Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis atriceps Black-headed Sea Snake [1101]		Species or species habitat may occur within area
Hydrophis coggeri Cogger's Sea Snake [25925]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis hardwickii as Lapemis hardwickii Spine-bellied Sea Snake [93516]		Species or species habitat may occur within area
Hydrophis inornatus Plain Sea Snake [1107]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis platura as Pelamis platurus		
Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii		
Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Hydrophis zweiffei as Enhydrina schistosa		
Australian Beaked Sea Snake [93514]		Species or species habitat may occur within area
Lepidochelys olivacea		
Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Foraging, feeding or related behaviour known to occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera borealis		
Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus		
Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus		
Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis		
Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
[Feresa attenuata](#) Pygmy Killer Whale [61]		Species or species habitat may occur within area
[Globicephala macrorhynchus](#) Short-finned Pilot Whale [62]		Species or species habitat may occur within area
[Grampus griseus](#) Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
[Kogia breviceps](#) Pygmy Sperm Whale [57]		Species or species habitat may occur within area
[Kogia sima](#) Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
[Lagenodelphis hosei](#) Fraser's Dolphin, Sarawak Dolphin [41]		Species or species habitat may occur within area
[Megaptera novaeangliae](#) Humpback Whale [38]		Breeding known to occur within area
[Mesoplodon densirostris](#) Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
[Orcaella heinsohni](#) Australian Snubfin Dolphin [81322]		Breeding known to occur within area
[Orcinus orca](#) Killer Whale, Orca [46]		Species or species habitat may occur within area
[Peponocephala electra](#) Melon-headed Whale [47]		Species or species habitat may occur within area
[Physeter macrocephalus](#) Sperm Whale [59]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Sousa sahulensis Australian Humpback Dolphin [87942]	Breeding known to occur within area	
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]	Species or species habitat may occur within area	
Steno bredanensis Rough-toothed Dolphin [30]	Species or species habitat may occur within area	
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat likely to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]	Species or species habitat may occur within area	
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Ashmore Reef and Cartier Island and surrounding Commonwealth waters	North-west
Carbonate bank and terrace system of the Sahul Shelf	North-west
Continental Slope Demersal Fish Communities	North-west
Pinnacles of the Bonaparte Basin	North
Pinnacles of the Bonaparte Basin	North-west
Seringapatam Reef and Commonwealth waters in the Scott Reef Complex	North-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Dolphins		
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Breeding	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Calving	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Foraging	Known to occur
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Foraging (high density prey)	Known to occur

Scientific Name	Behaviour	Presence
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Resting	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Breeding	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Breeding	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Calving	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Calving	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging (high density prey)	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging (high density prey)	Likely to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Significant habitat	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Significant habitat - unknown behaviour	Likely to occur
Tursiops aduncus Indo-Pacific/Spotted Bottlenose Dolphin [68418]	Calving	Known to occur
Tursiops aduncus Indo-Pacific/Spotted Bottlenose Dolphin [68418]	Foraging	Known to occur
Dugong Dugong dugon Dugong [28]	Breeding	Known to occur

Scientific Name		Behaviour	Presence
Dugong dugon			
Dugong [28]	Calving	Known to occur	
Dugong dugon			
Dugong [28]	Foraging	Known to occur	
Dugong dugon			
Dugong [28]	Foraging (high density seagrass beds)		Known to occur
Dugong dugon			
Dugong [28]	Nursing	Known to occur	
Marine Turtles	Caretta caretta		
Loggerhead Turtle [1763]	Foraging	Known to occur	
Chelonia mydas			
Green Turtle [1765]	Foraging	Likely to occur	
Chelonia mydas			
Green Turtle [1765]	Foraging	Known to occur	
Chelonia mydas			
Green Turtle [1765]	Internesting buffer		Known to occur
Chelonia mydas			
Green Turtle [1765]	Internesting buffer		Likely to occur
Chelonia mydas			
Green Turtle [1765]	Mating	Likely to occur	
Chelonia mydas			
Green Turtle [1765]	Nesting	Known to occur	
Chelonia mydas			
Green Turtle [1765]	Nesting	Likely to occur	
Eretmochelys imbricata			
Hawksbill Turtle [1766]	Foraging	Likely to occur	
Eretmochelys imbricata			
Hawksbill Turtle [1766]	Internesting buffer		Likely to occur

Scientific Name	Behaviour	Presence
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting buffer	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Likely to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur
Seabirds Ardenna pacifica Wedge-tailed Shearwater [84292]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur
Fregata minor Greater Frigatebird [1013]	Breeding	Known to occur
Phaethon lepturus White-tailed Tropicbird [1014]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sternula albifrons sinensis Little Tern [82850]	Breeding	Known to occur
Sternula albifrons sinensis Little Tern [82850]	Resting	Known to occur

Scientific Name	Behaviour	Presence
Sula leucogaster Brown Booby [1022]	Breeding	Known to occur
Sula sula Red-footed Booby [1023]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Sharks Rhincodon typus Whale Shark [66680]	Foraging	Known to occur
Whales Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Distribution	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Foraging	Known to occur
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Migration	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Calving	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Migration	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Nursing	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Resting	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements
This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 11-Jul-2024 Summary

Details

Matters of NES

Other Matters Protected by the EPBC Act Extra Information

Caveat Acknowledgements

Figure 1: NMR PMST area

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	3
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	82
Listed Migratory Species:	82

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	6
Commonwealth Heritage Places:	None
Listed Marine Species:	145
Whales and Other Cetaceans:	25
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	21
Habitat Critical to the Survival of Marine Turtles:	5

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	25
Regional Forest Agreements:	None
Nationally Important Wetlands:	7
EPBC Act Referrals:	80
Key Ecological Features (Marine):	10
Biologically Important Areas:	26
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name Commonwealth Marine Areas (EPBC Act)

Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act)

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Erythrotriorchis radiatus Red Goshawk [942]	Endangered	Species or species habitat likely to occur within area
Erythrura gouldiae Gouldian Finch [413]	Endangered	Species or species habitat likely to occur within area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area
Falcunculus frontatus whitei Crested Shrike-tit (northern), Northern Shrike-tit [26013]	Vulnerable	Species or species habitat likely to occur within area
Gallinago hardwickii Latham's Snipe, Japanese Snipe [863]	Vulnerable	Species or species habitat may occur within area
Geophaps smithii smithii Partridge Pigeon (eastern) [64441]	Vulnerable	Species or species habitat known to occur within area
Hirundapus caudacutus White-throated Needletail [682]	Vulnerable	Species or species habitat may occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat likely to occur within area
Limosa lapponica baueri Nunivak Bar-tailed Godwit, Western Alaskan Bar-tailed Godwit [86380]	Endangered	Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Melanodryas cucullata melvillensis Tiwi Islands Hooded Robin, Hooded Robin (Tiwi Islands) [67092]	Critically Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat likely to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area
Probosciger aterrimus macgillivrayi Palm Cockatoo (Australian) [67033]	Vulnerable	Species or species habitat likely to occur within area
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Tyto novaehollandiae kimberli Masked Owl (northern) [26048]	Vulnerable	Species or species habitat known to occur within area
Tyto novaehollandiae melvillensis Tiwi Masked Owl, Tiwi Islands Masked Owl [26049]	Endangered	Species or species habitat known to occur within area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area
FISH		
Thunnus maccoyii Southern Bluefin Tuna [69402]	Conservation Dependent	Species or species habitat may occur within area
MAMMAL		
Antechinus bellus Fawn Antechinus [344]	Vulnerable	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Conilurus penicillatus Brush-tailed Rabbit-rat, Brush-tailed Tree-rat, Pakooma [132]	Vulnerable	Species or species habitat known to occur within area
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat known to occur within area
Hipposideros semoni Semon's Leaf-nosed Bat, Greater Wart-nosed Horseshoe-bat [180]	Vulnerable	Species or species habitat may occur within area
Isoodon auratus auratus Golden Bandicoot (mainland) [66665]	Vulnerable	Species or species habitat known to occur within area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat likely to occur within area
Mesembriomys gouldii gouldii Black-footed Tree-rat (Kimberley and mainland Northern Territory), Djintamoonga, Manbul [87618]	Endangered	Species or species habitat likely to occur within area
Mesembriomys gouldii melvillensis Black-footed Tree-rat (Melville Island) [87619]	Vulnerable	Species or species habitat known to occur within area
Mesembriomys gouldii rattoides Black-footed Tree-rat (north Queensland), Shaggy Rabbit-rat [87620]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Notomys aquilo Northern Hopping-mouse, Woorrentinta [123]	Endangered	Species or species habitat may occur within area
Petrogale concinna canescens Nabarlek (Top End) [87606]	Endangered	Species or species habitat may occur within area
Phascogale pirata Northern Brush-tailed Phascogale [82954]	Vulnerable	Species or species habitat likely to occur within area
Rhinolophus robertsi Large-eared Horseshoe Bat, Greater Large-eared Horseshoe Bat [87639]	Vulnerable	Species or species habitat may occur within area
Saccolaimus saccolaimus nudicluniatus Bare-rumped Sheath-tailed Bat, Bare-rumped Sheathtail Bat [66889]	Vulnerable	Species or species habitat likely to occur within area
Sminthopsis butleri Butler's Dunnart [302]	Vulnerable	Species or species habitat known to occur within area
Trichosurus vulpecula arnhemensis Northern Brushtail Possum [83091]	Vulnerable	Species or species habitat known to occur within area
Xeromys myoides Water Mouse, False Water Rat, Yirrkoo [66]	Vulnerable	Species or species habitat known to occur within area
PLANT		
Bruguiera x hainesii Haines's Orange Mangrove [91351]	Critically Endangered	Species or species habitat may occur within area
Burmannia championii listed as Burmannia sp. Bathurst Island (R.Fensham 1021) [93461] Endangered (listed as Burmannia sp. Bathurst Island		Species or species habitat likely to occur within area
Calophyllum bicolor [11371]	Vulnerable	Species or species habitat may occur within area

Cooktown Orchid [10306]	Vulnerable	Species or species habitat likely to occur within area
[Dendrobium carronii listed as Cepobaculum carronii](#)		
an orchid [10822]	Vulnerable	Species or species habitat likely to occur within area
[Dendrobium johannis](#)		
Chocolate Tea Tree Orchid [13585]	Vulnerable	Species or species habitat likely to occur within area
[Elaeocarpus miegei](#)		
[65147]	Endangered	Species or species habitat may occur within area
[Tarennoidea wallichii](#)		
[65173]	Endangered	Species or species habitat likely to occur within area
[Typhonium jonesii](#)		
a herb [62412]	Endangered	Species or species habitat likely to occur within area
[Typhonium mirabile](#)		
a herb [79227]	Endangered	Species or species habitat likely to occur within area
[Vappodes phalaenopsis](#)		
Cooktown Orchid [78894]	Vulnerable	Species or species habitat likely to occur within area
[Xylopia monosperma](#)		
a shrub [82030]	Endangered	Species or species habitat likely to occur within area
REPTILE		
[Acanthophis hawkei](#)		
Plains Death Adder [83821]	Vulnerable	Species or species habitat likely to occur within area
[Aipysurus apraefrontalis](#)		
Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area

within area

Scientific Name	Threatened Category	Presence Text
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Cryptoblepharus gurrmul Arafura Snake-eyed Skink [83106]	Endangered	Species or species habitat known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Congregation or aggregation known to occur within area
Egernia rugosa Yakka Skink [1420]	Vulnerable	Species or species habitat may occur within area
Elseya lavarackorum Gulf Snapping Turtle [67197]	Endangered	Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Breeding known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Tiliqua scincoides intermedia Northern Blue-tongued Skink [89838]	Critically Endangered	Species or species habitat likely to occur within area
Varanus mertensi Mertens' Water Monitor, Mertens's Water Monitor [1568]	Endangered	Species or species habitat likely to occur within area
Varanus mitchelli Mitchell's Water Monitor [1569]	Critically Endangered	Species or species habitat likely to occur within area

SHARK

Scientific Name	Threatened Category	Presence Text
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Glyphis garricki Northern River Shark, New Guinea River Shark [82454]	Endangered	Species or species habitat known to occur within area
Glyphis glyphis Speartooth Shark [82453]	Critically Endangered	Species or species habitat known to occur within area
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat known to occur within area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
Anous stolidus Common Noddy [825]	Foraging, feeding or related behaviour known to occur within area	
Apus pacificus Fork-tailed Swift [678]	Species or species habitat likely to occur within area	

Scientific Name	Threatened Category	Presence Text
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat known to occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Breeding known to occur within area
Onychoprion anaethetus Bridled Tern [82845]		Breeding known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat may occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sterna sumatrana Black-naped Tern [800]		Breeding known to occur within area
Sternula albifrons Little Tern [82849]		Breeding known to occur within area
Sula leucogaster Brown Booby [1022]		Breeding known to occur within area
Migratory Marine Species	Anoxypristis cuspidata Narrow Sawfish, Knifetooth Sawfish [68448]	Species or species habitat known to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat may occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Congregation or aggregation known to occur within area
Dugong dugon Dugong [28]		Species or species habitat known to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
[Isurus paucus](#) Longfin Mako [82947]		Species or species habitat likely to occur within area
[Lepidochelys olivacea](#) Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area

Sousa sahulensis as Sousa chinensis
Australian Humpback Dolphin [87942] Breeding known to occur within area

Tursiops aduncus (Arafura/Timor Sea populations)
Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900] Species or species habitat known to occur within area

Migratory Terrestrial Species Cecropis daurica
Red-rumped Swallow [80610] Species or species habitat known to occur within area

Cuculus optatus
Oriental Cuckoo, Horsfield's Cuckoo [86651] Species or species habitat may occur within area

Hirundapus caudacutus
White-throated Needletail [682] Vulnerable Species or species habitat may occur within area

Hirundo rustica
Barn Swallow [662] Species or species habitat may occur within area

Monarcha melanopsis
Black-faced Monarch [609] Species or species habitat may occur within area

Motacilla cinerea
Grey Wagtail [642] Species or species habitat may occur within area

Motacilla flava
Yellow Wagtail [644] Species or species habitat likely to occur within area

Myiagra cyanoleuca
Satin Flycatcher [612] Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Rhipidura rufifrons		
Rufous Fantail [592]		Species or species habitat likely to occur within area
Symposiachrus trivirgatus as Monarcha trivirgatus		
Spectacled Monarch [83946]		Species or species habitat known to occur within area
Migratory Wetlands Species	Acrocephalus orientalis	
Oriental Reed-Warbler [59570]		Species or species habitat may occur within area
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Arenaria interpres		
Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Calidris acuminata		
Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris alba		
Sanderling [875]		Roosting known to occur within area
Calidris canutus		
Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris melanotos		
Pectoral Sandpiper [858]		Species or species habitat likely to occur within area
Calidris ruficollis		
Red-necked Stint [860]		Roosting known to occur within area
Calidris tenuirostris		
Great Knot [862]	Vulnerable	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Roosting may occur within area
Gallinago hardwickii Latham's Snipe, Japanese Snipe [863]	Vulnerable	Species or species habitat may occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area
Glareola maldivarum Oriental Pratincole [840]		Roosting may occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat likely to occur within area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Pandion haliaetus Osprey [952]		Species or species habitat known to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area
Thalasseus bergii Greater Crested Tern [83000]		Breeding known to occur within area
Tringa brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Commonwealth Land Name	State
Attorney-General - Australian Government Solicitor

Chalcites osculans as Chrysococcyx osculans Black-eared Cuckoo [83425]		Species or species habitat likely to occur within area overfly marine area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Charadrius ruficapillus Red-capped Plover [881]		Roosting known to occur within area

overfly marine area

Charadrius veredus Oriental Plover, Oriental Dotterel [882]	Roosting may occur within area overfly marine area	
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Breeding known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Breeding known to occur within area
Gallinago hardwickii Latham's Snipe, Japanese Snipe [863]	Vulnerable	Species or species habitat may occur within area overfly marine area
Gallinago megala Swinhoe's Snipe [864]	Roosting likely to occur within area overfly marine area	
Gallinago stenura Pin-tailed Snipe [841]	Roosting likely to occur within area overfly marine area	
Glareola maldivarum Oriental Pratincole [840]	Roosting may occur within area overfly marine area	
Haliaeetus leucogaster White-bellied Sea-Eagle [943]	Species or species habitat known to occur within area	
Himantopus himantopus Pied Stilt, Black-winged Stilt [870]	Roosting known to occur within area overfly marine area	
Hirundapus caudacutus White-throated Needletail [682]	Vulnerable	Species or species habitat may occur within area overfly

marine area

Scientific Name	Threatened Category	Presence Text
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area overfly marine area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area overfly marine area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat likely to occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area overfly marine area
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Monarcha melanopsis Black-faced Monarch [609]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area
Motacilla flava Yellow Wagtail [644]		Species or species habitat likely to occur within area overfly marine area
Myiagra cyanoleuca Satin Flycatcher [612]		Species or species habitat likely to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting known to occur within area overfly marine area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Pandion haliaetus Osprey [952]		Species or species habitat known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat may occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area overfly marine area
Rhipidura rufifrons Rufous Fantail [592]		Species or species habitat likely to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area overfly marine area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Sterna sumatrana Black-naped Tern [800]		Breeding known to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Breeding known to occur within area
Stiltia isabella Australian Pratincole [818]		Roosting known to occur within area overfly marine area
Sula leucogaster Brown Booby [1022]		Breeding known to occur within area
Symposiachrus trivirgatus as Monarcha trivirgatus Spectacled Monarch [83946]		Species or species habitat known to occur within area overfly marine area
Thalasseus bengalensis as Sterna bengalensis Lesser Crested Tern [66546]		Breeding known to occur within area
Thalasseus bergii as Sterna bergii Greater Crested Tern [83000]		Breeding known to occur within area
Tringa brevipes as Heteroscelus brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area overfly marine area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area overfly marine area
Fish Acentronura tentaculata Shortpouch Pygmy Pipehorse [66187]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Bhanotia fasciolata Corrugated Pipefish, Barbed Pipefish [66188]		Species or species habitat may occur within area
Campichthys tricarinatus Three-keel Pipefish [66192]	Species or species habitat may occur within area	
Choeroichthys brachysoma Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]	Species or species habitat may occur within area	
Corythoichthys amplexus Fijian Banded Pipefish, Brown-banded Pipefish [66199]		Species or species habitat may occur within area
Corythoichthys flavofasciatus Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
Corythoichthys haematopterus Reef-top Pipefish [66201]	Species or species habitat may occur within area	
Corythoichthys intestinalis Australian Messmate Pipefish, Banded Pipefish [66202]		Species or species habitat may occur within area
Corythoichthys ocellatus Orange-spotted Pipefish, Ocellated Pipefish [66203]		Species or species habitat may occur within area
Corythoichthys schultzi Schultz's Pipefish [66205]	Species or species habitat may occur within area	
Cosmocampus banneri Roughridge Pipefish [66206]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Cosmocampus maxweberi Maxweber's Pipefish [66209]	Species or species habitat may occur within area	
Doryrhamphus dactyliophorus Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Festucalex cinctus Girdled Pipefish [66214]	Species or species habitat may occur within area	
Filicampus tigris Tiger Pipefish [66217]	Species or species habitat may occur within area	
Halicampus brocki Brock's Pipefish [66219]	Species or species habitat may occur within area	
Halicampus dunckeri Red-hair Pipefish, Duncker's Pipefish [66220]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]	Species or species habitat may occur within area	
Halicampus macrorhynchus Whiskered Pipefish, Ornate Pipefish [66222]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area
Hippichthys cyanospilos Blue-speckled Pipefish, Blue-spotted Pipefish [66228]		Species or species habitat may occur within area
Hippichthys heptagonus Madura Pipefish, Reticulated Freshwater Pipefish [66229]		Species or species habitat may occur within area
Hippichthys parvicarinatus Short-keel Pipefish, Short-keeled Pipefish [66230]		Species or species habitat may occur within area
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippichthys spicifer Belly-barred Pipefish, Banded Freshwater Pipefish [66232]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area
Hippocampus zebra Zebra Seahorse [66241]		Species or species habitat may occur within area
Micrognathus brevirostris thorntail Pipefish, Thorn-tailed Pipefish [66254]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Microphis brachyurus Short-tail Pipefish, Short-tailed River Pipefish [66257]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammal		

Scientific Name	Threatened Category	Presence Text
Dugong dugon		
Dugong [28]	Species or species habitat known to occur within area	
Reptile Aipysurus apraefrontalis		
Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area
Aipysurus duboisii		
Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area
Aipysurus laevis		
Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area
Aipysurus mosaicus as Aipysurus eydouxii		
Mosaic Sea Snake [87261]	Species or species habitat may occur within area	
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus johnstoni		
Freshwater Crocodile, Johnston's Crocodile, Johnstone's Crocodile [1773]		Species or species habitat may occur within area
Crocodylus porosus		
Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat likely to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Congregation or aggregation known to occur within area
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis atriceps Black-headed Sea Snake [1101]	Species or species habitat may occur within area	
Hydrophis caerulescens Dwarf Sea Snake [1103]	Species or species habitat may occur within area	
Hydrophis coggeri Cogger's Sea Snake [25925]	Species or species habitat may occur within area	
Hydrophis czeblukovi Fine-spined Sea Snake [59233]	Species or species habitat may occur within area	
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis hardwickii as Lapemis hardwickii Spine-bellied Sea Snake [93516]	Species or species habitat may occur within area	
Hydrophis inornatus Plain Sea Snake [1107]	Species or species habitat may occur within area	
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]	Species or species habitat may occur within area	
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis melanosoma Black-banded Robust Sea Snake [1109]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis pacificus Pacific Sea Snake, Large-headed Sea Snake [1112]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Hydrophis vorisi Estuarine Sea Snake [25927]		Species or species habitat may occur within area
Hydrophis zweiffei as Enhydrina schistosa Australian Beaked Sea Snake [93514]		Species or species habitat may occur within area
Laticauda colubrina Yellow-lipped Sea Krait [1092]		Species or species habitat may occur within area
Laticauda laticaudata a sea krait [1093]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Lepidochelys olivacea Olive Ridley Turtle, Pacific Ridley Turtle [1767]	Endangered	Breeding known to occur within area
Microcephalophis gracilis as Hydrophis gracilis Graceful Small-headed Sea Snake, Slender Sea Snake [87375]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Parahydrophis mertoni Arafura Smooth Sea Snake, Northern Mangrove Sea Snake [1090]		Species or species habitat may occur within area

Whales and Other Cetaceans [Resource Information]

Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Species or species habitat likely to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]		Species or species habitat known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Sousa sahulensis Australian Humpback Dolphin [87942]		Breeding known to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Carbonate bank and terrace system of the Sahul Shelf	North-west
Carbonate bank and terrace system of the Van Diemen Rise	North
Gulf of Carpentaria basin	North
Gulf of Carpentaria coastal zone	North
Pinnacles of the Bonaparte Basin	North-west
Pinnacles of the Bonaparte Basin	North
Plateaux and saddle north-west of the Wellesley Islands	North
Shelf break and slope of the Arafura Shelf	North
Submerged coral reefs of the Gulf of Carpentaria	North
Tributary Canyons of the Arafura Depression	North

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Dolphins		
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Breeding	Known to occur
Sousa chinensis Indo-Pacific Humpback Dolphin [50]	Foraging	Likely to occur
Tursiops aduncus Indo-Pacific/Spotted Bottlenose Dolphin [68418]	Breeding	Likely to occur
Marine Turtles	Caretta caretta	
Loggerhead Turtle [1763]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Foraging	Likely to occur
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting	Likely to occur
Dermochelys coriacea Leatherback Turtle [1768]	Internesting	Likely to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting	Likely to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Likely to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Foraging	Known to occur
Lepidochelys olivacea Olive Ridley Turtle [1767]	Internesting	Likely to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting	Likely to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Seabirds		

Scientific Name	Behaviour	Presence
Anous stolidus Common Noddy [825]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Breeding	Known to occur
Fregata ariel Lesser Frigatebird [1012]	Foraging	Likely to occur
Onychoprion anaethetus Bridled Tern [82845]	Breeding	Known to occur
Onychoprion anaethetus Bridled Tern [82845]	Breeding (high numbers)	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding (high numbers)	Known to occur
Sula leucogaster Brown Booby [1022]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Thalasseus bergii Crested Tern [83000]	Breeding	Known to occur
Thalasseus bergii Crested Tern [83000]	Breeding (high numbers)	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 10-Jun-2024 Summary

Details

Matters of NES

Other Matters Protected by the EPBC Act Extra Information

Caveat Acknowledgements

Figure 1: SWMR PMST sub area 1 (labelled '2')

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	3
Wetlands of International Importance (Ramsar	6
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	3
Listed Threatened Ecological Communities:	9
Listed Threatened Species:	141
Listed Migratory Species:	84

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	240
Commonwealth Heritage Places:	4
Listed Marine Species:	123
Whales and Other Cetaceans:	39
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	29
Habitat Critical to the Survival of Marine Turtles:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	63
Regional Forest Agreements:	1
Nationally Important Wetlands:	5
EPBC Act Referrals:	131
Key Ecological Features (Marine):	11
Biologically Important Areas:	33
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

World Heritage Properties [Resource Information]

Name	State	Legal Status
Australian Convict Sites (Fremantle Prison)	WA	Declared property

National Heritage Places [Resource Information]

Name	State	Legal Status
Historic		
Fremantle Prison (former)	WA	Listed place
Indigenous		
Cheetup Rock Shelter	WA	Listed place
Natural		
Fitzgerald River National Park	WA	Listed place

Wetlands of International Importance (Ramsar Wetlands) [Resource Information]

Ramsar Site Name	Proximity
Becher point wetlands	Within Ramsar site
Forrestdale and thomsons lakes	Within 10km of Ramsar site
Lake gore	Within Ramsar site
Lake warden system	Within 10km of Ramsar site
Peel-yalgorup system	Within Ramsar site
Vasse-wonnerup system	Within Ramsar site

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act)

Listed Threatened Ecological Communities [Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.
Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.

Community Name	Threatened Category	Presence Text
Aquatic Root Mat Community 3 in Caves of the Leeuwin Naturaliste Ridge	Endangered	Community known to occur within area
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Empodisma peatlands of southwestern Australia	Endangered	Community likely to occur within area
Honeymyrtle shrubland on limestone ridges of the Swan Coastal Plain Bioregion	Critically Endangered	Community likely to occur within area
Proteaceae Dominated Kwongkan Shrublands of the Southeast Coastal Floristic Province of Western Australia	Endangered	Community likely to occur within area
Sedgelands in Holocene dune swales of the southern Swan Coastal Plain	Endangered	Community known to occur within area
Subtropical and Temperate Coastal Saltmarsh	Vulnerable	Community likely to occur within area
Thrombolite (microbial) community of coastal freshwater lakes of the Swan Coastal Plain (Lake Richmond)	Endangered	Community known to occur within area
Tuart (Eucalyptus gomphocephala) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Anous tenuirostris melanops Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area
Aphelocephala leucopsis Southern Whiteface [529]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna grisea Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Atrichornis clamosus Noisy Scrub-bird, Tjimiluk [654]	Endangered	Species or species habitat known to occur within area
Botaurus poiciloptilus Australasian Bittern [1001]	Endangered	Species or species habitat known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris tenuirostris Great Knot [862]	Vulnerable	Roosting known to occur within area
Calyptorhynchus banksii naso Forest Red-tailed Black-Cockatoo, Karrak [67034]	Vulnerable	Species or species habitat known to occur within area
Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978]	Vulnerable	Breeding known to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area
Charadrius mongolus Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Dasyornis longirostris Western Bristlebird [515]	Endangered	Species or species habitat known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area
Halobaena caerulea Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area
Leipoa ocellata Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Pachyptila turtur subantarctica Fairy Prion (southern) [64445]	Vulnerable	Species or species habitat known to occur within area
Pezoporus flaviventris Western Ground Parrot, Kyloring [84650]	Critically Endangered	Species or species habitat may occur within area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat known to occur within area
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area
Psophodes nigrogularis nigrogularis Western Heath Whipbird [64449]	Endangered	Species or species habitat known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area
Sternula nereis nereis Australian Fairy Tern [82950]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area
Thalassarche chrysostoma Grey-headed Albatross [66491]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area
Zanda baudinii listed as Calyptorhynchus baudinii Baudin's Cockatoo, Baudin's Black-Cockatoo, Long-billed Black-cockatoo [87736]	Endangered	Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Zanda latirostris listed as Calyptorhynchus latirostris		
Carnaby's Black Cockatoo, Short-billed Black-cockatoo [87737]	Endangered	Breeding known to occur within area
CRUSTACEAN		
Engaewa pseudoreducta		
Margaret River Burrowing Crayfish [82674]	Critically Endangered	Species or species habitat may occur within area
Engaewa reducta		
Dunsborough Burrowing Crayfish [82675]	Critically Endangered	Species or species habitat may occur within area
FISH		
Galaxias truttaceus (Western Australian population)		
Western Trout Minnow [89857]	Endangered	Species or species habitat known to occur within area
Galaxiella nigrostriata		
Blackstriped Dwarf Galaxias, Black-stripe Minnow [88677]	Endangered	Species or species habitat known to occur within area
Hoplostethus atlanticus		
Orange Roughy, Deep-sea Perch, Red Roughy [68455]	Conservation Dependent	Species or species habitat likely to occur within area
Nannatherina balstoni		
Balston's Pygmy Perch [66698]	Vulnerable	Species or species habitat known to occur within area
Thunnus maccoyii		
Southern Bluefin Tuna [69402]	Conservation Dependent	Species or species habitat known to occur within area
INSECT		
Hesperocolletes douglasi		
Douglas' Broad-headed Bee, Rottnest Bee [66734]	Critically Endangered	Species or species habitat may occur within area
Trioza barrettae		
Banksia brownii plant louse [87805]	Endangered	Species or species habitat known to occur within area
MAMMAL		

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Bettongia penicillata ogilbyi Woylie [66844]	Endangered	Species or species habitat known to occur within area
Dasyurus geoffroii Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat known to occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat may occur within area
Myrmecobius fasciatus Numbat [294]	Endangered	Species or species habitat may occur within area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Parantechinus apicalis Dibbler [313]	Endangered	Species or species habitat known to occur within area
Petrogale lateralis hacketti Recherche Rock-wallaby [66849]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Petrogale lateralis lateralis Black-flanked Rock-wallaby, Mororong, Black-footed Rock Wallaby [66647]	Endangered	Translocated population known to occur within area
Phascogale calura Red-tailed Phascogale, Red-tailed Wambenger, Kenngoor [316]	Vulnerable	Species or species habitat may occur within area
Potorous gilbertii Gilbert's Potoroo, Ngilkat [66642]	Critically Endangered	Species or species habitat known to occur within area
Pseudocheirus occidentalis Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Breeding known to occur within area
Pseudomys shortridgei Heath Mouse, Dayang, Heath Rat [77]	Endangered	Species or species habitat likely to occur within area
Setonix brachyurus Quokka [229]	Vulnerable	Species or species habitat known to occur within area
OTHER		
Westralunio carteri Carter's Freshwater Mussel, Freshwater Mussel [86266]	Vulnerable	Species or species habitat known to occur within area
PLANT		
Adenanthos dobagii Fitzgerald Woollybush [21253]	Endangered	Species or species habitat likely to occur within area
Adenanthos ellipticus Oval-leaf Adenanthos [4570]	Vulnerable	Species or species habitat likely to occur within area
Andersonia gracilis Slender Andersonia [14470]	Endangered	Species or species habitat may occur within area
Andersonia pinaster Two Peoples Bay Andersonia [67444]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Anigozanthos bicolor subsp. minor Little Kangaroo Paw, Two-coloured Kangaroo Paw, Small Two-colour Kangaroo Paw [21241]	Endangered	Species or species habitat likely to occur within area
Banksia brownii Brown's Banksia, Feather-leaved Banksia [8277]	Critically Endangered	Species or species habitat known to occur within area
Banksia nivea subsp. uliginosa Swamp Honeypot [82766]	Endangered	Species or species habitat may occur within area
Banksia squarrosa subsp. argillacea Whicher Range Dryandra [82769]	Vulnerable	Species or species habitat likely to occur within area
Banksia verticillata Granite Banksia, Albany Banksia, River Banksia [8333]	Vulnerable	Species or species habitat known to occur within area
Boronia clavata Bremer Boronia [5538]	Endangered	Species or species habitat may occur within area
Brachyscias verecundus Ironstone Brachyscias [81321]	Critically Endangered	Species or species habitat may occur within area
Caladenia busselliana Bussell's Spider-orchid [24369]	Endangered	Species or species habitat likely to occur within area
Caladenia caesarea subsp. maritima Cape Spider-orchid [64856]	Endangered	Species or species habitat known to occur within area
Caladenia excelsa Giant Spider-orchid [56717]	Endangered	Species or species habitat likely to occur within area
Caladenia granitora [65292]	Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Caladenia harringtoniae Harrington's Spider-orchid, Pink Spider-orchid [56786]	Vulnerable	Species or species habitat may occur within area
Caladenia huegelii King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid [7309]	Endangered	Species or species habitat known to occur within area
Caladenia lodgeana Lodge's Spider-orchid [68664]	Critically Endangered	Species or species habitat likely to occur within area
Caladenia procera Carbunup King Spider Orchid [68679]	Critically Endangered	Species or species habitat known to occur within area
Caladenia viridescens Dunsborough Spider-orchid [56776]	Endangered	Species or species habitat known to occur within area
Calectasia cyanea Blue Tinsel Lily [7669]	Critically Endangered	Species or species habitat likely to occur within area
Chamelaucium lullfitzii listed as Chamelaucium sp. Gingin (N.G.Marchant 6) Gingin Wax [92777]	Endangered (listed as Chamelaucium sp. Gingin	Species or species habitat likely to occur within area
Chamelaucium sp. S coastal plain (R.D.Royce 4872) Royce's Waxflower [87814]	Vulnerable	Species or species habitat likely to occur within area
Chordifex abortivus Manypeaks Rush [64868]	Endangered	Species or species habitat likely to occur within area
Commersonia apella Many-flowered Commersonia [86877]	Critically Endangered	Species or species habitat known to occur within area
Coopernookia georgei Mauve Coopernookia [21218]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Daviesia obovata Paddle-leaf Daviesia [17311]	Endangered	Species or species habitat likely to occur within area
Diuris drummondii Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat likely to occur within area
Diuris micrantha Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat known to occur within area
Diuris purdiei Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat may occur within area
Drakaea elastica Glossy-leafed Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat likely to occur within area
Drakaea micrantha Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat likely to occur within area
Eucalyptus argutifolia Yanchep Mallee, Wabling Hill Mallee [24263]	Vulnerable	Species or species habitat may occur within area
Eucalyptus insularis Twin Peak Island Mallee [3057]	Endangered	Species or species habitat likely to occur within area
Eucalyptus x phylacis Meelup Mallee [87817]	Endangered	Species or species habitat known to occur within area
Gastrolobium papilio Butterfly-leaved Gastrolobium [78415]	Endangered	Species or species habitat may occur within area
Grevillea elongata Ironstone Grevillea [64578]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Grevillea infundibularis Fan-leaf Grevillea [5772]	Endangered	Species or species habitat likely to occur within area
Isopogon uncinatus Albany Cone Bush, Hook-leaf Isopogon [20871]	Endangered	Species or species habitat likely to occur within area
Kennedia glabrata Northcliffe Kennedia [16452]	Vulnerable	Species or species habitat known to occur within area
Lambertia echinata subsp. echinata Prickly Honeysuckle [56729]	Endangered	Species or species habitat known to occur within area
Lambertia echinata subsp. occidentalis Western Prickly Honeysuckle [64528]	Endangered	Species or species habitat may occur within area
Morelotia australiensis listed as Tetraria australiensis Southern Tetraria [92784]	Vulnerable	Species or species habitat may occur within area
Petrophile latericola Laterite Petrophile [64532]	Endangered	Species or species habitat may occur within area
Phaius australis Lesser Swamp-orchid [5872]	Endangered	Species or species habitat may occur within area
Reedia spathacea Reedia [2995]	Critically Endangered	Species or species habitat may occur within area
Ricinocarpos trichophorus Barrens Wedding Bush [19931]	Endangered	Species or species habitat may occur within area
Sphenotoma drummondii Mountain Paper-heath [21160]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Stylidium galioides		
Yellow Mountain Triggerplant [4666]	Vulnerable	Species or species habitat may occur within area
Synaphea sp. Fairbridge Farm (D.Papenfus 696)		
Selena's Synaphea [82881]	Critically Endangered	Species or species habitat may occur within area
Verticordia crebra		
[55678]	Vulnerable	Species or species habitat likely to occur within area
Verticordia densiflora var. pedunculata		
Long-stalked Featherflower [55689]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. ananeotes		
Tufted Plumed Featherflower [23871]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. vassensis		
Vasse Featherflower [55804]	Endangered	Species or species habitat may occur within area
Wurmbea calcicola		
Naturaliste Nancy [64691]	Endangered	Species or species habitat known to occur within area
REPTILE		
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur

Scientific Name	Threatened Category	Presence Text
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

SHARK

Carcharias taurus (west coast population) Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Centrophorus uyato Little Gulper Shark [68446]	Conservation Dependent	Species or species habitat likely to occur within area
Galeorhinus galeus School Shark, Eastern School Shark, Snapper Shark, Tope, Soupfin Shark [68453]	Conservation Dependent	Species or species habitat may occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Onychoprion anaethetus
Bridled Tern [82845] Breeding known to occur within area

Phaethon rubricauda
Red-tailed Tropicbird [994] Breeding known to occur within area

Phoebetria fusca
Sooty Albatross [1075] Vulnerable Species or species habitat likely to occur within area

Sterna dougallii
Roseate Tern [817] Breeding known to occur within area

Sternula albifrons
Little Tern [82849] Species or species habitat may occur within area

Thalassarche carteri
Indian Yellow-nosed Albatross [64464] Vulnerable Species or species habitat likely to occur within area

Thalassarche cauta
Shy Albatross [89224] Endangered Foraging, feeding or related behaviour likely to occur within area

Thalassarche chrysostoma
Grey-headed Albatross [66491] Endangered Species or species habitat may occur within area

Thalassarche impavida
Campbell Albatross, Campbell Black-browed Albatross [64459] Vulnerable Species or species habitat may occur within area

Thalassarche melanophris
Black-browed Albatross [66472] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Lagenorhynchus obscurus Dusky Dolphin [43]		Species or species habitat likely to occur within area
Lamna nasus Porbeagle, Mackerel Shark [83288]		Species or species habitat likely to occur within area
Megaptera novaeangliae Humpback Whale [38]		Foraging, feeding or related behaviour known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
[Physeter macrocephalus](#) Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
[Rhincodon typus](#) Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Migratory Terrestrial Species [Motacilla cinerea](#) Grey Wagtail [642]	Species or species habitat known to occur within area	
Migratory Wetlands Species [Actitis hypoleucos](#) Common Sandpiper [59309]		Species or species habitat known to occur within area
[Arenaria interpres](#) Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
[Calidris acuminata](#) Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
[Calidris alba](#) Sanderling [875]		Roosting known to occur within area
[Calidris canutus](#) Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
[Calidris ferruginea](#) Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
[Calidris melanotos](#) Pectoral Sandpiper [858]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris pugnax as Philomachus pugnax Ruff [91256]		Roosting known to occur within area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Gallinago megala
Swinhoe's Snipe [864] Roosting likely to occur within area

Gallinago stenura
Pin-tailed Snipe [841] Roosting likely to occur within area

Glareola maldivarum
Oriental Pratincole [840] Species or species habitat known to occur within area

Limicola falcinellus
Broad-billed Sandpiper [842] Roosting known to occur within area

Limosa lapponica
Bar-tailed Godwit [844] Species or species habitat known to occur within area

Limosa limosa
Black-tailed Godwit [845] Endangered Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area

Numenius minutus
Little Curlew, Little Whimbrel [848] Roosting likely to occur within area

Numenius phaeopus
Whimbrel [849]Roosting known to occur within area

Pandion haliaetus
Osprey [952] Breeding known to occur within area

Phalaropus lobatus
Red-necked Phalarope [838] Roosting known to occur within area

Pluvialis fulva
Pacific Golden Plover [25545] Roosting known to occur within area

Pluvialis squatarola
Grey Plover [865] Vulnerable Roosting known to occur within area

Thalasseus bergii
Greater Crested Tern [83000] Breeding known to occur within area

Tringa brevipes
Grey-tailed Tattler [851] Roosting known to occur within area

Tringa glareola
Wood Sandpiper [829] Roosting known to occur within area

Tringa nebularia
Common Greenshank, Greenshank Endangered Species or species habitat known to occur within area [832]

Tringa stagnatilis
Marsh Sandpiper, Little Greenshank Roosting known to occur within area [833]

Tringa totanus
Common Redshank, Redshank [835] Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Xenus cinereus		
Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Listed Marine Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Bird		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus		
Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops		
Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea as Puffinus griseus Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris as Puffinus tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris alba Sanderling [875]		Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text

Calidris melanotos
Pectoral Sandpiper [858] Species or species habitat known to occur within area overfly marine area

Calidris pugnax as Philomachus pugnax
Ruff [91256] Roosting known to occur within area overfly marine area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area overfly marine area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area overfly marine area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area overfly marine area

Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978] Vulnerable Breeding known to occur within area overfly marine area

Chalcites osculans as Chrysococcyx osculans
Black-eared Cuckoo [83425] Species or species habitat likely to occur within area overfly marine area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area overfly marine area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Charadrius ruficapillus
Red-capped Plover [881] Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]	Breeding known to occur within area	
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Eudyptula minor Little Penguin [1085]		Breeding known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area overfly marine area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area overfly marine area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
Halobaena caerulea Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area
Himantopus himantopus Pied Stilt, Black-winged Stilt [870]		Roosting known to occur within area overfly marine area
Hydroprogne caspia as Sterna caspia Caspian Tern [808]		Breeding known to occur within area
Larus dominicanus Kelp Gull [809]		Breeding known to occur within area
Larus pacificus Pacific Gull [811]		Breeding known to occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area overfly marine area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat known to occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area overfly marine area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pachyptila turtur Fairy Prion [1066]		Species or species habitat known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pelagodroma marina White-faced Storm-Petrel [1016]		Breeding known to occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Phalacrocorax fuscescens Black-faced Cormorant [59660]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Phalaropus lobatus Red-necked Phalarope [838]		Roosting known to occur within area
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area
Pterodroma macroptera Great-winged Petrel [1035]		Breeding known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Puffinus assimilis Little Shearwater [59363]		Breeding known to occur within area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area overfly marine area
Stercorarius antarcticus as Catharacta skua Brown Skua [85039]		Species or species habitat may occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Sternula nereis as Sterna nereis Fairy Tern [82949]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area
Thalassarche chrysostoma Grey-headed Albatross [66491]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Thalasseus bergii as Sterna bergii Greater Crested Tern [83000]		Breeding known to occur within area
Thinornis cucullatus as Thinornis rubricollis Hooded Plover, Hooded Dotterel [87735]		Species or species habitat known to occur within area overfly marine area
Tringa brevipes as Heteroscelus brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola Wood Sandpiper [829]		Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area overfly marine area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area
Tringa totanus Common Redshank, Redshank [835]		Roosting known to occur within area overfly marine area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area overfly marine area
Fish Acentronura australe Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area
Campichthys galei Gale's Pipefish [66191]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Heraldia nocturna Upside-down Pipefish, Eastern Upside-down Pipefish, Eastern Upside-down Pipefish [66227]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus breviceps Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus subelongatus West Australian Seahorse [66722]	Species or species habitat may occur within area	
Histiogamphelus cristatus Rhino Pipefish, Macleay's Crested Pipefish, Ring-back Pipefish [66243]		Species or species habitat may occur within area
Leptoichthys fistularius Brushtail Pipefish [66248]	Species or species habitat may occur within area	
Lissocampus caudalis Australian Smooth Pipefish, Smooth Pipefish [66249]		Species or species habitat may occur within area
Lissocampus fatiloquus Prophet's Pipefish [66250]	Species or species habitat may occur within area	
Lissocampus runa Javelin Pipefish [66251]	Species or species habitat may occur within area	
Maroubra perserrata Sawtooth Pipefish [66252]	Species or species habitat may occur within area	
Mitotichthys meraculus Western Crested Pipefish [66259]	Species or species habitat may occur within area	
Nannocampus subosseus Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area
Notiocampus ruber Red Pipefish [66265]	Species or species habitat may occur within area	
Phycodurus eques Leafy Seadragon [66267]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Phyllopteryx taeniolatus Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area
Pugnaso curtirostris Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Stigmatopora argus Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area
Stigmatopora nigra Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Urocampus carinirostris Hairy Pipefish [66282]		Species or species habitat may occur within area
Vanacampus margaritifer Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area
Vanacampus phillipi Port Phillip Pipefish [66284]		Species or species habitat may occur within area
Vanacampus poecilolaemus Longsnout Pipefish, Australian Long- snout Pipefish, Long-snouted Pipefish [66285]		Species or species habitat may occur within area
Mammal Arctocephalus forsteri Long-nosed Fur-seal, New Zealand Fur-seal [20]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Reptile Aipysurus pooleorum Shark Bay Sea Snake [66061]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Berardius arnuxii Arnoux's Beaked Whale [70]		Species or species habitat may occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Globicephala melas Long-finned Pilot Whale [59282]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area

Hyperoodon planifrons
Southern Bottlenose Whale [71] Species or species habitat may occur within area

Kogia breviceps
Pygmy Sperm Whale [57] Species or species habitat may occur within area

Kogia sima
Dwarf Sperm Whale [85043] Species or species habitat may occur within area

Lagenorhynchus obscurus
Dusky Dolphin [43] Species or species habitat likely to occur within area

Lissodelphis peronii
Southern Right Whale Dolphin [44] Species or species habitat may occur within area

Megaptera novaeangliae
Humpback Whale [38] Foraging, feeding or related behaviour known to occur within area

Mesoplodon bowdoini
Andrew's Beaked Whale [73] Species or species habitat may occur within area

Mesoplodon densirostris Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
Mesoplodon ginkgodens Gingko-toothed Beaked Whale, Gingko-toothed Whale, Gingko Beaked Whale [59564]		Species or species habitat may occur within area
Mesoplodon grayi Gray's Beaked Whale, Scamperdown Whale [75]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Mesoplodon hectori Hector's Beaked Whale [76]		Species or species habitat may occur within area
Mesoplodon layardii Strap-toothed Beaked Whale, Strap-toothed Whale, Layard's Beaked Whale [25556]		Species or species habitat may occur within area
Mesoplodon mirus True's Beaked Whale [54]		Species or species habitat may occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Tasmacetus shepherdi Shepherd's Beaked Whale, Tasman Beaked Whale [55]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]	Species or species habitat may occur within area	
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Albany Canyons group and adjacent shelf break	South-west
Ancient coastline at 90-120m depth	South-west
Cape Mentelle upwelling	South-west

Name	Region
Commonwealth marine environment surrounding the Recherche Archipelago	South-west
Commonwealth marine environment within and adjacent	South-west to Geographe Bay
Commonwealth marine environment within and adjacent	South-west to the west coast inshore lagoons
Diamantina Fracture Zone	South-west
Naturaliste Plateau	South-west
Perth Canyon and adjacent shelf break, and other west coast canyons	South-west
Western demersal slope and associated fish communities	South-west
Western rock lobster	South-west

Biologically Important Areas			[Resource Information]
Scientific Name	Behaviour	Presence	
Seabirds			
Ardenna carneipes Flesh-footed Shearwater [82404]	Aggregation	Known to occur	
Ardenna carneipes Flesh-footed Shearwater [82404]	Foraging (in high numbers)	Known to occur	
Ardenna pacifica Wedge-tailed Shearwater [84292]	Foraging (in high numbers)	Known to occur	
Ardenna tenuirostris Short-tailed Shearwater [82652]	Foraging (in high numbers)	Known to occur	
Eudyptula minor Little Penguin [1085]	Foraging (provisioning young)	Known to occur	
Hydroprogne caspia Caspian Tern [808]	Foraging (provisioning young)	Known to occur	
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Former Range	

Scientific Name	Behaviour	Presence
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Known to occur
Onychoprion anaethetus Bridled Tern [82845]	Foraging (in high numbers)	Known to occur
Onychoprion fuscata Sooty Tern [82847]	Foraging	Known to occur
Pelagodroma marina White-faced Storm petrel [1016]	Foraging (in high numbers)	Known to occur
Phalacrocorax fuscescens Black-faced Cormorant [59660]	Foraging	Known to occur
Pterodroma macroptera macroptera Great-winged Petrel (macroptera race) [1035]	Foraging (provisioning young)	Known to occur
Pterodroma mollis Soft-plumaged Petrel [1036]	Foraging (in high numbers)	Known to occur
Puffinus assimilis tunneyi Little Shearwater [59363]	Foraging (in high numbers)	Known to occur
Sterna dougallii Roseate Tern [817]	Foraging	Known to occur
Sternula nereis Fairy Tern [82949]	Foraging (in high numbers)	Known to occur
Thalassarche chlororhynchos bassi Indian Yellow-nosed Albatross [85249]	Foraging (in high numbers)	Known to occur
Seals	Neophoca cinerea	
Australian Sea Lion [22]	Foraging (male)	Likely to occur

Scientific Name		Behaviour	Presence
[Neophoca cinerea](#)			
Australian Sea Lion [22]		Foraging (male and female)	Known to occur
[Neophoca cinerea](#)			
Australian Sea Lion [22]		Foraging (male and female)	Likely to occur
Sharks	[Carcharodon carcharias](#)		
White Shark [64470]		Foraging	Known to occur
Whales	[Balaenoptera musculus](#)		
Blue and Pygmy Blue Whale [36]		Foraging (abundant food source)	Known to occur
[Balaenoptera musculus](#)			
Blue and Pygmy Blue Whale [36]		Foraging (high density)	Known to occur
[Balaenoptera musculus](#)			
Blue and Pygmy Blue Whale [36]		Foraging (on migration)	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Distribution	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Foraging Area (annual high use area)	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Known Foraging Area	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Migration	Known to occur
[Megaptera novaeangliae](#)			
Humpback Whale [38]		Migration (north)	Known to occur
[Megaptera novaeangliae](#)			
Humpback Whale [38]		Migration (north and south)	Known to occur

Scientific Name	Behaviour	Presence
Megaptera novaeangliae Humpback Whale [38]	Migration (south)	Known to occur
Physeter macrocephalus Sperm Whale [59]	Foraging (abundant food source)	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 10-Jun-2024

Summary Details
Matters of NES
Other Matters Protected by the EPBC Act Extra Information
Caveat Acknowledgements

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	3
Wetlands of International Importance (Ramsar	6
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	3
Listed Threatened Ecological Communities:	9
Listed Threatened Species:	141
Listed Migratory Species:	84

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	240
Commonwealth Heritage Places:	4
Listed Marine Species:	123
Whales and Other Cetaceans:	39
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	29
Habitat Critical to the Survival of Marine Turtles:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	63
Regional Forest Agreements:	1
Nationally Important Wetlands:	5
EPBC Act Referrals:	131
Key Ecological Features (Marine):	11
Biologically Important Areas:	33
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

World Heritage Properties [Resource Information]

Name	State	Legal Status
Australian Convict Sites (Fremantle Prison)	WA	Declared property

National Heritage Places [Resource Information]

Name	State	Legal Status
Historic		
Fremantle Prison (former)	WA	Listed place
Indigenous		
Cheetup Rock Shelter	WA	Listed place
Natural		
Fitzgerald River National Park	WA	Listed place

Wetlands of International Importance (Ramsar Wetlands) [Resource Information]

Ramsar Site Name	Proximity
Becher point wetlands	Within Ramsar site
Forrestdale and thomsons lakes	Within 10km of Ramsar site
Lake gore	Within Ramsar site
Lake warden system	Within 10km of Ramsar site
Peel-yalgorup system	Within Ramsar site
Vasse-wonnerup system	Within Ramsar site

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act) Commonwealth Marine Areas (EPBC Act)

Listed Threatened Ecological Communities [Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.
Status of Vulnerable, Disallowed and Ineligible are not MNES under the EPBC Act.

Community Name	Threatened Category	Presence Text
Aquatic Root Mat Community 3 in Caves of the Leeuwin Naturaliste Ridge	Endangered	Community known to occur within area
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Empodisma peatlands of southwestern Australia	Endangered	Community likely to occur within area
Honeymyrtle shrubland on limestone ridges of the Swan Coastal Plain Bioregion	Critically Endangered	Community likely to occur within area
Proteaceae Dominated Kwongkan Shrublands of the Southeast Coastal Floristic Province of Western Australia	Endangered	Community likely to occur within area
Sedgelands in Holocene dune swales of the southern Swan Coastal Plain	Endangered	Community known to occur within area
Subtropical and Temperate Coastal Saltmarsh	Vulnerable	Community likely to occur within area
Thrombolite (microbial) community of coastal freshwater lakes of the Swan Coastal Plain (Lake Richmond)	Endangered	Community known to occur within area
Tuart (Eucalyptus gomphocephala) Woodlands and Forests of the Swan Coastal Plain ecological community	Critically Endangered	Community likely to occur within area

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.

Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Bettongia penicillata ogilbyi Woylie [66844]	Endangered	Species or species habitat known to occur within area
Dasyurus geoffroii Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat known to occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat may occur within area
Myrmecobius fasciatus Numbat [294]	Endangered	Species or species habitat may occur within area
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Parantechinus apicalis Dibbler [313]	Endangered	Species or species habitat known to occur within area
Petrogale lateralis hacketti Recherche Rock-wallaby [66849]	Vulnerable	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Petrogale lateralis lateralis Black-flanked Rock-wallaby, Mororong, Black-footed Rock Wallaby [66647]	Endangered	Translocated population known to occur within area
Phascogale calura Red-tailed Phascogale, Red-tailed Wambenger, Kenngoor [316]	Vulnerable	Species or species habitat may occur within area
Potorous gilbertii Gilbert's Potoroo, Ngilkat [66642]	Critically Endangered	Species or species habitat known to occur within area
Pseudocheirus occidentalis Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Breeding known to occur within area
Pseudomys shortridgei Heath Mouse, Dayang, Heath Rat [77]	Endangered	Species or species habitat likely to occur within area
Setonix brachyurus Quokka [229]	Vulnerable	Species or species habitat known to occur within area
OTHER		
Westralunio carteri Carter's Freshwater Mussel, Freshwater Mussel [86266]	Vulnerable	Species or species habitat known to occur within area
PLANT		
Adenanthos dobagii Fitzgerald Woollybush [21253]	Endangered	Species or species habitat likely to occur within area
Adenanthos ellipticus Oval-leaf Adenanthos [4570]	Vulnerable	Species or species habitat likely to occur within area
Andersonia gracilis Slender Andersonia [14470]	Endangered	Species or species habitat may occur within area
Andersonia pinaster Two Peoples Bay Andersonia [67444]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Anigozanthos bicolor subsp. minor Little Kangaroo Paw, Two-coloured Kangaroo Paw, Small Two-colour Kangaroo Paw [21241]	Endangered	Species or species habitat likely to occur within area
Banksia brownii Brown's Banksia, Feather-leaved Banksia [8277]	Critically Endangered	Species or species habitat known to occur within area
Banksia nivea subsp. uliginosa Swamp Honeypot [82766]	Endangered	Species or species habitat may occur within area
Banksia squarrosa subsp. argillacea Whicher Range Dryandra [82769]	Vulnerable	Species or species habitat likely to occur within area
Banksia verticillata Granite Banksia, Albany Banksia, River Banksia [8333]	Vulnerable	Species or species habitat known to occur within area
Boronia clavata Bremer Boronia [5538]	Endangered	Species or species habitat may occur within area
Brachyscias verecundus Ironstone Brachyscias [81321]	Critically Endangered	Species or species habitat may occur within area
Caladenia busselliana Bussell's Spider-orchid [24369]	Endangered	Species or species habitat likely to occur within area
Caladenia caesarea subsp. maritima Cape Spider-orchid [64856]	Endangered	Species or species habitat known to occur within area
Caladenia excelsa Giant Spider-orchid [56717]	Endangered	Species or species habitat likely to occur within area
Caladenia granitora [65292]	Endangered	Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Caladenia harringtoniae Harrington's Spider-orchid, Pink Spider-orchid [56786]	Vulnerable	Species or species habitat may occur within area
Caladenia huegelii King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid [7309]	Endangered	Species or species habitat known to occur within area
Caladenia lodgeana Lodge's Spider-orchid [68664]	Critically Endangered	Species or species habitat likely to occur within area
Caladenia procera Carbunup King Spider Orchid [68679]	Critically Endangered	Species or species habitat known to occur within area
Caladenia viridescens Dunsborough Spider-orchid [56776]	Endangered	Species or species habitat known to occur within area
Calectasia cyanea Blue Tinsel Lily [7669]	Critically Endangered	Species or species habitat likely to occur within area
Chamelaucium lullfitzii listed as Chamelaucium sp. Gingin (N.G.Marchant 6) Gingin Wax [92777]	Endangered (listed as Chamelaucium sp. Gingin	Species or species habitat likely to occur within area
Chamelaucium sp. S coastal plain (R.D.Royce 4872) Royce's Waxflower [87814]	Vulnerable	Species or species habitat likely to occur within area
Chordifex abortivus Manypeaks Rush [64868]	Endangered	Species or species habitat likely to occur within area
Commersonia apella Many-flowered Commersonia [86877]	Critically Endangered	Species or species habitat known to occur within area
Coopernookia georgei Mauve Coopernookia [21218]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Daviesia obovata Paddle-leaf Daviesia [17311]	Endangered	Species or species habitat likely to occur within area
Diuris drummondii Tall Donkey Orchid [4365]	Vulnerable	Species or species habitat likely to occur within area
Diuris micrantha Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat known to occur within area
Diuris purdiei Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat may occur within area
Drakaea elastica Glossy-leafed Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat likely to occur within area
Drakaea micrantha Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat likely to occur within area
Eucalyptus argutifolia Yanchep Mallee, Wabling Hill Mallee [24263]	Vulnerable	Species or species habitat may occur within area
Eucalyptus insularis Twin Peak Island Mallee [3057]	Endangered	Species or species habitat likely to occur within area
Eucalyptus x phylacis Meelup Mallee [87817]	Endangered	Species or species habitat known to occur within area
Gastrolobium papilio Butterfly-leaved Gastrolobium [78415]	Endangered	Species or species habitat may occur within area
Grevillea elongata Ironstone Grevillea [64578]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Grevillea infundibularis Fan-leaf Grevillea [5772]	Endangered	Species or species habitat likely to occur within area
Isopogon uncinatus Albany Cone Bush, Hook-leaf Isopogon [20871]	Endangered	Species or species habitat likely to occur within area
Kennedia glabrata Northcliffe Kennedia [16452]	Vulnerable	Species or species habitat known to occur within area
Lambertia echinata subsp. echinata Prickly Honeysuckle [56729]	Endangered	Species or species habitat known to occur within area
Lambertia echinata subsp. occidentalis Western Prickly Honeysuckle [64528]	Endangered	Species or species habitat may occur within area
Morelotia australiensis listed as Tetraria australiensis Southern Tetraria [92784]	Vulnerable	Species or species habitat may occur within area
Petrophile latericola Laterite Petrophile [64532]	Endangered	Species or species habitat may occur within area
Phaius australis Lesser Swamp-orchid [5872]	Endangered	Species or species habitat may occur within area
Reedia spathacea Reedia [2995]	Critically Endangered	Species or species habitat may occur within area
Ricinocarpos trichophorus Barrens Wedding Bush [19931]	Endangered	Species or species habitat may occur within area
Sphenotoma drummondii Mountain Paper-heath [21160]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Stylidium galioides		
Yellow Mountain Triggerplant [4666]	Vulnerable	Species or species habitat may occur within area
Synaphea sp. Fairbridge Farm (D.Papenfus 696)		
Selena's Synaphea [82881]	Critically Endangered	Species or species habitat may occur within area
Verticordia crebra		
[55678]	Vulnerable	Species or species habitat likely to occur within area
Verticordia densiflora var. pedunculata		
Long-stalked Featherflower [55689]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. ananeotes		
Tufted Plumed Featherflower [23871]	Endangered	Species or species habitat may occur within area
Verticordia plumosa var. vassensis		
Vasse Featherflower [55804]	Endangered	Species or species habitat may occur within area
Wurmbea calcicola		
Naturaliste Nancy [64691]	Endangered	Species or species habitat known to occur within area
REPTILE		
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur

Scientific Name	Threatened Category	Presence Text
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

SHARK

Carcharias taurus (west coast population) Grey Nurse Shark (west coast population) [68752]	Vulnerable	Congregation or aggregation known to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Centrophorus uyato Little Gulper Shark [68446]	Conservation Dependent	Species or species habitat likely to occur within area
Galeorhinus galeus School Shark, Eastern School Shark, Snapper Shark, Tope, Soupfin Shark [68453]	Conservation Dependent	Species or species habitat may occur within area
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
Rhincodon typus Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat known to occur within area

Listed Migratory Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Migratory Marine Birds		
Anous stolidus Common Noddy [825]		Species or species habitat likely to occur within area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Onychoprion anaethetus
Bridled Tern [82845] Breeding known to occur within area

Phaethon rubricauda
Red-tailed Tropicbird [994] Breeding known to occur within area

Phoebetria fusca
Sooty Albatross [1075] Vulnerable Species or species habitat likely to occur within area

Sterna dougallii
Roseate Tern [817] Breeding known to occur within area

Sternula albifrons
Little Tern [82849] Species or species habitat may occur within area

Thalassarche carteri
Indian Yellow-nosed Albatross [64464] Vulnerable Species or species habitat likely to occur within area

Thalassarche cauta
Shy Albatross [89224] Endangered Foraging, feeding or related behaviour likely to occur within area

Thalassarche chrysostoma
Grey-headed Albatross [66491] Endangered Species or species habitat may occur within area

Thalassarche impavida
Campbell Albatross, Campbell Black-browed Albatross [64459] Vulnerable Species or species habitat may occur within area

Thalassarche melanophris
Black-browed Albatross [66472] Vulnerable Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area

Scientific Name	Threatened Category	Presence Text
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered within area	Foraging, feeding or related behaviour known to occur
Eubalaena australis as Balaena glacialis australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Lagenorhynchus obscurus Dusky Dolphin [43]		Species or species habitat likely to occur within area
Lamna nasus Porbeagle, Mackerel Shark [83288]		Species or species habitat likely to occur within area
Megaptera novaeangliae Humpback Whale [38]		Foraging, feeding or related behaviour known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat known to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
[Physeter macrocephalus](#) Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area
[Rhincodon typus](#) Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Migratory Terrestrial Species [Motacilla cinerea](#) Grey Wagtail [642]	Species or species habitat known to occur within area	
Migratory Wetlands Species [Actitis hypoleucos](#) Common Sandpiper [59309]		Species or species habitat known to occur within area
[Arenaria interpres](#) Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
[Calidris acuminata](#) Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
[Calidris alba](#) Sanderling [875]		Roosting known to occur within area
[Calidris canutus](#) Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area
[Calidris ferruginea](#) Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
[Calidris melanotos](#) Pectoral Sandpiper [858]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Calidris pugnax as Philomachus pugnax Ruff [91256]		Roosting known to occur within area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Gallinago megala
Swinhoe's Snipe [864] Roosting likely to occur within area

Gallinago stenura
Pin-tailed Snipe [841] Roosting likely to occur within area

Glareola maldivarum
Oriental Pratincole [840] Species or species habitat known to occur within area

Limicola falcinellus
Broad-billed Sandpiper [842] Roosting known to occur within area

Limosa lapponica
Bar-tailed Godwit [844] Species or species habitat known to occur within area

Limosa limosa
Black-tailed Godwit [845] Endangered Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area

Numenius minutus
Little Curlew, Little Whimbrel [848] Roosting likely to occur within area

Numenius phaeopus
Whimbrel [849]Roosting known to occur within area

Pandion haliaetus
Osprey [952] Breeding known to occur within area

Phalaropus lobatus
Red-necked Phalarope [838] Roosting known to occur within area

Pluvialis fulva
Pacific Golden Plover [25545] Roosting known to occur within area

Pluvialis squatarola
Grey Plover [865] Vulnerable Roosting known to occur within area

Thalasseus bergii
Greater Crested Tern [83000] Breeding known to occur within area

Tringa brevipes
Grey-tailed Tattler [851] Roosting known to occur within area

Tringa glareola
Wood Sandpiper [829] Roosting known to occur within area

Tringa nebularia
Common Greenshank, Greenshank Endangered Species or species habitat known to occur within area [832]

Tringa stagnatilis
Marsh Sandpiper, Little Greenshank Roosting known to occur within area [833]

Tringa totanus
Common Redshank, Redshank [835] Roosting known to occur within area

Scientific Name	Threatened Category	Presence Text
Xenus cinereus		
Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Commonwealth Heritage Places [Resource Information]

Name	State	Status
Historic		
Artillery Barracks	WA	Listed place
Cliff Point Historic Site	WA	Listed place
J Gun Battery	WA	Listed place
Natural		
Garden Island	WA	Listed place

Listed Marine Species [Resource Information]

Scientific Name	Threatened Category	Presence Text
Bird		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus		
Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops		
Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna carneipes as Puffinus carneipes Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Breeding known to occur within area
Ardenna grisea as Puffinus griseus Sooty Shearwater [82651]	Vulnerable	Species or species habitat may occur within area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Ardenna tenuirostris as Puffinus tenuirostris Short-tailed Shearwater [82652]		Breeding known to occur within area
Arenaria interpres Ruddy Turnstone [872]	Vulnerable	Roosting known to occur within area
Bubulcus ibis as Ardea ibis Cattle Egret [66521]		Species or species habitat may occur within area overfly marine area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Roosting known to occur within area
Calidris alba Sanderling [875]		Roosting known to occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text

Calidris melanotos
Pectoral Sandpiper [858] Species or species habitat known to occur within area overfly marine area

Calidris pugnax as Philomachus pugnax
Ruff [91256] Roosting known to occur within area overfly marine area

Calidris ruficollis
Red-necked Stint [860] Roosting known to occur within area overfly marine area

Calidris subminuta
Long-toed Stint [861] Roosting known to occur within area overfly marine area

Calidris tenuirostris
Great Knot [862] Vulnerable Roosting known to occur within area overfly marine area

Cereopsis novaehollandiae grisea Cape Barren Goose (south-western), Recherche Cape Barren Goose [25978] Vulnerable Breeding known to occur within area overfly marine area

Chalcites osculans as Chrysococcyx osculans
Black-eared Cuckoo [83425] Species or species habitat likely to occur within area overfly marine area

Charadrius bicinctus
Double-banded Plover [895] Roosting known to occur within area overfly marine area

Charadrius leschenaultii
Greater Sand Plover, Large Sand Plover [877] Vulnerable Species or species habitat known to occur within area

Charadrius mongolus
Lesser Sand Plover, Mongolian Plover [879] Endangered Roosting known to occur within area

Charadrius ruficapillus
Red-capped Plover [881] Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]	Breeding known to occur within area	
Diomedea amsterdamensis Amsterdam Albatross [64405]	Endangered	Species or species habitat likely to occur within area
Diomedea antipodensis Antipodean Albatross [64458]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea dabbenena Tristan Albatross [66471]	Endangered	Species or species habitat likely to occur within area
Diomedea epomophora Southern Royal Albatross [89221]	Vulnerable	Species or species habitat may occur within area
Diomedea exulans Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Diomedea sanfordi Northern Royal Albatross [64456]	Endangered	Species or species habitat may occur within area
Eudyptula minor Little Penguin [1085]		Breeding known to occur within area
Gallinago megala Swinhoe's Snipe [864]		Roosting likely to occur within area overfly marine area
Gallinago stenura Pin-tailed Snipe [841]		Roosting likely to occur within area overfly marine area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
Halobaena caerulea Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area
Himantopus himantopus Pied Stilt, Black-winged Stilt [870]		Roosting known to occur within area overfly marine area
Hydroprogne caspia as Sterna caspia Caspian Tern [808]		Breeding known to occur within area
Larus dominicanus Kelp Gull [809]		Breeding known to occur within area
Larus pacificus Pacific Gull [811]		Breeding known to occur within area
Limicola falcinellus Broad-billed Sandpiper [842]		Roosting known to occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Limosa limosa Black-tailed Godwit [845]	Endangered	Roosting known to occur within area overfly marine area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Macronectes halli Northern Giant Petrel [1061]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Scientific Name	Threatened Category	Presence Text
Merops ornatus Rainbow Bee-eater [670]		Species or species habitat may occur within area overfly marine area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat known to occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Numenius minutus Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area overfly marine area
Numenius phaeopus Whimbrel [849]		Roosting known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pachyptila turtur Fairy Prion [1066]		Species or species habitat known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Pelagodroma marina White-faced Storm-Petrel [1016]		Breeding known to occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Breeding known to occur within area
Phalacrocorax fuscescens Black-faced Cormorant [59660]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Phalaropus lobatus Red-necked Phalarope [838]		Roosting known to occur within area
Phoebetria fusca Sooty Albatross [1075]	Vulnerable	Species or species habitat likely to occur within area
Pluvialis fulva Pacific Golden Plover [25545]		Roosting known to occur within area
Pluvialis squatarola Grey Plover [865]	Vulnerable	Roosting known to occur within area overfly marine area
Pterodroma macroptera Great-winged Petrel [1035]		Breeding known to occur within area
Pterodroma mollis Soft-plumaged Petrel [1036]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Puffinus assimilis Little Shearwater [59363]		Breeding known to occur within area
Recurvirostra novaehollandiae Red-necked Avocet [871]		Roosting known to occur within area overfly marine area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat known to occur within area overfly marine area
Stercorarius antarcticus as Catharacta skua Brown Skua [85039]		Species or species habitat may occur within area
Sterna dougallii Roseate Tern [817]		Breeding known to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Sternula nereis as Sterna nereis Fairy Tern [82949]		Breeding known to occur within area
Thalassarche carteri Indian Yellow-nosed Albatross [64464]	Vulnerable	Species or species habitat likely to occur within area
Thalassarche cauta Shy Albatross [89224]	Endangered	Foraging, feeding or related behaviour likely to occur within area
Thalassarche chrysostoma Grey-headed Albatross [66491]	Endangered	Species or species habitat may occur within area
Thalassarche impavida Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
Thalassarche melanophris Black-browed Albatross [66472]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Thalassarche steadi White-capped Albatross [64462]	Vulnerable	Species or species habitat may occur within area
Thalasseus bergii as Sterna bergii Greater Crested Tern [83000]		Breeding known to occur within area
Thinornis cucullatus as Thinornis rubricollis Hooded Plover, Hooded Dotterel [87735]		Species or species habitat known to occur within area overfly marine area
Tringa brevipes as Heteroscelus brevipes Grey-tailed Tattler [851]		Roosting known to occur within area
Tringa glareola Wood Sandpiper [829]		Roosting known to occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat known to occur within area overfly marine area
Tringa stagnatilis Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area overfly marine area
Tringa totanus Common Redshank, Redshank [835]		Roosting known to occur within area overfly marine area
Xenus cinereus Terek Sandpiper [59300]	Vulnerable	Roosting known to occur within area overfly marine area
Fish Acentronura australe Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area
Campichthys galei Gale's Pipefish [66191]		Species or species habitat may occur within area
Choeroichthys suillus Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Heraldia nocturna Upside-down Pipefish, Eastern Upside-down Pipefish, Eastern Upside-down Pipefish [66227]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus breviceps Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippocampus subelongatus West Australian Seahorse [66722]	Species or species habitat may occur within area	
Histiogamphelus cristatus Rhino Pipefish, Macleay's Crested Pipefish, Ring-back Pipefish [66243]		Species or species habitat may occur within area
Leptoichthys fistularius Brushtail Pipefish [66248]	Species or species habitat may occur within area	
Lissocampus caudalis Australian Smooth Pipefish, Smooth Pipefish [66249]		Species or species habitat may occur within area
Lissocampus fatiloquus Prophet's Pipefish [66250]	Species or species habitat may occur within area	
Lissocampus runa Javelin Pipefish [66251]	Species or species habitat may occur within area	
Maroubra perserrata Sawtooth Pipefish [66252]	Species or species habitat may occur within area	
Mitotichthys meraculus Western Crested Pipefish [66259]	Species or species habitat may occur within area	
Nannocampus subosseus Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area
Notiocampus ruber Red Pipefish [66265]	Species or species habitat may occur within area	
Phycodurus eques Leafy Seadragon [66267]	Species or species habitat may occur within area	

Scientific Name	Threatened Category	Presence Text
Phyllopteryx taeniolatus Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area
Pugnaso curtirostris Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
Stigmatopora argus Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area
Stigmatopora nigra Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Urocampus carinirostris Hairy Pipefish [66282]		Species or species habitat may occur within area
Vanacampus margaritifer Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area
Vanacampus phillipi Port Phillip Pipefish [66284]		Species or species habitat may occur within area
Vanacampus poecilolaemus Longsnout Pipefish, Australian Long- snout Pipefish, Long-snouted Pipefish [66285]		Species or species habitat may occur within area
Mammal Arctocephalus forsteri Long-nosed Fur-seal, New Zealand Fur-seal [20]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Neophoca cinerea Australian Sea-lion, Australian Sea Lion [22]	Endangered	Breeding known to occur within area
Reptile Aipysurus pooleorum Shark Bay Sea Snake [66061]		Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera bonaerensis Antarctic Minke Whale, Dark-shoulder Minke Whale [67812]		Species or species habitat likely to occur

Current Scientific Name	Status	Type of Presence
Balaenoptera borealis Sei Whale [34]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Foraging, feeding or related behaviour known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
Berardius arnuxii Arnoux's Beaked Whale [70]		Species or species habitat may occur within area
Caperea marginata Pygmy Right Whale [39]		Foraging, feeding or related behaviour likely to occur within area
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Eubalaena australis Southern Right Whale [40]	Endangered	Breeding known to occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Globicephala melas Long-finned Pilot Whale [59282]		Species or species habitat may occur

Current Scientific Name	Status	Type of Presence
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area

Hyperoodon planifrons
Southern Bottlenose Whale [71] Species or species habitat may occur within area

Kogia breviceps
Pygmy Sperm Whale [57] Species or species habitat may occur within area

Kogia sima
Dwarf Sperm Whale [85043] Species or species habitat may occur within area

Lagenorhynchus obscurus
Dusky Dolphin [43] Species or species habitat likely to occur within area

Lissodelphis peronii
Southern Right Whale Dolphin [44] Species or species habitat may occur within area

Megaptera novaeangliae
Humpback Whale [38] Foraging, feeding or related behaviour known to occur within area

Mesoplodon bowdoini
Andrew's Beaked Whale [73] Species or species habitat may occur within area

Mesoplodon densirostris Blainville's Beaked Whale, Dense- beaked Whale [74]		Species or species habitat may occur within area
Mesoplodon ginkgodens Gingko-toothed Beaked Whale, Gingko-toothed Whale, Gingko Beaked Whale [59564]		Species or species habitat may occur within area
Mesoplodon grayi Gray's Beaked Whale, Scamperdown Whale [75]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Mesoplodon hectori Hector's Beaked Whale [76]		Species or species habitat may occur within area
Mesoplodon layardii Strap-toothed Beaked Whale, Strap-toothed Whale, Layard's Beaked Whale [25556]		Species or species habitat may occur within area
Mesoplodon mirus True's Beaked Whale [54]		Species or species habitat may occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Foraging, feeding or related behaviour known to occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
Tasmacetus shepherdi Shepherd's Beaked Whale, Tasman Beaked Whale [55]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops truncatus s. str. Bottlenose Dolphin [68417]	Species or species habitat may occur within area	
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Albany Canyons group and adjacent shelf break	South-west
Ancient coastline at 90-120m depth	South-west
Cape Mentelle upwelling	South-west

Name	Region
Commonwealth marine environment surrounding the Recherche Archipelago	South-west
Commonwealth marine environment within and adjacent to Geographe Bay	South-west
Commonwealth marine environment within and adjacent to the west coast inshore lagoons	South-west
Diamantina Fracture Zone	South-west
Naturaliste Plateau	South-west
Perth Canyon and adjacent shelf break, and other west coast canyons	South-west
Western demersal slope and associated fish communities	South-west
Western rock lobster	South-west

Biologically Important Areas			[Resource Information]
Scientific Name	Behaviour	Presence	
Seabirds			
Ardenna carneipes Flesh-footed Shearwater [82404]	Aggregation	Known to occur	
Ardenna carneipes Flesh-footed Shearwater [82404]	Foraging (in high numbers)	Known to occur	
Ardenna pacifica Wedge-tailed Shearwater [84292]	Foraging (in high numbers)	Known to occur	
Ardenna tenuirostris Short-tailed Shearwater [82652]	Foraging (in high numbers)	Known to occur	
Eudyptula minor Little Penguin [1085]	Foraging (provisioning young)	Known to occur	
Hydroprogne caspia Caspian Tern [808]	Foraging (provisioning young)	Known to occur	
Larus pacificus Pacific Gull [811]	Foraging (in high numbers)	Former Range	

Scientific Name	Behaviour	Presence
[Larus pacificus](#) Pacific Gull [811]	Foraging (in high numbers)	Known to occur
[Onychoprion anaethetus](#) Bridled Tern [82845]	Foraging (in high numbers)	Known to occur
[Onychoprion fuscata](#) Sooty Tern [82847]	Foraging	Known to occur
[Pelagodroma marina](#) White-faced Storm petrel [1016]	Foraging (in high numbers)	Known to occur
[Phalacrocorax fuscescens](#) Black-faced Cormorant [59660]	Foraging	Known to occur
[Pterodroma macroptera macroptera](#) Great-winged Petrel (macroptera race) [1035]	Foraging (provisioning young)	Known to occur
[Pterodroma mollis](#) Soft-plumaged Petrel [1036]	Foraging (in high numbers)	Known to occur
[Puffinus assimilis tunneyi](#) Little Shearwater [59363]	Foraging (in high numbers)	Known to occur
[Sterna dougallii](#) Roseate Tern [817]	Foraging	Known to occur
[Sternula nereis](#) Fairy Tern [82949]	Foraging (in high numbers)	Known to occur
[Thalassarche chlororhynchos bassi](#) Indian Yellow-nosed Albatross [85249]	Foraging (in high numbers)	Known to occur
Seals [Neophoca cinerea](#) Australian Sea Lion [22]	Foraging (male)	Likely to occur

Scientific Name		Behaviour	Presence
[Neophoca cinerea](#)			
Australian Sea Lion [22]		Foraging (male and female)	Known to occur
[Neophoca cinerea](#)			
Australian Sea Lion [22]		Foraging (male and female)	Likely to occur
Sharks	[Carcharodon carcharias](#)		
White Shark [64470]		Foraging	Known to occur
Whales	[Balaenoptera musculus](#)		
Blue and Pygmy Blue Whale [36]		Foraging (abundant food source)	Known to occur
[Balaenoptera musculus](#)			
Blue and Pygmy Blue Whale [36]		Foraging (high density)	Known to occur
[Balaenoptera musculus](#)			
Blue and Pygmy Blue Whale [36]		Foraging (on migration)	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Distribution	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Foraging Area (annual high use area)	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Known Foraging Area	Known to occur
[Balaenoptera musculus brevicauda](#)			
Pygmy Blue Whale [81317]		Migration	Known to occur
[Megaptera novaeangliae](#)			
Humpback Whale [38]		Migration (north)	Known to occur
[Megaptera novaeangliae](#)			
Humpback Whale [38]		Migration (north and south)	Known to occur

Scientific Name	Behaviour	Presence
Megaptera novaeangliae		
Humpback Whale [38]	Migration (south)	Known to occur
Physeter macrocephalus		
Sperm Whale [59]	Foraging (abundant food source)	Known to occur

Caveat

PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

World and National Heritage properties;

Wetlands of International and National Importance;

Commonwealth and State/Territory reserves;

distribution of listed threatened, migratory and marine species;

listed threatened ecological communities; and

other information that may be useful as an indicator of potential habitat value.

DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data are available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance

DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions

LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

threatened species listed as extinct or considered vagrants;

some recently listed species and ecological communities;

some listed migratory and listed marine species, which are not listed as threatened species; and

migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded

seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

APPENDIX B. SUPPORTING FIGURES FOR SECTION 2.3 METEOROLOGY AND OCEANOGRAPHY

Browse

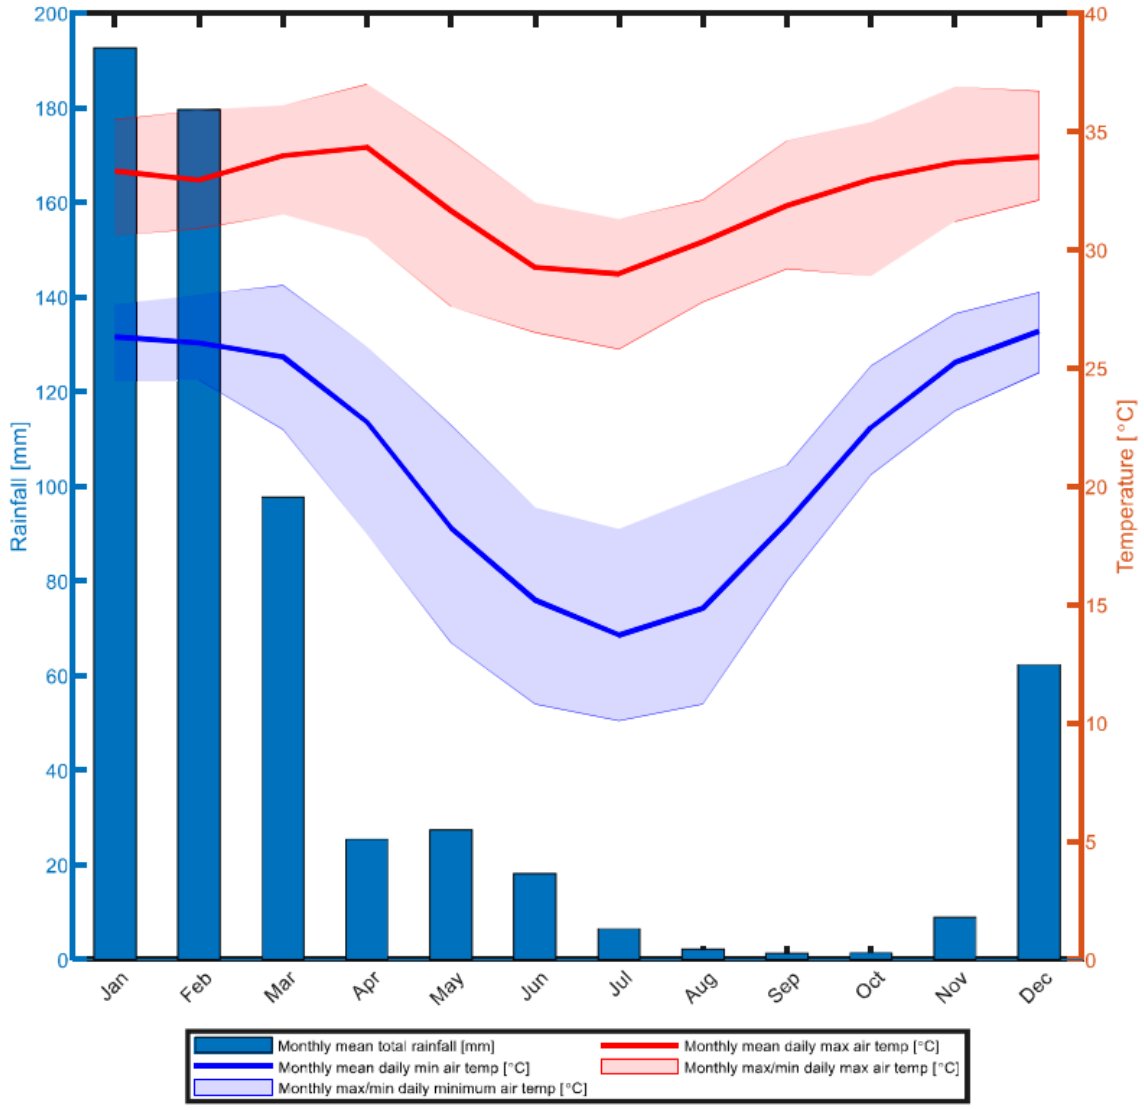

Figure 1. Monthly average total rainfall [mm] and air temperature [°C], calculated based on observations at the Broome Airport weather station from 1939-2020 (Bureau of Meteorology 2020). Bars show the monthly average total rainfall values, and thick blue and red lines denote monthly average daily minimum and maximum air temperatures, respectively. Shaded blue and red areas denote monthly recorded extremes of daily minimum and maximum air temperature, respectively.

Uncontrolled when printed. Refer to electronic version for most up to date information.

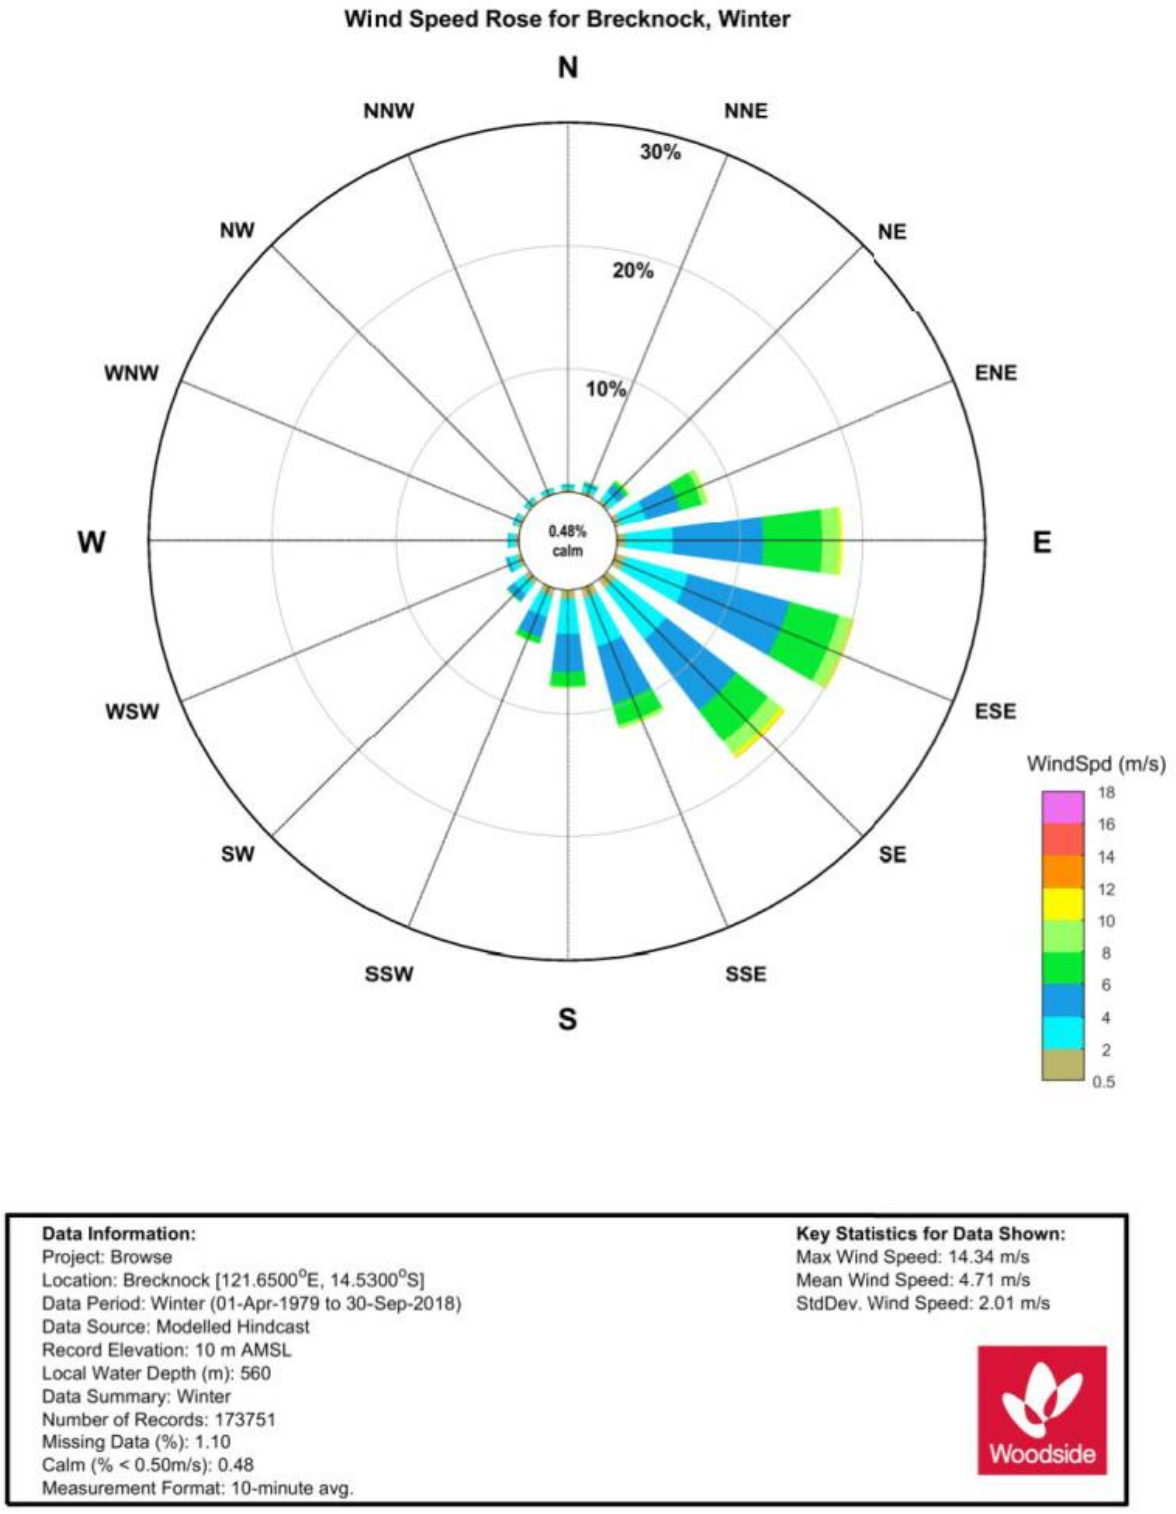

Figure 3. Winter distributions of 10-minute average wind speeds by 22.5° directional sectors at the Brecknock site (Metocean Solutions Ltd, 2019). Note tropical cyclone events were not included in this distribution. Winds at Brecknock in winter are predominantly from the E to SE due to the South East Trade Winds coming from the Australian mainland (WEL, 2019).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

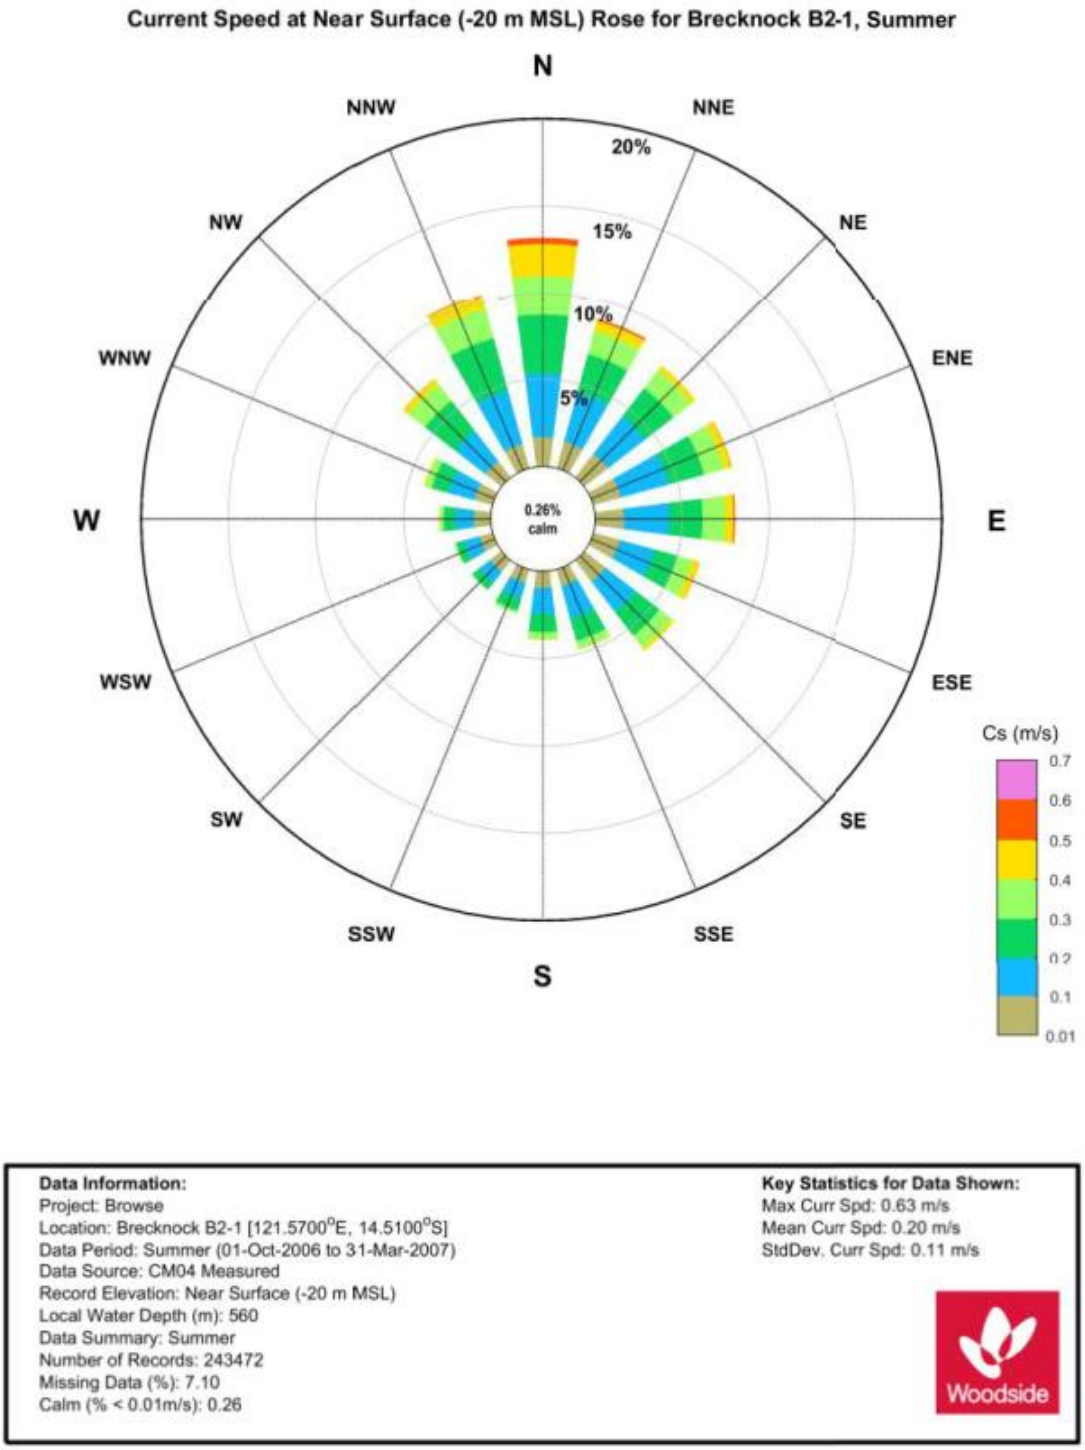

Figure 4. Summer (Nov-Apr) near surface combined frequency of 1-minute mean current speed and direction (towards) measured at Brecknock B2-1 location (cyclones removed) (RPS Metocean Ltd. 2008).

North west Shelf/Scarborough

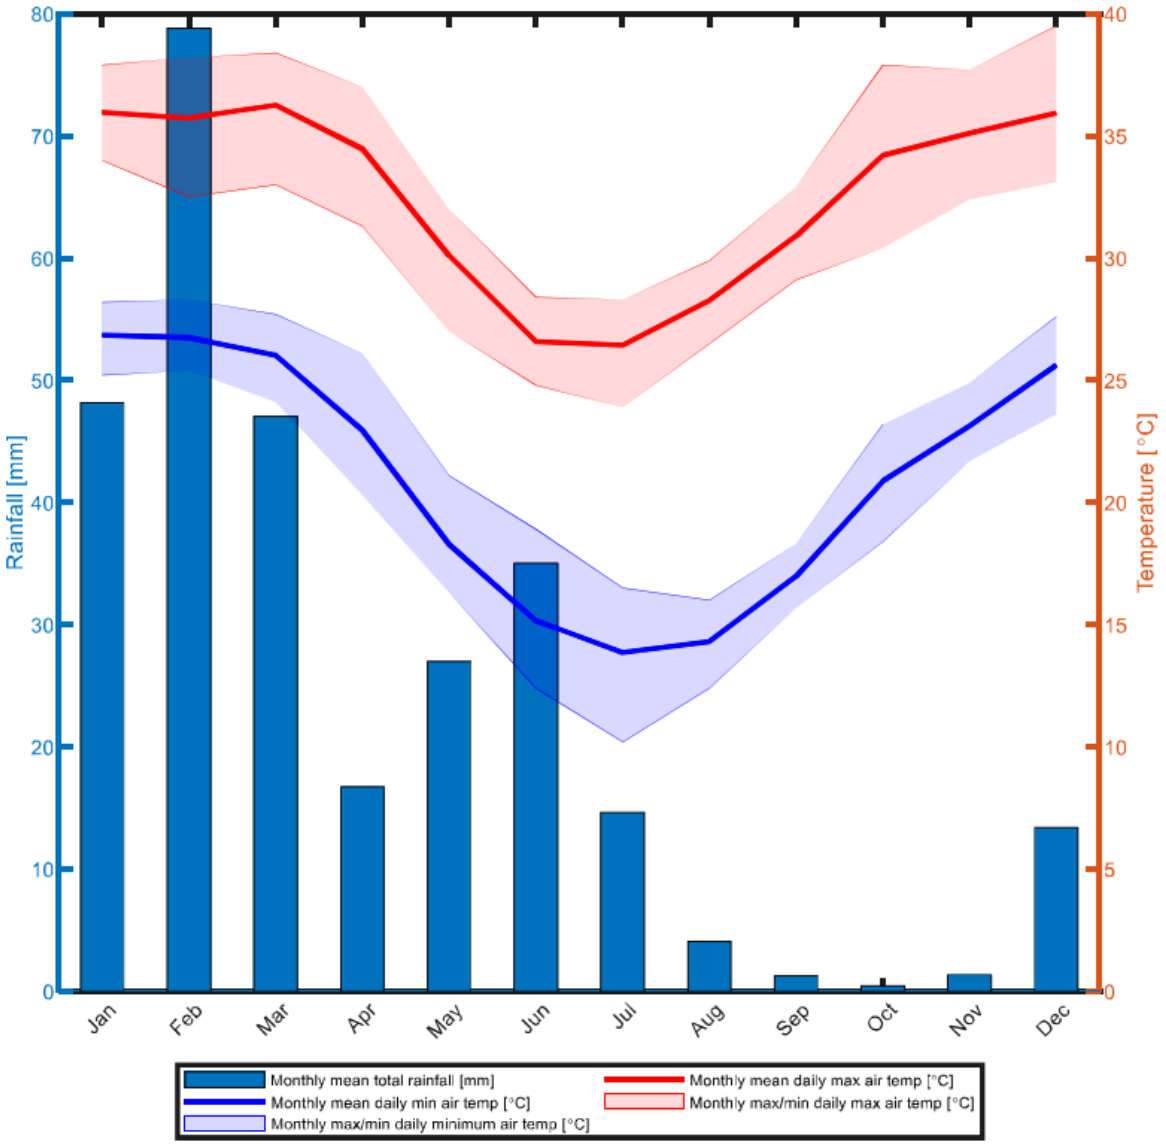

Figure 1. Monthly average total rainfall [mm] and air temperature [°C], calculated based on observations at the Karratha Aero weather station from 1972-2020 and 1993-2020 respectively (Bureau of Meteorology 2020). Bars show the monthly average total rainfall values, and thick blue and red lines denote monthly average daily minimum and maximum air temperatures, respectively. Shaded blue and red areas denote monthly recorded extremes of daily minimum and maximum air temperature, respectively.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

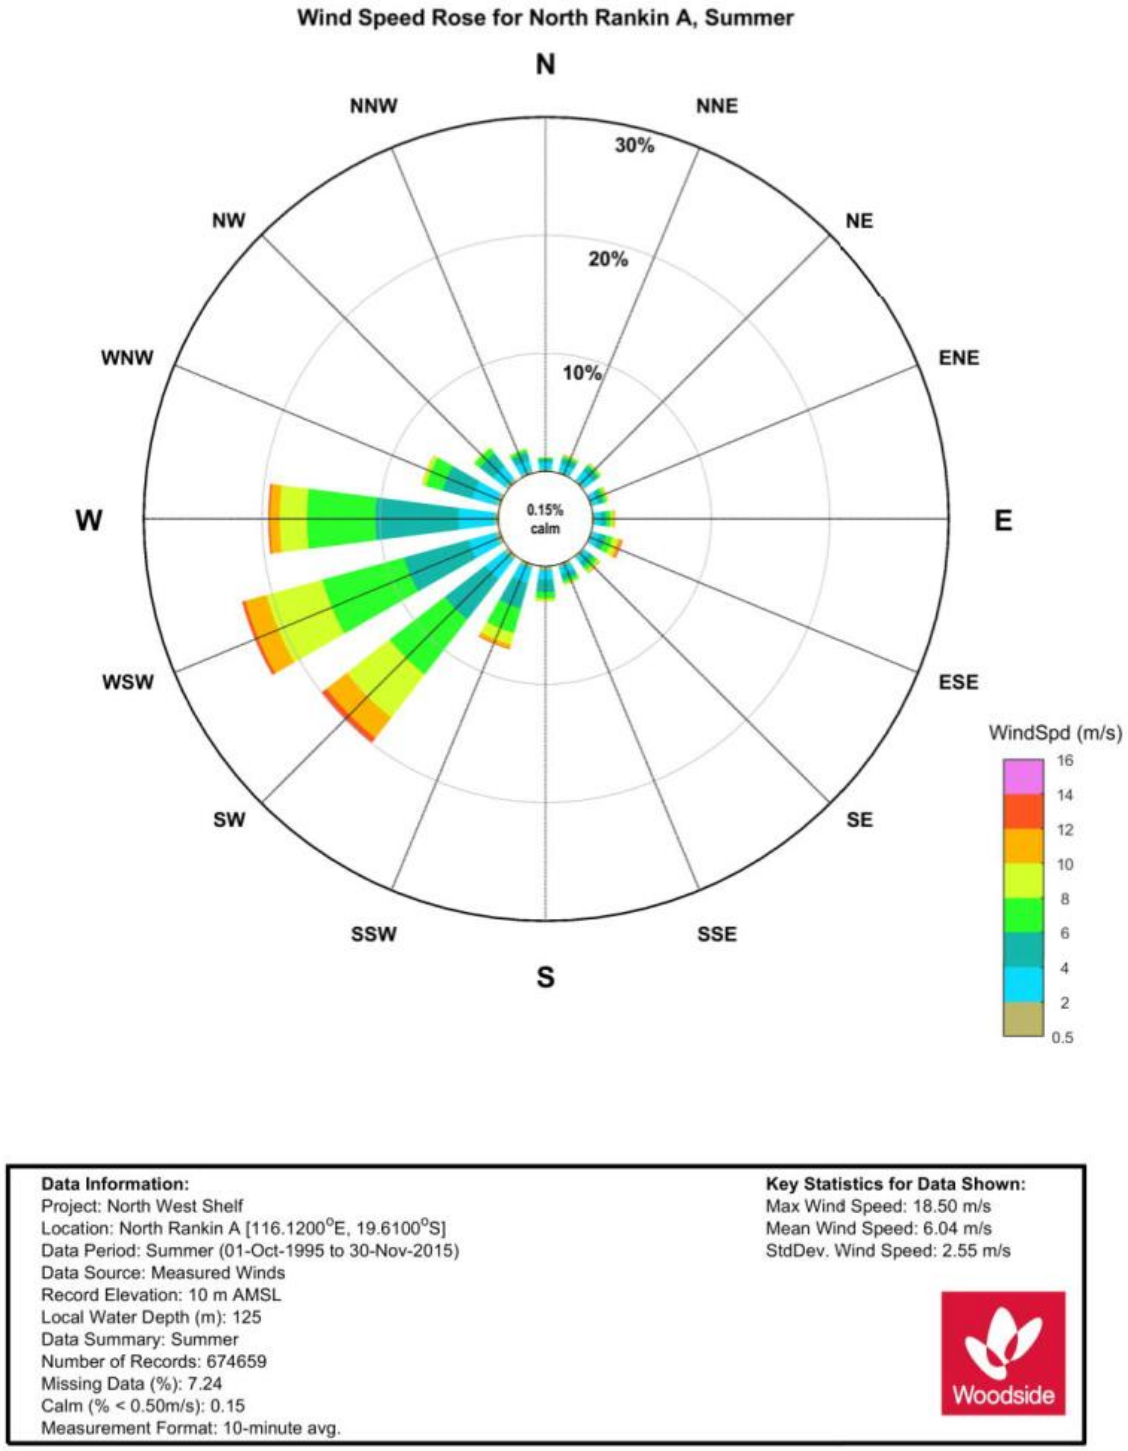

Figure 2. Summer distributions of 10-minute average wind speeds by 22.5° directional sectors at the North Rankin A site (WEL, 2015). Note tropical cyclone events were not included in this distribution. Winds at North Rankin A in summer are characterised by W to SW driven by the North West Monsoon (RPS, 2016).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

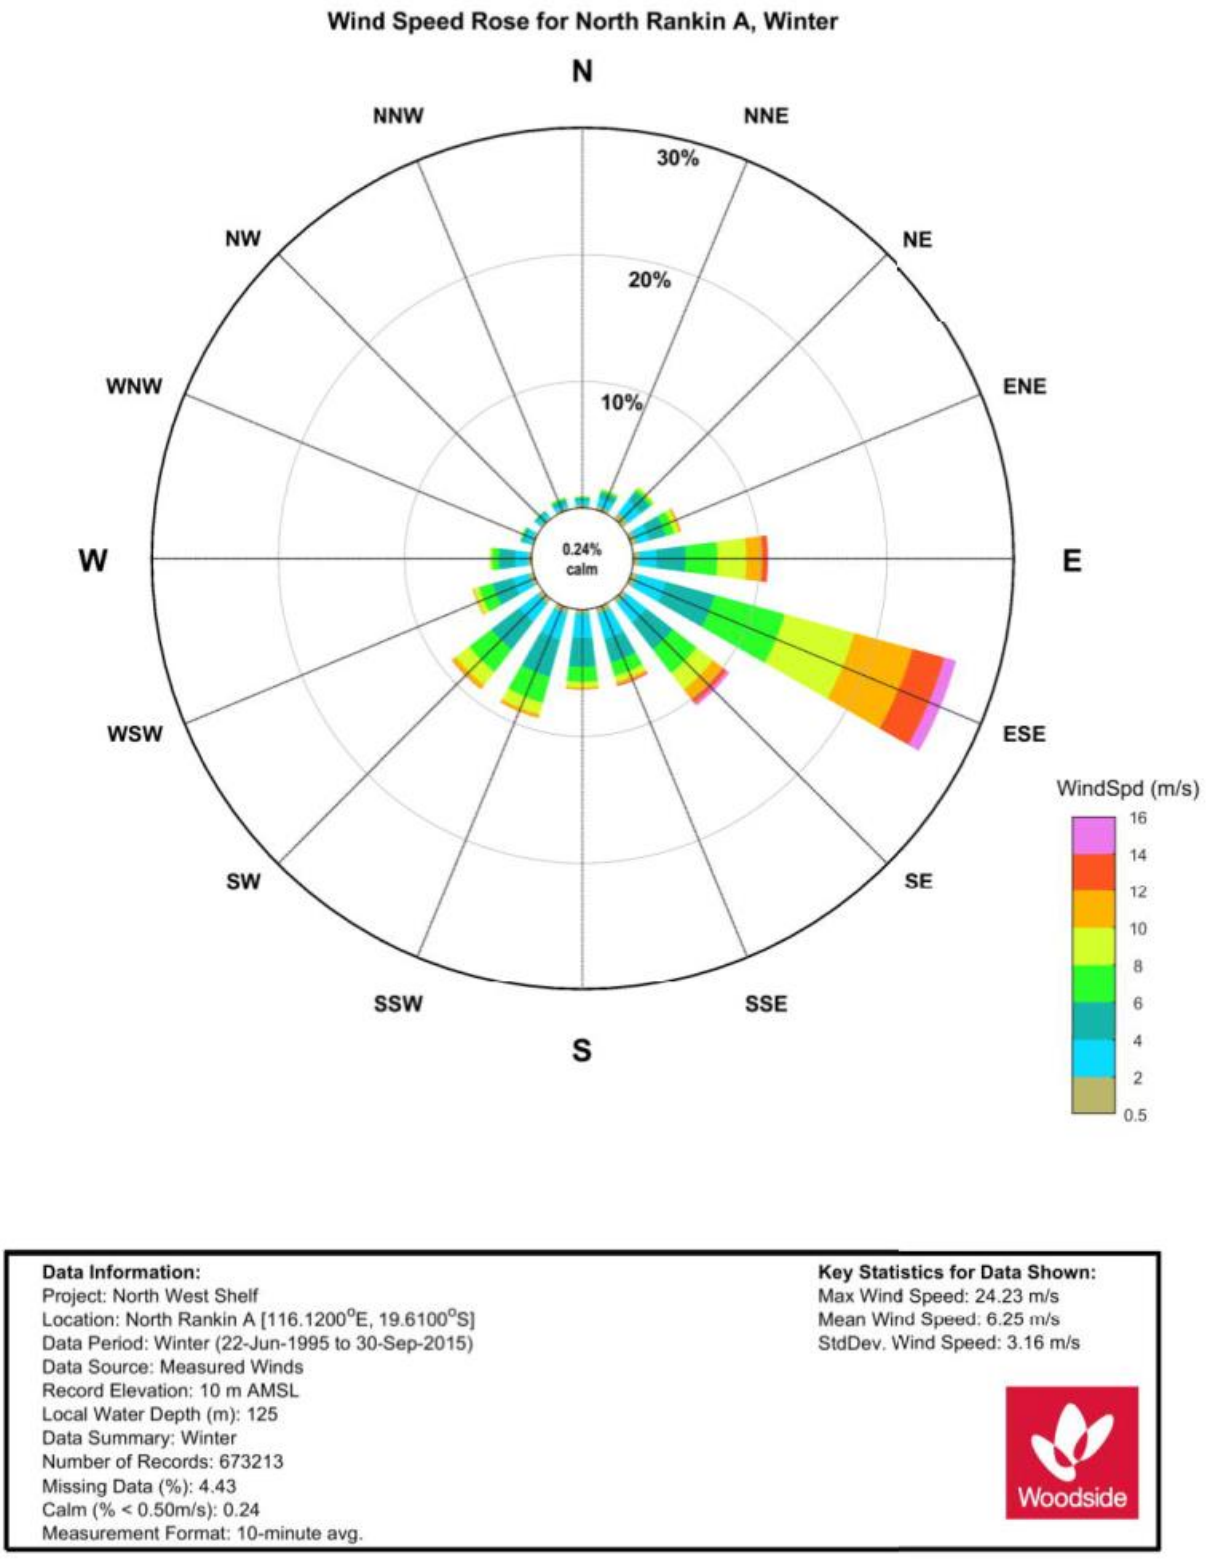

Figure 3. Winter distributions of 10-minute average wind speeds by 22.5° directional sectors at the North Rankin A site (WEL, 2015). Note tropical cyclone events were not included in this distribution. Winds at North Rankin in winter are predominantly influenced by the South East Trade Winds over Australia (RPS, 2016).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

Scarborough

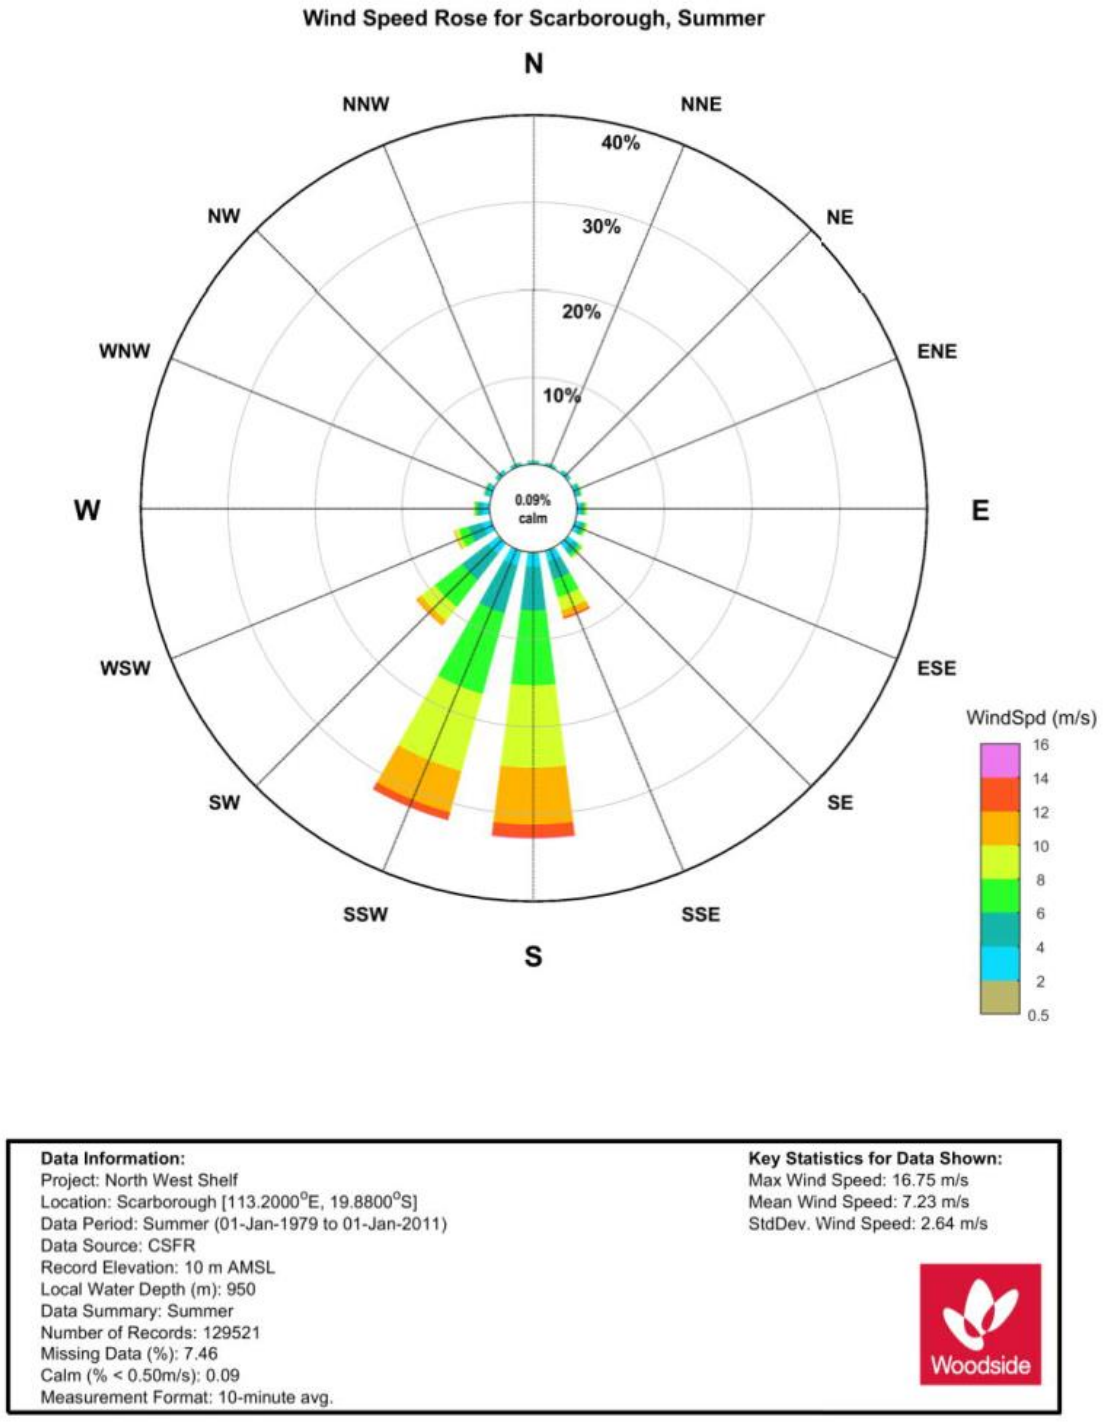

Figure 1. Summer distributions of wind speeds (10-minute at 10m ASL) by 22.5° directional sectors at the Scarborough site (WEL, 2018). Note tropical cyclone events were not included in this distribution. Winds at Scarborough in summer are predominantly from the S to SSW due to a Pilbara Heat Low forming over the northwest coast of Western Australia [R8] SW winds are also experienced at this site due to the monsoon trough.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

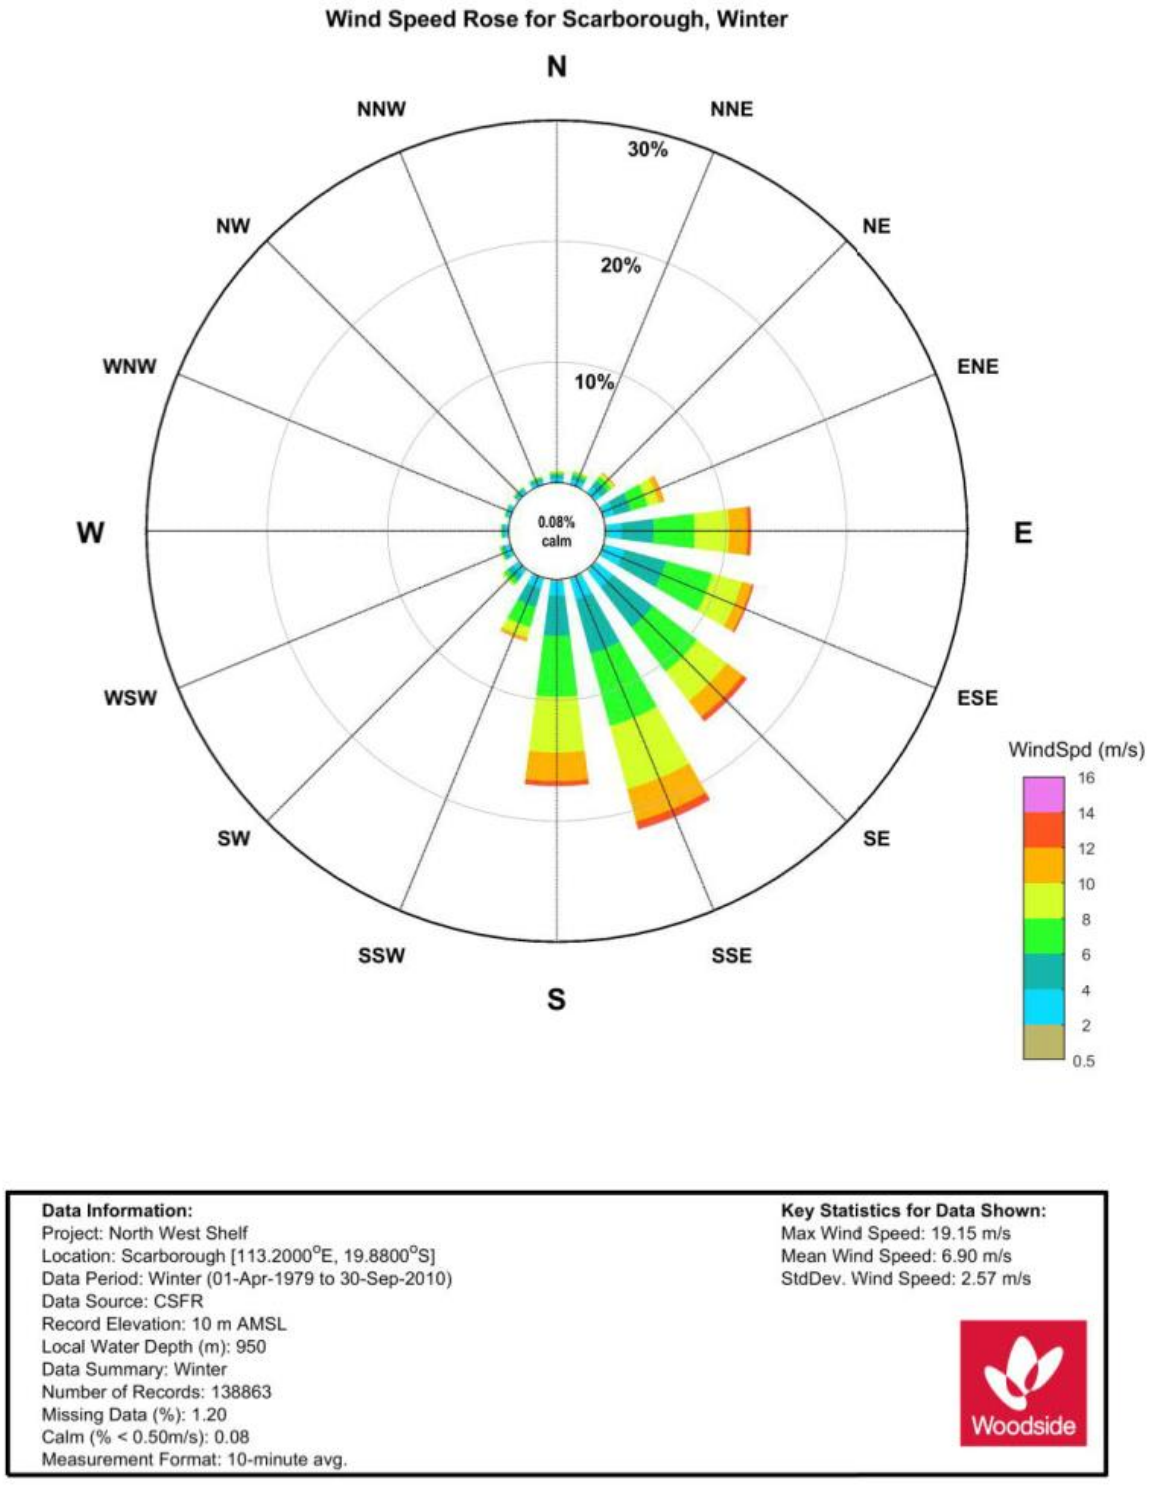

Figure 2. Winter distributions of wind speeds (10-minute at 10 m ASL) by 22.5° directional sectors at the Scarborough site (WEL, 2018). Note tropical cyclone events were not included in this distribution. Winds at Scarborough in winter are predominantly from the S to E driven by the South East Trade Winds over Australia (RPS, 2016)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

North-west Cape

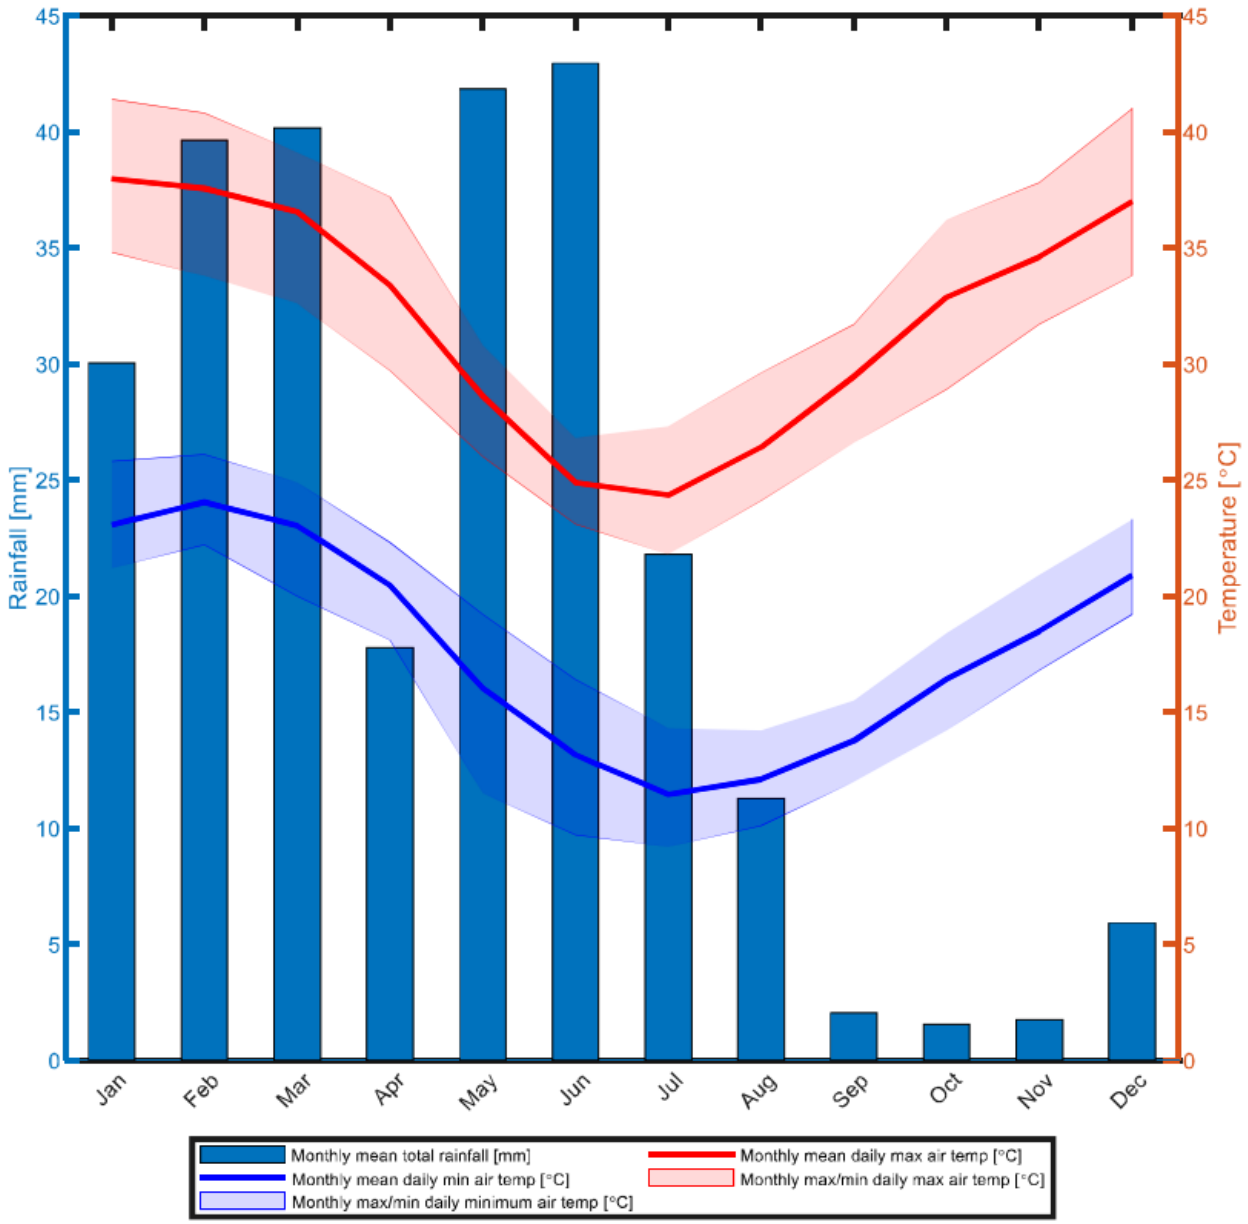

Figure 1. Monthly average total rainfall [mm] and air temperature [°C], calculated based on observations at the Learmonth Airport weather station from 1945-2020 and 1975-2020 respectively (Bureau of Meteorology 2020). Bars show the monthly average total rainfall values, and thick blue and red lines denote monthly average daily minimum and maximum air temperatures, respectively. Shaded blue and red areas denote monthly recorded extremes of daily minimum and maximum air temperature, respectively.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

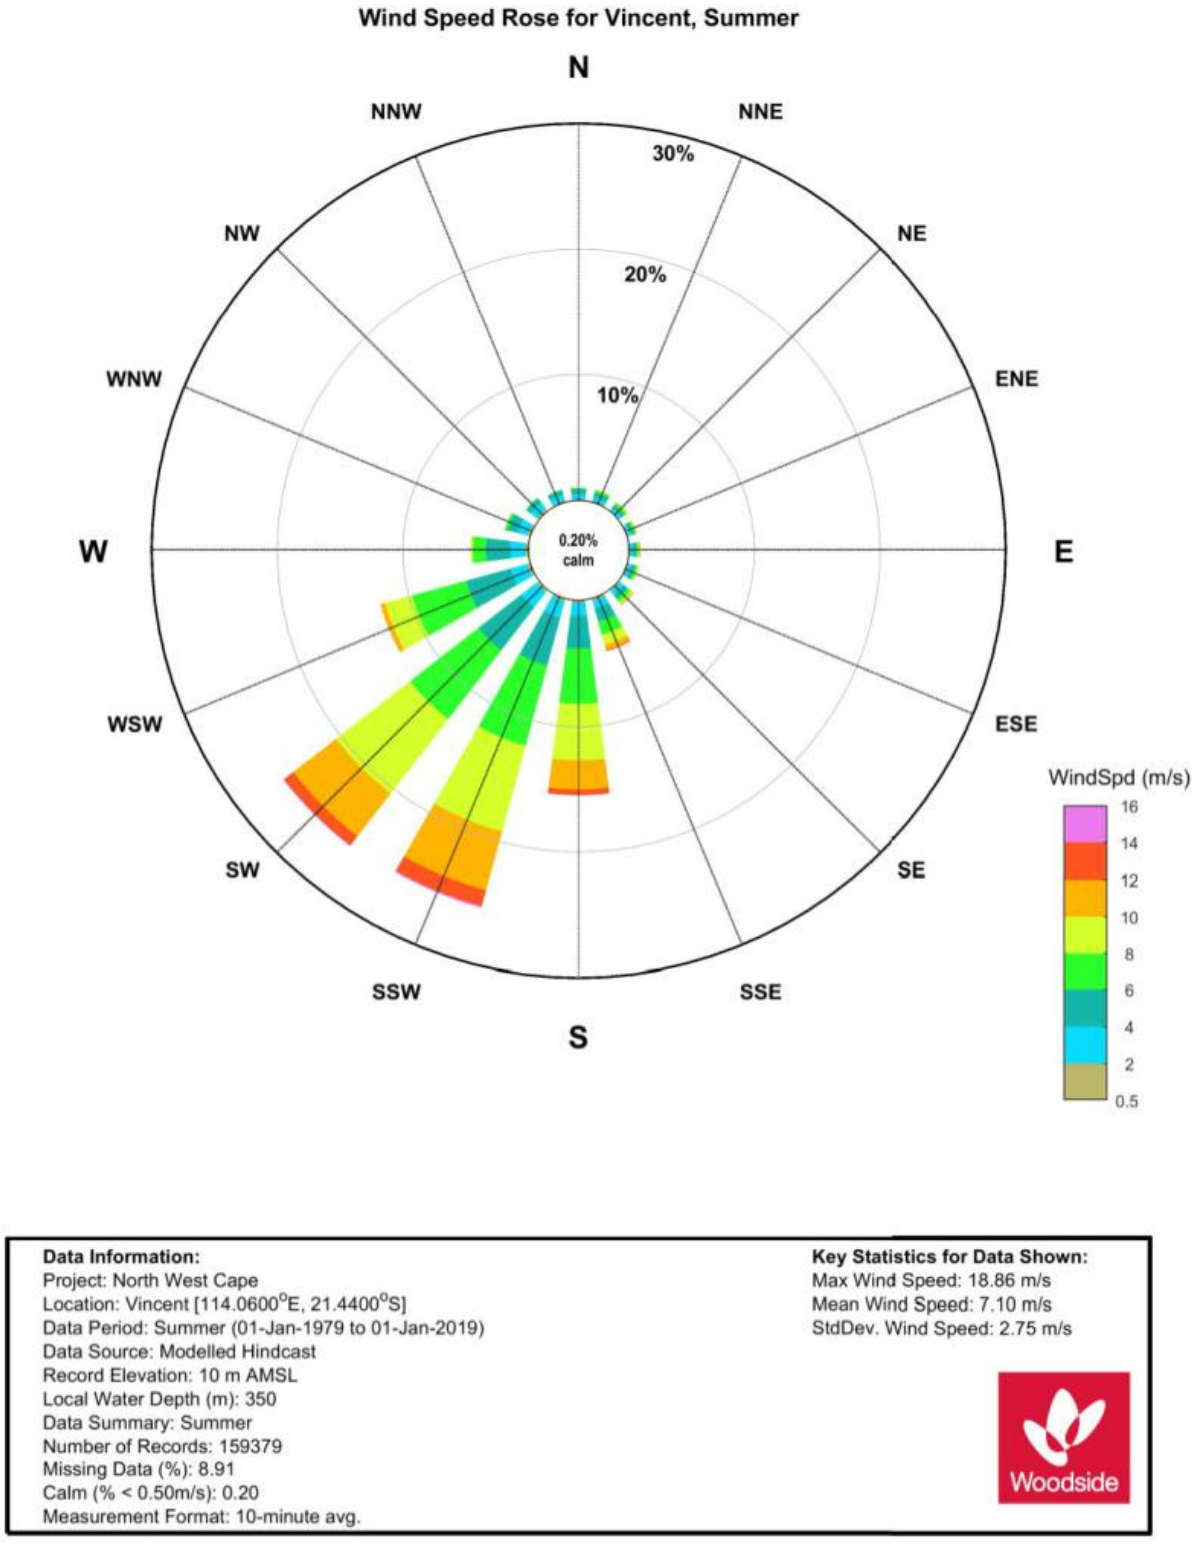

Figure 2. Summer distributions of wind speeds (10-minute at 10 m ASL) by 22.5° directional sectors at the Vincent site (Vincent Metocean). Note tropical cyclone events were not included in this distribution. Winds at Vincent in summer are predominantly from the SW to SSW in summer due to the presence of the Pilbara Heat Low (MetOcean Engineers, 2005).

Controlled Ref No: G2000RH1401743486 Revision: 2 Woodside ID: 1401743486

Uncontrolled when printed. Refer to electronic version for most up to date information.

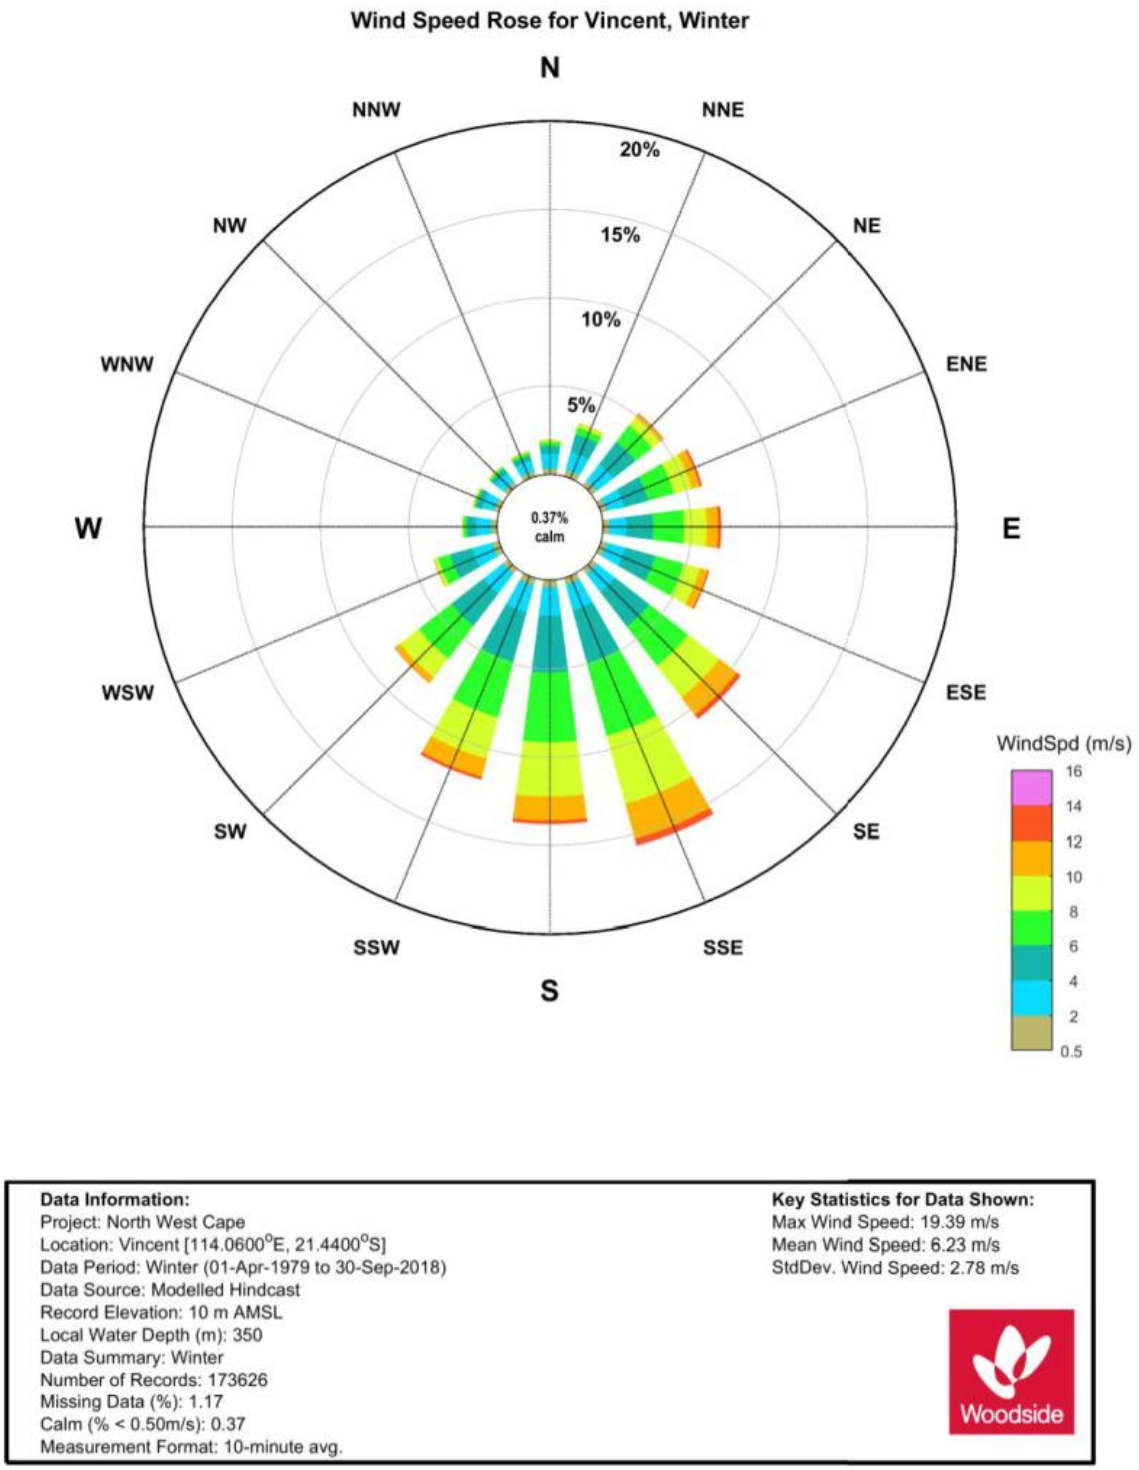

Figure 3. Winter distributions of wind speeds (10-minute at 10 m ASL) 22.5° directional sectors at the Vincent site (Vincent Metocean). Note tropical cyclone events were not included in this distribution. In winter, winds at are predominantly from the S to SE, associated with the South East Trades. Easterly gales are experienced at the Vincent location due to high pressure systems generating from the Great Australian Bight area to the site (MetOcean Engineers, 2005).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 11-Dec-2025

Summary

Details

- Matters of NES
- Other Matters Protected by the EPBC Act

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	2
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	27
Listed Migratory Species:	46

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	None
Commonwealth Heritage Places:	None
Listed Marine Species:	77
Whales and Other Cetaceans:	27
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None
Habitat Critical to the Survival of Marine Turtles:	3

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	None
Regional Forest Agreements:	None
Nationally Important Wetlands:	None
EPBC Act Referrals:	37
Key Ecological Features (Marine):	2
Biologically Important Areas:	9
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Commonwealth Marine Area [Resource Information]

Approval is required for a proposed activity that is located within the Commonwealth Marine Area which has, will have, or is likely to have a significant impact on the environment. Approval may be required for a proposed action taken outside a Commonwealth Marine Area but which has, may have or is likely to have a significant impact on the environment in the Commonwealth Marine Area.

Feature Name
Commonwealth Marine Areas (EPBC Act)
Commonwealth Marine Areas (EPBC Act)

Listed Threatened Species [Resource Information]

Status of Conservation Dependent and Extinct are not MNES under the EPBC Act.
Number is the current name ID.

Scientific Name	Threatened Category	Presence Text
BIRD		
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat may occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat may occur within area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]	Endangered	Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
[Phaethon rubricauda westralis](#) Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat likely to occur within area
[Sternula nereis nereis](#) Australian Fairy Tern [82950]	Vulnerable	Breeding known to occur within area
MAMMAL		
[Balaenoptera borealis](#) Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
[Balaenoptera musculus](#) Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
[Balaenoptera physalus](#) Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
[Orcaella heinsohni](#) Australian Snubfin Dolphin [81322]	Vulnerable	Species or species habitat may occur within area
[Sousa sahulensis](#) Australian Humpback Dolphin [87942]	Vulnerable	Species or species habitat may occur within area
REPTILE		
[Aipysurus apraefrontalis](#) Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
[Aipysurus foliosquama](#) Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat likely to occur within area
[Caretta caretta](#) Loggerhead Turtle [1763]	Endangered	Congregation or aggregation known to occur within area
[Chelonia mydas](#) Green Turtle [1765]	Vulnerable	Congregation or aggregation known to occur within area

Scientific Name	Threatened Category	Presence Text
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Species or species habitat likely to occur within area
Eretmochelys imbricata		
Hawksbill Turtle [1766]	Vulnerable	Congregation or aggregation known to occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Congregation or aggregation known to occur within area
SHARK		
Carcharias taurus (west coast population)		
Grey Nurse Shark (west coast population) [68752]	Vulnerable	Species or species habitat likely to occur within area
Carcharodon carcharias		
White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Pristis clavata		
Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis		
Largetooth Sawfish, Freshwater Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Endangered	Species or species habitat may occur within area
Pristis zijsron		
Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus		
Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sphyrna lewini		
Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat likely to occur within area

Listed Migratory Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
null

[Anoxypristis cuspidata](#) Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharias taurus Grey Nurse Shark [64469]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Congregation or aggregation known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Congregation or aggregation known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Dugong dugon Dugong [28]		Species or species habitat known to occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Congregation or aggregation known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Isurus paucus Longfin Mako [82947]		Species or species habitat likely to occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat likely to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Congregation or aggregation known to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Vulnerable	Species or species habitat may occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Pristis clavata		
Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis		
Largetooth Sawfish, Freshwater Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Endangered	Species or species habitat may occur within area
Pristis zijsron		
Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus		
Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sousa sahulensis as Sousa chinensis		
Australian Humpback Dolphin [87942]	Vulnerable	Species or species habitat may occur within area
Tursiops aduncus (Arafura/Timor Sea populations)		
Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat likely to occur within area
Migratory Wetlands Species		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat may occur within area
Calidris acuminata		
Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat may occur within area
Calidris canutus		
Red Knot, Knot [855]	Vulnerable	Species or species habitat may occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat may occur within area
Calidris melanotos		
Pectoral Sandpiper [858]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Numenius madagascariensis		
Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat may occur within area
Pandion haliaetus		
Osprey [952]		Species or species habitat may occur within area

Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area
Ephalophis greyae as Ephalophis greyi Mangrove Sea Snake [93738]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Congregation or aggregation known to occur within area
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis czeblukovi Fine-spined Sea Snake [59233]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis peronii as Acalyptophis peronii		
Horned Sea Snake [93509]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus		
Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii		
Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Congregation or aggregation known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera acutorostrata		
Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera borealis		
Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus		
Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Balaenoptera omurai		
Omura's Whale [87136]		Species or species habitat likely to occur within area
Balaenoptera physalus		
Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Delphinus delphis Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Feresa attenuata Pygmy Killer Whale [61]		Species or species habitat may occur within area
Globicephala macrorhynchus Short-finned Pilot Whale [62]		Species or species habitat may occur within area
Grampus griseus Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Kogia breviceps Pygmy Sperm Whale [57]		Species or species habitat may occur within area
Kogia sima Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Vulnerable	Species or species habitat may occur within area
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area

Current Scientific Name	Status	Type of Presence
[Pseudorca crassidens](#) False Killer Whale [48]		Species or species habitat likely to occur within area
[Sousa sahulensis](#) Australian Humpback Dolphin [87942]	Vulnerable	Species or species habitat may occur within area

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Glomar Shoals	North-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Marine Turtles		
Caretta caretta Loggerhead Turtle [1763]	Internesting buffer	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting buffer	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting buffer	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Seabirds		
Ardenna pacifica Wedge-tailed Shearwater [84292]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sternula nereis Fairy Tern [82949]	Breeding	Known to occur
Sharks		
Rhincodon typus Whale Shark [66680]	Foraging	Known to occur
Whales		

Scientific Name	Behaviour	Presence
Megaptera novaeangliae		
Humpback Whale [38]	Migration (north and south)	Known to occur

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data is available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance on the contents of this report.

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions when time permits.

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded breeding sites; and
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements

This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

-Office of Environment and Heritage, New South Wales

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 11-Dec-2025

Summary

Details

- Matters of NES
- Other Matters Protected by the EPBC Act
- Extra Information

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	1
National Heritage Places:	1
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	2
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	34
Listed Migratory Species:	59

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	None
Commonwealth Heritage Places:	None
Listed Marine Species:	96
Whales and Other Cetaceans:	29
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	4
Habitat Critical to the Survival of Marine Turtles:	3

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	2
Regional Forest Agreements:	None
Nationally Important Wetlands:	None
EPBC Act Referrals:	63
Key Ecological Features (Marine):	2
Biologically Important Areas:	27
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

[Caretta caretta](#)		
Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
[Chelonia mydas](#)		
Green Turtle [1765]	Vulnerable	Breeding known to occur within area
[Dermochelys coriacea](#)		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
[Eretmochelys imbricata](#)		
Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
[Liasis olivaceus barroni](#)		
Pilbara Olive Python [66699]	Vulnerable	Species or species habitat known to occur within area
[Natator depressus](#)		
Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
SHARK		

Scientific Name	Threatened Category	Presence Text
Carcharias taurus (west coast population)		
Grey Nurse Shark (west coast population) [68752]	Vulnerable	Species or species habitat likely to occur within area
Carcharodon carcharias		
White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Pristis clavata		
Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area
Pristis pristis		
Largetooth Sawfish, Freshwater Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Endangered	Species or species habitat may occur within area
Pristis zijsron		
Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Species or species habitat known to occur within area
Rhincodon typus		
Whale Shark [66680]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sphyrna lewini		
Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat likely to occur within area

Listed Migratory Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
null		
Balaenoptera omurai		
Omura's Whale [87136]		Species or species habitat likely to occur within area
Migratory Marine Birds		
Anous stolidus		
Common Noddy [825]		Species or species habitat may occur within area
Apus pacificus		
Fork-tailed Swift [678]		Species or species habitat likely to occur within area

Scientific Name	Threatened Category	Presence Text
Ardenna pacifica Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat likely to occur within area
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat may occur within area
Hydroprogne caspia Caspian Tern [808]		Breeding known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Onychoprion anaethetus Bridled Tern [82845]		Breeding known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat likely to occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Species or species habitat likely to occur within area
Sterna dougallii Roseate Tern [817]		Breeding likely to occur within area
Sternula albifrons Little Tern [82849]	Vulnerable	Species or species habitat may occur within area
Migratory Marine Species		
Anoxypristis cuspidata Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera physalus Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
Carcharhinus longimanus Oceanic Whitetip Shark [84108]		Species or species habitat likely to occur within area
Carcharias taurus Grey Nurse Shark [64469]		Species or species habitat likely to occur within area
Carcharodon carcharias White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat may occur within area
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Dugong dugon Dugong [28]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Isurus oxyrinchus Shortfin Mako, Mako Shark [79073]		Species or species habitat likely to occur within area
Isurus paucus Longfin Mako [82947]		Species or species habitat likely to occur within area
Megaptera novaeangliae Humpback Whale [38]		Breeding known to occur within area
Mobula alfredi as Manta alfredi Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area
Mobula birostris as Manta birostris Giant Manta Ray [90034]		Species or species habitat likely to occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area
Orcaella heinsohni Australian Snubfin Dolphin [81322]	Vulnerable	Species or species habitat likely to occur within area

Charadrius veredus		
Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area
Glareola maldivarum		
Oriental Pratincole [840]		Species or species habitat may occur within area
Limnodromus semipalmatus		
Asian Dowitcher [843]	Vulnerable	Species or species habitat may occur within area
Limosa lapponica		
Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Numenius madagascariensis		
Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Pandion haliaetus		
Osprey [952]		Breeding known to occur within area
Thalasseus bergii		
Greater Crested Tern [83000]		Breeding known to occur within area

Other Matters Protected by the EPBC Act

Listed Marine Species		[Resource Information]
Scientific Name	Threatened Category	Presence Text
Bird		
Actitis hypoleucos		
Common Sandpiper [59309]		Species or species habitat known to occur within area

Scientific Name	Threatened Category	Presence Text
Anous stolidus Common Noddy [825]		Species or species habitat may occur within area
Apus pacificus Fork-tailed Swift [678]		Species or species habitat likely to occur within area overfly marine area
Ardenna pacifica as Puffinus pacificus Wedge-tailed Shearwater [84292]		Breeding known to occur within area
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat may occur within area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat may occur within area overfly marine area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat likely to occur within area overfly marine area
Calidris melanotos Pectoral Sandpiper [858]		Species or species habitat may occur within area overfly marine area
Calonectris leucomelas Streaked Shearwater [1077]		Species or species habitat likely to occur within area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat likely to occur within area
Charadrius veredus Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area overfly marine area
Chroicocephalus novaehollandiae as Larus novaehollandiae Silver Gull [82326]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
Fregata ariel Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat known to occur within area
Fregata minor Great Frigatebird, Greater Frigatebird [1013]		Species or species habitat may occur within area
Glareola maldivarum Oriental Pratincole [840]		Species or species habitat may occur within area overfly marine area
Haliaeetus leucogaster White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
Hirundo rustica Barn Swallow [662]		Species or species habitat may occur within area overfly marine area
Hydroprogne caspia as Sterna caspia Caspian Tern [808]		Breeding known to occur within area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat may occur within area overfly marine area
Limosa lapponica Bar-tailed Godwit [844]		Species or species habitat known to occur within area
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
Motacilla cinerea Grey Wagtail [642]		Species or species habitat may occur within area overfly marine area

Scientific Name	Threatened Category	Presence Text
Motacilla flava Yellow Wagtail [644]		Species or species habitat may occur within area overfly marine area
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
Onychoprion anaethetus as Sterna anaethetus Bridled Tern [82845]		Breeding known to occur within area
Onychoprion fuscatus as Sterna fuscata Sooty Tern [90682]		Breeding known to occur within area
Pandion haliaetus Osprey [952]		Breeding known to occur within area
Phaethon lepturus White-tailed Tropicbird [1014]		Species or species habitat likely to occur within area
Phaethon lepturus fulvus Christmas Island White-tailed Tropicbird, Golden Bosunbird [26021]	Endangered	Species or species habitat may occur within area
Phaethon rubricauda Red-tailed Tropicbird [994]		Species or species habitat likely to occur within area
Rostratula australis as Rostratula benghalensis (sensu lato) Australian Painted Snipe [77037]	Endangered	Species or species habitat may occur within area overfly marine area
Sterna dougallii Roseate Tern [817]		Breeding likely to occur within area
Sternula albifrons as Sterna albifrons Little Tern [82849]	Vulnerable	Species or species habitat may occur within area
Sternula nereis as Sterna nereis Fairy Tern [82949]		Breeding known to occur within area

Scientific Name	Threatened Category	Presence Text
[Thalasseus bengalensis as Sterna bengalensis](#) Lesser Crested Tern [66546]		Breeding known to occur within area
[Thalasseus bergii as Sterna bergii](#) Greater Crested Tern [83000]		Breeding known to occur within area
Fish		
[Acentronura larsonae](#) Helen's Pygmy Pipehorse [66186]		Species or species habitat may occur within area
[Bulbonaricus brauni](#) Braun's Pughead Pipefish, Pug-headed Pipefish [66189]		Species or species habitat may occur within area
[Campichthys tricarinatus](#) Three-keel Pipefish [66192]		Species or species habitat may occur within area
[Choeroichthys brachysoma](#) Pacific Short-bodied Pipefish, Short-bodied Pipefish [66194]		Species or species habitat may occur within area
[Choeroichthys latispinosus](#) Muiron Island Pipefish [66196]		Species or species habitat may occur within area
[Choeroichthys suillus](#) Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
[Corythoichthys flavofasciatus](#) Reticulate Pipefish, Yellow-banded Pipefish, Network Pipefish [66200]		Species or species habitat may occur within area
[Cosmocampus banneri](#) Roughridge Pipefish [66206]		Species or species habitat may occur within area
[Doryrhamphus dactyliophorus](#) Banded Pipefish, Ringed Pipefish [66210]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Doryrhamphus excisus Bluestripe Pipefish, Indian Blue-stripe Pipefish, Pacific Blue-stripe Pipefish [66211]		Species or species habitat may occur within area
Doryrhamphus janssi Cleaner Pipefish, Janss' Pipefish [66212]		Species or species habitat may occur within area
Doryrhamphus multiannulatus Many-banded Pipefish [66717]		Species or species habitat may occur within area
Doryrhamphus negrosensis Flagtail Pipefish, Masthead Island Pipefish [66213]		Species or species habitat may occur within area
Festucalex scalaris Ladder Pipefish [66216]		Species or species habitat may occur within area
Filicampus tigris Tiger Pipefish [66217]		Species or species habitat may occur within area
Halicampus brocki Brock's Pipefish [66219]		Species or species habitat may occur within area
Halicampus grayi Mud Pipefish, Gray's Pipefish [66221]		Species or species habitat may occur within area
Halicampus nitidus Glittering Pipefish [66224]		Species or species habitat may occur within area
Halicampus spinirostris Spiny-snout Pipefish [66225]		Species or species habitat may occur within area
Haliichthys taeniophorus Ribboned Pipehorse, Ribboned Seadragon [66226]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hippichthys penicillus Beady Pipefish, Steep-nosed Pipefish [66231]		Species or species habitat may occur within area
Hippocampus angustus Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
Hippocampus histrix Spiny Seahorse, Thorny Seahorse [66236]		Species or species habitat may occur within area
Hippocampus kuda Spotted Seahorse, Yellow Seahorse [66237]		Species or species habitat may occur within area
Hippocampus planifrons Flat-face Seahorse [66238]		Species or species habitat may occur within area
Hippocampus spinosissimus Hedgehog Seahorse [66239]		Species or species habitat may occur within area
Hippocampus trimaculatus Three-spot Seahorse, Low-crowned Seahorse, Flat-faced Seahorse [66720]		Species or species habitat may occur within area
Micrognathus micronotopterus Tidepool Pipefish [66255]		Species or species habitat may occur within area
Phoxocampus belcheri Black Rock Pipefish [66719]		Species or species habitat may occur within area
Solegnathus hardwickii Pallid Pipehorse, Hardwick's Pipehorse [66272]		Species or species habitat may occur within area
Solegnathus lettiensis Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Solenostomus cyanopterus Robust Ghostpipefish, Blue-finned Ghost Pipefish, [66183]		Species or species habitat may occur within area
Syngnathoides biaculeatus Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
Trachyrhamphus bicoarctatus Bentstick Pipefish, Bend Stick Pipefish, Short-tailed Pipefish [66280]		Species or species habitat may occur within area
Trachyrhamphus longirostris Straightstick Pipefish, Long-nosed Pipefish, Straight Stick Pipefish [66281]		Species or species habitat may occur within area
Mammal		
Dugong dugon Dugong [28]		Species or species habitat known to occur within area
Reptile		
Aipysurus apraefrontalis Short-nosed Sea Snake, Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus duboisii Dubois' Sea Snake, Dubois' Seasnake, Reef Shallows Sea Snake [1116]		Species or species habitat may occur within area
Aipysurus foliosquama Leaf-scaled Sea Snake, Leaf-scaled Seasnake [1118]	Critically Endangered	Species or species habitat known to occur within area
Aipysurus laevis Olive Sea Snake, Olive-brown Sea Snake [1120]		Species or species habitat may occur within area
Aipysurus mosaicus as Aipysurus eydouxii Mosaic Sea Snake [87261]		Species or species habitat may occur within area
Aipysurus tenuis Brown-lined Sea Snake, Mjoberg's Sea Snake [1121]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Caretta caretta Loggerhead Turtle [1763]	Endangered	Breeding known to occur within area
Chelonia mydas Green Turtle [1765]	Vulnerable	Breeding known to occur within area
Crocodylus porosus Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Breeding likely to occur within area
Emydocephalus annulatus Eastern Turtle-headed Sea Snake [1125]		Species or species habitat may occur within area
Ephalophis greyae as Ephalophis greyi Mangrove Sea Snake [93738]		Species or species habitat may occur within area
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Breeding known to occur within area
Hydrelaps darwiniensis Port Darwin Sea Snake, Black-ringed Mangrove Sea Snake [1100]		Species or species habitat may occur within area
Hydrophis czeblukovi Fine-spined Sea Snake [59233]		Species or species habitat may occur within area
Hydrophis elegans Elegant Sea Snake, Bar-bellied Sea Snake [1104]		Species or species habitat may occur within area
Hydrophis kingii as Disteira kingii Spectacled Sea Snake [93511]		Species or species habitat may occur within area
Hydrophis macdowelli as Hydrophis mcdowelli MacDowell's Sea Snake, Small-headed Sea Snake, [75601]		Species or species habitat may occur within area

Scientific Name	Threatened Category	Presence Text
Hydrophis major as Disteira major Olive-headed Sea Snake [93512]		Species or species habitat may occur within area
Hydrophis ornatus Spotted Sea Snake, Ornate Reef Sea Snake [1111]		Species or species habitat may occur within area
Hydrophis peronii as Acalyptophis peronii Horned Sea Snake [93509]		Species or species habitat may occur within area
Hydrophis platura as Pelamis platurus Yellow-bellied Sea Snake [93746]		Species or species habitat may occur within area
Hydrophis stokesii as Astrotia stokesii Stokes' Sea Snake [93510]		Species or species habitat may occur within area
Natator depressus Flatback Turtle [59257]	Vulnerable	Breeding known to occur within area

Whales and Other Cetaceans		[Resource Information]
Current Scientific Name	Status	Type of Presence
Mammal		
Balaenoptera acutorostrata Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera borealis Sei Whale [34]	Vulnerable	Species or species habitat likely to occur within area
Balaenoptera edeni Bryde's Whale [35]		Species or species habitat likely to occur within area
Balaenoptera musculus Blue Whale [36]	Endangered	Migration route known to occur within area
Balaenoptera omurai Omura's Whale [87136]		Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
[Balaenoptera physalus](#) Fin Whale [37]	Vulnerable	Species or species habitat likely to occur within area
[Delphinus delphis](#) Common Dolphin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
[Feresa attenuata](#) Pygmy Killer Whale [61]		Species or species habitat may occur within area
[Globicephala macrorhynchus](#) Short-finned Pilot Whale [62]		Species or species habitat may occur within area
[Grampus griseus](#) Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
[Kogia breviceps](#) Pygmy Sperm Whale [57]		Species or species habitat may occur within area
[Kogia sima](#) Dwarf Sperm Whale [85043]		Species or species habitat may occur within area
[Lagenodelphis hosei](#) Fraser's Dolphin, Sarawak Dolphin [41]		Species or species habitat may occur within area
[Megaptera novaeangliae](#) Humpback Whale [38]		Breeding known to occur within area
[Mesoplodon densirostris](#) Blainville's Beaked Whale, Dense-beaked Whale [74]		Species or species habitat may occur within area
[Orcaella heinsohni](#) Australian Snubfin Dolphin [81322]	Vulnerable	Species or species habitat likely to occur within area

Current Scientific Name	Status	Type of Presence
Orcinus orca Killer Whale, Orca [46]		Species or species habitat may occur within area
Peponocephala electra Melon-headed Whale [47]		Species or species habitat may occur within area
Physeter macrocephalus Sperm Whale [59]		Species or species habitat may occur within area
Pseudorca crassidens False Killer Whale [48]		Species or species habitat likely to occur within area
Sousa sahulensis Australian Humpback Dolphin [87942]	Vulnerable	Species or species habitat likely to occur within area
Stenella attenuata Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
Stenella coeruleoalba Striped Dolphin, Euphrosyne Dolphin [52]		Species or species habitat may occur within area
Stenella longirostris Long-snouted Spinner Dolphin [29]		Species or species habitat may occur within area
Steno bredanensis Rough-toothed Dolphin [30]		Species or species habitat may occur within area
Tursiops aduncus Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
Tursiops aduncus (Arafura/Timor Sea populations) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area

Current Scientific Name	Status	Type of Presence
Tursiops truncatus s. str. Bottlenose Dolphin [68417]		Species or species habitat may occur within area
Ziphius cavirostris Cuvier's Beaked Whale, Goose-beaked Whale [56]		Species or species habitat may occur within area

Australian Marine Parks [Resource Information]

Key Ecological Features [Resource Information]

Key Ecological Features are the parts of the marine ecosystem that are considered to be important for the biodiversity or ecosystem functioning and integrity of the Commonwealth Marine Area.

Name	Region
Ancient coastline at 125 m depth contour	North-west
Glomar Shoals	North-west

Biologically Important Areas [Resource Information]

Scientific Name	Behaviour	Presence
Marine Turtles		
Caretta caretta		
Loggerhead Turtle [1763]	Internesting buffer	Known to occur

Scientific Name	Behaviour	Presence
Caretta caretta Loggerhead Turtle [1763]	Nesting	Known to occur
Chelonia mydas Green Turtle [1765]	Foraging	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting	Known to occur
Chelonia mydas Green Turtle [1765]	Internesting buffer	Known to occur
Chelonia mydas Green Turtle [1765]	Mating	Known to occur
Chelonia mydas Green Turtle [1765]	Migration corridor	Known to occur
Chelonia mydas Green Turtle [1765]	Nesting	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Foraging	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Internesting buffer	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Mating	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Migration corridor	Known to occur
Eretmochelys imbricata Hawksbill Turtle [1766]	Nesting	Known to occur
Natator depressus Flatback Turtle [59257]	Foraging	Known to occur

Scientific Name	Behaviour	Presence
Natator depressus Flatback Turtle [59257]	Internesting	Known to occur
Natator depressus Flatback Turtle [59257]	Internesting buffer	Known to occur
Natator depressus Flatback Turtle [59257]	Mating	Known to occur
Natator depressus Flatback Turtle [59257]	Migration corridor	Known to occur
Natator depressus Flatback Turtle [59257]	Nesting	Known to occur
Seabirds		
Ardenna pacifica Wedge-tailed Shearwater [84292]	Breeding	Known to occur
Sterna dougallii Roseate Tern [817]	Breeding	Known to occur
Sternula nereis Fairy Tern [82949]	Breeding	Known to occur
Thalasseus bengalensis Lesser Crested Tern [66546]	Breeding	Known to occur
Sharks		
Rhincodon typus Whale Shark [66680]	Foraging	Known to occur
Whales		
Balaenoptera musculus brevicauda Pygmy Blue Whale [81317]	Migration	Known to occur
Megaptera novaeangliae Humpback Whale [38]	Migration (north and south)	Known to occur

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data is available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance on the contents of this report.

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions when time permits.

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded breeding sites; and
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements

This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

-Office of Environment and Heritage, New South Wales
-Department of Environment and Primary Industries, Victoria
-Department of Primary Industries, Parks, Water and Environment, Tasmania
-Department of Environment, Water and Natural Resources, South Australia
-Department of Land and Resource Management, Northern Territory

6.9.2.5 Edition Q3 – October 2025 426

1. CONSULTATION APPROACH

Consultation under regulation 25 of the OPGGS(E) Regulations provides that a titleholder must consult each relevant person (regulation 25(1)), must give each relevant person sufficient information to allow the relevant person to make an informed assessment of the possible consequences of the activity on the functions, interests or activities of the relevant person (regulation 25(2)), must allow a relevant person a reasonable period for consultation (regulation 25(3)).

A titleholder must also give a relevant person a reasonable opportunity to consult – this means that a titleholder will need to demonstrate that what it did constituted consultation appropriate and adapted to the nature of the interests of the relevant person (see Tipakalippa Full Court paragraph 104). The EP must contain a report that contains an assessment of the merits of any objection or claim about the adverse impact of each activity to which the EP relates and a statement of the titleholder's response, or proposed response, if any, to each objection or claim (regulation 24(b)).

The criteria for acceptance of an EP includes that the EP demonstrates that the measures (if any) that the titleholder has adopted, or proposes to adopt, because of the consultations are appropriate (regulation 34(g)).

For the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Environment Plan (EP), Woodside has taken a broad and proactive tiered consultation approach over a period of 17 months.

This approach was aimed at raising public awareness of the consultation opportunity and to enable self-identification. It included a social media campaign and advertising in national, state, regional and Indigenous newspapers.

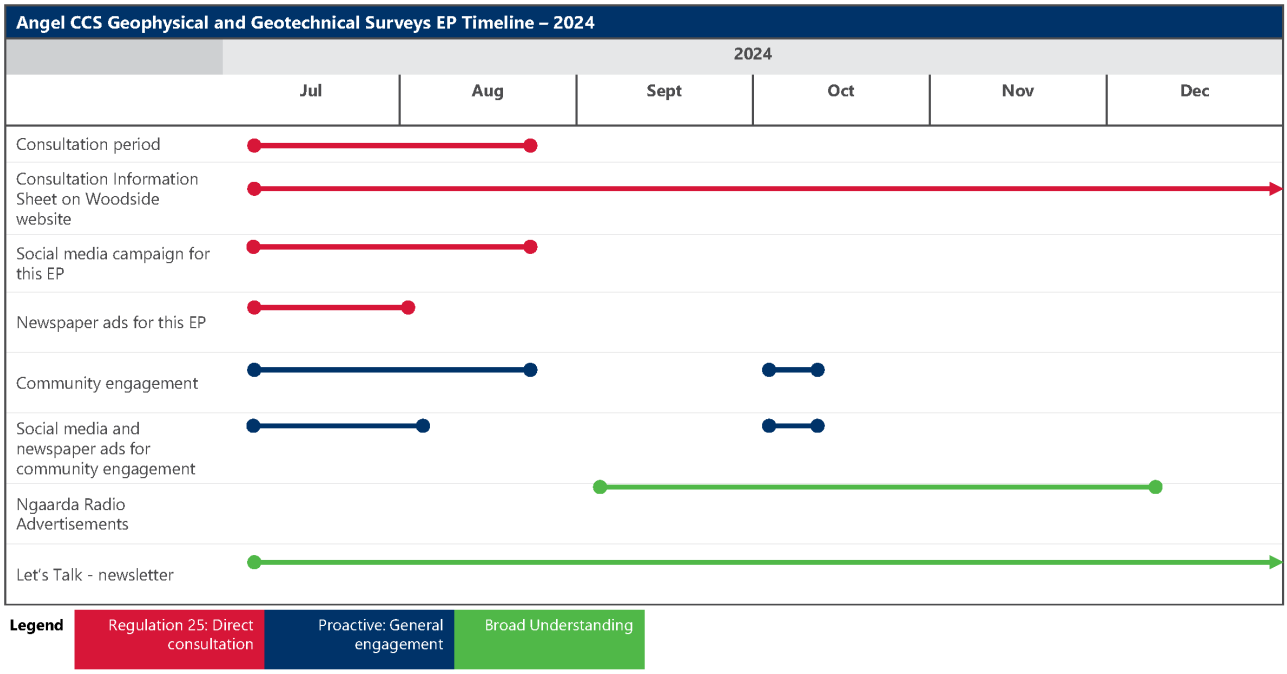
The tiered consultation approach discharges regulation 25 of the Environment Regulations' requirements. The approach is proactive, extended, has enabled self-identification, and has raised broad awareness of Woodside's activities related to this EP.

1.1 Tiered consultation approach

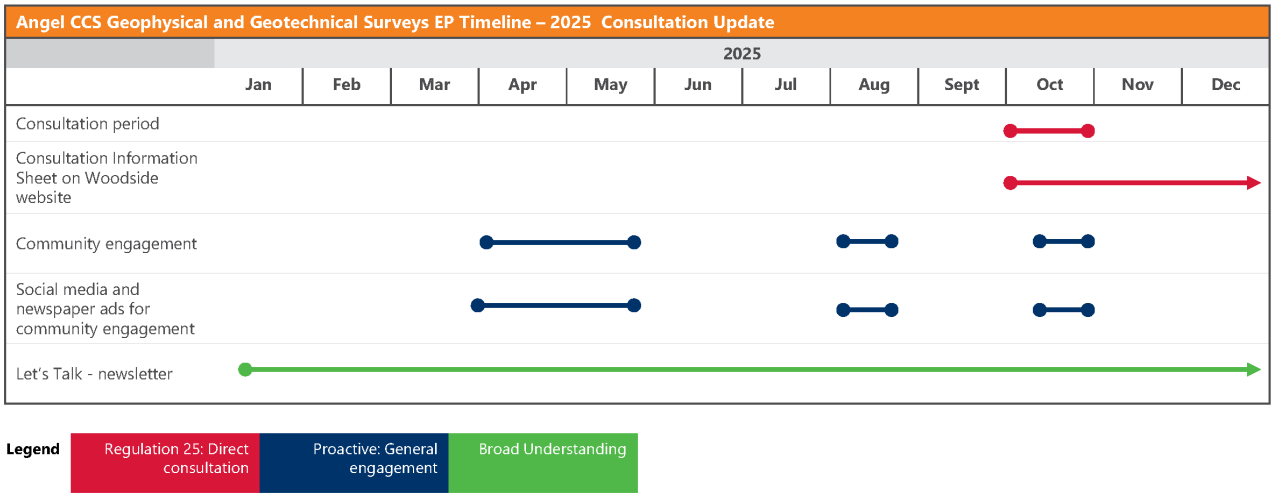
Regulation 25	Woodside's consultation approach assessed and identified relevant persons, enabled two-way dialogue and engagement, and included email and phone call follow up. The approach taken comfortably satisfies the requirements of regulation 25: to give relevant persons sufficient information and allow a reasonable period of time for consultation (see Section 5 in the EP).
Proactive	To raise awareness of the consultation process, and to enable grass-roots consultation, Woodside undertook advertised regional consultation roadshows and facilitated consultation at regional community events.
Broad Understanding	Broad communication activities were undertaken to build awareness of consultation and enable self-identification, supported by targeted education materials.

1.2 Building on the existing consultation approach

For this EP, Woodside has built on its consultation methodology and undertaken additional consultation activities throughout the consultation period to ensure a reasonable period of time and sufficient information has been provided to relevant persons so that they can make an informed assessment of the possible consequences of the activity on their functions, interests or activities.



The approach for this included:



- a consultation period of up to 17 months

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- undertaking proactive consultation activities to provide sufficient information to relevant persons
- raising awareness of the consultation process and opportunity to provide feedback
- driving participation in the consultation process.

An overview of this approach is shown below from the initial consultation period in 2024 and consultation update in 2025:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

1.3 Traditional Custodian consultation approach

Woodside has meaningful long-term relationships with relevant First Nations people specifically tailored to provide for effective engagement which is continuous and is not confined to individual EPs, instead covering all EPs and other issues that are relevant at the time of engagement.

To this end, consultation on any particular EP, including the Angel CCS GPGT Surveys EP, happens before, during and after the designated consultation period in a more holistic manner allowing for an understanding of the bigger picture and accommodating cultural requirements. Ongoing consultation remains an important part of consulting with First Nations people based on availability, cultural protocols and the preferred method of consultation for each relevant person.

Woodside consulted on this EP in 2024, however, due to operational decisions, the EP relating to this consultation was not submitted for assessment. Noting this, Woodside provided an additional opportunity for stakeholders to provide feedback in October 2025.

1.4 NGO consultation approach

Woodside has an established history of consulting with environmental non-government organisations (NGOs) as part of its EP consultation. In its methodology (Section 5.3.4, Table 5-2), NGOs are considered “Other non-government groups or organisations” and “Research institutes and local conservation groups or organisations”. Relevant person identification for these categories is based on registered non-government groups or organisations with current targeted public website material specific to the proposed activity at the time of developing the EP and who have demonstrated functions, interests or activities relevant to the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation.

So that NGOs were given sufficient information and a reasonable period of time to consult, Woodside:

- advertised the consultation period (social and traditional media)
- directly consulted NGOs
- participated in regional community events (which were advertised) in the Pilbara, which could be attended by any NGOs including local groups (if NGOs attended these sessions, they did not identify themselves).
- participated in regional community events (which were advertised) in the Pilbara, which could be attended by any NGOs including local groups (if NGOs attended these sessions, they did not identify themselves).

1.5 NGO response

Woodside consulted 7 NGOs at its discretion. During initial consultation for the Angel CCS GPGT Surveys EP in July 2025, no responses from NGOs were received. Following the consultation update in October 2025, Doctors for the Environment Australia (DEA), provided feedback on the surveys, but most feedback focused on the greater CCS topic which is outside the scope of the EP.

2. RELEVANCY ASSESSMENT

2.1 Assessment of relevant persons for the proposed activity

The result of Woodside's assessment of relevant persons in accordance with regulation 25 (1) of the Environment Regulations is outlined below at Table 1 and Table 2.

Persons or organisations that Woodside assessed as not relevant but nonetheless chose to contact at its discretion in accordance with Section 5.3.7 in the EP or self-identified and Woodside assessed as not relevant are summarised below at Table 1 and Table 3.

As per Woodside's methodology (Section 5 in the EP), assessment of relevant persons is informed by the EMBA, shown in Figure 2-1.

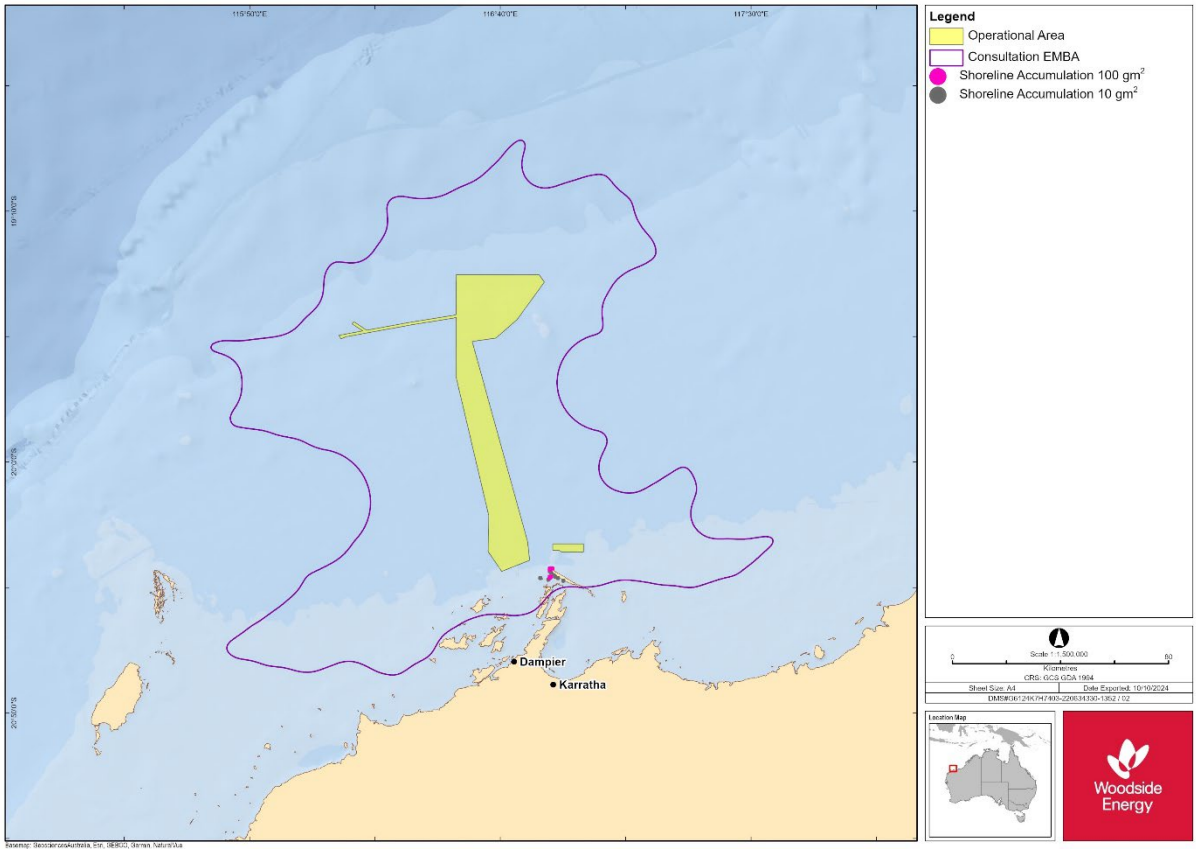

Figure 2-1: Operational Area and EMBA for this EP

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

2.2 Table 1: Assessment of relevance

Person or Organisation	Summary of responsibilities and/or functions, interests or activities	Assessment of relevance	Relevant person
Commonwealth and WA State Government Departments or Agencies – Marine			
Australian Border Force (ABF)	Responsible for coordinating maritime security	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. ABF's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Australian Communications and Media Authority (ACMA)	Regulator for communications and media	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. ACMA's responsibilities may be relevant to the activity as there maybe telecommunications lines that intersect the Operational Area.	Yes
Australian Fisheries Management Authority (AFMA)	Responsible for managing Commonwealth fisheries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. No Commonwealth fisheries are active in the Operational Area. The North West Slope Trawl Fishery is active in the EMBA. AFMA's responsibilities may be relevant to the activity as the North West Slope Trawl Fishery is active in the EMBA.	Yes
Australian Hydrographic Office (AHO)	Responsible for maritime safety and Notices to Mariners	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AHO's responsibilities may be relevant to the activity as there are proposed vessel activities.	Yes
Australian Maritime Safety Authority (AMSA) – Marine Pollution	Legislated responsibility for oil pollution response in Commonwealth waters	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. AMSA – Marine Pollution's responsibilities may be relevant to the activity as the proposed activity has a hydrocarbon spill risk which may require AMSA response in Commonwealth waters.	Yes
Australian Maritime Safety Authority	Statutory agency for vessel safety and navigation	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(AMSA) – Marine Safety		AMSA – MarineSafety's responsibilities may be relevant to the activity as there are proposed vessel activities.	
Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries	Responsible for implementing Commonwealth policies and programs to support agriculture, fishery, food and forestry industries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. No Commonwealth fisheries are active in the Operational Area. The North West Slope Trawl Fishery is active in the EMBA. DAFF – Fisheries responsibilities may be relevant to the activity as the North West Slope Trawl Fishery is active in the EMBA.	Yes
Department of Defence (DoD)	Responsible for defending Australia and its national interests.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(a) of the Environment Regulations. DoD's responsibilities may be relevant to the activity as defence training areas lie within the Operating Area and EMBA.	Yes
Department of Planning, Lands and Heritage (DPLH)	Responsible for state level land use planning and management, and oversight of Aboriginal cultural heritage and built heritage matters.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. There is known Maritime Cultural Heritage overlapping the EMBA.	Yes
Department of Primary Industries and Regional Development (DPIRD)	Responsible for managing State fisheries	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The Mackerel Managed Fishery (Area 2), Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Fish Trawl Managed Fishery, Pilbara Trap Managed Fishery, Pilbara Line Fishery and Specimen Shell Managed Fishery are active in the Operational Area. The Mackerel Managed Fishery (Area 2), Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Fish Trawl Managed Fishery, Pilbara Trap Managed Fishery, Pilbara Line Fishery Specimen Shell Managed Fishery and Western Australia Sea Cucumber Fishery have been active in the EMBA within the last 5 years. DPIRD's responsibilities may be relevant to the activity as the government department responsible for State fisheries.	Yes
Department of Transport and Major Infrastructure (DTMI,	Legislated responsibility for oil pollution response in State waters	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

previously known as Department of Transport/DoT)		The proposed activity has a hydrocarbon spill risk tied to vessel collision, which may require DTMI response in State waters.	
Pilbara Ports	Pilbara Ports encompasses the Ports of Ashburton, Dampier, Port Hedland and Varanus Island. Pilbara Ports oversees the operation of the greenfield ports of Anketell, Balla Balla, Cape Preston East, Cape Preston West and Urala. Pilbara Ports oversees *the Shipping and Pilotage Act 1967* ports of Barrow Island, Cape Preston, Onslow and Port Walcott.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The proposed activity has the potential to impact Pilbara Ports' responsibilities as the EMBA overlaps the Pilbara Ports' area of responsibility.	Yes
Western Australian Museum (WAM)	Manages 200 shipwreck sites of the 1,500 known to be located off the Western Australian coast.	Woodside has applied its methodology for 'Historical cultural heritage groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There are known shipwrecks overlapping the EMBA for which the Western Australian Museum may be responsible.	Yes
Commonwealth and WA State Government Departments or Agencies – Environment			
Clean Energy Regulator (CER)	The Clean Energy Regulator administers schemes legislated by the Australian Government for measuring, managing, reducing or offsetting Australia's carbon emissions, determined by climate change law.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. CER's responsibilities are not relevant to this EP as Woodside consults CER for operational EPs in relation to emissions and climate related matters.	No
Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine	DAFF administers, implements and enforces the *Biosecurity Act 2015*. The Department requests	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

pests, vessels, aircraft and personnel)	to be consulted where an activity has the potential to transfer marine pests. DAFF also has inspection and reporting requirements to ensure that all conveyances (vessels, installations and aircraft) arriving in Australian territory comply with international health regulations and that any biosecurity risk is managed. DAFF requests to be consulted where an activity involves the movement of aircraft or vessels between Australia and offshore petroleum activities either inside or outside Australian territory.	DAFF – Biosecurity's responsibilities may be relevant to the proposed activities in the EMBA in the prevention of introduced marine species.	
Department of Biodiversity, Conservation and Attractions (DBCA)	Responsible for managing WA's parks, forests and reserves to achieve wildlife conservation and provide sustainable recreation and tourism opportunities.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. The DBCA's responsibilities may be relevant to the activity as the EMBA overlaps WA parks, forests or reserves. Activities have the potential to impact marine tourism in the EMBA.	Yes
Department of Climate Change, Energy, the Environment and Water (DCCEEW)	Responsible for implementing Commonwealth policies and programs to support climate change, sustainable energy use, water resources, the environment and our heritage. Administers the *Underwater Cultural Heritage Act 2018* in collaboration with the	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DCCEEW's responsibilities may be relevant to the proposed activities in the EMBA as there are potential environmental impacts from the proposed activity.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	States, Northern Territory and Norfolk Island, which is responsible for the protection of shipwrecks, sunken aircraft and other types of underwater heritage and their associated artefacts in Commonwealth waters.		
Director of National Parks (DNP)	Responsible for the management of Commonwealth parks and conservation zones.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. DNP's responsibilities may be relevant to the activity as DNP requires an awareness of activities that occur within Australian Marine Parks (AMPs), and an understanding of potential impacts and risks to the values of parks (NOPSEMA guidance note N-04750-GN1785 A620236, June 2020). Titleholders are required to consult DNP on offshore petroleum activities if they occur in, or may impact on the values of marine parks, including where potential spill response activities may occur in the event of a spill (i.e. scientific monitoring).	Yes
Department of Water Environment Regulation (DWER)	Responsible for management and regulation of WA's environment and water resources.	DPLH requested DWER be consulted. Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(b) of the Environment Regulations. The department is responsible for WA environment and water regulation, serving as a 'one stop shop' for industry and developers, with the aim of streamlining and simplifying regulation. Woodside chose to contact DWER at its discretion in line with Section 5.3.7.	No.
Ningaloo Coast World Heritage Advisory Committee (NCWHAC)	Supports the DBCA to manage the Ningaloo Coast World Heritage Area.	Woodside has applied its methodology for 'Government departments / agencies – environment' under regulation 25(1)(a) of the Environment Regulations. NCWHAC's responsibilities are not relevant to the activity as the EMBA does not overlap the Ningaloo Marine Park.	No
Commonwealth and State Government Departments or Agencies – Industry			
Department of Mines, Petroleum and Exploration (DMPE, formerly known as Department of Energy, Mines, Industry	Department of relevant State Minister	Required to be consulted under regulation 25(1)(c) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Regulation and Safety (DEMIRS))			
Department of Industry, Science and Resources (DISR)	Department of relevant Commonwealth Minister.	Required to be consulted under regulation 25(1)(a) of the Environment Regulations.	Yes
Commonwealth Commercial fisheries and peak representative bodies			
Australian Southern Bluefin Tuna Industry Association (ASBTIA)	Represents the interests of the Southern Bluefin Tuna Fishery and Western Skipjack Fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Southern Bluefin Tuna Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Southern Bluefin Tuna Fishery, the ASBTIA has also been assessed as not relevant. Woodside chose to contact ASBTIA at its discretion in line with Section 5.3.7.	No
Commonwealth Fisheries Association (CFA)	Represents the interests of commercial fishers with licenses in Commonwealth waters	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. No fisheries are active in the Operational Area. CFA's functions may be relevant to the activity as the North West Slope Trawl Fishery is active in the EMBA.	Yes
North West Slope Trawl Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area, it has not been active in the Operational Area within the last 5 years. The fishery overlaps the EMBA and has been active in the EMBA within the last 5 years.	Yes
Pearl Producers Association (PPA)	Peak representative organisation of The Australian South Sea Pearling Industry, with members in Western Australia and the Northern Territory	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Pearl Oyster Managed Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Pearl Oyster Managed Fishery, the PPA has also been assessed as not relevant.	No
Southern Bluefin Tuna Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years.	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Woodside does not consider that the proposed activity will present a risk to licence holders, given since 1992, the majority of Australian catch has concentrated in south-eastern Australia. (Patterson et al., 2022). In addition, given fishing methods by licence holders for species fished in this fishery (Australia has a 35% share of total global allowable catch of Southern Bluefin Tuna, which is value-added through tuna ranching near Port Lincoln (South Australia), or fishing effort in New South Wales (Australian Southern Bluefin Tuna Industry Association). Woodside chose to contact ASBTIA and Southern Bluefin Tuna Fishery at its discretion in line with Section 5.3.7.	
Tuna Australia	Represents the interests of the Western Tuna and Billfish Fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The Western Tuna and Billfish Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the Western Tuna and Billfish Fishery, Tuna Australia has also been assessed as not relevant. Woodside chose to contact Tuna Australia at its discretion in line with Section 5.3.7.	No
Western Deepwater Trawl Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area or the EMBA.	No
Western Skipjack Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area or the EMBA. Woodside chose to contact the fishery at its discretion in line with Section 5.3.7.	No
Western Tuna and Billfish Fishery	Commonwealth commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, it has not been active in the Operational Area or EMBA within the last 5 years. Woodside chose to contact the fishery at its discretion in line with Section 5.3.7.	No
State Commercial fisheries and peak representative bodies			
Aquaculture Council of Western Australia (ACWA)	State peak body for WA's aquaculture industry.	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under 25(1)(b) of the Environment Regulations. ACWA has been assessed as relevant to the proposed activity, as there are pearl leases active in the EMBA.	YES – added in 2025 consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Western Australian Fishing Industry Council (WAFIC)	Represents the interests of commercial fishers with licences in State waters.	Woodside has applied its methodology for 'Government departments / agencies – marine' under regulation 25(1)(b) of the Environment Regulations. The Mackerel Managed Fishery (Area 2), Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Trawl Fishery, Pilbara Trap Fishery, Pilbara Line Fishery and Specimen Shell Managed Fishery have been active in the Operational Area within the last five years. The Mackerel Managed Fishery (Area 2), Marine Aquarium Fish Managed Fishery, Nickol Bay Prawn Managed Fishery, Onslow Prawn Managed Fishery, Pilbara Crab Managed Fishery, Pilbara Trawl Fishery, Pilbara Trap Fishery, Pilbara Fishery, Specimen Shell Managed Fishery and Western Australia Sea Cucumber Fishery have been active in the EMBA within the last 5 years. WAFIC's functions may be relevant to the activity as the peak representative body for State fisheries. Under an agreement with Woodside, WAFIC issued consultation materials to relevant commercial fisheries licence holders. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would be undertaken only in the event of an unplanned emergency scenario.	Yes
Abalone Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, the fishery has not been active in the Operational Area or EMBA within the last 5 years.	No
Exmouth Gulf Prawn Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area or the EMBA.	No
Gascoyne Demersal Scalefish Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area or the EMBA.	No
Land Hermit Crab Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		The fishery does not overlap the Operational Area or the EMBA.	
Mackerel Managed Fishery (Area 2)	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and the EMBA and has been active in the Operational Area and the EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
Marine Aquarium Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. Proposed activities include water depths of 0-35 m. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
Nickol Bay Prawn Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Northern Demersal Scalefish Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery is not in the Operational Area or EMBA.	No
Onslow Prawn Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
Pearl Oyster Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. Although the fishery overlaps the Operational Area and EMBA, the fishery has not been active in the Operational Area or EMBA within the last 5 years.	No
Pilbara Crab Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
Demersal Scalefish Fishery: Pilbara Trawl Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	
Demersal Scalefish Fishery: Pilbara Trap Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
Demersal Scalefish Fishery: Pilbara Line Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. Woodside acknowledges WAFIC's consultation guidance and has applied this by consulting, via WAFIC, fisheries that are assessed as having a potential for interaction in the Operational Area. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	Yes
Shark Bay Crab Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery is not in the Operational Area or EMBA.	No
Shark Bay Prawn Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery is not in the Operational Area or EMBA.	No

Shark Bay Scallop Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery is not in the Operational Area or EMBA.	No
South West Coast Salmon Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA but has not been active in the Operational Area and EMBA within the last 5 years. Woodside does not consider that the activity will present a risk to licence holders, given fishers are active south of Perth and from the beach (previous WAFIC advice). Further, no fishing occurs north of the Perth Metropolitan Area and therefore, no effort occurs within the Operational Area or EMBA.	No
Specimen Shell Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA and has been active in the Operational Area and EMBA within the last 5 years. While Woodside assessed the fishery as relevant in the Operational Area, WAFIC has advised there is no need to consult this fishery given the proposed activities. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No
West Coast Deep Sea Crustacean Managed Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery overlaps the Operational Area and EMBA but has not been active in the Operational Area and EMBA within the last 5 years. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No
West Coast Demersal Scalefish Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area or EMBA.	No
West Coast Rock Lobster Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations.	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		The fishery does not overlap the Operational Area or EMBA.	
Western Australia Sea Cucumber Fishery	State commercial fishery	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The fishery does not overlap the Operational Area. The fishery overlaps the EMBA and has been active in the EMBA in the past five years. While Woodside assessed the fishery as relevant in the EMBA, WAFIC has advised there is no need to consult this fishery given the proposed activities. As per WAFIC's Commercial Fishing Consultation Framework for the Offshore Oil and Gas Sector and Consultation Approach for Unplanned Events, consultation with State fisheries relevant to the EMBA of the proposed activity would however be undertaken only in the event of an unplanned emergency scenario.	No
Western Rock Lobster Council	Represents the interests of the Western Rock Lobster Managed Fishery.	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under regulation 25(1)(d) of the Environment Regulations. The West Coast Rock Lobster Managed Fishery has been assessed as not relevant to the proposed activity. As the peak representative body for the West Coast Rock Lobster Managed Fishery, the Western Rock Lobster Council has also been assessed as not relevant.	No
Recreational marine users and peak representative bodies			
Marine Tourism WA	Represents the interests of marine tourism in WA.	Woodside has applied its methodology for 'Recreational marine users and representative bodies' under regulation 25(1)(d) of the Environment Regulations. Activities have the potential to impact recreational fishers' functions, interests or activities due to the location offshore and there has been recorded charter effort in the EMBA in the past 5 years.	Yes
Pilbara/Kimberley Recreational Marine Users	Pilbara/Kimberley-based dive, tourism and charter operators	Woodside has applied its methodology for 'Recreational marine users and representative bodies' under regulation 25(1)(d) of the Environment Regulations. Marine Rescue Dampier, Port Walcott Volunteer Marine Rescue , West Pilbara Volunteer Sea Search and Rescue Group, Archipelago Adventures, Hampton Harbour Boat & Sailing Club, Port Walcott Yacht Club , Reef Seeker Charters, King Bay Game Fishing Club, Nickol Bay Sport Fishing Club, Bardina Pty Ltd, Down the Line Charters Pty Ltd, Mackerel Islands Pty Ltd, Ocean Charters Pty Ltd, Serenity Isles Trading Company Pty Ltd, Wyndham Fishing Tours Pty Ltd, Charter Travel Company Pty Ltd, Kw Marine Pty Ltd, Norbrick Pty Ltd, Sail Ningaloo Pty Ltd, Tiffom Pty Ltd, Aoa International Pty Ltd, Australian Port And Marine Services Pty Ltd, Bloor Street Investments Pty Ltd, Blue Juice Tours Pty Ltd, Bondall Pty Ltd, Brefjen Nominees Pty Ltd, Broome Chiropractic Pty Ltd, Broome Tours Pty Ltd, C Emery Fishing Pty Ltd, Chapel Nominees Pty Ltd, Charter Express Pty Ltd, CM Ventures Pty Ltd, Coastway Investments Pty	Yes

		Ltd, Coral Princess Cruises (Nq) Pty Ltd, Discovery Holiday Parks Pty Limited, Diversity Charter Company Wa Pty Ltd, Eco-Abrolhos Pty Ltd, Fawesome Expeditions Pty Ltd, G. C. Bass Nominees Pty Ltd, Hartley Motorcycles Pty Ltd, Hotel And Resort Investments Pty Ltd, Humbug Fishing Pty Ltd, Kcc Group Pty Ltd, Kimberley Getaway Cruises Pty Ltd, Kimberley Marine Pty Ltd, Kimberley Quest Adventures Pty Ltd, King Sound Resort Hotel Pty Ltd, Kw Marine Pty Ltd, L & S Family Holdings Pty Ltd, Lake Argyle Cruises Pty Ltd, Lombadina Aboriginal Corporation, Lugger Enterprises Pty Ltd, Lulamanzi Investments Pty Ltd, Mackerel Islands Pty Ltd, Mal Miles Adventures Pty Ltd, Marine Agents Australia Pty Ltd, Maritime Engineering Services Pty Ltd, Melkit Pty Ltd, Millennial Charters Pty Ltd, Monster Sportfishing Adventures Pty Ltd, North Star Cruises Australia Pty Ltd, Ocean Charters Pty Ltd, RSTG Pty Limited, Sea 2 Pty Ltd, Sealife Charters Pty Ltd, Split Tide Pty Ltd, Super Yachts Perth Pty Ltd, The Great Escape Charter Company Pty Ltd, W.A Maritime Investments Pty Ltd, Willie Creek Pearl Farm Pty Ltd. Activities have the potential to impact Pilbara/Kimberley-based dive, tourism and charter operator's functions, interests or activities due to the location of activities and there has been recorded charter effort in the EMBA in the past 5 years.	
Recfishwest	Represents the interests of recreational fishers in WA.	Woodside has applied its methodology for 'Recreational marine users and representative bodies' under regulation 25(1)(d) of the Environment Regulations. Activities have the potential to impact recreational fishers' functions, interests or activities due to the location offshore and there has been recorded charter effort in the EMBA in the past 5 years.	Yes
WA Game Fishing Association	Represents the interests of game fishers in WA.	Woodside has applied its methodology for 'Recreational marine users and representative bodies' under regulation 25(1)(d) of the Environment Regulations. Activities have the potential to impact game fishers' functions, interests or activities due to the location offshore and there has been recorded charter effort in the EMBA in the past 5 years.	Yes
Titleholders and Operators			
Bounty Oil and Gas	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
Chevron Australia	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA and Operational Area.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Coastal Oil and Gas / consulted as Fox Resources	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
Exxon Mobil Australia Resources Company	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit areas overlaps the EMBA.	Yes
Finder Energy (Finder No 16)	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
Jadestone	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
JX Nippon O&G Exploration (Australia)	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
KATO Energy	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
KUFPEC	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
Longreach Capital Investment/ Beagle No. 1	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
Santos Energy	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA and Operational Area.	Yes
Vermilion Oil & Gas	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d). of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Skye Napoleon	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes
InCapture	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes – added in 2025 with new title G-15-AP
Carbon CQ	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes - added in 2025 with new title G-15-AP
SK Earthon Australia	Titleholder or Operator	Woodside has applied its methodology for 'Titleholders and Operators' under regulation 25(1)(d) of the Environment Regulations. Titleholder or Operator's permit area overlaps the EMBA.	Yes - added in 2025 with new title G-15-AP
Peak Industry Representative bodies			
Australian Energy Producers (AEP)	Represents the interests of oil and gas explorers and producers in Australia.	Woodside has applied its methodology for 'Peak Industry Representative bodies' under regulation 25(1)(d) of the Environment Regulations. AEP's responsibilities are identified as having an intersect with Woodside's planned activities in the EMBA.	Yes
Traditional Custodians and nominated representative corporations			
Murujuga Aboriginal Corporation (MAC)	Representative Aboriginal Corporation	Woodside has applied its methodology for 'Traditional Custodians and Nominated Representative Corporations' under regulation 25(1)(d) of the Environment Regulations. MAC was established to represent the members of competing Native Title claims over Murujuga, collectively known as the Ngarda Ngarli and comprising Mardudhunera, Ngarluma, Yaburara, Yindjibarndi and Wong-Goo-Tt-Oo people. The determination of the competing Native Title claims resulted in no Native Title being found over the lands subject to the Burrup and Maitland Industrial Estates Agreement (BMIEA) or below the low water mark. MAC also owns and co-manages the Murujuga National Park, is responsible for the Dampier Archipelago National Heritage Place and the World Heritage listed Murujuga Cultural Landscape. MAC is also the Nominated Representative Corporation under the BMIEA. The EMBA is coastally adjacent to the Burrup and Maitland Industrial Estates.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Ngarluma Aboriginal Corporation (NAC)	Representative Aboriginal Corporation	Woodside has applied its methodology for 'Traditional Custodians and Nominated Representative Corporations' under regulation 25(1)(d) of the Environment Regulations. The Ngarluma/Yindjibarndi People Native Title claim, for which NAC and the Yindjibarndi Aboriginal Corporation are the Registered Native Title Bodies Corporate, overlaps the EMBA. NAC is also party to the Anketell Port, Infrastructure Corridor and Industrial Estates Agreement, which overlaps the EMBA and the RTIO Ngarluma Indigenous Land Use Agreement (Body Corporate Agreement), which is coastally adjacent to the EMBA. The EMBA overlaps the Dampier Marine Park, over which the North West Management Plan 2018 specifies NAC and Yindjibarndi Aboriginal Corporation as representing people who may have cultural interests in the marine park.	Yes
Robe River Kuruma Aboriginal Corporation (RRKAC)	Representative Aboriginal Corporation	Woodside has applied its methodology for 'Traditional Custodians and Nominated Representative Corporations' under regulation 25(1)(d) of the Environment Regulations. The Robe River Kuruma Aboriginal Corporation is party to the KM & YM Indigenous Land Use Agreement 2018, which overlaps the EMBA.	Yes
Wirrawandi Aboriginal Corporation (WAC)	Representative Aboriginal Corporation	Woodside has applied its methodology for 'Traditional Custodians and Nominated Representative Corporations' under regulation 25(1)(d) of the Environment Regulations. The Yaburara & Mardudhunera People Native Title claim, for which WAC is the Registered Native Title Body Corporate, overlaps the EMBA. WAC is party to the KM & YM Indigenous Land Use Agreement 2018 and the Cape Preston Project Deed (YM Mardie ILUA), which overlap the EMBA, and party to the Cape Preston West Export Facility, which is coastally adjacent to the EMBA.	Yes
Yindjibarndi Aboriginal Corporation	Representative Aboriginal Corporation	Woodside has applied its methodology for 'Traditional Custodians and Nominated Representative Corporations' under regulation 25(1)(d) of the Environment Regulations. The Ngarluma/Yindjibarndi People Native Title claim, for which NAC and the Yindjibarndi Aboriginal Corporation are the Registered Native Title Bodies Corporate, overlaps the EMBA. The EMBA overlaps the Dampier Marine Park, over which the North West Management Plan 2018 specifies NAC and Yindjibarndi Aboriginal Corporation as representing people who may have cultural interests in the marine park.	Yes
Native Title Representative Bodies			
Kimberley Land Council (KLC)	Native Title Representative Body	Woodside has applied its methodology for 'Native Title Representative Bodies' under regulation 25(1)(d) of the Environment Regulations.	Yes

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		KLC is the Native Title Representative Body for the Kimberley region of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist Native Title claimants and holders. KLC's Representative Aboriginal/Torres Strait Islander Body (RATSIB) area overlaps the EMBA. KLC's functions may be relevant to the proposed activity in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation.	
Yamatji Marlpa Aboriginal Corporation (YMAC)	Native Title Representative Body	Woodside has applied its methodology for 'Native Title Representative Bodies' under regulation 25(1)(d) of the Environment Regulations. YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist Native Title claimants and holders. YMAC's functions may be relevant to the proposed activity in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation. YMAC is the specified contact for the Kuruma Marthudunera and Yaburara and Coastal Mardudhunera Indigenous Land Use Agreement, which is overlapped by the EMBA.	Yes
Self-identified First Nations groups			
Ngarluma Yindjibarndi Foundation Ltd (NYFL)	Representative Aboriginal Corporation	Woodside has applied its methodology for 'Traditional Custodians and Nominated Representative Corporations' under regulation 25(1)(d) of the Environment Regulations. The Ngarluma and Yindjibarndi People, the NWS JVs and Woodside entered into an agreement on 22 December 1998 (Agreement). NYFL was subsequently incorporated under the terms of the Agreement to act as trustee for the trust established to benefit the Ngarluma and Yindjibarndi People and the Roebourne Aboriginal Community. Subsequent to that, the Ngarluma people settled their native title claim and established their nominated representative corporation, the NAC; and the Yindjibarndi people settled their Native Title claim and established their nominated representative corporation, the Yindjibarndi Aboriginal Corporation. The NAC and the Yindjibarndi Aboriginal Corporation are the appropriate representative bodies for consultation in relation to cultural interests. NYFL's functions may be relevant to the proposed activity in relation to its functions under the Agreement.	Yes

		SOS and/ or [Individual 1] stated interest is to stop or pause Scarborough gas and to stop new industry on the Burrup; and oppose planned expansion of the Burrup Hub industry by Woodside, Perdaman and Yara. In addition, their stated interests also include the protection of Murujuga rock art. As SOS have raised concerns relating to the processing of greenhouse gases on Murujuga, Woodside considers that SOS and/ or [Individual 1] are relevant for this activity.	

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

3. CONSULTATION ACTIVITIES

3.1 Angel CCS GPGT Surveys EP consultation activities

Woodside has been conducting extensive consultation with relevant persons and other parties for this EP since July 2024 when consultation commenced with interested and affected stakeholders as part of a planned, integrated and consistent approach to stakeholder engagement for Woodside's proposed activities.

A broad consultation process has been undertaken with relevant persons for the Angel CCS GPGT Surveys EP. Consultation aims to be inclusive, transparent, voluntary, respectful and two-way. Consultation was undertaken by email, letter, phone call and/or meetings and through advertising.

3.2 Discharging Regulation 25 of the Environment Regulations

Woodside advertised the planned activities proposed for this EP in national, state and relevant local newspapers as per the table below (also see Record of Consultation, reference 6.5). Regional newspapers do not require subscription and are available directly to households.

No direct comments or feedback were received from the advertisements.

Newspaper	Coverage and readership	Publication dates
The Australian	National (464,000)	8 July 2024
The West Australian	Regional (WA) (349,000)	8 July 2024
Pilbara News	Local (WA) (17,611)	10 July 2024
Midwest Times	Local (WA) (50,534)	10 July 2024
North West Telegraph	Local (WA) (8,154)	10 July 2024
Kimberley Echo	Local (WA) (480)	11 July 2024
National Indigenous Times	National	30 July 2024

A Consultation Information Sheet was provided to relevant persons and persons Woodside chose to contact (see Section 5.3.4 in the EP), which included details such as an activity overview, maps, a summary of key risks and/or impacts and management measures (Record of Consultation, reference 6.1.1).

Since the commencement of the initial consultation period (8 July 2024), the stakeholder Consultation Information Sheet (CIS) has been available on Woodside's website. The consultation update issued starting on 1 October 2025, included a new CIS which is also available on Woodside's website. The Woodside Consultation Information Sheets include a toll-free 1800 phone number and Woodside's feedback email address (feedback@woodside.com) and later, the updated email address consultation@feedback.woodside.com.

The Woodside Consultation Activities webpage, (available by QR code on banners at community events and via social media content and advertisements) includes Consultation Information Sheets for the EPs on which Woodside is currently consulting, including this EP. The website page also features a subscribe field for EP-focused communications from Woodside.

Additional targeted information was provided to select relevant persons based on their roles and responsibilities such as a vessel density map (Record of Consultation, reference 6.1.4), GIS shape files, shipwreck information (Record of Consultation, reference 6.1.5.), a submarine communication cable map (Record of Consultation, reference 6.1.6) and a defence zone map (Record of Consultation, reference 6.1.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The relevant persons had two 30-day periods in which to provide feedback, given the initial consultation in July 2024 and consultation update in October 2025.

Where appropriate, Woodside conducted phone calls and meetings with relevant persons.

Where appropriate, targeted follow-up emails were sent to relevant persons who had not provided a response prior to the close of the target feedback period.

Woodside considered relevant person responses and assessed the merits and relevance of objections and claims about the potential adverse impact of the proposed activity set out in the EP, in accordance with the intended outcome of consultation (see Section 5.2 in the EP).

Consultation activities undertaken with relevant persons are summarised at Appendix F, Table 2.

Engagement undertaken with persons or organisations Woodside assessed as not relevant but chose to contact (see Section 5.3.7 in the EP) or self-identified and Woodside assessed as not relevant are summarised at Appendix F, Table 3.

From 8 July 2024, Woodside commenced a geotargeted sponsored social media campaign (Record of Consultation, reference 6.7) covering local government authorities within, or coastally adjacent to, the EMBA for the proposed activities. The campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations on how they can find out about Woodside's proposed activities by visiting Woodside's website.

Platform	Geotargeted Reach	Dates	Impact
Meta: Facebook & Instagram	Karratha/Pilbara	8 July 2024 - 10 August 2024	Reach: 118,882 Frequency: 1.97 Impressions: 233,807 Clicks: 577 Click Through Rate 0.48%:

Below is a summary of comments and reactions to the social media campaign. Please note comments and reactions are not available for Instagram.

3.3 Proactive consultation

3.3.1 Community engagement

The Community Information Sessions or community events that Woodside has conducted or attended are outlined below and captured in more detail in (Record of Consultation, reference 6.8. Woodside published advertisements ahead of these sessions and events in relevant local newspapers and on social media to support attendance.

Date (2024)	Location	Event (if applicable)
26 July 2024	Karratha	Community pop-up at Lo's Cafe

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

3-4 August 2024	Karratha	FeNaCING Festival 2024
24-25 August 2024	Onslow	Onslow Mack10 Fishing Competition
26-28 August 2024	Karratha	DNA Conference
12 October 2024	Dampier	Dampier Beachside Markets
2 November 2024	Dampier	Dampier Beachside Markets
19 March 2025	Dampier	Dampier Community Association “Who’s who in the hood”
6 April 2025	Dampier	Dampier Beachside Markets
4 May 2025	Dampier	Dampier Beachside Markets
15-16 May 2025	Karratha	Red Earth Arts Festival (REAF)
2-3 August 2025	Karratha	FeNaCING Festival 2024
18 October 2025	Dampier	Dampier Beachside Markets

3.3.2 Community Liaison Group engagement

The Exmouth and Karratha Community Liaison Groups (CLGs) represent the interests of a range of local government, industry and community organisations in relation to oil and gas matters in the Exmouth and Karratha region. Woodside regularly meets with the two CLGs to discuss a range of issues including consultation of specific EPs. The Karratha CLG was relevant for this EP (see 4.9.2 below for consultation summary).

3.3.3 Let’s Talk – EP Newsletter

In July 2024, Edition 3 of Woodside’s EP-focused newsletter *Let’s Talk* helped reach existing and potential stakeholders to inform relevant persons about its EP consultation. The newsletter shared updates about EP consultation activities, including the Angel CCS GPGT Surveys EP, case studies on effective consultation with relevant persons and other EP-focused updates such as upcoming events where Woodside personnel were consulting with the local community. It was distributed in a variety of locations as well as across digital platforms including via website at www.woodside.com, and social media platforms. People can also subscribe to receive it (Record of Consultation, reference 6.9.1).

Woodside also publishes the Karratha Community Update newsletter which includes a QR code and encourages people to go to the Woodside Consultation Activities webpage to subscribe and find information about EPs (Record of Consultation, reference 6.9.2).

3.4 Traditional Custodian specific consultation

In addition to the approaches above including community information sessions, additional activities were undertaken with relevant Traditional Custodians, which were specifically designed to provide for effective engagement with Traditional Custodians and so that information was provided in a form that was readily accessible and appropriate (see Section 5.5 of the EP).

Consultation undertaken specifically with Traditional Custodians for this EP includes direct engagement with nominated representative bodies via the contact listed on the Office of the Registrar of Indigenous Corporations (ORIC) website, requesting advice on how they would like to

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

be engaged and asking whether other members and/or individuals should be consulted. This has resulted in:

- meetings with directors, Elders and any nominated representatives, on Country or in Perth
- requests and offers of resourcing to enable and support consultation
- exchange of written feedback and correspondence
- Summary Information Sheets, developed and reviewed by Woodside's First Nations team in collaboration with technical experts to ensure content is appropriate to the intended recipients, was provided to relevant Traditional Custodian groups (Record of Consultation, reference 6.1.2) and phone calls to provide context to the consultation made.

Ongoing efforts were made to engage and develop relationships with these bodies via a variety of means such as email, phone calls, alternative contacts, texts, social media and, in some cases, in-person visits.

Consultation meetings with attendees decided by Traditional Custodian groups and supported by senior Woodside representatives, subject matter experts and First Nations advisers with skills and experience in community engagement. Meetings are developed through a two-way consultation process to ensure effective information sharing via:

- mutually agreed agenda avoiding time pressure
- encouraging Traditional Custodian attendees to control the pace of the meeting and pause at any time to ask questions, seek clarification or provide feedback
- visual aids such as posters, presentations, simplified technical videos and real-world pictures and footage
- emphasis on potential planned and unplanned risks and impacts of the activity ample opportunity for questions and feedback
- discussion about ongoing relationship development and opportunities
- distribution of hard-copy Consultation Information Sheets (Record of Consultation, reference 6.1.1) and Summary Consultation Information Sheets (Record of Consultation, reference 6.1.2)
- meeting reasonable costs such as sitting fees, travel, legal support and executive support and other support required
- advertising in Indigenous publications such as the National Indigenous Times (30 July 2024) (Record of Consultation, 6.5.1.7)
- advertising on Ngaarda radio, the only licensed Aboriginal broadcaster in the Pilbara (26 August 2024 – 30 November 2024).

Newspaper	Coverage	Publication dates
National Indigenous Times	National	30 July 2024
Ngaarda Radio	National	26 August 2024 – 30 November 2024

Woodside also ran a geotargeted sponsored social media campaign (Record of Consultation, reference 6.4) to various communities that are coastally adjacent to the EMBA for the proposed activities. The wide-reaching campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations how they can find out about Woodside's proposed activities by visiting Woodside's website, which details the intent of consultation with relevant persons under the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

These social media posts were developed with input from Indigenous representatives. Social media is a highly effective means to engage Indigenous audiences as outlined in Indigenous Digital Life (Professor Carlson, 2021). Advertisements used language and information appropriate to Indigenous audiences and feedback from community engagements indicates a high level of penetration for this process.

Woodside has employed a diverse range of techniques to allow relevant persons to become aware of the proposed activity and how it may affect their functions, activities or interests, and to understand their ability to provide feedback. The combination of Prescribed Body Corporate (PBC) engagement meetings, traditional print media, social media and face-to face community interaction was designed with input from Indigenous representatives and adapted to the audience, so that it provides a wide-ranging opportunity to consult.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4. TABLE 2: CONSULTATION REPORT WITH RELEVANT PERSONS OR ORGANISATIONS

The black numbering **(N)** in the 'Summary of information provided and record of consultation for this EP' in Table 2 denotes an item raised by a stakeholder. The green numbering **(N)** in this section denotes Woodside's response to that issue.

4.1 COMMONWEALTH AND WA STATE GOVERNMENT DEPARTMENTS OR AGENCIES – MARINE

4.1.1 Australian Border Force (ABF)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed the ABF advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to ABF, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed ABF a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to ABF following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with ABF for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP, and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ABF sufficient information to allow ABF to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to ABF on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to ABF on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed ABF a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to ABF advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ABF two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed ABF a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with ABF is appropriate and adapted to the nature of interests of ABF:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding ABF of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as ABF did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on ABF's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.2 Australian Communications and Media Authority (ACMA)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed ACMA advising of the proposed activity (Record of Consultation, reference 6.1.8), provided a Consultation Information Sheet, a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*, and map of submarine communications cables (Record of Consultation, reference 6.1.6).
- On 12 July 2024, ACMA emailed to thank Woodside for the opportunity to comment (SI Report, reference 3.1) and:
  - Provided background on ACMA's responsibilities as covered in Schedule 3A to the *Telecommunications Act 1997*.
  - **(1)** Confirmed the Operational Area is clear of existing ACMA protection zones.
  - **(2)** Noted Woodside's awareness of cables in the area operated by Telstra and Vocus.
  - **(3)** Recommended contacting the AHO for cable locations.
  - **(4)** Advised no additional consultation for this activity was needed.
- On 16 July 2024, Woodside thanked ACMA for its response (SI Report, reference 3.2) and:
  - Noted ACMA's roles and responsibilities.
  - **(1)** Confirmed the advice on the protection zones.
  - **(2)** Acknowledged the existing cable systems of Telstra and Vocus and confirmed they received consultation materials.
  - **(3)** Confirmed that AHO received consultation materials and could be contacted further.
  - **(4)** Recognised that ACMA did not require further consultation on this EP.
- On 1 October 2025, Woodside emailed ACMA a consultation update (Record of Consultation, reference 6.3.4) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to ACMA following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) EP Operational Area not in vicinity of protection zones.	**(1)** Woodside noted ACMA's confirmation that the Operational Area is not in the vicinity of existing protection zones.	**(1)** Woodside acknowledged the advice regarding existing protection zones.	**(1)** Not required.
(2) Operational Area is in vicinity of submarine cables.	**(2)** Woodside noted ACMA's advice that the Operational Area was in the vicinity of submarine cables.	**(2)** Woodside confirmed it consulted Telstra and Vocus.	**(2)** Not required.
(3)	**(3)**	**(3)**	**(3)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Contact AHO for further assistance with cable identification.	Woodside noted ACMA's recommendation to contact the AHO for further assistance identifying cables.	Woodside confirmed AHO had been consulted and could be contacted for cable identification.	
(4) No further consultation required.	**(4)** Woodside accepts that ACMA does not require further consultation.	**(4)** Woodside noted that ACMA does not require further consultation.	**(4)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Outcomes of Consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with ACMA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ACMA sufficient information to allow ACMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 Woodside gave this information to ACMA on 8 July 2024, marking the commencement of consultation on this EP. A consultation update was sent to ACMA on 1 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 12 July 2024, ACMA shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable ACMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information to ACMA on 16 July to respond to points raised.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed ACMA a reasonable period for consultation in the preparation of this EP has been provided because:

- A consultation period was stated in the initial correspondence to ACMA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ACMA two 30 day periods for consultation.
- In this context, Woodside allowed ACMA a reasonable period for consultation in preparation of the EP as evidenced by ACMA's response on 12 July 2024.

Reasonable Opportunity

Woodside allowed Woodside allowed ACMA a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to ACMA as evidenced by its response on 12 July 2024.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- ACMA provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from ACMA.
  - Made no changes or inclusions to the EP as a result of consultation with ACMA because appropriate measures are already included in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.3 Australian Fisheries Management Authority (AFMA)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed AFMA advising of the proposed activity (Record of Consultation, reference 6.1.9), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to AFMA, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed AFMA a consultation update (Record of Consultation, reference 6.3.5) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 14 October 2025, AFMA thanked Woodside for the opportunity to comments (SI Report reference, 36.1) and:
  - **(1)** Noted it had no feedback on the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** Requested to be included in future consultation.
- (**3**) Confirmed the Commonwealth fisheries identified in consultation were correct and encouraged direct engagement.

- **(1)** On 16 October, Woodside thanked AFMA for confirming no feedback (SI Report, 36.2) and:
  - **(2)** Confirmed AFMA would receive any updates as well as notifications.
  - **(3)** Noted AFMA's confirmation on the identified Commonwealth fisheries and engagement.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) No feedback on EP.	**(1)** Woodside understands AFMA has no feedback.	**(1)** Woodside confirmed AFMA had no feedback.	**(1)** Not required.
(2) Interested in future consultation.	**(2)** Woodside notes that AFMA is interested in future consultation and provides activity notifications as standard practice to AFMA.	**(2)** Woodside confirmed AFMA would receive activity notifications and any updates to project.	**(2)** See Section 7.10 Ongoing Consultation, Table 7.5 and Section 6.8.1, P.S. 1.2. of the EP.
(3) Encouraged direct engagement with Commonwealth fisheries.	**(3)** Woodside appreciates AFMA's confirmation that its identification of fisheries is correct and also knows the fisheries were consulted.	**(3)** Woodside appreciated the confirmation from AFMA and noted ongoing engagement.	**(3)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AFMA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given AFMA sufficient information to allow AFMA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to AFMA on 8 July 2024, marking the commencement of consultation on this EP. Woodside issued a consultation update on 1 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed a reasonable period for consultation in the preparation of this EP has been provided because:

- A consultation period was stated in the initial correspondence to AFMA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AFMA two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed AFMA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed a reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with AFMA is appropriate and adapted to the nature of interests of AFMA.

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024, reminding AFMA of the opportunity to provide feedback which it did on 14 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AFMA provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Responded to feedback from AFMA
- Made no changes or inclusions to the EP as a result of consultation with AFMA because appropriate measures are already included in the EP as AFMA notification is a standard practice in the EP.

4.1.4 Australian Hydrographic Office (AHO)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed AHO advising of the proposed activity (Record of Consultation, reference 6.1.10), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*, GIS shapefiles and vessel density map.(Record of Consultation, reference 6.1.4)
- On 9 July 2024, AHO emailed Woodside to acknowledge receipt of information and noted:
  - **(1)** Supplied data would be used to update Navigational Charting products which adhere to national and international standards (SI Report, reference 2.1).
- On 9 July 2024, Woodside thanked AHO for its acknowledgement of the consultation information provided (SI Report, reference 2.2) and:
  - **(1)** Noted the data supplied will support Navigational Charting product updates.
- On 1 October 2025, Woodside emailed AHO a consultation update on the EP (Record of Consultation, reference 6.3.6) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet.
- On 2 October 2025, AHO thanked Woodside for the opportunity to comment (SI Report, reference 2.3) and:
  - **(2)** Noted it had no concerns with the activities proposed.
  - **(3)** Requested notifications once activity is due to begin and provided a link to its Fact Sheet: Reporting Maritime Activities Affecting Safety of Navigation. (SI Report, reference 2.3.1).
- On 2 October 2025, Woodside replied to AHO (SI Report, reference 2.4) and:
  - **(2)** Thanked AHO for confirming it had no concerns with the activities.
  - **(3)** Confirmed it would provide AHO with Start of Activity Notifications at least four weeks prior to commencement of activities.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Supplied data supports Navigational Charting updates.	**(1)** Woodside recognises its data on vessel activity and GIS shapefiles contributes to ongoing updates to AHO's Navigational Charting products.	**(1)** Woodside confirmed how AHO would use the provided data.	**(1)** Not required.
(2) Confirmed no concerns with proposed activities.	**(2)** Woodside accepts that AHO has no concerns with the survey activities.	**(2)** Woodside confirmed AHO had no concerns with the proposed activities.	**(2)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(3) Requested to be updated once activity is due to begin.	**(3)** Woodside understands AHO needs to be notified ahead of activity start and follows standard practice to notify AHO at least four weeks ahead of commencement of activities.	**(3)** Woodside confirmed it would notify AHO at least four weeks prior to commencement of survey activities.	**(3)** See Ongoing Consultation Section 7.10 , Table 7.5 and Section 6.8.1, P.S. 1.2. of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AHO for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AHO sufficient information to allow AHO to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to AHO on 8 July 2024, marking the commencement of consultation on this EP. Woodside issued a consultation update on 1 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 9 July 2024, AHO shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AHO to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded to AHO on 9 July 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sent a consultation update in October 2025 which included a new Consultation Information Sheet and provided an overview of the survey activities and updated timing.

Reasonable Period

Woodside allowed a reasonable period for consultation in the preparation of this EP has been provided because:

- A consultation period was stated in the initial correspondence to AHO advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AHO 30 days for the initial 2024 consultation and an additional 30 days for the consultation update which started in October 2025.
- In this context, Woodside allowed AHO a reasonable period for consultation in preparation of the EP as evidenced by AHO's response on 9 July 2024 and on 2 October 2025 for the updated consultation.

Reasonable Opportunity

Woodside allowed Woodside allowed AHO a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to AHO as evidenced by its response on 9 July 2024 and again on 2 October 2025 following the consultation update.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- AHO provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from AHO.
  - Made no changes or inclusions to the EP as a result of consultation with AHO because appropriate measures are already included in the EP as AHO notification is a standard practice in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.5 Australian Maritime Safety Authority (AMSA) – Marine Pollution

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 8 July 2024, Woodside emailed AMSA – Marine Pollution advising of the proposed activity (Record of Consultation, reference 6.1.12), provided a Consultation Information Sheet, vessel density map, GIS shapefiles and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to AMSA – Marine Pollution, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 21 August 2024, Woodside emailed AMSA – Marine Pollution and reshared a link to the Consultation Information, attached the Oil Pollution First Strike Plan (Appendix I) and requested feedback. (SI Report, reference 24.1)
- On 1 October 2025, Woodside emailed AMSA – Marne Pollution a consultation update (Record of Consultation, reference 6.3.8) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to AMSA – Marine Pollution following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AMSA – Marine Pollution for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AMSA – Marine Pollution sufficient information to allow AMSA – Marine Pollution to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to AMSA – Marine Pollution on 8 July 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AMSA – Marine Pollution advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AMSA – Marine Pollution 30 days for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed AMSA – Marine Pollution a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed AMSA – Marine Pollution a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding AMSA – Marine Pollution of the opportunity to provide feedback.
- Woodside sent its Oil Pollution First Strike plan to AMSA – Marine Pollution on 21 August 2024.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as AMSA – Marine Pollution did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on AMSA – Marine Pollution's functions, interests or activities.

4.1.6 Australian Maritime Safety Authority (AMSA) – Maritime Safety

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed AMSA – Maritime Safety advising of the proposed activity (Record of Consultation, reference 6.1.11), provided a Consultation Information Sheet, vessel density map, GIS shapefiles and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 19 July 2024, AMSA – Maritime Safety emailed to thank Woodside for information on operations and activities tied to the EP (SI Report, reference 5.1) and:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** Provided three PDFs detailing vessel traffic supported by Woodside GIS shapefiles, noting heavy vessel traffic and crossing of charted shipping areas during activities.
- Thanked Woodside for noting considerations in consultation email including:
  - **(2)** Requested Woodside notify AMSA's Response Centre (ARC) 24-48 hours before operations commence and to contact the AHO no less than four working weeks before operations commence.
  - **(3)** Reminded Woodside of compliance with International Rules for Preventing Collisions at Sea and that vessels should exhibit appropriate lights and shapes to reflect the nature of operation and advised that Woodside should evaluate and implement adequate anti-collision measures.
- **(4)** Suggested AMSA's special data gateway and portal for data sets and maps.

- On 23 July 2024, Woodside emailed to thank the AMSA – Maritime Safety team for their feedback on the EP (SI Report, reference 5.2) and:
  - (1) Acknowledged AMSA's PDFs which detail vessel traffic and charted shipping fairways.
  - (2) Confirmed notifications including notifying AMSA's ARC 24-48 hours before operations commence and notifying AHO no less than four working weeks before operations commence.
  - (3) Confirmed compliance with International Rules for Preventing Collisions at Sea (COLREGs).
  - (4) Noted availability of shipping data from AMSA's spatial data gateway and portal.
- On 1 October 2025, Woodside emailed AMSA – Maritime Safety a consultation update on the EP (Record of Consultation, reference 6.3.7) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 2 October 2025, AMSA – Maritime Safety thanked Woodside for the information on the timing updates (SI Report, reference 5.3) and:
  - (**1)** Informed that heavy vessel traffic and support craft are in the area and provided PDFs of the area with Angel CCS Operational Area.
  - **(2)** Provided notification protocol with AMSA with email and phone number and information vessel operator needs to provide AMSA and asked that AHO be contacted at least four working weeks before operations commence.
  - **(3)** Noted lighting requirements and shapes to comply with COLREGS.
  - **(4)** Confirmed availability of shipping date via AMSA's spatial data gateway and portal.
- On 3 October 2025, Woodside thanked AMSA for review of the update (SI Report, reference 5.4) and:
  - (1) Noted receipt of the PDFs and that heavy vessels traffic would be encountered in the area.
  - (2) Confirmed notifications for AMSA and AHO.
  - (3) Acknowledged the COLREGs guidance and confirmed it was mandated on Woodside chartered vessels.
  - (4) Noted availability of shipping data from AMSA's spatial data gateway and portal.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Noted heavy vessel traffic and sent maps.	**(1)** Woodside noted AMSA's point on heavy traffic and maps provided and was	**(1)**	**(1)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	aware of vessel activity from its shipping lane file.	Woodside acknowledge the map detailing the vessel traffic and shipping fairways.	
(2) Requested notifications for AMSA and AHO.	**(2)** Woodside is aligned with the notifications needed for AMSA and AHO and considers this a standard practice.	**(2)** Woodside confirmed notifications would be sent to AMSA, 24-48 hours prior to commencement of operations and AHO, no less than four working weeks before operations commence.	**(2)** Refer to Ongoing Consultation Section 7.10 Table 7-5 covering notifications for ongoing consultation in the EP.
(3) Flagged safe vessel operations considerations.	**(3)** Woodside complies with the International Rules for Preventing Collisions at Sea.	**(3)** Woodside confirmed it is compliant with the International Rules for Preventing Collisions at Sea.	**(3)** See Section 6.8.1. PS 1.1 of the EP.
(4) Access to data sets and maps	**(4)** Woodside noted availability of data and maps through AMSA's spatial gateway and portal.	**(4)** Woodside confirmed understanding that data sets and maps were available from AMSA's spatial gateway and portal.	**(4)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AMSA – Maritime Safety for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AMSA – Marine Safety sufficient information to allow AMSA – Marine Safety to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 Woodside gave this information to AMSA – Maritime Safety on 8 July 2024, marking the commencement of consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 16 July 2024 AMSA – Maritime Safety shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable AMSA – Maritime Safety to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded to AMSA – Maritime Safety on 23 July 2024.
- Woodside sent a consultation update in October 2025 which included a new Consultation Information Sheet and provided an overview of the survey activities and updated timing.

Reasonable Period

Woodside allowed AMSA – Maritime Safety a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AMSA – Maritime Safety advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed AMSA – Maritime Safety 30 days for the initial 2024 consultation and an additional 30 days for the consultation update which started in October 2025.
- In this context, Woodside allowed AMSA – Maritime Safety a reasonable period for consultation in preparation of the EP as evidenced by AMSA – Maritime Safety's response on 16 July 2024 and again on 2 October 2025 following the consultation update.
-

Reasonable Opportunity

Woodside allowed AMSA – Marine Safety reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to AMSA – Maritime Safety as evidenced by its response on 16 July 2024 and again on 2 October 2025 following the consultation update.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- AMSA – Maritime Safety provided feedback, but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from AMSA – Maritime Safety.
  - Made no changes or inclusions to the EP as a result of consultation with AMSA – Maritime Safety because appropriate measures are already included in the EP and AMSA notification is standard practice.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.7 Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed DAFF advising of the proposed activity (Record of Consultation, reference 6.1.13), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DAFF, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed DAFF-Fisheries a consultation update (Record of Consultation, reference 6.3.9) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DAFF-Fisheries following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DAFF - Fisheries for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DAFF sufficient information to allow DAFF to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to DAFF - Fisheries on 8 July 2024, and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DAFF-Fisheries on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DAFF-Fisheries on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DAFF - Fisheries a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DAFF - Fisheries advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DAFF - Fisheries two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed DAFF - Fisheries a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed DAFF - Fisheries a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding DAFF - Fisheries of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DAFF - Fisheries did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DAFF – Fisheries' functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.8 Department of Defence (DoD)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed the DoD advising of the proposed activity (Record of Consultation, reference 6.1.14), provided a Consultation Information Sheet, Defence Area map and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 23 July 2024, Woodside sent an email reminder to the DoD following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 August 2024, the DoD thanked Woodside for its email (SI Report, reference 4.1) and provided feedback noting:
  - **(1)** Location of the activity areas are not within training areas and restricted airspace.
  - **(2)** Potential presence of unexploded ordinance (UXO) on and in the seafloor, and that Woodside must take responsibility for any associated risks tied to the location, identification, removal or damage of UXO in area.
  - **(3)** DoD's notification requirements including liaison with the Australian Hydrographic Service/Office (AHS/AHO).
- On 2 August 2024, Woodside thanked DoD for its feedback (SI Report, reference 4.2) and confirmed:
  - (1) Guidance area is outside of training areas and restricted airspace.
  - (2) Guidance regarding location, identification, removal or damage to equipment from unexploded ordinances.
  - (3) AHO had been engaged for this activity and included in activity notification protocols.
- On 1 October 2025, Woodside emailed DoD a consultation update (Record of Consultation, reference 6.3.10) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DoD following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Confirmed activities outside of training areas / restricted airspace.	**(1)** Woodside's Defence Area Map suggested potential interaction with a training area, so accept the confirmation that activities are outside of training areas and restricted airspace.	**(1)** Woodside acknowledged the activities are outside of DoD training areas and restricted airspace.	**(1)** Not required.
(2) Flagged risks tied to potential UXO in area.	**(2)** Woodside is aware of the risks associated with UXO in the activity area. The risk of encountering UXO in the Operational Area very low.	**(2)** Woodside confirmed it noted the DoD's advice with respect to the risk, location, identification, removal or damage from UXO.	**(2)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(3) Noted need to notify AHO.	**(3)** Woodside has consulted AHO and will send relevant notifications.	**(3)** Woodside advised the AHO had been engaged by Woodside for these activities and was included in Woodside's activity notification protocols.	**(3)** Woodside will provide notifications to AHO as set out in Section 7.10, Table 7.5 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DoD for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DoD sufficient information to allow DoD to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DoD on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DoD on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 1 August 2024, DoD shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DoD to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside provided additional information on 2 August 2024.

Reasonable Period

Woodside allowed DoD a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DoD advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DoD two 30-day periods for consultation.
- In this context, Woodside allowed DoD a reasonable period for consultation in preparation of the EP as evidenced by DoD's response on 1 August 2024.

Reasonable Opportunity

Woodside allowed DoD a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to DoD as evidenced by its response on 1 August 2024.
- In the absence of feedback for the activity update, Woodside sent a follow-up consultation email on 21 October 2025, reminding DoD of the opportunity to provide feedback.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DoD provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2, and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DoD and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with DoD because appropriate measures are already included in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.9 Department of Planning, Lands and Heritage (DPLH)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed the DPLH advising of the proposed activity (Record of Consultation, reference 6.1.17), provided a Consultation Information Sheet, shipwreck information and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DPLH, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 1 October 2025, Woodside emailed DPLH a consultation update (Record of Consultation, reference 6.3.13) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 16 October 2025, DPLH thanked Woodside for the opportunity to comment (SI Report, reference 31.1) and:
  - **(1)** Noted the Operational Area is in Commonwealth waters and had no comments to provide.
  - **(2)** Recommended State's Department of Water and Environmental Regulations (DWER) and the federal Department of Climate Change, Energy, the Environment and Water (DCCEW) be consulted regarding the environmental disturbances and impacts.
  - **(1)** Confirmed DPLH had no comment regarding the updated start date.
- On 17 October 2025, Woodside thanked DPLH for its response (SI Report 31.2) and:
  - **(1)** Acknowledged DPLH had no comments for this EP.
  - **(2)** Confirmed DCCEEW had been consulted and consultation was extended to DWER as recommended by DLPH.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Confirmed no comments for EP.	**(1)** Woodside accepts that DPLH had no comments for this EP.	**(1)** Woodside acknowledged that DPLH had no comments to provide.	**(1)** Not required.
(2) Asked that DCCEEW and DWER be consulted.	**(2)** Woodside understands DPLH's request to include DCCEEW and DWER in consultation.	**(2)** Woodside confirmed DCCEEW had been consulted and that consultation was extended to DWER as recommended.	**(2)** See Appendix F Sections 4.2.3,
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DPLH for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP, and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given DPLH sufficient information to allow DPLH to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DPLH on 9 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DPLH on 1 October 2025, marking an additional consultation on this EP The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DPLH a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DPLH advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DPLH two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed DPLH a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity:

Woodside allowed DPLH a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024, reminding DPLH of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DPLH did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DPLH's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.1.10 Department of Primary Industries and Regional Development (DPIRD)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed DPIRD advising of the proposed activity (Record of Consultation, reference 6.1.15), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 July 2024, Woodside forwarded email to another contact at DPIRD given primary contact was on leave (SI Report, reference 26.1).
- On 23 July 2024, Woodside sent an email reminder to DPIRD, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed DPIRD a consultation update (Record of Consultation, reference 6.3.11) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to DPIRD following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required. DPIRD will receive start and end of activity notifications per standard procedure in Table 7-5 in Section 7.10 of the EP.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DPIRD for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DPIRD sufficient information to allow DPIRD to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DPIRD on 9 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DPIRD on 1 October 2025, marking an additional consultation on this EP The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DPIRD a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DPIRD advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DPIRD two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed DPIRD a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed DPIRD a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and again on 21 October 2025, reminding DPIRD of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DPIRD did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DPIRD's functions, interests or activities.

4.1.11 Department of Transport and Major Infrastructure (DTMI), known in 2024 as Department of Transport (DoT)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 9 July 2024, Woodside emailed DoT (now known in 2025 as DTMI so all following references will reflect this) advising of the proposed activity (Record of Consultation, reference 6.1.16), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 July 2024, DTMI thanked Woodside for the update and would await additional consultation (SI Report, reference 6.1).
- On 17 July 2024, Woodside thanked DTMI for its response and noted it would await any further consultation (SI Report, reference 6.2).
- On 20 August 2024, Woodside emailed DTMI to provide Oil Pollution First Strike Plan (FSP) and requested feedback for consultation (SI Report, reference 6.3).
- **(1)** On 20 September 2024, DTMI emailed to thank Woodside for FSP and confirmed it had no comment on it (SI Report, reference 6.4).
- (1) On 20 September 2024, Woodside emailed DTMI and thanked it for the review of the FSP and noted that the DTMI had no comment on it (SI Report, reference 6.5).
- On 1 October 2025, Woodside emailed DTMI a consultation update (Record of Consultation, reference 6.3.12) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to DTMI following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Confirmed no comment on the FSP.	**(1)** Woodside understands the DTMI had no comment on the FSP.	**(1)** Woodside acknowledged that DTMI had no comment on the FSP.	**(1)** Not required
While feedback has been received, there were no objections or claims.		Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DTMI for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DTMI sufficient information to allow DTMI to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DTMI on 9 July 2024, marking the commencement of consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

on this EP. Woodside emailed an updated Consultation Information Sheet to DTMI on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:

- The purpose of consultation and set out what was being sought through consultation.
- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

- On 15 July 2024, DTMI shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DTMI to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside responded to DTMI on 17 July and provided additional information on 20 August 2024.In October 2025, Woodside provided consultation update to DTMI.

Reasonable Period

Woodside allowed DTMI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DTMI advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DTMI two 30-day periods for consultation.
- In this context, Woodside allowed DTMI a reasonable period for consultation in preparation of the EP as evidenced by DTMI's response on 15 July 2024.

Reasonable Opportunity

Woodside allowed DTMI a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to DTMI as evidenced by its response on 15 July 2024.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DTMI provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 25 and 34(g). Woodside has:
  - Responded to feedback from DTMI.
  - Made no changes or inclusions to the EP as a result of consultation with DTMI because appropriate measures are already included in the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.1.12 Pilbara Ports

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Pilbara Ports advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Pilbara Ports, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed Pilbara Ports a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to Pilbara Ports following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Pilbara Ports for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Pilbara Ports sufficient information to allow Pilbara Ports to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Pilbara Ports on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to Pilbara Ports on 1 October 2025, marking an additional consultation on this EP The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed Pilbara Ports a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Pilbara Ports advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Pilbara Ports two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed Pilbara Ports a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Pilbara Ports reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding Pilbara Ports of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as Pilbara Ports did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on Pilbara Ports' functions, interests or activities.

4.1.13 Western Australian Museum (WAM)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 9 July 2024, Woodside emailed the WAM advising of the proposed activity (Record of Consultation, reference 6.1.18), provided a Consultation Information Sheet, shipwreck information and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to WAM, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed WAM a consultation update (Record of Consultation, reference 6.3.14 and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to WAM following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with WAM for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given WAM sufficient information to allow WAM to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to WAM on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to WAM on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Period

Woodside allowed WAM a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WAM advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WAM two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed WAM a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed WAM a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding WAM of the opportunity to provide feedback.

Outcomes of Consultation

- No additional measures were required as WAM did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on WAM's functions, interests or activities.

4.2 COMMONWEALTH AND WA STATE GOVERNMENT DEPARTMENTS OR AGENCIES – ENVIRONMENT

4.2.1 Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed DAFF advising of the proposed activity (Record of Consultation, reference 6.1.19), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DAFF, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed DAFF a consultation update (Record of Consultation, reference 6.3.9) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DAFF following up on the proposed activity (Record of Consultation 6.4.1)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DAFF for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DAFF sufficient information to allow DAFF to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DAFF on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DAFF on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GHG Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DAFF a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DAFF advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DAFF two 30-day periods for consultation.
- It has been 17 months since consultation commenced.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In this context, Woodside allowed DAFF a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed DAFF a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and another on 21 October 2025, reminding DAFF of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DAFF did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DAFF's functions, interests or activities.

4.2.2 Department of Biodiversity, Conservation and Attractions (DBCA)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed the DBCA advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DBCA following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 9 August 2024, DBCA thanked Woodside for providing information on the EP (SI Report, reference 13.1) and:
  - **(1)** Noted there are ecologically important areas located in the vicinity of proposed activities and EMBA and there is potential for activities to be affected by a hydrocarbon release and surveys have potential to impact marine fauna.
  - **(2)** Would like to have confidence that Woodside has established appropriate baseline survey data on the current state of areas supporting important ecological values and any current contamination present within the EMBA.
  - **(3)** It undertook monitoring in marine parks and reserves and published monitoring reports which were available on its website, however Woodside should be aware this monitoring was targeted to inform DBCA's values and objectives and was not necessarily suitable to provide baseline information for oil spill risk assessment and management planning and encouraged Woodside to implement a Before-After, Control-Impact (BACI) framework.
  - **(4)** It recommended Woodside refer to the Department of Climate Change, Energy, the *Environment and Water's National Light Pollution Guidelines for Wildlife* as a best-practice industry standard for managing potential impacts of light pollution on marine fauna.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (**5)** Referenced best practice management for underwater noise management per *EPBC Act Policy Statement 2.1*, including:
  - Establish noise impact thresholds for particular species.
  - Set management zones with low-power or shut-down zones and observation procedures for pre-start-up, soft-start and stop work as standard practice
  - Station qualified Marine Fauna Observers (MFOs) on vessels at all times.
- Noted emergency response contacts and procedures in event of hydrocarbon release, including:
  - (**6)** in the event of a hydrocarbon release, it was requested that Woodside notify DBCA's Pilbara regional office as soon as practicable on (08) 9182 2000 and commit to clean-up and monitoring.
  - **(7)** It would not implement an oiled wildlife management response on behalf of a petroleum operator except as part of a whole of government response mandated by regulatory decision makers.
  - **(8)** Woodside should refer to the Department of Transport's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements.

- On 11 September 2024, Woodside emailed DBCA to thank them for its email (SI Report, reference 13.2) and:
  - **(1)** Acknowledged there are areas of ecological importance near the proposed Operational Area and EMBA and the values and sensitivities of these areas and associated flora and fauna will be documented in Section 4 of the EP. Section 6 will assess risks and impacts from planned and unplanned activities including from a hydrocarbon spill in the event of vessel collision.
  - **(2,3)** Advised its oil spill scientific monitoring program, under the Joint Industry OSM Framework (AEP, 2021) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release and it has an information system to track current existing environment knowledge.
  - **(4)** Woodside has considered DCCEEW's Environment and Water's National Light Pollution Guidelines for Wildlife, and vessels will implement plan which aligns with these recommendations. Lighting on vessels will be limited to the minimum required for navigational and safety requirements.
  - **(5)** Controls will be implemented to manage potential impacts and risks to marine fauna from underwater noise emissions, and to support the noise assessment, modelling has been commissioned which will be in the EP and it will comply with regulatory requirements for interactions with marine fauna.
  - **(5)** Observation procedures include implementation of observation zones of 150 m for 30 minutes prior to start-up and vessels will have onboard crew trained in marine fauna observation.
  - **(6)** DBCA Pilbara regional office phone number is included as part of notifications in the Oil Pollution First Strike Plan (FSP) and Woodside's oil spill scientific monitoring program (SMP) is executed under the Joint Industry OSM Framework (AEP, 2021) and provides for overall environmental impacts in events of an unplanned hydrocarbon release. Within the plan are links to existing Operational Plans and Tactical Response Plans to mobilise response sources immediately, including Operational Monitoring, Scientific Monitoring and Shoreline Clean up where required.
  - **(7)** Understands DBCA will not implement an oiled wildlife plan on behalf of a titleholder and acknowledged its cost recovery arrangements are in line with Section 9 of the DoT Offshore Petroleum Industry Guidance Note 2020.
  - **(8)** Woodside references the Offshore Petroleum Industry Guidance Note in DoT correspondence and FSP is largely based on requirements set out in Offshore Petroleum Industry Guidance Note.
- On 1 October 2025, Woodside emailed DBCA a consultation update (Record of Consultation, reference 6.3.40) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DBCA following up on the proposed activity (Record of Consultation 6.4.1)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 28 October 2025, DBCA thanked Woodside for the information on activities (SI Report, reference 13.3) and
  - **(9)** Confirmed no further comments to add beyond advice provided previously in 2024 (SI Report, reference 13.1) in relation to the *Conservation and Land Management Act 1984 and Biodiversity Conservation Act 2016.*
  - **(10)** Asked that specific email continue to be used for all correspondence.
- On 3 November 2025, Woodside thanked DBCA for its review of the consultation update (SI Report, reference 13.4) and:
  - **(9)** Noted DBCA had no further comments and confirmed previously feedback was summarised in Appendix F of the EP.
  - **(10)** Confirmed Woodside will continue to send consultation correspondence to DBCA's provided email.

Summary of Feedback	Woodside's Assessment of Merits of Feedback	Woodside's Response	Inclusion in Environment Plan
(1) Activities may affect ecologically important areas and marine fauna.	**(1)** Woodside acknowledges areas of ecological importance in close proximity to proposed Operational Area and within EMBA.	**(1)** Woodside affirmed there are controls in place to manage any risks or impact associated with the activities in the areas of ecological importance in the proximity of the EP Operational Area and EMBA and has Oil Pollution Emergency Plan in event of hydrocarbon spill from a vessel collision.	**(1)** The EP demonstrates that the proposed activities are outside the boundaries of a proclaimed Australian Marine Park (AMP) and considers there are no credible risks as part of planned activities that have potential to impact the values of the AMP **(**Section 6 of the EP). While impacts to the AMP are possible in the highly unlikely event of a vessel collision resulting in release of marine diesel, Woodside identifies and manages all impacts and risks on AMP values to an acceptable level and has considered all options to avoid or reduce them to As Low As Reasonably Practical (ALARP), as demonstrated in Section 6.7 of the EP.
(2) Establish baseline survey data on activities areas.	**(2)** Woodside maintains knowledge of areas of ecological importance adjacent to Operational Areas and its oil spill scientific monitoring program provides for a quantitative assessment of overall impacts in the event of an unplanned hydrocarbon release.	**(2)** Woodside confirmed it has an information system to track current existing environment knowledge that is regularly updated which covers topics including *EPBC Act Matters of National Ecological Significance* and *WA Biodiversity Conservation Act 2016*. Its oil spill scientific monitoring program provides for quantitative assessment of	**(2)** Appendix G of the EP covers that under the Operational and Scientific Monitoring (OSM) Program, executed under the Joint Industry OSM Framework (AEP, 2021).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		overall environmental impacts in the event of an unplanned hydrocarbon release.	
(3) Encourages implementation of Before-After Control-Impact (BACI) framework.	**(3)** Woodside reviewed the request about implementing a BACI framework and noted it maintains knowledge of areas of ecological importance and its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release.	**(3)** Woodside advised its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release and that it maintains knowledge of areas of ecological importance within and adjacent to the Operational Area.	**(3)** Appendix H (Annex C) of EP covers that during a spill event, the first-strike monitoring capability will be prioritised to those receptors with insufficient baseline data to collect baseline data post-spill pre-impact i.e. Before-After-Impact-Control (BACI). Locations with hydrocarbon contact predicted within 7 days for priority first-strike baseline monitoring are listed.
(4) Management of light pollution.	**(4)** Woodside noted DCCEEW's National Light Pollution Guidelines for Wildlife and that its impact assessment for light emissions is based on these recommendations.	(**4)** Woodside confirmed it had considered DCCEEW's National Light Pollution Guidelines for Wildlife and that lighting associated with this EP is required as a priority for safe operation.	**(4)** Woodside's impact assessment for light emissions is based on recommendations of the National Light Pollution Guidelines for Wildlife in Section 6.8.5 of EP.
(5) Management of underwater noise and observation procedures.	**(5)** Woodside noted DBCA advice that marine fauna has the potential to be sensitive to underwater noise and confirms it has assessed potential impacts and risk which will be managed through controls as well as learnings from modelling that will be undertaken for the EP.	**(5)** Woodside acknowledged DBCA advice that marine fauna has the potential to be sensitive to underwater noise and confirmed it will have controls in place to manage impacts and risks in the EP and is also commissioning noise modelling, the results of which will be included in the EP.	**(5)** Underwater noise and observation procedures are included in Section 6.8.3 and 6.8.4 of EP
(6) Notify DBCA Pilbara office in event of hydrocarbon release.	**(6)** Woodside noted DBCA's 'Incidents and Emergency Response' process and need to include DBCA's Pilbara's contact information in Oil Pollution First Strike Plan.	**(6)** Woodside confirmed the DBCA Pilbara phone number had been incorporated as part of the Oil Pollution First Strike Plan.	**(6)** DBCA's Pilbara phone number has been incorporated into the Oil Pollution First Strike Plan for this EP (see Appendix H of EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(7) No oiled wildlife response.	**(7)** Woodside accepts that DBCA would not implement an oiled wildlife management response and notes its own Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP.	**(7)** Woodside confirmed that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.	**(7)** Woodside's Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP (see Appendix G).
(8) Refer to DoT's guidance on Marine Oil Pollution.	**(8)** Woodside appreciates the recommendation to refer to the DoT's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements.	Woodside noted the DoT's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements.	**(8)** Not required.
(9) No additional feedback beyond what was previously provided.	**(9)** Woodside understands DBCA has no additional feedback.	**(9)** Woodside confirmed DBCA had no feedback beyond what was previously provided in 2024 and that would be summarised in Appendix F.	**(9)** Not required.
(10) Requested consultation correspondence be sent to DBCA email.	**(10)** Woodside uses the recommended email for consultation.	**(10)** Woodside confirmed it will continue to use the recommended email for correspondence.	**(10)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DBCA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DBCA sufficient information to allow DBCA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 Woodside gave this information to DBCA on 8 July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DBCA on 8 July 2024, marking the commencement of consultation on this EP . Woodside emailed an updated Consultation Information Sheet to DBCA on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 9 August 2024, DBCA shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DBCA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 11 September 2024.

Reasonable Period

Woodside allowed DBCA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DBCA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DBCA two 30 day periods for consultation.
- In this context, Woodside allowed DBCA a reasonable period for consultation in preparation of the EP as evidenced by DBCA's response on 9 August 2024.

Reasonable Opportunity

Woodside allowed DBCA a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside considers a reasonable opportunity was provided to DBCA as evidenced by its response on 9 August 2024.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DBCA provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g)Woodside has:
  - Responded to feedback from DBCA and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with DBCA because appropriate measures are already included in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.2.3 Department of Climate Change, Energy, the Environment and Water (DCCEEW)

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed the DCCEEW advising of the proposed activity (Record of Consultation, reference 6.1.20), provided a Consultation Information Sheet, shipwreck information and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DCCEEW, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed DCCEEW a consultation update (Record of Consultation, reference 6.3.15) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DCCEEW following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report – Consultation Complete	

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DCCEEW for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DCCEEW sufficient information to allow DCCEEW to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DCCEEW on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DCCEEW on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DCCEEW a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DCCEEW advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DCCEEW two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed DCCEEW a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed DCCEEW a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and again on 21 October 2025, reminding DCCEEW of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DCCEEW did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DCCEEW's functions, interests or activities.

4.2.4 Director of National Parks (DNP)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed the DNP advising of the proposed activity (Record of Consultation, reference 6.1.21), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DNP, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 27 October 2024, DNP emailed to thank Woodside for opportunity to comment (SI Report, reference 29.1) and:
  - **(1)** Noted that no DNP authorisations are needed as the planned activities do not overlap any Australian Marine Parks (AMPs).
  - **(2)** to assist in the preparation of an EP for petroleum activities, NOPSEMA had worked closely with Parks Australia to develop and publish a guidance note that outlined what titleholders needed to consider and evaluate. Titleholders should ensure the EP:
    - Identifies and manages all impacts and risks on Australian marine park values (including ecosystem values) and had considered all options to avoid or reduce them to ALARP.
    - Clearly demonstrates the activity would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
  - **(3)** Asked for clarification on Operational Area for the activity and noted what activities it considers the OA to encompass including operational activities such as line turns / repositioning, deployment and recovery, equipment maintenance and crew change.
  - (**4)** Provided the requirements for emergency responses.
- On 14 November 2024, Woodside thanked DNP for its feedback (SI Report, reference 29.2) and:
  - **(1)** Noted DNP's confirmation that planned activities don't overlap any AMP.
  - **(2)** Confirmed that Woodside considered the recommended DNP and NOPSEMA guidance note 'Petroleum Activities and Australian Marine Parks' and preparations for the EP's survey activities included identification and management of impacts and risks and considered all options to avoid or reduce them to ALARP.
  - **(3)** Confirmed the Operational Area for the activity program does not overlap any Australian Marine Parks, noted the distances to nearest AMPs and responded that:
    - Vessels associated with the survey activity will comply with EP when within the Operational Area.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Vessels transiting to or from the OA are outside the scope of the EP and will comply with applicable requirements for safe vessel operations.
- Vessels associated with the activity will not enter an AMP at any time, unless there is an emergency situation.

- **(4)** Woodside will notify DNP in the event of an activity change resulting in an overlap or new impact on an AMP and for emergency responses, Woodside will notify the 24-hour Marine Compliance Duty Officer.
- On 1 October 2025, Woodside emailed DNP a consultation update on the EP (Record of Consultation, reference 6.3.16) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet.
- On 7 October, DNP thanked Woodside for opportunity to comment on the EP (SI Report, reference 29.3) and:
  - **(1)** Noted updated timing is in same seasonal window and planned activities don't overlap any Australian Marine Parks, so no authorisations are needed.
  - **(5)** Confirmed no additional comments aside from those provided in 27 October 2024 correspondence.
- On 8 October 2025, Woodside thanked DNP for review (SI Report 29.4) and:
  - **(1)** Understood DNP's note that activity is in same seasonal window and there is no overlap with any Australian Marine Parks, so no authorisations are needed.
  - **(5)** Accepted that DNP had no further comments beyond what was shared on 27 October 2024.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Confirmed activities don't overlap AMPs.	**(1)** Woodside noted there were no authorisation requirements from the DNP.	**(1)** Woodside noted the DNP's confirmation that planned activities did not overlap AMPs and there are no authorisation requirements.	**(1)** Not required.
(2) Ensure the EP identifies and manages all impacts and risks on AMP values, and clearly demonstrates that activities will not be inconsistent with the management plan.	**(2)** Woodside has considered the *'Petroleum Activities and Australian Marine Parks'* guidance note to assess and manage impacts and risks to AMPs.	**(2)** Woodside confirmed it had taken into consideration the 'Petroleum Activities and Marine Parks' guidance note to ensure the EP identified and managed all risks on AMP values and clearly demonstrated that activities would not be inconsistent with the management plan.	**(2)** The EP demonstrates how Woodside will identify and manage all impacts and risks on Australian Marine Park values (including ecosystem values) to an ALARP and acceptable level and that the activity is not inconsistent with the management plan (see Section 6.8 of the EP).
(3) Asked for clarification on the Operational Area and provided what it considers Operational Area to encompass.	**(3)** Woodside noted that the Operational Area is 150 m north of the Dampier Habitat Protection Zone (borrow ground) and ~7.5 km west of Dampier Habitat Protection Zone. Any project vessels associated with the activity will comply	**(3)** Woodside confirmed the location of the Operational Area and noted that support vessels will comply with the EP once they enter the Operational Area and while transiting to and from, vessels will comply with applicable maritime	**(3)** Adopted a control in Section 6.8.2 of the EP, as referenced as C 2.6, such that survey vessels will not enter the Dampier AMP at any time (unless there is an emergency that requires it).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	with the EP when within the Operating Area defined by Woodside and when vessels are transiting to and from the Operational Area will comply with applicable maritime regulations, laws and other requirements for safe vessel operation.	regulations, laws and other requirements. Woodside added a control that no vessels associated with the activity will enter the marine park at any time unless there is an emergency situation.	
(4) Provided guidance for emergency response.	**(4)** Woodside will notify DNP in the event of relevant changes to the activity, or for emergency responses.	**(4)** Woodside confirmed it would notify DNP if activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses**.**	**(4)** Woodside will provide notification of significant change, as appropriate, to relevant persons as referenced in Section 7.10 Table 7-5 of the EP. Woodside will ensure DNP is made aware of any incidences within a marine park for the activity, as per the commitment in the Oil Pollution First Strike Plan (Appendix H).
(5) No additional comments beyond ones provided in October 2024.	**(5)** Woodside understands DNP has no additional comments and recognises the comments previously shared during the first consultation in 2024l	**(5)** Woodside confirmed that DNP had no further comments beyond what was provided during the 2024 consultation.	**(5)** Not required.
While feedback has been received, there were no objections or claims.	.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.
Summary Report – Consultation Complete			
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DNP for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically: **Sufficient Information**			

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given DNP sufficient information to allow DNP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DNP on 8 July 2024, marking the commencement of consultation on this EP . Woodside emailed an updated Consultation Information Sheet to DNP on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 27 October 2024, DNP shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable DNP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 14 November 2024.
- Woodside sent a consultation update in October 2025 which included a new Consultation Information Sheet and provided an overview of the survey activities and updated timing.

Reasonable Period

Woodside allowed DNP a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DNP advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DNP two 30 day periods for consultation and accepted and responded to the feedback sent on 27 October 2024. Woodside provided an additional 30 days for the consultation update which started in October 2025.
- In this context, Woodside allowed DNP a reasonable period for consultation in preparation of the EP as evidenced by DNP's response on 27 October 2024 and its second response on 7 October following the consultation update on 1 October 2025.

Reasonable Opportunity

Woodside allowed DNP a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to DNP as evidenced by its response on 27 October 2024 and again on 7 October 2025.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- DNP provided feedback regarding the proposed activities in this EP. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from DNP and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of DNP's feedback, adopted a control in Section 6 of the EP, as referenced as C 2.6, such that survey vessels will not enter the Dampier AMP at any time (unless there is an emergency that requires it).

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable

4.3 COMMONWEALTH AND STATE GOVERNMENT DEPARTMENTS OR AGENCIES – INDUSTRY

4.3.1 Department of Mines, Petroleum and Exploration (DMPE), (known in 2024 as Department of Energy, Mines, Industry Regulation and Safety (DEMIRS))

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed DEMIRS (which will be called DMPE moving forward) advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DMPE, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed DMPE a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DMPE following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required. DMPE will receive start and end of activity notifications as a standard procedure based on regulation 54 in Table 7-5 in Section 7.10 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DMPE for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DMPE sufficient information to allow DMPE to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to DMPE on 8 July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DMPE on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to DMPE on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DMPE a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DMPE advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DMPE 30 days for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed DMPE a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed DMPE a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding DMPE of the opportunity to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DMPE did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DMPE's functions, interests or activities.

4.3.2 Department of Industry, Science and Resources (DISR)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed DISR advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to DISR, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed DISR a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1)
- On 21 October 2025, Woodside sent an email reminder to DISR following up on the proposed activity (Record of Consultation 6.4.1)

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with DISR for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given DISR sufficient information to allow DISR to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to DISR on 8 July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to DISR on 8 July 2024, marking the commencement of consultation on this EP . Woodside emailed an updated Consultation Information Sheet to DISR on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed DISR a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to DISR advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed DISR two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed DISR a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed DISR a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding DISR of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as DISR did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on DISR's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.4 COMMONWEALTH COMMERCIAL FISHERIES AND REPRESENTATIVE BODIES

4.4.1 Commonwealth Fisheries Association (CFA)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed CFA advising of the proposed activity (Record of Consultation, reference 6.1.22), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to CFA, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed CFA a consultation update (Record of Consultation, reference 6.3.17 and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to CFA following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with CFA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given CFA sufficient information to allow CFA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to CFA on 8 July 2024, and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to CFA on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to CFA on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed CFA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to CFA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed CFA two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed CFA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity to Provide Feedback

Woodside allowed CFA a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding CFA of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as CFA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on CFA's functions, interests or activities.

4.4.2 North West Slope Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed North West Slope Trawl Fishery licence holders advising of the proposed activity (Record of Consultation, reference 6.1.22), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 23 July 2024, Woodside sent an email reminder to North West Slope Trawl Fishery licence holders following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed North West Slope Trawl Fishery a consultation update (Record of Consultation, reference 6.3.17) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to North West Slope Trawl Fishery following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with North West Slope Trawl Fishery licence holders for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given North West Slope Trawl Fishery licence holders sufficient information to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to North West Slope Trawl Fishery licence holders on 8 July 2024, and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to North West Slope Trawl Fishery licence holders on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to North West Slope Trawl Fishery licence holders on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed North West Slope Trawl Fishery licence holders a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to North West Slope Trawl Fishery licence holders advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed North West Slope Trawl Fishery licence holders two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed North West Slope Trawl Fishery licence holders a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity to Provide Feedback

Woodside allowed North West Slope Trawl Fishery licence holders a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding North West Slope Trawl Fishery licence holders of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as North West Slope Trawl Fishery licence holders did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on North West Slope Trawl Fishery licence holders' functions, interests or activities.

4.5 STATE COMMERCIAL FISHERIES AND REPRESENTATIVE BODIES

4.5.1 Western Australian Fishing Industry Council (WAFIC)

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed WAFIC advising of the proposed activity (SI Report, 11.1), provided a Consultation Information Sheet, list of fisheries to contact and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 9 July 2024, WAFIC emailed to thank Woodside for the email and said it would action the request to contact relevant fisheries (SI Report, reference (11.2).
- **(1)** On 10 July 2024, Woodside emailed to thank WAFIC for the update (SI Report, reference 11.3).
- **(1)** On 12 July 2024, WAFIC advised it would action the request when a colleague was back in the office (SI Report, reference 11.4).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(1)** On 12 July 2024, Woodside thanked WAFIC for update and confirmed it was fine to action request upon the colleague's return (SI Report, reference 11.5) and offered to extend the consultation timeframe by a week so the fisheries would have access to full 30 days to provide feedback.
- On 15 July 2024, Woodside reached out again to WAFIC and offered to extend date for feedback. (SI Report, reference 11.6).

  (1) On 15 July 2024, WAFIC emailed to confirm it would send information out to fisheries that day (SI Report, reference 11.7) and thanked Woodside for extending the date for feedback.
- **(1)** On 15 July 2024, Woodside replied to thank WAFIC for sending information to the fisheries (SI Report, reference 11.8).
- **(1)** On 15 July 2024, WAFIC forwarded the Angel CCS GPGT Survey EP consultation material which was sent to relevant state fisheries (SI Report, reference 11.9).
- On 15 July 2024, WAFIC emailed Woodside (SI Report, reference, 11.10) and confirmed:
  - **(1)** It sent consultation information to relevant license holders for the EP and confirmed Specimen Shell Managed Fishery was not deemed relevant by WAFIC, and that it would provide feedback on 16 August 2024.
- **(1)** On 15 July 2024, Woodside thanked WAFIC for distributing consultation information for this and another EP (SI Report, reference 11.11).
- **(2)** On 16 August 2024, WAFIC emailed to confirm it did not receive any feedback from fisheries on the EP (SI Report, reference 11.12) and:
  - **(3)** Asked how Woodside monitored the discharge of drill cuttings and impact of drill cuttings associated with the surveys and about safety risk of fishing in area of drill cuttings and risk of catch contamination.
  - **(4)** Asked about impacts of activities on water quality.
  - **(5)** Requested notifications on vessel operations and activities.
- **(2)** On 30 August 2024, Woodside replied to WAFIC and thanked it for the update that there was no feedback from license holders (SI report, reference 11.13) and:
  - **(3)** Noted its assessment of risks and impacts and applied controls to manage drill cuttings from geotechnical seabed coring and said that no significant impacts to fish tied to seabed coring were anticipated.
  - **(4)** Included that only environmentally acceptable drill fluids are discharged to sea and toxic effects in vicinity of drill cuttings is low any impact to water quality was predicted to be localised and short-term with measures and controls in place to manage impacts and risks to ALARP and acceptable levels.
  - **(5)** Affirmed Woodside would provide notifications for start-up and completion of survey activities.
- **(6)** On 3 September 2024, WAFIC emailed to thank Woodside for responding to its feedback and confirmed it had no further comments (SI Report, reference 11.14).
- **(6)** On 11 September 2024, Woodside thanked WAFIC for its feedback (SI Report, reference 11.15).
- On 1 October 2025, Woodside emailed WAFIC a consultation update (SI Report, reference 11.16) and provided a Consultation Information Sheet (CIS) (Record of Consultation, reference 6.3.1) and request to contact the State Fishery license holders.
- **(1)** On 1 October 2025, WAFIC said it would share the activity update with State Fishery license holders (SI Report, reference 11.17) and later confirmed the send of the email and CIS attachment (SI Report, reference 11.18).
- **(1)** On 1 October 2025, Woodside thanked WAFIC for sending the consultation information (SI Report, reference 11.19).
- **(2)** On 31 October, WAFIC confirmed no feedback was received from the State Fishery licence holders (SI Report reference 11.20) and:
  - **(7)** Requested details of the compensation protocol Woodside intends to apply under the EP as WAFIC had concerns tied to potential damage or loss of commercial fishing gear due to survey activities.
- On 16 December, Woodside thanked WAFIC for confirming no feedback was received from State Fishery licence holders (SI Report, reference 11.21) and:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (7) Confirmed that Woodside was preparing an update to its co-existence approach with commercial fishers in Australia and it would be shared with WAFIC when final.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Confirmed consultation information was sent to fisheries/licence holders.	**(1)** Woodside notes relevant state fishery license holders would be consulted through WAFIC.	**(1)** Woodside thanked WAFIC for distributing consultation information to relevant fishery licence holders and noted there was no feedback or concerns from industry.	**(1)** Not required.
(2) No feedback from fishing industry members.	**(2)** Woodside notes that WAFIC did not get any feedback from its fishing industry members.	**(2)** Woodside acknowledged that WAFIC did not receive any feedback resulting from consultation with fishing industry members.	**(2)** Not required.
(3) Requested information on drill cuttings impact.	**(3)** Woodside assesses potential risks and impacts to seabed from geotechnical surveys and applies controls to manage impact of drill cuttings.	**(3)** Woodside noted its assessment of risks and impacts and has applied controls to manage drill cuttings from the geotechnical activities and also noted there should be no significant impact to fish as a result of the activity.	**(3)** Refer to Section 6.8.2 of the EP.
(4) Consideration of the cumulative impacts on water quality from activities.	**(4)** Woodside assesses the risks and impacts on water quality from the surveys and applies controls to manage impacts and risks to ALARP and acceptable levels.	**(4)** Woodside addressed concerns on impact to water quality noting it would be localised and short-term with measures and controls in place to manage impacts and risks to ALARP and acceptable levels	**(4)** Refer to Section 6.8 and 6.9 of the EP.
(5) Requested notifications.	**(5)** Woodside understands WAFIC needs to be notified given activities will take place in areas where state fisheries are active.	**(5)** Woodside confirmed WAFIC would receive start of activity notifications.	**(5)** Woodside will provide notifications to WAFIC as set out in Section 7.10, Table 7-5 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(6) No further comments.	**(6)** Woodside confirms it addressed WAFIC feedback in prior correspondence and understands that WAFIC has no further comments on the activities.	**(6)** Woodside noted that WAFIC had no further comments on the planned activities.	**(6)** Not required.
(7) Requested compensation protocol details regarding potential loss of commercial fishing gear	**(7)** Woodside is updating its co-existence agreement which addresses a compensation protocol available to fisheries.	**(7)** Woodside confirmed it was updating its co-existence agreement and would send to WAFIC when finalised.	**(7)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	Woodside has assessed the potential for interaction with State-managed fisheries in Section 6.6.1 of the EP. No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with WAFIC for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given WAFIC sufficient information to allow WAFIC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to WAFIC on 9 July 2024, marking the commencement of consultation on this EP. Woodside issued a consultation update on 1 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

- On 16 August 2024, WAFIC shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable WAFIC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 30 August 2024.

Reasonable Period

Woodside allowed WAFIC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WAFIC advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WAFIC two 30 day periods for consultation and consultation with relevant state fisheries.
- In this context, Woodside allowed WAFIC a reasonable period for consultation in preparation of the EP as evidenced by WAFIC's response on 16 August 2024 and again on 31 October 2025.

Reasonable Opportunity

Woodside allowed WAFIC a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside considers a reasonable opportunity was provided to WAFIC as evidenced by its response on 16 August 2024 and 31 October 2025.

Outcomes of Consultation:

- WAFIC provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from WAFIC and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of WAFIC's feedback requesting activity notifications, this was added to Section 7.10, Table 7-5 of the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.5.2 Marine Aquarium Managed Fishery, Mackerel Managed Fishery (Area 2), Nickol Bay Prawn Managed Fishery, Onslow Prawn Managed Fishery (Areas 1 and 2), Pilbara Crab Managed Fishery, Pilbara Line Fishery, Pilbara Trap Fishery, Pilbara Trawl Fishery

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 15 July 2024, WAFIC, on behalf of Woodside, emailed Marine Aquarium Managed Fishery, Mackerel Managed Fishery (Area 2), Nickol Bay Prawn Managed Fishery, Onslow Prawn Managed Fishery (Areas 1 and 2), Pilbara Crab Managed Fishery, Pilbara Line Fishery, Pilbara Trap Fishery, Pilbara Trawl Fishery (fishery licence holders) advising of the proposed activity (SI Report, reference 11.8), and provided a Consultation Information Sheet.
- On 16 August 2024, WAFIC emailed Woodside reporting that no feedback had been received for this activity from licence holders (SI Report, reference 11.11).
- On 1 October 2025, WAFIC, on behalf of Woodside, emailed the fishery licence holders a consultation update (SI Report, reference 11.17) and provided a Consultation Information Sheet (CIS) (Record of Consultation, reference 6.3.1) and request to contact the State Fishery license holders.
- On 1 October 2025, Woodside thanked WAFIC for sending the information to state fishery licence holders (SI Report, reference 11.18).
- On 31 October, WAFIC confirmed no feedback was received from the State Fishery licence holders (SI Report reference 11.19).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation through WAFIC with fishery licence holders for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given fisher licence holders sufficient information to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside via WAFIC gave this information to fishery licence holders on 15 July 2024, and an updated Consultation Information Sheet has been available on the Woodside website since October 2025.Woodside via WAFIC emailed an updated Consultation Information Sheet to fishery licence holders on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed fishery licence holders a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to fishery licence holders advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside, through WAFIC, allowed fishery licence holders two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed fishery licence holders a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed fishery licence holders a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as fishery licence holders did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on fishery licence holders' functions, interests or activities.

4.5.3 Aquaculture Council of Western Australia (ACWA)

Summary of information provided and record of consultation for this EP:

- On 1 October 2025, Woodside, emailed ACWA a consultation update (Record of Consultation, reference 6.3.42) and provided a Consultation Information Sheet (CIS) (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside emailed a reminder to ACWA about consultation. (Record of Consultation, reference 6.4.1)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with ACWA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given ACWA sufficient information to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP consultation update has been publicly available on the Woodside website since October 2025. Woodside emailed an updated Consultation Information Sheet to ACWA on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed ACWA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to ACWA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed ACWA a 30 day period for consultation.
- It has been 17 months since consultation commenced for the EP, but 2 months for the consultation update where ACWA was added to consultation.
- In this context, Woodside allowed ACWA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed ACWA a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as ACWA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on ACWA's functions, interests or activities.

4.6 RECREATIONAL MARINE USERS AND REPRESENTATIVE BODIES

4.6.1 Marine Tourism WA

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed the Marine Tourism WA advising of the proposed activity (Record of Consultation, reference 6.1.24), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Marine Tourism WA, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed Marine Tourism WA a consultation update (Record of Consultation, reference 6.3.20) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Marine Tourism WA following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Change and Revision process (see Section 7.8.1 of this EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Marine Tourism WA for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Marine Tourism WA sufficient information to allow Marine Tourism WA to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to Marine Tourism WA on 8 July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Marine Tourism WA on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to Marine Tourism WA on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed Marine Tourism WA a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Marine Tourism WA advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Marine Tourism WA two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed Marine Tourism WA a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity to Provide Feedback

Woodside allowed Marine Tourism WA a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as Marine Tourism WA did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on Marine Tourism WA's functions, interests or activities.

4.6.2 Pilbara/Kimberley Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed (Record of Consultation, reference 6.1.25) or sent a letter (Record of Consultation, reference 6.1.26) to individual Pilbara/Kimberley Recreational Marine Users advising of the proposed activity, provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent a follow up email to individual Pilbara/Kimberley Recreational Marine Users (Record of Consultation, reference 6.2.1).
- On 25 July 2024 Woodside sent a follow up letter to individual Pilbara/Kimberley Recreational Marine Users when emails were not available (Record of Consultation, reference 6.2.2).
- On 1 October 2025, Woodside emailed or mailed Pilbara/Kimberley Recreational Marine Users a consultation update (Record of Consultation, reference 6.3.20 and 6.3.20.1) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email or letter reminder to Pilbara/Kimberley Recreational Marine Users following up on the proposed activity (Record of Consultation 6.4.1 and 6.4.2).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with individual Pilbara/Kimberley Recreational Marine Users for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient Information

Woodside has given Pilbara/Kimberley Recreational Marine Users sufficient information to allow Pilbara/Kimberley Recreational Marine Users to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Pilbara/Kimberley Recreational Marine Users on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed or mailed an updated Consultation Information Sheet to Pilbara/Kimberley Recreational Marine Users on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed Pilbara/Kimberley Recreational Marine Users a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to individual Pilbara/Kimberley Recreational Marine Users advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed individual Pilbara/Kimberley Recreational Marine Users two 30-day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed individual Pilbara/Kimberley Recreational Marine Users a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Pilbara/Kimberley Recreational Marine Users a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 or letter on 25 July 2024 and again on 21 October 2025, reminding individual Pilbara/Kimberley Recreational Marine Users of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- No additional measures were required as individual Pilbara/Kimberley Recreational Marine Users did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on individual Pilbara/Kimberley Recreational Marine Users' functions, interests or activities.

4.6.3 Recfishwest

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Recfishwest advising of the proposed activity (Record of Consultation, reference 6.1.24), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Recfishwest, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 23 July, Recfishwest emailed (SI Report, reference 8.1) to thank Woodside for information related to Angel CCS Geophysical Geotechnical Surveys and:
  - **(1)** Noted that the planned activities will help obtain data to support the GHG program, inform design plans and placement of infrastructure and support baseline studies for current infrastructure and potential future activities.
  - **(2)** Noted activities are in area of recreational fishing but should not have high impact on recreational fishing due to survey methods.
  - **(3)** Wanted to be kept informed as project progresses and CCS infrastructure is designed and look forward to future updates.
- **(1)** On 23 July 2024, Woodside emailed Recfishwest to thank it for email regarding the planned activities of EP (SI Report, reference 8.2):
  - **(2)** Noted the feedback that recreational fishers are in area of planned activities, but they should not be highly impacted.
  - **(3)** Confirmed Recfishwest will receive notifications on current activities so they can update relevant fishing clubs and community members.
- On 1 October 2025, Woodside emailed Recfishwest a consultation update (Record of Consultation, reference 6.3.19) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Recfishwest following up on the proposed activity (Record of Consultation, reference 6.4.1).
- On 30 October 2025, Recfishwest thanked Woodside for the update on the Angel CCS GPGT Surveys EP (SI Report, reference 8.3) and:
  - **(1)** Recapped when surveys were expected to begin and status of state EP.
  - **(2,3)** Noted no additional feedback other than what was provided on 23 July 2025 and appreciated the update.
- On 3 November 2025, Woodside thanked Recfishwest for the review of the Angel CCC GPGT Surveys EP update (SI Report, reference 8.4) and:
  - **(1)** Confirmed Recfishwest's understanding of the Commonwealth EP activity and status of State EP.
  - **(2,3)** Understood that Recfishwest had no additional feedback beyond what was provided in 23 July 2024 and notifications will be provided.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Recapped core project activities.	**(1)** Woodside understands that Recfishwest had reviewed the planned activities.	**(1)** Woodside noted the recap of activities associated with the EP's planned activities.	**(1)** Planned activities are covered in Section 3.2 of EP.
(2) Noted survey activities will not have high impact on recreational fishing.	**(2)** Woodside reviewed Recfishwest's assessment that given survey methods, activities won't have a high impact on recreational fishing.	**(2)** Woodside noted that despite prevalent recreational fishing in activity areas, the survey methods should have limited impact on fishers.	**(2)** Not required.
(3) Asked to be kept informed**.**	**(3)** Woodside acknowledges Recfishwest's request to be informed as the Angel CCS program progresses.	**(3)** Woodside confirmed it would provide notifications so Recfishwest can inform relevant fishing clubs and communities.	**(3)** Woodside will provide notifications to Recfishwest as set out in Section 7.10, Table 7-5 of the EP**.**
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	Woodside considers the measures and controls in the EP are appropriate.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Recfishwest for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Recfishwest sufficient information to allow Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Recfishwest on 8 July 2024, marking the commencement of

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

consultation on this EP. Woodside emailed an updated Consultation Information Sheet to Recfishwest on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:

- The purpose of consultation and set out what was being sought through consultation.
- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 23 July 2024, Recfishwest shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Recfishwest to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 23 July 2024 and responded on 3 November 2025.

Reasonable Period

Woodside allowed Recfishwest a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Recfishwest advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Recfishwest two 30-day periods for consultation.
- In this context, Woodside allowed Recfishwest a reasonable period for consultation in preparation of the EP as evidenced by Recfishwest's response on 23 July 2024 and again on 31 October 2025.

Reasonable Opportunity

Woodside allowed Recfishwest a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to Recfishwest as evidenced by its response on 23 July 2024 and again on 30 October 2025.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Recfishwest provided feedback but had no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Recfishwest and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of Recfishwest's feedback requesting activity notifications, this was added to Section 7.10., Table 7-5 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.6.4 WA Game Fishing Association

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed WA Game Fishing Association advising of the proposed activity (Record of Consultation, reference 6.1.24), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to WA Game Fishing Association, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed WA Game Fishing Association a consultation update (Record of Consultation, reference 6.3.20) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to WA Game Fishing Association following up on the proposed activity (Record of Consultation, reference 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with WA Game Fishing Association for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given WA Game Fishing Association sufficient information to allow WA Game Fishing Association to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to WA Game Fishing Association on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to WA Game Fishing Association on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The purpose of consultation and set out what was being sought through consultation.
- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed WA Game Fishing Association a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to WA Game Fishing Association advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed WA Game Fishing Association two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed WA Game Fishing Association a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed WA Game Fishing Association a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and again on 21 October 2025, reminding WA Game Fishing Association of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as WA Game Fishing Association did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on WA Game Fishing Association's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7 TITLEHOLDERS AND OPERATORS

4.7.1 Bounty Oil and Gas, Coastal Oil and Gas, Exxon Mobil Australia, Jadestone, JX Nippon O&G Exploration, KATO Energy, Longreach Capital Investment / Beagle No. 1, Skye Napoleon, Vermillion Oil & Gas

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Bounty Oil and Gas, Coastal Oil and Gas (via Fox Resources), Exxon Mobil Australia, Jadestone, JX Nippon O&G Exploration, KATO Energy, Longreach Capital Investment/Beagle No. 1, Skye Napoleon and Vermillion Oil & Gas (known as Titleholders) advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Titleholders, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed Titleholders a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Titleholders following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation Titleholders for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Titleholders sufficient information to allow Titleholders to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Titleholders on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to Titleholders on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- The purpose of consultation and set out what was being sought through consultation.
- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
- A timeframe for consultation and the provision of feedback.
- A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed Titleholders a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Titleholders advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Titleholders two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed Titleholders a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Titleholders a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025, reminding Titleholders of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as Titleholders did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on Titleholders' functions, interests or activities.

4.7.2 Chevron Australia

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 8 July 2024, Woodside emailed Chevron Australia advising of the proposed activity (Record of Consultation, reference 6.1.27), provided a Consultation Information Sheet, GIS shape files and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Chevron Australia, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 20 August 2024, Chevron Australia emailed to thank Woodside for sharing planned activities (SI Report, reference 23.1) and:
  - **(1)** Noted no issues were identified.
  - **(2)** Asked to be updated on cyclone anchor configuration, as well as mooring design, site specific geophysical and geotechnical data, anchor analysis, risk mitigations, should any activities take place during cyclone season.
- On 22 August 2024, Woodside emailed Chevron Australia to thank it for reviewing materials (SI Report, reference 23.2) and:
  - **(1)** For confirming Chevron Australia had not identified any issues.
  - **(2)** Confirmed there would be no anchoring activities with this EP.
- On 1 October 2025, Woodside emailed Chevron a consultation update (Record of Consultation, reference 6.3.21) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, in absence of feedback, Woodside sent a follow-up email (Record of Consultation, reference 6.4.1).
- On 31 October 2025, Chevron thanked Woodside and provided Joint Venture (JV) partner-related questions (SI Report, reference 23.3).
- On 3 November 20025, Woodside thanked Chevron and noted JV matters to be addressed through those channels (SI Report, reference 23.4).
- On 5 November 2025, Chevron provided feedback for the Angel CCS survey activities (SI Report, reference 23.5) and:
  - Noted potential impacts to Chevron future fields including:
    - **(3)** Survey exclusion zones or vessel operations could temporarily restrict access to future field project areas or delay planned activities.
    - **(4)** Overlapping survey and future field schedules could create operational conflicts.
    - **(5)** Survey findings, such as geotechnical hazards or environmental sensitivities, may affect future field routing or design decisions.
  - **(4)** Requested detailed survey schedules and operational area maps to overlay with Chevron's future fields plans given the overlap with Chevron's adjacent title G-9-AP.
  - **(2)** Requested information on cyclone season and mooring design including anchor configuration and risk mitigation.
  - **(6)** Asked for notifications and updates on changes to survey scope, timing or operational area.
- On 26 November 2025, Woodside thanked Chevron for its feedback (SI Report, reference 23.6) and:
  - **(3)** Responded that survey exclusion zones and vessel operations were expected to have minimal impact because the exclusion zone was small and the vessel would remain in the area for short periods and
    - Would notify adjacent titleholders at least four weeks before mobilisation and collaborate on SIMOPs plan as needed.
  - **(4)** Noted survey planning was in early stages of planning to inform layouts and routes and if campaign would impact Chevron titles, survey corridor details would be provided.
  - (**5)** Confirmed Chevron's request for survey findings would be reviewed and handled through Joint Venture channels, outside the EP.
  - **(4)** Noted it would provide detail of survey corridor for any campaign affecting Chevron-operated titles.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(2)** Confirmed that no anchoring would take place within the Operational Area.
- **(6)** Committed to provide start and end of activity notifications and updates.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) No issues identified.	**(1)** Woodside accepts that Chevron Australia had reviewed consultation materials and no issues were identified.	**(1)** Woodside noted Chevron had not identified any issues.	**(1)** Not required.
(2) Cyclone season -related questions.	**(2)** Woodside reviewed work plan and confirmed no anchoring would take place during survey activities, so no updates will be needed for Chevron Australia related to cyclone season.	**(2)** Woodside confirmed with Chevron Australia there would be no anchoring associated with survey activities.	**(2)** Not required.
(3) Need to understand survey exclusion zones to avoid potential delays.	**(3)** Woodside confirms the exclusion zone is small and adjacent titleholders will be notified at least four weeks ahead of mobilisation and have SIMOPs plan as needed.	**(3** Woodside confirmed the exclusion zone is small and adjacent titleholders would be notified at least four weeks ahead of mobilisation and have SIMOPs plan as needed.	**(3)** See Section 3.2 addressing overlapping titles.
(4) Request for survey schedules.	**(4)** Woodside understands the request but notes survey planning is in development and will update in future if Chevron titles are affected.	**(4)** Woodside replied that survey planning was in early stages but if Chevron would be impacted, it would receive survey corridor details.	**(4)** Not required.
(5) Request for survey data.	**(5)** Woodside believes survey data access is a discussion for the Joint Venture channels and should be reviewed outside of the EP.	**(5)** Woodside confirmed Chevron's request should be reviewed through Joint Venture channels and not within the EP.	**(5)** Not required.
(6) Request for notifications.	**(6)**	**(6)**	**(6)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside notes Chevron's request for start and end of activity notifications and updates.	Woodside confirmed Chevron would receive start and end of activity notifications.	Chevron will receive start and end o activity notifications per Table 7-5, Section 7.10 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Chevron Australia for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Chevron Australia sufficient information to allow Chevron Australia to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Chevron on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to Chevron on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- Woodside followed-up to remind Chevron Australia of consultation on 23 July 2024 and again on 21 October 2025.
- On 20 August 2024, Chevron Australia shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Chevron Australia to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 22 August 2024 and on 26 November 2025.

Reasonable Period

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside allowed Chevron Australia a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Chevron Australia advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Chevron Australia two 30 day periods for consultation.
- In this context, Woodside allowed Chevron Australia a reasonable period for consultation in preparation of the EP as evidenced by Chevron Australia's response on 20 August 2024 and again on 5 November 2025.

Reasonable Opportunity

Woodside allowed Chevron Australia a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to Chevron Australia as evidenced by its response on 20 August 2024 and on 5 November 2025.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Chevron Australia provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Chevron Australia and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of consultation and request for notifications, Chevron is included in start and end of activity notifications, Table 7-5, Section 7.10 of the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.3 Finder Energy

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Finder Energy advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Finder Energy, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 24 July 2024, Finder Energy emailed to thank Woodside for the information and noted it had no objections or comment on the planned activities. (SI Report, reference 7.1.)
- **(1)** On 24 July 2024, Woodside emailed to thank Finder Energy for its feedback (SI Report, reference 7.2).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 1 October 2025, Woodside emailed Finder Energy a consultation update (Record of Consultation, reference 6.3.23) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Finder Energy following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Raised no objections or comments.	**(1)** Woodside accepts that Finder Energy had reviewed consultation materials and had no objections or comments**.**	**(1)** Woodside thanked Finder Energy and noted it had no objections or comments.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Finder Energy for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Finder Energy sufficient information to allow Finder Energy to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Finder Energy on 8 July 2024, marking the commencement of consultation on this EP . Woodside emailed an updated Consultation Information Sheet to Finder Energy on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

- On 24 July 2024, Finder Energy shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Finder Energy to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 24 July 2024.

Reasonable Period

Woodside allowed Finder Energy a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Finder Energy advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Finder Energy two 30 day periods for consultation.
- In this context, Woodside allowed Finder Energy a reasonable period for consultation in preparation of the EP as evidenced by Finder Energy's response on 24 July 2024.

Reasonable Opportunity

Woodside allowed Finder Energy a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside sent follow-up consultation information on 23 July 2024 and 21 October 2025.
- Woodside considers a reasonable opportunity was provided to Finder Energy as evidenced by its response on 24 July 2024.

Outcomes of Consultation:

- Finder Energy provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Finder Energy and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with Finder Energy because appropriate measures are already included in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.4 KUFPEC

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed KUFPEC advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 23 July 2024, Woodside sent an email reminder to KUFPEC, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 9 August 2024, KUFPEC emailed and thanked Woodside for the information and noted they had no objections. (SI Report, reference 12.1).
- (1) On 9 August 2024, Woodside replied to KUFPEC to thank them for responding and noted KUFPEC has no objections to the planned activities (SI Report, 12.2).
- On 1 October 2025, Woodside emailed KUFPEC a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to KUFPEC following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Raised no objections to activities.	**(1)** Woodside accepts that KUFPEC had reviewed consultation materials and had no objections.	**(1)** Woodside noted KUFPEC had no objections.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional controls or measures are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with KUFPEC for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given KUFPEC sufficient information to allow KUFPEC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to KUFPEC on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to KUFPEC on 1 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- Woodside followed up with KUFPEC on 23 July 2024 and again on 21 October 2025.
- On 9 August 2024, KUFPEC shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable KUFPEC to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information to KUFPEC on 9 August 2024.

Reasonable Period

Woodside allowed KUFPEC a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to KUFPEC advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed KUFPEC two 30-day periods for consultation.
- In this context, Woodside allowed KUFPEC a reasonable period for consultation in preparation of the EP as evidenced by KUFPEC response on 9 August 2024.

Reasonable Opportunity

Woodside allowed KUFPEC a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to KUFPEC as evidenced by its response 9 August 2024.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- KUFPEC provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from KUFPEC and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with KUFPEC because appropriate measures are already included in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.7.5 Santos

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Santos advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to Santos, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 August 2024, Santos emailed to thank Woodside for requesting feedback on Angel CCS surveys EP (SI Report, reference 9.1) and:
- **(1)** Said that it has planned activities in the same timeframe and vicinity of survey area.
- **(2)** Requested notification of planned vessel movements.
- On 2 August 2024, Woodside thanked Santos for its response and feedback (SI Report, reference 9.2) and:
  - **(1)** Noted Santos' feedback about planned operational activities during similar timeframe and in vicinity of proposed activity.
  - **(2)** Confirmed Woodside will notify Santos on planned vessel movements and activity commencement.
- On 2 October 2025, Woodside emailed Santos a consultation update (Record of Consultation, reference 6.3.22) with information about overlapping title and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Santos following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Noted planned activities in similar timeframe and location.	**(1)** Woodside considered Santos' feedback about having planned activities during similar timeframe and vicinity and reviewed with EP team facilitator.	**(1)** Woodside noted the need for notifications on planned vessel movements and commencement of activities, and EP facilitator will review for SIMOPS consideration.	**(1)** Not required.
(2) Requested notification on vessel movements.	**(2)** Woodside acknowledges Santos' request for vessel movement notification and agrees it is needed.	**(2)** Woodside will notify Santos on planned vessel movements when activities commence.	**(2)** Woodside will provide notifications to Santos as set out in Section 7.10, Table 7-5 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Management of Change and Revision process (see Section 7.8.1 of this EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Santos for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Santos sufficient information to allow Santos to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024 and an updated Consultation Information Sheet has been available on the Woodside website since October 2025. Woodside gave this information to Santos on 8 July 2024, marking the commencement of consultation on this EP. Woodside emailed an updated Consultation Information Sheet to Santos on 2 October 2025, marking an additional consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Program, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.
- On 1 August 2024, Santos shared its feedback, claims or objections regarding this activity, indicating the information provided was sufficient to enable Santos to make an informed assessment of the possible consequences of the activity on its functions, interests or activities.
- Woodside provided additional information on 2 August 2024.

Reasonable Period

Woodside allowed Santos a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Santos advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Santos two 30 day periods for consultation.
- In this context, Woodside allowed Santos a reasonable period for consultation in preparation of the EP as evidenced by Santos' response on 2 August 2024.

Reasonable Opportunity to Provide Feedback

Woodside allowed Santos a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- Woodside considers a reasonable opportunity was provided to Santos as evidenced by its response on 2 August 2024.

Outcomes of Consultation:

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Santos provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Santos and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - As a result of Santos' feedback requesting activity notifications, this was added to Section 7.10. of the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.6 InCapture

Summary of information provided and record of consultation for this EP:

- On 2 October 2025 Woodside emailed InCapture advising of the proposed activity (Record of Consultation, reference 6.3.24), provided a Consultation Information Sheet, and forwarded the original consultation emails from 2024 that were sent to relevant titleholders. InCapture was not part of the 2024 consultation because their title G-15-AP has not been awarded at the time of consultation.
- On 3 October 2025, InCapture emailed Woodside (SI Report, reference 30.1) and:
  - **(1)** Confirmed it had no objections to activities and would follow-up if further information was needed.
- On 6 October 2025, Woodside thanked InCapture for its email Woodside (SI Report, reference 30.2) and:
  - **(1)** Noted that InCapture had no objections and would contact Woodside should it need additional information.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) No objections to activities.	**(1)** Woodside understands and accepts that InCapture has no objections to the activities.	**(1)** Woodside confirmed with InCapture that it had no objections.	**(1)** Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with InCapture for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given InCapture sufficient information to allow InCapture to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The updated Consultation Information Sheet for this EP has been publicly available on the Woodside website since October 2025. Woodside gave this information to InCapture on 2 October 2025, marking the second commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity Program, and proposed mitigation and management measures.
  - A timeframe for consultation and the provision of feedback.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed InCapture a reasonable period for consultation in the preparation of the EP because:

- A consultation period was stated in the initial correspondence to InCapture advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed InCapture 30 days for consultation.
- Consultation for this EP with InCapture commenced 2 months ago.
- In this context, Woodside allowed InCapture a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with InCapture is appropriate and adapted to the nature of interests of InCapture:

- Woodside emailed InCapture at its preferred address.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- InCapture provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from InCapture and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Made no changes or inclusions to the EP as a result of consultation with InCapture as no measures are needed in the EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.7.7 Carbon CQ and SK Earthon Australia

Summary of information provided and record of consultation for this EP:

- On 2 October 2025 Woodside emailed Carbon CQ and SK Earthon Australia advising of the proposed activity (Record of Consultation, reference 6.3.24), provided a Consultation Information Sheet, and forwarded the original consultation emails from 2024 that were sent to relevant titleholders. They were not part of the 2024 consultation because their title G-15-AP has not been awarded at the time of consultation.
- On 21 October 2025, Woodside sent an email reminder to Carbon CQ and SK Earthon following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims about the adverse impact of the activity received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Carbon CQ and SK Earthon Australia for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Carbon CQ and SK Earthon Australia sufficient information to allow Carbon CQ and SK Earthon Australia to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The updated Consultation Information Sheet for this EP has been publicly available on the Woodside website since October 2025. Woodside gave this information to Carbon CQ and SK Earthon Australia on 2 October 2025, marking the second commencement of consultation on this EP. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity Program, and proposed mitigation and management measures.
- A timeframe for consultation and the provision of feedback.
- Advice that relevant persons can request that particular information provided during consultation not be published (to align with 25(4) of the Environment Regulations).

Reasonable Period

Woodside allowed Carbon CQ and SK Earthon Australia a reasonable period for consultation in the preparation of the EP because:

- A consultation period was stated in the initial correspondence to Carbon CQ and SK Earthon Australia advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Carbon CQ and SK Earthon Australia 30 days for consultation.
- Consultation with Carbon CQ and SK Earthon for this EP commenced 2 months ago.
- In this context, Woodside allowed Carbon CQ and SK Earthon Australia a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided because Woodside's approach to consultation with Carbon CQ and SK Earthon Australia is appropriate and adapted to the nature of interests of Carbon CQ and SK Earthon Australia:

- Woodside emailed InCapture at its preferred address.
- In the absence of feedback, Woodside sent a follow-up consultation email on 21 October 2025, reminding Carbon CQ and SK Earthon Australia of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were considered as a result of consultation as Carbon CQ and SK Earthon Australia did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on Carbon CQ and SK Earthon Australia's functions, interests or activities.

4.8 PEAK INDUSTRY REPRESENTATIVE BODIES

4.8.1 Australian Energy Producers (AEP)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed AEP advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petrol*eum environment plans: Information for the community.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 23 July 2024, Woodside sent an email reminder to AEP, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed AEP a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to AEP following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with AEP for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given AEP sufficient information to allow AEP to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to AEP on 8 July 2024, marking the commencement of consultation on this EP. A consultation update was provided on 1 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed AEP a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to AEP advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside's methodology allows a 30-day consultation period and Woodside allowed AEP two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed AEP a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity to Provide Feedback

Woodside allowed AEP a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and 21 October 2025, reminding AEP of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as AEP did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on AEP's functions, interests or activities.

4.9 LOCAL GOVERNMENT AND ELECTED PARLIAMENTARY REPRESENTATIVES, COMMUNITY GROUPS OR ORGANISATIONS

4.9.1 City of Karratha

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed the City of Karratha advising of the proposed activity (Record of Consultation, reference 6.1.28), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 23 July 2024, Woodside sent an email reminder to City of Karratha, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 2 October 2025, Woodside emailed City of Karratha a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to City of Karratha following up on the proposed activity (Record of Consultation 6.4.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with City of Karratha for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given City of Karratha sufficient information to allow City of Karratha to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to City of Karratha on 9 July 2024, marking the commencement of consultation on this EP. A consultation update was provided on 2 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed City of Karratha a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to City of Karratha advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed City of Karratha two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed City of Karratha a reasonable period for consultation in preparation of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Reasonable Opportunity

Woodside allowed City of Karratha a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and again on 21 October 2025, reminding City of Karratha of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as City of Karratha did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on City of Karratha's functions, interests or activities.

4.9.2 Karratha Community Liaison Group (Karratha CLG)

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed the Karratha CLG advising of the proposed activity (Record of Consultation, reference 6.1.28), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 23 July 2024, Woodside sent an email reminder to Karratha CLG, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 2 October 2025, Woodside emailed Karratha CLG a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Karratha CLG following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Change and Revision process (see Section 7.8.1 of this EP).	

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Karratha CLG for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

Woodside has given Karratha CLG sufficient information to allow Karratha CLG to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to Karratha CLG on 9 July 2024, marking the commencement of consultation on this EP. A consultation update was provided on 2 October 2025.The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activities, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed Karratha CLG a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to Karratha CLG advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Karratha CLG two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed Karratha CLG a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Karratha CLG a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025 reminding Karratha CLG of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as Karratha CLG did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on Karratha CLG's functions, interests or activities.

4.9.3 Karratha and Districts Chamber of Commerce and Industry (KDCCI)

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed the KDCCI advising of the proposed activity (Record of Consultation, reference 6.1.28), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to KDCCI following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed KDCCI a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to KDCCI following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with KDCCI for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has given KDCCI sufficient information to allow KDCCI to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because:

- The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to KDCCI on 9 July 2024, marking the commencement of consultation on this EP. A consultation update was provided on 2 October 2025. The Consultation Information Sheet included:
  - The purpose of consultation and set out what was being sought through consultation.
  - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures.
  - A timeframe for consultation and the provision of feedback.
  - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans.
  - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations.

Reasonable Period

Woodside allowed KDCCI a reasonable period for consultation in the preparation of this EP because:

- A consultation period was stated in the initial correspondence to KDCCI advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed KDCCI two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed KDCCI a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed KDCCI a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and again on 21 October 2025, reminding KDCCI of the opportunity to provide feedback.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- No additional measures were required as KDCCI did not provide feedback for this EP.
- Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

The measures and controls described in this EP address the potential impact from the proposed activity on KDCCI's functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

4.10 OTHER NON-GOVERNMENT GROUPS OR ORGANISATIONS

4.10.1 Telstra

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Telstra advising of the proposed activity (Record of Consultation, reference 6.1.29), provided a Consultation Information Sheet, submarine communications cables map and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 23 July 2024, Woodside sent an email reminder to Telstra, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 2 October 2025, Woodside emailed Telstra a consultation update (Record of Consultation, reference 6.3.25) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Telstra following up on the proposed activity (Record of Consultation 6.4.1).
- **(1)** On 31 October 2025, Telstra confirmed it was interested in the survey works for the Angel CCS project given the use of ROV and seabed penetrometer testing, noting the potential or actual disturbance of the seabed (SI Report, reference 33.1) and:
  - **(2)** Noted that Woodside was already aware of InfraCo cable assets in the NWS region.
  - **(3)** Asked to be kept informed on actual dates and activities or any operation that may result in a seabed disturbance within 500m of any of Telstra's seabed cables.
- On 19 November, Woodside thanked Telstra for its review and feedback for the EP (SI Report, reference 33.2) and:
  - **(1)** Noted Telstra's interest in the survey work given potential disturbance to seabed.
  - **(2)** Acknowledged awareness of cables in the region.
  - **(3)** Confirmed it would provide start and end of activity notifications and would discuss with Telstra should any activity be within 500m of Telstra's seabed cables.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(I) Confirmed interest given potential seabed disturbance.	**(1)** Woodside understands Telstra's interest in the activity given potential seabed disturbance.	**(1)** Woodside confirmed Telstra's interest in activity given potential seabed disturbance.	**(1)** Not required.
(2) Noted Woodside awareness of existing cable assets in NWS region.	**(2)** Woodside is aware of existing cable assets in the region and near survey area.	**(2)** Woodside acknowledged its awareness of cables in the region.	**(2)** See Section 4.9.7, Table 4-26 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(3) Requested notifications on actual dates and activities or any works within 500m of Telstra seabed cables.	**(3)** Woodside understands Telstra's request to be notified for the activity as well as if any works will take place within 500m of its seabed cables.	**(3)** Woodside confirmed Telstra will receive start and end of activity notifications and Telstra would be contacted for discussions related to any activity within 500m of its seabed cables.	**(3)** For start and end of activity notifications, see Table 7-5, Section 7.10 of the EP. For the commitment to notify Telstra in the event of activities within 500m of its cables, see Section 6.8.2, P.S. 2.7 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report – Consultation Complete	
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and considers consultation with Telstra for the purpose of regulation 25 complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.4 of the EP and further summarised in the Consultation Approach above. Specifically: **Sufficient Information** Woodside has given Telstra sufficient information to allow Telstra to make an informed assessment of the possible consequences of the activity on its functions, interests or activities because: • The Consultation Information Sheet for this EP has been publicly available on the Woodside website since July 2024. Woodside gave this information to Telstra on 8 July 2024, marking the commencement of consultation on this EP. A consultation update was provided on 1 October 2025. The Consultation Information Sheet included: - The purpose of consultation and set out what was being sought through consultation. - A summary of the activity description, location of the activity, timing of the activity, receiving environment, impacts and risks associated with the GPGT Survey Activity, and proposed mitigation and measurement measures. - A timeframe for consultation and the provision of feedback. - A link to NOPSEMA's brochure Consultation on offshore petroleum environment plans. - Advice that relevant persons can request that particular information provided during consultation not be published (to align with regulation 25(4) of the Environment Regulations. **Reasonable Period** Woodside allowed Telstra a reasonable period for consultation in the preparation of this EP because:	•

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A consultation period was stated in the initial correspondence to Telstra advising of consultation as well as when consultation closed for the purposes of the preparation of the EP. This enabled Woodside to assess feedback before EP submission.
- Woodside's methodology allows a 30-day consultation period and Woodside allowed Telstra two 30 day periods for consultation.
- It has been 17 months since consultation commenced.
- In this context, Woodside allowed Telstra a reasonable period for consultation in preparation of the EP.

Reasonable Opportunity

Woodside allowed Telstra a reasonable opportunity for consultation in the preparation of this EP because:

- Woodside published advertisements in 7 national, state, and relevant local newspapers (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside ran one targeted social media campaign (see Consultation Activities). This allowed for broad awareness of the activity under the EP and of consultation.
- Woodside hosted regional community information sessions and attended community events in Karratha, Dampier and Onslow which featured EP and consultation information.
- In the absence of feedback, Woodside sent a follow-up consultation email on 23 July 2024 and on 21 October 2025 , reminding Telstra of the opportunity to provide feedback, which it provided on 31 October 2025.

Outcomes of Consultation

Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under regulation 24. The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- Telstra provided feedback but no objections or claims. In line with the intended outcome of consultation as set out in Section 5.2 and regulations 24 and 34(g), Woodside has:
  - Responded to feedback from Telstra and assessed the merits of any objection or claim about the adverse impact of activities to which this EP relates.
  - Added control Section 6.8.2, P.S. 2.7 of the EP to address 4 week notification when activities are within 500m of seabed cables and o start and end of activity notifications, per Table 7-5, Section 7.10 of EP.

Woodside will continue to accept and assess feedback throughout the life of the EP and apply its Management of Change and Revision process when applicable.

4.11 TRADITIONAL CUSTODIANS AND NOMINATED REPRESENTATIVE CORPORATIONS

4.11.1 Murujuga Aboriginal Corporation (MAC)

MAC is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi, and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.

Woodside has an existing relationship with MAC which extends prior to consultation for this EP. Woodside's consultation approach for Traditional Owners has a focus on building and maintaining long-term relationships with each group. Woodside has also assigned a First Nations Engagement team member as a dedicated focal person for EP consultation with MAC, who is responsible for building a consultative relationship and is readily available to provide information and take feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

In October 2025, Woodside provided MAC with a table of cultural values as part of the activity update. These values had been previously identified for MAC through a process of consultation and reviews of publicly available literature. Woodside invited MAC to make changes or provide additional information about these cultural values. This context and process demonstrates that Woodside's consultation approach with MAC is appropriate and adapted to the nature and interests of MAC.

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed MAC advising of the proposed activity (Record of Consultation, reference 6.1.32), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - Information on the interests that MAC and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how MAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for MAC to provide information about the proposed activity to other individuals, as required.
- On 30 July 2024, Woodside emailed MAC a reminder about the proposed activity, offered to provide further information and the opportunity to meet (SI Report, reference 14.1).
- On 2 August 2024, MAC emailed Woodside a letter relating to another EP (SI Report, reference 14.2). Matters relating to this EP included:
  - **(1)** MAC's advice that any development could potentially affect the natural movement, migration and/or other behaviour of marine species, and may have an impact on the cultural interpretation of the seasonal landscape, seascape and associated cultural behaviours.
  - **(2)** MAC's request that Woodside contact MAC for comment and review, in the event of an environmental incident affecting Murujuga.
  - MAC's request to be consulted regarding any Woodside activities located close to Murujuga.
- **(2)** On 2 August 2024, Woodside emailed MAC confirming that Woodside would inform MAC in the unlikely case of an environmental incident (SI Report, reference 14.3).
- On 9 September 2024, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 37.1).
- **(1)** On 17 September 2024, Woodside emailed MAC following up on MAC's correspondence from 2 August 2024. Woodside noted that consideration of the potential cultural impacts on marine species, including impacts and associated controls for marine mammal migration paths and behaviour have been assessed collaboratively with the environmental impacts and controls. Woodside also confirmed it was available to meet with MAC to discuss (SI Report, reference 14.4).
- On 25 September 2024, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.2).
- On 3 October 2024, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 37.3).
- On 23 October 2024, Traditional Owner members from MAC attended Woodside's second Monthly Community Lunch for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.4).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 4 March 2025, Woodside invited MAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 37.5).
- On 5 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.6).
- On 24 March 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 37.7).
- On 26 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 37.8).
- On 7 April 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 37.9).
- On 8 April 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.10).
- On 2 October 2025, Woodside emailed MAC an activity update about the proposed activity (Record of Consultation, reference 6.3.30). The email included:
  - A reference to the original consultation email for this EP sent to MAC on 9 and 30 July 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Information on the cultural values that Woodside consider relevant to the activity:
    - **(3)** Ecosystem and health of Mermaid Sound.
    - **(4)** Marine species – whales, dolphins, dugongs, fish, sea snakes, turtles, coral, seagrass, stingrays, sharks, crustaceans, octopus, sea stars, sea urchins, sponges, molluscs.
    - **(5)** Marine eco-systems – mangroves, macroalgal (seaweed) communities, subtidal soft bottom communities, intertidal sand and mudflat communities, rocky shores.
    - **(6)** Fish traps in Conzinc Bay, and Angel and Gidley Islands.
    - **(7)** Harvesting squid around Conzinc Bay.
    - **(8)** MAC is the appropriate cultural authority for Murujuga.
    - **(9)** Potential impact on Jinna (Songlines) on the submerged landscape.
    - **(1)** Murujuga seasonal calendar - any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities.
  - **(1, 3, 4, 5, 6 ,7, 8, 9)** A request from Woodside that MAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation of this EP.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) Any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities	**(1)** This value has been identified through Woodside's data collection processes (consultation).	**(1)** Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research some of which are set out on Woodside's website.	**(1)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(2) MAC requested Woodside contact it in the event of environmental incident that may affect Murujuga.	**(2)** In the unlikely event of a spill under this EP, Woodside notifies appropriate cultural authorities that may be affected, with the purpose of mitigating potential risks to cultural heritage values in accordance with its Oil Spill Preparedness and Response Mitigation Assessment for this EP (see Appendix G).	**(2)** Woodside notes that if an unplanned event occurs under this EP, MAC will be notified.	**(2)** Woodside contacts relevant persons in the event of an unplanned event as outlined in Section 7.11 of this EP and in accordance with its Oil Spill Preparedness and Response Mitigation Assessment for this EP (see Appendix H).
(3) Cultural Value: • Ecosystem and health of Mermaid Sound.	**(3)** This value has been identified through Woodside's data collection processes (publicly available literature).	**(3)** Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30). MAC did not request any changes.	**(3)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(4) Cultural Value: Marine species: • Whales, totemic importance. • Dolphins, cultural ceremonies. • Dugongs, food source. • Fish, cultural ceremonies. • Sea Snakes, culturally important. • Turtles, Songlines.	**(4)** This value has been identified through Woodside's data collection processes (consultation).	**(4)** Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30).	**(4)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• Coral, attract fish and other species • Seagrass, provide protection for animals. Locations include Conzinc Bay and between Angel and Gidley Islands. • Stingrays • Sharks • Crustaceans • Octopus • Sea star • Sea urchins • Sponges • Molluscs			
(5) Cultural Value: Marine eco-systems • Mangroves. • Macroalgal (seaweed) communities. • Subtidal soft bottom communities. • Intertidal sand and mudflat communities. • Rocky shores.	**(5)** This value has been identified through Woodside's data collection processes (consultation and publicly available literature).	**(5)** Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30).	**(5)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(6) Cultural Value: • Fish traps in Conzinc Bay, and Angel and Gidley Islands.	**(6)** This value has been identified through Woodside's data collection processes (publicly available literature and consultation).	**(6)** Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30).	**(6)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(7)	**(7)**	**(7)**	**(7)**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Cultural Value: • Harvesting squid around Conzinc Bay	This value has been identified through Woodside's data collection processes (publicly available literature and consultation).	Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30).	Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(8) Cultural Value: • MAC is the appropriate cultural authority for Murujuga.	**(8)** This value has been identified through Woodside's data collection processes (consultation).	**(8)** Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30). MAC did not request any changes.	**(8)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(9) Cultural Value: • Potential impact on Jinna (Songlines) on the submerged landscape. • Potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.	**(9)** This value has been identified through Woodside's data collection processes (consultation).	**(9)** Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.30).	**(9)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with MAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to MAC on 9 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of MAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.30).

Reasonable Period

Woodside allowed MAC a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with MAC on 9 July 2024 and requested MAC provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to MAC on 2 October 2025 and requested MAC provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to MAC for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on MAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for more than 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 9 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with MAC members as well as the MAC Board.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Asked MAC to advise how it would like Woodside to engage and whether MAC required further information.

- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with MAC on a number of occasions.
- Throughout the consultation period, Woodside and MAC have exchanged multiple emails, met on one occasion and have otherwise had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- MAC advised Woodside that any activities that could potentially affect the natural movement or behaviour of marine species may impact cultural values. Woodside has assessed impacts and risks to marine species in Section 6 of the EP. MAC did not provide feedback or information during the activity update for this EP relating to cultural values but has done so in consultation for other activities.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of this EP).

4.11.2 Ngarluma Aboriginal Corporation (NAC)

NAC is established under the *Native Title Act 1993* (Cth) by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has an existing relationship with NAC which extends prior to consultation for this EP. Woodside's consultation approach for Traditional Owners has a focus on building and maintaining long-term relationships with each group. Woodside has assigned a First Nations Engagement team member as a dedicated focal person for EP consultation with NAC, who is responsible for building a consultative relationship and is readily available to provide information and take feedback. Aside from regular consultation, Woodside invites NAC to Quarterly Heritage Meetings.

In October 2025, Woodside provided NAC with a table of cultural values as part of the activity update. These values had been previously identified for NAC through a process of consultation and reviews of publicly available literature. NAC did not request any changes. This context and process demonstrates that Woodside's consultation approach with NAC is appropriate and adapted to the nature and interests of NAC.

Summary of information provided and record of consultation for this EP:

- On 12 July 2024, Woodside emailed NAC advising of the proposed activity (Record of Consultation, reference 6.1.33), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - Information on the interests that NAC and its members may have within the EMBA.
  - A request for feedback by 12 August 2024.
  - Information on how NAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for NAC to provide information about the proposed activity to other individuals, as required.
- On 7 August 2024, Woodside emailed NAC a reminder about the proposed activity and offered to meet. Woodside reiterated the date to provide a response about the proposed activity for the consideration in this EP (SI Report, reference 15.1).
- On 5 September 2024, Woodside emailed NAC to invite it to Woodside's Quarterly Heritage Meetings, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community (SI Report, reference 15.2).
- On 9 September 2024, Woodside invited NAC to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 37.1).
- On 25 September 2024, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.2).
- On 3 October 2024, Woodside emailed NAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 37.3).
- On 10 October 2024, NAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne where Woodside presented to Traditional Owners (SI Report, reference 38.1). Matters relevant to this EP included:
  - Consultation outcomes for Woodside EPs.
  - An explanation of State and Commonwealth regulatory requirements.
  - An explanation of EMBAs.
  - The process Woodside undertakes to identify Traditional Owners groups.
  - How Traditional Owners can provide information to Woodside about cultural values, interests and activities.
  - If there are any other First Nations groups who should be consulted.
- On 23 October 2024, Traditional Owner members from NAC attended Woodside's second Monthly Community Luncheon for Traditional Owners held in Roebourne. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.4).
- On 15 November 2024, Woodside emailed NAC an invitation to a Quarterly Heritage meeting in December (SI Report, reference 38.2).
- On 5 December 2024, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 38.3). Relevant matters discussed included:
  - An overview of upcoming Eps.
  - An explanation of ongoing consultation.
  - Reminder about monthly community luncheons.
- On 4 March 2025, Woodside invited NAC to share stories and receive updates from Woodside at its monthly community luncheon for Traditional Owners to be held in Roebourne on 5 March 2025(SI Report, reference 37.5).
- On 5 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.6).
- On 13 March 2025, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 38.4). Matters discussed and/or raised relating to this EP included:
  - That consultation is open for the life of any EP and Woodside can schedule consultation meetings at times that are convenient to the community.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - A reminder that Woodside hosts a community luncheon and yarning circle for all local Traditional Owners.
- On 24 March 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 37.7).
- On 26 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 37.8).
- On 7 April 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 37.9).
- On 8 April 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.10).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 38.5). Matters discussed relevant to this EP included:
  - Woodside provided an overview the consultation process with relevant First Nations persons.
- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 38.6). Matters discussed relevant to this EP included:
  - Woodside reminded attendees that it accepts feedback for the life of an EP.
  - Woodside is available to schedule meetings for EP consultation.
  - Cultural heritage updates.
- On 2 October 2025, Woodside emailed NAC about the proposed activity (Record of Consultation, reference 6.3.31). The email included:
  - A reference to the original consultation email for this EP sent to NAC on 12 July and 7 August 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Information on the cultural values that NAC has previously provided to Woodside considered relevant to the activity:
    - **(1)** Onshore heritage – interest in managing sites.
    - **(2)** Potential submerged heritage.
    - **(3)** Manggan (creative beings) used supernatural force to shape the hills, rivers, seas and landforms.
  - **(1, 2, 3)** A request from Woodside that NAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for this EP.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- On 3 December 2025, Woodside met representatives from NAC, WAC and Wong-Goo-Tt-Oo in Karratha for the Q4 Quarterly Heritage meeting (SI Report, Reference 38.7). Matters discussed relevant to EP consultation included:
  - Woodside showed a video explaining EP consultation.
  - Woodside advised it may develop more videos to aid consultation.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Cultural Value: • Onshore Heritage	**(1)** This value has been identified through Woodside's data collection processes (consultation).	**(1)** Woodside provided NAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.31). NAC did not request any changes.	**(1)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(2) Cultural Value: • Potential of submerged heritage	**(2)** This value has been identified through Woodside's data collection processes (consultation).	**(2)** Woodside provided NAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.31). NAC did not request any changes.	**(2)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(3) Cultural Value: • Manggan (creative beings) used supernatural force to shape the hills, rivers, seas and landforms.	**(3)** This value has been identified through Woodside's data collection processes (publicly available literature).	**(3)** Woodside provided NAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.31). NAC did not request any changes.	**(3)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
No feedback, objections or claims about the adverse impact of the activity received despite follow-up.	Although no feedback, objections or claims were provided for this EP, historical cultural values considered relevant have been identified and included based on consultation and publicly available literature.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of the EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with NAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NAC on 12 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.31).

Reasonable Period

Woodside allowed NAC a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with NAC on 12 July 2024 and requested NAC provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to NAC on 2 October 2025 and requested NAC provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to NAC for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on NAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 12 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NAC members as well as the NAC Board.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Asked NAC to advise how it would like Woodside to engage and whether NAC required further information.

- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with NAC on a number of occasions.
- Throughout the consultation period, Woodside and NAC have exchanged multiple emails and met on a number of occasions and have otherwise had direct contact lines to each other during the period.
- Woodside invites NAC to Quarterly Heritage Meetings and monthly relationship meetings.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months, NAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of this EP).

4.11.3 Robe River Kuruma Aboriginal Corporation (RRKAC)

RRKAC is established under the *Native Title Act 1993* (Cth) by the Robe River Kuruma people to represent the Robe River Kuruma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has an existing relationship with RRKAC which extends prior to consultation for this EP. Woodside's consultation approach for Traditional Owners has a focus on building and maintaining long-term relationships with each group. Woodside has assigned a First Nations Engagement team member as a dedicated focal person for EP consultation with RRKAC, who is responsible for building a consultative relationship and is readily available to provide information and take feedback.

In October 2025, Woodside provided RRKAC with a table of cultural values as part of the activity update. These values had been previously identified for RRKAC through a process of consultation and reviews of publicly available literature. RRKAC did not request any changes. This context and process demonstrates that Woodside's consultation approach with RRKAC is appropriate and adapted to the nature and interests of RRKAC.

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed RRKAC advising of the proposed activity (Record of Consultation, reference 6.1.34), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - Information on the interests that RRKAC and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how RRKAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- That feedback can continue to be accepted by Woodside for the life of the EP.
- A request for RRKAC to provide information about the proposed activity to other individuals, as required.

- On 30 July 2024, Woodside emailed RRKAC a reminder about the proposed activity and requested if RRKAC had any feedback or would like the opportunity to consult on the activity further. The email included the closing consultation date (SI Report, reference 16.1).
- **(1)** On 6 September 2024, as a result of ongoing conversations with Woodside, RRKAC verbally confirmed that there was no feedback regarding the proposed activity. **(1)** Woodside noted RRKAC's feedback (SI Report, reference 16.2).
- On 9 September 2024, Woodside invited RRKAC to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 37.1)**.**
- On 3 October 2024, Woodside emailed RRKAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 37.3).
- On 4 March 2025, Woodside invited RRKAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 37.5).
- On 5 March 2025, Traditional Owner members from RRKAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.6).
- On 24 March 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 37.7).
- On 7 April 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 37.9).
- On 2 October 2025, Woodside emailed RRKAC about the proposed activity (SI Report, reference 6.3.32). The email included:
  - A reference to the original consultation email for this EP sent to RRKAC on 8 and 30 July 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Information on the cultural values that RRKAC has previously provided to Woodside considered relevant to the activity:
    - **(2)** Underwater heritage – concerns about impacts to heritage at shoreline.
    - **(3)** The coastline.
  - **(2, 3)** A request from Woodside that RRKAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for this EP.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) RRKAC advised it had no feedback regarding the activity.	**(1)** Woodside acknowledges that RRKAC has no feedback regarding the activity,	**(1)** Should feedback be received after the EP has been accepted (including any	**(1)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	and this includes no objections or claims.	relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	
(2) Cultural Value: Concerns about underwater heritage: • impacts at shoreline.	**(2)** This value has been identified through Woodside's data collection processes (consultation).	**(2)** Woodside provided RRKAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited RRKAC to make changes or provide additional information (Record of Consultation, 6.3.32). RRKAC did not request any changes.	**(2)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(3) Cultural Value: • The coastline.	**(3)** This value has been identified through Woodside's data collection processes (consultation).	**(3)** Woodside provided RRKAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited RRKAC to make changes or provide additional information (Record of Consultation, 6.3.32). RRKAC did not request any changes.	**(3)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of the EP).	No additional measures or controls are required.
Summary Report: Consultation Complete			
Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with RRKAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information** Sufficient information has been provided because:			

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to RRKAC on 8 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of RRKAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.32).

Reasonable Period

Woodside allowed RRKAC a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with RRKAC on 8 July 2024 and requested RRKAC provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to RRKAC on 2 October 2025 and requested RRKAC provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to RRKAC for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on RRKAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 8 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with RRKAC members as well as the RRKAC Board.
  - Asked RRKAC to advise how it would like Woodside to engage and whether RRKAC required further information.
- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with RRKAC on a number of occasions.
- Throughout the consultation period, Woodside and RRKAC have met on occasions and have otherwise had direct contact lines to each other during the period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months RRKAC has provided feedback but has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).

4.11.4 Wirrawandi Aboriginal Corporation (WAC)

WAC is established under the *Native Title Act 1993* (Cth) by the Mardudhunera and Yaburara (YM) people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has an existing relationship with WAC which extends prior to consultation for this EP. Woodside's consultation approach for Traditional Owners has a focus on building and maintaining long-term relationships with each group. Woodside has assigned a First Nations Engagement team member as a dedicated focal person for EP consultation with WAC, who is responsible for building a consultative relationship and is readily available to provide information and take feedback. Aside from regular consultation about EPs, Woodside invites WAC to Quarterly Heritage Meetings.

In October 2025, Woodside provided WAC with a table of cultural values as part of the activity update. These values had been previously identified for WAC through a process of consultation and reviews of publicly available literature. WAC did not request any changes. This context and process demonstrates that Woodside's consultation approach with WAC is appropriate and adapted to the nature and interests of WAC.

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed WAC advising of the proposed activity (Record of Consultation, reference 6.1.35), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information,* and contact details. Information on the interests that WAC and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how WAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for WAC to provide information about the proposed activity to other individuals, as required.
- On 15 July 2024, Woodside met with WAC to discuss three EPs including the proposed activity (SI Report, reference 17.1). At this meeting:
  - **(1)** WAC confirmed there were no concerns as the three EPs were revisions and also informed Woodside that community Elders were advised of the EPs and had agreed there were no immediate concerns. **(1)** Woodside acknowledged the feedback at the meeting.
  - WAC expressed gratitude for Woodside's support and availability to discuss the EP materials in person.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(2)** WAC stated it was eager to participate in Sea Country mapping and to discuss possible sponsorship and commercial opportunities with industry, once a General Manager/CEO is recruited. **(2)** Woodside noted the interest at the meeting.
  - WAC noted its commitment to ensuring cultural governance is the foundation of consultation with industry.
- On 15 July 2024, WAC emailed Woodside to express gratitude for the information provided and the opportunity to consult on three EPs, including the proposed activity, at a meeting earlier that day (SI Report, reference 17.2). WAC stated:
  - It appreciated the information provided and was grateful for the opportunity to be consulted.
  - It was in the process of recruiting a General Manager.
  - **(2)** It was satisfied that the three activities including the proposed activity in this EP would have minimal impact to Sea Country within WAC's determination area and therefore WAC had no concerns. **(2)** Woodside acknowledged this.
  - The WAC Board was eager to meet and consult with Woodside for future EPs, after a General Manager is appointed.
- On 5 September 2024, Woodside emailed WAC to invite it to Woodside's Quarterly Heritage Meetings, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community. Woodside also requested a list attendees and attendance fees (SI Report, reference 17.3).
- On 9 September 2024, Woodside invited WAC to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 37.1).
- On 25 September 2024, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.2).
- On 30 September 2024, Woodside met with WAC (SI Report, reference 17.4) At the meeting:
  - WAC confirmed that it is currently under-resourced and has prioritised appointing a new Board at its Annual General Meeting in November.
  - WAC noted it has recently appointed a new Trustee and is negotiating its annual budget.
  - WAC advised it is keen to discuss sponsorship opportunities and currently working on an improved organisational structure to support successful strategic outcomes.
  - Woodside reported that throughout September 2024, it has undertaken a number of discussions face to face and via telephone calls with WAC members and Elders about the following issues:
    - Increased responsibilities and pressures on Elders from industry.
    - Lore and the transfer of cultural knowledge to younger generations.
    - EP consultation and reasons why Woodside consults with relevant groups.
- On 3 October 2024, Woodside emailed WAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 37.3).
- On 10 October 2024, WAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne where Woodside presented to Traditional Owners (SI Report, reference 38.1). Matters relevant to this EP included:
  - Consultation outcomes for Woodside EPs.
  - An explanation of State and Commonwealth regulatory requirements.
  - An explanation of EMBAs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - The process Woodside undertakes to identify Traditional Owners groups.
  - How Traditional Owners can provide information to Woodside about cultural values, interests and activities.
  - If there are any other First Nations groups who should be consulted.
- On 14 October 2024, Woodside was notified that the cultural protocols associated with Sorry Business were in place, and that industry and government stakeholders had been asked to minimise contact with Traditional Owner groups including WAC as a sign of respect (SI Report, reference 17.5).
- On 5 December 2024, WAC attended Woodside's Quarter 4 Heritage Meeting in Karratha (SI Report, reference 38.3). Matters discussed relevant to this EP included:
  - Woodside reminded the meeting attendees about ongoing consultation.
- On 4 March 2025, Woodside invited WAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 37.5).
- On 5 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.6).
- On 13 March 2025, WAC hosted Woodside's Quarterly Heritage Meeting (SI Report, reference 38.4). Matters discussed and/or raised relating to this EP included:
  - That consultation is open for the life of an EP and Woodside can schedule consultation meetings at times that are convenient to the community.
  - A reminder that Woodside hosts a community luncheon/yarning circle for all local Traditional Owners.
- On 24 March 2025, Woodside emailed WAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 37.7).
- On 26 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 37.8).
- On 8 April 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.10).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 38.5). Matters discussed relevant to this EP included:
  - Woodside provided an overview the consultation process with relevant First Nations persons.
- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 38.6). Matters discussed relating to this EP included:
  - Woodside reminded attendees that it accepts feedback for the life of an EP.
  - Woodside is available to schedule meetings for EP consultation.
  - Cultural heritage updates.
- On 2 October 2025, Woodside emailed WAC about the proposed activity (SI Report, reference 6.3.33). The email included:
  - A reference to the original consultation email for this EP sent to WAC on 8 July and met on 15 July 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Information on the cultural values that WAC has previously provided to Woodside considered relevant to the activity:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(3)** Marine species – whales, turtles.
- **(4)** Potential impact of emissions on rock art.
- **(5)** Underwater and onshore heritage.

- **(3, 4, 5)** A request from Woodside that WAC confirm if there were any changes or additional information regarding cultural values that Woodside should consider in the preparation for this EP.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

- On 3 December 2025, Woodside met representatives from NAC, WAC and Wong-Goo-Tt-Oo in Karratha for a Quarterly Heritage meeting (SI Report, Reference 38.7). Matters discussed relevant to EP consultation included:
  - Woodside showed a video explaining EP consultation.
  - Woodside said it may develop more videos to aid consultation.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) WAC confirmed with Woodside it had no issues or concerns for this EP.	**(1)** Woodside acknowledges that WAC had no issues or concerns, including no objections or claims, regarding this EP.	**(1)** Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of the EP).	**(1)** No action required.
(2) WAC is keen to participate in Sea Mapping and to discuss possible sponsorship and commercial opportunities with industry.	**(2)** Woodside acknowledges WAC's interest to participate in Sea Mapping, and its interest to discuss sponsorship and commercial opportunities with industry.	**(2)** Woodside notes WAC's interest to participate in Sea Mapping along with other opportunities with industry and will wait for instruction from WAC once it has recruited a General Manager/CEO.	**(2)** No additional measures or controls are required.
(3) Cultural Value: Marine species: • Whales • Turtles.	**(3)** This value has been identified through Woodside's data collection processes (consultation).	**(3)** Woodside provided WAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.33). WAC did not request any changes.	**(3)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(4) Cultural Value: • Potential impact of emissions on rock art.	**(4)** This value has been identified through Woodside's data collection processes (consultation).	**(4)** Woodside provided WAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.33). WAC did not request any changes.	**(4)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(5) Cultural Value: • Underwater and onshore heritage.	**(5)** This value has been identified through Woodside's data collection processes (consultation).	**(5)** Woodside provided WAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information (Record of Consultation, 6.3.33). WAC did not request any changes.	**(5)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with WAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to WAC on 8 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of WAC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.33).

Reasonable Period

Woodside allowed WAC a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with WAC on 8 July 2024 and requested WAC provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to WAC on 2 October 2025 and requested WAC provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to WAC for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on WAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 8 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with WAC members as well as the WAC Board.
  - Asked WAC to advise how it would like Woodside to engage and whether WAC required further information.
- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with WAC and met face to face on a number of occasions.
- Throughout the consultation period, Woodside and WAC have exchanged multiple emails, met on four occasions and have otherwise had direct contact lines to each other during the period.
- Woodside invites WAC to Quarterly Heritage Meetings, and monthly relationship meetings.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months, WAC has provided feedback, but has not raised objections or claims about the adverse impact of each activity to which this EP relates.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).

4.11.5 Yindjibarndi Aboriginal Corporation (Yindjibarndi)

Yindjibarndi is established under the *Native Title Act 1993* (Cth) by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Woodside has an existing relationship with Yindjibarndi which extends prior to consultation for this EP. Woodside's consultation approach for Traditional Owners has a focus on building and maintaining long-term relationships with each group. Woodside has assigned a First Nations Engagement team member as a dedicated focal person for EP consultation with Yindjibarndi, who is responsible for building a consultative relationship and is readily available to provide information and take feedback.

Yindjibarndi during previous consultation has requested Woodside to refer all correspondence about EPs to the Ngarluma Yindjibarndi Foundation Ltd (NYFL). This context and process demonstrates that Woodside's consultation approach with Yindjibarndi is appropriate and adapted to the nature and interests of Yindjibarndi.

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Yindjibarndi (via NYFL) advising of the proposed activity (Record of Consultation, reference 6.1.36), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - Information on the interests that Yindjibarndi (via NYFL) and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how Yindjibarndi (via NYFL) would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for Yindjibarndi (via NYFL) to provide information about the proposed activity to other individuals, as required.
- On 23 July 2024, Woodside emailed Yindjibarndi (via NYFL) a reminder about the proposed activity and requesting if there was any feedback from the Yindjibarndi community or other relevant persons. Woodside offered to provide further information and/or the opportunity to consult on the proposed activity. The email included the closing consultation date (SI Report, reference 18.1).
- On 9 September 2024, Woodside invited Yindjibarndi to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 37.1).
- On 25 September 2024, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.2).
- On 3 October 2024, Woodside emailed Yindjibarndi an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 37.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 14 October 2024, Woodside was notified that the cultural protocols associated with Sorry Business were in place, and that industry and government stakeholders had been asked to minimise contact with Traditional Owner groups including Yindjibarndi as a sign of respect (SI Report, reference 18.2).
- On 21 October 2024, Yindjibarndi (via NYFL) emailed Woodside (SI Report, reference 18.3). In the email NYFL asserted:
  - **(1)** No formal consultation had taken place between NYFL and Woodside on this EP and others.
  - **(1)** Woodside's emails did not meet the standard of meaningful consultation.
  - **(2)** Woodside has provided NYFL with a draft consultation agreement but had declined to agree with NYFL's estimated costs to proceed with the agreement.
  - NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
  - **(1)** A request for Woodside to note in any record provided to NOPSEMA that NYFL had not been consulted on this EP and others.
- On 23 October 2024, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.4).
- On 4 November 2024, Woodside emailed NYFL (as the delegated representative for Yindjibarndi) in response to statements made in NYFL's email on 21 October 2024 (SI Report, reference 18.4). The email:
  - **(2)** Responded to NYFL's cost estimates and rates and reiterated that they are excessive, and the rates quoted by NYFL related to the North West Shelf agreements and were not consistent with reasonable rates for enabling and supporting consultation on this EP. This is particularly so where the high rates quoted by NYFL were for an initial review of a 7-page agreement.
  - **(1)** Offered again to meet and discuss this issue further anytime. And that Woodside would be available to meet in person in Ieramugadu (Roebourne) in the week of 18 November 2024.
  - **(1)** Confirmed that Woodside's use of email as one of the methods to engage in consultation correspondence mirrored what appears to be NYFL's primary approach of emailing consultation correspondence. However, Woodside is also happy and discuss this EP and the various other EPs NYFL has listed in its recent correspondence.
  - **(1)** Reiterated that the ongoing negotiation of a consultation framework agreement can and continues to occur in parallel to consultation for EPs.
  - **(1)** Included a table showing the consultation status of each of the EPs referenced by NYFL in its letter outlining that consultation for this EP had closed.
- On 24 March 2025, Woodside emailed Yindjibarndi (via NYFL) an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 37.7).
- On 26 March 2025, Traditional Owner members from Yindjibarndi (via NYFL) attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 37.8).
- On 7 April 2025, Woodside emailed Yindjibarndi (via NYFL) an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 37.9).
- On 8 April 2025, Traditional Owner members from Yindjibarndi (via NYFL) attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.10).

Between 8 – 20 November 2024, emails were exchanged between NYFL (as the delegated representative for Yindjibarndi) and Woodside regarding the 4 November 2024 email and requests to meet regarding the draft consultation agreement. Please refer to NYFL Appendix F, reference 4.13.1 and SI Report, reference 21.0 for further information.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 October 2025, Woodside emailed Yindjibarndi (via NYFL) about the proposed activity (SI Report, reference 6.3.34). The email included:
  - A reference to the original consultation email for this EP sent to Yindjibarndi (via NYFL) on 8 and 23 July 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) NYFL has stated that no formal consultation had taken place between NYFL, in its capacity as the delegated representative for Yindjibarndi, and Woodside on this EP. NYFL would progress consultation on this EP once the draft consultation agreement was finalised.	**(1)** Woodside rejects NYFL's assertion that has not been consulted on this EP. Woodside began consulting Yindjibarndi (via NYFL) on 8 July 2024 and has provided sufficient information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that the consultation agreement is not required to undertake and/or consult with NYFL on EPs.	**(1)** The information provided by Woodside meets the requirements of Regulation 25 of the Environment Regulations for the reasons set out above.	**(1)** Not required.
(2) NYFL has acknowledged it supports an agreement to enable a process of consultation.	**(2)** Separate from consultation under Regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for consultation, however, notes that this is not required to undertake and/or complete consultation in the course of preparing this EP. Sufficient information to allow informed assessment has already been provided by other means. Woodside has an existing engagement framework in place with NYFL which enables regular	**(2)** Woodside sent a 7-page draft consultation framework to NYFL in March 2024 for its consideration.	**(2)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	(quarterly) communication about Woodside activities. Feedback from NYFL on 27 October 2023 requested Woodside develop a draft consultation framework.		
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with Yindjibarndi (via NYFL) for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to Yindjibarndi (via NYFL) on 8 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of Yindjibarndi's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.34).

Reasonable Period

Woodside allowed Yindjibarndi (via NYFL) a reasonable period for consultation in the preparation of this EP because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation on this EP with Yindjibarndi (via NYFL) on 8 July 2024 and requested Yindjibarndi (via NYFL) provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to Yindjibarndi (via NYFL) on 2 October 2025 and requested Yindjibarndi (via NYFL) provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to Yindjibarndi (via NYFL) for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on Yindjibarndi's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 8 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with Yindjibarndi's members as well as the Yindjibarndi Board.
  - Asked Yindjibarndi (via NYFL) to advise how it would like Woodside to engage and whether Yindjibarndi required further information.
- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with Yindjibarndi (via NYFL) on a number of occasions.
- Throughout the consultation period, Woodside and Yindjibarndi (via NYFL) have exchanged emails and have otherwise had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months, Yindjibarndi (via NYFL) has provided feedback, but has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).

4.12 NATIVE TITLE REPRESENTATIVE BODIES

4.12.1 Kimberley Land Council (KLC)

Kimberley Land Council is the Native Title Representative Body for the Kimberley region of Western Australia. As such, it is not a Prescribed Body Corporate or Registered Native Title Body Corporate but exists to assist Native Title claimants and holders.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation for this EP:

- On 9 July 2024, Woodside emailed KLC advising of the proposed activity (Record of Consultation, reference 6.1.37), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.
  - Information on the interests that KLC and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how KLC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for KLC to provide information about the proposed activity to other individuals, as required.
- On 30 July 2024, Woodside emailed KLC a reminder about the proposed activity and to offer an opportunity to meet and/or discuss the proposed activity (SI Report, reference 19.1).
- On 2 October 2025, Woodside emailed KLC about the proposed activity (SI Report, reference 6.3.35). The email included:
  - A reference to the original consultation email for this EP sent to KLC on 9 and 30 July 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has assessed the merits of any objection or claim about the adverse impact of the activity to which the EP relates as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with KLC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to KLC on 9 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of KLC's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.35).

Reasonable Period

Woodside allowed KLC a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with KLC on 9 July 2024 and requested KLC provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to KLC on 2 October 2025 and requested KLC provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to KLC for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on KLC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 9 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with KLC's members as well as the KLC Board.
  - Asked KLC to advise how it would like Woodside to engage and whether KLC required further information.
- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with KLC on a number of occasions.
- Throughout the consultation period, Woodside and KLC have otherwise had direct contact lines to each other during the period.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months, KLC has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).

4.12.2 Yamatji Marlpa Aboriginal Corporation (YMAC)

Yamatji Marlpa Aboriginal Corporation (YMAC) is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate representing the cultural rights of a Traditional Custodian Community but exist to assist native title claimants and holders.

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed YMAC advising of the proposed activity (Record of Consultation, reference 6.1.38), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.
  - Links to the NOPSEMA NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information,* and contact details. Information on the interests that YMAC and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how YMAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for YMAC to provide information about the proposed activity to other individuals, as required.
- **(1)** On 10 July 2024, following an email from Woodside that included a Word version of the draft consultation agreement, YMAC emailed Woodside confirming receipt of the draft consultation agreement with the intention to edit with proposed amendments and to confirm a date to meet (SI Report, reference 20.1).
- On 16 July 2024, Woodside telephoned YMAC to confirm the contact details to send EP information (SI Report, reference 20.2).
- On 16 July 2024, following a telephone conversation earlier that day, Woodside emailed YMAC's legal representative (SI Report, reference 20.3). Woodside:
  - Confirmed Woodside is seeking feedback and/or consultation of three EPs, including the proposed activity.
  - Attached original consultation emails from Woodside.
  - Advised of the contact details and closing dates to submit feedback.
  - Offered to provide additional information or to consult with Traditional Owners who are considered relevant.
  - Noted that the current consultation activities are part of five-year revisions.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Between 30 July 2024 and 11 September 2024, Woodside and YMAC exchanged emails relating to Woodside meeting with the NTGAC Board to discuss EP activities and **(1)** the draft consultation agreement. The information exchange included confirming a meeting date, venue location and cost estimate for the meeting, contact details of Woodside, NTGAC and YMAC representatives and attendees, and agreeing to a meeting agenda (SI Report, references 20.4 – 20.15).
- On 12 September 2024, Woodside met with the NTGAC Board and YMAC (SI Report, reference 20.16). Matters relevant to this EP were:
  - The EP consultation process and Woodside's availability to consult with NTGAC and YMAC about Woodside's activities or other matters important to NTGAC.
  - Woodside's partnerships with Indigenous communities.
  - That the discussion regarding the draft consultation agreement between Woodside and NTGAC (via YMAC) will be deferred and discussed with other Woodside representatives at a later date.
- On 2 October 2025, Woodside emailed YMAC about the proposed activity (SI Report, reference 6.3.36). The email included:
  - A reference to the original consultation email for this EP sent to YMAC on 8, 16 and 30 July 2024.
  - A Summary Information Sheet and a link to the Consultation Information Sheet.
  - A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
  - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) YMAC has expressed interest in entering a consultation agreement with Woodside and has provided Woodside with a draft consultation framework to assist the consultation process.	**(1)** Woodside is currently assessing the effectiveness of negotiating framework agreements with stakeholders. To date, no framework agreements have been finalised. Woodside notes that this is not required to undertake and/or complete consultation in the course of preparing this EP.	**(1)** Woodside has provided YMAC a draft framework agreement in February 2024 for consideration and notes it has not yet been actioned.	**(1)** No action required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of any objection or claim about the adverse impact of the activity to which the EP relates as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary Report: Consultation Complete
Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with YMAC for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically: **Sufficient Information** Sufficient information has been provided because: • On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website. • Woodside provided information to YMAC on 8 July 2024 when consultation commenced. Woodside provided: - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback. - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of YMAC's interests and how the activity could impact those interests. - A request for the consultation and information sheets to be distributed to members and individuals as required. - An offer to provide more specific information, maps and images if required. • Woodside provided contact information for Woodside and NOPSEMA. • Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.36). **Reasonable Period** Woodside allowed YMAC a reasonable period for consultation in the preparation of this EP because: • Woodside commenced consultation on this EP with YMAC on 8 July 2024 and requested YMAC provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation. • Woodside provided an activity update on this EP to YMAC on 2 October 2025 and requested YMAC provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation. • Woodside has provided an opportunity to address and respond to YMAC for over 17 months, demonstrating a "reasonable period" of consultation. **Reasonable Opportunity** A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because: • Woodside sought direction on YMAC's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups. • Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback. • Woodside's initial email about this EP on 8 July 2024: - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations team. Woodside also provided contact details for NOPSEMA. - Offered for Woodside to speak with YMAC's members as well as the YMAC Board.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Asked YMAC to advise how it would like Woodside to engage and whether YMAC required further information.

- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with YMAC on a number of occasions.
- Throughout the consultation period, Woodside and YMAC have exchanged emails and have otherwise had direct contact lines to each other during the period.
- Woodside invites YMAC to monthly relationship meetings and luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months, YMAC has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8 of this EP).

4.13 SELF-IDENTIFIED FIRST NATION GROUPS

4.13.1 Ngarluma Yindjibarndi Foundation Ltd (NYFL)

NYFL was created to act as trustee for the trust created pursuant to the Northwest Shelf Agreement 1998 (agreed between the Ngarluma and Yindjibarndi registered Native Title claimants, the NWS JVs, and Woodside) prior to the resolution of the Ngarluma and Yindjibarndi Native Title claim. Its purpose is to carry on the business of enterprise development, investment and social welfare.

In 1999 the Ngarluma and Yindjibarndi Native Title claim was settled with the Federal Court appointing, at the request of the Native Title holders, the NAC as PBC to represent the communal interests of the Ngarluma people and the Yindjibarndi Aboriginal Corporation as PBC to represent the communal interests of the Yindjibarndi people. Woodside consulted both NAC and Yindjibarndi as relevant persons in the course of preparing this EP. The Yindjibarndi Aboriginal Corporation has requested all correspondence about EPs be directed to NYFL. NYFL self-identified and has advised it is relevant for this EP. In March 2024, Woodside provided NYFL with the draft terms of a consultation agreement between NYFL and Woodside. Discussions between Woodside and NYFL in relation to this agreement are ongoing, and have occurred in parallel to consultation for this EP.

In addition to consultation for specific EPs relevant to NYFL, Woodside also consults NYFL through Quarterly Heritage Meetings. Woodside has continually confirmed it is open to receiving or being notified of feedback, claims or objections on EPs. This context and process demonstrates that Woodside's consultation approach with NYFL is appropriate and adapted to the nature and interests of NYFL.

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed NYFL advising of the proposed activity (Record of Consultation, reference 6.1.39), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
  - An overview of the proposed activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information,* and contact details.
  - Information on the interests that NYFL and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how NYFL would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for NYFL to provide information about the proposed activity to other individuals, as required.
- On 8 July 2024, NYFL emailed Woodside acknowledging receipt of Woodside's email about the proposed activity and requested that other NYFL representatives be included in all consultation correspondence from Woodside concerning EPs (SI Report, reference 21.1). In the attached letter:
  - **(1)** NFYL asserts that to undertake effective consultation, NYFL, its members and Traditional Owners require timely and accessible information in relation to the proposal.
  - **(1)** NYFL requires independent expert advice in relation to the technical information, the assessment of the potential environmental implications, the potential impact on the cultural heritage and rights.
  - **(2)** NYFL's funding request to progress discussions and negotiations on the draft consultation agreement remain unresolved.
  - **(2)** NYFL maintains that an interim consultation agreement remains the appropriate mechanism for consultation between Woodside and NYFL.
- On 9 July 2024, Woodside emailed NYFL, thanking it for the reply to the consultation email sent the day before and ensuring that further correspondence regarding EPs would be emailed to nominated NYFL staff (SI Report, reference 21.2).
- On 23 July 2024, Woodside emailed NYFL a reminder about the proposed activity and made an offer to provide further information or the opportunity to consult the activity further. The email included the closing consultation date (SI Report, reference 21.3).
- On 9 August 2024, NYFL emailed Woodside stating that NYFL would provide a response to Woodside in due course, as current resourcing resulted in limited availability to respond (SI Report, reference 21.4).
- On 9 September 2024, Woodside invited NYFL to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 37.1).
- On 25 September 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the luncheon Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.2).
- On 3 October 2024, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 37.3).
- On 21 October 2024, NYFL emailed Woodside (SI Report, reference 21.5). In the email NYFL stated:
  - **(1)** No formal consultation had taken place between NYFL and Woodside on this EP and others.
  - **(1)** Woodside's emails did not meet the standard of meaningful consultation.
  - **(2)** Woodside has provided NYFL with a draft consultation agreement but had declined to agree with NYFL's estimated costs to proceed with the agreement.
  - NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
  - **(1)** A request for Woodside to note in any record provided to NOPSEMA that NYFL had not been consulted on this EP and others.
- On 23 October 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Lunch for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.4).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 4 November 2024, Woodside emailed NYFL in response to statements made in NYFL's email on 21 October 2024 (SI Report, reference 21.6). The email:
  - **(2)** Responded to NYFL's cost estimates, reiterating that they are excessive. The rates quoted by NYFL related to the North West Shelf agreements and were not consistent with reasonable rates for enabling and supporting consultation on this EP. This is particularly so where the high rates quoted by NYFL were for an initial review of a 7-page agreement.
  - **(1)** Offered again to meet and discuss this issue further. Woodside would be available to meet in person in Ieramugadu (Roebourne) in the week of 18 November 2024.
  - **(1)** Confirmed that Woodside's use of email for consultation correspondence appears to mirror NYFL's primary approach of emailing consultation correspondence. However, Woodside is also available to discuss this EP as part of its ongoing consultation with NYFL.
  - **(1)** Reiterated that the ongoing negotiation of a consultation framework agreement can and continues to occur in parallel to consultation for EPs.
  - **(1)** Included a table showing the status of each of the EPs referenced by NYFL in its letter, outlining that consultation for this EP had closed.
- On 8 November 2024, NYFL emailed Woodside requesting to meet on 20 November 2024 to progress the draft Consultation Framework Agreement (SI Report, reference 21.7).
- On 15 November 2024, Woodside emailed NYFL confirming availability to meet on 20 November 2024 and requested NYFL confirm with its legal provider that the cost estimates remain current for the consultation agreement. Woodside stated it would separately email NYFL about remaining EPs outlined in the 21 October 2024 correspondence (SI Report, reference 21.8).
- On 15 November 2024, NYFL emailed Woodside regarding cost estimates in relation to the review of the draft Consultation Framework Agreement (SI Report, reference 21.9).
- On 20 November 2024, Woodside emailed NYFL to follow up and thank NYFL for the meeting, confirming Woodside and NYFL had agreed a way forward to progress the draft Consultation Framework Agreement (SI Report, reference 21.10).
- On 21 November 2024, NYFL advised Woodside about the passing of a Senior Yindjibarndi Elder and founding member of NYFL. The NYFL Board advised that Sorry Business was underway (SI Report, reference 21.11). As a sign of respect, Woodside would be limiting communication with NYFL and Yindjibarndi Aboriginal Corporation until further notice.
- On 5 December 2024, Woodside wrote to NYFL in response to its email of 21 October 2024 (SI report, reference 20.12). Matters relevant to this EP included:
  - Woodside had met with NYFL on 20 November 2024 to discuss progressing the Consultation Framework Agreement and had agreed a way forward.
  - **(1)** Woodside did not agree with NYFL's assertion that consultation for this EP and others had not commenced.
  - Woodside confirmed that consultation for this EP was complete and was now closed.
  - Woodside had continued to consult and engage with NYFL via email as this appeared to be NYFL's preferred and primary method of consulting with Woodside on EPs
  - Woodside was open to meet as part of its ongoing consultation with NYFL.
  - **(2)** Woodside reiterated that ongoing negotiation of a consultation framework agreement could and continued to occur in parallel to consultation for EPs, including this EP, and that a consultation framework agreement was not a prerequisite to consultation.
  - Woodside attached a summary of the consultation that had occurred for the EP.
- Between 6 – 16 December 2024, Woodside and NYFL exchanged emails regarding matters relating to the draft consultation agreement, with NYFL stating it would progress consultation matters in due course (SI Report, references 21.13 – 21.14).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 4 March 2025, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 37.5).
- On 5 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.6).
- On 24 March 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 37.7).
- On 26 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 37.8).
- **(1)** On 7 April 2025, NYFL emailed Woodside, in response to another EP, advising that NYFL will be meeting with its legal advisers regarding the draft consultation agreement and will send an updated agreement to Woodside in due course (SI Report, reference, 21.15).
- On 7 April 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 37.9).
- On 8 April 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 37.10).
- **(1)** On 10 April 2025, NYFL emailed Woodside a draft consultation agreement, previously provided by Woodside which incorporated NYFL changes (SI Report, reference 21.16).
- **(1)** On 15 June 2025, Woodside emailed NYFL amendments to a draft consultation agreement (SI Report, reference 21.17). In the email Woodside reiterated that consultation for the preparation of environment plans occurs concurrently with agreement negotiations.
- **(1)** On 16 June 2025, NYFL emailed Woodside to acknowledge receipt of Woodside's amendments to the draft consultation agreement (SI Report, reference 21.18).
- **(1)** On 16 June 2025, NYFL emailed Woodside about an unrelated EP and stated that a consultation agreement is the appropriate framework to engage in consultation and provided availability to discuss the draft consultation agreement (SI Report, reference 21.19).
- **(1)** On 19 June 2025, NYFL emailed Woodside and advised Woodside's amendments to a draft consultation were under review (SI Report, reference 21.20).
- **(1)** On 3 July 2025, NYFL emailed Woodside noting that NYFL looks forward to finalising the consultation agreement and undertaking consultation in regard to an EP not related to this activity (SI Report, reference 21.21).
- **(1)** On 4 July 2025, Woodside emailed NYFL to state that the preparation of EPs can and does occur concurrently with agreement negotiations (SI Report, reference 21.22).
- **(1)** On 24 July 2025, NYFL emailed Woodside and suggested meeting to discuss Woodside's amendments to the draft consultation agreement. NYFL requested Woodside support funding of the meeting including for legal representatives to attend (SI Report, reference 21.23).
- **(1)** On 23 September 2025, NYFL emailed Woodside to follow-up on its earlier offer to meet to discuss the consultation agreement (SI Report, reference 21.24).
- **(1)** On 24 September 2025, Woodside emailed NYFL to confirm an online meeting could be held to discuss the consultation agreement, however Woodside were unable to provide further funding for legal advice or otherwise in order to close out the agreement. Woodside again reminded NYFL that negotiation towards a consultation agreement can and does occur in parallel with consultation for EPs (SI Report, reference 21.25).
- On 2 October 2025, Woodside emailed NYFL about the proposed activity (SI Report, reference 6.3.37). The email included:
  - A reference to the original consultation email for this EP sent to NYFL on 8 and 23 July 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A Summary Information Sheet and a link to the Consultation Information Sheet.
- A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) NYFL has stated no formal consultation had taken place between NYFL and Woodside on this EP. NYFL would progress consultation on this EP once the draft consultation agreement was finalised.	**(1)** Woodside rejects NYFL's assertion that has not been consulted on this EP. Woodside began consulting NYFL on 8 July 2024 and has provided sufficient information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that the consultation agreement is not required to undertake and/or consult with NYFL on EPs.	**(1)** The information provided by Woodside meets the requirements of regulation 25 of the Environment Regulations for the reasons set out above.	**(1)** No action required.
(2) NYFL has acknowledged it supports an agreement to enable a process of consultation.	**(2)** Separate from consultation under Regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for consultation, however, notes that this is not required to undertake and/or complete consultation in the course of preparing this EP. Sufficient information to allow informed assessment has already been provided by other means. Woodside has an existing engagement framework in place with NYFL which enables regular (quarterly) communication about Woodside activities.	**(2)** Woodside and NYFL continue working to finalise a consultation agreement. Woodside has reiterated to NYFL that consultation for this EP and others has and continues to occur in parallel to discussions about the agreement.	**(1)** No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of any objection or claim about the adverse impact of the activity to which the EP relates as required under Regulation 24.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Summary Report - Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with NYFL for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to NYFL on 8 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of NYFL's interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.37).

Reasonable Period

Woodside allowed NYFL a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with NYFL on 8 July 2024 and requested NYFL provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside provided an activity update on this EP to NYFL on 2 October 2025 and requested NYFL provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to NYFL for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on NYFL's preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for over 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 8 July 2024:
  - Included a general email address and telephone number for Woodside, as well as a direct email and telephone number for a dedicated focal person from Woodside's First Nations Engagement team. Woodside also provided contact details for NOPSEMA.
  - Offered for Woodside to speak with NYFL's members as well as the NYFL Board.
  - Asked NYFL to advise how it would like Woodside to engage and whether Yindjibarndi required further information.
- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with NYFL on a number of occasions.
- Throughout the consultation period, Woodside and NYFL have exchanged emails and have otherwise had direct contact lines to each other during the period.
- Woodside invites NYFL to monthly meetings and luncheons.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- During the past 17 months, NYFL has provided feedback, but has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).

4.14 OTHER FIRST NATIONS GROUPS

4.14.1 Save Our Songlines (SOS)

SOS and/ or [Individual 1] do not squarely fall within the consultation categories in the current Woodside methodology and are therefore considered in their own category.

SOS is an organisation formed by [Individual 1], who we currently understand is the group's primary spokesperson. [Individual 1] and/ or SOS are together represented by lawyers from Johnson Legal Woodside understands that the views expressed by SOS align with the views of [Individual 1]. Woodside therefore approaches communication with SOS and/or [Individual 1] as communication with SOS and has consulted them concurrently.

The stated interests of [Individual 1] and/or SOS include the conservation of Murujuga rock art, and opposition to expansion of projects on the Burrup Peninsula. On the information available to us, we understand that SOS and/or [Individual 1] have also been members of Aboriginal corporations who have been separately consulted as relevant persons by Woodside. This is relevant because it confirms that cultural values or interests of those groups have been consulted on and assessed in preparing this EP. This context and process demonstrates that Woodside's consultation approach with SOS is appropriate and adapted to the nature and interests of SOS.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- During previous consultation for other activities, SOS and/or [Individual 2] has provided information relating to its cultural values which Woodside deem relevant to this EP:
  - **(1)** Threats to Murujuga Rock Art and Cultural Heritage:
    - Emissions, movement and potential damage.
    - Impacts on sites of cultural and spiritual significance.
  - **(1)** Woodside has noted the cultural significant of Murujuga Rock Art and assessed risks in the EP.
  - **(2)** Cultural and Environmental Significance:
    - Songlines, Dreaming, and energy lines.
    - Cultural features related to marine life including whales, marine mammals, seagrass, turtles.
    - Importance of the meeting of freshwater and saltwater.
    - Connection to Sea Country and the sea.
  - **(2)** Woodside has recorded matters of cultural and environmental significance in this EP.
  - **(3)** Environmental Protection and Cultural Values:
    - Caring for country, significance of eagle, kangaroo, bungarra.
    - Importance of offshore islands, including Rosemary Island.
    - Disturbance of seabed, noise, and pollution.
    - Relationship between environmental protection and cultural values.
  - **(3)** Woodside has included matters of cultural and environmental significance in the EP.

Please see Scarborough Offshore Facility and Trunkline (Operations) EP and North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed SOS and/or [Individual 1] advising of the proposed activity (Record of Consultation, reference 6.1.40), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email content included:
  - An overview of the proposed activity.
  - Links to NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details. Information on the interests that SOS and/or [Individual 1] and its members may have within the EMBA.
  - A request for feedback by 9 August 2024.
  - Information on how SOS and/or [Individual 1] would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
  - That feedback can continue to be accepted by Woodside for the life of the EP.
  - A request for SOS and/or [Individual 1] to provide information about the proposed activity to other individuals, as required.
- On 30 July 2024, Woodside emailed SOS and/or [Individual 1] a reminder about the proposed activity, including a reference to the original Record of Consultation email. Woodside provided contact details to submit feedback, as well as confirming a date to submit feedback about the activity (SI Report, reference 22.1).
- On 2 October 2025, Woodside emailed SOS and/or [Individual 1] about the proposed activity (SI Report, reference 6.3.38). The email included:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- A reference to the original consultation email for this EP sent to SOS and/or [Individual 1] on 8 and 30 July 2024.
- A Summary Information Sheet and a link to the Consultation Information Sheet.
- A request to provide any additional feedback 31 October 2025 so that it can be considered in the preparation of the EP.
- Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Threats to Murujuga Rock Art and Cultural Heritage: • Emissions, movement and potential damage. • Impacts on sites of cultural and spiritual significance.	**(1)** This value has been identified through Woodside's data collection processes (consultation).	**(1)** Woodside acknowledges the cultural significance of Murujuga Rock Art. No rock art will be moved during this activity.	**(1)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(2) Cultural and Environmental Significance: • Song lines, dreaming, and energy lines. • Cultural features related to marine life including whales, marine mammals, seagrass, turtles. • Importance of the meeting of freshwater and saltwater. • Connection to Sea Country and the sea.	**(2)** This value has been identified through Woodside's data collection processes (consultation).	**(2)** Woodside has noted these cultural values in Section 4.9 and assessed risks and mitigation measures in Sections 6.8 and 6.9 and 6.11 of the EP.	**(2)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.
(3) Environmental Protection and Cultural Values: • Caring for country, significance of eagle, kangaroo, bungarra. • Importance of offshore islands, including Rosemary Island.	**(3)** This value has been identified through Woodside's data collection processes (consultation).	**(3)** Woodside has noted these cultural values in Section 4.9 and assessed risks and mitigation measures in Sections 6.8, 6.9 and 6.11 of the EP.	**(2)** Woodside has updated Section 4.9 to record these interests and cultural values. Woodside has also assessed the potential impacts on these interests and cultural values, and where appropriate, included controls, in Sections 6.8, 6.9 and 6.11 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• Disturbance of seabed, noise, and pollution. • Relationship between environmental protection and cultural values.			
No feedback, objections or claims about the adverse impact of the activity received despite follow-up.	Although no feedback, objections or claims were provided for this EP, historical cultural values considered relevant have been identified and included based on consultation and publicly available literature.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of the EP).	No additional measures or controls are required.

Summary Report: Consultation Complete

Woodside has discharged its obligations for consultation under Regulation 25 of the Environmental Regulations and consultation with SOS and/or [Individual 1] for the purpose of Regulation 25 is complete. Sufficient information, a reasonable period and a reasonable opportunity have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information

Sufficient information has been provided because:

- On 9 July 2024, Woodside made the Consultation Information Sheet available on the Woodside website.
- Woodside provided information to SOS and/or [Individual 1] on 8 July 2024 when consultation commenced. Woodside provided:
  - A Summary Information Sheet developed specifically for First Nations groups and reviewed by a member of the First Nations Engagement team. This sheet included an overview of the proposed activity, the location of the activity, the timing of the activity, the potential risks and impacts of the activity, diagrams and details about how to provide feedback.
  - Confirmation of the purpose of consultation, what was being sought by Woodside through consultation including understanding the nature of SOS's and/or [Individual 1] interests and how the activity could impact those interests.
  - A request for the consultation and information sheets to be distributed to members and individuals as required.
  - An offer to provide more specific information, maps and images if required.
- Woodside provided contact information for Woodside and NOPSEMA.
- Woodside sent a consultation update in October 2025 which included a link to the updated Consultation Information Sheet and an updated Summary Information Sheet. Woodside also provided an overview of the survey activities and updated timing (Record of Consultation, 6.3.38).

Reasonable Period

Woodside allowed SOS and/or [Individual 1] a reasonable period for consultation in the preparation of this EP because:

- Woodside commenced consultation on this EP with SOS and/or [Individual 1] on 8 July 2024 and requested SOS and/or [Individual 1] provide feedback by 9 August 2024 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside provided an activity update on this EP to SOS and/or [Individual 1] on 2 October 2025 and requested SOS and/or [Individual 1] provide feedback by 31 October 2025 for the purposes of preparation of this EP in line with Woodside's methodology of a 30-day period for consultation.
- Woodside has provided an opportunity to address and respond to SOS and/or [Individual 1] for over 17 months, demonstrating a "reasonable period" of consultation.

Reasonable Opportunity

A reasonable opportunity to provide feedback has been provided and Woodside's approach to consultation is appropriate and adapted because:

- Woodside sought direction on SOS's and/or [Individual 1] preferred method of consultation and has consulted in a way that Woodside understands is appropriate for First Nations groups.
- Woodside has made information on this EP publicly available for 17 months. This has included publishing advertisements in national, state and local newspapers including Indigenous newspapers, the National Indigenous Times (30 July 2024) advising of the proposed activities and requesting comments or feedback.
- Woodside's initial email about this EP on 9 July 2024:
    - Included a general email address and telephone number for Woodside. Woodside also provided contact details for NOPSEMA.
    - Offered for Woodside to speak with and/or [Individual 1] or SOS's members.
    - Asked SOS and/or [Individual 1] to advise how it would like Woodside to engage and whether SOS and/or [Individual 1] required further information.
- Woodside sent an activity update about this EP on 2 October 2025.
- Woodside offered to meet with SOS and/or [Individual 1].
- Throughout the consultation period, Woodside and SOS and/or [Individual 1] have had direct contact lines to each other during the period.

Outcomes of Consultation

The measures (if any) that Woodside has adopted or proposes to adopt because of the consultation are appropriate because:

- SOS and/or [Individual 1] has previously advised Woodside that:
    - Cultural features associated with whales and other marine species are of spiritual importance. Woodside has put in place controls to manage impacts and risks relating to marine species' spiritual and cultural connection to the environment and assessed the potential impacts to cultural values. Items relating to SOS appear in Section 6.9 of the EP.
    - There were cultural features associated with Songlines, dreaming and energy lines. Woodside has updated Section 4.9.4 of the EP to record topics of interest and cultural values, including Songlines and energy lines, which are also assessed in Section 6.10 with appropriate controls implemented.
    - SOS and/or [Individual 1] has an interest in marine mammals, seagrass, and the meeting of freshwater and saltwater was demonstrated. Woodside has considered topics raised by SOS and/or [Individual 1] and updated Section 4.9 to record these, which are also assessed in Section 6.9 with appropriate controls implemented.
- During the past 17 months, SOS and/or [Individual 1] has not raised objections or claims about the adverse impact of each activity to which this EP relates.

Woodside engages in ongoing consultation once an EP has been submitted for assessment as well as throughout the life of an EP. Should feedback be received after the EP has been accepted (including relevant new information relating to cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5. TABLE 3: ENGAGEMENT REPORT WITH PERSONS OR ORGANISATIONS ASSESSED AS NOT RELEVANT

5.1 COMMONWEALTH AND WA STATE GOVERNMENT DEPARTMENTS OR AGENCIES – ENVIRONMENT

5.1.1 Department of Water and Environmental Regulation (DWER)

Summary of information provided and record of consultation for this EP:

- On 16 October 2025, Woodside emailed Department of Water and Environmental Regulation (DWER) advising of the proposed activity (Record of Consultation, reference 6.3.29), provided a Consultation Information Sheet after DLPH requested DWER be consulted for the Angel CCS GPGT EP.
- On 21 October 2025, Woodside sent an email reminder to DWER , following up on the proposed activity (Record of Consultation, reference 6.4.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Outcomes of Consultation

While DWER is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for DWER to provide feedback during the consultation process.

5.2 COMMONWEALTH COMMERCIAL FISHERIES AND REPRESENTATIVE BODIES

5.2.1 Australian Southern Bluefin Tuna Industry Association (ASBTIA)

Summary of information provided and record of consultation for this EP:

- On 3 October 2025, Woodside emailed ASBTIA a consultation update (Record of Consultation, reference 6.3.18) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

• On 21 October 2025, Woodside sent an email reminder to ASBTIA following up on the proposed activity (Record of Consultation 6.4.1).			
Summary of Feedback, Objection or Claim	**Woodside's Assessment of Merits of Feedback, Objection or Claim**	**Woodside's Statement of Response**	**Inclusion in Environment Plan**
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.
Outcomes of Consultation			
While ASBTIA not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ASBTIA to provide feedback during the consultation process.			

5.2.2 Tuna Australia

Summary of information provided and record of consultation for this EP:

- On 3 October 2025, Woodside emailed Tuna Australia a consultation update (Record of Consultation, reference 6.3.18) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Tuna Australia following up on the proposed activity (Record of Consultation 6.4.1).
- On 31 October 2025, Tuna Australia confirmed its interest in commenting on the Angel CCS GPGT Surveys EP (SI Report, reference 34.1) and:
  - **(1)** Raised point that the Operational Area lies within the gazetted boundaries of the Western Tuna and Billfish Fishery (WTBF), the Southern Bluefin Tuna Fishery (SBTF), and the Western Skipjack Fishery where all concession holders retain full legal rights to operate at any time and should be relevant and absence of activity doesn't remove those rights.
  - **(2)** Referenced seismic vessels and 3 nautical mile safe zone and suggested EP lacks formal communication protocol with commercial fishers, including AIS updates and broadcast notifications.
  - **(3)** Noted the EP does not assess potential displacement costs and omissions fall short of ALARP standard under Regulation 11A(1)(b).
  - **(4)** Stated that the EP's assessment of acoustic and geotechnical impacts being negligible or of no lasting effect is scientifically unsubstantiated and inconsistent with section 3 of the OPGGS act and:
- Noted that no empirical evidence was provided to show minimal risk to pelagic fish larvae, tuna spawning or recruitment and since these are internationally managed tuna stocks, any disturbance has potential transboundary implications.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

  - **(5)** Highlighted the absence of a Before–After–Control–Impact (BACI) research program is a deficiency and urged that Woodside fund a dedicated research program to quantify potential effects with a compensation mechanism for adverse outcomes and:
    - Failure to address exposes the Commonwealth to reputational risks in international tuna forums related to Australia's position as leader in evidenced-based fisheries stewardship.
  - **(6)** Expressed concern about consultation contact data sourced from AFMA as it undermines integrity of consultation and suggested verification of source, date and accuracy of lists.
  - Provided five recommendations which tied back to previous points including:
    - **(7)** Enter formal Consultation Services agreement.
    - **(5)** Conduct BACI-based research program.
    - **(2)** Include detailed navigational impact assessments and coordination protocols for fishing vessels.
    - **(6)** Provide evidence of compliant and current consultation database.
    - **(4)** Commit to science-based reporting of environmental performance and cumulative impact assessment.
  - **(7,3)** Noted it remained willing to work with Woodside to ensure consultation obligations were met along with coexistence with Commonwealth fisheries.
- On 24 November, Woodside thanked Tuna Australia for feedback on proposed EPs (SI Report, reference 34.2) and:
  - **(7)** Noted Woodside had effective consultation processes with other representative organisations and was open to considering a similar agreement with Tuna Australia,
  - Proposed a December meeting to discuss feedback and consultation and asked for availability.
- On 28 November 2025, Tuna Australia thanked Woodside for follow-up on consultation process and provided availability for meeting. (SI Report, reference 34.3).
- On 1 December 2025, Woodside thanked Tuna Australia for its response and proposed a date and time for meeting. (SI Report, reference 34.4).
- On 1 December 2025, Tuna Australia confirmed meeting date and time (SI Report, reference 34.5).
- On 2 December 2025, Woodside confirmed it would issue calendar invite. (SI Report, reference 34.6).
- On 10 December 2025, Woodside and Tuna Australia met (SI Report, reference 34.7), discussed stakeholder engagement and:
  - **(3)** Woodside outlined grievance process for fishery stakeholders.
  - Tuna Australia discussed improvements to outreach to members and tuna community.
  - Provided review by Tuna Australia of industry including:
    - Migratory and unpredictable nature of stock.
    - Past consultation challenges.
  - **(6)** AFMA database was incomplete.
  - It works with 15 companies currently to support consultation with industry and collaborates with other tuna representative body.
  - Covered operational insights from Tuna Australia perspective including:
    - **(4)** Tuna fishing is in Commonwealth waters and migratory with currently 2 boats in WA.
    - There are multiple international commitments and agreements which adds complexity to management.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Discussed Tuna Australia communications to stakeholders, including its approach for mailouts.
- Noted by Tuna Australia that there were potential changes coming to marine parks.
- **(7)** Agreed to have Tuna Australia send its Service Agreement for review.

- On 16 December, Woodside thanked Tuna Australia for its feedback (SI Report, reference 34.8) and:
  - **(1)** Stated Woodside's assessment of relevance for Commonwealth Fisheries is based on proposed activities and considered management area overlap and catch effort within past five years, and:
  - Western Tuna and Billfish Fishery, Southern Bluefin Tuna Fishery, and Western Skipjack Fishery have not been active in the Operations Area or EMBA for at least 15 years, according to ABARES data.
  - With consideration of overlap, Woodside consulted the three fisheries for this EP.
  - **(2)** Clarified the EP does not involve seismic vessels or a 3 nautical mile exclusion zone but a temporary 500m exclusion zone around project vessels and:
  - Woodside facilitates communication with mariners through the following:
    - AHO notification at least 4 weeks prior to start of activity for inclusion in AHO's notice to mariners.
    - On request, provides start and end of activity notification to fisheries.
    - Ensures project vessels operate AIS and virtual AIS.
    - Comply with Marine Orders for safe vessel operations.
  - **(3)** Noted Woodside was updating its co-existence approach with Australian commercial fisheries and will provide it to Tuna Australia in due course.
  - **(4)** Confirmed that Woodside conducts all activities in accordance with the Commonwealth EPBC Act and:
    - Its environmental risk assessments are based on robust scientific methodologies, industry best practices and review of available literature and empirical studies.
    - The GPGT survey equipment and techniques for the EP were selected to mimimise acoustic disturbance to limit sounds levels and physical impacts in a localised area and having temporary impacts.
    - Potential cumulative impacts to marine fauna, including pelagic fish and tuna spawning have been carefully considered and:
      - Risk of significant impact is assess as extremely low due to duration and scale of activity as well as movement of potentially affected species in area.
      - Mitigation and management measures are in place to reduce any potential impact.
  - **(5)** Noted a formal BACI research program is not mandated for activity and:
    - Woodside is committed to ongoing engagement with fisheries stakeholders and scientific community, and recognise importance as upholding high standards in keeping with Australia's reputation as an evidenced-based fisheries management leader.
    - Committed to high standards across operations through transparent, science-based reporting of environmental performance.
  - **(6)** Confirmed Woodside gets licensing information for consultation from AFMA and complies with terms of provision.
  - **(7)** Stated a service agreement is not needed to meet Regulation 25 of the Environment Regulations, but noted discussions would continue between Tuna Australia and Woodside outside of the EP.
  - Responded to Tuna Australia's closing recommendations and tied back to earlier responses which included:
    - **(7)** Refer back to response on entering formal Consultation Services Agreement.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- **(5)** Refer back to response on conduct BACI-based research program.
- **(2)** Refer back to response on Include detailed navigational impact assessments and coordination protocols for fishing vessels.
- **(6)** Refer back to response on provide evidence of compliant and current consultation database.
- **(4)** Refer back to response on commit to science-based reporting of environmental performance and cumulative impact assessment.

- On 16 December, Tuna Australia thanked Woodside for its response (SI Report, reference 34.9) and:
  - Said while it appreciated the detailed response to its concerns, it would be best to talk in the new year to adequately address its concerns.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(I) Fishing rights determines relevancy, not activity.	**(1)** Woodside confirms it reviews management area overlap and catch effort over the past 5 years for consultation.	**(1)** Woodside confirmed it reviewed management area overlap and catch effort over past 5 years but did provide consultation material t**o** Western Tuna and Billfish Fishery, Southern Bluefin Tuna Fishery, and Western Skipjack Fishery.	**(1)** See Section 5.2.3 of Appendix F of this EP for consultation summary of the three tuna fisheries.
(2) Need for communication protocols with commercial fishers.	**(2)** Woodside has protocols in place for communications with commercial fisheries.	**(2)** Woodside confirmed the protocols in place for communication with mariners.	**(2)** See Section 6.8.1 of the EP.
(3) Potential displacement costs not in EP.	**(3)** Woodside is currently updating its co-existence agreement approach for commercial fisheries.	**(3)** Woodside confirmed its co-existence approach with commercial fisheries was being updated and will be shared in due course.	**(3)** Not required.
(4) Concern over impacts of surveys on tuna stock.	**(4)** Woodside understands Tuna Australia has concern over survey impacts and uses robust scientific methodologies to minimise and mitigate impacts.	**(4)** Woodside confirmed it uses robust scientific methodologies, industry best practices and review of available literature and empirical studies to assess and address potential impacts.	**(4)** Not required.
(5)	**(5)** Woodside understands that BACI	**(5)**	**(5)** Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Lack of BACI program supports need for funded research.	research program is not mandated for this type of activity.	Woodside confirmed that BACI research program is not mandated but committed to ongoing engagement with fisheries stakeholders and scientific community.	
(6) Concern over AFMA-sourced consultation data.	**(6)** Woodside secures licensing information from AFMA and complies with terms of provision.	**(6)** Woodside confirmed it works with AFMA to secure licensing information and complies with terms of provision.	**(6)** Not required
(7) Suggested formal consultation agreement.	**(7)** Woodside has suggested a meeting to discuss consultation with Tuna Australia.	**(7)** Woodside confirmed with Tuna Australia a meeting date to discuss consultation.	**(7)** Not required.
While feedback was received, there were no objections or claims.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required. Tuna Australia will receive start and end of activity notifications per Table 7-5, Section 7.10 of the EP.
Outcomes of Consultation			
While Tuna Australia not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Tuna Australia to provide feedback during the consultation process.			

5.2.3 Southern Bluefin Tuna Fishery, Western Skipjack Tuna Fishery and Western Tuna and Billfish Fishery

Summary of information provided and record of consultation for this EP:

- On 25 November 2025, Woodside emailed the Southern Bluefin Tuna Fishery, Western Skipjack Tuna Fishery Western Tuna and Billfish Fishery (Commonwealth Fisheries) advising of the proposed activity as of October 2025 (Record of Consultation, reference 6.3.41) and provided a Consultation Information Sheet. They were given 30 days for consultation with a close date of 29 December 2025.
- On 16 December 2025, as no response had been received, Woodside sent a follow up email to the Commonwealth Fisheries which included a consultation close date of 29 December 2025, to ensure at least 30 days for consultation. (Record of Consultation, reference 6.4.3)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.
Outcomes of Consultation			
While the Commonwealth Fisheries are not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for the fisheries to provide feedback during the consultation process.			

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5.3 OTHER NON-GOVERNMENT GROUPS OR ORGANISATIONS

5.3.1 Vocus

Summary of information provided and record of consultation for this EP:

- On 15 July 2024, Woodside emailed Vocus advising of the proposed activity (Record of Consultation, reference 6.1.30, provided a Consultation Information Sheet, submarine communications cables map and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to 23 July 2024, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 23 July 2024, Vocus emailed to thank Woodside for the information (SI Report, reference 10.1) and:
  - **(1)** Noted its Highclere Cable is outside of the survey zone, so it has no comment or concern.
  - **(2)** Wished Woodside well on survey and asked to be informed on any changes.
- **(1)** On 23 July 2024, Woodside emailed to thank Vocus for its response and confirming location of Highclere Cable and that it had no comments or concerns and **(2)** confirmed Woodside would update Vocus if there were changes (SI Report, reference 10.2).
- On 2 October 2025, Woodside emailed Vocus a consultation update (Record of Consultation, reference 6.3.26) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to Vocus following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Noted no concerns as cable outside survey area.	**(1)** Woodside agreed that there would be no cable interaction during activities and noted Vocus had no comment or concerns**.**	**(1)** Woodside noted location of Highclere Cable is outside of the survey zone.	**(1)** Not required.
(2) Requested updates if there are any changes to the activity.	**(2)** Woodside understands that Vocus would want to be contacted if activity changes and that is standard practice**.**	**(2)** Woodside will update Vocus if there are changes to the activity.	**(2)** All relevant stakeholders would be contacted in the event of a change to the planned activities as set out in Section 7.10, Table 7-5 of the EP.
While feedback has been received, there were no objections or claims.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Change and Revision process (see Section 7.8.1 of this EP).	

Outcomes of Consultation

While Vocus is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Vocus to provide feedback during the consultation process.

5.3.2 Doctors for the Environment Australia (DEA)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed DEA advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 23 July 2024, Woodside sent an email reminder to DEA, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 2 October 2025, Woodside emailed DEA a consultation update on the EP (Record of Consultation, reference 6.3.3) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet (Record of Consult, reference 6.3.1).
- On 21 October 2024, Woodside sent a reminder email to DEA (Record of Consultation, reference 6.4.1).
- On 24 October 2024, DEA responded to the consultation request (SI Report, reference, 32.1) and provided an attachment with its response (SI Report reference, 32.1.1 and:
  - Opened with an overview of DEA as an independent, non-government organisation of medical doctors in the Australian states and territories with work based on premise that humans need a future with clean air and water, healthy soils, a stable climate and diverse and interconnected humanity. They are interested in environmental protection and restoration to promote human health and social stability.
  - Shared an Acknowledgement of Country, recognising traditional owners throughout Australia in the spirit of reconciliation.
  - Provided a summary overview of its position on Geophysical and Geotechnical (GPGT Surveys) and CCS projects which included:
    - **(1)** Angel CCS GPGT Surveys are unnecessary and may damage the marine ecosystem and are part of a CCS project which should not be used to justify gas expansion.
    - **(2)** Angel CCS would divert attention from our need to move away from gas and risks of GPGT surveys can not be justified. It also noted that:
      - CCS is unproven and costly and should not be supported or approved to justify gas expansion as it undermines decarbonisation efforts.
      - CCS projects divert funding from proven emissions-reduction technologies and delay transition to renewables.
  - Stated points not related to GPGT surveys including bullets below and the rest of this summary:
    - Concentrated carbon dioxide (CO_2) is toxic and its leakage into marine environment is a threat to aquatic ecosystems both directly through acidification and indirectly through sediment toxicity and oceans and water environments need to be protected from this.
    - Associated seismic blasting negatively impacts marine ecosystem in a number of ways, some known and others not known or understood.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

        - Australia can demonstrate how it can conserve biodiversity despite the inadequate environmental laws by rejecting false solutions to curb greenhouse gas emissions and get back on the path to a liveable future.
    - Identified CCS as a false solution to global heating and included:
        - CCS cannot operate at scale to limit global heating and is not proven climate solution.
        - Proft maximisation by fossil fuel industry is at the core of CCS promotion as a way out of climate crisis.
        - CCS delays cuts in GHG emissions required for a safe climate and to meet Paris Agreement goals.
    - Cited Chevron Gorgon as a CCS failure to deliver on forecasted emissions reductions noting:
        - Project only sequesters ~50% of what was projected after 5 years.
        - Target only represents a small percentage of total emissions.
        - CCS has yet to demonstrate it can reach target at scale.
    - Stated that approving CCS to manage carbon emissions is like greenwashing to support the development of fossil fuel projects in Australia, noting:
        - International Energy Agency (IEA) and Intergovernmental Panel on Climate Change (IPCC) outline that new fossil fuels projects are incompatible with reaching net-zero by 2050.
        - Support of CCS diverts funding from proven technologies and delays transition to renewables.
    - Noted safety and environmental concerns about transport of CO_2 and sub-seabed CCS including:
        - Fossil fuel industry has underplayed environmental risks associated with CCS and escaped CO_2 during transport in ships and pipelines and from storage facilities.
        - Within a sub-seabed setting, dissolved CO_2 leads to acidification of water which affects aquatic organisms, our food system, growth of shellfish and mobility of metals which increases sediment toxicity.
    - Added that CCS poses a range of geomechanical risks due to pressure build-up including caprock failure, reactivation of existing faults and the resultant induced seismicity, surface uplift and CO_2 leakage.
    - Provided information on the technical and operational challenges associated with large-scale shipping of CO_2 including:
        - Stages the gas must go through and associated safety protocols and uses which add to GHG emissions.
        - Moisture-laden CO_2 is highly corrosive.
        - Between 3-4% per 1000 km of CO_2 is lost to atmosphere during transport.
        - It is dubious to conduct surveys for a CCS project that relies on experimental shipping.
    - Stated it believes that given CCS' high risks and uncertainties, approval of any activity that enables it, should be rejected and:
        - Australia is obligated to protect ecosystems and regulators need to be clear that ecosystem protection is needed for human health and chance for liveable future.
- On 16 December, Woodside thanked DEA for its feedback (SI Report, reference 32.2) and:
    - Noted DEA's position that GPGT surveys were unnecessary and may have impacts on marine environment.
    - **(1)** Confirmed Woodside seeks to manage activities so any impacts or risks from GPGT surveys are reduced to ALARP and provided background including:
        - Impacts and risks are identified and assessed by its multi-disciplinary team of experts across environment, cultural heritage and stakeholder consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Mitigation and management measures which includes noise modelling, exclusion zones, fauna observation and spill response were in the EP,
- Table 3 of the Consultation Information Sheet includes a summary of key impacts and proposed management measures that may be subject to change based on consultation and assessment.

- **(2)** Acknowledged DEA's feedback related to climate concerns and carbon capture and storage which is outside the scope of the GPGT surveys EP and confirmed:
  - Angel CCS Project is subject to further regulatory approvals, noting the proposed project includes a carbon dioxide (CO_2) gathering system for the collection of CO_2 which will be taken to a central facility prior to being transported offshore for injection into the subsea geological formation.
- Asked if DEA had additional feedback on the GPGT surveys which the EP covers as Woodside continues to receive, assess and respond to feedback throughout the life of the EP.
- Noted Woodside's Management of Change and Review process in the event new information or stakeholder feedback introduces need for additional measures to reduce risk or improve outcomes.
- Flagged that State EP consultation would occur at a later date.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) GPGT surveys are unnecessary and may damage marine environment.	**(1)** Woodside carries out its activity so impacts and risks are managed to ALARP and notes Table 3 of the Consultation Information Sheet (CIS) provides mitigation and management measures.	**(1)** Woodside confirmed it seeks to carry out activities so impacts and risks are managed to ALARP, noted a multidisciplinary team identified and assessed those and referred to Table 3 of the CIS for review of mitigation and management measures.	**(1)** See section 2.3 and 2.4 of the EP.
(2) CCS isn't viable solution and diverts funding and focus from renewables	**(2)** Woodside notes that the EP cover GPGT surveys and not CCS activities.	**(2)** Woodside noted DEA's feedback on CCS and confirmed EP scope covers GPGT surveys.	**(2)** Not required.
While feedback has been received, there were no objections or claims.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1. of this EP).	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation
While DEA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for DEA to provide feedback during the consultation process.

5.3.3 Australasian Centre for Corporate Responsibility (ACCR), Australian Marine Conservation Society (AMCS), Australian Conservation Foundation (ACF), Conservation Council of Western Australia (CCWA), Greenpeace Australia Pacific (GAP) and Market Forces

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed Australasian Centre for Corporate Responsibility (ACCR), Australian Marine Conservation Society (AMCS), Australian Conservation Foundation (ACF), Conservation Council of Western Australia (CCWA), Greenpeace Australia Pacific (GAP) and Market Forces (known as NGOs moving forward) advising of the proposed activity (Record of Consultation, reference 6.1.7), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to NGOs, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 1 October 2025, Woodside emailed NGOs a consultation update (Record of Consultation, reference 6.3.3) and provided a Consultation Information Sheet (Record of Consultation, reference 6.3.1).
- On 21 October 2025, Woodside sent an email reminder to NGOs following up on the proposed activity (Record of Consultation 6.4.1).

Summary of Feedback, Objection or Claim	Woodside's Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Outcomes of Consultation
While these NGOs are not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for NGOs to provide feedback during the consultation process.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

5.4 RESEARCH INSTITUTES AND LOCAL CONSERVATION GROUPS OR ORGANISATIONS

5.4.1 Australian Institute of Marine Science (AIMS)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed AIMS advising of the proposed activity (Record of Consultation, reference 6.1.31), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 19 July 2024, AIMS emailed and thanked Woodside for the notification of activities (SI Report, reference 1.1) and:
  - **(1)** Noted their operational activities will not be impacted due to the exclusion zone and proactive vessel communication on behalf of Woodside.
  - **(2)** Requested to be updated should the proposed activities change.
- On 23 July 2024, Woodside thanked AIMS for reviewing the activities (SI Report, reference 1.2) and:
  - **(1)** Acknowledged AIMS' note that activities will not impact their operations.
  - **(2)** Will update AIMS if anything changes.
- On 2 October 2025, Woodside emailed AIMS a consultation update on the EP (Record of Consultation, reference 6.3.27) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet.
- On 21 October 2024, Woodside sent a reminder email to AIMS (Record of Consultation, reference 6.4.1).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
(1) Noted AIMS operations will not be affected.	**(1)** Woodside noted AIMS' position that their operations will not be impacted by the planned activities.	**(1)** Woodside confirmed AIMS' position as not being impacted.	**(1)** Not required.
(2) Requested update if there are any changes to the activity.	**(2)** Woodside agrees that stakeholders would be updated in the event planned activities change.	**(2)** Woodside confirmed it would update AIMS if changes were made to the planned activities.	**(2)** Not required.
While feedback has been received, there were no objections or claims.		Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback	No additional controls or measures are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	
Outcomes of Consultation			
While AIMS is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for AIMS to provide feedback during the consultation process.			

5.4.2 Commonwealth Scientific and Industrial Research Organisation (CSIRO)

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed CSIRO, advising of the proposed activity (Record of Consultation, reference 6.1.31), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 July 2024, Woodside forwarded the email to another CSIRO contact recommended by primary contact's out-of-office response (SI Report, reference 27.1).
- On 23 July 2024, Woodside sent an email reminder to CSIRO, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 2 October 2025, Woodside emailed CSIRO a consultation update on the EP (Record of Consultation, reference 6.3.28) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet.
- On 21 October 2024, Woodside sent a reminder email to CSIRO (Record of Consultation, reference 6.4.1).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Outcomes of Consultation
While CSIRO is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CSIRO to provide feedback during the consultation process.

5.4.3 Western Australian Marine Science Institution (WAMSI), University of Western Australia (UWA), Curtin University, Murdoch University

Summary of information provided and record of consultation for this EP:

- On 8 July 2024, Woodside emailed WAMSI, UWA, Curtin University and Murdoch University (Research Organisations) advising of the proposed activity (Record of Consultation, reference 6.1.31), provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 23 July 2024, Woodside sent an email reminder to the Research Organisations, following up on the proposed activity (Record of Consultation, reference 6.2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 2 October 2025, Woodside emailed Research Organisations a consultation update on the EP (Record of Consultation, reference 6.3.28) since consultation first took place in July 2024. Woodside provided an overview of activities with updated timing for planned GPGT survey activities. Woodside attached an updated Consultation Information Sheet.
- On 21 October 2024, Woodside sent a reminder email to Research Organisations (Record of Consultation, reference 6.4.1).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim	Woodside's Statement of Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.		Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.8.1 of this EP).	No additional measures or controls are required.

Outcomes of Consultation
While the Research Organisations are not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for WAMSI to provide feedback during the consultation process.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

6. RECORD OF CONSULTATION

6.1 Initial consultation

6.1.1 Consultation Information Sheet

Woodside Energy

CONSULTATION

INFORMATION SHEET

July 2024

ANGEL CCS GEOPHYSICAL AND GEOTECHNICAL SURVEYS COMMONWEALTH AND STATE ENVIRONMENT PLANS

NORTH WEST SHELF, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an environment plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure the activity is carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and of an acceptable level. We want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Overview

The Angel Carbon Capture and Storage Joint Venture (Angel CCS JV), of which Woodside is Operator, has identified the opportunity for a carbon capture and storage (CCS) project in the North-West region of Western Australia (WA). The proposed Angel CCS Project involves the development of a Carbon Dioxide (CO_2) gathering system, collecting CO_2 via new pipelines from emitters on shore or through imported options via ships. Collected CO_2 would be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

More information about the plans for the proposed Angel CCS Project is available at https://woodside.com/angelccs.

To support the Angel CCS Project, Woodside is proposing to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit (MODU) anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

Survey activities proposed to be undertaken in Commonwealth waters will be submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for assessment under the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth).*

Pending the introduction of legislation, survey activities proposed to be undertaken in State waters are currently intended be submitted to the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA).*

Location and operations

The State Operational Area is proposed to be on the North West Shelf of WA extending from the state waters adjacent to the Karratha Gas Plant (KGP) out to the Commonwealth/State waters boundary.

The Commonwealth Operational Area is proposed to extend from the Commonwealth/State waters boundary, out to the Angel Field located in GHG Assessment Permit G-10-AP. A narrow survey corridor also extends west out from the Angel Field to petroleum title WA-1-L. Operational Areas are shown in **Figure 1.**

Woodside notes that the Commonwealth Operational Area is larger than the area of the GHG Assessment Permit G-10-AP and that within G-10-AP there are overlapping petroleum titles. Woodside will obtain key GHG Operation permits and GHG Special Authorities as applicable.

Surveys

Geophysical and geotechnical surveys are planned to assist to provide data for aspects of the GHG activity program. The surveys will involve seafloor sampling and scanning in both State and Commonwealth waters for data collection to inform various phases of the Angel CCS Project.

For the purposes of the EPs, a 'survey' is defined as a suite of geophysical and/or geotechnical activities that are all conducted in a defined survey campaign. Survey activities under this EP will be conducted in the following permit areas:

- Commonwealth Operational Area includes permit titles: WA-3-L, WA-4-L, WA-9-L, WA-52-L, WA-28-P, WA-1-L, WA-208-P, G-9-AP, G-10-AP, vacant acreage and vacant acreage release area W22-4
- State Operational Area includes permit title: vacant acreage.

Timing

The surveys are anticipated to commence around Q1 2025, with the State waters component estimated to take a total of approximately 80 days to complete and the Commonwealth component, a total of approximately 100 days. The survey activities are not planned to be undertaken in a single campaign and will be split into a number of campaigns over the five-year validity period of the EPs. Timing and duration may be subject to change due to a number of factors including approvals, weather, project vessel availability, and other unforeseen circumstances.

The campaign may occur at any time throughout the year and therefore the EPs assess risks relevant to geophysical and geotechnical survey activities in all seasons to provide flexibility for campaigns.

Proposed future activity in State waters is pending revision of State regulations [and State EP approval].

Table 1 Summarises the activities, which will be managed under the Angel CCS Geophysical and Geotechnical Surveys EPs.

Project vessels

A number of project vessels will be used to complete the survey activities.

These may include a multi-purpose project vessel for geophysical and geotechnical survey and a smaller vessel to access the nearshore sections.

1 Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans | July 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Geotechnical drilling may be performed from a supply vessel using a seafloor drilling unit or from a small jack-up barge. The barge will be positioned and supported using a small tug or multi cat.

Activities in Commonwealth waters may also require a larger vessel such as a geotechnical drilling vessel. Uncrewed surface vessels (USVs), controlled from a remote operations centre, are likely to replace conventional vessels for numerous survey tasks over the life of the EP. In addition, a drone or light aircraft may be used to capture data close to the shore.

Communications with mariners

A 500 m safety exclusion zone will apply around the project vessels conducting survey activities to manage vessel movements.

Commercial fishers and other marine users are permitted to use the Operational Areas but should take care around operations by adhering to standard navigation rules and remain clear of the safety exclusion zone.

Marine notices will be issued prior to activity commencement to alert vessels which may be operating in waters nearby.

Assessment

Woodside has undertaken an assessment of the potential impacts and risks to the environment and relevant persons arising from the planned activities as well as unplanned events. This assessment considers the timing, duration, and location of the activities. **Table 3** provides a summary of mitigation and management measures that will be implemented. Further details will be provided in the EPs.

In preparing the EP, Woodside's intent is to minimise environmental social and cultural risks and impacts associated with the proposed activities, and we seek your feedback to inform our decision making.

Joint venture

Woodside Energy Ltd is the operator on behalf of the Angel CCS Joint Venture. The participants of the JV are Woodside Energy Ltd, BP Developments Australia Pty Ltd, Japan Australia LNG (MIMI) Pty Ltd, Shell Australia Pty Ltd, and Chevron Australia Pty Ltd.

We welcome your feedback by 9 August 2024.

Environment That May Be Affected (EMBA)

The EMBA is a mathematically modelled area of the largest possible spatial extent where the Commonwealth activities could potentially have an environmental consequence. The broadest extent of the model takes into consideration planned and unplanned activities. For the EPs, the EMBA has been developed by combining numerous modelling outputs based on scenarios involving a release of hydrocarbons to the environment. These scenarios are highly unlikely to occur. The most credible modelling scenarios that inform the EMBA are based on hydrocarbon release as a result of a vessel collision. The Commonwealth EMBA is depicted in **Figure 2.**

The EMBA does not represent the extent of the predicted impact of a release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths that a hydrocarbon release could travel, depending on factors including the weather and ocean conditions at the time of the release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. Only a minimal, specific part of the EMBA will be affected and that portion will only be known at the time of the release.

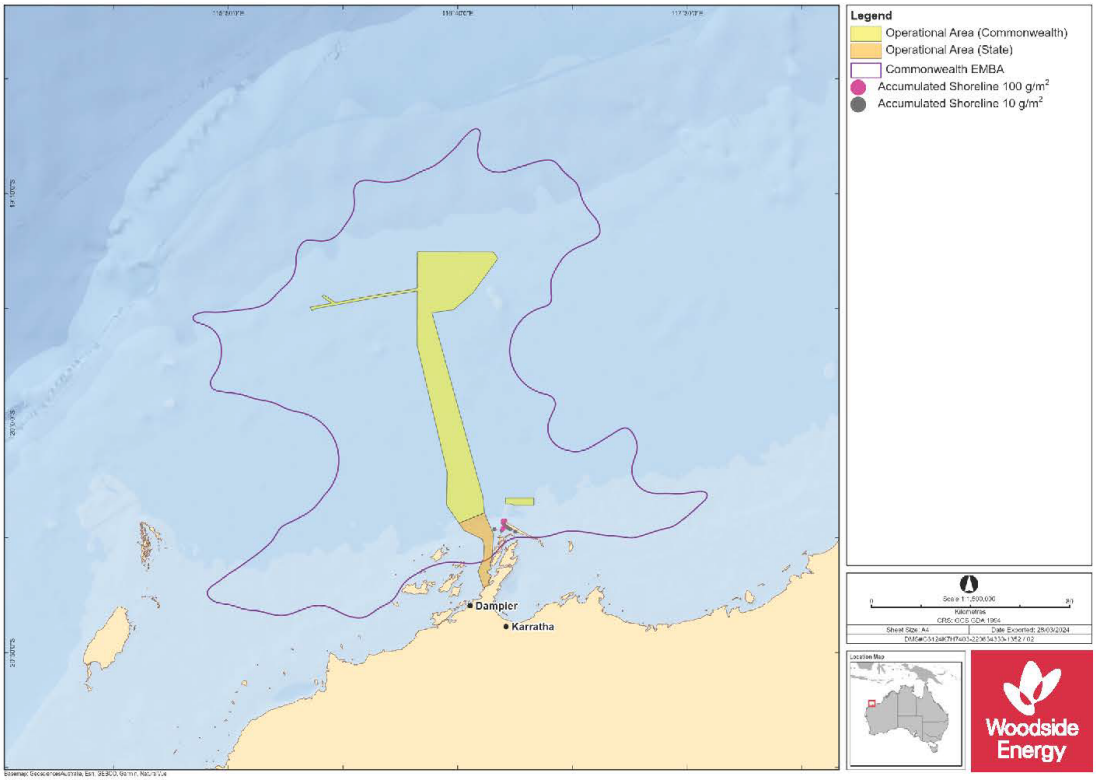

Figure 2: Commonwealth EMBA for Angel CCS Geophysical and Geotechnical Surveys EPs

Mitigation and management measures

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the proposed activities considering timing, duration, location. Mitigation and management measures for proposed activities are outlined in **Table 3**. Further details will be provided in the EPs.

Table 3. Summary of key risks and/or impacts and management measures

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Planned Activities (Routine and Non-routine)			
Physical presence: interaction with other marine users	The physical presence and movement of project vessels within the Operational Areas has the potential to interfere with/ displace other marine users. The following vessels will be involved in survey activities: • multi-purpose project vessels • geotechnical vessels (geotechnical drilling vessels) • jack-up barge positioned and supported using a small tug or multi cat (State only) • smaller vessel will be used to access the very nearshore sections (State only) • uncrewed surface vessels (USVs). Survey activities are planned to be conducted as multiple campaigns over the five-year approval period of the EP (2025 – 2029).	• Displacement of commercial fishing activities and commercial shipping vessels. • Other marine users may be present in the Operational Areas. These include recreational fishing areas, tourism, and commercial shipping fairways. • Due to the localised nature of the activity, any displacement is expected to be negligible with no lasting effect.	• Establish a temporary 500 m safety exclusion zone around the project vessels which is communicated to marine users. • Vessels to adhere to the navigation safety requirements including the *Navigation Act 2012* and any subsequent Marine Orders. • Notify Australian Hydrographic Office (AHO) of activities and movements. • Notify relevant government departments, fishing industry representative bodies and licence holders (where requested during consultation) of activities.
Physical presence – disturbance to seabed from geotechnical and geophysical surveys	Geotechnical survey activities are likely to result in localised and temporary physical modification and disturbance to a small area of the seabed. The source of impact from geotechnical surveys are: • box cores/grab samplers • shallow cores and probes: piston/gravity/vibrocores • cored bore holes • penetrometer testing (CPT/PCPT/CPTu). The geotechnical seabed coring may result in the indirect discharge of a small quantity of drill cuttings and fluid at the seafloor. Placing the geotechnical equipment on the seafloor will result in minor localised physical disturbance to the seafloor beneath the equipment.	Environmental values potentially impacted: • seabed habitat • key ecological features (KEFs) (Commonwealth only) • marine primary producers • cultural heritage. The Operational Areas are expected to consist mainly of sandy substrate. The Commonwealth Operational Area overlaps the Ancient Coastline and Glomar Shoal Key Ecological Features (KEFs). Activities will be localised and of short duration, physical impacts to the seabed are expected to be negligible.	• No routine anchoring will occur during surveys. • Monitor inventory deployed to the field and track removal of equipment during activity. • Implement Woodside's Chemical Selection and Assessment Environment Guideline. • No seabed disturbance will occur on shoals within the Operational Areas. • An Unexpected Finds Procedure will be in place in the event of the discovery of what appears to be Underwater Cultural Heritage. • Desktop heritage assessment prior to starting the activities. • Comply with regulatory requirements for Underwater Cultural Heritage.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Routine acoustic emissions – Generation of noise from survey vessels, and from geophysical and geotechnical survey equipment	• Generation of underwater noise from project vessels. • Generation of acoustic signals from dynamic positioning systems. • The key sound sources during geotechnical surveys include the penetration tests and sampling boreholes undertaken at the seabed. • Underwater noise generated by geophysical sources during surveys and positioning equipment (transponders).	• Elevated underwater noise may affect marine fauna, including marine mammals, turtles and fish in three main ways: 1. By causing direct physical effects, including injury or hearing impairment. Hearing impairment may be temporary or permanent. 2. Through disturbance leading to behavioural changes or displacement from important areas. The occurrence and intensity of disturbance is highly variable and depends on a range of factors rating to the animal and situation. 3. By masking or interfering with other biologically important sounds (including vocal communication, echolocation, signals and sounds produced by predators or prey). • The frequency of the transponders is at the upper limit of the bandwidth of low frequency cetaceans. Low frequency cetaceans such as pygmy blue whales are therefore unlikely to be impacted by sound generated from the transponders. • The continuous noise generated by vessels is not expected to cause temporary or permanent change in hearing sensitivity to cetaceans due to the level of exposure required to trigger this. Impacts may relate to temporary behavioural changes such as avoidance with no lasting effect. • Biologically Important Areas (BIAs) overlapping the Operational Areas include the pygmy blue whale distribution BIA, the humpback whale migration BIA. • The Commonwealth Operational Area overlaps internesting buffers for the hawksbill, loggerhead, green turtles and flatback turtles. The State Operational Area supports several BIAs such as internesting buffers, internesting, foraging, migration corridors, mating, and nesting for all marine turtles. Marine turtles may avoid the low-frequency sounds generated by vessel noise. • The Commonwealth Operational Area overlaps a foraging BIA for whale sharks however as the thresholds for impacts are higher than the noise generated by the activities, impacts are not expected.	• Comply with regulatory requirements for interactions with marine fauna to prevent adverse interactions. • Project vessels will not travel greater than 6 knots within 300 m of a cetacean or turtle (caution zone) and not closer than 100 m from a whale. • Project vessels will not approach closer than 50 m for a dolphin or turtle and/or 100 m for a whale (with the exception of animals bow riding). • If the cetacean or turtle shows signs of being disturbed, project vessels will immediately withdraw from the caution zone at a constant speed of less than 6 knots. • Project vessels will not travel greater than 8 knots within 250 m of a whale shark and not allow the vessel to approach closer than 30 m of a whale shark. • Start-up of geophysical survey equipment will be delayed if a whale is sighted within the observation zone (150 m). • Implementation of an observation zone for 30 minutes prior to start up around geophysical survey equipment.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Routine and non-routine discharges from survey vessels	• Routine discharge of sewage, grey water and putrescible wastes to marine environment from project vessels. • Routine discharge of deck and bilge water to marine environment from project vessels.	• The main impact associated with ocean disposal of sewage and other organic wastes (i.e., putrescible waste) is eutrophication. Eutrophication occurs when the addition of nutrients, such as nitrates and phosphates, causes adverse changes to the ecosystem including short-term, localised impacts to water quality. • No significant impacts are expected to water quality from planned discharges because of the minor quantities involved, the expected localised mixing zone, and the high level of dilution into the open water marine environment of the Operational Areas. • Similarly, although some marine fauna may transit the Operational Areas, potential for impacts remains low due to the localised nature of discharges and rapid dilution.	• Vessel discharges will be managed according to regulatory requirements.
Routine and non-routine discharges of drill cuttings and drilling fluids during geotechnical drilling	• Drill cuttings and fluids will be discharged at the borehole location during geotechnical seabed coring. • Drilling fluid will consist primarily of seawater and may include low-toxicity additives.	Geotechnical survey activities are likely to result in localised and temporary physical modification and disturbance to a small area of the seabed. Potential impacts include: • localised reduction in water and sediment quality • loss or damage to benthic habitats. The Commonwealth Operational Area overlaps with the Ancient Coastline KEF and Glomar Shoals KEFs. Impacts to benthic marine fauna as a result of geotechnical surveying are expected to be highly localised to surface area of the borehole, drill cuttings and the footprint of the geotechnical equipment, which is a relatively small area compared to the regional extent of the Ancient Coastline KEF.	• All chemicals intended or likely to be discharged into the marine environment reduced to as low as reasonably practicable (ALARP) using Woodside's chemical assessment process.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Routine light emissions – external lighting on survey vessels	Project vessels will use external lighting to navigate and conduct safe operations at night, including to maintain good night visibility for crew members and to communicate the vessel's presence to other marine users.	Light emissions may affect fauna (such as marine turtles and birds) in two main ways: 1. Behaviour: artificial lighting has the potential to create a constant level of light at night that can override natural levels and cycles. 2. Orientation: if an artificial light source is brighter than a natural source, the artificial light may override natural cues, leading to disorientation. The Commonwealth Operational Area overlaps internesting buffers for the hawksbill, loggerhead, green turtles and flatback turtles. The State Operational Area supports several BIAs such as internesting buffers, internesting, foraging, migration corridors, mating, and nesting for all marine turtles. The Commonwealth Operational Area supports several breeding BIAs for the wedge-tailed shearwater, roseate tern, and fairy terns. The State Operational Area supports both breeding and foraging BIAs for these species.	Implementation of the Woodside Offshore Seabird Management Plan, that includes but not limited to: • record keeping and reporting of seabird interactions • procedures on seabird intervention, care and management • regulatory reporting requirements for seabed interactions that result in unintentional injury • a scalable adaptive management process should negative light impacts to nocturnal seabirds be detected. Lighting will be limited to the minimum required for navigation and safe operational requirements, with the exception of emergency events.
Routine and non-routine atmospheric and GHG emissions	• Atmospheric emissions and GHG emissions generated by project vessels. • Emissions are generated from internal combustion engines, machinery, and incinerators on vessels.	• Emissions from project vessels and could result in temporary, localised reductions in air quality in the immediate vicinity. • The exposed location of the project vessels is expected to result in the rapid dispersion of the low volumes of atmospheric emissions, as such the potential impacts are expected to be localised and of no lasting effect.	• Comply with regulatory requirements for GHG emissions reporting. • Vessel operations planned, where practicable, to minimise fuel consumption and associated GHG/air emissions. • Fuel types will be selected to reduce expected GHG emissions (I.e., Project vessels will not use heavy fuel oil (HFO) or intermediate fuel oil (IFO)).
Unplanned Events (Accidents / Incidents)			
Accidental introduction of invasive marine species (IMS)	• Project vessels have the potential to introduce IMS to the Operational Areas through marine biofouling (containing IMS) on vessels, as well as within high risk ballast water exchange. • There is also a remote potential that cross contamination between vessels can also occur (such as IMS translocated between project vessels) or onto benthic habitat within shallower areas.	• It is not credible for IMS to be introduced and establish on the seabed or subsea structures in the Commonwealth Operational Area as these deep waters are not conducive to the settlement and establishment of IMS. • The State Operational Area in shallower waters (up to 45 m) present a slightly increased risk of IMS establishment, however, the risk of establishment, whilst credible, is remote. • Given the low likelihood of IMS translocation to and colonisation within the Operational Areas, project activities are unlikely to result in establishment of IMS, and as such will not adversely affect other marine user activities in the region.	• Project vessels will manage their ballast water using one of the approved ballast water management options, as outlined in the Australian Ballast Water Management Requirements. • Woodside's IMS risk assessment process will be applied to project vessels and immersible equipment undertaking the activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Unplanned interaction with marine fauna	• Vessel movements have the potential to result in collisions between project vessel (hull and propellers) and marine fauna. • Project vessels would typically be stationary or moving at low speeds when supporting the survey activities.	• BIAs overlapping the Operational Areas include the pygmy blue whale distribution BIA, the humpback whale migration BIA, marine turtle internesting buffers, internesting, foraging, migration corridors, mating, and nesting BIAs, marine turtle critical habitat areas, and the Commonwealth whale shark foraging BIA. • Given the adopted controls, it is considered that if a collision or entanglement were to occur, it will not result in a potential impact greater than a localised impact to environmental receptors, with no lasting effect to marine fauna populations.	Comply with regulatory requirements for interactions with marine fauna to reduce the likelihood of a collision occurring.
Physical presence – disturbance to seabed: vessel grounding (State only)	The highly unlikely event of a collision or grounding event during the survey activities could cause disturbance of seabed habitat.	• Unplanned seabed disturbance may result in localised changes to water and sediment quality or a localised temporary impact to benthic communities and is therefore considered to present a negligible risk.	Comply with regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements.
Physical presence – disturbance to seabed from dropped objects, equipment loss	Dropped objects resulting in the disturbance of seabed habitat	• Unplanned seabed disturbance may result in localised changes to water and sediment quality or a localised temporary impact to benthic communities and is therefore considered to present a negligible risk. • Potential impacts to KEFs which intersect the Commonwealth Operational Area are considered to have a temporary disruption and no lasting effects to a small area of the seabed, as they would be limited to the footprint of a dropped object resulting in potential highly localised and temporary change in habitat. Dropped objects within the Ancient Landscape could impact cultural heritage associated with this area, however, this would also comprise a small area.	• Project vessel inductions include control measures for dropped object prevention. • Dropped objects and geophysical/ geotechnical equipment to be recovered and relocated where safe and practicable to do so. Overboarding geotechnical equipment: exclusion zone of 50 m of existing subsea assets
Unplanned discharges – loss of solid hazardous and non- hazardous wastes/ equipment	• Accidental discharge of hydrocarbons/ chemicals from project vessels deck activities and equipment, from subsea ROV hydraulic leaks. • Unplanned release of chemicals or hydraulic fluid due to failure of subsea equipment. • Accidental loss of hazardous or non-hazardous solid wastes / equipment to the marine environment.	• The potential impacts of hazardous or non-hazardous solid wastes and equipment accidentally discharged to the marine environment include contamination of the environment as well as secondary impacts relating to potential contact of marine fauna with wastes.	• Comply with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes (i.e., Marine Orders 95 and 94). • Implement waste management procedures which provide for safe handling and transportation, segregation and storage and appropriate classification of waste generated. • Solid waste/equipment dropped to the marine environment is to be recovered where safe and practicable to do so.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impact/Risk	Preliminary Draft Mitigation and/or Management Measure
Unplanned discharges – deck and subsea spills from geotechnical and geophysical survey vessels and equipment	• Accidental discharge to the ocean of other hydrocarbons/ chemicals/ geotechnical drilling fluids from project vessels deck activities and equipment (e.g., cranes). • Unplanned release of chemicals or hydraulic fluid due to failure of geotechnical and geophysical survey equipment.	• Unplanned discharges of non-process chemicals and hydrocarbons may decrease the water quality in the immediate vicinity of the release. Only small volumes are anticipated, resulting in very short-term impacts to water quality, limited to the immediate release location. • As a result of a change in water quality, further impacts to receptors may occur, however impacts to marine fauna are expected to be limited to temporary irritation of sensitive membranes to individuals and are considered slight or less (negligible).	• Comply with regulatory requirements for the prevention of marine pollution for project vessels. • Liquid chemical and fuel storage areas are bunded or secondarily contained when they are not being handled/moved temporarily on project vessels. • Spill kits positioned in high-risk locations around the vessels (near potential spill points such as transfer stations). • Chemicals will be selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process.
Unplanned hydrocarbon release – vessel collision	Vessels will use marine diesel fuel, meaning a collision involving a project vessel or third-party vessel during the activity may result in the release of marine diesel. For an interaction to result in the worst-case scenario diesel release, several factors must occur: • Vessel interaction must result in a collision. • The collision has enough force to penetrate the vessel hull and must occur in the location of a fuel tank. The fuel tank must have a sufficient amount of fuel so that the liquid level is higher than the point of damage.	• In the highly unlikely event of a vessel collision causing a release of hydrocarbon, impact to water quality and marine ecosystems could occur. • Marine diesel is a relatively volatile, non-persistent hydrocarbon. If released to the environment, up to approximately 40% evaporates within the first 24 hours. • In the event of a hydrocarbon release, potential impacts across the EMBA will be assessed including receptors such as plankton, fish, marine turtles, marine mammals, seabirds and migratory shorebirds, marine primary producers, tourism, recreation, commercial fisheries, commercial shipping and cultural heritage. • Considering receptor sensitivity, potential loss of containment volume(s) and potential spill locations, most receptors are expected to be rated as having a potential consequence level of 'Minor' or less (Slight or Negligible).	• Comply with regulatory requirements for the prevention of vessel collisions and safety and emergency arrangements. • Notify relevant government departments, fishing industry representative bodies and licence holders of activities prior to commencement and on completion of activities. • Establish temporary exclusion zones around vessels which are communicated to marine users to reduce the likelihood of collision. • A management plan for simultaneous operations is in place when working in vicinity of other Woodside operations/ activities. **Spill response arrangements:** • Arrangements supporting the Oil Pollution Emergency Plan (OPEP) will be tested so that the OPEP can be implemented as planned. • Emergency response activities would be implemented in line with the OPEP.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **9 August 2024** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/what-we-do/consultation-activities.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation and to the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS).

Woodside will communicate material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our Environment Plans which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* and support other regulatory processes associated with the planned activities (which may or may not be confidential) as well as to DEMIRS pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Noting that at the date of this information sheet, the legislation has not yet been drafted.

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit: www.woodside.com/what-we-do/consultation-activities.

6.1.2 Summary Information Sheet

Woodside Energy

CONSULTATION

SUMMARY INFORMATION SHEET

July 2024

ANGEL CCS GEOPHYSICAL AND GEOTECHNICAL SURVEYS COMMONWEALTH AND STATE ENVIRONMENT PLANS

NORTH WEST SHELF, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an Environment Plan (EP) to notify and obtain their input. This assists Woodside to confirm current measures or identify additional measures, if any, that maybe taken to lessen or avoid potential adverse effects of the proposed activity on the environment. These are the intended outcomes of consultation.

This Summary Information Sheet provides information relating to the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Waters EPs which aim to assist with planning associated with the proposed Greenhouse Gas (GHG) activity program.

The surveys essentially aim to gather information about the features of the seabed to assist to understand seabed soil conditions. They also seek to test soil and rock samples to provide data on seabed contents and properties.

Further details, including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures are available within the Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans Consultation Information Sheet (July 2024) which can be found at: http://www.woodside.com/what-we-do/consultation-activities.

The surveys are anticipated to commence around Q1 2025.

Overview

The Angel Carbon and Capture Storage Joint Venture (Angel CCS JV), of which Woodside is Operator, has identified the opportunity to pursue the implementation of a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures. The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO_2) gathering system, collecting CO_2 via new pipelines from emitters on shore or through imported options via ships. Collected CO_2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To learn more about the proposed Angel CCS Project, visit https://woodside.com/angelccs.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The Commonwealth EP will cover activities in Commonwealth waters and will be submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA). The State EP will cover activities in WA waters and will be submitted to the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS), pending updates to WA state legislation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Maps showing the location of the activities are provided below:

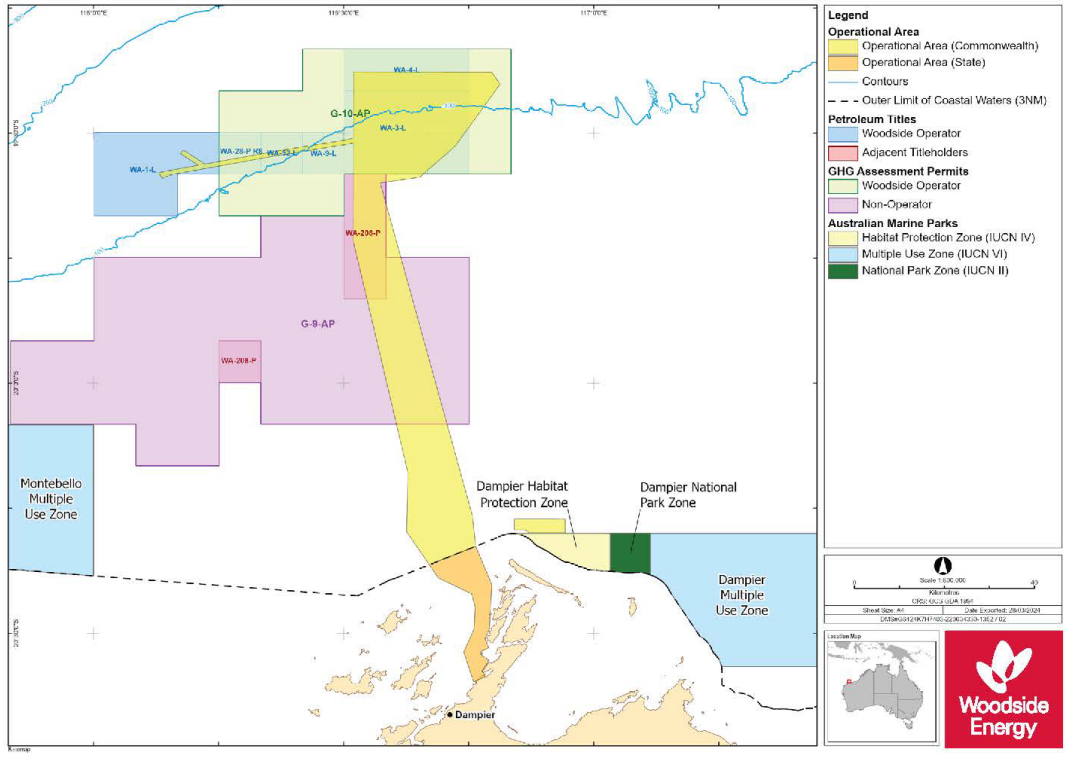

Figure 1: Commonwealth and State Operational Areas for Angel CCS Geophysical and Geotechnical Surveys EPs.

Summary of activities

Woodside plans to collect high resolution geophysical and geotechnical data by using geophysical and geotechnical survey equipment and various vessels. The activities in State waters are estimated to take approximately 80 days to complete, and the activities in Commonwealth waters are estimated to take approximately 100 days. The survey activities are not planned to be undertaken in a single campaign and will be split into multiple campaigns over the five-year validity period of the EPs. Timing and duration may be subject to change due to a number of factors, including timing of approvals, project vessel availability, weather and other unforeseen circumstances.

Vessels

Survey vessels will be used to support the geophysical and geotechnical surveys. Vessel size and type will be consistent with the relevant work scope and water depth. Drones or light aircraft may also be used.

Geophysical and geotechnical surveys

Geophysical surveys use a number of different techniques to gather information about the features of the seabed and determine seabed soil conditions. Geotechnical surveys are proposed to use standard industry equipment to test soil and rock samples to provide detailed data on seabed contents and properties.

Communication with mariners

Marine notices will be issued prior to activity commencement to alert vessels which may be operating in waters nearby.

Joint venture

Woodside Energy Ltd is the operator on behalf of the Angel CCS Joint Venture. The participants of the JV are Woodside Energy Ltd, BP Developments Australia Pty Ltd, Japan Australia LNG (MIMI) Pty Ltd, Shell Australia Pty Ltd, and Chevron Australia Pty Ltd.

Environment that may be affected (EMBA)

The EMBA is an area that has been mathematically modelled. It is a model of the largest spatial extent where the Commonwealth activities could potentially have an environmental consequence. The broadest extent of the model takes into consideration planned as well as unplanned activities. For the EPs, the EMBA modelling has been developed by combining numerous modelled outputs which are based on highly unlikely releases of hydrocarbons to the environment. The modelling scenarios that inform the EMBA are based on hydrocarbon releases from a highly unlikely vessel collision. The Commonwealth EMBA is depicted in **Figure 2.**

The EMBA does not represent the extent of the predicted impact of a release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths that a hydrocarbon release could travel, depending on a number of variables like the weather and ocean conditions at the time of the release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. The specific path of a hydrocarbon release and specific part of the EMBA that is affected will only be known at the time of the release.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

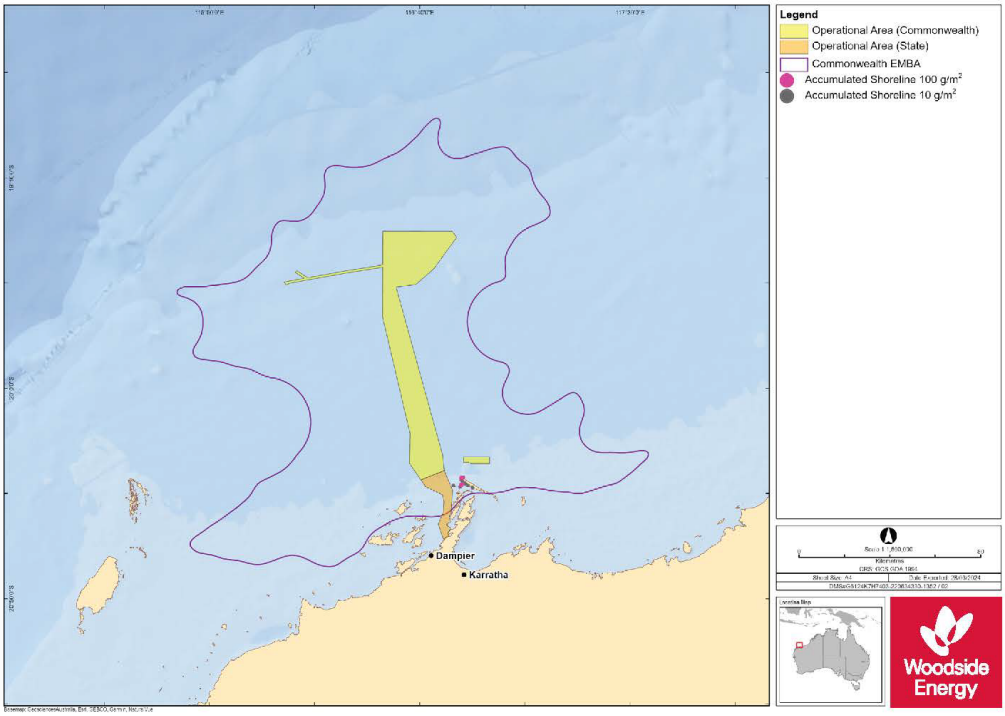

Figure 2: Commonwealth EMBA

Feedback

Woodside consults relevant persons in the course of preparing EPs to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

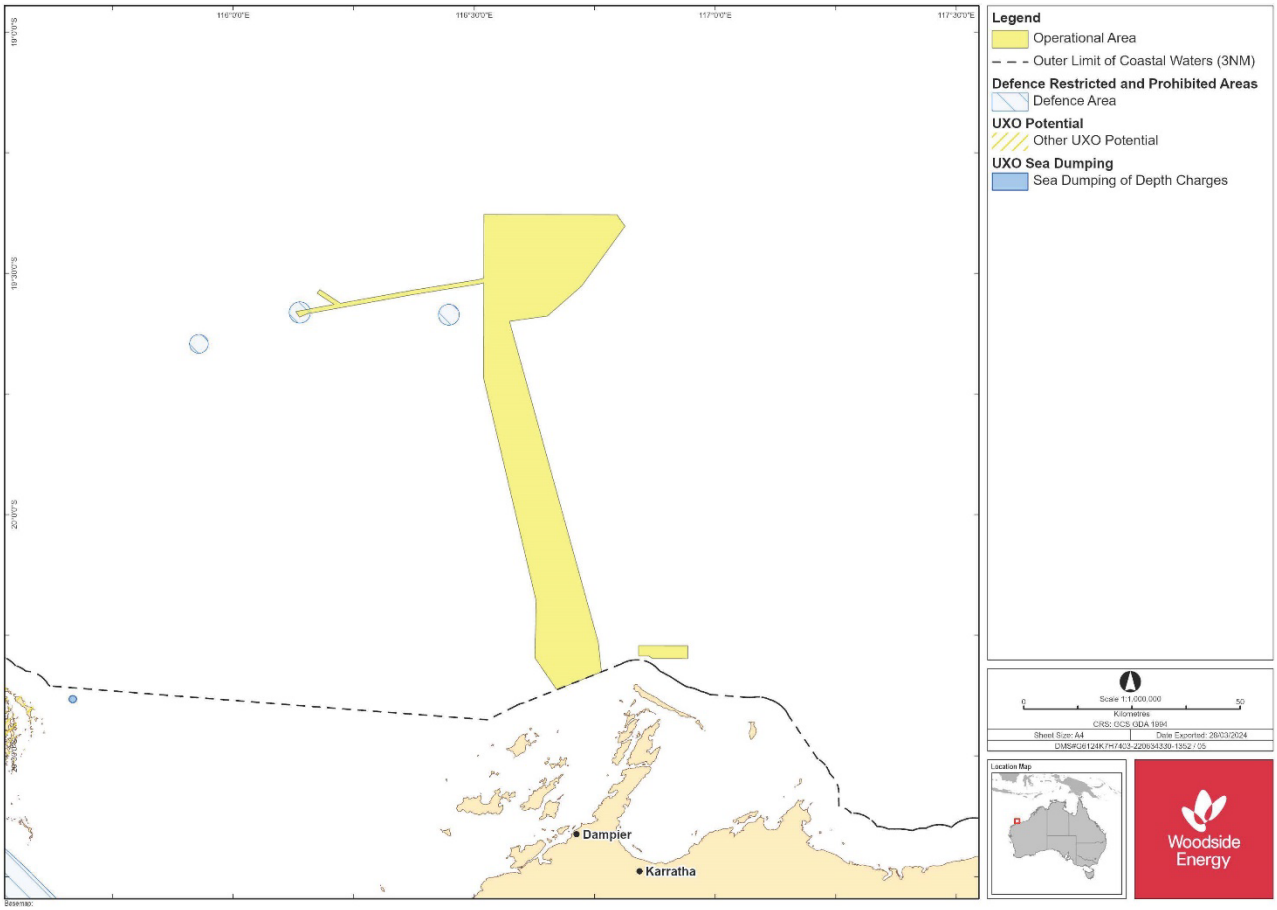
If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **9 August 2024** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:
www.woodside.com/what-we-do/consultation-activities

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) and to the Western Australia Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) as required under legislation. Woodside will communicate material changes to the proposed activity to affected relevant persons as relevant and appropriate.



Your feedback and our response will be included in our EPs for the proposed activities, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* and to DEMIRS pending updates to the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA)*. As at the date of this Information Sheet, the Western Australian regulations have not yet been drafted.

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit:

6.1.7 Email to Australian Border Force (ABF), Australian Conservation Foundation (ACF), Australian Energy Producers (AEP), Australian Marine Conservation Society (AMCS), Australasian Centre for Corporate Responsibility (ACCR), Bounty Oil and Gas, Coastal Oil and Gas/Fox Resources, Conservation Council of Western Australia (CCWA), Department of Biodiversity, Conservations and Attractions (DBCA), Department of Mines, Petroleum and Exploration (DMPE, formerly DEMIRS), Department of Industry, Sciences and Resources (DISR), Doctors for the Environment (DEA), Exxon Mobil, Finder Energy, Greenpeace Australia Pacific (GAP), Jadestone Energy, JX Nippon, KATO Energy, KUFPEC Australia, Longreach Capital Investments/Beagle No. 1, Market Forces, Pilbara Ports, Santos, Skye Napoleon, Vermillion Oil & Gas − 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview

For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships.

Collected CO2 would be transported to a central compression facility prior to being transported

offshore via a subsea pipeline and injected into the subsea geological formation.

Environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

Consultation information

A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Feedback:

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.

Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with *the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Ch)*. The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA)*. Both support other regulatory processes associated with the planned activities (which may or may not be confidential)

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.8 Email to Australian Communications and Media Authority (ACMA) − 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.
Environment that may be affected (EMBA)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.
The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

	cat, smaller craft for nearshore, uncrewed surface vessels.	

Feedback:
If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.
Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)
Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.
NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.
Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.9 Email to Australian Fisheries Management Authority (AFMA), Commonwealth Fish - 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.
The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.
Exclusionary / Cautionary Zones
Temporary 500 m exclusion zone around vessels conducting survey activities to manage vessel movements.
No restrictions to other vessels within the Operational Area apart from being advised to take care during the survey vessel activities.

Environment that may be affected (EMBA)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.
The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.
Consultation information
A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Please note that Woodside has provided consultation information directly to licence holders it has assessed as 'relevant persons' for this EP, as well as relevant fishery representative bodies.

Please let us know if you require notification prior to and on completion of the proposed activities.

Activity: Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans

Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environmental Plans		
Summary	Series of geophysical and geotechnical surveys to provide data to support the GHG activity program, inform design of the Angel CCS Project and support baselines studies to provide data on existing infrastructure and potential future activities.	
	State	Commonwealth
Permit Area	Vacant acreage	Vacant acreage, G-10-AP, WA-3-L, WA-4-L, WA-9-L, WA-52-L, WA-28-P, WA-1-L, G-9-AP, WA-208-P, Vacant acreage release area W22-4
Location	North West Shelf Province ~ 9 km north-east of Dampier, Western Australia	North West Shelf ~ 35 km to 140 km north of Dampier, Western Australia
Approx. water depth (m)	Up to 45 m	35-135 m
Timing	Expected to commence around: Q1 2025 Timing: Approximately 80 days over 5-year period of the EP.	Expected to commence around: Q1 2025 Timing: Approximately 100 days over 5-year period of the EP.
Operational areas / Exclusionary zones	Temporary 500 m safety exclusion zone will apply around the project vessels conducting survey activities in the State and Commonwealth Operational Areas to manage vessel movements.	

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environmental Plans		
Vessels	Multi-purpose project vessel, supply vessel, jack-up barge supported by small tug or multi cat, smaller craft for nearshore, uncrewed surface vessels.	Multi-purpose project vessel, supply vessel, geotechnical drilling vessel, uncrewed surface vessels.
Fisheries	Active in the State Operational Area: none	Active in the Commonwealth Operational Area: none Active in the Commonwealth EMBA: North-West Slope Trawl Fishery

management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Please also find attached a vessel density map and a GIS Shape File.
Please note that Woodside will:

- Notify the AHO no less than 4 weeks before operations commence,
- Notify AMSA's JRCC at least 24-48 hours before operations commence,
- Notify AMSA's JRCC when operations end,
- Provide updates to both the AHO and AMSA on any material changes to planned activities,
- Ensure vessels exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea,
- Evaluate and implement adequate anti-collision measures including but not limited to installation of Automatic Identification System (AIS) units, offshore guard vessel/s that can monitor traffic, and additional warnings and/or lights to attract attention.

Biosecurity

With respect to the biosecurity matters, please note the following information below:

Operational Area:
The Operational Area is located within the North-west Marine Region (NWMR) in State water depths of up to 45 m deep, and in Commonwealth water depths between 35 m to 135 m on the continental shelf. The bathymetry within the Operational Area is generally flat, which is consistent with the broader NWS Province shelf region.

Potential IMS risk	IMS risk mitigation management

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Accidental introduction and establishment of invasive marine species (IMS)	Vessels are required to comply with the Australian Biosecurity Act 2015, specifically the Australian Ballast Water Management Requirements as defined under the Biosecurity Act 2015 (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing IMS. Vessels will be assessed and managed to prevent the introduction of invasive marine species in accordance with Woodside's Invasive Marine Species Management Plan. Woodside's Invasive Marine Species Management Plan includes a risk assessment process that is applied to vessels undertaking Activities. Based on the outcomes of each IMS risk assessment, management measures commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced. Woodside notes the specified timeframes for pre-arrival reporting using the Maritime and Aircraft Reporting System (MARS), and for submission of the supplied "Questionnaire for Biosecurity Exemptions for Biosecurity Control Determination". Woodside works closely with our suppliers and contractors to address the risks and assure awareness of the obligations outlined above.

Feedback:
If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.
Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)
Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.
NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.14 Email to Department of Defence (DoD) - 8 July 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview

For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.

Environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

Consultation information

A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Please also find attached a defence area map in the areas surrounding the Operational Area.

Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environmental Plans		
Approx. water depth (m)	Up to 45 m	35-135 m
Timing	Expected to commence around: Q1 2025 Timing: Approximately 80 days over 5-year period of the EP.	Expected to commence around: Q1 2025 Timing: Approximately 100 days over 5-year period of the EP.
Operational areas / Exclusionary zones	Temporary 500 m safety exclusion zone will apply around the project vessels conducting survey activities in the State and Commonwealth Operational Areas to manage vessel movements.	
Vessels	Multi-purpose project vessel, supply vessel, jack-up barge supported by small tug or multi cat, smaller craft for nearshore, uncrewed surface vessels.	Multi-purpose project vessel, supply vessel, geotechnical drilling vessel, uncrewed surface vessels.

Feedback:
If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.
Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)
Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.
NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.
Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.15 Email to Department of Primary Industries and Regional Development (DPIRD) - 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.
The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.
Exclusionary / Cautionary Zones
Temporary 500 m exclusion zone around vessels conducting survey activities to manage vessel movements.
No restrictions to other vessels within the Operational Area apart from being advised to take care during the survey vessel activities.

Environment that may be affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.
The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.
Consultation information
A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Fisheries	Active in the State Operational Area: none	Active in the Commonwealth Operational Area: none Active in the Commonwealth EMBA: North-West Slope Trawl Fishery

Biosecurity
With respect to the biosecurity matters, please note the following information below:

Operational Area:

The Operational Area is located within the North-west Marine Region (NWMR) in State water depths of up to 45 m deep, and in Commonwealth water depths between 35 m to 135 m on the continental shelf. The bathymetry within the Operational Area is generally flat, which is consistent with the broader NWS Province shelf region.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Potential IMS risk	IMS risk mitigation management
Accidental introduction and establishment of invasive marine species (IMS)	Vessels are required to comply with the Australian Biosecurity Act 2015, specifically the Australian Ballast Water Management Requirements as defined under the Biosecurity Act 2015 (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing IMS. Vessels will be assessed and managed to prevent the introduction of invasive marine species in accordance with Woodside's Invasive Marine Species Management Plan. Woodside's Invasive Marine Species Management Plan includes a risk assessment process that is applied to vessels undertaking Activities. Based on the outcomes of each IMS risk assessment, management measures commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced. Woodside notes the specified timeframes for pre-arrival reporting using the Maritime and Aircraft Reporting System (MARS), and for submission of the supplied "Questionnaire for Biosecurity Exemptions for Biosecurity Control Determination". Woodside works closely with our suppliers and contractors to address the risks and assure awareness of the obligations outlined above.

Feedback:
If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.
Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)
Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.
NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.20 Email to Department of Climate Change, Energy, the Environment and Water (DCCEEW) - 9 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.
The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.
Environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.
The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.
Consultation information
A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Please also find attached the details of commonwealth shipwrecks that are relevant for this EP.

Activity: Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans

Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environmental Plans		
Summary	Series of geophysical and geotechnical surveys to provide data to support the GHG activity program, inform design of the Angel CCS Project and support baselines studies to provide data on existing infrastructure and potential future activities.	
	State	Commonwealth
Permit Area	Vacant acreage	Vacant acreage, G-10-AP, WA-3-L, WA-4-L, WA-9-L, WA-52-L, WA-28-P, WA-1-L, G-9-AP, WA-

Angel CCS Geophysical and Geotechnical Surveys Commonwealth and State Environmental Plans		
		208-P, Vacant acreage release area W22-4
Location	North West Shelf Province ~ 9 km north-east of Dampier, Western Australia	North West Shelf ~ 35 km to 140 km north of Dampier, Western Australia
Approx. water depth (m)	Up to 45 m	35-135 m
Timing	Expected to commence around: Q1 2025 Timing: Approximately 80 days over 5-year period of the EP.	Expected to commence around: Q1 2025 Timing: Approximately 100 days over 5-year period of the EP.
Operational areas / Exclusionary zones	Temporary 500 m safety exclusion zone will apply around the project vessels conducting survey activities in the State and Commonwealth Operational Areas to manage vessel movements.	
Vessels	Multi-purpose project vessel, supply vessel, jack-up barge supported by small tug or multi cat, smaller craft for nearshore, uncrewed surface vessels.	Multi-purpose project vessel, supply vessel, geotechnical drilling vessel, uncrewed surface vessels.

Feedback:
If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.
Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)
Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.
NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.
Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.21 Email to Director of National Parks − 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Australian Marine Parks (AMPs)

We note Australian Government Guidance on consultation activities and confirm that:

- The proposed activities are outside the boundaries of a proclaimed Australian Marine Park (AMP), with Commonwealth Operational Area located ~9 km west of the Commonwealth boundary of the Dampier Marine Park. The borrow ground is adjacent to the Dampier Habitat Protection Zone. The Murujuga National Park is adjacent to the State Operational Area.
- We have assessed potential risks to AMPs in the development of the proposed EPs and consider that there are no credible risks as part of planned activities that have potential to impact the values of the AMPs.
- The worst-case credible spill scenario assessed for the EPs is the highly unlikely event of a vessel collision resulting in a release of marine diesel. Through review of hydrocarbon spill modelling, and with consideration of a 50 ppb dissolved and 100 ppb entrained hydrocarbon threshold, the Dampier Marine Park may be contacted in the event of a spill. A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities, which will include notification to relevant agencies and organisations as to the nature and scale of the event, as soon as practicable following an occurrence. The Director of National Parks will be advised if an environmental incident occurs that may impact on the values of the AMP.

Woodside is aware of and will consider the 'Petroleum Activities and Australian Marine Parks' guidance note developed and published jointly by DNP and NOPSEMA, while preparing this EP to ensure that the EP:

Identifies and manages all impacts and risks on AMP values (including ecosystem values) to an acceptable level and has considered all options to avoid or reduce them to as low as reasonably practicable (ALARP),

Clearly demonstrates that the activities will not be inconsistent with the North-west Marine Parks Network Management Plan 2018.

If there is a change in activities which results in an overlap or new impact to a marine park Woodside will notify DNP.

Feedback:

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)

NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.
Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.1.22 Email to North West Slope Trawl Fishery, Commonwealth Fisheries Association (CFA) – 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.
The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.
Exclusionary / Cautionary Zones
Temporary 500 m exclusion zone around vessels conducting survey activities to manage vessel movements.
No restrictions to other vessels within the Operational Area apart from being advised to take care during the survey vessel activities.

Environment that may be affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.
The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

Dear Recreational Marine user

Woodside is planning to submit the **Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.**

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO_2) gathering system, collecting CO_2 via new pipelines from emitters onshore or through imported options via ships. Collected CO_2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.

Exclusionary / Cautionary Zones

- Temporary 500 m exclusion zone around vessels conducting survey activities to manage vessel movements.
- No restrictions to other vessels within the Operational Area apart from being advised to take care during the survey vessel activities.

Environment that may be affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

Consultation information
A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter *Let's Talk – Our Plans, Your Say* and to receive updates on our consultation activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	State	**Commonwealth**
Permit Area	Vacant acreage	Vacant acreage, G-10-AP, WA-3-L, WA-4-L, WA-9-L, WA-52-L, WA-28-P, WA-1-L, G-9-AP, WA-208-P, Vacant acreage release area W22-4
Location	North West Shelf Province ~ 9 km north-east of Dampier, Western Australia	North West Shelf ~ 35 km to 140 km north of Dampier, Western Australia
Approx. water depth (m)	Up to 45 m	35-135 m
Timing	Expected to commence around: Q1 2025 Timing: Approximately 80 days over 5-year period of the EP.	Expected to commence around: Q1 2025 Timing: Approximately 100 days over 5-year period of the EP.
Operational areas / Exclusionary zones	Temporary 500 m safety exclusion zone will apply around the project vessels conducting survey activities in the State and Commonwealth Operational Areas to manage vessel movements.	
Vessels	Multi-purpose project vessel, supply vessel, jack-up barge supported by small tug or multi cat, smaller craft for nearshore, uncrewed surface vessels.	Multi-purpose project vessel, supply vessel, geotechnical drilling vessel, uncrewed surface vessels.

Feedback:

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by **9 August 2024.**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

211059 - 1

Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth).* The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA).* Both support other regulatory processes associated with the planned activities (which may or may not be confidential)

NOPSEMA has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. It can be accessed online through the QR code provided below.

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit https://woodside.com/what-we-do/consultation-activities.

Regards

6.1.27 Email to Chevron − 8 July 2024

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.
The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.
Environment that may be affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.
The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.
Consultation information
A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe to our newsletter Let's Talk – Our Plans, Your Say and to receive updates on our consultation activities.

Please also find attached GIS Shape files.

6.1.32 Email to Murujuga Aboriginal Corporation – 9 July 2024

Hi [Individual 2]

Woodside is seeking feedback from Murujuga Aboriginal Corporation about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

The purpose of this email is to:

- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with your members.

What Woodside plans to do

Woodside is planning a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environment Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).

Woodside would welcome the opportunity to speak with Elders, office holders and other interested parties about this activity. We are also keen to build on our relationship with Murujuga Aboriginal Corporation to make it easier for you to contribute to other EPs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please let us know how you would like us to consult with you and if you require any specific support or information. This includes meeting with you face-to-face.

Feedback

If you have feedback specific to this EP, please email us at Feedback@woodside.com or call 1800 442 977 by **9 August 2024.**

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you have information that you do not wish to be published, please let us know so we can inform NOPSEMA and DEMIRS.

Further information about NOPSEMA

Feedback can also be submitted directly to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) via email communications@nopsema.gov.au or telephone (08) 6188 8700.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs.

Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Further information about DEMIRS

EPs that relate to activities within WA's Waters will be submitted to the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) for acceptance in accordance with the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA).*

*P*lease feel free to forward this email and the attached document to members of the Murujuga Aboriginal Corporation, Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards,

6.1.33 Email to Ngarluma Aboriginal Corporation – 12 July 2024

Dear [Individual 3]

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside is seeking feedback from Ngarluma Aboriginal Corporation (NAC) about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

The purpose of this email is to:

- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with your members.

What Woodside plans to do

Woodside is planning a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to receive your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environment Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).

Woodside would welcome the opportunity to speak with Elders, office holders and other interested parties about this activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

We understand NAC was considering the establishment of a working group for EP consultations. Please let us know if this has been established or alternatively, let us know how you would like us to consult with you and if you require any specific support or information.

Feedback
If you have feedback specific to this EP, please email us at Feedback@woodside.com or call 1800 442 977 by **12 August 2024.**

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you have information that you do not wish to be published, please let us know so we can inform NOPSEMA and DEMIRS.

Further information about NOPSEMA

Feedback can also be submitted directly to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) via email communications@nopsema.gov.au or telephone (08) 6188 8700.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs.

Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Further information about DEMIRS
EPs that relate to activities within WA's Waters will be submitted to the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) for acceptance in accordance with the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA).*

Please feel free to forward this email and the attached document to the NAC Board, it's members and any other people and organisations who may be interested.

I look forward to hearing from you.

Kind regards

6.1.34 Email to Robe River Kuruma Aboriginal Corporation – 8 July 2024

Dear [Individual 4] (& [Individual 5]),

We have another EP that is relevant to RRKAC that I wanted to send through. I have spoken to the team, and they are going to get back to me this week on the Sea mapping Project. It looks like

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

there are a few groups interested so we are looking at options and how best we can support everyone. I'll let you know the outcome from these discussions later in the week.

Woodside is seeking feedback from **Robe River Kurama Aboriginal Corporation** about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

The purpose of this email is to:

- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with your members.

What Woodside plans to do

Woodside is planning a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environment Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).

Woodside would welcome the opportunity to speak with Elders, office holders and other interested parties about this activity. We are also keen to build on our relationship with **Robe River Kurama Aboriginal Corporation** to make it easier for you to contribute to other EPs.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please let us know how you would like us to consult with you and if you require any specific support or information. This includes meeting with you face-to-face.

Feedback

If you have feedback specific to this EP, please email us at Feedback@woodside.com or call 1800 442 977 by **9 August 2024.**

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you have information that you do not wish to be published, please let us know so we can inform NOPSEMA and DEMIRS.

Further information about NOPSEMA

Feedback can also be submitted directly to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) via email communications@nopsema.gov.au or telephone (08) 6188 8700.

6.1.37 Email to Kimberley Land Council – 9 July 2024

Hi [Individual 8]

I hope all is well.

Woodside is seeking feedback from Kimberley Land Council about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The purpose of this email is to:

- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with your members.

What Woodside plans to do

Woodside is planning a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to know, understand and gather your feedback about the following:

2. How could these activities impact your cultural values, interests, and activities?
3. Does protecting the environment do enough to protect your cultural values?
4. What are your concerns about the proposed activities and how can we resolve those issues?
5. What other elements should be considered in the Environment Plan?
6. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).
Woodside would welcome the opportunity to speak with Kimberley Land Council, office holders and other interested parties about this activity.

Please let us know how you would like us to consult with you and if you require any specific support or information. This includes meeting with you face-to-face.

Feedback

If you have feedback specific to this EP, please email us at Feedback@woodside.com or call 1800 442 977 by **9 August 2024.**

6.1.38 Email to Yamatji Marlpa Aboriginal Corporation – 8 July 2024

Hi [Individual 9],

Woodside is seeking feedback from **Yamatji Marlpa Aboriginal Corporation (YMAC)** about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

The purpose of this email is to:

- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with your members.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

What Woodside plans to do

Woodside is planning a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to know, understand and gather your feedback about the following:

4. How could these activities impact your cultural values, interests, and activities?
5. Does protecting the environment do enough to protect your cultural values?
6. What are your concerns about the proposed activities and how can we resolve those issues?
7. What other elements should be considered in the Environment Plan?
8. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).

Woodside would welcome the opportunity to speak with Elders, office holders and other interested parties about this activity. We are also keen to build on our relationship with **Yamatji Marlpa Aboriginal Corporation (YMAC)** to make it easier for you to contribute to other EPs.

Please let us know how you would like us to consult with you and if you require any specific support or information. This includes meeting with you face-to-face.

Feedback

If you have feedback specific to this EP, please email us at Feedback@woodside.com or call 1800 442 977 by **9 August 2024.**

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you have information that you do not wish to be published, please let us know so we can inform NOPSEMA and DEMIRS.

6.1.39 Email to Ngarluma Yindjibarndi Foundation Ltd – 8 July 2024

Hi [Individual 7],

Please see below another EP that may be of relevance to the Ngarluma and Yindjibarndi Traditional Owners. Hopefully we can work through the Consultation Agreement discussions soon. In the meantime, please let us know if the community would like more information or an opportunity to provide feedback on the Angel CCS EP.

Woodside is seeking feedback from **Ngarluma Yindjibarndi Foundation Ltd (NYFL)** about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

The purpose of this email is to:

- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you and your members; and/or
- discuss further ways to consult and engage with your members.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

CCS is the process of capturing carbon and storing it underground in geological structures.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to know, understand and gather your feedback about the following:

5. How could these activities impact your cultural values, interests, and activities?
6. Does protecting the environment do enough to protect your cultural values?
7. What are your concerns about the proposed activities and how can we resolve those issues?
8. What other elements should be considered in the Environment Plan?
9. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).

Woodside would welcome the opportunity to speak with Elders, office holders and other interested parties about this activity. We are also keen to build on our relationship with **Ngarluma Yindjibarndi Foundation Ltd (NYFL)** to make it easier for you to contribute to other EPs. Please let us know how you would like us to consult with you and if you require any specific support or information. This includes meeting with you face-to-face.

Feedback

If you have feedback specific to this EP, please email us at Feedback@woodside.com or call 1800 442 977 by **9 August 2024.**

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you have information that you do not wish to be published, please let us know so we can inform NOPSEMA and DEMIRS.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Further information about NOPSEMA

Feedback can also be submitted directly to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) via email communications@nopsema.gov.au or telephone (08) 6188 8700.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs.

Additional sources of information are located on NOPSEMA's website (Document Hub | NOPSEMA) and listed below:

- **Brochure:** Consultation on offshore petroleum environment plans brochure.pdf (nopsema.gov.au)
- **Guideline:** Guideline: Consultation in the course of preparing an environment plan (nopsema.gov.au)
- **Policy:** Draft policy for managing gender-restricted information PL2098.pdf (nopsema.gov.au).

Further information about DEMIRS
EPs that relate to activities within WA's Waters will be submitted to the Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) for acceptance in accordance with the *Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA).*

*P*lease feel free to forward this email and the attached document to members of the **Ngarluma Yindjibarndi Foundation Ltd (NYFL)** Traditional Owners and other people and organisations who may be interested.

I look forward to your response and please feel free to call and send through guidance on next steps.

Kind regards

[Attachment: Summary Information Sheet and Consultation Information Sheet]

6.1.40 Email to Save Our Songlines – 8 July 2024

Dear [Individual 1],

Woodside is seeking feedback from you and Save our Songlines about its **Angel Carbon and Capture Storage (CCS) Geophysical and Geotechnical Surveys Environment Plan**.

The purpose of this email is to:
- inform you about Woodside's plans for the Angel CCS Project;
- invite you to submit feedback about the activity;
- provide an opportunity to discuss this activity with you; and/or
- discuss further ways to consult and engage with yourself and Save our Songlines.

What Woodside plans to do
Woodside is planning a carbon capture and storage (CCS) project in the North-West of Western Australia (WA).

CCS is the process of capturing carbon and storing it underground in geological structures.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The proposed Angel CCS Project would involve the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters on shore or through imported options via ships. Collected CO2 would then be transported to a central compression facility prior to being transported offshore via subsea pipeline and injected into the subsea geological formation.

To assist with the planning associated with the proposed Angel CCS Project, Woodside is proposing to undertake a series of geophysical and geotechnical surveys in both Commonwealth and State waters. The proposed route for the surveys is from the state waters adjacent to the Karratha Gas Plant (KGP) to the Angel Field, a distance of approximately 140 km.

The surveys are anticipated to commence around Q1, 2025.

The attached Summary Information Sheet provides a high-level overview of the Angel CCS Environment Plan, including the Environment that May Be Affected (EMBA) map. The Consultation Information Sheet provides further details about the activity including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures.

What Woodside is seeking

We are keen to know, understand and gather your feedback about the following:

1. How could these activities impact your cultural values, interests, and activities?
2. Does protecting the environment do enough to protect your cultural values?
3. What are your concerns about the proposed activities and how can we resolve those issues?
4. What other elements should be considered in the Environment Plan?
5. Are there any other individuals, groups, or organisations you think we should talk to?

Your feedback, opinions and comments will be reflected in the EP and considered by the Commonwealth regulator, NOPSEMA, and WA State regulator, DEMIRS (see further information below).

Woodside would welcome the opportunity to speak with Elders, office holders and other interested parties about this activity. We are also keen to build on our relationship with you and Save our Songlines to make it easier for you to contribute to other EPs.

Please let us know how you would like us to consult with you and if you require any specific support or information. This includes meeting with you face-to-face.

Feedback

If you have feedback specific to this EP, please provide this feedback to Feedback@woodside.com or call 1800 442 977 by **9 August 2024.**

It is important to know that we will continue to accept feedback from you for the life of the EP.

If you have information that you do not wish to be published, please let us know so we can inform NOPSEMA and DEMIRS.

Further information about NOPSEMA

Feedback can also be submitted directly to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) via email communications@nopsema.gov.au or telephone (08) 6188 8700.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NOPSEMA has published a brochure titled *Consultation on offshore petroleum environment plans – Information for the community* to help peak bodies, communities and the public understand the requirements and participate in the consultation for Commonwealth EPs.

Petroleum and Exploration (DMPE, formerly DEMIRS), Department of Industry, Sciences and Resources (DISR), Department of Planning, Lands and Heritage (DPLH), Department of Primary Industries and Regional Development (DPIRD), Director of National Parks (DNP), Doctors for the Environment (DEA), Exxon Mobil, Finder Energy, Greenpeace Australia Pacific (GAP), Jadestone Energy, JX Nippon, Karratha & Districts Chamber of Commerce and Industry, Karratha Community Liaison Group, KATO Energy KUFPEC Australia, Longreach Capital Investments/Beagle No. 1, Market Force, Marine Tourism WA, Murdoch University, North West Slope Trawl Fishery, Pilbara Ports, Pilbara/Kimberley Recreational Marine Users, Recfishwest, Santos, Skye Napoleon, Telstra, University Western Australia (UWA), Vocus, Vermillion Oil & Gas, WA Game Fishing Association, Western Australian Museum (WAM), Western Australian Marine Science Institution (WAMSI) − 23 July 2024

Woodside previously consulted you on its plans to submit the Angel CCS Geophysical and Geotechnical Surveys Environment Plans (EPs).

For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.

Information on the EP is provided in the email below and in the Consultation Information Sheet, which is available on Woodside's website.

If you have feedback specific to the activities and the proposed EP, Woodside welcomes it at Feedback@woodside.com or 1800 442 977 by 9 August 2024.

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

6.2.2 Letter sent to Pilbara/Kimberley Recreational Marine Users – 25 July 2024

Please direct all responses/queries to:
Woodside Energy Feedback

Dear Recreational Marine User

Woodside previously consulted you on its plans to submit the Angel CCS Geophysical and Geotechnical Surveys Environment Plans (EPs).

For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO_2) gathering system, collecting CO_2 via new pipelines from emitters onshore or through imported options via ships. Collected CO_2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.

Further information on the proposed activities is provided in the Consultation Information Sheet, which is available via the QR code below:

If you have feedback specific to the activities and the proposed EP, Woodside welcomes it at Feedback@woodside.com or 1800 442 977 by **9 August 2024**.

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)*. Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

Regards,

Woodside Energy Feedback

6.3 2025 Consultation update

6.3.1 2025 Consultation Information Sheet

Woodside Energy

Consultation Information Sheet
October 2025

Angel CCS Geophysical and Geotechnical Surveys Environment Plan

North West Shelf, North-West Australia

Activity Overview

The Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys EP covers:

- Geophysical and geotechnical surveys involving seafloor sampling and scanning.
- Project vessel operations.

The Angel CCS GPGT Surveys will provide data for aspects of the Angel CCS Project, an opportunity identified In the North-West region of Western Australia (WA).

Data from the surveys is intended to inform the design of pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit (MODU) anchoring or jack-up rig placement.

Location

- In Commonwealth waters between approximately 35km and 140km to Dampier (**Figure 1**).

Water depth

- ~35m - 125m deep.

Timing and duration

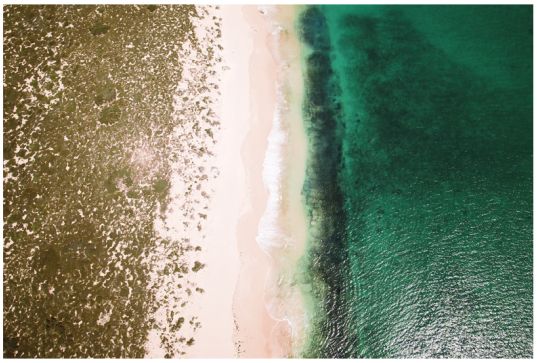
- Survey activities are planned to be conducted as multiple campaigns over the five-year approval period of the EP with activities estimated to start In Q1 2027.
- Duration is estimated to take ~100 days.
- Timing and duration is subject to change due to factors including approvals, weather, project vessel availability, and other unforeseen circumstances.

Joint Venture

- Operator – Woodside Energy Ltd.
- Joint Venture Participants – Woodside Energy Ltd, BP Developments Australia Pty Ltd, Japan Australia LNG (MIMI) Pty Ltd, Shell Australia Pty Ltd, and Chevron Australia Pty Ltd.

We would like to hear from you

We would like relevant persons whose functions, interests or activities may be affected by the proposed activity to have the opportunity to provide feedback on our proposed activity, in accordance with the intended outcome of consultation.



Woodside must consult relevant persons when developing an Environment Plan (EP) to confirm current measures or identify additional measures, which could lessen or avoid potential adverse effects of the proposed activity on the environment.

Woodside aims to ensure the proposed activity is consistent with the principles of ecologically sustainable development, by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and of an acceptable level.

If you are an individual, organisation or community group and believe your functions, interests or activities may be impacted by the activities under this EP, we would like your feedback by **31 October 2025**.

consultation@feedback.woodside.com
Toll free: 1800 442 977
woodside.com

A summary of the activity and location is found in **Table 1** and **2**.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's First Peoples. We acknowledge their connection to land, waters and the environment and pay our respects to ancestors and Elders, past and present. We extend this recognition and respect to First Nations peoples and communities around the world.

1 Angel CCS Geophysical and Geotechnical Surveys EP | October 2025

Activity Location

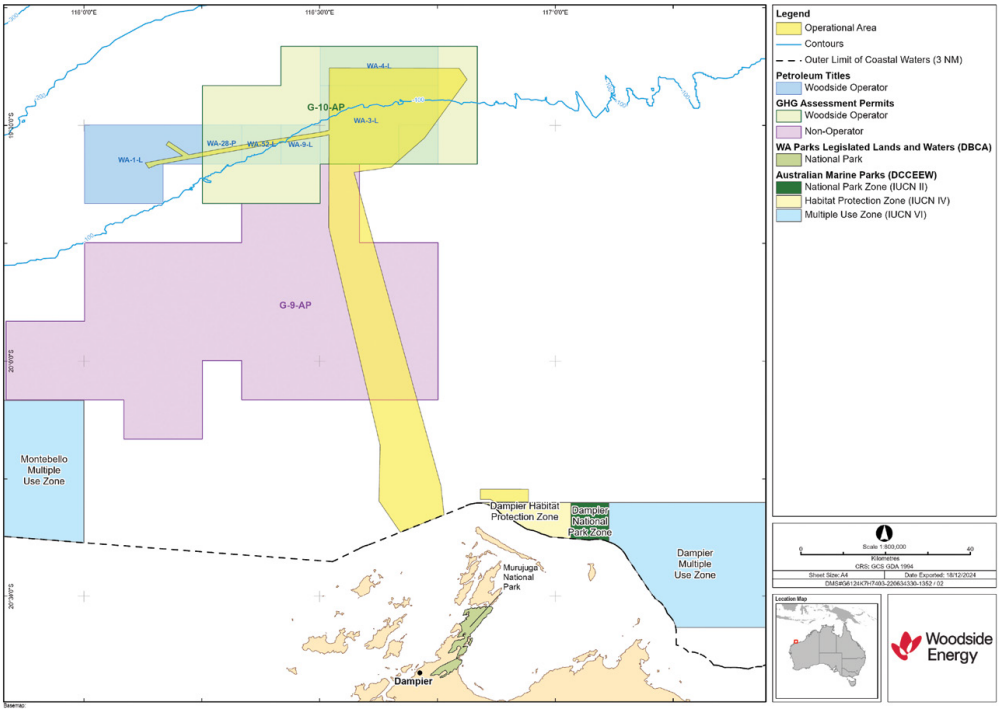

Figure 1. Operational Area for Angel CCS Geophysical and Geotechnical Surveys EP

Table 1 – Activity and Location Summary

Angel CCS Geophysical and Geotechnical Surveys EP	
Activity details	**Geophysical surveys**: • Geophysical surveys in this GPGT Survey Program involve acoustic measurements to characterise the seabed features and sub-seabed sediment types. • Geophysical survey techniques include but are not limited to; multibeam echo sounders, single beam echo sounders, altimeters; side scan sonar; magnetometers; sub-bottom profilers; refraction sub-bottom profiler (including mini airgun). **Geotechnical surveys**: • The geotechnical surveys will be performed using standard industry equipment and will consist of in situ testing and the recovery of soil/rock samples at locations within the Operational Area to ground truth existing geophysical data and provide geotechnical data for engineering design. • Geotechnical survey methods include but are not limited to; box cores/grab samplers; shallow cores and probes: piston cores/gravity cores/vibrocores; drilling core holes; piezocone penetrometer testing. **Other surveys**: • Other surveys using; water samplers; sound velocity sensors and multi-parameter conductivity-temperature-depth profilers (CTDs); ultra-short baseline (USBL) positioning system; doppler velocity log and inertial navigation systems; underwater cameras; underwater laser scanners; remotely operated vehicles (ROVs); autonomous underwater vehicles (AUVs).
Titles	**Operational Area includes operating title G-10-AP (Angel CCS title) and overlapping GHG and petroleum titles**: • Within G-10-AP: A-3-L, WA-4-L, WA-9-L, WA-52-L, WA-28-P *(Woodside as Operator)*. • Outside G-10-AP: *WA-1-L (Woodside as Operator)*, G-9-AP and WA-208-P *(other titleholders' license areas that may be subject to Access Authority and Special Prospecting Authority)*. • Vacant acreage and vacant acreage release area W22-4.
Vessels	• Multi-purpose project vessel, supply vessel, geotechnical drilling vessel, uncrewed surface vessels controlled from a remote operations centre.
Operational area and exclusion zones	• Temporary 500m exclusion zone around vessels conducting survey activities to manage vessel movements. • No restrictions to other vessels within the Operational Area apart from being advised to take care during the survey vessel activities.
Communication with mariners	• A 500m safety exclusion zone will apply around the project vessels conducting survey activities to manage vessel movements. • Commercial fishers and other marine users are permitted to use the Operational Area but should take care around operations by adhering to standard navigation rules and remain clear of the safety exclusion zone. • Marine notices will be issued prior to activity commencement to alert vessels which may be operating in waters nearby.
Distance to nearest marine park/nature reserve	• ~150 m north of Dampier Habitat Protection Zone (borrow ground) • ~7.5 km west of Dampier Habitat Protection Zone

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment that May Be Affected (EMBA)

The EMBA is the largest geographic area where an unplanned event could potentially have an environmental consequence. The broadest extent of the EMBA takes into consideration planned activities and unplanned events. The EMBA was developed combining numerous modelling outputs based on highly unlikely releases of hydrocarbons to the environment. The most credible modelling scenarios that inform the EMBA are based on a hydrocarbon release as a result of a vessel collision. The EMBA is depicted in **Figure 2**.

The EMBA does not represent the extent of the predicted impact of a highly unlikely hydrocarbon release. Rather, the EMBA represents the merged area of many possible paths that a highly unlikely hydrocarbon release could travel, which depends on the weather and ocean conditions at the time of a release. This means that in the highly unlikely event that a hydrocarbon release does occur, the whole EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known if there is a release. To learn more about an EMBA, please see the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) video on oil spill modelling at **www.nopsema.gov.au**.

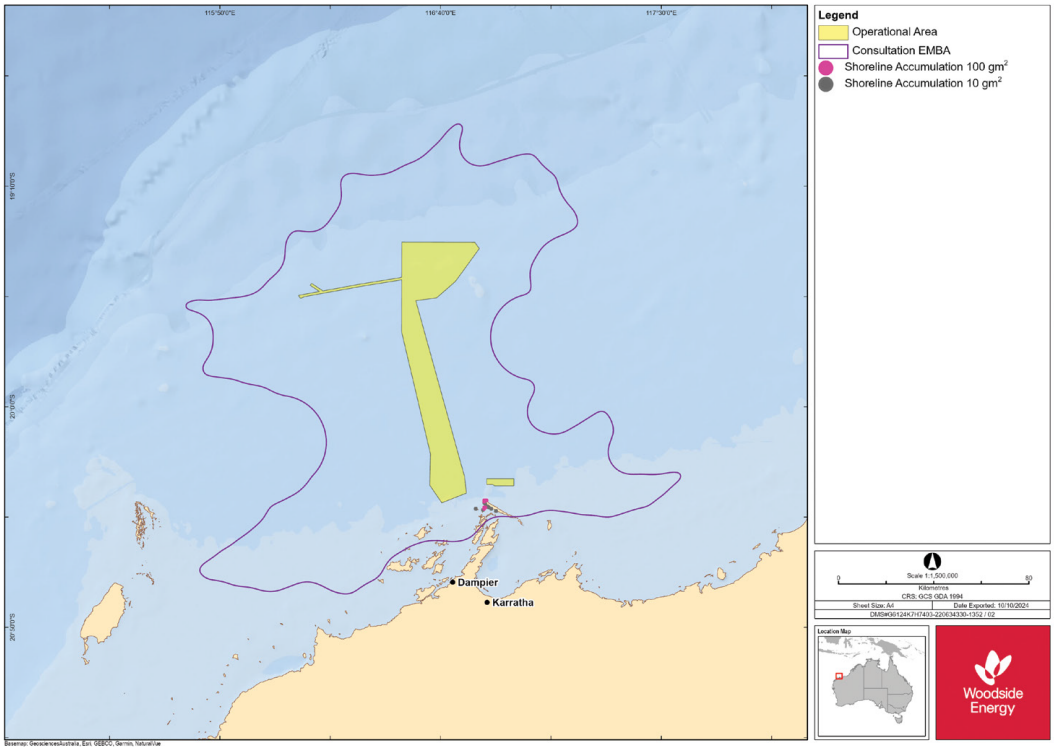

Figure 2. EMBA for Angel CCS Geophysical and Geotechnical Surveys EP

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Impacts/Risks, and Mitigation and/or Management Measures

Woodside assessed the impacts and risks to the environment arising from the planned activities and unplanned events. This assessment considers the timing, duration and location of the activities. Proposed mitigation and management measures are summarised in **Table 3**. Further details will be provided in the EP.

In preparing the EP, Woodside's intent is to minimise environmental, social and cultural impacts and risks associated with the proposed activities, and Woodside seeks your feedback to inform our decision-making.

Table 3 – Summary of key impacts and risks and proposed management measures

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Planned activities (routine and non-routine)			
Physical presence: ***interaction with other marine users***	• The physical presence and movement of project vessels within the Operational Area has the potential to interfere with/ displace other marine users. • The following vessels will be involved in survey activities: - multi-purpose project vessels - geotechnical vessels (geotechnical drilling vessels) - uncrewed surface vessels (USVs). • Survey activities are planned to be conducted as multiple campaigns over the five-year approval period of the EP (2026 – 2030).	• Displacement of commercial fishing activities and commercial shipping vessels. • Other marine users may be present in the Operational Area. These include recreational fishing areas, tourism, and commercial shipping fairways. • Due to the localised nature of the activity, any displacement is expected to be negligible with no lasting effect.	• Establish a temporary 500 m safety exclusion zone around the project vessels which is communicated to marine users. • Vessels to adhere to the navigation safety requirements including the Navigation Act 2012 and any subsequent Marine Orders. • Notify Australian Hydrographic Office (AHO) of activities and movements. • Notify relevant government departments, fishing industry representative bodies and licence holders (where requested during consultation) of activities. • Consult with marine users so they are informed of the proposed activities.
Physical presence: ***disturbance to seabed from geotechnical and geophysical surveys***	• Geotechnical survey activities are likely to result in localised and temporary physical modification and disturbance to a small area of the seabed. • The source of impact from geotechnical surveys are: - box cores/grab samplers - shallow cores and probes: piston/ gravity/vibrocores - cored bore holes - penetrometer testing (CPT/PCPT/CPTu). • The geotechnical seabed coring may result in the indirect discharge of a small quantity of drill cuttings and fluid at the seafloor. • Placing the geotechnical equipment on the seafloor will result in minor localised physical disturbance to the seafloor beneath the equipment.	• Environmental values potentially impacted: - seabed habitat - key ecological features (KEFs) - marine primary producers - cultural heritage. • The Operational Area is expected to consist mainly of sandy substrate. • The Operational Area overlaps the Ancient Coastline and Glomar Shoal Key Ecological Features (KEFs). • Activities will be localised and of short duration, physical impacts to the seabed are expected to be negligible.	• No routine anchoring will occur during surveys. • Monitor inventory deployed to the field and track removal of equipment during activity. • Chemicals will be selected with the lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. No seabed disturbance will occur on shoals within the Operational Area. • An Unexpected Finds Procedure will be in place in the event of the discovery of what appears to be Underwater Cultural Heritage. • Desktop heritage assessment prior to starting the activities. • Comply with regulatory requirements for Underwater Cultural Heritage.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Routine acoustic emissions: ***generation of noise from survey vessels, and from geophysical and geotechnical survey equipment***	• Generation of underwater noise from project vessels. • Generation of acoustic signals from dynamic positioning systems. • The key sound sources during geotechnical surveys include the penetration tests and sampling boreholes undertaken at the seabed. • Underwater noise generated by geophysical sources during surveys and positioning equipment (transponders).	• Elevated underwater noise may affect marine fauna, including marine mammals, turtles and fish in three main ways: 1. By causing direct physical effects, including injury or hearing impairment. Hearing impairment may be temporary or permanent. 2. Through disturbance leading to behavioural changes or displacement from important areas. The occurrence and intensity of disturbance is highly variable and depends on a range of factors rating to the animal and situation. 3. By masking or interfering with other biologically important sounds (including vocal communication, echolocation, signals and sounds produced by predators or prey). • The frequency of the transponders is at the upper limit of the bandwidth of low frequency cetaceans. Low frequency cetaceans such as pygmy blue whales are therefore unlikely to be impacted by sound generated from the transponders. • The continuous noise generated by vessels is not expected to cause temporary or permanent change in hearing sensitivity to cetaceans due to the level of exposure required to trigger this. Impacts may relate to temporary behavioural changes such as avoidance with no lasting effect. • Biologically Important Areas (BIAs) overlapping the Operational Area include the pygmy blue whale distribution BIA, the humpback whale migration BIA. • The Operational Area overlaps internesting buffers for the hawksbill, loggerhead, green turtles and flatback turtles. Marine turtles may avoid the low-frequency sounds generated by vessel noise. • The Operational Area overlaps a foraging BIA for whale sharks however as the thresholds for impacts are higher than the noise generated by the activities, impacts are not expected.	• Comply with EPBC Regulations 2000 Part 8 Division 8.1 for interactions with marine fauna. • Comply with Biodiversity Conservation Regulations 2018 for whale sharks. • Project vessels will not travel greater than 6 knots within 300 m of a turtle (caution zone). If the turtle shows signs of being disturbed, project vessels will immediately withdraw from the caution zone at a constant speed of less than 6 knots. • Start-up of geophysical survey equipment will be delayed if a whale is sighted within the observation zone (150 m). • Implementation of an observation zone for 30 minutes prior to start up around geophysical survey equipment.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Routine and non-routine discharges: ***from survey vessels***	• Routine discharge of sewage, grey water and putrescible wastes to marine environment from project vessels. • Routine discharge of deck and bilge water to marine environment from project vessels.	• The main impact associated with ocean disposal of sewage and other organic wastes (i.e., putrescible waste) is eutrophication. Eutrophication occurs when the addition of nutrients, such as nitrates and phosphates, causes adverse changes to the ecosystem including short-term, localised impacts to water quality. • No significant impacts are expected to water quality from planned discharges because of the minor quantities involved, the expected localised mixing zone, and the high level of dilution into the open water marine environment of the Operational Area. • Similarly, although some marine fauna may transit the Operational Area, potential for impacts remains low due to the localised nature of discharges and rapid dilution.	• Vessel discharges will be managed according to regulatory requirements. • Chemicals will be selected with the lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process.
Routine and non-routine discharges: ***drill cuttings and drilling fluids during geotechnical drilling***	• Drill cuttings and fluids will be discharged at the borehole location during geotechnical seabed coring. • Drilling fluid will consist primarily of seawater and may include low-toxicity additives.	• Geotechnical survey activities are likely to result in localised and temporary physical modification and disturbance to a small area of the seabed. Potential impacts include: - localised reduction in water and sediment quality - loss or damage to benthic habitats. • The Operational Area overlaps with the Ancient Coastline KEF and Glomar Shoals KEFs. Impacts to benthic marine fauna as a result of geotechnical surveying are expected to be highly localised to surface area of the borehole, drill cuttings and the footprint of the geotechnical equipment, which is a relatively small area compared to the regional extent of the Ancient Coastline KEF.	• All chemicals intended or likely to be discharged into the marine environment reduced to as low as reasonably practicable (ALARP) using Woodside's chemical assessment process.
Routine light emissions: ***external lighting on survey vessels***	• Project vessels will use external lighting to navigate and conduct safe operations at night, including to maintain good night visibility for crew members and to communicate the vessel's presence to other marine users.	• Light emissions may affect fauna (such as marine turtles and birds) in two main ways: 1. Behaviour: artificial lighting has the potential to create a constant level of light at night that can override natural levels and cycles. 2. Orientation: if an artificial light source is brighter than a natural source, the artificial light may override natural cues, leading to disorientation. • The Operational Area overlaps internesting buffers for the hawksbill, loggerhead, green turtles and flatback turtles. The Operational Area supports several breeding BIAs for the wedge-tailed shearwater, roseate tern, and fairy terns.	• Implementation of the Woodside Offshore Seabird Management Plan. • Lighting will be limited to the minimum required for navigation and safe operational requirements, with the exception of emergency events.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Routine and non-routine: ***atmospheric and GHG emissions***	• Atmospheric emissions and GHG emissions associated with project vessels. • Emissions are generated from internal combustion engines, machinery, and incinerators on vessels.	• Emissions associated with project vessels and could result in temporary, localised reductions in air quality in the immediate vicinity. • The exposed location of the project vessels is expected to result in the rapid dispersion of the low volumes of atmospheric emissions, as such the potential impacts are expected to be localised and of no lasting effect.	• Comply with regulatory requirements for GHG emissions reporting. • Vessel operations planned, where practicable, to minimise fuel consumption and associated GHG/ air emissions. • Fuel types will be selected to reduce expected GHG emissions (I.e., Project vessels will not use heavy fuel oil (HFO) or intermediate fuel oil (IFO)).
Unplanned events (accidents / incidents)			
Accidental introduction of invasive marine species (IMS)	• Project vessels have the potential to introduce IMS to the Operational Area through marine biofouling (containing IMS) on vessels, as well as within high risk ballast water exchange. • There is also a remote potential that cross contamination between vessels can also occur (such as IMS translocated between project vessels) or onto benthic habitat within shallower areas.	• It is not credible for IMS to be introduced and establish on the seabed or subsea structures in the Operational Area as these deep waters are not conducive to the settlement and establishment of IMS. • Given the low likelihood of IMS translocation to and colonisation within the Operational Area, project activities are unlikely to result in establishment of IMS, and as such will not adversely affect other marine user activities in the region.	• Project vessels will manage their ballast water using one of the approved ballast water management options, as outlined in the Australian Ballast Water Management Requirements. • Woodside's IMS risk assessment process will be applied to project vessels and immersible equipment undertaking the activities.
Unplanned interaction with marine fauna	• Vessel movements have the potential to result in collisions between project vessel (hull and propellers) and marine fauna. • Project vessels would typically be stationary or moving at low speeds when supporting the survey activities.	• BIAs overlapping the Operational Area include the pygmy blue whale distribution BIA, the humpback whale migration BIA, marine turtle internesting buffers, internesting, foraging, migration corridors, mating, and nesting BIAs, marine turtle critical habitat areas, and the whale shark foraging BIA. • Given the adopted controls, it is considered that if a collision or entanglement were to occur, it will not result in a potential impact greater than a localised impact to environmental receptors, with no lasting effect to marine fauna populations.	• Comply with EPBC Regulations 2000 - Part 8 Division 8.1 Interacting with Cetaceans to reduce the likelihood of an accidental collision occurring.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Physical presence: ***disturbance to seabed from dropped objects, equipment loss***	• Dropped objects resulting in the disturbance of seabed habitat.	• Unplanned seabed disturbance may result in localised changes to water and sediment quality or a localised temporary impact to benthic communities and is therefore considered to present a negligible risk. • Potential impacts to KEFs which intersect the Operational Area are considered to have a temporary disruption and no lasting effects to a small area of the seabed, as they would be limited to the footprint of a dropped object resulting in potential highly localised and temporary change in habitat. Dropped objects within the Ancient Landscape could impact cultural heritage associated with this area, however, this would also comprise a small area.	• Project vessel inductions include control measures for dropped object prevention. • Dropped objects and geophysical/ geotechnical equipment to be recovered and relocated where safe and practicable to do so. • Apply safe work procedures to prevent dropped objects from survey vessels and during deployment and retrieval of equipment.
Unplanned discharges: ***loss of solid hazardous and non-hazardous wastes/ equipment***	• Accidental discharge of hydrocarbons/ chemicals from project vessels deck activities and equipment, from subsea ROV hydraulic leaks. • Unplanned release of chemicals or hydraulic fluid due to failure of subsea equipment. • Accidental loss of hazardous or nonhazardous solid wastes / equipment to the marine environment.	• The potential impacts of hazardous or non-hazardous solid wastes and equipment accidentally discharged to the marine environment include contamination of the environment as well as secondary impacts relating to potential contact of marine fauna with wastes.	• Comply with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes (i.e., Marine Orders 95 and 94). • Implementation of vessel waste management plans. • Solid waste/equipment dropped to the marine environment is to be recovered where safe and practicable to do so.
Unplanned discharges: ***deck and subsea spills from geotechnical and geophysical survey vessels and equipment***	• Accidental discharge to the ocean of other hydrocarbons/ chemicals/ geotechnical drilling fluids from project vessels deck activities and equipment (e.g., cranes). • Unplanned release of chemicals or hydraulic fluid due to failure of geotechnical and geophysical survey equipment.	• Unplanned discharges of non-process chemicals and hydrocarbons may decrease the water quality in the immediate vicinity of the release. Only small volumes are anticipated, resulting in very short-term impacts to water quality, limited to the immediate release location. • As a result of a change in water quality, further impacts to receptors may occur, however impacts to marine fauna are expected to be limited to temporary irritation of sensitive membranes to individuals and are considered slight or less (negligible).	• Comply with regulatory requirements for the prevention of marine pollution for project vessels. • Liquid chemical and fuel storage areas are bunded or secondarily contained when they are not being handled/moved temporarily on project vessels. • Spill kits positioned in high-risk locations around the vessels (near potential spill points such as transfer stations). • Chemicals will be selected with the lowest reasonably practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Impact/Risk	Description of Source of Impact/Risk	Description of Impact/Risk	Proposed Mitigation and/or Management Measure
Unplanned hydrocarbon release: ***vessel collision***	• Vessels will use marine diesel fuel, meaning a collision involving a project vessel or third-party vessel during the activity may result in the release of marine diesel. • For an interaction to result in the worse-case scenario diesel release, several factors must occur: - Vessel interaction must result in a collision. - The collision has enough force to penetrate the vessel hull and must occur in the location of a fuel tank. • The fuel tank must have a sufficient amount of fuel so that the liquid level is higher than the point of damage.	• In the highly unlikely event of a vessel collision causing a release of hydrocarbon, impact to water quality and marine ecosystems could occur. • Marine diesel is a relatively volatile, non-persistent hydrocarbon. If released to the environment, up to approximately 40% evaporates within the first 24 hours. • In the event of a hydrocarbon release, potential impacts across the EMBA will be assessed including receptors such as plankton, fish, marine turtles, marine mammals, seabirds and migratory shorebirds, marine primary producers, tourism, recreation, commercial fisheries, commercial shipping and cultural heritage. • Considering receptor sensitivity, potential loss of containment volume(s) and potential spill locations, most receptors are expected to be rated as having a potential consequence level of 'Minor' or less (Slight or Negligible).	**Preventing marine vessel collisions**: • Comply with regulatory requirements for navigational safety and prevention of vessel collisions. • Notify relevant government departments, fishing industry representative bodies and licence holders of activities prior to commencement and on completion of activities. • Establish temporary exclusion zones around vessels which are communicated to marine users to reduce the likelihood of collision. • A management plan for simultaneous operations is in place when working in vicinity of other Woodside operations/activities. **Spill response arrangements**: • Arrangements supporting the Oil Pollution Emergency Plan (OPEP) will be tested so that the OPEP can be implemented as planned. • Emergency response activities would be implemented in line with the OPEP.

**These mitigation and management measures are subject to change through the consultation and subsequent assessment process and may not represent content in the publicly available EP or in the final plan once accepted.*

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for greenhouse gas activities.

If you would like to comment on the proposed activities outlined in this information sheet, please provide feedback to Woodside by **31 October 2025** via:

consultation@feedback.woodside.com
Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:
woodside.com/what-we-do/consultation-activities

Please note that stakeholder feedback will be communicated to NOPSEMA as required under legislation. Woodside will communicate any material changes to the proposed activity to affected relevant persons as relevant and appropriate.

Your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit:
woodside.com/what-we-do/consultation-activities

6.3.2 2025 Summary Information Sheet

Woodside Energy

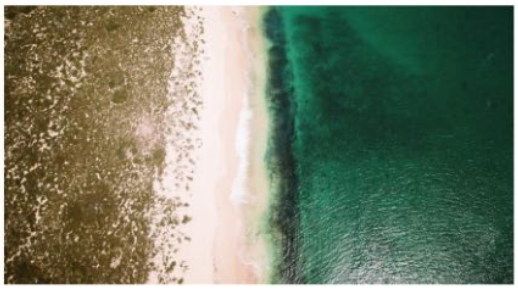
Summary Consultation Information Sheet
October 2025

Angel CCS Geophysical and Geotechnical Surveys Commonwealth Environment Plan

North West Shelf, North-West Australia

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's First Peoples. We acknowledge their connection to land, waters and the environment and pay our respects to ancestors and Elders, past and present. We extend this recognition and respect to First Nations peoples and communities around the world.

Have Your Say



We want to talk, share ideas, and yarn with local community who have a deep connection to the land and sea. Your knowledge helps us do our work better!

We want to understand the environments we want to work in. We want to work in a way which manages the environmental impacts and risks of the activities appropriately. By working together, we want to help protect cultural heritage and keep the Land and Sea Country healthy.

We welcome feedback from First Nations communities and stakeholders whose functions, interests and activities may be affected by our activities under this Environment Plan (EP). If you'd like to share your views, please contact us before **31 October 2025**.

Email: **feedback@woodside.com**
Call: **1800 442 977 (toll-free)**
Visit: **woodside.com/what-we-do/consultation-activities**

Your feedback will be included in our EP submissions to NOPSEMA (National Offshore Petroleum Safety and Environmental Management Authority) and will help guide responsible environmental decision-making.

Activity Overview

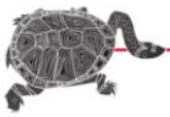
The Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys EP covers Geophysical and geotechnical surveys involving seafloor sampling and scanning and project vessel operations.

Data from the surveys is intended to inform the design of pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit (MODU) anchoring or jack-up rig placement.

Location

- In Commonwealth waters between approximately 35km and 140km to Dampier.

Water depth



- ~ 35m - 125m deep.

Timing and duration

- Estimated to start In Q1 2027.
- Duration is estimated to take ~ 100 days, planned over multiple campaigns during the five-year approved period of the EP.
- Timing and duration is subject to change due to factors including, approvals, weather, project vessel availability, and other unforeseen circumstances.

Joint Venture

- Operator – Woodside Energy Ltd.
- Joint Venture Participants – Woodside Energy Ltd, BP Developments Australia Pty Ltd, Japan Australia LNG (MIMI) Pty Ltd, Shell Australia Pty Ltd, and Chevron Australia Pty Ltd.

Angel CCS GPGT Surveys EP | October 2025

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Activity Location

The EP explains how Woodside will manage environmental risks and impacts while carrying out our activities. These plans help us conduct operations safely and responsibly, with respect for the environment and cultural heritage. The location where the work will be done is known as the Operational Area (**Figure 1**).

Woodside must consult with relevant persons, including Traditional Custodian groups whose functions, interests or activities may be affected by the activities to be carried out under the EP or that are considered relevant, to listen to concerns and, where required, incorporate feedback into the EP.

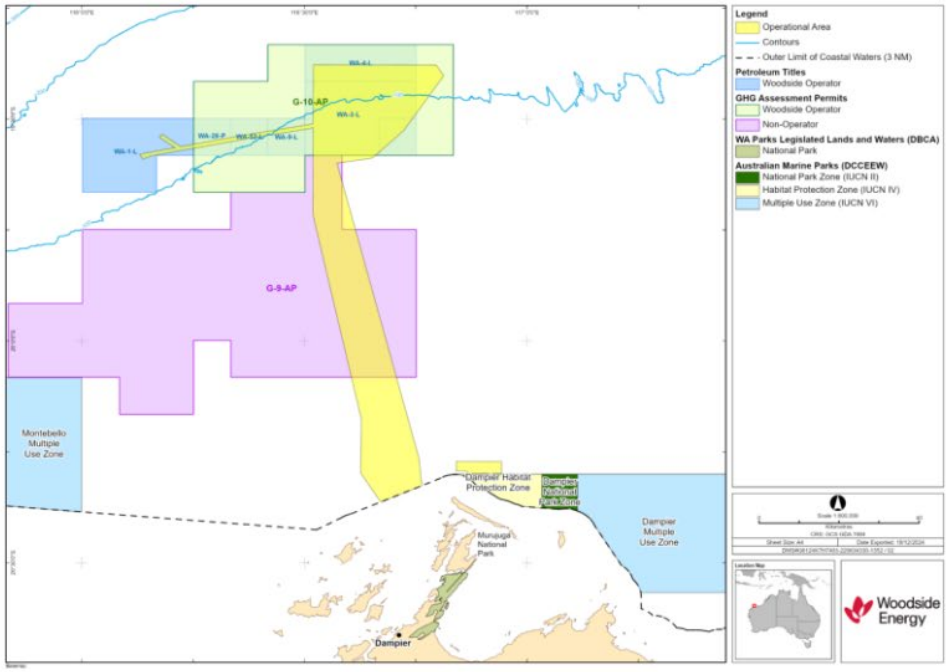

Figure 1: Location of the activity, including Operational Area and associated infrastructure

Planned Activities and Unplanned Events

We assess both planned activities and unplanned events which may result in environmental risks and impacts.

Planned activities are activities that Woodside knows will happen as part of the work under the EP. This could include generating underwater noise, light emissions, associated atmospheric emissions or routine discharges (such as sewage, waste, and deck drainage). We take steps so that planned activities comply with legislative and regulatory requirements.

Unplanned events are very unlikely. They may be the result of an accident, incident or emergency, such as a spill of fuel or oil from a ship (vessel) collision, a spill on the deck of a vessel (like during refuelling), unplanned seabed and/or marine life disturbance, or accidental introduction of invasive species from outside the region.

Planned and unplanned activities, potential impacts, and management measures are included in the Consultation Information Sheet for this activity, available at www.woodside.com/what-we-do/consultation-activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Environment that May Be Affected (EMBA)

The EMBA map (**Figure 2**) is a model of the largest spatial area where the activity could have a potential environmental impact. It combines multiple modelling outputs for both planned and unplanned activities in the highly unlikely event of an oil and natural gas (hydrocarbon) release to the environment. The modelling scenarios that inform the EMBA are based on a hydrocarbon release as a result of a vessel collision.

The EMBA does not show the predicted impact of a single event - it is the merged area of many possible scenarios that a highly unlikely hydrocarbon release could travel, depending on the weather and ocean conditions at the time. This means that if a hydrocarbon release was to occur, the whole EMBA would not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of a release.

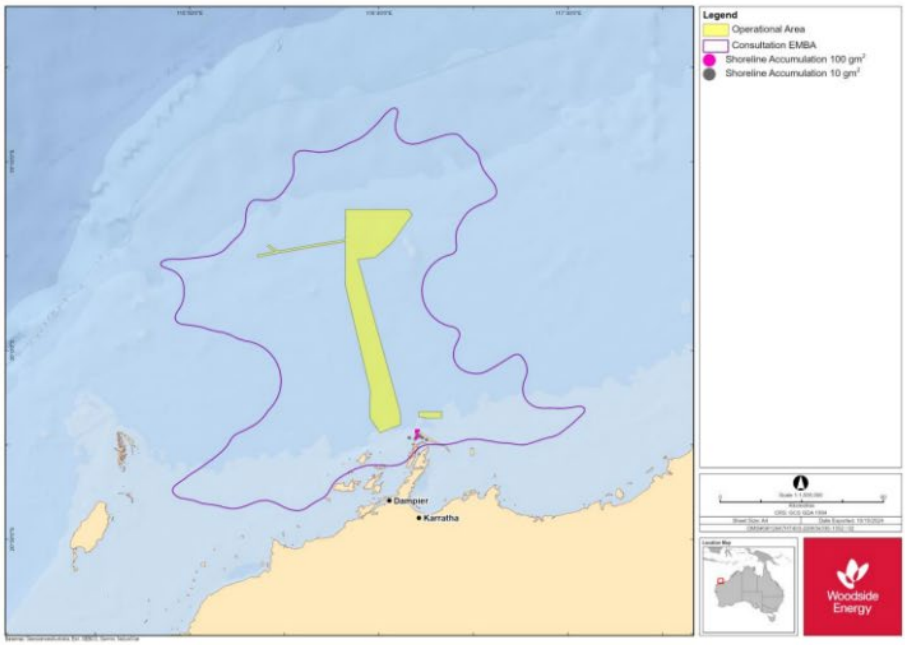

Figure 2: Environment that May Be Affected (EMBA) map

Your Feedback is Important

Woodside consults with relevant persons during the preparation of EPs to notify them about the activity and hear their feedback. By working together, we aim to protect biodiversity and maintain the health of ecosystems while carrying out our projects.

Your feedback helps shape the EP by:

- Identifying additional possible measures to reduce environmental impacts.
- Helping us consider cultural heritage and environmental values.
- Providing information that may help improve Woodside's environmental practices.

If there is particular information that you provide during consultation that you'd prefer not to be published, please let us know. We'll make your request known to NOPSEMA.

We'll manage any personal information collected during our consultation with you in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand more, please visit www.woodside.com/what-we-do/consultation-activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

6.3.3 Email to Australian Border Force (ABF), Australian Conservation Foundation (ACF), Australian Energy Producers (AEP), Australian Marine Conservation Society (AMCS), Australasian Centre for Corporate Responsibility (ACCR), Bounty Oil and Gas, Coastal Oil and Gas/Fox Resources, Conservation Council of Western Australia (CCWA), Department of Petroleum, Mines and Exploration (DMPE, formerly DEMIRS), Department of Industry, Sciences and Resources (DISR), Doctors for the Environment (DEA), Exxon Mobil, Greenpeace Australia Pacific (GAP), Jadestone Energy, JX Nippon, KATO Energy, KUFPEC Australia, Longreach Capital Investments/Beagle No. 1, Market Forces, City of Karratha, Karratha Community Liaison Group (CLG), Karratha & Districts Chamber of Commerce and Industry (KDCCI), Skye Napoleon, Vermillion Oil & Gas, Pilbara Ports – 1 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and any feedback previously received during the initial 2024 consultation will be included in the EP.

Feedback

If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by 31 October 2025.

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

Regards.

6.3.4 Email to Australian Communications and Media Authority (ACMA) – 1 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**. Telstra and Vocus will receive this update as well.

Feedback

If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.8 Email to Australian Maritime Safety Authority (AMSA) – Marine Pollution – 1 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.9 Email to Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries and Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity – 1 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

6.3.18 Email to Australian Southern Bluefin Tuna Industry Association (ASBTIA), Tuna Australia – 3 October 2025

Last July 2024, Woodside started consultation on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted. Since that time, AFMA requested that we send to your organisation, so we wanted to provide information on the update. The information from the original July 2024 consultation follows below. Please note that no Commonwealth fisheries have been active in the Operational Area in the past 5 years. North West Slope Trawl Fishery has been active in the EMBA within the past 5 years.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Dear Stakeholder

ANGEL CARBON CAPTURE AND STORAGE (CCS) GEOPHYSICAL AND GEOTECHICAL (GPGT) SURVEYS ENVIRONMENT PLAN

Woodside previously consulted you in July 2024 on the Angel CCS GPGT Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted,

While the activity remains unchanged, the estimated start date for the Commonwealth EP has been updated to **Q1 2027**.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys are intended to inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the updated Consultation Information Sheet which is included for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity —including location, scope, risks, and mitigation measures—remain as previously outlined and any feedback previously received during the initial 2024 consultation will be included in the EP.

Feedback

If you have feedback specific to the activities and the proposed EP, Woodside welcomes it at consultation@feedback.woodside.com or via phone call at 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit www.woodside.com/what-we-do/consultation-activities.

6.3.21 Email to Chevron – 2 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted. In August 2024, Chevron's feedback related to cyclone season, and requested cyclone anchor configuration, as well as mooring design, site specific geophysical and geotechnical data, anchor analysis and risk mitigations if activities would take place during cyclone season. (See emails below).

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Adjacent Titles

With this timing update, we also wanted to confirm that the Operational Area for the GPGT survey activity overlaps adjacent title G-9-AP with Chevron and Santos as titleholders. Image attached. To reduce the impact on adjacent titleholders, Woodside proposes to include adjacent titleholders in Start and End of Activity notifications. Please note these notifications are in addition to other relevant authorisations Woodside requires to carry out activities in adjacent titles.

Activity Overview
As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation
Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**.

Feedback
If you have feedback specific to the proposed activities and/or the overlapping adjacent title, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.22 Email to Santos – 2 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). At the time, Santos noted that it may have planned operational activities during a similar timeframe and within the vicinity of the proposed activity.

The Commonwealth and State EPs have not yet been submitted. While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Adjacent Titles

With this timing update, we also wanted to confirm that the Operational Area for the GPGT survey activity overlaps Santos' adjacent title G-9-AP. Image attached. We will also notify Chevron as a titleholder. To reduce the impact on adjacent titleholders, Woodside proposes to include adjacent titleholders in Start and End of Activity notifications. Please note these notifications are in addition to other relevant authorisations Woodside requires to carry out activities in adjacent titles.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**.

Feedback

If you have additional feedback specific to the proposed activities or adjacent titles, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.23 Email to Finder Energy − 1 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**. Previous correspondence follows.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.24 Email to Carbon CQ, InCapture, SK Earthon Australia – 2 October 2025

Woodside previously consulted in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). At the time of initial consultation, title G-15-AP had not been granted yet to InCapture, SK Earthon Australia and Carbon CQ. As title G-15-AP falls within the EMBA for the Commonwealth EP, we wanted to share the Angel CCS GPGT Surveys EP consultation updates with the G-15-AP titleholders.

The Commonwealth and State EPs have not yet been submitted. While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined. (Previous correspondence follows this email for reference as needed.)

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

6.3.26 Email to Vocus – 2 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). At the time, Robert Knowles wrote to confirm that the Vocus Highclere cable was 15km north of survey area, so there were no comments or concerns. Given we had consulted with you previously, we wanted to share the consultation update on timing of the activities.

The Commonwealth and State EPs have not yet been submitted. While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

6.3.29 Email to Department of Water and Environmental Regulation (DWER) – 16 October 2025

Dear DWER Team,

DPLH has recommended that we contact DWER in respect to the Angel Carbon Capture and Storage (CCS) GPGT Surveys Commonwealth EP. Please let us know if you have any feedback and/or confirm if DWER would like to be consulted on future Woodside EPs. For historical reference, we've also included the original consultation from July 2024 which follows the email below.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside first consulted in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation

Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and any feedback previously received during the initial 2024 consultation will be included in the EP.

Feedback

If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by 31 October 2025.

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.30 Email sent to Murujuga Aboriginal Corporation (MAC) – 02 October 2025

Dear Murujuga Aboriginal Corporation (MAC),

ACTIVITY UPDATE: ANGEL CARBON CAPTURE AND STORAGE (CCS) GEOPHYSICAL AND GEOTECHNICAL (GPGT) ENVIRONMENT PLAN (EP)

Woodside previously contacted you on 9 and 30 July 2024 to consult with you on the Angel

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

CCS GPGT Surveys Environment Plans for both Commonwealth and State waters. Due to operational decisions, the EPs relating to this consultation have not been submitted for assessment with the relevant regulator.

We can confirm that the Angel CCS GPGT EP relating to activities within Commonwealth waters is now planned to be submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for assessment. While the activities described within the EP remain unchanged since we consulted with you, we wanted to provide an additional opportunity for you to provide feedback about the activity before we submit the EP for assessment. Any feedback provided during the initial 2024 consultation has been incorporated into the EP.

Activity Overview
As an Operator of the Angel CCS Joint Venture, Woodside plans to conduct GPGT surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure. Please refer to the attached Summary Information Sheet for details or the linked Consultation Information Sheet.

Cultural Values
We have collated information in relation to MAC's cultural values that have either been provided to Woodside during previous EP consultation or via publicly available literature. For your convenience, these are outlined in Appendix A. If there are any changes or additional information about your cultural values that you would like Woodside to consider ahead of the EP's submission, please let us know by 31 October 2025. Please also get in touch if you'd like to know more about how we collected this information.

Feedback
If there is additional information that you would like us to consider, please provide that information to us by no later than 31 October 2025. Feedback can be provided directly, by emailing feedback@woodside.com or by calling 1800 442 977. Woodside manages gender-restricted or other culturally sensitive information carefully and we will work with you to understand how you would like your information to be managed. If you would prefer to provide the information directly to NOPSEMA, please do so by phoning (08) 6188 8700 or via email at communications@nopsema.gov.au.

Feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX A

Cultural Values – Murujuga Aboriginal Corporation (MAC)

Cultural Value	Source	
	Consultation – identified during EP consultation	Literature review (publicly available)
The ecosystem and health of Mermaid Sound.		x
Marine species • Whales: totemic importance • Dolphins: cultural ceremonies • Dugongs: food source • Fish: cultural ceremonies • Sea Snakes: culturally important • Turtles: Songlines • Coral: attract fish and other species • Seagrass: provide protection for animals. Locations include Conzinc Island and between Angel and Gidley Islands. • Stingrays • Sharks • Crustaceans • Octopus • Sea stars • Sea urchins • Sponges • Molluscs	x	x
Marine eco-systems • Mangroves: would have provided shelter, crabbing, digging for shellfish and could be turtle nurseries. Locations include Conzinc Bay north end, Flying Foam Passage, Searipple Passage, North-East Bay of West Lewis Island. • Macroalgal (seaweed) communities: important habitats and food sources. • Subtidal soft bottom communities (ocean bottom): support invertebrate diversity. • Intertidal sand and mudflat communities: support invertebrate diversity and provide food for shorebirds. • Rocky shores: habitats for plants/animals and provide food for shorebirds.	x	x
Fish traps in Conzinc Bay and Angel and Gidley Islands.	x	x
Harvesting squid around Conzinc Bay		x

MAC is the appropriate cultural authority for Murujuga	x	
Submerged landscape: • Potential impact on Jinna (Songlines) • Potential impact to Aboriginal heritage, due to the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.	x	
Murujuga seasonal calendar: • Any change to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities.	x	

Kind regards,

6.3.31 Email sent to Ngarluma Aboriginal Corporation (NAC) – 02 October 2025

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Dear Ngarluma Aboriginal Corporation (NAC),

ACTIVITY UPDATE: ANGEL CARBON CAPTURE AND STORAGE (CCS) GEOPHYSICAL AND GEOTECHNICAL (GPGT) ENVIRONMENT PLAN (EP)

Woodside previously contacted you on 12 July 2024 and 7 August 2024 to consult with you on the Angel CCS GPGT Surveys Environment Plans for both Commonwealth and State waters. Due to operational decisions, the EPs relating to this consultation have not been submitted for assessment with the relevant regulator.

We can confirm that the Angel CCS GPGT EP relating to activities within Commonwealth waters is now planned to be submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for assessment. While the activities described within the EP remain unchanged since we consulted with you, we wanted to provide an additional opportunity for you to provide feedback about the activity before we submit the EP for assessment. Any feedback provided during the initial 2024 consultation has been incorporated into the EP.

Activity Overview
As an Operator of the Angel CCS Joint Venture, Woodside plans to conduct GPGT surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure. Please refer to the attached Summary Information Sheet for details or the linked Consultation Information Sheet.

Cultural Values
We have collated information in relation to NAC's cultural values that have either been provided to Woodside during previous EP consultation or via publicly available literature. For your convenience, these are outlined in Appendix A. If there are any changes or additional information about your cultural values that you would like Woodside to consider ahead of the EP's submission, please let us know by 31 October 2025. Please also get in touch if you'd like to know more about how we collected this information.

Feedback
If there is additional information that you would like us to consider, please provide that information to us by no later than 31 October 2025. Feedback can be provided directly, by emailing feedback@woodside.com or by calling 1800 442 977. Woodside manages gender-restricted or other culturally sensitive information carefully and we will work with you to understand how you would like your information to be managed. If you would prefer to provide the information directly to NOPSEMA, please do so by phoning (08) 6188 8700 or via email at communications@nopsema.gov.au.

Feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. Should a claim or objection be received following the acceptance of an EP that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside will apply its Management of Change and Review process as appropriate.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

We also acknowledge our discussions relating to the consultation framework agreement have been ongoing and appreciate that these discussions will progress in parallel with consultation for this EP.

6.3.32 Email sent to Robe River Kuruma Aboriginal Corporation (RRKAC) – 02 October 2025

Dear Robe River Kuruma Aboriginal Corporation (RRKAC),

ACTIVITY UPDATE: ANGEL CARBON CAPTURE AND STORAGE (CCS) GEOPHYSICAL AND GEOTECHNICAL (GPGT) ENVIRONMENT PLAN (EP)

Woodside previously contacted you on 8 and 30 July 2024 as well as 6 September 2024 to consult with you on the Angel CCS GPGT Surveys Environment Plans for both Commonwealth and State waters. Due to operational decisions, the EPs relating to this consultation have not been submitted for assessment with the relevant regulator.

We can confirm that the Angel CCS GPGT EP relating to activities within Commonwealth waters is now planned to be submitted to National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for assessment. While the activities described within the EP remain unchanged since we consulted with you, we wanted to provide an additional opportunity for you to provide feedback about the activity before we submit the EP for assessment. Any feedback provided during the initial 2024 consultation has been incorporated into the EP.

Activity Overview
As an Operator of the Angel CCS Joint Venture, Woodside plans to conduct GPGT surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure. Please refer to the attached Summary Information Sheet for details or the linked Consultation Information Sheet.

Cultural Values
We have collated information in relation to RRKAC's cultural values that have either been

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

provided to Woodside during previous EP consultation or via publicly available literature. For your convenience, these are outlined in Appendix A. If there are any changes or additional information about your cultural values that you would like Woodside to consider ahead of the EP's submission, please let us know by 31 October 2025. Please also get in touch if you'd like to know more about how we collected this information.

Feedback
If there is additional information that you would like us to consider, please provide that information to us by no later than 31 October 2025. Feedback can be provided directly, by emailing feedback@woodside.com or by calling 1800 442 977. Woodside manages gender-restricted or other culturally sensitive information carefully and we will work with you to understand how you would like your information to be managed. If you would prefer to provide the information directly to NOPSEMA, please do so by phoning (08) 6188 8700 or via email at communications@nopsema.gov.au.

Feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. Woodside continues to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP. 6.3.40 Email to Department of Biodiversity, Conservations and Attractions (DBCA) – 1 October 2025

Woodside previously consulted you in July 2024 on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview
As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation
Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

6.3.41 Email to Southern Bluefin Tuna Fishery, Western Skipjack Tuna Fishery and Western Tuna and Billfish Fishery – 25 November 2025

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Last July 2024, Woodside started consultation on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted. Based on estimated start date now in Q1 2027, we are consulting your organisation on the Commonwealth EP and providing the 2025 update.

Woodside has also consulted Tuna Australia and Australian Southern Bluefin Tuna Industry Association (ASBTIA). Below please find the activity overview, and the original July 2024 consultation follows that for reference. Please note that no Commonwealth fisheries have been active in the Operational Area in the past 5 years. North West Slope Trawl Fishery has been active in the EMBA within the past 5 years.

While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview
As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.
Please refer to the attached updated Consultation Information Sheet for details, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

Consultation
Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and highlighted in the attached Consultation Information Sheet.
Please let us know if you require notification prior to and on completion of the proposed activities.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at consultation@feedback.woodside.com or 1800 442 977 by 29 December 2025.
Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).
Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.
Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.
Regards.

Subject: Woodside Consultation Information ANGEL CCS GPGT Surveys EPs

Dear Stakeholder

Woodside is planning to submit the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical Surveys Commonwealth and State Environment Plans.

Overview
For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO2) gathering system, collecting CO2 via new pipelines from emitters onshore or through imported options via ships. Collected CO2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.

Exclusionary / Cautionary Zones
- Temporary 500 m exclusion zone around vessels conducting survey activities to manage vessel movements.
- No restrictions to other vessels within the Operational Area apart from being advised to take care during the survey vessel activities.

Environment that may be affected (EMBA)
The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these environment plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

Consultation information
A Consultation Information Sheet is attached, which provides additional background on the proposed activities including summaries of potential key impacts and risks and associated management measures. This is also available on our website. Here you can also subscribe

Feedback:
If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback via email at Feedback@woodside.com or phone call at 1800 442 977, or via the feedback form on our website by 9 August 2024.

Your feedback and our response will be included in our EPs. The Commonwealth EP will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth). The State EP will be submitted to Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) pending review of the Petroleum (Submerged Lands) (Environment) Regulations 2012 (WA). Both support other regulatory processes associated with the planned activities (which may or may not be confidential)
Please let us know if you request that particular information that you provide in the consultation not
be published. If so, we will make your request known to NOPSEMA.

NOPSEMA has published the brochure Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

Regards.

6.3.42 Email to Aquaculture Council of Western Australia (ACWA) – 1 October 2025

Last July 2024, Woodside started consultation on the Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth and State Environment Plans (EPs). The Commonwealth and State EPs have not yet been submitted. Since that time, we have started consulting ACWA so wanted to provide information on the update. While there are no aquaculture sites that overlap the EMBA, there are two pearling leases, located in Flying Foam Passages A and B. The information from the original July 2024 consultation follows below.
While the activity remains unchanged, the estimated start date for the Commonwealth EP surveys has been updated to Q1 2027. Woodside will update on the State EP at a later time.

Activity Overview
As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. These surveys will inform pipeline and umbilical routing, subsea infrastructure placement, and drilling unit positioning. They will also support baseline studies for existing and future infrastructure.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Please refer to the attached updated Consultation Information Sheet for details.

Additional Consultation
Due to the revised timing, Woodside is undertaking further consultation. All other aspects of the activity—including location, scope, risks, and mitigation measures—remain as previously outlined and **any feedback previously received during the initial 2024 consultation will be included in the EP**.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at feedback@woodside.com or 1800 442 977 by **31 October 2025.**
Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.
Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.
A Consultation Information Sheet is attached, which provides the proposed activities in Commonwealth waters including summaries of key impacts and risks and associated management measures. This is also available on our website.

CONSULTATION UPDATE

Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth Environment Plan (EP)

Dear Stakeholder

Woodside previously consulted you on the Angel CCS GPGT Surveys Commonwealth EP.

As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA.

Additional information on the EP is provided in the Consultation Information Sheet, which is available on Woodside's website https://www.woodside.com/what-we-do/consultation-activities, accessible through this QR Code:

Feedback

If you have feedback specific to the proposed activities, we welcome your feedback at consultation@feedback.woodside.com or 1800 442 977 by **31 October 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit https://www.woodside.com/privacy.

Regards

Woodside Consultation

6.4.3 Email to Southern Bluefin Tuna Fishery, Western Skipjack Tuna Fishery and Western Tuna and Billfish Fishery – 16 December 2025

Dear Stakeholder

Woodside previously consulted you on the **Angel Carbon Capture and Storage (CCS) Geophysical and Geotechnical (GPGT) Surveys Commonwealth Environment Plan (EP)**. As Operator of the Angel CCS Joint Venture, Woodside plans to conduct geophysical and geotechnical surveys in Commonwealth waters off the North-West coast of WA. Additional information on the EP is provided in the previous email below and in the Consultation Information Sheet, which is attached and available on Woodside's website.

Feedback
If you have feedback specific to the proposed activities, we welcome your feedback at consultation@ feedback.woodside.com or 1800 442 977 by **29 December 2025.**

Your feedback and our response will be included in our EP which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if you request that particular information that you provide in the consultation not be published. If so, we will make your request known to NOPSEMA so that the information is not included when the EP is published on NOPSEMA's website.

Personal information collected in the course of consultation will be handled in accordance with Woodside's Environment Plan Privacy Collection Notice. To understand how personal information will be handled, please visit our website.

6.5.1.2 The West Australian – 8 July 2024

The West Australian
Monday, July 8, 2024

Main: Amy Wensley & David Simmons with their daughters Naya and Tay.
Below inset: Amy's mother Nancy.

is now, that is not how Amy died.

"How could she hold a double-barrel shotgun? How could she turn her head like that? It doesn't make sense," she says.

While Nancy has raised Amy's children, her sister Anna has raised Amy's violent death at every opportunity, in a bid to get to the truth.

"They were just babies, just little girls – and they were Amy's babies and she should be here," Anna says.

The memories those girls now hold are predominantly positive ones, especially movie nights on Friday dressed in matching onesies.

But her older daughter Naya also remembers that final night.

"She told me that she needed to go back inside to grab something. And she told me that the next movie we're going to watch would be Rio — and then she went inside, and she never came back," Naya said.

"It does have an effect on me, but I don't think it affects me as much as it does everyone else.

"It's not too painful for me. But I know that some people get really emotional and upset with these things.

"And this could have happened a lot easier if it was done properly. It's still going on, like 10 years now. And we shouldn't have come to the point where we didn't know what happened.

"We should have just known on the day."

Scores drown across Russia

Seven children are among 49 people who have drowned in waters across Russia as scorching heat blankets large areas of the country.

"A total of 65 incidents were registered on the country's water bodies over the past 24 hours — 49 people died," the Ministry for Emergency Situations said on Sunday on the Telegram messaging app.

That was 10 more drowning incidents than on the same day in 2023, Russia's RIA state news agency reported.

In the past week, Russians braved some of the hottest weather in more than a century, with Moscow breaking a 1917 record and cities across the world's biggest country sizzling in temperatures well above 35C.

Russia's Service for Hydrometeorology said on Friday on its website that abnormal, sweltering heat was expected across most of the south of European parts of Russia at the weekend, with temperatures rising to more than 40C in some places.

In the Nizhny Novgorod region in central Russia, a 10-year-old girl drowned in the vast Volga River and her six-year-old sister disappeared, with divers still searching for her, the Emergency Ministry said.

In the Bashkiria region, which lies between the Volga River and the Ural Mountains, three people drowned, including a 16-year-old girl, the Ministry said.

ANGEL CCS GEOPHYSICAL AND GEOTECHNICAL SURVEYS COMMONWEALTH AND STATE ENVIRONMENT PLANS

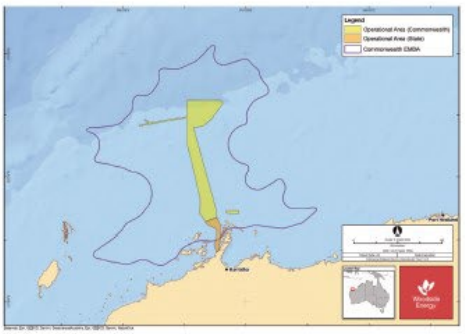
For more than 35 years, Woodside has been developing and operating LNG and oil projects in Australia. Our focus is the safety, reliability, efficiency and environmental performance of our operations and activities.

Woodside consults so that feedback is considered and used to inform the **Angel Carbon Capture and Storage (CCS) Geophysical Geotechnical Surveys Commonwealth and State Environment Plans.**

Our activities

For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO_2) gathering system, collecting CO_2 via new pipelines from emitters onshore or through imported options via ships. Collected CO_2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.



The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these Environment Plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

We want to hear from you

If you are an individual, organisation or community group and believe your functions, interests or activities may be impacted by the activities under these Environment Plans, we would like to hear from you by **9 August 2024.**

6.5.1.3 Pilbara News – 10 July 2024

Pilbara NEWS
Wednesday, July 10, 2024
pilbaranews.com.au

Public school teachers will take home a 12 per cent pay rise over the next three years. Picture: Riley Churchman

Teachers to pocket 12pc rise in pay

DYLAN CAPORN

Public school teachers have endorsed a pay deal with the State Government, pocketing 12 per cent in pay rises over the next three years.

In a ballot run by the State School Teachers Union of WA, 70.5 per cent of those members who voted were in favour, 29.13 per cent against and 0.37 per cent abstained.

Under the deal, teachers will receive a five per cent rise this year, followed by four per cent in 2025 and three per cent in the final year of the agreement.

SSTUWA president Matt Jarman said he hoped the agreement was registered with the Western Australian Industrial Relations Commission quickly to allow for back pay and the claims and conditions to begin to flow to members.

However, Mr Jarman said the campaign over class sizes would become a broader issue as part of a community campaign.

"Whilst gains were made on the management of oversize classes through this agreement, the new measures must be monitored to assess their effectiveness as well as the extent of class size issues across the system. This will require broad membership support," he said.

"The union will also be ensuring the new Workload Ministerial Taskforce begins operations immediately so that the extensive issues affecting members and taking teachers away from actual teaching can be addressed urgently.

"With both State and Federal elections due in the first half of 2025 the SSTUWA will be seeking to ensure public education, including the ongoing campaign for genuine full funding, becomes a central issue in both elections."

The deal comes after a protracted six-month bargaining process with the Government, which saw teachers walk off the job for a half day — the first strike in more than a decade.

The Cook Government has been embroiled in a number of heated pay negotiations, with public sector workers unimpressed with six years of wages suppression.

The second deal put before teachers was for a wage rise of 11 per cent over three years.

Compelling portrait of deception and lies

Asher Keddie gives a career-best performance in Fake alongside David Wenham.

TV REVIEW

Fake
Starring Asher Keddie, David Wenham, Heather Mitchell
Streaming on Paramount+
Review Wamai Ma
VERDICT 4/5

We all think we're savvy. If someone's asking to be paid in gift cards, you know it's a scam. Likewise, if an unsolicited email purporting to be from your bank asks you to reset your password.

But when it comes to matters of the heart, we're all vulnerable. We want to believe in someone because if they're true, then it leads to the best possible version of our future.

When someone tells you you're amazing and whispers those magic words, "I love you", it overrides our instincts to be suspicious. Never trusting anyone, we're told, leads to loneliness and bitterness. No one wants to be that person.

So it was that Birdie Bell (Asher Keddie, a journalist who sniffs out bulls..t for a living, came to fall for Joe Burt (David Wenham).

The eight-episode drama Fake was inspired by the memoirs of Stephanie Wood, a writer and journalist, who met a man through a dating website and was sucked into his elaborate web of deception.

It's a gripping drama, an almost forensic exploration of how under the right circumstances, anyone is prey to someone's manipulations.

Birdie is almost 50 and single. Her first date with Joe is a disaster. They met for drinks at a trendy Melbourne restaurant. He talked about himself the whole time and only asked one question of her. Birdie told a friend. She left early and ignored his calls. But Joe persisted and talked her into a second date. He's a greater chat a farmer's of sheep. He's divorced with two kids. He doesn't have a credit card because he objects to bank fees. He's consulting with chinese investors.

If it sounds too good to be true, it probably is. It's not as if Birdie's spidey senses aren't tingling, they're screaming.

But she does everything she can to push them down.

She wants Joe to be the right one. But the abruptly cancelled plans, the no-shows and the ghosting for days all add up, and Birdie knows, in her heart of hearts, that something isn't right. Fake is a vivid portrait of the emotional abuse in this dynamic. Joe is gaslighting her, making her think she's crazy, diminishing her legitimate questions.

The scripting by creator Anya Beyersdorf and her team is super compelling while the series directors including the always wonderful Emma Freeman pull everything together. It's anxiety-ridden and frustrating, because it's evoking a visceral response. But it's not melodramatic. Keddie sheds some of the more mannered quirks of previous roles and gives a fantastic performance that's restrained and relatable. A fifth episode where Birdie is slowly unravelling over the length of an Uber ride to the airport is masterful stuff.

Heather Mitchell as Birdie's awful mother reveals much about Birdie's psychology and why she so desperately wants Joe to be the real deal.

Sometimes, when we're watching stories about scammers, narcissists and con-artists, we keep them at a distance. That could never be me, you say. Fake provides a persuasive argument that it could be.

Grants of $10k set to give groups a 'leg-up'

NATASHA CLARK

Port Hedland community groups could receive $10,000 worth of funding thanks to Pilbara Minerals' Community Grants Program.

The initiative — established last October — successfully awarded more than $100,000 in funding across 12 organisations.

Pilbara Minerals founded the initiative with the intention of reinvesting in organisations pivotal to the region's social fabric.

Managing director and chief executive Dale Henderson said the company was delighted to continue the program.

"We invite applications for grants of up to $10,000 for community projects that align with our priority investment areas of education, community resilience and the energy transition," he said.

"No one knows what the community needs more than the people who live and work there, and we're looking forward to once again engaging with the people of Port Hedland and neighbouring communities to understand how Pilbara Minerals can help support the initiatives that matter most to them."

Last year, several community grants were allocated to bolster educational programs, including funding for soccer uniforms and upgrades for primary school systems.

"These grants are more than just money — they provide the leg-up that organisations need to build a stronger, more resilient and healthy community," Mr Henderson said.

Applications for the Community Grants Program are now open and will close on July 31. The program supports locally delivered projects and events in Port Hedland, Strelley, Yandeyarra and Pilbara-wide initiatives.

Application forms and guidelines are available at pilbaraminerals.com.au/communitygrants.

Melinda Hayes, from Pilbara Minerals, with the Youth Involvement Council team.

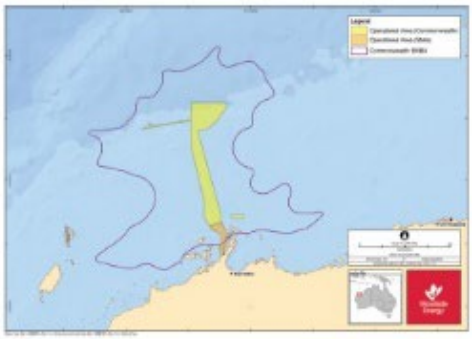
Woodside consults so that feedback is considered and used to inform the **Angel Carbon Capture and Storage (CCS) Geophysical Geotechnical Surveys Commonwealth and State Environment Plans.**

Our activities

For the proposed Angel CCS Project in the North-West region of Western Australia, Woodside, as Operator of the Angel CCS Joint Venture, plans to undertake geophysical and geotechnical surveys to provide data to support the greenhouse gas (GHG) activity program. Data from the surveys, in Commonwealth and State waters, is intended to inform the design for the pipeline and umbilical routes, subsea structure foundation locations and planning for mobile offshore drilling unit anchoring or jack-up rig placement. The surveys will also support baseline studies to provide data on existing infrastructure and potential future activities.

The Angel CCS Project involves the development of a Carbon Dioxide (CO_2) gathering system, collecting CO_2 via new pipelines from emitters onshore or through imported options via ships. Collected CO_2 would be transported to a central compression facility prior to being transported offshore via a subsea pipeline and injected into the subsea geological formation.



The environment that may be affected (EMBA)

The EMBA is the largest area where activities could potentially have a direct or indirect impact on the environment. The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these Environment Plans, is determined by modelling a release of hydrocarbons from a vessel collision. A vessel collision and release of this kind is highly unlikely to occur.

The EMBA models the merged area of many possible paths that a hydrocarbon release could travel depending on factors including the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected.

6.5.1.6 Kimberley Echo – 11 July 2024

Thursday, July 11, 2024 kimberleyecho.com.au NEWS 5

Workshops focus on fishing

NATASHA CLARK

A series of workshops aimed at empowering native title holders across WA's Northern coastal regions began on Tuesday in Broome, with the Mayala Inninalang Aboriginal Corporation seminar.

The initiative, guided by Kimberley based not for profit group Morrgul, will facilitate nine additional workshops with Prescribed Bodies Corporate across the Kimberley coast.

Each session is tailored to enhance understanding and capacity in commercial fishing and aquaculture operations within regions managed by these bodies corporate.

A partnership of the Centre for Developing Northern Australia and WA's Department of Primary Industries and Regional Development have funded the workshops.

Melissa Hartmann, DPIRD's manager for Aboriginal Economic Development, outlined benefits the workshops will bring to Indigenous fishers in the Kimberley.

"There's high interest among native title holders in exploring commercial fishing opportunities," she said.

"These workshops will help mitigate risks and pave the way for successful Aboriginal led enterprises."

CRCNA's chief executive operations, Sarah Docherty, highlighted the transformative potential of fisheries research in creating sustainable economic industries.

"We aim to develop aquaculture products suited to tropical climates, reducing reliance on imports and fostering local industry capacity," Ms Docherty said.

The workshops will not only foster economic opportunities but also ensure these ventures are culturally appropriate and environmentally sustainable.

Discussions will focus on key species like mud crabs, sea cucumber, and black-lipped oysters, prevalent along WA's northern coast.

"This collaboration aims to empower Aboriginal corporations with the knowledge and resources to operate commercial fishing enterprises on native title lands," Ms Hartmann said.

"It's a crucial step towards economic self determination and sustainable development in our coastal communities," she said.

As the workshops commence, stakeholders anticipate a new era of economic resilience and cultural awareness in Northern WA's fisheries and aquaculture sectors.

Participants in one of the Aboriginal fishing workshops.

6.5.1.7 National Indigenous Times – 30 July 2024

nit.com.au WORLD NT 17

Leaders head to turmoil

DECLAN BRENNAN

Pacific leaders will arrive in New Caledonia in the coming weeks as the Indigenous Kanak people dispute a contested referendum on voting rights, coming in the wake of prolonged unrest in the French-ruled Pacific territory.

The visiting Cook Islands Prime Minister and Pacific Islands Forum chair Mark Brown, along with Fiji Prime Minister Sitiveni Rabuka and Tonga Prime Minister Hu'akavameiliku Siaosi Sovaleni were described as a PIF "troika" by Mr Brown and comes as trouble continues to plague the island.

"I have also been asked by many Pacific leaders to lead a group to conduct a fact-finding mission in Noumea to understand the problems they are facing," Mr Rabuka said.

In May, 10 people were killed and much of the capital Noumea was damaged after riots, and the Melanesian Spearhead Group said this week they had strong objections to France's handling of the political situation in New Caledonia.

Mr Brown said the PIF understood those concerns.

"The third referendum was boycotted by the Kanak population because of the impacts of COVID-19 and the respect for the mourning period. Therefore, the outcome of that referendum is not valuable," he said, as reported by RNZ.

Mr Brown said there had been a request from the New Caledonian Government for a "high-level" Pacific delegation, and the Cook Islands PM said the next step would be writing a letter which would require French support.

"We will now go through the process of how we will put this into practice. Of course, it will require the support of the Government of France for the mission to proceed," he said.

Mr Brown said the PIF wanted a de-escalation in the violence, with AAP reporting he wanted "dialogue between all parties".

"Our objective is to help all parties resolve this situation as peacefully and expeditiously as possible," he said.

Despite arguments over the validity of the referendum, the top French diplomat in the region, Véronique Roger-Lacan, told Pacific leaders at the 10th Pacific Islands Leaders Meeting in Tokyo earlier this month that the referendum was fair and stated there was significant levels of disinformation being reported.

"For example, Mark Brown sent a letter to President (Louis) Mapou but he did not try and contact France, kind of ignoring that New Caledonia, until further notice, is France," she said, RNZ reports.

"We tried to call them, but Mark Brown would not be there to pick up the phone."

A spokesperson for Mr Mapou said the delegation would come to New Caledonia before the annual meeting of the PIF in Tonga in mid-August.

Air New Zealand on July 18 announced they were extending their suspension of flights to Noumea until December 14 due to ongoing safety concerns.

6.8 Community Information Sessions

The community information sessions that Woodside has conducted are captured below:

6.8.1 Pilbara Region

6.8.1.1 Community Pop-Up at Lo's Cafe – 26 July 2024

Location	Karratha
Activity	Community pop-up at Lo's Cafe
Date	26 July 2024
Description of the consultation	Woodside hosted a stand in the community to coincide with Woodside's 70th birthday and 40 years of safe operations in Karratha. (Record of Consultation, reference 6.5.1.1). Members of Woodside's Corporate Affairs team actively engaged with the community to discuss proposed EP activities and general community engagement discussion. Woodside displayed a QR code on the stand, linked to the Let's Talk EP newsletter on the Woodside consultation page of the website. A pull-up banner was on display focusing on engagement on our plans at land and sea with a QR code to the consultation page on the Woodside website. Woodside had printed consultation information sheets for Angel Carbon Capture and Storage Geophysical and Geotechnical EP on display.
Advertising and invitations	Woodside advertised this engagement on social media only. Social media post was advertised on Woodside North West Facebook page on 26 July 2024. An EP consultation banner with QR code (linked to the Consultation Activities page on the Woodside website) was displayed at Woodside's stand along with current EP factsheets.
Estimated number of individuals consulted	Over 60 community members attended the event. Woodside spoke to many community members, recording 10 meaningful conversations.
Summary of Feedback, Objection or Claim	
Approximately 10 conversations occurred around employment opportunities and pathways, social investment, the EP process and approvals in general. No feedback was received regarding Woodside's EPs.	
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	
This session forms part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).	

6.8.1.1.1 Facebook post – 26 July 2024

On 26 July 2024, Woodside posted a story on its Woodside North West Facebook account, sharing details of its stand to celebrate Woodside's 70th and 40 years of safe operations in Karratha. Consultation Information Sheets regarding is planned and proposed activities were available, including the activities proposed under this EP.

Woodside North West is with **Woodside Energy**.
5 days ago ·

🎉 It's our birthday 🥳

Today we're celebrating 70 years of Woodside, and this year, four decades of safe and reliable operations in Karratha.

To thank the community for their support over this time, we've been providing free morning coffees across the City of Karratha this past month.

Join us at just one of the participating local providers, Lo's this morning! Grab a coffee on us and let's talk about upcoming projects, ongoing operations and our role in the community we've proudly called home for forty years.

As we celebrate this significant milestone, we look forward to continuing to support the local community through our ongoing operations and growth projects. This includes the Scarborough Energy Project and Pluto Train 2, which has engaged more than 75 Karratha businesses since construction began.

6.8.1.2 FeNaCING Festival – 3 to 4 August 2024

Location	Karratha
Activity	FeNaCING Festival
Date	3-4 August 2024
Description of the consultation	Woodside hosted a stand at the FeNaCING Festival 2024 (Record of Consultation, reference 6.5.1.10). Members of Woodside's Corporate Affairs, Environment and Operations teams actively engaged with the community to discuss proposed EP activities. Woodside displayed a QR code on the stand, linked to the Let's Talk EP newsletter on the Woodside consultation page of the website. A pull-up banner was on display focusing on engagement on our plans at land and sea with a QR code to the consultation page on the Woodside website. Woodside had printed consultation materials for the Angel Carbon Capture and Storage Geophysical and Geotechnical EP on display and available.
Advertising and invitations	Woodside advertised the sessions to enable individuals to self-identify, become aware of the community consultation, and enable individuals to provide feedback on proposed activities, through the following: • Social media post was advertised on the City of Karratha and FeNaCING Festival Facebook page on 18 July 2024 • Social media post was advertised on the Woodside North West Facebook page • FeNaCING Festival lift-out in the Pilbara News on 31 July 2024 • An EP consultation banner with QR code (linked to the Consultation Activities page on the Woodside website) was on display outside the Woodside marquee, and EP factsheets were displayed, and provided in the Woodside marquee.
Estimated number of individuals consulted	Over 10 000 community members (City of Karratha) attended the event. Woodside spoke to many community members, recording 30 meaningful conversations.
Summary of Feedback, Objection or Claim	
Approximately 10 conversations occurred around new energy opportunities and plans. Other conversations included local content, social investment, EMBAs (relating to EPs), approvals in general (Browse and Scarborough), Karratha Gas Plant assets future, tax and royalties and general production process. No feedback was received regarding Woodside's EPs.	
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	
This session forms part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).	

6.8.1.2.1 Social media – 18 July 2024

On 18 July 2024, the FeNaCING festival Woodside posted about the upcoming festival and Woodside as the major sponsor.

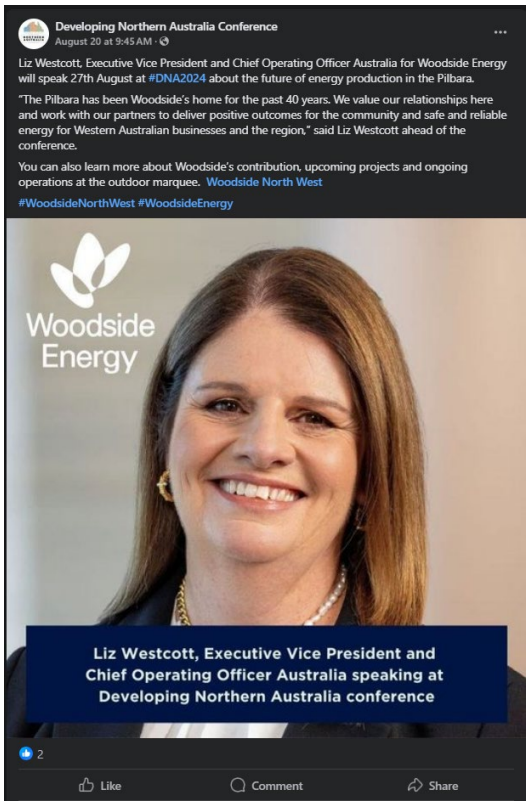
6.8.1.3 Mack10 Fishing Competition – 23 to 25 August 2024

Location	Onslow
Activity	Mack10 Fishing Competition – organised by Ashburton Anglers fishing club
Date	23 – 25 August 2024
Description of the consultation	Woodside sponsorship of the Mack10 fishing competition enabled copies of the Let's Talk newsletter to be included in all competitor briefing packs. An EP consultation banner with QR code (linked to the Consultation Activities page on the Woodside website) was on display at the event.
Advertising and invitations	Woodside advertised participation at the event to assist individuals to self-identify, become aware of the community consultation, and enable individuals to provide feedback on EP activities.
Estimated number of individuals consulted	The competition had approximately 300 participants. Informal conversations were held with a number of competition participants and other attendees.
Summary of Feedback, Objection or Claim	
Community members were able to engage with Woodside representatives and discuss the Griffin Gas Export Pipeline.	
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	
Whilst feedback was received, there were no objections or claims. Participation at the event is part of Woodside's broader consultation approach to enable self-identification, and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).	



6.8.1.4 Developing Northern Australia (DNA Conference) – 26 to 28 August 2024

Location	Karratha
Activity	Developing Northern Australia (DNA) Conference
Date	26-28 August 2024
Description of the consultation	Woodside hosted an exhibition stand at the DNA Conference (Record of Consultation, reference 6.5.1.14**).** Members of Woodside's Corporate Affairs team actively engaged with 400+ individuals, policy makers and decision makers attending the conference to discuss, amongst other things, EP activities. Woodside displayed a QR code, linked to the Let's Talk EP newsletter on the Woodside consultation page of the website. An iPad was available encouraging audience to view and subscribe to the consultation page on the Woodside website. Woodside made available Consultation Information Sheets on the Angel Carbon Capture and Storage Geophysical and Geotechnical EP.
Advertising and invitations	Woodside advertised the sessions to enable individuals to self-identify, become aware of the community consultation, and enable individuals to provide feedback on proposed activities, through the following: • Social media post was advertised on the Developing Northern Australia Facebook page on 20 August 2024. • EP consultation information sheets and copies of Let's Talk with QR codes linking to Consultation Activities - Woodside Energy were displayed and provided.
Estimated number of individuals /	Over 400 delegates attended the conference. Woodside spoke to many conference attendees, recording 20 meaningful conversations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

organisations consulted	
Summary of Feedback, Objection or Claim	
• Approximately 10 conversations occurred around new energy opportunities and plans. • Other conversations included: - Local content - Social investment - General understanding of an EMBA - How oil and gas is produced and the organisations future in energy transition - Price of gas for international project forecasting - Ai and simulation technology - Carbon sequestration • No feedback was received regarding specific EPs.	
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	
Woodside's participation at the DNA conference forms part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

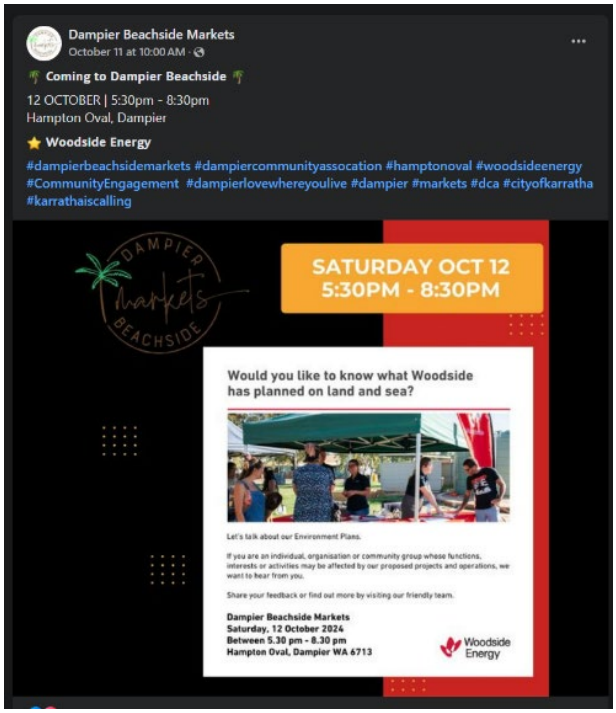
6.8.1.4.2 Woodside stall at DNA Conference



6.8.1.5 Dampier Beachside Markets – 12 October 2024

Location	Dampier
Activity	Dampier Beachside Markets - Oktoberfest
Date	12 October 2024
Description of the consultation	Woodside hosted a stand at the Dampier Beachside Markets a community event bringing together local businesses selling local products, a variety of food vendors and community groups. The stand was staffed by members from Woodside's Corporate Affairs Woodside displayed a QR code on the stand, linked to the consultation activities page of the Woodside website. An iPad with consultation/feedback subscription prompt was made available. Woodside made available printed consultation information sheets on the Angel CCS GPGT Surveys EP.
Advertising and invitations	Woodside advertised the sessions to enable individuals to self-identify, become aware of the community consultation, and enable individuals to provide feedback on proposed activities, through the following: • Advertisement in the Pilbara News on 9 October 2024. • Geotargeted Social media posts were published inviting public to attend on Woodside North West Facebook page. • Social media post from event host, Dampier Community Association was published on October 11, 2024 inviting public to attend. • Advertisement was displayed on community noticeboard at Lo's Café, Karratha, and Roebourne Library. • An EP consultation banner with QR code (linked to the Consultation Activities page on the Woodside website) displayed at Woodside's stand along with current EP factsheets.
Estimated number of individuals /	Over 1000 community members attended the event. Woodside spoke to many community members, recording 6 meaningful conversations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

organisations consulted	
Summary of Feedback, Objection or Claim	
General positive commentary from community members working at Woodside or on Woodside projects. General interest in CSS process Interest in community grant program EP approval process discussed and why we want to talk to community. No concerns raised. General queries around employment and graduate opportunities. Interest in divestment of ex-Woodside homes.	
Woodside Energy's Assessment of Merits of Feedback, Objection or Claim and its Response	
Whilst feedback was received, there were no objections or claims. The community information sessions were part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

Minefield for ore big shots

ADRIAN RAUSO

'Tensions between a junior miner and an Aboriginal corporation at the iron-ore-rich fringes of Karijini National Park have spilled over onto Fortescue and Rio Tinto territory.

The State Government last month quietly registered areas of Pilbara land and waterways as two distinct sites of Aboriginal cultural heritage.

The ruling was based on information from a heritage study commissioned by Equinox Resources to progress the company's flagship project — Hamersley Equinox wants to mine a $\$3$-billion-tonne iron ore deposit adjacent to the north-western edge of Karijini's boundary but the Wunaamin Conmu Aboriginal Corporation has vehemently opposed the proposal.

WGSC argues the mine would tarnish Karijini.

One of the freshly registered sites — Ethirli Rungu — has been made public on a Department of Planning, Lands and Heritage online portal.

Ethirli predominantly spreads across Karijini, while also sneaking into the margins of both Equinox's Hamersley and a neighbouring resource package controlled by Fortescue.

It is the second site — Wuliapiarramurtha Warra — that has been causing some agitation behind closed doors, The West Australian understands, and its existence is yet to be made public.

Wuliapiarramurtha comprises a web of creeks and gullies that flow to the Fortescue River and extends all the way up to the doorstep of Fortescue's prized Solomon mining hub, according to documents sighted by The West.

Unlike Ethirli, Wuliapiarramurtha pierces deeper into a swag of Fortescue and Rio interests, as well as Hamersley, on the outer of Karijini's north-western boundary. Both Ethirli and Wuliapiarramurtha are classified as "dreaming narrative" sites.

Equinox and Rio declined to comment, while Fortescue did not comment directly on the two registered sites.

"We are committed to preserving First Nations Australian heritage and have dedicated heritage, native title and community teams that work hand in hand with First Nations people to ensure cultural heritage is managed sustainably and responsibly," a Fortescue spokeswoman said.

A State Government spokesman confirmed two sites "within the boundaries of Karijini" had been registered on September 19.

A sole being registered as an area of Aboriginal cultural heritage does not necessarily prevent mining, but it gives local Aboriginal groups greater influence in the approvals process. A Section 18 application, lodged by Equinox in February, seeks permission from Aboriginal Affairs Minister Tony Buti to disturb registered sites.

Author's incredible tale hopes to inspire

MADELEIN HAYES

Growing up in Tom Price, Nyamal woman Dr Tracy Westerman had never met a psychologist. Yet she went on to become the first Aboriginal person in Australia to complete a PhD in clinical psychology, rising to become one of the country's leading practitioners.

With a host of impressive achievements, such as recently establishing her charity, Westerman Jilpa Institute for Indigenous Mental Health, which nurtures Indigenous people from high-risk communities to become psychologists, Dr Westerman visited Karratha for the launch of her memoir Jilpa, How one Indigenous woman from the remote Pilbara transformed psychology.

"I have spent my life challenging systems and that means the one-size-fits-all view of mental health that serves very few of those in mental health distress, and that's frightening because those in distress are usually from our most marginalised communities," Dr Westerman said.

"Those systems have been built by non-Aboriginal people to serve the needs of non-Aboriginal people."

"From child protection to justice to mental health, it is a system that is unwavering in its inability to understand and respond to different."

Dr Westerman said she hoped readers would be inspired by not only the story, but to also understand that with passion, energy and a sense of responsibility to our most vulnerable communities, great change can occur.

"This has all been done without a cent of Federal Government funding," she said. "I want non-Aboriginal people to understand that as Aboriginal people we are capable of getting this done and my story shows that, for Aboriginal people I want them to see something that they can be optimistic about.

"If you are frustrated with the pace of change; if you have lost belief that things can get better, this story shows that great change can occur without looking to governments to 'save' us.

"I also hope that those (who attended) the launch have a deeper understanding of the mental health drivers around the disadvantage we are seeing in Aboriginal communities and that it's vital that when Aboriginal people are in the driver's seat, that's our best opportunity to close the gap."

Dr Tracy Westerman travelled to Karratha for the launch of her book. Picture: Dr Tracy Westerman

Woodside Community Grants

Applications open Tuesday, 1 October 2024

The Woodside Community Grants program is part of our commitment to help build local capacity and develop opportunities for community wellbeing.

If your club or organisation has a great idea or needs extra support, Woodside wants to hear from you. Grants of up to $5000 are available to support community initiatives in the City of Karratha and the Shire of Exmouth.

If you're interested in finding out more about our grants program and our role in community, including our Investment Plans, visit us at the Dampier Beachside Markets this Saturday, 12 October from 5.30pm - 8.30 pm.

Applications close Thursday, 31 October 2024.

For more information, please email northwestcommunities@woodside.com

6.8.1.6 Dampier Beachside Markets – 2 November 2024

Location	Dampier
Activity	Dampier Beachside Markets – Guy Fawkes
Date	2 November 2024
Description of the consultation	Woodside hosted a stand at the Dampier Beachside Markets a community event bringing together local businesses selling local products, a variety of food vendors and community groups. The stand was staffed by members from Woodside's Corporate Affairs and First Nations teams. Woodside displayed a QR code at the stand, linked to the 'Consultation activities' page of the Woodside website. Woodside made available printed consultation information sheets on the Angel CCS GPGT Surveys EP.
Advertising and invitations	Woodside advertised the event to enable individuals to self-identify, become aware of the community consultation, and to allow individuals to provide feedback on proposed activities, through the following: • An advertisement published in the Pilbara News on 30 October 2024 (see below) • Social media posts on the Woodside North West Facebook page inviting the public to attend (see below) • A social media post from event host, Dampier Community Association, published on 11 October 2024 inviting public to attend • An advertisement displayed on community noticeboards at Lo's Café in Karratha, and the Karratha and Roebourne libraries • An EP consultation display with QR code (linked to the 'Consultation activities' page on the Woodside website) displayed at Woodside's stand along with current EP consultation information sheets (see below).
Estimated number of individuals / organisations consulted	Over 1200 community members (Dampier Community Association) attended the event. Woodside spoke to many community members, recording 10 conversations.
Summary of Feedback, Objection or Claim	
• General queries around employment opportunities. • General interest in the Scarborough progress and Browse, and the future of gas in the energy transition. • EP approval process discussed and why we want to talk to community. No concerns raised. • General interest in the Carbon Capture and Storage (CCS) process. • Discussions around the area's housing market and related industry opportunities.	
Woodside's Assessment of Merits of Feedback, Objection or Claim and its Response	
Whilst feedback was received, there were no objections or claims raised about EPs. Woodside's participation at the markets is part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).	

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

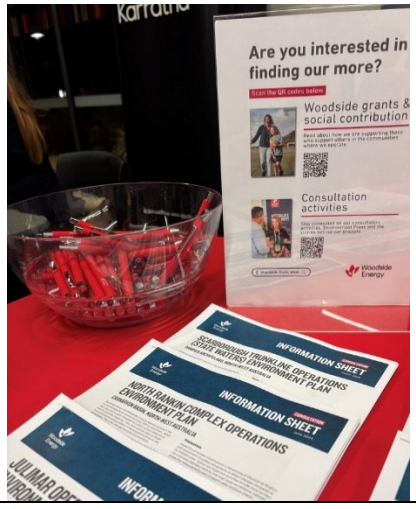
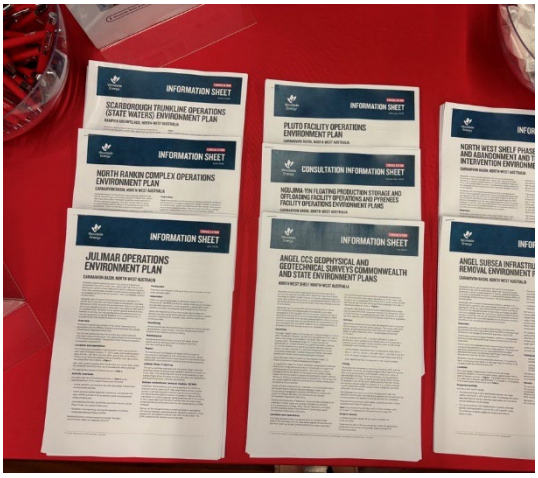
6.8.1.7 Dampier Community Association, 'Who's Who in the Hood' – 18 March 2025





Location	Dampier
Activity	Dampier Community Association – Who's Who in the Hood
Date	18 March 2025
Description of the consultation	Woodside hosted a stand at the Dampier Community Hub available to community members, sporting groups and industry representatives who provide funding opportunities in Dampier. The stand was staffed by members from Woodside's Corporate Affairs teams. Woodside displayed a QR code at the stand, linked to the 'Consultation activities' page of the Woodside website and provided hard copy versions of the March 2025 'Let's Talk' newsletter. Woodside made available printed consultation information sheets on the Angel CCS GPGT Surveys EP.
Advertising and invitations	Woodside advertised the event to enable individuals to self-identify, become aware of the community consultation, and to allow individuals to provide feedback on proposed activities, through the following: • Social media posts on the Woodside North West Facebook page inviting the public to attend (see below)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	• An EP consultation display with QR code (linked to the 'Consultation activities' page on the Woodside website) displayed at Woodside's stand along with current EP consultation information sheets (see below).
Estimated number of individuals / organisations consulted	Over 50 community members (Dampier Community Association) attended the event. Woodside spoke to several community members, recording 2 conversations.
Summary of Feedback, Objection or Claim	
General queries around community grants and what is available from Woodside.	
Woodside's Assessment of Merits of Feedback, Objection or Claim and its Response	
There were no objections or claims raised about EPs. Woodside's participation at 'Who's Who in the Hood' is part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

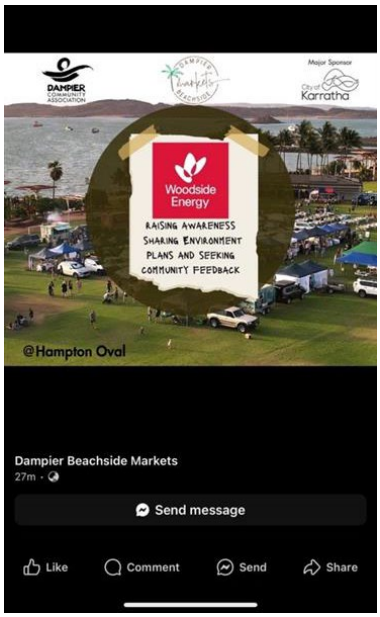
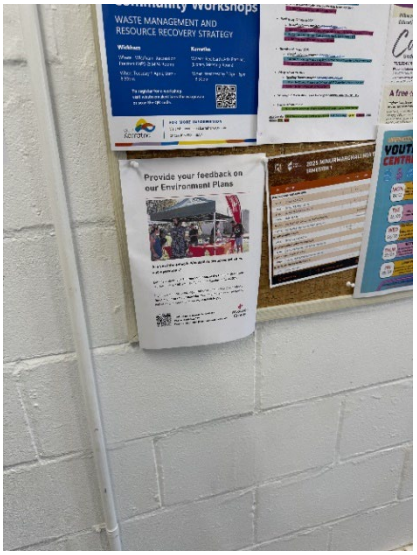
6.8.1.8 Dampier Beachside Markets − 6 April 2025

Location	Dampier
Activity	Dampier Beachside Markets
Date	6 April 2025
Description of the consultation	Woodside hosted a stand at the Dampier Beachside Markets, a community event bringing together local businesses selling local products, a variety of food vendors and community groups. The stand was staffed by members of Woodside's Corporate Affairs, Environment Plan and First Nations teams. Woodside displayed a QR code at the stand, linked to the 'Consultation activities' page on Woodside's website. Woodside displayed and made available printed consultation information sheets on the Angel CCS GPGT Surveys EP.
Advertising and invitations	Woodside advertised the event to enable individuals to self-identify, become aware of the community consultation, and to allow individuals to provide feedback on proposed activities, through the following: • An advertisement published in the Pilbara News on 26 March 2025 (see below) • Social media posts on the Woodside North West Facebook page inviting the public to attend (see below) • A social media post from event host, Dampier Community Association, published on 5 April 2025 inviting the public to attend • An advertisement displayed on community noticeboards at Lo's Café in Karratha, and the Karratha and Roebourne libraries • An EP consultation display with QR code (linked to the 'Consultation activities' page on the Woodside website) displayed at Woodside's stand along with current EP consultation information sheets (see below).
Estimated number of individuals / organisations consulted	Over 1200 community members (Dampier Community Association) attended the event. Woodside spoke to several community members, recording 30 conversations.





This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim
• Queries around employment opportunities, including apprenticeship and trainee opportunities. • Interest in local content opportunities. • General interest in the Scarborough Energy Project progress and Pluto Train 2 and Train 1 modifications projects. • Comments were made about the views of some issue motivated groups. Woodside expressed everyone had the right to share their views in a respectful and peaceful manner. • Conversations on the North West Shelf Project Extension including support for local community, timelines, investing partners, political views and the future of gas in the energy transition. • EP consultation and approval process discussed and why we want to talk to community. No concerns raised. • General interest in Woodsides commitment to emission reduction, positive feedback on meeting commitments. • Discussions around the area's housing market, residential and Fly In/Fly Out workforce. • Several discussions with children about what Woodside does and where gas comes from.
Woodside's Assessment of Merits of Feedback, Objection or Claim and its Response
Whilst feedback was received, there were no objections or claims raised about EPs. Woodside's participation at the markets is part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

6.8.1.12 Dampier Beachside Markets − 18 October 2025

	Location: Dampier
Activity	Dampier Beachside Markets
Date	Saturday, 18 October 2025
Description of the consultation	Woodside hosted a stand at the Dampier Beachside Markets, a community event bringing together local businesses selling local products, a variety of food vendors and community groups. The stand was staffed by members of Woodside's Corporate Affairs team. Woodside displayed a QR code at the stand linking to the 'Consultation activities' page of the Woodside website. Woodside displayed and made available printed Consultation Information Sheets on the Angel CCS GPGT Surveys EP.
Advertising and invitations	Woodside advertised the event to enable individuals to self-identify, become aware of the community consultation, and to allow individuals to provide feedback on proposed activities, through the following: • An advertisement published in the Pilbara News on 15 October 2025 (see below) • A social media post Dampier Community Association Facebook page advising that Woodside would be in attendance at the event (see below) • A social media post via Woodside North West Facebook account advising that Woodside would be in attendance at the event (see below) • An advertisement displayed on community noticeboards at Lo's Karratha, and IGA Good Grocer Karratha • An EP consultation display with QR code (linked to the 'Consultation activities' page on Woodside's website) displayed at Woodside's stand • EP consultation banner with QR code (linked to 'Consultation activities' page on Woodside website), displayed at Woodside's stand along with current EP consultation information sheets (see table below).
Estimated number of individuals / organisations consulted	Over 500 community members attended the event. Woodside spoke to many community members, recording 5 conversations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim
• Queries around employment opportunities. • General interest in the Scarborough Energy Project progress and Pluto Train 2 and Train 1 modifications projects. • Conversation on the North West Shelf Project Extension; pro approval. • Patrons shared their views on future of gas in the energy transition and how this compares to alternative power options; solar and nuclear. • Interest in Woodside's supply of DOMGAS to WA. • Environment Plan community consultation and approval process discussed and why we want to talk to community. No concerns raised. • Discussions with children about what Woodside does and where gas comes from. • Pleasant interactions with Woodside, Woodside contractor company and near neighbour employees.
Woodside's Assessment of Merits of Feedback, Objection or Claim and its Response
Whilst feedback was received, there were no objections or claims. The community information sessions were part of Woodside's broader consultation approach to enable self-identification and provide relevant persons with the opportunity to assess any impacts on their functions, interests or activities, and provide feedback on proposed activities, which is consistent with the intended outcome of consultation (see Section 5.2 of the EP).

OUR PLANS, YOUR SAY

Woodside Energy

WAFIC SEAFOOD AWARDS

Endeavour Foods General Manager Sophie Sharland's empowerment of future leaders in the seafood industry was recognised in early May when she received the Young Achievers Award, sponsored by Woodside Energy, at the 2024 Western Australian Seafood Industry Awards.

This event, hosted biennially by the Western Australian Fishing Industry Council (WAFIC), acknowledges the innovations and achievements within the WA seafood industry.

The Young Achiever Award is one of 14 categories and focuses on individuals who demonstrate positive impacts to the seafood industry.

Sophie is a shining example of the growing number of talented young women working in the commercial seafood industry.

Jo Ferrie, Head of Communities and Social Performance, Woodside Energy and Young Achievers Award recipient, Sophie Sharland.

THE RUNDOWN

Woodside Energy Chief Executive Officer and Managing Director Meg O'Neill has said gas producers are ready to work with government to deliver new supplies critical to the energy transition as she highlighted the importance of removing barriers to investment.

On 21 May 2024, welcoming the release in May of the Federal Government's Future Gas Strategy, Ms O'Neill said it provided a clear statement about the critical role gas plays in Australia's economy and will continue to play in the future.

A key point the Strategy makes is that new sources of gas will be needed to meet demand during the energy transition.

Addressing an Australian Energy Producers (AEP) Conference, Ms O'Neill, who is also AEP Chair, said:

"I am pleased the Government is talking about solutions. The industry is ready to roll up our sleeves and work with the Commonwealth to achieve a solution to a shortage which is supply.

"We welcome acknowledgment in the Strategy that we'll need the right regulatory settings to do so.

"Indeed, the success of the Strategy will be measured by whether it delivers policy reforms that address the barriers to new gas supply and investment."

She said the recent passage of Federal legislation relating to the Petroleum Resource Rent Tax (PRRT) had provided certainty.

The changes bring forward PRRT payments from LNG projects. However, in order to facilitate the PRRT payment amendments, the government held off passing other amendments designed to clarify ambiguity around consultation requirements for environmental approvals.

"This helps us make future investment decisions. But it has come at the expense of addressing the ambiguity in the consultation process for offshore approvals," Ms O'Neill said.

"Leaving this issue unresolved makes the timely development of new energy supply more difficult."

"The industry stands ready to work with the Government to progress these necessary reforms as soon as possible," she said.

COMMUNITY SPOTLIGHT

Karratha Signs

The Scarborough Energy Project will provide a boost to the WA economy and communities, growing jobs and bringing work through the supply chain.

Karratha Signs is one of more than 75 local Karratha businesess who have been working on our Scarborough Energy Project.

Started by Jed and Suzy Griffiths in 1999 in the third bedroom of their home, they have grown to be an award-winning enterprise that operates from premises in Karratha and Port Hedland.

Karratha Signs has designed and manufactured an array of site entry, safety and wayfinding signage for the Pluto Train 2 Project and has been vendors with Woodside since 2022.

Working with Karratha Signs provides Woodside with premium products suited to the Pilbara. The company invests in top-of-the-range equipment to ensure a professional, high-quality result every time.

Using local businesses which understand the areas in which Woodside operates ensures the best possible standards and expertise on the job.

Jed Griffiths said there was a sense of community among the employees on the Pluto Train 2 project.

"We work closely with many different people throughout the company to provide locally made signage that suits their individual requirements. Every member we've spoken to has been open-minded to new signage ideas and eager to assist in the process," Jed said.

"The Pluto Train 2 contract has enabled us to open our doors to more clients – both big and small. We've been able to demonstrate the depth of our professionalism to other high-end customers and ultimately expand our client base."

Click **here** to learn more about Karratha Signs and their work on the Scarborough Energy Project.

TALKING POINT

National Energy Technician Training Scheme

A talk at Exmouth High School on the National Energy Technician Training Scheme (NETTS) inspired Taj, an Exmouth local, to apply for an Electrical Instrumentation apprenticeship.

NETTS is a collaboration between Programmed and several energy organisations including Woodside, to develop skilled workers for the future. It's part of Woodside's commitment to local recruitment and providing opportunities to the communities in which we operate.

The first 12 months of the four-year apprenticeship is based in a structured learning environment to provide apprentices with the skills, knowledge and experience required to transition into an onshore or offshore role. Apprentices are taught a variety of life skills designed to prepare them for the transition from school to the workplace.

Taj spent 12 months training at the Australian Centre of Energy and Processing Training and is now offshore at the Woodside-operated Ngujima-Yin, Floating Production Storage and Offloading oil production facility, located 50 km northwest of Exmouth. Taj will work offshore swings and continue his TAFE courses in Perth.

Taj is one of twelve young people currently being hosted by the Woodside NETTS apprenticeship program which has a 98% apprentice retention rate, and in line with Woodside's commitment to inclusion and diversity, First Nations apprentices account for more than 25% of the intake and around 33% are female.

"I've started learning about basic electrical work and it's been interesting, I'm enjoying it. I'm keen to expand my knowledge and ultimately, finish this apprenticeship and hopefully work for Woodside for a decent amount of time and get back up North." Said Taj, NETTS apprentice.

This story demonstrates just one of the ways our operations and projects continue to enable us to make a difference, both in this community and across the state.

Read our 2023 North West Australia Community Development Report to learn more.

COMMUNITY CONVERSATIONS

Woodside consults with local communities at local events so you can easily come and chat to us about our operations, decommissioning activities, or proposed projects.

Recently our team talked with community members at the Pilbara Summit in Karratha, Dampier Beachside Markets, WA Day Festival in Dampier, Exmouth Community Markets and the Onslow community information night.

We also meet quarterly with Community Liaison Groups in Karratha and Exmouth where we communicate updates and consult with community members on a range of relevant topics.

If you're interested in what Woodside has planned on land and sea, come and chat to our friendly team. Visit us at:

FeNaCing Festival 3rd and 4th of August, Bulgarra Oval, between 10 am and 4 pm.

You can also read our recent Karratha Community Update **here.**

STAY UP TO DATE ON OUR CONTINUED CONTRIBUTION TO THE COMMUNITY WE CALL HOME.

LET'S TALK

INFRASTRUCTURE GETS SECOND LIFE

Woodside's largest ever decommissioning campaign to date is currently in full swing with a range of activities completed or planned across the Enfield, Echo Yodel, Stybarrow and Griffin fields off the coast of Western Australia and activities planned at the Minerva field in Victoria.

Involving the removal of an estimated 35,000 tonnes of infrastructure including more than 350 km of pipe, flowlines and umbilicals and a range of other equipment, approximately 95% is planned to be recycled or reused.

Woodside has engaged a range of contractors (including international contractors) that bring significant subsea experience, technical know-how, and that use specialist offshore vessels for safe and reliable execution of campaign activities. Specialist vessels include mobile offshore drilling units required for well plug and abandonment activities, light construction vessels for removal of subsea structures and pipe, and heavy lift vessels to remove large structures including riser turret moorings.

Woodside is working with a variety of Australian businesses, many with experience supporting defence, mining and refinery disposal, which are assisting the business to complete oil and gas decommissioning activities. Companies such as McMahon, RPA, C.D. Dodd and Birdon are playing leading roles in onshore disposal scopes, adapting established processes and pathways to support the unique requirements of the oil and gas industry.

Because of the specific needs of the campaign, new onshore facilities are being developed by sub-contractors to support and complement existing facilities.

Some large infrastructure, such as the Nganhurra Riser Turret Mooring removed in late 2023, is typically taken to the Australian Marine Complex at Henderson to be cleaned and deconstructed in preparation for recycling and reuse. Infrastructure such as pipe, flexibles and umbilicals are unloaded from offshore up to three times a week at facilities near Onslow including the Port of Ashburton.

The infrastructure is then taken to a facility established by sub-contractors C.D. Dodd and RPA at the nearby Pilbara Regional Waste Management Facility where it is decontaminated and cleaned before it's transported to another C.D. Dodd facility in Karratha for deconstruction and sorting into its constituent parts in preparation for recycling.

Woodside recently hosted Shire of Ashburton President Audra Smith, Cr Brie Healy, Cr Rosanne Kapor, Cr Linton Rumble, and Deputy CEO Jo Sangster at the decommissioning facility near Onslow. With many local businesses supporting decommissioning activities, the site visit was a great opportunity to inform stakeholders about the campaign's progress and the importance of working with the Shire to its success.

"I am immensely proud of the progress we have witnessed during our recent site visit. Woodside's decommissioning campaign, one of the largest in Australia, reinforces our commitment to responsible resource management and environmental stewardship in the Shire of Ashburton.

The efforts of the lead contractor, TechnipFMC, in removing over 35,000 tonnes of offshore infrastructure, and the work of RPA and C.D. Dodd in recycling these materials, highlight the impressive collaboration and innovation driving this project. This initiative not only supports our goal of sustainable development but also contributes significantly to the local economy. As we move towards completing this campaign by the end of 2025, I am confident that our continued dedication will produce outstanding results for both the industry and the community." – Shire of Ashburton President Audra Smith.

Shire of Ashburton President Audra Smith, Cr Brie Healy, Cr Rosanne Kapor, Cr Linton Rumble, and Deputy CEO Jo Sangster visiting the decommissioning facility near Onslow.

6.9.1.2 Edition 4 – November 2024

Woodside Energy

Let's Talk

Our Plans, Your Say

Edition 4 | November 2024

The rundown

North West Shelf Visitors Centre welcomes Wanparta

The Ngarla people at the North West Shelf Visitors Centre.

We acknowledge the unique connection that First Nations communities have to land, waters and the environment and seek to consult them in relation to our operations and proposed projects.

As part of our ongoing consultation with First Nations groups, Woodside Energy recently hosted 13 Traditional Owners from Ngarla country at the North West Shelf Visitors Centre, so they could see our operations first hand.

The Ngarla people are the Traditional Owners of an area of land east of Port Hedland that covers the De Grey and Pardoo pastoral stations in Western Australia's North West.

Woodside Manager First Nations Engagements, Michael Roe said that Wanparta Aboriginal Corporation as the Prescribed Body Corporate for the Ngarla people, had been identified as a relevant person to consult with on previously submitted and present Environment Plans.

"The Ngarla people were interested in learning more about the world of gas, and as part of the consultation process were invited to Karratha for a visit to the North West Shelf Visitors Centre overlooking the Karratha Gas Plant."

"This provided an occasion to build trust and understanding whilst providing the opportunity to provide feedback on our activities. In this case we were consulting on the five-yearly review of the Pluto Facility Operations Environment Plan." said Michael.

An accepted Environment Plan is required in order for Woodside to carry out activities. Meaningful conversations with First Nations people are documented and make up part of an Environment Plan submitted to regulatory bodies for assessment ahead of continued operation.

Wanparta Aboriginal Corporation Chairperson, Mary-Jo Coppin said, "the trip was really informative with good consultation, well organised and we felt very welcome at the facility."

A key element of Woodside's consultation efforts is our willingness to be flexible and adaptable to suit the audience in our overall efforts to avoid or minimise potential impacts from our operations.

Munro's Mack10k Fishing Competition

Munro's Mack10k 2024 Fishing Competition, held in Onslow from 24-25 August 2024, saw hundreds of anglers and fishing enthusiasts from across Australia enter into the running for a chance to reel in $10,000.

The event doubles up as a research initiative, spearheaded by Recfishwest's Fishing for Science program and supported by Woodside Energy.

Working with the Department of Primary Industries and Regional Development, the Recfishwest science team collected biological samples from mackerel caught by competitors, providing insight into the health of the local fish population.

Read more about the annual competition, hosted by the Ashburton Angler Fishing Club by visiting: recfishwest.org.au

Community spotlight

Wangarri Crane and Equipment Hire

Murujuga Commercial Limited's (MCL) first Pilbara business, Wangarri Crane and Equipment Hire (Wangarri), has been awarded the contract for supply and maintenance of cranes and forklifts for the Pluto Train 2 Project, the onshore component of the Scarborough Energy Project.

Established by MCL as a joint venture with Boddington's Hire, Wangarri provides a range of lifting equipment that includes cranes, forklift trucks, reach stackers and telehandlers for hire to the resource sector and other industrial clients across the Pilbara.

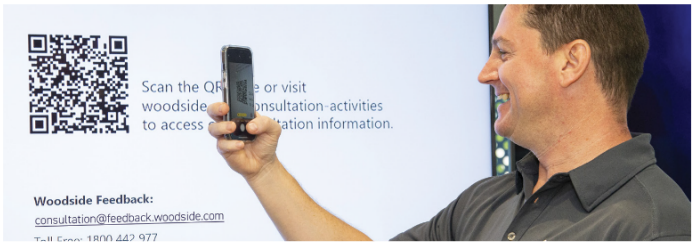
One of five commercial ventures managed by MCL, Wangarri forms a portfolio of businesses and commercial ventures that aim to provide a strong and economic future for its Murujuga members.

Wangarri means "Coming to Life" in Yindjibarndi, which represents MCL's journey as it moves from a start-up phase toward building business streams that align to the strategic goals and objectives of the Murujuga Aboriginal Corporation.

Bechtel, the appointed contractor for the Pluto Train 2 project, delivers engineering, procurement, construction and commissioning, has awarded contracts to local Indigenous businesses, such as Wangarri to deliver a variety of work scopes.

"We are very happy to be working with Wangarri on Pluto Train 2. We deeply value this local contract and appreciate their professionalism and dedication to providing safe and high-quality cranes and forklifts." said Bechtel Pluto Train 2 site manager Terry Klowss.

Jig Albert, MCL Managing Director said the contract with Bechtel on Pluto Train 2 had been an enormous stepping stone for their business.



"We have been contracted to provide a range of the smaller cranes for the project. Mostly this consists of Franna pick and carry cranes, however we are also providing a 160 tonne all-terrain crane and a small three tonne Maeda spider crane, as well as the ongoing maintenance of these machines," said Jig Albert.

"It has given our business the confidence to invest in our own equipment which will drive equity for the business and in turn provide a direct return to Murujuga Aboriginal Corporation members."

Learn more about Wangarri Crane and Equipment Hire and their work on the Scarborough Energy Project

The importance of consultation

"Like safety, consultation continues to be a core focus for NOPSEMA," Sue McCarrey, CEO, NOPSEMA *(Source: The Regulator, 2024, Issue 2)*

Consultation is a key component of Woodside's environmental planning and can involve a two-way process with relevant persons who wish to provide feedback on operations or proposed offshore activities.

Consultation enables Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. It is a key requirement of Australia's offshore environmental management framework and Environment Regulations.

An appropriate consultation approach which meets regulatory requirements enables Regulators such as the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for Commonwealth activities, or the Department of Energy, Mines, Industry Regulation and Safety for state activities, to assess and accept Environment Plans (EP).

Woodside is committed to open and transparent consultation and does this by providing clear information on proposed activities, assessing and responding to objections or claims about the activity, and providing a reasonable period of time and opportunity for a relevant person to provide feedback.

If required due to the nature and scale of a proposed activity, Woodside undertakes additional consultation activities over a longer period to ensure a reasonable period of time period and sufficient information has been provided. This allows for an informed assessment of the possible consequences of the activity on stakeholders' (referred to as a 'relevant person' under Commonwealth regulations) functions, interests or activities.

Subscribe to stay up-to-date

On Woodside's website we enable members of the public to subscribe to receive information about EPs as it becomes available.

Subscribing is a great way to stay informed about updates and important information related to Woodside's activities. It also provides the public with timely notifications about new projects, environmental initiatives, community engagements, and consultation information sheets for proposed activities.

Woodside has updated its consultation email address to consultation@feedback.woodside.com

To subscribe to Woodside's consultation activities **click here** and enter your details on the page.

Milestone celebrations at FeNaCING Festival

The City of Karratha recently hosted the FeNaCING Festival, bringing together community and celebrating the region's key industries – iron (Fe), sodium chloride, commonly known as salt (NaCl), and natural gas (NG).

Woodside Energy, along with its joint venture partners, proudly supported the event, with a pavilion that featured Woodside's 70th anniversary as a company and 40th year of safe and reliable operations in the North West.

Woodside CEO Meg O'Neill made a special appearance at the festival, meeting local community members and helping with a range of giveaways on offer.

Meg praised the event organisers who successfully celebrated the community spirit that makes Karratha a great place to live and work.

"We know that such a significant milestone could only be achieved with the support of our people and the Karratha community," she said. "I was really thrilled to have the opportunity to join our team in the Woodside marquee as they engaged with the community about issues that matter to them and answered questions about our operations and growth projects."

Many attendees who visited the Woodside marquee expressed curiosity about Woodside's Environmental Plans and other topics including Carbon Capture and Storage, the Scarborough Energy Project and the development of Browse.

Woodside's active participation in events like the FeNaCING Festival supports our consultation approach to engage the community on our current business activities, including opportunity to provide feedback on our Environment Plans.

Woodside Energy CELEBRATE 70

6.9.1.3 Edition 5 – March 2025

Woodside Energy

Let's Talk

Our Plans, Your Say

Edition 5 | March 2025

Heritage auditors walking along eastern outside boundary of Pluto LNG Plant on Murujuga Country

The rundown

Cultural Connections: Woodside's Commitment to Heritage Management

Woodside has operated on the Burrup Peninsula (Murujuga) in the Pilbara region of Western Australia for more than 40 years. We've matured our approach to heritage management considerably over this time, and are proud of the relationships we have built with Traditional Owners and Custodians.

Every year, Woodside works with Traditional Custodians undertaking audits of heritage sites around the perimeter of the Karratha Gas Plant and Pluto LNG Parks. These audits arose from our long-standing consultation with Traditional Custodians regarding Cultural Heritage Management at our onshore facilities.

Both assets operate near National Heritage and Tentative World Heritage listed sites, including Murujuga's petroglyphs (rock art).

The primary purpose of the audits is to monitor the condition of culturally and spiritually significant sites and invite recommendations if the potential for impacts are detected.

"The audits are also an opportunity for Traditional Custodians to connect to areas of a cultural landscape that stretch back tens of thousands of years, and for the community's reassurance that cultural heritage is being managed appropriately on Woodside's leases," said Daniel Thomas, Manager Global Heritage and Human Rights.

The most recent heritage audits were carried out last year over a two week period.

"The feedback from Traditional Custodians was that the sites inspected remain in generally good condition," said Daniel.

"Traditional Custodians did identify some areas in need of additional vegetation management, and that vegetation management was supervised by elders and Indigenous community members in November last year. Another issue identified was rubbish washing up on shore which is also now managed."

Learn more about Woodside's cultural heritage management **here**

A soaring community experience

Western Australia's Pilbara shorebirds undertake a remarkable migration journey of over 10,000 kilometres to breed in the northern hemisphere, sustained by the region's marine cuisine.

Around 70 participants recently attended an annual community event at Hearson's Cove featuring shorebird watching and information sessions, and a tour of the incredible petroglyphs at Nganjarli (Deep George).

The event aims to raise awareness about the significance of the Pilbara coast for shorebirds and the rich cultural heritage of the area. Participants gain insights into the birds' behaviour and contribute to conservation efforts within the community.

Woodside Energy thanks the collective support from co-hosts, Pilbara Ports, Rio Tinto, Yara Pilbara and the DBCA Parks and Wildlife Service who partnered with the Murujuga Aboriginal Corporation Rangers and Birdlife Australia.

Community spotlight Impact felt locally in Karratha

Impact Digi is a Pilbara-based Indigenous owned and operated marketing agency with close to a decade of experience working with Woodside Energy.

A full-service marketing agency, Impact Digi has built relationships with government, industry, Indigenous organisations and businesses of all sizes helping them to build brands and reach stakeholders.

"The past couple of years have been extra rewarding as our reputation has grown within Woodside and we're getting to work with team members from other areas of their business," said Impact Digi Managing Director, Tamara Bin Amat.

Starting off by offering photography services when they first began, Impact Digi has transformed over time with a growing team, refined services and an expanded reach.

"Looking back, one of my favourite moments was when local Asset Manager for the Karratha Gas Plant, Breyden Lonnie presented our first ever award for Best Aboriginal Business at the 2015 Karratha and Districts Chamber of Commerce and Industry (KDCCI) Business Excellence Awards," said Tamara.

With Impact Digi recently winning the Business Excellence Award for Best Small Business at the 2024 Awards, among many other accolades, the recognition continues.

Tamara and her team understand the importance of supporting local and contributing to their community.

"Working with Woodside has not only boosted our business but also our reputation, opening doors to new opportunities across the state," said Tamara.

Continue reading about Impact Digi's experience working with Woodside **here**

Managing Director, Tamara Bin Amat left with her team.

Community partners playing a friendly game of lawn bowls during the sundowner event

Woodsiders ready to chat at Ross St Mall

Talking Point

Engaging Exmouth

Did you know that Woodside has been engaging with the Exmouth community for over 15 years? Woodside operates two Floating Production Storage and Offtake (FPSO) facilities around 50 kilometres off the coast of Exmouth, the Ngujima-Yin FPSO and the Pyrenees FPSO.

In November 2024, Woodside wrapped up the year with a series of engagements with stakeholders, community partners and the Exmouth community.

This included a Community Liaison Group meeting which is a forum co-hosted by Woodside and Santos. The joint approach stemmed from community feedback received around a decade ago, and the collaborative format has been retained to this day. The group meets three times a year and both Woodside and Santos provide updates on activities and community initiatives, inviting members to raise queries and provide feedback.

Woodside recently presented on our climate strategy and invited research partner, CSIRO to share updates on Ningaloo Outlook, a program furthering knowledge on the deep and shallow reefs of Ningaloo Coast World Heritage Area.

Woodside and Santos thanked community partners during a sundowner event at the Exmouth Bowling Club. This was a great opportunity to celebrate shared commitment to positive community outcomes over a friendly game of lawn bowls.

The following day, Woodside held a pop-up Environment Plan consultation stand at Ross Street Mall where locals (including the iconic Exmouth emus) and visitors dropped by to find out more about our activities and proposed plans.

Woodside's active engagement in community illustrates our commitment to open and transparent consultation.

Read about the Woodside supported programs focusing on the unique ecosystem along the Ningaloo Reef and Exmouth Gulf **here**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Community conversations

Open and transparent consultation is important to Woodside. Consulting firm GHD was recently in Karratha to speak with community stakeholders as part of Woodside's socio-economic impact assessments for communities that host Woodside's workforce and assets.

These insights assist Woodside to identify, assess, and manage social impacts and benefits that may arise from different operational and project scenarios in Karratha and aims to uncover new ways for Woodside to partner with the community in the future.

This informs Woodside's future strategies for impact management, community engagement, local content and social investment.

Further consultation will be taking place in April 2025.

If you're interested in what Woodside has planned on land and sea, come and chat to our friendly team and follow the Woodside North West Facebook page for updates, including our Karratha Community Update.

Stay up to date on our continued contribution to the community we call home.

Environment planning continues to move forward

To undertake offshore petroleum or greenhouse gas activities, a titleholder is required to have an accepted Environment Plan, also referred to as an EP, in place.

In accordance with the objectives of the government regulations, the main purpose of an EP is to demonstrate two things. The first is that potential environmental impacts and risks from activities are identified and appropriate management and mitigation controls are implemented to a level that is 'as low as reasonably practicable' (ALARP) and acceptable.

The second ensures activities are carried out in a manner consistent with the principles of ecologically sustainable development set out in the *Environment Protection and Biodiversity Conservation Act 1999*.

It takes extensive work and time to develop an EP. A staged approach includes early planning of the proposed activity, defining the existing environment, consideration of potential impacts and risks to the environment, and identifying appropriate mitigation and control measures to manage risks to ALARP and an acceptable level.

Woodside Environment Plan Delivery Team Lead, Tim Mander, came into his role in 2023 following a number of legal challenges on the consultation processes under the Offshore Environment Regulations.

"Coming into the role was an interesting and challenging time. We navigated our way through this and in 2024, 12 Environment Plans were accepted with activities spanning ongoing operations, decommissioning, drilling, surveys, and installation of subsea infrastructure on the seafloor," Tim said.

"This year again, we have a number of Environment Plans kicking off across a range of different activities. We'll continue to focus on how we improve what we do to ensure our processes and management measures are appropriate to the nature and scale of these activities."

Environment Plans are required for both State and Commonwealth waters, with the National Offshore Petroleum Safety and Environmental Management (NOPSEMA) assessing and accepting Commonwealth EPs and the Department of Energy, Mines, Industry Regulation and Safety assessing and approving State EPs.

Woodside's Commonwealth EPs, currently under assessment and EPs that have been accepted can be viewed on NOPSEMA's website.

Several of the Scarborough Energy Project EPs were accepted in late 2023, including trunkline installation, with the work completed in October 2024

Upcoming engagement opportunities

Roebourne

Monthly Community Luncheon
- 26 March 2025, 11.00 am – 2.00 pm

Woodside Office, 39 Roe Street, Roebourne, WA, 6718

Dampier

Dampier Beachside Markets
- 6 April 2025, 9.00 am – 12 noon
- 4 May 2025, 9.00 am – 12 noon

Hampton Oval, Dampier, WA, 6713

Have your say

Woodside consults relevant persons while preparing our Environment Plans to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse impacts of the proposed activity on the environment.

We welcome your input so please contact us if you'd like to discuss your functions, interests or activities which may be affected by our proposed activities.

You can access our consultation information, provide feedback and subscribe for updates by cicking **here**

6.9.1.4 Edition 6 – October 2025

Woodside Energy

Let's Talk

Our Plans, Your Say

Edition 6 | October 2025

Goodwyn A Platform approximately 140 km north-west of Karratha.

The rundown

Goodwyn Area Infill Development Offshore Project Proposal gets the green light

Following NOPSEMA's acceptance of the Goodwyn Area Infill Development Offshore Project Proposal (GWA OPP), Woodside is planning to develop new gas wells about 140 km north-west of Karratha.

The development will make better use of space at the Goodwyn A platform by bringing in extra gas and condensate from up to 8 new wells.

This is a phased development expected to deliver first gas in 2027-2028.

Environment Plans (EPs) supporting the development include:

- Goodwyn Alpha Geophysical and Geotechnical Surveys (Rev 2)
- Greater Western Flank Phase 4 (GWF-4) Drilling and Subsea Installation – consultation closed 27 August 2025.

We currently anticipate consulting on a revision for the GWA Operations EP that will include the proposed new wells in the first half of 2026.

Upcoming engagement opportunities

Woodside is consulting with local community members at events, making it easy to speak to us about our operations, decommissioning activities and proposed projects.

If you're interested in what Woodside has planned on land and sea, come and chat to our friendly teams at the locations below, follow the Woodside North West Facebook page or email us at consultation@feedback.woodside.com

Dampier

- Dampier Beachside Markets Saturday, 18 October and 8 November 5:30pm to 8:30pm Hampton Oval, Dampier, WA, 6713

Exmouth

- Exmouth Community Markets Sunday, 5 October 8:00 am to 12:00 noon Federation Park, Exmouth, WA, 6707

Community conversations

The way we engage is based on building trust and understanding to support long-term relationships.

We emphasise open and accessible communication and feedback on our activities. One way we do this is by inviting community to engage with Woodside at popular community events.

Woodside and our joint venture partners were pleased again to sponsor the City of Karratha's Red Earth Arts Festival (REAF) at The Quarter where we helped activate and transform the area into a hub of artistic and cultural activity.

This year's festival featured over 100 performances, workshops, and experiences. Over 9,200 people attended the four-day festival, with 90% of programming free to the community.

The main attraction was 'The Whale' installation, which invited viewers to operate the strings of a large whale puppet and its sea friends while listening to whale vocalisations – an immersive experience enjoyed by all ages.

Artists from Yinjaa-Barni Art Group painted and displayed art, welcoming the public to watch the creation of several pieces and engage in conversations.

A community concert featured roving entertainment, stage performances, music, food trucks and markets.

At our Woodside tent, we engaged with the Karratha community discussing Woodside's work in the North West, our EPs, current and proposed projects and we listened to community feedback.

Woodside, on behalf of the Scarborough Joint Venture, was also proud to support the new biennial Ningaloo Sky Festival in Exmouth recently. The three-day event showcased the region's vibrant culture, food and community.

A key event was a market day at Talanjee Oval featuring local artists and makers, roving entertainers, a kite show, animal petting farm and food trucks.

At our Woodside stand, we chatted with visitors about our EPs and Woodside's activities in the Exmouth region, and listened to people's feedback.

Ningaloo Sky Festival drone show.

A drone show highlighting stories of the region's Traditional Owners and a free community concert by iconic Aussie rock band Eskimo Joe capped off the day.

Other events included astronomy talks highlighting the star-filled Ningaloo night sky, unique dining experiences, sunrise yoga, cultural talks and a community movie night.

Woodsiders also met with the Exmouth Community Liaison Group to provide updates on relevant projects and activities.

Talking point

Pygmy blue whales: feeding discovery

In an Australian first, scientists have recorded where and when pygmy blue whales feed as they migrate along the WA coast, thanks to research co-funded by Woodside Energy.

Every year, many whale species and thousands of individual whales migrate through the offshore waters of WA's north-west.

Luke Smith, Woodside Head of Biodiversity and Science, says collaboration with researchers is helping us better understand these whale species and their annual migration.

"In recent years, we – together with our joint venture partners – have invested heavily in numerous whale research programs," Luke points out.

"We continue to deepen our understanding of these magnificent animals and their natural habitat."

One of our research programs focuses on pygmy blue whales, a species that belies its name and can measure up to 24 metres long and weigh 90 tonnes. They undertake an annual northern migration from south-east Australia up through offshore waters of WA to Indonesia before returning five to six months later.

Photo credit: Grace Russell, Centre for Whale Research.

The research led by the Australian Institute of Marine Science and the Centre for Whale Research, found the whales aren't just migrating but also feeding enroute to their Indonesian breeding grounds – something never previously recorded with telemetry in the north-west waters of WA.

Unlike humpback whales, commonly seen as they play and frolic near to shore on their annual migration along the WA coast, pygmy blues spend little time at the surface and migrate in deeper offshore waters. To understand this species we've turned to the latest technology.

Using satellite tags and dive loggers (think Fitbits for whales), scientists tracked nine pygmy blues as they searched for prey.

Previously, it was thought feeding only occurred at the Perth Canyon and Ningaloo but researchers documented them snacking on the go, too.

The whales were recorded performing deep dives with lunge feeding – a high-speed move where they engulf dense swarms of krill.

The findings are helping researchers deepen their understanding of the species' annual migration, while providing us with more knowledge to include in EPs, improving how we avoid or minimise potential impacts.

"As whale species continue to recover and whale numbers migrating through north-west Australia increase, we'll continue to develop technology and approaches to improve our management of whale interactions," reports Luke.

"It's crucial we further reduce potential impacts, support future project approvals and contribute to science along the way."

Luke believes we can continue to successfully co-exist in the marine environment while simultaneously contributing to the study of these complex, remarkable mammals.

Okha FPSO, approximately 115 kilometres north-west of Dampier.

Let's talk about... FPSOs

Woodside has been producing oil from its Australian assets through Floating Production Storage and Offloading (FPSO) facilities since 1995. Woodside currently has three FPSOs in operation in North West Western Australia.

An FPSO facility is a vessel used in offshore oil and gas production, processing hydrocarbons from subsea wells, storing the oil onboard, and offloading it to tankers for transport. During normal operations, an FPSO is operated by 50 to 100 personnel onboard at any given time. These roles include production operators, marine crew, engineers, safety officers, catering staff, and support personnel.

Moored approximately 115 kilometres north-west of Dampier, the Okha FPSO has been producing oil and gas from the Cossack, Wanaea, Lambert, and Hermes oil fields. Crude oil is offloaded to bulk tankers, and LPG-rich gas is exported to the North Rankin Complex before being processed at the Karratha Gas Plant.

Woodside operates two offshore assets off Exmouth: the Ngujima-Yin and Pyrenees FPSO facilities.

The Ngujima-Yin FPSO is located over the Vincent oil field, 50 kilometres north-west of Exmouth. Ngujima-Yin is a Thalanjyi word meaning "to dream". The Greater Enfield Project, completed in 2018, involved developing several oil accumulations through a subsea tie-back to Ngujima-Yin. This project included a major refit of the FPSO, installation of subsea infrastructure, and the drilling of 12 development wells.

The Pyrenees FPSO commenced operations in 2010 and consists of six conventional oil fields located 45 kilometres north-west of Exmouth.

The Ningaloo region is recognised for its high ecological importance, boasting unique environmental, social, and cultural values, extending across 280 kilometers of coastline between Exmouth and Carnarvon. It is a global biodiversity hotspot and was inscribed on the World Heritage List in 2011.

To better understand and manage the environmental features of the region, Woodside has supported a range of multi-year projects through its environmental partnerships program.

These projects focus on iconic species and habitats across different ecosystems along the Ningaloo Reef and Exmouth Gulf. Woodside's social investment and science-funded projects contribute to conservation efforts, biodiversity education, and community engagement at local and regional scales.

You can read more about this significant region by **clicking here**

Scarborough's subsea infrastructure now in place

The Scarborough Energy Project has reached another exciting milestone–this time beneath the waves. The team has successfully completed the penultimate subsea installation campaign, marking a significant step toward first LNG cargo in the second half of 2026.

Approximately 375 km off the Pilbara coast, over 400 pieces of subsea equipment have now been assembled and installed in the Scarborough field, including the impressive 305-tonne Riser Base Manifold. With all critical infrastructure in place and tested, the project is now more than 86% complete (excluding Pluto Train 1 modifications) and ready for the hook-up and commissioning of the floating production unit (FPU) upon its arrival.

The Scarborough Offshore Facility and Trunkline (Operations) Environment Plan (EP) is now approved, setting out how Woodside will manage environmental risks and impacts associated with offshore operations. The EP covers activities such as FPU installation, commissioning, and ongoing operations, as well as inspection, maintenance, and repair of subsea infrastructure.

Read more about the Scarborough Energy Project by **clicking here**

This is the 80m long, 32" diameter rigid pipe spool which weighs approximately 230 tonnes and was fabricated in Henderson, Western Australia.

6.9.2 Karratha Community Update

6.9.2.1 Edition Q2 – April 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

This year, Woodside celebrates its 70th anniversary and four decades of operations in Karratha.

Over this time, we have provided the reliable energy our state needs to power homes and industry.

2024 also marks 35 years since the North West Shelf Project loaded its first liquefied natural gas (LNG) cargo. After delivering more than 6,500 cargoes from the Karratha Gas Plant and Pluto LNG, we continue to supply the gas our international customers require to continue their decarbonisation journeys.

Since 1984, Woodside and its joint venture partners have made lasting contributions to the Karratha community through valued social contribution partnerships, employment and training pathways and opportunities for local businesses. These important and positive impacts were front of mind 40 years ago, and they will be as we embark on a period of change across our North West operations.

As the North West Shelf reserves gradually decline, we are assessing our future infrastructure requirements. We have previously said that we will be retiring one LNG processing train at the Karratha Gas Plant, which could happen as early as this year. We also continue to pursue opportunities to process other resource owners' gas and are focused on remaining a world-class tolling facility, albeit one that may become smaller over time.

At the same time, we are progressing our Scarborough Energy Project and building a second train at our Pluto LNG facility. We are pursuing local new energy opportunities, including the proposed Woodside Solar facility and we are investigating a potential carbon capture and storage project to help decarbonise industry in the Pilbara.

While the North West Shelf will operate differently over the next 40 years, our commitment to the Karratha community remains strong.

Just as the North West Shelf marked itself in Australia's history books in 1984, as we start to write a new chapter in the North West, we will do so together with the Karratha community.

Breyden Lonnie
Vice President North West Shelf

Volunteering WA Regional Community Engagement Coordinator Kelly Nunn (left) with Woodside volunteers at Gumala Early Learning Centre.

WOODSIDE VOLUNTEERS MAKE VALUED CONTRIBUTIONS

At Woodside, we take pride in giving back to the communities in which we operate. One of the ways we do this is through our corporate volunteering program.

Since the launch of the program with Volunteering WA in 2010, Woodsiders have been lending a helping hand with all kinds of community projects. Most recently, volunteers have participated in a range of activities from cooking meals for The Salvation Army to building a sandpit at Gumala Early Learning Centre and assembling furniture for the redevelopment of Roebourne District High School.

Our program partner, Volunteering WA, plays a crucial role in the success of Woodside's volunteering efforts by connecting us with local organisations in need of assistance and facilitating the opportunities to participate.

Volunteering WA's Regional Community Engagement Coordinator, Kelly Nunn said the partnership has delivered some important outcomes for the local community.

"Corporate volunteering offers fantastic opportunities for community organisations to complete ongoing maintenance or projects with the help of Woodside's employees, allowing them to focus on what they do best - providing programs and events for our community," she said.

STAY UP TO DATE ON OUR CONTINUED CONTRIBUTION TO THE COMMUNITY WE CALL HOME.

WORK READINESS PROGRAM CREATES CAREER PATHWAYS

A new Work Ready Program being run as part of the Pluto Train 2 Project is supporting skills development for local participants.

The latest round of the program commenced in February 2024, with participants offered the opportunity to build employable skills and industry experience. Participants complete Construction White Card, First Aid and site induction certifications. During the program, Bechtel offered job shadow placements of participants' choice which provided invaluable insights into the industry, helping them make informed decisions about their futures.

Gaining on the job experience with Bechtel also built work-life balance skills to prepare the graduates for full-time employment.

Sixteen individuals are now ready to commence full-time employment with Bechtel on the Pluto Train 2 site as Trade Assistants. The roles vary for these dedicated participants across various disciplines, including electrical, mechanical, warehousing and concreting.

A large part of the Work Ready Program's success is the camaraderie and culture that has been fostered within the group. As their skills have grown, so have integral and supportive relationships.

Woodside will continue to provide wrap-around support for these motivated participants, identifying long-term training and development opportunities such as apprenticeships, traineeships or roles within operations and projects.

Pluto Train 2 Project Manager, Tom Feutrill said the experience is creating pathways into fulfilling careers and building capability in the local community.

"Woodside's involvement in the program is aimed at establishing employment opportunities and providing successful and meaningful careers while developing critical life skills and confidence," he said.

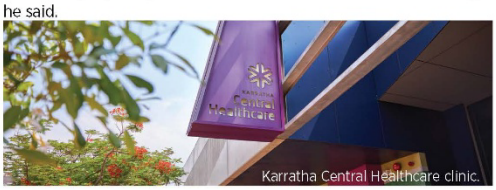
Working with an experienced construction contractor such as Bechtel provides a unique opportunity to be involved in a program that supports meeting the growing demand for the low-cost, lower-carbon, reliable energy the world needs today and into the future.

The Work Ready Program is run by the Ngarliyarndu Bindirri Aboriginal Corporation (NBAC), supported by the Pluto Train 2 Project and the engineering, procurement and construction contractor, Bechtel.

NBAC team members with Work Ready Program graduates.

KARRATHA CENTRAL HEALTHCARE SOLAR POWER SYSTEM INSTALL A SUCCESS

Social contribution plays an important role in building the capacity and capability of community partners to deliver positive impacts in the regions where we live and work. Together with our joint venture partners, Woodside is proud to support those who support others in the City of Karratha.



Allied health services provider, Karratha Central Healthcare is one of the valued organisations Woodside has proudly partnered with. In 2023, the Scarborough Energy Project assisted Karratha Central Healthcare to review its operations and strategies developed to support the not-for-profit's long-term sustainability. The review identified a reduction in operating costs as a key opportunity, with a particular focus on power expenditure.

The Pluto Train 2 Project was pleased to provide funding alongside the City of Karratha for the installation of a solar power system at Karratha Central Healthcare's premises. The system, which was installed by local business Coastal Electrical and Data, will go a long way in helping Karratha Central Healthcare to reduce its power costs.

Karratha Central Healthcare's Operations Manager, Kingsley Murray said the solar power system would help the organisation allocate resources into programs for the local community.

"The solar system has already made a notable difference to our operating costs; on a good day the system is supplying up to 95% of our power needs, and in overcast and lowlight conditions about 35-40%.

"These savings can then be used for our not-for-profit and charitable programs, it's a win for us and a win for our community," he said.

Karratha Central Healthcare clinic.

ACCOMMODATION INITIATIVE ACKNOWLEDGED AT EXCELLENCE AWARDS

In May 2024, the City of Karratha Service Worker Accommodation Initiative was recognised as a finalist in the Community Development category of the Australian Energy Producers' Excellence Awards.

The Service Worker Accommodation Initiative is a partnership between the City of Karratha, Woodside and industry that aims to provide additional affordable rental options for people working in critical service worker sectors in Karratha, like childcare and allied health.

Launched in 2021, the initiative established a pool of housing managed by the City of Karratha and Woodside, offering affordable rental options for service workers. Woodside and joint venture partners at Pluto LNG and the North West Shelf Project are pleased to now contribute 30 houses to the accommodation pool.

If you would like to find out more about the Service Worker Accommodation Initiative, visit the City of Karratha website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

GBSC Yurra team member working on one of the 20 new builds.

BUILDING MOMENTUM WITH LOCAL HOUSING CONTRACT

We understand that housing is an important issue for the Karratha community. And that's why Woodside is working closely with the City of Karratha and other stakeholders to help overcome this challenge.

Some initiatives established to support housing in Karratha include contributing 30 properties to the City of Karratha's Service Worker Accommodation Initiative, the incremental divestment of older housing stock as well as making a small number of properties available for lease on the open market.

Late last year, the Pluto LNG Project also entered into a long-term agreement with Traditional Owner business Karratha Housing Pty Ltd (a subsidiary of Yurra Pty Ltd) for the build and lease back of 20 houses in Karratha.

Under the agreement, 10 homes are being built by GBSC Yurra and another 10 will be constructed by Ngarluma Yindjibarndi Foundation Limited (NYFL) in partnership with Thomas Building.

Work is now well underway on the construction of these new homes, which will be leased back to Woodside for a period of 15 years and are targeted to be completed by the end of 2025.

All of the houses will be maintained by Karratha Housing Pty Ltd as part of the lease agreement that will provide long-term revenue and capital assets to support the Yurra business into the future.

Michael Woodley, Chief Executive Officer at Yindjibarndi Aboriginal Corporation and Yurra Founder said he is very proud of the Yurra team and the partnership that has been established with Woodside over recent years.

"Having long-term contracts such as this enables us to work collaboratively with Woodside Energy on mutually beneficial plans that will create real legacy for our community," he said.

Woodside is also investigating potential options to build up to 60 additional new homes in Karratha to address its future workforce needs.

Our partnership with the City of Karratha helps to support much-loved community events.

WOODSIDE JOINS THE FUN AT RED EARTH ARTS FESTIVAL

Woodside and some of our joint venture partners were pleased to support the City of Karratha's Red Earth Arts Festival (REAF) which featured over 70 performances, workshops, and experiences over four days in May 2024.

This year saw the introduction of REAF at The Quarter which offered a suite of free, family-friendly activities, activating and transforming the area into a hub of artistic and cultural activity.

The Plants of the Pilbara installation was a highlight, a pop-up flower dome sculpture invited viewers to experience the magic of Western Australia's native flora on a larger-than-life scale. Artists from Yinjaa-Barni Art Group painted and displayed art on site, welcoming the public to engage.

Locals were spoilt for dinner choices as part of Karratha City Eats, picnicking on the Quarter grass while enjoying an open-air performance featuring captivating handpan artist Sam Maher and Indigenous songwriter Frank Yamma, crossing cultural and musical boundaries.

The Community Development partnership between the City of Karratha and Woodside and our joint venture partners was extended last year, with support from the Scarborough Energy Project. This supports the continued provision of important and much-loved community events like REAFas well as liveability initiatives and significant City projects.

City of Karratha Mayor Daniel Scott said working together was an integral part of delivering high quality community programs and well-attended community events.

"This support is incredibly important, assisting City operations in the delivery of exceptional events, programming and projects for our residents to enjoy," he said.

Woodside Energy

Karratha Community Update

Edition 3 | 2024

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Earlier this year, I relocated to Karratha and commenced as Asset Manager of the North West Shelf Project's Karratha Gas Plant.

It was a real pleasure to join Woodside's local team at a time when we were celebrating 70 years of Woodside and 40 years of operations right here in the North West.

Karratha is where our story began in Western Australia and Woodside has a proud history of contribution to the place we continue to call home. This year's milestones gave me insight into the longstanding partnerships and strong relationships we've developed with the community over this time.

The North West Shelf Project has contributed more than $300 million within the City of Karratha since our operations began. This investment in the local community and economy continues as we support partnerships and businesses like the ones you will read about in this update.

We are entering a period of change at the Karratha Gas Plant as we undertake work to prepare for the retirement of one of our LNG processing trains later this year. This is an important step in the journey ahead as we navigate the gradual decline of the North West Shelf reserves and continue to pursue opportunities to process other resource owners' gas.

As we manage the future of the North West Shelf alongside our Pluto LNG operations and the growth of the Scarborough Energy Project, we will continue to engage and collaborate with those we work with, partner with and live alongside. We look forward to engaging and involving the local community in the future of Woodside in Karratha, working together to create opportunities in the place we call home.

Derek Paulgaard
Asset Manager North West Shelf Onshore.

Celebration sundowner

On the evening of 18 September, as the sun set over Karratha, we gathered with our local community partners to celebrate both Woodside's 70th year as a proud Australian company and 40 years of operations in the North West.

Our sundowner event, held at the Red Earth Arts Precinct, provided an opportunity to share our appreciation for the local community which has supported Woodside over its decades of operations in Karratha.

Woodside Executive Vice President and Chief Operating Officer Liz Wescott joined us at the event and expressed her gratitude for the role those in attendance continue to play in shaping Karratha into a thriving and connected community.

Liz also announced a one-off large grant round, supported by Woodside and its Joint Venture participants in the North West Shelf Project and the Scarborough Energy Project's Pluto Train 2.

With applications open throughout October, the Woodside Anniversary Grants will provide funding of up to $100,000 to community groups and not-for-profit organisations in the City of Karratha to support health, liveability, sustainability and environmental outcomes.

Thank you to all who joined us in marking such a special occasion.

Winyama awarded construction contract

This year, Woodside awarded its largest ever Traditional Owner construction contract to Karratha company Winyama Contracting Group (Winyama). The contract was awarded for the delivery of civil works for the Pluto Train 1 Modifications Project. Winyama will work alongside Kellogg Brown & Root Pty Ltd., the project's engineering, procurement and construction management contractor.

Winyama is a 100% Karratha-owned and 50% Indigenous-owned provider of civil, construction and mining services and renewable asset hire that prioritises spend with local and Indigenous suppliers. The name Winyama, meaning Sea Eagle in the Ngarluma language, symbolises the company's mission to provide economic opportunities and prosperity for local Aboriginal people. It is a bird that has held significance through the female line of Ngarluma majority owner Arthur Ramirez's family for generations.

Woodside Pluto Expansion Project Manager Paul Baker said Woodside was thrilled to be partnering with Winyama for the delivery of the civil works for the Pluto Train 1 Modifications Project and supporting the delivery of local business and employment outcomes for the Pilbara.

"By engaging a local Indigenous-led and owned contractor, we're securing the delivery of an important service while contributing to the local economy. The contract will also support the growth of Winyama, increasing the company's capacity to deliver services to other industries across the Pilbara," he said.

Arthur Ramirez, Winyama Chairman and Indigenous Business Manager, said the new supply agreement with Woodside was a major milestone for Winyama.

"This project will allow our team to grow by about another 65 new employees, with the majority being residential employees.

"Being engaged on the Pluto Train 1 Modifications Project will help fulfil Winyama Contracting Group's vision to increase its footprint in the region, which will enable us to increase our focus on outcomes for Aboriginal people through our reflection Reconciliation Action Plan.

"We are really proud that Woodside has chosen a local Karratha-based Indigenous business to execute a major portion of one of their largest current projects, showing they live their values and support local and Indigenous business growth in the region," he said.

Winyama, KBR and Woodside representatives at Pluto LNG.

Healing comes from Country

Roebourne-based start-up Warridahs of the Ngurra (WOTN) aims to build awareness and respect for traditional bush medicine and share cultural knowledge. Meaning 'Women of Country' in Ngarluma language, WOTN was founded in 2023 by Ngarluma and Banjima woman, Kylie Mowarin.

Kylie's years of dedication to exploring the uses and benefits of native plants have seen her experiment with the ingredients in teas and ointments. The healing properties of these plants have recently been reinforced by modern scientific research conducted in partnership with Griffith University.

"We are working with Griffith University, testing two traditional plants for their antimicrobial, antioxidant and anti-inflammatory properties. So far, we are seeing very positive results," said Kylie.

With support from Woodside, Kylie recently held a bush medicine workshop on Murujuga alongside local Elders, representatives from Murujuga Aboriginal Corporation, Griffith University and a leading archaeologist.

Students from Roebourne District High School were among the attendees at the workshop at Hearson's Cove. Kylie spoke with students about the scientific attributes of traditional medicines and their gathering methods.

"It's important to pass on our knowledge from our ancestors and for our young ones to understand our cultural connections to Country and how it can help with healing our bodies and minds," said Kylie.

Liz Ritchie, Roebourne District High School Principal, said the students' involvement in the workshop was part of Connected Learning, a program developed with support from the Karratha and Roebourne Education Initiative to link classroom curriculum with cultural knowledge and community.

"We are deeply committed to delivering education that is culturally respectful and meaningful. This work can only be achieved when we have the guidance, support and expertise of our families, community advisors, and Elders.

"Participating in the Warridahs of the Ngurra workshops enables our young people to demonstrate practical applications of the learning that occurs in class and on-Country throughout the term.

"The day was an authentic example of how curriculum delivery in a culturally responsive and connected way leads to deep two-way learning of skills and knowledge," she said.

Looking ahead, WOTN plans to create a healing hub in Roebourne, which aims to balance education, wellbeing, and a sustainable business by building upon a range of products Kylie has been developing with native plants.

"We also plan to provide on-Country tours, which will provide economic prosperity for our people through employment and educating women in how to run a business," said Kylie.

Kylie Mowarin with students from Roebourne District High School at Hearson's Cove.

KREI supports student revision seminars

For more than 15 years, Woodside and its Joint Venture participants have contributed to programs aimed at enhancing academic achievements among students in the City of Karratha. Since the establishment of the Karratha and Roebourne Education Initiative (KREI), a key focus has been to bridge the gaps in opportunities available to local students and their peers in metropolitan areas.

During the recent school holidays, the KREI supported a group of Year 12 students from St Luke's College to travel to Perth for a 10-day educational experience. The local students participated in a series of intensive revision seminars, designed to prepare them for their WACE examinations. With small class sizes and personalised help from specialist teachers, students were able to delve into the course material and discuss valuable exam strategies.

While in Perth, the students dedicated time outside the seminars to learn about life at university. They visited several campuses where they engaged in pre-arranged faculty workshops and met with student ambassadors to gain valuable insights into the university environment, academic workload, course offerings and entry pathways.

The students also took the opportunity to explore the university accommodation colleges, helping them to envision their potential future living arrangements and supporting their readiness for their upcoming transition to higher education.

St Luke's College Upper School Pathways Coordinator Carol Potter said this year's revision seminars were an outstanding success.

"We are very fortunate to have the support of the Karratha and Roebourne Education funding, which made both the revision seminars and university visits possible. Our students are now feeling more prepared ahead of their final examinations and transition into tertiary education, away from their family to a big city," she said.

Supporting local students from St Luke's College and Karratha Senior High School to travel to Perth for revision seminars is just one example of Woodside and its Joint Venture participants' contribution to schools in the City of Karratha. Earlier this year, Woodside announced the renewal of the KREI, with five-year community partnership agreements. The renewal builds on a strong history of collaboration and provides continued investment to help local high school and primary school students thrive.

Students from St Luke's College on KREI supported Perth visit.

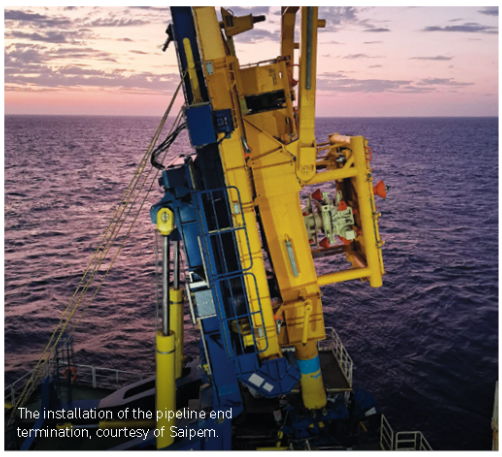
Scarborough trunkline installation a success

This October, Woodside marked an important milestone as it announced the completion of the Scarborough Energy Project's trunkline installation. Once operational, the 433 km trunkline will transport gas from the offshore Scarborough field to the onshore Pluto LNG facility for processing.

Reaching depths of up to 1400 m, the trunkline took around 12 months to install and had numerous teams and contractors contributing to the successful work program.

Woodside Executive Vice President and Chief Operating Officer Australia Liz Westcott said the trunkline was a critical piece of infrastructure for the Scarborough Energy Project.

"The completion of installation is a significant accomplishment, reflecting the dedication of all involved in achieving this project milestone.



"With the last components of the trunkline in place, the focus will be maintained on safely executing the remaining project scopes to support the targeted first Scarborough LNG cargo in 2026," she said.

Following the successful installation of the trunkline, work will now commence on the pre-commissioning in preparation for hook-up of the subsea infrastructure.

The Scarborough Energy Project was 73% complete in October[1], and is set to help meet demand for the reliable energy the world needs today and into the future. This includes up to 225 terajoules a day of domestic gas supply into the Western Australian market from operations in Karratha.

These volumes will be processed by the recently delivered Pluto Train 2 domestic gas module. The important piece of infrastructure, which arrived in Karratha and was installed in early September, weighs over 1500 tonnes and will connect to the domestic gas export compressor. The domestic gas module is one of the 51 modules that is targeted to be delivered to site by the end of this year.

6.9.2.3 Edition Q1 – April 2025

Karratha Community Update

Woodside Energy

April 2025

Liz Westcott Executive Vice President and Chief Operating Officer Australia.

Woodside hopes to keep on contributing

As seen in the Pilbara News - Wednesday, 12 March 2025.

Last year, Woodside celebrated 70 years as a proud Australian company, and the North West Shelf Project marked 40 years of operations from right here in Karratha.

We are proud to be a part of this community. It's where our story started.

But there is currently a debate playing out that could determine the future of the North West Shelf Project and the ongoing operation of its Karratha Gas Plant.

The North West Shelf Project Extension approval is required to enable operations beyond 2030.

Let's be clear — this approval does not involve expanding our onshore infrastructure or footprint on Murujuga.

It allows us to continue our existing operations across the North West Shelf Project.

In December last year, six years after we applied, the State Government approved the North West Shelf Project Extension proposal, with conditions including cultural heritage, emissions and air quality. We take our responsibility to manage cultural heritage seriously, guided by Traditional Owners, heritage experts and credible science.

Following the robust assessment from the State, a final decision now rests with the Federal Government, and the stakes are high.

The North West Shelf Project supplies 14 per cent of WA's domestic gas — gas that not only powers homes, but also the mining operations and industries that provide many local jobs and underpin the economic strength of the Pilbara and Australia.

The North West Shelf Project alone employs about 900 people, and some 1300 contractors.

Almost 300 Woodsiders and their families live locally and work at the Karratha Gas Plant.

This year they were joined by 22 new apprentices and trainees who were welcomed into the Woodside Training Academy.

In 2024, the North West Shelf Project invested $5.1 million in the Karratha community on initiatives including education, health and liveability. Annually we spend around $1 billion with WA businesses, including contractors and service providers based in Karratha, and in 2024 about 700 WA businesses were engaged by the North West Shelf.

Last year I was pleased to be able to join some of our longstanding partners in Karratha as we celebrated our 40-year milestone.

I spoke with representatives from local schools, businesses and not-for-profit community organisations. I was humbled by what Woodside and the community here in Karratha have built together over the four decades of North West Shelf operations.

And it can continue to contribute, supporting our State's gas supply, the economy and the Karratha community for decades to come.

Extending the life of the North West Shelf Project will enable the future of our world-class operations, using existing infrastructure to produce the gas that local industry needs and our regional partners rely upon.

It enables us to leverage our decades of experience while unlocking long-term value through the development of the remaining North West Shelf reserves and processing of third-party gas.

Importantly, it allows us to make the business decisions today that will help maximise the use of processing capacity at the Karratha Gas Plant into the future.

With the Australian Energy Market Operator forecasting gas shortfalls in WA from 2028, extending the life of the North West Shelf Project makes sense.

But to be in a position to do this, we need a pragmatic approach from our nation's decision-makers. We need timely decisions to provide operational certainty and confidence to support the ongoing development of gas reserves that will keep the Karratha Gas Plant running.

We can all be proud of what the North West Shelf Project has contributed to Karratha over the last 40 years – and we're working to secure its ongoing contribution to the community we call home.

Stay up to date on our continued contribution to the local community Woodside North West

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

L-R: Roebourne District High School Chaplain Beth Smith, Roebourne District High School Principal Liz Ritchie, Woodside CEO Meg O'Neill, WA Premier Roger Cook and Kevin Michel MLA.

Investment continues to reach students in Roebourne

Woodside welcomed the new year with an exciting announcement.

In January, our CEO Meg O'Neill joined us at Roebourne District High School to share details of our significant contribution to the school's redevelopment.

Alongside WA Premier Roger Cook, Meg announced a contribution of $20 million over five years to the upgrades. Woodside's contribution will come from our A$50 million commitment to the Western Australian Government's Resources Community Investment Initiative.

Meg said funding was directed towards programs that deliver tangible benefits for the sustainability and liveability of our host communities.

"Our investment in the Roebourne District High School upgrades builds on our long-term commitment to positive regional education outcomes through the Karratha and Roebourne Education Initiative," said Meg.

For more than 16 years, we have proudly contributed to the Karratha and Roebourne Education Initiative (KREI) together with our joint venture participants. The partnership with local schools invests in opportunities to support the academic achievements of students and the development of their dedicated teachers.

Roebourne District High School is one of the long-standing participants of the KREI.

In 2024, the school developed a program to support students sitting the Western Australian Department of Education's Online Literacy and Numeracy Assessment (OLNA). Designed for secondary students to demonstrate they successfully meet the minimum standard of literacy and numeracy, the OLNA is an important step in supporting students on their path to further study and training.

Several students at the school were identified as requiring additional assistance and intervention to reach an OLNA pass level in one or more of the assessment areas.

Through the support of the KREI, individual learning and social needs of each student preparing to sit the OLNA were assessed so educational support could be tailored. Resources such as one-to-one and small group tutoring opportunities, and online training tools were provided focusing on building the skills required to improve students' OLNA results.

Roebourne District High School Principal Elizabeth Ritchie said the students who participated demonstrated greater levels of confidence when sitting the OLNA, resulting in one of the highest recorded sittings for the test at our school.

"The OLNA achievements of participating students have not only enhanced their own education experience but is positively impacting peers, because our students are actively supporting their classmates to improve their own reading, writing, and numeracy skills," said Elizabeth.

Stay up to date on our continued contribution to the local community Woodside North West

Woodside helps connect Cherratta to Country

Woodside was proud to award a $35 million contract to Cherratta Lodge earlier this year. The agreement marks the first time Woodside has awarded a village accommodation contract to a business owned by a Traditional Owner.

Under the agreement, Cherratta will accommodate the Pluto Train 1 modifications construction workforce, part of the Scarborough Energy Project.

Woodside initiated discussions last year with long-standing partner Cherratta Lodge, based in Karratha's Industrial Estate.

It was then that Cherratta owner Malcolm Wylie raised the prospect of a new partnership that could transition the site into a village owned and operated by a Traditional Owner – someone with traditional connections to the area.

Malcolm's vision was twofold: to give back to the community in which the business operates and for the site to become a leading facility providing career opportunities for Indigenous people.

"Not everyone wants to or can work on a mine site or a gas plant. A place like Cherratta not only provides jobs like gardening, cleaning, catering, access to trades and apprenticeships, it will deliver mentorship and empowerment programs for fledgling Indigenous businesses," said Malcolm.

Together with his business partner Aaron Polini, Malcolm invited Traditional Owner and Ngarluma Elder Harry Mowarin to join them in the ownership of Cherratta, after building a trusting friendship and agreeing on solutions to challenges together.

"As part of Cherratta's new energy projects, the company awarded a $1 million contract to Harry's contracting business," said Malcolm.

"Harry is a Ngarluma Elder who is well respected in the community and during the successful execution of this contract we realised Harry was the perfect fit for Cherratta. Through our programs he could help guide Indigenous people to learn, grow, develop skills and increase their confidence in an environment that is culturally safe, and on their own country."

L-R: Harry Mowarin Traditional Owner and Ngarluma Elder, Malcolm Wylie Cherratta Lodge business partner, Julie Attwood Local Content Manager and Rebekka Scroop Villages Coordinator.

Rebekka Scroop, our Villages Coordinator and Woodside's Local Content Manager, Julie Attwood both realised the potential significance of the agreement and the value it could provide to the local Indigenous community where we operate.

"It made sense. Woodside's contract would provide Cherratta with the confidence and security to support their transition to become a Traditional Owner village by securing a fixed number of rooms over three years, for the Pluto Train 1 modifications workforce," said Rebekka.

"By coming together to work towards a common goal, we had the opportunity to create a significant impact that will leave a lasting legacy for generations to come," said Rebekka.

Harry is overwhelmed by the opportunities this landmark agreement can create for both his family and his people. "This connection with Cherratta is life changing for me and my family."

"It's something that I never thought would be possible in my lifetime. For me, it's generational healing. I want to leave something behind for the emerging generation, for them to set themselves up and have a chance at a decent life," said Harry

Woodside Training Academy graduates and mentor award winners.

Woodside's own Academy Awards

Eighteen apprentices and trainees have joined the ranks of Woodside Training Academy participants who have been welcomed into roles across our operations.

The Woodside Training Academy Graduation and Awards held at Red Earth Arts Precinct saw the cohort celebrated for their achievements in completing their training.

Reflecting on the event, Academy Team Lead Jacqui Meeson said it provided a special opportunity to recognise the entire graduating group and the outstanding performance of individuals throughout their training.

"The award recipients were not only selected for their excellence during their training but also for their dedication, commitment and consistent demonstration of Woodside's values," said Jacqui.

"We are incredibly proud of what all of the apprentices and trainees have accomplished across their learning journey and we look forward to seeing their continued success throughout their careers with Woodside."

Several Woodsiders were acknowledged alongside the graduates for the support they provided the trainees and apprentices during their time at the Academy.

In his opening address, NWS Onshore Asset Manager Derek Paulgaard expressed his thanks for those across the business who played an essential role in contributing to the growth and development of the cohort.

"When the graduates faced challenges throughout their training, they had a network of family and friends to provide support and guide them. They also had a group of trainers, mentors, supervisors and peers who they could rely on," said Derek.

This year, 22 Karratha-based apprentices and trainees have been recruited by our partner Programmed Training Services and will be hosted at the Woodside Training Academy.

The 2025 intake includes seven operator trainees, 10 apprentices, three pre-pathway trainees and two school-based trainees – one trainee from Karratha Senior High School and one from Roebourne District High School.

Thirteen of the training participants are female and 14 are Indigenous. They are now part of the more than 80 apprentices and trainees building their skills and experience across our Western Australian operations.

Stay up to date on our continued contribution to the local community Woodside North West

Dampier Playgroup was previously awarded a Woodside Community Grant to help purchase new play equipment.

Giving back through community grants

Last year, we extended our grant offerings in the City of Karratha in celebration of our 70 years as a proud Australian company and four decades of safe and reliable operations in the place we call home.

Ten community and not-for-profit organisations were awarded Woodside Anniversary Grants of up to $100,000 for programs and activities that deliver positive local outcomes.

This March, we ran our first of two community grants rounds for 2025. If you missed out, don't worry, applications will be open again in October.

We have been running the program for seven years, awarding grants of up to $5,000 to support community initiatives in the City of Karratha and Shire of Exmouth.

It's part of our commitment to building local capacity and supporting opportunities that strengthen wellbeing in the community.

We were excited to announce the recipients of our Woodside Anniversary Grants in January.

Woodside Executive Vice President and Chief Operating Officer Australia Liz Westcott said Woodside and its joint venture participants in the North West Shelf Project and Scarborough Energy Project's Pluto Train 2 were pleased to support these valuable initiatives.

"Karratha is where our Western Australia story began and we understand that being a part of the community is centred on developing strong relationships and making meaningful contributions," said Liz.

"We have done this for 40 years and look forward to continue supporting projects and programs that provide local solutions to local challenges."

Grant recipients included:

- St John Ambulance to help purchase new ambulances and lifesaving equipment across its Karratha, Roebourne and Wickham operations.
- Yaandina Community Services for the installation of air-conditioning in its Roebourne residential detoxification facility.
- Yinjaa-Barni Art to support upgrades at its Roebourne art studio.
- The WA Centre for Rural Health to deliver a business case to support the development of a Centre for Applied Research and Education (CARE) hub in Karratha.
- Reach Us Pilbara for the purchase of equipment for its Karratha cancer support services centre.
- Juluwarlu Group for the delivery of the Yindjibarndi Wellness pilot program for Jadas and Gurri.
- Karratha RSL for the installation of solar panels, battery storage and new air-conditioners in its facility.
- Pilbara for Purpose to support the delivery of cultural competency training for community service providers.
- Karratha Volunteer Fire and Rescue Services to support the upgrade of storage facilities to support year-round storage of firefighting equipment.
- Dampier Community Association for the purchase of kitchen equipment to support activation of the Dampier foreshore kiosk.

If you would like more information about our next round of grants, you can contact us at northwestcommunities@woodside.com.

Listening to our local community

Our approach to social performance at Woodside begins with understanding the potential impacts and opportunities associated with our activities.

Consultants from GHD recently visited Karratha and met with a range of stakeholders to inform Woodside's socio-economic impact assessment. Participants included Woodside's Karratha Community Liaison Group, local businesses, state and local government bodies, social contribution partners and healthcare providers.

During the engagements, participants were presented with a series of scenarios for our ongoing operations and proposed projects in the City of Karratha. Their valuable reflections and insights in response to the scenarios will assist in the identification and management of social impacts and benefits, including opportunities to contribute to the local community.

Woodside's Senior Social Performance Adviser David Collins is leading the assessment scope and said it is important to have the local community be a part of the journey.

"Over the past 40 years of operations, we have built strong relationships in community to enable ongoing engagement across all phases of our activities," said David.

"This is an important piece of work to understand sentiment towards Woodside by listening to concerns and asking how we can best manage impacts on a local level."

The socio-economic impact assessment will continue throughout 2025 as GHD visits community stakeholders in Roebourne.

To find out more about Woodside's approach to social performance please visit our website.

Woodside Energy

Karratha Community Update

July 2025

Woodside and its joint venture partners were proud to support the Red Earth Arts Festival, as The Quarter Sponsor.

Stay up to date on our continued contribution to the local community Woodside North West

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Meet the people of the North West Shelf Project (L-R): Haylee, Aaron and Narelle

Woodside welcomes proposed North West Shelf Project extension

The North West Shelf (NWS) Project has supplied energy to Australian and international customers since the 1980s, investing hundreds of millions of dollars into the local economy and community. It has pioneered the LNG industry in Australia and is a nationally significant asset.

The NWS Project is a major employer in and around Karratha, supporting the development of a local workforce through training and employment pathways and contracting opportunities throughout Western Australia.

After decades of processing only the NWS resources, the Karratha Gas Plant (KGP) now also processes gas for other resource owners, who pay a toll to use the facility. A transformation that enables this landmark facility to continue to supply energy to Western Australia and international markets for decades to come.

State Government approval for North West Shelf Project Extension was received in December 2024 after six years of assessment and appeals.

The Federal Government provided its proposed environmental approval for the North West Shelf Project Extension in May 2025 with proposed conditions. Consultation is now occurring with Government on the proposed conditions.

As part of the State Government approval in December 2024, the North West Shelf committed to a range of environmental management measures, including a significant reduction in air emissions and measures to manage greenhouse gas emissions and to reduce them over time.

In addition, meaningful consultation with Traditional Owners is occurring as part of these conditions, including complying with all air quality objectives and standards arising from the Murujuga Rock Art Monitoring Program.

We remain committed to protecting the Murujuga Cultural Landscape and support its World Heritage nomination. We believe long-term co-existence between cultural heritage and industry is possible when guided by credible science, Traditional Custodian leadership, and genuine collaboration.

Discover the ways the North West Shelf Project holds a special place for our people, the businesses we work with and the Pilbara community by scanning the QR code.

New members join Karratha Community Liaison Group

Woodside is committed to building strong relationships with the community. One way we do this is through our quarterly Community Liaison Group (CLG) meetings.

This month we were excited to welcome new members to the meetings following a review of the group's membership and call for public nominations to fill new community member positions on the CLG.

Meeting quarterly, the CLG is an important platform for Woodside to share information about our operations, gather feedback on current and future activities, and facilitate discussions on issues of importance to the community.

Our meetings cover a range of topics, including operational and project updates, social impacts, local content, environment plans and social investment.

If you're interested in finding out more about the CLG, contact us by email: northwestcommunities@woodside.com or keep an eye on our social media channels for updates.

Woodside's CLG meet quarterly to share information, gather feedback and facilitate discussions.

Impact felt locally in Karratha

Impact Digi is a Pilbara-based Indigenous owned and operated marketing agency with close to a decade of experience working with Woodside Energy.

A full-service marketing agency, Impact Digi has built relationships with government, industry, Indigenous organisations and businesses of all sizes helping them to build brands and reach stakeholders.

"The past couple of years have been extra rewarding as our reputation has grown within Woodside and we're getting to work with team members from other areas of their business," said Impact Digi Managing Director, Tamara Bin Amat

Starting off by offering photography services when they first began, Impact Digi has transformed over time with a growing team, refined services and an expanded reach.

"Looking back, one of my favourite moments was when local Asset Manager for the Karratha Gas Plant, Breyden Lonnie presented our first ever award for Best Aboriginal Business at the 2015 Karratha and Districts Chamber of Commerce and Industry (KDCCI) Business Excellence Awards," said Tamara.

That recognition is continuing with Impact Digi recently winning the Best Small Business Award at the 2024 KDCCI Business Excellence Awards.

Tamara Bin Amat and Jason Miltrup with the Woodside team at EXA 2025 in Perth

Tamara and her team understand the importance of supporting local and contributing to their community.

"Working with Woodside has not only boosted our business but also our reputation, opening doors to new opportunities across the state," said Tamara.

Celebrating 20 Years of Corporate Volunteering at Woodside

This year marks another significant milestone for Woodside: 20 years of corporate volunteering.

We take pride in our long-standing commitment to investing in the communities where we operate, and where our employees live and work. In fact, 20 years ago, Woodside was one of the first companies in Australia to offer volunteering leave to our employees.

Woodside employees are entitled to 12 hours of volunteering leave each year, empowering them to make a meaningful difference in their communities and engage in a variety of activities. In Karratha this includes volunteering at local food banks, participating in beach clean-ups and mentoring young people in educational programs.

Introducing Danielle East. If you've been involved in Woodside volunteering in WA's Pilbara region, chances are you've met Dan.

Since joining Woodside in 2011, Dan has worked across many roles, but none showcase her passion better than coordinating volunteering opportunities for our teams in Karratha.

Dan's commitment to volunteering extends beyond coordination; she actively contributes her time and effort to help those in need. As a long-serving member of the Karratha State Emergency Service, Dan has been instrumental in responding to crises. Earlier this year, following the impact of Category 4 Tropical Cyclone Zelia, she was one of a team of volunteers that assisted a remote Aboriginal community by clearing fallen trees and addressing other emergency response requirements.

"Giving back to the community is in my DNA," Dan shares. "Being able to support my neighbours in need at a time of crisis is essential for me. And I'm grateful Woodside has volunteering programs in place, where I can put my hand up and jump in as and where I'm needed."

Last year alone, Woodside employees dedicated over 650 volunteer hours to community groups and not-for-profit organisations within the City of Karratha. As we celebrate two decades of corporate volunteering, we look forward to continuing our community engagement and making a positive impact, one volunteer hour at a time.

North West Shelf Project supports community housing needs

The North West Shelf Project recently gifted two houses to vital local not-for-profit organisations in the Pilbara region.

This initiative underscores the Project's commitment to fostering community wellbeing and providing essential support to those in need.

One of the houses has been donated to Reach Us Pilbara, an organisation dedicated to providing cancer support services.

This new facility will enable Reach Us Pilbara to expand their services, offering a comforting space for individuals and families navigating the challenges of a cancer diagnosis. The house will serve as a sanctuary where patients can access support, counselling, and respite.

The second house has been gifted to the Salvation Army Karratha Women's and Children's Centre. This centre plays a crucial role in offering refuge and support to women and children escaping domestic violence situations. The additional space will allow the centre to accommodate more families, providing them with a safe and nurturing environment as they rebuild their lives.

By supporting these organisations, the North West Shelf Project aims to help address immediate community needs while contributing to the long-term resilience and wellbeing of the Pilbara community.

One hull of a milestone for Scarborough's FPU

The Scarborough Energy Project has achieved a major engineering milestone with the joining together of the topsides and hull for the Floating Production Unit (FPU).

Constructed separately at two different fabrication yards in China, the joining of the two mega-structures is a significant step forward for the Scarborough Energy Project as it progresses towards first LNG cargo, targeted for the second half of 2026.

The floatover required precise planning and extensive collaboration by all stakeholders. Teams from Woodside, McDermott, QMW and COSCO worked closely on the fabrication of the structures and on safely and successfully bringing them together.

Woodside Executive Vice President & Chief Operating Officer Australia Liz Westcott highlighted what it meant for Woodside and the Scarborough Energy Project, which is now over 82% complete.

"The floatover of the FPU is an engineering marvel and builds on the safe and successful fabrication of the topsides and hull.

"Manoeuvring two structures that each weigh more than 30,000 tonnes at sea is an exceptionally complex operation.

"I am proud of the Woodside and McDermott teams for the safe delivery of the FPU to the integration yard and the completion of this chapter of work. The FPU is a critical piece of infrastructure for this world-class project which continues to be delivered to the highest standard."

The remaining integration work for the FPU will continue at the fabrication yard in Yantai before sailaway to Australia.

Once complete the FPU will be moored 375km off the coast of Karratha. The Scarborough Energy Project is set to produce up to 8 million tonnes of LNG per year and contribute up to 225 terajoules a day of domestic gas supply into the Western Australian market.

6.9.2.5 Edition Q3 – October 2025

Karratha Community Update

Woodside Energy

October 2025

Woodside welcomes approval of North West Shelf Project Extension

The Australian Government's final decision to grant environmental approval for the North West Shelf Project Extension is positive news for Woodside Energy and Karratha as our host community.

The decision provides certainty for the ongoing operation of the North West Shelf Project.

For Karratha and surrounds, this has meant sustained employment, meaningful social contributions, a legacy built on responsible energy development and a deep-rooted connection with the local community.

Over its lifetime, the North West Shelf Project has paid more than A$40 billion in royalties and excise, supported thousands of Australian jobs and contributed over A$300 million to social investment initiatives and infrastructure support in the City of Karratha.

Importantly, the approval follows an extensive environmental assessment and appeal process and includes rigorous conditions to manage the protection of cultural heritage.

This includes conditions that require additional monitoring and management of air emissions to protect the Dampier Archipelago (including Burrup Peninsula or Murujuga).

Woodside is committed to protecting the Murujuga Cultural Landscape and we were a proud supporter of the World Heritage nomination and assessment process, led by Ngarda Ngarli, the Traditional Custodians of Murujuga, on the World Heritage listing.

The internationally peer-reviewed, best-practice science conducted by the Murujuga Rock Art Monitoring Program, led by Murujuga Aboriginal Corporation and Western Australian Department of Water and Environmental Regulation, confirms that with the right controls and collaboration, co-existence of industry and cultural heritage is not only possible, but already happening.

"Over its lifetime, the North West Shelf Project has paid more than A$40 billion in royalties and excise, supported thousands of Australian jobs and contributed over A$300 million to social investment initiatives and infrastructure support in the City of Karratha."

As we shape the future of the North West Shelf alongside our Pluto LNG operations and the development of the Scarborough Energy Project, our commitment to collaboration and consultation remains strong.

We will continue to work closely with our colleagues, partners, and neighbours.

I'm looking forward to supporting Woodside's future in Karratha, reflecting the values and aspirations of the place we have proudly called home for over four decades.

Derek Paulgaard
Asset Manager North West Shelf Onshore

Inspiring futures through work experience

We recently had the pleasure of hosting Programmed work experience students from Karratha Senior High School, Roebourne District High School and St Luke's College Karratha at Pluto LNG and Karratha Gas Plant.

The students had the opportunity to shadow our teams, gaining insights into day-to-day operations and exploring the diverse career pathways available right here in the Pilbara.

Thank you all participating students, we hope the experience sparked some new ideas for your future pathways.

Woodside Energy recognises Aboriginal and Torres Strait Islander peoples as Australia's first peoples.

We acknowledge the unique connection of the Traditional Custodians to land, waters and the environment where we operate in the City of Karratha. We extend this recognition and respect to First Nations peoples and communities around the world.

Community partnerships valued

On the evening of 13 August 2025, we had the privilege of celebrating the incredible contributions of our community partners at our annual Community Partner Sundowner, held at The Shelf, Red Earth Arts Precinct.

Our sundowner event was a heartfelt tribute to the people and organisations making a real difference across the Pilbara.

Hosted by Derek Paulgaard, Asset Manager – North West Shelf Onshore, the event featured inspiring reflections from Sophie Martin, One Tree Community Services Inc. sharing information about our award-winning Roebourne Pathways Program partnership and its impact on local youth and Stacey Giles, Reach Us Pilbara, highlighting vital cancer support services available to families in the region.

Thank you to everyone who joined us to recognise the incredible work happening across the City of Karratha.

The Woodside Community Grant Program opens in October, providing funding of up to $5,000 to community groups and not-for-profit organisations in the City of Karratha to support health, liveability, sustainability and environmental outcomes.

Building community connections: repurposing for a brighter future

Yurra and Woodside Energy made a collaborative contribution to the Roebourne Work Camp by donating 34 tonnes of scaffold boards.

During supplier visits, Local Content Manager, Julie Attwood, realised there was an opportunity to re-purpose redundant scaffold materials, no longer being used at Karratha Gas Plant.

The materials were welcomed by the men at the Department of Justice Roebourne Work Camp. They were used to make furniture for not-for-profit organisations and local community groups, helping participants develop employable skills, as well as providing benefits to Pilbara regional communities.

Some of the projects completed using these repurposed materials include; timber picnic benches for the Roebourne District Hospital, outdoor seating and cubby houses for local schools and daycares, and tables to display the work of local Aboriginal artists. These projects improve community spaces and connectivity, while providing a platform for artists to gain recognition and income.

Read more about the collaboration between Yurra, Woodside, and the Department of Justice and the positive impact on community by scanning the QR code.

Woodside is building for the future: 30 new homes in Karratha

Woodside Energy (Karratha Services) Pty Ltd, has awarded contracts for the construction of an additional 30 new homes in Karratha for Woodside's residential employees. Under the award, 20 new homes will be built by Thomas Building and 10 by Traditional Owner business, Yurra Building, both locally based contractors.

Expected to be completed from mid-2026, the new houses will be owned by Woodside and are additional to the recent construction of 20 new homes under a 15-year build-to-lease agreement with Karratha Housing, a subsidiary of Yurra Building.

Awarding the construction contracts to Thomas Building and Yurra Building is part of Woodside's ongoing commitment to delivering business opportunities that boost jobs and support the local economy. The contracts include provisions for the employment of local apprentices and trainees.

Woodside Pluto Asset Manager Kate Bardill said the new contracts were part of the company's Karratha housing approach, which aimed to providing quality housing options for employees while balancing the needs of the local housing market.

"Woodside's approach to housing includes investment in new builds, the sale of older housing stock on the open market and support for local housing affordability initiatives such as the City of Karratha's Service Worker Accommodation program," said Kate.

Under Woodside's predominantly residential frontline workforce policy, approximately 75% of the company's employees working at its Karratha operations live locally.

Scarborough's subsea infrastructure now in place

The Scarborough Energy Project has reached another exciting milestone–this time beneath the waves. The team has successfully completed the penultimate subsea installation campaign, marking a significant step toward first LNG cargo in the second half of 2026.

Approximately 375 km off the Pilbara coast, over 400 pieces of subsea equipment have now been assembled and installed in the Scarborough field, including the impressive 305-tonne Riser Base Manifold. With all critical infrastructure in place and tested, the project is now more than 86% complete (excluding Pluto Train 1 modifications) and ready for the hook-up and commissioning of the floating production unit (FPU) upon its arrival.

The Scarborough Offshore Facility and Trunkline (Operations) Environment Plan (EP) is now approved, setting out how Woodside will manage environmental risks and impacts associated with offshore operations. The EP covers activities such as FPU installation, commissioning, and ongoing operations, as well as inspection, maintenance, and repair of subsea infrastructure.

Scan the QR code to read more about the Scarborough Energy Project.

This is the 80 m long, 32" diameter rigid pipe spool which weighs approximately 230 tonnes and was fabricated in Henderson, Western Australia.

REAF reflections

This year saw the continuation of Woodside's support for the City of Karratha's Red Earth Arts Festival (REAF). We were proud to once again sponsor 'REAF at The Quarter,' offering a suite of free, family-friendly activities, activating and transforming the area into a hub of artistic and cultural activity.

The main attraction of REAF at The Quarter was 'The Whale' installation; inviting viewers to interact with a large whale puppet and its sea friends while listening to whale vocalisations – an immersive experience enjoyed by all ages.

REAF is moving towards becoming a destination festival for the region, and Woodside and its joint venture partners are proud to support the continued provision of important and much-loved community events, livability initiatives and significant local government projects.

Artists from Yinjaa-Barni Art Group painted and displayed art on site, welcoming the public to watch the creation of several pieces and engage in conversations.

A community concert featured roving entertainment, stage performances, music, food trucks and the Karratha District Chamber of Commerce and Industry markets.

Attendees were treated to Maori cultural displays, Brazilian samba and Chinese dance while enjoying face painting, elaborately costumed stilt artists, Dr Hubble's bubble display, jazz music from the Perth Symphony Orchestra and a calming space at The Inclusive Movement's sensory tent.

Woodsiders enjoyed engaging with the diverse Karratha community discussing Woodside's work in the North West and listening to community feedback on our activities.

The festival finale featured First Lights - Bunggaliyarra Munggu, presented by Fremantle Biennale in collaboration with Juluwarlu Art Group and supported by Woodside and its Pluto Train 2 Joint Venture partners. Woodside is proud to support events like REAF, bringing the community together, strengthening local connections, and fostering a sense of collective pride.

Karratha Volunteer Fire & Rescue Service were Woodside Community Grant recipients, 2024

Woodside Community Grants

Applications open Wednesday, 1 October 2025

The Woodside Community Grants program is part of our commitment to help build local capacity and develop opportunities for community wellbeing.

If your club or organisation has a great idea or needs extra support, Woodside wants to hear from you. Grants of up to $5,000 are available to support community initiatives in the City of Karratha and the Shire of Exmouth.

Applications close Friday, 31 October 2025 and can be completed online at woodside.com/social-contribution

EXECUTIVE SUMMARY

The Angel Carbon Capture and Storage Joint Venture (Angel CCS JV), of which Woodside is the Operator, has developed its oil spill preparedness and response position for the Angel Carbon Capture and Storage Geophysical and Geotechnical (GPGT) Surveys, hereafter known as the GPGT Surveys Program.

This document demonstrates that the risks and impacts from an unplanned hydrocarbon release, and the associated response operations, are controlled to As Low as Reasonably Practicable (ALARP) and an acceptable level. It achieves this by evaluating response options to address the potential environmental impacts resulting from an unplanned loss of hydrocarbon containment associated with the activity described in the Environment Plan (EP). This document then outlines Woodside's decisions and techniques for responding to a hydrocarbon release event and the process for determining its level of hydrocarbon spill preparedness.

A summary of the key facts and references to additional detail within this document are presented below.

Table 0-1: Summary of the key details for assessment

<table>
<tr><th>Key details of assessment</th><th colspan="3">Summary</th><th>Reference to additional detail</th></tr>
<tr><td>Worst Case Credible Scenario</td><td colspan="3">Credible Scenario-08 (CS-08): Instantaneous surface release of 150 m^3 of Marine Gas Oil (MGO) following a loss of vessel containment at the State Waters boundary.
20° 19' 34.0" S 116° 45' 50.2" E
Instantaneous release of 150 m^3 of MGO.
5% residual component of 7.5 m^3</td><td rowspan="2">Section 2.2</td></tr>
<tr><td colspan="3">Credible Scenario-05 (CS-05): Instantaneous surface release of 150 m^3 of MGO following a loss of vessel containment at an offshore location.
19° 34' 19.6" S 116° 32' 56.0" E
Instantaneous release of 150 m^3 of MGO.
5% residual component of 7.5 m^3</td></tr>
<tr><td>Hydrocarbon Properties</td><td colspan="3">Marine Gas Oil (MGO)
MGO is a mixture of volatile and persistent hydrocarbons with low proportions of highly volatile and residual components. In general, about 6% of the oil mass should evaporate within the first 12 hours (BP < 180 °C); a further 35% should evaporate within the first 24 hours (180 °C < BP < 265 °C); and a further 54% should evaporate over several days (265 °C < BP < 380 °C). Approximately 5% of the oil is shown to be persistent. The aromatic content of the oil is approximately 3%.</td><td>Section 6.7.1 of the EP
Appendix A of the First Strike Plan</td></tr>
<tr><td rowspan="3">Modelling Results</td><td colspan="3">Stochastic modelling
A quantitative, stochastic assessment has been undertaken for credible spill scenarios to help assess the environmental risk of a hydrocarbon spill.
A total of 200 replicate simulations were completed for the scenarios to test for trends and variations in the trajectory and weathering of the spilled oil, with an even number of replicates completed using samples of metocean data that commenced within each calendar quarter (50 simulations per quarter).</td><td rowspan="3">Section 2.3</td></tr>
<tr><td></td><td>CS-08: Instantaneous surface release of 150 m^3 of MGO at the State Waters boundary</td><td>CS-05: Instantaneous surface release of 150 m^3 of MGO at offshore location</td></tr>
<tr><td>Minimum time to floating hydrocarbon contact with the offshore edge(s) of any shoreline</td><td>Dampier Archipelago – 3 hours (0.13 days)</td><td>No contact at threshold</td></tr>
</table>

	receptor polygon (at a concentration of 10 g/m^2)			
	Minimum time to shoreline contact (above 100 g/m^2)	Dampier Archipelago at Legendre Island – 8 hours (0.33 days), 69 m^3	No contact at threshold	
	Largest volume ashore at any single Response Protection Area (RPA) (above 100 g/m^2)	Dampier Archipelago at Legendre Island – 69 m^3 (8 hours/ 0.33 days)	No contact at threshold	
	Largest total shoreline accumulation (above 100 g/m^2) all shorelines	Dampier Archipelago at Legendre Island – 69 m^3 (8 hours/ 0.33 days)	No contact at threshold	
	Minimum time to entrained/dissolved hydrocarbon contact with the offshore edges of any receptor polygon (at a threshold of 100 ppb)	Dampier Archipelago and Madeleine Shoals – 3 hours (0.13 days)	No contact at threshold	
Net Environmental Benefit Analysis	Monitor and evaluate, source control (vessel), shoreline protection and deflection, shoreline clean-up, oiled wildlife response, are all identified as potentially having a net environmental benefit (dependent on the actual spill scenario) and carried forward for further assessment.			Section 4
ALARP evaluation of selected response techniques	The evaluation of the selected response techniques shows the proposed controls reduced the risk to an ALARP and acceptable level for the risk presented in Section 2, without the implementation of considered additional, alternative or improved control measures.			Section 6

1 INTRODUCTION

1.1 Overview

The Angel Carbon Capture and Storage Joint Venture (Angel CCS JV), of which Woodside is the Operator, has developed its oil spill preparedness and response position for the Angel Carbon Capture and Storage Geophysical and Geotechnical (GPGT) Surveys, hereafter known as the GPGT Surveys Program.

1.2 Purpose

This document, together with the documents listed below, meet the requirements of the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2023 (Cth)* (Environment Regulations) relating to hydrocarbon spill response arrangements.

- The Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan (EP)
- Hydrocarbon Spill Australia Regulatory Framework
- The Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Oil Pollution Emergency Plan (OPEP) including:
  - Oil Pollution First Strike Plan (FSP)
  - Operational and Scientific Monitoring Bridging Implementation Plan (OSM BIP)[1]
  - Relevant Operations Plans
  - Relevant Tactical Response Plans (TRPs)
  - Relevant Supporting Plans.

1.3 Scope

This document demonstrates that the risks and impacts from an unplanned hydrocarbon release, and the associated response operations, are controlled to ALARP and an acceptable level. It achieves this by evaluating response options to address the potential environmental risks and impacts resulting from an unplanned loss of hydrocarbon containment associated with the activities described in the EP. This document then outlines Woodside's decisions and techniques for responding to a hydrocarbon release event and the process for determining its level of hydrocarbon spill preparedness. It should be read in conjunction with the documents listed in Table 1-1. The location of the activity is shown in Figure 3.1 of the EP.

1.4 Oil spill response document overview

The documents outlined in Table 1-1 and Figure 1-1 are collectively used to manage the preparedness and response for a hydrocarbon release.

The Oil Pollution First Strike Plan (FSP) contains a pre-operational Net Environmental Benefit Analysis (NEBA) summary, outlining the selected response techniques for this activity. Relevant Operational Plans to be initiated for associated response techniques are identified in the FSP and relevant forms to initiate a response are appended to the FSP.

The process to develop an Incident Action Plan (IAP) begins once the oil pollution FSP is underway. The IAP includes inputs from the monitor and evaluate operations and the operational NEBA (Section 4). Planning, coordination and resource management are initiated by the Corporate Incident Management Team (CIMT). In some instances, technical specialists may be utilised to provide expert advice. The planning may also involve liaison officers from supporting government agencies.

[1] In accordance with Regulation 56 of the Environmental Regulations, references to the Operational and Scientific Monitoring Bridging Implementation Plan (OSM-BIP) within this document refer to the OSM-BIP submitted with accepted North West Shelf Phase 1 Plug and Abandonment and TPA03 Well Intervention Environment Plan, which is available on NOPSEMA's website using the following link: https://docs.nopsema.gov.au/A1282743

No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

During each operational period, field reports are continually reviewed to evaluate the effectiveness of response operations. In addition, the operational NEBA is continually reviewed and updated to confirm the response techniques implemented continue to result in a net environmental benefit (Section 4).

The response will continue as described in Section 5 until the response termination criteria have been met.

2 RESPONSE PLANNING PROCESS

This document details Woodside's process for identifying potential response options for the hydrocarbon release scenarios, identified in the EP. Figure 2-1 outlines the interaction between Woodside's response, planning, preparedness and selection process.

This structure has been used because it shows how the planning and preparedness activities inform a response and provides indicative guidance on what activities would be undertaken, in sequential order, if a real event were to occur. The process also evaluates alternative, additional and/or improved control measures specific to the activity.

The Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Oil Pollution First Strike Plan (FSP) then summarises the outcome of the response planning process and provides initial response guidance and a summary of ongoing response activities if an incident were to occur.

2.1 Response planning process outline

This document is expanded below to provide additional context on the key steps in determining capability, evaluating ALARP and hydrocarbon spill response requirements.

Section 1. INTRODUCTION

Section 2. RESPONSE PLANNING PROCESS

- identification of worst-case credible scenario(s) (WCCS)
- spill modelling for WCCS.

Section 3. IDENTIFY RESPONSE PROTECTION AREAS (RPAs)

- areas predicted to be contacted at concentration >100 g/m^2.

Section 4. NET ENVIRONMENTAL BENEFIT ANALYSIS (NEBA)

- pre-operational NEBA (during planning/ALARP evaluation): this must be reviewed during the initial response to an incident to confirm its accuracy.
- selected response techniques prioritised and carried forward for ALARP assessment.

Section 5. HYDROCARBON SPILL ALARP PROCESS

- determines the response need based on predicted consequence parameters.
- details the environmental performance of the selected response options based on need.
- sets the environmental performance outcomes, environmental performance standards and measurement criteria.

Section 6. ALARP EVALUATION

- evaluates alternative, additional, and improved options for each response technique to demonstrate the risk has been reduced to ALARP.
- provides a detailed ALARP assessment of selected control measure options against:
  - predicted cost associated with implementing the option
  - predicted change to environmental benefit
  - predicted effectiveness / feasibility of the control measure.

Section 7. ENVIRONMENTAL RISK ASSESSMENT OF SELECTED RESPONSE TECHNIQUES

- evaluation of impacts and risks from implementing selected response options.

Section 8. ALARP CONCLUSION

Section 9. ACCEPTABILITY CONCLUSION

This document is protected by copyright. 2.1.1 Response Planning Assumptions

Figure 2-2 illustrates the initial steps of a response to an oil spill event and, where available, the indicative timing. For the latter stages, the timing will be specific to the selective response option.

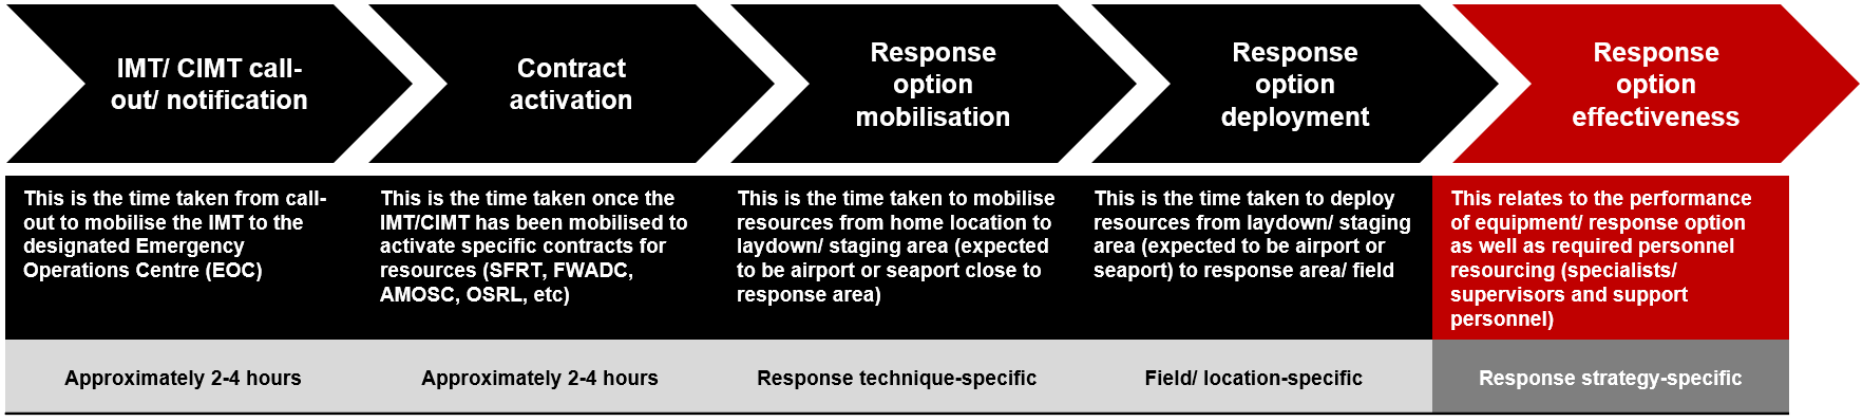

Figure 2-2: Response planning assumption – timing, resourcing and effectiveness

2.2 Environment plan risk assessment (credible spill scenarios)

Potential hydrocarbon release scenarios from the activities have been identified during the risk assessment process (Section 6 of the EP). Further descriptions of risk, impacts and mitigation measures (which are not related to hydrocarbon preparedness and response) are provided in Section 6 of the EP. Two unplanned events or credible spill scenarios for the activities have been selected as representative across types, sources and incident/response levels, up to and including the WCCS.

Table 2-1 presents the credible scenarios for the activities. The WCCS for the activity is then used for response planning purposes, as all other scenarios are of a lesser scale and extent. By demonstrating capability to manage the response to the WCCS, Woodside assumes other scenarios that are smaller in nature and scale can also be managed by the same capability. Response performance measures have been defined based on a response to the WCCS.

Stochastic modelling has been completed for worst-case spill scenarios of an instantaneous surface release of MGO, representing loss of vessel fuel tank integrity after a collision, at two locations:

- 150 m^3 of MGO at the State Waters boundary (CS-08; Figure 2-3); and
- 150 m^3 of MGO at an offshore location (CS-05; Figure 2-4).

The instantaneous surface release of 150 m^3 of MGO at the State Waters boundary scenario (CS-08) is considered to determine the WCCS for response planning purposes as it is the only scenario with hydrocarbons contacting shoreline receptors above response thresholds (>100 g/m^2). CS-05 does not make contact with shorelines above response thresholds or any offshore receptors at or above floating oil thresholds (>50 g/m^2). It does intercept receptors at or above minimum thresholds for operational and scientific monitoring (OSM) purposes, and has therefore been assessed for OSM planning .

2.2.1 Hydrocarbon characteristics

Hydrocarbon characteristics, including modelled weathering data and ecotoxicity, are included in Section 6.7.1 of the EP.

Marine Gas Oil (CS-08, CS-05)

MGO typically classed as an International Tanker Owners Federation (ITOPF) Group I oil. Group I oils are non-persistent and tend to dissipate completely through evaporation within a few hours and do not normally form emulsions.

MGO is a mixture of volatile and persistent hydrocarbons with low proportions of highly volatile and residual components. In general, about 6% of the oil mass should evaporate within the first 12 hours (boiling point < 180°C); a further 35% should evaporate within the first 24 hours (180°C < boiling point < 265°C); and a further 54% should evaporate over several days (265°C < boiling point < 380°C). About 5% of the oil is shown to be persistent. The aromatic content of the oil is about 3%.

The mass balance forecast for the constant-wind case for MGO shows that about 40% of the oil is predicted to evaporate within 24 hours. Under these calm conditions the majority of the remaining oil on the water surface weathers at a slower rate due to comprising the longer-chain compounds with higher boiling points. Evaporation of the residual compounds slows significantly and is then subject to more gradual decay through biological and photochemical processes.

Under the variable-wind case, where the winds are of greater strength, entrainment of MGO into the water column is indicated to be significant. Approximately 24 hours after the spill, around 74% of the oil mass is forecast to have entrained and a further 26% is forecast to have evaporated, leaving only a small proportion of the oil floating on the water surface (<1%). The entrained component remained subsurface under the conditions imposed.

The increased level of entrainment in the variable-wind case results in a higher dissolution of the soluble compounds, with dissolved hydrocarbons forecasted at ~0.5% of the original mass after 12 hours in comparison to < 0.01% in the low-wind case. The proportion of the spill volume that entrains will vary with the timing of the release relative to sea conditions. Entrainment would occur more rapidly if the spill occurred when winds exceed more than a moderate breeze (> 9-10 m/s), generating breaking waves on the ocean surface.

2.3 Hydrocarbon spill modelling

Oil spill trajectory modelling (OSTM) tools are used for environmental impact assessment and during response planning to understand spatial scale and timeframes for response operations. Woodside recognises there is a degree of uncertainty related to the use of modelling data and has subsequently utilised conservative approaches to volumes, weathering, spatial areas, timing and response effectiveness to scale capability to need.

The Oil Spill Model and Response System (OILMAP) and Integrated Oil Spill Impact Model System (SIMAP) models are both used for stochastic and deterministic trajectory modelling. They have been developed over three decades of planning, exercises, actual responses, several peer reviews, and validation studies. OILMAP was originally derived from the United States Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Type A model (French et al. 1996), for assessing marine transport, biological impact and economic damage that was also used under the United States Oil Pollution Act 1990 Natural Resource Damage Assessment (NRDA) regulations. Notable spills where the model has been used and validated against actual field observations include, Exxon Valdez (French McCay 2004), North Cape Oil Spill (French McCay 2003), along with an assessment of 20 other spills (French McCay and Rowe, 2004). In addition, test spills designed to verify fate, weathering and movement algorithms have been conducted regularly and in a range of climate conditions (French and Rines 1997; French et al. 1997; Payne et al. 2007; French McCay et al. 2007).

Further to this, the algorithms have been updated using the latest findings from the Macondo/Deepwater Horizon well blowout in the Gulf of Mexico and validated according to the Deepwater Horizon (DWH) oil spill in support of the NRDA (Spaulding et al. 2015; French McCay et al. 2015, 2016). Finally, the OILMAP and SIMAP models have been used extensively in Australia to prosecute pollution offences, predict discharge locations and likely spill volumes based on weathering and surveillance observations, and has been used as expert witness evidence in Australian court proceedings, aiding the prosecution to determine spill quantum estimates.

2.3.1 Stochastic modelling

Quantitative, stochastic assessments have been undertaken for the credible spill scenarios (refer to Table 2-1) to help assess the environmental consequences of a hydrocarbon spill.

A total of 200 replicate simulations were completed for each of the scenarios to test for trends and variations in the trajectory and weathering of the spilled oil, with an even number of replicates completed using samples of metocean data that commenced within each calendar quarter (50 simulations per quarter). Further details relating to the assessments for the scenarios can be found in Section 6 of the EP.

2.3.1.1 Environmental impact thresholds – Environment that May Be Affected (EMBA) and hydrocarbon exposure

The outputs of the stochastic spill modelling are used to assess the potential environmental impact from the credible scenarios. The stochastic modelling results are used to delineate areas of the marine and shoreline environment that could be exposed to hydrocarbon levels exceeding environmental impact threshold concentrations. The summary of all the locations where hydrocarbon thresholds could be exceeded by any of the simulations modelled is defined as the EMBA and is discussed further in Section 6 of the EP. As the weathering of different fates of hydrocarbons (surface, entrained and dissolved) differs due to the influence of the metocean mechanism of transportation, a different EMBA is presented for each fate within the EP.

A conservative approach – adopting accepted accumulation thresholds for impacts on the marine environment – is used to define the EMBA. These hydrocarbon thresholds are presented in Table 2-2 below and described in Section 6 of the EP.

Table 2-2: Summary of thresholds applied to the stochastic hydrocarbon spill modelling to determine the EMBA and environmental impacts

Hydrocarbon	Surface hydrocarbon (g/m^2)	Dissolved hydrocarbon (ppb)	Entrained hydrocarbon (ppb)	Accumulated hydrocarbon (g/m^2)
Diesel	10	50	100	100

2.3.2 Deterministic modelling

Deterministic modelling is undertaken where initial stochastic modelling has indicated that floating oil is present at a response threshold of 50 g/m^2 and/or where there are shoreline accumulations at a response threshold of 100 g/m^2. The deterministic modelling outputs are then used to scale the required capability for the offshore (surface dispersant and containment and recovery) and/or shoreline responses.

Whilst the modelling undertaken for CS-08 does predict some shoreline contact at the 100 g/m^2 response threshold and floating hydrocarbon at the 50 g/m^2 threshold in open ocean, this is limited in nature. Additionally, the use of surface dispersant and containment and recovery are not deemed feasible for MDO spills due to rapid spreading and weathering as a result of the local metocean conditions, together with its highly volatile nature. Deterministic modelling was, therefore, not required and thus stochastic modelling has been used to scale the response in this assessment.

2.3.3 Response planning thresholds for surface and shoreline hydrocarbon exposure

Thresholds to determine the EMBA are used to predict and assess environmental impacts and inform the operational and scientific monitoring (OSM) program, however they do not appropriately represent the thresholds at which an effective response can be implemented. Additional response thresholds are used for response planning and to determine areas where response techniques would be most effective.

In the event of an actual response, existing modelling would be reviewed for suitability and additional modelling would be conducted using real-time data and field information to inform CIMT decisions.

The spill modelling outputs are presented at response planning thresholds for surface hydrocarbons for the WCCS. Surface spill concentrations are expressed as grams per square metre (g/m^2) (Section 2.2). The thresholds used are derived from oil spill response planning literature and industry guidance and are summarised below.

2.3.3.1 Surface hydrocarbon concentrations

Table 2-3: Surface hydrocarbon thresholds for response planning

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Surface hydrocarbon threshold (g/m^2)	Description	Bonn Agreement Oil Appearance Code	Mass per area (m^3/km^2)
>10	Predicted minimum threshold for commencing monitor and evaluate activities and operational monitoring[3]	Code 3 – Dull metallic colours	5 to 50
50	Predicted minimum floating oil threshold for containment and recovery and surface dispersant application [4]	Code 4 – Discontinuous true oil colour	50 to 200
100	Predicted optimum floating oil threshold for containment and recovery and surface dispersant application	Code 5 – Continuous true oil colour	>200
Shoreline hydrocarbon threshold (g/m^2)	**Description**	**National Plan Guidance on Oil Contaminated Foreshores**	**Mass per area (m^3/km^2)**
100	Predicted minimum shoreline accumulation threshold for shoreline assessment operations	Stain	>100
250	Predicted minimum threshold for commencing shoreline clean-up operations	Level 3 – Thin Coating	200 to 1000

The surface thickness of oil at which dispersants are typically effective is approximately 100 g/m^2. However, substantial variations occur in the thickness of the oil within the slick, and most fresh crude oils spread within a few hours, so overall the average thickness is 0.1 mm (or approx. 100 g/m^2 ITOPF 2011). Additionally, the recommended rate of application for surface dispersant is typically one part dispersant to 20 or 25 parts of spilled oil. These figures assume a 0.1 mm slick thickness, averaged over the thickest part of the spill, to calculate a litres/hectare application rate from vessels and aircraft. In practice this can be difficult to achieve as it is not possible to accurately assess the thickness of the floating oil.

Some degree of localised over-dosage and under-dosage is inevitable in dispersant response. An average oil layer thickness of 0.1 mm is often assumed, although the actual thickness can vary over a wide range (from less than 0.0001 mm to more than 1 mm) over short distances (International Petroleum Industry Environment Conservation Association [IPIECA] 2015).

Guidance from the Australian Maritime Safety Authority (AMSA, 2020) indicates spreading of spills of Group II or III products will rapidly decrease slick thickness over the first 24 hours of a spill resulting in the potential requirement of up to a ten (10) fold increase in capability on day 2 to achieve the same level of performance.

Further guidance from the European Maritime Safety Authority (EMSA) states spraying the 'metallic' looking area of an oil slick (Bonn Agreement Oil Appearance Code [BAOAC] 3, approx. 5 – 50 µm) with dispersant from spraying gear designed to treat an oil layer 0.1 mm (100 µm) thick, will inevitably cause dispersant over-treatment by a factor of 2 to 20 times (EMSA 2012).

Therefore, dispersant application should be concentrated on the thickest areas of an oil slick and Woodside intends on applying surface dispersants to only BAOAC 4 and 5. Spraying areas of oil designated as BAOAC Code 4 (Discontinuous true oil colour) with dispersant will, on average, deliver approximately the recommended treatment rate of dispersant.

Spraying areas of oil designated as BAOAC Code 5 with dispersant (Continuous true oil colour and more than 0.2 mm thick) will, on average, deliver approximately half the recommended treatment rate of dispersant. Repeated application of these areas of thicker oil, or increased dosage ratios, will be required to achieve the recommended treatment rate of dispersant (EMSA 2012).

[3] Monitor and evaluate activities will be undertaken from the outset of a spill whether or not this threshold has been reached. Monitoring is needed throughout the response to assess the nature of the spill, track its location and inform the need for any additional monitoring and/or response techniques. It also informs when the spill has entered State Waters and control of the incident passes to statutory authorities e.g. Western Australia Department of Transport and Major Infrastructure (WA DTMI) or AMSA.

[4] At 50 g/m^2, containment and recovery and surface dispersant application operations are not expected to be particularly effective. This threshold represents a conservative approach to planning response capability and containing the spread of surface oil.

Guidance from NOAA in the United States is found in the document: *Characteristics of Response Strategies: A Guide for Spill Response Planning in Marine Environments 2013 (NOAA 2013).* This guide outlines advice for response planning across all common techniques, including surface dispersant spraying and containment and recovery. It states oil thickness can vary by orders of magnitude within distinct areas of a slick, thus the actual slick thickness and oil distribution of target areas are crucial for determining response method feasibility. Further to this, ITOPF also states in terms of oil spill response, sheen can be disregarded as it represents a negligible quantity of oil, cannot be recovered or otherwise dealt with to a significant degree by existing response techniques, and is likely to dissipate readily and naturally (ITOPF, 2014a, 2014b).

Figure 2-5 below from AMSA's Identification of Oil on Water – Aerial Observation and Identification Guide (AMSA, 2014) shows expected percent coverage of surface hydrocarbons as a proportion of total surface area. Wind-rows, heavy oil patches and tar balls, for example, must be considered, as they influence oil encounter rates, chemical dosages and ignition potential. Each method has different thickness thresholds for effective response.

From this information and other relevant sources (Allen and Dale, 1996, EMSA, 2012, Spence, 2018) the surface threshold of 50 g/m^2 was chosen as an average/equilibrium thickness for offshore response operations (50 g/m^2 is an average of 50% coverage of 0.1 mm Bonn Agreement Code 4 – discontinuous true oil colour, or 25% coverage of 0.2 mm Bonn Agreement Code 5 – continuous true oil colour which would represent small patches of thick oil or wind-rows).

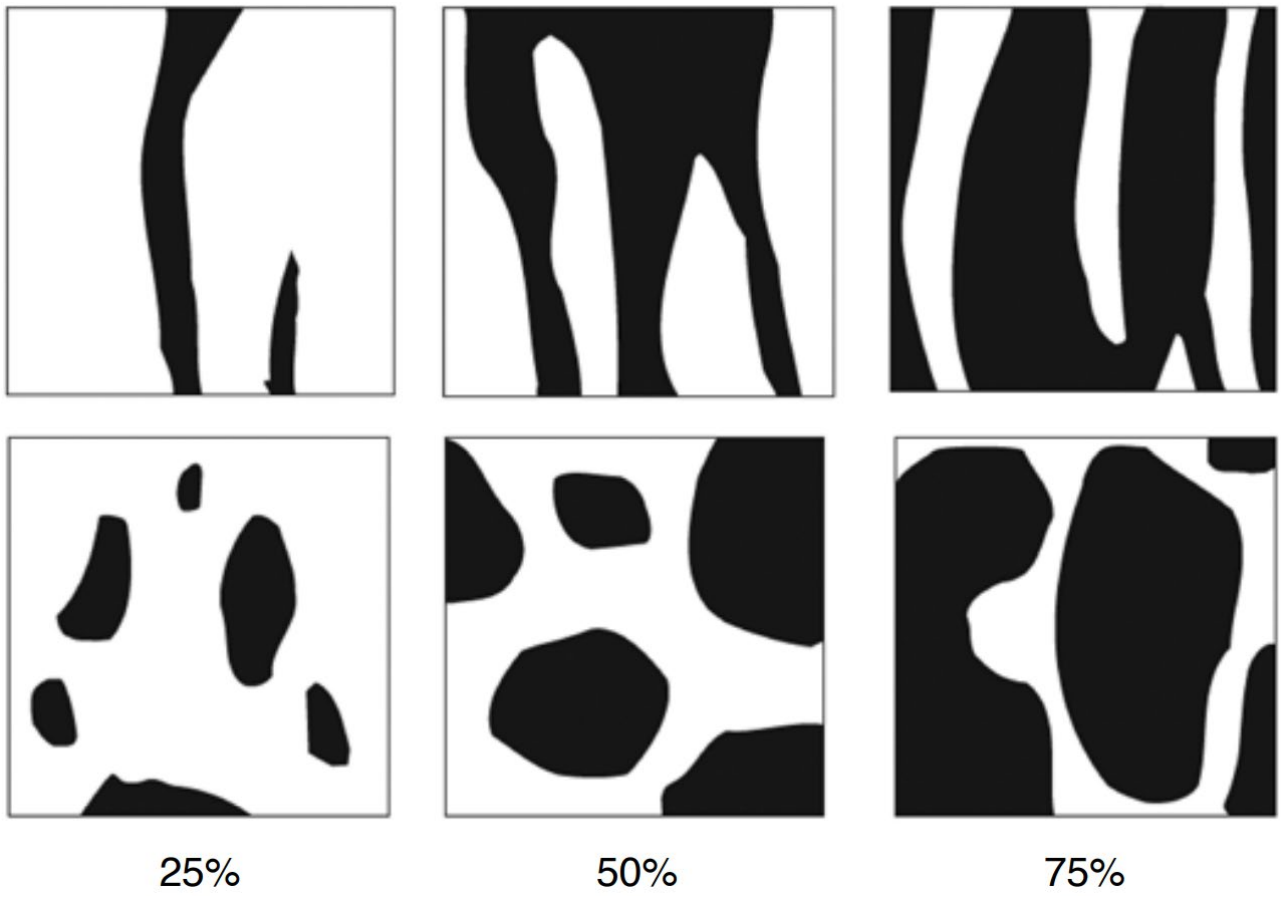

Figure 2-5: Proportion of total area coverage (AMSA, 2014)

Figure 2-6 illustrates the general relationships between on-water response techniques and slick thickness. Wind-rows, heavy oil patches and tar balls, for example, must be considered, as they influence oil encounter rates, chemical dosages and ignition potential. Each method has different thickness thresholds for effective response.

This document is protected by copyright. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

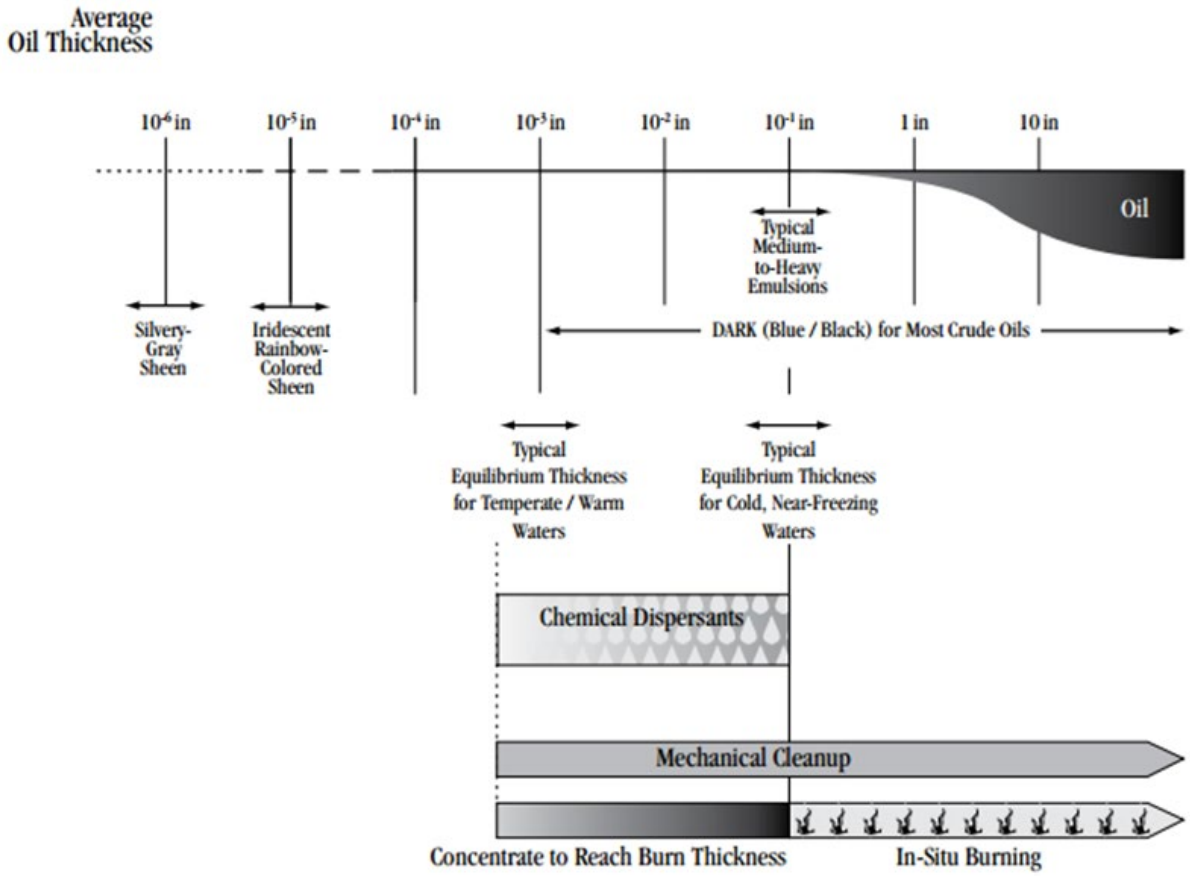

Figure 2-6: Oil thickness versus potential response options (from Allen & Dale 1996)

Wind and waves influence the feasibility of mechanical clean-up operations, dropping the effectiveness significantly because of entrainment and/or splash-over as short period waves develop beyond two to three feet (0.6 to 0.9 m) in height. Waves and wind can also be limiting factors for the safe operation of vessels and aircraft.

2.3.3.2 Surface hydrocarbon viscosity

Table 2-4: Surface hydrocarbon viscosity thresholds

Surface viscosity threshold (cSt)	Description	European Maritime Safety Authority (EMSA)	Viscosity at sea temperature (cSt)
5,000*	Predicted optimum viscosity for surface dispersant operations	Generally possible to disperse	500-5,000
10,000*	Predicted maximum viscosity for effective surface dispersant operations	Sometimes possible to disperse	5,000-10,000

*Measured at sea surface temperature

Further to the required thickness for surface dispersant application and containment and recovery to be deployed effectively as outlined above, changes to viscosity will also limit the treatment of offshore response techniques. As outlined in the EMSA Manual on the Applicability of Oil Spill Dispersants (EMSA, 2012), guidance around changes to viscosity and likely effectiveness of surface dispersant application is provided.

This includes the following statements: “It has been known for many years that it is more difficult to disperse a high viscosity oil than a low or medium viscosity oil. Laboratory testing had shown that the effectiveness of dispersants is related to oil viscosity, being highest for modern ‘Concentrate, UK Type 2/3’ dispersants at an oil viscosity of about 1,000 or 2,000 mPa (1,000 – 2,000 cSt) and then declining to a low level with an oil viscosity of 10,000 mPa (10,000 cSt). It was considered that some generally applicable viscosity limit, such as 2,000 or 5,000 mPa (2,000 – 5,000 cSt), could be applied to all oils.”

However, modern oil spill dispersants are generally effective up to an oil viscosity of 5,000 mPa (5,000 cSt) or more, and their performance gradually decreases with increasing viscosity; oils with a viscosity of more than 10,000 cSt are in most cases, no longer dispersible. Guidance from CEDRE (EMSA, 2012) also indicates products with a range of 500 – 5,000 cSt at sea temperature are generally possible to disperse, while 5,000 – 10,000 cSt at sea temperature above pour point are sometimes possible to disperse, with products beyond 10,000 cSt at sea temperature below pour point are generally impossible to disperse.

To support decision making and response planning, a threshold of 10,000 cSt at sea temperature was chosen as a conservative estimate of maximum viscosity for surface dispersant spraying operations.

The thresholds described above are compared with the modelling results for the WCCS

Table 2-5).

2.3.4 Spill modelling results

Details of the scenario and modelling inputs are included along with stochastic results in Table 2-5.

The selected stochastic runs used to represent the WCCS are:

- Minimum time to floating hydrocarbon contact with the offshore edge(s) of any shoreline receptor polygon (at a threshold of 10 g/m^2).
- Minimum time to commencement of hydrocarbon accumulation at any shoreline receptor (at a threshold of 100 g/m^2).
- Maximum cumulative hydrocarbon volume accumulated at any individual shoreline receptor (at a threshold of 100 g/m^2).
- Maximum cumulative hydrocarbon volume accumulated across all shoreline receptors (at a threshold of 100 g/m^2).
- Minimum time to entrained/dissolved hydrocarbon contact with the offshore edges of any receptor polygon (at a threshold of 100 ppb).

Table 2-5: Worst case credible scenario modelling results

Scenario description	Results	
	CS-08	**CS-05**
WCCS – total volume released Refer to Section 2.1.1 for detailed hydrocarbon characteristics	**Instantaneous release of 150 m^3 of MGO at the State Waters boundary.** Hydrocarbon release resulting from a loss of containment from a vessel collision. Instantaneous release of 150 m^3 of MGO.	**Instantaneous release of 150 m^3 of MGO at offshore location.** Hydrocarbon release resulting from a loss of containment from a vessel collision. Instantaneous release of 150 m^3 of MGO.
WCCS – residual volume remaining post-weathering	5% residual component or 7.5 m^3	5% residual component or 7.5 m^3
Location	20° 19' 34.0" S 116° 45' 50.2" E	19° 34' 19.6" S 116° 32' 56.0" E
Modelling results		
Surface area of hydrocarbons (>50 g/m^2)	N/A	N/A
Surface area of hydrocarbons (>50 g/m^2 and <10,000 cSt)	N/A	N/A
Minimum time to floating hydrocarbon contact with the offshore edge(s) of any shoreline receptor polygon (at a concentration of 10 g/m^2)	Dampier Archipelago – 3 hours (0.13 days).	No contact at threshold.
Minimum time to commencement of hydrocarbon accumulation at any shoreline receptor (at a concentration of 100 g/m^2)	Dampier Archipelago at Legendre Island – 8 hours/ 0.33 days (69 m^3).	No contact at any of the assessed thresholds.
Maximum cumulative hydrocarbon volume accumulated at any individual shoreline receptor (at a concentration of 100 g/m^2).	Dampier Archipelago at Legendre Island – 69 m^3 (8 hours/ 0.33 days).	No contact at any of the assessed thresholds.
Maximum cumulative hydrocarbon volume accumulated across all shoreline receptors contacted by accumulated hydrocarbons (at a concentration of 100 g/m^2)	Dampier Archipelago at Legendre Island (69 m^3) and Keast Island (20 m^3) on day 1.	No contact at any of the assessed thresholds.
Minimum time to entrained/dissolved hydrocarbon contact with the offshore edges of any receptor polygon (at a threshold of 100 ppb)	Dampier Archipelago and Madeleine Shoals – 3 hours (0.13 days).	No contact at threshold.
The full list of response protection areas (RPAs) predicted from modelling is available in Table 3-1.		

From the above modelling results, the shoreline volumes and timeframes predicted for CS-08 are deemed to be the worst-case and have been used as the basis for response planning for the GPGT Surveys Program. CS-05 modelling did not predict contact at any RPAs at any of the assessed floating or shoreline response thresholds for the duration of the spill.

Spreading and weathering of the surface oil occurs rapidly due to the loss of light, volatile components. Dispersant application and containment and recovery are not appropriate for use on spills of MDO due to these weathering characteristics.

3 IDENTIFY RESPONSE PROTECTION AREAS (RPAs)

In a response, monitor and evaluate techniques – including trajectory modelling and vessel/ aerial observations – would be used to predict RPAs that may be impacted. For the purposes of planning and appropriately scaling a response, modelling has been used to identify RPAs as outlined below in Figure 3-1.

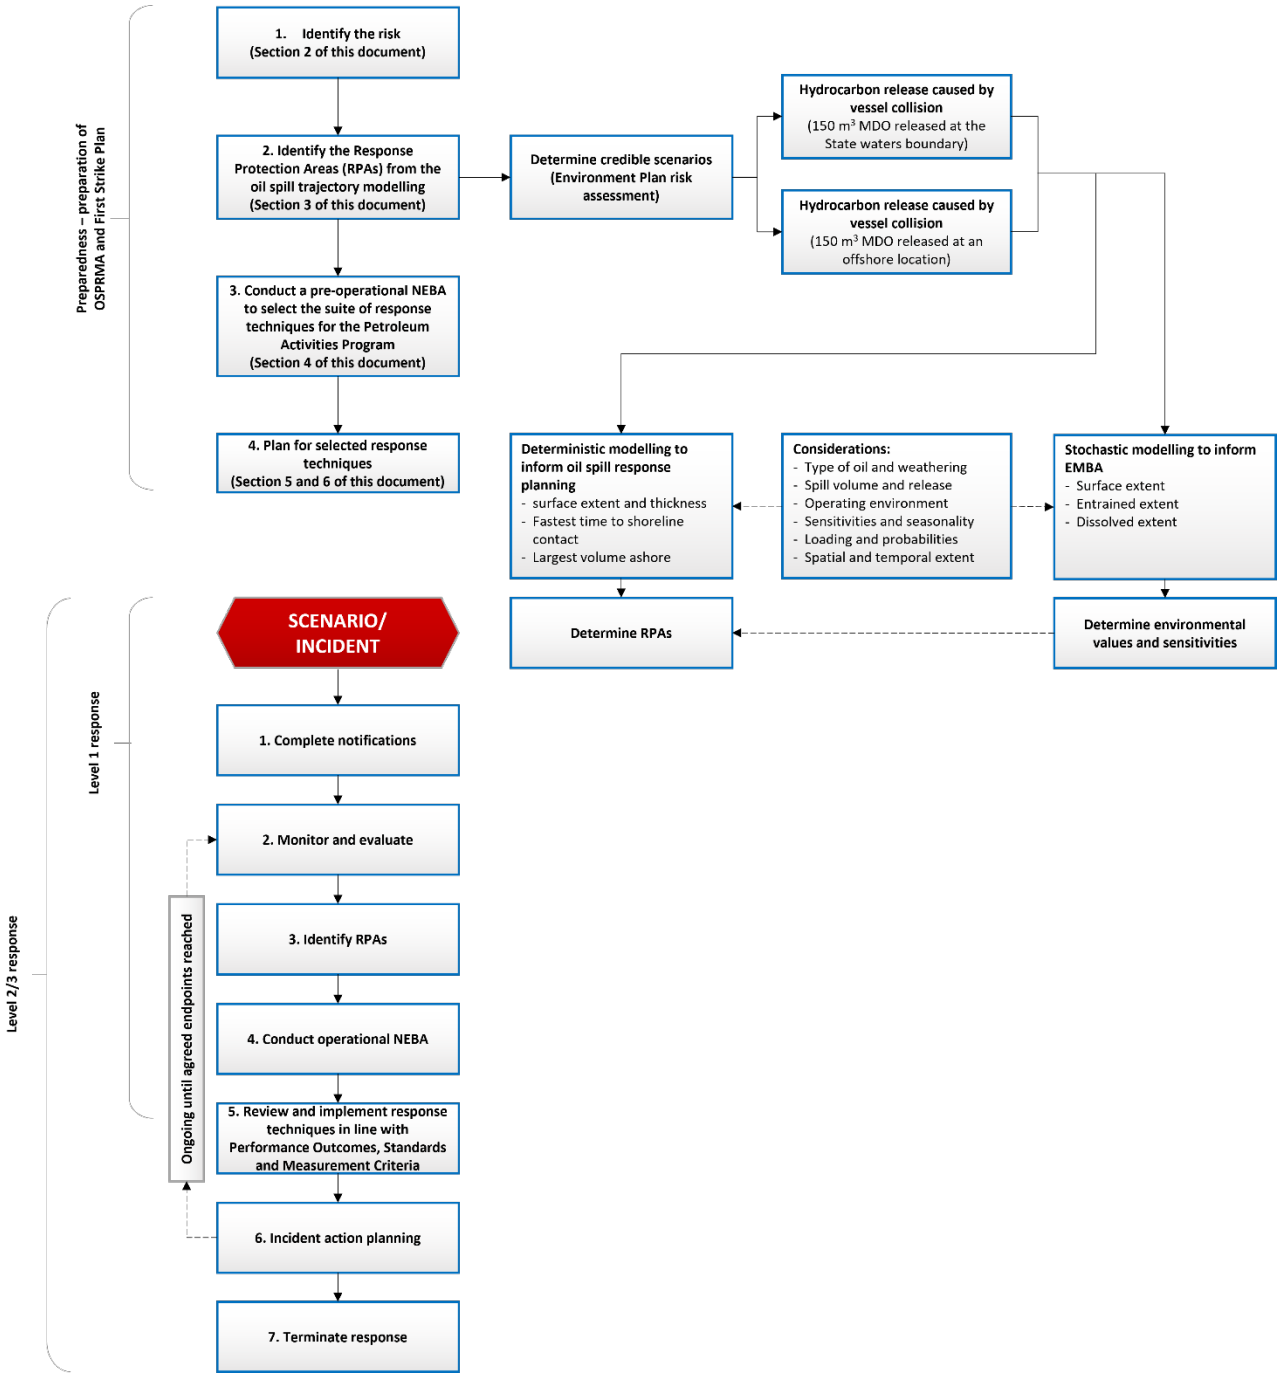

Figure 3-1: Identify Response Protection Areas (RPAs) flowchart

3.1 Identified sensitive receptor locations

Section 6 of the EP includes the list of sensitive receptor locations that have been identified by stochastic modelling as meeting the requirements outlined below:

- receptors with the potential to incur surface, entrained or shoreline accumulation contact above environmental impact thresholds

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

- receptors within the EMBA which meet the following:
  - a number of priority protection criteria/categories
  - International Union of Conservation of Nature (IUCN) marine protected area categories
  - high conservation value habitat and species
  - important socio-economic/heritage value.

3.2 Identify Response Protection Areas (RPAs)

RPAs have been selected on the basis of their environmental ecological, social, economic, cultural and heritage values and sensitivities and the ability to conduct a response based on the minimum response thresholds (Section 2.3.3). It is important to note that the figures outlined in Table 3-1 are the combined results of the individual worst-case runs and do not indicate a single worst case credible scenario (where the timings and volumes are all expected from one release).

From the identified sensitive receptors described in Section 6 of the EP, only those which a shoreline response could feasibly be conducted (accumulation > 100 g/m^2 for shoreline assessment and/or contact with surface slicks >10 g/m^2 for monitor and evaluate activities and operational monitoring) have been selected for response planning purposes. While not discounting other sensitivities, these RPAs have been used as the basis for demonstrating the capability to respond to the nature and scale of a spill from the WCCS and prioritising response techniques.

Table 3-1 outlines locations which were identified from the modelling runs for the WCCS but does not constitute the full list of Priority Protection Areas (PPAs) potentially contacted from stochastic modelling (as per EMBA definition) (see Section 4 of the EP). Other PPA outliers were identified from the modelling and have been included in the assessment of capability in Sections 5 and 6.

Additional sensitive receptors are presented the existing environment description (Section 4 of the EP) and impact assessment section (Section 6 of the EP) for each respective spill scenario. The pre-operational NEBA (Section 4) considers the results from the stochastic modelling to allow consideration of all feasible response techniques are considered in the planning phase, therefore additional receptors are also included in the pre-operational NEBA.

The RPAs identified in Table 3-1 are used to plan for the nature and scale of a shoreline response.

Table 3-1: Response Protection Areas (RPAs) from stochastic modelling

Response protection area	Conservation status	IUCN protection category	CS-08	
			Minimum time to shoreline contact (above 100 g/m^2) in days [5]	Maximum shoreline accumulation (above 100 g/m^2) in m^3 [6]
Dampier Archipelago at Legendre Island	National Heritage Property	N/A	0.33 days	69 m^3
Keast Island	National Heritage Property	N/A	0.71 days	20 m^3
Cape Bruguieres	National Heritage Property	N/A	2.04 days	5 m^3

[5] This volume and time represent the first time to contact on defined shoreline polygon and the maximum volume ashore for that 24 hour period.
[6] This volume and time represent the maximum volume ashore on defined shoreline polygon for any 24 hour time period

4 NET ENVIRONMENTAL BENEFIT ANALYSIS (NEBA)

A Net Environmental Benefit Analysis (NEBA) is a structured process to consider which response techniques are likely to provide the greatest net environmental benefit.

The NEBA process typically involves four key steps outlined in Figure 4-1: evaluate data, predict outcomes, balance trade-offs, and select response options. These steps are followed in the planning/preparedness process and would also be followed in a response.

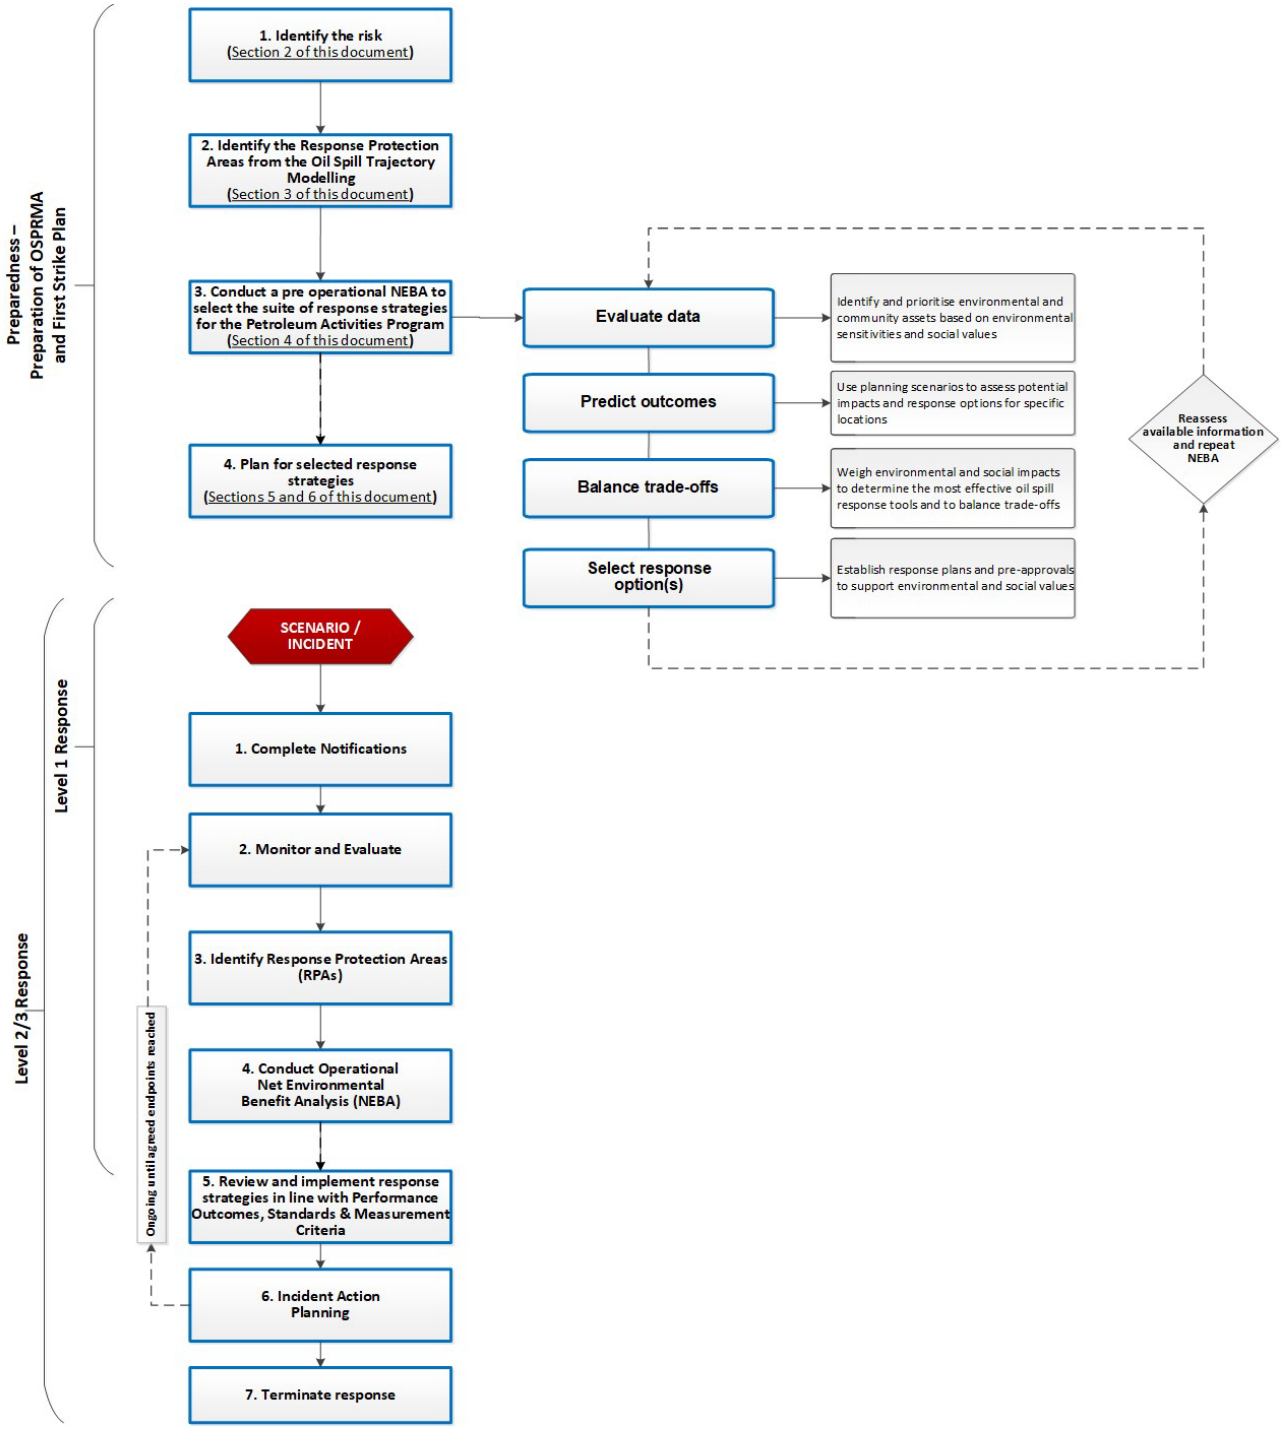

Figure 4-1: Net Environmental Benefit Analysis (NEBA) flowchart

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

4.1 Pre-operational / Strategic NEBA

The pre-operational NEBA identifies positive and negative impacts to sensitive receptors from implementing the response techniques. Feasibility is considered by assessing the receptors potentially impacted above response thresholds (Section 2.3.3) and the surface concentrations (Section 2.3.3.1) from the stochastic modelling.

Completing a pre-operational NEBA is a key response planning control that reduces the environmental risks and impacts of implementing the selected response techniques. Comprehensive details of the pre-operational NEBA for these activities are contained in **ANNEX A**: Net Environmental Benefit Analysis detailed outcomes.

4.2 Stage 1: Evaluate data

Woodside identifies and prioritises environmental and community assets based on environmental sensitivities and social values, informed through the use of trajectory modelling. Interpretation of stochastic oil spill modelling determines the EMBA for the release, which defines the spatial area that may be potentially impacted by the activities.

4.2.1 Define the scenario(s)

Woodside uses scenarios identified from the risk assessment in the EP to assess potential impacts and response options for specific locations. The WCCS is then selected for deterministic modelling and is used for this pre-operational NEBA. Outlier locations with potential environmental impacts, selected from the stochastic modelling may also be included for assessment. Response thresholds and deterministic modelling are then used to assess the feasibility/effectiveness and scale of the response. Modelling results are available in

and Table 3-1.

4.3 Stage 2: Predict Outcomes

Woodside uses planning scenarios to assess potential impacts and response options for specific locations. Locations with potential environmental impacts, selected from the stochastic modelling are included for assessment. Response thresholds and deterministic modelling are then used to assess the feasibility/ effectiveness of a response.

4.4 Stage 3: Balance trade-offs

Woodside considers environmental impacts and response effectiveness/ feasibility to determine the most effective oil spill response tools and balance trade-offs, using an automated NEBA tool. The tool considers potential benefits and impacts associated with a response at sensitive receptors and then considers the effectiveness/ feasibility of the response to select the response techniques carried forward to the ALARP assessment. The NEBA can be found in **ANNEX A: Net Environmental Benefit Analysis detailed outcomes**.

4.5 Stage 4: Select Best Response Options

To select the response technique, all the other stages in the NEBA process are considered and used to establish response plans and any pre-approvals to support protection of identified environmental and social values.

The response techniques implemented may vary according to a particular spill. The hydrocarbon type released and the sensitivities of the receptors (both ecological and socio-economic) may influence the response. The pre-operational NEBA broadly evaluates each response technique and supports decisions on whether they are feasible and of net environmental benefit. Response techniques that are not feasible or beneficial are rejected at this stage and not progressed to planning.

Further risks and impacts from implementing these selected response options are outlined in Section 7.

4.5.1 Determining potential response options

The available response techniques based on current technology can be summarised under the following headings:

- Monitor and evaluate
- Source control via vessel SOPEP

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

- Surface dispersant application:
  - aerial dispersant application
  - vessel dispersant application
- Mechanical dispersion
- In-situ burning
- Containment and recovery
- Shoreline protection and deflection:
  - protection
  - deflection
- Shoreline clean-up:
  - Phase 1 – mechanical clean-up
  - Phase 2 – manual clean-up
  - Phase 3 – final polishing
- Oiled wildlife response (including hazing)

Support functions may include:

- Waste management
- Operational and scientific monitoring (routinely implemented for spills if the OMP and SMP initiation criteria are met).

Table 4-1 include scenario-specific assessments of feasible response options and justification for the exclusion of inappropriate options. These options are evaluated against the scenario parameters including oil type, volume, characteristics, prevailing weather conditions, logistical support, and resource availability to determine deployment feasibility.

A shortlist of the feasible response options is then carried forward for the ALARP assessment. This assessment will typically result in a range of available options, that are deployed at different areas (at-source, offshore, nearshore and onshore) and different times during the response. The NEBA process assists in prioritising which options to use where and when, and timings throughout the response.

Table 4-1: Response technique evaluation – Instantaneous Release of MGO (CS-08, CS-05)

Response Technique	Effectiveness	Feasibility	Decision	Rationale for the decision
Monitor and evaluate	Will be effective in tracking the location of the spill, informing when it has entered State Waters, predicting potential impacts and triggering further monitoring and response techniques as required. Monitoring techniques include: • Predictive modelling of hydrocarbons – used throughout spill. 'Ground-truthed' using the outputs of all other monitoring techniques. • Surveillance and reconnaissance to detect hydrocarbons and resources at risk – from outset of spill. • Pre-emptive assessment of sensitive receptors at risk – triggered once monitor and evaluate informs likely RPAs at risk.	Monitoring of a MGO spill is a feasible response technique and an essential element of all spill response incidents. Outputs will be used to guide decision making on the use of other monitoring/response techniques and providing required information to regulatory agencies including AMSA and Western Australia Department of Transport and Major Infrastructure (WA DTMI).	Yes	Monitoring the spill will be necessary to: • validate trajectory and weathering models • determine the location and state of the slick • provide forecasts of spill trajectory • determine appropriate response techniques • determine effectiveness of response techniques • confirm impact pathways to receptors • provide regulatory agencies with required information.
Source control via vessel SOPEP	Controlling the spill of MGO at source would be the most effective way to limit the quantity of hydrocarbon entering the marine environment.	A spill of MGO from a vessel collision (CS-08 and CS-05) will be instantaneous and source control will be limited to what the vessel can safely achieve whilst responding to the incident.	Yes	Ability to stop the spill at source will be dependent upon the specific spill circumstances and whether or not it is safe for response personnel to access/isolate the source of the spill.
Surface dispersant application	Application of surface dispersant would likely reduce the volumes of hydrocarbons contacting sensitive surface receptors. Dispersant can also enhance biodegradation and may reduce volatile organic compounds (VOCs) in some circumstances therefore reducing potential health and safety risk to responders. Dispersant can increase dispersed/entrained hydrocarbons which can potentially have higher toxicity to biota in shallow water than naturally dispersed hydrocarbons. Subsurface oil plume likely to increase in size resulting in greater spatial extent of entrained oil. Entrained oil could potentially impact on sensitive shallow-water receptors e.g. corals, which otherwise may have been unaffected.	Whilst modelling for CS-08 predicts that floating oil will reach the minimum feasible threshold at which to commence surface dispersant application (>50 g/m^2) at the Dampier Archipelago, this technique is not suitable for MGO spills as this hydrocarbon is prone to rapid spreading and evaporation and are not considered effective when applied on thin surface films such as MGO as the dispersant droplets tend to pass through the surface films without binding to the hydrocarbon resulting in the unnecessary addition of chemicals to the marine environment. The volatile nature of MGO is also likely to lead to unsafe conditions in the vicinity of fresh hydrocarbon thus this response technique is deemed inappropriate.	No	The application of dispersant to MGO is unnecessary as the hydrocarbon will rapidly evaporate and would thus unnecessarily introduce additional chemical substances to the marine environment. The additional entrainment would also increase exposure of subsea species and habitats to hydrocarbons in the sensitive nearshore habitats around the Dampier Archipelago.
Mechanical dispersion	Mechanical dispersion involves the use of a vessel's prop wash and/or fire hose to target surface hydrocarbons to achieve dispersion into the water column. However, this technique is of limited benefit in an open ocean environment where wind and wave action are likely to deliver similar advantages.	Although the technique is feasible, highly volatile hydrocarbons are likely to weather, spread and evaporate quickly. The volatile nature of the oil likely to lead to unsafe conditions in the vicinity of fresh hydrocarbon. Additionally, any vessel used for mechanical dispersion activities would be contaminated by the hydrocarbon and could potentially cause secondary contamination of unimpacted areas when exiting the spill area. The decontamination of a vessel used for mechanical dispersion activities would result in additional quantities of oily waste requiring appropriate handling and treatment.	No	Given the limited benefit of mechanical dispersion over natural wind and wave action, secondary contamination and waste issues, and the associated safety risk of implementing the response for this activity, this strategy is deemed unsuitable.
In-situ burning	In-situ burning is only effective where minimum slick thickness can be achieved and where calm metocean conditions can be confirmed. Use of this technique would also cause an increase the release of atmospheric pollutants.	There is a limited window of opportunity in which this technique can be applied (prior to evaporation of the volatiles) which would be difficult to achieve. Furthermore, this technique may be prevented from being undertaken due to personnel safety issues arising from predicted high local concentrations of atmospheric volatiles.	No	The safety concerns and the predicted low effectiveness associated with implementing an in-situ burning response outweigh the potential environmental benefit.
Containment and recovery	Containment and recovery has an effective recovery rate of 5-10% when a hydrocarbon encounter rate of 25-50% is achieved at BAOAC 4 and 5. It has the potential to reduce the magnitude, probability, extent, contact and accumulation of hydrocarbon on shorelines receptors when suitable encounter rates can be achieved. It also has the potential to reduce the magnitude and extent of contact with submerged receptors by removing oil before further natural entraining/dissolving of hydrocarbons occurs.	Whilst modelling predicts that floating oil will reach the minimum feasible threshold at which to commence containment and recovery (50 g/m^2) at the Dampier Archipelago, this technique is not suitable for MDO spills as it is prone to rapid spreading and evaporation and is deemed unsuitable for effective containment and recovery operations. The volatile nature of MGO is also likely to lead to unsafe conditions in the vicinity of the hydrocarbon thus this response technique is deemed inappropriate.	No	Containment and recovery would be an inappropriate response technique for a spill of MGO. Corralling a volatile hydrocarbon such as MDO is deemed unsafe for response personnel thus this response strategy is not considered feasible. In addition to the safety issues, most of the spilled diesel would have been subject to rapid evaporation prior to the commencement of containment and recovery operations.
Shoreline protection and deflection	Shoreline protection and deflection can be effective at preventing contamination of sensitive resources and can be used to corral oil into slicks thick enough to skim effectively.	If real-time Monitor and Evaluate and Operational Monitoring activities indicate hydrocarbons are moving towards shorelines, pre-emptive assessments of sensitive receptors at risk and existing TRPs will be utilised to guide shoreline	Yes	The modelling undertaken for CS-08 predicts that shoreline receptors would be contacted by floating oil concentrations above 100 g/m^2.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with [Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Response Technique	Effectiveness	Feasibility	Decision	Rationale for the decision
		protection and deflection operations, in agreement with WA DTMI (for Level 2/3 spills). For CS-08, first shoreline accumulation (>100 g/m^2) is predicted on day 0.33 at Dampier Archipelago at Legendre Island (69 m^3) and Keast Island (20 m^3). Feasibility of deploying this technique prior to shoreline contact will be assessed based on real-time monitoring. For scenarios CS-05, no shoreline receptors will be contacted at any threshold. Protection strategies can be used for targeted protection of sensitive resources. Access to sensitive areas may cause more negative impact than benefit.		RPAs predicted to be contacted are based on modelling outputs and thus may differ under the prevailing conditions of a real event. If RPAs are deemed to be at risk, based on real-time modelling during a spill event, shoreline protection and deflection techniques will be employed to minimise hydrocarbon accumulation providing a net environmental benefit.
Shoreline clean-up	Shoreline clean-up is an effective means of hydrocarbon removal from contaminated shorelines where coverage is at an optimum level of 250 g/m^2.	If real-time Monitor and Evaluate and Operational Monitoring activities indicate hydrocarbons will contact shorelines, pre-emptive assessments of sensitive receptors at risk, shoreline assessments and existing TRPs will be utilised to guide shoreline clean-up operations, in agreement with WA DTMI (for Level 2/3 spills). For CS-08, first shoreline accumulation (>100 g/m^2) is predicted on day 0.33 at Dampier Archipelago at Legendre Island (69 m^3) and Keast Island (20 m^3). For scenarios CS-05, no shoreline receptors will be contacted at any threshold. Can reduce or prevent impact on sensitive receptors in most cases. Must confirm, through shoreline assessment, that sensitive sites will benefit from clean-up activities as the response itself may cause more negative impact than benefit through disturbance of habitats and species.	Yes	The modelling undertaken for CS-08 predicts that shoreline receptors would be contacted by floating oil concentrations above 100 g/m^2. RPAs predicted to be contacted are based on modelling outputs and thus may differ under the prevailing conditions of a real event. If RPAs are at risk, based on real-time modelling during a spill event, shoreline clean-up techniques will be deployed to expedite clean-up of the impacted sites. Removal of hydrocarbons will help shorten the recovery window unless shoreline type is of a sensitive nature. This technique can help prevent remobilisation of hydrocarbon and impact on shorelines.
Oiled wildlife response	Oiled wildlife response is an effective response technique for reducing the overall impact of a spill on wildlife. This is mostly achieved through hazing to prevent additional wildlife from being contaminated and through rehabilitation of those already subject to contamination.	Due to the likely volatile atmospheric conditions surrounding a MGO spill, response options may be limited to hazing for the safety of response personnel. The modelling undertaken for CS-08 predicts floating oil above 10 g/m^2 for Dampier MP, Dampier Archipelago, Keast Island, Legendre Island and Madeleine Shoals receptors. It also predicts shoreline oil concentrations at or above the 100 g/m^2 threshold for Dampier Archipelago at Legendre Island, Cape Bruguieres and Keast Island. In the event that wildlife are at risk of contamination, oiled wildlife response will be undertaken in accordance with the Wildlife Response Operational Plan as and where required. In addition, any rehabilitation could only be undertaken by trained specialists.	Yes	This technique may prevent impact to and/or treat oiled wildlife providing net environmental benefit.

5 HYDROCARBON SPILL ALARP PROCESS

Woodside's hydrocarbon spill ALARP process is aligned with guidance provided by NOPSEMA in *ALARP Guidance Note N-04300-GN0166* (2022) and *Oil Spill Risk Management Guidance Note N-04750-GN1488 A382148* (2024) and is set out in the 'Woodside Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) Guidelines'.

From the identified response planning need and pre-operational NEBA/SIMA, Woodside conducts a structured, semi-quantitative hydrocarbon spill process which has the following steps:

- considers the Response Planning Need identified in terms of surface area (km^2) and available surface hydrocarbon volumes (m^3) against existing Woodside capability
- considers alternative, additional, and improved options for each response technique/control measure by providing an initial and, if required, detailed evaluation of:
    - predicted cost associated with adopting the control measure
    - predicted change/environmental benefit
    - predicted effectiveness/feasibility of the control measure.
- evaluates the risks and impacts of implementing the proposed response techniques, and any further control measures with associated environmental performance to manage these additional risks and impacts.

Woodside considers the risks and impacts from a hydrocarbon spill to have been reduced to ALARP when:

- a structured process for identifying and considering alternative, additional, and improved options has been completed for each selected response technique
- the analysis of alternate, additional, and improved control measures meets one of the following criteria:
    - all identified, reasonably practicable control measures have been adopted; or
    - no identified reasonably practicable additional, alternative and/or improved control measures would provide further overall increased proportionate environmental benefit; or
    - no reasonably practical additional, alternative, and/or improved control measures have been identified.
- where an alternative, additional and/or improved control measure is adopted, a measurable level of environmental performance has been assigned
- higher order impacts/ risks have received more comprehensive alternative, additional, and improved control measure evaluations and do not just compare the cost of the adopted control measures to the costs of an extreme or clearly unreasonable control measure
- cumulative effects have been analysed when considered in combination across the whole activity.

The response technique selection is based on the risk assessment conducted in the EP. The risk assessment identifies the type of oil, volume of release, duration of release, predicted fate, weathering and the EMBA (along with other requirements such as time to impact and predicted volumes ashore). Modelling is then used to inform the NEBA and the prioritisation of suitable response options. The scale of the response techniques selected in the pre-operational NEBA is informed through the assessment of results from deterministic modelling.

For the purpose of the ALARP assessment, the following terms and definitions have been used:

- response techniques are considered the control measures that reduce consequences from hydrocarbon spill events. The terms 'response technique' and 'control measure' are used interchangeably
- cost is defined as the time, effort and/or trouble taken in financial, safety, design/storage/installation, capital/lease, and/or operations/maintenance terms to adopt a control measure

5.1 Monitor and evaluate

Monitor and evaluate includes the gathering and evaluation of data to inform the oil spill response planning and operations. It includes fate and trajectory modelling, spill tracking, weather updates and field observations. This response option is deployed in some capacity for every event.

Techniques may include:

- Predictive modelling of hydrocarbons to assess resources at risk
- Surveillance and reconnaissance to detect hydrocarbons and resources at risk
- Pre-emptive assessment of sensitive receptors at risk

Woodside maintains an *Operational Monitoring Operational Plan*. If shoreline contact is predicted, Response Protection Areas (RPAs) will be identified and assessed before contact. The Operational Plan includes the process for the CIMT to mobilise resources depending on the nature and scale of the spill.

The proximity of Dampier / Karratha to the spill event location means that multiple logistical options are available to monitor the spill in relatively short timeframes. The primary mobilisation base for initial monitoring activities would be Dampier / Karratha. However, in the unlikely event of an extended spill with potential to impact receptors further afield, monitoring activities may also be mobilised from Onslow.

5.1.1 Response need based on predicted consequence parameters

The following statements identify the key parameters upon which a response need can be based:

- First contact for floating surface oil in sufficient concentrations for effective monitor and evaluate techniques is expected:
  - for CS-08 with surface concentrations of 10 g/m^2 at Dampier Archipelago (3 hours)
  - no floating oil is predicted for CS-05 at 10 g/m2 for the duration of the spill. .
- The shortest timeframe that shoreline contact from floating oil is predicted is 0.13 days (Dampier Archipelago at Legendre Island) for CS-08.
- The shortest time to contact for entrained hydrocarbons greater than 100 ppb at shoreline receptors is 3 hours at Dampier Archipelago for CS-08 and 57 hours at Glomar Shoal for CS-05.
- Arrangements for support organisations who provide specialist services or resources should be tested regularly.
- Plans, procedures and support documents need to be in place for Operational and Support Sections. These should be reviewed and updated regularly.
- Response operations may take up to 3-4 days based on the predicted time to complete shoreline clean-up operations.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.1.2 Environmental performance based on need

Table 5-1: Environmental Performance – Monitor and evaluate

Environmental Performance Outcome		To gather information from multiple sources to establish an accurate common operating picture as soon as possible and predict the fate and behaviour of the spill to validate planning assumptions and adjust response plans as appropriate to the scenario.		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
1	Oil spill trajectory modelling	1.1	Initial modelling available within 6 hours using the Rapid Assessment Tool	1, 3B, 3C, 4
		1.2	Detailed modelling available within 4 hours of RPS receiving information from Woodside	
		1.3	Detailed modelling service available for the duration of the incident upon contract activation	
2	Tracking buoy	2.1	Tracking buoy located on facility/ lead vessel and ready for deployment 24/7	1, 3A, 3C, 4
		2.2	Deploy tracking buoy from facility/ lead vessel within 2 hours as per the First Strike Plan.	1, 3A, 3B, 4
		2.3	Contract in place with service provider to allow data from tracking buoy to be received 24/7 and processed.	1, 3B, 3C, 4
		2.4	Data received to be uploaded into Woodside common operating picture (COP) daily to improve the accuracy of other Monitor and Evaluate techniques.	1, 3B, 4
3	Satellite imagery	3.1	Contract in place with 3rd party provider to enable access and analysis of satellite imagery. Imagery source/type requested on activation of service.	1, 3C, 4
		3.2	3rd party provider will confirm availability of an initial acquisition within 2 hours	1, 3B, 3C, 4
		3.3	First image received with 24 hours of Woodside confirming to 3rd party provider its acceptance of the proposed acquisition plan.	1
		3.4	3rd party provider to submit report to Woodside per image. Report is to include a polygon of any possible or identified slick(s) with metadata.	1
		3.5	Data received to be uploaded into Woodside COP daily to improve accuracy of other Operational Monitoring techniques.	1, 3B, 4
		3.6	Satellite Imagery services available and employed during response	1, 3C, 4
4	Aerial surveillance	4.1	2 x trained aerial observers available to be deployed by day 1 from resource pool.	1, 2, 3B, 3C, 4
		4.2	1 x aircraft available for two sorties per day, available for the duration of the response from day 1	1, 3C, 4
		4.3	Observer to compile report during flight as per FSP. Observers report available to the IMT within 2 hours of landing after each sortie.	1, 2, 3B, 4
		4.4	Unmanned Aerial Vehicles/Systems (UAV/UASs) to support Shoreline Contamination Assessment Technique (SCAT), containment and recovery and surface dispersal and pre-emptive assessments as contingency if required.	1, 2
5	Pre-emptive assessment	5.1	Within 24 hours, in liaison with WA DTMI (for Level 2/3 incidents), deployment of 1 x specialists from resource pool in establishing the status of sensitive receptors.	1, 2, 3B, 3C, 4

	of sensitive receptors	5.2	Daily reports provided to IMT on the status of the receptors to prioritise Response Protection Areas (RPAs) and maximise effective utilisation of resources.	1, 3B, 4

The control measures and capability of Woodside and its third-party service providers are shown to support Monitor and Evaluate techniques up to and including the identified WCCS. This is demonstrated by the following:

- Woodside has a documented, structured and tested capability for monitor and evaluate techniques including internal trajectory modelling capabilities, tracking buoys located offshore and contracted aerial observation platforms with access to trained observers.
- Woodside and its third-party service providers seek to maintain sufficient capability for the duration of the response.
- Woodside has assessed the existing capability available and considered potential alternative, additional and improved control measures. Where control measures have been selected and implemented, they are included in Section 6.1.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.2 Source Control via vessel Shipboard Oil Pollution Emergency Plan (SOPEP)

Vessel source control will be conducted, where feasible and in accordance with MARPOL 73/78 Annex I, by the Vessel Master under the Shipboard Oil Pollution Emergency Plan (SOPEP) triggered by any loss of containment from the activity vessels.

The SOPEP provides guidance to the Master and Officers on board the vessel with respect to the extra steps to be taken when an unexpected pollution incident has occurred or is likely to occur. The SOPEP contains all information and operational instructions required by IMO Resolution MEPC.54 (32) adopted on 6 March 1992, as amended by resolution MEPC.86 (44) adopted on 13 March 2000.

Its purpose is to set in motion the necessary actions to stop or minimise oil discharge and mitigate its effects and outlines responsibilities, pollution reporting requirements, procedures and resources needed in the event of a hydrocarbon spill from vessel activities.

In the event of the WCCS vessel collision event, the vessel master may engage precautionary marine manoeuvres to avoid collision or commence pumping operations to transfer MGO and thus minimise the release.

5.2.1 Environmental performance based on need

Woodside has established control measures, environmental performance outcomes, performance standards and measurement criteria to be used for vessel-source oil spill response during the activities which are detailed in Section 6.9 of the EP. The vessel master's roles and responsibilities are described in EP Section 7.3.

Performance standards for each contracted activity vessel are detailed in the vessel's specific SOPEP.

These standards maintain availability of sufficient resources and are adequately tested for successful implementation of the SOPEP in the event of a hydrocarbon spill.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.3 Shoreline Protection and Deflection

The placement of containment, protection or deflection booms on and near a shoreline is a response technique to reduce the potential volume of hydrocarbons contacting or spreading along shorelines, which may reduce the scale of shoreline clean-up. Hydrocarbons contained by the booms would be collected where practicable.

Shorelines would be protected where accessible via vessel or shore. Where hydrocarbon contact has already occurred, there may still be value in deploying protection equipment to limit further accumulations and preventing remobilisation of stranded hydrocarbons.

Shoreline protection and deflection equipment would be mobilised to selected locations, where the following conditions were met:

- Sea-states and hydrocarbon characteristics are safe to deploy protection and deflection measures,
- Oil trajectory has been identified as heading towards identified RPAs.

5.3.1 Response need based on predicted consequence parameters

The following statements identify the key parameters upon which the response need can be based:

- The shortest timeframe that shoreline contact from floating oil above response threshold (100 g/m^2) for scenario CS-08 is predicted to be 0.33 days at the Dampier Archipelago at Legendre Island (69 m^3), 0.71 days at Keast Island (20 m^3) and 2.04 days at Cape Bruguieres (5 m^3).
- Pre-emptive assessment and SCAT will be mobilised to RPAs contacted at 100 g/m^2, which occurs from day 0.33 at Dampier Archipelago at Legendre Island.
- The duration of the spill will be instantaneous with shoreline response operations extending to 3 to 4 days based on the predicted time to complete shoreline clean-up operations.
- Arrangements for support organisations who provide specialist services (trained personnel, protection and deflection equipment) and/or resources and should be tested regularly.
- Tactical Response Plans (TRPs) for Response Protection Areas (RPAs) along with other relevant plans, procedures and support documents need to be in place for Operational and Support Sections. These should be reviewed and updated regularly.

In addition, a number of assumptions are required to estimate the response need for Shoreline Protection and Deflection. These assumptions have been described in the table below.

Table 5-2: Response Planning Assumptions – Shoreline Protection and Deflection

Response Planning Assumptions	
Safety considerations	Shoreline protection and deflection operations cannot be implemented if the safety of response personnel cannot be guaranteed. This requires an initial and ongoing risk assessment of health and safety hazards and risks at the site. Personnel safety issues may include: • hydrocarbon gas and/or liquid exposure • safe for deployment and conditions within range of vessels • high ambient temperatures.
Shoreline Protection and Deflection	One Shoreline Protection and Deflection operation may include; • Quantity of shoreline sealing boom (as outlined in TRP) • Quantity of fence or curtain boom (as outlined in TRP) • 1-2 trained supervisors • 8-10 personnel/ labour hire Specific details of each operation would be tailored to the Tactical Response Plan implemented (where available).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.3.2 Environmental performance based on need

Table 5-3: Environmental Performance – Shoreline protection and deflection

Environmental Performance Outcome		To stop hydrocarbons encountering particularly sensitive areas		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
6	Response teams	6.1	In liaison with WA DTMI (for Level 2/3 incidents), relevant Tactical Response Plans (TRPs) will be identified in the First Strike plan for activation within 12 hours of the release.	1, 3A, 3C, 4
		6.2	In liaison with WA DTMI (for Level 2/3 incidents), mobilise teams to RPAs within 24 hours of a predicted impact. Teams to contaminated RPAs comprised of: • 1-2 trained specialists per operation • 8-10 personnel/labour hire • Personnel sourced through resource pool.	1, 2, 3B, 3C, 4
		6.3	In liaison with WA DTMI (for Level 2/3 incidents), 1 operation mobilised within 24 hours to each identified RPA.	1, 3A, 3B, 4
		6.4	12 trained personnel available within 24 hours. Sourced through resource pool.	1, 2, 3A, 3B, 3C, 4
		6.5	Open communication line to be maintained between IMT and infield operations to confirm awareness of progress against plan(s)	1, 3A, 3B
		6.6	The safety of shoreline response operations will be considered and appropriately managed. During shoreline operations: • All personnel in a response will receive an operational/safety briefing before commencing operations • Gas monitoring and site entry protocols will be used to assess safety of an operational area before allowing access to response personnel	1, 3B, 4
7	Response equipment	7.1	Equipment mobilised from closest location within 24 hours of a predicted impact.	1, 3A, 3C, 4
		7.2	Supplementary equipment mobilised from State and AMOSC, stockpiles within 48 hours.	1, 3C, 4
		7.3	Supplementary equipment mobilised from OSRL within 48 hours.	
		7.4	Woodside maintains integrated fleet of vessels. Additional vessels can be sourced through existing contracts/frame agreements	1, 3A, 3C, 4
8	Management of environmental impact of the response risks	8.1	If vessels are required for access, anchoring locations will be selected to minimise disturbance to benthic primary producer habitats. Where existing fixed anchoring points are not available, locations will be selected to minimise impact to nearshore benthic environments with a preference for areas of sandy seabed where they can be identified	1
		8.2	Shallow draft vessels will be used to access remote shorelines to minimise the impacts associated with seabed disturbance on approach to the shorelines	

The resulting shoreline protection and deflection capability has been assessed against the WCCS. The range of techniques provide an ongoing approach to shoreline protection and deflection at identified RPAs.

Under optimal conditions, during the surface releases the capability available exceeds the need identified. It indicates that, the shoreline protection and deflection capability have the following expected performance:

- Stochastic modelling scenarios indicate that first shoreline impact at Dampier Archipelago and Legendre Island within 0.33 days for the vessel collision at the State Waters boundary (CS-08). There is no shoreline contact for the spill scenarios at the offshore location (CS-05).
- Existing capability allows for mobilisation and deployment of 1 protection and deflection operation (approximately 10-12 responders) within 24 hours (if required). Whilst modelling predicts contact at a total of 3 RPAs above response threshold within 24-48 hours (Table 3-1), it should be noted that this is based upon 200 stochastic model runs thus it is unlikely to occur from a single release.

No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

- The most significant constraint on expanding the scale of response operations is the availability of accommodation and transport services in the region between Exmouth and Port Hedland, and the management of response generated waste. From previous assessment of accommodation in this region, Woodside estimates that current accommodation can cater for a range of 500-700 personnel per day for an ongoing operation.
- TRPs have been developed for all identified RPAs excepting international locations.
- Woodside has assessed the existing capability available and considered potential alternative, additional and improved control measures. Where control measures have been selected and implemented, they are included in Section 6.3.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.4 Shoreline Clean-up

Shoreline clean-up may be undertaken using a broad range of techniques when floating hydrocarbons contact shorelines. The timing, location and extent of shoreline clean-up activities can vary from one scenario to another, depending on the hydrocarbon type, sensitivities and values contacted, shoreline type and access, degree of oiling, and area oiled.

Shoreline clean-up is typically undertaken as a three-phase process:

- phase one (gross contamination removal) involving the collection of bulk oil, either floating against the shoreline or stranded on it
- phase two (moderate to heavy contamination removal) involving removal or in-situ treatment of shoreline substrates such as sand or pebble beaches, and
- phase three (final treatment or polishing) involving removal of the remaining residues of oil.

As phase one typically involves recovery of floating and pooled oil, and phase three removes minor volumes, they have not been considered in the assessment of response need for the scenarios identified.

The *Shoreline Clean-up Operational Plan* details the mobilisation and resource requirements for a shoreline clean-up operation including the logistics, support and facility arrangements to manage the movement of personnel and resources.

The *Shoreline Clean-up Operational Plan* includes the process for the IMT to mobilise resources depending on the nature and scale of the spill. Woodside would activate and mobilise trained and competent personnel in shoreline assessment before or following shoreline contact at response thresholds.

Shoreline clean-up consists of different manual and mechanical recovery techniques to remove hydrocarbons and contaminated debris from a shoreline; this is to minimise ongoing environmental contamination and impact. The National Plan also provides guidance on shoreline clean-up techniques as outlined in National Plan Guidance *Response assessment and termination of cleaning for oil contaminated foreshores* (AMSA 2015).

5.4.1 Response need based on predicted consequence parameters

The following statements identify the key parameters upon which the response need can be based:

- The shortest timeframe for the CS-08 scenario (vessel collision at the State Waters boundary) that shoreline contact from floating oil above threshold is predicted to be 0.33 days at Dampier Archipelago at Legendre Island (69 m^3) with shoreline accumulation peaking on Day 1. There is no shoreline contact predicted for CS-05.
- Pre-emptive assessment and shoreline assessments will be mobilised within 24 hours of shoreline contact.
- The nature of the spill is instantaneous occurring within a timeframe of hours, with shoreline response operations extending to 3-4 days based on the predicted time to complete shoreline clean-up operations.
- Following SCAT and agreement of prioritisation with WA Department of Transport and Major Infrastructure (DTMI), clean-up operations would commence until agreed termination criteria are reached.
- Arrangements for support organisations who provide specialist services (trained personnel, labour hire, shoreline clean-up, and site management equipment) and/or resources and should be tested regularly.
- Tactical Response Plans (TRPs) for Response Protection Areas (RPAs) along with other relevant plans, procedures and support documents should be in developed and in place for Operational and Support Sections. These should be reviewed and updated regularly.

In addition, a number of assumptions are required to estimate the response need for shoreline clean-up. These assumptions have been described in the table below.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Table 5-4: Response Planning Assumptions – Shoreline Clean-up

Response planning assumptions: Shoreline clean-up	
Safety considerations	Shoreline clean-up operations cannot be implemented if the safety of response personnel cannot be guaranteed. This requires an initial and ongoing risk assessment of health and safety hazards and risks at the site. Personnel safety issues may include: • hydrocarbon gas and/or liquid exposure • waves and/or sea states, tidal cycle and intertidal zone limits • presence of wildlife • high ambient temperatures.
Manual shoreline clean-up operation (Phase 2)	One, manual shoreline clean-up operation (Phase 2) may include: • 1–2 x trained supervisor • 8–10 x personnel/ labour hire • Supporting equipment for manual clean-up including rakes, shovels, plastic bags etc.
Physical properties	Surface Threshold • Lower – 100 g/m^2–100% coverage of 'stain' – cannot be scratched off easily on coarse sediments or bedrock – Expected trigger to undertake detailed shoreline survey • Optimum – 250 g/m^2 – 25% coverage of 'coat' – can be scratched off with a fingernail on coarse sediments – Expected trigger to commence clean-up operations.
Efficiency **(m^3 oil recovered per person per day)**	Manual shoreline clean-up (Phase 2) – approximately 0.25–1 m^3 oil recovered per person per 10 hour day is based on moderate to high coverage of oil (100 g/m^2–1000 g/m^2) with manual removal using shovels/rakes, etc. from studies of previous response operations and exercises.

Table 5-5: Shoreline Clean-up techniques and recommendations

Technique	Description	Shoreline type		Application
		Recommended	Not recommended	
Natural recovery	Allowing shoreline to self-clean; no intervention undertaken.	Remote and inaccessible shorelines for personnel, vehicles and machinery. Other clean-up techniques may cause more damage than allowing the shoreline to naturally recover. Natural recovery may be recommended for areas with mangroves and coral reefs due to their sensitivity to disturbance from other shoreline clean-up techniques. High-energy shorelines: where natural removal rates are high, and hydrocarbons will be removed over a short timeframe.	Low-energy shorelines: these areas tend to be where hydrocarbon accumulates and penetrates soil and substrates.	May be employed, if the operational NEBA identifies that other clean-up techniques will have a negligible or negative environmental impact on the shoreline. May also be used for buried or reworked hydrocarbons where other techniques may not recover these.
Manual recovery	Use of manpower to collect hydrocarbons from the shoreline. Use of this form of clean-up is based on type of shoreline.	Remote and inaccessible shorelines for vehicles and machinery. Areas where shorelines may not be accessible by vehicles or machinery and personnel can recover hydrocarbons manually. Where hydrocarbons have formed semi-solid to solid masses that can be picked up manually. Areas where nesting and breeding fauna cannot or should not be disturbed.	Coral reef or other sensitive intertidal habitats, as the presence of a response may cause more environmental damage then allowing them to recover naturally. For some high-energy shorelines such as cliffs and sea walls, manual recovery may not be recommended as it may pose a safety threat to responders.	May be used for sandy shorelines. Buried hydrocarbons may be recovered using shovels into small carry waste bags, but where possible the shoreline should be left to naturally recover to prevent any further burying of hydrocarbons (from general clean-up activities).
Sorbents	Sorbent boom or pads used to recover fluid or sticky hydrocarbons. Can also be used after manual clean-up to remove any residues from crevices or from vegetation.	When hydrocarbons are free-floating close to shore or stranded onshore. As a secondary treatment method after hydrocarbon removal and in sensitive areas where access is restricted.	Access for deploying and retrieving sorbents should not be through soft or sensitive habitats or affect wildlife.	Used for rocky shorelines. Sorbent boom will allow for deployment from small shallow draught vessels, which will allow deployment close to shore where water is sheltered and to aid recovery. Sorbents will create more solid waste compared with manual clean-up, so will be limited to cleaning rocky shorelines.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Technique	Description	Shoreline type		Application
		Recommended	Not recommended	
Vacuum recovery, flushing, washing	The use of high volumes of low-pressure water, pumping and/or vacuuming to remove floating hydrocarbons accumulated at shorelines.	Suited to rocky or pebble shores where flushing can remobilise hydrocarbons (to be broken up) and aid natural recovery. Any accessible shoreline type from land or water. May be mounted on barges for water-based operations, on trucks driven to the recovery area, or hand-carried to remote sites. Flushing and vacuum may be useful for rocky substrate. Medium- to high-energy shorelines where natural removal rates are moderate to high. Where flushed hydrocarbons can be recovered to prevent further oiling of shorelines.	Areas of pooled light, fresh hydrocarbons may not be recoverable via vacuum due to fire and explosion risks. Shorelines with limited access. Flushing and washing not recommended for loose sediments. High-energy shorelines where access is restricted.	High volume low pressure (HVLP) flushing and washing into a sorbent boom could be used for rocky substrate, if protection booming has been unsuccessful in deflecting hydrocarbons from these areas.
Sediment reworking	Movement of sediment to surf to allow hydrocarbons to be removed from the sediment and move sand via heavy machinery.	When hydrocarbons have penetrated below the surface. Recommended for pebble/cobble shoreline types. Medium- to high-energy shorelines where natural removal rates are moderate to high.	Low-energy shorelines as the movement of substrate will not accelerate the natural cleaning process. Areas used by fauna which could potentially be affected by remobilised hydrocarbons.	Use of wave action to clean sediment: appropriate for sandy beaches where light machinery is accessible.
Vegetation cutting	Cutting vegetation to prevent oiling and reduce volume of waste and debris.	Vegetation cutting may be recommended to reduce the potential for wildlife being oiled. Where oiling is restricted to fringing vegetation.	Access in bird-nesting areas should be restricted during nesting seasons. Areas of slow-growing vegetation.	May be used on shorelines where vegetation can be safely cleared to reduce oiling.
Cleaning agents (OSCA)	Application of chemicals such as dispersants to remove hydrocarbons.	May be used for manmade structures and where public safety may be a concern.	Natural substrates and in low-energy environments where sufficient mixing energy is not present.	Not recommended for shorelines. Could be used for manmade structures such as boat ramps.

This document is protected by copyright. 5.4.2 Environmental performance based on need

Table 5-6: Environmental Performance – Shoreline Clean-up

Environmental Performance Outcome		To remove bulk and stranded hydrocarbons from shorelines and facilitate shoreline amenity habitat recovery.		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
9	Shoreline responders	9.1	In liaison with WA DTMI (for Level 2/3 incidents), deployment of 1 shoreline clean-up teams to contaminated RPAs comprised of: • 1-2 trained specialists per operation • 8-10 personnel/labour hire • Personnel sourced through resource pool within 24 hours of request from the IMT.	1, 2, 3A, 3B, 3C, 4
		9.2	Relevant Tactical Response Plans (TRPs) will be identified in the first strike plan for activation within 12 hours of a predicted impact..	1, 3A, 3C, 4
		9.3	Clean-up operations for shorelines in line with results and recommendations from SCAT outputs	1, 3A, 3B
		9.4	All shoreline clean-up sites will be zoned and marked before clean-up operations commence to prevent secondary contamination and minimise the mixing of clean and oiled sediment and shoreline substrates.	
		9.5	In liaison with WA DTMI (for Level 2/3 incidents), mobilise and deploy 1-2 shoreline clean-up operations within 24 hours.	1, 2, 3A, 3C, 4
		9.6	The safety of shoreline response operations will be considered and appropriately managed. During shoreline clean-up operations: • All personnel in a response will receive an operational/safety briefing before commencing operations • Gas monitoring and site entry protocols will be used to assess safety of an operational area before allowing access to response personnel	1, 3B, 4
		9.7	Open communication line to be maintained between IMT and infield operations to ensure awareness of progress against plan(s)	1, 3A, 3B
10	Shoreline clean up equipment	10.1	Contract in place with 3rd party providers to access equipment.	1, 3A, 3C, 4
		10.2	Equipment mobilised from closest stockpile (detail in activity specific ALARP) within 24 hours.	
		10.3	Supplementary equipment mobilised from State and AMOSC, stockpiles within 48 hours.	1, 3C, 4
		10.4	Supplementary equipment mobilised from OSRL within 48 hours.	
11	Management of environmental impact of the response risks	11.1	If vessels are required for access, anchoring locations will be selected to minimise disturbance to benthic primary producer habitats. Where existing fixed anchoring points are not available, locations will be selected to minimise impact to nearshore benthic environments with a preference for areas of sandy seabed where they can be identified	1
		11.2	Shallow draft vessels will be used to access remote shorelines to minimise the impacts associated with seabed disturbance on approach to the shorelines	
		11.3	Vehicular access will be restricted on dunes, turtle nesting beaches an in mangroves	
		11.4	Removal of vegetation will be limited to moderately or heavily oiled vegetation	
		11.5	Shoreline access routes with the least environmental impact identified will be selected by a specialist in SCAT operations.	
		11.6	Oversight by trained personnel who are aware of the risks	
		11.7	Trained unit leader's brief personnel of the risks prior to operations	

The resulting shoreline clean-up capability has been assessed against the WCCS. The range of techniques provide an ongoing approach to shoreline clean-up at identified RPAs. Woodside's capability will cover required shoreline clean-up operations for the activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Whilst modelling predicts contact at a total of 3 RPAs above response threshold within 24-48 hours (Table 3-1), it should be noted that this is based upon 200 stochastic model runs thus it is unlikely to occur from a single release.

Safety factors have also been considered, including the potential for personnel to be exposed to hydrocarbon gas vapours in the early stages of the response. In addition, given the natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is managing risks and impacts to ALARP.

The capability available meets the need identified for this activity. The shoreline clean-up capability has the following expected performance (if required during a response):

- Woodside has the capacity to mobilise and deploy up to 3-5 shoreline clean-up teams (approximately 45–60 responders in total) by day 3 using existing labour hire contracts with Woodside, AMOSC, Core Group, WA DTMI and OSRL team leads.
- Assessment of response capability indicates that for a worst-case scenario the actual teams required would meet the available capability by day 7 and the response would extend for up to 2-3 months.
- Woodside has considered deployment of additional personnel to undertake shoreline clean-up operations but is satisfied that the identified level of resource is balanced between cost, time and effectiveness. The most significant constraint on expanding the scale of response operations is the availability of accommodation and transport services in the region between Onslow and Dampier and management of response generated waste. From previous assessment of accommodation in Onslow and Dampier, Woodside estimates that current accommodation can cater for a range of 500-700 personnel per day for an ongoing operation.
- TRPs have been developed for all identified RPAs excepting international locations.
- Woodside has assessed the existing capability available and considered potential alternative, additional and improved control measures. Where control measures have been selected and implemented, they are included in Section 6.4.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.5 Oiled wildlife response (including hazing)

Oiled wildlife response (OWR) includes wildlife surveillance/reconnaissance, wildlife hazing, pre-emptive capture, and the capture, cleaning, treatment, and rehabilitation of animals that have been oiled. In addition, it includes the collection, post-mortem examination, and disposal of deceased animals that have succumbed to the effects of oiling.

For a petroleum activity spill in Commonwealth waters, Woodside will act as the Control Agency and will be responsible for the wildlife response. In such circumstances, Woodside would implement a response in accordance with the *Oiled Wildlife Operational Plan*, the WA Oiled Wildlife Response Plan (WAOWRP) (DBCA, 2022a) and the WA OWR Manual (DBCA, 2022b). The *Oiled Wildlife Operational Plan* includes the process for the IMT to mobilise resources depending on the nature and scale of the spill. Oiled wildlife operations would be implemented with advice and assistance from the Oiled Wildlife Advisor from the Department of Biodiversity, Conservation and Attractions (DBCA).

The key plan for OWR in WA is the WAOWRP (DBCA, 2022a). The WAOWRP establishes the framework for preparing and responding to potential or actual wildlife impacts during a spill and sets out the management arrangements for implementing an OWR in conjunction with the DTMI *State Hazard Plan – Maritime Environmental Emergencies* (SHP-MEE). It is the responsibility of DBCA to administer the WAOWRP under the direction of the DTMI. The WA OWR Manual (DBCA, 2022b) supports, and should be used in conjunction with, the WAOWRP. The purpose of the WA OWR Manual is to standardise the operating procedures, protocols and processes for an OWR during a spill event in WA waters, and to create alignment between the wildlife response processes and the overall incident response (DBCA, 2022b).

If a spill occurs in WA State waters or enters State waters, DBCA is the Jurisdictional Authority for wildlife, for level 2/3 spills, and will also lead the oiled wildlife response under the control of the DTMI. DBCA is the State Government agency responsible for administering the *Biodiversity Conservation Act 2016 (BC Act)* which has provisions for authorising activities that affect wildlife.

For level 1 spills in State waters, Woodside will be the Control Agency, including for wildlife response. It is, however, also an expectation that for level 2/3 petroleum activity spills, Woodside will conduct the initial first-strike response actions for wildlife response and continue to manage those operations until DBCA is activated as the lead agency for wildlife response and formal handover occurs. Following formal handover, Woodside will function as a support organisation for the OWR and will be expected to continue to provide planning and resources as required.

Woodside retains specialist personnel to support and manage oiled wildlife operations, including trained and competent responders for deployment in Exmouth and Dampier. Additional personnel would be sourced through Woodside's arrangements to support an oiled wildlife response as required.

5.5.1 Response need based on predicted consequence parameters

Wildlife response priority areas and assessment of wildlife impact

French-McCay et al. (2002), based on a review of existing literature at the time, determined lethal thresholds for floating and shoreline oil for the external coating of wildlife to be 10 g/m^2 for floating, and 100 g/m^2 for shoreline accumulation. It should however be noted that toxicity thresholds for wildlife are likely to be highly variable due to differences in species sensitivity, type of hydrocarbon, type of exposure (ingestion or external oiling), life-stage, and on-water versus land habitat.

For planning purposes, determination of wildlife priority protection areas is based on stochastic modelling of the worst-case spill scenarios at 10 g/m^2 for floating, and 100 g/m^2 for shoreline accumulation (acknowledging that impacts to wildlife may occur at lower concentrations), the known presence of wildlife, and in consideration of the following:

- Presence of high densities of wildlife, threatened species, and/or endemic species with high site fidelity
- Greatest probability of shoreline accumulation
- Shortest timeframe to contact

Table 5-7 outlines the wildlife response areas for this activity. At the time of a spill, identification and allocation of wildlife RPA's should also take into consideration any key biological activities. Additional detail regarding species and their key biological activities within the vicinity of the activities are described in Section 4 of the Angel CCS Geophysical and Geotechnical Surveys Environment Plan.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

For WA, the Pilbara and Kimberley Regional Oiled Wildlife Plans (DBCA [formerly Department of Parks and Wildlife), 2014) provide useful information relating to wildlife priority response areas in their respective regions.

Table 5-7: Key at-risk species potentially in Response Protection Areas and open ocean where there is 10 g/m^2 floating or 100 g/m^2 shoreline

Species	Dampier Archipelago	Madeleine Shoals	Legendre Island	Keast Island	Dampier MP	Cape Bruguieres
Marine turtles	✓	✓	✓	✓	✓	✓
Whale sharks	✓	✓	✓	✓	✓	✓
Seabirds and/or migratory shorebirds	✓	✓	✓	✓	✓	✓
Cetaceans – migratory whales	✓	✓	✓	✓	✓	✓
Cetaceans – dolphins and porpoises	✓	✓	✓	✓	✓	✓
Dugongs	✓	✓	✓	✓	✓	✓
Sharks and rays	✓	✓	✓	✓	✓	✓

The following statements identify the key parameters upon which a wildlife response need can be based:

- For CS-08, floating oil at >10 g/m^2 is predicted at:
  - Dampier Archipelago within 3 hours
  - Madeleine Shoals within 3 hours
  - Legendre Island within 7 hours
  - Keast Island within 17 hours
  - Dampier MP within 27 hours
- The shortest timeframe for shoreline accumulation at response thresholds (>100 g/m^2) for CS-08 is predicted to be 0.33 days at Dampier Archipelago at Legendre Island (69 m^3) with shoreline accumulation peaking on Day 1. There is no shoreline contact predicted for CS-05.
- At sea there are likely to be low numbers of at risk or impacted wildlife, and limited opportunities to rescue wildlife, given the distribution and behaviour of animals in the open marine environment. At sea, continued wildlife reconnaissance, carcass recovery, sampling of carcasses that cannot be retrieved and scientific monitoring are more likely to be the focus of response efforts.
- As the surface oil approaches shorelines and as oil accumulates on the shoreline, potential for oiled wildlife impacts is likely to increase as well as opportunities to rescue wildlife.
- It is estimated that the wildlife impact would be between low and medium, as defined in the WAOWRP (DBCA, 2022a) (Table 5-8).

Table 5-8: WAOWRP Guide for rating wildlife impact of an oil spill (DBCA, 2022)

Wildlife Impact Rating	Low	Medium	High
What is the likely duration of the wildlife response?	<3 days	3-10 days	>10 days
What is the likely total intake of animals?	<10	11-25	>25
What is the likely daily intake of animals?	0-2	2-5	>5
Are threatened species, or species protected by treaty, likely to be impacted, either directly or by pollution of habitat or breeding areas?	No	Yes – possible	Yes – likely
Is there likely to be a requirement for building primary care facility for treatment, cleaning and rehabilitation?	No	Yes – possible	Yes – likely

All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Tactics

Where there is imminent or actual impact to wildlife, Woodside will activate the Wildlife Division and follow the oiled wildlife incident management framework and implementation plan outlined in the Woodside *Oiled Wildlife Operational Plan*.

In Commonwealth waters, Woodside will be responsible for the planning and implementation of the OWR in its entirety. Noting that at sea, and in comparison to the shoreline, there are likely to be less wildlife impacted by an oil spill and limited opportunities to rescue wildlife, given the distribution and behaviour of animals in the open marine environment. At sea, continued wildlife reconnaissance, carcass recovery, sampling of carcasses that cannot be retrieved and integration with scientific monitoring are more likely to be the focus of the OWR.

In State waters, Woodside will conduct the initial first-strike response actions for wildlife and continue to manage those operations until DBCA is activated as the lead agency for wildlife response and formal handover occurs. Following formal handover, Woodside will function as a support organisation for the OWR and will be expected to continue to provide planning and resources as required.

If a protracted response is likely, requiring preventative actions and/or wildlife rescue, and formal hand over to the Control Agency (in State waters) has not yet occurred, the Wildlife Division will be responsible for the development of the Wildlife Division portion of the IAP. Preventative actions, such as hazing, along with capture, intake and treatment require a higher degree of planning, approval (licenses) and skills and will be planned for and carried out under the IAP as outlined in the *Oiled Wildlife Operational Plan* and in accordance with the WAOWRP (DBCA, 2022a) and WA OWR Manual (DBAC, 20022b).

The oiled wildlife response technique targets key wildlife populations at risk within Commonwealth open waters and the nearshore waters as described in **Section 4** of the EP.

This document is protected by copyright. 5.5.2 Environmental performance based on need

Table 5-9: Environmental Performance – Oiled Wildlife Response (OWR)

Environmental Performance Outcome		OWR is conducted in accordance with the Western Australian Oiled Wildlife Response Plan (WAOWRP, 2022) to meet legislative requirements to house, release or euthanise wildlife under the *Biodiversity Conservation Act 2016*.		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
12	Wildlife response arrangements	12.1	Oiled Wildlife Operational Plan in place and utilised during a response to plan, coordinate, implement and terminate operations.	1, 3A, 4
		12.2	Initiate a wildlife first strike response within 24 hours of confirmed or imminent wildlife contact as directed by OMP: Marine Fauna Assessment and in liaison with DBCA.	1
13	Wildlife response equipment	13.1	Maintain contract with AMOSC for immediate access to oiled wildlife response equipment.	1, 3C, 4
		13.2	Maintain contract with OSRL to access additional oiled wildlife response equipment.	1, 3C, 4
14	Wildlife responders	14.1	Two Oiled Wildlife Team Members to supervise the oiled wildlife operations who have completed an OWR Management course.	1, 2, 3B
		14.2	Maintain contract with AMOSC for immediate access to trained oiled wildlife response specialists.	1, 3B, 3C
		15.3	Maintain contract with OSRL to access additional trained OWR specialists.	1, 3B, 3C
		15.4	Open communication line to be maintained between IMT and infield operations to ensure awareness of progress against plan(s).	1, 3A, 3B
15	Management of environmental impacts of response risks	15.1	Oiled wildlife operations (including hazing) would be implemented with advice and assistance from the Oiled Wildlife Advisor from the DBCA, and in accordance with the processes and methodologies described in the WA OWRP and the relevant regional plan.	1

The resulting wildlife response capability has been assessed against the WCCS. The range of techniques provide an ongoing approach to response at identified RPAs.

Under optimal conditions, during the subsea or surface release, the capability available meets the need identified. It indicates that, the wildlife response capability has the following expected performance:

- undertake OWR first strike response:
  - mobilisation of Monitor and Evaluate operations to identify wildlife and RPAs contacted or at imminent risk of contact by hydrocarbons.
- availability and mobilisation of trained OWR personnel to supervise OWR activities.
- access to wildlife resources (personnel and equipment) to meet the needs where there are medium or high levels of wildlife impact.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.6 Waste Management

Waste management is considered a support technique to wildlife response, containment and recovery and shoreline clean-up. Waste generated and collected during the response that will require handling, management and disposal may consist of:

- Liquids (hydrocarbons and contaminated liquids) collected during shoreline clean-up and wildlife response, and/or
- Solids/semi-solids (oily solids, garbage, contaminated materials) and debris (e.g. seaweed, sand, woods, and plastics) collected during shoreline clean-up and wildlife response.

Expected waste volumes during an event are likely to vary depending on oil type, volume released, response techniques employed and how weathering of hydrocarbons. Waste management, handling and capacity should be scalable to maintain continuous response operations.

All waste management activities will follow the Environment Protection (Controlled Waste) Regulations 2004 and the waste will be managed to minimise final disposal volumes. Waste treatment techniques will consider contaminated solids treatment to allow disposal to landfill and solids with high concentrations of hydrocarbon will be treated and recycled where possible or used in clean fill if suitable.

The waste products would be transported from response locations to the nearest suitable staging area/waste transfer station for treatment, disposal or recycling. Waste will be transferred with appropriately licensed vehicles. Containers will be available for temporary waste storage and will be:

- labelled with the waste type
- provided with appropriate lids to prevent waste being blown overboard
- bunded if storing liquid wastes.
- processes will be in place for transfers of bulk liquid wastes and include:
  - inspection of transfer hose undertaken prior to transfer
  - watchman equipped with radio visually monitors loading hose during transfer
  - tank gauges monitored throughout operation to prevent overflow

The *Oil Spill Preparedness Waste Management Support Plan* details the procedures, capability and capacity in place between Woodside and its primary waste services contractor to manage waste volumes generated from response activities.

5.6.1 Response need based on predicted consequence parameters

Table 5-10: Response Planning Assumptions – Waste Management

Response planning assumptions: Waste management	
Waste loading per m^3 oil recovered (multiplier)	Shoreline clean-up (manual) – approximately 5-10 multiplier for oily solid and liquid wastes generated by manual clean-up.
	Oiled wildlife response – approximately 1 m^3 of oily solid and liquid waste generated for each wildlife unit cleaned.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.6.2 Environmental performance based on need

Table 5-11: Environmental Performance – Waste Management

Environmental Performance Outcome		To minimise further impacts, waste will be managed, tracked and disposed of in accordance with laws and regulations.		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
16	Waste Management	16.1	Contract with waste management services for transport, removal, treatment and disposal of waste.	1, 3A, 3B, 3C, 4
		16.2	Access to at least 675 m^3 of solid and liquid waste storage available within 4 days upon activation of 3rd party contract.	
		16.3	Access to up to 16,800 m^3 within 2 weeks.	
		16.4	Recovered hydrocarbons and wastes will be transferred to licensed treatment facility for reprocessing or disposal.	
		16.5	Waste management provider support staff available year-round to assist in the event of an incident with waste management as detailed in contract.	
		16.6	Open communication line to be maintained between IMT and waste management services to ensure the reliable flow of accurate information between parties.	1, 3A, 3B
		16.7	Waste management to be conducted in accordance with Australian laws and regulations.	1, 3A, 3B, 3C, 4
		16.8	Waste management services available and employed during response.	
17	Management of environmental impacts of response risks	17.1	Teams will segregate liquid and solid wastes at the earliest opportunity.	1, 3A, 3B, 3C, 4

The resulting waste management capability has been assessed against the WCCS. The range of techniques provide an ongoing approach to waste management at identified RPAs.

Given the largest shoreline volumes ashore are predicted during day 1 at a maximum volume of 151 m^3, and up to 2513 m^3 of waste is expected across all shoreline clean-up operations up until day 7, the capability available will exceed the need identified by day 6.

Whilst modelling predicts contact at a total of 3 RPAs above response threshold within 24-48 hours (Table 3-1), it should be noted that this is based upon 200 stochastic model runs thus it is unlikely to occur from a single release.

It indicates that the waste management capability has the following expected performance:

- Shoreline and nearshore operations may generate up to an additional 2513 m^3 for one week of offshore operations for the vessel collision at the State Waters boundary (CS-08).
- Woodside has assessed the existing capability available and considered potential alternative, additional and improved control measures. Where control measures have been selected and implemented, they are included in Section 6.6.
- Woodside's waste contractor has access to approximately 120,000 m^3 to treat overall waste volumes. The waste management requirements are within Woodside's and its service providers existing capacity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 5.7 Operational and Scientific monitoring

Operational and scientific monitoring (OSM) is a key component of the environmental management document framework for offshore petroleum activities, which includes activity EPs and OPEPs. The key elements and differences between operational monitoring and scientific monitoring include:

- **Operational Monitoring (OM)** – Is undertaken during the course of the spill and includes any physical. chemical and biological assessments that may guide operational decisions such as selecting the appropriate response and mitigation methods and/or to determine a response activity. This monitoring is additional to the activities (aerial/vessel surveillance, tracking buoys, oil spill trajectory modelling and satellite tracking) performed as part of the Monitor and Evaluate Strategy (Section 5.1). Information needs to be collected and processed rapidly to suit response needs, with a lower level of sampling and accuracy needed than for scientific purposes. For the OMP initiation and termination criteria during a Level 2-3 spill event refer to Table 9-1 of the Joint Industry OSM Framework.
- **Scientific Monitoring (SM)** – Is the principal tool for determining the extent, severity and persistence of possible environmental impacts from a hydrocarbon spill and for informing resultant remediation activities. Consequently, such studies are required to account for natural or sampling variation, and study designs must be robust and produce defensible data. Scientific monitoring is typically conducted over a wider study area, extending beyond the spill footprint, and a longer time period, extending beyond the spill response. For the SMP initiation and termination criteria during a Level 2-3 spill event refer to Table 9-2 of the Joint Industry OSM Framework.

Woodside has developed a Woodside OSM Bridging Implementation Plan (OSM-BIP)[1], which describes a program of monitoring oil pollution that will be adopted in the event of a hydrocarbon spill incident (Level 2–3) to marine waters. It aligns with the Joint Industry OSM Framework (AEP, 2021) and describes how this Framework applies to Woodside activities and spill risks.

A series of Operational Monitoring Plans (OMPs) and Scientific Monitoring Plans (SMPs) form part of the Joint Industry OSM Framework and provide detail on monitoring design, standard operating procedures, data management, quality assurance and quality control and reporting.

Table 5-12 lists the Joint Industry OMPs and SMPs that are relevant to the Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys. The aims/objectives of each OMP and SMP are listed in Tables 5-1 and 6-1 of the Joint Industry OSM Framework respectively. Woodside confirms it has reviewed these aims/objectives and determined they are all appropriate to address the potential impacts, risks and response activities of this activity, noting that dispersant application is not a suitable response strategy for this activity.

The OSM-BIP is structured so that it can provide a flexible framework that can be adapted to individual spill incidents. The Combined OSM Planning Area (refer to section 2.1 of the OSM-BIP), derived from all Woodside worst-case scenarios, represents the geographical extent of the Woodside OSM-BIP.

The OSM requirements for this activities credible spill scenarios, including monitoring priorities, implementation timeframes and capability is provided in ANNEX C: Angel CCS GPGT Surveys OSM Activity Specific Assessment.

Woodside will review the initiation criteria for OMPs and SMPs (provided in Table 9-1 [OMPs] and Table 9-2 [SMPs] of the Joint Industry Operational and Scientific Monitoring Framework (AEP, 2021)) during the preparation of the initial IAPs, and subsequent IAPs. If any initiation criteria are met, then that relevant OMP and/or SMP will be activated via the OSM Services Provider.

No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Table 5-12: Joint industry OSM plans relevant to Angel CCS GPGT activities

Operational Monitoring	Relevant for the activity	Scientific Monitoring	Relevant for the activity
OM1: Hydrocarbon Characterisation	✓	SM1: Water Quality Impact Assessment	✓
OM2: Hydrocarbon in Water Assessment	✓	SM2: Sediment Quality Impact Assessment	✓
OM3: Hydrocarbon in Sediment Assessment	✓	SM3: Intertidal & Coastal Habitat Assessment	✓
OM4a: Dispersant Effectiveness Monitoring (Subsea)	×	SM4: Seabirds and Shorebirds Assessment	✓
OM4b: Dispersant Effectiveness Monitoring (Surface)	×	SM5: Marine mega-fauna Assessment	✓
OM5: Rapid Marine Fauna Surveillance	✓	SM6: Benthic habitat Assessment	✓
OM6: Shoreline Clean-up Assessment (SCAT)	✓	SM7: Marine fish and elasmobranch assemblages assessment	✓
		SM8: Fisheries Impact Assessment	✓
		SM9: Heritage Features Assessment	✓
		SM10: Social Impact Assessment	✓

5.7.1 Response need for Shoreline Clean-Up Assessment (SCAT) based on predicted consequence parameters

The following statements identify the key parameters upon which the response need can be based:

- SCAT will be mobilised to RPAs contacted at 100 g/m^2.
- The stochastic run with the shortest timeframe for shoreline accumulation at 100 g/m^2 predicted is 8 hours to Dampier Archipelago, including Legendre Island (CS-08).

In addition, a number of assumptions are required to estimate the response need for SCAT. These assumptions have been described in Table 5-13. Consequently, for planning purposes and based on the modelling results for shortest time to contact at 100 g/m^2 there are two RPAs (Keast Island and Legendre Island) requiring four SCAT specialists. These resourcing requirements can be met via the resourcing arrangements outlined in Table 8-3 of the OSM-BIP.

Table 5-13: Response Planning Assumptions – SCAT

Response planning assumptions: SCAT	
Safety considerations	Shoreline clean-up operations cannot be implemented if the safety of response personnel cannot be guaranteed. This requires an initial and ongoing risk assessment of health and safety hazards and risks at the site. Personnel safety issues may include: • hydrocarbon gas and/or liquid exposure • waves and/or sea states, tidal cycle and intertidal zone limits • presence of wildlife • high ambient temperatures.
SCAT	• Deployment of 2 x specialists in SCAT from resource pool for each of the RPAs with predicted impacts

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.7.2 Summary – operational and scientific monitoring

A detailed OSM preparedness assessment is provided in ANNEX C: Angel CCS GPGT Surveys OSM Activity Specific Assessment.

The ALARP assessment for operational and scientific monitoring (Section 6.7) considers alternate, additional, and/or improved control measures on each selected response technique.

Known, reasonably practicable control measures have been adopted with the cost and organisational complexity of these options determined to be moderate and the overall delivery effectiveness determined to be medium. The OSM program's main objectives can be met, with no additional, alternative or improved control measures providing further benefit.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 5.7.3 Environmental performance based on need

Table 5-14: Operational and scientific monitoring

Environmental Performance Outcome		Implement OSM programs to assess and report on the impact, extent, severity, persistence and recovery of sensitive receptors contacted by a spill or affected by spill response.		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
18	OSM arrangements	18.1	Maintain access to OSM expertise qualified to fulfill OSM Implementation Lead role during a Level 2/3 spill event per Joint Industry OSM Framework requirements.	3A, 3B, 3C, 4
		18.2	OSM Implementation Lead responsible for overseeing implementation of OMP and SMP components in accordance with the Woodside OSM Bridging Implementation Plan[1].	
19	Access to adequate OSM capability to provide both initial and ongoing monitoring	19.1	Maintain contract with third-party OSM Services Provider to provide access to suitably qualified and competent personnel and equipment to assist in the implementation of monitoring in accordance with the capability and resourcing requirement described in Sections 8–10 of the OSM-BIP and the activity-specific capability assessment in Table C - 7 and Table C - 8.	3A, 3B, 3C, 4
		19.2	Obtain monthly capability reports from OSM Service Provider to demonstrate the capability described in Section 10 of the OSM-BIP is available throughout the activity	
		19.3	Annual testing of OSM Service Provider standby arrangements and activation process	
20	Baseline studies assurance	20.1	Annual review of environmental baseline data for all locations where spill modelling has predicted contact at relevant hydrocarbon thresholds within 7 days	3C
21	OSM-BIP maintenance	21.1	Annual review will be conducted according to the criteria in Section 11 of the OSM-BIP	3A, 3B, 3C, 4
22	OSM response	22.1	OMPs and SMPs will be activated in accordance with the initiation criteria provided in Tables 9-1 and 9-2 of the Joint Industry OSM Framework (AEP, 2021)	1
		22.2	Initiation criteria of OMPs and SMPs will be reviewed during the preparation of the initial Incident Action Plan (IAPs) and subsequent IAPs; and if any criteria are met, relevant OMPs and SMPs will be activated	
		22.3	If the OSM Implementation Lead identifies that additional monitoring capability is required beyond that described in Section 10 of the OSM-BIP, the need for these resources will be identified as soon as practicable and mobilised through the OSM Services Provider Contract, which includes provisions for scaling up personnel to meet monitoring program requirements	
		22.4	Decisions regarding co-mobilisation of monitoring teams will be determined following a spill event, as part of the Incident Action Planning process. These decisions will be made by the CIMT in consultation with the OSM Services Provider and relevant stakeholders, with due consideration given to safety, access to sensitive receptors, timing, and data quality requirements	
		22.5	OSM to be conducted in accordance with the Woodside OSM-BIP and, where relevant to the activity, the assessment detailed in ANNEX C: Angel CCS GPGT Surveys OSM Activity Specific Assessment	
		22.6	Monitoring prioritisation will be undertaken in accordance with the process and checklist provided in Table 13-1, informed by the guidance in Section C.2 of the OSPRMA	
		22.7	Mobilisation and implementation of OMPs and SMPs will be undertaken in accordance with the indicative timeframes and sequencing described in Section C.3 of the OSPRMA and Part B of the OSM-BIP	
		22.8	Implementation of OSM will comply with the minimum standards listed in Appendix A of the Joint Industry OSM Framework	

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

		22.9	Once Scientific Monitoring data reports are drafted they will be peer reviewed by an expert panel for data integrity	
		22.10	OMPs and SMPs will be terminated in accordance with the termination criteria provided in Table 9-1 and 9-2 of the Joint Industry OSM Framework (AEP, 2021)	
23	Shoreline Clean-up Assessment Technique (SCAT)	23.1	Mobilisation within 24 hours, in agreement with WA DTMI (for Level 2/3 incidents), deployment of 2 x specialist(s) in SCAT from resource pool for each of the Response Protection Areas (RPAs) with predicted impacts	1, 2, 3B, 3C, 4
		23.2	Reports from OM6: Shoreline Clean-up Assessment will be provided to the IMT daily, detailing the assessed areas to maximise effective utilisation of resources.	1, 3B, 4
		23.3	If vessels are required for access, anchoring locations will be selected to minimise disturbance to benthic primary producer habitats. Where existing fixed anchoring points are not available, locations will be selected to minimise impact to nearshore benthic environments with a preference for areas of sandy seabed where they can be identified	1
		23.4	Shallow draft vessels will be used to access remote shorelines to minimise the impacts associated with seabed disturbance on approach to the shorelines	
		23.5	Shoreline access routes with the least environmental impact identified will be selected by a specialist in SCAT operations	
		23.6	Vehicular access will be restricted on dunes, turtle nesting beaches an in mangroves	

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.8 Incident Management System (IMS)

The Incident Management System (IMS) is both a control measure and a measurement criteria. As a control measure the IMS function is to prompt, facilitate and record the completion of three key response planning processes detailed below. As a measurement criterion, the IMS records the evidence of the timeliness of all response actions included in the environmental performance standards and the plans used for the activity.

As the IMS does not directly remove hydrocarbons spilt into the marine environment there is no direct relationship to the response planning need.

5.8.1 Incident action planning

The CIMT will be required to collect and interpret information from the scene of the incident to determine support requirements to the site-based IMT, develop an IAP and assist the IMT with the execution of that plan. The site-based IC may request the CIMT to complete notifications internally within Woodside, to relevant persons/ organisations and government agencies as required. Depending on the type and scale of the incident either the CIMT IC or Deputy IC will be responsible for ensuring the development of the IAP. Incident Action Planning is an ongoing process that involves continual review to confirm the appropriateness of techniques to control the incident for the situation at the time.

5.8.2 Operational NEBA process

In the event of a response Woodside will confirm that the response techniques adopted at the time of Environment Plan/ Oil Pollution Emergency Plan (EP/ OPEP) acceptance remain appropriate to reduce the consequences of the spill. This process verifies that there is a continuing net environmental benefit associated with continuing the response technique through the operational NEBA process. This process manages the environmental risks and impacts of response techniques during the spill response. An operational NEBA will be undertaken throughout the response for each operational period.

The operational NEBA will consider the risks and benefits of conducting and response activity. For example, if vessels are required for access to nearshore or onshore areas, anchoring locations will be selected to minimise disturbance to benthic habitats. Vessel cleanliness would be commensurate with the receiving environment. The operational NEBA will consider the risks and benefits of conducting other response techniques.

The operational NEBA process is also used to terminate a response. Using data from operational and scientific monitoring activities the response to a hydrocarbon spill will be terminated in accordance with the termination process outlined in the Oil Pollution Emergency Arrangements (Australia). In effect the operational NEBA will determine whether there is net environmental benefit to continue response operations.

5.8.3 Consultation engagement process

Woodside will consult relevant persons/ organisations engaged during the spill response in accordance with internal standards. This process requires that Woodside will:

- Undertake all required notifications (including government notifications) for relevant persons/ organisations in the region (identified in the First Strike Plan). This includes notification to mariners to communicate navigational hazards introduced through response equipment and personnel.
- In the event of a response, identify and engage with relevant persons/ organisations and continually assess and review.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

5.8.4 Environmental performance based on need

Table 5-15: Environmental Performance – Incident Management System

Environmental Performance Outcome		To support the effectiveness of all other control measures and monitor/record the performance levels achieved.		
Control measure		**Performance Standard**		**Measurement Criteria (Section 5.9)**
25	Operational SIMA	25.1	Confirm that the response techniques adopted at the time of acceptance remain appropriate to reduce the consequences of the spill within 24 hours.	1, 3A
		25.2	Record the evidence and justification for any deviation from the planned response activities.	
		25.3	Record the information and data from operational and scientific monitoring activities used to inform the SIMA.	
26	Stakeholder engagement	26.1	Prompt and record all notifications (including government notifications) for persons/ organisations in the region are made.	
		26.2	In the event of a response, identification of relevant persons/ organisations will be re-assessed throughout the response period.	
		26.3	Undertake communications in accordance with: • Functional Support Team Guideline – Reputation • External Communication and Continuous Disclosure Procedure.	
27	Personnel required to support any response	27.1	Action planning is an ongoing process that involves continual review to confirm the appropriateness of techniques to control the incident are appropriate to the situation at the time.	1, 3B
		27.2	A duty roster of trained and competent people will be maintained to maintain minimum manning requirements are met all year round.	3C
		27.3	Immediately activate the CIMT with personnel filling one or more of the following roles: • CIMT Incident Commander • CIMT Deputy Incident Commander • Operations Section Chief • Planning Section Chief • Logistics Section Chief • Documentation Unit Leader • Safety Officer • Environment Unit Leader • Human Resources Officer • Public Information Officer • Situation Unit Leader • Finance Section Chief • Source Control Section Chief.	1, 2, 3B, 3C, 4
		27.4	Collect and interpret information from the scene of the incident to determine support requirements to the site-based IMT, develop an IAP and assist with the execution of that plan.	
		27.5	S&EM advisors will be integrated into CIMT to monitor performance of all functional roles.	
		27.6	Continually communicate the status of the spill and support Woodside to determine the most appropriate response by delivering on the responsibilities of their role.	
		27.7	Follow the Hydrocarbon Spill Australia Regulatory Framework, Operational Plans, FSPs, support plans and the IAPs developed.	1, 2, 3A, 4
		27.8	Contribute to Woodside's response in accordance with the aims and objectives set by the Incident Commander.	1, 2, 3B, 3C, 4

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 5.9 Measurement criteria for all response techniques

Woodside measures compliance with environmental performance outcomes and standards through four primary mechanisms. The aforementioned performance tables identify which of these four mechanisms monitors the readiness and records the effectiveness and performance of the control measures adopted.

1. The Incident Management System

The Incident Management System (IMS) supports the implementation of the Emergency and Crisis Management Procedure. The IMS provides a near real-time, single source of information for monitoring and recording an incident and measuring the performance of those control measures.

The Emergency and Crisis Management Procedure defines the management framework, including roles and responsibilities, to be applied to any size incident (including hydrocarbon spills). The organisational structure required to manage an incident is developed in a modular fashion and is based on the specific requirements of each incident. The structure can be scaled up or down.

The IAP process formally documents and communicates the:

- Incident objectives
- Status of assets
- Operational period objectives
- Response techniques (defined during response planning)
- The effectiveness of response techniques.

The information captured in the IMS (including information from personal logs and assigned tasks/close outs) confirms the response techniques implemented remain appropriate to reduce the consequences of the spill. The system also records all information and data that can be used to support the site-based IMT, development and the execution of the IAP.

2. The CEM Competency Dashboard

The CEM competency dashboard records the number of trained and competent responders that are available across Woodside to participate in a response.

This number varies dependent on expiry of competency certificates, staff attrition, internal rotations, leave and other absences. As such the Dashboard is designed to identify the minimum manning requirements and to identify sufficient redundancy to cater for the variances listed above.

Figure 5-1shows the minimum manning numbers for the different hydrocarbon spill response roles and the number of qualified persons against those roles.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

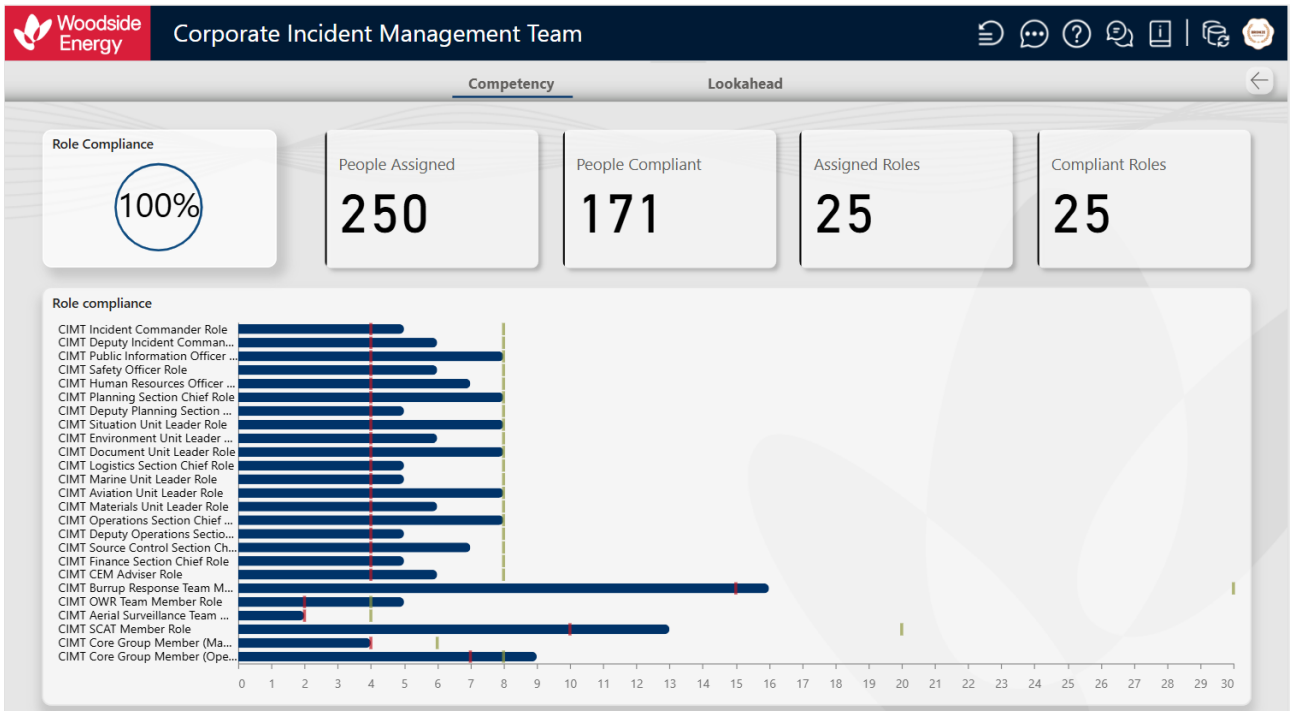

Figure 5-1: Example screenshot of the CEM dashboard

The Dashboard is one of Woodside's key means of monitoring its readiness to respond. It also demonstrates Woodside's ability to meet the requirements of the environmental performance standards that relate to filling certain response roles.

Figure 5-2shows an example of the SCAT role and the training modules required to show competence.

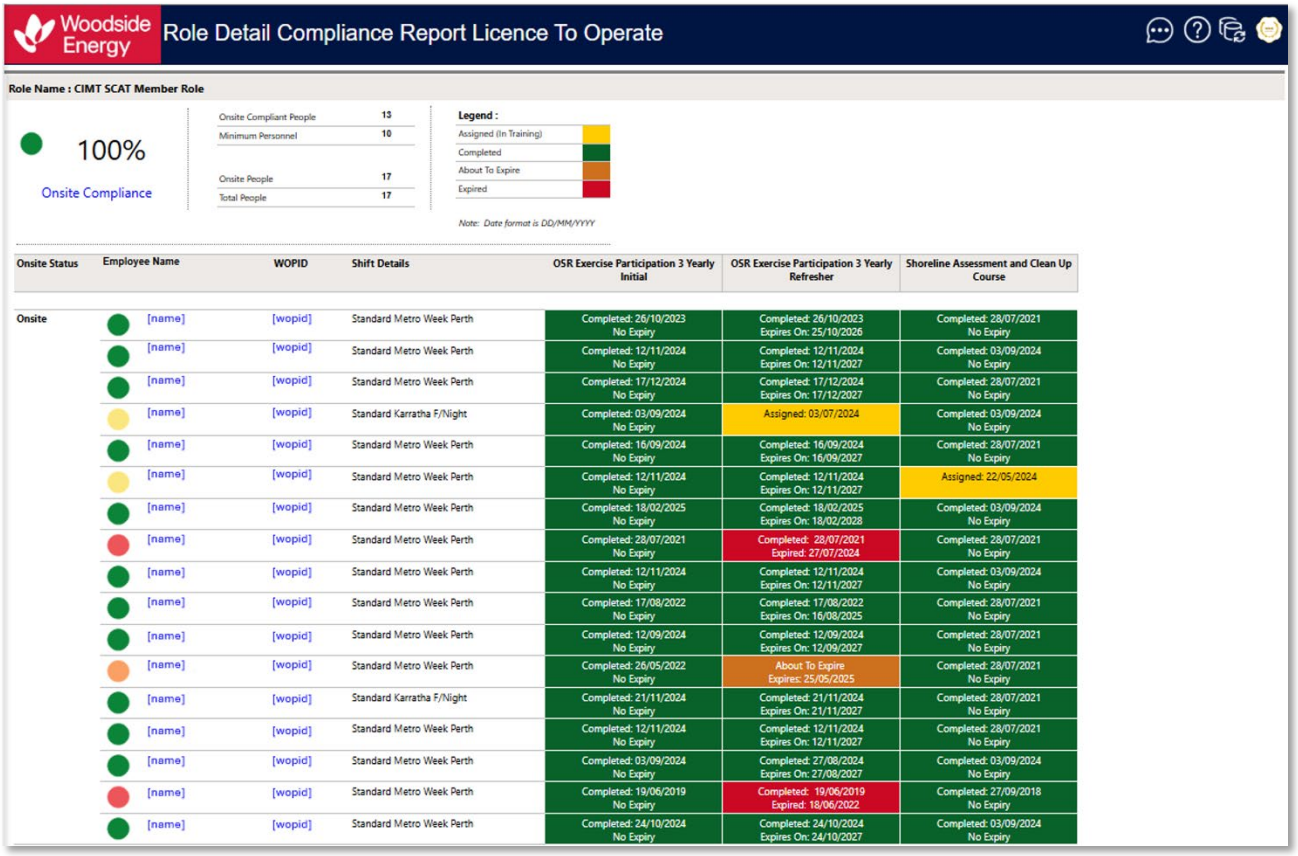

Figure 5-2: Example screenshot for the SCAT role

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Woodside also maintains access to a pool of trained responders which is composed of, but not limited to, personnel from the following organisations:

- Woodside internal
- Australian Marine Oil Spill Centre (AMOSC) core group
- AMOSC
- Oil Spill Response Limited (OSRL)
- Marine Spill Response Corporation (MSRC)
- Woodside contracted workforce

3. The Hydrocarbon Spill Preparedness Assurance Process

The Hydrocarbon Spill Response Team uses Woodside's assurance process to track compliance over three key control areas:

a) **Plans** – confirms all plans (including: Hydrocarbon Spill Australia Regulatory Framework, first strike plans, operational plans, support plans and tactical response plans) are current and in line with regulatory and internal requirements.

b) **Competency (personnel and testing)** – confirms the competency dashboard is up to date and there are the minimum numbers across CIMT, CMT and hydrocarbon spill response roles. The hydrocarbon spill training plan and exercise schedule, including testing of arrangements is also tracked. The Testing of Arrangements (TOA) register tracks the testing of all hydrocarbon spill response arrangements, key contracts and agreements in place with internal and external parties to ensure compliance.

c) **Capability (equipment and contracts)** – tracks and monitors capability that could be required in a hydrocarbon incident, including but not limited to: integrated fleet[7] vessel schedule, dispersant availability, rig/vessels monitoring, equipment stockpiles, tracking buoy locations and the CIMT duty roster.

The assurance process records how each commitment listed in the performance tables above is managed for ongoing compliance monitoring. The level of compliance can be reviewed in real time and is reported on a monthly basis through the CEM Function.

The completion of the assurance checks (over and above the ICE process) is also applied via the Woodside Integrated Risk and Compliance System (WiRCs) and subject to the requirements of Woodside's Provide Assurance Procedure.

4. The Hydrocarbon Spill Planning Standard, Hydrocarbon Spill Planning Work Instruction (Australia), Hydrocarbon Spill Capability and Competency Standard, and Hydrocarbon Spill Response Standard

The Hydrocarbon Spill Planning Standard sets out how to plan and prepare for a liquid hydrocarbon spill to the marine environment. (Note, this standard does not apply to scenarios relating to gas releases in the marine environment). This standard details the requirement for an Oil Pollution Emergency Plan (OPEP) to be developed, maintained, reviewed, and approved by appropriate regulators (where applicable).

The Hydrocarbon Spill Planning Work Instruction (Australia) details planning for hydrocarbon spill response preparedness including:

- Developing OPEPs.
- Defining how spill scenarios are developed on an activity specific basis
- Priority response receptor determination.
- ALARP determination.

The Hydrocarbon Spill Capability and Competency Standard details:

- Developing spill training requirements and ongoing maintenance of training and competency for personnel

[7] The Integrated fleet consists of vessels from multiple operators that have been contracted to Woodside to undertake a number of duties including hydrocarbon spill response.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

- Developing requirements for spill exercising / testing of spill response arrangements
- Maintaining access to identified equipment, personnel and contracts.
- Ensuring compliance and assurance is undertaken in accordance with external and internal requirements.

The Hydrocarbon Spill Response Standard details requirements for appropriate hydrocarbon spill response standards including:

- safeguarding the safety and health of people (responders and communities)
- stopping the source of the spill as quickly as possible
- minimising the environmental and community impact

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6 ALARP EVALUATION

This Section should be read in conjunction with Section 5 which is the capability planned for this activity.

6.1 Monitor and evaluate – ALARP assessment

Alternative, additional and improved control measure options have been identified and assessed against the base capability described in Section 5 with those that have been selected for implementation are highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.1.1 Monitor and evaluate – Control Measure Options Analysis

6.1.1.1 Alternative Control Measures

Alternative Control Measures considered *Alternative control measure, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Aerostat (or similar inflatable observation platform) for localised aerial surveillance.	Lead time to Aerostat surveillance is disproportionate to the environmental benefit. The system also provides a very limited field of visibility around the vessel it is deployed from.	Long lead time to access (>10 days). Each system would require an operator to interpret data and direct vessels accordingly. Requires multiple systems for shoreline use.	Purchase cost per system approx. A$300,000.	This option is not adopted as the minimal environmental benefit gained is disproportionate to the cost and complexity of its implementation.	**No**

6.1.1.2 Additional Control Measures

Additional Control Measures considered *Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Additional personnel trained to use systems.	Current arrangement provides an environmental benefit in the availability of trained personnel facilitating access to monitoring data used to inform all other response techniques. No improvement required.	No improvement can be made, all personnel in technical roles e.g. intelligence unit are trained and competent on the software systems. Personnel are trained and exercised regularly. Use of the software and systems forms part of regular work assignments and projects.	Cost for training in-house staff would be approx. A$25,000.	This option is not adopted as the current capability meets the need.	**No**
Additional satellite tracking buoys to enable greater area coverage.	Increased capability does not provide an environmental benefit compared to the disproportionate cost in having an additional contract in place.	Tracking buoy on location at manned facility and additional needs are met from Woodside owned stocks in King Bay Support Facility (KBSF) and Exmouth or can be provided by service provider.	Cost for an additional satellite tracking buoy would be A$200 per day or A$6,000 to purchase.	This option is not adopted as the current capability meets the need, but additional units are available if required.	**No**
Additional trained aerial observers.	Current capability meets need. Woodside has access to a pool of trained, competent observers at strategic locations to ensure timely and sustainable response. Additional observers are available through current contracts with AMOSC and OSRL.	Current capability meets need. Woodside has a pool of trained, competent observers at strategic locations to ensure timely and sustainable response. Additional observers are available through current contracts with AMOSC and OSRL Aviation standards and guidelines confirm all aircraft crews are competent for their roles. Woodside maintains a pool of trained and competent aerial observers with various home base locations to be called upon at the time of an incident. Regular audits of oil spill response organisations ensure training and competency is maintained.	Cost for additional trained aerial observers would be A$2,000 per person per day.	This option is not adopted as the current capability meets the need, but additional observers are available via response contractors if required.	**No**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6.1.1.3 Improved Control Measures

Improved Control Measures considered *Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Faster turnaround time from modelling contractor.	Improved control measure does not provide an environmental benefit compared to the disproportionate cost in having an additional contract in place.	External contractor on CIMT roster to be called as soon as required. However initial information needs to be gathered by CIMT team to request an accurate model. External contractor has person on call to respond from their own location.	Modelling service with a faster activation time would be achieved via membership of an alternative modelling service at an annual cost of A$50,000 for 24hr access plus an initial A$5000 per modelling run.	This option is not adopted as the minimal environmental benefit gained is disproportionate to the cost and complexity of its implementation.	**No**
Night time aerial surveillance.	The risk of undertaking the aerial observations at night is disproportionate to the limited environmental benefit. The images would be of low quality and as such the variable is not adopted.	Flights will only occur when deemed safe by the pilot. The risk of night operations, is disproportionate to the benefit gained, as images from sensors (IR, UV, etc). will be low quality. Flight time limitations will be adhered to.	No improvement can be made without risk to personnel health and safety and breaching Woodside's Golden Safety Rules.	This option is not adopted as the safety considerations outweigh any environmental benefit gained.	**No**

6.1.2 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activities:

- alternative
  - none selected
- additional
  - none selected
- improved
  - none selected.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6.2 Source Control via Vessel SOPEP – ALARP Assessment

Alternative, additional and improved control measure options have been assessed against the base capability described in Section 5 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.2.1 Source Control via Vessel SOPEP – Control Measure Options Analysis

6.2.1.1 Alternative Control Measures

Alternative Control Measures considered *Alternative control measures including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
No reasonably practical alternative control measures identified					

6.2.1.2 Additional Control Measures

Additional Control Measures considered *Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
No reasonably practical additional control measures identified					

6.2.1.3 Improved Control Measures

Improved Control Measures considered *Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
No reasonably practical improved control measures identified					

6.2.2 Selected control measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activities:

- alternative
  - none selected
- additional
  - none selected
- improved
  - none selected.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6.3 Shoreline Protection and Deflection - ALARP Assessment

Alternative, additional and improved control measure options have been identified and assessed against the base capability described in Section 5 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.3.1 Existing Capability – Shoreline Protection and Deflection

Woodside's exiting level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside's direct control.

6.3.2 Response Planning: Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys – Shoreline Protection and Deflection

Planning for shoreline protection is based upon identification of Response Protection Areas (RPAs) from deterministic modelling and the logistics associated with deploying protection at these locations. The response planning scenarios indicate that this would require effective mobilisation to priority shorelines and maintenance of protection until monitor and evaluate operations confirm that the locations were no longer at risk. Woodside has identified the RPAs from modelling results provided from specific scenarios. The full list of RPAs predicted to be contacted by oil above response thresholds are detailed in Table 3-1.

The control measures selected provide capability to commence mobilisation of shoreline protection equipment within 24 hours (if required). Stochastic modelling scenarios indicate that first shoreline impact at Dampier Archipelago at Legendre Island within 0.33 days for the vessel collision at the State Waters boundary (CS-08) scenario. Given shoreline contact at RPAs is predicted to arrive on day 0.33) at Dampier Archipelago at Legendre Island, the existing capability will meet the response need within 48 hours, guided by the ongoing monitor and evaluate operations.

Tactical response plans exist for many of the RPAs identified. The plans identify values and sensitivities that would be protected at location. Modelling does not predict that all priority protection shorelines will be at risk of contact at the same time. Therefore, to allow for the best use of available shoreline protection and deflection resources, monitor and evaluate techniques will inform the response, targeting RPAs where contact is predicted above response threshold levels.

Table 6-1 below outlines the capability required (number of RPAs predicted to be impacted) against the capability available (number of shoreline protection and deflection operations that can be mobilised and deployed). As can be seen from the table below. Woodside's capability meets the response planning need identified for shoreline protection and deflection operations at identified RPAs within 48 hours.

Table 6-1: Response Planning – Shoreline Protection and Deflection

Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys		Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7	Week 2	Week 3	Week 4	Month 2	Month 3
	Oil on shoreline (from stochastic modelling) m^3	89	0	5	0	0	0	0	0	0	0	0	0
A	Capability Required												
A1	Number of RPAs contacted (> 100 g/m^2) – CS-08 (State Waters boundary)	2	0	1	0	0	0	0	0	0	0	0	0
A2	Number of RPAs contacted (> 100 g/m^2) - CS-05 (Offshore location)	0	0	0	0	0	0	0	0	0	0	0	0
B	Capability Available (operations per day)												
B1	SPD operations available – per day (lower)	0	1	1	2	2	4	6	70	70	70	330	330
B2	SPD operations available – per day (upper)	1	2	3	4	6	8	10	84	84	84	336	336
C	Capability Gap (operations per day)												
C1	SPD operations gap – per day (lower)	2	-1	0	-2	-2	-4	-6	-70	-70	-70	-330	-330
C2	SPD operations gap – per day (upper)	3	-2	-1	-4	-6	-8	-10	-84	-84	-84	-336	-336

A1 and A2 – the number of Response Protection Areas contacted by surface hydrocarbons above 100 g/m^2
B1 and B2 – the upper and lower number of shoreline protection and deflection operations available (based on response planning assumptions in Section 5.3),
C1 and C2 – the gap between the upper and lower number of shoreline protection and deflection operations required in A1 and A2 compared to the operations available in B1 and B2

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Table 6-2: Indicative Tactical response plan, aims and methods for identified RPAs

Tactical Response Plan	Response aims and methods
Legendre Island – Dampier	**First Response objective:** Ongoing Monitor and Evaluate activities and evaluation of hydrocarbon spill to adapt aims and response tactics to the evolving nature of the incident and to assist in locating relevant booming areas. **Second Response objective:** Protection of sensitive shorelines (mangrove) at Legendres Island through use of shoreline booms. Formation types to deploy will be dependent on the time available until the hydrocarbon impacts the shoreline and local geographical and tidal/ weather conditions **Third Response objective:** Clean-up impacted shoreline. Manual clean-up techniques, use of mechanical recovery methods and techniques where appropriate. **Fourth response aim:** Collection and specialist cleaning/ rehabilitation of oiled wildlife NOTES: • Relevant permissions must be sought from DBCA to carry out any response operations within the limits of the area. • In the event that the existing Woodside equipment stockpile at the King Bay Supply Base becomes exhausted, Woodside has an MoU with AMSA and the DTMI to provide surplus equipment from their stockpile. Additionally, Woodside is a member of both AMOSC and OSRL and has the ability to call upon their relevant technical advisory services and equipment stockpiles 24/7. • This TRP should be considered a draft until it has been verified and tested.
Dampier Archipelago – Inshore Waters of Mermaid Sound/ Dampier Archipelago (applicable to RPAs including; Gidley Island, Keast Island, Cape Bruguieres, Angel Island and Cohen Island)	**First response objective:** Ongoing Monitor and evaluate activities and evaluation of hydrocarbon spill to adapt aims and response tactics to the evolving nature of the incident and to assist in locating relevant booming areas. **Second response objective**: Recovery of floating oil at sea where possible through the use of skimming systems and other appropriate recovery devices to reduce shoreline impact. **Third response objective:** Protection of sensitive shorelines within Dampier Archipelago through use of shoreline booms. Formation types to deploy will be dependent on the time available until the hydrocarbon impacts the shoreline and local geographical and tidal/weather conditions. **Fourth response objective**: Clean-up of the shoreline. Manual clean up techniques, use of mechanical recovery methods and techniques where appropriate. NOTES: • Relevant permissions must be sought from DBCA to carry out any response operations within the limits of the area. • In the event that the existing Woodside equipment stockpile at the King Bay Supply Base becomes exhausted, Woodside has an MoU with AMSA and the DTMI to provide surplus equipment from their stockpile. Additionally, Woodside is a member of both AMOSC and OSRL and has the ability to call upon their relevant technical advisory services and equipment stockpiles 24/7. • This TRP should be considered a draft until it has been verified and tested.

Pre-emptive mobilisation of equipment and personnel would commence as soon as practicable prior to oil contact. Additional resources would be mobilised depending on the scale of the event to increase the length or number of shorelines being protected.

A shoreline protection and deflection response would be launched only when Monitor and Evaluate activities/Operational Monitoring operations identify spill heading towards RPA(s) and there is sufficient time for deployment prior to shoreline contact.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6.3.3 Shoreline Protection and Deflection – Control Measure Options Analysis

6.3.3.1 Alternative Control Measures

Alternative Control Measures considered *Alternative control measures including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Pre-position equipment at Response Protection Areas (RPAs)	Additional environmental benefit of having equipment prepositioned is considered minor as the RPAs predicted to be contacted are based on modelling outputs and thus may differ under the prevailing conditions of a real event making it impractical to preposition equipment in advance. Equipment is currently available to protect RPAs and additional shorelines, within estimated minimum times until shoreline contact at RPAs, enabling mobilisation of the selected delivery options.	The incremental environmental benefit associated with these delivery options is considered minor and unlikely to reduce the environmental consequence of a significant hydrocarbon release beyond the adopted delivery options. Considering the highly unlikely nature of a significant hydrocarbon release and the costs and organisational complexity associated with prepositioning and maintenance of equipment, the sacrifice is considered disproportionate to the limited environmental benefit that might be realised. Furthermore, these options would conflict with the mutual aid philosophy being adopted under the selected delivery options. The selected delivery options for shoreline protection and deflection meet the relevant objectives of this control measure and do not require prepositioned or additional equipment in Exmouth.	Total cost to preposition protection/ deflection packages at each site of potential impact would be approx. A$6100 per package per day.	This option is not adopted as addition shoreline protection and deflection capability is not considered practicable due to uncertainty of the sites that may be contacted during a real spill event and the predicted time frames prior to contact. Safety factors have also been considered, including the potential for personnel to be exposed to volatile hydrocarbons in the early stage of the response. Given the rapid natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**

6.3.3.2 Additional Control Measures

Additional Control Measures considered *Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Supplemented stockpiles of equipment in Exmouth to protect additional shorelines	Additional equipment would increase the number of receptor areas that could be protected from hydrocarbon contact. However, current availability of personnel and equipment is capable of protecting up to 30 km of shoreline, commensurate with the scale and progressive nature of shoreline impact. Additional stocks would be made available from international sources if long term up scaling were necessary. A reduction in environmental consequence from a ‘B’ rating (serious long-term impacts) is unlikely to be realised as a result of having more equipment available locally.	The incremental environmental benefit associated with these delivery options is considered minor and unlikely to reduce the environmental consequence of a significant hydrocarbon release beyond the adopted delivery options. Considering the highly unlikely nature of a significant hydrocarbon release and the costs and organisational complexity associated with prepositioning and maintenance of equipment, the sacrifice is considered disproportionate to the limited environmental benefit that might be realised. Furthermore, these options would conflict with the mutual aid philosophy being adopted under the selected delivery options. The selected delivery options for shoreline protection and deflection meet the relevant objectives of this control measure and do not require prepositioned or additional equipment in Exmouth.	Total cost for purchase supplemental protection and deflection equipment would be approximately. A$455,000 per package.	Whilst modelling for this activity predicts contact at 8 RPAs within 24-48 hours, it should be noted that this is based upon 200 stochastic model runs thus it is unfeasible for this to all occur from a single release. Safety factors have also been considered, including the potential for personnel to be exposed to volatile hydrocarbons in the early stage of the response. Given the rapid natural weathering rate of MDO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP. This option is not adopted as addition shoreline protection and deflection capability is not considered practicable in the time frames from a logistical perspective. Whilst modelling for this activity predicts contact at 3 RPAs within 72 hours, this is based upon 200 stochastic model runs thus it is unfeasible for this to all occur from a single release. Given the rapid natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Additional trained personnel	The level of training and competency of the response personnel allows the shoreline protection and deflection operation is delivered with minimum secondary impact to the environment. Training additional personnel does not provide an increased environmental benefit.	Additional personnel required to sustain an extended response can be sourced through the Woodside *People & Global Capability Surge Labour Requirement Plan*. Additional personnel sourced from contracted OSRO's (OSRL/AMOSC) to manage other responders. Response personnel are trained and exercised regularly in shoreline response techniques and methods. All personnel involved in a response will receive a full operational/safety briefing prior to commencing operations.	Additional Specialist Personnel would cost A$2000 per person per day.	This option is not adopted as the existing capability meets the need within 48 hours. Safety factors have also been considered, including the potential for personnel to be exposed to volatile hydrocarbons in the early stage of the response. Given the rapid natural weathering rate of condensate and MDO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**

6.3.3.3 Improved Control Measures

Improved Control Measures considered *Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Faster response/ mobilisation time	Modelling predicts floating or shoreline accumulation at threshold at day 0.33 at Dampier Archipelago and Legendre Island (CS-08), thus faster response times are not practicable.	Response teams, trained personnel, contracted oil spill response service providers, government agencies and the associated mitigation equipment required to enact an initial protection and deflection response will be available for mobilisation within 24-48 hrs of activation. Additional equipment from existing stockpiles and oil spill response service providers can be on scene within days.	The cost of establishing a local stockpile of new mitigation equipment (including protection and deflection boom) closer to the expected hydrocarbon stranding areas is not commensurate with the need.	This option is not adopted as additional shoreline protection and deflection capability is not considered practicable in the time frames from a logistical perspective. Safety factors have also been considered, including the potential for personnel to be exposed to hydrocarbon gas vapours in the early stage of the response. Given the rapid natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**

6.3.4 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activities:

- alternative
  - none selected
- additional
  - none selected
- improved
  - none selected.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6.4 Shoreline Clean-up – ALARP Assessment

Alternative, additional and improved control measure options have been identified and assessed against the base capability described in Section 5 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.4.1 Existing Capability – Shoreline Clean-up

Woodside's exiting level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside's direct control.

6.4.2 Response planning: Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys – Shoreline Clean-up

Woodside has assessed existing capability against the WCCS and has identified that the range of techniques provide an ongoing approach to shoreline clean-up at identified RPAs. Woodside's capability can cover all required shoreline clean-up operations for the activities.

Modelling predicts shoreline contact from day 0.33 at Dampier Archipelago at Legendre Island (69 m^3) for the vessel collision at the State Waters boundary (CS-08) with ongoing accumulation over the following days, Woodside is satisfied that the current capability (which is predicted to meet the response need within 72 hours) is managing risks and impacts to ALARP. The largest volumes ashore are Dampier Archipelago at Legendre Island with approximately 69 m^3 predicted on day 0.33. These volumes are considered very conservative. The full list of RPAs predicted to be contacted by oil is detailed in **Table 3-1** and relevant Tactical Response Plans available for identified RPAs are included in **Table 6-2**.

These figures have been combined into a single response planning need scenario that provides a worst-case scenario for planning purposes as outlined below. Given all other shoreline contact scenarios identified from deterministic modelling are longer time frames and lesser volumes, demonstration of capability against this need will ensure Woodside can meet requirements for any other outcome.

The potential scale and remoteness of a response coupled with the uncertainty of which locations will be affected precludes the stockpiling or prepositioning of equipment specific to shorelines. The most significant constraint is accommodation and transport of personnel in Dampier to undertake clean-up operations and to manage wastes generated during the response effort. From previous assessment of facilities in Dampier, Woodside estimates that current accommodation can cater for a range of 500-700 personnel per day.

Woodside has identified several options which could be mobilised to achieve defined response objectives. Evaluation considers the benefit in terms of the time to respond and the scale of response made possible by each option. The evaluation of possible control measures is summarised in Section 6.5.3.

Table 6-3: Response Planning – Shoreline Clean-up

	Shoreline Clean-up (Phase 2)	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7	Week 2	Week 3	Week 4	Month 2	Month 3	Month 4
	Oil on shoreline (from deterministic modelling) m^3													
	Shoreline accumulation (above 100 g/m^2) - m^3	89	0	5	0	0	0	0	0	0	0	0	0	0
	Oil remaining following response operations - m^3	0	26	0	0	0	0	0	0	0	0	0	0	0
A	**Capability Required (number of operations)**													
A1	**SCU operations required (lower)**	10	3	1	0	0	0	0	0	0	0	0	0	0
A2	**SCU operations required (upper)**	0	4	1	0	0	0	0	0	0	0	0	0	0
B	**Capability Available (number of operations)**													
B1	**SCU operations available - Stage 2 - Manual (lower)**	0	1	3	5	8	12	15	105	105	105	560	560	560
B2	**SCU operations available - Stage 2 - Manual (upper)**	0	2	5	8	10	15	20	140	140	140	560	560	560
C	**Capability Gap**													
C1	**SHC operations gap (lower)**	10	2	-3	-5	-8	-12	-15	-105	-105	-105	-560	-560	-560
C2	**SHC operations gap (upper)**	0	2	-4	-8	-10	-15	-20	-140	-140	-140	-560	-560	-560

A1 and A2 – the number of Shoreline Clean-up operations required based on the hydrocarbon volumes ashore above 100 g/m^2
B1 and B2 – the upper and lower number of shoreline clean-up operations available (based on response planning assumptions in Section 5.4),
C1 and C2 – the gap between the upper and lower number of shoreline clean-up operations required in A1 and A2 compared to the operations available in B1 and B2

6.4.3 Shoreline Clean-up – Control measure options analysis

6.4.3.1 Alternative Control Measures

Alternative Control Measures considered *Alternative control measures including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
No reasonably practical alternative control measures identified					

6.4.3.2 Additional Control Measures

Additional Control Measures considered *Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Additional trained personnel available	The level of training and competency of the response personnel ensures the shoreline clean-up operation is delivered with minimum secondary impact to the environment. Training additional personnel does not provide an increased environmental benefit.	Additional personnel required to sustain an extended response can be sourced through the Woodside *People & Global Capability Surge Labour Requirement Plan*. Additional personnel sourced from contracted OSROs (OSRL/AMOSC) to manage other responders Response personnel are trained and exercised regularly in shoreline response techniques and methods. All personnel involved in a response will receive a full operational/safety briefing prior to commencing operations.	Additional specialist personnel would cost A$2000 per person per day.	Modelling for this activity predicts shoreline contact at feasible response thresholds within 24 hours of the spill and Woodside's existing capability allows for mobilisation to commence within 24-48 hours. Larger numbers of additional personnel may also be detrimental to sensitive shoreline areas. Safety factors have also been considered, including the potential for personnel to be exposed to hydrocarbon gas vapours in the early stage of the response. Given the rapid natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**
Additional trained personnel deployed	Maintaining a span of control of 200 competent personnel is deemed manageable and appropriate for this activity. Additional personnel conducting clean-up activities may be able to complete the clean-up in a shorter timeframe. Managing a smaller, targeted response is expected to achieve an environmental benefit through ensuring the shoreline clean-up response is suitable and scalable for the shoreline substrate and sensitivity type.	The figure of 200 personnel is broken down to include on 1-2 x Trained Supervisors managing 8-10 personnel/labour hire responders. This allows for multiple operational teams to operate along the extended shoreline at different locations. Typically, an additional 30-50% of the tactical workforce is required to support ongoing operations including on-scene control, logistics, safety/medical/welfare and transport. Personnel on site will include members with the appropriate specialties to ensure an efficient shoreline clean-up. Additional personnel are available through existing contracts with oil spill response organisations, labour hire organisations and environmental panel contractors	Additional specialist personnel would cost A$2000 per person per day.	This option is not adopted as deployment of larger numbers of additional trained personnel may be detrimental to sensitive shoreline areas. Safety factors have also been considered, including the potential for personnel to be exposed to hydrocarbon gas vapours in the early stage of the response. Given the rapid natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

6.4.3.3 Improved Control Measures

Improved Control Measures considered *Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Faster response/ mobilisation time	Modelling predicts floating or shoreline impacts at threshold (>100 g/m^2) at day 0.33 (CS-08) , thus faster response times are not practicable.	Response teams, trained personnel, contracted oil spill response service providers, government agencies and the associated mitigation equipment required to enact an initial protection and deflection response will be available for mobilisation within 24-48 hrs of activation. Additional equipment from existing stockpiles and oil spill response service providers can be on scene within days.	The cost of establishing a local stockpile of new shoreline clean-up equipment closer to the expected hydrocarbon stranding areas is not commensurate with the need.	This option is not adopted as additional shoreline clean-up capability is not considered practicable in the time frames prior to contact. Safety factors have been considered, including the potential for personnel to be exposed to hydrocarbon gas vapours in the early stage of the response. Given the rapid natural weathering rate of MGO, mobilising additional capability is not expected to provide a material net environmental benefit, therefore the current capability is considered to reduce the risk to ALARP.	**No**

6.4.4 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activities:

- alternative
  - none selected
- additional
  - none selected
- improved
  - none selected.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 6.5 Oiled Wildlife Response – ALARP Assessment

Alternative, additional and improved control measure options have been identified and assessed against the base capability described in Section 5 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.5.1 Existing Capability – Oiled Wildlife Response

Woodside's existing level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside's direct control.

6.5.2 Oiled Wildlife Response – Control Measure Options Analysis

6.5.2.1 Alternative Control Measures

Alternative Control Measures considered
Alternative control measures including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
Direct contracts with service providers	This option duplicates the capability accessed through AMOSC and OSRL and would compete for the same resources. Does not provide a significant increase in environmental benefit.	These delivery options provide increased effectiveness through more direct communication and control of specialists. However, no significant net benefit is anticipated.	Duplication of capability – already subscribed to through contracts with AMOSC and OSRL	This option is not adopted as the existing capability meets the need.	**No**

6.5.2.2 Additional Control Measures

Additional Control Measures considered
Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
Additional wildlife treatment systems	The selected delivery options provide access to call-off contracts with selected specialist providers. The agreements ensure that these resources can be mobilised to meet the required response objectives, commensurate with the progressive nature of environmental impact and the time available to monitor hydrocarbon plume trajectories. Provides response equipment and personnel by day 3. The additional cost in having a dedicated oiled wildlife response (equipment and personnel) in place is disproportionate to environmental benefit. These selected delivery options provide capacity to carry out an oiled wildlife response if contact is predicted; and to scale up the response if required to treat widespread contamination. Current capability meets the needs required and there is no additional environmental benefit in adopting the improvements.	Although hydrocarbon contact above wildlife response threshold concentrations (>100 g/m^2) with shoreline is expected from day 1 (CS-08), given the low likelihood of such an event occurring and that the current capability meets the need within 48 hours of the spill, the cost of implementing measures to reduce the mobilisation time is considered disproportionate to the benefit. Oiled wildlife response capacity would be addressed for open Commonwealth waters through the AMOSC arrangements, as informed by monitor and evaluate operations, and under the direction of DBCA in nearshore areas. The cost and organisational complexity of this approach is moderate, and the overall delivery effectiveness is high.	Additional wildlife response resources could total A$1700 per operational site per day.	This option is not adopted as the existing capability meets the need within 48 hours of the spill.	**No**
Additional trained wildlife responders	Numbers of oiled wildlife are expected to be low in the remote offshore setting of the oiled wildlife response, given the distance from known aggregation areas. The potential environmental benefit of training additional personnel is expected to be low.	Current numbers meet the needs required within 48 hours of the spill and additional personnel are available through existing contracts with oil spill response organisations and environmental panel contractors. Additional equipment and facilities would be required to support ongoing response, depending on the scale of the event and the impact to wildlife and maybe sourced via existing contracts with OSROs. Materials for holding facilities, portable	Additional wildlife response personnel cost A$2000 per person per day	This option is not adopted as the existing capability meets the need within 48 hours of the spill.	**No**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

		pools, enclosures and rehabilitation areas would be sourced as required.			

6.5.2.3 Improved Control Measures

Improved Control Measures considered *Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Faster mobilisation time for wildlife response	Response time is limited by specialist personnel mobilisation time. Current timing is not sufficient for expected first shoreline contact. This control measure provides increased effectiveness through faster mobilisation of specialists. Some net environmental benefit is expected if teams could be mobilised by Day 1.	Pre-positioning vessels or equipment would reduce mobilisation time for oiled wildlife response activities. However, given the effectiveness of an oiled wildlife response is expected to be low, an earlier response would provide a marginal increase in environmental benefit.	Wildlife response packages to preposition at vulnerable sites identified through the deterministic modelling cost A$700 per package per day. The cost of having dedicated equipment and personnel available to respond faster is considered disproportionate to the environmental benefit.	This option is not adopted as the existing capability meets the need from day 2.	**No**

6.5.3 Selected control measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activities:

- alternative
  - none selected
- additional
  - none selected
- improved
  - none selected.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 6.6 Waste Management – ALARP Assessment

Alternative, additional and improved control measure options have been identified and assessed against the base capability described in Section 5 with those that have been selected for implementation highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.6.1 Existing Capability – Waste Management

Woodside's exiting level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/vessel/aircraft/vehicle location and duties, survey or classification society inspection requirements, overflight/port/quarantine permits and inspections, crew/pilot duty and fatigue hours, refuelling/re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside's direct control.

6.6.2 Waste Management - Control Measure Options Analysis

6.6.2.1 Alternative Control Measures

Alternative Control Measures considered
Alternative control measure including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
No reasonably practical alternative control measures identified					

6.6.2.2 Additional Control Measures

Additional Control Measures considered
Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
Increased waste storage capability	The procurement of waste storage equipment options on the day of the event will allow immediate response and storage of collected waste. The environmental benefit of immediate waste storage is to reduce ecological consequence by safely securing waste, allowing continuous response operations to occur.	Access to Woodside's waste service provider's storage options provides the resources required to store and transport sufficient waste to meet the need. Access to waste contractors existing facilities enables waste to be stockpiled and gradually processed within the regional waste handling facilities. Additional temporary storage equipment is available through existing contract and arrangements with AMOSC/ OSRL. Existing arrangements meet identified need for the GPGT Surveys Program.	Cost for increased waste disposal capability would be approx. A$1300 per m^3. Cost for increased onshore temporary waste storage capability would be approx. A$40 per unit per day.	This option is not adopted as the existing capability meets the need from day 3.	**No**

6.6.2.3 Improved Control Measures

Improved Control Measures considered
Improved control measures are evaluated for improvements they could bring to the effectiveness of adopted control measures in terms of functionality, availability, reliability, survivability, independence and compatibility

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
Faster response time	The access to Woodside's waste service provider's storage options provides the resources to store and transport waste, permitting the wastes to be stockpiled and gradually processed within the regional waste handling facilities. Bulk transport to the waste service provider's licensed waste management facilities would be undertaken via controlled-waste-licensed vehicles and in accordance with Environmental Protection (Controlled Waste) Regulations 2004. The environmental benefit from successful waste storage will reduce pressure on the treatment and disposal facilities reducing ecological consequences by safely securing waste. In addition, waste storage	Woodside already maintains an equipment stockpile in Exmouth to enable shorter response times to incidents. This stockpile includes temporary waste storage equipment. Woodside has access to stockpiles of waste storage and equipment in Dampier and Exmouth through existing contracts and arrangements.	The incremental benefit of having a dedicated local Woodside owned stockpile of waste equipment and transport is considered minor and cost is considered disproportionate to the benefit gained given predicted shoreline contact times.	This option is not adopted as the existing capability meets the need.	**No**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

	and transport will allow continuous response operations to occur. This delivery option would increase known available storage, eliminating the risk of additional resources not being available at the time of the event. However, the environmental benefit of Woodside procuring additional waste storage is considered minor as the risk of additional storage not being available at the time of the event is considered low and existing arrangements provide adequate storage to support the response.				

6.6.3 Selected control measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the activities:

- alternative
  - none selected
- additional
  - none selected
- improved
  - none selected.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 6.7 Operational and Scientific Monitoring – ALARP Assessment

Alternative, additional and improved options have been identified and assessed against the base capability described in Section 5 with those that have been selected for implementation which are highlighted in green. Items highlighted in red have been considered and rejected on the basis that they are not feasible, the costs are clearly disproportionate to the environmental benefit, and/or the option is not reasonably practical. Control measures where there is not a clear justification for their inclusion or exclusion may be subject to a detailed ALARP assessment.

6.7.1 Existing Capability – Operational and Scientific Monitoring

Woodside's existing level of capability is based on internal and third-party resources that are available 24 hours, 7 days per week. The capability presented below is displayed as ranges to incorporate operational factors such as weather, crew/ vessel/ aircraft/ vehicle location and duties, survey or classification society inspection requirements, overflight/ port/ quarantine permits and inspections, crew/ pilot duty and fatigue hours, refuelling/ re-stocking provisions, and other similar logistic and operational limitation that are beyond Woodside's direct control.

6.7.2 Operational and Scientific Monitoring – Control Measure Options Analysis

6.7.2.1 Alternative Control Measures

Alternative Control Measures considered
Alternative control measures including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
Dedicated contracted OSM vessel (exclusive to Woodside)	Would provide marginally faster mobilisation time of first-strike monitoring resources. However, the timescale difference would be limited when compared to the availability of in-field support vessels which are equipped with water quality sampling equipment, meaning it would result in very minor to no environmental benefit.	Chartering and equipping additional vessels on standby for operational and scientific monitoring has been considered. The option is reasonably practicable but the sacrifice (charter costs and organisational complexity) is significant, particularly when existing contracted support vessels can be equipped with water quality sampling equipment. Additionally, vessels are not the limiting factor in deployment times, as the majority of operational and scientific monitoring components require trained specialists, who can take > 72 hours to mobilise.	The cost and organisational complexity of contracting a dedicated response vessel is considered disproportionate to the marginal environmental benefit by adopting these delivery options.	This control measure is not adopted as the costs and complexity are considered disproportionate to any environmental benefit that might be realised.	**No**

6.7.2.2 Additional control measures

Additional Control Measures considered
Additional control measures are evaluated in terms of them reducing an environmental impact or an environmental risk when added to the existing suite of control measures

Option considered	Environmental consideration	Feasibility	Approximate Cost	Assessment conclusions	Implemented
Pre-position a team of trained scientific monitoring personnel on standby in Dampier	Pre-positioning a team of trained scientific monitoring personnel closer to the spill location would result in quicker mobilisation times for one or two priority OMPs or SMPs to be implemented.	A trained team of scientific monitoring personnel positioned in Dampier could result in a more rapid deployment of initial monitoring. However, this option is reliant on suitable vessels being readily available in Dampier and not requiring relocation from nearby ports or adjacent offshore locations.	The costs of having a small team of trained scientific monitoring personnel available on standby in Dampier would be in excess of $3-4M / annum and would be an associated cost to the activity whether there was a spill or not.	The cost of maintaining a team of trained scientific monitoring personnel on standby in Dampier is considered disproportionate, as multiple teams of trained personnel are required to implement multiple OMPs and SMPs. It is considered more cost effective and feasible to pre-position first strike sampling kits on support vessels (see below).	**No**
Contract additional OSM Service Providers to increase availability of monitoring personnel in the first 2 weeks of the spill	The availability of additional monitoring personnel could theoretically increase the number of receptors and locations able to be monitored, however, the ability to deploy personnel would be subject to a range of feasibility considerations.	This option has been considered and evaluated; however, it has been discounted on the basis that deploying a significantly larger number of monitoring teams concurrently with response operations would introduce additional safety, environmental, and operational risks. The current resource assessment within Table C - 7indicates that up to 24 monitoring teams may be required during the initial two weeks of the response. Expanding this effort further by engaging additional contracted monitoring teams would likely result in increased simultaneous operations (SIMOPs), elevating the potential for vessel interactions, collision risks, anchoring impacts, and waste discharges, thereby increasing the overall risk profile. To ensure risk remains ALARP, a staged and scalable approach to resourcing has been adopted. Should additional monitoring capacity be required from week 3 onwards, this will	Cost to contract an additional OSM Service Provider.	The option to contract an additional OSM Service Provider to increase the number of contracted monitoring teams during the initial stages of the spill response has been assessed and found not to be reasonably practicable due to the elevated safety and environmental risks associated with SIMOPs, including vessel collisions, anchoring impacts, and waste discharges. These risks outweigh the marginal benefit of increased early-stage monitoring coverage, particularly given the scale of the existing response and monitoring deployment already planned.	**No**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

		be identified early through ongoing review of monitor and evaluate activities and existing monitoring efforts. Woodside will activate additional resourcing via its existing contract with the OSM Services Provider, thereby ensuring a streamlined and controlled expansion of effort. By this stage of the response, operational response activities are expected to have stabilised, reducing the likelihood and severity of SIMOPs-related risks. In addition, efficiencies may be gained by reallocating existing monitoring teams to other priority receptors where monitoring is still required, particularly in cases where termination criteria have been met at initial locations. This dynamic resourcing approach ensures that additional personnel are only deployed when necessary, thereby supporting both environmental and safety performance outcomes and maintaining ALARP principles throughout the monitoring program.		
Purchase initial water quality / hydrocarbon sampling kits for pre-positioning on nearby support vessels and develop technical procedure for sample collection	The availability of initial water quality / hydrocarbon sampling kits on nearby support vessels (and an accompanying technical procedure for sample collection) will provide an opportunity for more rapid initial measurements of hydrocarbon properties and concentrations. This information will provide important initial situational awareness information that will aid decision making in both monitoring and response efforts.	This control measure will improve the availability and timeframe for initialwater quality sampling.	Implementing this additional control measure will involve time and effort to source and supply initialsampling kits to the selected supply vessels. There will also be employee time involved in developing and conducting training to vessel crews on the technical procedure for sample collection.	Adoption of this control measure will provide an additional and quicker opportunity for initialwater quality sampling, resulting in improved situational awareness for decision making in monitoring and response teams.	**Yes**
Modify Woodside Aerial Surveillance Observer Log to enable observers to record marine fauna sightings (presence and type of fauna)	Initial aerial surveillance provides important information for decision making in response operations, but can also provide important initial environmental monitoring data. Amending the Woodside Aerial Surveillance Observer Log to include the ability to report on location, presence and type of fauna could assist in a more rapid, effective deployment of specialised OMP teams for Marine Fauna Assessment and Oiled Wildlife Response.	This control measure is considered reasonably practicable to implement.	Cost to modify the Aerial Surveillance Observer Log is minimal and is associated with time and effort of existing employees.	Adoption of this control measure is considered to be beneficial as it could assist in more effective and efficient deployment of fauna monitoring and response efforts.	**Yes**
Conduct periodical review of existing baseline data sources across receptors predicted to be contacted within 7 days at the low thresholds and a probability ≥10%	This ensures that receptors with deficient baseline data are identified. This a consideration for first-strike monitoring prioritisation and the finalisation of each SMP design	This control measure is considered reasonably practicable to implement.	Cost of contract with Service Provider.	Understanding the presence or absence, suitability and quality of baseline data for receptors predicted to be contacted within 7 days, at a probability ≥ 10%, is an important preparatory measure. Understanding which receptors have insufficient baseline data will help quickly guide monitoring prioritisation and the finalisation of each SMP design and whether there is a need to include alternative designs.	**Yes**

6.7.2.3 Improved Control Measures considered

Improved Control Measures considered *Improved control measures, including potentially more effective and/or novel control measures are evaluated as replacements for an adopted control*					
Option considered	**Environmental consideration**	**Feasibility**	**Approximate Cost**	**Assessment conclusions**	**Implemented**
Adoption of the OSRL OSM Supplementary Service Agreement for OSM capability provision	A Joint Industry capability provision has considerable benefits, including an improvement to industry OSM standards; improved reliability in accessing specialist personnel; efficiencies and capability growth associated with shared testing and exercising; and greater depth in Monitoring Service Provider (MSP) capability, with a centralised	This control measure has already been developed by Industry and is considered reasonably practicable to implement.	Cost of annual subscription to OSRL OSM Supplementary Service Agreement	Adopting this control measure involves additional costs, but the benefits of a Joint Industry OSM capability provision outweighs the costs and therefore this additional measure has been accepted.	**Yes**

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

	contract coordinating multiple consultancies and MSPs.				
Determine the required specifications for suitable monitoring vessels, including specialised equipment for OMPs and SMPs (i.e. hiab) and the requirement of shallow draft vessels to access offshore islands and priority monitoring areas	Understanding vessel specification requirements for OSM at priority locations will result in quicker mobilisation times, and more effective monitoring, as correctly equipped vessels will be made available at the commencement the monitoring effort.	This control measure is considered reasonably practicable to implement.	Cost to determine vessel specifications is minimal and is associated with time and effort of existing employees.	This control measure would result in the correct vessels being mobilised for monitoring personnel and result in quicker implementation of monitoring.	**Yes**

6.7.3 Selected Control Measures

Following review of alternative, additional and improved control measures as outlined above, the following controls were selected for implementation for the GPGT Surveys Program:

- alternative
  - none selected
- additional
  - purchase water quality / hydrocarbon sampling kits for pre-positioning on nearby support vessels and develop technical procedure for sample collection
  - modify Woodside Aerial Surveillance Observer Log to enable observers to record marine fauna sightings (presence and type of fauna)
  - conduct periodical review of existing baseline data sources for receptors predicted to be contacted within 7 days, at the low thresholds and a probability ≥ 10%.
- improved
  - adoption of the OSRL OSM Supplementary Service Agreement for OSM capability provision
  - determine the required specifications for suitable monitoring vessels, including specialised equipment for OMPs and SMPs (i.e. hiab) and the requirement of shallow draft vessels to access offshore islands and priority monitoring areas

This document is protected by copyright. 6.7.4 ALARP and Acceptability Summary

ALARP and Acceptability Summary		
Scientific Monitoring		
ALARP Summary	X	Known, reasonably practicable control measures have been adopted
	X	No additional, alternative and improved control measures would provide further benefit
	X	No reasonably practical additional, alternative, and/or improved control measure exists
	The resulting operational and scientific monitoring capability has been assessed against the credible spill scenarios. The range of techniques provide an ongoing approach to monitoring operations to assess and evaluate the scale and extent of impacts. Known, reasonably practicable control measures have been adopted with the cost and organisational complexity of these options determined to be moderate and the overall delivery effectiveness considered medium. The operational and scientific monitoring's main objectives can be met, with the addition of one alternative control measures to provide further benefit.	
Acceptability Summary	• The control measures selected for implementation manage the potential impacts and risks to ALARP. • In the event of a hydrocarbon spill, the control measures selected, meet or exceed the requirements of Woodside Management System and industry best-practice. • Operational and scientific monitoring control and activities are compliant with relevant environmental legislation and regulations, including the EPBC Act. • Throughout the GPGT Surveys Program, relevant Australian standards and codes of practice will be followed to evaluate the impacts from a loss of well control. • Stakeholder consultation undertaken for the activities did not receive feedback regarding concerns for Scientific Monitoring activities in response to a hydrocarbon spill. • The level of impact and risk to the environment has been considered with regards to the principles of ESD and risks and impacts from a range of identified scenarios were assessed in detail. The control measures described consider the conservation of biological and ecological diversity, through both the selection of control measures and the management of their performance. The control measures have been developed to account for credible case scenarios, and uncertainty has not been used as a reason for postponing control measures.	
On the basis from the ALARP and acceptability summary as presented above and in Section 6.7 of the EP, Woodside considers the adopted controls discussed manage the impacts and risks associated with implementing operational and scientific monitoring activities to a level that is ALARP and acceptable.

7 ENVIRONMENTAL RISK ASSESSMENT OF SELECTED RESPONSE TECHNIQUES

The implementation of response techniques may modify the impacts and risks identified in the EP and response activities can introduce additional impacts and risks from response operations themselves. Therefore, it is necessary to complete an assessment to ensure these impacts and risks have been considered and specific measures are put in place to continually review and manage further impacts and risks to ALARP and an acceptable level. A simplified assessment process has been used to complete this task which covers the identification, analysis, evaluation and treatment of impacts and risks introduced by responding to the event.

7.1 Identification of impacts and risks from implementing response techniques

Each of the control measures can modify the impacts and risks identified in the EP. These impacts and risks have been previously assessed within the scope of the EP. Please refer to the EP for details regarding how these risks are being managed as they are not discussed further in this document. These risks include:

- atmospheric emissions
- routine and non-routine discharges
- physical presence, proximity to other vessels (shipping and fisheries)
- routine acoustic emissions vessels
- lighting for night work/navigational safety
- invasive marine species
- collision with marine fauna
- disturbance to seabed.

Additional impacts and risks associated with the control measures not included within the scope of the EP include:

- vessel operations and anchoring
- presence of personnel on the shoreline
- human presence (manual cleaning)
- vegetation cutting
- additional stress or injury caused to wildlife
- secondary contamination from the management of waste.

7.2 Analysis of impacts and risks from implementing response techniques

The table below compares the adopted control measures for this activity against the environmental values that can be affected when they are implemented.

Table 7-1: Analysis of risks and impacts

	Environmental Value						
	Soil and Groundwater	Marine Sediment Quality	Water Quality	Air Quality	Ecosystems/ Habitat	Species	Socio-Economic
Monitor and evaluate		✓	✓		✓	✓	
Shoreline protection and deflection	✓	✓	✓		✓	✓	✓
Shoreline clean-up	✓	✓	✓		✓	✓	✓
Oiled wildlife					✓	✓	
Operational and scientific monitoring		✓	✓		✓	✓	✓
Waste management				✓	✓	✓	✓

7.3 Evaluation of impacts and risks from implementing response techniques

Vessel operations and anchoring

During the implementation of response techniques, where water depths allow, it is possible that response vessels will be required to anchor (e.g. during shoreline surveys). The use of vessel anchoring will be minimal and likely to occur when the impacted shoreline is inaccessible via road. Anchoring in the nearshore environment of sensitive receptor locations will have the potential to impact coral reef, seagrass beds and other benthic communities in these areas. Recovery of benthic communities from anchor damage depends on the size of anchor and frequency of anchoring. Impacts would be highly localised (restricted to the footprint of the vessel anchor and chain) and temporary, with full recovery expected.

Presence of personnel on the shoreline

Presence of personnel on the shoreline during shoreline operations could potentially result in disturbance to wildlife and habitats. During the implementation of response techniques, it is possible that personnel may have minimal, localised impacts on habitats, wildlife and coastlines. The impacts associated with human presence on shorelines during shoreline surveys may include:

- damage to vegetation/habitat to gain access to areas of shoreline oiling
- damage or disturbance to wildlife during shoreline surveys
- removal of surface layers of intertidal sediments (potential habitat depletion)
- excessive removal of substrate causing erosion and instability of localised areas of the shoreline.

Human presence

Human presence for manual clean-up operations may lead to the compaction of sediments and damage to the existing environment especially in sensitive locations such as mangroves and turtle nesting beaches. However, any impacts are expected to be localised with full recovery expected.

Waste generation

Implementing the selected response techniques will result in the generation of the following waste streams that will require management and disposal:

- liquids (recovered oil/water mixture), recovered from shoreline clean-up and oiled wildlife response operations
- semi-solids/solids (oily solids), collected during shoreline clean-up and oiled wildlife response operations
- debris (e.g. seaweed, sand, woods, plastics), collected during shoreline clean-up operations and oiled wildlife response.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

If not managed and disposed of correctly, wastes generated during the response have the potential for secondary contamination of previously uncontaminated areas and/ or impacts to wildlife through contact with or ingestion of waste materials and contamination risks if not disposed of correctly onshore.

Cutting back vegetation could allow additional oil to penetrate the substrate and may also lead to localised habitat loss. However, any loss is expected to be localised in nature and lead to an overall net environmental benefit associated with the response by reducing exposure of wildlife to oiling.

Additional stress or injury caused to wildlife

Additional stress or injury to wildlife could be caused through the following phases of a response:

- capturing wildlife
- transporting wildlife
- stabilisation of wildlife
- cleaning and rinsing of oiled wildlife
- rehabilitation (e.g. diet, cage size, housing density)
- release of treated wildlife

Inefficient capture techniques have the potential to cause undue stress, exhaustion or injury to wildlife, additionally pre-emptive capture could cause undue stress and impacts to wildlife when there are uncertainties in the forecast trajectory of the spill. During the transportation and stabilisation phases there is the potential for additional thermoregulation stress on captured wildlife. Additionally, during the cleaning process, it is important personnel undertaking the tasks are familiar with the relevant techniques to ensure that further injury and the removal of water proofing feathers are managed and mitigated. Finally, during the release phase it is important that wildlife is not released back into a contaminated environment.

7.4 Treatment of impacts and risks from implementing response techniques

In respect of the impacts and risks assessed the following treatment measures have been adopted. It must be recognised that this environmental assessment is seeking to identify how to maintain the level of impact and risks at levels that are ALARP and of an acceptable level rather than exploring further impact and risk reduction. It is for this reason that the treatment measures identified in this assessment will be captured in Operational Plans, Tactical Response Plans, and/or First Strike Plans.

Vessel operations and access in the nearshore environment

- If vessels are required for access, anchoring locations will be selected to minimise disturbance to benthic primary producer habitats. Where existing fixed anchoring points are not available, locations will be selected to minimise impact to nearshore benthic environments with a preference for areas of sandy seabed where they can be identified (Performance Standard (PS) 8.1, PS 11.1, PS 23.3).
- Shallow draft vessels will be used to access remote shorelines to minimise the impacts associated with seabed disturbance on approach to the shorelines (PS 8.2, PS 11.2, PS 23.4).

Presence of personnel on the shoreline

- Oversight by trained personnel who are aware of the risks (PS 11.6, PS 23.7).
- Trained unit leader's will brief personnel prior to operations of the environmental risks of presence of personnel on the shoreline (PS 11.7, PS 23.8).

Human Presence

- Shoreline access route (foot, car, vessel and helicopter) with the least environmental impact identified will be selected by a specialist in SCAT operations (PS 11.5, PS 23.6).
- Vehicular access will be restricted on dunes, turtle nesting beaches and in mangroves (PS 11.3, PS 23.5).

Waste generation

- All shoreline clean-up sites will be zoned and marked before clean-up operations commence to prevent secondary contamination and minimise the mixing of clean and oiled sediment and shoreline substrates (PS 9.4).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

- Removal of vegetation will be limited to moderately or heavily oiled vegetation (PS 11.4).
- Teams will segregate liquid and solid wastes at the earliest opportunity (PS 17.1).

Additional stress or injury caused to wildlife

- Oiled wildlife operations (including hazing) would be implemented with advice and assistance from the Oiled Wildlife Advisor from the DBCA, and in accordance with the processes and methodologies described in the WA OWRP and the relevant regional plan (PS 15.1).

8 ALARP CONCLUSION

An analysis of alternative, additional and improved control measures has been undertaken to determine their reasonableness and practicability. The tables in Section 6 document the considerations made in this evaluation. Where the costs of an alternative, additional, or improved control measure have been determined to be clearly disproportionate to the environmental benefit gained from its adoption it has been rejected. Where this is not considered to be the case, the control measure has been adopted.

The risks from a hydrocarbon spill have been reduced to ALARP because:

- Woodside has a significant hydrocarbon spill response capability to respond to the WCCS through the control measures identified.
- New and modified impacts and risks associated with implementing response techniques have been considered and will not increase the risks associated with the activity.
- A consideration of alternative, additional, and improved control measures identified any other control measures that delivered proportionate environmental benefit compared to the cost of adoption for this activity ensuring that:
    - Known, reasonably practicable control measures have been adopted.
    - No additional, reasonably practicable alternative and/or improved control measures would provide further environmental benefit.
    - No reasonably practical additional, alternative, and/or improved control measure exists.
- A structured process for considering alternative, additional, and improved control measures was completed for each control measure.
- The evaluation was undertaken based on the outputs of the WCCS so that the capability in place is sufficient for all other scenario from this activity.
- The likelihood of the WCCS spill has been ignored in evaluating what was reasonably practicable.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. 9 ACCEPTABILITY CONCLUSION

Following the ALARP evaluation process, Woodside deems the hydrocarbon spill risks and impacts have been reduced to an acceptable level by meeting all of the following criteria:

- Techniques are consistent with Woodside's processes and relevant internal requirements including policies, culture, processes, standards, structures and systems.
- Levels of risk/ impact are deemed acceptable by relevant persons/ organisations are aligned with the uniqueness of, and/or the level of protection assigned to the environment, its sensitivity to pressures introduced by the activity, and the proximity of activities to sensitive receptors, and have been aligned with Part 3 of the EPBC Act.
- Selected control measures meet requirements of legislation and conventions to which Australia is a signatory (e.g. MARPOL, the World Heritage Convention, the Ramsar Convention, and the Biodiversity Convention etc.). In addition to these, other non-legislative requirements met include:
    - Australian IUCN reserve management principles for Commonwealth marine protected areas and bioregional marine plans.
    - National Water Quality Management Strategy and supporting guidelines for marine water quality.
    - conditions of approval set under other legislation.
    - national and international requirements for managing pollution from ships.
    - national biosecurity requirements.
- Industry standards, best practices and widely adopted standards and other published materials have been used and referenced when defining acceptable levels. Where these are inconsistent with mandatory/ legislative regulations, explanation has been provided for the proposed deviation. Any deviation produces the same or a better level of environmental performance (or outcome).

11 GLOSSARY AND ABBREVIATIONS

11.1 Glossary

Term	Description / Definition
ALARP	Demonstration through reasoned and supported arguments that there are no other practicable options that could reasonably be adopted to reduce risks further.
Availability	The availability of a control measure is the percentage of time that it is capable of performing its function (operating time plus standby time) divided by the total period (whether in service or not). In other words, it is the probability that the control has not failed or is undergoing a maintenance or repair function when it needs to be used.
Control	The means by which risk from events is eliminated or minimised.
Control effectiveness	A measure of how well the control measures perform their required function.
Control measure (risk control measure)	The features that eliminate, prevent, reduce or mitigate the risk to environment associated with the activities.
Credible spill scenario	A spill considered by Woodside as representative of maximum volume and characteristics of a spill that could occur as part of the activities.
Dependency	The degree of reliance on other systems in order for the control measure to be able to perform its intended function.
Environment that may be affected	The summary of quantitative modelling where the marine environment could be exposed to hydrocarbons levels exceeding hydrocarbon threshold concentrations.
Incident	An event where a release of energy resulted in or had (with) the potential to cause injury, ill health, damage to the environment, damage to equipment or assets or company reputation.
Major Environment Event	The events with potential environment, reputation, social or cultural consequences of category C or higher (as per Woodside's operational risk matrix) which are evaluated against credible worst-case scenarios which may occur when all controls are absent or have failed.
Performance outcome	A statement of the overall goal or outcome to be achieved by a control measure
Performance standard	The parameters against which [risk] controls are assessed to ensure they reduce risk to ALARP. A statement of the key requirements (indicators) that the control measure has to achieve in order to perform as intended in relation to its functionality, availability, reliability, survivability and dependencies.
Preparedness	Measures taken before an incident in order to improve the effectiveness of a response
Reasonably practicable	... a computation ... made by the owner, in which the quantum of risk is placed on one scale and the sacrifice involved in the measures necessary for averting the risk (whether in money, time or trouble) [showing whether or not] that there is a gross disproportion between them ... made by the owner at a point of time anterior to the accident. (Judgement: Edwards v National Coal Board [1949])
Receptors at risk	Physical, biological and social resources identified as at risk from hydrocarbon contact using oil spill modelling predictions.
Receptor areas	Geographically referenced areas such as bays, islands, coastlines and/or protected area (WHA, Commonwealth or State marine reserve or park) containing one or more receptor type.
Receptor Sensitivities	This is a classification scheme to categorise receptor sensitivity to an oil spill. The Environmental Sensitivity Index (ESI) is a numerical classification of the relative sensitivity of a particular environment (particularly different shoreline types) to an oil spill. Refer to the Woodside Oil Pollution Emergency Arrangements (Australia) for more details.
Regulator	NOPSEMA are the Environment Regulator under the Environment Regulations.
Reliability	The probability that at any point in time a control measure will operate correctly for a further specified length of time.

No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Term	Description / Definition
Response technique	The key priorities and objectives to be achieved by the response plan Measures taken in response to an event to reduce or prevent adverse consequences.
Survivability	Whether or not a control measure is able to survive a potentially damaging event is relevant for all control measures that are required to function after an incident has occurred.
Threshold	Hydrocarbon threshold concentrations applied to the risk assessment to evaluate hydrocarbon spills. These are defined as: surface hydrocarbon concentration – ≥10 g/m^2, dissolved – ≥50 ppb and entrained hydrocarbon concentrations – ≥100 ppb.
Zone of Application	The zone in which Woodside may elect to apply dispersant. The zone is determined based on a range of considerations, such as hydrocarbon characteristics, weathering and metocean conditions. The zone is a key consideration in the Net Environmental Benefit Analysis for dispersant use.

A NEBA has been conducted to assess the net environmental benefit of different response techniques to selected receptors in the event of an oil spill from the activities for Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys. The complete list of potential receptor locations within the EMBA is included in Section 6.7.1 of the EP.

The locations utilised for the NEBA were limited to the identified RPAs identified from modelling (see Section 3 for outline of selection). These include receptors which have potential for the following:

- Surface contact (>50 g/m^2)
- Shoreline accumulation (>100 g/m^2) at any time

The detailed NEBA assessment outcomes are shown below. The Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys preoperational NEBAs contains the full assessments.

Table A-1: NEBA assessment technique recommendations for Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys

Receptor	Monitor and evaluate	Containment and recovery	Dispersant application: sub-sea	Dispersant application: > 20 m water depth and > 10 km from shore/reefs	Shoreline protection	Shoreline clean-up (manual)	Shoreline clean-up (mechanical)	Shoreline clean-up (chemical)	Oiled wildlife response	In situ burning	Mechanical dispersion	Source control via vessel SOPEP

NEBA Impact Ranking Classification Guidance

To reduce variability between assessments, the following ranking descriptions have been devised to guide the workshop process:

			Degree of impact[8]	Potential duration of impact	Equivalent Woodside Corporate Risk Matrix Consequence Level
Positive	**3P**	**Major**	Likely to prevent: • behavioural impact to biological receptors • behavioural impact to socio-economic receptors e.g. changes to day-today business operations, public opinion/behaviours (e.g. avoidance of amenities such as beaches) or regulatory designations.	Decrease in duration of impact by > 5 years	N/A
	2P	**Moderate**	Likely to prevent: • significant impact to a single phase of reproductive cycle of biological receptors • detectable financial impact, either directly (e.g. loss of income) or indirectly (e.g. via public perception), for socio-economic receptors.	Decrease in duration of impact by 1–5 years	N/A

	1P	**Minor**	Likely to prevent impacts on:
			• significant proportion of population or breeding stages of biological receptors
			• socio-economic receptors such as:
			  ○ significant impact to the sensitivity of protective designation; or
			  ○ significant and long-term impact to business/industry.
				Decrease in duration of impact by several seasons (< 1 year)	N/A

	0	**Non-mitigated spill impact**	**No detectable difference to unmitigated spill scenario.**		
Negative	**1N**	**Minor**	Likely to result in: • behavioural impact to biological receptors • behavioural impact to socio-economic receptors e.g. changes to day-to-day business operations, public opinion/behaviours (e.g. avoidance of amenities such as beaches), or regulatory designations.	Increase in duration of impact by several seasons (< 1 year)	Increase in risk by one sub-category, without changing category (e.g. Minor (E) to Minor (D))
	2N	**Moderate**	Likely to result in: • significant impact to a single phase of reproductive cycle for biological receptors; or • detectable financial impact, either directly (e.g. loss of income) or indirectly (e.g. via public perception), for socio-economic receptors. This level of negative impact is recoverable and unlikely to result in closure of business/industry in the region.	Increase in duration of impact by 1–5 years	Increase in risk by one category (e.g. Minor (D) to Moderate (C or B))

	3N	**Major**	Likely to result in impacts on:
			• significant proportion of population or breeding stages of biological receptors
			• socio-economic receptors resulting in either:
			  ○ significant impact to the sensitivity of protective designation; or
			  ○ significant and long-term impact to business/industry.
				Increase in duration of impact by > 5 years or unrecoverable	Increase in risk by two categories (e.g. Minor (E) to Major (A))

.

[8] NOTE: the maximum likely impact should be considered; for example, if a spill were to directly impact the behaviour that results in an impact to reproduction and/or the breeding population (such as fish failing to aggregate to spawn), then the score should be a 2 or 3 rather than a 1. Similarly, if a change in behaviour resulted in an increased risk of mortality of a population, then it should be scored as a 2 or 3

ANNEX B: MONITOR AND EVALUATE ACTIVATION AND TERMINATION CRITERIA

Table B-1: Operational monitoring objectives, triggers and termination criteria

Operational monitoring Operational Plan	Objectives	Activation triggers	Termination criteria
Operational Monitoring Operational Plan -- Predictive Modelling of Hydrocarbons to Assess Resources at Risk	Predictive modelling focuses on the conditions that have prevailed since a spill commenced, as well as those that are forecasted in the short term (1–3 days ahead) and longer term. Predictive modelling utilises computer-based forecasting methods to predict hydrocarbon spill movement and guide the management and execution of spill response operations to maximise the protection of environmental resources at risk. The objectives of predictive modelling are to: • Provide forecasting of the movement and weathering of spilled hydrocarbons • Identify resources that are potentially at risk of contamination • Provide simulations showing the outcome of alternative response options (booming patterns etc.) to inform on-going Net Environmental Benefit Analysis (NEBA) and continually assess the efficacy of available response options in order to reduce risks to ALARP	Predictive modelling will be triggered immediately following a level 2/3 hydrocarbon spill.	The criteria for the termination of predictive modelling are: • The hydrocarbon discharge has ceased and no further surface oil is visible • Response activities have ceased • Hydrocarbon spill modelling (as verified by surveillance observations) predicts no additional natural resources will be impacted

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

Operational monitoring Operational Plan	Objectives	Activation triggers	Termination criteria
Operational Monitoring Operational Plan -- Surveillance and reconnaissance to detect hydrocarbons and resources at risk	Surveillance and reconnaissance aims to provide regular, on-going hydrocarbon spill surveillance throughout a broad region, in the event of a spill. The objectives of surveillance and reconnaissance are: • Verify spill modelling results and recalibrate spill trajectory models . • Understand the behaviour, weathering and fate of surface hydrocarbons. • Identify environmental receptors and locations at risk or contaminated by hydrocarbons. • Inform ongoing Net Environmental Benefit Analysis (NEBA) and continually assess the efficacy of available response options in order to reduce risks to ALARP. • To aid in the subsequent assessment of the short- to long-term impacts and/or recovery of natural resources (assessed in SMPs) by ensuring that the visible cause and effect relationships between the hydrocarbon spill and its impacts to natural resources have been observed and recorded during the operational phase.	Surveillance and reconnaissance will be triggered immediately following a level 2/3 hydrocarbon spill.	The termination triggers for the Surveillance and reconnaissance are: • 72 hours has elapsed since the last confirmed observation of surface hydrocarbons. • Latest hydrocarbon spill modelling results do not predict surface exposures at visible levels.
Operational Monitoring Operational Plan -- Pre-emptive assessment of sensitive receptors at risk	Pre-emptive shorelines assessment aims to undertake a rapid assessment of the presence, extent and current status of shoreline sensitive receptors prior to contact from the hydrocarbon spill, by providing categorical or semi-quantitative information on the characteristics of resources at risk. The primary objective of pre-emptive shorelines assessment is to confirm understanding of the status and characteristics of environmental resources, predicted by predictive modelling and surveillance, to be at risk, to further assist in making decisions on the selection of appropriate response actions and prioritisation of resources. Indirectly, qualitative/semi-quantitative pre-contact information collected by pre-emptive shorelines assessment on the status of environmental resources may also aid in the verification of environmental baseline data and provide context for the assessment of environmental impacts, as determined through subsequent SMPs. Pre-emptive shorelines assessment would be undertaken in liaison with WA DTMI as the control agency once the oil is in State Waters (if a Level 2/3 incident).	Triggers for commencing pre-emptive shorelines assessment include: • Contact of a sensitive habitat or shoreline is predicted by predictive modelling and surveillance. • The pre-emptive assessment methods can be implemented before contact from hydrocarbons (once a receptor has been contacted by hydrocarbons it will be assessed via SCAT.	The criteria for the termination of pre-emptive shorelines assessment at any given location are: • Locations predicted to be contacted by hydrocarbons have been contacted. • The location has not been contacted by hydrocarbons and is no longer predicted to be contacted by hydrocarbons (resources should be reallocated as appropriate).

ANNEX C: ANGEL CCS GPGT SURVEYS OSM ACTIVITY SPECIFIC ASSESSMENT

The Woodside OSM-BIP[1] comprehensively presents important information for OSM assessment and implementation, including the process for assessing OSM requirements for each activity. This Annex provides the activity-specific information required for the Angel CCS GPGT Surveys (hereafter referred to as the GPGT Surveys Program) OSM Assessment, including:

- OSM Planning Area;
- Monitoring priorities;
- Mobilisation and implementation timeframes; and
- Resourcing requirements and capability assessment.

C.1 Determine if the activity OSM Planning Area fits within the Combined OSM Planning Area

The OSM Planning Area for the GPGT Surveys Program credible spill scenarios (as shown in Figure C - 1) fits within the Combined OSM Planning Area (Figure 2-1 in the OSM-BIP).

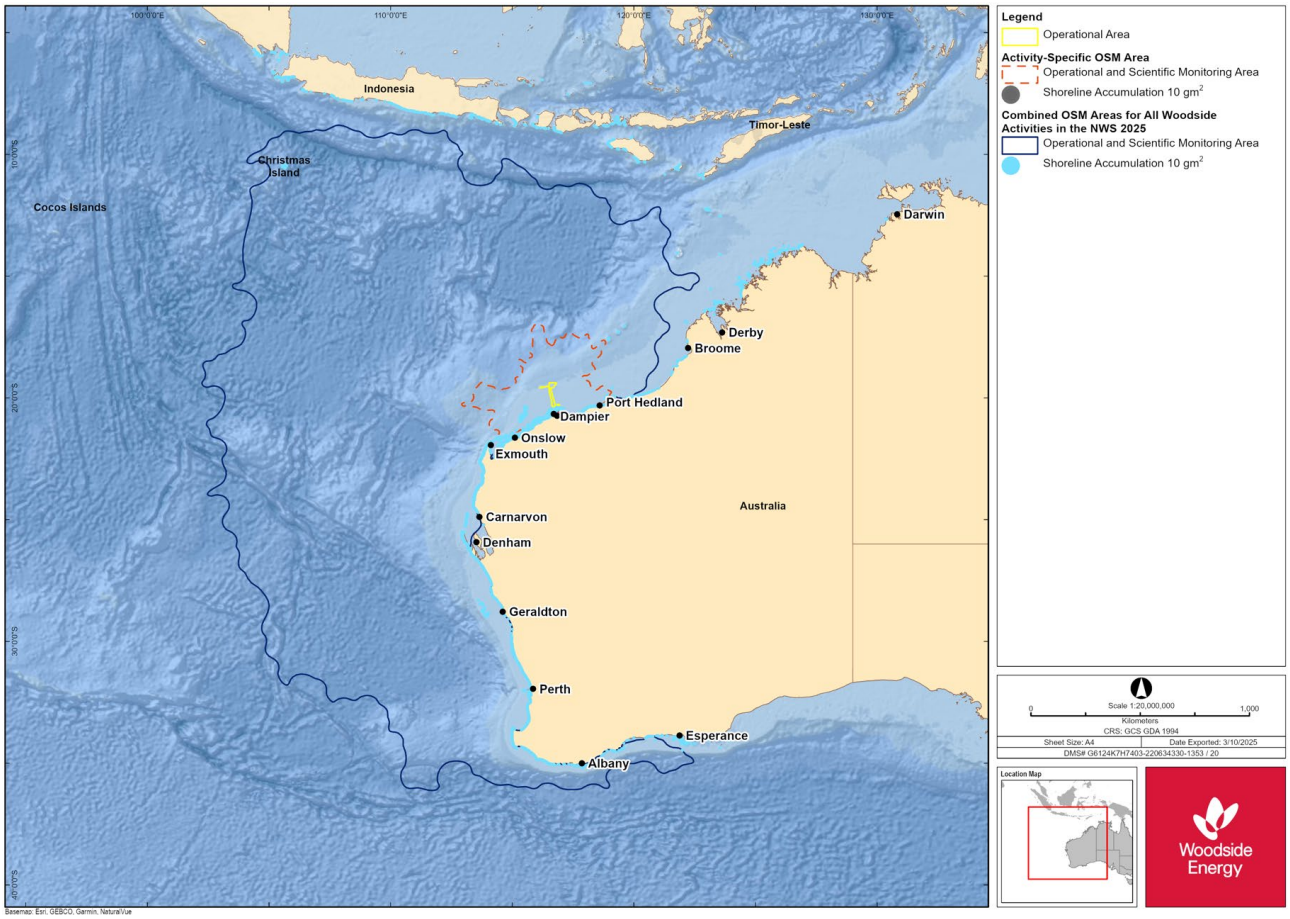

Figure C - 1: GPGT Surveys Program OSM Planning Area based on the area potentially contacted by the low (below ecological impact) hydrocarbon thresholds in the event of the worst-case credible spill scenarios (CS-05 and CS-08)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Document to be read in conjunction with Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan.

C.2 Determine activity-specific monitoring priorities

Assess spill exposure risk using trajectory modelling

Woodside has reviewed the stochastic oil spill modelling results for the worst-case credible spill scenarios listed in Table 2-1 and as outlined in Section 2.2 of the OSM-BIP, identified receptors contacted at a higher probability of rapid contact. Table C - 1 presents the receptors contacted within 14 days at a probability >10% at the low threshold for dissolved (≥10 ppb), entrained (≥10 ppb), floating (≥1 g/m^2), and shoreline contact (≥10 g/m^2).

Evaluate availability of adequate baseline data

The availability of baseline data may influence monitoring priorities. Section 4 of the OSM-BIP outlines Woodside's baseline review and evaluation process. Using the Marine Environment Baseline Database, Woodside has reviewed baseline data for all of the receptors predicted of being rapidly contacted at a higher probability from CCS GPGT activities (Table C - 1) to help determine which receptors and key features have insufficient or no baseline data available and should be given a higher monitoring priority.

It is anticipated that some receptors and locations may be impacted before monitoring teams can begin the assessments. Given this constraint, and the limited baseline data at many priority monitoring locations and receptors, scientific monitoring will likely need to use a combination of approaches including gradient analysis, impact versus control comparisons, and lines of evidence methodologies. During a spill, it may be necessary to identify additional unaffected control sites for comparative monitoring where possible. As such, control sites have been factored into capability planning in Section C.4.

Consideration of Key Ecological Features, Biologically Important Areas and transient receptors

A number of broadscale ecological features are located within the OSM Planning Area and have been considered in monitoring prioritisation and OSM capability planning for the GPGT Surveys Program activities. The following Key Ecological Features (KEFs) (and their distances to the Operational Area) are noted in Table 4-14 of the EP:

- Ancient Coastline at 125 m depth contour (overlaps Operational Area)
- Glomar Shoals (overlaps Operational Area)

The Ancient Coastline KEF overlaps the GPGT Surveys Program Operational Area, so is at a higher risk of contact with hydrocarbons. All KEFs within the OSM Planning Area are described in detail in Section 4.7 and Appendix C-1 of the EP. These KEFs include subsea receptors therefore, OSM planning and resourcing for this activity includes relevant monitoring requirements, such as water quality, sediment quality, benthic habitats and fish for these features (refer to Table C - 3 and Table C - 7).

The OSM Area also overlaps a number of Biologically Important Areas (BIAs) with protected species potentially occurring in the area, as described in Section 4.6 of the EP and listed in Table C - 3. A number of the BIAs and protected species are located within the geographical extents of other receptors, such as marine turtles within the Dampier AMP, so these BIAs and protected species would automatically be included in the relevant SMPs for that receptor (refer to Table C - 6). Where BIAs, protected species and KEFs are situated away from the monitoring priorities, they will be captured in the Offshore Environs monitoring unit described in Table C - 6.

Initial Monitoring Priorities

Monitoring prioritisation during the initial stages of a spill should focus on sensitive receptors with the highest risk of adverse consequences and where oil spill modelling predicts high probability of rapid contact. During the initial monitoring response, emphasis will be placed on receptors contacted by floating, shoreline, and dissolved hydrocarbon phases. If a receptor is only contacted by low concentrations of entrained hydrocarbons and not by any other hydrocarbon phase, it will be considered a lower priority during the initial monitoring response.

To further guide monitoring prioritisation in the event of a spill, Woodside has also compared the availability of baseline data against the WA State-based protection prioritisation evaluation rankings. The WA DTMI protection priority rankings were established through the Western Australian Marine Oil Pollution Risk Assessment process. These rankings evaluate each receptor's vulnerability to marine oil spills, considering impacts from both floating and dissolved oil, as shown in Table C - 4. This information is then used to determine the resultant initial monitoring priorities for the activity.

C.3 Mobilisation and timing of OMP and SMP implementation

Table C - 5 provides a list of OMPs and SMPs relevant to GPGT Surveys Program activities, as well as indicative timeframes for mobilisation of each OMP and SMP for key receptors. In addition, monitor and evaluate activities will capture initial observations of fauna, habitat, and other sensitive receptors. Water samples will be collected during vessel surveillance for OM1: Hydrocarbon Characterisation, when safe to do so. SCAT teams will begin mobilisation within 48–72 hours of notification and will also document fauna observations. This information will be provided to the IMT to aid early decision making per the process outlined in Section 18.1 of the OSM-BIP.

Table C - 5: Indicative OMP and SMP implementation schedule for OSM activities if initiation criteria are met

Proximity to spill source	Monitoring type	0–48 hours from OSM activation	Within 72 hours of OSM activation	~5–7 days from OSM activation	Weeks 1–2 from OSM activation	Ongoing
Spill site and surrounding waters	OM	• Activation of OMP Team Leads. • Finalise OMPs. • Aerial surveillance – which will also document fauna observations. • Commence activation and mobilisation of OM personnel.	• OM1: Hydrocarbon Characterisation, where resources are available (e.g. Supply Vessel with onboard sampling equipment). • OM2: Hydrocarbons in Water Assessment • OM3: Hydrocarbons in Sediment Assessment • OM5: Rapid Marine Fauna Surveillance • Continue to finalise OMPs. • Continue to activate and mobilise OM personnel.	Continued (as per ongoing arrangements)	Continued (as per ongoing arrangements)	As results from implemented OMPs are available, data are provided to relevant personnel in IMT (e.g. Situation Unit) and used in the Incident Action Planning process for the next operational period. C.4 Determine the OSM resourcing requirements and assess capability for the activity

To guide the resourcing requirements assessment for the GPGT Surveys Program activity, the spill scenario (see Table 2-1) most likely to require the greatest initial capability was selected for further assessment. Selection was based on stochastic modelling results, focussing on the scenario predicted to contact the greatest number of receptors at the low hydrocarbon thresholds for floating, shoreline or dissolved contact within 14 days and at the highest contact probabilities. If a receptor is only contacted by low concentrations of entrained hydrocarbons and not by any other hydrocarbon phase, it will be considered a lower priority during the initial monitoring response as outlined in Section 2.2 of the OSM-BIP. The Instantaneous Release of 150 m^3 of MGO at the State Waters boundary-08 (CS-08) was identified as the worst-case scenario, affecting the most locations within 14 days and determined to require the greatest OSM capability.

The first 14 days of the response has been selected as the focus area for the OSM resourcing assessment as it is the period during which resources are likely to be overwhelmed, before additional resources (including appropriately qualified personnel, suitable vessels and additional monitoring equipment) can be scaled in locally and from interstate and international resources. Other factors influencing the selection of the scenario with the highest capability requirements were location of the spill, proximity to receptors, and hydrocarbon properties. The OSM Services Provider Contract includes provision of scale-up resources, which would be considered and mobilised as soon as practicable following the spill.

Monitoring Units

Using the stochastic modelling results, Woodside has grouped the monitoring priorities for GPGT Surveys Program activities into monitoring 'units' (Table C - 6). These units incorporate all of the possible receptors that may be contacted by the GPGT Surveys Program scenarios shown in Table C - 1 at a probability >10%. Receptors only contacted by entrained hydrocarbons and no other phase of hydrocarbon were not included. These unit groupings are based on consultation with experienced monitoring personnel and planners, who often group these receptors together for time-bound monitoring projects. The grouping of units is based on factors such as access and distance to ports, SIMOPS of multiple vessels and teams working in a close area, travel time between individual locations/receptors and time taken to collect samples for each SMP.

The monitoring units presented in Table C - 6 also include KEFs, BIAs and transient species. Additional information on the seasonality of the receptors can be found in Appendix B of the OSM-BIP and in Section 4.7 of the EP. Each monitoring unit will require 1-2 teams during the initial response (first 14 days). The number of teams allocated to each unit will depend on the extent of the spill, the outcome of the monitoring prioritisation finalised at the time of the spill (Section 13 of the OSM-BIP), the ALARP assessment, and SIMOPs.

It should be noted that not all monitoring units will be contacted by a single spill and that the list below has been generated from stochastic modelling results.

Table C - 6: Monitoring units for GPGT Surveys Program activities relevant to stochastic modelling results

Monitoring Unit	Receptors within Monitoring Unit
Dampier	• Dampier Archipelago and Islands • Dampier AMP* • Madeleine Shoals* • Hammersley Shoal* • Courtenay Shoal* • Marine turtle BIAs • Pygmy blue whale (distribution) BIA • Seabird and shorebird BIAs • Humpback whale (migration) BIA
Offshore Environs	• Rankin Bank* • Glomar Shoals* • Ancient Coastline at 125 m depth contour* • Continental Slope Demersal Fish Communities* • Humpback whale (migration) BIA • Pygmy blue whale (distribution) BIA

CONTROL AGENCIES AND INCIDENT CONTROLLERS

Source	Location	Level	Jurisdictional Authority/ Hazard Management Agency	Control Agency	Incident Controller
Spill from facility including subsea infrastructure Note: pipe laying and accommodation vessels are considered a "facility" under Australian regulations	Commonwealth waters	1	NOPSEMA	Woodside	Person In Charge (PIC) with support from Onshore Team Leader (OTL)
		2/3		Woodside	Corporate Incident Management Team Incident Commander (CIMT IC)
	State waters	1/2/3	Western Australian Department of Transport and Major Infrastructure (DTMI)	DTMI	DTMI Incident Controller
	Within port limits	1	DTMI	Port Authority	Port Harbour Master
		2/3		Port Authority/ DTMI	Port Harbour Master/ DTMI Incident Controller
Spill from vessel Note: SOPEP should be implemented in conjunction with this document	Commonwealth waters	1	Australian Marine Safety Authority (AMSA)	AMSA	Vessel Master
		2/3		AMSA	AMSA (with response assistance from Woodside)
	State waters	1/2/3	DTMI	DTMI	DTMI Incident Controller
	Within port limits	1	DTMI	Port Authority	Port Harbour Master
		2/3		Port Authority/ DTMI	Port Harbour Master/ DTMI Incident Controller

SPILLS IN STATE/PORT WATERS

In the event of a hydrocarbon spill (hereafter 'spill') where Woodside Energy Ltd ('Woodside') is the responsible party and the spill may impact State waters and shorelines, Woodside (or the Vessel Master) will commence the initial response actions and notify the Western Australian Department of Transport and Major Infrastructure (DTMI). In the event that Woodside is the responsible party for a spill that occurs within port limits or impacts Port Waters, Woodside will notify the Port Authority and DTMI for all spills.

Initially Woodside will be required to make available an appropriate number of suitably qualified persons to work in the DTMI IMT (APPENDIX F – Woodside Liaison Officer Resources to DTMI). DTMI/ PPA's role as the Controlling Agency in State waters/ within port limits does not negate the requirement for Woodside to have appropriate plans and resources in place to adequately respond to a marine hydrocarbon spill incident in State Waters/ within port limits or to commence the initial response actions to a spill prior to DTMI establishing incident control in line with DTMI *Offshore Petroleum Industry Guidance Note – Marine Oil Pollution: Response and Consultation Arrangements* (July 2020). Cost recovery arrangements for offshore marine pollution incidents (MOP) are in accordance with Section 9 of the Guidance Note:

https://www.transport.wa.gov.au/mediaFiles/marine/MAC_P_Westplan_MOP_OffshorePetroleumIndGuidance.pdf

Woodside's Incident Management Structure for a hydrocarbon spill, including Woodside Liaison Officer's command structure within DTMI can be seen at APPENDIX E – Woodside Incident Management Structure.

The coordination structure for a concurrent hydrocarbon spill in both Commonwealth and State waters/ shorelines is shown in APPENDIX D – Coordination structure for a concurrent hydrocarbon spill in both Commonwealth and State waters/ shorelines .

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

RESPONSE PROCESS OVERVIEW

	For guidance on credible scenarios and hydrocarbon characteristics, refer to APPENDIX A	
ALL INCIDENTS	Notify the Woodside Communication Centre (WCC) on: [1]	
	If further support required, Incident Commander or delegate to implement this Oil Pollution First Strike Plan per relevant actions detailed in **Table 1-1** and **Table 2-1**.	
LEVEL 1	**FACILITY INCIDENT**	**VESSEL INCIDENT**
	Coordinate pre-identified tactics in **Table 2-1** of this Oil Pollution First Strike Plan. Remember to download each Operational Plan.	Notify AMSA or Port Authority (if within port limits) and coordinate pre-identified tactics in **Table 2-1** of this Oil Pollution First Strike Plan Remember to download each Operational Plan.
	If the spill escalates such that the site cannot manage the incident, inform the WCC on: [1] and escalate to a level 2/3 incident.	
LEVEL 2/3	**FACILITY INCIDENT**	**VESSEL INCIDENT**
	Handover control to CIMT and notify DTMI or Port Authority (if within port limits)	Handover control to AMSA or Port Authority (if within port limits) and stand up CIMT to assist.
	Commence quick revalidation of the recommended strategies in **Table 2-1** taking into consideration seasonal sensitivities and current situational awareness. Commence validated strategies.	If requested by AMSA/Port Authority: Commence quick revalidation of the recommended strategies in **Table 2-1** taking into consideration seasonal sensitivities and current situational awareness. Commence validated strategies.
	Create an Incident Action Plan (IAP) for all ongoing operational periods. The content of the IAP should reflect the selected response strategies based on current situational awareness. For the full detailed pre-operational Net Environmental Benefit Analysis (NEBA) see the OSPRMA Appendix A	If requested by AMSA/Port Authority: Create an IAP for all ongoing operational periods. The content of the IAP should reflect the selected response strategies based on current situational awareness. For the full detailed pre-operational NEBA see the OSPRMA Appendix A

1. NOTIFICATIONS

The Incident Controller or delegate must ensure the below notifications (Table 1-1) are completed within the designated timeframes.

For spills from a vessel, relevant notifications must be undertaken by a Woodside representative.

Table 1-1: Notifications

In the event of an incident between campaign vessels, also activate relevant vessel Emergency Response Plans and/or Bridging Documents

Timing	By	To	Name	Contact	Instruction	Form	Complete? (✓)
NOTIFICATIONS FOR ALL LEVELS OF SPILL							
Immediately	Offshore Installation Manager (OIM) or Vessel Master	Woodside Communication Centre (WCC)	Corporate Incident Management Team Incident Commander (CIMT IC)	[1]	Verbally notify WCC of event and estimated volume and hydrocarbon type. If further support required, Incident Commander or delegate to implement this Oil Pollution First Strike Plan per relevant actions detailed in **Table 1-1** and **Table 2-1**.	Verbal	
Within 2 hours	Woodside Site Rep (WSR), CIMT IC or Delegate	National Offshore Petroleum Safety Environmental Management Authority (NOPSEMA[1])	Incident notification office	[2]	Verbally notify NOPSEMA for spills >80L. Record notification using Initial Verbal Notification Form or equivalent and send to NOPSEMA as soon as practicable (cc to NOPTA and DMPE).	Link	
Within 3 days	WSR, CIMT IC or Delegate				Provide a written NOPSEMA Incident Report Form as soon as practicable (no later than 3 days after notification) (cc to NOPTA and DMPE) NOPSEMA [2] NOPTA [3] DMPE [4]	[2]	
As soon as practicable	CIMT IC or Delegate	Woodside	Environment Unit Leader	As per roster	Verbally notify Environment Unit Leader of event and seek advice on relevant performance standards from EP	Verbal	
As soon as practicable if spill arises in or is likely to extend into port limits.	CIMT IC or Delegate	Pilbara Ports	Pilbara Ports, Port of Dampier Vessel Traffic Services (VTS)	[5]	Any spill within or close to the Dampier Port boundary should be reported immediately to the Pilbara Ports, Port of Dampier VTS	Verbal/ [5]	
Within 2 hours of becoming aware of a marine pollution incident (MOP) that occurs in or may impact state waters	CIMT IC or Delegate	WA Department of Transport and Major Infrastructure	DTMI Maritime Environmental Emergency Response Unit (MEER) Duty Officer	[6]	Verbally notify DTMI MEER Duty Officer that a spill has occurred and, if required, request use of equipment stored in Karratha. Follow up with a written Marine Pollution Report (POLREP) as soon as practicable following verbal notification. Additionally, DTMI to be notified if spill is likely to extend into WA State waters. Request DTMI to provide Liaison to Woodside IMT.	[6]	
As soon as practicable	CIMT IC or Delegate	Department of Climate Change, Energy, the Environment and Water (DCCEEW) Director of National Parks	Marine Park Compliance Duty Officer	[7]	The Marine Park Compliance Duty Officer is notified in the event of oil pollution within a marine park, or where an oil spill response action must be taken within a marine park, so far as reasonably practicable, prior to response action being taken. This notification should include: • titleholder details • time and location of the incident • proposed response arrangements and locations as per the OPEP • contact details for the response coordinator • confirmation of access to relevant monitoring and evaluation reports when available.	Verbal	
Within 24 hours of Woodside reporting the incident to the appropriate authority	CIMT IC or Delegate	Department of Primary Industries and Regional Development (DPIRD)			Notification to DPIRD via email within 24 hours of Woodside reporting the incident to the appropriate authority: [15]	Email	

[1] Notification to NOPSEMA must be from a Woodside Representative.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Timing	By	To	Name	Contact	Instruction	Form	Complete? (✓)
Within 24 hours of Woodside reporting the incident to the appropriate authority	CIMT IC or Delegate	WA Fishing Industry Council (WAFIC)	Industry Liaison Officer	[16]	Notification to WAFIC via email within 24 hours of Woodside reporting the incident to the appropriate authority: [16]	Verbal/ email	
As soon as practicable if there is potential for oiled wildlife or the spill is expected to contact land or waters managed by WA Department of Biodiversity, Conservation and Attractions	CIMT IC or Delegate	WA Department of Biodiversity, Conservation and Attractions (DBCA)	Duty Officer	[8]	Phone call notification	Verbal	
As soon as practicable	Public Information	Relevant persons/ organisations	To be determined	To be determined	Should it be identified that additional persons such as, but not limited to, commercial fishers or tourism operators may be affected, Woodside would, at the relevant time, engage with these parties as appropriate and in alignment with the Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) for Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys. Relevant persons/ organisations will be re-assessed throughout the response period.	Verbal initially	
As soon as practicable	Public Information	Relevant cultural authorities	To be determined	To be determined	Should it be identified that relevant cultural authorities may be affected, Woodside would, at the relevant time, engage with these parties as appropriate and in alignment with the Oil Spill Preparedness and Response Mitigation Assessment (OSPRMA) for Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys. Relevant cultural authorities will be re-assessed throughout the response period.	Verbal initially	
ADDITIONAL NOTIFICATIONS TO BE MADE ONLY IF SPILL IS FROM A VESSEL							
"Without delay" as per *Protection of the Sea (Prevention of Pollution from Ships) Act 1983* (Cth) s 11(1)	Vessel Master	Australian Maritime Safety Authority (AMSA)	Response Coordination Centre (RCC)	[9]	Verbally notify AMSA RCC of the hydrocarbon spill. Follow up with a written Hazardous Substances Report (POLREP) as soon as practicable following verbal notification.	[9]	
ADDITIONAL LEVEL 2/3 NOTIFICATIONS							
As soon as practicable	CIMT IC or Delegate	AMOSC	AMOSC Duty Manager	[10]	Notify AMOSC that a spill has occurred and follow-up with an email from the **CIMT IC/ CIMT Deputy IC/ CMT Leader** to formally activate AMOSC. Determine what resources are required consistent with the AMOS Plan and detail in a Service Contract that will be sent to Woodside from AMOSC upon activation.	[10]	
As soon as practicable	CIMT IC or Delegate	Oil Spill Response Limited (OSRL)	OSRL Duty Manager	[11]	**Notification for all services:** Contact OSRL duty manager and request assistance from technical advisor in Perth. Send the completed notification form to OSRL as soon as practicable.	[11]	
					Mobilisation of response personnel/ equipment: For mobilisation of response personnel/ resources, send the Mobilisation Form to OSRL as soon as practicable. The mobilisation form must be signed by a nominated callout authority from Woodside. OSRL can advise the names on the call out authority list, if required.	[11]	
					Mobilisation of Operational and Scientific Monitoring service: For mobilisation of Operational and Scientific Monitoring (OSM) service, send the OSM Mobilisation Form to OSRL as soon as practicable. The mobilisation form must be signed by a nominated callout authority from Woodside. OSRL can advise the names on the call out authority list, if required.	[11]	
As soon as practicable if extra personnel are required for incident support	CIMT IC or Delegate	Marine Spill Response Corporation (MSRC)	MSRC Response Manager	[12]	Activate the contract with MSRC (in full) for the provision of up to 30 personnel depending on what skills are required. Please note that provision of these personnel from MSRC are on a best endeavours basis and are not guaranteed.	Verbal

Technique	Spill type	Level	Pre- Identified Tactics	Responsible	ALARP Commitment Summary	Link to Operational Plans for notification numbers and actions
	MGO					
Monitor and evaluate – tracking buoy	Yes	ALL	If a vessel is on location, consider the need to deploy the oil spill tracking buoy. If no vessel is on location, consider the need to mobilise oil spill tracking buoys from the King Bay Supply Base (KBSB) Stockpile. If a surface sheen is visible from the facility, deploy the satellite tracking buoy within two hours.	Operations	**WITHIN 24 HOURS:** Tracking buoy deployed within 2 hours.	Surveillance and Reconnaissance to Detect Hydrocarbons and Resources at Risk – see Operational Monitoring Operational Plan. Deploy tracking buoy in accordance with Link.
Monitor and evaluate – predictive modelling	Yes	ALL	Undertake initial modelling using OceansMap and weathering fate analysis using Automated Data Inquiry for Oil Spills (ADIOS) or refer to the hydrocarbon information in Appendix A.	Situation or Environment	**WITHIN 24 HOURS:** Initial modelling within 6 hours using the Rapid Assessment Tool.	Predictive Modelling of Hydrocarbons to Assess Resources at Risk – see Operational Monitoring Operational Plan. *Planning Section to download immediately and follow steps*
	Yes	ALL	Send Oil Spill Trajectory Modelling (OSTM) form (Appendix B, Form 7) to RPS Response ([13]). Outputs will be uploaded to OceansMap by RPS.	Situation	**WITHIN 24 HOURS:** Detailed modelling within 4 hours of RPS Response receiving information from Woodside.	
Monitor and evaluate – aerial surveillance	Yes	ALL	Instruct Aviation Unit Leader to commence aerial observations in daylight hours. Aerial surveillance observer to complete log in Appendix B Form 8.	Logistics – Aviation	**WITHIN 24 HOURS:** 2 trained aerial observers. 1 aircraft available. Report made available to the IMT within 2 hours of landing after each sortie.	Surveillance and Reconnaissance to Detect Hydrocarbons and Resources at Risk – see Operational Monitoring Operational Plan. *Planning Section to download immediately and follow steps*
Monitor and evaluate – satellite tracking	Yes	ALL	The Situation Unit Leader to action satellite imagery services. This may be obtained via: • AMOSC Duty Manager: [10] • OSRL Duty Manager: [11] • KSAT: [13] • Others identified by CIMT	Situation	**WITHIN 24 HOURS:** Service provider will confirm availability of an initial acquisition within 2 hours. Data received to be uploaded into Woodside Common Operating Picture.	
Revalidate pre-operational NEBA	Yes	ALL	Environment Unit Leader to revalidate pre-operational NEBA against current situational awareness from monitor and evaluate techniques.	Environment	**WITHIN 24 HOURS**: Revalidate pre-operational NEBA and incorporate into IAP	Pre-operational NEBAs
Monitor and evaluate – pre-emptive assessment of receptors at risk	Yes	ALL	Consider the need to mobilise resources to undertake pre-emptive assessment of sensitive receptors at risk (OM04).	Planning or Environment	**WITHIN 48 HOURS:** In agreement with WA DTMI, deployment of 2 specialists for each of the Response Protection Areas (RPA) with predicted impacts.	Pre-emptive Assessment of Sensitive Receptors – see Operational Monitoring Operational Plan..
Operational monitoring – shoreline assessment	Yes	ALL	Consider the need to mobilise resources to undertake shoreline assessment surveys (OM05).	Planning or Environment	**WITHIN 48 HOURS:** In agreement with WA DTMI, deployment of 2 specialists trained in Shoreline Clean-up Assessment Technique (SCAT) for each of the RPAs with predicted impacts.	Mobilise OSM service via OSRL: [11] Refer to OSM Bridging Implementation Plan – Part B for additional implementation information: Link Refer to Joint Industry Operational And Scientific Monitoring Plan Framework for activation criteria and additional supporting information.
Operational and Scientific Monitoring	Yes	ALL	Consider the need to mobilise OSM resources via third party service provider.	Environment	**WITHIN 24 HOURS:** Notify service provider of spill event and mobilise required programs depending upon nature of spill event	
Mechanical dispersion	No	N/A	This response strategy is not recommended.			
In-situ burning	No	N/A	This response strategy is not recommended.			
Shoreline protection and deflection	Yes	ALL	Concentrations over 100 g/m^2 may impact shorelines. Any high-value sections of shoreline can be selected for protection and deflection. Equipment from Woodside, PPA (if within port limits), AMOSC and AMSA Western Australian Stockpiles mobilised. Consideration of mobilisation of interstate/international shoreline protection equipment (i.e. OSRL).	Operations and Planning	**WITHIN 24 HOURS:** In agreement with WA DTMI (for Level 2/3 incidents), activate relevant Tactical Response Plans (TRPs) within 12 hours. In agreement with WA DTMI (for Level 2/3 incidents), mobilise teams to RPAs within 24 hours of operational monitoring predicting impacts.	Protection and Deflection Operational Plan *Logistics Section to download immediately and follow steps*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Technique	Spill type	Level	Pre- Identified Tactics	Responsible	ALARP Commitment Summary	Link to Operational Plans for notification numbers and actions
	MGO					
					In agreement with WA DTMI (for Level 2/3 incidents), equipment mobilised from closest stockpile within 24 hours. **WITHIN 48 HOURS:** Supplementary equipment mobilised from State, AMOSC, AMSA stockpiles within 48 hours. Supplementary equipment mobilised from OSRL within 48 hours.	
Shoreline clean-up	**Yes**	**ALL**	Concentrations over 100 g/m^2 may impact shorelines. Any high-value sections of shoreline can be selected for clean up. Equipment from Woodside, and/or PPA (if within port limits) AMOSC and AMSA Western Australian Stockpiles and relevant personnel mobilised. Consideration of mobilisation of interstate/international shoreline clean-up equipment and relevant personnel (i.e. OSRL).	Logistics and Planning	**WITHIN 24 HOURS:** Equipment mobilised from closest stockpile within 24 hours. TRPs available for at risk shorelines within 24 hours. Deployment of shoreline clean-up teams to contaminated RPAs within 24 hours. Access to at least 124 m^3 of solid and liquid waste storage available within 24 hours upon activation of 3rd party contract.	Shoreline Clean-up Operational Plan *Logistics Section to download immediately and follow steps*
Oiled wildlife response	**Yes**	**ALL**	If oiled wildlife is a potential impact, request AMOSC to mobilise containerised oiled wildlife first strike kits and relevant personnel. Refer to relevant Tactical Response Plan for potential wildlife at risk. Mobilise AMOSC Oiled Wildlife Containers. Consider whether additional equipment is required from local suppliers.	Logistics and Planning	**WITHIN 24 HOURS:** Initiate a wildlife first strike response within 24 hours of confirmed or imminent wildlife contact.	Oiled Wildlife Response Operational Plan

3. RESPONSE PROTECTION AREAS

Action: Provide relevant Control Agency with applicable Tactical Response Plans for any Response Protection Areas (RPAs) identified during operational monitoring.

Based on hydrocarbon spill modelling results, the sensitive receptors outlined in **Table 3-1** are identified as priority protection areas, as they have the potential to be contacted by hydrocarbon at or above impact threshold levels within 48 hours of a spill.

Table 3-1: Receptors for Priority Protection with Potential Impact within 48 Hours

Receptor	Distance and Direction from Operational Area (km)	Minimum time to shoreline contact (above 100g/m^2) in days	Maximum shoreline accumulation (above 100g/m^2) in m^3	Tactical Response Plans
Dampier Archipelago at Legendre Island	~ 8 km south	CS-08 – 0.33 days	CS-08 – 69 m^3	Mermaid Sound/ Dampier Archipelago Inshore Waters Tactical Response Plan
Keast Island	~ 10 km south-east	CS-08 – 0.71 days	CS-08 – 20 m^3	

Hydrocarbon spill modelling results indicate the sensitive receptors listed below have the potential to be contacted by hydrocarbons beyond 48 hours of a spill:

- Cape Bruguieres – 12 km south-east of the Operational Area. 2.04 days (5 m^3)

Tactical Response plans for these locations can be accessed via the link here and include the details of potential forward operating bases and staging areas.

Oil Spill Trajectory Modelling specific to the spill event will be required to determine the regional sensitive receptors to be contacted beyond 48 hours of a spill.

Figure 3-1 illustrates the location of regional sensitive receptors in relation to the Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Operational Area and identifies priority protection areas.

Consideration should be given to other stakeholders (including mariners) in the vicinity of the spill location. **Table 3-2** indicates the assets within the vicinity of the Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Operational Area.

Table 3-2: Assets in the vicinity of the Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Operational Area

Asset	Distance and Direction from Operational Area	Operator
North Rankin Complex	Overlaps	Woodside
Goodwyn Alpha	22 km west	Woodside
Goodwyn Alpha Pipeline	Overlaps	Woodside
NWS Pipeline	Overlaps	Woodside
North Rankin Pipeline	Overlaps	Woodside
Pluto LNG Export Pipeline to Burrup	Overlaps	Woodside
Cossack-Wanaea Pipeline	Overlaps	Woodside
Wandoo A & B	16 km west	Vermilion
Reindeer	32 km west	Santos
Stag	36 km west	Jadestone

4. DISPERSANT APPLICATION

Dispersant is not considered an appropriate response strategy for this activity as described in the Angel Carbon Capture and Storage Geophysical and Geotechnical Surveys Environment Plan Appendix D (Woodside's Oil Spill Preparedness and Response Mitigation Assessment).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX A – CREDIBLE SPILL SCENARIOS AND HYDROCARBON INFORMATION

Table A - 1: Credible spill scenarios and hydrocarbon information

Scenario	Product	API gravity	Volume	Residue	Weathering rate		Suggested ADIOS2 Analogue[2]
CS-08 (WCCS) **Instantaneous Release of 150 m^3 of Marine Gas Oil at the State Waters boundary**	Marine gas oil	0.829 @ 25°C	150 m^3	5% or 7.5 m^3	12 hours (BP < 180 °C)	6 %	Diesel Fuel Oil (Southern USA 1). API of 37.
					24 hours (180 °C < BP < 265 °C)	34.6 %	
					Several days (265 °C < BP < 380 °C)	54.4 %	
CS-05 **Instantaneous Release of 150 m^3 of Marine Gas Oil at an offshore location**	Marine gas oil	0.829 @ 25°C	150 m^3	5% or 7.5 m^3	12 hours (BP < 180 °C)	6 %	Diesel Fuel Oil (Southern USA 1). API of 37.
					24 hours (180 °C < BP < 265 °C)	34.6 %	
					Several days (265 °C < BP < 380 °C)	54.4 %	

[2] Initial screening of possible ADIOS2 analogues considered hydrocarbons with similar APIs. Suggested selection is based on the closest distillation cut to the Woodside hydrocarbon. Only hydrocarbons with >380°C distillation cuts were included in selection process.

APPENDIX C – SPILL ASSESSMENT QUESTIONS

What has happened?		
Date/time		
Spill source		
Spill cause		
Safety situation		
What is it?		
Oil type and name		
Oil properties	Specific gravity	
	Viscosity	
	Pour point	
	Asphaltenes	
	Wax content	
	Boiling point	
Where is it?		
Latitude and longitude		
Distance and bearing		
Affected area	☐ Offshore	
	☐ Subsea	
	☐ Shoreline	
	☐ Estuary	
	☐ Port	
	☐ Harbour	
	☐ Inland	
	☐ River	
	☐ Other (please detail):	
Water depth		
How big is it?		
Area		
Release type	☐ Instantaneous	Estimated volume:
	☐ Continuous release	Estimated release rate:
Where is it going?		
Metocean conditions		
Currents and tides		
What is in the way?		
Resources at risk		
Time until resource contact		
What's happening to it?		
Weathering processes		
Response actions underway

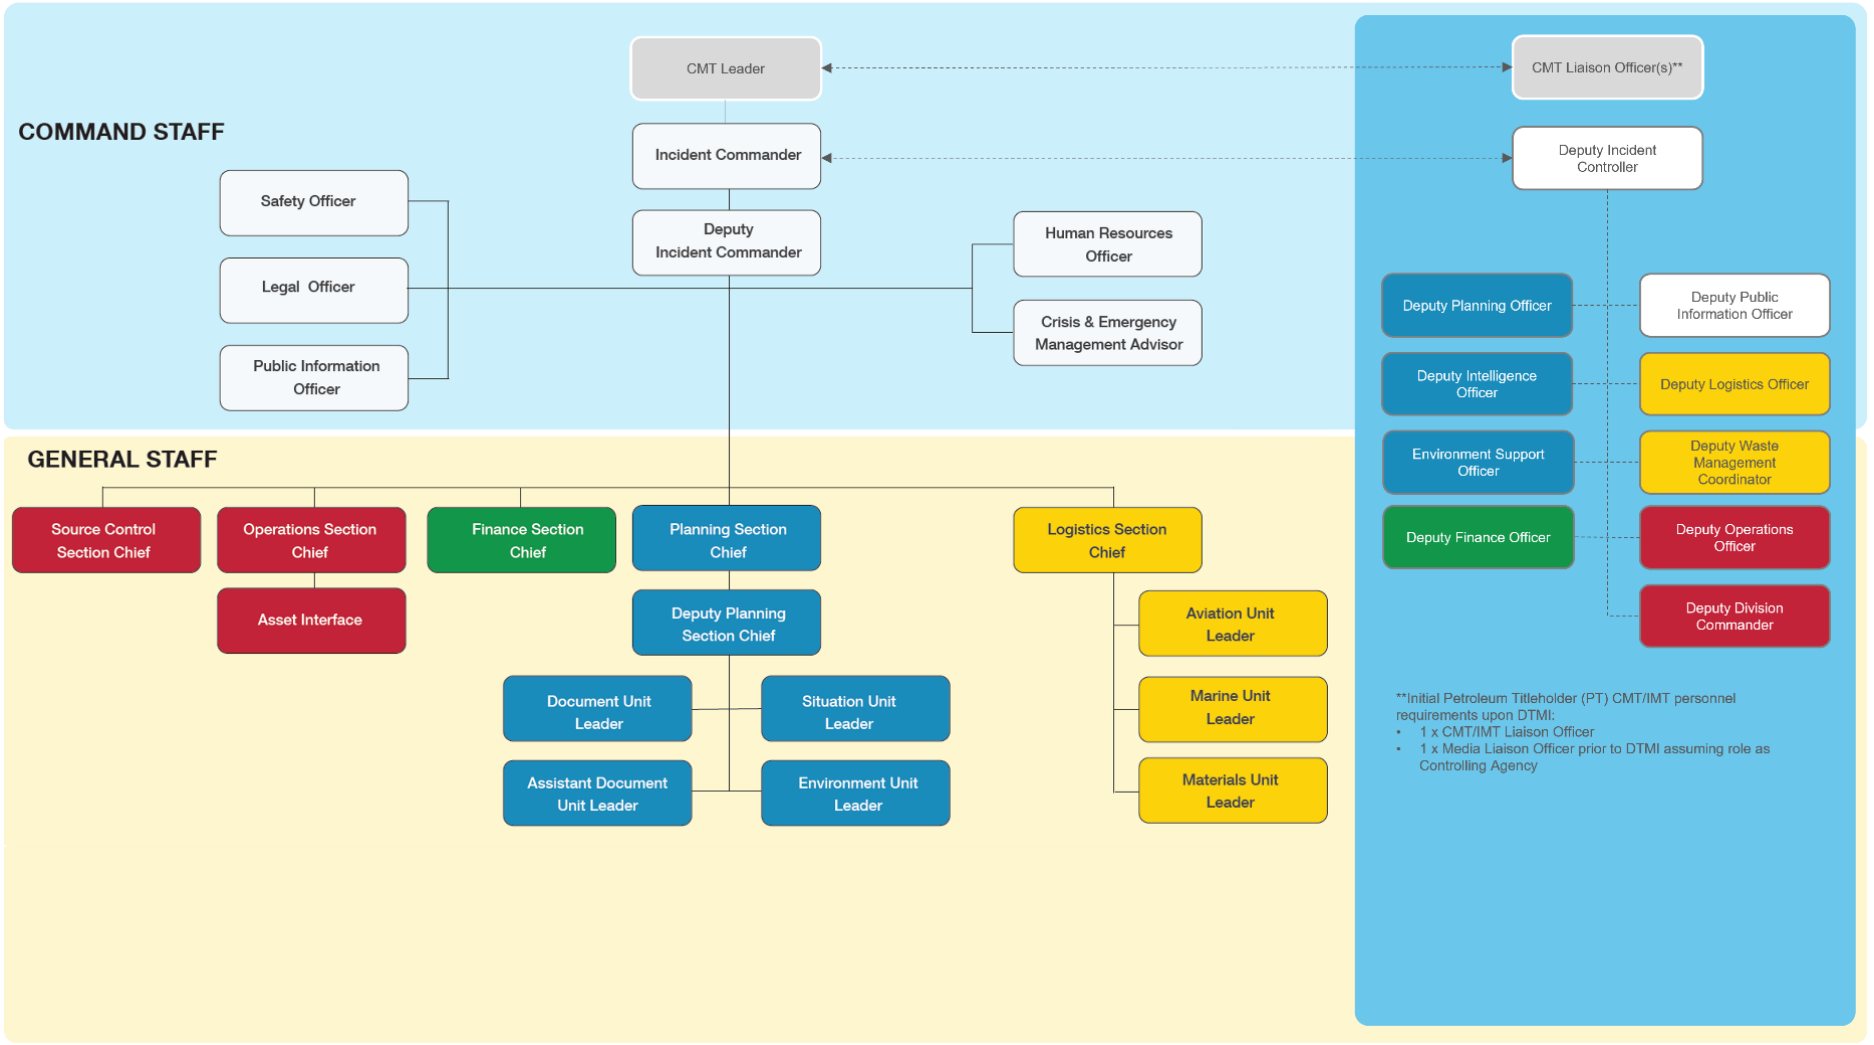
APPENDIX D – COORDINATION STRUCTURE FOR A CONCURRENT HYDROCARBON SPILL IN BOTH COMMONWEALTH AND STATE WATERS/ SHORELINES [3]

The Control Agency for a hydrocarbon spill in Commonwealth waters resulting from an offshore petroleum activity is Woodside (the Petroleum Titleholder).



The Control Agency/ Hazard Management Agency (HMA) for a hydrocarbon spill in State waters/shorelines resulting from an offshore petroleum activity is DTMI. DTMI will appoint an Incident Controller and form a separate IMT to only manage the spill within State waters/shorelines.

[3] Adapted from DTMI Offshore Petroleum Industry Guidance Note, Marine Oil Pollution: Response and Consultation Arrangements July 2020. Note: For full structure up to Commonwealth Cabinet/Minister refer to Marine Oil Pollution: Response and Consultation Arrangements Section 6.5, Figure 4.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX E – WOODSIDE INCIDENT MANAGEMENT STRUCTURE

Woodside Incident Management Structure for Hydrocarbon Spill (including Woodside Liaison Officers Command Structure within DTMI IMT if required). Woodside's CIMT would operate from the Emergency Operations Centre (EOC) at the Woodside headquarters in Perth.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX F – WOODSIDE LIAISON OFFICER RESOURCES TO DTMI

In the event that DTMI is required to establish an IMT, Woodside will make available an appropriate number of appropriately qualified persons to work within the DTMI IMT. In the event the Port Authority is the Control Agency within the Dampier Port Limits, Woodside will make available similar roles as requested.

It is an expectation that Woodside's nominated CMT Liaison Officer and the Deputy Incident Controller attend the DTMI Fremantle Incident Control Centre (ICC) as soon as possible after the formal request has been made by the State Marine Pollution Coordinator (SMPC) , and that the remaining initial cohort will attend no later than 8 am on the day following the request being formally made to Woodside by the SMPC. For Woodside personnel designated to serve in DTMI'S Forward Operating Base (FOB), it is expected that they arrive at the FOB no later than 24 hours from the formal request being made by the SMPC.

Area	Role	Woodside personnel[4]	Key Duties	#
DTMI Maritime Environmental Emergency Coordination Centre (MEECC)	CMT Liaison Officer	CIMT Liaison	• Provide a direct liaison between the CMT and the MEECC. • Facilitate effective communications and coordination between the CIMT Leader and SMPC. • Offer advice to SMPC on matters pertaining to PT crisis management policies and procedures.	1
DTMI IMT Incident Control	Deputy Incident Controller	Deputy Incident Commander (Deputy IC)	• Provide a direct liaison between the PT IMT and DTMI IMT. • Facilitate effective communications and coordination between the PT IC and the DTMI IC. • Offer advice to the DTMI IC on matters pertaining to PT incident response policies and procedures. • Offer advice to the Safety Coordinator on matters pertaining to PT safety policies and procedures, particularly as they relate to PT employees or contractors operating under the control of the DTMI IMT.	1
DTMI IMT Intelligence	Deputy Intelligence Officer	Situation Unit Leader (Intelligence)	• As part of the Intelligence Team, assist the Intelligence Officer in the performance of their duties in relation to situation and awareness. • Facilitate the provision of relevant modelling and predications from the PT IMT. • Assist in the interpretation of modelling and predictions originating from the PT IMT. • Facilitate the provision of relevant situation and awareness information originating from the DTMI IMT to the PT IMT. • Facilitate the provision of relevant mapping from the PT IMT. • Assist in the interpretation of mapping originating from the PT IMT. • Facilitate the provision of relevant mapping originating from the DTMI IMT to the PT IMT.	1
DTMI IMT Intelligence – Environment	Environment Support Officer	Deputy Environment Unit Leader	• As part of the Intelligence Team, assist the Environment Coordinator in the performance of their duties in relation to the provision of environmental support into the planning process. • Assist in the interpretation of the PT OPEP and relevant TRP plans.	1

[4] *These positions would be mobilised, in consultation with DTMI, to align to the actual spill scenario. The selected roles and/or individual personnel would be subject to continued evaluation to ensure continued 'best fit'. For CIMT roster arrangements, contact the WCC. During a prolonged response, additional personnel may be sourced through internal resourcing and mutual Aid agreements such as the AMOSC Core Group via [10].*

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Area	Role	Woodside personnel[4]	Key Duties	#
			• Facilitate in requesting, obtaining and interpreting environmental monitoring data originating from the PT IMT. • Facilitate the provision of relevant environmental information and advice originating from the DTMI IMT to the PT IMT.	
DTMI IMT Planning-Plans/ Resources	Deputy Planning Officer	Deputy Planning Section Chief	• As part of the Planning Team, assist the Planning Officer in the performance of their duties in relation to the interpretation of existing response plans and the development of incident action plans and related sub plans. • Facilitate the provision of relevant IAP and sub plans from the PT IMT. • Assist in the interpretation of the PT OPEP from the PT. • Assist in the interpretation of the PT IAP and sub plans from the PT IMT. • Facilitate the provision of relevant IAP and sub plans originating from the DTMI IMT to the PT IMT. • Assist in the interpretation of the PT existing resource plans. • Facilitate the provision of relevant components of the resource sub plan originating from the DTMI IMT to the PT IMT. **(Note this individual must have intimate knowledge of the relevant PT OPEP and planning processes)**	1
DTMI IMT Public Information-Media/ Community Engagement	Deputy Public Information Officer	Deputy Public Information Officer	• As part of the Public Information Team, provide a direct liaison between the PT Media team and DTMI IMT Media team. • Facilitate effective communications and coordination between the PT and DTMI media teams. • Assist in the release of joint media statements and conduct of joint media briefings. • Assist in the release of joint information and warnings through the DTMI Information and Warnings team. • Offer advice to the DTMI Media Coordinator on matters pertaining to PT media policies and procedures. • Facilitate effective communications and coordination between the PT and DTMI Community Liaison teams. • Assist in the conduct of joint community briefings and events. • Offer advice to the DTMI Community Liaison Coordinator on matters pertaining to the PT community liaison policies and procedures. • Facilitate the effective transfer of relevant information obtained from through the Contact Centre to the PT IMT.	1
DTMI IMT Logistics	Deputy Logistic Officer	Deputy Logistics Section Chief	• As part of the Logistics Team, assist the Logistics Officer in the performance of their duties in relation to the provision of supplies to sustain the response effort. • Facilitate the acquisition of appropriate supplies through the PTs existing OSRL, AMOSC and private contract arrangements. • Collects Request Forms from DTMI to action via PT IMT. **(Note this individual must have intimate knowledge of the relevant PT logistics processes and contracts)**	1

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Area	Role	Woodside personnel[4]	Key Duties	#
DTMI IMT Finance-Accounts/ Financial Monitoring	Deputy Finance Officer	Deputy Finance Section Chief	• As part of the Finance Team, assist the Finance Officer in the performance of their duties in relation to the setting up and payment of accounts for those services acquired through the PTs existing OSRL, AMOSC and private contract arrangements. • Facilitate the communication of financial monitoring information to the PT to allow them to track the overall cost of the response. • Assist the Finance Officer in the tracking of financial commitments through the response, including the supply contracts commissioned directly by DTMI and to be charged back to the PT.	1
DTMI IMT Operations	Deputy Operations Officer	Deputy Operations Section Chief	• As part of the Operations Team, assist the Operations Officer in the performance of their duties in relation to the implementation and management of operational activities undertaken to resolve an incident. • Facilitate effective communications and coordination between the PT Operations Section and the DTMI Operations Section. • Offer advice to the DTMI Operations Officer on matters pertaining to PT incident response procedures and requirements. • Identify efficiencies and assist to resolve potential conflicts around resource allocation and simultaneous operations of PT and DTMI response efforts.	1
DTMI IMT Operations – Waste Management	Deputy Waste Management Coordinator	Deputy Waste Coordinator (Materials)	• As part of the Operations Team, assist the Waste Management Coordinator in the performance of their duties in relation to the provision of the management and disposal of waste collected in State waters. • Facilitate the disposal of waste through the PT's existing private contract arrangements related to waste management and in line with legislative and regulatory requirements. • Collects Request Forms from DTMI to action via PT IMT.	1
DTMI FOB Operations Command	Deputy Division Commander	FOB Deputy Incident Commander	• As part of the Field Operations Team, assist the Division Commander in the performance of their duties in relation to the oversight and coordination of field operational activities undertaken in line with the IMT Operations Section's direction. • Provide a direct liaison between the PT FOB and DTMI FOB. • Facilitate effective communications and coordination between the PT Division Commander and the DTMI Division Commander. • Offer advice to the DTMI Division Commander on matters pertaining to PT incident response policies and procedures. • Assist the Safety Coordinator deployed in the FOB in the performance of their duties, particularly as they relate to PT employees or contractors. • Offer advice to the Safety Coordinator deployed in the FOB on matters pertaining to PT safety policies and procedures.	1
			Total initial Woodside personnel requirement to DTMI	11

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

APPENDIX G – DTMI LIAISON OFFICER RESOURCES TO WOODSIDE

Once DTMI activates a State waters/shorelines IMT, DTMI will make available the following roles to Woodside.

Area	DTMI Liaison Role	Personnel Sourced from:	Key Duties	#
Woodside CIMT	DTMI Liaison Officer (prior to DTMI assuming Controlling Agency)/ Deputy Incident Controller – State waters (after DTMI assumes Controlling Agency)	DTMI	• Facilitate effective communications between DTMI's SMPC/ Incident Controller and the Petroleum Titleholder's appointed CMT Leader / Incident Controller. • Provide enhanced situational awareness to DTMI of the incident and the potential impact on State waters. • Assist in the provision of support from DTMI to the Petroleum Titleholder. • Facilitate the provision technical advice from DTMI to the Petroleum Titleholder Incident Controller as required.	1
Woodside CIMT Public Information – Media	DTMI Media Liaison Officer	DTMI	• Provide a direct liaison between the PT Media team and DTMI IMT Media team. • Facilitate effective communications and coordination between the PT and DTMI media teams. • Assist in the release of joint media statements and conduct of joint media briefings. • Assist in the release of joint information and warnings through the DTMI Information & Warnings team. • Offer advice to the PT Media Coordinator on matters pertaining to DTMI and wider Government media policies and procedures.	1
			Total initial DTMI personnel requirement to Woodside	2

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.
