Meanwhile, the curfew, which runs until 6am, was reduced "in light of the improvement in the situation and in order to facilitate the gradual return to normal life", the commission said.

French President Emmanuel Macron had announced on Wednesday that the voting reform that touched off the unrest would be "suspended" in light of stop parliamentary polls. Although approved by both France's National Assembly and Senate, the reform had been waiting on a constitutional congress of both houses to become law. AFP

6.3.1.2 The West Australian – 17 June 2024

Thumbs up, all round

Picture this, a lone man gets in strife in remote WA ....

PHIL HICKEY

It's the photo that confirmed all ended well after what could have been a catastrophic incident in the remote North West of WA.

Police have released new details of the dramatic rescue of a man on Saturday.

The massive emergency mission unfolded in the Kimberley after the man was seriously injured in a wakeboarding accident near the WA and Northern Territory border.

The incident came to the attention of emergency crews about 3.15pm after the Australian Maritime Safety Authority notified WA Police of an EPIRB activation near the Lake Argyle boat ramp.

The EPIRB was activated after a man became tangled in rope while wakeboarding near Lagoon Island, about 25km away from the ramp.

A vessel then returned to the Lake Argyle boat ramp with the man on board.

It was met by Kununurra police officers — who quickly put the injured man into their vehicle and rushed him towards an ambulance that was heading to the scene. In a statement posted on Facebook on Sunday, police said the man was in need of "urgent medical attention".

They posted new details of the rescue, alongside a heartwarming photograph of the relieved man in hospital with the two beaming officers who helped him.

"Due to the urgent need for medical treatment, the police officers placed the injured man in their vehicle and commenced driving back towards the Victoria Highway under emergency conditions, while arrangements were made for them to meet a St John WA ambulance that was enroute to the scene," police said.

"The police officers met the St John WA ambulance near the Dingo Springs Community, and the man was transferred into the care of the ambulance crew.

"He was taken by ambulance the rest of the way to Kununurra Hospital.

"Well done Kununurra Police, and thanks to the patient for allowing us to share this photo."

Stone rolled with his bed

Keith Richards got so out of his mind on tour with the Rolling Stones that he was flown to another country while still in bed.

The guitarist, 80, who used heroin at the height of the band's fame, but has now kicked drugs, drink and smoking, was in such a deep sleep after a drug binge the group's roadies carried the bed, with Keith sleeping in it, onto the band's private jet while he was still resting.

In his new memoir I Was There, celebrity publicist Alan Edwards said Keith woke up in a hotel room in another country.

Vitamin loss no big risk

Doctors should stop testing the majority of adults for Vitamin D deficiency because it does not appear to have any effect on their health, according to research. Instead, GPs should focus on children, pregnant women, adults over the age of 75, and people with pre-diabetes.

Vitamin D deficiency can lead to a soft-bone condition in babies and children, osteoporosis in the elderly and increases the risk of birth complications. While GPs should still advise patients to seek Vitamin D, falling below the recommended amount is unlikely to have any negative impact.

NORTH RANKIN COMPLEX
OPERATIONS ENVIRONMENT PLAN

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

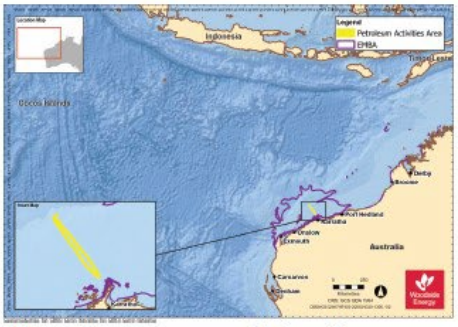
Woodside consults relevant persons so that feedback is considered and appropriate measures are adopted in response to objections or claims received from relevant persons and used to inform the revision of the **North Rankin Complex (NRC) Operations Environment Plan.**

Our activities

Woodside plans to continue producing dry gas and condensate at the NRC facility and is submitting a five-year revision of the operations Environment Plan. The Environment Plan for NRC Operations will cover routine production, well clean-up as well as inspection, maintenance, monitoring and repair of subsea infrastructure.

The NRC facility is located ~ 135 km north west of Dampier, Western Australia and began operation in 1984. The facility operates 24 hours a day, 365 days a year.

We are seeking input from relevant persons whose functions, interests or activities may be affected by the proposed activities within the environment that may be affected (EMBA).



The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this Environment Plan, is determined by a highly unlikely release of hydrocarbons from loss of well control or loss of containment of a pipeline.

The EMBA represents the merged area of many possible paths a hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected at one time.

We want to hear from you

6.3.1.3 Pilbara News – 19 June 2024

Exchanges heated at live export ban probe

OLIVIA FORD

Emotions ran high as stakeholders provided evidence to a parliament inquiry into Federal Labor's live sheep export ban, with heated exchanges between committee members and peak body representatives.

The snap inquiry held its first hearing in Canberra last Wednesday.

A second hearing was held in Northam on Friday before the committee reports back this week.

The Canberra hearing began which questioning to the Department of Agriculture, Fisheries and Forestry, which involved committee member Aaron Violi grilling the Department on its phase-out time frame.

Mr Violi said the Independent Panel Report: Phase Out of Live Sheep Exports by Sea recommended the phase-out be announced at the end of 2023, and for Government to provide support measure in early 2024.

"Given we're in June of 2024, is the phase out not already running seven months behind schedule?"

DAFF's Andrew McDonald said the Government's decision was a result of from the Cabinet and budget process deliberations.

During the hearing, industry bodies were each given half an hour to give evidence to the Parliament's Agriculture Committee.

Australian Veterinary Association head of policy Melanie Latter told MPs of the group's strong support for slaughtering animals as close to production as possible to prevent the stress of travel and handling.

However, she said it represented a "broad church" of veterinarians some who supported and others who were opposed to the live export ban, and that the AVA would remain neutral on the phase-out.

Farmers in Neerabup ahead of the Keep The Sheep rally. Picture: Justin Benson-Cooper

RSPCA chief executive Richard Mussel opened his statement by saying there were serious concerns for sheep welfare around issues with inanition, ammonia exposure, heat stress and stocking density.

Former live export vet Lynn Simpson also gave evidence, and said both the Bab al-Mandab Strait and the Strait of Hormuz had "more dead sheep lay on (its) sea floors then anywhere else I can imagine."

Committee deputy chair Rick Wilson asked Dr Simpson, who conceded she had not been on a live export ship since 2011, if she thought animal welfare standards had improved over the past 14 years.

Dr Simpson said she did not believe so and argued while mortality rates had dropped, morbidity rates had not.

Mr Mussel added to that and said mortality rates were not a "scientific valid" method of measuring welfare.

In his opening statement, National Farmers' Federation deputy chief executive Charles Thomas slammed the Government for treating WA sheep farmers with "absolute contempt".

MPs referenced the growth in WA's boxed meat market and the decline of the live sheep trade over the past decade. Mr Thomas rejected the statement that the industry was decline and referred to the 30 per cent year-on-year increase in live sheep export volumes since 2022 recorded by LiveCorp.

Tensions only further heightened as the day went on and the committee heard from Cattle Australia and the Northern Territory Cattlemen's Association, who both feared live cattle exports would be next on the chopping block.

Sheep Producers Australia chief executive Bonnie Skinner said the live export trade was "necessary" and "critical" in maintaining competition and price stability in the sheep industry.

The hearing hit boiling point when committee chair Meryl Swanson asked Ms Skinner what she had done to help members adjust to a change that may lead to a "potentially better future".

NORTH RANKIN COMPLEX OPERATIONS ENVIRONMENT PLAN

For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

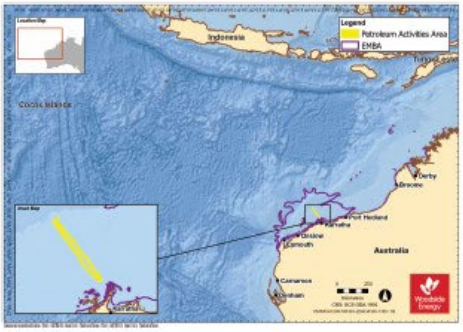
Woodside consults relevant persons so that feedback is considered and appropriate measures are adopted in response to objections or claims received from relevant persons and used to inform the revision of the **North Rankin Complex (NRC) Operations Environment Plan.**

Our activities

Woodside plans to continue producing dry gas and condensate at the NRC facility and is submitting a five-year revision of the operations Environment Plan. The Environment Plan for NRC Operations will cover routine production, well clean-up as well as inspection, maintenance, monitoring and repair of subsea infrastructure.

The NRC facility is located ~ 135 km north west of Dampier, Western Australia and began operation in 1984. The facility operates 24 hours a day, 365 days a year.

We are seeking input from relevant persons whose functions, interests or activities may be affected by the proposed activities within the environment that may be affected (EMBA).



The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for this Environment Plan, is determined by a highly unlikely release of hydrocarbons from loss of well control or loss of containment of a pipeline.

The EMBA represents the merged area of many possible paths a hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected at one time.

We want to hear from you

If you are an individual, organisation or community group and your functions, interests or activities may be affected by the activities under this Environment Plan, we would like to hear from you by **19 July 2024.**

Crowds enjoy winning day

KATYA MINNS

The Broome Turf Club hosted an exhilarating race day three at the weekend, drawing a lively crowd of punters and fashionistas for the Mark Manado Memorial race.

Adding a touch of glamour to the event, The Broome Closet sponsored the highly anticipated fashions on the field competition and provided generous vouchers for the winner.

Participants dazzled the judges with their creativity and elegance, wearing a variety of stylish ensembles that ranged from classic chic to bold and contemporary.

While the races were the main event, the entertainment did not stop at the finish line as Rob Pascoe and The Turps kept the energy high with their live performances, providing the perfect soundtrack to a day of celebration.

Race day four, Family Day, will be held on June 30.

Fashions on the Field for Broome race day three was sponsored by The Broome Closet.

6.3.1.5 Kimberley Echo – 20 June 2024

Thursday, June 20, 2024 — kimberleyecho.com.au — NEWS 9

connected to the environment he spent most of his life exploring. His last words were to confirm the timing of the New Moon.

On June 6 after a short battle with cancer, Mr Quick died surrounded by family in Cowaramup, aged 62.

When news of his passing broke, an outpouring of tributes from close friends, acquaintances and locals who were touched by his tours was shared.

"Very sad to learn that Greg Quicke 'Space Gandalf' has died . . . I love what he wrote on seeing the solar eclipse in 2023: 'My body spent, my heart full, I crash into a deep eclipse fuelled communion with the other worlds,'" I hope that's where he is now'," Professor Cox wrote on X.

"Oh Greg, an extraordinary life touching so many people the world over," said Broome local Gaye Wolbergaars, who helped Mr Quicke with his first bookings of Astro Tours. "It was a privilege to share many special moments with you over the years.

"Now one with the universe you loved so much. Tears rolling down my cheeks. We will miss you."

Another close friend, Penny Arrow said: I was lucky enough to spend some cherished time with Greg in the past few months."

On July 5 — a New Moon — there will be a paddle out on Cable Beach, south of the surf hut at 11am, to honour Quicke.

All are welcome and encouraged to bring kayaks or boards.

There will also be a celebration of his life at Gantheaume Beach at 3pm.

Greg Quicke embraced the Kimberley lifestyle. Main picture: Mark Jones

A billion shades of De Grey

SIMONE GROGAN

De Grey Mining looks set to line up debt to the tune of $1 billion to fund Australia's next big gold mine, but the MD insists they won't just be "sitting still" when construction starts in the next six months.

Despite being years away from pouring first gold, the listed explorer is valued at nearly $2.5 billion, and is chasing down a massive debt component to build a mine out of its famed Hemi discovery in the Pilbara.

Mr Jardine told a packed WA Mining Club event last Thursday that it was expecting to get credit approved terms from commercial banks — potentially up to 10 — in a matter of weeks to bankroll the $1.3b project. Government agencies are also in the mix as potential backers of the project, he said.

With a busy and expensive build-stage ahead — generally considered a vulnerable time for mining companies — Mr Jardine told The West Australian that De Grey would be looking at additional exploration, project studies, and even "potential corporate activity". "We're not going to be sitting still during construction when it comes to value creation," he said.

De Grey has also recently closed the book on another capital raising, this time for $600 million, which will top up its coffers to nearly $900m.

The participation of De Grey's biggest shareholder Gold Road Resources in the May placement sparked much intrigue about the motivations of the listed mid-tier, which has a smaller market capitalisation at about $1.7b.

Gold Road, which had a cash balance of about $143m in February and has long been considered a potential suitor or partner on the Hemi project, let its foothold slip from the takeover threshold of 19.9 per cent to just over 17 per cent.

Mr Jardine told the mining audience it would be best to direct questions as to why to its shareholder, but indicated relations between the companies were positive.

"If you wanted to go any further on that question probably best direct it to Gold Road," he said.

"Gold Road have been very supportive of all of our capital raising since they became shareholders and are also very supportive of the board and management of De Grey." He later said that De Grey hadn't "found anything that can compete" from a shareholder or corporate perspective than going it alone on Hemi.

A final investment decision is expected on Hemi in the second half of this year, to be followed by the start of early works construction, provided environmental approvals fall into place.

Pulling staff away from well-paying iron ore miners in the Pilbara could prove challenging for De Grey, which is on a major hiring spree to find hundreds of workers ahead of construction starting.

The company is banking on a major new gold project bringing diversity to the region, which is best known as the home of the steelmaking ingredient.

Hemi is slated to produce 553,000oz in its first five years.

6.3.1.7 Koori Mail – 19 June 2024

opinion

Inquiry to test truth-telling

Adam C Lees

RECENTLY, the Queensland Government announced its leadership in its inaugural Truth-telling and Healing Inquiry. The inquiry aims to deepen our understanding of Queensland's shared history, support healing and contribute to Closing the Gap. They'll have their work cut out for them.

Given the failure of the Voice to Parliament proposal, which saw 69% opposition from Queenslanders, the highest of any state or territory, engaging communities in 'truth-hearing' and meaningful dialogue presents a real challenge. The inquiry also risks becoming further politicised ahead of the state elections in October, with critics deeming it a waste of taxpayer funds best directed toward frontline services.

Coupled with this, Victoria's recent rejection of numerous initial recommendations from the Yoorrook Justice Commission has created scepticism, portraying their inquiry as a toothless tiger. Despite any indifference or even disdain towards reconciliation and historical reckonings, this inquiry can be a rear-vision mirror of our past as we drive towards a fairer future.

Queensland's inquiry will rely on its legislated authority to request documents and information from the state and agencies. However, unlike Commonwealth parliamentary hearings, its inability to require evidence from private individuals limits its reach.

Mining has significantly shaped Queensland's physical, social and cultural landscape for over 150 years. For an industry that has historically reaped the benefits of the land, often at the expense of Indigenous peoples, the call for the mining industry to participate in this inquiry should not just be an invitation; it is a moral and ethical imperative they must accept.

Over its three-year term, the inquiry has sufficient material to explore the intersection between mining and Indigenous rights. It should delve into the wealth amassed from mining on Aboriginal land and the failure to fully benefit communities, including the absence of agreements and benefits for older mines and smelters. Furthermore, the inquiry should also look at the negative impacts of mining on Indigenous communities, the destruction of ancient cultural heritage and the historical contamination of water and land.

Consider the state's focus on cleaning up 120 derelict mine sites under the Abandoned Mines Land Program (AMLP) – compared to the 15,300 sites that environmentalists claim need attention, 317 urgently. Abandoned and mismanaged mines present significant risks to people and our environment. The inquiry can push for increased Indigenous engagement in these clean-up efforts, turning neglect into opportunity by involving Traditional Owner enterprises and Indigenous businesses in rehabilitation.

The timing is right. Recent or impending closures of old mines across northern Australia and in Queensland highlight a critical moment for learning and action, such as how industry and government can better prepare for and support Indigenous communities ahead of closure and beyond the life of mine.

Then there's the tangled and uneasy history tied to the allocation of bauxite leases on Cape York in the 1950s. Considering the inquiry, perhaps there's an opportunity for the Queensland government to fully open its archival records, shedding light on the decisions and policies linked to the granting of these mining leases. Many records remain restricted due to commercial and privacy concerns.

Today, the mining sector is a significant employer of Indigenous people in Queensland and across Australia, demonstrating numerous successful agreements, economic advantages and collaborative coexistence. But it can do much better.

Despite long-standing promises and commitments to Indigenous employment and leadership development, most Indigenous employees continue to work on the bottom rungs and in the lowest entry-level roles with mining and resource companies in Australia. In my experience, a lack of accountability has perpetuated a culture of excuse-making. The inquiry must fiercely question why this disparity persists despite decades of operations in Queensland. These outcomes wouldn't be tolerated in many foreign jurisdictions where mining companies are legally bound to meet and report on national employment targets across all levels, ensuring they maximise employment opportunities and economic benefits for local communities.

The inquiry can also play a significant role in opening the lid on mining's connections with Indigenous communities and the state and industry's moral obligations to address historical injustices beyond legal limitations, such as stolen wages. Historical allegations of wage discrimination and underpayment of Indigenous workers within the mining sector warrant a thorough investigation to prevent any continuation of such practices.

If sunlight is the best disinfectant, then Queensland's Truth-Telling and Healing Inquiry presents an immediate opportunity to address past and present uncomfortable truths, and to work towards a more just and equitable future. Mining's future and achieving net zero by 2050 hinges on Indigenous consent, with over half of the world's key mineral projects on their lands. Owning and learning from past deeds can ensure mutual respect and genuine benefits from mining, with Indigenous communities as equal partners.

● *Cape York and Meriam Traditional Owner Adam Lees, raised in the mining town of Mount Isa, has over twenty years of global experience in the resources and energy sector.*

6.3.1.8 National Indigenous Times – 28 June 2024

Women must be heard

HANNAH MCGLADE

The Federal Government shocked and hurt Aboriginal women across Australia with its announcement on May 28 of an expert panel tasked with conducting a rapid review of violence against women, with a focus on the killings of women, with not one Aboriginal woman as a member of the panel.

Considering Aboriginal women are at exceptionally high risk of violence and even murder and have been standing strong against violence for many decades, this was a serious oversight.

Last week, with no consultation with Aboriginal women, WA Premier Roger Cook and Minister for Prevention of Family and Domestic Violence Sabine Winton announced new family violence laws to include coercive and controlling behaviour, as well as electronic monitoring of high-risk offenders.

Although Aboriginal women in WA are shockingly over-represented as murder victims, very little has been done about this. When the Telethon Kids Institute pointed out nearly a decade ago Aboriginal mothers were 17½ times more likely to be murdered than non-Aboriginal mothers, there was no response by the State.

Black women's lives have mattered so little, and this surely stems from colonisation, brutal and violent, with horrific violence enacted on Indigenous women and children, as well as men.

This violence is still not acknowledged or addressed.

We know Aboriginal women were raped and killed by settlers who acted with impunity and were protected by racist laws that denied women the most basic rights.

Aboriginal men also were enslaved and reduced to beggars in their own lands.

Children were stolen from mothers under genocidal laws.

There is now a contentious issue between Aboriginal and non-Aboriginal women concerning the role of the law in responding to violence.

Aboriginal women and girls have long experienced the violence of the law and State, racism and racial profiling, and don't see laws as the answer to this violence — especially as we know violence in our communities often has its basis in the trauma flowing from the violence of colonisation and the failure of the state to make amends.

We want healing for our women, and for men.

Children need support, not to be taken from their mothers and families.

Many non-Aboriginal women continue to urge more laws, and stronger ones, to address men's violence.

This approach explains new laws prohibiting "coercive control" introduced in Queensland and New South Wales, with WA now following.

The Commonwealth last year also developed guidelines for States concerning their adoption. These largely ignored the concerns of Aboriginal women that police have long mistreated Indigenous women who are likely to be caught by such laws; misidentified as perpetrators rather than victims.

Coercive control laws have come from Scotland and should not have been imported, let alone without serious and respectful conversations as to their translatability to Australia.

Police, like other State institutions, have not tackled systemic racism and how dangerous that is to Aboriginal women.

In WA, the task force on violence — recently concluded — was surprising and disappointing.

The task force was precipitated by murders of Noongar women and led to investment of more than $90 million, but none dedicated to Aboriginal-led responses.

Instead, we saw $55m allocated to police, child protection and corrections staff. Aboriginal women advocates voiced our concerns, pointing to the Aboriginal Family Safety Strategy, with the State responding with $6m allocated last year for Aboriginal programs. This funding was welcome but inadequate considering the extent of the problem.

The Gordon Inquiry more than 20 years ago recommended a "sea change" and investment in Aboriginal community-led responses to family and domestic violence.

This watershed inquiry, sparked by the death of 15-year-old Noongar girl Susan Taylor, laid bare the neglect and failure of State responses and highlighted the importance of Aboriginal community-led responses to family violence.

The State largely ignored the key recommendations and invested instead in police and child protection whose punitive approaches hark back to the Stolen Generations.

Violence against Aboriginal women will never be addressed while Aboriginal women's expertise and leadership is denied and undermined.

Unfortunately, the failure of the Voice referendum leaves our communities vulnerable to continued imposition of government laws and policies that fail to meet our needs and compound violence experienced by Aboriginal women and families.

And while the Federal commitment to a national Aboriginal family violence peak body under Closing the Gap is clearly needed, our recent experiences in WA show a statewide peak body is also needed.

Aboriginal women have experienced so much violence, it's time we addressed all forms of violence, including racism and the imposition of yet more laws that carry unacceptable risk of harm to First Nations women and children.

Dr Hannah McGlade is a Kurin Minang human rights expert, law academic and member of the United Nations Permanent Forum on Indigenous Issues.

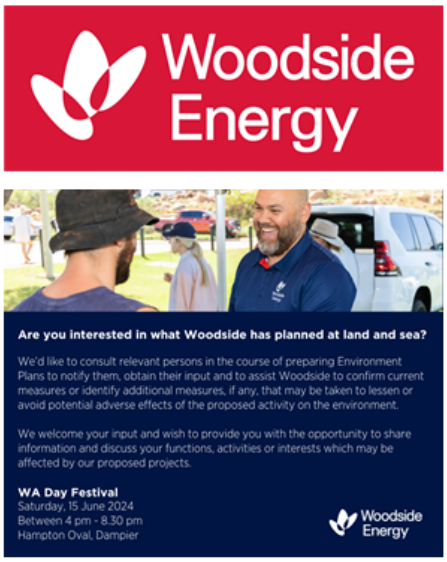
Activity	WA Day Festival
Date	15 June 2024
Description of the consultation	Woodside hosted a stand at the WA Day Festival organised by Celebrate WA. The event featured a drone show, food stalls, live music, sideshow stalls and interactive exhibits. The stand was staffed by members from Woodside's Corporate Affairs, First Nations and Environment team. Woodside displayed a QR code on the stand, linked to the consultation activities page of the Woodside website. Woodside made available printed consultation information sheets including on this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.



Advertising and invitations	Woodside advertised the sessions to enable individuals to self-identify, become aware of the community consultation, and enable individuals to provide feedback on proposed activities, through the following: • Advertisement in the KDCCI e-newsletter distributed 5 June 2024. • Social media posts were published inviting public to attend on Woodside North West Facebook page. • Celebrate WA advertised the event via TV commercials, radio advertisement and in print. • An EP consultation banner with QR code linked to the Consultation Activities page on the Woodside website.
Estimated number of individuals / organisations consulted	Over 2000 community members (Celebrate WA) attended the event. Woodside spoke to many community members, recording 15 meaningful conversations.
Summary of Feedback, Objection or Claim	
• General queries around employment and volunteer opportunities. • General positive commentary from community members working at Woodside or on Woodside projects. • General interest in Scarborough and Browse progress and the future of gas in the energy transition. • General query around tax contributions. • EP approval process discussed and why we want to talk to community. No concerns raised.	
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	
Whilst feedback was received, there were no objections or claims. The community information sessions were part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

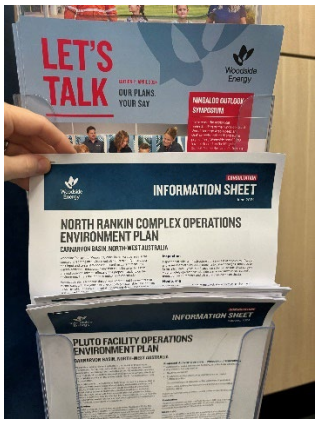
6.4.1.2 Pilbara Summit – 25 & 26 June 2024



Location	Karratha
Activity	Pilbara Summit 2024
Date	25 & 26 June 2024
Description of the consultation	Woodside hosted a stand at Pilbara Summit 2024, a sold-out conference established to raise the profile of issues and opportunities in the Pilbara region. The event provides the opportunity for the Pilbara region's industry, investors, businesses, community, and government representatives to connect. The stand was staffed by members from Woodside's Corporate Affairs, Government Affairs, First Nations, Supply Chain and New Energy teams. Woodside displayed a QR code on the stand, linked to the Let's Talk EP newsletter on the Woodside consultation page of the website. A pull-up banner was on display focusing on engagement on our plans at land and sea with a QR code to the consultation page on the Woodside website. Woodside made available printed consultation information sheets including on this EP.
Advertising and invitations	No advertising was undertaken. The Vice President for North West Shelf delivered a speech during the conference, which highlighted the important role the that Woodside will continue to play in the energy transition. In addition a presentative from Woodside's CCS team was part of a panel discussion on Decarbonisation – moving to net zero discussing the role of CCS, opportunities for growth, new business and the best approach to renewable and lower carbon industries. Attendees were invited to find out more about Woodside's projects, developments or environment plans by speaking team members on the Woodside conference stand or to visit Woodside's town office based in The Quarter.
Estimated number of individuals / organisations consulted	Over 600 people attended in person event over 2 days.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim
• Approximately 10 conversations occurred around new energy opportunities and plans, local content, social investment, EMBAs (relating to EPs) and approvals in general. • No feedback was received regarding Woodside's EPs.
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response
This session forms part of Woodside's broader consultation approach to enable self-identification, and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

Woodside stand – 26 & 27 June 2024

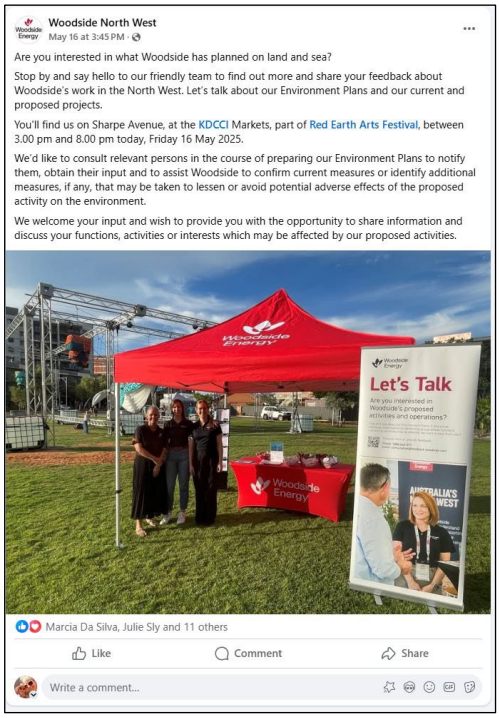
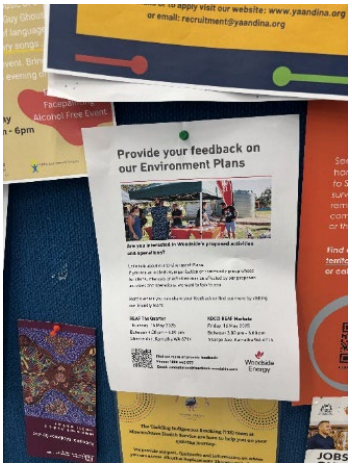
- General interest Woodside operated assets including King Bay Supply Base, Karratha Gas Plant, Scarborough Energy Project progress, Pluto Train 2 and Train 1 modifications projects.
- Conversations on the North West Shelf Project Extension including support for local community, timelines, investing partners, political views and the future of gas in the energy transition.
- Queries relating to whales, in particular pygmy blue whales and the research that Woodside has contributed to over 30 years. In addition, two community members wanted to know about Seismic activities and impacts to whales.
- Queries relating to air emissions and flaring with several flaring fact sheets being given to members of the public.
- Queries around bird migrations and impacts to birds as a result of Woodside's operations. Mitigations were discussed.
- EP consultation and approval process discussed and why we want to talk to community. No concerns raised.





Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response

Whilst feedback was received, there were no objections or claims.

The community information sessions were part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

6.4.1.12 FeNaCING Festival – 2 & 3 August, 2025

	Location: Karratha
Activity	FeNaCING Festival
Date	2 & 3 August, 2025
Description of the consultation	Woodside hosted a stand at the FeNaCING Festival 2025**.** Members of Woodside's Corporate Affairs, Environment and Operations teams actively engaged with the community to discuss proposed EP activities. Woodside displayed a QR code on the stand linked to the 'Consultation activities' page of the Woodside website. A pull-up banner was on display regarding engaging on Woodside's 'Let's Talk', with a QR code linking to the 'Consultation activities' page of the Woodside website. Woodside made available printed consultation information sheets North Rankin Complex Operations EP.
Advertising and invitations	Woodside advertised the sessions to enable individuals to self-identify, promote awareness of the community consultation, and enable individuals to provide feedback on proposed activities, through the following: • Advertisement in Pilbara News on Wednesday, 30 July 2025 edition. • Social media posts published on the Woodside North West Facebook page inviting the public to attend (see table below) • EP consultation banner with QR code (linked to 'Consultation activities' page on Woodside website), displayed at Woodside's stand along with current EP consultation information sheets (see table below).
Estimated number of individuals / organisations consulted	Over 5,000 community members attended the event. Woodside spoke to many community members, recording 50 conversations.
Summary of Feedback, Objection or Claim	
• General queries around employment opportunities, including apprenticeship and trainee opportunities. • Interest in local content and community contribution opportunities. • General interest in the Scarborough Energy Project progress and Pluto Train 2 and Train 1 modifications projects. • Conversations on the North West Shelf Project Extension including support for local community, timelines, investing partners, political views and the future of gas in the energy transition. Many pro approval. • Interest in Woodside's supply of DOMGAS to WA. • Environment Plan community consultation and approval process discussed and why we want to talk to community. No concerns raised. • Heritage BHP and Woodside merger, interest in the environmental approvals in the Bass Straight regarding decommissioning. • Murujuga World Heritage & MRAMP queries.	
Woodside's Assessment of Merits of Feedback, Objection or Claim and its Response	
Whilst feedback was received, there were no objections or claims. The community information sessions were part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

6.4.2 Gascoyne Region

6.4.2.1 Exmouth Community Information Session – 14 November 2024

Activity	**Community markets – Woodside stand**
Date	Thursday, 14 November 2024
Description of the consultation	Woodside hosted a stand at Ross Street Mall in Exmouth. The stand was staffed by Woodside Environment and Corporate Affairs representatives. Woodside displayed a QR code on the stand, linked to the consultation activities page of the Woodside website. Information on the Scarborough Energy Project, Browse to NWS Project, Woodside's Climate Transition Action Plan, leaflets providing QR codes to Woodside's Annual Report and Sustainability, 'Let's Talk' (a publication on the company's Australian activities) were available. EP Consultation Information Sheets were made available to attendees including on this EP.
Advertising and invitations	Woodside advertised the sessions to enable individuals to self-identify, become aware of the community consultation, and enable individuals to provide feedback on proposed activities, through the following: • Geotargeted social media campaign advertising in Exmouth and surrounding areas (+80 kms) from November 9 to November 14 • Post on Woodside social media channel • Promotion at the Exmouth Community Liaison Group meeting • An EP consultation banner with QR code (linked to the Consultation Activities page on the Woodside website) was displayed at Woodside's stand along with the EP factsheets and Project information sheets.
Estimated number of individuals / organisations consulted	Woodside had meaningful conversations with approximately 12 groups. These people identified as being Exmouth community members or visitors to Exmouth (residents of the East Coast of Australia or Western Australia).

Summary of Feedback, Objection or Claim

- Community members were able to engage with Woodside representatives to understand the proposed activity and how it may affect them, ask questions, and provide their feedback.
- There was general interest in Woodside activities. Key issues discussed:
  - Query on whether Woodside is building new marine infrastructure being built in the nearshore environment. A query was received on whether the design of Scarborough infrastructure allows for juvenile fauna to continue to traverse the nearshore environment.
  - Woodside responded that the Scarborough trunkline was installed by horizontal directional drilling to minimise impacts to the beach and nesting turtles. The Scarborough trunkline is not a solid structure that would block movement of nearshore juvenile fauna.
  - General queries on Woodside's footprint in Exmouth.
  - Queries about employment and local content opportunities.
  - Interest in understanding current social investment programs and opportunities.
  - Stakeholders identifying themselves as Woodside shareholders interested in project updates, particularly on Scarborough.
  - Query on domestic gas commitments for Woodside's activities.

Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response

Whilst feedback was received, there were no specific objections or claims to a particular Woodside project or activity.

The community information sessions were part of Woodside's broader consultation approach to enable self-identification, and provide relevant persons with the opportunity to assess any impacts on their functions, interests or

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation.

From 9 November 2024, Woodside ran an Operations EP specific geotargeted, sponsored social media campaign across regions within or coastally adjacent to the Operations EP EMBA. The campaign was designed to bring the proposed activity to the attention of persons who may be interested and advised persons or organisations on how they could find out about Woodside's proposed activities by visiting Woodside's website.

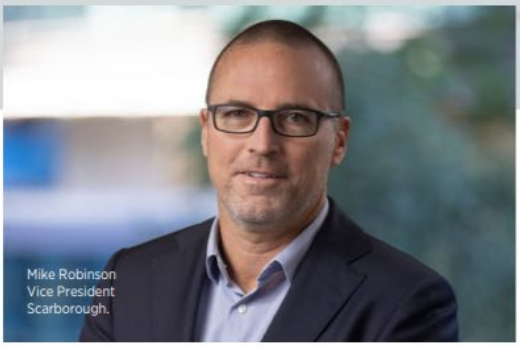
6.5 Community Newsletters

6.5.1 Karratha Community Update



Q1 – 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Mike Robinson
Vice President
Scarborough.

The Scarborough Energy Project will see gas from the Scarborough fields piped approximately 430 km to be processed onshore at the Pluto LNG facility, where Pluto Train 2 is currently under construction. Scarborough gas will also be processed through the existing Pluto Train 1 plant following modifications, which are expected to commence in late 2024.

The Project is now more than 55% complete[1], and in March 2024, Pluto Train 2 achieved a key milestone, the arrival of the first modules in Karratha. This year, a total of 51 modules will be delivered to Pluto for installation.

This year, Woodside also celebrates its 70th anniversary and the North West Shelf Project marks 40 years of domestic gas production and 35 years of LNG exports from Karratha. Over this period, we have provided reliable energy to Australia and the world from the community we continue to call home. Karratha is where the Woodside story began and the Scarborough Energy Project will build on the legacy of supporting the world's energy needs from this region.

We are proud of the Scarborough Energy Project and what it will deliver for the Karratha community and the nation.

Mike Robinson
Vice President Scarborough

[1] The completion percentage excludes the Pluto Train 1 modifications project.

Graduating apprentices and trainees at Red Earth Arts Precinct.

Celebrating success: Woodside Training Academy Graduation and Awards

The Karratha Gas Plant-based Woodside Training Academy has seen more than 750 apprentices and trainees commence their learning journey with Woodside since it opened its doors in 2010.

The Academy plays an integral role in hosting those who are building their employable skills and experience, supporting the development of local workforce capabilities.

This March, Woodside welcomed 21 apprentices and trainees into roles across its Burrup assets. The Woodside Training Academy Graduation and Awards held at Red Earth Arts Precinct saw the graduating cohort celebrated for their achievements in completing their training. The event also recognised and awarded the outstanding performance of particular individuals throughout their training process. The award recipients were selected for their dedication, commitment and consistent demonstration of Woodside's values.

An additional 33 apprentices, trainees and pre-pathway trainees, including 17 school leavers from the Karratha area, have been recruited by Woodside's training partner, Programmed Training Services and are being hosted by Woodside in 2024. We're proud to have close to 100 apprentices and trainees learning their craft at the Woodside Training Academy and offshore assets this year.

Scan the QR code or click here to get to know a few of Woodside's new team members.

Woodside extends investment in education initiative

Woodside was recently joined in Karratha by the WA Minister for Education Dr. Tony Buti MLA and Kevin Michel MLA to share news of our ongoing collaboration with schools in the local community.

Together with our joint venture partners, we were pleased to announce our extended support for education in the City of Karratha after signing five-year community partnership agreements for the ongoing delivery of the Karratha and Roebourne Education Initiative (KREI).

The extension builds on more than 15 years of investment by the Woodside-operated North West Shelf Project to bridge the gap between the opportunities and resources available to students residing in the Pilbara and their metropolitan peers, and support students on their pathway to employment.

The renewed agreements with the Department of Education and St Luke's College increases funding provided for programming at local high schools and extends that support to primary schools in the community.

The funding will enable the delivery of quality educational opportunities, including ATAR revision seminars, additional STEM curriculum, student leadership programs, employment and career pathway planning, and teacher development.

Western Australia's Minister for Education, Hon Dr Tony Buti MLA, said he is thrilled support for the Initiative will continue for years to come, benefitting even more students in the Pilbara.

"It has proved to be a very successful partnership over the years helping many students achieve their best and guiding them to a range of careers," Minister Buti said.

Woodside CEO, Meg O'Neill, said the renewed agreements reflected Woodside's commitment to improving capability and capacity in its host communities.

"The Initiative has delivered strong educational outcomes and its success is a testament to what can be achieved when we work collaboratively with a student-centred approach," she said.

Baynton West Primary School Principal Lisa Ledger, WA Minister for Education Hon Dr Tony Buti MLA, Woodside Energy Corporate Affairs Manager North West Amanda Fuery, Pilbara Education Regional Office Program Coordinator Amanda Lawrence, Member for Pilbara Kevin Michel MLA and students from Baynton West Primary School.

Apprentice takes home Citizen of the Year

Meet Rhian. She's a fourth-year, Programmed Electrical Instrumentation Apprentice at Karratha Gas Plant and was recently named the City of Karratha's Citizen of the Year.

Rhian joined the Karratha Volunteer Fire and Rescue Service to meet people and make friends when she first moved to Karratha. She now holds a senior position and is on-call 24/7 with requests for jobs, including road crash rescues, house fires, HAZMAT incidents and assisting the local police.

But Rhian's contribution to the community doesn't stop at fire and rescue. Five years ago, she joined St John Ambulance as an Emergency Medical Technician volunteer.

She's attended more than 800 jobs in and around Karratha, and she also helped at the 2019-2020 Black Summer fire in QLD. Rhian also volunteers at community events like Speedway, Karratha's FeNaCING festival, Santa lolly runs, youth cadets and school visits.

"I just love giving back to the community and helping people in times of need. It's what I enjoy doing in my spare time. Some people play sport. I volunteer," said Rhian.

Electrical Instrumentation Apprentice and City of Karratha Citizen of the Year, Rhian

Indigenous Collegiate leads cargo loading

As the Woodside-operated North West Shelf Project prepares to mark 35 years of delivering LNG cargoes to our international customers, another achievement was recently recognised at Karratha Gas Plant.

In January, an LNG cargo was loaded at Karratha Gas Plant's berths by a team made up entirely of Indigenous employees.

The team consisted of nine members from Storage and Loading, including Operations Support Trainees through to Maintenance Technicians and Supervisors. The vessel was also piloted by Woodside and Australia's first Indigenous master mariner.

Woodside's Indigenous Liaisons Coach, Josh Hill, said the activity demonstrated the progress Woodside has made in creating employment opportunities for First Nation's people.

"It was inspiring to see and reflects Woodside's work to increase Indigenous recruitment and provide career support for members of the Indigenous Collegiate," he said.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Pluto Train 2 modules arriving in Karratha.

Making significant progress on the Scarborough Energy Project

The Scarborough Energy Project's Pluto Train 2 achieved a major milestone with the first three modules now safely installed on site in Karratha.

The modules, which arrived in February 2024, weigh a combined total of more than 4,000 metric tonnes, equivalent to the weight of 30 houses or 24 Boeing 787 Dreamliner aircraft. The modules were transported from Pilbara Ports to the construction site at the existing Pluto LNG facility using 21 specialised hydraulic transporters with 126 axles and 504 wheels.

Our CEO, Meg O'Neill, said the delivery of the first Pluto Train 2 module was a key milestone towards the delivery of the Scarborough Energy Project, which will help meet the growing demand for the low-cost, lower-carbon, reliable energy the world needs today and into the future.

"The safe and timely arrival of the module is a testament to the hard work and dedication of the Woodside team and our lead contractor Bechtel," she said.

The Scarborough Energy Project will contribute significantly to the Australian economy and create thousands of job opportunities during its construction phase.

The Project is already benefiting local Karratha businesses, including almost 30 Indigenous businesses that have been engaged. It is also supporting Woodside's investment in social contribution partnerships that provide positive impacts for those living in the Karratha community.

Scan the QR code or click here to see the arrival of the modules in Karratha .

Local businesses set to benefit from the Scarborough Energy Project

The Scarborough Energy Project, including Pluto Train 2 is providing opportunities for local businesses in Karratha. To date, with collaboration from Woodside's construction partner Bechtel, the Project has injected more than $90 million locally and contracted with close to 70 Karratha businesses.

Local, family-owned business, ATOM is one of these businesses. ATOM was recently awarded a contract to supply industrial consumables, safety supplies and personal protective equipment products for the Pluto Train 2 construction.

ATOM believes locals serve locals best, which is why their 22 employees supporting the project are all local to Karratha. Nearly half of the team are female and there is one Indigenous employee.

The contract has supported ATOM to expand its workforce increasing local employment opportunities.

Long-term, it's estimated Pluto Train 2 will sustain around 600 roles, once the project is operational, across Western Australia, including 70 residential positions in Karratha.

Like Woodside, ATOM is a nationwide company, with roots in Western Australia. ATOM opened its Karratha branch in 1980, where during the same decade, we commissioned the North West Shelf Project.

ATOM also shares Woodside's commitment to invest where we operate, building meaningful relationships and supporting our local community.

Phil Donders, National Team Leader of ATOM said, "At ATOM, we believe in investing in the success and sustainability of the communities we operate within. This is why ATOM welcomed the opportunity to support the Pluto Train 2 Project through the supply of industrial consumables and PPE."

Darren Wilson, ATOM Karratha Branch Manager.

Q2 – 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

This year, Woodside celebrates its 70th anniversary and four decades of operations in Karratha.

Over this time, we have provided the reliable energy our state needs to power homes and industry.

2024 also marks 35 years since the North West Shelf Project loaded its first liquefied natural gas (LNG) cargo. After delivering more than 6,500 cargoes from the Karratha Gas Plant and Pluto LNG, we continue to supply the gas our international customers require to continue their decarbonisation journeys.

Since 1984, Woodside and its joint venture partners have made lasting contributions to the Karratha community through valued social contribution partnerships, employment and training pathways and opportunities for local businesses. These important and positive impacts were front of mind 40 years ago, and they will be as we embark on a period of change across our North West operations.

As the North West Shelf reserves gradually decline, we are assessing our future infrastructure requirements. We have previously said that we will be retiring one LNG processing train at the Karratha Gas Plant, which could happen as early as this year. We also continue to pursue opportunities to process other resource owners' gas and are focused on remaining a world-class tolling facility, albeit one that may become smaller over time.

At the same time, we are progressing our Scarborough Energy Project and building a second train at our Pluto LNG facility. We are pursuing local new energy opportunities, including the proposed Woodside Solar facility and we are investigating a potential carbon capture and storage project to help decarbonise industry in the Pilbara.

While the North West Shelf will operate differently over the next 40 years, our commitment to the Karratha community remains strong.

Just as the North West Shelf marked itself in Australia's history books in 1984, as we start to write a new chapter in the North West, we will do so together with the Karratha community.

Breyden Lonnie
Vice President North West Shelf

Volunteering WA Regional Community Engagement Coordinator Kelly Nunn (left) with Woodside volunteers at Gumala Early Learning Centre.

WOODSIDE VOLUNTEERS MAKE VALUED CONTRIBUTIONS

At Woodside, we take pride in giving back to the communities in which we operate. One of the ways we do this is through our corporate volunteering program.

Since the launch of the program with Volunteering WA in 2010, Woodsiders have been lending a helping hand with all kinds of community projects. Most recently, volunteers have participated in a range of activities from cooking meals for The Salvation Army to building a sandpit at Gumala Early Learning Centre and assembling furniture for the redevelopment of Roebourne District High School.

Our program partner, Volunteering WA, plays a crucial role in the success of Woodside's volunteering efforts by connecting us with local organisations in need of assistance and facilitating the opportunities to participate.

Volunteering WA's Regional Community Engagement Coordinator, Kelly Nunn said the partnership has delivered some important outcomes for the local community.

"Corporate volunteering offers fantastic opportunities for community organisations to complete ongoing maintenance or projects with the help of Woodside's employees, allowing them to focus on what they do best - providing programs and events for our community," she said.

STAY UP TO DATE ON OUR CONTINUED CONTRIBUTION TO THE COMMUNITY WE CALL HOME.

WORK READINESS PROGRAM CREATES CAREER PATHWAYS

A new Work Ready Program being run as part of the Pluto Train 2 Project is supporting skills development for local participants.

The latest round of the program commenced in February 2024, with participants offered the opportunity to build employable skills and industry experience. Participants complete Construction White Card, First Aid and site induction certifications. During the program, Bechtel offered job shadow placements of participants' choice which provided invaluable insights into the industry, helping them make informed decisions about their futures.

Gaining on the job experience with Bechtel also built work-life balance skills to prepare the graduates for full-time employment.

Sixteen individuals are now ready to commence full-time employment with Bechtel on the Pluto Train 2 site as Trade Assistants. The roles vary for these dedicated participants across various disciplines, including electrical, mechanical, warehousing and concreting.

A large part of the Work Ready Program's success is the camaraderie and culture that has been fostered within the group. As their skills have grown, so have integral and supportive relationships.

Woodside will continue to provide wrap-around support for these motivated participants, identifying long-term training and development opportunities such as apprenticeships, traineeships or roles within operations and projects.

Pluto Train 2 Project Manager, Tom Feutrill said the experience is creating pathways into fulfilling careers and building capability in the local community.

"Woodside's involvement in the program is aimed at establishing employment opportunities and providing successful and meaningful careers while developing critical life skills and confidence," he said.

Working with an experienced construction contractor such as Bechtel provides a unique opportunity to be involved in a program that supports meeting the growing demand for the low-cost, lower-carbon, reliable energy the world needs today and into the future.

The Work Ready Program is run by the Ngarliyarndu Bindirri Aboriginal Corporation (NBAC), supported by the Pluto Train 2 Project and the engineering, procurement and construction contractor, Bechtel.

NBAC team members with Work Ready Program graduates.

KARRATHA CENTRAL HEALTHCARE SOLAR INSTALL A SUCCESS

Social contribution plays an important role in building the capacity and capability of community partners to deliver positive impacts in the regions where we live and work. Together with our joint venture partners, Woodside is proud to support those who support others in the City of Karratha.

Allied health services provider, Karratha Central Healthcare is one of the valued organisations Woodside has proudly partnered with. In 2023, the Scarborough Energy Project assisted Karratha Central Healthcare to review its operations and strategies developed to support the not-for-profit's long-term sustainability. The review identified a reduction in operating costs as a key opportunity, with a particular focus on power expenditure.

The Pluto Train 2 Project was pleased to provide funding alongside the City of Karratha for the installation of a solar power system at Karratha Central Healthcare's premises. The system, which was installed by local business Coastal Electrical and Data, will go a long way in helping Karratha Central Healthcare to reduce its power costs.

Karratha Central Healthcare's Operations Manager, Kingsley Murray said the solar power system would help the organisation allocate resources into programs for the local community.

"The solar system has already made a notable difference to our operating costs; on a good day the system is supplying up to 95% of our power needs, and in overcast and lowlight conditions about 35-40%.

"These savings can then be used for our not-for-profit and charitable programs, it's a win for us and a win for our community," he said.

Karratha Central Healthcare clinic.

ACCOMMODATION INITIATIVE ACKNOWLEDGED AT EXCELLENCE AWARDS

In May 2024, the City of Karratha Service Worker Accommodation Initiative was recognised as a finalist in the Community Development category of the Australian Energy Producers' Excellence Awards.

The Service Worker Accommodation Initiative is a partnership between the City of Karratha, Woodside and industry that aims to provide additional affordable rental options for people working in critical service worker sectors in Karratha, like childcare and allied health.

Launched in 2021, the initiative established a pool of housing managed by the City of Karratha and Woodside, offering affordable rental options for service workers. Woodside and joint venture partners at Pluto LNG and the North West Shelf Project are pleased to now contribute 30 houses to the accommodation pool.

If you would like to find out more about the Service Worker Accommodation Initiative, visit the City of Karratha website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

GBSC Yurra team member working on one of the 20 new builds.

BUILDING MOMENTUM WITH LOCAL HOUSING CONTRACT

We understand that housing is an important issue for the Karratha community. And that's why Woodside is working closely with the City of Karratha and other stakeholders to help overcome this challenge.

Some initiatives established to support housing in Karratha include contributing 30 properties to the City of Karratha's Service Worker Accommodation Initiative, the incremental divestment of older housing stock as well as making a small number of properties available for lease on the open market.

Late last year, the Pluto LNG Project also entered into a long-term agreement with Traditional Owner business Karratha Housing Pty Ltd (a subsidiary of Yurra Pty Ltd) for the build and lease back of 20 houses in Karratha.

Under the agreement, 10 homes are being built by GBSC Yurra and another 10 will be constructed by Ngarluma Yindjibarndi Foundation Limited (NYFL) in partnership with Thomas Building.

Work is now well underway on the construction of these new homes, which will be leased back to Woodside for a period of 15 years and are targeted to be completed by the end of 2025.

All of the houses will be maintained by Karratha Housing Pty Ltd as part of the lease agreement that will provide long-term revenue and capital assets to support the Yurra business into the future.

Michael Woodley, Chief Executive Officer at Yindjibarndi Aboriginal Corporation and Yurra Founder said he is very proud of the Yurra team and the partnership that has been established with Woodside over recent years.

"Having long-term contracts such as this enables us to work collaboratively with Woodside Energy on mutually beneficial plans that will create real legacy for our community," he said.

Woodside is also investigating potential options to build up to 60 additional new homes in Karratha to address its future workforce needs.

Our partnership with the City of Karratha helps to support much-loved community events.

WOODSIDE JOINS THE FUN AT RED EARTH ARTS FESTIVAL

Woodside and some of our joint venture partners were pleased to support the City of Karratha's Red Earth Arts Festival (REAF) which featured over 70 performances, workshops, and experiences over four days in May 2024.

This year saw the introduction of REAF at The Quarter which offered a suite of free, family-friendly activities, activating and transforming the area into a hub of artistic and cultural activity.

The Plants of the Pilbara installation was a highlight, a pop-up flower dome sculpture invited viewers to experience the magic of Western Australia's native flora on a larger-than-life scale. Artists from Yinjaa-Barni Art Group painted and displayed art on site, welcoming the public to engage.

Locals were spoilt for dinner choices as part of Karratha City Eats, picnicking on the Quarter grass while enjoying an open-air performance featuring captivating handpan artist Sam Maher and Indigenous songwriter Frank Yamma, crossing cultural and musical boundaries.

The Community Development partnership between the City of Karratha and Woodside and our joint venture partners was extended last year, with support from the Scarborough Energy Project. This supports the continued provision of important and much-loved community events like REAFas well as liveability initiatives and significant City projects.

City of Karratha Mayor Daniel Scott said working together was an integral part of delivering high quality community programs and well-attended community events.

"This support is incredibly important, assisting City operations in the delivery of exceptional events, programming and projects for our residents to enjoy," he said.

Q3 – 2024

Woodside Energy

Karratha Community Update

Edition 3 | 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Earlier this year, I relocated to Karratha and commenced as Asset Manager of the North West Shelf Project's Karratha Gas Plant.

It was a real pleasure to join Woodside's local team at a time when we were celebrating 70 years of Woodside and 40 years of operations right here in the North West.

Karratha is where our story began in Western Australia and Woodside has a proud history of contribution to the place we continue to call home. This year's milestones gave me insight into the longstanding partnerships and strong relationships we've developed with the community over this time.

The North West Shelf Project has contributed more than $300 million within the City of Karratha since our operations began. This investment in the local community and economy continues as we support partnerships and businesses like the ones you will read about in this update.

We are entering a period of change at the Karratha Gas Plant as we undertake work to prepare for the retirement of one of our LNG processing trains later this year. This is an important step in the journey ahead as we navigate the gradual decline of the North West Shelf reserves and continue to pursue opportunities to process other resource owners' gas.

As we manage the future of the North West Shelf alongside our Pluto LNG operations and the growth of the Scarborough Energy Project, we will continue to engage and collaborate with those we work with, partner with and live alongside. We look forward to engaging and involving the local community in the future of Woodside in Karratha, working together to create opportunities in the place we call home.

Derek Paulgaard
Asset Manager North West Shelf Onshore.

Celebration sundowner

On the evening of 18 September, as the sun set over Karratha, we gathered with our local community partners to celebrate both Woodside's 70th year as a proud Australian company and 40 years of operations in the North West.

Our sundowner event, held at the Red Earth Arts Precinct, provided an opportunity to share our appreciation for the local community which has supported Woodside over its decades of operations in Karratha.

Woodside Executive Vice President and Chief Operating Officer Liz Wescott joined us at the event and expressed her gratitude for the role those in attendance continue to play in shaping Karratha into a thriving and connected community.

Liz also announced a one-off large grant round, supported by Woodside and its Joint Venture participants in the North West Shelf Project and the Scarborough Energy Project's Pluto Train 2.

With applications open throughout October, the Woodside Anniversary Grants will provide funding of up to $100,000 to community groups and not-for-profit organisations in the City of Karratha to support health, liveability, sustainability and environmental outcomes.

Thank you to all who joined us in marking such a special occasion.

Stay up to date on our continued contribution to the local community Woodside North West

Winyama awarded construction contract

This year, Woodside awarded its largest ever Traditional Owner construction contract to Karratha company Winyama Contracting Group (Winyama). The contract was awarded for the delivery of civil works for the Pluto Train 1 Modifications Project. Winyama will work alongside Kellogg Brown & Root Pty Ltd., the project's engineering, procurement and construction management contractor.

Winyama is a 100% Karratha-owned and 50% Indigenous-owned provider of civil, construction and mining services and renewable asset hire that prioritises spend with local and Indigenous suppliers. The name Winyama, meaning Sea Eagle in the Ngarluma language, symbolises the company's mission to provide economic opportunities and prosperity for local Aboriginal people. It is a bird that has held significance through the female line of Ngarluma majority owner Arthur Ramirez's family for generations.

Woodside Pluto Expansion Project Manager Paul Baker said Woodside was thrilled to be partnering with Winyama for the delivery of the civil works for the Pluto Train 1 Modifications Project and supporting the delivery of local business and employment outcomes for the Pilbara.

"By engaging a local Indigenous-led and owned contractor, we're securing the delivery of an important service while contributing to the local economy. The contract will also support the growth of Winyama, increasing the company's capacity to deliver services to other industries across the Pilbara," he said.

Arthur Ramirez, Winyama Chairman and Indigenous Business Manager, said the new supply agreement with Woodside was a major milestone for Winyama.

"This project will allow our team to grow by about another 65 new employees, with the majority being residential employees.

"Being engaged on the Pluto Train 1 Modifications Project will help fulfil Winyama Contracting Group's vision to increase its footprint in the region, which will enable us to increase our focus on outcomes for Aboriginal people through our reflection Reconciliation Action Plan.

"We are really proud that Woodside has chosen a local Karratha-based Indigenous business to execute a major portion of one of their largest current projects, showing they live their values and support local and Indigenous business growth in the region," he said.

Winyama, KBR and Woodside representatives at Pluto LNG.

Healing comes from Country

Roebourne-based start-up Warridahs of the Ngurra (WOTN) aims to build awareness and respect for traditional bush medicine and share cultural knowledge. Meaning 'Women of Country' in Ngarluma language, WOTN was founded in 2023 by Ngarluma and Banjima woman, Kylie Mowarin.

Kylie's years of dedication to exploring the uses and benefits of native plants have seen her experiment with the ingredients in teas and ointments. The healing properties of these plants have recently been reinforced by modern scientific research conducted in partnership with Griffith University.

"We are working with Griffith University, testing two traditional plants for their antimicrobial, antioxidant and anti-inflammatory properties. So far, we are seeing very positive results," said Kylie.

With support from Woodside, Kylie recently held a bush medicine workshop on Murujuga alongside local Elders, representatives from Murujuga Aboriginal Corporation, Griffith University and a leading archaeologist.

Students from Roebourne District High School were among the attendees at the workshop at Hearson's Cove. Kylie spoke with students about the scientific attributes of traditional medicines and their gathering methods.

"It's important to pass on our knowledge from our ancestors and for our young ones to understand our cultural connections to Country and how it can help with healing our bodies and minds," said Kylie.

Liz Ritchie, Roebourne District High School Principal, said the students' involvement in the workshop was part of Connected Learning, a program developed with support from the Karratha and Roebourne Education Initiative to link classroom curriculum with cultural knowledge and community.

"We are deeply committed to delivering education that is culturally respectful and meaningful. This work can only be achieved when we have the guidance, support and expertise of our families, community advisors, and Elders.

"Participating in the Warridahs of the Ngurra workshops enables our young people to demonstrate practical applications of the learning that occurs in class and on-Country throughout the term.

"The day was an authentic example of how curriculum delivery in a culturally responsive and connected way leads to deep two-way learning of skills and knowledge," she said.

Looking ahead, WOTN plans to create a healing hub in Roebourne, which aims to balance education, wellbeing, and a sustainable business by building upon a range of products Kylie has been developing with native plants.

"We also plan to provide on-Country tours, which will provide economic prosperity for our people through employment and educating women in how to run a business," said Kylie.

Kylie Mowarin with students from Roebourne District High School at Hearson's Cove.

Stay up to date on our continued contribution to the local community Woodside North West

KREI supports student revision seminars

For more than 15 years, Woodside and its Joint Venture participants have contributed to programs aimed at enhancing academic achievements among students in the City of Karratha. Since the establishment of the Karratha and Roebourne Education Initiative (KREI), a key focus has been to bridge the gaps in opportunities available to local students and their peers in metropolitan areas.

During the recent school holidays, the KREI supported a group of Year 12 students from St Luke's College to travel to Perth for a 10-day educational experience. The local students participated in a series of intensive revision seminars, designed to prepare them for their WACE examinations. With small class sizes and personalised help from specialist teachers, students were able to delve into the course material and discuss valuable exam strategies.

While in Perth, the students dedicated time outside the seminars to learn about life at university. They visited several campuses where they engaged in pre-arranged faculty workshops and met with student ambassadors to gain valuable insights into the university environment, academic workload, course offerings and entry pathways.

The students also took the opportunity to explore the university accommodation colleges, helping them to envision their potential future living arrangements and supporting their readiness for their upcoming transition to higher education.

St Luke's College Upper School Pathways Coordinator Carol Potter said this year's revision seminars were an outstanding success.

"We are very fortunate to have the support of the Karratha and Roebourne Education funding, which made both the revision seminars and university visits possible. Our students are now feeling more prepared ahead of their final examinations and transition into tertiary education, away from their family to a big city," she said.

Supporting local students from St Luke's College and Karratha Senior High School to travel to Perth for revision seminars is just one example of Woodside and its Joint Venture participants' contribution to schools in the City of Karratha. Earlier this year, Woodside announced the renewal of the KREI, with five-year community partnership agreements. The renewal builds on a strong history of collaboration and provides continued investment to help local high school and primary school students thrive.

Students from St Luke's College on KREI supported Perth visit.

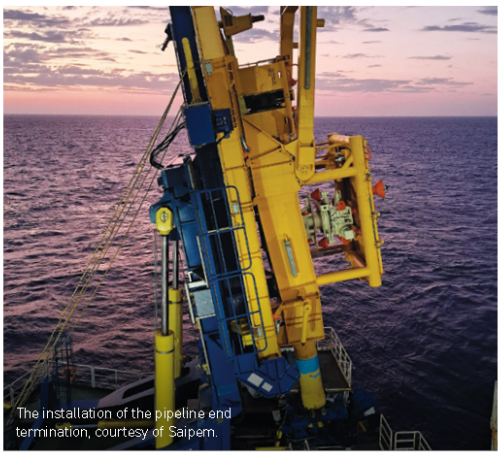
Scarborough trunkline installation a success

This October, Woodside marked an important milestone as it announced the completion of the Scarborough Energy Project's trunkline installation. Once operational, the 433 km trunkline will transport gas from the offshore Scarborough field to the onshore Pluto LNG facility for processing.

Reaching depths of up to 1400 m, the trunkline took around 12 months to install and had numerous teams and contractors contributing to the successful work program.

Woodside Executive Vice President and Chief Operating Officer Australia Liz Westcott said the trunkline was a critical piece of infrastructure for the Scarborough Energy Project.

"The completion of installation is a significant accomplishment, reflecting the dedication of all involved in achieving this project milestone.



"With the last components of the trunkline in place, the focus will be maintained on safely executing the remaining project scopes to support the targeted first Scarborough LNG cargo in 2026," she said.

Following the successful installation of the trunkline, work will now commence on the pre-commissioning in preparation for hook-up of the subsea infrastructure.

The Scarborough Energy Project was 73% complete in October[1], and is set to help meet demand for the reliable energy the world needs today and into the future. This includes up to 225 terajoules a day of domestic gas supply into the Western Australian market from operations in Karratha.

These volumes will be processed by the recently delivered Pluto Train 2 domestic gas module. The important piece of infrastructure, which arrived in Karratha and was installed in early September, weighs over 1500 tonnes and will connect to the domestic gas export compressor. The domestic gas module is one of the 51 modules that is targeted to be delivered to site by the end of this year.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Mike Robinson
Vice President
Scarborough.

The Scarborough Energy Project will see gas from the Scarborough fields piped approximately 430 km to be processed onshore at the Pluto LNG facility, where Pluto Train 2 is currently under construction. Scarborough gas will also be processed through the existing Pluto Train 1 plant following modifications, which are expected to commence in late 2024.

The Project is now more than 55% complete[1], and in March 2024, Pluto Train 2 achieved a key milestone, the arrival of the first modules in Karratha. This year, a total of 51 modules will be delivered to Pluto for installation.

This year, Woodside also celebrates its 70th anniversary and the North West Shelf Project marks 40 years of domestic gas production and 35 years of LNG exports from Karratha. Over this period, we have provided reliable energy to Australia and the world from the community we continue to call home. Karratha is where the Woodside story began and the Scarborough Energy Project will build on the legacy of supporting the world's energy needs from this region.

We are proud of the Scarborough Energy Project and what it will deliver for the Karratha community and the nation.

Mike Robinson
Vice President Scarborough

[1] The completion percentage excludes the Pluto Train 1 modifications project.

Graduating apprentices and trainees at Red Earth Arts Precinct.

Celebrating success: Woodside Training Academy Graduation and Awards

The Karratha Gas Plant-based Woodside Training Academy has seen more than 750 apprentices and trainees commence their learning journey with Woodside since it opened its doors in 2010.

The Academy plays an integral role in hosting those who are building their employable skills and experience, supporting the development of local workforce capabilities.

This March, Woodside welcomed 21 apprentices and trainees into roles across its Burrup assets. The Woodside Training Academy Graduation and Awards held at Red Earth Arts Precinct saw the graduating cohort celebrated for their achievements in completing their training. The event also recognised and awarded the outstanding performance of particular individuals throughout their training process. The award recipients were selected for their dedication, commitment and consistent demonstration of Woodside's values.

An additional 33 apprentices, trainees and pre-pathway trainees, including 17 school leavers from the Karratha area, have been recruited by Woodside's training partner, Programmed Training Services and are being hosted by Woodside in 2024. We're proud to have close to 100 apprentices and trainees learning their craft at the Woodside Training Academy and offshore assets this year.

Woodside extends investment in education initiative

Woodside was recently joined in Karratha by the WA Minister for Education Dr. Tony Buti MLA and Kevin Michel MLA to share news of our ongoing collaboration with schools in the local community.

Together with our joint venture partners, we were pleased to announce our extended support for education in the City of Karratha after signing five-year community partnership agreements for the ongoing delivery of the Karratha and Roebourne Education Initiative (KREI).

The extension builds on more than 15 years of investment by the Woodside-operated North West Shelf Project to bridge the gap between the opportunities and resources available to students residing in the Pilbara and their metropolitan peers, and support students on their pathway to employment.

The renewed agreements with the Department of Education and St Luke's College increases funding provided for programming at local high schools and extends that support to primary schools in the community.

The funding will enable the delivery of quality educational opportunities, including ATAR revision seminars, additional STEM curriculum, student leadership programs, employment and career pathway planning, and teacher development.

Western Australia's Minister for Education, Hon Dr Tony Buti MLA, said he is thrilled support for the Initiative will continue for years to come, benefitting even more students in the Pilbara.

"It has proved to be a very successful partnership over the years helping many students achieve their best and guiding them to a range of careers," Minister Buti said.

Woodside CEO, Meg O'Neill, said the renewed agreements reflected Woodside's commitment to improving capability and capacity in its host communities.

"The Initiative has delivered strong educational outcomes and its success is a testament to what can be achieved when we work collaboratively with a student-centred approach," she said.

Baynton West Primary School Principal Lisa Ledger, WA Minister for Education Hon Dr Tony Buti MLA, Woodside Energy Corporate Affairs Manager North West Amanda Fuery, Pilbara Education Regional Office Program Coordinator Amanda Lawrence, Member for Pilbara Kevin Michel MLA and students from Baynton West Primary School.

Apprentice takes home Citizen of the Year

Meet Rhian. She's a fourth-year, Programmed Electrical Instrumentation Apprentice at Karratha Gas Plant and was recently named the City of Karratha's Citizen of the Year.

Rhian joined the Karratha Volunteer Fire and Rescue Service to meet people and make friends when she first moved to Karratha. She now holds a senior position and is on-call 24/7 with requests for jobs, including road crash rescues, house fires, HAZMAT incidents and assisting the local police.

But Rhian's contribution to the community doesn't stop at fire and rescue. Five years ago, she joined St John Ambulance as an Emergency Medical Technician volunteer.

She's attended more than 800 jobs in and around Karratha, and she also helped at the 2019-2020 Black Summer fire in QLD. Rhian also volunteers at community events like Speedway, Karratha's FeNaCING festival, Santa lolly runs, youth cadets and school visits.

"I just love giving back to the community and helping people in times of need. It's what I enjoy doing in my spare time. Some people play sport. I volunteer," said Rhian.

Electrical Instrumentation Apprentice and City of Karratha Citizen of the Year, Rhian

Indigenous Collegiate leads cargo loading

As the Woodside-operated North West Shelf Project prepares to mark 35 years of delivering LNG cargoes to our international customers, another achievement was recently recognised at Karratha Gas Plant.

In January, an LNG cargo was loaded at Karratha Gas Plant's berths by a team made up entirely of Indigenous employees.

The team consisted of nine members from Storage and Loading, including Operations Support Trainees through to Maintenance Technicians and Supervisors. The vessel was also piloted by Woodside and Australia's first Indigenous master mariner.

Woodside's Indigenous Liaisons Coach, Josh Hill, said the activity demonstrated the progress Woodside has made in creating employment opportunities for First Nation's people.

"It was inspiring to see and reflects Woodside's work to increase Indigenous recruitment and provide career support for members of the Indigenous Collegiate," he said.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Pluto Train 2 modules arriving in Karratha.

Making significant progress on the Scarborough Energy Project

The Scarborough Energy Project's Pluto Train 2 achieved a major milestone with the first three modules now safely installed on site in Karratha.

The modules, which arrived in February 2024, weigh a combined total of more than 4,000 metric tonnes, equivalent to the weight of 30 houses or 24 Boeing 787 Dreamliner aircraft. The modules were transported from Pilbara Ports to the construction site at the existing Pluto LNG facility using 21 specialised hydraulic transporters with 126 axles and 504 wheels.

Our CEO, Meg O'Neill, said the delivery of the first Pluto Train 2 module was a key milestone towards the delivery of the Scarborough Energy Project, which will help meet the growing demand for the low-cost, lower-carbon, reliable energy the world needs today and into the future.

"The safe and timely arrival of the module is a testament to the hard work and dedication of the Woodside team and our lead contractor Bechtel," she said.

The Scarborough Energy Project will contribute significantly to the Australian economy and create thousands of job opportunities during its construction phase.

The Project is already benefiting local Karratha businesses, including almost 30 Indigenous businesses that have been engaged. It is also supporting Woodside's investment in social contribution partnerships that provide positive impacts for those living in the Karratha community.

Scan the QR code or click here to see the arrival of the modules in Karratha .

Local businesses set to benefit from the Scarborough Energy Project

The Scarborough Energy Project, including Pluto Train 2 is providing opportunities for local businesses in Karratha. To date, with collaboration from Woodside's construction partner Bechtel, the Project has injected more than $90 million locally and contracted with close to 70 Karratha businesses.

Local, family-owned business, ATOM is one of these businesses. ATOM was recently awarded a contract to supply industrial consumables, safety supplies and personal protective equipment products for the Pluto Train 2 construction.

ATOM believes locals serve locals best, which is why their 22 employees supporting the project are all local to Karratha. Nearly half of the team are female and there is one Indigenous employee.

The contract has supported ATOM to expand its workforce increasing local employment opportunities.

Long-term, it's estimated Pluto Train 2 will sustain around 600 roles, once the project is operational, across Western Australia, including 70 residential positions in Karratha.

Like Woodside, ATOM is a nationwide company, with roots in Western Australia. ATOM opened its Karratha branch in 1980, where during the same decade, we commissioned the North West Shelf Project.

ATOM also shares Woodside's commitment to invest where we operate, building meaningful relationships and supporting our local community.

Phil Donders, National Team Leader of ATOM said, "At ATOM, we believe in investing in the success and sustainability of the communities we operate within. This is why ATOM welcomed the opportunity to support the Pluto Train 2 Project through the supply of industrial consumables and PPE."

Darren Wilson, ATOM Karratha Branch Manager.

Q1 – April 2025

Karratha Community Update

April 2025

Liz Westcott Executive Vice President and Chief Operating Officer Australia.

Woodside hopes to keep on contributing

As seen in the Pilbara News - Wednesday, 12 March 2025.

Last year, Woodside celebrated 70 years as a proud Australian company, and the North West Shelf Project marked 40 years of operations from right here in Karratha.

We are proud to be a part of this community. It's where our story started.

But there is currently a debate playing out that could determine the future of the North West Shelf Project and the ongoing operation of its Karratha Gas Plant.

The North West Shelf Project Extension approval is required to enable operations beyond 2030.

Let's be clear — this approval does not involve expanding our onshore infrastructure or footprint on Murujuga.

It allows us to continue our existing operations across the North West Shelf Project.

In December last year, six years after we applied, the State Government approved the North West Shelf Project Extension proposal, with conditions including cultural heritage, emissions and air quality. We take our responsibility to manage cultural heritage seriously, guided by Traditional Owners, heritage experts and credible science.

Following the robust assessment from the State, a final decision now rests with the Federal Government, and the stakes are high.

The North West Shelf Project supplies 14 per cent of WA's domestic gas — gas that not only powers homes, but also the mining operations and industries that provide many local jobs and underpin the economic strength of the Pilbara and Australia.

The North West Shelf Project alone employs about 900 people, and some 1300 contractors.

Almost 300 Woodsiders and their families live locally and work at the Karratha Gas Plant.

This year they were joined by 22 new apprentices and trainees who were welcomed into the Woodside Training Academy.

In 2024, the North West Shelf Project invested $5.1 million in the Karratha community on initiatives including education, health and liveability. Annually we spend around $1 billion with WA businesses, including contractors and service providers based in Karratha, and in 2024 about 700 WA businesses were engaged by the North West Shelf.

Last year I was pleased to be able to join some of our longstanding partners in Karratha as we celebrated our 40-year milestone.

I spoke with representatives from local schools, businesses and not-for-profit community organisations. I was humbled by what Woodside and the community here in Karratha have built together over the four decades of North West Shelf operations.

And it can continue to contribute, supporting our State's gas supply, the economy and the Karratha community for decades to come.

Extending the life of the North West Shelf Project will enable the future of our world-class operations, using existing infrastructure to produce the gas that local industry needs and our regional partners rely upon.

It enables us to leverage our decades of experience while unlocking long-term value through the development of the remaining North West Shelf reserves and processing of third-party gas.

Importantly, it allows us to make the business decisions today that will help maximise the use of processing capacity at the Karratha Gas Plant into the future.

With the Australian Energy Market Operator forecasting gas shortfalls in WA from 2028, extending the life of the North West Shelf Project makes sense.

But to be in a position to do this, we need a pragmatic approach from our nation's decision-makers. We need timely decisions to provide operational certainty and confidence to support the ongoing development of gas reserves that will keep the Karratha Gas Plant running.

We can all be proud of what the North West Shelf Project has contributed to Karratha over the last 40 years – and we're working to secure its ongoing contribution to the community we call home.

Stay up to date on our continued contribution to the local community Woodside North West

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

L-R: Roebourne District High School Chaplain Beth Smith, Roebourne District High School Principal Liz Ritchie, Woodside CEO Meg O'Neill, WA Premier Roger Cook and Kevin Michel MLA.

Investment continues to reach students in Roebourne

Woodside welcomed the new year with an exciting announcement.

In January, our CEO Meg O'Neill joined us at Roebourne District High School to share details of our significant contribution to the school's redevelopment.

Alongside WA Premier Roger Cook, Meg announced a contribution of $20 million over five years to the upgrades. Woodside's contribution will come from our A$50 million commitment to the Western Australian Government's Resources Community Investment Initiative.

Meg said funding was directed towards programs that deliver tangible benefits for the sustainability and liveability of our host communities.

"Our investment in the Roebourne District High School upgrades builds on our long-term commitment to positive regional education outcomes through the Karratha and Roebourne Education Initiative," said Meg.

For more than 16 years, we have proudly contributed to the Karratha and Roebourne Education Initiative (KREI) together with our joint venture participants. The partnership with local schools invests in opportunities to support the academic achievements of students and the development of their dedicated teachers.

Roebourne District High School is one of the long-standing participants of the KREI.

In 2024, the school developed a program to support students sitting the Western Australian Department of Education's Online Literacy and Numeracy Assessment (OLNA). Designed for secondary students to demonstrate they successfully meet the minimum standard of literacy and numeracy, the OLNA is an important step in supporting students on their path to further study and training.

Several students at the school were identified as requiring additional assistance and intervention to reach an OLNA pass level in one or more of the assessment areas.

Through the support of the KREI, individual learning and social needs of each student preparing to sit the OLNA were assessed so educational support could be tailored. Resources such as one-to-one and small group tutoring opportunities, and online training tools were provided focusing on building the skills required to improve students' OLNA results.

Roebourne District High School Principal Elizabeth Ritchie said the students who participated demonstrated greater levels of confidence when sitting the OLNA, resulting in one of the highest recorded sittings for the test at our school.

"The OLNA achievements of participating students have not only enhanced their own education experience but is positively impacting peers, because our students are actively supporting their classmates to improve their own reading, writing, and numeracy skills," said Elizabeth.

Stay up to date on our continued contribution to the local community Woodside North West

Woodside helps connect Cherratta to Country

Woodside was proud to award a $35 million contract to Cherratta Lodge earlier this year. The agreement marks the first time Woodside has awarded a village accommodation contract to a business owned by a Traditional Owner.

Under the agreement, Cherratta will accommodate the Pluto Train 1 modifications construction workforce, part of the Scarborough Energy Project.

Woodside initiated discussions last year with long-standing partner Cherratta Lodge, based in Karratha's Industrial Estate.

It was then that Cherratta owner Malcolm Wylie raised the prospect of a new partnership that could transition the site into a village owned and operated by a Traditional Owner – someone with traditional connections to the area.

Malcolm's vision was twofold: to give back to the community in which the business operates and for the site to become a leading facility providing career opportunities for Indigenous people.

"Not everyone wants to or can work on a mine site or a gas plant. A place like Cherratta not only provides jobs like gardening, cleaning, catering, access to trades and apprenticeships, it will deliver mentorship and empowerment programs for fledgling Indigenous businesses," said Malcolm.

Together with his business partner Aaron Polini, Malcolm invited Traditional Owner and Ngarluma Elder Harry Mowarin to join them in the ownership of Cherratta, after building a trusting friendship and agreeing on solutions to challenges together.

"As part of Cherratta's new energy projects, the company awarded a $1 million contract to Harry's contracting business," said Malcolm.

"Harry is a Ngarluma Elder who is well respected in the community and during the successful execution of this contract we realised Harry was the perfect fit for Cherratta. Through our programs he could help guide Indigenous people to learn, grow, develop skills and increase their confidence in an environment that is culturally safe, and on their own country."

L-R: Harry Mowarin Traditional Owner and Ngarluma Elder, Malcolm Wylie Cherratta Lodge business partner, Julie Attwood Local Content Manager and Rebekka Scroop Villages Coordinator.

Rebekka Scroop, our Villages Coordinator and Woodside's Local Content Manager, Julie Attwood both realised the potential significance of the agreement and the value it could provide to the local Indigenous community where we operate.

"It made sense. Woodside's contract would provide Cherratta with the confidence and security to support their transition to become a Traditional Owner village by securing a fixed number of rooms over three years, for the Pluto Train 1 modifications workforce," said Rebekka.

"By coming together to work towards a common goal, we had the opportunity to create a significant impact that will leave a lasting legacy for generations to come," said Rebekka.

Harry is overwhelmed by the opportunities this landmark agreement can create for both his family and his people. "This connection with Cherratta is life changing for me and my family."

"It's something that I never thought would be possible in my lifetime. For me, it's generational healing. I want to leave something behind for the emerging generation, for them to set themselves up and have a chance at a decent life," said Harry

Woodside Training Academy graduates and mentor award winners.

Woodside's own Academy Awards

Eighteen apprentices and trainees have joined the ranks of Woodside Training Academy participants who have been welcomed into roles across our operations.

The Woodside Training Academy Graduation and Awards held at Red Earth Arts Precinct saw the cohort celebrated for their achievements in completing their training.

Reflecting on the event, Academy Team Lead Jacqui Meeson said it provided a special opportunity to recognise the entire graduating group and the outstanding performance of individuals throughout their training.

"The award recipients were not only selected for their excellence during their training but also for their dedication, commitment and consistent demonstration of Woodside's values," said Jacqui.

"We are incredibly proud of what all of the apprentices and trainees have accomplished across their learning journey and we look forward to seeing their continued success throughout their careers with Woodside."

Several Woodsiders were acknowledged alongside the graduates for the support they provided the trainees and apprentices during their time at the Academy.

In his opening address, NWS Onshore Asset Manager Derek Paulgaard expressed his thanks for those across the business who played an essential role in contributing to the growth and development of the cohort.

"When the graduates faced challenges throughout their training, they had a network of family and friends to provide support and guide them. They also had a group of trainers, mentors, supervisors and peers who they could rely on," said Derek.

This year, 22 Karratha-based apprentices and trainees have been recruited by our partner Programmed Training Services and will be hosted at the Woodside Training Academy.

The 2025 intake includes seven operator trainees, 10 apprentices, three pre-pathway trainees and two school-based trainees – one trainee from Karratha Senior High School and one from Roebourne District High School.

Thirteen of the training participants are female and 14 are Indigenous. They are now part of the more than 80 apprentices and trainees building their skills and experience across our Western Australian operations.

Dampier Playgroup was previously awarded a Woodside Community Grant to help purchase new play equipment.

Giving back through community grants

Last year, we extended our grant offerings in the City of Karratha in celebration of our 70 years as a proud Australian company and four decades of safe and reliable operations in the place we call home.

Ten community and not-for-profit organisations were awarded Woodside Anniversary Grants of up to $100,000 for programs and activities that deliver positive local outcomes.

This March, we ran our first of two community grants rounds for 2025. If you missed out, don't worry, applications will be open again in October.

We have been running the program for seven years, awarding grants of up to $5,000 to support community initiatives in the City of Karratha and Shire of Exmouth.

It's part of our commitment to building local capacity and supporting opportunities that strengthen wellbeing in the community.

We were excited to announce the recipients of our Woodside Anniversary Grants in January.

Woodside Executive Vice President and Chief Operating Officer Australia Liz Westcott said Woodside and its joint venture participants in the North West Shelf Project and Scarborough Energy Project's Pluto Train 2 were pleased to support these valuable initiatives.

"Karratha is where our Western Australia story began and we understand that being a part of the community is centred on developing strong relationships and making meaningful contributions," said Liz.

"We have done this for 40 years and look forward to continue supporting projects and programs that provide local solutions to local challenges."

Grant recipients included:

- St John Ambulance to help purchase new ambulances and lifesaving equipment across its Karratha, Roebourne and Wickham operations.
- Yaandina Community Services for the installation of air-conditioning in its Roebourne residential detoxification facility.
- Yinjaa-Barni Art to support upgrades at its Roebourne art studio.
- The WA Centre for Rural Health to deliver a business case to support the development of a Centre for Applied Research and Education (CARE) hub in Karratha.
- Reach Us Pilbara for the purchase of equipment for its Karratha cancer support services centre.
- Juluwarlu Group for the delivery of the Yindjibarndi Wellness pilot program for Jadas and Gurri.
- Karratha RSL for the installation of solar panels, battery storage and new air-conditioners in its facility.
- Pilbara for Purpose to support the delivery of cultural competency training for community service providers.
- Karratha Volunteer Fire and Rescue Services to support the upgrade of storage facilities to support year-round storage of firefighting equipment.
- Dampier Community Association for the purchase of kitchen equipment to support activation of the Dampier foreshore kiosk.

If you would like more information about our next round of grants, you can contact us at northwestcommunities@woodside.com

Listening to our local community

Our approach to social performance at Woodside begins with understanding the potential impacts and opportunities associated with our activities.

Consultants from GHD recently visited Karratha and met with a range of stakeholders to inform Woodside's socio-economic impact assessment. Participants included Woodside's Karratha Community Liaison Group, local businesses, state and local government bodies, social contribution partners and healthcare providers.

During the engagements, participants were presented with a series of scenarios for our ongoing operations and proposed projects in the City of Karratha. Their valuable reflections and insights in response to the scenarios will assist in the identification and management of social impacts and benefits, including opportunities to contribute to the local community.

Woodside's Senior Social Performance Adviser David Collins is leading the assessment scope and said it is important to have the local community be a part of the journey.

"Over the past 40 years of operations, we have built strong relationships in community to enable ongoing engagement across all phases of our activities," said David.

"This is an important piece of work to understand sentiment towards Woodside by listening to concerns and asking how we can best manage impacts on a local level."

The socio-economic impact assessment will continue throughout 2025 as GHD visits community stakeholders in Roebourne.

To find out more about Woodside's approach to social performance please visit our website.

Karratha Community Update

Woodside Energy

July 2025

Woodside and its joint venture partners were proud to support the Red Earth Arts Festival, as The Quarter Sponsor.

Stay up to date on our continued contribution to the local community Woodside North West

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Meet the people of the North West Shelf Project (L-R): Haylee, Aaron and Narelle

Woodside welcomes proposed North West Shelf Project extension

The North West Shelf (NWS) Project has supplied energy to Australian and international customers since the 1980s, investing hundreds of millions of dollars into the local economy and community. It has pioneered the LNG industry in Australia and is a nationally significant asset.

The NWS Project is a major employer in and around Karratha, supporting the development of a local workforce through training and employment pathways and contracting opportunities throughout Western Australia.

After decades of processing only the NWS resources, the Karratha Gas Plant (KGP) now also processes gas for other resource owners, who pay a toll to use the facility. A transformation that enables this landmark facility to continue to supply energy to Western Australia and international markets for decades to come.

State Government approval for North West Shelf Project Extension was received in December 2024 after six years of assessment and appeals.

The Federal Government provided its proposed environmental approval for the North West Shelf Project Extension in May 2025 with proposed conditions. Consultation is now occurring with Government on the proposed conditions.

As part of the State Government approval in December 2024, the North West Shelf committed to a range of environmental management measures, including a significant reduction in air emissions and measures to manage greenhouse gas emissions and to reduce them over time.

In addition, meaningful consultation with Traditional Owners is occurring as part of these conditions, including complying with all air quality objectives and standards arising from the Murujuga Rock Art Monitoring Program.

We remain committed to protecting the Murujuga Cultural Landscape and support its World Heritage nomination. We believe long-term co-existence between cultural heritage and industry is possible when guided by credible science, Traditional Custodian leadership, and genuine collaboration.

Discover the ways the North West Shelf Project holds a special place for our people, the businesses we work with and the Pilbara community by scanning the QR code.

New members join Karratha Community Liaison Group

Woodside is committed to building strong relationships with the community. One way we do this is through our quarterly Community Liaison Group (CLG) meetings.

This month we were excited to welcome new members to the meetings following a review of the group's membership and call for public nominations to fill new community member positions on the CLG.

Meeting quarterly, the CLG is an important platform for Woodside to share information about our operations, gather feedback on current and future activities, and facilitate discussions on issues of importance to the community.

Our meetings cover a range of topics, including operational and project updates, social impacts, local content, environment plans and social investment.

If you're interested in finding out more about the CLG, contact us by email: northwestcommunities@woodside.com or keep an eye on our social media channels for updates.

Woodside's CLG meet quarterly to share information, gather feedback and facilitate discussions.

Impact felt locally in Karratha

Impact Digi is a Pilbara-based Indigenous owned and operated marketing agency with close to a decade of experience working with Woodside Energy.

A full-service marketing agency, Impact Digi has built relationships with government, industry, Indigenous organisations and businesses of all sizes helping them to build brands and reach stakeholders.

"The past couple of years have been extra rewarding as our reputation has grown within Woodside and we're getting to work with team members from other areas of their business," said Impact Digi Managing Director, Tamara Bin Amat

Starting off by offering photography services when they first began, Impact Digi has transformed over time with a growing team, refined services and an expanded reach.

"Looking back, one of my favourite moments was when local Asset Manager for the Karratha Gas Plant, Breyden Lonnie presented our first ever award for Best Aboriginal Business at the 2015 Karratha and Districts Chamber of Commerce and Industry (KDCCI) Business Excellence Awards," said Tamara.

That recognition is continuing with Impact Digi recently winning the Best Small Business Award at the 2024 KDCCI Business Excellence Awards.

Tamara Bin Amat and Jason Miltrup with the Woodside team at EXA 2025 in Perth

Tamara and her team understand the importance of supporting local and contributing to their community.

"Working with Woodside has not only boosted our business but also our reputation, opening doors to new opportunities across the state," said Tamara.

Celebrating 20 Years of Corporate Volunteering at Woodside

This year marks another significant milestone for Woodside: 20 years of corporate volunteering.

We take pride in our long-standing commitment to investing in the communities where we operate, and where our employees live and work. In fact, 20 years ago, Woodside was one of the first companies in Australia to offer volunteering leave to our employees.

Woodside employees are entitled to 12 hours of volunteering leave each year, empowering them to make a meaningful difference in their communities and engage in a variety of activities. In Karratha this includes volunteering at local food banks, participating in beach clean-ups and mentoring young people in educational programs.

Introducing Danielle East. If you've been involved in Woodside volunteering in WA's Pilbara region, chances are you've met Dan.

Since joining Woodside in 2011, Dan has worked across many roles, but none showcase her passion better than coordinating volunteering opportunities for our teams in Karratha.

Dan's commitment to volunteering extends beyond coordination; she actively contributes her time and effort to help those in need. As a long-serving member of the Karratha State Emergency Service, Dan has been instrumental in responding to crises. Earlier this year, following the impact of Category 4 Tropical Cyclone Zelia, she was one of a team of volunteers that assisted a remote Aboriginal community by clearing fallen trees and addressing other emergency response requirements.

"Giving back to the community is in my DNA," Dan shares. "Being able to support my neighbours in need at a time of crisis is essential for me. And I'm grateful Woodside has volunteering programs in place, where I can put my hand up and jump in as and where I'm needed."

Last year alone, Woodside employees dedicated over 650 volunteer hours to community groups and not-for-profit organisations within the City of Karratha. As we celebrate two decades of corporate volunteering, we look forward to continuing our community engagement and making a positive impact, one volunteer hour at a time.

North West Shelf Project supports community housing needs

The North West Shelf Project recently gifted two houses to vital local not-for-profit organisations in the Pilbara region.

This initiative underscores the Project's commitment to fostering community wellbeing and providing essential support to those in need.

One of the houses has been donated to Reach Us Pilbara, an organisation dedicated to providing cancer support services.

This new facility will enable Reach Us Pilbara to expand their services, offering a comforting space for individuals and families navigating the challenges of a cancer diagnosis. The house will serve as a sanctuary where patients can access support, counselling, and respite.

The second house has been gifted to the Salvation Army Karratha Women's and Children's Centre. This centre plays a crucial role in offering refuge and support to women and children escaping domestic violence situations. The additional space will allow the centre to accommodate more families, providing them with a safe and nurturing environment as they rebuild their lives.

By supporting these organisations, the North West Shelf Project aims to help address immediate community needs while contributing to the long-term resilience and wellbeing of the Pilbara community.

One hull of a milestone for Scarborough's FPU

The Scarborough Energy Project has achieved a major engineering milestone with the joining together of the topsides and hull for the Floating Production Unit (FPU).

Constructed separately at two different fabrication yards in China, the joining of the two mega-structures is a significant step forward for the Scarborough Energy Project as it progresses towards first LNG cargo, targeted for the second half of 2026.

The floatover required precise planning and extensive collaboration by all stakeholders. Teams from Woodside, McDermott, QMW and COSCO worked closely on the fabrication of the structures and on safely and successfully bringing them together.

Woodside Executive Vice President & Chief Operating Officer Australia Liz Westcott highlighted what it meant for Woodside and the Scarborough Energy Project, which is now over 82% complete.

"The floatover of the FPU is an engineering marvel and builds on the safe and successful fabrication of the topsides and hull.

"Manoeuvring two structures that each weigh more than 30,000 tonnes at sea is an exceptionally complex operation.

"I am proud of the Woodside and McDermott teams for the safe delivery of the FPU to the integration yard and the completion of this chapter of work. The FPU is a critical piece of infrastructure for this world-class project which continues to be delivered to the highest standard."

The remaining integration work for the FPU will continue at the fabrication yard in Yantai before sailaway to Australia.

Once complete the FPU will be moored 375km off the coast of Karratha. The Scarborough Energy Project is set to produce up to 8 million tonnes of LNG per year and contribute up to 225 terajoules a day of domestic gas supply into the Western Australian market.

Q3 – October 2025

Karratha Community Update

October 2025

Woodside welcomes approval of North West Shelf Project Extension

The Australian Government's final decision to grant environmental approval for the North West Shelf Project Extension is positive news for Woodside Energy and Karratha as our host community.

The decision provides certainty for the ongoing operation of the North West Shelf Project.

For Karratha and surrounds, this has meant sustained employment, meaningful social contributions, a legacy built on responsible energy development and a deep-rooted connection with the local community.

Over its lifetime, the North West Shelf Project has paid more than A$40 billion in royalties and excise, supported thousands of Australian jobs and contributed over A$300 million to social investment initiatives and infrastructure support in the City of Karratha.

Importantly, the approval follows an extensive environmental assessment and appeal process and includes rigorous conditions to manage the protection of cultural heritage.

This includes conditions that require additional monitoring and management of air emissions to protect the Dampier Archipelago (including Burrup Peninsula or Murujuga).

Woodside is committed to protecting the Murujuga Cultural Landscape and we were a proud supporter of the World Heritage nomination and assessment process, led by Ngarda Ngarli, the Traditional Custodians of Murujuga, on the World Heritage listing.

The internationally peer-reviewed, best-practice science conducted by the Murujuga Rock Art Monitoring Program, led by Murujuga Aboriginal Corporation and Western Australian Department of Water and Environmental Regulation, confirms that with the right controls and collaboration, co-existence of industry and cultural heritage is not only possible, but already happening.

"Over its lifetime, the North West Shelf Project has paid more than A$40 billion in royalties and excise, supported thousands of Australian jobs and contributed over A$300 million to social investment initiatives and infrastructure support in the City of Karratha."

As we shape the future of the North West Shelf alongside our Pluto LNG operations and the development of the Scarborough Energy Project, our commitment to collaboration and consultation remains strong.

We will continue to work closely with our colleagues, partners, and neighbours.

I'm looking forward to supporting Woodside's future in Karratha, reflecting the values and aspirations of the place we have proudly called home for over four decades.

Derek Paulgaard
Asset Manager North West Shelf Onshore

Inspiring futures through work experience

We recently had the pleasure of hosting Programmed work experience students from Karratha Senior High School, Roebourne District High School and St Luke's College Karratha at Pluto LNG and Karratha Gas Plant.

The students had the opportunity to shadow our teams, gaining insights into day-to-day operations and exploring the diverse career pathways available right here in the Pilbara.

Thank you all participating students, we hope the experience sparked some new ideas for your future pathways.

Stay up to date on our continued contribution to the local community **Woodside North West**

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Community partnerships valued

On the evening of 13 August 2025, we had the privilege of celebrating the incredible contributions of our community partners at our annual Community Partner Sundowner, held at The Shelf, Red Earth Arts Precinct.

Our sundowner event was a heartfelt tribute to the people and organisations making a real difference across the Pilbara.

Hosted by Derek Paulgaard, Asset Manager – North West Shelf Onshore, the event featured inspiring reflections from Sophie Martin, One Tree Community Services Inc. sharing information about our award-winning Roebourne Pathways Program partnership and its impact on local youth and Stacey Giles, Reach Us Pilbara, highlighting vital cancer support services available to families in the region.

Thank you to everyone who joined us to recognise the incredible work happening across the City of Karratha.

The Woodside Community Grant Program opens in October, providing funding of up to $5,000 to community groups and not-for-profit organisations in the City of Karratha to support health, liveability, sustainability and environmental outcomes.

Building community connections: repurposing for a brighter future

Yurra and Woodside Energy made a collaborative contribution to the Roebourne Work Camp by donating 34 tonnes of scaffold boards.

During supplier visits, Local Content Manager, Julie Attwood, realised there was an opportunity to re-purpose redundant scaffold materials, no longer being used at Karratha Gas Plant.

The materials were welcomed by the men at the Department of Justice Roebourne Work Camp. They were used to make furniture for not-for-profit organisations and local community groups, helping participants develop employable skills, as well as providing benefits to Pilbara regional communities.

Some of the projects completed using these repurposed materials include; timber picnic benches for the Roebourne District Hospital, outdoor seating and cubby houses for local schools and daycares, and tables to display the work of local Aboriginal artists. These projects improve community spaces and connectivity, while providing a platform for artists to gain recognition and income.

Read more about the collaboration between Yurra, Woodside, and the Department of Justice and the positive impact on community by scanning the QR code.

Woodside is building for the future: 30 new homes in Karratha

Woodside Energy (Karratha Services) Pty Ltd, has awarded contracts for the construction of an additional 30 new homes in Karratha for Woodside's residential employees. Under the award, 20 new homes will be built by Thomas Building and 10 by Traditional Owner business, Yurra Building, both locally based contractors.

Expected to be completed from mid-2026, the new houses will be owned by Woodside and are additional to the recent construction of 20 new homes under a 15-year build-to-lease agreement with Karratha Housing, a subsidiary of Yurra Building.

Awarding the construction contracts to Thomas Building and Yurra Building is part of Woodside's ongoing commitment to delivering business opportunities that boost jobs and support the local economy. The contracts include provisions for the employment of local apprentices and trainees.

Woodside Pluto Asset Manager Kate Bardill said the new contracts were part of the company's Karratha housing approach, which aimed to providing quality housing options for employees while balancing the needs of the local housing market.

"Woodside's approach to housing includes investment in new builds, the sale of older housing stock on the open market and support for local housing affordability initiatives such as the City of Karratha's Service Worker Accommodation program," said Kate.

Under Woodside's predominantly residential frontline workforce policy, approximately 75% of the company's employees working at its Karratha operations live locally.

Scarborough's subsea infrastructure now in place

The Scarborough Energy Project has reached another exciting milestone–this time beneath the waves. The team has successfully completed the penultimate subsea installation campaign, marking a significant step toward first LNG cargo in the second half of 2026.

Approximately 375 km off the Pilbara coast, over 400 pieces of subsea equipment have now been assembled and installed in the Scarborough field, including the impressive 305-tonne Riser Base Manifold. With all critical infrastructure in place and tested, the project is now more than 86% complete (excluding Pluto Train 1 modifications) and ready for the hook-up and commissioning of the floating production unit (FPU) upon its arrival.

The Scarborough Offshore Facility and Trunkline (Operations) Environment Plan (EP) is now approved, setting out how Woodside will manage environmental risks and impacts associated with offshore operations. The EP covers activities such as FPU installation, commissioning, and ongoing operations, as well as inspection, maintenance, and repair of subsea infrastructure.

Scan the QR code to read more about the Scarborough Energy Project.

REAF reflections

This year saw the continuation of Woodside's support for the City of Karratha's Red Earth Arts Festival (REAF). We were proud to once again sponsor 'REAF at The Quarter,' offering a suite of free, family-friendly activities, activating and transforming the area into a hub of artistic and cultural activity.

The main attraction of REAF at The Quarter was 'The Whale' installation; inviting viewers to interact with a large whale puppet and its sea friends while listening to whale vocalisations – an immersive experience enjoyed by all ages.

REAF is moving towards becoming a destination festival for the region, and Woodside and its joint venture partners are proud to support the continued provision of important and much-loved community events, livability initiatives and significant local government projects.

Artists from Yinjaa-Barni Art Group painted and displayed art on site, welcoming the public to watch the creation of several pieces and engage in conversations.

A community concert featured roving entertainment, stage performances, music, food trucks and the Karratha District Chamber of Commerce and Industry markets.

Attendees were treated to Maori cultural displays, Brazilian samba and Chinese dance while enjoying face painting, elaborately costumed stilt artists, Dr Hubble's bubble display, jazz music from the Perth Symphony Orchestra and a calming space at The Inclusive Movement's sensory tent.

Woodsiders enjoyed engaging with the diverse Karratha community discussing Woodside's work in the North West and listening to community feedback on our activities.

The festival finale featured First Lights - Bunggaliyarra Munggu, presented by Fremantle Biennale in collaboration with Juluwarlu Art Group and supported by Woodside and its Pluto Train 2 Joint Venture partners. Woodside is proud to support events like REAF, bringing the community together, strengthening local connections, and fostering a sense of collective pride.

Karratha Volunteer Fire & Rescue Service were Woodside Community Grant recipients, 2024

Woodside Community Grants

Applications open Wednesday, 1 October 2025

The Woodside Community Grants program is part of our commitment to help build local capacity and develop opportunities for community wellbeing.

If your club or organisation has a great idea or needs extra support, Woodside wants to hear from you. Grants of up to $5,000 are available to support community initiatives in the City of Karratha and the Shire of Exmouth.

Applications close Friday, 31 October 2025 and can be completed online at woodside.com/social-contribution

LET'S TALK

EDITION 2 | APRIL 2024

OUR PLANS, YOUR SAY

Woodside Energy

THE RUNDOWN

On 1 March 2024, Woodside received Commonwealth environmental acceptance for the Griffin Field Decommissioning (End State) Environment Plan, supporting the staged decommissioning program for the Griffin oil and gas field, located off the Western Australian (WA) coast 65 km north-west of Onslow and 94 km north-east of Exmouth.

During late 2023, Woodside received acceptance for other Griffin decommissioning activities, with several activities already safely and successfully completed.

WHAT IS DECOMMISSIONING?

Decommissioning involves managing infrastructure that is no longer required in a timely, safe, and culturally and environmentally responsible manner.

GRIFFIN FIELD – FAST FACTS

- Field discovered 1989
- Production period 1994 – 2009
- Gas produced for the WA domestic gas market - 62 billion cubic feet
- Barrels of oil produced - 167 million

Griffin gas export pipeline removed safely, offshore from Onslow

Woodside recently completed staged decommissioning activities under the Griffin Gas Export Pipeline (GEP) Decommissioning Environment Plan, which was accepted on 30 November 2023. Woodside removed ~25 km of the pipeline offshore within Commonwealth waters at depths ranging from 52 m to 127 m, approximately 41 km north-west of Onslow.

During production, the 62 km long and 30 cm in diameter Griffin GEP transported gas from the field to the former onshore Griffin gas export facility south of Onslow for use by WA businesses and households.

The decommissioning of the pipeline's WA State waters section and related onshore infrastructure requires separate state approvals. Woodside will engage local stakeholders to understand their views on potential decommissioning options for this pipeline portion.

Woodside is now undertaking a post-removal assessment of the Commonwealth section of the Griffin pipeline to inform future decommissioning activities in the region. Woodside will continue to assess decommissioning options case-by-case, guided by science, consultation, and legislative requirements.

NINGALOO OUTLOOK SYMPOSIUM

To increase the ecological understanding of the Ningaloo Coast World Heritage Area's deep and shallow reefs and shark and turtle populations, Woodside and CSIRO have partnered on the Ningaloo Outlook Marine Research Partnership.

For Ningaloo Outlook (Phase 1 and 2) over A$12million has been invested in scientific research to further develop new knowledge about the Ningaloo Coast World Heritage Area. The initial Phase 1 was in partnership with BHP, now part of the merged Woodside Energy.

The 300 km long Ningaloo Reef is the largest fringing coral reef on the west coast of any continent. With shallow lagoons and deeper waters offshore, the reef is home to a variety of marine life and diverse habitats.

The sixth **Ningaloo Outlook Symposium** recently enabled marine park managers, the scientific community and interested stakeholders to discuss the partnership's 2023 research findings.

Click here to view footage shown at the 2024 Ningaloo Outlook symposium.

COMMUNITY SPOTLIGHT

Support for Murujuga

Woodside is proud to be a signatory of Murujuga Aboriginal Corporation's (MAC) Statement of Intent as part of our unwavering support for World Heritage Listing over the Murujuga Cultural Landscape, and our ongoing support for the protection and management of Murujuga's outstanding heritage values. We are committed to and support the protection of Aboriginal cultural heritage and continue to work closely with Traditional Custodians in the areas we operate.

Woodside was one of 11 signatories to the MAC Statement of Intent at a ceremony held at Hearson Cove on Murujuga Country. Other parties to the Statement of Intent included MAC (as the representative body for five Traditional Custodian groups, being Ngarluma, Yaburara, Yindjibarndi, Mardudhunera and Wong-Goo-tt-oo peoples), the Government (Premier, Environment Minister and Aboriginal Affairs Minister), Commonwealth Government (Environment Minister), Rio Tinto, Pardaman, Yara Pilbara, Horizon Power and the City of Karratha.

The Statement of Intent sets out the guiding principles for MAC, government and industry parties to work together to negotiate a cooperative Strategic Head Agreement in relation to the management, protection, and conservation of the Murujuga Cultural Landscape in support of the World Heritage nomination of this landscape.

Woodside takes its responsibility to protect and manage cultural heritage seriously, including through taking reasonable and practical measures across our operations and growth projects to minimise our emissions.

TALKING POINT

Supporting Science at Scott Reef

Out on the edge of Australia's continental shelf sits the north and south reefs and sandy islet of Scott Reef.

Located about 425 km north-west of Broome, to reach Scott Reef a boat would need to travel from the closest point on the WA coast for 270 km across the Indian Ocean.

Scott Reef and other reefs in the Pilbara and Kimberley were considered "poorly understood" by the Australian Institute of Marine Science (AIMS) three decades ago. However, over the last 30 years, more than 50 expeditions by numerous marine scientists have led to extensive research and understanding of Scott Reef.

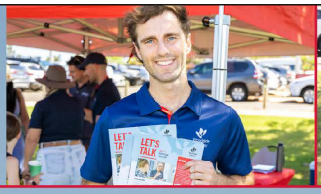
In 1993, Woodside supported AIMS' extensive survey of coral and fish communities. This led to the establishment of a long-term monitoring program in 1994, which continues today. The Scott Reef coral reef monitoring program is globally one of the few continuous programs providing insight into the health and condition of resident corals and fish.

Woodside partnered with the WA Museum in 1998, contributing to research on oceanography and the biology and ecology of the resident species. The partnership has enabled long-term research to understand the reef's health and how it changes through time. WA Museum scientists visited Scott Reef in 1984 to carry out extensive surveys to sample fauna. Then, in 2006 returned with Woodside's support and catalogued 1,897 marine life species, including 262 new discoveries.

The WA Museum partnership included the Woodside Collection Project, focused on the marine life of the Dampier Archipelago and Kimberley. Over 55,000 specimens were collected and 700 new species were identified as part of the large Australian biodiversity project.

The wide-ranging Scott Reef research projects have revealed important insights into a complex ecosystem and have delivered a wealth of knowledge to support Woodside's long-term environmental planning and management.

Woodside is consulting on the Browse State Wellhead Decommissioning Environment Plan (EP), involving decommissioning options for three historical wellheads in WA State waters, approximately 430 km north of Broome. **View the consultation information sheet.**



In preparing the EP, Woodside's intent is to minimise environmental and social impacts and is seeking stakeholder input to inform Woodside's development of the EP.

COMMUNITY CONVERSATIONS

Upcoming engagement opportunities

DAMPIER
5 May 2024 | 9:00am – 12:00pm
Dampier Beachside Markets, Hampton Oval

EXMOUTH
19 May 2024 | 8:00am – 12:00pm
Exmouth Community Markets, Federation Park

Dates and times subject to change.

Woodside is consulting with local communities at local events so you can easily come and chat us to us about our operations, decommissioning activities, or proposed projects.

Recently our team talked with community members at the Karratha Shopping Centre and the Dampier Beachside Markets about Environment Plans for the Scarborough State Trunkline Operations and Pluto Operations. We also meet quarterly with Community Liaison Groups in Karratha and Exmouth where we communicate updates and consult with community members on a range of relevant topics.

If you're interested in what Woodside has planned on land and sea, come and chat to our friendly team and follow the **Woodside North West Facebook page** for updates. You can also read our recent **Karratha Community Update here.**

HAVE YOUR SAY

Woodside consults relevant persons while preparing our Environment Plans to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse impacts of the proposed activity on the environment.

We welcome your input so please contact us if you'd like to discuss your functions, interests or activities which may be affected by our proposed activities.

Environment Plan	Activity Type	Location	Consultation Dates
Browse State Wellhead Decommissioning	Decommissioning	430 km north of Broome	25 March – 3 May 2024
North Rankin Complex Operations	Operations	135 km offshore of Dampier	- May – - June 2024
Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys	Survey	125 km north-west of Dampier	-May – June 2024
North West Shelf Phase 1 Plug & Abandonment	Decommissioning	~117 km north-west of Dampier	-May – June 2024
Julimar Operations	Operations	160 km north-west of Dampier	-May – June 2024

You can access our consultation information, provide feedback and subscribe for updates by visiting **www.woodside.com/what-we-do/consultation-activities** or click **here.**

PROGRESS SNAPSHOT

Environment Plan	Activity Type	Date Accepted	Status
Griffin Field Decommissioning (End State) (Griffin Field Deviation / Griffin Leave In-situ)	Decommissioning	1 March 2024	In progress
Stybarrow Decommissioning and Field Management	Decommissioning	8 January 2024	In progress
Stybarrow Plug and Abandonment	Decommissioning	21 December 2023	In progress
WA-34-L Pyxis Drilling and Subsea Installation (Revision)	Project	21 December 2023	Drilling to commence around May 2024
Scarborough Seabed Intervention and Trunkline Installation	Project	13 December 2023	In progress
Scarborough WA-61-L and WA-62-L Subsea Infrastructure Installation	Project	8 December 2023	In progress
Scarborough Drilling and Completions	Project	1 December 2023	In progress
Griffin Gas Export Pipeline Decommissioning	Decommissioning	30 November 2023	Completed
TPA03 Well Intervention	Project	28 November 2023	In scheduling
Griffin Decommissioning and Field Management	Decommissioning	21 November 2023	In progress

You can view Commonwealth Environment Plans for approved activities and operations by visiting NOPSEMA's website **info.nopsema.gov.au/home/approved_projects_and_activities**

LET'S TALK

EMBAs AND OIL SPILL MODELLING

Let's talk about EMBAs – what they are, and just as importantly, what they're not.

When Woodside talks to community members about our activities, we're often asked about the areas marked on our consultation material referred to as the "Environment that May Be Affected" (EMBA).

EMBAs are an important part of preparing the environmental and emergency response strategies that underpin the planning for our offshore activities.

They are produced as part of our extensive oil spill modelling and response planning. They represent the largest spatial area where a petroleum activity could potentially have a direct or indirect environmental impact.

Understanding the EMBA

The EMBA represents the largest, merged area of many potential paths that a highly unlikely oil spill could travel based on predictions around weather, currents, and other conditions at the time. An EMBA is not a predicted impact of a single oil spill, which would be much smaller, and the extent and path of the impact would only be known at the time it occurred.

This means the area the EMBA covers includes locations where planned activities and unplanned events could potentially occur.

Oil Spill Modelling

While offshore oil spills are extremely rare, it is important oil and gas companies are still ready to prepare for and respond to them. There are several different approaches to oil spill modelling, and Woodside uses these in combination for information about where an oil spill could move, how quickly, and the possible effect of using methods to manage a potential oil spill.

To calculate this, our oil spill modelling involves running many (sometimes hundreds) computer simulations of the same scenario to predict the behaviour of oil under different conditions.

Each simulation is subject to a range of variables, including weather and sea conditions, tides, and times of year. In the model, the oil responds to these conditions and behaves differently in each individual simulation.

Every individual simulation is overlayed on top of the next, allowing statistical analysis of the possible area the oil spill could travel in the highly unlikely event that a spill occurs. The smooth boundary drawn around all these computer simulations of the spill creates the EMBA.

The models process the information based on an assumption there is no emergency response, which would of course not be the case in a real emergency.

Oil spill modelling helps us develop our oil spill emergency management plans and assists in preparedness and response planning. Woodside conducts regular emergency response training exercises involving multiple facets of the business so our teams are ready to respond should they ever need to.

The many simulations used to underpin our planning are estimates and predictions only. It is not possible to exactly predict the outcome until the exact weather and other conditions are known if an oil spill event occurs.

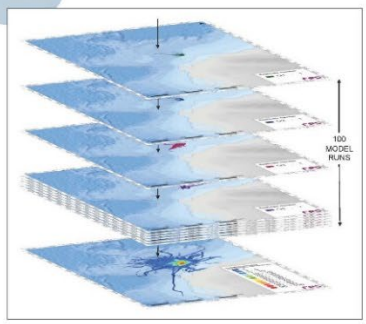

Figure 1: The first stage in EMBA creation is running computer simulations (model runs). Figure 1 shows the model runs for the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan.

Emergency Management Plans

The emergency management plan informed by the oil spill modelling is submitted to both State and Commonwealth regulators for approval along with all other planning documents for our activities.

Woodside, in more than 60 years, has not experienced any significant uncontrolled release of oil or gas to the environment as a result of loss of well control.

Nevertheless, our extensive planning continues, drawing on international good practice, so the impacts and risks associated with our activities are detailed, evaluated and managed to a level that is as low as reasonably practicable.

We are committed to continuous improvement and share our expertise with our peers and take the lessons learned from other operators to incorporate into our management processes.

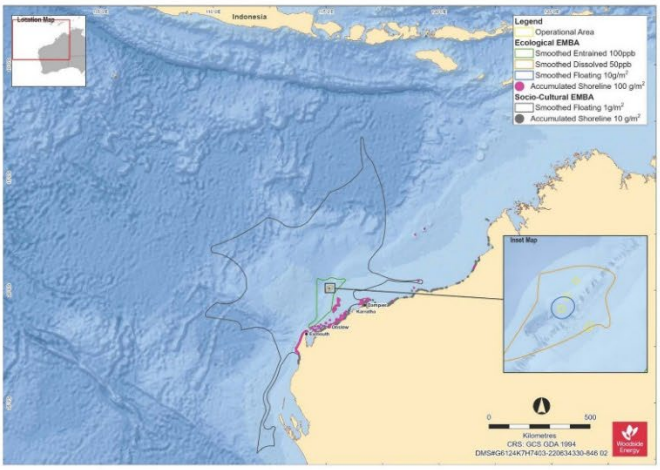

Figure 2: The EMBA is a culmination of all the computer simulations with a smooth boundary. Figure 2 shows the final EMBA for the WA-34-L Pyxis Drilling and Subsea Installation Environment Plan.

Let's Talk - July 2024 edition

LET'S TALK

EDITION 3 | JULY 2024

OUR PLANS, YOUR SAY

Woodside Energy

THE RUNDOWN

Woodside Energy Chief Executive Officer and Managing Director Meg O'Neill has said gas producers are ready to work with government to deliver new supplies critical to the energy transition as she highlighted the importance of removing barriers to investment.

On 21 May 2024, welcoming the release in May of the Federal Government's Future Gas Strategy, Ms O'Neill said it provided a clear statement about the critical role gas plays in Australia's economy and will continue to play in the future.

A key point the Strategy makes is that new sources of gas will be needed to meet demand during the energy transition.

Addressing an Australian Energy Producers (AEP) Conference, Ms O'Neill, who is also AEP Chair, said:

"I am pleased the Government is talking about solutions. The industry is ready to roll up our sleeves and work with the Commonwealth to achieve a solution to a shortage which is supply.

"We welcome acknowledgment in the Strategy that we'll need the right regulatory settings to do so.

"Indeed, the success of the Strategy will be measured by whether it delivers policy reforms that address the barriers to new gas supply and investment."

She said the recent passage of Federal legislation relating to the Petroleum Resource Rent Tax (PRRT) had provided certainty.

The changes bring forward PRRT payments from LNG projects. However, in order to facilitate the PRRT payment amendments, the government held off passing other amendments designed to clarify ambiguity around consultation requirements for environmental approvals.

"This helps us make future investment decisions. But it has come at the expense of addressing the ambiguity in the consultation process for offshore approvals," Ms O'Neill said.

"Leaving this issue unresolved makes the timely development of new energy supply more difficult."

"The industry stands ready to work with the Government to progress these necessary reforms as soon as possible," she said.

WAFIC SEAFOOD AWARDS

Endeavour Foods General Manager Sophie Sharland's empowerment of future leaders in the seafood industry was recognised in early May when she received the Young Achievers Award, sponsored by Woodside Energy, at the 2024 Western Australian Seafood Industry Awards.

This event, hosted biennially by the Western Australian Fishing Industry Council (WAFIC), acknowledges the innovations and achievements within the WA seafood industry.

The Young Achiever Award is one of 14 categories and focuses on individuals who demonstrate positive impacts to the seafood industry.

Sophie is a shining example of the growing number of talented young women working in the commercial seafood industry.

Jo Ferrie, Head of Communities and Social Performance, Woodside Energy and Young Achievers Award recipient, Sophie Sharland.

COMMUNITY SPOTLIGHT

Karratha Signs

The Scarborough Energy Project will provide a boost to the WA economy and communities, growing jobs and bringing work through the supply chain.

Karratha Signs is one of more than 75 local Karratha businesess who have been working on our Scarborough Energy Project.

Started by Jed and Suzy Griffiths in 1999 in the third bedroom of their home, they have grown to be an award-winning enterprise that operates from premises in Karratha and Port Hedland.

Karratha Signs has designed and manufactured an array of site entry, safety and wayfinding signage for the Pluto Train 2 Project and has been vendors with Woodside since 2022.

Working with Karratha Signs provides Woodside with premium products suited to the Pilbara. The company invests in top-of-the-range equipment to ensure a professional, high-quality result every time.

Using local businesses which understand the areas in which Woodside operates ensures the best possible standards and expertise on the job.

Jed Griffiths said there was a sense of community among the employees on the Pluto Train 2 project.

"We work closely with many different people throughout the company to provide locally made signage that suits their individual requirements. Every member we've spoken to has been open-minded to new signage ideas and eager to assist in the process," Jed said.

"The Pluto Train 2 contract has enabled us to open our doors to more clients – both big and small. We've been able to demonstrate the depth of our professionalism to other high-end customers and ultimately expand our client base."

Click **here** to learn more about Karratha Signs and their work on the Scarborough Energy Project.

TALKING POINT

National Energy Technician Training Scheme

A talk at Exmouth High School on the National Energy Technician Training Scheme (NETTS) inspired Taj, an Exmouth local, to apply for an Electrical Instrumentation apprenticeship.

NETTS is a collaboration between Programmed and several energy organisations including Woodside, to develop skilled workers for the future. It's part of Woodside's commitment to local recruitment and providing opportunities to the communities in which we operate.

The first 12 months of the four-year apprenticeship is based in a structured learning environment to provide apprentices with the skills, knowledge and experience required to transition into an onshore or offshore role. Apprentices are taught a variety of life skills designed to prepare them for the transition from school to the workplace.

Taj spent 12 months training at the Australian Centre of Energy and Processing Training and is now offshore at the Woodside-operated Ngujima-Yin, Floating Production Storage and Offloading oil production facility, located 50 km northwest of Exmouth. Taj will work offshore swings and continue his TAFE courses in Perth.

Taj is one of twelve young people currently being hosted by the Woodside NETTS apprenticeship program which has a 98% apprentice retention rate, and in line with Woodside's commitment to inclusion and diversity, First Nations apprentices account for more than 25% of the intake and around 33% are female.

"I've started learning about basic electrical work and it's been interesting, I'm enjoying it. I'm keen to expand my knowledge and ultimately, finish this apprenticeship and hopefully work for Woodside for a decent amount of time and get back up North." Said Taj, NETTS apprentice.

This story demonstrates just one of the ways our operations and projects continue to enable us to make a difference, both in this community and across the state.

Read our 2023 North West Australia Community Development Report to learn more.

Billie the dog watching over Taj enjoying days off

LET'S TALK

INFRASTRUCTURE GETS SECOND LIFE

Woodside's largest ever decommissioning campaign to date is currently in full swing with a range of activities completed or planned across the Enfield, Echo Yodel, Stybarrow and Griffin fields off the coast of Western Australia and activities planned at the Minerva field in Victoria.

Involving the removal of an estimated 35,000 tonnes of infrastructure including more than 350 km of pipe, flowlines and umbilicals and a range of other equipment, approximately 95% is planned to be recycled or reused.

Woodside has engaged a range of contractors (including international contractors) that bring significant subsea experience, technical know-how, and that use specialist offshore vessels for safe and reliable execution of campaign activities. Specialist vessels include mobile offshore drilling units required for well plug and abandonment activities, light construction vessels for removal of subsea structures and pipe, and heavy lift vessels to remove large structures including riser turret moorings.

Woodside is working with a variety of Australian businesses, many with experience supporting defence, mining and refinery disposal, which are assisting the business to complete oil and gas decommissioning activities. Companies such as McMahon, RPA, C.D. Dodd and Birdon are playing leading roles in onshore disposal scopes, adapting established processes and pathways to support the unique requirements of the oil and gas industry.

Because of the specific needs of the campaign, new onshore facilities are being developed by sub-contractors to support and complement existing facilities.

Some large infrastructure, such as the Nganhurra Riser Turret Mooring removed in late 2023, is typically taken to the Australian Marine Complex at Henderson to be cleaned and deconstructed in preparation for recycling and reuse. Infrastructure such as pipe, flexibles and umbilicals are unloaded from offshore up to three times a week at facilities near Onslow including the Port of Ashburton.

Shire of Ashburton President Audra Smith, Cr Brie Healy, Cr Rosanne Kapor, Cr Linton Rumble, and Deputy CEO Jo Sangster visiting the decommissioning facility near Onslow.

The infrastructure is then taken to a facility established by sub-contractors C.D. Dodd and RPA at the nearby Pilbara Regional Waste Management Facility where it is decontaminated and cleaned before it's transported to another C.D. Dodd facility in Karratha for deconstruction and sorting into its constituent parts in preparation for recycling.

Woodside recently hosted Shire of Ashburton President Audra Smith, Cr Brie Healy, Cr Rosanne Kapor, Cr Linton Rumble, and Deputy CEO Jo Sangster at the decommissioning facility near Onslow. With many local businesses supporting decommissioning activities, the site visit was a great opportunity to inform stakeholders about the campaign's progress and the importance of working with the Shire to its success.

"I am immensely proud of the progress we have witnessed during our recent site visit. Woodside's decommissioning campaign, one of the largest in Australia, reinforces our commitment to responsible resource management and environmental stewardship in the Shire of Ashburton.

The efforts of the lead contractor, TechnipFMC, in removing over 35,000 tonnes of offshore infrastructure, and the work of RPA and C.D. Dodd in recycling these materials, highlight the impressive collaboration and innovation driving this project. This initiative not only supports our goal of sustainable development but also contributes significantly to the local economy. As we move towards completing this campaign by the end of 2025, I am confident that our continued dedication will produce outstanding results for both the industry and the community." – Shire of Ashburton President Audra Smith.

November 2024

Woodside Energy

Let's Talk

Our Plans, Your Say

Edition 4 | November 2024

The rundown

North West Shelf Visitors Centre welcomes Wanparta

The Ngarla people at the North West Shelf Visitors Centre.

We acknowledge the unique connection that First Nations communities have to land, waters and the environment and seek to consult them in relation to our operations and proposed projects.

As part of our ongoing consultation with First Nations groups, Woodside Energy recently hosted 13 Traditional Owners from Ngarla country at the North West Shelf Visitors Centre, so they could see our operations first hand.

The Ngarla people are the Traditional Owners of an area of land east of Port Hedland that covers the De Grey and Pardoo pastoral stations in Western Australia's North West.

Woodside Manager First Nations Engagements, Michael Roe said that Wanparta Aboriginal Corporation as the Prescribed Body Corporate for the Ngarla people, had been identified as a relevant person to consult with on previously submitted and present Environment Plans.

"The Ngarla people were interested in learning more about the world of gas, and as part of the consultation process were invited to Karratha for a visit to the North West Shelf Visitors Centre overlooking the Karratha Gas Plant."

"This provided an occasion to build trust and understanding whilst providing the opportunity to provide feedback on our activities. In this case we were consulting on the five-yearly review of the Pluto Facility Operations Environment Plan." said Michael.

An accepted Environment Plan is required in order for Woodside to carry out activities. Meaningful conversations with First Nations people are documented and make up part of an Environment Plan submitted to regulatory bodies for assessment ahead of continued operation.

Wanparta Aboriginal Corporation Chairperson, Mary-Jo Coppin said, "the trip was really informative with good consultation, well organised and we felt very welcome at the facility."

A key element of Woodside's consultation efforts is our willingness to be flexible and adaptable to suit the audience in our overall efforts to avoid or minimise potential impacts from our operations.

Munro's Mack10k Fishing Competition

Munro's Mack10k 2024 Fishing Competition, held in Onslow from 24-25 August 2024, saw hundreds of anglers and fishing enthusiasts from across Australia enter into the running for a chance to reel in $10,000.

The event doubles up as a research initiative, spearheaded by Recfishwest's Fishing for Science program and supported by Woodside Energy.

Working with the Department of Primary Industries and Regional Development, the Recfishwest science team collected biological samples from mackerel caught by competitors, providing insight into the health of the local fish population.

Read more about the annual competition, hosted by the Ashburton Angler Fishing Club by visiting: recfishwest.org.au

Community spotlight

Wangarri Crane and Equipment Hire

Murujuga Commercial Limited's (MCL) first Pilbara business, Wangarri Crane and Equipment Hire (Wangarri), has been awarded the contract for supply and maintenance of cranes and forklifts for the Pluto Train 2 Project, the onshore component of the Scarborough Energy Project.

Established by MCL as a joint venture with Boddington's Hire, Wangarri provides a range of lifting equipment that includes cranes, forklift trucks, reach stackers and telehandlers for hire to the resource sector and other industrial clients across the Pilbara.

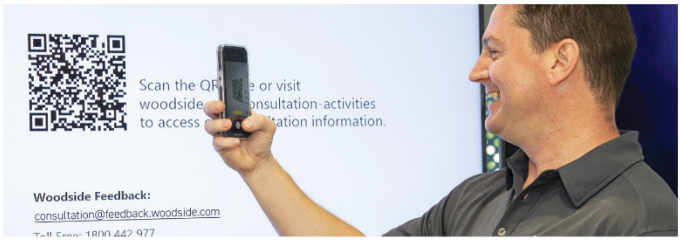
One of five commercial ventures managed by MCL, Wangarri forms a portfolio of businesses and commercial ventures that aim to provide a strong and economic future for its Murujuga members.

Wangarri means "Coming to Life" in Yindjibarndi, which represents MCL's journey as it moves from a start-up phase toward building business streams that align to the strategic goals and objectives of the Murujuga Aboriginal Corporation.

Bechtel, the appointed contractor for the Pluto Train 2 project, delivers engineering, procurement, construction and commissioning, has awarded contracts to local Indigenous businesses, such as Wangarri to deliver a variety of work scopes.

"We are very happy to be working with Wangarri on Pluto Train 2. We deeply value this local contract and appreciate their professionalism and dedication to providing safe and high-quality cranes and forklifts." said Bechtel Pluto Train 2 site manager Terry Klowss.

Jig Albert, MCL Managing Director said the contract with Bechtel on Pluto Train 2 had been an enormous stepping stone for their business.



"We have been contracted to provide a range of the smaller cranes for the project. Mostly this consists of Franna pick and carry cranes, however we are also providing a 160 tonne all-terrain crane and a small three tonne Maeda spider crane, as well as the ongoing maintenance of these machines," said Jig Albert.

"It has given our business the confidence to invest in our own equipment which will drive equity for the business and in turn provide a direct return to Murujuga Aboriginal Corporation members."

Learn more about Wangarri Crane and Equipment Hire and their work on the Scarborough Energy Project

The importance of consultation

"Like safety, consultation continues to be a core focus for NOPSEMA," Sue McCarrey, CEO, NOPSEMA *(Source: The Regulator, 2024, Issue 2)*

Consultation is a key component of Woodside's environmental planning and can involve a two-way process with relevant persons who wish to provide feedback on operations or proposed offshore activities.

Consultation enables Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. It is a key requirement of Australia's offshore environmental management framework and Environment Regulations.

An appropriate consultation approach which meets regulatory requirements enables Regulators such as the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for Commonwealth activities, or the Department of Energy, Mines, Industry Regulation and Safety for state activities, to assess and accept Environment Plans (EP).

Woodside is committed to open and transparent consultation and does this by providing clear information on proposed activities, assessing and responding to objections or claims about the activity, and providing a reasonable period of time and opportunity for a relevant person to provide feedback.

If required due to the nature and scale of a proposed activity, Woodside undertakes additional consultation activities over a longer period to ensure a reasonable period of time period and sufficient information has been provided. This allows for an informed assessment of the possible consequences of the activity on stakeholders' (referred to as a 'relevant person' under Commonwealth regulations) functions, interests or activities.

Subscribe to stay up-to-date

On Woodside's website we enable members of the public to subscribe to receive information about EPs as it becomes available.

Subscribing is a great way to stay informed about updates and important information related to Woodside's activities. It also provides the public with timely notifications about new projects, environmental initiatives, community engagements, and consultation information sheets for proposed activities.

Woodside has updated its consultation email address to consultation@feedback.woodside.com

To subscribe to Woodside's consultation activities **click here** and enter your details on the page.

Milestone celebrations at FeNaCING Festival

The City of Karratha recently hosted the FeNaCING Festival, bringing together community and celebrating the region's key industries – iron (Fe), sodium chloride, commonly known as salt (NaCl), and natural gas (NG).

Woodside Energy, along with its joint venture partners, proudly supported the event, with a pavilion that featured Woodside's 70th anniversary as a company and 40th year of safe and reliable operations in the North West.

Woodside CEO Meg O'Neill made a special appearance at the festival, meeting local community members and helping with a range of giveaways on offer.

Meg praised the event organisers who successfully celebrated the community spirit that makes Karratha a great place to live and work.

"We know that such a significant milestone could only be achieved with the support of our people and the Karratha community," she said. "I was really thrilled to have the opportunity to join our team in the Woodside marquee as they engaged with the community about issues that matter to them and answered questions about our operations and growth projects."

Many attendees who visited the Woodside marquee expressed curiosity about Woodside's Environmental Plans and other topics including Carbon Capture and Storage, the Scarborough Energy Project and the development of Browse.

Woodside's active participation in events like the FeNaCING Festival supports our consultation approach to engage the community on our current business activities, including opportunity to provide feedback on our Environment Plans.

Woodside Energy CELEBRATE 70

Let's Talk

Our Plans, Your Say

Edition 5 | March 2025

Heritage auditors walking along eastern outside boundary of Pluto LNG Plant on Murujuga Country

The rundown

Cultural Connections: Woodside's Commitment to Heritage Management

Woodside has operated on the Burrup Peninsula (Murujuga) in the Pilbara region of Western Australia for more than 40 years. We've matured our approach to heritage management considerably over this time, and are proud of the relationships we have built with Traditional Owners and Custodians.

Every year, Woodside works with Traditional Custodians undertaking audits of heritage sites around the perimeter of the Karratha Gas Plant and Pluto LNG Parks. These audits arose from our long-standing consultation with Traditional Custodians regarding Cultural Heritage Management at our onshore facilities.

Both assets operate near National Heritage and Tentative World Heritage listed sites, including Murujuga's petroglyphs (rock art).

The primary purpose of the audits is to monitor the condition of culturally and spiritually significant sites and invite recommendations if the potential for impacts are detected.

"The audits are also an opportunity for Traditional Custodians to connect to areas of a cultural landscape that stretch back tens of thousands of years, and for the community's reassurance that cultural heritage is being managed appropriately on Woodside's leases," said Daniel Thomas, Manager Global Heritage and Human Rights.

The most recent heritage audits were carried out last year over a two week period.

"The feedback from Traditional Custodians was that the sites inspected remain in generally good condition," said Daniel.

"Traditional Custodians did identify some areas in need of additional vegetation management, and that vegetation management was supervised by elders and Indigenous community members in November last year. Another issue identified was rubbish washing up on shore which is also now managed."

Learn more about Woodside's cultural heritage management **here**

A soaring community experience

Western Australia's Pilbara shorebirds undertake a remarkable migration journey of over 10,000 kilometres to breed in the northern hemisphere, sustained by the region's marine cuisine.

Around 70 participants recently attended an annual community event at Hearson's Cove featuring shorebird watching and information sessions, and a tour of the incredible petroglyphs at Nganjarli (Deep George).

The event aims to raise awareness about the significance of the Pilbara coast for shorebirds and the rich cultural heritage of the area. Participants gain insights into the birds' behaviour and contribute to conservation efforts within the community.

Woodside Energy thanks the collective support from co-hosts, Pilbara Ports, Rio Tinto, Yara Pilbara and the DBCA Parks and Wildlife Service who partnered with the Murujuga Aboriginal Corporation Rangers and Birdlife Australia.

Community spotlight Impact felt locally in Karratha

Impact Digi is a Pilbara-based Indigenous owned and operated marketing agency with close to a decade of experience working with Woodside Energy.

A full-service marketing agency, Impact Digi has built relationships with government, industry, Indigenous organisations and businesses of all sizes helping them to build brands and reach stakeholders.

"The past couple of years have been extra rewarding as our reputation has grown within Woodside and we're getting to work with team members from other areas of their business," said Impact Digi Managing Director, Tamara Bin Amat.

Starting off by offering photography services when they first began, Impact Digi has transformed over time with a growing team, refined services and an expanded reach.

"Looking back, one of my favourite moments was when local Asset Manager for the Karratha Gas Plant, Breyden Lonnie presented our first ever award for Best Aboriginal Business at the 2015 Karratha and Districts Chamber of Commerce and Industry (KDCCI) Business Excellence Awards," said Tamara.

With Impact Digi recently winning the Business Excellence Award for Best Small Business at the 2024 Awards, among many other accolades, the recognition continues.

Tamara and her team understand the importance of supporting local and contributing to their community.

"Working with Woodside has not only boosted our business but also our reputation, opening doors to new opportunities across the state," said Tamara.

Community partners playing a friendly game of lawn bowls during the sundowner event

Woodsiders ready to chat at Ross St Mall

Talking Point

Engaging Exmouth

Did you know that Woodside has been engaging with the Exmouth community for over 15 years? Woodside operates two Floating Production Storage and Offtake (FPSO) facilities around 50 kilometres off the coast of Exmouth, the Ngujima-Yin FPSO and the Pyrenees FPSO.

In November 2024, Woodside wrapped up the year with a series of engagements with stakeholders, community partners and the Exmouth community.

This included a Community Liaison Group meeting which is a forum co-hosted by Woodside and Santos. The joint approach stemmed from community feedback received around a decade ago, and the collaborative format has been retained to this day. The group meets three times a year and both Woodside and Santos provide updates on activities and community initiatives, inviting members to raise queries and provide feedback.

Woodside recently presented on our climate strategy and invited research partner, CSIRO to share updates on Ningaloo Outlook, a program furthering knowledge on the deep and shallow reefs of Ningaloo Coast World Heritage Area.

Woodside and Santos thanked community partners during a sundowner event at the Exmouth Bowling Club. This was a great opportunity to celebrate shared commitment to positive community outcomes over a friendly game of lawn bowls.

The following day, Woodside held a pop-up Environment Plan consultation stand at Ross Street Mall where locals (including the iconic Exmouth emus) and visitors dropped by to find out more about our activities and proposed plans.

Woodside's active engagement in community illustrates our commitment to open and transparent consultation.

Read about the Woodside supported programs focusing on the unique ecosystem along the Ningaloo Reef and Exmouth Gulf **here**

Community conversations

Open and transparent consultation is important to Woodside. Consulting firm GHD was recently in Karratha to speak with community stakeholders as part of Woodside's socio-economic impact assessments for communities that host Woodside's workforce and assets.

These insights assist Woodside to identify, assess, and manage social impacts and benefits that may arise from different operational and project scenarios in Karratha and aims to uncover new ways for Woodside to partner with the community in the future.

This informs Woodside's future strategies for impact management, community engagement, local content and social investment.

Further consultation will be taking place in April 2025.

If you're interested in what Woodside has planned on land and sea, come and chat to our friendly team and follow the Woodside North West Facebook page for updates, including our Karratha Community Update.

Stay up to date on our continued contribution to the community we call home.

Search on Facebook or click **here**

Environment planning continues to move forward

To undertake offshore petroleum or greenhouse gas activities, a titleholder is required to have an accepted Environment Plan, also referred to as an EP, in place.

In accordance with the objectives of the government regulations, the main purpose of an EP is to demonstrate two things. The first is that potential environmental impacts and risks from activities are identified and appropriate management and mitigation controls are implemented to a level that is 'as low as reasonably practicable' (ALARP) and acceptable.

The second ensures activities are carried out in a manner consistent with the principles of ecologically sustainable development set out in the *Environment Protection and Biodiversity Conservation Act 1999*.

It takes extensive work and time to develop an EP. A staged approach includes early planning of the proposed activity, defining the existing environment, consideration of potential impacts and risks to the environment, and identifying appropriate mitigation and control measures to manage risks to ALARP and an acceptable level.

Woodside Environment Plan Delivery Team Lead, Tim Mander, came into his role in 2023 following a number of legal challenges on the consultation processes under the Offshore Environment Regulations.

"Coming into the role was an interesting and challenging time. We navigated our way through this and in 2024, 12 Environment Plans were accepted with activities spanning ongoing operations, decommissioning, drilling, surveys, and installation of subsea infrastructure on the seafloor," Tim said.

"This year again, we have a number of Environment Plans kicking off across a range of different activities. We'll continue to focus on how we improve what we do to ensure our processes and management measures are appropriate to the nature and scale of these activities."

Environment Plans are required for both State and Commonwealth waters, with the National Offshore Petroleum Safety and Environmental Management (NOPSEMA) assessing and accepting Commonwealth EPs and the Department of Energy, Mines, Industry Regulation and Safety assessing and approving State EPs.

Woodside's Commonwealth EPs, currently under assessment and EPs that have been accepted can be viewed on NOPSEMA's website.

Several of the Scarborough Energy Project EPs were accepted in late 2023, including trunkline installation, with the work completed in October 2024

Upcoming engagement opportunities

Roebourne

Monthly Community Luncheon
- 26 March 2025, 11.00 am – 2.00 pm

Woodside Office, 39 Roe Street, Roebourne, WA, 6718

October 2025

Woodside Energy

Let's Talk

Our Plans, Your Say

Edition 6 | October 2025

Goodwyn A Platform approximately 140 km north-west of Karratha.

The rundown

Goodwyn Area Infill Development Offshore Project Proposal gets the green light

Following NOPSEMA's acceptance of the Goodwyn Area Infill Development Offshore Project Proposal (GWA OPP), Woodside is planning to develop new gas wells about 140 km north-west of Karratha.

The development will make better use of space at the Goodwyn A platform by bringing in extra gas and condensate from up to 8 new wells.

This is a phased development expected to deliver first gas in 2027-2028.

Environment Plans (EPs) supporting the development include:

- Goodwyn Alpha Geophysical and Geotechnical Surveys (Rev 2)
- Greater Western Flank Phase 4 (GWF-4) Drilling and Subsea Installation – consultation closed 27 August 2025.

We currently anticipate consulting on a revision for the GWA Operations EP that will include the proposed new wells in the first half of 2026.

Upcoming engagement opportunities

Woodside is consulting with local community members at events, making it easy to speak to us about our operations, decommissioning activities and proposed projects.

If you're interested in what Woodside has planned on land and sea, come and chat to our friendly teams at the locations below, follow the Woodside North West Facebook page or email us at: consultation@feedback.woodside.com

Dampier

Community conversations

The way we engage is based on building trust and understanding to support long-term relationships.

We emphasise open and accessible communication and feedback on our activities. One way we do this is by inviting community to engage with Woodside at popular community events.

Woodside and our joint venture partners were pleased again to sponsor the City of Karratha's Red Earth Arts Festival (REAF) at The Quarter where we helped activate and transform the area into a hub of artistic and cultural activity.

This year's festival featured over 100 performances, workshops, and experiences. Over 9,200 people attended the four-day festival, with 90% of programming free to the community.

The main attraction was 'The Whale' installation, which invited viewers to operate the strings of a large whale puppet and its sea friends while listening to whale vocalisations – an immersive experience enjoyed by all ages.

Artists from Yinjaa-Barni Art Group painted and displayed art, welcoming the public to watch the creation of several pieces and engage in conversations.

A community concert featured roving entertainment, stage performances, music, food trucks and markets.

At our Woodside tent, we engaged with the Karratha community discussing Woodside's work in the North West, our EPs, current and proposed projects and we listened to community feedback.

Woodside, on behalf of the Scarborough Joint Venture, was also proud to support the new biennial Ningaloo Sky Festival in Exmouth recently. The three-day event showcased the region's vibrant culture, food and community.

A key event was a market day at Talanjee Oval featuring local artists and makers, roving entertainers, a kite show, animal petting farm and food trucks.

At our Woodside stand, we chatted with visitors about our EPs and Woodside's activities in the Exmouth region, and listened to people's feedback.

Ningaloo Sky Festival drone show.

A drone show highlighting stories of the region's Traditional Owners and a free community concert by iconic Aussie rock band Eskimo Joe capped off the day.

Other events included astronomy talks highlighting the star-filled Ningaloo night sky, unique dining experiences, sunrise yoga, cultural talks and a community movie night.

Woodsiders also met with the Exmouth Community Liaison Group to provide updates on relevant projects and activities.

Talking point

Pygmy blue whales: feeding discovery

Photo credit: Grace Russell, Centre for Whale Research.

In an Australian first, scientists have recorded where and when pygmy blue whales feed as they migrate along the WA coast, thanks to research co-funded by Woodside Energy.

Every year, many whale species and thousands of individual whales migrate through the offshore waters of WA's north-west.

Luke Smith, Woodside Head of Biodiversity and Science, says collaboration with researchers is helping us better understand these whale species and their annual migration.

"In recent years, we – together with our joint venture partners – have invested heavily in numerous whale research programs," Luke points out.

"We continue to deepen our understanding of these magnificent animals and their natural habitat."

One of our research programs focuses on pygmy blue whales, a species that belies its name and can measure up to 24 metres long and weigh 90 tonnes. They undertake an annual northern migration from south-east Australia up through offshore waters of WA to Indonesia before returning five to six months later.

The research led by the Australian Institute of Marine Science and the Centre for Whale Research, found the whales aren't just migrating but also feeding enroute to their Indonesian breeding grounds – something never previously recorded with telemetry in the north-west waters of WA.

Unlike humpback whales, commonly seen as they play and frolic near to shore on their annual migration along the WA coast, pygmy blues spend little time at the surface and migrate in deeper offshore waters. To understand this species we've turned to the latest technology.

Using satellite tags and dive loggers (think Fitbits for whales), scientists tracked nine pygmy blues as they searched for prey.

Previously, it was thought feeding only occurred at the Perth Canyon and Ningaloo but researchers documented them snacking on the go, too.

The whales were recorded performing deep dives with lunge feeding – a high-speed move where they engulf dense swarms of krill.

The findings are helping researchers deepen their understanding of the species' annual migration, while providing us with more knowledge to include in EPs, improving how we avoid or minimise potential impacts.

"As whale species continue to recover and whale numbers migrating through north-west Australia increase, we'll continue to develop technology and approaches to improve our management of whale interactions," reports Luke.

"It's crucial we further reduce potential impacts, support future project approvals and contribute to science along the way."

Luke believes we can continue to successfully co-exist in the marine environment while simultaneously contributing to the study of these complex, remarkable mammals.

Okha FPSO; approximately 115 kilometres north-west of Dampier.

Let's talk about... FPSOs

Woodside has been producing oil from its Australian assets through Floating Production Storage and Offloading (FPSO) facilities since 1995. Woodside currently has three FPSOs in operation in North West Western Australia.

An FPSO facility is a vessel used in offshore oil and gas production, processing hydrocarbons from subsea wells, storing the oil onboard, and offloading it to tankers for transport. During normal operations, an FPSO is operated by 50 to 100 personnel onboard at any given time. These roles include production operators, marine crew, engineers, safety officers, catering staff, and support personnel.

Moored approximately 115 kilometres north-west of Dampier, the Okha FPSO has been producing oil and gas from the Cossack, Wanaea, Lambert, and Hermes oil fields. Crude oil is offloaded to bulk tankers, and LPG-rich gas is exported to the North Rankin Complex before being processed at the Karratha Gas Plant.

Woodside operates two offshore assets off Exmouth: the Ngujima-Yin and Pyrenees FPSO facilities.

The Ngujima-Yin FPSO is located over the Vincent oil field, 50 kilometres north-west of Exmouth. Ngujima-Yin is a Thalanjyi word meaning "to dream". The Greater Enfield Project, completed in 2018, involved developing several oil accumulations through a subsea tie-back to Ngujima-Yin. This project included a major refit of the FPSO, installation of subsea infrastructure, and the drilling of 12 development wells.

The Pyrenees FPSO commenced operations in 2010 and consists of six conventional oil fields located 45 kilometres north-west of Exmouth.

The Ningaloo region is recognised for its high ecological importance, boasting unique environmental, social, and cultural values, extending across 280 kilometers of coastline between Exmouth and Carnarvon. It is a global biodiversity hotspot and was inscribed on the World Heritage List in 2011.

To better understand and manage the environmental features of the region, Woodside has supported a range of multi-year projects through its environmental partnerships program.

These projects focus on iconic species and habitats across different ecosystems along the Ningaloo Reef and Exmouth Gulf. Woodside's social investment and science-funded projects contribute to conservation efforts, biodiversity education, and community engagement at local and regional scales.

You can read more about this significant region by **clicking here**

Scarborough's subsea infrastructure now in place

The Scarborough Energy Project has reached another exciting milestone–this time beneath the waves. The team has successfully completed the penultimate subsea installation campaign, marking a significant step toward first LNG cargo in the second half of 2026.

Approximately 375 km off the Pilbara coast, over 400 pieces of subsea equipment have now been assembled and installed in the Scarborough field, including the impressive 305-tonne Riser Base Manifold. With all critical infrastructure in place and tested, the project is now more than 86% complete (excluding Pluto Train 1 modifications) and ready for the hook-up and commissioning of the floating production unit (FPU) upon its arrival.

The Scarborough Offshore Facility and Trunkline (Operations) Environment Plan (EP) is now approved, setting out how Woodside will manage environmental risks and impacts associated with offshore operations. The EP covers activities such as FPU installation, commissioning, and ongoing operations, as well as inspection, maintenance, and repair of subsea infrastructure.

Read more about the Scarborough Energy Project by **clicking here**

This is the 80m long, 32" diameter rigid pipe spool which weighs approximately 230 tonnes and was fabricated in Henderson, Western Australia.

		2/3		Port Authority/ DTMI	Port Harbour Master/ DTMI Incident Controller

SPILLS IN STATE/ PORT WATERS

In the event of a hydrocarbon spill (hereafter 'spill') where Woodside Energy Ltd ('Woodside') is the responsible party and the spill may impact State waters and shorelines, Woodside (or the Vessel Master) will commence the initial response actions and notify the Western Australian Department of Transport and Major Infrastructure (DTMI). In the event that Woodside is the responsible party for a spill that occurs within Port Limits or impacts Port Waters, Woodside will notify the Port Authority and DTMI for all spills.

Initially Woodside will be required to make available an appropriate number of suitably qualified persons to work in the DTMI IMT (APPENDIX F – Woodside Liaison Officer Resources to DTMI). DTMI/ the Port Authority's role as the Controlling Agency in State waters does not negate the requirement for Woodside to have appropriate plans and resources in place to adequately respond to a marine hydrocarbon spill incident in State Waters/ within Port Limits or to commence the initial response actions to a spill prior to DTMI establishing incident control in line with DTMI *Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements* (July 2020). Cost recovery arrangements for offshore marine pollution incidents (MOP) are in accordance with Section 9 of the Guidance Note:

https://www.transport.wa.gov.au/mediaFiles/marine/MAC_P_Westplan_MOP_OffshorePetroleumIndGuidance.pdf

Woodside's Incident Management Structure for a hydrocarbon spill, including Woodside Liaison Officer's command structure within DTMI can be seen at APPENDIX E – Woodside Incident Management Structure.

The coordination structure for a concurrent hydrocarbon spill in both Commonwealth and State waters/ shorelines is shown in APPENDIX D – Coordination structure for a concurrent hydrocarbon spill in both Commonwealth and State waters/ shorelines.

1. NOTIFICATIONS

The Incident Controller or delegate must ensure the below notifications (Table 1-1) are completed within the designated timeframes.

For spills from a vessel, relevant notifications must be undertaken by a Woodside representative.

Table 1-1: Notifications

In the event of an incident between campaign vessels, also activate relevant vessel Emergency Response Plans and/or Bridging Documents

Timing	By	To	Name	Contact	Instruction	Form	Complete? (ü)
NOTIFICATIONS FOR ALL LEVELS OF SPILL							
Immediately	Offshore Installation Manager (OIM) or Vessel Master	Woodside Communication Centre (WCC)	Corporate Incident Management Team Incident Commander (CIMT IC)	[1]	Verbally notify WCC of event and estimated volume and hydrocarbon type. If further support required, Incident Commander or delegate to implement this Oil Pollution First Strike Plan per relevant actions detailed in **Table 1-1** and **Table 2-1**.	Verbal	
Within 2 hours	Woodside Site Rep (WSR), CIMT IC or Delegate	National Offshore Petroleum Safety Environmental Management Authority (NOPSEMA[1])	Incident notification office	[2]	Verbally notify NOPSEMA for spills >80L. Record notification using Initial Verbal Notification Form or equivalent and send to NOPSEMA as soon as practicable (cc to NOPTA and DMPE).	Link	
Within 3 days	WSR, CIMT IC or Delegate				Provide a written NOPSEMA Incident Report Form as soon as practicable (no later than 3 days after notification) (cc to NOPTA and DMPE) NOPSEMA [2] NOPTA [3] DMPE [4]	[2]	
As soon as practicable	CIMT IC or Delegate	Woodside	Environment Unit Leader	As per roster	Verbally notify Environment Unit Leader of event and seek advice on relevant performance standards from EP	Verbal	
Within 2 hours of becoming aware of a marine pollution incident (MOP) that occurs in or may impact state waters	CIMT IC or Delegate	WA Department of Transport and Major Infrastructure	DTMI Maritime Environmental Emergency Response Unit (MEER) Duty Officer	[5]	Verbally notify DTMI MEER Duty Officer that a spill has occurred and, if required, request use of equipment stored in Karratha. Follow up with a written Marine Pollution Report (POLREP) as soon as practicable following verbal notification. Additionally, DTMI to be notified if spill is likely to extend into WA State waters. Request DTMI to provide Liaison to Woodside IMT.	[5]	
Within 24 hours of Woodside reporting the incident to the appropriate authority	CIMT IC or Delegate	Department of Primary Industries and Regional Development (DPIRD)			Notification to DPIRD via email within 24 hours of Woodside reporting the incident to the appropriate authority: [14]	Email	
Within 24 hours of Woodside reporting the incident to the appropriate authority	CIMT IC or Delegate	WA Fishing Industry Council (WAFIC)	Industry Liaison Officer	[15]	Notification to WAFIC via email within 24 hours of Woodside reporting the incident to the appropriate authority: [15]	Verbal/ email	
As soon as practicable	CIMT IC or Delegate	Department of Climate Change, Energy, the Environment and Water (DCCEEW) Director of National Parks	Marine Park Compliance Duty Officer	[6]	The Marine Park Compliance Duty Officer is notified in the event of oil pollution within a marine park, or where an oil spill response action must be taken within a marine park, so far as reasonably practicable, prior to response action being taken. This notification should include: • titleholder details • time and location of the incident • proposed response arrangements and locations as per the OPEP • contact details for the response coordinator • confirmation of access to relevant monitoring and evaluation reports when available.	Verbal	
As soon as practicable if there is potential for oiled wildlife or the spill is	CIMT IC or Delegate	WA Department of Biodiversity, Conservation	Duty Officer	[7]	Phone call notification	Verbal	

[1] Notification to NOPSEMA must be from a Woodside Representative.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

expected to contact land or waters managed by WA Department of Biodiversity, Conservation and Attractions		and Attractions (DBCA)					
As soon as practicable	Public Information	Relevant persons or organisations	To be determined	To be determined	Should it be identified that additional persons such as, but not limited to, commercial fishers or tourism operators may be affected, Woodside would, at the relevant time, engage with these parties as appropriate and in alignment with the Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) for North Rankin Complex Operations. Relevant persons or organisations will be re-assessed throughout the response period.	Verbal initially	
As soon as practicable	Public Information	Relevant cultural authorities	To be determined	To be determined	Should it be identified that relevant cultural authorities may be affected, Woodside would, at the relevant time, engage with these parties as appropriate and in alignment with the Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) for North Rankin Complex Operations. Relevant cultural authorities will be re-assessed throughout the response period.	Verbal initially	
ADDITIONAL NOTIFICATIONS TO BE MADE ONLY IF SPILL IS FROM A VESSEL							
"Without delay" as per *Protection of the Sea (Prevention of Pollution from Ships) Act 1983* (Cth) s 11(1)	Vessel Master	Australian Maritime Safety Authority (AMSA)	Rescue Coordination Centre (RCC)	[8]	Verbally notify AMSA RCC of the hydrocarbon spill. Follow up with a written Harmful Substances Report (POLREP) as soon as practicable following verbal notification.	[8]	
ADDITIONAL LEVEL 2/3 NOTIFICATIONS							
As soon as practicable	CIMT IC or Delegate	AMOSC	AMOSC Duty Manager	[9]	Notify AMOSC that a spill has occurred and follow-up with an email from the **CIMT IC/ CIMT Deputy IC/ CMT Leader** to formally activate AMOSC. Determine what resources are required consistent with the AMOS Plan and detail in a Service Contract that will be sent to Woodside from AMOSC upon activation.	[9]	
As soon as practicable	CIMT IC or Delegate	Oil Spill Response Limited (OSRL)	OSRL Duty Manager	[10]	**Notification for all services:** Contact OSRL duty manager and request assistance from technical advisor in Perth. Send the completed notification form to OSRL as soon as practicable.	[10]	
					Mobilisation of response personnel/ equipment: For mobilisation of response personnel/ resources, send the Mobilisation Form to OSRL as soon as practicable. The mobilisation form must be signed by a nominated callout authority from Woodside. OSRL can advise the names on the call out authority list, if required.	[10]	
					Mobilisation of Operational and Scientific Monitoring service: For mobilisation of Operational and Scientific Monitoring (OSM) service, send the OSM Mobilisation Form to OSRL as soon as practicable. The mobilisation form must be signed by a nominated callout authority from Woodside. OSRL can advise the names on the call out authority list, if required.	[10]	
As soon as practicable if extra personnel are required for incident support	CIMT IC or Delegate	Marine Spill Response Corporation (MSRC)	MSRC Response Manager	[11]	Activate the contract with MSRC (in full) for the provision of up to 30 personnel depending on what skills are required. Please note that provision of these personnel from MSRC are on a best endeavours basis and are not guaranteed.	Verbal

2. RESPONSE TECHNIQUES

Table 2-1: Response techniques

Technique	Spill type			Level	Pre- Identified Tactics	Responsible	ALARP Commitment Summary	Link to Operational Plans for notification numbers and actions
	MDO	Perseus Cond.	GWA Cond.					
Monitor and evaluate – tracking buoy	Yes	Yes	Yes	ALL	If a vessel is on location, consider the need to deploy the oil spill tracking buoy. If no vessel is on location, consider the need to mobilise oil spill tracking buoys from the King Bay Supply Base (KBSB) Stockpile. If a surface sheen is visible from the facility, deploy the satellite tracking buoy within two hours.	Operations	**WITHIN 24 HOURS:** Tracking buoy deployed within 2 hours.	Surveillance and Reconnaissance to Detect Hydrocarbons and Resources at Risk in the Operational Monitoring Operational Plan. Deploy tracking buoy in accordance with Link.
Monitor and evaluate – predictive modelling	Yes	Yes	Yes	ALL	Undertake initial modelling using the Rapid Assessment Oil Spill Tool and weathering fate analysis using Automated Data Inquiry for Oil Spills (ADIOS) or refer to the hydrocarbon information in **Appendix A.**	Situation or Environment	**WITHIN 24 HOURS:** Initial modelling within 6 hours using the Rapid Assessment Tool.	Predictive Modelling of Hydrocarbons to Assess Resources at Risk in the Operational Monitoring Operational Plan. *Planning Section to download immediately and follow steps*
	Yes	Yes	Yes	ALL	Send Oil Spill Trajectory Modelling (OSTM) form ([12]) to RPS Response ([12]).	Situation	**WITHIN 24 HOURS:** Detailed modelling within 4 hours of RPS Response receiving information from Woodside.	
Monitor and evaluate – aerial surveillance	Yes	Yes	Yes	ALL	Instruct Aviation Unit Leader to commence aerial observations in daylight hours. Aerial surveillance observer to complete log in Appendix B Form 8.	Logistics – Aviation	**WITHIN 24 HOURS:** 2 trained aerial observers. 1 aircraft available. Report made available to the IMT within 2 hours of landing after each sortie.	Surveillance and Reconnaissance to Detect Hydrocarbons and Resources at Risk in the Operational Monitoring Operational Plan. *Planning Section to download immediately and follow steps*
Monitor and evaluate – satellite tracking	Yes	Yes	Yes	ALL	The Situation Unit Leader to action satellite imagery services. This may be obtained via: • AMOSC Duty Manager: [9] • OSRL Duty Manager: [10] • KSAT: [13] • Others identified by CIMT	Situation	**WITHIN 24 HOURS:** Service provider will confirm availability of an initial acquisition within 2 hours. Data received to be uploaded into Woodside Common Operating Picture.	
Monitor and evaluate – pre-emptive assessment of receptors at risk	Yes	Yes	Yes	ALL	Consider the need to mobilise resources to undertake pre-emptive assessment of sensitive receptors at risk (OM04).	Planning or Environment	**WITHIN 48 HOURS:** In agreement with WA DTMI, deployment of 2 specialists for each of the Response Protection Areas (RPA) with predicted impacts.	Pre-emptive Assessment of Sensitive Receptors in the Operational Monitoring Operational Plan.
Operational monitoring – shoreline assessment	Yes	Yes	Yes	ALL	Consider the need to mobilise resources to undertake shoreline assessment surveys (OM05).	Planning or Environment	**WITHIN 48 HOURS:** In agreement with WA DTMI, deployment of 2 specialists trained in Shoreline Clean-up Assessment Technique (SCAT) for each of the RPAs with predicted impacts.	Mobilise OSM service via OSRL: [10] Refer to OSM Bridging Implementation Plan – Part B for additional implementation information: Link Refer to Joint Industry Operational And Scientific Monitoring Plan Framework for activation criteria and additional supporting information.
Operational and Scientific Monitoring	Yes	Yes	Yes	ALL	Consider the need to mobilise OSM resources via third party service provider.	Environment	**WITHIN 24 HOURS:** Notify service provider of spill event and mobilise required programs depending upon nature of spill event	
Surface dispersant	No	No	No	N/A	This response strategy is not recommended.			
Containment and recovery	No	No	No	N/A	This response strategy is not recommended.			
Mechanical dispersion	No	No	No	N/A	This response strategy is not recommended.			
In-situ burning	No	No	No	N/A	This response strategy is not recommended.			
Shoreline protection and deflection	No	Yes	Yes	L2/3	Equipment from Woodside, AMOSC and AMSA Western Australian Stockpiles mobilised. Consideration of mobilisation of interstate/international shoreline protection equipment (i.e. OSRL).	Operations and Planning	**WITHIN 24 HOURS:** In agreement with WA DTMI, activate relevant Tactical Response Plans (TRPs) within 12 hours. In agreement with WA DTMI, mobilise teams to RPAs within 24 hours of operational monitoring predicting impacts. In agreement with WA DTMI, equipment mobilised from closest stockpile within 24 hours.	Protection and Deflection Operational Plan *Logistics Section to download immediately and follow steps*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

							Supplementary equipment mobilised from State, AMOSC, AMSA stockpiles within 48 hours. **WITHIN 48 HOURS:** Supplementary equipment mobilised from OSRL within 48 hours	
Shoreline clean-up	**No**	**Yes**	**Yes**	**L2/3**	Equipment from Woodside, AMOSC and AMSA Western Australian Stockpiles and relevant personnel mobilised. Consideration of mobilisation of interstate/international shoreline clean-up equipment and relevant personnel (i.e. OSRL).	Logistics and Planning	**WITHIN 24 HOURS:** Equipment mobilised from closest stockpile within 24 hours. TRPs available for at risk shorelines within 12 hours. **WITHIN 48 HOURS:** Deployment of shoreline clean-up teams to contaminated RPAs. Access to at least 213 m^3 of solid and liquid waste storage available within 48 hours, and 3,491 m^3 by Day 3 upon activation of 3rd party contract.	Shoreline Clean-up Operational Plan *Logistics Section to download immediately and follow steps*
Oiled wildlife response	**Yes**	**Yes**	**Yes**	**ALL**	If oiled wildlife is a potential impact, request AMOSC to mobilise containerised oiled wildlife first strike kits and relevant personnel. Refer to relevant Tactical Response Plan for potential wildlife at risk. Mobilise AMOSC Oiled Wildlife Containers. Consider whether additional equipment is required from local suppliers.	Logistics and Planning	Contracted capability to treat up to an additional 250 individual fauna within a five-day period. Facilities for oiled wildlife rehabilitation are operational 24/7	Oiled Wildlife Response Operational Plan
SOURCE CONTROL TECHNIQUES								
Subsea First Response Toolkit	**No**	**Yes**	**No**	**L2/3**	Debris clearance equipment to be mobilised prior to deployment of capping stack (if feasible).	Source Control	**WITHIN 48 HOURS:** Remotely Operated Vehicle (ROV) ready for deployment within 48 hours. SFRT equipment mobilised to site for deployment within 11 days.	Source Control Emergency Response Planning Guideline
Subsea Dispersant	**N/A**	**No**	**N/A**	**N/A**	This response strategy is not recommended. The use of subsea dispersant would increase dispersed/ entrained hydrocarbon exposure of subsea biota. Modelling predicts that the LOWC scenario will result in minimal surface or shoreline oil for the duration of the spill event and thus use of subsea dispersant would not provide a net environmental benefit.	**N/A**		
Capping Stack	**N/A**	**No**	**N/A**	**N/A**	This response strategy is not viable. Capping stack as a source control method is not considered feasible for PEN05 well as it is a platform wellhead positioned above sea level. The two subsea Persephone wells exhibit water inflow and outflow dynamics and consequently, in the event of a containment breach, it is anticipated that formation water would predominantly be produced, killing the subsea well.	**N/A**		
Relief Well	**N/A**	**Yes**	**N/A**	**L2/3**	Relief MODU supply arrangements through the AEP MoU. Wild Well Control Inc (WWCI) staff available all year round to assist with the mobilisation, deployment, and operation well intervention equipment.	Operations – Source Control Unit	**WITHIN 24 HOURS** Identify source control vessel availability within 24 hours. MODU mobilised to location within 21 days, with drilling to be completed within 77 days.	

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

3. RESPONSE PROTECTION AREAS

Action: Provide relevant Control Agency with applicable Tactical Response Plans for any Response Protection Areas (RPAs) identified during operational monitoring.

Based on deterministic hydrocarbon spill modelling for MEE-02 (see Appendix A for scenario details), the sensitive receptors outlined in **Table 3-1** are identified as priority protection areas, as they have the potential to be contacted by hydrocarbon at or above impact threshold levels within 48 hours of a spill.

Table 3-1: Receptors for priority protection with potential impact within 48 Hours

Receptor	Distance and Direction from Offshore Facility Operational Area (km)	Distance and Direction from Export Trunkline Operational Area (km)	Minimum time to shoreline contact (above 100g/m^2) in days (WCCS)	Maximum shoreline accumulation (above 100g/m^2) in m^3 (WCCS)	Tactical Response Plans
Dampier Archipelago	110, southeast	Overlapping	0.6 days (13 m^3)	325 m^3 (1.8 days)	Mermaid Sound – Dampier Archipelago Inshore Waters
Cape Bruguieres	115, southeast	8 km, east-northeast	1.3 days (1 m^3)	9 m^3 (1.5 days)	
Cohen Island	110, southeast	3 km, east-northeast	0.8 days (1 m^3)	267 m^3 (2 days)	
Keast Island	115, southeast	5 km, east-northeast	0.6 days (4 m^3)	27 m^3 (2 days)	
Legendre Island	110, southeast	8 km, east-northeast	0.6 days (11 m^3)	46 m^3 (2.8 days)	Legendre Island – Dampier

Hydrocarbon spill modelling results for MEE-01 indicate the sensitive receptors listed below have the potential to be contacted by hydrocarbons beyond 48 hours of a spill:

- Exmouth Coastline
- Ningaloo World Heritage Coastline
- Ningaloo State Marine Park
- Clerke Reef (Rowley Shoals)
- Bedwell Island

Tactical Response plans for these locations can be accessed via the link here and include the details of potential forward operating bases and staging areas.

Oil Spill Trajectory Modelling specific to the spill event will be required to determine the regional sensitive receptors to be contacted beyond 48 hours of a spill.

Figure 3-1 illustrates the location of regional sensitive receptors in relation to the North Rankin Complex Operations Operational Area and identifies priority protection areas.

Consideration should be given to other stakeholders (including mariners) in the vicinity of the spill location. **Table 3-2** indicates the assets within the vicinity of the North Rankin Complex Operations Operational Area.

Table 3-2: Assets in the vicinity of the North Rankin Complex Operations Operational Area

Asset	Distance and Direction from PPA	Operator
Angel platform	42 km east	Woodside
Okha FPSO	33 km east	Woodside
Goodwyn Alpha platform	21 km west	Woodside
Reindeer wellhead platform	9 km west (Export Trunkline Operational Area) 50 km south (Offshore Facility Operational Area)	Santos
Stag A	28 km west (Export Trunkline Operational Area) 78 km south (Offshore Facility Operational Area)	Jadestone
Wandoo B	4 km west (Export Trunkline Operational Area) 67 km south (Offshore Facility Operational Area)	VOGA

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

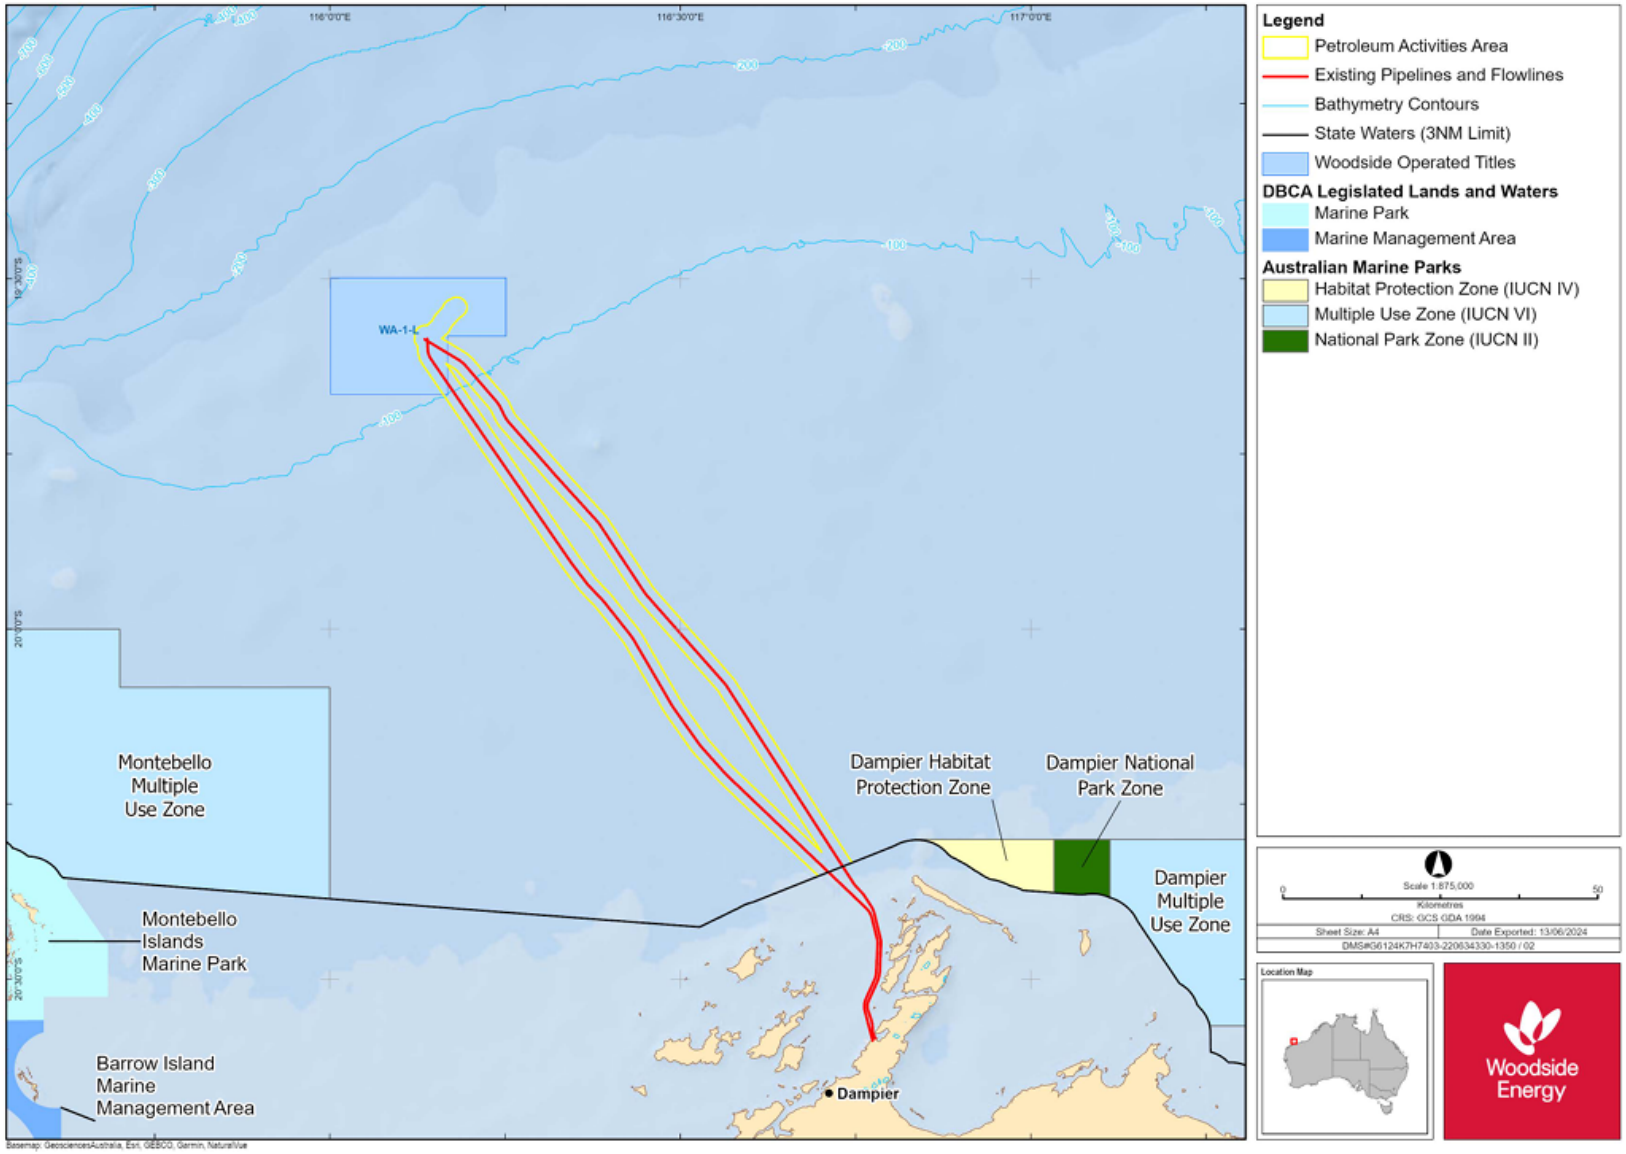

Figure 3-1: Petroleum Activities Area

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4. DISPERSANT APPLICATION

Dispersant is not considered an appropriate response strategy for this activity as described in the North Rankin Complex Operations Environment Plan Appendix D (Woodside's Oil Spill Preparedness and Response Mitigation Assessment.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX A – CREDIBLE SPILL SCENARIOS AND HYDROCARBON INFORMATION

Table A - 1: Credible spill scenarios and hydrocarbon information

Scenario	Product	Volume	Residue	Weathering rate		Suggested ADIOS2 Analogue[2]
MEE-01: ***77-day surface release of Perseus Condensate due to loss of containment from a blowout at PEN05 well***	*Perseus Condensate*	19,863 m^3	0.6% (119.2 m^3)	12 hours (BP < 180 °C)	80.5%	NWS Condensate API 62.6
				24 hours (180 °C < BP < 265 °C)	12.8%	
				Several days (265 °C < BP < 380 °C)	6.1%	
MEE-02 (WCCS) ***16-hour Subsea release of GWA Export Condensate at 29.89 km of TL2 Export Pipeline from shore***	GWA Export Condensate	6,371 m^3	2.3% (146.5 m^3)	12 hours (BP < 180 °C)	61.2%	NWS Condensate API 62.6
				24 hours (180 °C < BP < 265 °C)	23.7%	
				Several days (265 °C < BP < 380 °C)	12.7%	
MEE-05 ***Loss of vessel containment at the PLA platform***[3]	Marine Gas Oil	1,000 m^3	5.0% (50 m^3)	12 hours (BP < 180 °C)	6%	Diesel Fuel Oil (Southern USA 1) API of 37.2
				24 hours (180 °C < BP < 265 °C)	34.6%	
				Several days (265 °C < BP < 380 °C)	54.4%	

[2] Initial screening of possible ADIOS2 analogues considered hydrocarbons with similar APIs. Suggested selection is based on the closest distillation cut to the Woodside hydrocarbon. Only hydrocarbons with >380°C distillation cuts were included in selection process.

[3] Modelling for a release of 1000 m3 Marine Gas Oil was available within Pluto Facility Operations, 83 km closer to shore than the Operational Area for this activity. It was originally undertaken in 2024 using NOPSEMA's contemporary modelling thresholds. The worst-case scenario for this category remains unchanged at approximately 1000 m3 due to the rupture of a vessel wing tank, which is the same modelled volume for the PLA Facility (1000 m3). Given that spill parameters and geographic location fall within the envelope of the existing modelling, it is an appropriate surrogate and therefore additional modelling was not required.

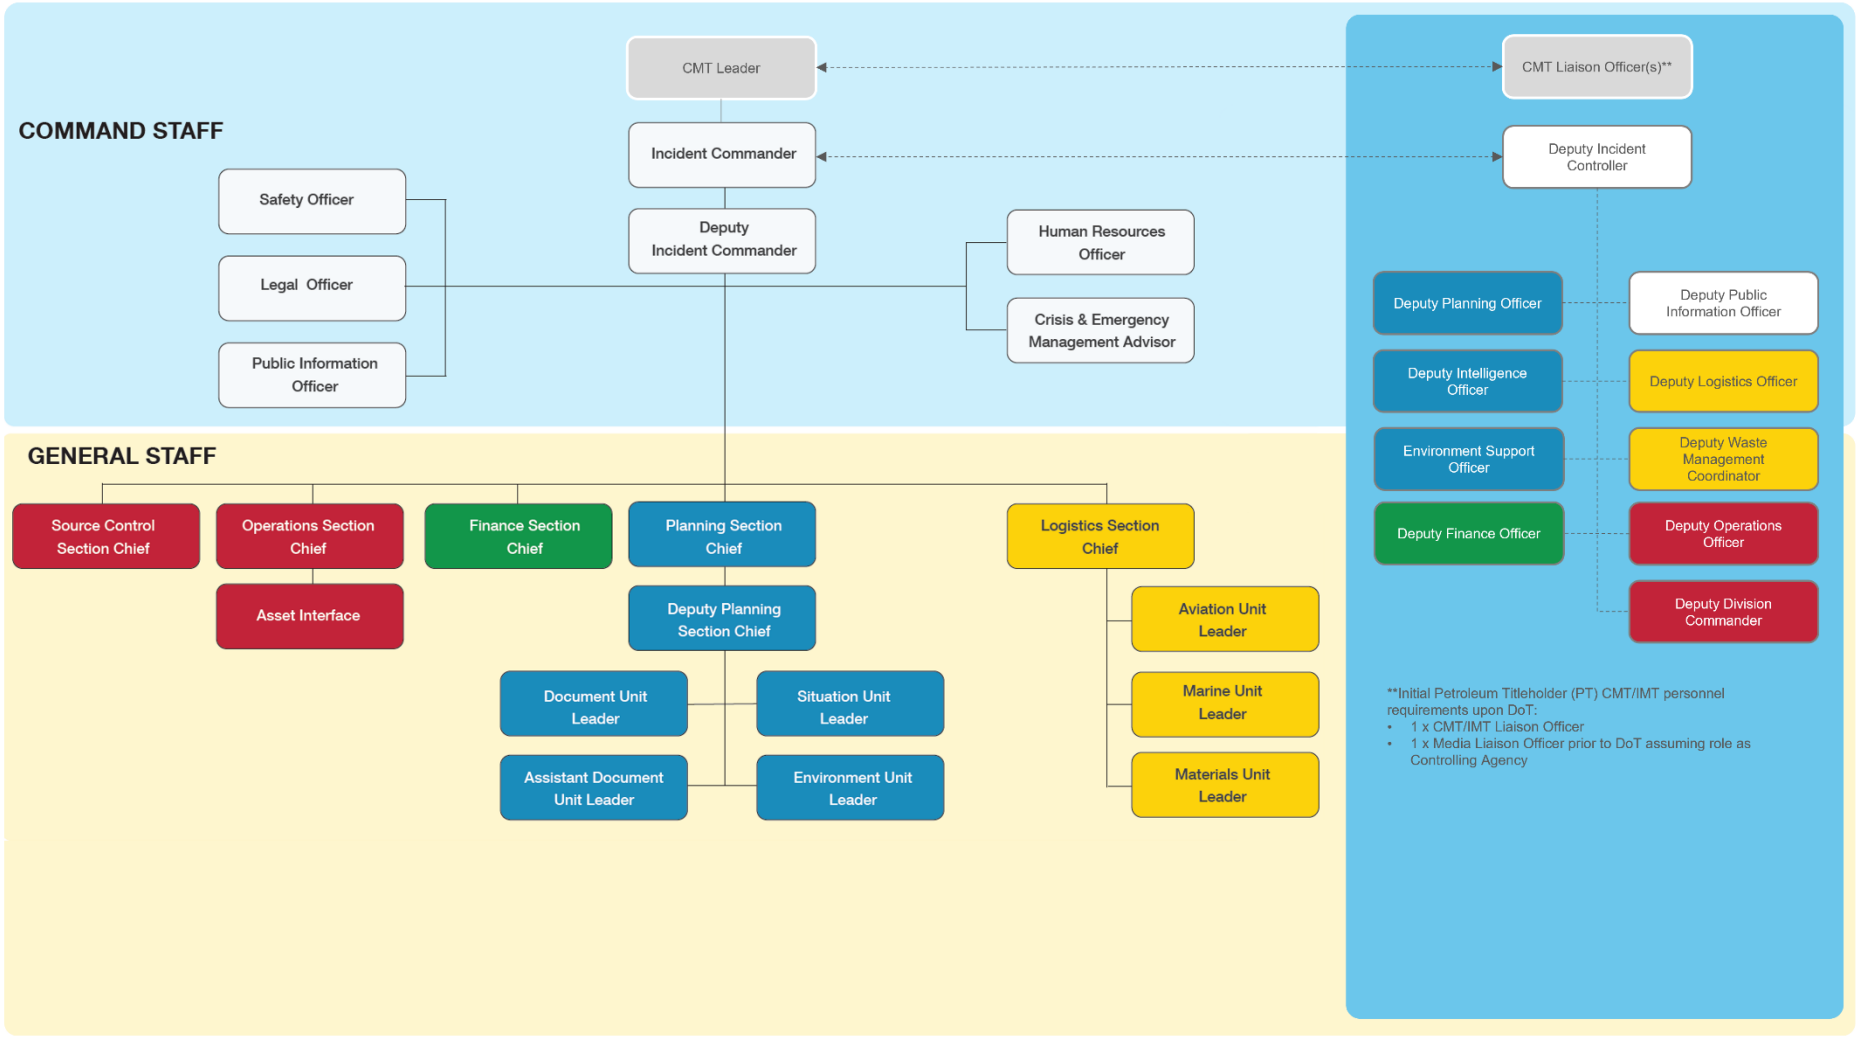
APPENDIX D – COORDINATION STRUCTURE FOR A CONCURRENT HYDROCARBON SPILL IN BOTH COMMONWEALTH AND STATE WATERS/ SHORELINES[4]

The Control Agency for a hydrocarbon spill in Commonwealth waters resulting from an offshore petroleum activity is Woodside (the Petroleum Titleholder).



The Control Agency/ Hazard Management Agency (HMA) for a hydrocarbon spill in State waters/shorelines resulting from an offshore petroleum activity is DTMI. DTMI will appoint an Incident Controller and form a separate IMT to only manage the spill within State waters/shorelines.

[4] Adapted from DTMI Offshore Petroleum Industry Guidance Note, Marine Oil Pollution: Response and Consultation Arrangements July 2020. Note: For full structure up to Commonwealth Cabinet/Minister refer to Marine Oil Pollution: Response and Consultation Arrangements Section 6.5, Figure 4.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX E – WOODSIDE INCIDENT MANAGEMENT STRUCTURE

Woodside Incident Management Structure for Hydrocarbon Spill (including Woodside Liaison Officers Command Structure within DTMI IMT if required). Woodside's CIMT would operate from the Emergency Operations Centre (EOC) at the Woodside headquarters in Perth.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX F – WOODSIDE LIAISON OFFICER RESOURCES TO DTMI

In the event that DTMI is required to establish an IMT, Woodside will make available an appropriate number of appropriately qualified persons to work within the DTMI IMT. In the event the Port Authority is the Control Agency within Port Limits, Woodside will make available similar roles as requested.

It is an expectation that Woodside's nominated CMT Liaison Officer and the Deputy Incident Controller attend the DTMI Fremantle Incident Control Centre (ICC) as soon as possible after the formal request has been made by the State Marine Pollution Coordinator (SMPC), and that the remaining initial cohort will attend no later than 8 am on the day following the request being formally made to Woodside by the SMPC. For Woodside personnel designated to serve in DTMI's Forward Operating Base (FOB), it is expected that they arrive at the FOB no later than 24 hours from the formal request being made by the SMPC.

Area	Role	Woodside personnel[5]	Key Duties	#
DTMI Maritime Environmental Emergency Coordination Centre (MEECC)	CMT Liaison Officer	CIMT Liaison	• Provide a direct liaison between the CMT and the MEECC. • Facilitate effective communications and coordination between the CIMT Leader and SMPC. • Offer advice to SMPC on matters pertaining to PT crisis management policies and procedures.	1
DTMI IMT Incident Control	Deputy Incident Controller	Deputy Incident Commander (Deputy IC)	• Provide a direct liaison between the PT IMT and DTMI IMT. • Facilitate effective communications and coordination between the PT IC and the DTMI IC. • Offer advice to the DTMI IC on matters pertaining to PT incident response policies and procedures. • Offer advice to the Safety Coordinator on matters pertaining to PT safety policies and procedures, particularly as they relate to PT employees or contractors operating under the control of the DTMI IMT.	1
DTMI IMT Intelligence	Deputy Intelligence Officer	Situation Unit Leader (Intelligence)	• As part of the Intelligence Team, assist the Intelligence Officer in the performance of their duties in relation to situation and awareness. • Facilitate the provision of relevant modelling and predications from the PT IMT. • Assist in the interpretation of modelling and predictions originating from the PT IMT. • Facilitate the provision of relevant situation and awareness information originating from the DTMI IMT to the PT IMT. • Facilitate the provision of relevant mapping from the PT IMT. • Assist in the interpretation of mapping originating from the PT IMT. • Facilitate the provision of relevant mapping originating from the DTMI IMT to the PT IMT.	1
DTMI IMT Intelligence – Environment	Environment Support Officer	Deputy Environment Unit Leader	• As part of the Intelligence Team, assist the Environment Coordinator in the performance of their duties in relation to the provision of environmental support into the planning process. • Assist in the interpretation of the PT OPEP and relevant TRP plans. • Facilitate in requesting, obtaining and interpreting environmental monitoring data originating from the PT IMT.	1

[5] *These positions would be mobilised, in consultation with DTMI, to align to the actual spill scenario. The selected roles and/or individual personnel would be subject to continued evaluation to ensure continued 'best fit'. For CIMT roster arrangements, contact the WCC. During a prolonged response, additional personnel may be sourced through internal resourcing and mutual Aid agreements such as the AMOSC Core Group via* [9]

APPENDIX G – DTMI LIAISON OFFICER RESOURCES TO WOODSIDE

Once DTMI activates a State waters/shorelines IMT, DTMI will make available the following roles to Woodside.

Area	DTMI Liaison Role	Personnel Sourced from:	Key Duties	#
Woodside CIMT	DTMI Liaison Officer (prior to DTMI assuming Controlling Agency)/ Deputy Incident Controller – State waters (after DTMI assumes Controlling Agency)	DTMI	• Facilitate effective communications between DTMI's SMPC/ Incident Controller and the Petroleum Titleholder's appointed CMT Leader / Incident Controller. • Provide enhanced situational awareness to DTMI of the incident and the potential impact on State waters. • Assist in the provision of support from DTMI to the Petroleum Titleholder. • Facilitate the provision technical advice from DTMI to the Petroleum Titleholder Incident Controller as required.	1
Woodside CIMT Public Information – Media	DTMI Media Liaison Officer	DTMI	• Provide a direct liaison between the PT Media team and DTMI IMT Media team. • Facilitate effective communications and coordination between the PT and DTMI media teams. • Assist in the release of joint media statements and conduct of joint media briefings. • Assist in the release of joint information and warnings through the DTMI Information & Warnings team. • Offer advice to the PT Media Coordinator on matters pertaining to DTMI and wider Government media policies and procedures.	1
			Total DTMI Personnel Initial Requirement to Woodside	2

APPENDIX H: PROGRAM OF ONGOING ENGAGEMENT WITH TRADITIONAL CUSTODIANS

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Proposed Program of Ongoing Engagement with Traditional Custodians

This Program of Ongoing Engagement with Traditional Custodians ("Program") has been developed to demonstrate Woodside's commitment to ongoing engagement and support of Traditional Custodians' capacity to care for and manage Country, including Sea Country, and has been directly informed by Traditional Custodians' feedback regarding their capacity to engage and consult on Environment Plans.

It is a living document designed to evolve with ongoing consultation and feedback from Traditional Custodians and, at a minimum, will be subject to annual review. In addition to this Program, Woodside will continue to participate in, and support collective industry engagement with Traditional Owners on the development of a future, sustainable, industry wide Program. Through the Program, Woodside actively supports Traditional Custodians' capacity for, and involvement in, ongoing engagement and feedback on environment plans.

The Program has been developed so that Traditional Custodians can, on an ongoing basis, provide Woodside with feedback relating to the possible consequences of an activity to be carried out under an environment plan on their functions, interests and activities as they relate to cultural values. This feedback will be evaluated in conjunction with Traditional Custodians and, where necessary, avoidance or mitigation strategies in will be developed in collaboration with Traditional Custodians. How the Program is implemented with specific Traditional Custodians will depend on their stated needs and priorities

The Program is underpinned by Woodside's First Nations Communities Policy (woodside.com), the objective of which is to ensure Woodside partners and engages with First Nations communities to create positive economic, social and cultural outcomes that leave a lasting legacy. Woodside does this through building respectful relationships and partnerships with First Nations communities where we are active, in the areas where they are most interested in. We acknowledge the unique connection that First Nations communities have to land, waters and the environment.

The Program will include, as agreed with relevant communities, reasonable commitment to:

1. **Support for ongoing dialogue and engagement**

Woodside will support the capacity of Traditional Custodians to participate in ongoing dialogue and engagement about the environment plans and to enable the ongoing and future identification of cultural values potentially impacted by Woodside's activities. Woodside further commits to agreeing consultation protocols with individual Traditional Custodians to ensure the material provided is appropriate in level of detail such that the potential for cultural impact from Woodside activities can be determined and as required measures can be adopted to avoid or minimise impact.

In addition, Woodside will receive feedback on cultural values from an individual person or organisation that identifies as a Traditional Custodian, at any stage during the development and implementation of activities. This feedback will be evaluated, in conjunction with the Traditional Custodian individual or group and if required, control measures will put in place to avoid impacts to cultural values, or where avoidance is not possible, to minimise and mitigate the impacts to an acceptable level.

Where cultural values are identified post activity completion, any controls relevant to value management will be implemented during the next relevant activity.

2. Support for the identification and recording of cultural features

Woodside will support Traditional Custodians to record and articulate their Sea Country values and will invest in cultural assessments codesigned with Traditional Custodians, where required, to inform potential risks to cultural values from our petroleum activities.

This may include supporting cultural mapping by Traditional Custodians to identify and map significant cultural features including archaeological sites and other cultural values. The scoping of the mapping process will be codesigned with Traditional Custodians.

Woodside understands that cultural knowledge remains the intellectual property of Traditional Custodians and will agree with Traditional Custodians at the outset how that information from surveys will be used to feedback into and inform the environment plan's design and implementation.

In addition, Woodside applies the Cultural Heritage Management Procedure 2019, updated in 2023, to the Program which*:*

- provides a process for the identification, protection, and management of Cultural Heritage taking into account relevant standards, in particular, the United Nations Declaration on the Rights of Indigenous Peoples, the Charter for the Protection and Management of the Archaeological Heritage, the Convention for the Safeguarding of the Intangible Cultural Heritage, and the Convention on the Protection of the Underwater Cultural Heritage;
- applies to underwater cultural heritage and, consistent with current practice, provides for the commissioning of (where appropriate) both archaeological and ethnographic assessments of cultural values over the submerged landscape; and
- the process includes the following:
    - early engagement with relevant Traditional Custodians
    - identification of potential heritage, this could include desktop and field surveys undertaken with the Traditional Custodians.
- the development of cultural management strategies; and, where it is determined cultural heritage may be impacted, the development of Cultural Heritage Management Plans codesigned with Traditional Custodians and implemented by Woodside's First Nations team which:
    - focus on avoidance or minimisation of impacts; and
    - provide regular reviews and for inclusion of new information and further development of the Cultural Heritage Management Plan.

Woodside is committed to continue to receive feedback on cultural values for the life of an environment plan, the inclusion of new information and the development of avoidance or mitigation strategies in collaboration with Traditional Custodians. This information will be recorded via the Woodside Management of Knowledge Process and any potential impacts to the accepted Environment Plan evaluated via the Woodside Management of Change Process.

3. Building capacity for the ongoing protection of country

Woodside will support measures to increase the capability and capacity of the Traditional Custodian groups. This is guided by Woodside's Indigenous Affairs Strategy 2019 ("Strategy"), which is designed to enable the building and maintaining of relationships with Traditional Custodians to leave a lasting legacy, including strengthening of Traditional Custodians' capacity to care for and manage Country, including Sea Country. The Strategy was developed with inputs from Traditional Custodians and contains four pillars that direct Woodside's social investment, policies relating to economic development, procurement and employment, and Woodside's agreement making and implementation of agreements. The pillars are:

1. Culture and Heritage Management: support social outcomes through protection, recognition and respect for culture and heritage;
2. Economic Participation: provide training, jobs, and business opportunities;

3. Capability and capacity: ensure strong corporate governance, leadership development and education initiatives to support self-determination; and
4. Safer and Healthier Communities: partner with Aboriginal people and service providers to maximise safer and healthier community outcomes.

Woodside is committed to an ongoing relationship between Woodside and the Traditional Custodian groups. Through consultation with Traditional Custodians Woodside will continue to:

- establish support for Indigenous ranger programs via social investment;
- establish support for Indigenous oil spill response capability via investigating training models;
- establish support for identification and recording of cultural values and the management of that information by Traditional Custodians;
- establish support for programs identified by the Traditional Custodians as important to them and as agreed by Woodside.

4. Support for capacity and capability in relation to governance

Pillar 3 of the Indigenous Affairs Strategy 2019 focuses on ensuring strong corporate governance, leadership development and education initiatives to support self-determination. To enable this, Woodside will support measures to increase the capability and capacity of the Traditional Custodian groups, including in relation to governance and management systems.

The nature of this support will be informed by the individual needs of Traditional Custodian groups, but may include:

- funding or other support for community meetings, particularly where consultation with representative bodies lies outside of that body's core business and cultural authority or mandate needs to be secured,
- resourcing internal expertise so that information is managed consistently and internally, including ensuring appropriate record keeping of consultation to provide stakeholders with a lasting record of discussions, and
- development or upgrade of IT systems to manage information.

5. Program Reporting and Review of Effectiveness

Woodside will undertake an annual review of the Program to assess its effectiveness and adapt the Program accordingly. The annual review will also include an assessment of appropriateness of the methods used to undertake ongoing consultation with Traditional Custodians.
Progress of the Program will be reported annually in line with annual sustainability reporting via the Woodside website.

6. Current Status

Following distribution of this proposed Program, Woodside is now participating in a number of specific ongoing consultation activities with Traditional Custodian Relevant Persons. Specific ongoing activities are tabulated below:

Traditional Custodian Relevant Person	Ongoing Consultation Description	Forward Plan	Estimated Timeframes
Buurabalayji Thalanyji Aboriginal Corporation (BTAC)	BTAC proposed a Collaboration Agreement in May 2023, Woodside agreed in principle, and exchanged correspondence to understand details of the proposal. The Collaboration Agreement would enable support for BTAC to undertake an ethnographic assessment to articulate values, and ensure appropriate cost recovery	Woodside and BTAC have executed a Costs Acceptance Letter. Woodside has developed a Collaboration Agreement which is currently under internal Woodside review. Once settled internally it will be put to BTAC for their consideration.	The draft Collaboration Agreement will be provided to BTAC for consideration in November 2023. Woodside will follow up on a monthly basis for at least six months with BTAC once they are in receipt of the draft proposed Collaboration Agreement from Woodside, or until the Agreement is in place.
Yamatji Marlpa Aboriginal Corporation (YMAC)	In June 2023, YMAC provided Woodside a proposed draft Framework Agreement, and a proposal to fund in-house expertise to support consultation and implement the Collaboration Framework. In July 2023, Woodside agreed in principle to the proposed Collaboration Framework and the funding proposal and requested a meeting to work together on details. Woodside provided the Proposed Program of Ongoing Consultation to complement the proposed Collaboration Framework.	Woodside will continue to communicate with YMAC, seeking to collaborate and reach agreement on the proposed Collaboration Framework and funding agreement. At the point of EP submission, Woodside is seeking a meeting with YMAC at YMAC's earliest convenience.	Woodside will follow up with YMAC on a monthly basis for at least six months, seeking to progress the Collaboration Framework and funding agreement.
Wirrawandi Aboriginal Corporations (WAC)	In August 2023, WAC proposed a Framework Agreement with Woodside to provide a streamlined, formalised approach to consultation between WAC and Woodside. Woodside has confirmed receipt of the proposed framework from WAC.	Woodside is in contact with the WAC CEO and is currently developing a response to the proposed Framework Agreement put forward by WAC. WAC do not object to Woodside progressing environmental plans on the proviso that both parties enter into an Agreement suitable to each party. WAC have suggested a timeframe to settle the Agreement over the next 2-3 months. Woodside will be aiming to reach agreement within a shorter timeframe.	Ongoing Framework Agreement settled in 2023.
Ngarluma Aboriginal Corporation (NAC)	In September 2023, NAC proposed a Joint Working Group to practically manage consultation processes. It was proposed that the group would meet monthly for 2023 and quarterly thereafter, meetings would include NAC CEO and NAC Directors and potentially independent SME/s, the proposal was that Woodside draft a Framework Agreement, and included a request for funding for this approach. Woodside provided in-principle support for the proposal.	Woodside has provided in-principle support for NAC's proposal and is currently developing a draft Framework Agreement which once settled internally will be sent to NAC for their response.	In accordance with NAC's proposed timeframe, Woodside aims to prepare a draft Framework Agreement, settle internally and then meet to discuss in 2023.
Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC)	In a meeting during August 2023, NTGAC proposed a Framework Agreement. This included terms for ongoing	Woodside and NTGAC/YMAC have agreed in writing to develop a Framework Agreement. Woodside have been responding to queries from NTGAC who have passed	Woodside will follow up with NTGAC on a monthly basis for at least six months, seeking to

	engagement such as frequency of consultation, participation, and content. NTGAC has also requested Woodside provide funding for an in-house environmental scientist to review material. Woodside agreed in principle to this approach, and has requested a first draft of the Framework Agreement for consideration. Woodside have agreed to pay for YMAC's in-house scientist to attend NTGAC meetings to advise NTGAC.	information provided by Woodside onto their Environmental Scientist. Woodside are awaiting a proposed draft of a Framework Agreement and general report. YMAC's preference is to prepare the drafts, Woodside have offered to assist with drafting and remain ready to respond on receipt of documents.	progress the Framework Agreement and General report.
Yinggarda Aboriginal Corporation (YAC)	In August 2023, YAC requested Woodside provide a draft Framework Agreement for their consideration. Woodside has provided a draft Framework Agreement to YAC for review.	Woodside's Proposal suggests meeting with YAC every 3 months to progress matters. The Proposal suggests committing to work continuing between meetings with each party nominating focal points. A Scope of Work and schedule of rates is included to re-imburse the cost of ongoing consultation. Woodside's Proposal includes timeframes for anticipated milestones and has suggested the Proposal be in place for an initial 2-year period. Woodside has provided the draft Framework Agreement to YAC; they have advised that they will seek direction from the YAC Board on the proposal.	Woodside will continue following up with YAC on a monthly basis for at least six months, seeking to progress the Framework Agreement.
Robe River Kuruma Aboriginal Corporation (RRKAC)	RRKAC have noted that they are insufficiently resourced to engage further and respond to Woodside regarding EPs. Woodside assesses that a Framework Agreement could address this.	Woodside has on several occasions written to RRKAC offering to fund consultation meetings. Woodside will offer RRKAC a Framework Agreement which will propose funding, scope of work and timeframes to assist with consultation and ongoing consultation. If RRKAC are open to the proposal, it is intended to put forward a draft Framework Agreement to RRKAC within the next 2 months.	Woodside will follow up with RRKAC monthly for at least six months, seeking to progress a Framework Agreement.
Ngarluma Yindjibarndi Foundation Limited (NYFL)	NYFL and Woodside have an existing Agreement in place which enables quarterly communication about Woodside activities. NYFL has said they are working with other First Nations organisation and representative Bodies developing a Framework Agreement.	Woodside has not yet seen a draft of the Framework Agreement. Woodside's expectation is that it will outline principles of engagement, details of resourcing, timeframes to meet agreed outcomes etc. Woodside look forward to receiving a draft Agreement and will engage with NYFL to settle on the details of any proposal.	Woodside will continue to follow up monthly with NYFL for at least six months, seeking to progress a Framework Agreement.
Yindjibarndi Aboriginal Corporation	Yindjibarndi have advised that they are represented by NYFL for consultation on oil and gas matters. NYFL and Woodside have met to discuss the consultation framework to be used by NYFL as representatives of Yindjibarndi. Woodside will seek to use the Framework Agreement proposed by NYFL (above) for ongoing consultation with Yindjibarndi.	Per NYFL above.	Per NYFL above.
Kariyarra Aboriginal Corporation (KAC)	In September 2023 KAC proposed an agreement which would include meeting arrangements, ongoing consultations, specialist advice and contact protocols.	Woodside support funding request that are reasonable and will seek to reach agreement on a funding proposal put forward by KAC. Woodside agrees that a Framework Agreement is a sound tool to set out ongoing consultation with KAC, funding arrangements and social investment opportunities that KAC would want explored. Woodside will propose a first draft of an agreement and put to KAC in the	Woodside will continue to follow up monthly with KAC for at least six months, seeking to progress a Framework Agreement.

		first instance. Woodside will prepare a draft agreement within the next two months to for KAC's consideration.	
Bardi and Jawi Niimidiman Aboriginal Corporation (BJNAC)	In June 2023, BJNAC provided Woodside a draft resourcing protocol for consultation. Woodside noted that the draft protocol was drafted with a focus on land based activities that fall within the BJNAC native title determination, as opposed to offshore activities. In October 2023, BJNAC and Woodside met to review the resourcing protocol, which resulted in some small changes being agreed. BJNAC and Woodside agreed that both organisations were on the same page for ongoing consultation.	Woodside supports funding request that are reasonable.. Woodside agrees that the resourcing protocol is a sound tool to set out ongoing consultation with BJNAC, funding arrangements and employment, training and contracting opportunities that BJNAC want to explore. Woodside is awaiting BJNAC's revised protocol.	Woodside will continue to follow up monthly with BJNAC for at least six months, seeking to progress a Resourcing Protocol.
Karajarri Traditional Lands Association (KTLA)	.On 19 April 2023 and 2 May 2023, KTLA said they would seek funding support from Woodside and were developing paperwork/proposal for sending to Woodside.	Woodside supports funding requests that are reasonable. Woodside is awaiting KTLA's proposal.	Woodside will continue to follow up monthly with KTLA for at least six months, seeking to progress a Framework Agreement.

1. INTRODUCTION

1.1 OBJECTIVE

To provide guidance on the Australian regulatory framework as it applies to hydrocarbon spill response planning in Australian Commonwealth and State jurisdictions.

This document supports the implementation of mandates in the:

- Our Expectations - Hydrocarbon Spill
- Hydrocarbon Spill Planning Standard
- Hydrocarbon Spill Planning Work Instruction – Australia

1.2 APPLICABILITY

Anyone using, following, and applying the Hydrocarbon Spill Planning Work Instruction – Australia and for persons seeking to understand the Australia legislative framework.

2. LEGISLATIVE FRAMEWORK

Marine oil pollution emergency planning, together with supporting hydrocarbon response documents, is a requirement of an Environment Plan's (EP) implementation strategy. Woodside is required to meet the following applicable regulations and regulatory agencies, as appropriate to their statutory needs:

- National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA), in accordance with Regulation 22(3), Regulation 22(8) and Regulation 22(11) of the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations 2023 (Cth) (the OPGGS (E) Regulations), OPGGS (E) Regulations.
- Western Australian (WA) Department Mines, Petroleum and Exploration (DMPE), in accordance with the Petroleum and Geothermal Energy Resources (Environment) Regulations 2012 (WA).
- Commonwealth Department of Climate Change, Energy, the Environment and Water (DCCEEW) where the petroleum activity is required to satisfy a Ministerial Condition of approval.
- WA Department of Transport and Major Infrastructure (WA DTMI) as the Hazard Management Authority (HMA), in accordance with the Emergency Management Regulations 2006 (WA).
- Northern Territory Department of Environment, Parks and Water Security (NT DEPWS) as the HMA, in accordance with Section 9 of the Emergency Management Act 2013 and via the Territory Emergency Plan.
- Victorian Earth Resources Regulation (ERR) branch of the Department of Energy, Environment and Climate Action (DEECA) in accordance with the Victoria *Offshore Petroleum and Greenhouse Gas Storage Act 2010* and the Victoria *Offshore Petroleum and Greenhouse Gas Storage Regulations 2021*.

2.1 STATUTORY AND CONTROL AGENCY JURISDICTIONS

Woodside's facilities and permit areas are currently situated in Western Australian, Victorian, and Commonwealth waters. Depending on their location, these facilities and permit areas fall under various statutory jurisdictions[1] and nominated Control Agencies[2], as outlined in Table 1 and Figure 1 and Figure 2.

For oil and gas activities taking place in Commonwealth waters, the titleholder is the responsible Control Agency for all operational aspects of oil spill response. NOPSEMA is the jurisdictional authority with responsibility for regulating the titleholder's response to the incident (DISR, 2019).

2.1.1 Control Agency Transfer Protocols for Commonwealth Waters Response

In all instances of spills arising from Woodside's petroleum activities in Commonwealth waters, Woodside's response activities should be considered to be regulated by NOPSEMA and directed by the relevant activity-specific OPEP until such time as another control agency verifies its intention to stand up and assert control.

[1] A Statutory Authority is the agency with legislative responsibility to regulate the responsible party. The Statutory Authority oversees the response to hydrocarbon spills and may request the State or Commonwealth Control Agency to take control if deemed appropriate.

[2] The Control Agency is the agency assigned by legislation, administrative arrangements, or the relevant contingency plan to control response activities to a maritime environmental emergency. The Control Agency will have responsibility for appointing the Incident Controller (IC)

As a response grows in size and complexity, a range of other parties and agencies may become involved, either to meet legislative obligation or to provide support to a control agency. In all cases, for spills originating from Woodside assets and activities, Woodside will facilitate the provision of resources to the control agency for their use in mitigating the consequences of the spill.

The AMSA National Plan includes a guidance for change of control agencies to a third party and includes processes for:

- approval from the relevant jurisdiction, or relevant regulator within that jurisdiction
- planning for the transfer of control
- implementing a transfer arrangement.

The AMSA National Plan and supporting guidance (National plan supporting documents) provide for a jurisdiction to request that AMSA or another Control Agency assume operational control of an incident in exceptional circumstances.

Where a transfer of control is required, the Woodside Crisis Management Team Leader/ Corporate Incident Management Team Incident Commander will handover control in accordance with:

- the aforementioned guidance within the AMSA National Plan;
- the emergency and crisis management arrangements outlined in Section 5.5.2 and Section 5.5.3 of Woodside's Incident Management Team (Level 2) Guidance; and

in accordance with 'Transfer of Command' processes detailed in the Woodside Incident Management Handbook. The latest version of the incident action plan (IAP) will be shared with the external agency to assist the workflow.

2.1.2 Control Agency Transfer Protocols for State/Territory Waters/Shoreline Response

Where an incident arising from oil and gas activities impacts upon State or coastal waters, the relevant state or territory government may decide to assume the role of Control Agency (from the titleholder) for the elements of the response that take place within coastal waters and on the shoreline. Should this occur, there will be two Control Agencies, with the titleholder being the Control Agency for the response taking place in Commonwealth waters (under the guidance of NOPSEMA as jurisdictional authority – see Section 2.1) and the state or territory government as Control Agency for the response taking place in coastal waters.

Where a transfer of control is required, the Woodside Crisis Management Team Leader/ Corporate Incident Management Team Incident Commander will handover control in accordance with:

- the above guidance within the AMSA National Plan;
- the Incident Control Transfer Checklist (APPENDIX A) for incidents impacting Western Australia waters;
- the emergency and crisis management arrangements outlined in Section 5.5.2 and Section 5.5.3 of Woodside's Incident Management Team (Level 2) Guidance; and
- the 'Transfer of Command' processes detailed in the Woodside Incident Management Handbook.

The latest version of the incident action plan (IAP) will be shared with the external agency to assist the workflow.

The arrangements for incident control and handover of control to relevant Commonwealth/State/Territory agencies, if required, is shown Table 1.

Table 1: Statutory Authorities and Control Agencies relevant to Woodside activities

Location of Incident Response	Source	Statutory Authority	Control Agency[3]	
			Level 1	Level 2/Level 3
Commonwealth waters[4]	Offshore Petroleum Facility	NOPSEMA[5]	Titleholder (Woodside)	
	Shipping Sourced Spill	AMSA (& NOPSEMA)[6]	AMSA[7]

[3] The Control Agency may request support from government and oil spill response organisations.
[4] Beyond 3 nm of the State/Territory sea baseline.
[5] NOPSEMA does not have the legislative function to perform the Control Agency role.
[6] If the Ship is a facility.
[7] Woodside (Titleholder) and the vessel owner may provide first strike response capabilities in the event of a spill under the direction of the Control Agency
[8] Within 3 nm of the State/Territory sea baseline.
[9] Port Authority may be required to respond initially as ‘‘First Response/Controlling Agency’ under State/Territory Hazard Plan or Oil Spill Contingency Plan arrangements.
[10] The JDPA does not have a Statutory Authority. The ANP is a Designated Authority, which regulates operations within the KDPA on behalf of both Australia and Timor Leste. The ANP is a Designated Authority, which regulates operations within the KDPA on behalf of both Australia and Timor Leste.

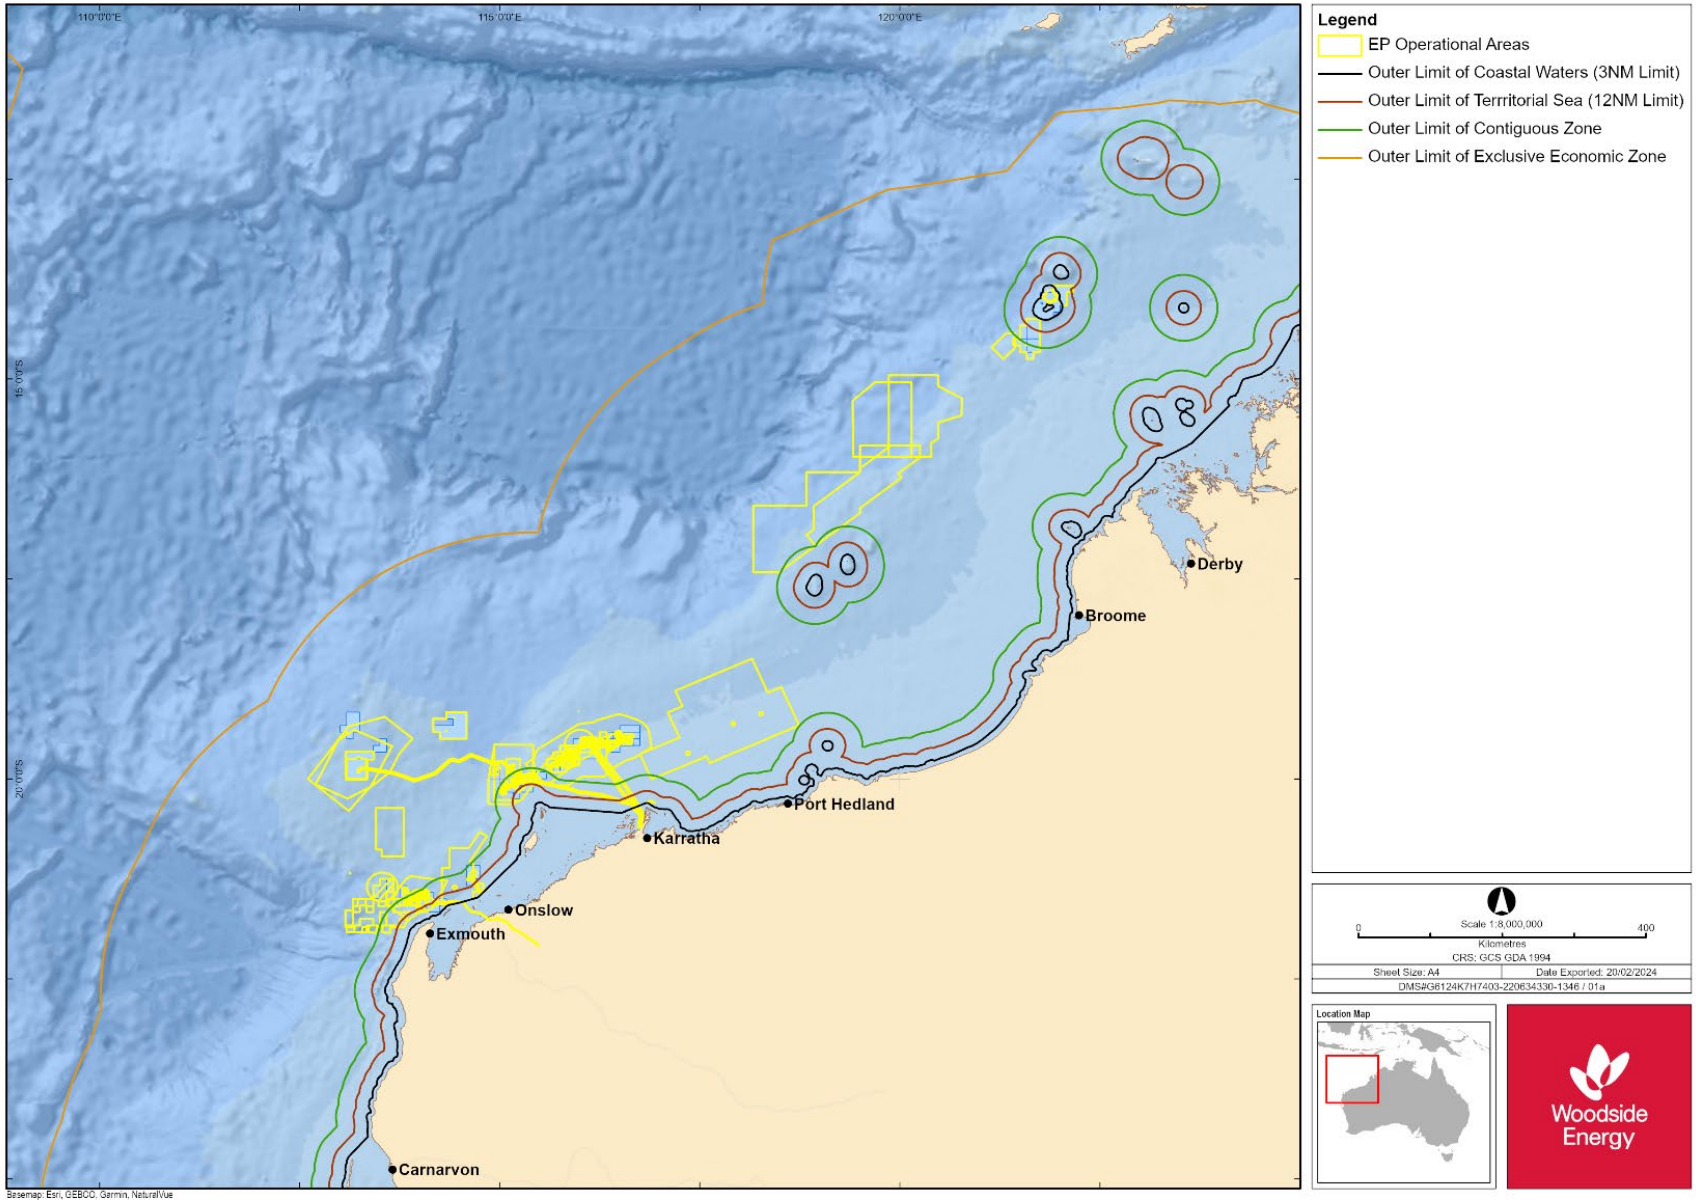

Figure 1: Western Australian oil pollution emergency jurisdictions in relation to key Woodside petroleum facilities

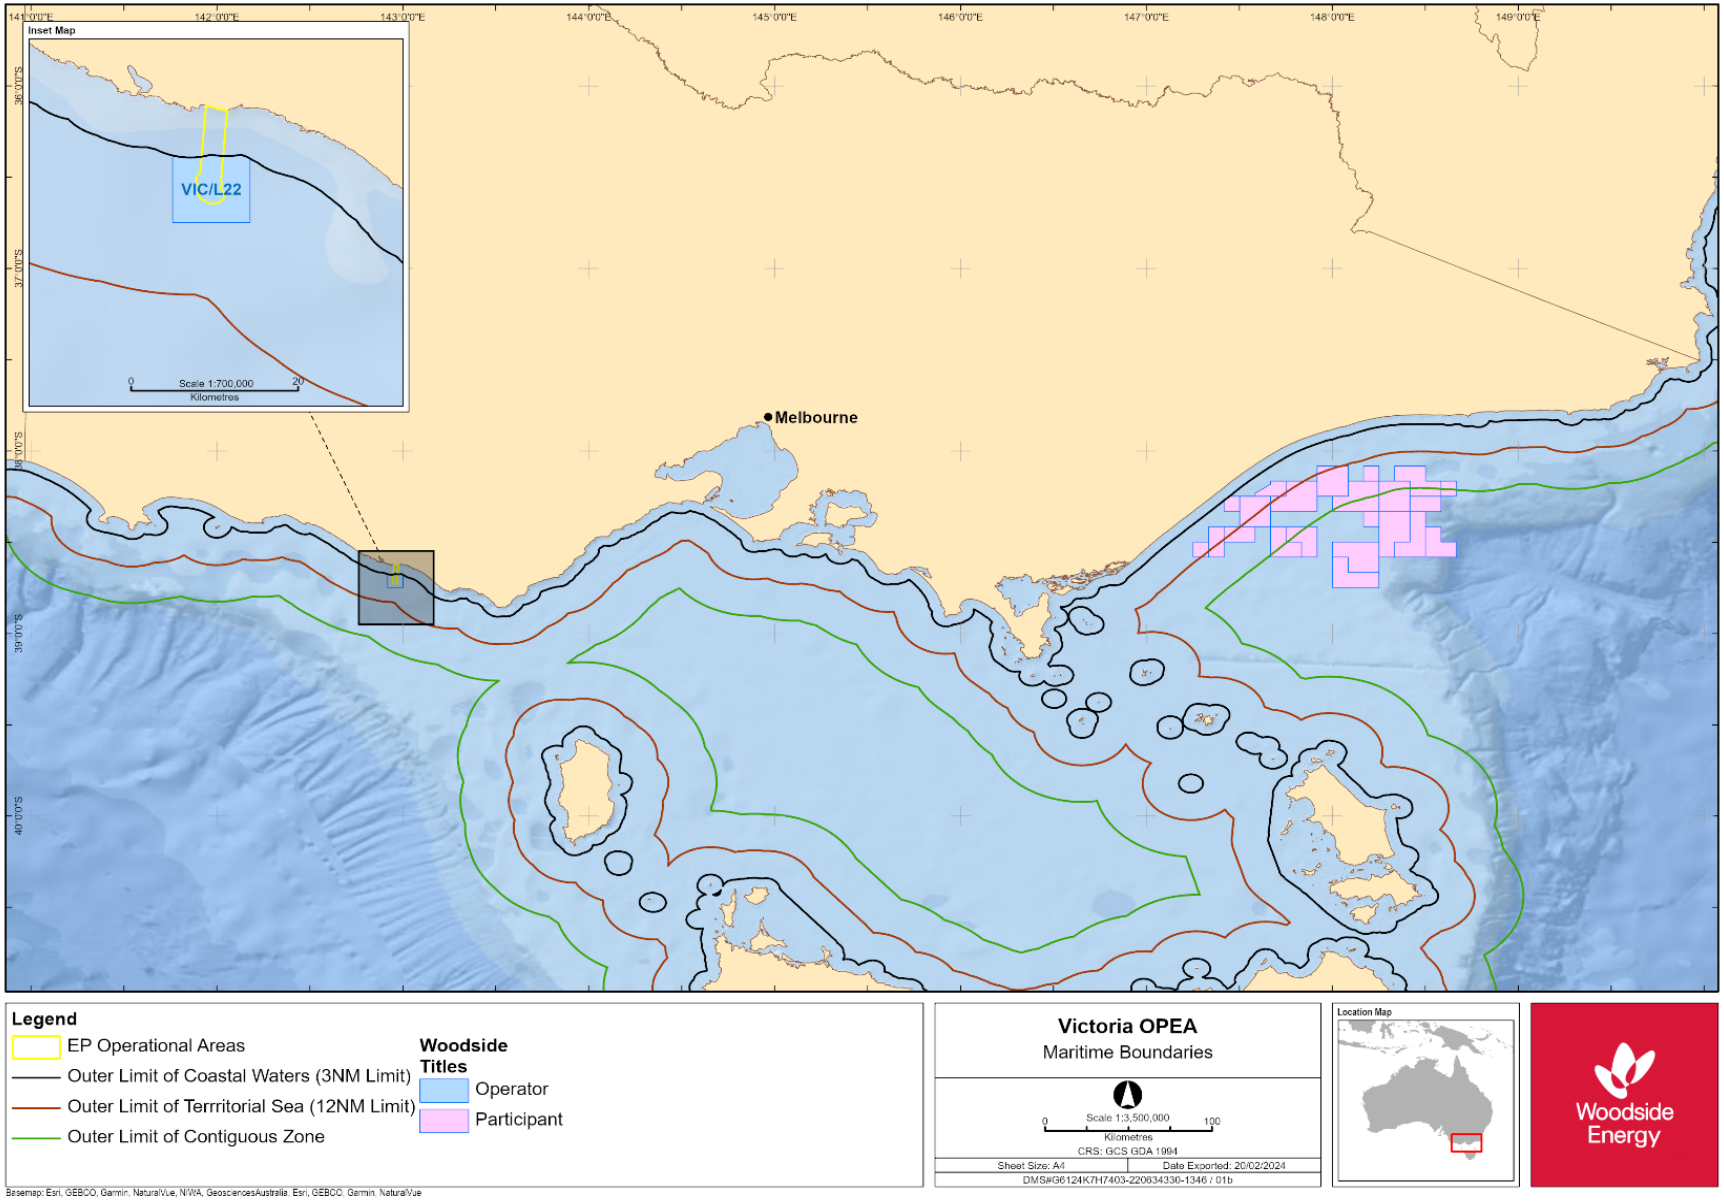

Figure 2: Victorian oil pollution emergency jurisdictions in relation to key Woodside petroleum facilities

2.2 INTERFACE WITH OTHER PLANS

Table 3 summarises how this document interfaces with the relevant hydrocarbon spill response plans of the Government and external agencies discussed within this section.

Table 2: Interface with other plans

Relevant Plans	Responsible Party	Main Content
National Plan for Maritime Environmental Emergencies (National Plan)	AMSA	The National Plan for Maritime Environmental Agencies provides a national system for responding promptly and effectively to marine pollution by hydrocarbons and other noxious and hazardous substances, by designating competent national and local authorities. The National Plan is responsible for maintaining: • a national contingency plan for preparedness and response • an adequate Level of pre-positioned marine pollution combat equipment and program for its use • a comprehensive national training program for personnel familiarisation • detailed state, local and industry contingency plans. The National Plan provides for AMSA to be the Australian Government's Control Agency in the event of vessel-based spills for the purposes of the National Plan.
State Hazard Plan: Maritime Environmental Emergencies (MEE)	WA DTMI	The State Hazard Plan for Maritime Environmental Emergencies (SHP-MEE) (the Plan) provides an overview of arrangements for the management of marine oil pollution and marine transport emergencies in Western Australia and contains information on prevention, preparedness, response and recovery. Collectively these two hazards are referred to as Maritime Environmental Emergencies. The Plan refers to a range of existing plans and documents relating to Maritime Environmental Emergencies but does not duplicate the information contained in these, instead providing directions to websites or other sources where further information can be obtained if required. The Director General, WA DTMI, is the Hazard Management Agency (HMA) for marine oil pollution and marine transport emergencies.
Broome Port Authority OSCP	BrPA	BrPA's OSCP is a sub-plan of the Port's ERP and is activated as the primary plan to combat pollution of the Port from oil. The ERP requires that all personnel who may be involved in the management of oil spills in the Port are conversant with the content of the National Plan. The current version of BrPA OSCP can be obtained from the BrPA Harbour Master.
Pilbara Ports' Port of Dampier Marine Pollution Contingency Plan	Pilbara Ports	The Pilbara Ports' Port of Dampier Emergency Response Plan (ERP) provides guidelines for actions to be taken during an emergency to minimise the potential for loss of life, injury to people, and damage to the environment and property by covering foreseeable incidents and outlining remediation. The latest versions of the Pilbara Ports' Port of Dampier ERP and the Marine Pollution Contingency Plan are available on the Emergency Preparedness and Response page of the Pilbara Ports' Port of Dampier website.
NT OSCP	NT DEPWS	NT DEPWS is responsible for the NT Oil Spill Contingency Plan, which supports the Territory Emergency Plan, and is the Hazard Management Agency (HMA) for marine oil pollution and marine transport emergencies.
Darwin Port Corporation Oil Spill Contingency Plan (DPC OSCP)	Darwin Port Corporation	The DPC OSCP sets out the response to spills of oil and hazardous and noxious substances within the Port of Darwin. This includes hydrocarbon spills from vessels or land based activities that enter Port waters. More information is available on the Emergency & Cyclone Plans page of the Darwin Port Authority website. The Port of Darwin Harbourmaster is the Incident Controller for all spills within the harbour.

Relevant Plans	Responsible Party	Main Content
AMOSPlan	AMOSC	AMOSPlan covers the spill response and training activities of AMOSC and the company- to- company mutual assistance arrangements administered by AMOSC. The AMOSPlan is underpinned by a Principal and Agency Agreement signed between AMOSC and each Participating Company that sets out the basis on which personnel and company-owned equipment can be loaned by each Company to AMOSC. A Master Services Contract is also signed between these parties. This contract also covers the entities of Member Companies. In the event that a company is involved in a hydrocarbon spill incident necessitating activation of its Contract, a supplementary Service Contract specifies the equipment and/or personnel to be hired. The specified equipment will vary depending on the nature and location of the oil spill incident. AMOSPlan is activated by a company when the response to an oil spill incident is regarded by the company as requiring resources beyond those of the company itself. The AMOSPlan also outlines the agreement between AMOSC and AMSA that enables AMSA to hire equipment and personnel from AMOSC on behalf of the National Plan. The AMOSPlan divides into several response regions with Mutual Aid Contacts (MACs) identified in each region.
Victorian State Emergency Management Plan (SEMP) State Maritime Emergencies (non-search and rescue)	Department of Energy, Environment and Climate Action (DEECA) Department of Transport and Major Infrastructure and Planning (DTP)	DEECA retains responsibility for titles administration, well integrity and environment within state water (located within 3 nautical miles of the Victorian coast). In accordance with the *Victorian Marine (Drug, Alcohol and Pollution Control) Act 1988 (the Act),* Emergency Management Act 2013 and the *Emergency Management Manual Victoria*, DTP is the control agency for marine pollution incidents in state waters, up to 3 NM offshore. The Maritime Emergencies (NSR) Subplan prescribes the emergency management arrangements for preparedness and response to marine pollution from vessel, offshore petroleum activities and other sources in state waters.

2.3 GOVERNMENT AND EXTERNAL AGENCIES

2.3.1 NOPSEMA

NOPSEMA is the Statutory Authority responsible for the oversight of response actions to pollution events from offshore petroleum activities in areas of Commonwealth jurisdiction. It administers the OPGGS (E) Regulations.

NOPSEMA has National Plan Statutory Responsibility for the offshore petroleum industry. During a spill incident, NOPSEMA's role will be to:

- Implement regulatory processes to monitor and secure compliance with the OPGGS(E) Regulations 2023 and the Offshore Petroleum and Greenhouse Gas Storage Act 2006 (Cth) (the OPGGS Act), including issuing directions as required.
- Investigate accidents, occurrences, and circumstances involving deficiencies in environment management as required.
- Provide management, operational, technical, and environmental advice, as required to the Titleholder.

Although NOPSEMA is the Statutory Authority for hydrocarbon spill incidents from offshore petroleum activities, it does not have the legislative capacity to undertake the role of Control Agency and, as such, the Titleholder remains responsible (as Control Agency) for all Levels of hydrocarbon spill incidents from offshore petroleum activities. NOPSEMA will, however, provide support for a whole-of-government approach to incident coordination by providing advice and issuing directions to Titleholders and/or operators during an offshore petroleum incident.

2.3.2 Australian Maritime Safety Authority (AMSA)

AMSA is the national shipping and maritime industry regulator and was established under the Australian Maritime Safety Authority Act 1990 (Cth). AMSA manages the National Plan to Combat Pollution of the Sea

by Oil and other Noxious and Hazardous Substances on behalf of the Australian Government, working with State and the Northern Territory governments, emergency services, and private industry to maximise Australia's marine pollution response capability[11]..

Legislatively, AMSA is responsible for protecting the marine environment from pollution from vessels and other environmental damage caused by vessels. AMSA functions are to:

- combat pollution in the marine environment
- provide a search and rescue service
- perform other functions conferred on it by or under any other Acts.

As part of this national plan, a National Response Team (NRT) and the National Response Support Team (NRST) were established to provide support to control agencies in the event of a major marine oil pollution incident.

Each State/Territory is to nominate to AMSA suitably qualified personnel to fill designated roles, including:

- Planning Officer
- Operations Officer
- Logistics Officer
- Response Team Leader.

Each of these roles is filled in each State/Territory as part of the NRT.

AMSA is to be notified immediately through the Rescue Coordination Centre (RCC) of all ship-sourced incidents. When AMSA is the Control Agency, AMSA will assume control of the incident and respond in accordance with the AMSA's Marine Pollution Response Plan. AMSA's Marine Pollution Response Plan is the operational response plan for the management of vessel-sourced spills (as per Section 8 of the Memorandum of Understanding between Woodside and AMSA). AMSA is Control Agency for hydrocarbon spills, as per Table 1.

Woodside will undertake first strike response on behalf of AMSA for vessel-sourced spills, in line with the relevant Oil Pollution First Strike Plan.

For marine pollution incidents from offshore petroleum facilities arising in Commonwealth Waters where Woodside is the Control Agency, Woodside would enact its hydrocarbon spill arrangements per the activity-specific Oil Pollution First Strike Plan. For events requiring regional or national level support AMSA, as managers of the National Plan, will coordinate the resources under its direct control. This may include technical and response advice, services, equipment, personnel and contractors.

2.3.2.1 National Plan

The National Plan implements Australia's obligations as a State Party under the United Nation's Convention on the Law of the Sea 1982, the International Convention on Oil Pollution Preparedness, Response and Cooperation 1990, and the Protocol on Preparedness, Response and Cooperation to Pollution Incidents by Hazardous and Noxious Substances (HNS) 2000. AMSA works with the State/Northern Territory governments, emergency services, and private industry to maintain Australia's marine pollution response capability. Central to this capability is the Inter-Governmental Agreement on the National Plan that outlines AMSA and State/Northern Territory Government responsibilities.

As part of the National Plan, a Marine Pollution Controller will be appointed to an incident. As outlined within the National Plan, the duties of the appointed Marine Pollution Controller may include:

- Assisting the Control Agency with strategic communications, including:
  - primary spokesperson for the multi-agency response
  - primary point of contact for the briefing of government(s).
- Providing the common operating picture and situational awareness at the strategic Level.
- Strategic coordination, including:
  - resolution of strategic multi-jurisdictional policy and legislative issues on behalf of the Control Agency

[11] http://www.amsa.gov.au/forms-and-publications/Publications/national_plan.pdf

- facilitating collaboration between all parties and resolving multi-jurisdictional-agency conflicts
- facilitating national and international assistance through the National Plan and Australian Emergency Management arrangements.

2.3.2.2 AMSA equipment

AMSA maintains strategic equipment stockpiles of marine pollution response equipment around the Australian coastline. Stocks of dispersant are stored at these stockpiles as well as other key locations. Woodside may request access to these resources via AMOSC.

2.3.3 Commonwealth Department of Climate Change, Energy, the Environment and Water (DCCEEW)

Under the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (the EPBC Act), actions that may have a significant impact on a matter of national environmental significance (MNES) require referral to the Australian Commonwealth Minister for Environment (the Minister). The Minister will decide whether assessment and approval is required under the EPBC Act.

Important for hydrocarbon spill response, an exemption from Part 3 of the EPBC Act was granted in March 2014 and remains in place for agencies acting in accordance with the National Plan. This exemption allows for the implementation of hydrocarbon spill response options, without the need for Part 3 approvals, provided that the actions taken are in accordance with the National Plan.

Although the use of chemical dispersant may be consistent with the National Plan, the dispersant type is required to be on the list of accepted National Plan Oil Spill Control Agents (OSCA list) or comply with the transitional arrangements for existing dispersants stocks accepted prior to 1 December 2012, in order for its use to be exempt from Part 3 of the EPBC Act.

An exemption from Part 13 of the EPBC Act was also granted in March 2014. Where response actions are taken in accordance with the National Plan, those actions are exempt from the Part 13 contraventions that would otherwise apply.

2.3.4 Port Authority Arrangements

Woodside operates out of several ports in the Australian states and territories. The Port Authorities house and maintain some oil spill equipment.

State/Territory authorities can also access the AMSA National Plan equipment for incident response if required.

Each Port Authority maintains its own OSCP as a subset of the State/Territory Plan. These plans are summarised in Table 3. Port Authorities may also be involved in the following tasks in relation to hydrocarbon spill preparedness:

- Operator training.
- Regular exercises (including deployment).
- Coordination of committees, such as quarterly meetings of the Dampier Port Authority Marine Oil Pollution (MOP) Committee of Port Users and the Regional Response Team, which is a collaboration between adjacent port authorities and ports (as defined by the Shipping and Pilotage Act 1967 (WA).
- Risk assessments.

2.3.4.1 AMOSC and AMOSPlan

AMOSC was established through the support of members of the Australian Institute of Petroleum (AIP), including Woodside. The Centre maintains a 24-hour stand-by status and can respond quickly to a major incident.

Arrangements between AMOSC and its participating members are outlined in a Master Services Contract signed between AMOSC and the participating Member Company. When activating AMOSC as a service (i.e. hydrocarbon spill response or training) a Service Contract is executed. Woodside also has contractual arrangements with the AMOSC to access the Australian Subsea First Response Toolkit (SFRT) equipment and dispersant stockpiles.

AMOSC administers the AMOSPlan, which outlines arrangements for mutual aid between members. Mutual aid support is available from the member companies of AMOSC and the AMOSC Core Group response team and may comprise response equipment and personnel employed by another AMOSC member company.

AMOSC Core Group members are a group highly skilled in the discipline of hydrocarbon spill response, which includes approximately 120 experienced member company personnel who can be made available to support and assist with spill response activities. The request for assistance is made directly between companies via each company-nominated Mutual Aid Contact (AMOSC should be consulted for the most up-to-date Mutual Aid Contacts). AMOSC will also activate the Service Contract of the lending company and will coordinate the signing of a Service Contract for the borrowing company or companies.

2.3.5 Western Australian Agency Arrangements and the WA Department of Transport and Major Infrastructure

The Emergency Management Act 2005 (WA) designates Agencies within the State as Statutory Authority for hazards. In Western Australia, the hazard management agency for Marine Oil Pollution is the WA DTMI.

Under the Act, the Statutory Authorities are required to produce and administer Plans for the hazards assigned to them.

They are responsible not only for the oversight of a response, but also for responding, should the party responsible for the spill not be able to control the situation.

For oil pollution to the marine environment in State waters/shorelines the WA DTMI has produced and administer the SHP-MEE.

In the event of a spill where Woodside is the responsible party and the spill may impact State waters/shorelines, Woodside will notify WA DTMI.

For all levels of spill in State waters/shorelines, WA DTMI is the Control Agency. WA DTMI will appoint an Incident Controller and form a separate Incident Management Team.

The WA DTMI coordinates the State Response Team (SRT). SRT is part of Western Australia's commitment to ensure the effective preparedness and response to marine pollution incidents. The SRT members are primarily frontline responders. Members of the team are from government agencies, port authorities, and industry, all of whom have a vested interest in marine oil pollution.

For any Level 2 or 3 Marine Oil Pollution (MOP) incident, Woodside will immediately notify WA DTMI and conduct initial response actions in State waters as directed and in accordance with the WA OSCP/ Oil Pollution Emergency Plan (OPEP). Woodside will continue to manage those operations at WA DTMI direction until formal incident control can be established by WA DTMI.

Initially, Woodside will be required to make available an appropriate number of suitably qualified persons to work in the WA DTMI Incident Management Team (IMT). WA DTMI's role as the Controlling Agency for spills in State waters/shorelines does not negate the requirement for Woodside to have appropriate plans and resources in place to adequately respond to a Marine Oil Spill incident in State waters/shorelines, or to commence the initial response actions to a spill prior to WA DTMI establishing incident control in line with the WA DTMI Offshore Petroleum Industry Guidance Note, Marine Oil Pollution: Response and Consultation Arrangements.

A list of roles and key duties for Woodside personnel working in the WA DTMI IMT and the response structure can be found in an approved Oil Pollution First Strike Plan on Corporate Hydrocarbon Spill SharePoint.

To assist WA DTMI in assuming formal incident control, the nominated WA DTMI Incident Controller will establish contact with the Woodside Incident Controller and work through the Controlling Agency Transfer Checklist at APPENDIX A.

Upon establishment of incident control by WA DTMI, Woodside will continue to provide planning and resources in accordance with their OSCP/OPEP. This will include response assets and contracts specified in the OSCP/OPEP, such as those pertaining to waste management, transport, and personnel, as well as response arrangements with the Australian Marine Oil Spill Centre (AMOSC) and other third-party responders.

In performing the Controlling Agency function, WA DTMI will use Woodside's approved/accepted OSCP/OPEP as a starting point for all aspects of a response. WA DTMI reserves the right to deviate from the OSCP/OPEP in circumstances where there is a justifiable cause, in consultation with Woodside.

By arrangement with WA DTMI, within designated port limits the relevant Port Authority is responsible for hydrocarbon spills in port waters.

In the case where a spill for which Woodside is responsible has, or will, enter State waters/shorelines, the WA DTMI will send a State Marine Pollution Coordinator (SMPC) Liaison Officer and a Media Liaison Officer to Woodside's CIMT. The role of the WA DTMI Liaison Officer will be to:

- Facilitate effective communications between WA DTMI's SMPC and Incident Controller and Woodside's appointed Crisis Management Team (CMT) Leader and CIMT Incident Commander.
- Provide enhanced situational awareness to WA DTMI of the incident and the potential impact on State waters.
- Assist in the provision of support from WA DTMI to Woodside.
- Facilitate the provision technical advice from WA DTMI to the Woodside Incident Controller as required.

Additional information on marine oil pollution coordination arrangements in WA State waters is included in Section 2.3.14.

2.3.6 WA Department of Water and Environment Regulation (DWER)

The DWER has responsibilities associated with State environmental regulation, approvals and appeals processes, and pollution prevention. The DWER primarily administers the Environmental Protection Act 1986 (WA).

The DWER's Pollution Response Unit has operational waste management responsibilities in accordance with the Environmental Protection Act 1986 (WA). This includes approving temporary waste storage areas. The DWER may send an Officer to a spill site and can provide an External Liaison role in Woodside's IMT.

The DWER Pollution Response Unit will be notified directly of any spill incident that requires temporary waste storage outside existing Woodside Lease boundaries.

2.3.7 WA Department of Biodiversity, Conservation and Attractions (DBCA)

The DBCA has responsibilities associated with wildlife and activities in national parks, reserves, and State marine parks.

The Biodiversity Conservation Act 2016 (WA) (which replaced the Wildlife Conservation Act 1950 (WA)) provides the Department of Parks and Wildlife (DPaW) with the responsibility and Statutory Authority to treat, protect, and destroy wildlife. The DPaW does not provide oiled wildlife operational response support. Industry is expected to have access to their own oiled wildlife capability.

DBCA, together with AMOSC, have developed the Western Australia Oiled Wildlife Response Plan (WAOWRP) and the Western Australia Oiled Wildlife Response Manual, which align with the SHP-MEE and address requirements for oiled wildlife response in both State and Commonwealth waters. The WAOWRP details the legislative responsibilities, relationships to other plans, roles and responsibilities, emergency management structure, and procedures for OWR.

2.3.8 Northern Territory Arrangements

Authority for the regulation of marine pollution, powers of investigation, and appointment of authorised officers in the Northern Territory (NT) is derived from the *Marine Pollution Act, 1999* (NT) (the Act). NT DEPWS is responsible for administering the Act.

The Territory Emergency Plan (TEP) describes the NT emergency management principles for response and recovery operations, and the control and coordination roles and responsibilities across multiple hazards.

The TEP is established by the *Emergency Management Act, 2013* (NT) (EM Act) and administered by the Department of Police, Fire and Emergency Services (PFES). Administrative authority for the TEP is held by the Territory Emergency Controller. The NT OSCP is listed as a hazard-specific emergency plan within the TEP.

NT DEPWS is the Hazard Management Authority and is responsible for maintaining currency of the NT OSCP and providing strategic oversight and technical advice for marine oil spill incidents.

Where Woodside believes a spill may cross into Territory coastal waters, Woodside will notify NT DEPWS.

2.3.9 Northern Territory Environment Protection Authority (NT EPA)

The NT EPA is an independent corporation established under the Northern Territory Environment Protection Act 2019. The NT EPA is responsible for regulatory services to provide for effective waste management, pollution control and sustainable practices. The NT EPA will be informed verbally and by email as soon as practicable via notification through a 24-hour pollution hotline and email, in the event of a hydrocarbon spill which is predicted to enter NT coastal waters.

2.3.10 Northern Territory Department of Environment, Parks and Water Security (NT DEPWS)

The NT DEPWS is the regulatory authority responsible for protecting the NT's environment and natural resources while providing advice and support to enable the responsible use and development of the Territory's land and waters within three nautical miles of the coastline. NT DEPWS will be responsible for wildlife response if a spill tracks towards NT coastal waters. NT DEPWS will also provide advice on waste management and clean-up of NT shorelines, if required.

2.3.11 Victorian Arrangements

In accordance with *Victorian Marine (Drug, Alcohol and Pollution Control) Act 1988* (the Act), *Emergency Management Act 2013* and the Emergency Management Manual Victoria, Department of Transport and Major Infrastructure and Planning (DTP) is the control agency for marine pollution incidents in state waters, up to three nautical miles offshore.

The State Controller Maritime Emergencies (SCME) has overall responsibility for ensuring there is an adequate response to a marine pollution incident in state waters; this includes marine pollution arising from a petroleum activity originating in either state or Commonwealth waters. In these circumstances, the provision of an adequate response will be primarily achieved through the coordinated employment of the titleholders' resources. Department of Energy, Environment and Climate Action (DEECA) retains responsibility for titles administration, well integrity, and environment within state waters.

In the event of a marine pollution incident originating in Commonwealth waters that impacts or threatens Victorian state waters, DTP assumes jurisdictional control for such incidents within coastal waters (only) from a state consequence management perspective.

2.3.12 Victoria Department of Transport and Major Infrastructure and Planning (DTP) & State Controller Maritime Emergencies (SCME)

The Victorian DTP is the regulatory authority responsible for Level 2 and Level 3 marine pollution incidents in coastal waters, up to three nautical miles from land.

The SCME has overall responsibility for ensuring there is an adequate response to a marine pollution incident in state waters; this includes marine pollution arising from a petroleum activity originating in either state or Commonwealth waters. During an actual or impending marine (petroleum) pollution incident in state waters, the SCME provides overall strategic management of the response and executive level support and guidance to the Incident Controller. DTP's Resilience and Emergency Coordination (REC) team assists the SCME and the DTP to fulfil their statutory obligations in response to a marine pollution incident in state waters.

2.3.13 Australian Government Coordination Arrangements for Maritime Environmental Emergencies

2.3.13.1 Purpose

The purpose of the Australian Government Coordination Arrangements for Maritime Environmental Emergencies (Coordination Arrangements) (NP-GUI-020) is to provide a framework for the coordination of Australian Government departments and agencies to respond to a maritime environmental emergency.

2.3.13.2 Objectives

The objectives of the Coordination Arrangements are to:

- provide whole-of-government management of maritime environmental emergencies
- establish the roles and responsibilities of Australian Government departments and agencies in the management of maritime environmental emergencies

- protect the strategic interests and reputation of the Australian Government
- provide for the effective and timely briefing, reporting and engagement across the Australian Government and to the community
- coordinate the commitment of the Australian Government's resources to combat a maritime environmental emergency.

2.3.13.3 Scope

Maritime Environmental Emergencies

The Coordination Arrangements apply to all maritime incidents as defined by the National Plan for Maritime Environmental Emergencies.

Geographic Scope

This includes incidents occurring:

- within the Commonwealth marine area
- on the High Seas or within the marine area of a neighbouring country and that has the potential to impact the interests of the Australian Government or
- within the jurisdiction of a state or the Northern Territory and has the potential to impact the interests of the Australian Government.

The Coordination Arrangements may also be applied through the National Plan within the jurisdiction of a state or Northern Territory for significant incidents that require the support of the Australian Government.

Relevant supporting and legal arrangements are detailed within Sections 1.4 and 1.5 of the Coordination Arrangements.

2.3.13.4 Governance

The Coordination Arrangements work within the governance arrangements of the National Plan for Maritime Environmental Emergencies (the National Plan). Under the National Plan, sit a number of Committees, including the Australian Government National Plan Committee (AGNPC), which is responsible for ensuring Australian Government departments and agencies are prepared to respond to maritime environmental emergencies. Figure 3 describes the Governance model.

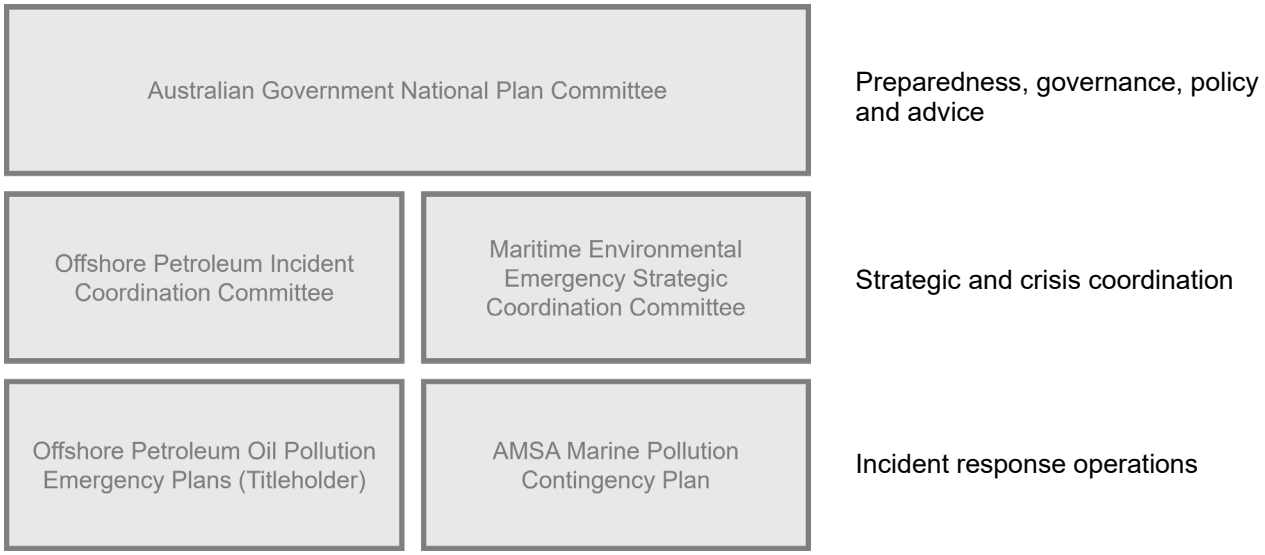

Figure 3: Governance model for the Australian Government Coordination Arrangements

2.3.13.5 Incident management

The Coordination Arrangements address three areas of response to a maritime environmental emergency:

- strategic and crisis coordination
- emergency response
- recovery.

They do not replace existing plans and response systems but help to draw them into a single coordinated framework.

2.3.13.6 Strategic Coordination

Strategic and crisis coordination, within the context of these Arrangements, refers to bringing together Australian Government departments and agencies to manage the strategic and reputational interests of the Government as well as effectively and efficiently resource operational responses to incidents where relevant. This may include:

Australian Government Crisis Management Framework – The Australian Government Crisis Management Framework (AGCMF) defines the Australian Government's approach to crisis management. The Framework outlines Ministers and senior official's roles and responsibilities when preparing for, responding to and recovering from crisis, and sets out the arrangements that link ministers and the work of key officials, committees and facilities. For a maritime environmental emergency, this Framework stipulates that the Australian Government Coordinating Agency will be the Department of Industry, Science and Resources (DISR). A key responsibility of this agency is harnessing capabilities and resources in line with coordination requirements from within the portfolio, and from other agencies when portfolio-managed options are insufficient which, for a maritime environmental emergency, may include requesting Australian Government (AMSA) support with National Plan resources if required.

Maritime Emergency Strategic Coordination Committee – A Maritime Emergency Strategic Coordination Committee (MESCC) may be formed in the event of a significant maritime incident involving a ship within the Commonwealth marine area, or where the Australian Government is supporting a state or Northern Territory under the National Plan arrangements. The MESCC is led by AMSA and is constituted by the membership of the AGNPC.

Offshore Petroleum Incident Coordination Committee – An Offshore Petroleum Incident Coordination Committee (OPICC) (see additional detail in Section 2.3.13.7) may be formed in the event of a significant offshore petroleum incident in Commonwealth waters, as set out in the AGCMF and Offshore Petroleum Incident Coordination Framework. OPICC draws together expertise and capability from across government to guide a coordinated Commonwealth Government strategic response to an offshore petroleum incident in Commonwealth waters. In these circumstances, DISR is the lead Commonwealth agency providing support to OPICC as the primary mechanism to facilitate coordinated strategic leadership.

Incidents involving offshore petroleum activities and ships – Offshore petroleum activities are regulated by the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). If an event occurs in Commonwealth waters that incorporates both a significant offshore petroleum incident and a maritime environmental emergency involving a ship, together DISR/ NOPSEMA and Department of Infrastructure, Transport, Regional Development, Communications, Sport and the Arts (DITRDCSA)/ AMSA will make an early decision on whether the OPICC will manage the Commonwealth Government's involvement and coordination, or the Maritime Emergency Strategic Coordination Committee will manage the incident.

Figure 4 outlines the AGCMF arrangements and the intersect with the MESCC and OPICC.

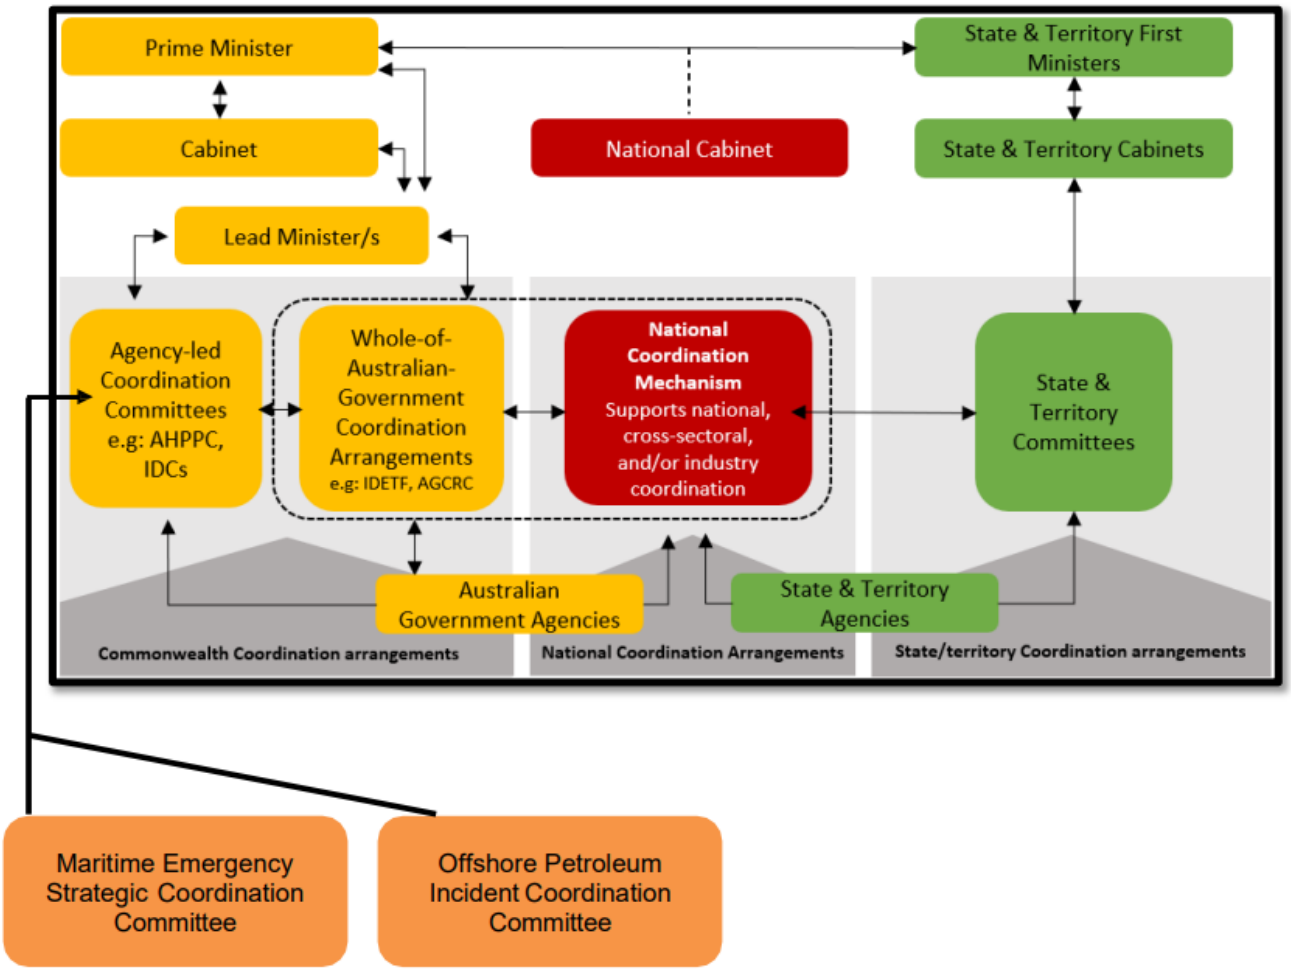

Figure 4: The Australian Government Crisis Management Framework and the intersect with the Maritime Emergency Strategic Coordination Committee and Offshore Petroleum Incident Coordination Committee[12]

2.3.13.7 Offshore Petroleum Incident Coordination Committee

The purpose of the Offshore Petroleum Incident Coordination Committee (OPICC) is to draw together expertise and capability from across government to guide a coordinated Commonwealth Government response to a significant offshore petroleum incident in Commonwealth waters. Significant Incident Arrangements are defined in the Offshore Petroleum Incident Coordination Framework.

The OPICC is not responsible for leading the operational response to an incident and does not have decision-making powers to allocate funding to any activities occurring in response to a significant incident

The OPICC has the following responsibilities:

- **Situational awareness**: provide an accurate and unified picture of the significant incident and the Commonwealth Government's, state and territory governments' and industry's capacity to respond
- **Advice**: inform and align advice to ministers, through portfolio agencies, on the status of the incident and possible response option
- **Public information**: ensure a coordinated approach to communications management to support consistent messaging
- **Leadership**: provide strategic direction from the Commonwealth Government during and following an incident
- **Assistance**: liaise with the titleholder to provide advice on Commonwealth Government capabilities and regulatory processes
- **Evaluation**: to monitor and evaluate the effectiveness of the OPICC's activities in relation to public and ministerial expectations

[12] Australian Government Coordination Arrangements for Maritime Environmental Emergencies (June 2024) (NP-GUI-020)

OPICC composition

The OPICC is activated by the Chair, the General Manager of the Offshore Strategy Branch, DISR.

Members include senior representatives from relevant Australian Government agencies, State/Territory Government(s) impacted or potentially impacted by the significant incident, and industry representatives where appropriate.

The composition of the OPICC may vary and will be determined by the Chair depending on the nature of the significant incident. Agencies central to the OPICC include:

- DISR (Chair)
- NOPSEMA
- AMSA
- DITRDCSA

Other agencies may be included in the OPICC as needed.

Trans-national incidents

In accordance with Coordination of International Incidents: Notification Arrangements Guidance (NP-GUI-007), in the event a pollution incident is affecting or is likely to affect another country, the Control Agency (in the case of pollution from a ship or unknown source) will contact the Department of Foreign Affairs and Trade (DFAT) as soon as practicable through the contact point advised by DFAT.

In the event a pollution incident originates from an offshore facility, DISR will contact DFAT as soon as practicable through the contact point advised by DFAT.

In relation to pollution of the marine environment occurring from petroleum activities in the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) in the Timor Sea:

a. The operator will inform the Autoridade Nacional do Petroleo (ANP) (as the Designated Authority for the JPDA, in its delegated capacity as the regulator on behalf of the Timor-Leste and Australian Governments) and may also inform the Australian Government.

b. If informed of such an incident, DISR will contact DFAT as soon as practicable.

c. Should DFAT become aware of such an incident, DFAT will notify DISR.

d. In the event that a pollution incident occurs within Australian waters and the pollution may spill into the JPDA, DISR, through the Australian Joint Commissioner, will notify the Timor-Leste Government through the Timorese Joint Commissioner, in addition to notifying DFAT.

Woodside's response operations across trans-national boundaries will be determined in conjunction with DFAT and in consultation with local authorities.

2.3.14 Western Australia Coordination Arrangements for Maritime Environmental Emergencies

Marine oil pollutions incidents originating from offshore petroleum activities that impact State Waters require a high level of coordination between WA DTMI (see Section 2.3.5), the Australian Government (see Section 2.3.13) and the respective Petroleum Titleholder. The interrelationships between Commonwealth, State/ Territory and industry are illustrated in Figure 5. Response by WA DTMI as HMA and Controlling Agency, and relevant obligations for the Petroleum Titleholder, are detailed in Section 2.3.5.

To facilitate effective coordination between the two Controlling Agencies and their respective IMT's, a Joint Strategic Coordination Committee (JSCC) will be established. The JSCC will be jointly chaired by the SMEEC and the Petroleum Titleholder's nominated Crisis Management Team (CMT) Leader and will comprise of individuals deemed necessary by the chairs to ensure an effective coordinated response across both jurisdictions. As the relevant Jurisdictional Authority in Commonwealth Waters, NOPSEMA may opt to participate in the JSCC as they see fit.

Key functions of the JSCC include:

- Ensuring that the key objectives set by multiple IMTs in relation to the marine oil pollution incident are consistent and focused on achieving an effective coordinated response.
- De-conflicting competing priorities between multiple IMTs.
- De-conflicting competing requests for resources between the multiple IMTs, including those managed by AMSA, such as national stockpile equipment, dispersant aircraft, and the National Response Team.

- Resolution of significant strategic issues as they arise during the incident response.
- Ensuring that there is a single shared understanding of the concept of operations for the response and resolution of any controversial actions.
- Ensuring that there is a shared understanding of the incident situation and its meaning among all key stakeholders.
- Ensuring there is agreement on how information is communicated to the public, particularly those issues that have actual or perceived public health implications.
- Ensuring adequate coordination and consistency is achieved in relation to access and interpretation of intelligence, information, and spill modelling to promote a common operating picture.

It is important to note that the JSCC is a committee, not a team operating from a specified location. The JSCC will be administered by the Controlling Agency.

In WA waters, the inaugural JSCC meeting will be convened by the SMPC, once both the Petroleum Titleholder and WA DTMI formally assume the role of Controlling Agency.

Additional information on the role of WA DTMI as Controlling Agency for spill arising in or impacting WA State waters is provided in Section 2.3.5.

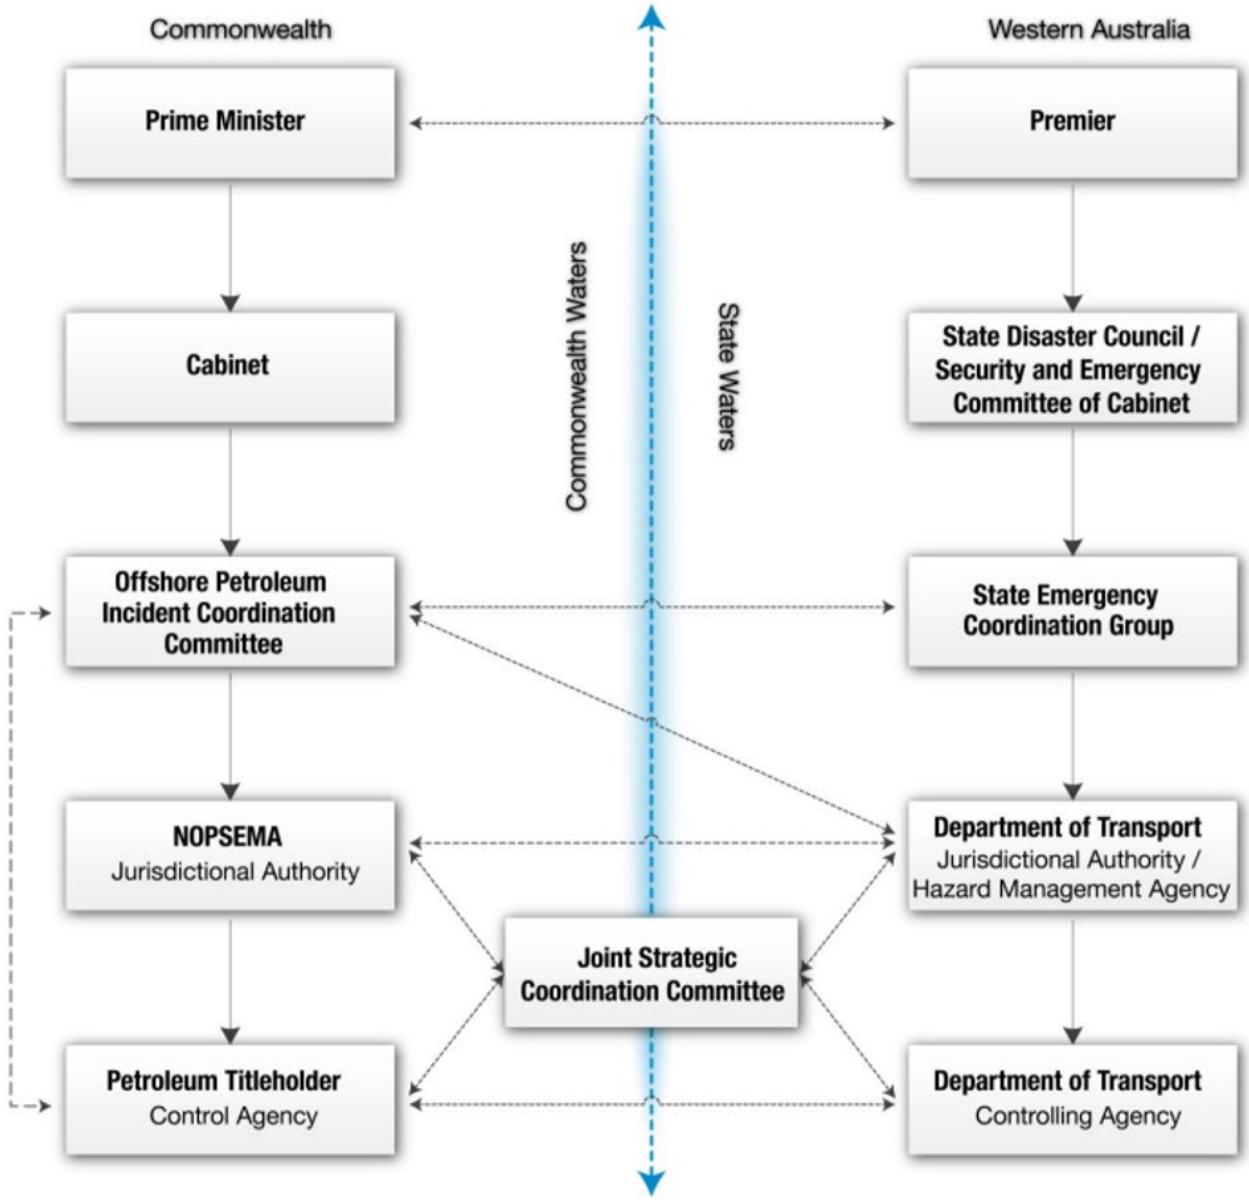

Figure 5: Overall Coordination Arrangements – Cross Jurisdiction[13]

[13] WA Department of Transport and Major Infrastructure Offshore Petroleum Industry Guidance Note - Marine Oil Pollution: Response and Consultation (July 2020)

APPENDIX A – WESTERN AUSTRALIA DEPARTMENT OF TRANSPORT AND MAJOR INFRASTRUCTURE INCIDENT CONTROL TRANSFER CHECKLIST

☐	Confirm date and time of formal transfer of Incident Control in State Waters
☐	Confirm respective Incident Controller lines of communication arrangements (including exchange of Liaison Officers in IMT.
☐	Confirm respective On-Scene Commander lines of communication arrangements (including exchange of Liaison Officers in FOB)
☐	Confirm the location of any Woodside FOB and Staging Areas.
☐	Confirm the details of all current response operations being conducted by Woodside in State Waters
☐	Confirm the composition and status of all response resources, both personnel and equipment, currently being controlled by Woodside that relate to response operations in State Waters.
☐	Confirm the composition and status of all response resources, both personnel and equipment that has been mobilised by Woodside and in transit to the spill site that will contribute to future response operations in State Waters.
☐	Confirm the composition and status of all response resources, both personnel and equipment that is in the process of being mobilised by Woodside to contribute to future response operations in State Waters.
☐	Confirm current level of incident and the predicted level in the future
☐	Confirm existence and adherence to an OPEP/OSCP and secure a copy for the relevant OPEP/OSCP plan, EP and OSMP.
☐	Secure a copy of the current Situation Report and incident prognosis.
☐	Secure a copy of the Product Material Safety Data Sheet (MSDS)
☐	Notification of significant Safety Risks
☐	Secure a copy of the latest spill trajectory modelling
☐	Secure a copy of the latest actual spill monitoring and surveillance information.
☐	Confirm GIS lines of communication arrangements
☐	Secure a copy of the current IAP as it relates to State Waters response operations specifically the details of all immediate and future response operations planned by Woodside in State waters.
☐	Secure a copy of the most recent media statements.
☐	Secure a summary of all community / stakeholder engagement activities undertaken to date and those planned in the immediate future that pertain to state waters impact.
☐	Confirm deployment of initial Woodside personnel to DoT IMT and DoT FOB
☐	Reconfirm date and time of formal transfer of Incident Control in State Waters
DoT Incident Controller_____ Date_____ Time_____

4. DEFINITIONS

Term	Meaning
Control Agency	The agency or company assigned by legislation, administrative arrangements or within the relevant contingency plan, to control response activities to a maritime environmental emergency.
First Strike	The prompt initial response to a spill by a Control Agency or on behalf of a control agency (i.e. by a Person in Charge (PIC) or Vessel Master) to protect the environment and is intended to limit the effect of an incident, until such time as other supporting resources can be deployed.
Support Agency	An agency or company that provides essential services, personnel, material or advice in support of the Control Agency during the response to a maritime environmental emergency.
Statutory Authority	An agency authorised by law to enforce legislation on behalf of the relevant country or state.

5. ABBREVIATIONS

Abbreviation	Term
AEP	Australian Energy Producers
AGCMF	Australian Government Crisis Management Framework
AGNPC	Australian Government National Plan Committee
AIP	Australian Institute of Petroleum
AMOSC	Australian Marine Oil Spill Centre
AMOSPlan	A voluntary oil industry mutual aid plan intended to supplement the National Plan, administered by Australian Institute of Petroleum through AMOSC.
AMSA	Australian Maritime Safety Authority
ANP	Autoridade Nacional do Petróleo e Minerais – Timor-Leste National Petroleum Authority (Designated Authority of the JPDA)
BrPA	Broome Port Authority
CIMT	Corporate Incident Management Team
CMT	Crisis Management Team
DBCA	Department of Biodiversity, Conservation and Attractions (Western Australia)
DEECA	Victorian Department of Energy, Environment and Climate Action
DEPWS	Northern Territory Department of Environment, Parks and Water Security
DISR	Department of Industry, Science and Resources
DITRDCSA	Department of Infrastructure, Transport, Regional Development, Communications, Sport and the Arts
