Rockingham Kwinana Chamber of Commerce and Industry	Independent not-for-profit organisation responsible for promoting the interests of its members in the business community in the towns of Rockingham and Kwinana and surrounding areas.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Rockingham and Kwinana Chamber of Commerce and Industry's interests have the potential to be impacted by the proposed activities.	Yes
Manjimup Chamber of Commerce and Industry	Independent not-for-profit organisation responsible for promoting the interests of its members in the business community in the town of Manjimup and surrounding areas.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Manjimup Chamber of Commerce and Industry's interests have the potential to be impacted by the proposed activities.	Yes
Nannup Chamber of Commerce and Industry	Independent not-for-profit organisation responsible for promoting the interests of its members in the business community in the town of Nannup and surrounding areas.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Based on the revised EMBA, the Nannup Chamber of Commerce and Industry's interests do not have the potential to be impacted by the proposed activities. Nevertheless, to take an inclusive approach and to consult more widely, Woodside chose to consult Nannup Chamber of Commerce and Industry based on overlap with the initial EMBA.	No
Augusta Chamber of Commerce and Industry	Independent not-for-profit organisation responsible for promoting the interests of its members in the business community in the town of Augusta and surrounding areas.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Augusta Chamber of Commerce and Industry's interests have the potential to be impacted by the proposed activities.	Yes
Christmas Island Business Association	Represents the interests of Christmas Island's business community.	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under Regulation 25(1)(d) of the Environment Regulations. The Christmas Island Business Association's interests have the potential to be impacted by the proposed activities.	Yes

Indian Ocean Territories Regional Development Organisation	Responsible for supporting the economic development of Christmas Island.	Woodside has applied its methodology for 'Commercial fisheries (Commonwealth and State) and peak representative bodies' under Regulation 25(1)(d) of the Environment Regulations. The Indian Ocean Territories Regional Development Organisation's interests have the potential to be impacted by the proposed activities.	Yes
Shark Bay Community Resource Centre	Not-for-profit, community owned and managed organisation which produces a monthly community newspaper.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified Shark Bay Community Resource Centre as a potentially relevant person. Woodside chose to contact Shark Bay Community Resource Centre at its discretion in line with Section 5.3.7.	No
RAC Monkey Mia Dolphin Resort	Accommodation provider within the Shark Bay World Heritage Area.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified RAC Monkey Mia Dolphin Resort as a potentially relevant person. Woodside chose to contact RAC Monkey Mia Dolphin Resort at its discretion in line with Section 5.3.7.	No
Dirk Hartog Island	Tourism business operating accommodation and guided tours and providing four-wheel drive access to Dirk Hartog Island.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified Dirk Hartog Island as a potentially relevant person. Woodside chose to contact Dirk Hartog Island at its discretion in line with Section 5.3.7.	No
Shark Bay Aviation	Shark Bay-based business offering air services across the Gascoyne, Pilbara, Murchison and Kimberley regions	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified Shark Bay Aviation as a potentially relevant person.	No

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

		Woodside chose to contact Shark Bay Aviation at its discretion in line with Section 5.3.7.	
Naturetime Tours	Shark Bay-based tour company offering four-wheel drive tours.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified Naturetime Tours as a potentially relevant person. Woodside chose to contact Naturetime Tours at its discretion in line with Section 5.3.7.	No
Wula Gura Nyinda Eco Cultural Tours	Shark Bay-based tour company offering tours and Indigenous experiences.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified Wula Gura Nyinda Eco Cultural Tours as a potentially relevant person. Woodside chose to contact Wula Gura Nyinda Eco Cultural Tours at its discretion in line with Section 5.3.7.	No
Shark Bay Coastal Tours	Shark Bay-based tour company specialising in four-wheel drive tours.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified Shark Bay Coastal Tours as a potentially relevant person. Woodside chose to contact Shark Bay Coastal Tours at its discretion in line with Section 5.3.7.	No
[Individual 1]	Former State Member for North West Central	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The Shire of Shark Bay identified [Individual 1] as a potentially relevant person.	No

		Woodside chose to contact [Individual 1] at its discretion in line with Section 5.3.7.	
Malay Association of Christmas Island (MACI)	Incorporated association responsible for promoting Malay culture and heritage on Christmas Island and advocating on issues relating to the island in general.	Woodside has applied its methodology for 'Local government and elected Parliamentary representatives, community groups or organisations' under regulation 25(1)(d) of the Environment Regulations. The MACI is an incorporated association whose objects are to maintain and promote Malay culture and heritage on Christmas Island as well to advocate on issues relating to the opportunity and prosperity for Malay residents and the island in general. Woodside contacted MACI at its discretion in line with Section 5.3.7	No
Other non-government groups or organisations			
350 Australia (350A)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations to determine 350A's relevance for the proposed activity. Woodside has assessed that 350A's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact 350A at its discretion in line with Section 5.3.7.	No
Greenpeace Australia Pacific (GAP)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that GAP's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact GAP at its discretion in line with Section 5.3.7.	No

Australian Conservation Foundation (ACF)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that ACF's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact ACF at its discretion in line with Section 5.3.7.	No
Australian Marine Conservation Society (AMCS)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that AMCS's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact AMCS at its discretion in line with Section 5.3.7.	No
Conservation Council of Western Australia (CCWA)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that CCWA's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact CCWA at its discretion in line with Section 5.3.7.	No
Sea Shepherd Australia (SSA)	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that SSA's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact SSA at its discretion in line with Section 5.3.7.	No

Environs Kimberley	Non-government organisation	Woodside has applied its methodology for 'Other non-government groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Woodside has assessed that Environs Kimberley's public website material does not demonstrate an interest with the potential risks and impacts associated with planned activities in accordance with the intended outcome of consultation (as set out in Section 5.2). Woodside chose to contact Environs Kimberley at its discretion in line with Section 5.3.7.	No
Research institutes and local conservation groups or organisations			
Cape Conservation Group (CCG)	Local conservation group focused on protecting the terrestrial and marine environment of the North West Cape	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. CCG's conservation activities have the potential to intersect with the EMBA as the EMBA overlaps North West Cape.	Yes
Protect Ningaloo	Local conservation group focused on protecting the Exmouth Gulf and Ningaloo Reef and Cape Range	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. Protect Ningaloo's conservation activities have the potential to intersect with the EMBA as the EMBA overlaps North West Cape and Ningaloo Reef.	Yes
University of Western Australia (UWA)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There is no known research being undertaken by the UWA that intersects within the EMBA. Woodside chose to contact UWA at its discretion in line with Section 5.3.7.	No
Western Australia Marine Science Institution (WAMSI)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There is no known research being undertaken by WAMSI that intersects within the EMBA.	No

		Woodside chose to contact WAMSI at its discretion in line with Section 5.3.7.	
Australian Institute of Marine Science (AIMS)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There is no known research being undertaken by AIMS that intersects within the EMBA. Woodside chose to contact AIMS at its discretion in line with Section 5.3.7.	No
Commonwealth Scientific and Industrial Research Organisation (CSIRO)	Research institute	Woodside has applied its methodology for 'Research institutes and local conservation groups or organisations' under regulation 25(1)(d) of the Environment Regulations. There is no known research being undertaken by the CSIRO that intersects within the EMBA. Woodside chose to contact CSIRO at its discretion in line with Section 5.3.7.	No
Other			
Save Our Songlines and/ or [Individual 2] and/ or [Individual 3]	Non-government organisation	Woodside has applied its methodology for 'Traditional Custodians and nominated representative corporations' and 'Other non-government groups or organisations' under regulation 25(1)(d) to determine Save Our Songlines' (SOS) and/ or [Individual 2] and/ or [Individual 3] relevance for the proposed activity. Save Our Songlines' and/ or [Individual 2] and/ or [Individual 3] stated interest is to stop or pause Scarborough gas and to stop new industry on the Burrup; and oppose planned expansion of the Burrup Hub industry by Woodside, Perdaman and Yara. In addition, their stated interests also include the protection of Murujuga rock art. This scope of the activity under this EP does not fall within their stated interests (see Section 6.6 in the EP).	No

Consultation Activities

Pyrenees Facility Operations EP Consultation Activities

Woodside has been conducting extensive consultation with relevant persons and other parties for this EP since September 2023 when consultation commenced with interested and affected stakeholders as part of a planned, integrated and consistent approach to stakeholder engagement for Woodside's proposed opportunities. A broad consultation process has been undertaken with relevant persons for the Pyrenees Facility Operations EP. Consultation aims to be inclusive, transparent, voluntary, respectful and two-way. Consultation was undertaken by email, letter, phone call and/or meeting.

Discharging Regulation 25 of the Environment Regulations

Woodside advertised the planned activities proposed for this EP in national, state and relevant local newspapers (see Record of Consultation, reference 5.1). Regional newspapers do not require subscription and are available (and in some cases delivered) directly to households. All communities within or adjacent to the EMBA had access to this information via this media. No direct comments or feedback were received from the advertisements.

- A Consultation Information Sheet was provided to relevant persons and persons Woodside chose to contact (see Section 5.3.7), which included details such as an activity overview, maps, a summary of key risks and/or impacts and management measures (Record of Consultation, references 1.1 and 3.1).
- Since the commencement of the initial consultation period (September 2023), the stakeholder Consultation Information Sheet (Record of Consultation, reference 1.1, superseded by Record of Consultation, reference 3.1) has been available on Woodside's website. The Woodside Consultation Information Sheets include a toll-free 1800 phone number and Woodside's feedback email address (feedback@woodside.com.au).
- Additional targeted information was provided to relevant marine users including AHO and AMSA – Marine Safety (Record of Consultation, references 1.14 and 3.10). This information included maps and additional information relevant to the specific category of persons.
- Where appropriate, Woodside conducted phone calls and meetings with relevant persons.
- Where appropriate, targeted follow-up emails were sent to relevant persons who had not provided a response prior to the close of the target feedback period.
- Woodside considered relevant person responses and assessed the merits and relevance of objections and claims about the potential adverse impact of the proposed activity set out in the EP, in accordance with the intended outcome of consultation (see Section 5.2).
- Consultation activities undertaken with relevant persons are summarised at Appendix F, Table 2.
- Engagement undertaken with persons or organisations Woodside assessed as not relevant but chose to contact (see Section 5.3.7) or self-identified and Woodside assessed as not relevant are summarised at Appendix F, Table 3.

Social media

- In September 2023, Woodside commenced a sponsored social media campaign (Record of Consultation, reference 3.2) geotargeting local government authorities in Perth metropolitan area, regional areas in the north of WA and regional areas in the south of WA, which are within or coastally adjacent to the EMBA for the proposed activities.

The campaign had a reach of more than 1.3 million and brought the proposed activity to the attention of persons who may be interested, and advised persons or organisations on how they can find out more about Woodside's proposed activities by visiting Woodside's website.

Platform	Geotargeted Reach	Post Dates	Impact
Facebook and Instagram	Perth Metro: Users 18+ within 80km	13 September 2023 – 11 October 2023	Reach: 1,146,919 Frequency: 4.42 Impressions: 5,071,662 Clicks: 4780 Click Through Rates%: 0.09

Community engagement

Woodside has held a number of Community Information Sessions where this EP's Consultation Information Sheets were available and discussed. See tables in Record of Consultation, References 5.3 and 5.4.

Date (2023)	Location	Event (if applicable)
18, 19 and 20 September 2023	Karratha, Port Hedland and Roebourne	Community Consultation Roadshow
10 and 11 October 2023	Karratha	Pilbara Summit 2023
16 and 17 October 2023	Carnarvon and Denham	Community Consultation Roadshow
23 October 2023	Exmouth	Community Consultation Roadshow
4 November 2023	Dampier	Dampier Beachside Twilight Markets
24 March 2024	Dampier	Dampier Beachside Markets
19 May 2024	Exmouth	Exmouth Community Markets
15 June 2024	Karratha	WA Day Festival
26-27 June 2024	Karratha	Pilbara Summit

26 July 2024	Karratha	Community Pop-Up
3-4 August 2024	Karratha	FeNaCING Festival
26-28 August 2024	Karratha	Developing Northern Australia Conference
12 October 2024	Dampier	Dampier Beachside Markets
2 November 2024	Dampier	Dampier Beachside Markets
14 November 2024	Exmouth	Community Information Session
18 March 2025	Karratha	Who's Who in the Hood
6 April 2025	Dampier	Dampier Beachside Markets
15 June 2025	Dampier	Dampier Beachside Markets
28 June 2025	Exmouth	Ningaloo Sky Festival
5 October 2025	Exmouth	Exmouth Community Markets

Community Liaison Group engagement

The Exmouth and Karratha Community Liaison Groups (CLGs) represent the interests of a range of local government, industry and community organisations in relation to oil and gas matters in the Exmouth and Karratha region. Woodside regularly meets with the two CLGs to discuss a range of issues including consultation of specific EPs. For this EP, see **Table 2** for a summary of consultation with Karratha and Exmouth CLGs.

Newsletters

Woodside's EP focussed newsletter *Let's Talk* is designed to reach existing and potential stakeholders and encourage self-identification about Woodside's EP-related activities. The newsletter provides quarterly updates about EP consultation activities, case studies on effective consultation with relevant persons and other EP related information such as forthcoming events where Woodside personnel will be consulting with the local community. *Let's Talk* is distributed in a variety of locations as well as across digital platforms including Woodside's website and social media channels. People can also subscribe to receive it on Woodside's website. (Record of Consultation, reference 5.5).

Traditional Custodian Specific Consultation

In addition to the approaches above including community information sessions, additional activities were undertaken with relevant Traditional Custodians, which were specifically designed to provide for effective engagement with Traditional Custodians and so that information was provided in a form that was readily accessible and appropriate (see Section 5.5.4 in the EP).

Consultation undertaken specifically with Traditional Custodians for this EP includes direct engagement with nominated representative bodies via the contact listed on the Office of the Registrar of Indigenous Corporations (ORIC) website, requesting advice on how they would

like to be engaged and asking whether other members and/or individuals should be consulted. This has resulted in:

- Direct engagement with nominated representative bodies via the contact listed on the ORIC website, requesting advice on how they would like to be engaged and asking whether other members and/or individuals should be consulted.
- Meetings with directors, Elders and any nominated representatives, on country or in Perth.
- Requests and offers of resourcing to enable and support consultation.
- Exchange of written feedback and correspondence.
- A Summary Consultation Information Sheet, developed and reviewed by Indigenous representatives in collaboration with technical experts to ensure content is appropriate for the intended recipients, was provided to relevant Traditional Custodian groups (Record of Consultation, reference 1.2) and phone calls to provide context to the consultation were made.

Ongoing efforts were made to engage and develop relationships with these bodies via a variety of means such as email, phone calls, alternative contacts, texts, social media and in some cases physical visits.

Consultation meetings with attendees decided by Traditional Custodian groups, supported by senior Woodside representatives, subject matter experts, First Nations Relations advisers with skills and experience in community engagement. Meetings are developed through a two-way consultation process to ensure effective information sharing via:

- Mutually agreed agenda avoiding time pressure.
- Encouraging Traditional Custodian attendees to control the pace of the meeting and pause at any time to ask questions, seek clarification or provide feedback.
- Visual aids such as posters, presentations, simplified technical videos and real-world pictures and footage.
- Emphasis on potential planned and unplanned risks and impacts of the activity.
- Ample opportunity for questions and feedback.
- Discussion about ongoing relationship development and opportunities.
- Distribution of hard-copy Consultation Information Sheets (Record of Consultation, reference 1.1) and Summary Information Sheets (Record of Consultation, reference 1.2)
- Meeting all costs such as sitting fees, travel, legal support and executive support and other support required.
- Advertising in Indigenous publications such as the Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) (Record of Consultation, reference 5.1.20 and 5.1.21).

Newspaper	Coverage	Publication dates
Koori Mail	Indigenous	20 September 2023
National Indigenous Times	Indigenous	26 September 2023

Woodside has a geotargeted sponsored social media campaign (Record of Consultation, reference 5.2) to various communities that are coastally adjacent to the EMBA for the proposed activities.

The wide-reaching campaign brought the proposed activity to the attention of persons who may be interested and advised persons or organisations how they can find out about Woodside's proposed activities by visiting Woodside's website, which details the intent of consultation with relevant persons under the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth)*. The campaign reached around 1,369,350 people and was viewed more than 7 million times across various regions as shown in Record of Consultation, reference 5.2.

These social media posts were developed with input from Indigenous representatives. Social media is a highly effective means to engage Indigenous audiences as outlined in Indigenous Digital Life (Professor Carlson, 2021). Advertisements used language and information appropriate to Indigenous audiences. Feedback from community engagements indicates a high level of penetration for this technique.

Woodside has employed a diverse range of techniques to allow relevant persons to become aware of the proposed activity and how it may affect their functions, activities or interests, and to understand their ability to provide feedback. The combination of PBC engagement meetings, traditional print media, social media and face-to face community interaction was designed with input from Indigenous representatives and adapted to the audience, so that it provides a wide-ranging opportunity to consult.

Consultation update (February/March 2025)

As a result of the revised modelling, the EMBA for this activity has been revised, and now extends into Northern Territory waters.

Woodside identified a number of relevant persons who were potentially impacted by the change to the EMBA and provided a consultation update to these relevant persons which included:

- Government departments, where the changes to the EMBA were potentially relevant to their functions, interests or activities, including record keeping and emergency response preparedness.
- Stakeholders who were previously consulted at Woodside's discretion as part of combined consultation with another EP, but who are now assessed as relevant persons for this EP.

Woodside also chose to contact a number of persons and organisations who were previously consulted at Woodside's discretion as part of combined consultation with another EP, and who continue to be assessed as not relevant based on the revised EMBA.

These relevant persons, and persons not assessed as relevant but whom Woodside chose to contact, were provided with an additional 30-day period to provide feedback. Woodside also sent a follow-up email reminding these stakeholders of the opportunity to provide feedback.

Based on the revised EMBA, Woodside also identified a number of persons and organisations who had not previously been consulted for this EP. Woodside has consulted these persons and organisations in accordance with regulation 25 of the Environment Regulations and the summary of that consultation is set out in **Appendix F, Table 2 and Table 3**.

Table 2: Consultation Report with Relevant Persons or Organisations

The black numbering in the **Summary of information provided and record of consultation for this EP** section in Table 2 denotes an item raised by a relevant person. The green numbering denotes Woodside's response to that item.

Commonwealth and State Government Departments or Agencies – Marine

Australian Border Force (ABF)

Summary of information provided and record of consultation for this EP: - On 13 September 2023, Woodside emailed ABF advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 16 October 2023, Woodside sent a reminder email to ABF following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. - On 20 February 2025, Woodside emailed ABF a consultation update on this EP (Record of Consultation, reference 3.17). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with ABF. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. - On 11 March 2025, Woodside sent a reminder email to ABF following up on the proposed activity (Record of Consultation, reference 4.3). Woodside included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has addressed maritime security-related issues in Section 6 of the EP based on previous offshore activities. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with ABF for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:		

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation information provided to ABF on 13 September 2023 and 20 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided ABF with the opportunity to provide feedback over a 28-month period.

Department of Foreign Affairs and Trade (DFAT)

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed DFAT advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DFAT following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 18 February 2025, Woodside emailed DFAT a consultation update on this EP (Record of Consultation, reference 3.9). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DFAT. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to DFAT following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.
- On 14 March 2025, DFAT responded thanking Woodside for the invitation to comment (SI Report, reference 84.1). DFAT:
 - (1) Noted that as there was shoreline accumulation in Indonesia, it was recommended that Woodside consult Indonesia via its Canberra embassy.
- (1) On 20 March 2025, Woodside telephoned DFAT to seek clarification on consultation with Indonesia.
 - Woodside:
 - Noted previous advice from DFAT was that Woodside was not encouraged to contact embassies directly as DFAT preferred to manage sensitivities around engagement with other countries.

▪ Noted Woodside's oil spill response plans provided a mechanism for consultation in international waters that would be complied with, at the appropriate time, if an incident occurred. ▪ Noted the proposed activities had no planned impacts in Indonesian waters. With regards to unplanned events, DFAT had previously advised that in the case of an oil spill, AMSA was the best point of contact for Woodside. ▪ Asked if DFAT advice had changed and whether it was satisfactory for Woodside to progress EP development based on its existing international consultation model. – DFAT: ▪ Advised that consultation with Indonesia was at Woodside's discretion based on Woodside's legal and regulatory requirements. ▪ Confirmed it would revert back to Woodside with any official changes to DFAT's position on international consultation. ▪ Confirmed Woodside could continue to use its existing international consultation model unless provided with updated advice from DFAT that required changes to the approach. • On 24 March 2025, DFAT emailed Woodside (SI Report, reference 84.2) and thanked Woodside for the phone call. DFAT: – (1) Noted it had consulted internally and hadn't been able to confirm the advice regarding consultation with international governments referenced by Woodside, and asked did Woodside have further information. • On 28 March 2025, Woodside emailed DFAT in response to DFAT's query (SI Report, reference 84.3). Woodside: – (1) Noted its international consultation approach arose from a number of engagements with DFAT around April/May 2023 including a meeting in May 2023. Woodside confirmed the details of the DFAT representative at the meeting and advised the discussions had included: ▪ That DFAT preferred to manage sensitivities around engagement with other countries. ▪ That AMSA was the correct contact for Woodside in the event of a hydrocarbon release that could impact international waters. ▪ That DFAT had a bilateral desk with Indonesia and would work with the Indonesian embassy. – (1) Confirmed that following the meeting, Woodside had emailed DFAT's Indonesian branch advising of the discussions, setting out Woodside's proposed strategy for international consultation, and seeking any further feedback. Woodside attached a copy of the email thread. • On 11 April 2025, DFAT emailed Woodside (SI Report, reference 84.4) and: – (1) Confirmed the advice provided in 2023 remained current. – (2) Advised a previous email address was no longer active and confirmed the correct address to use in the event of a hydrocarbon release. • On 11 April 2025, Woodside responded thanking DFAT for its email (SI Report, reference 84.5). Woodside: – (1) Acknowledged DFAT's confirmation that its 2023 advice remained current. – (2) Confirmed it would use the updated contact details for notifications in the event of a hydrocarbon release that was likely to traverse international waters.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

(1) Recommended Woodside consult the Indonesian Government via its embassy in Canberra due to the potential for shoreline accumulation.	(1) Woodside assessment: Based on prior engagement with DFAT, Woodside's approach to international consultation with regard to unplanned events is set out in its emergency response plans which include mechanisms for international consultation in the highly unlikely event of a hydrocarbon release. Woodside response: Woodside sought clarification from DFAT on whether the advice regarding international consultation had changed, as previously DFAT had advised that it preferred to manage engagement with other countries, and that Woodside's best contact in the event of an unplanned event was AMSA. On DFAT's confirmation that this advice remained current, Woodside thanked DFAT for the information.	(1) Woodside notes the Australian Government is signatory to international agreements with Indonesia, which address matters relating to oil spill preparedness and response. In the event of a hydrocarbon spill that is likely to traverse international waters, Woodside will notify the following government agencies as referenced in the Oil Pollution First Strike Plan (Appendix I): - Verbally notify AMSA and Western Australian departments responsible. Woodside will follow up its AMSA notification by way of an online report via AMSA's website. - Other relevant government departments as soon as practicable. These notifications include DFAT.
(2) Provided Woodside with updated contact details to use in the event of a spill.	(2) Woodside assessment: Woodside notes DFAT's updated contact details and has amended the First Strike Plan for this EP accordingly. Woodside response: Woodside confirmed it would use the updated contact details for DFAT notifications in the event of a hydrocarbon release that was likely to traverse international waters.	(2) Woodside has included the updated contact details in the Oil Pollution First Strike Plan (Appendix I).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DFAT for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation information provided to DFAT on 13 September 2023 and 19 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided DFAT with the opportunity to provide feedback over a 28-month period.

Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA)

Summary of information provided and record of consultation for this EP:

- On 15 December 2023, Woodside emailed DITRDCA advising of the proposed activity (Record of Consultation, reference 1.101) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to DITRDCA following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DITRDCA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DITRDCA on 15 December 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activity.
- Woodside has provided the DITRDCA with the opportunity to provide feedback over a 25-month period.

Australian Fisheries Management Authority (AFMA)

Summary of information provided and record of consultation for this EP:

- On 20 September 2023, Woodside emailed AFMA advising of the proposed activity (Record of Consultation, reference 1.34) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 October 2023, AFMA sent an email (SI Report, reference 1.1) to thank Woodside for the advice and:
 - (1) Advised it had no specific comments on the proposal.
 - (2) Encouraged Woodside, if it had not already done so, to engage directly with Commonwealth fishing operators in the area and included contact details for relevant industry associations.
- On 27 October 2023, Woodside responded thanking AFMA for its email (SI Report, reference 1.2). Woodside:
 - (1) Noted AFMA had no specific comments on the proposal.
 - (2) Confirmed it had provided information to relevant fishery licence holders as well as the representative organisations and fishing industry associations recommended by AFMA.
- On 17 February 2025, Woodside emailed AFMA a consultation update on this EP (Record of Consultation, reference 3.5). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with AFMA. Woodside advised the Northern Prawn Fishery was now relevant to the EMBA. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 21 February 2025, AFMA responded thanking Woodside for its email (SI Report, reference 1.3). AFMA:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (2) Sought confirmation that Woodside had consulted the Northern Prawn Fishery.
- Noted a change to its contact information regarding environment plans.
- On 4 March 2025, Woodside responded and thanked AFMA for its feedback (SI Report, reference 1.4). Woodside:
 - (2) Confirmed it had consulted Northern Prawn Fishery licence holders directly, as well as the Northern Prawn Fishery Industry Pty Ltd.
 - Advised it had updated AFMA's preferred contact details in Woodside's database.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) AFMA advised it had no specific comments on the proposal.	(1) Woodside assessment: Woodside accepts that AFMA has no comments on the proposed activities. Woodside response: Woodside noted AFMA had no comments on the proposal.	(1) Not required.
(2) AFMA encouraged Woodside to consult directly with fishing operators who have entitlements to fish within the proposed area.	(2) Woodside assessment: Woodside has consulted relevant individual Commonwealth fishing operators as well as representative bodies of fisheries with entitlement to fish within the proposed area. Woodside response: Woodside advised it had consulted relevant individual Commonwealth fishing operators in the area, as well as representative bodies and fishing industry associations recommended by AFMA.	(2) Woodside has assessed the potential for interaction with Commonwealth managed fisheries in Section 4.10.1 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has consulted AFMA, DAFF - Fisheries, CFA, Tuna Australia, ASBTIA, Northern Prawn Fishery Industry Pty and individual relevant licence holders. Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional controls or measures are required.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with AFMA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation information provided to AFMA on 20 September 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to AFMA over a 28-month period.		

Australian Hydrographic Office (AHO)

Summary of information provided and record of consultation for this EP: • On 15 September 2023, Woodside emailed AHO advising of the proposed activity (Record of Consultation, reference 1.13) and provided a Consultation Information Sheet, shipping lanes map (Record of Consultation, reference 1.14) and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to AHO (Record of Consultation, reference 2.1) following up on the proposed activity and provided the shipping lanes map and a link to the Consultation Information Sheet on Woodside's website. • (1) On 17 October 2023, AHO provided its standard response, acknowledging receipt of Woodside's email (SI Report, reference 2.1) and noted the data would be registered, assessed, prioritised and validated in preparation for updating navigational charting products. (1) Woodside noted AHO's standard response regarding how it would use the information provided. • On 18 February 2025, Woodside emailed AHO a consultation update on this EP (Record of Consultation, reference 3.10). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with AHO. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. Woodside also attached an updated shipping lane map (Record of Consultation, reference 3.22).
--

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 11 March 2025, Woodside sent a reminder email to AHO following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included the shipping lane map and a link to the Consultation Information Sheet on Woodside's website.
- On 12 March 2024, AHO responded thanking Woodside for the invitation to comment (SI Report, reference 2.2). AHO advised:
 - (2) It had no concerns with any of the activities proposed and did not require further updates unless an activity was starting.
- On 26 March 2024, Woodside thanked AHO for its response (SI Report, reference 2.3). Woodside:
 - (2) Noted AHO had no concerns with the activity and that no further updates were required except in circumstances outlined in the reporting requirements factsheet provided by AHO.
 - Asked AHO for clarification if its position on updates could be applied across all Woodside EPs in development.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) AHO acknowledged receipt of consultation emails.	(1) Woodside assessment: Woodside noted the AHO's acknowledgement of its consultation information. Woodside response: Woodside noted AHO would use Woodside's data to update navigational charting products but had no specific feedback on the EP.	(1) Not required.
(2) No concerns with the activities proposed and no further updates required except in the circumstances outlined in AHO's reporting requirements.	(2) Woodside assessment: Woodside acknowledges the AHO has no concerns regarding the activity and does not require further updates. Woodside response: Woodside thanked AHO for its feedback and noted it had no concerns. Woodside also thanked AHO for providing information on its reporting requirements.	(2) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of Consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with AHO for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation information provided to AHO on 15 September 2023 and 18 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has provided AHO with the opportunity to provide feedback over a 28-month period.		

Australian Maritime Safety Authority (AMSA) – Marine Safety

Summary of information provided and record of consultation for this EP: • On 15 September 2023, Woodside emailed AMSA – Marine Safety advising of the proposed activity (Record of Consultation, reference 1.13) and provided a Consultation Information Sheet, GIS shape file, shipping lanes map (Record of Consultation, reference 1.14) and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 25 September 2023, AMSA – Marine Safety thanked Woodside for its email (SI Report, reference 3.1) and: – (1) Advised that as the infrastructure was already in place, previous advice provided by AMSA remained. – (2) Reminded Woodside that vessels should exhibit appropriate lights and shapes to reflect the nature of operation. – (3) Confirmed Woodside should evaluate and implement adequate anti-collision measures. • On 10 October 2023, Woodside thanked AMSA – Marine Safety for its feedback (SI Report, reference 3.2). Woodside also: – (1) Noted that previous advice from AMSA regarding these operations remained. – (2) Confirmed vessels would exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.
--

- (3) Advised that while Woodside did not propose to implement further anti-collision measures for this activity at this time, collision risk mitigation measures were constantly being evaluated.
- On 20 February 2025, Woodside emailed AMSA – Marine Safety a consultation update on this EP (Record of Consultation, reference 3.10). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with AMSA – Marine Safety. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. Woodside also attached an updating shipping lane map (Record of Consultation, reference 3.22).
- On 11 March 2025, Woodside sent a reminder email to AMSA – Marine Safety following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.
- On 11 April 2025, AMSA – Marine Safety thanked Woodside for the consultation information (SI Report, reference 3.3). AMSA apologised for the late feedback and confirmed it welcomed open communication regarding Woodside's activities. AMSA also:
 - (4) Noted it had attached two vessel traffic plots for North-West Western Australia and that some heavy vessel traffic and support craft would be encountered in the area.
 - (5) Noted the large EMBA, which meant there were more vessels to be encountered within the area.
 - (6) Requested the vessels involved notify AMSA's Response Centre 24-48 hours before operations commenced.
 - (7) Reminded Woodside that AHO should be contacted no less than four weeks before operations commenced.
 - (2) Confirmed vessels should exhibit appropriate lights and shapes and should ensure their navigation status was correctly set.
 - (3) Confirmed Woodside should evaluate and implement adequate anti-collision measures.
 - (8) Advised shipping data could be downloaded from AMSA's spatial gateway.
- On 8 May 2025, Woodside responded thanking AMSA – Marine Safety for its feedback (SI Report, reference 3.4). Woodside:
 - (4) Acknowledged the vessel traffic plots provided by AMSA and noted that some heavy vessel traffic would be active in the area.
 - (5) Noted that more vessels may be encountered in the broader EMBA for the activity.
 - (6) Confirmed it would notify the ARC 24-48 hours before activities commenced where vessels would be in Operational Area for >3 weeks.
 - (7) Confirmed it would notify AHO at least four weeks before activities where vessels would be in the Operational Area for >3 weeks.
 - (2) Confirmed vessels would exhibit appropriate lights and shapes, and would ensure their navigation status was correctly set in the AIS unit.
 - (3) Advised it did not propose to implement further anti-collision measures at this time, however collision risk mitigation measures were constantly being evaluated and implemented as required.
 - (8) Noted shipping data could be obtained from AMSA's spatial gateway.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

(1) Previous advice from AMSA regarding the operations remained.	(1) Woodside assessment: Woodside accepts previous advice from AMSA regarding the operations remains relevant. Woodside response: Woodside noted that previous AMSA – Marine Safety advice regarding the operations remained relevant.	(1) Not required.
(2) Vessels should exhibit appropriate lights and shapes.	(2) Woodside assessment: Woodside complies with the International Rules for Preventing Collisions at Sea. Woodside response: Woodside confirmed vessels would exhibit appropriate lights and shapes to reflect the nature of operations and the obligation to comply with the International Rules for Preventing Collisions at Sea.	(2) The EP contains a number of controls that address AMSA's feedback on lighting and compliance with the international rule for preventing collisions at sea (see Section 6.7 of the EP).
(3) Woodside should evaluate and implement adequate anti-collision measures.	(3) Woodside assessment: Woodside is continuously evaluating existing collision risk mitigation measures. Woodside response: Woodside advised it did not propose to implement further anti-collision measures for the activity at this time, but collision risk mitigation measures were constantly being evaluated and implemented.	(3) The EP contains a number of controls that address AMSA's feedback on lighting and compliance with the international rule for preventing collisions at sea (see Section 6.7 of the EP).
(4) Provided vessel traffic plots and noted heavy traffic would be encountered in the area.	(4) Woodside assessment: Woodside acknowledges there is some heavy vessel traffic in Western Australia's North-West. Woodside response: Woodside noted AMSA's traffic plots and that some heavy vessel traffic will be active in the area.	(4) Not required.
(5)	(5)	(5)

Noted the large EMBA would mean more vessels would be encountered.	Woodside assessment: Woodside acknowledges more traffic may be encountered in the broader EMBA. Woodside response: Woodside noted the EMBA meant more vessels, mainly SOLAS, could be encountered.	Not required.
(6) Requested a notification to its ARC 24-48 hours before operations commenced.	(6) Woodside assessment: Woodside will notify the ARC as requested by AMSA. Woodside response: Woodside confirmed vessels would notify the ARC 24-48 hours before mobilisation where vessels would be in the Operational Area >3 weeks.	(6) Woodside will notify AMSA's response centre as referenced as PS 1.6 of the EP.
(7) Reminded Woodside to notify AHO no less than four weeks before operations commenced.	(7) Woodside assessment: Woodside will notify AHO as requested by AMSA. Woodside response: Woodside confirmed it would notify AHO no less than four weeks prior to activities where vessels would be in the Operational Area >3 weeks.	(7) Woodside will notify AHO as referenced as PS 1.5 of the EP.
(8) Shipping data could be obtained from AMSA's spatial gateway.	(8) Woodside assessment: Woodside acknowledges shipping data is available from AMSA's spatial gateway. Woodside response: Woodside noted shipping data could be downloaded from AMSA's spatial gateway.	(8) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with AMSA – Marine Safety for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to AMSA – Marine Safety on 15 September 2023 and 20 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to AMSA – Marine Safety over a 28-month period.

Australian Maritime Safety Authority (AMSA) – Marine Pollution

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed AMSA – Marine Pollution advising of the proposed activity (Record of Consultation, reference 1.15) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to AMSA – Marine Pollution following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 24 June 2024, Woodside emailed AMSA – Marine Pollution (SI Report, reference 82.1) and provided a copy of the Oil Pollution First Strike Plan (Appendix I) and invited AMSA – Marine Pollution to comment on the plan.
- On 18 February 2025, Woodside emailed AMSA – Marine Pollution a consultation update on this EP (Record of Consultation, reference 3.12). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with AMSA – Marine Pollution. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to AMSA – Marine Pollution following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	Woodside and has addressed oil pollution planning and response at Appendix H.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with AMSA – Marine Pollution for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to AMSA – Marine Pollution on 15 September 2023 and 18 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided AMSA - Marine Pollution with the opportunity to provide feedback over a 28-month period.		

Department of Agriculture, Fisheries and Forestry (DAFF) – Fisheries

Summary of information provided and record of consultation for this EP: • On 15 September 2023, Woodside emailed DAFF – Fisheries advising of the proposed activity (Record of Consultation, reference 1.33) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to DAFF – Fisheries following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. • On 17 February 2025, Woodside emailed DAFF - Fisheries a consultation update on this EP (Record of Consultation, reference 3.6). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DAFF - Fisheries. Woodside advised the Northern Prawn Fishery was now relevant to the EMBA. Woodside attached an updated consultation information sheet which included a map of the revised EMBA. • On 10 March 2025, Woodside sent a reminder email to DAFF - Fisheries following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.
--

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, CFA, Tuna Australia, ASBTIA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Vessels are required to comply with the Australian Biosecurity Act 2015, specifically the Australian Ballast Water Management Requirements (as defined under the Biosecurity Act 2015) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing IMS. Vessels will be assessed and managed to prevent the introduction of invasive marine species in accordance with Woodside's Invasive Marine Species Management Plan (see Section 6.8.12 of the EP). Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of the EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DAFF – Fisheries for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to DAFF - Fisheries on 15 September 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community. • Woodside has sent follow-up emails seeking feedback on the proposed activities.		

- Woodside has provided DAFF - Fisheries with the opportunity to provide feedback over a 28-month period.

Department of Defence (DoD)

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed DoD advising of the proposed activity (Record of Consultation, reference 1.7) and provided a Consultation Information Sheet, defence map (Record of Consultation, reference 1.8) and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website as well as the defence map.
- On 25 October 2023, DoD sent an email thanking Woodside for the information (SI Report, reference 4.1) and provided feedback regarding:
 - (1) The location of the activity areas within an exercise area and restricted airspace.
 - (2) Unexploded ordinance (UXO) that may be present on and in the seafloor, and that Woodside must inform itself as to the risks associated with conducting activities in that area, with the Commonwealth of Australia taking no responsibility for reporting the UXO in the area, identifying or removing UXO from the area, or any loss or damage suffered or incurred by Woodside or any third party arising out of, or directly related to, UXO in the area.
 - (3) DoD's notification requirements including liaison with the Australian Hydrographic Service/Office (AHS/AHO).
- On 1 November 2023, Woodside thanked DoD for its feedback (SI Report, reference 4.2) and confirmed:
 - (1) It had noted the location of activity areas and the presence of exercise areas and restricted airspace.
 - (2) It had noted the advice regarding location, identification, removal or damage to equipment from unexploded ordinances (UXO)s.
 - (3) The Australian Hydrographic Service/Office (AHS/AHO) had been engaged for this activity and is part of the activity notification protocols.
- On 17 February 2025, Woodside emailed DoD a consultation update on this EP (Record of Consultation, reference 3.7). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DoD. Woodside attached an updated consultation information sheet which included a map of the revised EMBA. Woodside also provided an updated defence zone map (Record of Consultation, reference 3.23).
- On 10 March 2025, Woodside sent a reminder email to DoD following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website and attached the defence zone map (Record of Consultation, reference 3.23).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	(1)	(1)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

The location of exercise areas and restricted airspace.	Woodside assessment: Woodside is aware of the exercise area and restricted airspace. Woodside response: Woodside confirmed it had noted DoD's advice on the location of activity areas within an exercise area and restricted airspace.	Woodside has recorded the defence areas, facilities and UXOs overlapping the Operational Area and/or EMBA in Section 4.10.6 of the EP.
(2) The risk of unexploded ordnance (UXO) in the area.	(2) Woodside assessment: Woodside is aware of the risks associated with UXO in the activity area. Woodside response: Woodside confirmed it had noted the DoD's advice with respect to the risk, location, identification, removal or damage from UXO.	(2) Woodside has recorded the defence areas, facilities and UXOs overlapping the Operational Area and/or EMBA in Section 4.10.6 of the EP.
(3) The need for Woodside to continue liaison with AHO and ensure AHO is notified three weeks prior to the actual commencement of activities.	(3) Woodside assessment: Woodside recognises the need to liaise with the AHO. Woodside response: Woodside advised the AHO had been engaged by Woodside for these activities and was included in Woodside's activity notification protocols.	(3) Notifying the AHO provides DoD with information of the PAP through maritime safety information.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DoD for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:		

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DoD on 15 September 2023 and 17 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside sent follow-up emails seeking feedback on the proposed activities.
- Woodside has addressed and responded to DoD over a 28-month period.

Department of Primary Industries and Regional Development (DPIRD)

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside emailed DPIRD advising of the proposed activity (Record of Consultation, reference 1.38) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DPIRD following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 20 February 2025, Woodside emailed DPIRD a consultation update on this EP (Record of Consultation, reference 3.15). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DPIRD. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA, and provided an update on fisheries in the EMBA.
- On 11 March 2025, Woodside sent a reminder email to DPIRD following up on the proposed activity (Record of Consultation, reference 4.3). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted DPIRD, WAFIC, and relevant individual licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	Woodside has assessed the potential for interaction with State managed fisheries issues in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DPIRD for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation information provided to DPIRD on 22 September 2023 and 20 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided DPIRD with the opportunity to provide feedback over a 28-month period.		

Department of Transport (DoT) / now Department of Transport and Major Infrastructure (DTMI)

Summary of information provided and record of consultation for this EP: • On 13 September 2023, Woodside emailed DoT advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • (1) On 02 October 2023, DoT responded to Woodside's email (SI Report, reference 5.1) and asked to be consulted if there was a risk of a spill impacting State waters. • (1) On 04 October 2023, Woodside responded thanking DoT for its email (SI Report, reference 5.2) and confirming DoT would be consulted if there was a risk of a spill impacting State waters from the proposed activities. • On 24 June 2024, Woodside emailed DoT (SI Report, reference 5.3) and provided a copy of the Oil Pollution First Strike Plan (FSP) (Appendix I) for this EP and invited DoT to comment on the plan. • On 2 August 2024, DoT responded thanking Woodside for providing the Pyrenees FSP (SI Report, reference 5.4). DoT advised it had reviewed the plan and:
--

- (2) Noted Appendix F of the FSP made mention of when the CMT Liaison Officer and Deputy Incident Controller would attend the ICC, but there was no mention of the when the rest of the IMT personnel would attend.
- (3) Sought clarification of why there was mention of PPA being the control agency in Dampier Port Limits.
- On 20 August 2024, Woodside responding thanking DoT for its review (SI Report, reference 5.5). Woodside:
 - (2) Proposed an amendment which had been pre-emptively made to the latest draft of the Pyrenees FSP following previous feedback from DoT on a separate EP. The amendment noted that remaining IMT personnel would attend no later than 8am the day. Woodside noted the amendment had been made to the FSP template to ensure future FSPs were correct.
 - (3) Advised that while the Pyrenees Facility and all assessed worst-case scenarios were located outside of Port waters, modelling predicted there was potential for hydrocarbons to contact Port waters of one or more ports in the region in the event of a spill. Woodside proposed to retain this sentence but broaden it from PPA to Port Authorities.
- (2, 3) On 20 September 2024, DoT responded thanking Woodside for the clarification which addressed the comments DoT had raised (SI Report, reference 5.6).
- (2, 3) On 20 September 2024, Woodside responding thanking DoT for confirming the proposed amendments were suitable (SI Report, reference 5.7).
- On 18 February 2025, Woodside emailed DoT a consultation update on this EP (Record of Consultation, reference 3.13). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DoT. Woodside attached an updated consultation information sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to DoT following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.
- On 5 May 2025, Woodside emailed DoT to confirm the First Strike Plan for this activity had been updated as a result of the new modelling (SI Report, reference 5.8). Woodside attached a copy of the revised FSP and invited DoT to review and provide comment. Woodside noted key changes in the revised document included changes to dispersant application, updates to the operational and scientific monitoring arrangements, and minor administration amendments.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) DoT requested to be consulted if there was a risk of a spill impacting State waters.	(1) Woodside assessment: Woodside has incorporated DoT in its hydrocarbon release response plans. Woodside response: Woodside confirmed DoT would be consulted if there was a risk of a spill impacting State waters.	(1) Woodside will consult DoT if there is a spill impacting State water from the proposed activity, as referenced in the OSPRMA (Appendix H).
(2)	(2)	(2)

IMT personnel arrangements in the event of an incident.	Woodside assessment: Woodside has updated the FSP to include full reference to IMT personnel arrangements. Woodside response: Woodside confirmed an amendment had been made to note when all IMT personnel would attend. DoT had no further concerns.	The FSP (Appendix I) has been updated with personnel movements.
(3) Clarification on control agency in Dampier Port Limits.	(3) Woodside assessment: Woodside has broadened the wording in the FSP to reference port authorities. Woodside response: Woodside noted there was potential for hydrocarbons to contact Port waters of one or more ports in the region in the event of a spill. Woodside proposed a revised version of the sentence. DoT had no further concerns.	(3) References to control agencies within port limits have been updated in the FSP (Appendix I).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DoT for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to DoT on 13 September 2023 and 18 February 2025 based on their functions, interests or activities.		

- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to DoT over a 28-month period.

Department of Planning, Lands and Heritage (DPLH)

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed DPLH advising of the proposed activity (Record of Consultation, reference 1.11) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DPLH following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 18 October 2023, DPLH thanked Woodside for the opportunity to provide feedback (SI Report, reference 6.1) and:
 - (1) Confirmed it administered Crown land within the boundaries of the State of Western Australia, including coastal waters out to three nautical miles offshore.
 - (2) Recommended consultation with the Department of Biodiversity, Conservation and Attractions (DBCA), given the proximity of the proposal to Marine Reserve 2.
 - (3) Noted that due to the proposal's location outside of coastal waters, it had no further comment to make.
- On 6 November 2023, Woodside responded thanking DPLH for its feedback (SI Report, reference 6.2). Woodside:
 - (1) Noted DPLH's area of administration.
 - (2) Confirmed it had consulted DBCA for the EP.
 - (3) Acknowledged that, due to the operation's location outside of coastal waters, DPLH had no further comment.
- On 18 February 2025, Woodside emailed DPLH a consultation update on this EP (Record of Consultation, reference 3.12). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DPLH. Woodside attached an updated consultation information sheet which included a map of the revised EMBA, as well as an updated list of relevant State shipwrecks (Record of Consultation, reference 3.24).
- On 11 March 2025, Woodside sent a reminder email to DPLH following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	(1)	(1) Not required.

DPLH confirmed it administered Crown land in WA, including coastal waters out to three nautical miles offshore.	Woodside assessment: Woodside understands DPLH's area of administration. Woodside response: Woodside confirmed it had noted DPLH's area of administration.	
(2) Due to the proximity of the proposal to Marine Reserve 2, DPLH recommended Woodside consult the Department of Biosecurity, Conservation and Attractions (DBCA).	(2) Woodside assessment: Woodside has consulted DBCA for this EP. Woodside response: Woodside confirmed to DPLH that DBCA had also been consulted for this EP.	(2) Woodside has assessed DBCA as a relevant person for this EP (see Appendix F, Table 1) in accordance with regulation 25(1) of the Environment Regulations and consulted it alongside DPLH.
(3) DPLH advised it had no further comment given the operation's location outside coastal waters.	(3) Woodside assessment: Woodside accepted that DPLH had no comment. Woodside response: Woodside acknowledged that DPLH had no further comment on the proposal given the location.	(3) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (See Section 7.6.1 of the EP).	The EP demonstrates that there are no known underwater heritage sites or shipwrecks within the Petroleum Activities Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (Sections 4.9.3 and 6.10). While impacts to underwater heritage sites or shipwrecks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.8. No additional measures or controls are required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DPLH for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DPLH on 13 September 2023 and 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to DPLH over a 28-month period.

Western Australian Museum

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed WA Museum advising of the proposed activity (Record of Consultation, reference 1.10) and provided a Consultation Information Sheet, list of shipwrecks and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 October 2023, WA Museum responded thanking Woodside for the information (SI Report, reference 7.1). WA Museum:
 - (1) Advised that under the Underwater Heritage Act 2018, proponents should, in the first place, contact DCCEEW as the Commonwealth regulator.
 - (2) Directed Woodside to refer to the Commonwealth Government's Underwater Cultural Heritage Guidance for Offshore Developments regarding UCH assessments and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.
 - (3) Recommended that Woodside engages a suitably qualified and experienced maritime archaeologist to undertake a UCH Desktop Assessment to identify Aboriginal and non-Aboriginal UCH within the project area.
 - (4) Recommended that Woodside consult with Traditional Owners where appropriate if the project involves seabed disturbance in water shallower than 130m.
- On 15 November 2023, Woodside responded and thanked WA Museum for its feedback (SI Report, reference 7.2). Woodside:
 - (1) Confirmed it had consulted the Commonwealth regulator, DCCEEW, for this EP.
 - (2) Confirmed it referred to the Commonwealth Government's Underwater Cultural Heritage Guidance for Offshore Developments regarding UCH assessments and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.
 - (3) Noted that as this EP involved ongoing operations, mapping and identification for non-Aboriginal UCH within the project area had previously been completed.

- (3) Advised that Woodside engaged a desktop review by qualified and experienced maritime archaeologists for seabed disturbing activities to a depth of approximately 130m. As the shallowest water depth for the Operational Area of this activity is 180m, Woodside considered the projects area to be beyond the depth contours for potential Aboriginal UCH.
- (4) Confirmed that while this activity did not involve seabed disturbance in water shallower than 130m, Woodside consulted with Traditional Owners in the course of preparing EPs and also engaged in ongoing consultation subsequent to the approval of EPs.
- (4) As per Woodside's ongoing consultation approach, feedback and comments received continued to be assessed and responded to, as required, through the life of an EP.
- On 18 February 2025, Woodside emailed WA Museum a consultation update on this EP (Record of Consultation, reference 3.12). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with WA Museum. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA, and an updated State shipwreck list (Record of Consultation, reference 3.24).
- On 19 February 2025, WA Museum responding thanking Woodside for the email and confirming the information would be forwarded to the appropriate department (SI Report, reference 7.3).
- On 11 March 2025, Woodside sent a reminder email to WA Museum following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website and the updated State shipwreck list (Record of Consultation, reference 3.24).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Woodside should contact DCCEEW as the Commonwealth regulator.	(1) Woodside assessment: Woodside assessed DCCEEW as relevant and has consulted it for this EP. Woodside response: Woodside confirmed it had consulted DCCEEW, as the Commonwealth regulator, for this EP.	(1) Woodside assessed DCCEEW as a relevant person for this EP (see Appendix F, Table 1) in accordance with regulation 25(1) of the Environment Regulations and consulted it as described in Appendix F, Table 2.
(2) Refer to the Commonwealth Government's Underwater Cultural Heritage Guidance for Offshore Developments.	(2) Woodside assessment: Woodside refers to the Commonwealth Government's relevant underwater cultural guidance and draft guidelines. Woodside response: Woodside confirmed it referred to the Commonwealth Government's Underwater Cultural Heritage Guidance for Offshore Developments regarding UCH assessments and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.	(2) Not required.

(3) Engage a maritime archaeologist to undertake a UCH Desktop Assessment.	(3) Woodside assessment: Mapping has been completed for the ongoing operations associated with this EP, and the water depth of the Operational Area is considered too deep for potential Aboriginal UCH. Woodside response: Woodside noted that as this EP involved ongoing operations, mapping had already been completed for non-Aboriginal UCH. As the shallowest water depth for the Operational Area of this activity is 180m, Woodside considered the project area to be beyond the depth contour for potential Aboriginal UCH.	(3) Not required.
(4) Woodside recommended to consult Traditional Owners where appropriate if the project involves seabed disturbance in water shallower than 130m.	(4) Woodside assessment: This activity does not involve seabed disturbance in water shallower than 130m. Woodside response: Woodside confirmed that although this activity did not involve seabed disturbance in water shallower than 130m, Woodside consulted Traditional Owners in the course of preparing EPs and also engaged in ongoing consultation subsequent to the approval of the EP.	(4) Consultation with Traditional Owners is described in Appendix F, Table 2 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	The EP demonstrates that there are no known underwater heritage sites or shipwrecks within the Petroleum Activities Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (Sections 4.9 and 6.10). While impacts to underwater heritage sites or shipwrecks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.8. As part of ongoing consultation engagements as set out in Table 7-7 of the EP, Woodside will notify WAM of any

		unexpected finds of potential Underwater Cultural Heritage under the Unexpected Finds Procedure (as described in Section 7.9 of the EP). No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WA Museum for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to WA Museum on 15 September 2023 and 18 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to WA Museum over a 28-month period.		

Pilbara Ports

Summary of information provided and record of consultation for this EP:		
• On 19 September 2023, Woodside emailed Pilbara Ports advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Pilbara Ports following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Pilbara Ports for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Pilbara Ports on 19 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Pilbara Ports with the opportunity to provide feedback over a 28-month period.		

Kimberley Ports Authority

Summary of information provided and record of consultation for this EP:		
• On 19 September 2023, Woodside emailed Kimberley Ports Authority advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Kimberley Ports Authority following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. • On 27 February 2025, Woodside emailed Kimberley Ports Authority a consultation update on this EP (Record of Consultation, reference 3.21). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Kimberley Ports Authority. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. • On 19 March 2025, Woodside sent a reminder email to Kimberley Ports Authority following up on the proposed activity (Record of Consultation, reference 4.7). Woodside included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kimberley Ports Authority for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Kimberley Ports Authority on 19 September 2023 and 27 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Kimberley Ports Authority with the opportunity to provide feedback over a 28-month period.		

Mid West Ports Authority

Summary of information provided and record of consultation for this EP:		
• On 19 September 2023, Woodside emailed Mid West Ports Authority advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Mid West Ports Authority following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Mid West Ports Authority for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Mid West Ports Authority on 19 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided the Mid West Ports Authority with the opportunity to provide feedback over a 28-month period.		

Fremantle Port Authority

Summary of information provided and record of consultation for this EP:		
• On 21 September 2023, Woodside emailed Fremantle Ports advising of the proposed activity (Record of Consultation, reference 1.36 and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Fremantle Ports following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Fremantle Ports for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Fremantle Ports on 21 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Fremantle Ports with the opportunity to provide feedback over a 28-month period.		

Port of Christmas Island

Summary of information provided and record of consultation for this EP:		
• On 15 December 2023, Woodside emailed Port of Christmas Island advising of the proposed activity (Record of Consultation, reference 1.100) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 9 January 2024, Woodside sent a reminder email to Port of Christmas Island following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Port of Christmas Island for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Port of Christmas Island on 15 December 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Port of Christmas Island with the opportunity to provide feedback over a 25-month period.		

Commonwealth and State Government Departments or Agencies – Environment

Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (marine pests, vessels, aircraft and personnel)

Summary of information provided and record of consultation for this EP: • On 16 October 2023, Woodside emailed DAFF - Biosecurity advising of the proposed activity (Record of Consultation, reference 1.57) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 3 November 2023, Woodside sent a reminder email following up on the proposed activity (Record of Consultation, reference 2.14) and included a link to the Consultation Information Sheet on Woodside's website.

- On 18 February 2025, Woodside emailed DAFF - Biosecurity a consultation update on this EP (Record of Consultation, reference 3.11). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DAFF - Biosecurity. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to DAFF - Biosecurity following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Vessels are required to comply with the Australian Biosecurity Act 2015, specifically the Australian Ballast Water Management Requirements (as defined under the Biosecurity Act 2015) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing IMS. Vessels will be assessed and managed to prevent the introduction of invasive marine species in accordance with Woodside's Invasive Marine Species Management Plan (see Section 6.8.12 of the EP). No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DAFF - Biosecurity for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity on 16 October 2023 and 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside has provided DAFF - Biosecurity with the opportunity to provide feedback over a 25-month period.

Department of Climate Change, Energy, the Environment and Water (DCCEEW)

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed DCCEEW advising of the proposed activity (Record of Consultation, reference 1.9) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 October 2023, DCCEEW responded thanking Woodside for contacting the Department in relation to this EP (SI Report, reference 8.1). DCCEEW:
 - (1) Advised Underwater Cultural Heritage (UCH) may potentially be impacted by planned or unplanned activities or events in relation to offshore petroleum activities.
 - (2) Noted Woodside was already aware of the *Underwater Cultural Heritage Act 2018* (UCH Act 2018) and its requirements based on communication received during previous EP consultations.
 - (3) Provided a summary of legislation and protections, key requirements and obligations, and management considerations and recommendations from the UCH Act 2018.
- On 15 November 2023, Woodside responded and thanked DCCEEW for its email (SI Report, reference 8.2). Woodside:
 - (1) Confirmed mapping and identification for non-Aboriginal UCH with the project area had previously been completed for these ongoing activities.
 - (1) Advised the shallowest water depths in the Operational Area, at 180m, were considered beyond the 130m depth contours for potential Aboriginal UCH.
 - (2) Confirmed it referred to the Department's UCH Guidance for Offshore Developments document and draft Guidelines for Working in the Near and Offshore Environment to Protect Underwater Cultural Heritage.
 - (2) Confirmed it was aware of the legislative requirements of the Underwater Cultural Heritage Act 2018.
 - (3) Noted the Department's summary of legislation and protections, key responsibilities and obligations for proponents, and management recommendations.
 - (3) Confirmed it consulted with communities and Traditional Owners in the course of preparing EPs and engaged in ongoing consultation subsequent to the approval of EPs.
- On 18 February 2025, Woodside emailed DCCEEW a consultation update on this EP (Record of Consultation, reference 3.12). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DCCEEW. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. Woodside also attached updated State and Commonwealth shipwreck lists (Record of Consultation, references 3.24 and 3.25).
- On 11 March 2025, Woodside sent a reminder email to DCCEEW following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) UCH may potentially be impacted by planned or unplanned activities related to offshore petroleum activities.	Woodside assessment: Mapping has already been completed for the ongoing operations associated with this EP, and the water depth of the Operational Area is considered too deep for potential Aboriginal UCH. Woodside response: Woodside noted that as this EP involved ongoing operations, mapping had already been completed for non-Aboriginal UCH. As the shallowest water depth for the Operational Area of this activity is 180m, Woodside considers the project area to be beyond the depth contour for potential Aboriginal UCH.	(1) The EP demonstrates that there are no known underwater heritage sites or shipwrecks within the Petroleum Activities Area and identifies that there are no credible impacts to the values of any underwater heritage or shipwrecks as a result of planned activities (Section 4.9 and Section 6.7). While impacts to underwater heritage sites or shipwrecks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Section 6.8 of this EP.
(2) It noted Woodside is already aware of the Underwater Cultural Heritage Act 2018.	(2) Woodside assessment: Woodside agrees it is aware of the Underwater Cultural Heritage Act 2018. Woodside response: Woodside confirmed it was aware of the legislative requirements of the Underwater Cultural Heritage Act 2018.	(2) Not required.
(3) A summary of legislation and protections, key responsibilities and obligations, and management considerations and recommendations from the UCH Act 2018.	(3) Woodside assessment: Woodside adheres to the Underwater Cultural Heritage Act 2018. Woodside response: Woodside confirmed it had noted the Department's summary of key legislation and protections, responsibilities and obligations, and management considerations and recommendations from the UCH Act 2018.	(3) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.

	received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DCCEEW for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation information provided to DCCEEW on 15 September 2023 and 18 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to DCCEEW over a 28-month period.		

Director of National Parks (DNP)

Summary of information provided and record of consultation for this EP: • On 19 September 2023, Woodside emailed DNP advising of the proposed activity (Record of Consultation, reference 1.30) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to DNP following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. • On 9 November 2023, Woodside sent a second reminder email to DNP following up on the proposed activity (Record of Consultation, reference 2.16) and included a link to the Consultation Information Sheet on Woodside's website. • On 7 December 2023, DNP responded to Woodside and apologised for the delayed response (SI Report, reference 9.1). DNP noted that: – (1) Based on the information provided, the planned activity did not overlap any Australian Marine Parks (AMPs) therefore there were no authorisation requirements from the DNP.

- (2) To assist in the preparation of an EP for petroleum activities, NOPSEMA has worked closely with Parks Australia to develop and publish a guidance note that outlines what titleholders need to consider and evaluate. Titleholders should ensure the EP:
 - Identified and managed all impacts and risks on Australian Marine Park values (including ecosystem values) and had considered all options to avoid or reduce them to as low as reasonably practicable (ALARP).
 - Clearly demonstrated the activity would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
- (3) It did not require further notification of progress made in relation to this activity unless details regarding the activity changed and resulted in an overlap with a marine park or new impact, or for emergency responses.
- On 14 December 2023, Woodside responded thanking DNP for its email (SI Report, reference 9.2) and:
 - (1) Noted DNP's confirmation that planned activities did not overlap any AMPs and there were no authorisation requirements.
 - (2) Confirmed Woodside had taken into consideration the 'Petroleum Activities and Australian Marine Parks' guidance note to ensure the EP:
 - Identified and managed all impacts and risks on AMP values (including ecosystem values) to an acceptable level.
 - Clearly demonstrated that the activities would not be inconsistent with the North-west Marine Parks Network Management Plan 2018.
 - (3) Confirmed Woodside would notify DNP in relation to these activities if details regarding the activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.
- On 17 February 2025, Woodside emailed DNP a consultation update on this EP (Record of Consultation, reference 3.8). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DNP. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. Based on the revised EMBA, Woodside also included an updated list of national parks which had to the potential to be contacted in the event of a spill.
- On 10 March 2025, Woodside sent a reminder email to DNP following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.
- On 20 March 2025, DNP responded thanking Woodside for the opportunity to comment on the additional modelling. DNP:
 - (1) Confirmed planned activities did not overlap any AMPs therefore there were no authorisation requirements from the DNP.
 - (4) Noted the management plans which provided further information on values for Abrolhos, Carnarvon Canyon, Gascoyne, Montebello, Ningaloo and Shark Bay marine parks.
 - (3) Confirmed it did not require further notifications unless changes to the activity resulted in an overlap or new impact to a marine park, or for emergency responses. DNP also included details of the emergency response process.
- On 26 March 2025, Woodside responded thanking DNP for its email (SI Report, reference 4.4). Woodside:
 - (1) Noted DNP's confirmation that planned activities did not overlap any AMPs, therefore there were no authorisation requirements from DNP.
 - (4) Noted the management plans referenced by DNP.
 - (3) Noted DNP did not require any further updates unless changes resulted in an overlap with an AMP or for emergency response.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Planned activities do not overlap any Australian Marine Parks and there are therefore no authorisation requirements from the DNP.	(1) Woodside assessment: Woodside noted there were no authorisation requirements from the DNP. Woodside response: Woodside noted the DNP's confirmation that planned activities did no overlap AMPs and there are no authorisation requirements.	(1) Not required.
(2) Woodside should ensure EPs identify and manage all impacts and risks on AMP values, and clearly demonstrate that activities will not be inconsistent with the management plan.	(2) Woodside assessment: Woodside has considered the 'Petroleum Activities and Australian Marine Parks' guidance note to assess and manage impacts and risks to AMPs. Woodside response: Woodside confirmed it had taken into consideration the 'Petroleum Activities and Marine Parks' guidance note to ensure the EP identified and managed all risks on AMP values, and clearly demonstrated that activities will not be inconsistent with the management plan.	(2) The EP demonstrates how Woodside will identify and manage all impacts and risks on Australian Marine Park values (including ecosystem values) to an ALARP and acceptable level and that the activity is not inconsistent with the management plan (see Section 6.8 of the EP).
(3) It does not require further notification of progress unless details regarding the activity change and result in an overlap with a marine park or new impact, or for emergency responses.	(3) Woodside assessment: Woodside will notify DNP in the event of relevant changes to the activity, or for emergency responses. Woodside response: Woodside confirmed it would notify DNP if activities changed and resulted in an overlap with or new impact to a marine park, or for emergency responses.	(3) Woodside will provide notification of significant change, as appropriate, to relevant persons as referenced in Section 7.15 of the EP. Woodside will ensure DNP is made aware of any incidences within a marine park for the activity, as per the commitment in the Oil Pollution First Strike Plan (Appendix I).
(4) Noted the specific management plans which provide further information on values for marine parks.	(4) Woodside assessment: Woodside refers to the management plans in the EP. Woodside response: Woodside noted DNP's reference to the management plans.	(4) Not required.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DNP for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to DNP on 19 September 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has addressed and responded to DNP over a 28-month period.		

Ningaloo Coast World Heritage Advisory Committee (NCWHAC)

Summary of information provided and record of consultation for this EP: • On 13 September 2023, Woodside emailed NCWHAC advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to NCWHAC following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

- On 9 November 2023, Woodside sent a second reminder email to NCWHAC following up on the proposed activity (Record of Consultation, reference 2.16) and included a link to the Consultation Information Sheet on Woodside's website. No response was received.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NCWHAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to NCWHAC on 13 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent follow-up emails seeking feedback on the proposed activities. - Woodside has provided NCWHAC with the opportunity to provide feedback over a 28-month period.		

Department of Biodiversity, Conservation and Attractions (DBCA)

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed DBCA advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 23 October 2023, DBCA responded thanking Woodside for the email and consultation information (SI Report, reference 10.1). DBCA noted:
 - (1) The operations were in vicinity of reserves managed by DBCA under the CALM act and given the ecological importance of areas potentially affected by a hydrocarbon release from the proposed activities, it was considered important that the baseline values and state of the potentially affected environment were appropriately understood and documented prior to operations commencing.
 - (2) It would like to have confidence that Woodside had established appropriate baseline survey data on the current state of areas supporting important ecological values and any current contamination if present within the area of potential impact of hydrocarbon releases.
 - (3) It undertakes monitoring in marine parks and reserves and published monitoring reports which are available on its website, however Woodside should be aware this monitoring is targeted to inform DBCA's values and objectives and is not necessarily suitable to provide baseline information for oil spill risk assessment and management planning.
 - (4) It recommended Woodside refer to the Department of Climate Change, Energy, the Environment and Water's National Light Pollution Guidelines for Wildlife as a best-practice industry standard for managing potential impacts of light pollution on marine fauna.
 - (5) In the event of a hydrocarbon release, it was requested that Woodside notify DBCA's Pilbara regional office as soon as practicable on (08) 9182 2000.
 - (6) It would not implement an oiled wildlife management response on behalf of a petroleum operator except as part of a whole of government response mandated by regulatory decision makers.
 - (7) Woodside should refer to the Department of Transport's web content regarding marine pollution and the Offshore Petroleum Industry Guidance Note of 2020 titled Marine Oil Pollution: Response and Consultation Arrangements. (7) Woodside refers to DoT's content in the development of its response plans.
- On 31 October 2023, following feedback from the Shire of Shark Bay that the DBCA's Shark Bay office may also wish to provide feedback, Woodside emailed DBCA Shark Bay advising of the proposed activity (Record of Consultation, reference 1.61) and provided a Consultation Information Sheet. Woodside noted in the email that DBCA's main department had already provided feedback on the activity.
- On 15 November 2023, Woodside responded thanking DBCA's main department for its feedback on 23 October 2023 (SI Report, reference 10.2). Woodside:
 - (1, 2) Confirmed it maintained knowledge and an understanding of areas of ecological importance within and adjacent to operational areas.
 - (3) Advised its oil spill scientific monitoring program would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release.
 - (4) Confirmed the lighting associated with the Pyrenees Facility Operations EP and any associated activity vessels was required as a priority for safe operation.
 - (4) Confirmed it had considered DCCEEW's National Light Pollution Guidelines with respect to vessel activities. The impact assessment determined that the impacts of lighting were as low as reasonably practicable (ALARP).
 - (5) Advised it had incorporated the DBCA Pilbara regional office telephone number as part of the notifications listed in the Oil Pollution First Strike Plan, which describes the incident management structure, notification and reporting requirements, the Operational Area, activity specific credible spill scenarios, and the hydrocarbon spill response strategies available.
 - (6) Noted that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.

- On 15 December 2023, Woodside sent a reminder email to the DBCA's Shark Bay office following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.
- On 21 February 2025, Woodside emailed DBCA a consultation update on this EP (Record of Consultation, reference 3.18). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DBCA. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to DBCA following up on the proposed activity (Record of Consultation, reference 4.4). Woodside included a link to the Consultation Information Sheet on Woodside's website.
- On 21 March 2025, DBCA responded thanking Woodside for the information (SI Report, reference 10.3). DBCA:
 - (1) Noted it had previously provided advice in relation to petroleum activities, including Pyrenees, in proximity to important areas such as marine parks and other reserves managed in accordance with the CALM Act.
 - (8) DBCA welcomed any additional information on Woodside's monitoring or oil spill response preparedness.
 - (9) Woodside should be aware that activities requiring access to reserves under the CALM Act or the taking/disturbance of threatened fauna may require additional approvals.
- On 6 May 2025, Woodside responded thanking DBCA for its feedback (SI Report, reference 10.4). Woodside:
 - (1) Noted DBCA's previous comments regarding activities in proximity to petroleum activities, including in relation to Pyrenees operations.
 - (8) Advised that since the initial consultation for DBCA for this EP, Woodside:
 - Was now subscribed to a joint industry operational and scientific monitoring framework which, in the event of a spill, would guide situational awareness and response as well as undertake a suite of science-based monitoring programs to evaluate environmental damage.
 - Advised that as noted in the additional consultation material sent in February 2025, Woodside had undertaken additional spill modelling which had resulted in potential use of dispersant being reassessed to a 'secondary'/'potential' technique. Woodside noted in all cases it would reconsult with relevant authorities and provided criteria for the use of dispersant.
 - (9) Confirmed it was aware that activities requiring access to reserves under the CALM Act or the taking/disturbance of threatened fauna under the BC Act may require additional approvals.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Ecologically important areas including marine parks and coastal conservation reserves in the vicinity of the proposed operations.	(1) Woodside assessment: Woodside is aware of ecologically important areas and has ensured there are no credible impacts from planned activities. Woodside response: Woodside confirmed that areas of ecological importance in the proximity of the EP	(1) The EP demonstrates that the proposed activities are outside the boundaries of a proclaimed State Marine Park and identifies that there are no credible impacts to the values of any State Marine Parks as a result of planned activities (Section 4.9.3 and Section 6.8 of the EP). While

	Operational Areas would not be impacted by planned activities.	impacts to Commonwealth Marine Parks are possible in the event of an unplanned hydrocarbon spill, Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill, as demonstrated in Sections 6.8.2-6.8.8 of the EP.
(2) The establishment of appropriate baseline survey data on the current state of areas.	(2) Woodside assessment: Woodside maintains knowledge of areas of ecological importance adjacent to the Operational Area and assesses the existing environment that may be affected in the EP. Woodside response: Woodside confirmed it maintained knowledge and an understanding of areas of ecological importance adjacent to Operational Areas.	(2) A description of the existing environment that may be affected is provided in Section 4 of this EP.
(3) Encouraging Woodside to acquire the necessary information to implement a Before-After Control Impact (BACI) framework.	(3) Woodside assessment: Woodside has the necessary information to assess environmental impacts in the event of an unplanned hydrocarbon release. Woodside response: Woodside confirmed its oil spill scientific monitoring program (SMP) would provide for a quantitative assessment of the overall environmental impacts in the event of an unplanned hydrocarbon release, or any release event with the potential to contact sensitive environmental receptors.	(3) Review of knowledge relevant to the existing environment is undertaken as described in Section 7.11.2 of this EP.
(4) Recommending Woodside refers to DCCEE's National Light Pollution Guidelines for Wildlife.	(4) Woodside assessment: Woodside referred to DCCEE's National Light Pollution Guidelines for Wildlife in the preparation of this EP. Woodside response: Woodside confirmed it had considered DCCEE's National Light Pollution Guidelines for Wildlife and that lighting associated with this EP was required as a priority for safe operation.	(4) Woodside's impact assessment for light emissions is based on recommendations of the National Light Pollution Guidelines for Wildlife (see Section 6.7.3).
(5)	(5)	(5)

Its 'Incidents and Emergency process, including that Woodside notify DBCA's Pilbara office as soon as practicable in the event of a hydrocarbon release.	Woodside assessment: Woodside has incorporated the DBCA Pilbara number into its First Strike Plan. Woodside response: Woodside noted DBCA's Incidents and Emergency Response and confirmed the DBCA Pilbara number had been incorporated as part of the Oil Pollution First Strike Plan.	DBCA's Pilbara phone number has been incorporated into the Oil Pollution First Strike Plan for this EP (see Appendix I).
(6) The implementation of an oiled wildlife management response.	(6) Woodside assessment: Woodside notes DBCA will not implement an oiled wildlife management response on behalf of an operator. Woodside response: Woodside acknowledged that DBCA would not implement an oiled wildlife management response on behalf of a petroleum operator.	(6) Woodside's Oiled Wildlife Response is included in the Oil Spill Preparedness and Response Mitigation Assessment for this EP (see Appendix H).
(7) Woodside should refer to the DoT's web content on marine pollution, and the guidance note Marine Oil Pollution: Response and Consultation Arrangements.	(7) Woodside assessment: Woodside refers to DoT's marine pollution content in the development of its response plans. Woodside response: Woodside noted DBCA's reference to DoT's marine oil pollution content.	(7) Woodside refers to the specified marine oil pollution content and guidance note in its First Strike Plan for this activity (Appendix I).
(8) Any additional information Woodside can provide related to monitoring or oil spill response preparedness.	(8) Woodside assessment: Additional information has been provided to DBCA based on updates that have taken place since consultation was first undertaken on this EP. Woodside response: Woodside confirmed that since the initial consultation for the EP, Woodside was now subscribed to a joint industry framework. Woodside also provided updates to spill modelling related to the activity.	(8) Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix H of the EP. Woodside's First Strike Plan is in Appendix I of the EP.
(9) Woodside should be aware that activities requiring access to reserves or taking/disturbance of threatened fauna may require additional approvals.	(9) Woodside assessment: Woodside is aware of the CALM Act and BC Act. Woodside response: Woodside confirmed it was aware activities requiring access to reserves or the taking/disturbance of threatened fauna may require additional approvals.	(9) Not required.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DBCA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to DBCA on 13 September 2023 and 21 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to DBCA over a 28-month period.		

Department of Industry, Tourism and Trade (DITT) – Aquatic Biosecurity

Summary of information provided and record of consultation for this EP and the other operations EP: • On 22 September 2023, Woodside emailed DITT – Aquatic Biosecurity, advising of the proposed activity (Record of Consultation, reference 1.100) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 19 January 2024, Woodside sent a reminder email to DITT – Aquatic Biosecurity following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website. • On 17 February 2025, Woodside emailed DITT – Aquatic Biosecurity a consultation update on this EP (Record of Consultation, reference 3.2). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DITT – Aquatic Biosecurity. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
--

- On 10 March 2025, Woodside sent a reminder email to DITT – Aquatic Biosecurity following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DITT – Aquatic Biosecurity for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation information provided to DITT – Aquatic Biosecurity on 22 September 2023 and 17 February 2025 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent follow-up emails seeking feedback on the proposed activities. - Woodside has provided DITT – Aquatic Biosecurity with the opportunity to provide feedback over a 28-month period.		

Department of Environment, Parks and Water Security (DEPWS)

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside emailed DEPWS advising of the proposed activity (Record of Consultation, reference 1.40) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 16 October 2023, Woodside sent a reminder email to DEPWS following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 February 2025, Woodside emailed DEPWS a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DEPWS. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to DEPWS following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DEPWS for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation information provided to DEPWS on 22 September 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided DEPWS with the opportunity to provide feedback over a 28-month period.		

Northern Territory Environment Protection Authority (NTEPA)

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside emailed NTEPA advising of the proposed activity (Record of Consultation, reference 1.40) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to NTEPA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 February 2025, Woodside emailed NTEPA a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with NTEPA. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to NTEPA following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NTEPA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation information provided to NTEPA on 22 September 2023 and 17 February 2025 based on their functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Woodside has provided a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided NTEPA with the opportunity to provide feedback over a 28-month period.

Northern Territory Department of Infrastructure, Planning and Logistics (DIPL) – Marine Safety

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 15 December 2023, Woodside emailed DIPL – Marine Safety advising of the proposed activity (Record of Consultation, reference 1.100) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to DIPL – Marine Safety following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 February 2025, Woodside emailed DIPL – Marine Safety a consultation update on this EP (Record of Consultation, reference 3.2). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DIPL – Marine Safety. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to DIPL – Marine Safety following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DIPL – Marine Safety for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:		
• Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.		

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation information provided to DIPL – Marine Safety on 15 December 2023 and 17 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided DIPL – Marine Safety with the opportunity to provide feedback over a 25-month period.

Commonwealth and State Government Departments or Agencies – Industry

Department of Industry, Science and Resources (DISR)

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed DISR advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to DISR following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 18 February 2025, Woodside emailed DISR a consultation update on this EP (Record of Consultation, reference 3.14). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DISR. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 14 March 2025, Woodside sent a reminder email to DISR following up on the proposed activity (Record of Consultation, reference 4.5). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DISR for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to DISR on 13 September 2023 and 18 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided DISR with the opportunity to provide feedback over a 28-month period.		

Department of Energy, Mines, Industry Regulation and Safety (DEMIRS) / now Department of Mines, Petroleum and Exploration (DMPE)

Summary of information provided and record of consultation for this EP: • On 13 September 2023, Woodside emailed DEMIRS advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to DEMIRS following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. • On 18 February 2025, Woodside emailed DEMIRS a consultation update on this EP (Record of Consultation, reference 3.14). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DEMIRS. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. • On 14 March 2025, Woodside sent a reminder email to DEMIRS following up on the proposed activity (Record of Consultation, reference 4.5). Woodside included a link to the Consultation Information Sheet on Woodside's website.
--

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should further feedback be received, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DEMIRS for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to DEMIRS on 13 September 2023 and 18 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided DEMIRS with the opportunity to provide feedback over a 28-month period.		

Department of Industry, Tourism and Trade (DITT) – Mining and Energy

Summary of information provided and record of consultation for this EP and the other operations EP: • On 22 September 2023, Woodside emailed DITT – Mining and Energy, advising of the proposed activity (Record of Consultation, reference 1.40) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to DITT – Mining and Energy following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. • (1) On 30 October 2023, DITT – Mining and Energy thanked Woodside for its email and advised it had no comment (SI Report, reference 11.1).
--

- (1) On 31 October 2023, Woodside responded thanking DITT – Mining and Energy for its email and noted it had no comment (SI Report, reference 11.2).
- On 15 December 2023, Woodside emailed DITT – Mining and Energy to confirm whether its feedback encompassed the Aquatic Biosecurity arm of DITT (SI Report, reference 11.3).
- On 15 December 2023, DITT – Mining and Energy advised that Woodside should consult Aquatic Biosecurity separately (SI Report, reference 11.4).
- On 15 December 2023, Woodside thanked DITT – Mining and Energy for the advice and confirmed it would contact the Aquatic Biosecurity division (SI Report, reference 11.5).
- On 17 February 2025, Woodside emailed DITT – Mining and Energy a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with DITT- Mining and Energy. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to DITT – Mining and Energy following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) DITT – Mining and Energy advised it had no comment.	(1) Woodside assessment: Woodside accepts DITT – Mining and Energy has no comment. Woodside response: Woodside noted DITT – Mining and Energy had no comment on the proposed activity.	(1) Not required.
While feedback has been received, there were no objections or comments.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DITT – Mining and Energy for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.		

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DITT – Mining and Energy on 22 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided DITT – Mining and Energy with the opportunity to provide feedback over a 28-month period.

Commonwealth Commercial fisheries and representative bodies

North West Slope and Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside emailed North West Slope and Trawl Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.38) and provided a Consultation Information Sheet.
- On 18 October 2023, Woodside sent a reminder email to North West Slope and Trawl Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF – Fisheries, CFA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth-managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under Regulation 25(1) and consultation with North West Slope and Trawl Fishery for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to North West Slope and Trawl Fishery on 22 September 2023 based on their functions, interests or activities.
- Woodside has sent a follow-up email seeking feedback on the proposed activity.
- Woodside has provided the North West Slope and Trawl Fishery with the opportunity to provide feedback over a 28-month period.

Western Deepwater Trawl Fishery

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside emailed Western Deepwater Trawl Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet.
- On 18 October 2023, Woodside sent a reminder email to Western Deepwater Trawl Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA, and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth-managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under Regulation 25(1) and consultation with Western Deepwater Trawl Fishery for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Western Deepwater Trawl Fishery on 22 September 2023 based on their functions, interests or activities.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided the Western Deepwater Trawl Fishery with the opportunity to provide feedback over a 28-month period.

Western Tuna and Billfish Fishery

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside emailed Western Tuna and Billfish Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet.
- On 18 October 2023, Woodside sent a reminder email to Western Tuna and Billfish Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website.
- **(1)** On 19 October 2023, a licence holder from the Western Tuna and Billfish Fishery responded asking to be removed from Woodside's mailing list and for Woodside to consult with Tuna Australia (SI Report, reference 12.1).
- **(1)** On 2 November 2023, Woodside responded thanking the licence holder for their email and confirming they would be removed from Woodside's mailing list and correspondence would be directed to Tuna Australia (SI Report, reference 12.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) A licence holder from the Western Tuna and Billfish Fishery asked to be removed from Woodside's mailing list and for Woodside to consult with Tuna Australia.	(1) Woodside assessment: Woodside accepts that the consultation process is voluntary.	(1) Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside confirmed it had removed the licence holder from mailing lists and correspondence would be directed to Tuna Australia.	
While feedback has been received, there were no objections or claims.	Woodside has consulted Tuna Australia, AFMA, DAFF - Fisheries, CFA, ASBTIA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under Regulation 25(1) and consultation with Western Tuna and Billfish Fishery for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Western Tuna and Billfish Fishery on 22 September 2023 based on their functions, interests or activities. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Western Tuna and Billfish Fishery with the opportunity to provide feedback over a 28-month period.		

Northern Prawn Fishery

Page 151 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 22 September 2023, Woodside emailed Northern Prawn Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Northern Prawn Fishery following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website.
- (1) On 18 October 2023, a licence holder from the Northern Prawn Fishery responded asking to be removed from Woodside's mailing list (SI Report, reference 69.1).
- (1) On 24 November 2023, Woodside responded thanking the licence holder for their email and confirming they had been removed from the mailing list (SI Report, reference 69.2).
- On 17 February 2025, Woodside emailed Northern Prawn Fishery licence holders a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Northern Prawn Fishery. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to Northern Prawn Fishery licence holders following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) A licence holder from Northern Prawn Fishery asked to be removed from Woodside's mailing list.	(1) Woodside assessment: Woodside respects that the consultation process is voluntary. Woodside response: Woodside confirmed it had removed the licence holder from the mailing list.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has consulted AFMA, Northern Prawn Fishery Industry Pty Ltd, DAFF - Fisheries, CFA, and individual fishery licence holders. Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries issues in Section 4.10.1 of this EP. No additional measures or controls are required.

	accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under Regulation 25(1) and consultation with Northern Prawn Fishery for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Northern Prawn Fishery on 16 October 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided Northern Prawn Fishery with the opportunity to provide feedback over a 28-month period.		

Christmas Island Line Fishery

Summary of information provided and record of consultation for this EP:		
• On 22 September 2023, Woodside emailed/sent a letter to Christmas Island Line Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.37 and 1.43) and provided a Consultation Information Sheet. • On 16 and 18 October 2023, Woodside sent a reminder letter/email to Christmas Island Line Fishery following up on the proposed activity (Record of Consultation, reference 2.3 and 2.17) and included a link/QR code to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA, DITRDCA and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under Regulation 25(1) and consultation with Christmas Island Line Fishery for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Christmas Island Line Fishery on 22 September 2023 based on their functions, interests or activities. • Woodside has sent a follow-up email/letter seeking feedback on the proposed activities. • Woodside has provided Christmas Island Line Fishery with the opportunity to provide feedback over a 28-month period.		

Commonwealth Fisheries Association (CFA)

Summary of information provided and record of consultation for this EP: • On 22 September 2023, Woodside emailed CFA advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 18 October 2023, Woodside sent a reminder email to CFA following up on the proposed activity (Record of Consultation, reference 2.3) and included a link to the Consultation Information Sheet on Woodside's website. • On 17 February 2025, Woodside emailed CFA a consultation update on this EP (Record of Consultation, reference 3.6). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with CFA. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. • On 10 March 2025, Woodside sent a reminder email to CFA following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA and DAFF – Fisheries and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with CFA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to CFA on 22 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided CFA with the opportunity to provide feedback over a 28-month period.		

Tuna Australia

Historical Engagement:

- Between 15 March 2023 and 4 September 2023, in relation to other Woodside EPs, Tuna Australia:
 - Provided its position statement for engaging on EPs and project proposals.

- Advised that due to increased activity of proponents seeking to access offshore areas for various maritime developments, Tuna Australia could no longer coordinate consultation with offshore energy activities on behalf of its members without a services agreement in place.
- Advised it did not agree with proposed amendments made by Woodside to a draft services agreement.

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside emailed Tuna Australia advising of the proposed activity (Record of Consultation, reference 1.37) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 31 October 2023, Woodside sent a reminder email to Tuna Australia following up on the proposed activity (Record of Consultation, reference 2.11) and included a link to the Consultation Information Sheet on Woodside's website.
- On 6 November 2023, Tuna Australia emailed Woodside regarding this EP (SI Report, reference 13.1) and stated:
 - (1) It could assist to help Woodside reach concession owners and licence holders of potentially impacted fisheries to meet regulatory consultation requirements.
 - (2) Proponents must address planned fishing effort and development of the fishery, and focussing on historical fishing effort as the basis for validating the EP was a flawed assessment.
 - (3) Concern about recent consultation by energy companies using outdated mailing lists sourced from AFMA or elsewhere, while Tuna Australia's database was up to date and actively managed.
 - (2) It assisted energy companies to meet genuine and comprehensive consultation and reporting requirements. Its view was that consultation not conducted through its services was highly likely to be incomplete. Tuna Australia could not support this EP as it believed Woodside had fallen short of genuine and comprehensive consultation.
 - (4) Woodside should advise if it wished to progress with a services agreement.
- On 22 November 2023, Woodside responded thanking Tuna Australia for its email (SI Report, reference 13.2) and advised:
 - (1) Offshore proponents must consult relevant persons under the Commonwealth Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009.
 - (1) Woodside's consultation process identified relevant persons and provided them sufficient information and a reasonable period to make an informed assessment of the possible consequences of the proposed activity on their functions, interests or activities.
 - (3) Woodside obtained contact details of individual Commonwealth fishing statutory fishing rights and fishing permit holders so that consultation was consistent with the Environment Regulations. As noted on its website, AFMA's expectation was that petroleum operators consulted with fishing operators about all activities and projects which may affect day-to-day fishing activities.
 - (1, 3) In addition to consulting individual licence holders, Woodside consulted relevant fishing industry associations and representative bodies such as Tuna Australia and Commonwealth Fisheries Association, and referred to the AFMA website to help inform which associations and bodies were relevant.
 - (1, 2, 3) While the management area for the Western Tuna and Billfish Fishery overlapped the Operational Area, based on AFMA data, no recent fishing effort had occurred within the Operational Area for at least the past 10 years. Despite this, Woodside chose to consult licence holders in this fishery.

- (4) The Offshore Environment Regulations did not require entry into services agreements in order to meet EP consultation requirements. Woodside has met its consultation obligations under the Environment Regulations and given Tuna Australia sufficient time and information.
- On 5 December 2023, Tuna Australia responded and thanked Woodside for its advice (SI Report, reference 13.3) and noted:
 - (2) It was concerned Woodside was electing to cherry-pick on how to meet statutory requirements, for example by focussing on fishing effort and disregarding important information in the OPGGS Act 2006 and Regulations.
 - (5) To progress consultation, it wished to pause the process while it took advice.
 - (1) It could assist Woodside to develop an EP that was improved and met regulatory requirements.
- On 20 December 2023, Woodside responded and thanked Tuna Australia for its response. (SI Report, reference 13.4). Woodside advised:
 - (2) Woodside met its legislative and regulatory requirements in the development and implementation of an EP.
 - (5) Woodside would continue to consult Tuna Australia and individual Commonwealth licence holders for proposed activities where relevant and as appropriate.
 - (1) Consultation was voluntary, and Tuna Australia could decide whether it wished to engage in the process or not.
- On 21 December 2023, Tuna Australia responded and thanked Woodside for its response (SI Report, reference 13.5). It noted:
 - (1, 4) The OPGGS Act 2006 clearly stated that when developing an EP, the proponent must demonstrate they could “carry on those activities in a manner that does not interfere with navigation, fishing or the conservation of the resources of the sea and seabed”. It had provided its industry position statement and, it was prepared to provide services to ensure the EP met legislative and regulatory requirements. Tuna Australia would ensure thorough and comprehensive consultation on the proposed EP and without this advice, any EP submitted to NOPSEMA would be incomplete, inadequate and would not meet regulatory requirements.
 - (1, 4) Tuna Australia would welcome comment from NOPSEMA on the content required in an EP to meet regulatory requirements when considering potential impacts on Australian tuna fisheries, especially in the context of knowing that it could comprehensively provide this information through a services agreement and Woodside has chosen not to engage.
 - (4) Tuna Australia was breaking for the festive season but urged Woodside to consider whether it would like to enter a services agreement and to advise accordingly in the week of 8 January 2024.

Ongoing engagement:

- Between 5 February 2024 and 17 July 2024, ongoing discussions between Woodside and Tuna Australia regarding other EPs included:
 - Concern from Tuna Australia regarding the provision and frequency of industry data from AFMA.
 - Reiteration from Woodside that it was willing to have a working relationship with Tuna Australia and that it had previously engaged on a draft agreement, however Tuna Australia had not been willing to make amendments to the draft agreement.
 - Tuna Australia providing an amended draft services agreement.
 - A meeting during which Woodside and Tuna Australia discussed fishing effort, Woodside’s methodology for determining relevancy, and an agreement that both parties were committed to genuine consultation.

– Woodside providing activities when a service agreement might be used due to the potential impact on the Western Tuna and Billfish Fishery. – Woodside confirming it would continue to consult Tuna Australia where historical catch effort overlapped the EMBA, but this wouldn't be under a services agreement. Services agreement would be deployed where there was historical catch effort in the Operational Area. – Tuna Australia advising it did not agree with the proposed way forward for managing consultation as its view was that catch history was only one factor that must be considered when planning activities, and that it wished to meet with Woodside again to discuss. – Woodside agreeing to reconvene with Tuna Australia and suggesting dates for the meeting.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Tuna Australia could provide comprehensive consultation for EPs and without its support, consultation was likely to be incomplete.	(1) Woodside assessment: Woodside disagrees that consultation would be incomplete without Tuna Australia support. Woodside has developed a methodology for identifying relevant persons, in accordance with regulation 25 of the Environment Regulations that is consistent with NOPSEMA's guideline. Woodside response: Woodside advised Tuna Australia that Woodside's consultation process identified relevant persons and provided them with sufficient information and a reasonable period in which to provide feedback.	(1) Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP and identified relevant persons in Appendix F, Table 1 of the EP in accordance with regulation 25 of the Environment Regulations.
(2) Noted that focusing on historical fishing effort was a flawed assessment for relevancy.	(2) Woodside assessment: Woodside disagrees that considering historical fishing effort, sourced from government agencies, in determining relevant fisheries is flawed. This information helps to determine where a fisher could typically fish and that this location could be impacted by a proposed activity. Woodside response: Woodside determined and advised that although the Western Tuna and Billfish Fishery management area overlapped the Operational Area, there had been no fishing effort in the Operational Area for at least the past 10 years. Despite this, Woodside chose to consult licence holders in the fishery.	(2) Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP and identified relevant persons in Appendix F, Table 1 of the EP in accordance with regulation 25 of the Environment Regulations.

(3) Concern about energy companies sourcing mailing lists from AFMA or elsewhere.	(3) Woodside assessment: Woodside considers purchasing contact details from a relevant Government agency is an appropriate means in which to contact relevant licence holders. Woodside response: Woodside obtains contact details of Commonwealth statutory fishing rights and fishing permit holders so that consultation is consistent with the Regulations, as per the expectation from AFMA that petroleum operators consulted with fishing operators about all activities and projects which may affect day-to-day fishing activities. In addition to consulting individual licence holders, Woodside consulted relevant fishing industry associations and representative bodies such as Tuna Australia and Commonwealth Fisheries Association, and referred to the AFMA website to help inform which associations and bodies were relevant.	(3) Not required.
(4) Recommended entering into a services agreement to support consultation.	(4) Woodside assessment: The Offshore Environment Regulations do not require the entry into a fee-for-service agreement in order to meet EP consultation requirements. Given Tuna Australia was not willing to make any amendments to the agreement to address Woodside's concerns, Woodside has not agreed to enter into an agreement. Outside of a fee-for-service agreement, Woodside is willing to explore options on how best to consult Tuna Australia and licence holders. Woodside response: Woodside advised that consultation regulations did not require entry into a services agreement in order to engage in consultation or for an EP to be complete. Woodside confirmed it respects that, for a relevant person, consultation was voluntary. Woodside advised Tuna Australia the level of feedback provided by an organisation, if any, was at the person or organisation's discretion, and Woodside was open to suggestions from	(4) Consultation with Tuna Australia is complete as reflected in Table 2 of Appendix F.

	Tuna Australia on ways to improve efficiency and simplicity for feedback.	
(5) Wished to pause discussions on the consultation process while it took advice.	(5) Woodside assessment: Woodside has provided sufficient information and a reasonable period to provide information on potential impacts to its interests, functions or activities. Woodside will continue to consult Tuna Australia when relevant. Woodside response: Woodside noted Tuna Australia's wish to pause the consultation process and advised it would continue to consult Tuna Australia and Commonwealth licence holders for proposed activities where relevant and as appropriate, and that consultation was voluntary, and Tuna Australia could decide whether it wished to engage in the process or not.	(5) Not required.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Tuna Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River		

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Tuna Australia on 22 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Tuna Australia over a 28-month period.

Pearl Producers Association

Summary of information provided and record of consultation for this EP:

- On 26 September 2023, Woodside emailed Pearl Producers Association advising of the proposed activity (Record of Consultation, reference 1.45) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Pearl Producers Association following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF - Fisheries, and CFA. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Pearl Producers Association for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo,

Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Pearl Producers Association on 26 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Pearl Producers Association with the opportunity to provide feedback over a 28-month period.

Northern Prawn Fishery Industry Pty Ltd

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, Woodside emailed Northern Prawn Fishery Industry Pty Ltd advising of the proposed activity (Record of Consultation, reference 1.58) and provided a Consultation Information Sheet.
- On 2 November 2023, Woodside sent a reminder email to Northern Prawn Fishery Industry Pty Ltd following up on the proposed activity (Record of Consultation, reference 2.13) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 February 2025, Woodside emailed Northern Prawn Fishery Industry Pty Ltd a consultation update on this EP (Record of Consultation, reference 3.4). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Northern Prawn Fishery Industry Pty Ltd. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to Northern Prawn Fishery Industry Pty Ltd following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA and individual Northern Prawn Fishery licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries issues in Section 4.10.1 of this EP. No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under Regulation 25(1) and consultation with Northern Prawn Fishery Industry Pty Ltd for the purpose of 25(1) is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Northern Prawn Fishery Industry Pty Ltd on 18 October 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided Northern Prawn Fishery Industry Pty Ltd with the opportunity to provide feedback over a 28-month period.		

State Commercial fisheries and representative bodies

Western Australian Fishing Industry Council (WAFIC)

Summary of information provided and record of consultation for this EP: • On 21 September 2023, Woodside emailed WAFIC advising of the proposed activity (Record of Consultation, reference 1.31) and provided an overview and Consultation Information Sheet for distribution to licence holders in six State fisheries relevant to the Operational Area of the proposed activity. • On 21 September 2023, WAFIC responded thanking Woodside (SI Report, reference 14.1) for its email and: – (1) Advised it would send out the consultation material under its agreement with Woodside. – (2) Asked Woodside to confirm the relevance of the Marine Aquarium Fish Managed Fishery and Specimen Shell Managed Fishery, on the basis that the hand collection and diving methods used in this fishery were not applicable at the water depths of the proposed activity. • On 21 September 2023, Woodside responded thanking WAFIC for its email (SI Report, reference 14.2). Woodside also: – (2) Confirmed that on the basis of the activity water depths, it would remove Marine Aquarium Fish Managed Fishery and Specimen Shell Managed Fishery from relevant fisheries for this activity.

- (1) On 21 September 2023, Woodside emailed WAFIC with an amendment to the information intended for distribution to the relevant fisheries, including an additional line regarding notification of activities (SI Report, reference 14.3).
- (1) On 21 September 2023, WAFIC emailed Woodside (SI Report, reference 14.4) confirming it had sent the amended version of the consultation information to licence holders in the four fisheries relevant to the Operational Area for this EP: Mackerel Managed Fishery (Area 2), Pilbara Line Fishery, Pilbara Trap Managed Fishery, and West Coast Deep Sea Crustacean Managed Fishery.
- On 18 October 2023, Woodside sent a reminder email to WAFIC following up on the proposed activity (SI Report, reference 14.5). Woodside noted that it understood WAFIC may not consider it necessary to send a reminder email to individual licence holders but provided a link to the Consultation Information Sheet on Woodside's website for WAFIC's information and for distribution to licence holders at WAFIC's discretion.
- On 19 October 2023, WAFIC thanked Woodside for its email (SI Report, reference 14.6) and confirmed that:
 - (3) As per WAFIC's protocol to avoid consultation fatigue, it did not consider it necessary to issue a consultation reminder to commercial licence holders.
 - (4) WAFIC would take time to review the consultation material ahead of the closure of the consultation period.
- On 31 October 2023, Woodside sent an email (SI Report, reference 14.7) to WAFIC in which Woodside thanked WAFIC for:
 - (3) Its advice that consultation reminders were not necessary for individual licence holders.
 - (4) Its intention to review the consultation material.
- On 31 October 2023, WAFIC emailed Woodside (SI Report, reference 14.8). WAFIC:
 - (1) Confirmed it had not received any feedback or concerns from licence holders regarding this EP.
 - (5) Confirmed that given the activity in this EP was standard business for Woodside, it had no further comment at this stage.
 - (6) Confirmed and agreed that Woodside would send all notifications regarding activities to WAFIC.
 - Requested to be consulted on any future development activities considered for the other operations EP.
- On 1 November 2023, Woodside responded thanking WAFIC for its email (SI Report, reference 14.9) and:
 - (5) Noted there was no feedback or concerns from licence holders and no further comment from WAFIC.
 - (6) Noted that as this and another EP included ongoing operations no activity notifications were expected, but confirmed it would provide WAFIC with start and end activity notifications for the associated drilling, construction and installation activities related to the other operations EP.
- On 6 November 2023, WAFIC responded thanking Woodside for its email (SI Report, reference 14.10).
- On 20 February 2025, Woodside emailed WAFIC a consultation update on this EP (Record of Consultation, reference 3.16). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with WAFIC. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. Woodside noted there were no changes to the State fisheries relevant to the Operational Area and asked WAFIC to advise if it considered further consultation was required with fishery licence holders.
- On 11 March 2025, Woodside sent a reminder email to WAFIC following up on the proposed activity (Record of Consultation, reference 4.3). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) WAFIC advised it would send consultation material to relevant licence holders, and, following the consultation period, confirmed it received no feedback or concerns from licence holders.	(1) Woodside assessment: Woodside notes relevant licence holders received the consultation information via WAFIC and accepts there was no feedback or concerns raised. Woodside response: Woodside thanked WAFIC for distributing the consultation information to relevant licence holders and for confirming no feedback or concerns were raised by the licence holders.	(1) Not required.
(2) Asked Woodside to clarify the relevance to the Operational Area of two fisheries based on the collection and diving methods.	(2) Woodside assessment: Woodside assessed WAFIC's feedback regarding the relevancy of two fisheries and based on WAFIC's expertise on water depths and the methods of hand collection and diving, determined it would not consider the Marine Aquarium and Specimen Shell fisheries relevant to the Operational Area for this EP. Woodside response: Woodside confirmed it would not consider the Marine Aquarium and Specimen Shell fisheries as relevant to this EP, based on WAFIC's advice.	(2) Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has updated its assessment of relevancy for consultation purposes (see Appendix F, Table 1) to reflect WAFIC's advice and consultation guidelines.
(3) Advised it did not consider it necessary to send reminder emails to licence holders for this activity.	(3) Woodside assessment: Woodside accepts WAFIC's advice that reminder emails are not necessary for individual licence holders. Woodside response: Woodside acknowledged WAFIC's advice that it was not necessary to send reminder emails to individual licence holders.	(3) Not required.
(4) Confirmed it would take time to review the consultation material before the end of the consultation period.	(4) Woodside assessment: Woodside noted WAFIC would review the consultation material. Woodside response: Woodside thanked WAFIC for reviewing the consultation material.	(4) Not required.

(5) Noted it had no further comment on the EP at this stage.	(5) Woodside assessment: Woodside accepts that WAFIC has no comment on the EP at this time. Woodside response: Woodside noted WAFIC had reviewed the consultation material and did not have further comment on the EP at this stage.	(4) Not required.
(6) Confirmed Woodside should send all notifications regarding activities to WAFIC.	(6) Woodside assessment: As this EP involves ongoing operations, no activity notifications are expected. Woodside response: Woodside confirmed to WAFIC that there were not expected to be activity notifications for the ongoing operations involved with this EP.	(6) Not required.
While feedback has been received, there were no objections or claims.	Woodside has consulted DPIRD, WAFIC and individual licence holders (via WAFIC). Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WAFIC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times,		

Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to WAFIC on 20 September 2023 and 20 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has addressed and responded to WAFIC over a 28-month period.

Mackerel Managed Fishery (Area 2)

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed Mackerel Managed Fishery (Area 2) individual licence holders advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required to the Mackerel Managed Fishery (Area 2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under Regulation 25 and consultation with Mackerel Managed Fishery (Area 2) for the purpose of 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Mackerel Managed Fishery (Area 2), via WAFIC, on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided the Mackerel Managed Fishery (Area 2) with the opportunity to provide feedback over a 25-month period.

West Coast Deep Sea Crustacean Managed Fishery

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed West Coast Deep Sea Crustacean Managed Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required to the West Coast Deep Sea Crustacean Managed Fishery.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 and consultation with West Coast Deep Sea Crustacean Managed Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information provided to West Coast Deep Sea Crustacean Managed Fishery, via WAFIC, on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided the West Coast Deep Sea Crustacean Managed Fishery with the opportunity to provide feedback over a 28-month period.

Pilbara Line Fishery (Condition)

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed Pilbara Line Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required to the Pilbara Line Fishery (Condition).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 and consultation with Pilbara Line Fishery (Condition) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Pilbara Line Fishery (Condition), via WAFIC, on 21 September 2023 based on their functions, interests or activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Woodside has provided Pilbara Line Fishery (Condition) with the opportunity to provide feedback over a 28-month period.

Pilbara Trap Managed Fishery

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, WAFIC, on behalf of Woodside, emailed Pilbara Trap Managed Fishery individual licence holders advising of the proposed activity (Record of Consultation, reference 1.32) and provided a Consultation Information Sheet.
- As per advice from WAFIC regarding its consultation guidelines, no follow-up email was required to the Pilbara Trap Managed Fishery.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received.	Woodside has consulted DPIRD, WAFIC and individual relevant licence holders (via WAFIC). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 and consultation with Pilbara Trap Managed Fishery for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Pilbara Trap Managed Fishery, via WAFIC, on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided Pilbara Trap Managed Fishery with the opportunity to provide feedback over a 28-month period.

Western Rock Lobster Council

Summary of information provided and record of consultation for this EP: - On 30 October 2023, Woodside emailed Western Rock Lobster Council advising of the proposed activity (Record of Consultation, reference 1.59) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 13 November 2023, Woodside sent a reminder email to Western Rock Lobster Council following up on the proposed activity (Record of Consultation 2.15) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted DPIRD and WAFIC. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Western Rock Lobster Council for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to Western Rock Lobster Council on 30 October 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided Western Rock Lobster Council with the opportunity to provide feedback over a 26-month period.		

Aquaculture Council of Western Australia (ACWA)

Summary of information provided and record of consultation for this EP:

- On 19 February 2025, Woodside emailed ACWA advising of the proposed activity (Record of Consultation, reference 1.110) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to ACWA following up on the proposed activity (Record of Consultation, reference 2.21) and included a link to the Consultation Information Sheet on Woodside's website.
- On 10 March 2025, ACWA responded (SI Report, reference 80.1). ACWA:
 - (1) Advised the activities were significantly distant from aquaculture enterprises to result in direct impacts.
- On 21 March 2025, Woodside responded thanking ACWA for its feedback (SI Report, reference 80.2). Woodside:
 - (1) Noted that ACWA considered the activities to be a significant distance from aquaculture enterprises and that direct impacts were therefore unlikely.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Activities significantly distant to aquaculture sites.	(1) Woodside assessment: Woodside notes ACWA considers direct impacts on aquaculture sites to unlikely based on the distance from activities. Woodside response: Woodside thanked ACWA for its feedback and noted ACWA's comments on the distance between the activities and aquaculture sites.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with State managed commercial fisheries in Section 4.10.1 of this EP. No additional measures or controls are required.

Outcomes of consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with ACWA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation information provided to ACWA on 19 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to ACWA over an 11-month period.

Recreational marine users and representative bodies

Exmouth Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Exmouth Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Exmouth Recreational Marine Users following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Exmouth Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Exmouth Recreational Marine Users on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Exmouth Recreational Marine Users with the opportunity to provide feedback over a 28-month period.		

Gascoyne Recreational Marine Users

Summary of information provided and record of consultation for this EP:		
• On 22 September 2023, Woodside sent a letter to Gascoyne Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and referred to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder letter to Gascoyne Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 2.5) and included a QR code link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users.	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Gascoyne Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Gascoyne Recreational Marine Users on 22 September 2023 based on their functions, interests or activities. • Woodside has referred Gascoyne Recreational Marine Users to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up letter seeking feedback on the proposed activities. • Woodside has provided Gascoyne Recreational Marine Users with the opportunity to provide feedback over a 28-month period.		

Pilbara/Kimberley Recreational Marine Users

Summary of information provided and record of consultation for this EP:		
• On 22 September 2023, Woodside sent a letter to Pilbara/Kimberley Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and referred to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder letter to Pilbara/Kimberley Recreational Marine Users following up on the proposed activity (Record of Consultation, reference 2.5) and included a QR code link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Pilbara/Kimberley Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Pilbara/Kimberley Recreational Marine Users on 22 September 2023 based on their functions, interests or activities. • Woodside has referred Pilbara/Kimberley Recreational Marine Users to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up letter seeking feedback on the proposed activities. • Woodside has provided Pilbara/Kimberley Recreational Marine Users with the opportunity to provide feedback over a 28-month period.		

Lombadina Aboriginal Corporation (LAC)

LAC have been identified as a relevant person through their functions, interests or activities as a Pilbara/Kimberley Recreational Marine User, as identified in Table 1. LAC is not a Prescribed Body Corporate under the *Native Title Act 1993 (Cth)* and associated regulations.

Historical engagement: • On 25 July 2023, Woodside emailed LAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information (SI Report, reference 59.1). This email also reiterated Woodside's request that LAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult. No response was received to this email.
--

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside emailed LAC advising of the proposed activity (Record of Consultation, reference 1.97) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that LAC and its members may have within the EMBA, information on how LAC would like to engage, and requested that LAC provide information to other individuals as required.
- On 10 October 2023, Woodside met with LAC in person for a consultation meeting on this activity (SI Report, reference 59.2). Woodside explained the activity, noting that it is a 5-year submission review and had been operating since 2008 and was located near Exmouth. Woodside described the EMBA and how the EMBA is created. Woodside talked through the NOPSEMA guidelines.
 - (1) LAC asked a question about how Woodside drilled into the ocean floor. Woodside said they would provide an animation drilling video that demonstrated the process.
 - Woodside asked LAC if there were any cultural values that they would like Woodside to know about noting that there is the option to require information to be kept confidential. Woodside asked whether LAC had any further questions or concerns in relation to this EP. LAC responded no to both queries.
 - Woodside said it was able to fund future meetings.
- (1) On 17 October 2023, Woodside emailed LAC thanking them for the 10 October 2023 meeting and reaffirmed that feedback on EPs can be provided over the life of the EP and does not need to occur before the activity commences (SI Report, reference 59.3). Woodside also provided a drilling video as requested by LAC at the meeting. No response has been received.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) LAC requested more information about how Woodside drills into the ocean floor.	(1) Woodside assessment: Woodside acknowledged LAC's request for more information about drilling. Woodside response: Woodside responded to LAC's requests for information by explaining the process and providing a video. No further information was requested on this topic.	(1) Existing controls considered sufficient, as described in Section 6 and 7.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will	Based on the engagement to date, no additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with LAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on LAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to LAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Asked for the consultation and information sheets to be distributed to members and individuals. - Woodside has provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". - Advised that LAC's can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023). - Woodside commenced consultation with LAC in October 2023. - Woodside has addressed and responded to LAC over 26 months, demonstrating a "reasonable" period of consultation. Woodside asked LAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP). Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on LAC'S functions, interests or activities.		

Karratha Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Karratha Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Karratha Recreational Marine Users following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Karratha Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Karratha Recreational Marine Users on 14 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email to Karratha Recreational Marine Users seeking feedback on the proposed activities.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Woodside has provided the Karratha Recreational Marine Users with the opportunity to provide feedback over a 28-month period.

West Coast Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside sent a letter to West Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and referred to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to West Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 2.5) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with West Coast Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Consultation Information provided to West Coast Recreational Marine Users on 22 September 2023 based on their functions, interests or activities.
- Woodside has referred West Coast Recreational Marine Users to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up letter seeking feedback on the proposed activities.
- Woodside has provided West Coast Recreational Marine Users with the opportunity to provide feedback over a 28-month period.

South Coast Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 22 September 2023, Woodside sent a letter to South Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.41) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to South Coast Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 2.5).
- On 4 October 2023, a fishing charter operator consulted as part of the South Coast Recreational Marine Users emailed Woodside (SI Report, reference 15.1) and commented they were vehemently against the proposal of FPSOs in the Carnarvon Basin due to the risks to marine and shore environments which, in their opinion, outweighed the projects. Their concerns regarded:
 - (1) The potential of a crude oil spill and/or the release of hydrocarbons and the effect on marine life, Ningaloo Reef, and coastline.
 - (2) The impact on shoreline bird life and marine mammals such as whales.
 - The drilling of two new wells associated with another EP (which was consulted in conjunction with this EP), and the impact on the World Heritage-listed reef and coast.
 - Seismic blasting carried out to search for the new wells associated with the other EP, and the impact on the natural environment including fauna.
- On 12 October 2023, Woodside emailed the fishing charter operator thanking them for their email, and asked to confirm they were referencing activities relating to this EP, and which stakeholder group they were part of (SI Report, reference 15.2).
- On 12 October 2023, the fishing charter operator responded to Woodside confirming their comments were in relation to this EP and that they were part of the coastal tourism stakeholder group (SI Report, reference 15.3).
- On 27 November 2023, Woodside responded (SI Report, reference 15.4) and advised:
 - (1) In accordance with Woodside's risk assessment for this EP, a worst-case loss of well containment has been defined as a 'highly unlikely' event. In the highly unlikely event of a hydrocarbon release, Woodside has a well-developed oil response management framework, including specific responses for sensitive areas such as Ningaloo Marine Park, and an Oil Pollution First Strike Plan which guides the immediate response.

- (2) The potential impacts on bird life and marine animals depend on the timing, duration and extent of a spill in the highly unlikely event this occurs. Response options to mitigate environmental impacts include tracking the spill, the use of protective barriers, shoreline clean-up techniques, prevention of the spill contacting wildlife where feasible and rehabilitation of wildlife where contact occurs, and long-term monitoring of sensitive species and sites after a spill event.
- The other EP included production from a proposed additional two wells via subsea tieback to existing infrastructure. There were no planned impacts on the nearby World Heritage area or coastline as a result of the proposed additional wells or ongoing activities proposed under the other EP. The proposed activity to drill the two wells would be subject to a separate and future EP, for which Woodside would undertake consultation.
- There were no seismic activities associated with the other EP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Fishing charter operator's concerns about the potential of a crude oil spill and its impact on marine life, reef and coastline.	(1) Woodside assessment: Woodside has assessed the risk of worst-case loss of well containment as 'highly unlikely'. Woodside response: Woodside advised a worst-case loss of well containment had been defined as a 'highly unlikely' event and it had a well-developed oil response management framework including an Oil Pollution First Strike Plan.	(1) The risks associated with unplanned activities are assessed in Section 6.8 of this EP.
(2) Fishing charter operator's concerns about the impact on shoreline birds and marine mammals.	(2) Woodside assessment: Woodside has developed response plans to mitigate or avoid impacts on shoreline birds and marine mammals in the highly unlikely event of a hydrocarbon release. Woodside response: Woodside advised the impact on animals depended on the timing, duration and extent of a spill. Response options included tracking, protective barriers, shoreline clean-up techniques, prevention of contact with wildlife and rehabilitation of wildlife where contact occurs, and long-term monitoring of species and sites after a spill.	(2) The potential environmental impacts of planned and unplanned activities are assessed in Section 6.7 and 6.8 of this EP.
Woodside has addressed claims and objections as noted above.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users.	Woodside has consulted South Coast Recreational Marine Users in the course of preparing this EP. Woodside has assessed the claims or objections raised

	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	by a South Coast Recreational Marine User. No additional measures or controls have been put in place. Woodside considers the measures and controls described within this EP address the potential impact from the proposed activities on the South Coast Recreational Marine Users' functions, interests or activities. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with South Coast Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to South Coast Recreational Marine Users on 22 September 2023 based on their functions, interests or activities. • Woodside has referred South Coast Recreational Marine Users to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow up letter seeking feedback on the proposed activities. • Woodside has addressed and responded to South Coast Recreational Marine Users over a 28-month period.		

Christmas Island Recreational Marine Users

Summary of information provided and record of consultation for this EP:

- On 14 September 2023 and 3 October 2023, Woodside emailed/sent a letter to Christmas Island Recreational Marine Users advising of the proposed activity (Record of Consultation, reference 1.6 and 1.54) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

On 16 October 2023 and 24 October 2023, Woodside sent a reminder email or letter to Christmas Island Recreational Marine Users following up on the proposed activities (Record of Consultation, reference 2.1 and 2.8) and included a link/QR code to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, Marine Tourism WA, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Christmas Island Recreational Marine Users for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to Christmas Island Recreational Marine Users on 14 September/3 October 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email/letter seeking feedback on the proposed activities. - Woodside has provided the Christmas Island Recreational Marine Users with the opportunity to provide feedback over a 25-month period.		

Recfishwest

Summary of information provided and record of consultation for this EP: On 14 September 2023, Woodside emailed Recfishwest advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 16 October 2023, Woodside sent a reminder email to Recfishwest following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 25 October 2023, Recfishwest responded (SI Report, reference 16.1) thanking Woodside for its email and:
 - (1) Advised it had no objection to the proposed activities.
 - (2) Requested to be kept informed as activities progressed, given that the areas surrounding the operations were accessed by recreational fishers.
 - Noted another EP (consulted in conjunction with this EP) included production from an additional two wells and the operation of a new fuel gasline, with associated drilling, construction and installation activities to be subject to separate future EPs.
- On 1 November 2023, Woodside responded (SI Report, reference 16.2) thanking Recfishwest for its feedback. Woodside:
 - (1) Noted Recfishwest had no objections to the proposed activities.
 - (2) Confirmed it would continue to inform Recfishwest on the activities' progression.
 - Confirmed it would consult Recfishwest on future EPs related to the other operations EP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Recfishwest had no objection to the proposed activities.	(1) Woodside assessment: Woodside noted Recfishwest had no objections. Woodside response: Woodside acknowledged that Recfishwest had no objections to the activity.	(1) Not required.
(2) Recfishwest requested to be kept informed as activities progressed, given the areas surrounding the operations were accessed by recreational fishers.	(2) Woodside assessment: Woodside accepts that Recfishwest should be kept informed as activities progress. Woodside response: Woodside confirmed it would keep Recfishwest informed as the activities progressed, given that the areas surrounding the operation were accessed by recreational fishers.	(2) Woodside engages in ongoing consultation throughout the life of an EP and will provide notification of significant change, as appropriate, to Recfishwest as referenced in Section 7.15 of the EP.
While feedback has been received, there were no objections or claims.	Woodside has consulted Recfishwest, Marine Tourism Association of WA, WA Game Fishing Association and relevant individual recreational marine users.	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide

	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Recfishwest for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Recfishwest on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has addressed and responded to Recfishwest over a 28-month period.		

Marine Tourism WA

Summary of information provided and record of consultation for this EP:
• On 14 September 2023, Woodside emailed Marine Tourism WA advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Marine Tourism WA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Marine Tourism WA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Marine Tourism WA on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Marine Tourism WA with the opportunity to provide feedback over a 28-month period.		

WA Game Fishing Association

Summary of information provided and record of consultation for this EP: • On 14 September 2023, Woodside emailed WA Game Fishing Association advising of the proposed activity (Record of Consultation, reference 1.6) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to WA Game Fishing Association following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted Recfishwest, WA Game Fishing Association and individual recreational marine users. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has implemented a consultation program to advise relevant persons of the PAP and provide opportunity to raise objections or claims, as referenced as PS 1.4 in this EP. No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WA Game Fishing Association for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to WA Game Fishing Association on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided WA Game Fishing Association with the opportunity to provide feedback over a 28-month period.		

Titleholders and Operators

Chevron Australia/ Osaka Gas Gorgon/ Tokyo Gas Gorgon (now MidOcean Gorgon)/ JERA Gorgon

Summary of information provided and record of consultation for this EP: • On 15 September 2023, Woodside emailed Chevron Australia advising of the proposed activity (Record of Consultation, reference 1.12) and provided a Consultation Information Sheet, GIS shape files and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside asked that the consultation information be forwarded to Chevron's Joint Venture participants Osaka Gas Gorgon, Tokyo Gas Gorgon and Jera Gorgon for feedback. On 16 October 2023, Woodside sent a reminder email to Chevron Australia following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Chevron Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to Chevron Australia on 15 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided Chevron Australia with the opportunity to provide feedback over a 28-month period.		

Western Gas

Summary of information provided and record of consultation for this EP: On 15 September 2023, Woodside emailed Western Gas advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.
This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved. Controlled Ref No: PYHSE-E-001 Revision: 5 Page 189 of 1047 Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 16 October 2023, Woodside sent a reminder email to Western Gas following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Western Gas for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided Western Gas on 15 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided Western Gas with the opportunity to provide feedback over a 28-month period.		

Exxon Mobil Australia Resources Company

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Exxon Mobil Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

- On 16 October 2023, Woodside sent a reminder email to Exxon Mobil Australia following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Exxon Mobil Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to Exxon Mobil Australia on 14 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided Exxon Mobil Australia with the opportunity to provide feedback over a 28-month period.		

Shell Australia

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed Shell Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

- On 16 October 2023, Woodside sent a reminder email to Shell Australia following up on the proposed activity ((Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shell Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to Shell Australia on 15 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided Shell Australia with the opportunity to provide feedback over a 28-month period.		

BP Developments Australia

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed BP Developments Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

• (1) On 03 October 2023, BP Developments Australia responded (SI Report, reference 17.1) thanking Woodside for its email and advising it had no objections or further feedback at that time. • (1) On 03 October 2023, Woodside responded (SI Report, reference 17.2) thanking BP Developments Australia for its email and acknowledged it had no objections or feedback at that time.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) BP Developments Australia advised it had no objections or further feedback.	(1) Woodside assessment: Woodside notes that BP Developments Australia has no objections or feedback. Woodside response: Woodside acknowledged BP Developments Australia had no objections or feedback.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BP Developments for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to BP Developments on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.		

- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to BP Developments Australia over a 28-month period.

Carnarvon Energy

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Carnarvon Energy advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- (1) On 28 September 2023, Carnarvon Energy responded thanking Woodside for its email and confirming it had no further request for information after reviewing the consultation material (SI Report, reference 18.1).
- (1) On 29 September 2023, Woodside responded thanking Carnarvon Energy for its email and noted it had no further requests for information (SI Report, reference 18.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Carnarvon Energy advised it had no further requests for information.	(1) Woodside assessment: Woodside noted Carnarvon Energy has no comments. Woodside response: Woodside thanked Carnarvon Energy and noted it had no further requests for information.	(1) Not required.
Whilst feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Carnarvon Energy for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Carnarvon Energy on 14 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Carnarvon Energy over a 28-month period.

PE Wheatstone

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed PE Wheatstone advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- **(1)** On 14 September 2023, PE Wheatstone responded thanking Woodside for its email and confirming it had no concerns on the consultation information provided (SI Report, reference 19.1).
- **(1)** On 21 September 2023, Woodside responded thanking PE Wheatstone for its email and acknowledged it had no concerns (SI Report, reference 19.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) PE Wheatstone advised it had no concerns on the consultation information provided.	(1) Woodside assessment: Woodside notes that PE Wheatstone has no concerns. Woodside response: Woodside thanked PE Wheatstone and acknowledged that it had no concerns.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24.	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with PE Wheatstone for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to PE Wheatstone on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to PE Wheatstone over a 28-month period.		

Kyushu Electric Wheatstone

Summary of information provided and record of consultation for this EP:		
• On 14 September 2023, Woodside emailed Kyushu Electric Wheatstone advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Kyushu Electric Wheatstone following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Kyushu Electric Wheatstone for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Kyushu Electric Wheatstone on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Kyushu Electric Wheatstone with the opportunity to provide feedback over a 28-month period.		

Eni Australia

Summary of information provided and record of consultation for this EP:		
• On 14 September 2023, Woodside emailed Eni Australia advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Eni Australia following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Eni Australia for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Eni Australia on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Eni Australia with the opportunity to provide feedback over a 28-month period.		

Finder Energy No 16

Summary of information provided and record of consultation for this EP:
• On 14 September 2023, Woodside emailed Finder Energy advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email (Record of Consultation, reference 2.1) following up on the proposed activity and included a link to the Consultation Information Sheet on Woodside's website. • (1) On 17 October 2023, Finder Energy responded thanking Woodside for its email and advising it had no feedback on the proposed activities (SI Report, reference 20.1). • (1) On 17 October 2023, Woodside responded thanking Finder Energy for its email and noted it had no feedback on the proposed activities (SI Report, reference 20.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Finder Energy advised it had no feedback on the proposed activities.	(1) Woodside assessment: Woodside notes Finder Energy has no feedback on the proposed activities. Woodside response: Woodside thanked Finder Energy and acknowledged it had no feedback on the proposed activities.	(1) Not required.
Whilst feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Finder Energy No 16 for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Finder Energy on 14 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has addressed and responded to Finder Energy No 16 over a 28-month period.		

Jadestone

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Jadestone advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Jadestone following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Jadestone for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Jadestone on 14 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided the Jadestone with the opportunity to provide feedback over a 28-month period.

KUFPEC

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed KUFPEC advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to KUFPEC following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KUFPEC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to KUFPEC on 14 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided KUFPEC with the opportunity to provide feedback over a 28-month period.

Santos NA Energy Holdings / Santos Ltd / Santos WA Northwest / Santos Offshore / Santos WA Southwest / Santos (BOL) / Santos WA PVG / Santos Browse

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Santos advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- (1) On 20 September 2023, Santos responded thanking Woodside for its email and advising it had no comments or objections to the proposed activities (SI Report, reference 21.1).
- (1) On 22 September 2023, Woodside responded thanking Santos for its email and noted it had no comments or objections (SI Report, reference 21.2).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Environment Plan Controls
(1) Santos advised it had no comments or objections regarding the proposed activities.	(1) Woodside assessment: Woodside accepts that Santos has no comments or objections. Woodside response: Woodside thanked Santos and noted it had no comments or objections.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Santos for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Santos on 14 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has addressed and responded to Santos over a 28-month period.

Coastal Oil and Gas

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Coastal Oil and Gas advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Coastal Oil and Gas following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Mid West Geothermal Power Pty Ltd

Summary of information provided and record of consultation for this EP:

- On 14 September 2023, Woodside emailed Strike Energy, on behalf of Mid West Geothermal Power Pty Ltd, advising of the proposed activity (Record of Consultation, reference 1.5) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Strike Energy following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 26 February 2025, after acquiring new contact details for Mid West Geothermal Power Pty Ltd, Woodside sent a consultation update to Mid West Geothermal Power Pty Ltd email address, advising of the additional modelling undertaken since initial consultation and subsequent changes to the EMBA (Record of Consultation, reference 3.20). Woodside provided an updated Consultation Information Sheet.
- On 26 February 2025, Mid West Geothermal Power Pty Ltd responded thanking Woodside for contacting it (SI Report, reference 78.1). Mid West Geothermal Power advised:
 - **(1)** Given its asset was in the onshore portion of the Northern Perth Basin, Mid West Geothermal Power had no additional feedback on the EP.
- On 20 March 2025, Woodside responded thanking Mid West Geothermal Power for its feedback (SI Report, reference 78.2). Woodside:
 - **(1)** Noted that given the location of Mid West Geothermal Power's asset in the Northern Perth Basin, Mid West Geothermal Power had no additional feedback on the EP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Based on the location of its asset, Mid West Geothermal Power had no feedback.	(1) Woodside assessment: Woodside notes Mid West Geothermal Power has no additional feedback based on the location of its assets. Woodside response: Woodside thanked Mid West Geothermal Power for its feedback.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Strike Energy / Mid West Geothermal Power Pty Ltd for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Mid West Geothermal Power Pty Ltd via Strike Energy on 14 September 2023 and 26 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities.		

- Woodside has provided Strike Energy / Mid West Geothermal Power Pty Ltd with the opportunity to provide feedback over 26-month period.

Mitsui E&P Australia (MEPAU)

Summary of information provided and record of consultation for this EP:

- On 18 February 2025, Woodside emailed MEPAU advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to MEPAU following up on the proposed activity (Record of Consultation, reference 2.22) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MEPAU for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to MEPAU on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided MEPAU with the opportunity to provide feedback over an 11-month period.

DeepC Store

Summary of information provided and record of consultation for this EP:

- On 18 February 2025, Woodside emailed DeepC Store advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to DeepC Store following up on the proposed activity (Record of Consultation, reference 2.22) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DeepC store for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to DeepC Store on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided DeepC Store with the opportunity to provide feedback over an 11-month period.

Energy Resources

Summary of information provided and record of consultation for this EP:

- On 18 February 2025, Woodside emailed Energy Resources advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to Energy Resources following up on the proposed activity (Record of Consultation, reference 2.22) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Energy Resources for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Energy Resources on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Energy Resources with the opportunity to provide feedback over an 11-month period.

InCapture

Summary of information provided and record of consultation for this EP: - On 18 February 2025, Woodside emailed InCapture advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 19 February 2025, InCapture responded to Woodside (SI Report, reference 79.1). InCapture provided feedback that did not relate to an adverse impact of the proposed activity. - On 21 March 2025, Woodside responded thanking InCapture for its feedback (SI Report, reference 79.2).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
While feedback has been received, there were no claims or objections.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with InCapture for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to InCapture on 18 February 2025 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has provided InCapture with the opportunity to provide feedback over an 11-month period.

SK Earthon

Summary of information provided and record of consultation for this EP:

- On 18 February 2025, Woodside emailed SK Earthon advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to SK Earthon following up on the proposed activity (Record of Consultation, reference 2.22) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with SK Earthon for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to SK Earthon on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided SK Earthon with the opportunity to provide feedback over an 11-month period.

H2EX Ltd

Summary of information provided and record of consultation for this EP:

- On 18 February 2025, Woodside emailed H2EX Ltd advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to H2EX Ltd following up on the proposed activity (Record of Consultation, reference 2.22) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with H2EX Ltd for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to H2EX on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided H2EX Ltd with the opportunity to provide feedback over an 11-month period.

Beagle No 1

Summary of information provided and record of consultation for this EP:

- On 17 February 2025, Woodside emailed Beagle No 1 advising of the proposed activity (Record of Consultation, reference 1.108) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to Beagle No 1 following up on the proposed activity (Record of Consultation, reference 2.21) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Beagle No 1 for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Beagle No 1 on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Beagle No 1 with the opportunity to provide feedback over an 11-month period.

Melbana Energy Limited

Summary of information provided and record of consultation for this EP:

- On 18 February 2025, Woodside emailed Melbana Energy Limited advising of the proposed activity (Record of Consultation, reference 1.109) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to Melbana Energy Limited following up on the proposed activity (Record of Consultation, reference 2.22) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Melbana Energy Limited for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Melbana Energy Limited on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Melbana Energy Limited with the opportunity to provide feedback over an 11-month period.

Longreach Capital

Summary of information provided and record of consultation for this EP:

- On 17 February 2025, Woodside emailed Longreach Capital advising of the proposed activity (Record of Consultation, reference 1.108) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to Longreach Capital following up on the proposed activity (Record of Consultation, reference 2.21) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Longreach Capital for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Longreach Capital on 18 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Longreach Capital with the opportunity to provide feedback over an 11-month period.

Peak Industry Representative bodies

Australian Energy Producers (AEP)

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed AEP advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to AEP following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Australian Energy Producers (AEP) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to AEP on 13 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided AEP with the opportunity to provide feedback over a 28-month period.

Traditional Custodians and nominated representative corporations

Murujuga Aboriginal Corporation (MAC)

MAC is established under the Burrup and Maitland Industrial Estates Agreement and is the representative body for the Traditional Custodians for Murujuga being the Ngarluma, the Mardudhunera, the Yaburara, the Yindjibarndi and the Wong-Goo-Tt-Oo peoples (collectively Ngarda-Ngarli). MAC is the cultural authority for Murujuga and is responsible for the management and protection of its cultural values.

Historical engagement

- On 18 July 2023, Woodside emailed MAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed MAC *Woodside's planned Program of Ongoing Engagement with Traditional Custodians*.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 17 November 2023, Woodside emailed MAC advising of the proposed activity (Record of Consultation, reference 1.63) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MAC and its members may have within the EMBA, information on how MAC would like to engage, and requested that MAC provide information to other individuals as required.
- On 17 November 2023, MAC emailed Woodside confirming receipt of materials (SI Report reference, 23.1).
- On 5 January 2024, Woodside emailed MAC a table displaying the status of Woodside's outstanding EP consultations with MAC. Woodside offered to set up a consultation meeting to work through this table with MAC. (SI Report, reference 23.2).

Ongoing engagement:

- On 23 April 2024, MAC emailed Woodside (SI Report, reference 23.3) about another activity and raised the following:
 - (1) The lack of broader-scale bathymetric information on the submerged landscape and the potential for impact on Jinna (Songlines).
 - (2) That MAC had no specific knowledge of tangible or intangible heritage that may be impacted.
 - (3) The size of the EMBA and management procedures in place to protect cultural values in addition to environmental values.
- On 26 April 2024, Woodside emailed MAC advising it would seek information to respond to MAC's feedback (SI Report, reference 23.4).
- On 8 May 2024, Woodside emailed MAC to provide further information (SI Report, reference 23.5) including:
 - (1) Woodside's continued support to work with MAC to undertake mapping of areas significant to MAC.
 - (1) Woodside's continued support to undertake further ethnographic surveys focussed on Jinna at MAC's convenience.
 - (2) That Woodside welcomed MAC's advice on identifying cultural features and values in the absence of information from further surveys and mapping.
 - (3) How the EMBA is determined.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 2 August 2024, MAC emailed Woodside a letter relating to another EP (SI Report, reference 23.6). Matters relating to this EP include:
 - (4) MAC's advice that activities that could potentially affect the natural movement or behaviour of marine species may impact cultural values.
 - (5) MAC's request that the protection of environmental values be assessed separately from the protection of cultural values.
 - (6) That MAC expects to be consulted about any activity located near Murujuga and informed if there is an environmental incident whereby Murujuga falls within the possible impact zone.
- (6) On 2 August 2024, Woodside responded to MAC's email confirming it would inform MAC of all projects located near Murujuga and in the very unlikely case of an environment incident (SI Report, reference 23.7).
- On 9 September 2024, Woodside invited MAC to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners (SI Report, reference 83.1).
- On 17 September 2024, Woodside emailed MAC responses to matters raised in correspondence on 2 August 2024 (SI Report, reference 23.8). The letter stated:
 - (4, 5) Woodside assesses potential cultural impacts on marine species including controls for mammal migration paths and behaviour collaboratively with environmental impacts.
 - (6) Woodside actively seeks ongoing engagement and consultation with MAC on its cultural interests, activities and functions.
 - Woodside is available to meet with MAC.
- On 25 September 2024, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.2).
- On 3 October 2024, Woodside invited MAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 23 October 2024, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.5).
- On 21 November 2024, NYFL emailed Woodside a letter advising that due to the passing of a Senior Elder, Sorry Business was underway in the Roebourne area (SI Report, reference 23.9).
- On 4 March 2025, Woodside emailed MAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 83.7).
- On 5 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.8).
- On 24 March 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 83.10).
- On 26 March 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 83.11).

- On 7 April 2025, Woodside emailed MAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 83.12).
- On 8 April 2025, Traditional Owner members from MAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.13).
- On 22 August 2025, MAC emailed Woodside about an unrelated EP (SI Report, reference 23.10). MAC asked for clarification about Woodside's process for compiling records about Cultural Values and provided this feedback:
 - (7) Additional culturally valued species: stingrays, sharks, crustaceans, octopus, sea stars, sea urchins, sponges and molluscs. (8) Any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities.
 - (9) Submerged landscape: potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.
 - (10) Feedback that fish traps are not limited to Conzinc, Angel and Gidley as significant.
 - (11) Feedback that harvesting squid at Conzinc Bay is one of many subsistence activities that have been and continue to be practiced across the archipelago.
- On 22 August 2025, MAC emailed Woodside a letter about an unrelated EP (SI Report, reference 23.11). Matters relevant to this email included:
 - (10) Protection of environmental values should be assessed separately to protection of cultural values.
 - (8) Activities that could potentially affect the natural movement, migration and/or other behaviour of marine species (including sea birds) may have an impact on the cultural interpretation of the seasonal landscape and seascape and associated cultural behaviours.
- On 28 August 2025, Woodside responded by email to MAC's feedback about Cultural Values (SI Report, reference 23.12). Woodside:
 - (7, 8, 9, 10, 11) Provided MAC with an expanded Cultural Values table (Appendix A) which included sources of information and additional detail.
 - (7, 8, 9, 10, 11) Explained how Woodside sources information about Cultural Values for EPs.
 - (7, 8, 9, 10, 11) Invited MAC to review the Cultural Values table and provide further feedback if necessary.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) MAC have previously raised concerns lack of broader-scale bathymetric information on the submerged landscape and the potential for impact on Jinna (Songlines).	(1) Woodside assessment: Woodside acknowledges MAC's position that there is a lack of bathymetric information. Woodside notes that this EP is for continued operation of existing infrastructure. The EP includes the Unexpected Finds Procedure (Section 7.9) which addresses the risk of discovery of potential underwater cultural material. Woodside response: Woodside has previously proposed to MAC that MAC work to determine a scope	(1) Cultural features and heritage values including Jinna (Songlines) are identified and assessed in Sections 4.9 and Section 6.

	of works to determine further bathymetric information on the area. This proposal is under consideration by MAC and Woodside remains supportive of undertaking this work. Woodside also remains supportive of conducting further ethnographic surveys with MAC, following the initial phase of works in 2020 which focussed on Jinna and their connection from Murujuga to inland areas.	
(2) On 23 April 2024, MAC advised it had no specific knowledge of tangible or intangible heritage that might be impacted.	(2) Woodside assessment: Woodside uses multiple sources of information including publicly available literature, heritage databases and feedback from consultation in order to identify tangible and intangible cultural features of the environment, as described in Sections 4.9 and 6.11. Woodside response: Woodside recognises the difficulty MAC faces in identifying tangible and intangible heritage on the submerged continental shelf in the absence of bathymetric mapping and ethnographic assessment of the results. In June 2023 Woodside proposed a project to MAC that would undertake mapping of areas identified by MAC as a priority in understanding this landscape. MAC has not accepted this proposal and through several meetings with MAC between July 2023 and February 2024 Woodside understands that MAC intends to issue a modified proposal to conduct this work.	(2) Cultural features and heritage values are identified and assessed in Sections 4.9 and Section 6 of the EP.
(3) On 23 April 2024, MAC noted the size of the EMBA and management procedures in place to protect cultural values.	(3) Woodside assessment: Woodside aligns with industry guidance in developing the EMBA. Many replicate model simulations are completed to understand the potential behaviour of the worst-case release under various wind, wave and current conditions and these are combined to create an overall EMBA. Woodside welcomes any advice MAC provides on identifying cultural features or heritage values within the EMBA. Woodside response: The EMBA for this activity is determined by a highly unlikely release of marine	(3) Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix H. The First Strike Plan is in Appendix I.

	diesel as the result of damage to the production facility or vessel collision. Woodside considers it adopts appropriate controls to prevent a hydrocarbon spill and controls to respond in the highly unlikely event of a hydrocarbon spill.	
(4) MAC stated that any development could potentially affect the natural movement, migration and/or other behaviour of marine species, and may have an impact on the cultural interpretation of the seasonal landscape, seascape and associated cultural behaviours.	(4) Woodside assessment: Woodside considers the potential cultural impacts on marine species including impacts and associated controls for marine mammal paths and behaviour. Woodside response: Woodside has undertaken numerous environmental studies that form part of the EPs and has an ongoing commitment to environmental studies and research some of which are set out on Woodside's website. Woodside also committed to ongoing consultation with MAC in relation to environmental impacts including to marine life.	(4) Woodside has assessed impacts and risks to marine species in Section 6 of the EP. Items relating to MAC appear in section 4.9. Woodside has assessed impacts and risks to marine species in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(5) During ongoing engagement, MAC stated that the protection of environmental values should be assessed separately from the protection of cultural values in EPs.	(5) Woodside assessment: Woodside undertakes assessments for both environmental and cultural values. These are considered individually and collaboratively. Woodside response: Woodside has responded to MAC and informed it that environmental and cultural impacts have been assessed both individually and collaboratively.	(5) Woodside's First Nations Cultural Features and Heritage Values Assessment is in section 6.10.
(6) During ongoing engagement MAC stated that it expects to be consulted about any activity located near Murujuga and contacted in the event of an environmental incident whereby Murujuga falls within the possible impact zone.	(6) Woodside assessment: Woodside acknowledges MAC's advice that it should be consulted about any activity located near Murujuga and in the unlikely case of an environmental incident. Woodside response: Woodside has advised MAC that it will inform MAC of projects proposed on Murujuga.	(6) Under Woodside's methodology for identifying relevant persons, MAC is considered a relevant person for EPs with an EMBA covering/in proximity to Murujuga. Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix H of the EP. Woodside's First Strike Plan is in Appendix I of the EP Woodside's emergency response protocols (Section 7.15) include a review of potentially impacted stakeholders,

		including Traditional Owners. Woodside engages with Traditional Owners for applicable events.
(7) MAC has previously advised on the following Cultural Values: Marine species: • Whales, totemic importance. • Dolphins, cultural ceremonies. • Dugongs, food source. • Fish, cultural ceremonies. • Sea Snakes, culturally important. • Turtles, Songlines • Coral, attract fish and other species • Seagrass, provide protection for animals. Locations include Conzinc Bay, and between Angel and Gidley Islands. On 22 August 2025, MAC further advised Woodside that these species also had cultural value: • Stingrays • Sharks • Crustaceans • Octopus • Sea star • Sea urchins • Sponges • Molluscs	(7) Woodside assessment: This value has been identified via feedback from MAC. Woodside response: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information relating to its cultural values. Woodside has updated its records and informed MAC that it will apply these updates to this and future EPs.	(7) Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6
(8) Any changes to the feeding, breeding or migratory behaviour of culturally significant species would impact significantly on subsistence, cultural and ceremonial activities	(8) Woodside assessment: Woodside acknowledges this feedback and has updated its Cultural Values records for MAC. Woodside has also included this information in the EP.	(8) Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.

	Woodside response: Woodside has provided MAC with details of Woodside's updated Cultural Values records.	
(9) Cultural Value: Submerged landscape: potential impact to Aboriginal heritage, the submerged coastline at initial occupation of the region, landscape features that would have defined the first travel routes used to move through Country.	(9) Woodside assessment: This value has been identified via feedback from MAC. Woodside response: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	(9) Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.
(10) Cultural Value: Feedback that fish traps are not limited to Conzinc, Angel and Gidley as significant.	(10) Woodside assessment: This value has been identified via feedback from MAC. Woodside response: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	(10) Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.
(11) Cultural Value: Feedback that harvesting squid at Conzinc Bay is one of many subsistence activities that have been and continue to be practiced across the archipelago.	(11) Woodside assessment: This value has been identified via feedback from MAC. Woodside response: At the beginning of consultation for EPs unrelated to this activity, Woodside provided MAC with a list of the cultural values known to Woodside that it believed relevant to the group and	(11) Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Sections 6.

	invited it to make changes or provide additional information. On 22 August 2025, MAC provided additional information about this Cultural Value. Woodside has amended its records and informed MAC of these changes.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on MAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheet and Summary Information Sheets developed by Indigenous staff to MAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". - Advised that MAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.		

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with MAC in November 2023.
- Woodside has addressed and responded to MAC over 26 months, demonstrating a “reasonable” period of consultation.

Woodside asked MAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MAC’s functions, interests or activities.

Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC)

NTGAC is established under the *Native Title Act 1993* (Cth) by the Baiyungu people to represent the Baiyungu people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. YMAC is the Native Title Representative Body (NTRB) for the Aboriginal corporations in the Yamatji and Pilbara regions, including NTGAC. NTRBs exist to provide assistance to native title claimants and holders in relation to their native title rights.

Historical engagement:

- (1) On 17 July 2023, in response to consultation requests on activities not relevant to this EP, NTGAC (via YMAC) provided Woodside with a proposed consultation framework for PBCs to consult with oil and gas companies.
- On 19 July 2023, Woodside emailed NTGAC (via YMAC) NOPSEMA’s *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside’s request that NTGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed NTGAC (via YMAC) Woodside’s planned *Program of Ongoing Engagement with Traditional Custodians*.
- (2) On 15 August 2023, Woodside presented to NTGAC (via YMAC) about several activities unrelated to this EP. At the meeting, NTGAC expressed interest in whales and whale sharks. (2) Woodside noted NTGAC’s interest in whales and whale sharks, which will be documented in EPs.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* and *Angel Facility Operations EP (Appendix F and SI Report)*.

Summary of information provided and record of consultation for this EP:

- On 23 October 2023, Woodside emailed NTGAC (via YMAC) advising of the proposed activity (Record of Consultation, reference 1.64) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website). The email requested information on the interests that

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

NTGAC and its members may have within the EMBA, information on how NTGAC would like to engage, and requested that NTGAC provide information to other individuals as required.

- On 13 November 2023, Woodside emailed NTGAC (via YMAC) noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet (SI Report, reference 24.1).

Ongoing engagement:

- (1) On 14 December 2023, Woodside emailed NTGAC (via YMAC) (SI Report, reference 24.2) attaching the Program of Ongoing Consultation and advised that Woodside wanted to progress negotiations on consultation frameworks with groups represented by YMAC (including NTGAC). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide NTGAC with the information NTGAC requires to make free, prior and informed decisions about Woodside's EPs.
 - Agreement as to how NTGAC will provide feedback and how that can best be represented in EPs.
 - An agreed schedule of rates for NTGAC's participation in consultation.
 - How the outputs of the consultations will be managed.
- On 21 December 2023, Woodside emailed NTGAC (via YMAC) with a list of activities, as requested, including this activity (SI Report, reference 24.3).
- (1) On 28 February 2024, Woodside emailed NTGAC (via YMAC) with a letter (SI Report, reference 24.4) setting out the draft terms of an agreement between NTGAC and Woodside, the agreement (among other things) included the following topics:
 - Sufficient Information.
 - Reasonable Period.
 - Provision of Information.
 - Objection or claims.
 - Publications.
 - Cost and termination.
- (1) On 29 February 2024, NTGAC (via YMAC) emailed Woodside acknowledging receipt of the information (SI Report, reference 24.5).
- Between 16 May and 19 June 2024, Woodside and NTGAC (via YMAC) exchanged emails about a request by Woodside to meet with the NTGAC Board to discuss EPs (SI Report, references 24.6 – 24.10). While the possibility of Woodside attending NTGAC's July Board meeting was briefly mentioned, this meeting did not go ahead. Woodside and NTGAC instead met in September 2024.
- Between 27 June and 10 July 2024, Woodside and NTGAC (via YMAC) exchanged emails about a draft consultation agreement provided by Woodside in February. (1) NTGAC (via YMAC) requested Woodside pay costs associated with reviewing the agreement. (1) During the exchange Woodside agreed to pay costs quoted by NTGAC (via YMAC) to review the agreement (SI Report, references 24.11 – 24.14).

- Between 30 July and 20 August 2024, NTGAC (via YMAC) and Woodside exchanged emails to arrange a half day meeting on 12 September 2024 in Carnarvon (SI Report, references 24.15 – 24.17).
- On 6 September 2024, Woodside spoke to NTGAC on the phone (SI Report, reference 24.18). Matters discussed included the agenda for the 12 September 2024 meeting including EPs intended to be presented.
- Between 10 September and 11 September 2024, Woodside and NTGAC (via YMAC) exchanged emails about meeting on 12 September 2024 (SI Report, references 24.19 – 24.25).
- On 12 September 2024, Woodside and NTGAC met (SI Report, reference 24.26), at which Woodside:
 - Confirmed attendees were familiar with EPs and NOPSEMA. Attendees acknowledged they were.
 - Displayed a map of its activities in WA.
 - Explained the EP consultation process.
- On 3 October 2024, Woodside emailed NTGAC an invitation to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners (SI Report, reference 83.3).
- On 10 October 2024, Woodside emailed NTGAC regarding this EP, referring to correspondence sent to NTGAC on 23 October 2023, 13 November 2023, and 21 December 2023 and correspondence from NTGAC on 29 February 2024 (SI Report, reference 24.27), including notifying NTGAC that:
 - Consultation for this EP opened on 23 October 2023 when Woodside provided NTGAC consultation information, and closed on 20 November 2023 allowing Woodside to prepare the EP.
 - The EP was publicly available on NOPSEMA's website (and provided a link) and is being assessed by NOPSEMA.
 - Woodside would shortly resubmit this EP for further assessment and that the EP will be substantively the same as that published on the website and will include relevant feedback obtained during consultation.
 - Any feedback, claims or objections about the adverse impacts (if any) relating to the EP that NTGAC would like Woodside to consider as part of this resubmission, be provided to Woodside no later than 24 October 2024.
 - Feedback can be provided by email, phone, directly to the engagement team, or directly to NOPSEMA and providing a range of contact details.
 - (1) Woodside acknowledged discussions relating to framework agreements had been ongoing since July 2023 and is yet to be completed, and that consultation for this EP had occurred in parallel.
 - Woodside had provided sufficient information, allowed a reasonable period of time for consultation and given a reasonable opportunity to provide details about the adverse impacts of the activity on NTGAC's functions, interests or activities, and looked forward to progressing discussions with NTGAC on framework agreements separately.
 - Feedback could continue to be provided during the life of the EP, including after consultation for the EP had closed, during assessment of the EP, and after the EP has been accepted by NOPSEMA, and that Woodside would continue to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP.

- Should a claim or objection be received following the acceptance of the EP, that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside would apply its Management of Change and Review process as appropriate.
- On 21 October 2024, Woodside emailed NTGAC (via YMAC) a reminder about this EP (SI Report, reference 24.8). The email included:
 - A reference to the consultation email update for this EP sent to NTGAC on 10 October September 2024.
 - A reminder that consultation for the preparation of this EP resubmission closes on 24 October 2024.
 - A request for information on how NTGAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NTGAC to understand how it would like information to be managed.
 - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for NTGAC to provide information about the proposed activity to other individuals, as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) NTGAC (via YMAC) to develop first draft of a Consultation Agreement.	(1) Woodside assessment: Woodside is supportive of a sustainable consultation framework and has a commitment to ongoing consultation with Traditional Custodians for the life of an EP. Woodside response: Separate from consultation for this activity under regulation 25 of the Environment Regulations, Woodside has sent a draft agreement to NTGAC via YMAC in February 2024. This would be used to frame ongoing consultation to occur as part of Woodside's commitment to consultation post regulation 25 of the Environment Regulations. The draft agreement is under review by NTGAC/YMAC.	(1) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G). This includes continued engagement regarding NTGAC's proposed Consultation Framework and General Report which will be applied to ongoing consultation.
(2) NTGAC have expressed a general interest in whales and whale sharks.	(2) Woodside assessment: When developing EPs, Woodside considers potential cultural impacts on marine species including impacts and associated controls with whales and whale sharks. Woodside response: Woodside recognises that whales and other species of totemic importance need	(2) Woodside has assessed impacts and risks to marine species in Section 6 of the EP. Items relating to NTGAC appear in section 4.9.

	to be protected, including their populations and migration patterns. As assessed in Section 6, Woodside considers that when the impacts and risks to marine species, including potential totemic species, have been reduced to ALARP and an acceptable level in offshore areas, the potential impacts and risks to cultural values associated with coastal Indigenous connection with, or traditional uses of marine species and associated ecosystems in nearshore coastal waters are also reduced to ALARP and an acceptable level.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NTGAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on NTGAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheet and Summary Information Sheets developed by Indigenous staff to NTGAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".		

- Advised that NTGAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- Woodside provided further information to NTGAC on 10 October 2024, which included:
 - The dates Woodside had previously contacted NTGAC about the proposed activity.
 - That the original consultation period commenced on 23 October and closed on 20 November 2023.
 - A link to the publicly available EP on NOPSEMA's website.
 - Confirmation that Woodside will resubmit the EP for further assessment.
 - That feedback, claims or objections about the adverse impacts (if any) relating to the EP that NTGAC would like Woodside to consider as part of the resubmission, should be provided to Woodside by 24 October 2024.
 - That discussions relating to framework agreements can occur in parallel to EP consultation.
 - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with NTGAC in October 2023, with a further consultation period in October 2024.
- Woodside has addressed and responded to NTGAC over 26 months, demonstrating a "reasonable" period of consultation.

Woodside asked NTGAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NTGAC's functions, interests or activities.

Buurabalayji Thalanyji Aboriginal Corporation (BTAC)

BTAC is established under the *Native Title Act 1993* (Cth) by the Thalanyji people to represent the Thalanyji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 20 February 2023, BTAC sent a letter to Woodside in relation to another project, confirming that:
 - (1) BTAC, on behalf of Thalanyji people, had interests in archaeological sites on nearshore islands including the Montebello islands, Barrow Island and Mackerel Islands, and had a cultural obligation to care for Sea Country and environmental values.
 - (2) BTAC had not specifically developed values regarding Sea Country into a format that could be articulated for consultation.
 - (3) BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.
 - (4) BTAC proposed that Woodside enter into a consultation or engagement framework agreement to set out a process for ongoing consultation.
- On 19 July 2023, Woodside emailed BTAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed BTAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.
- (1, 2, 3) On 31 July 2023, Woodside emailed 3 letters to BTAC, one of which outlined support for an ethnographic assessment to:
 - Identify Sea Country values generally sufficient to inform all Woodside EPs.
 - Identify any work necessary to clarify or define the offshore areas that are relevant to the Thalanyji People.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed BTAC advising of the proposed activity (Record of Consultation, reference 1.65) and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that BTAC and its members may have within the EMBA.
- (4) On 13 and 31 October 2024, BTAC's legal representative emailed Woodside about the contents of a proposed consultation agreement (SI Report, references 25.1 – 25.2).
- On 1 November 2023, BTAC (via legal representative) emailed Woodside inviting Woodside to present on Woodside activities at a 1-hour slot in the BTAC Common Law Holders meeting on 27 November 2023 (SI Report, reference 25.3).
- On 1 November 2023, Woodside emailed BTAC (via legal representative) accepting the offer to present at the Common Law Holders meeting and offering to pay costs for the meeting (SI Report, reference 25.4).
- (4) Between 2 and 18 November 2023, Woodside and BTAC's legal representative exchanged emails about the contents of the proposed consultation agreement (SI Report, reference 25.5 – 25.8).

Ongoing engagement:

- (2, 3) On 27 November 2023, Woodside attended and presented at the BTAC Common Law Holders meeting (SI Report, reference 25.9). The one-hour timeslot did not allow for taking feedback in relation to EPs, but the Common Law Holders were made aware that Woodside had been attempting to meet since January 2023 on

activities and had agreed to pay for reasonable consultation costs as well as fund Sea Country mapping but that these offers had not been taken up. BTAC members were very interested in an ongoing relationship and discussed sea country mapping, which Woodside had responded to in writing earlier in 2023, Woodside agreed to re-send the relevant correspondence to the new CEO. BTAC noted they would invite Woodside to attend a meeting with BTAC early in 2024, a collaborative agreement will be settled and further ongoing consultation on all relevant EPs will continue in order of priority for BTAC and Woodside.

- **(4)** On 7 December 2023, Woodside emailed BTAC (via legal representative) (SI Report, reference 25.10). Woodside noted that the framework agreement had not been finalised to date but would include the following:
 - Agreement between parties to consult in a meaningful and genuine manner.
 - Procedure Woodside will follow when a submission requires consultation, which would include notification and an invitation to meet.
 - Initial and ongoing consultation about activities.
 - How Thalanyji provides feedback and how to represent that feedback in submissions.
 - Agreed schedule of rates.
 - How to manage the outputs of consultation.
 - Woodside requested to meet to progress discussions with BTAC.
- **(1, 2, 3)** On 7 December 2023, Woodside emailed BTAC forwarding correspondence received from and correspondence sent to the previous CEO dated 20 February 2023 and dated 17 March 2023, confirming support for recording Sea Country values and confirming anthropological support (SI Report, reference 25.11). Woodside confirmed support to pay reasonable costs for ethnographic/anthropological support for mapping and recording Sea Country values. Woodside requested to be contacted to enable progress on the above matters. BTAC's letter of 20 February 2023 in relation to other activities noted interests in archaeological sites on nearshore islands including the Montebello and Barrow Islands, they noted a cultural obligation to care for Sea Country and environmental values.
- **(2, 3)** On 7 December 2023, BTAC emailed Woodside accepting the offer to take up Sea Country mapping and research. BTAC requested a meeting in the week of 15 January 2024 to plan for upcoming activities (SI Report, reference 25.12).
- Between 8 December and 11 December 2023, Woodside and BTAC's legal representative exchanged emails about legal fees (SI Report, references 25.13 – 25.15).
- On 12 December 2023, BTAC emailed Woodside asking if 17 January 2024 was a suitable date to meet (SI Report, reference 25.16).
- On 12 December 2023, Woodside emailed BTAC (via legal representative) noting that BTAC had suggested a meeting during the week of 15 January 2024 to discuss Sea Country mapping. Woodside suggested that they would include time to progress the framework agreement and present on the status of current EPs (SI Report, reference 25.17).
- On 15 December 2023, BTAC emailed Woodside requesting a copy of the slide presentation from the meeting of 27 November 2023 (SI Report, reference 25.18).
- On 18 December 2023, Woodside emailed BTAC a copy of the slide presentation as requested from the meeting of 27 November 2023 (SI Report, reference 25.19).
- Between 19 December 2023 and 16 January 2024, Woodside and BTAC (and via legal representative) exchanged emails about administrative matters relating to meeting on 17 January 2024 including costs, agenda items and attendees (SI Report, references 25.20 – 25.25).
- On 17 January 2024, Woodside met with BTAC and discussed (among other things) (SI Report, reference 25.26):
 - **(1, 2)** Sea Country mapping, confirming:

- BTAC choose their own experts for ethnographic survey.
- BTAC retain intellectual property of material and may request information not be provided.
- Fieldwork required with a preferred commencement in April, with Woodside personnel in attendance as guided by BTAC.
- (5) BTAC prefer early notice on EPs, if possible. (5) Woodside acknowledged the request.
- (6) BTAC were keen on employment/training opportunities and opportunities for rangers.
- (7) BTAC to form a committee for consultation on EPs.
- (6) On 17 January 2024, Woodside emailed BTAC information about training pathways as discussed at the meeting with BTAC on 17 January 2024 (SI Report, reference 25.27).
- (2, 3) On 8 February 2024, Woodside emailed BTAC confirming support in articulating Sea Country values. (SI Report, reference 25.28).
- (2, 3) On 8 February 2024, BTAC emailed Woodside informing that a scope of work would be generated to inform identifying and articulating Sea Country values. Woodside replied acknowledging the email (SI Report, references 25.29 – 25.30).
- (4) On 28 February 2024, Woodside emailed BTAC a draft consultation agreement for BTAC's consideration which included the aims of consultation, proposed consultation agreement details and a consultation meeting framework (SI Report, reference 25.31). Woodside invited BTAC to propose a schedule of rates and other details relating to ongoing engagements.
- (4) (4) Between 28 February – 5 March 2024, Woodside and BTAC (via legal representative) exchanged emails to progress the draft consultation framework (SI Report, reference 25.32 – 25.34).
- (7) On 11 March 2024, BTAC (via legal representative) emailed Woodside to discuss Woodside meeting with two new BTAC committees to progress discussions relating to Woodside activities and EP consultation and engagement. BTAC requested available dates for Woodside representatives to attend committee meetings (SI Report, reference 25.35).
- (7) Between 25 March and 22 April 2024, Woodside and BTAC (via legal representative) exchanged emails about meeting the BTAC committees. A meeting date of 22 May 2024 was agreed to (SI Report, references 25.36 – 25.40).
- (2, 3) On 22 May 2024, Woodside met with BTAC about another EP. Among topics not related to this EP, (2, 3) Woodside reiterated its commitment to supporting BTAC articulate Sea Country Values (SI Report, reference 25.41).
- On 9 September 2024, Woodside invited BTAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 3 October 2024, Woodside invited BTAC to share stories and receive updates from Woodside at its Monthly Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 10 October 2024, Woodside emailed BTAC regarding this EP, referring to correspondence sent to BTAC on 11 October 2023, 18 December 2023 and a meeting on 27 November 2023 in relation to consultation for this EP (SI Report, reference 25.42). Woodside stated:
 - Consultation for this EP opened on 11 October 2023 when Woodside provided BTAC consultation information, and closed on 11 November 2023 allowing Woodside to prepare the EP.

- The EP was publicly available on NOPSEMA’s website (and provided a link) and is being assessed by NOPSEMA.
- Woodside would shortly resubmit this EP for further assessment and it would be substantively the same as that published on the website and would include relevant feedback obtained during consultation.
- Any feedback claims or objections about the adverse impacts (if any) relating to the EP that BTAC would like Woodside to consider as part of this resubmission, to be provided to Woodside no later than 24 October 2024.
- Woodside attached a table outlining information BTAC had previously provided about its cultural values:
 - (1) (1) BTAC has a cultural obligation to care for the environmental values of Sea Country and its interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands.
- Woodside requested BTAC provide any additional information about its cultural values by 24 October 2024. Woodside provided contact details for providing feedback.
- Woodside acknowledged discussions relating to framework agreements had been ongoing since May 2023 and were yet to be completed, and that consultation for this EP had occurred in parallel.
- Woodside had provided sufficient information, allowed a reasonable period of time for consultation and given a reasonable opportunity to provide details about the adverse impacts of the activity on BTAC’s functions, interests or activities, and looked forward to progressing discussions with BTAC on framework agreements separately.
- Feedback could continue to be provided during the life of the EP, including after consultation for the EP had closed, during assessment of the EP, and after the EP has been accepted by NOPSEMA, and that Woodside would continue to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP.
- Should a claim or objection be received following the acceptance of the EP, Woodside would apply its Management of Change and Review process.
- On 21 October 2024, Woodside emailed BTAC a reminder about this EP (SI Report, reference 25.43). The email included:
 - A reference to the consultation email update for this EP sent to BTAC on 10 October September 2024.
 - A reminder that consultation for the preparation of this EP resubmission closes on 24 October 2024.
 - A request for information on how BTAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside’s commitment to managing gender-restricted or other culturally sensitive information, and working with BTAC to understand how it would like information to be managed.
 - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for BTAC to provide information about the proposed activity to other individuals, as required.
- On 18 November 2024, Woodside emailed BTAC following a meeting about a matter unrelated to EP consultation (SI Report, reference 25.44). Matters raised in the email that are relevant included:
 - (6) BTAC would send a ranger program proposal to Woodside for consideration.

- (2, 3) Woodside and BTAC would hold a workshop to finalise the Sea Country mapping scope.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) BTAC has a cultural obligation to care for the environmental values of Sea Country. BTAC's interests include archaeological sites identified on nearshore islands including the Montebello Islands, Barrow Island and the Mackerel Islands.	(1) Woodside assessment: Woodside assessed BTAC's cultural obligation to care for environmental values of Sea Country to represent potential cultural values. The nearshore islands identified by BTAC do not fall within the EMBA. Woodside response: Updated relevant sections in the EP to record interests and potential cultural values and assessed the potential impact on these and included controls. The islands will not be impacted by the activities set out in the EP and Sea Country mapping will therefore continue even though consultation for this EP is closed.	(1) Woodside has recorded BTAC's interests and potential cultural values in Section 4.9 and assessed potential impact on these, including controls, in Section 6.10.
(2) BTAC has not specifically developed values regarding Sea Country into a format that could be articulated for consultation. BTAC sought support from Woodside to enable BTAC to define and articulate its values on Sea Country in a manner that could be more clearly understood by the offshore sector, government, and the community.	(2) Woodside assessment: Completion of an ethnographic assessment is not required to undertake or complete consultation under regulation 25 of the Environment Regulations and/or for a comprehensive description of the environment. Opportunity to undertake this work continues under the proposed consultation framework (see (4) below) as part of ongoing engagement. Woodside has been able to develop a robust understanding of Thalanyji Sea Country cultural values and features in absence of this assessment. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP). Woodside response: Woodside agreed to support the articulation and recording of Sea Country values. This offer has been taken up and progress has commenced towards the desired outcome. The draft consultation	(2) Woodside has taken all reasonable steps to identify cultural features and heritage features of Thalanyji people within the EMBA. This is described in Section 4.9. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

	framework at (4) below includes support for recording and articulation of Sea Country values.	
(3) Requested Woodside supports BTAC in obtaining technical advice relating to the proposed activities which were sent to BTAC.	(3) Woodside assessment: In February 2024, BTAC engaged a consultant who is completing a scope of work to inform BTAC of costings for articulating Sea Country values. Woodside considers it beneficial for Thalanyji to have technical advice to ensure the delivery of an outcome that does justice to the work involved to record the Sea Country values. Woodside response: Woodside has offered reasonable financial support for technical advice and other support that has now been taken up by BTAC.	(3) No additional measures or controls are required.
(4) BTAC proposed a consultation framework as an appropriate mechanism to provide ongoing feedback to Woodside regarding its activities.	(4) Woodside assessment: Woodside is committed to ongoing consultation with acknowledges BTAC. proposal for a consultation framework. Woodside response: Separate from consultation under regulation 25 of the Environment Regulations, Woodside has drafted a consultation framework with BTAC and is awaiting final internal review. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.	(4) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G). This includes continued engagement regarding the consultation framework that Woodside seeks with BTAC. No additional measures or controls are required.
(5) BTAC requested early notification on EPs and are interested in forming a committee for ongoing consultation on EPs.	(5) Woodside assessment: Woodside supports ongoing consultation being conducted in the most appropriate way for BTAC. Woodside response: Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate,	(5) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G). This includes continued engagement regarding the consultation framework that Woodside seeks with BTAC, a draft of which includes support for BTAC to define and articulate sea values, provision of ongoing feedback and cost

	Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	recovery. No additional measures or controls are required.
(6) BTAC expressed desire to be involved in local emergency response capability, potentially via an Indigenous Ranger Program. Interested in opportunities for employment/training.	(6) Woodside assessment: Woodside considers value in having rangers on the ground, trained up in the highly unlikely event of a spill. It would be beneficial to an immediate response in an emergency situation. Woodside response: Woodside has offered to support BTAC In January 2024 Woodside provided BTAC with information about a training/employment program.	(6) The Program for Ongoing Engagement with Traditional Custodians (Appendix G) includes commitments to social investment to support Indigenous Ranger programs, and support for Indigenous oil spill response capabilities. Based on engagement to date, no additional measures or controls are required.
(7) BTAC has formed two new committees including one responsible for EP consultation and engagement.	(7) Woodside assessment: In its initial email to BTAC about this EP, Woodside requested BTAC advise of its preferred method of consultation. Woodside response: Woodside met with BTAC on 22 May 2024 and will continue to follow BTAC's guidance about consultation requirements.	(7) No further action required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BTAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: Woodside sought direction on BTAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.		

- Provided Consultation Information Sheet and Summary Information Sheet developed by Indigenous staff to BTAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals.
- Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that BTAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- Woodside provided further information to BTAC on 10 October 2024, which included:
 - The dates Woodside emailed BTAC about the proposed activity.
 - That the original consultation commenced on 23 October and closed on 20 November 2023.
 - A link to the publicly available EP on NOPSEMA's website.
 - Confirmation that Woodside will resubmit the EP for further assessment.
 - That feedback, claims or objections about the adverse impacts (if any) relating to the EP that BTAC would like Woodside to consider as part of the resubmission, should be provided to Woodside by 24 October 2024.
 - That discussions relating to framework agreements can occur in parallel to EP consultation.
 - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with BTAC in October 2023, with a further consultation period in October 2024.
- Woodside has addressed and responded to BTAC over 27 months, demonstrating a "reasonable" period of consultation.

Woodside asked BTAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BTAC's functions, interests or activities.

Yinggarda Aboriginal Corporation (YAC)

YAC is established under the *Native Title Act 1993* (Cth) by the Yinggarda people to represent the Yinggarda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 5 July 2023, Woodside met YAC and gave a presentation about several EPs. Matters relevant to this EP included:
 - (1) YAC stated that plants, animals and the environment are inexorably linked to its culture and asked whether Woodside had undertaken environmental studies, whether these studies were ongoing and what environmental monitoring occurred after EPs were approved.
 - (1) Woodside responded that it had undertaken numerous environmental studies that form part of EPs and had an ongoing commitment to environmental studies and research. Woodside also explained that environmental monitoring was an ongoing activity and was committed to ongoing consultation with YAC and would take feedback if any new information in relation to risks came to light.
 - (2) YAC expressed concern about potential impacts to patterns of whales and potential collisions.
 - (2) Woodside responded by explaining controls that would be put in place to minimise impacts and risks to whales.
- On 19 July 2023, Woodside emailed YAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed YAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.
- (3) On 4 August 2023, YAC's legal representative emailed Woodside a request for a consultation agreement.
- (3) On 14 September 2023, Woodside emailed YAC's legal representative draft consultation framework principles.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed YAC advising of the proposed activity (Record of Consultation, reference 1.66) and provided a simplified Consultation Summary Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that YAC and its members may have within the EMBA, information on how YAC would like to engage, and requested that YAC provide information to other individuals as required. Woodside requested information be provided by 11 November 2023 and offered further information, support, and any assistance required by YAC to participate in consultation.

- **(3)** Between 13 October and 18 November 2023, Woodside exchanged emails with YAC (via legal representative) about the contents of the draft consultation framework/agreement (SI Report, references 26.1 – 26.4)
- On 28 December 2023, Woodside emailed YAC (via legal representative) to follow-up on the initial email sent on 11 October 2023 (SI Report, reference 26.5) Woodside:
 - Invited YAC to provide any information about any functions, interests or activities which may be affected by the activities to be carried out under this EP.
 - Asked YAC to notify Woodside of any other individuals and or organisations Woodside should consult with.
 - Sought feedback by the end of January as the EP would be submitted in February.
 - Offered to respond to questions or provide further information if needed.
- On 12 February 2024, Woodside emailed YAC via its legal representative (SI Report, reference 26.6). Woodside notified YAC that the consultation period would close on 23 February 2024 and Woodside would take an ongoing consultation approach after this date.

Ongoing engagement:

- **(3)** On 8 March 2024, Woodside emailed YAC (via legal representative) a draft consultation agreement for YAC's consideration, including the aims of consultation, proposed consultation agreement details and a consultation meeting framework (SI Report, reference 26.7).
- Between 12 March and 10 May 2024, Woodside and YAC (via legal representative) exchanged emails relating to YAC's consultation costs and the possibility of meeting the YAC Board (SI Report, references 26.8 – 26.12).
- Between 15 and 16 July 2024, Woodside and YAC and GAC exchanged emails and phone calls to arrange a meeting on 18 July 2024 (SI Report, references 26.13 – 26.15).
- On 18 July 2024, Woodside met with the YAC Board (SI Report, reference 26.16). Matters discussed relevant to this EP included:
 - **(4)** Support for education and training including ranger programs.
 - **(3)** Possibility of setting up workshops to discuss the formalisation of an agreement between Woodside and YAC.
- On 26 July 2024, Woodside emailed YAC (via legal representative) a letter (SI Report, reference 26.17). Matters relevant to this EP included:
 - **(4)** Woodside would keep YAC informed about Woodside's consideration of ranger initiatives.
 - **(3)** Woodside looked forward to receiving YAC's feedback on the consultation framework and to hearing when YAC would like to meet again.
 - Woodside was committed to continuing consultation with Traditional Custodians beyond the submission of EPs and this would not be YAC's only opportunity to engage with Woodside.
 - Woodside invited YAC to share information with other organisations and individuals.
- On 10 October 2024, Woodside emailed YAC's legal representative regarding this EP, referring to correspondence sent to YAC on 11 October 2023, 28 December 2023 and 12 February 2024 (SI Report, reference 26.18) The email stated:
 - Consultation for this EP opened on 11 October 2023 when Woodside provided YAC consultation information.
 - The EP was now publicly available on NOPSEMA's website (and provided a link) and is being assessed by NOPSEMA.

- Woodside would shortly resubmit this EP for further assessment and that the EP will be substantively the same as that published on the website and will include relevant feedback obtained during consultation.
- Any feedback, claims or objections about the adverse impacts (if any) relating to the EP that YAC would like Woodside to consider as part of this resubmission, to be provided to Woodside no later than 24 October 2024.
- Woodside attached a table displaying cultural values previously provided by YAC. These were:
 - (1) YAC had noted that marine plants and animals including whales, turtles and the environment generally were inexorably linked to its culture.
 - (1) Woodside would record YAC's cultural and environmental values in the proposed EP.
- Feedback could be provided by email, phone, directly to the engagement team, or directly to NOPSEMA and providing a range of contact details.
- Woodside acknowledged consultation for this EP had occurred in parallel with discussions about a consultation framework/agreement.
- Woodside had provided sufficient information, allowed a reasonable period of time for consultation and given a reasonable opportunity to provide details about the adverse impacts of the activity on YAC's functions, interests or activities, and looked forward to progressing discussions with YAC on framework agreements separately.
- Feedback could continue to be provided during the life of the EP, including after consultation for the EP had closed, during assessment of the EP, and after the EP has been accepted by NOPSEMA, and that Woodside would continue to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP.
- Should a claim or objection be received following the acceptance of the EP, that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside would apply its Management of Change and Review process as appropriate.
- On 21 October 2024, Woodside emailed YAC a reminder about this EP (SI Report, reference 26.19). The email included:
 - A reference to the consultation email update for this EP sent to YAC on 10 October September 2024.
 - A reminder that consultation for the preparation of this EP resubmission closes on 24 October 2024.
 - A request for information on how YAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with YAC to understand how it would like information to be managed.
 - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for YAC to provide information about the proposed activity to other individuals, as required.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) YAC stated that plants, animals and the environment are inexorably linked to its culture and asked whether	(1) Woodside assessment: Woodside acknowledges YAC's feedback that plants, animals and the	(1)

Woodside had undertaken environmental studies, whether these studies were ongoing and what environmental monitoring occurred after EPs were approved.	environment are inexorably linked to its culture. Woodside has undertaken numerous environmental studies, has an ongoing commitment to research and conducts environmental monitoring after EPs are accepted. Woodside response: Woodside has advised YAC that it has undertaken numerous environmental studies, has an ongoing commitment to research and conducts environmental monitoring after EPs are accepted. Woodside has also advised YAC that it continues to take feedback for the life on an EP and will inform YAC of any new information in relation to risks.	Woodside has updated Section 4.9.4 to record YAC's interests and potential cultural values. Potential impact on these, including controls are detailed in Section 4.9.4. Woodside's commitment to ongoing engagement with YAC including informing YAC if new information becomes available about potential risks is detailed in Section 5.7. Woodside's environmental controls are described in Section 6.
(2) YAC expressed concern about potential impacts to patterns of whales and potential collisions.	(2) Woodside assessment: Woodside has noted YAC's interest in whales and has controls in place to minimise impacts and risks to whales. Woodside response: Woodside has advised YAC that controls are put in place to minimise impacts and risks to whales.	(2) Woodside has updated Section 4.9.4 to record YAC's interests and potential cultural values. Information about whales and migration patterns is recorded in Sections 4.6. Potential impact on these, including controls are detailed in Section 6.
(3) YAC requested a consultation agreement with Woodside	(3) Woodside assessment: An agreement with YAC aligns with Woodside's <i>Program of Ongoing Engagement with Traditional Custodians</i> and will frame ongoing consultation processes. Woodside response: Woodside provided a draft consultation agreement to YAC in March 2024. Discussions about this agreement are ongoing. YAC's request for a consultation agreement is not a pre-requisite for consultation under regulation 25 of the Environment Regulations. Sufficient information to allow informed assessment has already been provided by other means, including summary sheets developed by Indigenous staff. Woodside has also provided a reasonable period and opportunity for consultation. On 10 October 2024 Woodside reiterated to YAC that consultation for this EP had occurred in parallel with discussions about the consultation agreement.	(3) Not required.

(4) YAC enquired about support for education and training including ranger programs.	(4) Woodside assessment: Woodside considers value in having rangers on the ground trained up in the highly unlikely event of an oil spill. It would be beneficial to an immediate response in an emergency situation. Woodside response: Woodside looks forward to hearing about YAC's plans for a ranger program and will keep YAC informed about Woodside's consideration of ranger initiatives.	(4) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with YAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: • Woodside sought direction on YAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to YAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan."		

- Advised that YAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- Woodside provided further information to YAC on 10 October 2024, which included:
 - The dates Woodside emailed YAC about the proposed activity.
 - That the original consultation commenced on 23 October and closed on 20 November 2023.
 - A link to the publicly available EP on NOPSEMA's website.
 - Confirmation that Woodside will resubmit the EP for further assessment.
 - That feedback, claims or objections about the adverse impacts (if any) relating to the EP that YAC would like Woodside to consider as part of the resubmission, should be provided to Woodside by 24 October 2024.
 - That discussions relating to framework agreements can occur in parallel to EP consultation.
 - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with YAC in October 2023, with a further consultation period in October 2024.
- Woodside has addressed and responded to YAC over 27 months, demonstrating a "reasonable" period of consultation.

Woodside asked YAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YAC functions, interests or activities.

Kariyarra Aboriginal Corporation (KAC)

Kariyarra is established under the *Native Title Act 1993* (Cth) by Kariyarra people to represent the Kariyarra people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Historical engagement:

- On 18 July 2023, Woodside emailed KAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that KAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed KAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.
- On 22 September 2023, KAC (via legal representative) emailed Woodside a letter with matters relevant to this EP include:
 - (1) An agreement which provides the most effective tool for the effective and ongoing consultation by Woodside with KAC.
 - An agreed budget to fund (among other things) preparation of Agreement, meetings, and specialist advice.
 - (2) Noting that KAC asserted sea rights in their native title claim. (Note: Native title was found by the Federal Court not to exist in the sea in the Kariyarra determination).
 - Contact protocols going forward.
- On 28 September 2023, KAC's legal representative emailed Woodside . The email attached a letter dated 22 September, referring to another activity more broadly setting out:
 - Proposed negotiations for a consultation protocol and co-management agreement.
 - (2) Referring to values and interests in Sea Country.
 - (2) Traditional fishing and gathering rights in the ocean.
 - (2) Presence of mythic snakes.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, Woodside emailed KAC advising of the proposed activity (Record of Consultation, reference 1.67) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that KAC and its members may have within the EMBA, information on how KAC would like to engage, and requested that KAC provide information to other individuals as required.
- Between 20 – 26 October 2023, several emails (some via KAC's legal representative) were exchanged in relation to consultation costs and Woodside reiterated the need for a reasonable quote (SI Report, reference 27.1 – 27.7).
- On 14 November 2023, KAC (via legal representative) emailed Woodside in relation to costs of consultation meetings noting that they had taken their concerns to the Environment Defenders Office (EDO) (SI Report, reference 27.8).
- (1, 2) On 22 November, Woodside emailed KAC (via legal representative) reiterating a preparedness to fund consultation for consultation meetings and noting that Woodside were looking at implementing further environmental controls in relation to operations to reduce or remove any potential impact to Kariyarra Sea Country. Woodside said they wished to progress the framework agreement and suggested a full day meeting with KAC. The agreement could set out a protocol for ongoing

consultation on EPs where consultation for purposes of developing an EP is closed, and for consultation on development of EPs for new activities (SI Report, reference 27.9).

- **(1)** Between 23 – 29 November 2023, KAC (via legal representative) emailed Woodside (SI Report, reference 27.10 – 27.13):
 - Agreeing to Woodside’s proposal in the email of 22 November 2023.
 - Requesting a draft protocol and suggesting dates for a meeting between KAC and Woodside.
 - Seeking costs already incurred by KAC’s legal representative to KAC.
 - Confirming a meeting of 5 December 2023 in Karratha with KAC, including meeting agenda and location details, and quotes for meeting costs and reviewing the draft consultation protocol.
 - Requesting a copy of the draft consultation protocol.
- **(1)** On 29 November 2023, Woodside emailed KAC (via legal representative) attaching Woodside’s Program of Ongoing Consultation, a revised Agenda and suggesting the protocol between KAC and Woodside would set out (SI Report, reference 27.14):
 - How Woodside and KAC would consult, the basic procedure for initial and ongoing consultation in relation to activities.
 - An agreement as to how Woodside would provide information to KAC.
 - How KAC would provide feedback and how Woodside represents that into submissions.
 - An agreed to schedule of rates.
 - How the outputs of the consultations are managed.
- On 29 November 2023, KAC (via legal representative) emailed Woodside with an amended proposed Agenda for the upcoming meeting (SI Report, reference 27.15).
- On 5 December 2023, Woodside and KAC met in Port Hedland (SI Report, reference 27.16). At the meeting Woodside:
 - **(1)** Presented on an Engagement Protocol.
 - Presented the regulatory context.
 - Discussed why Woodside were talking to KAC.
 - Displayed the EMBA and how it was developed.
 - Showed projects open for ongoing consultation.
 - Spoke to what Woodside were seeking to understand from KAC:
 - **(2)** How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?

- Is there anyone else Woodside should consult with about the activities?
- (3) KAC asked how Woodside maintain the validity of controls over periods of times, sighting turtles as an example in terms of whether current controls would be sufficient into the future.
 - (3) Woodside noted that there is ongoing monitoring and Woodside would apply its Management of Change and Revision process to address controls.
 - Noted the EPs subject of ongoing consultation, including this EP.
 - Spoke to planned and unplanned risks.
- (2) KAC gave a presentation to Woodside on their Sea Country rights and duties. This included:
 - Accessing Sea Country for fishing, trapping, crabbing catching turtle, hunting dugong, using stingray barbs for spears and collecting shellfish.
 - Visiting offshore islands at low tide.
 - Passing on traditional knowledge to children.
 - Secret habitat totems.
 - Having duties to look after and protect all of KAC's Sea Country.
- KAC outlined their consultation requirements to Woodside including:
 - (2) To co-designed and co-manage an approach to protecting Sea Country.
 - (1) To establish a consultation agreement with Woodside and have ongoing input into EPs.
 - (4) To fund sea rangers.
 - To ensure a positive and collaborative relationship.
- (1) On 13 December 2023, KAC (via legal representative) emailed Woodside with outcomes of the 5 December meeting, confirming availability for a workshop in March 2024 and that KAC and Woodside aim to reach agreement on an engagement protocol by mid-2024 (SI Report, reference 27.17).
- (1) On 20 December 2023, Woodside emailed KAC (via legal representative) confirming the process for ongoing consultation, noting information to be included in this EP provided by KAC and noting that Woodside looks forward to reaching agreement with KAC on consultation process (SI Report, reference 27.18).
- (2) On 20 December 2023, KAC (via legal representative) emailed Woodside noting further information regarding Sea Country features and values KAC wish noted within EPs (SI Report, reference 27.19).
- (1) (1) Between 20 December 2023 – 4 April 2024, KAC (via legal representative) and Woodside exchanged emails (SI Report, reference 27.20 – 27.29), that communicated the following:
 - KAC acknowledging that it looked forward to progressing an agreement in 2024 between itself and Woodside.
 - KAC expressing interest in signing a consultation agreement with Woodside and informed Woodside that the letter has been approved for signing by the Corporation Chair and waits for Woodside's response.
 - KAC expressing interest in signing a consultation agreement with Woodside .

- (1) Woodside thanking KAC for its emails and attaching a draft consultation agreement letter outlining the objectives, terms and conditions, and proposed consultation schedule with KAC .
- KAC requesting a Word version of the letter sent on 21 February 2024 and Woodside subsequently emailing the requested version of the letter to KAC.
- (1) KAC sending to Woodside an edited draft agreement for consideration and Woodside confirming receipt of draft agreement.
- (1) Woodside returning the draft agreement with edits, comments for requests for further information.
- (1) KAC raising concerns regarding Woodside's edits and seeking further instruction from KAC. No further response from Kariyarra regarding this matter.

Ongoing engagement:

- Between 26 June 2024 – 28 August 2024, Woodside and KAC exchanged emails (SI Report, reference 27.30 – 27.34) which included the following:
 - Woodside requested if there were further instructions from KAC on the draft agreement and proposed amendments.
 - (1) KAC's legal representative advised that the consultation agreement and recent Woodside EPs would be addressed by KAC's in-house counsel. The in-house counsel would revert to Woodside about the proposed agreement and EP consultation.
 - Woodside requested contact details for KAC's in-house counsel.
 - KAC's in-house counsel KAC confirmed it was no longer represented by its former legal representative. The in-house counsel enquired about Woodside's availability for a phone call or online meeting to discuss and plan next steps.
 - Woodside offered to speak on the phone or meet in person.
- On 29 August 2024, Woodside spoke to KAC on the phone (SI Report, reference 27.35). During the conversation:
 - Woodside confirmed its commitment to building meaningful relationships with First Nations groups.
 - KAC confirmed it had recruited a new CEO.
 - (1) KAC expressed interest in negotiating a consultation agreement.
 - (1) Woodside advised that negotiation of the consultation agreement work would run in parallel with EP consultation.
 - Woodside confirmed availability to consult and willingness to travel for meetings.
 - (1) KAC confirmed it wanted to “start fresh” and requested a copy of the draft agreement.
 - KAC requested an online meeting on 3 September 2024.
 - Woodside offered to provide a copy of its presentation ahead of time to allow KAC to review and distribute it to its Board prior to the meeting.
 - KAC requested information about Woodside assets and Woodside advised it has no assets within the determination.
 - Woodside explained how EMBA's are used as part of the methodology to ascertain and contact relevant people.
- On 3 September 2024, Woodside emailed its presentation to KAC for a meeting that day (SI Report, reference 27.36). Matters relevant to this EP that were discussed included:
 - Woodside's commitment to working with First Nations communities.

- How Woodside consults with First Nations communities, including ongoing consultation on EPs.
- On 3 September 2024, Woodside and KAC met virtually (SI Report, reference 27.37). Matters discussed included the following:
 - KAC wanted to build a valuable relationship with Woodside.
 - KAC advised it had undergone a recent internal restructure resulting in a new CEO, General Counsel and Native Title Representative.
- (1) On 3 September 2024, Woodside provided KAC with a copy of the draft consultation agreement originally provided in February 2024. KAC acknowledged receipt of the email. (SI Report, references 27.38 – 27.39).
- On 4 September 2024, Woodside travelled from Karratha to South Hedland to meet KAC in-person (SI Report, reference 27.40). Matters discussed:
 - (1) KAC expressed a desire to finalise the consultation agreement.
 - (1) Woodside confirmed that consultation agreement negotiations run in parallel to EP consultations and it was important KAC provide feedback before the closure of consultation for each EP.
 - Woodside confirmed feedback deadlines are in consultation emails.
 - Woodside also confirmed that feedback is open for the life of an EP.
 - (4) KAC advised it would like to discuss opportunities with Woodside to support its ranger program. (4) Woodside replied that it was looking into a ranger assistance program.
- On 9 September 2024, Woodside invited KAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 3 October 2024, Woodside invited KAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 1 April 2025, Woodside telephoned KAC (SI Report, reference 27.41). During the discussion both parties tentatively agreed to meet on 30 April 2025 to discuss two EPs unrelated to this activity. Woodside acknowledged the importance of maintaining ongoing relationships with relevant PBCs to ensure Woodside remains aware of the cultural interests and values to each group.
- On 30 April 2025, Woodside met KAC in Port Hedland about unrelated EPs (SI Report, reference 27.42). Matters discussed relating to this EP include:
 - Woodside explained EPs, consultation processes and EMBA's.
 - Woodside presented cultural values that KAC had previously provided.
 - (5) KAC sought clarity of impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event. (5) Woodside answered questions about these issues during the meeting and offered to provide information in a written response.
 - (6) KAC queried the role of Traditional Owners in the event of a spill. (6) Woodside provided an overview on its emergency response process and how it was working with the Government to implement additional training opportunities for ranger groups.
 - (7) KAC queried which shipping channels are used as they wanted to understand the risks associated with ships travelling closely to their determination. (7) Woodside took the question on notice.

- (8) KAC expressed a desire to enter into a consultation agreement. (8) Woodside accepted this as an ongoing action noting that these discussions would not delay EP submission deadlines.
- (9) Islands off the coast of Port Hedland are extremely important to KAC (Little Turtle, North Turtle and Bedout). (9) Woodside noted this feedback.
- (10) KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes. (10) Woodside explained that since these historic incidents, governments have set up regulatory bodies including NOPSEMA to regulate industry.
- On 5 May 2025, Woodside emailed KAC to confirm matters discussed during the 30 April 2025 meeting (SI Report, reference 27.43) this included:
 - (8) KAC's desire to enter into a consultation agreement. (8) Woodside notes this as an ongoing action noting that these discussions occur in parallel to EP consultation.
 - (5) KAC sought clarity of impacts to the health of food sources and other marine life that could threaten sea life.
 - (7) KAC queried which shipping channels are used as it wanted to understand the risks associated with ships travelling closely to its determination.
 - (6) KAC queried contact points in the event of a spill.
 - (10) KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes.
- Between 20 and 27 May 2025, Woodside and KAC exchanged emails and met online to follow-up on matters raised during the 30 April 2025 meeting (SI Report, references 27.44 – 27.47).
- On 28 May 2025, Woodside and KAC spoke on the phone (SI Report, reference 27.48) where the following items relevant to this EP were discussed:
 - (8) KAC's desire to enter into a consultation agreement and requested Woodside resend the most recent consultation agreement draft for KAC to consider and respond. (8) Woodside notes this as an ongoing action noting that these discussions occur in parallel to EP consultation.
 - Woodside offered to host a consultation 'learning' workshop to help build an understanding of the EP consultation process.
 - Woodside committed to provide a formal response to KAC.
- On 3 June 2025, Woodside emailed KAC responses to questions raised during their meeting on 30 April 2025 (SI Report, reference 27.49). Responses included:
 - (8) Woodside noted that it had provided KAC with a draft consultation agreement in February 2024 and that discussions about this agreement had occurred in parallel to consultation for unrelated EPs to this activity.
 - (5) Woodside acknowledged KAC's connection to Sea Country and provided details about risks and mitigation measures that related to the ecological integrity of marine fauna.
 - (6) Woodside provided information about contact procedures in the highly unlikely event of a spill.
 - (7) Woodside provided information about shipping channels, and that ships were sometimes required to travel from Dampier.
 - (9) Woodside acknowledged that islands off Port Hedland are culturally important to KAC - Little Turtle, North Turtle and Bedout. This information would be recorded in EPs.
 - (10) Woodside provided information about two historic incidents not related to Woodside that had been raised by KAC in the 30 April 2025 meeting. Woodside explained the role of NOPSEMA and that it took a robust and systematic approach to the environmental management of petroleum activities.

- On 21 August 2025, Woodside met with KAC in Port Hedland to consult on EPs not related to this activity (SI Report, reference 27.50). During the meeting:
 - (11) KAC queried where Woodside had collated its list of KAC's cultural values. (11) Woodside stated it had sourced KAC's cultural values via consultation and feedback from KAC when consulting on other EPs and desktop research using publicly available literature.
 - (12) KAC provided additional information on marine species identified as cultural values which include: shellfish, cockles, oysters, clam shells, con shells, mullets and sea cow (dugong), as well as the importance of (13) river systems as food chains (12, 13) Woodside acknowledged this new information and would update its records and current and future EPs accordingly.
 - (14) KAC asked if Woodside considered historical mapping of cultural values and prehistoric coastlines when understanding the closeness of the activity to KAC's Native Title determination. (14) Woodside stated that underwater archaeologists are often engaged to assess underwater marine life when undertaking its activities.
- (11, 12, 13) On 17 September 2025, Woodside emailed KAC updated information about its record of Cultural Values and responses to questions taken on notice during their 21 August 2025 meeting (SI Report B, reference 27.15) This included an answer to a query about consideration of cyclone events in spill modelling. Woodside provided information about how modelling captures large-scale ocean changes caused by cyclones.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) KAC have noted that they want to engage on matters with Woodside and would like to develop an Engagement Protocol for (among other things) ongoing input into EP's and a collaborative relationship with Woodside.	(1) Woodside assessment: An agreement with KAC aligns with Woodside's <i>Program of Ongoing Engagement with Traditional Custodians</i> and will frame ongoing consultation processes. Woodside response: Woodside will finalise the draft agreement with KAC which was sent to KAC in February 2024. It will be used to frame ongoing consultation during the life of the EP. Woodside and KAC have agreed to hold a workshop in early 2024 to progress towards finalising the agreement between KAC and Woodside.	(1) Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented. The draft agreement with KAC (among other things) will set out the process for ongoing engagement. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i>, (Appendix G). Woodside will continue to consult following acceptance of the EP, as set out in Section 7.15 of the EP.
(2) KAC has informed Woodside about its Sea Country rights including during a face-to-face meeting on 5 December 2023, it mentioned: Fishing, trapping, crabbing catching turtle, hunting dugong, and using stingray barbs for spears and collecting shellfish.	(2) Woodside assessment: Woodside accepts that KAC may have Sea Country values within the EMBA for the EP. Woodside response: Woodside has noted the KAC's values and interests in Sea Country in Section 4.9.	(2) Woodside recognises KAC's connection to Sea Country (Section 4.9). Potential impacts on Cultural Features and Heritage Values are assessed in Section 6.10 of the EP.

• Visiting offshore islands at low tide. • Secret habitat tokens. • Having a duty to look after and protect Sea Country.		
(3) KAC queried how the validity of current controls are maintained and appropriate into the future.	(3) Woodside assessment: Management of changes are in accordance with regulations 38 and 39 of the Environment Regulations. Appropriate controls and currency of those controls remain valid through applying new advice from external stakeholders and understanding changes in the environment. Woodside response: Woodside applies its Management of Change and Revision process to address controls.	(3) Management of Change and Revision process (refer to Section 7.6.1 of the EP). No additional measures or controls are required.
(4) KAC would like to discuss opportunities for Woodside to support its ranger program	(4) Woodside assessment: Woodside acknowledges the value in having trained rangers available in the highly unlikely event of an oil spill and agrees it would be beneficial to an immediate response in an emergency situation. Woodside response: Woodside is reviewing a ranger assistance program and will provide details to KAC once this has matured, and notes a ranger program is not relevant to the activity under this EP.	(4) The Program for Ongoing Engagement with Traditional Custodians (Appendix G) includes commitments to social investment to support Indigenous Ranger programs, and support for Indigenous oil spill response capabilities.
(5) KAC sought clarity of impacts to the health of food sources and other marine life including whether there were any diseases that could threaten sea life as a result of an adverse event.	(5) Woodside assessment: Woodside acknowledges KAC's connection to Sea Country. Woodside has identified potential impacts and risks to the ecological integrity of marine fauna and put in place mitigation measures. Woodside response: Woodside has provided a written response to KAC explaining risks to marine life relating to another EP. Woodside has categorised these risks as highly unlikely events. Woodside has explained that clean up and remediation response activities would commence from the outset of an	(5) KAC's connection to Sea Country is identified in Section 4.9 of the EP. Risks and mitigation measures relating to marine life are details in Section 6. Measures relating to oil spills are covered in Appendix H – Oil Spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.

	incident in line with Woodside's Oil Pollution First Strike Plan.	
(6) KAC queried the role of Traditional Owners in the event of a spill.	(6) Woodside assessment: In the highly unlikely event of a spill, Woodside would enact its Oil Pollution First Strike Plan, which includes contacting the regulator, NOPSEMA and any relevant cultural authorities that may be affected. Woodside response: Woodside provided KAC with details of its Oil Pollution First Strike Plan and contact procedures.	(6) Measures relating to oil spills are covered in Appendix H – Oil Spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(7) KAC queried which shipping channels are used as they wanted to understand the risks associated with ships travelling closely to their determination.	(7) Woodside assessment: Ships are sometimes required to travel from the mainland (Dampier) to operational areas. Woodside response: Woodside informed KAC about the distance from KAC's Native Title claim determination to the operational area of another activity (for which this feedback was initially raised). Woodside also provided KAC with details about regulations governing vessel transport. Woodside has also provided details about its First Strike Plan.	(7) Measures relating exclusion zones and vessels are in Section 3.3 and 3.17 of the EP. Measures relating to oil spills are covered in Appendix H – Oil Spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(8) KAC expressed a desire to enter into a consultation agreement.	(8) Woodside assessment: Woodside provided KAC with a draft consultation agreement in February 2024. Woodside response: Woodside notes that while discussions about this agreement are ongoing, a consultation agreement is not a prerequisite for consultation, and consultation for EPs have occurred in parallel.	(8) No action required.
(9) Islands off the coast of Port Hedland are extremely important to KAC (Little Turtle, North Turtle and Bedout).	(9) Woodside assessment: Woodside acknowledges that islands off Port Hedland have cultural value to KAC.	(9) This information has been captured in Section 4.9 of the EP.

	Woodside response: Woodside has updated its records to reflect this and will include this information in Section 4.9.	
(10) KAC raised concerns about historic unplanned incidents (not involving Woodside) and asked for details about improvements to processes.	(10) Woodside assessment: Woodside takes a robust and systematic approach to environmental management of petroleum activities. Woodside response: Woodside explained that since these historic incidents, governments have set up regulatory bodies including NOPSEMA to oversee industry. In the unlikely event of a spill, Woodside would enact its First Strike Plan which would include contacting NOPSEMA and any affected cultural authorities. Woodside has oil pollution emergency plans and implements training and capability building programs in the regions where it operates.	(10) Measures relating to oil spills are covered in Appendix H – Oil Spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(11) KAC queried where Woodside had collated its list of KAC's cultural values.	(11) Woodside assessment: At the start of consultation for EPs, Woodside provides KAC with information on the Cultural Values it had collated for the group through consultation and publicly available literature. Woodside response: Woodside explained to KAC that it had sourced KAC's cultural values via consultation and feedback from KAC when consulting on other EPs and desktop research.	(11) No further action required.
(12) Cultural Value previously provided to Woodside: Marine Animals - Management of sea turtle nesting. - Impacts to whale migration (whales are connected to Songlines). Additional species identified during consultation for unrelated EPS include: - Shellfish	(12) Woodside assessment: This value has been identified through Woodside's data collection processes (consultation) and at a meeting with KAC on 21 August 2022. Woodside response: During consultation for an unrelated EP, KAC identified additional species. Woodside has updated its records and the EP to reflect this feedback.	(12) Woodside has updated Section 4.9 to record these interests and cultural values. Whale migration and turtle nesting has been included in Section 4.9 of the EP. Controls have been adopted where appropriate in Sections 6 of the EP.

• Cockles • Oysters • Clam shells, • Con shells • Mulletts • Sea cow (dugong),		
(13) River systems are important to the food chain.	(13) Feedback assessment: While river systems are not relevant for this EP, Woodside assesses environmental impacts of its EPs and puts in place appropriate mitigation measures. Feedback response: Woodside has informed KAC that it will update its records and current and future EPs accordingly.	(13) River systems are not relevant for this EP. Cultural values relating to river systems are in 4.9.
(14) KAC asked if Woodside considered historical mapping of cultural values and prehistoric coastlines when understanding the closeness of the activity to KAC's Native Title determination.	(14) Feedback assessment: Woodside engages a consultant to undertake underwater cultural heritage assessment when developing EPs with seabed contact activities. Feedback response: Woodside informed KAC that a maritime archaeologist is engaged to assess the potential for underwater cultural heritage when undertaking its activities.	(14) No further action required.
Woodside has addressed objections and claims as noted above.	Woodside has assessed the merits of any objection or claim (if any) about the adverse impact of the activity to which the EP relates as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on KAC preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that KAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with KAC in October 2023.
- Woodside has addressed and responded to KAC over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked KAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP). Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KAC functions, interests or activities.

Wirrawandi Aboriginal Corporation (WAC)

WAC is established under the *Native Title Act 1993* (Cth) by the Mardudhunera and Yaburara people to represent the Mardudhunera and Yaburara people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed WAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information.
- On 26 July 2023, Woodside emailed WAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed WAC advising of the proposed activity (Record of Consultation, reference 1.68) and provided a simplified Consultation Summary Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that WAC and its members may have within the EMBA, information on how WAC would like to engage, and requested that WAC provide information to other individuals as required. Woodside requested information be provided by 2 November 2023 and offered further information, support, and any assistance required by WAC to participate in consultation.
- On 3 October 2023, Woodside and WAC exchanged email correspondence on the logistics of booking a meeting to discuss the environment plan. Woodside offered to meet at a location suitable to WAC (SI Report, references 28.1 – 28.4).
- On 20 October 2023, WAC and Woodside met (SI Report, reference 28.5) and discussed:
 - Current EPs and how parties intended to support each other through the process.
 - Woodside's intention to ensure that WAC was adequately consulted on all relevant EPs.
 - WAC's current corporate restructure and the impact of this to engage in consultation.
 - (1)** WAC's interest in discussing a consultation framework/process once the new CEO was settled in.
- On 24 October 2023, Woodside sent a follow-up email enquiring if WAC had any questions relating to this EP and offering to schedule a consultation session with the members and/or Board of WAC (SI Report, reference 28.6).
- On 3 November 2023, Woodside emailed WAC following up regarding feedback on this activity and again attaching the Summary Information Sheet (Record of Consultation, reference 1.68). Woodside advised WAC it could take some additional time to consider the consultation. Woodside asked WAC to advise if it would like to set up a consultation meeting (SI Report, reference 28.7).

Ongoing engagement:

- On 19 December 2023, Woodside emailed WAC wishing a happy festive season, thanking WAC for its contributions throughout the year and offering availability for consultation sessions (SI Report, reference 28.8).
- On 19 December 2023, WAC emailed Woodside noting its thanks for Woodside support (SI Report, reference 28.9).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (1) On 6 March 2024, Woodside emailed WAC a draft consultation framework for consideration relating to EPs and Woodside's ongoing activities, including the aims of consultation, proposed consultation agreement details and a consultation meeting framework. Woodside invites WAC to propose a schedule of rates and other details relating to its engagements (SI Report, reference 28.10).
- On 6 March 2024, WAC requested a Word version of the draft consultation framework and Woodside provided it (SI Report, references 28.11, 28.12).
- On 5 September 2024, Woodside emailed WAC an invitation to its Quarterly Heritage Meetings (SI Report, reference 28.13).
- On 9 September 2024, Woodside invited WAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 25 September 2024, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.2).
- On 3 October 2024, Woodside invited WAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 10 October 2024, Woodside emailed WAC regarding this EP (SI Report, reference 28.14), referring to correspondence sent to WAC on 3 October 2023, 24 October 2023, 3 November 2023, and 19 December 2023, correspondence from WAC on 19 December 2023 and a meeting on 20 October 2023, including notifying WAC that:
 - Consultation for this EP opened on 3 October 2023 when Woodside provided WAC consultation information, and closed on 2 November 2023 .
 - The EP was now publicly available on NOPSEMA's website (and providing a link) and is being assessed by NOPSEMA.
 - Woodside would shortly resubmit this EP for further assessment. The EP would be substantively the same as that published on the website and would include relevant feedback obtained during consultation.
 - Any feedback, claims or objections about the adverse impacts (if any) relating to the EP that WAC would like Woodside to consider as part of this resubmission, to be provided to Woodside no later than 24 October 2024.
 - Woodside acknowledged discussions relating to a framework agreement had been ongoing and were yet to be completed, and that consultation for this EP had occurred in parallel.
 - Woodside requested WAC provide any additional feedback about this EP by 24 October 2024 and provided details about how to do so.
 - Woodside had provided sufficient information, allowed a reasonable period of time for consultation and given a reasonable opportunity to provide details about the adverse impacts of the activity on WAC's functions, interests or activities, and looked forward to progressing discussions with WAC on framework agreements separately.
 - Feedback could continue to be provided during the life of the EP, including after consultation for the EP had closed, during assessment of the EP, and after the EP has been accepted by NOPSEMA, and that Woodside would continue to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP.
 - Should a claim or objection be received following the acceptance of the EP, Woodside would apply its Management of Change and Review process.
- On 10 October 2024, WAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne (SI Report, reference 83.4). Matters relevant to this EP included:

- An explanation of State and Commonwealth regulatory requirements.
- An explanation of EMBA's and the process Woodside undertakes to identify Traditional Owner groups.
- How Traditional Owners could provide information to Woodside about cultural values, interests and activities.
- On 14 October 2024, Woodside was notified that cultural protocols relating to Sorry Business were in place for the Karratha and Roebourne area (28.15).
- On 21 October 2024, Woodside emailed WAC a reminder about this EP (SI Report, reference 28.16.8). The email included:
 - A reference to the consultation email update for this EP sent to WAC on 10 October September 2024.
 - A reminder that consultation for the preparation of this EP resubmission closes on 24 October 2024.
 - A request for information on how WAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with WAC to understand how it would like information to be managed.
 - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for WAC to provide information about the proposed activity to other individuals, as required.
- On 28 October 2024, Woodside attended WAC'S Board meeting (SI Report 28.17). Matters discussed that were relevant to this EP included:
 - Woodside's consultation processes.
 - **(2)** WAC asked about Woodside's spill reporting. **(2)** Woodside clarified its spill reporting processes.
- On 29 October 2024, WAC emailed Woodside to thank it for its presentation to the Board (SI Report, reference 28.18).
- On 15 November 2024, Woodside emailed WAC an invitation to its Quarterly Heritage meeting on 5 December 2024 (SI Report, reference 28.19).
- On 21 November 2024, NYFL emailed Woodside to advise that Sorry Business was taking part in the Roebourne Community (SI Report, reference 28.20).
- On 5 December 2024, WAC attended Woodside's Quarterly Heritage meeting (SI Report, reference 83.6). Matters discussed that were relevant to this EP include:
 - Woodside reminded attendees that it accepts feedback for the life of an EP.
 - Monthly community luncheons would be held in 2025.
- On 11 December 2024, Woodside became aware via a social media post from RRRKAC that due to the recent passings of two significant Elders cultural grieving protocols were underway (SI Report, reference 28.21).
- On 22 January 2025, Woodside emailed WAC a schedule for the 2025 Quarterly Heritage Meetings. WAC replied to acknowledge the email (SI Report, references 28.22 – 28.23).
- On 4 March 2025, Woodside emailed WAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 83.7).
- On 5 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.8).

- On 13 March 2025, WAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 83.9). Matters discussed and/or raised relating to this EP included:
 - That consultation is open for the life of any EP and Woodside can schedule consultation meetings at times that are convenient to the community.
 - A reminder that Woodside hosts a community luncheon/yarning circle for all local Traditional Owners.
- On 24 March 2025, Woodside emailed WAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 83.10).
- On 26 March 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 83.11).
- On 8 April 2025, Traditional Owner members from WAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.13).
- On 16 May 2025, Woodside emailed WAC a reminder about the Quarterly Heritage Meeting scheduled for 4 June 2025 (SI Report, reference 28.24).
- On 4 June 2025, Woodside hosted its Quarterly Community Heritage meeting with Traditional Owners attended by members of NAC and WAC (SI Report, reference 83.14). Matters discussed relevant to this EP included:
 - Woodside provided an overview of the EP consultation process.
- On 22 July 2025, Woodside met with WAC to discuss two unrelated EPs (SI Report, reference 28.25). Matters relevant to this EP included:
 - (3) WAC asked if a piece of cultural heritage is identified, how would Traditional Owners be informed. (3) Woodside explained this process to WAC and confirmed that relevant Traditional Owner groups would be notified.
 - (2) WAC mentioned a recent incident in the Exmouth Gulf involving hydrocarbon release during decommissioning and questioned the discrepancy between the reported media spill volume and the reported Woodside spill volume. (2) Woodside explained the response and mitigation measures and acknowledged the complexity of spill calculations.
 - (2) WAC asked if there was an investigation from the regulator regarding the hydrocarbon release and queried the outcome. (2) Woodside took the question on notice.
 - (4) WAC asked about the mitigation measures for whales including how whales are spotted at night. (4) Woodside explained mitigation measures for noise, whale and marine sightings, and vessel maintenance.
 - (5) WAC expressed interest in being involved in ranger programs and the potential for ranger fee-for-service opportunities. (5) Woodside acknowledged this and encouraged WAC to remain in contact with Woodside.
- On 29 July 2025, WAC emailed Woodside to follow up on the consultation meeting (SI Report, reference 28.26). Matters relevant to this EP included:
 - (6) WAC stated that its Board confirmed a position that WAC should be consulted by proponents in respect of EPs where the relevant EMBA intersects within a general radius of 120km from the mouth of the Fortescue River. (6) Woodside notes this feedback.
 - (5) WAC sought Woodside's support to further build the capacity of the ranger team so that Yaburara and Mardudhunera (YM) people can be involved in the identification of cultural values, monitoring of risks associated with activities under the EP. WAC requested details of the appropriate person within Woodside to write a letter in support of implementing WAC ranger activities.

- (7) WAC stated a preference for holistic, rather than piecemeal engagement and requested Woodside undertake bespoke rather than generalised engagement with WAC. (7) Woodside notes this feedback.
- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 83.15). Matters discussed relating to this EP included:
 - Cultural heritage update.
 - Training and contracting opportunities.
 - Project updates.
- On 2 December 2025, Woodside emailed WAC an invitation to Woodside's Quarterly Heritage Meeting on 3 December 2025, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community (SI Report, reference 28.27).
- On 3 December 2025, WAC attended Woodside's Quarterly Heritage Meeting, at which Woodside stated that consultation for future EPs would recommence in Q1 2026 and showed an example of new animations videos used to support EP consultation (SI Report, reference 83.16).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) WAC has requested that Woodside and WAC enter into a framework agreement to provide for ongoing meaningful consultation a desire for ongoing engagement and partnership through a Framework Agreement.	(1) Woodside Assessment: Woodside has confirmed and accepts that WAC is seeking to establish a framework agreement for the purposes of ongoing consultation with Woodside. Woodside Response: Separate from consultation under regulation 25 of the Environment Regulations, Woodside has sent a draft consultation agreement in March 2024 and will work with WAC to finalise the agreement.	(1) Although consultation for the purpose of regulations 25 of the Environment Regulations is complete, Woodside will continue to engage with WAC through ongoing engagement and continue to progress the consultation agreement as part of Woodside's Program of Ongoing Engagement (Appendix G). No additional measures or controls are required.
(2) During ongoing consultation, WAC asked Woodside about oil spill reporting.	(2) Woodside assessment: Woodside aligns with industry guidance about oil spill reporting. Woodside response: Woodside adopts appropriate controls to prevent a hydrocarbon spill and has controls in place to respond in the highly unlikely event of a hydrocarbon spill as demonstrated in Sections 6.8 of the EP and Appendix I	(2) Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix H and its Offshore Operations First Strike Plan is in Appendix I.
(3)	(3)	(3)

WAC asked if a piece of cultural heritage is identified, how would Traditional Owners be informed.	Woodside assessment: Woodside has processes in place to notify Traditional Owners if a piece of cultural heritage is identified during an activity. Woodside response: Woodside explained this process to WAC and confirmed that relevant Traditional Owner groups would be notified.	Processes relating to informing Traditional Owners are in Section 7.9 (Unexpected Finds Procedure).
(4) WAC asked about the mitigation measures for whales including how whales are spotted at night.	(4) Woodside assessment: Woodside includes mitigation measures for impacts on whales in its EPs. Woodside response: Woodside explained mitigation measures for noise, whale and marine sightings, and vessel maintenance.	(4) Mitigation measures relating to whales are in Section 6.7, 6.8 and routine reporting is outlined in Section 7.14.
(5) WAC expressed interest in being involved in ranger programs and the potential for ranger fee-for-service opportunities	(5) Woodside assessment: Woodside considers value in having rangers on the ground trained up in the highly unlikely event of an oil spill. It would be beneficial to an immediate response in an emergency situation. Woodside response: Woodside is in the process of developing a ranger funding program. WAC's request will be evaluated in accordance with the program's criteria upon its implementation. Woodside has provided ranger information to WAC.	(5) Ranger programs are able to be addressed as part of Woodside's Program of Ongoing Engagement (Appendix G).
(6) WAC should be consulted by proponents in respect of EPs where the relevant EMBA intersects within a general radius of 120km from the mouth of the Fortescue River.	(6) Woodside assessment: Woodside acknowledges this feedback. Woodside response: Woodside will consider this request for future EPs.	(6) No action required.
(7) During engagement about unrelated EPs, WAC stated a preference for holistic, rather than piecemeal engagement and requested Woodside undertake bespoke rather than generalised engagement with WAC.	(7) Woodside assessment: During Woodside's initial engagement with WAC on 17 June 2024 about this EP (6.2.38). Woodside requested WAC advise Woodside of its preferred method of consultation and if there was any support or specific information that WAC required as part of engagement.	(7) No action required.

	Woodside response: Woodside has met regulatory requirements for sufficient information, reasonable time, and reasonable opportunity for consultation. Woodside will respond to WAC's request.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wirrawandi Aboriginal Corporation (WAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on WAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to WAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. - Advised that WAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). - Woodside provided further information to WAC on 10 October 2024, which included: - The dates Woodside emailed WAC about the proposed activity. - That the original consultation commenced on 23 October and closed on 20 November 2023.		

- A link to the publicly available EP on NOPSEMA's website.
- Confirmation that Woodside will resubmit the EP for further assessment.
- That feedback, claims or objections about the adverse impacts (if any) relating to the EP that WAC would like Woodside to consider as part of the resubmission, should be provided to Woodside by 24 October 2024.
- That discussions relating to framework agreements can occur in parallel to EP consultation.
- That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with WAC in October 2023, with a further consultation period in October 2024.
- Woodside has addressed and responded to WAC over 25 months, demonstrating a "reasonable period" of consultation.

Woodside asked WAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WAC functions, interests or activities.

Robe River Kuruma Aboriginal Corporation (RRKAC)

RRKAC is established under the *Native Title Act 1993* (Cth) by the Robe River Kuruma people to represent the Robe River Kuruma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed RRKAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed RRKAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* for further details of this correspondence

Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed RRKAC advising of the proposed activity (Record of Consultation, reference 1.69) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that RRKAC and its members may have within the EMBA, information on how RRKAC would like to engage, and requested that RRKAC provide information to other individuals as required.
- On 24 October 2023, Woodside sent a follow-up email enquiring if RRKAC had any questions relating to this EP and offering to schedule a consultation session with the members and/or board of RRKAC. No response has been received (SI Report, reference 29.1).

Ongoing engagement:

- Between 14 and 16 November 2023, Woodside and RRKAC exchanged emails about consultation support (SI Report, references 29.2, 29.3, 29.4).
- On 19 December 2023, Woodside emailed RRKAC wishing a happy festive season, thanking RRKAC for their contributions throughout the year and offering availability for consultation sessions (SI Report, reference 29.5).
- On 9 January 2024, Woodside emailed RRKAC following up on this activity and offering an opportunity for discussion. Woodside advised RRKAC of the best contact after 31 January 2024 (SI Report, reference 29.6).
- On 11 January 2024, Woodside and RRKAC (SI Report, reference 29.7), held a telephone discussion:
 - RRKAC have recently employed new personnel, RRKAC noted that once the new employees were settled in, RRKAC would be happy to consult with Woodside on relevant EPs.
 - **(1)** RRKAC noted that some RRKAC Country is on the coast (and would be affected by an oil spill or another such environmental incident), they feel that EMBA's are far too broad, and the areas covered by EMBA's are far too big and unfeasible.
- On 20 March 2024, Woodside and RRKAC held an online meeting (SI Report, reference 29.8). Woodside outlined
 - The purpose of engagement with Traditional Owner groups and PBC's.
 - **(1)** How Woodside consults on Environment Plans and seeks feedback on heritage and cultural values.
 - Opportunities for social investment programs such as rangers and opportunities for future meetings.
- On 26 March 2024, Woodside emailed RRKAC to follow up on the meeting, and to outline the upcoming activities for consultation, that reasonable financial support is available for meetings for the purpose of consultation, to ask for guidance on their preferred next steps, and to provide Woodside's Program of Ongoing Engagement (SI Report, reference 29.9).
- On 9 September 2024, Woodside invited RRKAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 3 October 2024, Woodside invited RRKAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 11 December 2024, Woodside became aware via a social media post from RRKAC that due to the recent passings of two significant Elders cultural grieving protocols were underway (SI Report, reference 29.10).

- On 19 December 2024, RRKAC emailed Woodside about a number of matters relating to other activities (SI Report, reference 29.11). In relation to the proposed activity and ongoing consultation, RRKAC:
 - (2) Considers its Heritage Advisory Committee (HAC) as the relevant person for the purpose of consultation and advised Woodside that RRKAC has increased capacity and will be in a position via its HAC to engage in consultation with Woodside in 2025. This involves subject matter experts reviewing the relevant material to be able to make a formal assessment and participating in meetings where Woodside present information to RRKAC.
 - (2) Advised Woodside that RRKAC has scheduled four HAC meetings in 2025 and inviting Woodside to a meeting on 18 February 2025.
 - (3) Informed Woodside that RRKAC is keen to discuss a seascape scale approach to understanding the potential risks and impacts to submerged heritage values, in relation to potential management measures contained in EPs.
- (2) On 14 January 2024, Woodside accepted RRKAC's invitation to the HAC meeting on 18 February 2025 (SI Report, reference 29.12).
- (3) On 14 January 2024, Woodside replied to RRKAC's email of 19 December 2024 responding to a number of claims by RRKAC relating to other EPs (SI Report, reference 29.13). In regard to seascape mapping, Woodside stated it did not have plans to conduct bathymetric surveys but was open to meeting with RRKAC to discuss publicly available datasets and Woodside's own mapping of deeper water areas.
- (2) On 15 January 2025, RRKAC emailed Woodside a response to its email on 14 January 2025 and provided details relating to the planned HAC meeting (SI Report, reference 29.14).
- (2) On 29 January 2025, Woodside emailed RRKAC following a phone call, the email confirmed agreement between Woodside and RRKAC to defer Woodside attending the HAC meeting until May 2025 (SI Report, reference 29.15).
- On 24 March 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 83.10).
- On 7 April 2025, Woodside emailed RRKAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 83.12).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) In response to a previous activity, RRKAC noted that some RRKAC country is on the coast (and would be affected by an oil spill or another such environmental incident), that EMBA are broad, and the areas covered by EMBA are big and unfeasible.	(1) Woodside assessment: Woodside aligns with industry guidance in developing the EMBA. Many replicate model simulations are completed to understand the potential behaviour of the worst-case release under various wind, wave and current conditions and these are combined to create an overall EMBA. Woodside response: Woodside has explained the consultation process to RRKAC. Woodside adopts appropriate controls to prevent a hydrocarbon spill and has controls in place to respond in the highly unlikely	(1) Woodside's Oil Spill Preparedness and Response Mitigation Assessment is in Appendix H and its Offshore Operations First Strike Plan is in Appendix I.

	event of a hydrocarbon spill as demonstrated in Sections 6.8 of the EP and Appendix I	
(2) RRKAC informed Woodside that it considers RRKAC's Heritage Advisory Committee (HAC) as the relevant person for the purpose of consultation and advised Woodside that RRKAC has increased capacity and will be in a position via its HAC to engage in consultation with Woodside in 2025. RRKAC also advised Woodside that RRKAC has scheduled four HAC meetings in 2025 and inviting Woodside to a meeting on 18 February 2025.	(2) Woodside assessment: Woodside acknowledges that RRKAC's HAC has increased capacity to regularly meet with Woodside in 2025 for the purpose of EP consultation. Woodside has emailed RRKAC consistently throughout the period of time that this EP has been open for consultation and has provided RRKAC with sufficient information, a reasonable opportunity and reasonable time to provide feedback for EPs. Woodside response: Woodside has accepted RRKAC's invitation to meet with HAC throughout 2025 and present information about current and future EPs. Woodside also confirms that it has complied with regulation 25 of the Environment Regulations for the purposed of this activity and related EP.	(2) Not required.
(3) RRKAC raised the potential of a bathymetric survey of the coastline, working with all relevant coastal groups.	(3) Woodside Assessment: Woodside does not have plans to conduct regional bathymetric surveys but there are publicly available datasets covering coastal regions. Woodside Response: Woodside is seeking a meeting with RRKAC to find ways to interpret existing data sets to generate information which may be useful to RRKAC.	(3) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation Robe River Kuruma Aboriginal Corporation (RRKAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on RRKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to RRKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that RRKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with WAC in October 2023.
- Woodside has addressed and responded to RRKAC over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked RRKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on RRKAC functions, interests or activities.

Ngarluma Aboriginal Corporation (NAC)

NAC is established under the *Native Title Act 1993* (Cth) by the Ngarluma people to represent the Ngarluma people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed NAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. This email also requested that NAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed NAC Woodside's planned Program of Ongoing Engagement with Traditional Custodians.
- (1) On 18 September 2023, NAC emailed Woodside proposing the establishment of a joint working group to manage the consultation process for Woodside's Environment Plans. NAC explained the purpose of the group and noted the positions and roles of the NAC representatives that would be included in the working group. NAC also discussed seeking funding from Woodside to support the formation of this new working group and pointed out key actions moving forward, the timeframe of events and attached a budget summary.
- (1) On 10 October 2023, Woodside emailed NAC approving the proposal in principle and affirming that Woodside is looking forward to ongoing consultation. Woodside stated that some administrative process still needed to be arranged and asked for NAC's availability to schedule a meeting.
- (1) (1) Between 19 October – 13 November 2023, Woodside and NAC exchanged emails regarding:
 - Previous correspondence about the establishment of a joint working group and Woodside's consultation process.
 - The circulation of a draft engagement letter and NAC requesting an expected agenda for future meetings.
 - Woodside providing NAC with a list of priorities for discussion and EPs, in order of priority, that require consultation.
 - NAC informing Woodside that it would share the draft engagement protocol on that day and would address the matters via a working group.
 - NAC also requested the timeframe to work through the EP due for consultation.
 - NAC submitting a draft engagement protocol letter and scheduling a meeting.
- (1) On 13 November 2023, NAC emailed Woodside following a telephone discussion about other unrelated matters to this EP noting a lack of availability to consult on EPs prior to 25 November 2023 and requesting a response to the draft Engagement Protocol.
- (1) On 13 November 2023, Woodside emailed NAC acknowledging that Woodside noted that NAC was not available for consultation prior to 25 November 2023, noting that Woodside would respond to the draft engagement protocol as soon as possible.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* and *Angel Facility Operations EP (Appendix F and SI Report)*.

Summary of information provided and record of consultation for this EP:

- On 17 November 2023 Woodside emailed NAC advising of the proposed activity (Record of Consultation, reference 1.70) and provided a simplified Consultation Summary Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NAC and its members may have within the EMBA, information on how NAC would like to engage, and requested that

NAC provide information to other individuals as required. Woodside requested information and offered further information, support, and any assistance required by NAC to participate in consultation.

Ongoing engagement:

- (1) On 1 March 2024, Woodside emailed NAC a draft consultation framework agreement for review (SI Report reference, 30.1).
- On 17 April 2024, NYFL emailed Woodside noting it was attending to Sorry Business and per cultural protocols would require time within the community and engagement would be delayed until appropriate to recommence (SI Report reference, 30.2).
- On 26 April 2024, Woodside emailed NAC a reminder relating to its draft consultation agreement for review and comment, requesting a status of the review and offering to provide further information (SI Report, reference 30.3).
- On 5 September 2024, Woodside emailed NAC to invite it to Woodside's Quarterly Heritage Meetings, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community. Woodside also requested a list attendees and attendance fees (SI Report, reference 30.4).
- On 9 September 2024, Woodside invited NAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 22 September 2024, Woodside emailed NAC about an administrative matter relating to the Quarterly Heritage Meetings (SI Report, reference 30.5).
- On 25 September 2024, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.2).
- On 3 October 2024, Woodside invited NAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 10 October 2024, Woodside emailed NAC regarding this EP (SI Report, reference 30.6), including notifying NAC that:
 - Consultation for this EP opened on 17 November 2023 when Woodside provided NAC with consultation information.
 - The EP was now publicly available on NOPSEMA's website (and provided a link) and is being assessed by NOPSEMA.
 - Woodside would shortly resubmit this EP for further assessment and that the EP will be substantively the same as that published on the website and will include relevant feedback obtained during consultation.
 - Any feedback, claims or objections about the adverse impacts (if any) relating to the EP that NAC would like Woodside to consider as part of this resubmission, to be provided to Woodside by no later than 24 October 2024.
 - Feedback can be provided by email, phone, directly to the engagement team, or directly to NOPSEMA and providing a range of contact details.
 - Woodside acknowledged discussions relating to a framework agreement had been ongoing and is yet to be completed, and that consultation for this EP had occurred in parallel.
 - Woodside had provided sufficient information, allowed a reasonable period of time for consultation and given a reasonable opportunity to provide details about the adverse impacts of the activity on NAC's functions, interests or activities, and looked forward to progressing discussions with NAC on framework agreements separately.

- Feedback could continue to be provided during the life of the EP, including after consultation for the EP had closed, during assessment of the EP, and after the EP has been accepted by NOPSEMA, and that Woodside would continue to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP.
- Should a claim or objection be received following the acceptance of the EP, that Woodside assesses, and which identifies a measure or control that Woodside considers requires implementation or updates to meet the intended outcome of consultation, Woodside would apply its Management of Change and Review process as appropriate.
- Woodside invited NAC to contact Woodside if it had any questions.
- On 10 October 2024, NAC attended Woodside's Quarter 3 Heritage Meeting in Roebourne where Woodside presented to Traditional Owners (SI Report, reference 83.4). Matters relevant to this EP included:
 - Consultation outcomes for Woodside EPs.
 - An explanation of State and Commonwealth regulatory requirements.
 - An explanation of EMBA's.
 - The process Woodside undertakes to identify Traditional Owner groups.
 - How Traditional Owners can provide information to Woodside about cultural values, interests and activities.
 - If there are any other First Nations groups who should be consulted.
- On 14 October 2024, Woodside was notified that the cultural protocols associated with Sorry Business were in place, and that industry and government stakeholders had been asked to minimise contact with Traditional Owner groups including NAC as a sign of respect (SI Report, reference 30.7).
- On 21 October 2024, Woodside emailed NAC a reminder about the proposed activity (SI Report, reference 30.8). The email included:
 - A reference to the original consultation email for this EP sent to NAC on 30 September 2024, which included Summary and Consultation Information Sheets.
 - A reminder that consultation for the preparation of this EP closes on 30 October 2024.
 - A request for information on how NAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NAC to understand how it would like information to be managed.
 - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for NAC to provide information about the proposed activity to other individuals, as required.
- On 23 October 2024, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.5).
- On 15 November 2024, Woodside emailed NAC an invitation to a Quarterly Heritage meeting in December (SI Report, reference 30.9).
- On 5 December 2024, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 83.6). Relevant matters discussed included:

- An overview of upcoming EPs
 - An explanation of ongoing consultation.
 - Reminder about monthly community luncheons.
- On 11 December 2024, Woodside became aware through social media about the passing of two significant Elders. This news was relevant to NAC (SI Report, reference 30.10).
- On 22 January 2025, Woodside emailed NAC information about Quarterly Heritage meetings scheduled for 2025 (SI Report, reference 30.11).
- On 4 March 2024, Woodside emailed NAC an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 83.7).
- On 5 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.8).
- On 13 March 2025, NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 83.9). Matters discussed and/or raised relating to this EP included:
 - That consultation is open for the life of any EP and Woodside can schedule consultation meetings at times that are convenient to the community.
 - A reminder that Woodside hosts a community luncheon and yarning circle for all local Traditional Owners.
- On 24 March 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 83.10).
- On 26 March 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 83.11).
- On 7 April 2025, Woodside emailed NAC an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 83.12).
- On 8 April 2025, Traditional Owner members from NAC attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.13).
- On 15 May 2025, Woodside emailed NAC an invitation to Woodside's Quarterly Heritage Meeting on 4 June 2025, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community (SI Report, reference 30.12).
- On 4 June 2025, Woodside hosted a Quarterly Community Heritage meeting with Traditional Owners including members of NAC and WAC (SI Report, reference 83.14). Matters discussed relevant to this EP included:
 - Woodside provided an overview the consultation process with relevant First Nations persons.
- On 5 June 2025, Woodside emailed NAC confirming the attendance of two NAC representatives at the Quarterly Heritage Meeting held the previous day (SI Report, reference 30.13).
- On 3 September 2025, Wong Goo Tt Oo, WAC and NAC attended Woodside's Quarterly Heritage Meeting (SI Report, reference 83.15). Matters discussed relating to this EP included:
 - Cultural heritage update.

– Training and contracting opportunities. – Project updates. • On 2 December 2025, Woodside emailed NAC an invitation to Woodside's Quarterly Heritage Meeting on 3 December 2025, as an opportunity for Woodside to provide updates on Woodside's activities to Traditional Owner groups and to receive feedback from the community (SI Report, reference 30.14). • On 3 December 2025, NAC attended Woodside's Quarterly Heritage Meeting, at which Woodside stated that consultation for future EPs would recommence in Q1 2026 and showed an example of new animations videos used to support EP consultation (SI Report, reference 83.16).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) During prior engagement, NAC proposed establishing a Joint Working Group to engage in meetings with Woodside for ongoing consultation. NAC noted it had they have capacity issues and required resourcing to cover costs of meeting.	(1) Woodside assessment: An agreement with NAC aligns with Woodside's <i>Program of Ongoing Engagement with Traditional Custodians</i> and will frame ongoing consultation processes, including with the NAC Working Group. Woodside response: Woodside will finalise an agreement with NAC to work with the NAC Working Group. The draft agreement sent to NAC in March 2024, will be used to frame ongoing consultation during the life of the EP.	(1) Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented, the draft agreement with NAC (among other things) will set out the process for ongoing engagement. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i>, (Appendix G). No additional measures or controls are required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on NAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- Woodside provided further information to NAC on 10 October 2024, which included:
 - The dates Woodside emailed NAC about the proposed activity.
 - That the original consultation commenced on 23 October and closed on 20 November 2023.
 - A link to the publicly available EP on NOPSEMA's website.
 - Confirmation that Woodside will resubmit the EP for further assessment.
 - That feedback, claims or objections about the adverse impacts (if any) relating to the EP that NAC would like Woodside to consider as part of the resubmission, should be provided to Woodside by 24 October 2024.
 - That discussions relating to framework agreements can occur in parallel to EP consultation.
 - That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation with NAC in November 2023, with a further consultation period in October 2024.
- Woodside has addressed and responded to NAC over 26 months, demonstrating a “reasonable period” of consultation.

Woodside asked NAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NAC functions, interests or activities.

Yindjibarndi Aboriginal Corporation (Yindjibarndi)

Yindjibarndi is established under the *Native Title Act 1993* (Cth) by the Yindjibarndi people to represent the Yindjibarndi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 26 July 2023, Woodside emailed Yindjibarndi Woodside’s planned Program of Ongoing Engagement with Traditional Custodians.
- (1) On 1 August 2023, Yindjibarndi emailed Woodside acknowledging 26 July 2023 email, and advising that NYFL would manage Oil and Gas matters on behalf of Yindjibarndi (SI Report, reference 31.2). (1) Woodside accepts Yindjibarndi’s right to be represented at their own choosing and will engage with NYFL for ongoing consultation.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed Yindjibarndi (via NYFL) of the proposed activity (Record of Consultation, reference 1.71) and provided a Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Yindjibarndi and its members may have within the EMBA, information on how Yindjibarndi would like to engage, and requested that Yindjibarndi provide information to other individuals as required.

Ongoing engagement:

- On 9 September 2024, Woodside invited Yindjibarndi (via NYFL) to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 25 September 2024, Traditional Owner members from Yindjibarndi (via NYFL) attended Woodside’s Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.2).
- On 3 October 2024, Woodside invited Yindjibarndi (via NYFL) to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 14 October 2024, Woodside was notified that the cultural protocols associated with Sorry Business were in place, and that industry and government stakeholders had been asked to minimise contact with Traditional Owner groups including Yindjibarndi as a sign of respect (SI Report, reference 31.1).
- On 21 October 2024, Woodside emailed Yindjibarndi (via NYFL) a reminder about the proposed activity (SI Report, reference 31.2). The email included:
 - A reference to the original consultation email for this EP sent to Yindjibarndi on 27 September 2024, which included Summary and Consultation Information Sheets.
 - A reminder that consultation for the preparation of this EP closes on 30 October 2024.
 - An update on the activity's well location co-ordinates and water depths.
 - A request for information on how Yindjibarndi would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with Yindjibarndi to understand how it would like information to be managed.
 - Advice that feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for Yindjibarndi to provide information about the proposed activity to other individuals, as required.
- On 21 October 2024, Yindjibarndi (via NYFL) emailed Woodside asserting (SI Report, reference 31.3):
 - **(2)** No formal consultation had taken place between NYFL, in its capacity as the delegated representative for Yindjibarndi, and Woodside on this EP and others.
 - **(2)** Woodside's emails did not meet the standard of meaningful consultation.
 - **(3)** Woodside has provided NYFL with a draft consultation agreement but had declined to agree with NYFL's estimated costs to proceed with the agreement.
 - **(3)** NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
 - **(2)** Woodside note in any record provided to NOPSEMA that NYFL had not been consulted on this EP and others.
- On 23 October 2024, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.5).
- On 2 November 2024, Woodside's First Nations spoke with relevant persons from Yindjibarndi and Elders at the Dampier Beachside Markets (SI Report, reference 33.4). The conversations included:
 - Information about Woodside's activities and related EPs including the proposed activity.
 - An offer to further consult and meet face to face with Yindjibarndi and Elders.
 - Reference to printed Summary Information Sheets for a number of Woodside activities.
 - Elders noted they had no feedback, objections or claims relating to the proposed activity, and were comfortable with the information being sent via Yindjibarndi. Woodside notes and respects the feedback from Elders.
 - Yindjibarndi noted that upcoming AGMs, Sorry Business and Lore will impact its availability to consult over the next few months

- On 4 November 2024, Woodside emailed NYFL as the delegated representative for Yindjibarndi in response to statements made in NYFL's email on 21 October 2024 (SI Report, reference 31.5). The email:
 - (3) Responded to NYFL's cost estimates and rates and reiterated that they are excessive, and the rates quoted by Yindjibarndi related to the North West Shelf agreements and were not consistent with reasonable rates for enabling and supporting consultation on this EP. This is particularly so where the high rates quoted by Yindjibarndi were for an initial review of a 7-page agreement.
 - (2) Offered to meet and discuss this issue further anytime. And that Woodside would be available to meet in person in Ieramungadu in the week of 18 November 2024.
 - (2) Confirmed that Woodside's use of email as one of the methods to engage in consultation correspondence mirrored what appears to be Yindjibarndi's primary approach of emailing consultation correspondence. However, Woodside is also happy to discuss this EP and the various other EPs Yindjibarndi has listed in its recent correspondence.
 - (2) Reiterated that the ongoing negotiation of a consultation framework agreement can and continues to occur in parallel to consultation for EPs.
 - (2) Included a table showing the status of each of the EPs referenced by Yindjibarndi in its letter. This list includes Scarborough EPs which Yindjibarndi was consulted on (although now is saying it has not been consulted on) and which have been accepted by NOPSEMA.
- (2, 2) Between 8 – 20 November 2024, emails were exchanged between NYFL (as the delegated representative for Yindjibarndi) and Woodside regarding the 4 November 2024 email and requests to meet regarding the draft consultation agreement. Please refer to NYFL Appendix F and SI Report, reference 62.0 for further information.
- On 4 March 2025 Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 83.7).
- On 5 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.8).
- On 24 March 2025, Woodside emailed Yindjibarndi an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 38.10).
- On 26 March 2025, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 83.11).
- On 7 April 2025, Woodside emailed Yindjibarndi an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 83.12).
- On 8 April 2025, Traditional Owner members from Yindjibarndi attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.13).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1)	(1) Woodside assessment: Woodside accepts	(1) Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Yindjibarndi has instructed Woodside that it will be represented by NYFL in ongoing discussion about EPs.	Yindjibarndi's right to be represented at their own choosing. Woodside response: Woodside will engage with NYFL on behalf of Yindjibarndi for ongoing consultation related to this activity.	
(2) NYFL has acknowledged it supports an agreement to enable a process of consultation.	(2) Woodside assessment: Separate from consultation under Regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for consultation, however, notes that this is not required to undertake and/or complete consultation in the course of preparing this EP. Sufficient information to allow informed assessment has already been provided by other means. Woodside has an existing engagement framework in place with NYFL which enables regular (quarterly) communication about Woodside activities. Feedback from NYFL on 27 October 2023 requested Woodside develop a draft consultation framework. Woodside response: Woodside sent a 7-page draft consultation framework to NYFL in March 2024 for its consideration.	(2) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G). This includes continued engagement regarding the proposed Framework Agreement which would be applied to ongoing consultation for this activity. Woodside will continue to consult following acceptance of the EP, as set out in Section 7.15 of the EP.
(3) NYFL has stated no formal consultation had taken place between NYFL and Woodside on this EP. NYFL would progress consultation on this EP once the draft consultation agreement was finalised.	(3) Woodside assessment: Woodside rejects NYFL's assertion that has not been consulted on this EP. Woodside began consulting NYFL on 8 July 2024 and has provided sufficient information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that the consultation agreement is not required to undertake and/or consult with NYFL on EPs. Woodside response: The information provided by Woodside meets the requirements of regulation 25 of	(3) Not required.

	the Environment Regulations for the reasons set out above.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation Yindjibarndi Aboriginal Corporation (YAC) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on Yindjibarndi's preferred method of consultation. Yindjibarndi instructed Woodside that it will be represented by NYFL. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. - Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Yindjibarndi. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Confirmed the purpose of consultation and set out in detail what was being sought through consultation. - Asked for the information and request for feedback be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". - Advised that Yindjibarndi can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

- Woodside commenced consultation with Yindjibarndi in October 2023.
- Woodside has responded to Yindjibarndi/NYFL over 27 months, demonstrating a “reasonable period” of consultation.

Woodside asked Yindjibarndi if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yindjibarndi functions, interests, or activities.

Wanparta Aboriginal Corporation (Wanparta)

Wanparta is established under the *Native Title Act 1993* (Cth) by the Ngarla people to represent the Ngarla people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed Wanparta NOPSEMA’s *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed Wanparta Woodside’s planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 5 October 2023, Woodside emailed Wanparta advising of the proposed activity (Record of Consultation, reference 1.72) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Wanparta and its members may have within the EMBA, information on how Wanparta would like to engage, and requested that Wanparta provide information to other individuals as required.
- On 6 October 2023, Wanparta emailed Woodside thanking them for the previous summary email (5 October 2023) and stated that it will bring all the 4 October 2023 items to the Board for further consideration and would revert shortly after (SI Report, reference 32.1).
- On 7 November 2023, Woodside emailed Wanparta following up previous correspondence (6 October 2023) and to check if there was any further information Wanparta would like from Woodside regarding this EP. No response was received (SI Report, reference 32.2).
- (1) On 13 November 2023, Wanparta emailed Woodside requesting funding to assist with ongoing consideration of Woodside EPs. Wanparta noted the consultation meeting to be held between Wanparta and Woodside in February 2023 (SI Report, reference 32.3).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (1) On 22 November, Woodside acknowledged Wanparta's requests and agreed to seek out available options for funding (SI Report, reference 32.4).
- From 24 - 28 November 2023, Woodside and Wanparta exchanged emails seeking availability for a phone call (SI Report, reference 32.5 – 32.8).
- On 30 November 2023, Wanparta emailed Woodside in relation to a financial matter unrelated to this EP, also suggesting a date for a directors' meeting for the purposes of ongoing consultation across EPs in Karratha on 23 February 2024 (SI Report, reference 32.9).
- On 23 February 2024, Wanparta emailed Woodside to confirm availability for a meeting on 23-24 April 2024 (SI Report, reference 32.10).
- On 26 February 2024, Woodside emailed Wanparta to confirm the 23-24 April dates for a meeting, confirming the process regarding names, accommodation and travel logistics (SI Report, reference 32.11).
- Between 16-22 April, Woodside and Wanparta exchanged emails regarding logistics and funding for a meeting for consultation on another activity and a site visit with the Wanparta Board, including a draft agenda for the meeting and Wanparta emailing to Woodside its (2) Ngarla Ranger Program Proposal (SI Report, references 32.12 – 32.20).

Ongoing engagement:

- On 24 April 2024, Woodside met with Wanparta at Murujuga (SI Report, reference 32.21). Woodside presented an overview of EPs and ongoing consultation in 2024, and provided information on another activity, Aboriginal employment, and (2) ranger programs. Wanparta informed Woodside that there were no issues following the discussion..
- On 6 May 2024, Wanparta emailed Woodside following the meeting on 24 April 2024 (SI Report, reference 32.22). Matters relevant to this EP include:
 - (3) The Ngarla People have a deep spiritual connection to Sea Country.
 - (3) The Ngarla peoples' totem species – the octopus, stingray, spiny bream fish and kestrel are of great significance.
 - (3) The protection and management of marine life and healthy ocean plays a significant role in their lore, culture and customs.
- (3) On 30 May 2024, Woodside emailed Wanparta thanking for the opportunity to meet the Board and acknowledges and supports the significance of the Ngarla's People totem species, the continue protection and management of marine life, and their right to practice lore, culture and custom (SI Report, reference 32.23).
- On 28 August 2024, Woodside and Wanparta met in Port Hedland (SI Report, reference 32.24). Matters relevant to this EP included:
 - (2) Wanparta asked Woodside for an update on its Ranger Program Proposal.
 - (2) Woodside responded that the proposal was under assessment.
- On 9 May 2025, Woodside met with Wanparta to discuss an unrelated EP (SI Report, reference 32.25). Matters relevant to this EP included:
 - (4) Wanparta enquired about whale and turtle breeding and migration pathways. (4) Woodside explained that it takes factors such as these into consideration and puts mitigation measures in place in the EP to address this.
 - (5) Wanparta asked if Woodside records whale observations. (5) Woodside noted it uses available research and that staff have a duty to report wildlife sightings.
 - (6) Wanparta provided feedback that more visual learning material would aid consultation. (6) Woodside acknowledged the importance of visual aids and noted that animation videos are currently being developed to support Traditional Owners with the EP consultation process.
 - (7) Wanparta enquired about support for Ranger Programs. (7) Woodside provided a Ranger Program update.

- (3) Wanparta noted that a healthy Sea Country = a healthy marine life = Ngarla food source = healthy Ngarla People. (3) Woodside acknowledged this feedback.
- (8) Wanparta noted concerns around maintaining sustainable fish stock post operations during decommissioning. (8) Woodside noted that the EPs being discussed at the meeting were not in relation to decommissioning and that it assesses the environmental impacts of removing infrastructure.
- (9) Wanparta questioned if Woodside monitors islands, in particular nesting shore birds. (9) Woodside took the question on notice.
- (10) Wanparta noted that there is ethnohistorical evidence of Ngarla occupation on islands. (10) Woodside acknowledged this cultural value.
- On 16 May 2025, Wanparta emailed Woodside a letter that summarised outcomes of a meeting between Wanparta and Woodside on 9 May 2025 (SI report B, reference 32.26).
- On 10 June 2025, Woodside emailed Wanparta responding to its email of 16 May 2025 (SI Report, reference 32.27). The letter included Woodside's responses to the summarised outcomes raised by Wanparta, as well as questions Woodside took on notice from the consultation meeting on 9 May 2025:
 - (9) Wanparta asked if Woodside will monitor the islands within the Ngarla Determination Area. (9) Woodside noted that it does not currently monitor islands within the Ngarla Determination Area under the proposed activity program for an unrelated EP, noting that the islands are outside of the EMBA for that EP.
 - (1) Wanparta raised that in the Ngarla People's view healthy Sea Country = a healthy marine life = Ngarla food source = healthy Ngarla People. (1) Woodside has noted these interests.
 - (8) Wanparta noted that Woodside should maintain sustainable fish stocks post operations. (8) Woodside recognises the importance of maintaining sustainable fish stocks post operations and acknowledges that offshore platforms and pipelines can become habitats for various fish species over time. Woodside also provided further details of research underway and provided details of Woodside's regulatory expectations.
 - (9) Woodside took a question on notice to seek more information on research activities relating to the monitoring of shorebirds. (9) Woodside provided Wanparta with information on shorebirds and noted that since 2016, Woodside has partnered with BirdLife Australia on programs focused on migratory shorebirds.
 - (7) Woodside took a question on notice to continue discussion on social investment opportunities and ranger programs. (7) Woodside is in the process of developing a Ranger Funding Program. Woodside noted that Wanparta's request will be evaluated in accordance with the Program's criteria upon its implementation.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Wanparta requested funding to participate in ongoing consultation.	(1) Woodside Assessment: Woodside supports reasonable funding for Traditional Custodians to allow for consultation on proposed activities. Woodside Response: Woodside has agreed to provide support to Wanparta for consultation purposes.	(1) Not required
(2)	(2)	(2)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Wanparta has expressed interest in a range of social investment opportunities including a ranger program and have provided a Ranger Program proposal for Woodside's consideration.	Woodside Assessment: A framework agreement is an effective mechanism for social investment opportunities, including for a ranger program and ongoing consultation. It aligns with Woodside's <i>Program of Ongoing Engagement with Traditional Custodians</i>. Ranger program funding may allow Traditional Custodians to be involved in spill response. Woodside Response: Woodside is continuing to work with Wanparta regarding social investment opportunities.	Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented, an agreement with Wanparta (among other things) could address social investment in ranger programs and would set out the process for ongoing engagement. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G). No additional measures or controls are required
(3) Wanparta stated that water and the ocean were extremely important to them, and they had a responsibility to look after ocean and lore. They noted the bream, octopus, stingray and kestrel as totemic species.	(3) Woodside Assessment: Woodside assessed Wanparta's interest in water to represent potential cultural values. Woodside Response: Wanparta's interests and potential cultural values have been recorded in the EP, the potential impact on the interests and values, including controls, have been assessed.	(3) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7. Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> (Appendix G). This includes continued engagement regarding the proposed Framework Agreement which will be applied to ongoing consultation. No additional measures or controls are required.
(4) Wanparta enquired about whale and turtle breeding and migration pathways.	(4) Woodside assessment: Woodside assesses risks to marine life and puts in place mitigation measures. Woodside response: Woodside advised Wanparta that it assesses risks to marine life and puts in place mitigation measures.	(4) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(5) Wanparta asked if Woodside records whale observations.	(5) Woodside assessment: Woodside continues to use all available research and staff have a duty to report whale sightings. Woodside response: Woodside explained to Wanparta how whale sightings are managed.	(5) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.

(6) Wanparta provided feedback that more visual learning material would aid consultation.	(6) Woodside assessment: Woodside welcomes this feedback and is committed to consulting with Traditional Owners in an appropriate way. Woodside response: Woodside acknowledged the importance of visual aids and confirmed it is developing materials such as animations to further support future consultation.	(6) No action required.
(7) Wanparta enquired about support for Ranger Programs.	(7) Woodside assessment: Woodside sees the value of groups having ranger programs. Woodside response: Woodside is in the process of developing a ranger funding program. Wanparta's request will be evaluated in accordance with the program's criteria upon its implementation. This is noted in historical feedback from Wanparta (2).	(7) Please refer to (2).
(8) Cultural value: maintaining sustainable fish stock post operations during decommissioning.	(8) Woodside assessment: Woodside recognises the importance of maintain sustainable fish stocks post operations and acknowledges that offshore platforms and pipelines can become habitats for fish over time. Woodside response: Woodside acknowledges Wanpartas's cultural values.	(8) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.
(9) Wanparta questioned if Woodside monitors islands within the Ngarla Determination area, in particular nesting shore birds	(9) Woodside assessment: Woodside does not currently monitor these islands. Woodside response: Woodside advised Wanparta that it does not currently monitor islands outside of the EMBA of the EP for which this feedback was raised.	(9) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.
(10) Cultural Value: • Dreamtime stories connected to nearshore islands particularly Solitary Island / Jarrkunpungu.	(10) Woodside assessment: This value has been identified through Woodside's data collection processes (consultation). Woodside has noted this value in the EP and assessed that Solitary Island is not in the EMBA for this activity.	(10) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6.

There is ethnohistorical evidence of Ngarla occupation on these islands.	Woodside response: Woodside acknowledges Wanparta's cultural values.	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wanparta Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on Wanparta's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Wanparta. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. - Advised that Wanparta can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.		

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with Wanparta Aboriginal Corporation in October 2023.
- Woodside has addressed and responded to Wanparta Aboriginal Corporation over 27 months, demonstrating a “reasonable” period of consultation.

Woodside asked Wanparta Aboriginal Corporation if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wanparta Aboriginal Corporation’s functions, interests or activities.

Malgana Aboriginal Corporation (Malgana)

Malgana is established under the *Native Title Act 1993* (Cth) by the Malgana people to represent the Malgana people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 19 July 2023, Woodside emailed Malgana NOPSEMA’s *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside’s request that Malgana advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed Malgana Woodside’s planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed Malgana advising of the proposed activity (Record of Consultation, reference 1.73) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that Malgana and its members may have within the EMBA, information on how Malgana would like to engage, and requested that Malgana provide information to other individuals as required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 306 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 20 October 2023, Woodside emailed an alternate contact at Malgana (the registered contact person), requesting feedback/further information about activities that Malgana had previously been notified about by Woodside and offered assistance to Malgana for consultation if required. Woodside re-attached earlier emails and requested the information be forwarded to any members and other individuals or groups who may have interests SI Report, references 33.1).
- Between 26 October 2023 – 2 November 2023 (SI Report 33.2 – 33.4), Woodside:
 - Telephoned Malgana on the number listed on the ORIC website, but the number was not connected. Woodside emailed Malgana following up on the proposed activities and requesting feedback and re-iterating an offer of assistance if required by Malgana about the activities.
 - Emailed Malgana following up on proposed activities and requesting feedback.
 - Emailed Malgana referencing previous emails sent by Woodside in October and November 2023 about this activity. Woodside informed Malgana that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside also offered to meet with Malgana at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments received post 23 February 2024.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Malgana for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Malgana's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to Malgana. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.

- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that Malgana can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with Malgana in October 2023.
- Woodside has addressed and responded to Malgana over 27 months, demonstrating a "reasonable" period of consultation.

Woodside asked Malgana if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Malgana's functions, interests or activities.

Nanda Aboriginal Corporation (Nanda)

Nanda is established under the *Native Title Act 1993* (Cth) by the Nanda people to represent the Nanda people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values. Nanda's nominated representative is YMAC, and Woodside consults with Nanda via YMAC.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 308 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 21 July 2023, Woodside emailed Nanda NOPSEMA's *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside's request that Nanda advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 25 July 2023, Woodside emailed Nanda (via YMAC) Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 23 October 2023, Woodside emailed Nanda (via YMAC) advising of the proposed activity (Record of Consultation, reference 1.78) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that Nanda and its members may have within the EMBA, information on how Nanda would like to engage, and requested that Nanda provide information to other individuals as required.
- On 13 November 2023, Woodside emailed YMAC noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet (SI Report, references 34.1).
- On 14 December 2023, Woodside emailed YMAC attaching the Program of Ongoing Consultation and advising that Woodside would like to progress negotiations on consultation frameworks with groups represented by YMAC (including Nanda) (SI Report, references 34.2). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside would follow when a submission required consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside would provide Nanda with the information Nanda required to make free, prior and informed decisions about Woodside's Environmental Plans.
 - Agreement as to how Nanda would provide feedback and how that could best be represented in EPs.
 - On an agreed schedule of rates for Nanda's participation in consultation.
 - How to manage the outputs of the consultations.
- On 21 December 2023, Woodside emailed Nanda (via YMAC) providing a list of Woodside's upcoming activities as requested (SI Report, references 34.3).
- Between 28 February 2024 – 10 July 2024, Woodside and Nanda (via YMAC) exchanged emails regarding the draft consultation agreement including the aims of the agreement, meeting framework, proposed schedule of rates and other details relating to engagement with Woodside. This included a request to meeting with the Nanda Board of Directors, a discussion about upcoming EPs and review of legal cost estimates (SI Report, reference 34.4 – 34.9).
- On 12 May 2025, Woodside and Nanda (via YMAC) met in-person at the YMAC Geraldton office to consult on an unrelated EP (SI Report, reference 34.10). Relevant matters raised for this EP include:
 - (1) Nanda asked about whale migration pathways. (1) Woodside explained the mitigation methods employed where activities overlap migration pathways.
 - (2) Nanda noted that the Abrolhos Islands are culturally significant noting the presence of artefacts and historical significance. (2) Woodside acknowledged this and explained the opportunities with industry, universities, and government to support sea mapping. Woodside invited Nanda to discuss this further.

– (3) Nanda raised concerns around retaining cultural knowledge and the implications of sharing cultural values. (3) Woodside explained that it is the decision of Nanda whether cultural values are shared or not. – (4) Nanda shared further cultural values which include white snow crabs, North Island artefacts and food sources. (4) Woodside acknowledged these cultural values. • On 10 June 2025, Woodside emailed Nanda (via YMAC) following up from the consultation from 12 May 2025 (SI Report, reference 34.11). Woodside thanked Nanda for the meeting and acknowledged the cultural values shared which include: – (2, 4) White snow crabs of Shark Bay, North Island artefacts and the importance of food sources. – (2) Abrolhos Islands, noting the presence of artefacts and their historical significance.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Cultural value: whales • whale migration patterns.	(1) Woodside assessment: This value has been identified through Woodside's data collection processes (consultation). Woodside response: Woodside acknowledges Nanda's previously raised cultural values in other EPs. Woodside has made note of this information in this EP.	(1) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(2) Cultural value: Abrolhos Islands and North Island • artefacts • historical significance	(2) Woodside assessment: This value has been identified through Woodside's data collection processes (consultation). Woodside response: Woodside acknowledges Nanda's cultural values and has included in this EP.	(2) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed potential impact on these, including controls, in Section 6 and 7.
(3) Nanda raised concerns around retaining cultural values.	(3) Woodside assessment: Woodside explained that it is the decision of Nanda whether cultural values are conveyed to Woodside or not. Woodside response: Woodside acknowledges Nanda's feedback.	(3) No action required.
(4) Cultural value: significance of: • White snow crabs	(4)	(4) Woodside updated Section 4.9 to record Wanparta's interests and potential cultural values and assessed

Food sources.	Woodside assessment: This value has been identified through Woodside's data collection processes (consultation). Woodside response: Woodside acknowledges Nanda's cultural values. Woodside has made note of this information and has included in this EP.	potential impact on these, including controls, in Section 6 and 7.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Nanda Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on Nanda's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Nanda. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. - Advised that Nanda can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period:		

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Nanda in October 2023.
- Woodside has addressed and responded to Nanda over 26 months, demonstrating a “reasonable period” of consultation.

Woodside asked Nanda if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nanda functions, interests or activities.

Gogolanyngor Aboriginal Corporation (GAC)

GAC is established under the *Native Title Act 1993* (Cth) by the Jabirr Jabirr/Ngumbarl and Bindunbur people to represent the Jabirr Jabirr/Ngumbarl and Bindunbur people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed GAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that GAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed GAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside emailed GAC advising of the proposed activity (Record of Consultation, reference 1.79) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that GAC and its members may have within the EMBA, information on how GAC would like to engage, and requested that GAC provide information to other individuals as required. The email requested information on the interests that GAC and its members may have within the EMBA. Woodside also suggested a lunch meeting in Broome the following week.
- Between 7 October – 4 April 2024, GAC and Woodside exchanged emails (SI Report, references 35.1 – 35.6), which included:
 - GAC confirming it would be available to meet in Broome the following week.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside requesting if there were any questions regarding the EP, requested a suitable time to call and confirmed it would try to line up a meeting in Broome.
- GAC confirming it had briefly seen the consultation material and would follow up
- Woodside requesting to meet in person in Broome and telephoning GAC, with both parties agreeing to meet on 5 April 2024.
- (1) On 5 April 2024, Woodside met face to face with GAC, where no issues were raised concerning EPs and GAC invited Woodside to attend GAC Board meeting in late April (SI Report, references 35.6). (1) Woodside noted GAC's feedback to the EP.
- On 26 April 2024, Woodside spoke with GAC for estimated quote to speak at Board meeting on 26 April 2024 (SI Report, references 35.7).
- On 26 April 2024, Woodside attended the GAC Board meeting to discuss other Woodside activities and answer questions. There was no specific presentation regarding this activity or related questions raised (SI Report, references 35.8).
- On 3 April 2025, Woodside met with GAC to discuss unrelated EPs (SI Report, reference 35.9) and the following matters discussed relevant to this EP include:
 - (2) Possibility of activities causing vibrations in the water. (2) Woodside explained the seismic testing process (not being used for this activity) and what measures are in place to mitigate the impact on marine animals.
 - (3) GAC stated that funding for ranger programs was difficult to access. (2) Woodside provided information about ranger funding.
- (3) On 7 May 2025, Woodside visited GAC's office and provided an update on a ranger funding proposal (SI Report, reference 35.10).
- (3) On 20 May 2025, Woodside called GAC and provided information about ranger funding available from a Commonwealth government agency (SI Report, reference 35.11).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) GAC provided feedback stating that there were no issues, including no objections or claims, relating to the activity.	(1) Woodside assessment: Woodside acknowledges that GAC had no issues or concerns, including no objections or claims, regarding this EP. Woodside response: Woodside will reflect GAC's feedback in the EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	(1) No action required.
(2) GAC enquired about the possibility of activities causing vibrations in the water.	(2) Woodside assessment: There is no seismic testing in this EP. Support vessels may generate some noise.	(2)

	Woodside response: During a meeting on 3 April 2025 about another EP, Woodside explained what measures are in place to mitigate the impact of noise on marine animals.	While this EP does not include seismic activity, risk and mitigation measures for all relevant sound sources are in Section 6.7 of the EP.
(3) GAC stated that funding for ranger programs was difficult to access.	(3) Woodside assessment: Woodside sees the value of groups having ranger programs. Woodside response: Woodside is in the process of developing a ranger funding program. GAC's request will be evaluated in accordance with the program's criteria upon its implementation. Woodside has provided ranger information to GAC.	(3) No action required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with GAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: • Woodside sought direction on GAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to GAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required.		

- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that GAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with GAC in October 2023.
- Woodside has addressed and responded to GAC over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked GAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GAC functions, interests or activities.

Nimanburr Aboriginal Corporation (Nimanburr)

Nimanburr is established under the *Native Title Act 1993* (Cth) by the Nimanburr people to represent the Nimanburr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed KLC on behalf of Nimanburr NOPSEMA's *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside's request that Nimanburr advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 315 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 10 October 2023, Woodside met with Nimanburr in person on Country and hand delivered the below documents and explained the proposed activity (SI Report, references 36.1). At this meeting Woodside also:
 - Provided a Consultation Information Sheet and explained the proposed activity.
 - Explained the EMBA and how it was developed.
 - Asked if there were any cultural values, they wished to share with Woodside, noting that information could be kept confidential.
 - Asked if there were any relevant persons that Woodside should consult with to which Nimanburr replied; no.
 - (1) Asked if Nimanburr had any further questions or concerns for this EP, to which Nimanburr replied; no. (1) Woodside noted the response.
 - Confirmed that Nimanburr would like to be consulted on a quarterly basis about Woodside activities with consultation to take place out on Nimanburr community.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Nimanburr advised it had no questions or concerns for the EP.	(1) Woodside assessment: Woodside accepts that Nimanburr has no feedback or concerns for this EP. Woodside response: Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	(1) Existing controls considered sufficient as described in Section 6 and 7.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Nimanburr for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Nimanburr's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Nimanburr. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Nimanburr can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Nimanburr in October 2023.
- Woodside has addressed and responded to Nimanburr over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked Nimanburr if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Nimanburr functions, interests or activities.

Nyul Nyul PBC Aboriginal Corporation (NNAC)

NNAC is established under the *Native Title Act 1993* (Cth) by the Nyul Nyul people to represent the Nyul Nyul people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 20 July 2023, Woodside emailed NNAC NOPSEMA's *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside's request that NNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP:

- On 6 October 2023, Woodside emailed NNAC (via KLC) advising of the proposed activity (Record of Consultation, reference 1.96) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NNAC and its members may have within the EMBA, information on how NNAC would like to engage, and requested that NNAC provide information to other individuals as required.
- On 26 October 2023, Woodside emailed NNAC (via KLC) requesting an opportunity to meet with NNAC and consult on EPs, informing that they were happy to pay reasonable sitting costs (SI Report, reference 37.1).
- On 26 October 2023, NNAC (via KLC) emailed Woodside thanking them for their email and informed Woodside that the NNAC Board would like to meet for a consultation workshop (SI Report, reference 37.2).
- On 1 November 2023, Woodside emailed NNAC (via KLC) and responded that they would be happy to coordinate and fund the consultation workshop and requested a 3–4-hour time slot (SI Report, reference 37.3).
- On 6 November 2023, NNAC (via KLC) emailed Woodside informing that they would seek confirmation from NNAC, but that Woodside should expect a meeting date suggesting February 2024 (SI Report, reference 37.4).
- On 22 February 2024, Woodside presented to the NNAC Board and its legal representative on Woodside activities, including this EP (SI Report, reference 37.5). Woodside presented slides which discussed NOPSEMA, EPs including addressing EPs currently under consultation. Woodside also presented on how Woodside consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBA's, and next steps in consultation processes. Woodside explained that the Pyrenees Operations EP is a 5-year revision plan, which has been operating since 2010. **(1)** The Chair expressed that there didn't seem to be an issue with this EP. The Board requested a further workshop with Woodside for corporation members. **(1)** Woodside confirmed it was available as needed for future requests.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) NNAC Board, via the Chair, provided feedback stating that there were no issues with the activity, and requested	(1) Woodside assessment: Woodside acknowledges that NNAC had no issues or concerns, including no objections or claims, regarding this EP.	(1) No action required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

a further workshop with Woodside for corporate members.	Woodside response: Woodside will reflect NNAC's feedback in the EP and will further engage with NNAC about a future workshop. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on NNAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan."		

- Advised that NNAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NNAC in October 2023.
- Woodside has addressed and responded to NNAC over 27 months, demonstrating a “reasonable period” of consultation.

Woodside asked NNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NNAC functions, interests or activities.

Karajarri Traditional Lands Association (Aboriginal Corporation) (KTLA)

KTLA is established under the *Native Title Act 1993* (Cth) by the Karajarri people to represent the Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 24 July 2023, Woodside emailed KTLA NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that KTLA advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.
- On 26 July 2023, Woodside emailed KTLA Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed KTLA advising of the proposed activity (Record of Consultation, reference 1.81) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

information on the interests that KTLA and its members may have within the EMBA, information on how KTLA would like to engage, and requested that KTLA provide information to other individuals as required.

- Between 13 October 2023 – 23 January 2024, Woodside emailed follow-up emails to KTLA seeking to confirm the best contact person at KTLA as Woodside had not received a response to its initial email (SI Report, reference 39.1 – 39.3). These emails included:
 - A copy of the initial email was attached enquiring if there is any further information needed.
 - An attached a copy of the Environment Plan Summary sheet
 - A requested for the opportunity to meet.
 - That consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024.
 - An offered to meet with KTLA at their preferred place and time.
 - That consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KTLA for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: • Woodside sought direction on KTLA's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KTLA. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required.		

- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that KTLA can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with KTLA in October 2023.
- Woodside has addressed and responded to KTLA over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked KTLA if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KTLA functions, interests or activities.

Wanjina-Wunggurr (Native Title) Aboriginal Corporation (WWAC)

WWAC is established under the *Native Title Act 1993* (Cth) by the Wanjina and Wunggurr people to represent the Wanjina and Wunggurr people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 19 July 2023, Woodside emailed WWAC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed WWAC advising of the proposed activity (Record of Consultation, reference 1.80) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

information on the interests that WWAC and its members may have within the EMBA, information on how WWAC would like to engage, and requested that WWAC provide information to other individuals as required.

- On 13 October 2023, Woodside sent an email to WWAC (via KLC) enquiring about the best contact person at WWAC as Woodside had not received a response from its initial email. A copy of the initial email was attached (SI Report, reference 38.1).
- On 25 October 2023, Woodside emailed KLC enquiring if the KLC was the best point of contact (SI Report, reference 38.2).
- On 26 October 2023, KLC responded thanking Woodside for its email and confirmed Woodside had sent the information to the correct email address for WWAC. KLC noted that Corporation responses could be somewhat delayed due to various factors including opportunities for meetings and discussions, cultural or other corporation commitments and obligations, governance considerations, and more, and that it trusted someone would be in touch in due course (SI Report, reference 38.3).
- On 30 October 2023, KLC responded to Woodside's email from 25 October 2023 and provided a link to ORIC (SI Report, reference 38.4).
- On 2 November 2023, Woodside emailed KLC thanking it for its response and informing it that Woodside had exhausted all contacts listed on ORIC which is why they contacted KLC. Woodside also noted that it appreciated this time of the year was very busy and was understanding why making contact with PBCs may be difficult (SI Report, reference 38.5).
- On 2 November 2023, KLC emailed Woodside confirming it would pass on Woodside's email to WWAC (SI Report, reference 38.6).
- On 23 January 2024, Woodside emailed WWAC about this activity and informed WWAC that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with WWAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 38.7).
- On 13 March 2024, Woodside emailed WWAC requesting who to contact regarding EPs and Woodside activities (SI Report, reference 38.8).
- On 16 April 2024, Woodside emailed WWAC (via KLC) requesting that attached email correspondence regarding EPs be forwarded to WWAC, and that Woodside was available to meet face to face or telephone to discuss further (SI Report, reference 38.9).
- On 29 August 2024, Woodside emailed WWAC about an administrative matter regarding payments (SI Report, reference 38.10).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with WWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on WWAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to WWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that WWAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with WWAC in October 2023.
- Woodside has addressed and responded to WWAC over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked WWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.5.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on WWAC functions, interests or activities.

Mayala Inninalang Aboriginal Corporation (MIAC)

MIAC is established under the *Native Title Act 1993* (Cth) by the Mayala people to represent the Mayala people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

Kimberley Land Council (KLC) is the nominated Representative of MIAC.

- On 19 July 2023, Woodside emailed MIAC *NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 8 August 2023, MIAC (via NOPSEMA) emailed Woodside enclosing a letter relating to among other things:
 - Culturally appropriate consultation processes,
 - Information that will support free, prior and informed consent.
 - **(1)** Financial support to bring together the right people to ensure appropriate consultations.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 13 October 2023, Woodside emailed MIAC advising of the proposed activity (Record of Consultation, reference 1.82) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MIAC and its members may have within the EMBA, information on how MIAC would like to engage, and requested that MIAC provide information to other individuals as required.
- On 16 October 2023, Woodside emailed MIAC introducing a new Woodside focal point and offering the opportunity for feedback by meeting in person with the Board and members (SI Report, reference 40.1).
- On 18 October 2023, Woodside emailed KLC asking if previous correspondence had been received and passed on to MIAC (SI Report, reference 40.2).
- On 26 October 2023, KLC emailed Woodside advising that their email had been forwarded to the relevant corporation (SI Report, reference 40.3).
- **(1)** On 27 October 2023, Woodside emailed MIAC following up on previous emails, informing MIAC that Woodside would cover meeting costs including flights and accommodation if they wished to meet in Perth. Alternatively, Woodside suggested an online Teams meeting if that was the preferred method of consultation. No response has been received (SI Report, reference 40.4).
- On 23 January 2024, Woodside emailed MIAC to inform it that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with MIAC at its preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 40.5).
- On 23 January 2024, KLC emailed Woodside advising that the contact person for MIAC had forwarded on Woodside's email to the PBC (SI Report, reference 40.6).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) MIAC stated that it is not funded and required financial support for ongoing consultation.	(1) Woodside assessment: Woodside supports reasonable funding for costs associated with consultation. Woodside response: Woodside has responded to MIAC's financial requests in the 8 August 2023 letter and has offered financial support for ongoing consultation on 27 October 2023, which has not yet been taken up by MIAC. Sufficient information to allow informed assessment on this activity has been provided, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with MIAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on MIAC's preferred method of consultation. Woodside has offered to hold meetings at the location and time of MIAC 's choosing, with MIAC's nominated representatives (including face-to-face meetings with the Board). These meetings did not occur due to a lack of response to Woodside's requests. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25(1) of the Environment Regulations consultation. - Provided Consultation Information Sheets and Consultation Summary Sheets developed by Indigenous staff to MIAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls.		

- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that MIAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with MIAC in October 2023.
- Woodside has addressed and responded to MIAC over 27 months demonstrating a "reasonable" period of consultation.

Woodside asked MIAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on MIAC functions, interests or activities.

Nyangumarta Warrarn Aboriginal Corporation (NWAC)

NWAC is established under the *Native Title Act 1993* (Cth) by the Nyangumarta people to represent the Nyangumarta people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed NWAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed NWAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 5

Page 327 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed NWAC advising of the proposed activity (Record of Consultation, reference 1.83) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that NWAC and its members may have within the EMBA, information on how NWAC would like to engage, and requested that NWAC provide information to other individuals as required. Woodside requested information be provided by 1 November 2023.
- On 11 October 2023, Woodside emailed seeking an alternative NWAC contact to arrange a meeting (SI Report, reference 41.1).
- On 18 October 2023, Woodside emailed an alternative YMAC contact, after attempting to contact NWAC's Operations Manager by telephone, to seek an opportunity to speak to the contact person for NWAC (SI Report, reference 41.2). NWAC sent a mobile text message asking Woodside to call back on the 19 October 2023.
- On 19 October 2023, Woodside emailed NWAC, after contacting NWAC by telephone, with a request for a cost estimation and offered to meet at a time and place that was suitable to NWAC (SI Report, reference 41.3). No response was received.
- On 24 November 2023, Woodside emailed NWAC (via YMAC) introducing itself and submitted a set of questions requesting NWAC's response in an effort to enhance their relationship. Woodside queried best contact details regarding consultation matters (SI Report, reference 41.4).
- **(1)** On 24 November 2023, NWAC (via YMAC) emailed Woodside its communications protocol. **(2)** NWAC noted additional expenses would be involved and committed to preparing a budget for Woodside's consideration (SI Report, reference 41.5).
- On 27 November 2023, Woodside emailed NWAC (via YMAC) (SI Report, reference 41.6). Woodside:
 - **(1)** Stated it would align to the approach set out in the communications protocol.
 - **(2)** Asked for a cost estimation/budget to assign funds for meetings.
- On 11 December 2023, Woodside met with NWAC (SI Report, reference 41.7), Woodside:
 - Described the EP framework, referring to the *Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations*, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities open for consultation.
 - Woodside provided an overview of this activity, explaining that these were floating vessels and not permanent rigs.
 - Woodside explained the difference between crude, gas and condensate.
 - Described the types of vessels involved.
 - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
 - Displayed and spoke to the EMBA and how they are developed.
 - Stated that Woodside wanted to understand how the functions, activities, or interests of NWAC and the people it represents may be impacted by any of those activities.
 - Specifically asked the following:

- How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
- (3) NWAC said it believed future meetings were required.
- Woodside advised it would continue to take feedback from NWAC for the life of the EP.
- On 11 December 2023, Woodside emailed NWAC (via YMAC) thanking it for the meeting and sharing contact details (SI Report, reference 41.8).
- On 11 December 2023, Woodside emailed NWAC (via YMAC) a copy of the presentation given at the meeting and followed up on key topics discussed in the meeting and offered to provide further information regarding the activity (SI Report, reference 41.9).
- (1) On 14 December 2023, Woodside emailed YMAC attaching the Program of Ongoing Consultation and advised that Woodside wanted to progress negotiations on consultation frameworks with groups represented by YMAC (including NWAC) (SI Report, reference 41.10). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide NWAC with the information NWAC requires to make free, prior and informed decisions about Woodside's EPs.
 - Agreement as to how NWAC will provide feedback and how that can best be represented in EPs.
 - (2) An agreed schedule of rates for NWAC's participation in consultation.
 - How the outputs of the consultations will be managed.
- (3) On 13 February 2024, Woodside emailed NWAC (via YMAC) seeking opportunities for EP consultations for upcoming activities in first half of 2024 (SI Report, reference 41.11).
- (1) On 28 February 2024, Woodside emailed NWAC (via YMAC) draft consultation agreements for consideration that include aims of consultation, proposed consultation agreement details and a consultation meeting framework. (2) Woodside invites YMAC to propose a schedule of rates and other details relating to its engagements (SI Report, reference 41.12).
- (1) On 27 June 2024, Woodside emailed YMAC to follow up on the draft consultation agreement sent to NWAC (SI Report, reference 41.13).
- (1) On 10 July 2024, YMAC confirmed it had received the draft consultation agreement which related to NWAC (SI Report, reference 41.14).
- On 3 October 2024, Woodside emailed NWAC Woodside emailed MIAC about an administrative matter regarding payments (SI Report, reference 41.15)
- Between 15 and 21 October 2024, NWAC and Woodside exchanged emails about meeting on 24 October 2024 (SI Report, references 41.16 – 41.24).
- On 24 October 2024, Woodside and NWAC met to discuss an unrelated EP (SI Report, reference 41.25). Matters discussed relevant to this EP included:
 - Woodside's consultation process.

- Locations of Woodside activities including those associated with this EP.
- NWAC can provide feedback for the life of an EP.
- Woodside explained the role of state and federal regulators.
- (1) NWAC expressed an interest in negotiating the consultation agreement but understood these negotiations run unilaterally to EP consultation.
- (4) NWAC confirmed Traditional Owners would want their own independent monitoring processes. (4) Woodside confirmed there are social investment and cultural mapping opportunities that can be utilised to support Traditional Owners independent monitoring and survey projects.
- (5) NWAC Traditional Owners explained that their priority is to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians. (5) Woodside explained the impacts and controls to mitigate risk for the activity and assured NWAC that Eighty Mile Beach will be acknowledged as a cultural value.
- (6) NWAC discussed the impacts of migrating birds, whales, turtles and vegetation. (6) Woodside acknowledged and reiterated the importance of ongoing consultation to ensure Traditional Owners are up to date with Woodsides activities.
- Between 24 October and 2 December 2024, Woodside and NWAC exchanged emails about an administrative matter relating to meeting payments (SI Report, references 41.26 – 41.31).
- (1) On 7 May 2025, NWAC (via YMAC) emailed Woodside a response to Woodside's email about an unrelated EP (SI Report, reference 41.32). NWAC stated that it wanted to develop a consultation protocol.
- (1, 1) Between 9 May 2025 and 22 June 2025, Woodside and NWAC (via YMAC) exchanged emails about an unrelated EP (SI Report, reference 41.33 – 41.35). Among other issues discussed, Woodside stated that a consultation protocol is not a prerequisite for consultation and is not required for Woodside to provide reasonable support to NWAC to enable it to participate in consultation. Woodside advised it was not inclined to enter into new negotiations for consultation protocols at this time.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) NWAC has provided Woodside with a Communications Protocol.	(1) Woodside assessment: Woodside has adapted its consultation methods to align with the consultation protocol provided by NWAC. Woodside response: As well as complying with NWAC's communications protocol, Woodside has provided NWAC via YMAC with a draft consultation agreement for consideration.	(1) Woodside's program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on EPs is currently being implemented. The draft agreement with NWAC (among other things) will set out the process for ongoing engagement. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G). Woodside will continue to consult following acceptance of the EP. No additional measures or controls are required.
(2)	(2)	(2)

NWAC has sought funding for expenses relating to communications/consultation.	Woodside assessment: The draft consultation agreement would be an effective mechanism to address resourcing for ongoing consultation. Woodside response: Woodside supports reasonable requests for resourcing. Woodside has invited NWAC via YMAC to propose a schedule of rates and other details as part of the draft consultation agreement.	Not required.
(3) NWAC has requested further meetings with Woodside.	(3) Woodside assessment: Woodside engages in ongoing consultation throughout the life of an EP. Consultation can take the form of meetings. Woodside Response: Woodside has provided NWAC with a draft consultation agreement which includes proposed consultation agreement details and a consultation meeting framework.	(3) Not required.
(4) NWAC confirmed Traditional Owners would want their own independent monitoring processes.	(4) Woodside assessment: Woodside acknowledges that NWAC requests independent monitoring processes. Woodside response: Woodside confirmed there are social investment and cultural mapping opportunities that can be utilised to support Traditional Owners independently monitor and survey projects.	(4) Woodside's environmental controls are described in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
(5) NWAC Traditional Owners explained that their priority is to protect Eighty Mile Beach due to its cultural and ecological value to the Nyangumarta Custodians.	(5) Woodside assessment: Woodside acknowledges NWAC's connection, and priority to protect, Eighty Mile Beach, and the cultural value to the Nyangumarta Custodians. Woodside response: Woodside explained the impacts and controls to mitigate risk for the activity and assured NWAC that Eighty Mile Beach will be acknowledged as a cultural value in the EP.	(5) Eighty Mile Beach is identified as a cultural feature and heritage value in Section 4.9.1: Cultural values and heritage, under Sea Country values in the EP.
(6)	(6)	(6)

NWAC discussed the impacts to migrating birds, whales, turtles and vegetation.	Woodside assessment: Woodside has developed response plans to mitigate or avoid impacts on birds and marine mammals in the highly unlikely event of a hydrocarbon response. Woodside response: Woodside advised the impact on animals depended on the timing, duration and extent of a spill. Response options included tracking, protective barriers, shoreline clean-up techniques, prevention of contact with wildlife and rehabilitation of wildlife where contact occurs, and long-term monitoring of species and sites after a spill.	The potential environmental impacts of planned and unplanned activities are assessed in Section 6: Environmental impact and risk assessment, performance outcomes, standards and measurements criteria.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NWAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on NWAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NWAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required.		

- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NWAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NWAC in October 2023.
- Woodside has addressed and responded to NWAC over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked NWAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NWAC functions, interests or activities.

Nyangumarta Karajarri Aboriginal Corporation (NKAC)

NKAC is established under the *Native Title Act 1993* (Cth) by the Nyangumarta and Karajarri people to represent the Nyangumarta and Karajarri people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 24 July 2023, Woodside emailed NKAC/KLC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed NKAC/KLC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

Revision: 5

Page 333 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 13 October 2023, Woodside emailed NKAC (via KLC) advising of the proposed activity (Record of Consultation, reference 1.84) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required.
- On 18 October 2023, Woodside emailed NKAC (via KLC) confirming if the email sent from Woodside on 13 October 2023, had been received and passed along to Nyangumarta Karajarri Aboriginal Corporation (SI Report, reference 42.1).
- On 26 October 2023, KLC (representing NKAC) emailed Woodside to confirm receipt of emails and stated it would pass on relevant information. KLC did note that turnaround times could be timely and delayed due to several factors (SI Report, reference 42.2).
- On 27 October 2023, Woodside emailed KLC asking for advice on forwarding a meeting request on to NKAC (SI Report, reference 42.3).
- On 23 January 2024, Woodside emailed NKAC (via KLC) advising that consultation prior to the EP being submitted to NOPSEMA would close on 23 February 2024. Woodside offered to meet with NKAC at its preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 42.4).
- On 23 January 2024, KLC (representing NKAC) emailed Woodside to confirm receipt of emails and stated it would pass on relevant information. KLC noted that turnaround times could be timely and delayed due to several factors (SI Report, reference 42.5).
- On 10 April Woodside and NKAC met in Broome (SI Report, reference 42.6). While the topic of the meeting was an unrelated EP, Woodside explained its activities in WA and expressed an interest in building a relationship with NKAC.
- On 3 October 2024, Woodside emailed NKAC about an administrative matter relating to consultation expenses and payments (SI Report, reference 42.7).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: Woodside sought direction on NKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to NKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that NKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with NKAC in October 2023.
- Woodside has addressed and responded to NKAC over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked NKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25(1) of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NKAC functions, interests or activities.

Yawuru Native Title Holders Aboriginal Corporation (Yawuru)

Yawuru is established under the *Native Title Act 1993* (Cth) by the Yawuru people to represent the Yawuru people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 335 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 18 July 2023, Woodside emailed Yawuru *NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside's request that Yawuru advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Please see *Ngujima-Yin Floating Production Storage and Offloading Facility Operations EP (Appendix F and SI Report)* for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed Yawuru advising of the proposed activity (Record of Consultation, reference 1.85) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Yawuru and its members may have within the EMBA, information on how Yawuru would like to engage, and requested that Yawuru provide information to other individuals as required.
- On 24 January 2024, Woodside sent a follow-up email to Yawuru informing them that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Yawuru at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 43.1).
- On 8 April 2025, Traditional Owner members from Yawuru attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.13).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Yawuru for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Yawuru's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Yawuru. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 336 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that Yawuru can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Yawuru in October 2023.
- Woodside has addressed and responded to Yawuru over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked Yawuru if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yawuru functions, interests or activities.

Dambimangari Aboriginal Corporation (DAC)

DAC is established under the *Native Title Act 1993* (Cth) by the Dambimangari people to represent the Dambimangari people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed DAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. This email also reiterated Woodside's request that DAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Please see Ngujima-Yin Floating Production Storage and Offloading Facility Operations EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 337 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 2 October 2023, Woodside emailed DAC advising of the proposed activity (Record of Consultation, reference 1.76) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that DAC and its members may have within the EMBA, information on how DAC would like to engage, and requested that DAC provide information to other individuals as required.
- Between 16 – 18 October 2023, following a telephone call and voicemail message to the CEO on 13 October 2023, Woodside emailed DAC providing information about Woodside's consultation along the coastline of Western Australia, Northern Territory and Victoria and enquiring about the opportunity to connect with the Board in the near future. This included an email to DAC's deputy CEO introducing the Woodside focal point and asking to listen to any feedback on Woodside activities (SI Report, reference 44.1 – 44.2).
- Between 25 October and 2 November 2023, Woodside and KLC exchanged emails seeking the most recent contact details for DAC, KLC advising Woodside that the ORIC website would have the relevant contact details, notifying KLC that Woodside had previously tried all available contacts listed on ORIC site and interest to meet members including flexibility with meeting dates and logistics, and KLC stating it would pass Woodside's email onto their contacts at the relevant organisations (SI Report, reference 44.3 – 44.6).
- On 8 November 2023, Woodside emailed the DAC CEO requesting the opportunity for a 'meet & greet', highlighting the purpose for the meeting was to explain the current EPs as they related to the Dambimangari Traditional Owners. Woodside attached an offer to meet document alongside the relevant EP to the email (SI Report, reference 44.7).
- On 8 November 2023, Woodside visited the DAC offices in Derby in person to meet and greet and seek feedback on EPs. The activity was discussed, and the purpose of consultation was communicated to DAC. Woodside gave an overview of the EMBA and provided the link to NOPSEMA regarding First Nations engagement. Woodside asked if DAC had any questions or would like to provide feedback and if there was anyone else, they should speak to or to speak with to make introductions. Woodside was advised that the DAC CEO was the best person to organise further contact. DAC provided a contact for a ranger project and gave the CEO contact details (SI Report, reference 44.8).
- On 11 November 2023, Woodside wrote to DAC requesting a meeting with the CEO and Board, at a time, date and location of DAC's choosing. Woodside offered to pay reasonable costs for the meeting. No response has been received (SI Report, reference 44.9).
- On 23 January 2024, Woodside emailed DAC following up on previous attempts to consult and meet with DAC about this activity. Woodside informed DAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with DAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 44.10).
- **(1)** On 12 March 2024, DAC emailed Woodside to confirm Woodside meeting with DAC Board between 10 – 11 April 2024. DAC Board also requested Woodside provide full disclosure of any environmental issues or incidents, including from current operations in the region, and how Woodside manages these issues and incidents. DAC will confirm agenda and meeting details in due course (SI Report, reference 44.11).
- On 12 March 2024, Woodside emailed DAC acknowledging receipt of email regarding DAC Board meeting and to confirm if the advisor is the contact (SI Report, reference 44.12).
- On 12 March 2024, DAC emailed Woodside to confirm that the advisor is the contact for meeting logistics and other matters need to channelled via DAC and its Board (SI Report, reference 44.13).
- On 26 March 2024, DAC emailed Woodside to confirm Woodside's attendance at DAC Board meeting on 10 April 2024 in Derby (SI Report, reference 44.14).

- On 26 March 2024, Woodside emailed DAC with an offer to provide reasonable financial support for the meeting and would require a cost estimation before the meeting. Woodside stated it would email separately new EPs and activities since last correspondence with DAC, and would also provide an information pack to be presented at the meeting (SI Report, reference 44.15).
- Between 4 – 9 April 2024, DAC and Woodside exchanged emails regarding Woodside's attendance at the DAC Board meeting including cost estimations and invoices, meeting confirmation and attendees, and online meeting links (SI Report, reference 44.16 – 44.19).
- On 10 April 2024, Woodside emailed DAC the presentations for the meeting about Browse Stakeholder Consultation, scheduled for 10 April 2024. The presentation included information about other Woodside activities and Environmental Plan consultation (SI Report, reference 44.20).
- (1)** On 10 April 2024, Woodside met with DAC to discuss other Woodside activities and EP consultation. Woodside discussed the Browse Project, history of the project at James Price Point, Woodside's First Nations Engagement Team, Woodside Energy overview and EP consultation relating to other activities, not related to this EP. Woodside reaffirmed that it would remain in contact regarding any follow conversations in regard to this meeting and future EP discussions (SI Report, reference 44.21).
- On 12 April 2024, Woodside emailed DAC thanking for the opportunity to meet the Board the previous day. Woodside followed up with information about two separate activities and related EPs, as well as reinforcing that Woodside is legally required to provide information about projects relevant to DAC, and appreciate and respect the busy schedules of members. Woodside reaffirmed its commitment to working with DAC and providing support as required (SI Report, reference 44.22).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) DAC Board requested Woodside provide full disclosure of any environmental issues or incidents, including from current operations in the region, and how Woodside manages these issues and incidents.	(1) Woodside assessment: Woodside acknowledges the importance of providing information to Traditional Custodians in a timely manner. Woodside response: Woodside met with DAC Board to provide information about EP consultations relating to other activities in the region and reaffirmed its commitment to continue engagement with DAC.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside	Based on the engagement to date, no additional measures or controls required.

	will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with DAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient information: • Woodside sought direction on DAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. • Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to DAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. • Advised that DAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Woodside commenced consultation with DAC in October 2023. • Woodside has addressed and responded to DAC over 27 months, demonstrating a "reasonable period" of consultation. Woodside asked DAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP). Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on DAC functions, interests or activities.		

Bardi and Jawi Niimidiman Aboriginal Corporation (BJNAC)

BJNAC is established under the *Native Title Act 1993* (Cth) by the Bardi and Jawi People to represent the Bardi and Jawi people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- **(1)** On 14 April 2023, BJNAC emailed Woodside, advising that that BJNAC would be unable to engage with Woodside on a goodwill basis via attending and coordinating meetings, or with general correspondence and requested that Woodside factor in the values that are outlined in BJNAC's Joint Management Plan for the Park, into Woodside's EP plan for projects. BJNAC noted that there may be cases where BJNAC will simply want to make Woodside aware of the Bardi and Jawi Marine Park and will be requesting that Woodside factor in the values that are outlined in the Joint Management Plan for the Park, into Woodside's EP plan for projects. In other cases, BJNAC may want to respond with more detailed information if a project is likely to have a greater effect on Bardi and Jawi Sea Country. BJNAC stated that it will provide Woodside with a resourcing protocol within 28 days and objected to Woodside progressing matters with the PBC or making a submission to NOPSEMA (SI Report, reference 45.1).
- **(2)** On 5 June 2023, BJNAC emailed Woodside a draft resourcing protocol for consideration and stated it would await comments from Woodside (SI Report, reference 45.2).
- **(2)** On 18 July 2023, Woodside emailed BJNAC thanking them for the draft protocol and restated Woodside's objectives for consultation. In the email, Woodside included a summary sheet for another activity unrelated to this EP along with NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that BJNAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 45.3).
- **(3)** On 8 August 2023, BJNAC (via NOPSEMA) emailed Woodside (SI Report, reference 45.4) enclosing a letter relating to among other things:
 - Culturally appropriate consultation processes,
 - Information that will support free, prior and informed consent.
 - **(2)** Financial support to bring together the right people to ensure appropriate consultations.
- **(3)** On 13 October 2023, Woodside met face-to-face with BJNAC in a meeting on implementing an engagement framework. A framework draft was reviewed, and edits proposed. It was agreed that both parties were on the same page for ongoing consultation. BJNAC commended Woodside for how they engage and consult with First Nations peoples. BJNAC's preferred methods of consultation, including the use of animated videos, were discussed with suggestions agreed to by both parties (SI Report, reference 45.5).

Summary of information provided and record of consultation for this EP:

- On 23 November 2023, Woodside emailed BJNAC advising of the proposed activity (Record of Consultation, reference 1.98) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that BJNAC and its members may have within the EMBA, information on how BJNAC would like to engage, and requested that BJNAC provide information to other individuals as required. Woodside followed up with a telephone call, there was no answer.

- (2, 3) On 14 December 2023, Woodside emailed BJNAC Woodside's planned *Program of Ongoing Engagement with Traditional Custodians* (SI Report, reference 45.6). Woodside noted that Woodside's contracting team had not settled the Agreement Protocol yet but noted the following inclusions:
 - Agreement between Woodside and BJNAC and as representatives of the Bardi Jawi people (together "BJNAC") to consult in a meaningful and genuine manner.
 - The basic procedure Woodside will follow when a submission requires consultation – notification and invitation to meet.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide BJNAC the information BJNAC requires to make a free, prior and informed decisions.
 - Agreement as to how BJNAC will provide feedback and how we can best represent BJNAC's feedback in our submissions.
 - An agreed schedule of rates.
 - How the outputs of the consultation are managed.
- On 15 December 2023, emails were exchanged between Woodside and BJNAC seeking a date to meet (SI Report, reference 45.7).
- On 18 January 2024, emails were exchanged between Woodside and BJNAC seeking a time to meet. The 25 January 2024 was discussed and agreed between BJNAC and Woodside (SI Report, reference 45.8 – 45.11).
- (4) On 25 January 2024, BJNAC emailed and sent a letter to Woodside (SI Report, reference 45.12) making the following points (among others):
 - Will seek technical advice about the activities proposed in the EP.
 - Will seek advice on potential environmental implications of the activity in the EP.
 - Advice on potential impact on cultural heritage and rights under law and custom.
 - Consideration of reports which contain the above advice.
 - (2) Funding requirement to allow for the above undertakings by relevant experts.
- On 2 February 2023, Woodside emailed BJNAC confirming a meeting for the week of 5 February 2024 and offering to pay costs (SI Report, reference 45.13).
- On 2 February 2024, BJNAC emailed Woodside confirming availability and responding that they did not require costs to be paid to meet at this time (SI Report, reference 45.14).
- (5) On 5 February 2024, Woodside met with BJNAC's, Executive Officer who confirmed that BJNAC had no issues with this activity and no comments to make (SI Report, reference 45.15).
- (5) On 8 February 2024, BJNAC emailed Woodside stating they do not see themselves being affected. BJNAC requested that Woodside consult with them in the event changes occur to the oil spill scenario (SI Report, reference 45.16).
- On 9 February 2024, Woodside emailed BJNAC thanking for the response (SI Report, reference 45.17).
- (3) On 28 February 2024, Woodside emailed BJNAC with a letter (SI Report, reference 45.18) setting out the draft terms of a consultation agreement between BJNAC and Woodside, the agreement (among other things) included the following topics:
 - Sufficient Information

– Reasonable Period. – Provision of Information – Objection or claims – Publication – (2) Arrangements regarding reasonable costs and expenses – How the agreement may be terminated • On 3 April 2024, Woodside met BJNAC for lunch during which BJNAC invited Woodside to its board meeting on 2 May 2024 (SI Report, reference 45.19). • (3) On 4 April 2024, Woodside emailed BJNAC enquiring if BJNAC had reviewed the draft consultation agreement sent on 28 February 2024 (SI Report, reference 45.20). • (3) On 15 April 2024, BJNAC emailed Woodside advising it would respond to the draft consultation agreement by the end of the week (SI Report, reference 45.21) • (3) On 23 April 2024, Woodside phoned BJNAC to confirm an earlier arranged meeting with the BJNAC Board on 2 May. BJNAC informed Woodside that it would be unable to meet until the consultation agreement was in place (SI Report, reference 45.22). • (2, 3) On 3 May 2024, BJNAC emailed Woodside a draft protocol which included a Schedule of Rates and Consultation Schedule (SI Report, reference 45.23). • On 3 May 2024, BJNAC emailed Woodside in relation to an invoice for a social investment funding proposal not related to this EP (SI Report, reference 45.24).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) BJNAC previously advised it has values that are outlined in the Joint Management Plan for the Bardi and Jawi Marine Park, which it may require to be noted in particular EPs.	(1) Woodside assessment: Woodside accepts BJNAC's feedback regarding the values outlined in the Joint Management Plan for the Bardi Jawi Gaarra Marine Park. Woodside response: Woodside has updated the EP to reflect BJNAC's interests in the Bardi Jawi Gaarra Marine Park, whilst noting that the Marine Park falls outside the EMBA for this EP.	(1) Woodside has updated Table 4.9.5 of the EP to reflect BJNAC's feedback and note that the Bardi Jawi Gaarra Marine Park falls outside the EMBA for this EP.
(2) BJNAC has requested that Woodside enter into a resourcing protocol. BJNAC has set out conditions it requires for ongoing engagement.	(2) Woodside assessment: Woodside supports reasonable requests for funding to aid consultation activities. Woodside response: Woodside is committed to resourcing BJNAC through an agreed resourcing protocol as part of ongoing consultation as required	(2) As identified in Sections 6 and 7 of this EP, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in regulation 22(15) of the Environment Regulations and continue to progress with establishing a framework

	by the implementation strategy as set out regulation 22(15) of the Environment Regulations.	agreement as part of Woodside's <i>Program of Ongoing Engagement with Traditional Custodians</i> (Appendix G).
(3) BJNAC supports implementing an engagement framework. The framework would include preferred methods of consultation	(3) Woodside assessment: Woodside is committed to culturally appropriate consultation processes. Woodside response: Woodside provided BJNAC with a draft consultation agreement in February 2024. The agreement would be used to frame ongoing consultation. Sufficient information to allow informed assessment has already been provided by other means, including Consultation Information Sheets and a Summary Information Sheet developed by Indigenous staff members.	(3) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G).
(4) BJNAC advised it would seek technical advice on the proposed activity and advice on potential environmental and cultural heritage implications. BJNAC seeks funding from Woodside for this.	(4) Woodside assessment: Woodside acknowledges BJNAC plans to seek technical advice on the proposed activity and advice on potential environmental and cultural heritage implications. Woodside response: The draft consultation agreement includes arrangements regarding reasonable costs and expenses.	(4) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> , (Appendix G).
(5) BJNAC confirmed it had no issues or comments to make about this activity.	(5) Woodside assessment: Woodside accepts BJNAC has no issues or comments to make about this activity. Woodside response: Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	(5) As identified in Sections 6 and 7 of this EP, Woodside will continue to consult following acceptance of the EP, as required by the implementation strategy as set out in regulation 22(15) of the Environment Regulations and continue to progress with establishing a framework agreement as part of Woodside's <i>Program of Ongoing Engagement with Traditional Custodians</i> (Appendix G).
Woodside addressed objections and claims as noted above.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the	Based on the engagement to date, no additional controls or measures required.

	activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BJNAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient information: - Woodside sought direction on BJNAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to BJNAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". - Advised that BJNAC can request that particular information provided in the consultation not be published to align with regulation 25(4) of the Environment Regulations. Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023). - Woodside commenced consultation with BJNAC in November 2023.		

- Woodside has addressed and responded to BJNAC over 25 months, demonstrating a “reasonable” period of consultation.

Woodside asked BJNAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BJNAC'S functions, interests or activities.

Bundi Yamatji Aboriginal Corporation (BYAC)

BYAC is established under the *Native Title Act 1993* (Cth) by the Bundi Yamatji people to represent the Bundi Yamatji people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed BYAC advising of the proposed activity (Record of Consultation, reference 1.87) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that BYAC and its members may have within the EMBA, information on how BYAC would like to engage, and requested that BYAC provide information to other individuals as required.
- On 11 October 2023, Woodside emailed BYAC a follow-up email attaching the Summary Information Sheet (SI Report, reference 48.1).
- (1) On 1 November 2023, BYAC emailed Woodside thanking it for the information and advising there was no need for BYAC to provide a response in relation to connections to the area, noting that if any particular area was impacted by oil or spills then there would be a need to consult with BYAC (SI Report, reference 48.2).
(1) Woodside notes this feedback and will include in EP.
- On 2 February 2024, Woodside emailed BYAC links to NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also informed BYAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside asked if BYAC would like to provide further feedback and gave contact information for direct feedback. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference, 48.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) BYAC advised it had no need to respond regarding this activity. BYAC advised that if there were spills or oil impacting BYAC's area of interest then BYAC should be consulted.	(1) Woodside assessment: Woodside accepts BYAC's feedback. Woodside response: In the highly unlikely event a hydrocarbon release was to impact BYAC's area of interest, Woodside will contact BYAC.	(1) The Oil Spill First Strike Plan (Appendix I) includes a requirement to contact Traditional Owners who may be affected by a spill.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BYAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: • Consultation Information Sheet publicly available on the Woodside website since September 2023. • Provided Consultation Information Sheet and Summary Information Sheet to BYAC on 11 October 2023 based on their functions, interests or activities. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format. • Woodside sought direction on BYAC's preferred method of consultation. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Confirmed the purpose of consultation and set out in detail what is being sought through consultation. • Asked for the consultation and information sheets to be distributed to members and individuals. • Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan". • Advised that BYAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River		

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Woodside commenced consultation with BYAC in October 2023.
- Woodside has addressed and responded to BYAC over 27 months, demonstrating a “reasonable period” of consultation.

Woodside asked BYAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BYAC functions, interests or activities.

Gnaala Karla Booja Aboriginal Corporation (GKB)

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed GKB advising of the proposed activity (Record of Consultation, reference 1.88) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that GKB and its members may have within the EMBA, information on how GKB would like to engage, and requested that GKB provide information to other individuals as required.
- On 27 October 2023, Woodside emailed GKB following up on the 11 October 2023 email, offering to meet and asking whether any further information was required and whether there were any other individuals or groups that Woodside should consult with. No response has been received (SI Report, reference 50.1).
- On 7 December 2023, Woodside received a letter from GKB (SI Report, reference 50.2) stating:
 - (1) Woodside should inform GKB as soon as possible once an unplanned event occurs.
 - (2) Woodside to update GKB on the progress of the Pyrenees operations.
 - (2) GKB will inform Woodside if there are matters relating to the operations that GKB believe Woodside should know.
 - There are no additional matters that GKB wishes to provide in response to the EP.
- On 2 February 2024, Woodside emailed GKB NOPSEMA's *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information* (SI Report, reference 50.3). This email acknowledged that:
 - (1, 2) Woodside would keep GKB up to date on this activity and that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024.
 - Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) GKB has stated it should be informed as soon as possible following an unplanned event.	(1) Woodside assessment: Woodside acknowledges that GKB should be informed as soon as possible following an unplanned event. Woodside response: In line with the Oil Pollution First Strike Plan, in the highly unlikely event a hydrocarbon release was to impact GKB's area of interest, Woodside would contact GKB.	(1) The Oil Spill Response First Strike Plan (Appendix I) includes a requirement to notify Traditional Owners who may be affected by a spill.
(2) GKB requires regular updates about the activity and will share relevant information with Woodside about the activity.	(2) Woodside assessment: Woodside acknowledges GKB's requirement to be regularly updated about the activity and is commitment to informing Woodside about relevant matters. Woodside response: Woodside will keep GKB informed about progress on the activity and will accept all feedback as part of ongoing engagement explained in Section 7 of the EP.	(2) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> (Appendix G).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with GKB for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information:		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside sought direction on GKB'S preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to GKB. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan.
- Advised that GKB can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with GKB in October 2023.
- Woodside has addressed and responded to GKB over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked GKB if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by Regulation 25, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on GKB functions, interests or activities.

Karri Karrak Aboriginal Corporation (KKAC)

Summary of information provided and record of consultation for this EP:

- On 11 October 2023, Woodside emailed KKAC advising of the proposed activity (Record of Consultation, reference 1.89) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested

Uncontrolled when printed. Refer to electronic version for most up to date information.

information on the interests that KKAC and its members may have within the EMBA, information on how KKAC would like to engage, and requested that KKAC provide information to other individuals as required.

- On 12 October 2023, KKAC emailed Woodside noting they would call to discuss arrangements for feedback (SI Report, reference 51.1).
- On 18 October 2023, following a telephone conversation with Woodside on 14 October 2023 inviting Woodside to attend a KKAC Cultural Advice Committee meeting, Woodside met with the KKAC Cultural Advice Committee (SI Report, reference 51.2) comprised of senior knowledge holders, Woodside:
 - Described the EP framework, referring to the Environment Regulations, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of activities open for feedback to be discussed in the meeting and provided a list of other upcoming activities open for consultation.
 - Woodside provided an overview of this activity.
 - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
 - Displayed and spoke to the EMBA and how they are developed.
 - Stated that Woodside wanted to understand how the functions, activities, or interests of KKAC and the people it represents may be impacted by any of those activities.
 - Specifically asked the following:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
 - KKAC said:
 - (1) They expected to be kept informed about the activities.
 - (2) That Woodside should advise KKAC in the case of an unplanned event arising from the activities.
 - (3) That KKAC would prefer their rangers to be prepared for, and included, in a response to an unplanned event within the area of their Indigenous Land Use Agreement.
 - (1, 2, 3) Woodside advised that they take feedback from KKAC for the life of the EP.
- (1, 2, 3) On 26 October 2023, Woodside emailed KKAC following up on the meeting of 18 October, confirming outcomes and seeking to understand if KKAC would like to meet further (SI Report, reference 51.3).
- On 29 October 2023, KKAC emailed Woodside acknowledging receipt of the meeting overview and indicating that an invoice would be sent shortly (SI Report, reference 51.4).
- On 2 February 2024, Woodside emailed KKAC informing them the opportunity for consultation closes on 23 February 2024. Woodside also attached links to NOPSEMA's *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information*. Woodside noted they would keep KKAC

informed of progress on this activity, they noted that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside reiterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 51.5).

- **(1)** On 20 June 2025, Woodside emailed KKAC to explore the opportunity to meet and discuss current and future EPs involving Woodside's activities and an approach to working together effectively (SI Report, reference 51.6).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) KKAC requires Woodside to inform it about the activity's progress.	(1) Woodside assessment: Woodside acknowledges KKAC's requirement to be informed about the activity's progress. Woodside response: Woodside has undertaken to keep KKAC informed about progress on the activity.	(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with KKAC as part of ongoing engagement (Section 7.15 of the EP).
(2) KKAC requires Woodside to inform it as soon as reasonably practical in the case of an unplanned event arising from the activities.	(2) Woodside assessment: Woodside acknowledges KKAC's requirement to be informed in the case of an unplanned event. Woodside response: In line with the Oil Pollution First Strike Plan (Appendix I), in the highly unlikely event a hydrocarbon release was to impact KKAC's area of interest, Woodside will contact KKAC.	(2) The Oil Spill Response First Strike Plan (Appendix I) includes a requirement to notify Traditional Owners who may be affected by a spill.
(3) KKAC requests rangers be prepared for, and included, in a response to an unplanned event within the area of their Indigenous Land Use Agreement.	(3) Woodside assessment: Woodside considers value in having rangers on the ground, trained up in the highly unlikely event of a spill. It would be beneficial to an immediate response in an emergency situation. Woodside response: Woodside will continue to discuss ranger programs in line with Woodside's Program for Ongoing Engagement.	(3) Woodside is implementing a program to actively support Traditional Custodians' capacity for ongoing engagement and consultation on environment plans. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i> (Appendix G).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the	Based on the engagement to date, no additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KKAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on KKAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to KKAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. - Advised that KKAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Woodside commenced consultation with KKAC in October 2023. - Woodside has addressed and responded to KKAC in over 27 months, demonstrating a "reasonable period" of consultation.		

Woodside asked KKAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KKAC functions, interests or activities.

Wagyl Kaip Southern Noongar Aboriginal Corporation (Wagyl Kaip)

Summary of information provided and record of consultation for this EP:

- On 31 October 2023, Woodside emailed Wagyl Kaip advising of the proposed activity (Record of Consultation, reference 1.90) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Wagyl Kaip and its members may have within the EMBA, information on how Wagyl Kaip would like to engage, and requested that Wagyl Kaip provide information to other individuals as required.
- On 7 November 2023, Woodside emailed Wagyl Kaip following up on the 31 October 2023 email, offering to meet and asking whether any further information was required and whether there were any other individuals or groups that Woodside should consult with (SI Report, reference 52.1). No response was received.
- On 22 December 2023, Woodside phoned Wagyl Kaip and left a message asking for a return call (SI Report, reference 52.2).
- On 22 December 2023, Woodside sent a follow-up email requesting the opportunity to meet and answer any questions regarding the EP that Wagyl Kaip may have (SI Report, reference 52.3).
- (1) On 8 January 2024, Wagyl Kaip emailed Woodside advising the EP would have no effect on Wagyl Kaip Aboriginal Corporation heritage or cultural values (SI Report, reference 52.4). (1) Woodside would note this feedback in the EP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Wagyl Kaip has provided feedback stating the proposed activity will have no effect on Wagyl Kaip Aboriginal Corporation heritage or cultural values.	(1) Woodside assessment: Woodside accepts that Wagyl Kaip's feedback on the activity at this time. Woodside response: Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Wagyl Kaip (Section 7.15) of the EP.	(1) Although consultation for the purpose of regulation 25 of the Environment Regulations is complete, Woodside will continue to engage with Wagyl Kaip as part of ongoing engagement (Section 7.15 of the EP).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the	Based on the engagement to date, no additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Wagyl Kaip for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on Wagyl Kaip's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Wagyl Kaip. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. - Advised that Wagyl Kaip can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Woodside commenced consultation with Wagyl Kaip in October 2023. - Woodside has addressed and responded to Wagyl Kaip over 26 months, demonstrating a "reasonable period" of consultation.		

Woodside asked Wagyl Kaip if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Wagyl Kaip functions, interests or activities.

Whadjuk Aboriginal Corporation (Whadjuk)

Summary of information provided and record of consultation for this EP:

- On 9 October 2023, Woodside telephoned Whadjuk advising them that Woodside would be sending consultation information regarding this EP, requesting that they review the information and respond with any feedback (SI Report, reference 53.1).
- On 9 October 2023, Woodside emailed Whadjuk advising of the proposed activity (Record of Consultation, reference 1.91) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Whadjuk and its members may have within the EMBA, information on how Whadjuk AC would like to engage, and requested that Whadjuk AC provide information to other individuals as required.
- On 7 November 2023, Woodside emailed Whadjuk requesting any feedback regarding this activity and offering to meet with Whadjuk (SI Report, reference 53.2). No response was received.
- On 28 April 2025, Whadjuk (via SWALS) emailed Woodside about an unrelated activity and requested an opportunity to meet with Woodside to discussing a broader engagement framework with Whadjuk for Perth-based activities (SI Report, reference 53.3).
- Between 29 April – 6 May 2025, Woodside exchanged emails with Whadjuk (via SWALS) about meeting to discuss an unrelated EPs and other matters not relating to EP consultation (SI Report, reference 53.4 – 53.9).
- On 23 May 2025, Woodside met Whadjuk to discuss an unrelated EP (SI Report, reference 53.10). Matters discussed relevant to this activity included:
 - (1) Whadjuk expressed concern about the possibility of a spill including:
 - Impact to marine life not just on Rottnest Island but north of Perth and Rockingham.
 - Impact to coastline.
 - Impact to fish runs.
 - (1) Woodside explained that this would be a highly unlikely event and that EPs outline a robust and detailed assessment of the environment including current risks, impacts and mitigation measures.
 - (2) Whadjuk stated that the whole coastline has symbolic sites/areas, as well as Noongar tracks.
 - (3) Whadjuk stated Wadjemup (Rottnest Island) is an important spiritual place for Whadjuk.
 - (4) Whadjuk stated that cultural groups are connected, there are affiliated groups / people along the coast to Roebourne.

- (5) Whadjuk state that there are Songlines, affiliations to cultural and Sea Country totems and seasonal fishing traditions.
- (2, 3, 4, 5) Woodside discussed the importance of consultation, that it is ongoing and information sharing, and how consultation is represented in EPs. Woodside also reiterated that consultation is two-way, and involved listening to the Board, understanding cultural values, valuing healthy and robust relationships, and working together through engagement.
- (6) Whadjuk requested a cultural heritage assessment, as well as an environmental assessment to assess impacts, and requested to be provided with environment and cultural heritage plans in respect to Whadjuk Country.
- (6) Woodside took Whadjuk's request for a cultural heritage assessment on notice.
- On 3 June 2025, Whadjuk emailed Woodside a letter requesting whether Woodside had undertaken a Cultural Heritage Impact assessment specific to Whadjuk land and Sea Country; and if the assessment did not exist, Whadjuk proposed the development of a Whadjuk-led assessment in partnership with Woodside (SI Report, reference 53.11).
- On 4 June 2025, Whadjuk (via legal representative) emailed Woodside (SI Report, reference 53.12). The email stated:
 - (7) Whadjuk is seeking a Confidentiality and Cultural Information Protection Agreement, this agreement would ensure appropriate protection of Whadjuk's cultural and intellectual property.
- On 12 June 2025, Woodside emailed Whadjuk (SI Report, reference 53.13). Woodside requested a meeting with Whadjuk to discuss:
 - (6) Whadjuk's proposal for a cultural heritage assessment.
 - (7) Terms for managing and handling confidential and culturally sensitive information.
- (6, 7) On 18 June 2025, Woodside emailed Whadjuk (via SWALS) to follow up on an email sent on 12 June 2025 inviting Whadjuk to meet (SI Report, reference 53.14)
- (6, 7) On 18 June 2025, Whadjuk (via SWALS) emailed Woodside to accept Woodside's offer to meet to discuss a confidentiality and cultural information protection agreement and a cultural assessment. The meeting was scheduled for 9 July 2025 (SI Report, reference 53.15).
- On 19 June 2025, Woodside emailed Whadjuk (via SWALS) an invitation to a meeting scheduled for 9 July 2025 (SI Report, reference 53.16).
- On 9 July 2025, Woodside and Whadjuk met about an unrelated EP and discussed a number of matters relating to Whadjuk and its cultural values (SI Report, reference 53.17). Matters relevant to this activity included:
 - (8) Whadjuk stated that migratory birds were sacred to Whadjuk people and enquired how birds would be protected in the case of an unplanned incident.
 - (8) Woodside replied that migratory birds would be recorded in EPs as a cultural value for Whadjuk and that mitigation measures would be put in place for migratory birds.
 - (6) Whadjuk said it wished to secure a Whadjuk commissioned Cultural Heritage Plan.
 - (6) Woodside invited Whadjuk to provide a draft plan for Woodside's review. This plan would include a proposed scope of work.
 - (7) Whadjuk wishes to finalise an Intellectual Property Agreement/Confidentiality Plan with Woodside.
 - (7) Woodside said it would send Whadjuk a draft confidentiality agreement for Whadjuk's review.
 - (9) Whadjuk seeks funding from Woodside for a ranger program.

- (9) Woodside provided information about Woodside’s support for Traditional Owner ranger programs.
- (10) Whadjuk enquired how information provided by Whadjuk would be captured in an unrelated EP.
- (10) Woodside explained how information about Whadjuk’s cultural values would be included in an EP and an action was recorded for Woodside to provide a list of these values to Whadjuk.
- (11) Whadjuk requested information about agreements Woodside has with Traditional Owner groups in the Pilbara including royalties. Whadjuk stated it should have the same agreements in place as Woodside has with Pilbara groups.
- (11) Woodside explained that agreements with Pilbara Traditional Owners generally relate to land access management.
- (10) On 15 July 2025, Woodside emailed Whadjuk details of cultural values obtained during consultation for an unrelated EP (SI Report, reference 53.18).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside’s Response	Inclusion in Environment Plan
---	--	-------------------------------

(1) Whadjuk expressed concern about the possibility of a spill: • Impact to marine life not just on Rottnest Island but north of Perth and Rockingham. • Impact to coastline. • Impact to fish runs.	(1) Woodside assessment: In the highly unlikely event of a spill, Woodside would enact its First Strike Plan, which includes contacting the regulator, NOPSEMA and any relevant cultural authorities that may be affected. Woodside response: Woodside explained during the consultation of another EP that this would be a highly unlikely event. Woodside stated that it provides a robust and detailed assessment of the environment including current risks, impacts and mitigation measures.	(1) Measures relating to oil spills are covered in Appendix H – Oil spill Preparedness and Response and Appendix I – Oil Pollution First Strike Plan.
(2) Whadjuk stated that the whole coastline has symbolic sites/areas as well as Noongar tracks.	(2) Woodside assessment: Woodside acknowledges Whadjuk's feedback that the whole coastline has symbolic sites/areas as well as Noongar tracks. Woodside response: Woodside has included this value in the EP.	(2) Woodside recorded this cultural value in Section 4.9 of the EP.
(3) Whadjuk stated Wadjemup (Rottnest Island) is an important spiritual place for Whadjuk.	(3) Woodside assessment: Woodside acknowledges Whadjuk's feedback that Wadjemup is an important spiritual place. Woodside response: Woodside included this value in the EP.	(3) Woodside recorded this cultural value in Section 4.9 of the EP.
(4) Whadjuk stated that cultural groups are connected, there are affiliated groups / people along the coast to Roebourne.	(4) Woodside assessment: Woodside acknowledges Whadjuk's feedback that there are affiliated groups / people along the coast to Roebourne. Woodside response: Woodside has included this value in the EP.	(4) Woodside recorded this cultural value in Section 4.9 of the EP.

(5) Whadjuk state that there are Songlines, affiliations to cultural and Sea Country totems and seasonal fishing traditions.	(5) Woodside assessment: Woodside acknowledges Whadjuk's feedback that there are Songlines, affiliations to cultural and Sea Country totems and seasonal fishing traditions. Woodside response: Woodside has included this value in the EP.	(5) Woodside has updated Section 4.9 to record these interests and cultural values and assessed the potential impacts on these and where appropriate included controls, in Section 6.
(6) Whadjuk requested a cultural heritage assessment as well as an environmental assessment to assess impacts, and requested to be provided with environment and cultural heritage plans in respect to Whadjuk Country.	(6) Woodside assessment: Woodside acknowledges Whadjuk's request for a cultural heritage assessment. Woodside response: Woodside met with Whadjuk on 9 July 2025 to discuss how to progress matters relating to Whadjuk's request for a cultural heritage plan.	(6) No action required
(7) Whadjuk requested that Woodside and Whadjuk enter into a Confidentiality and Cultural Information Protection Agreement.	(7) Woodside assessment: Woodside acknowledges the importance of matters relating to confidentiality and the protection of cultural information. Woodside response: Woodside met with Whadjuk on 9 July 2025 to discuss how to progress matters relating to confidentiality and Whadjuk's request for a Confidentiality and Cultural Information Protection Agreement.	(7) No action required.
(8) Migratory birds are sacred to Whadjuk people.	(8) Woodside assessment: Woodside acknowledges Whadjuk's feedback that migratory birds are sacred to Whadjuk people. Woodside response: Woodside explained that this cultural value would be recorded in an unrelated EP (and subsequently recorded in this EP) and that mitigation measures would be in place for migratory birds.	(8) Woodside recorded this cultural value in Section 4.9 of the EP. Mitigation measures relating to migratory birds are in Section 6.
(9)	(9)	(9) No action required.

Whadjuk seeks a funding from Woodside for a ranger program.	Woodside assessment: Woodside sees the value of groups having ranger programs. Woodside response: Woodside is in the process of developing a ranger funding program. Whadjuk's request will be evaluated in accordance with the program's criteria upon its implementation.	
(10) Whadjuk sought information from Woodside about how Whadjuk's information would be captured in the EP.	(10) Woodside assessment: Woodside will capture Whadjuk's cultural values and feedback to include in EPs as relevant. Woodside response: Woodside has provided Whadjuk with details of cultural values obtained during consultation for an unrelated EP.	(10) No action required.
(11) Whadjuk requested information about agreements Woodside has with Traditional Owner groups in the Pilbara including royalties. Whadjuk stated it should have the same agreements in place as Woodside has with Pilbara groups.	(11) Woodside assessment: Woodside notes that it has no agreements relating to EP consultations in the Pilbara and that consultation agreements are not required for effective consultation. Woodside response: Woodside explained that agreements with Pilbara Traditional Owners generally relate to land access and management.	(11) No action required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Whadjuk for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on Whadjuk preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Whadjuk. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans".
- Advised that Whadjuk can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Woodside commenced consultation with Whadjuk in October 2023.
- Woodside has addressed and responded to Whadjuk over 27 months, demonstrating a "reasonable period" of consultation.

Woodside asked Whadjuk if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Whadjuk functions, interests or activities.

Yued Aboriginal Corporation (Yued)

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 9 October 2023, Woodside emailed Yued advising of the proposed activity (Record of Consultation, reference 1.92) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Yued and its members may have within the EMBA, information on how Yued would like to engage, and requested that Yued provide information to other individuals as required.
- (1) On 13 October 2023, Yued responded requesting maps overlaying the extent of oil spill modelling and the Yued ILUA area (SI Report, reference 54.1).
- (1) On 18 October 2023, Woodside emailed Yued providing the requested map and offering to meet or answer any questions (SI Report, reference 54.2).
- On 8 November 2023, Woodside emailed Yued offering the opportunity for feedback (SI Report, reference 54.3).
- (2) On 9 November 2023, Yued emailed Woodside advising that at present it had no feedback, and there did not appear to be any adverse impacts in the Yued area. Yued advised that they would endeavour to contact Woodside after their election cycle (SI Report, reference 54.4).
- (2) On 10 November 2023, Woodside emailed Yued thanking them for the response and advising Woodside would take feedback at any time as part of Woodside's approach to ongoing consultation (SI Report, reference 54.5).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Yued requested maps overlaying the extent of oil spill modelling and the Yued ILUA area.	(1) Woodside assessment: Woodside acknowledged that Yued required further information. Woodside response: Woodside provided Yued with relevant mapping.	(1) Not required.
(2) Yued advised that they have no feedback on this activity, and they would endeavour to contact Woodside after their election cycle.	(2) Woodside assessment: Woodside accepts that Yued has no feedback on the activity at this time. Woodside response: Separate from consultation under regulation 25 of the Environment Regulations, Woodside supports ongoing engagement with Yued (Section 7.12.3.1).	(2) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will	Based on the engagement to date, no additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Yued Aboriginal Corporation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: - Woodside sought direction on Yued's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation. - Provided Consultation Information Sheets and Summary Information Sheets developed by Indigenous staff to Yued. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Confirmed the purpose of consultation and set out in detail what is being sought through consultation. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. - Asked for the consultation and information sheets to be distributed to members and individuals as required. - Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. - Advised that Yued can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). Reasonable Period: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Woodside commenced consultation with Yued in October 2023. - Woodside has addressed and responded to Yued over 27 months, demonstrating a "reasonable period" of consultation. Woodside asked Yued if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified. Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP). Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on Yued functions, interests or activities.		

Balanggarra Aboriginal Corporation (BAC)

BAC is established under the *Native Title Act 1993* (Cth) by the Balanggarra People to represent the Balanggarra People (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed BAC NOPSEMA's *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*. This email also requested that BAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult.

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 2 October 2023, Woodside emailed BAC advising of the proposed activity and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that BAC and its members may have within the EMBA, information on how BAC would like to engage, and requested that BAC provide information to other individuals as required (SI Report, reference 46.1).
- On 13 October 2023, following an attempt by Woodside to telephone BAC, Woodside contacted BAC via an alternative email address to seek advice on making contact with the BAC board or contact person (SI Report, reference 46.2).
- On 25 October 2023, Woodside phoned BAC via the registered number listed on ORIC. Call was taken but Woodside was informed that this was not the correct number for BAC. Subsequently, Woodside emailed the Kimberley Land Council enquiring about the best method of contact for BAC (SI Report, reference 46.3).
- On 2 November 2023, Woodside sent a follow-up email to BAC providing information about the proposed activity, enquiring about the best point of contact, confirming if any further information is required regarding this EP, and advising Woodside is available to meet as suits the CEO and Board of Directors (SI Report, reference 46.4).
- On 23 November 2023, Woodside emailed BAC requesting an opportunity to make introductions, answer any questions and listen to feedback (SI Report, reference 46.5).
- On 23 January 2024, Woodside emailed BAC informing them that consultation prior to the EP being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with BAC at its preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 46.6).
- On 13 March 2024, Woodside emailed BAC requesting an opportunity to meet and discuss Woodside's activities (SI Report, reference 46.7).

Ongoing engagement:

- On 17 February 2025, as a result of a change to the activity's EMBA, Woodside emailed BAC advising of the proposed activity, which included the activity's Summary Information Sheet and Consultation Information Sheet (Record of Consultation, reference 3.27). The email included:
 - An overview of the proposed activity.
 - Links to the NOPSEMA *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*, and contact details.

- A request for information on the interests that BAC and its members may have within the EMBA.
- A request for feedback by 19 March 2025.
- A request for information on how BAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
- Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with BAC to understand how it would like information to be managed.
- That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
- A request for BAC to provide information about the proposed activity to other individuals, as required.
- On 4 March 2025, Woodside emailed BAC a reminder email about the proposed activity, following an earlier email sent on 17 February 2025 (SI Report, reference 46.8). The email included:
 - A request for feedback by 19 March 2025.
 - A request for information on how BAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with BAC to understand how it would like information to be managed.
 - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for BAC to provide information about the proposed activity to other individuals, as required.
- On 5 March 2025, Woodside telephoned BAC about the previous day's reminder email (SI Report, reference 46.09). Woodside was informed that the 4 March 2025 email had been forwarded to BAC's Chief Executive Officer for attention and action.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with BAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Woodside sought direction on BAC's preferred method of consultation. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 consultation.
- Provided Consultation Information Sheet and Summary Information Sheets developed by Indigenous staff to BAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what is being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.
- Woodside has provided NOPSEMA's brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan".
- Advised that BAC can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations).
- On 17 February 2025, as a result of a change to the activity's EMBA, Woodside emailed BAC advising of the proposed activity, which included:
 - An overview of the proposed activity.
 - Links to the NOPSEMA *Consultation Guidelines*, *Consultation Brochure*, and *Draft Policy for Managing Gender-Restricted Information*, and contact details.
 - Information on the interests that BAC and its members may have within the EMBA.
 - A request for feedback by 19 March 2025.
 - Information on how BAC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with BAC to understand how it would like information to be managed.
 - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for BAC to provide information about the proposed activity to other individuals, as required.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- The revised version of the Consultation Information Sheet identifying the new EMBA, was available on the Woodside website from February 2025.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Woodside commenced consultation with BAC in October 2023, with a further consultation period in October 2024 due to a revised EMBA which determined BAC as a relevant person to consult.
- Woodside has addressed and responded to BAC over 27 months, demonstrating a “reasonable” period of consultation.

Woodside asked BAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on BAC’s functions, interests or activities.

Native Title Representative Bodies

Yamatji Marlpa Aboriginal Corporation (YMAC)

YMAC is the Native Title Representative Body for the Yamatji and Pilbara regions of Western Australia. As such, they are not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.

Historical engagement:

- On 13 March 2023, Woodside emailed YMAC as to whether YMAC considers itself a ‘relevant person’ under regulation 25 of the Environment Regulations for the purposes of consultation on EPs and, if so, whether that relevance is limited to a facilitation function in its capacity as a representative of Traditional Owner groups/corporations that overlap or adjacent to the EMBA of a particular activity.
- Between 15 March 2023 – 20 March 2023, Woodside and YMAC corresponded via email regarding whether YMAC considers itself a ‘relevant person’ under relevant sections of the Environment Regulations for the purposes of consultation in EPs.
- YMAC confirmed that it is a ‘relevant person’ under regulation 25(1) of the Environment Regulations for the purposes of consultation on EPs only in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation. YMAC also stated that it did not intend to provide substantive comment on the content of EPs. Woodside acknowledged YMAC’s position and advised that that this assessment would be included in Woodside’s Eps.
- On 20 March 2023, YMAC emailed Woodside confirming that they agree to their advice being included in reporting (YMAC is the representative for NTGAC and Nanda Aboriginal Corporation and was the representative for Yinggarda Aboriginal Corporation until April 2023).
- (1) On 12 June 2023, YMAC emailed Woodside on behalf of itself and its clients. The email attached:
 - A proposal to fund in-house expertise to support consultations and administration of the consultation framework.
 - A draft consultation framework.
- (1) On 25 July 2023, Woodside emailed YMAC:
 - Agreeing in principle to the draft consultation framework and funding proposal but seeking further discussion on details.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Stating that Woodside is open to considering an industry funded position at YMAC to support the work they are facilitating.
- Attaching Woodside's Program for Ongoing Engagement with Traditional Custodians.
- Seeking a meeting with YMAC in relation to the draft consultation framework at YMAC's earliest convenience.

Summary of information provided and record of consultation for this EP:

- On 23 October 2023, Woodside emailed YMAC advising of the proposed activity (Record of Consultation, reference 1.104) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that YMAC and its members may have within the EMBA, information on how YMAC would like to engage, and requested that YMAC provide information to other individuals as required.
- On 13 November 2023, Woodside emailed YMAC noting that the previous email had included the Consultation Information Sheet, not the Summary Information Sheet. Woodside attached a copy of the Summary Information Sheet (SI Report, reference 60.1).

Ongoing engagement:

- (1) On 14 December 2023, Woodside emailed YMAC re-attaching the Program of Ongoing Consultation and advising that Woodside would like to progress negotiations on consultation frameworks with groups represented by YMAC (SI Report, reference 60.2). Woodside proposed the protocol would include (among other things):
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to activities.
 - Agreement as to how Woodside will provide the information groups requires to make free, prior and informed decisions about Woodside's EPs.
 - Agreement as to how groups will provide feedback and how that can best be represented in EPs.
 - An agreed schedule of rates for groups participation in consultation.
 - How to manage the outputs of the consultations.
- On 21 December 2023, Woodside emailed YMAC providing a list of upcoming activities as requested by YMAC (SI Report, reference 60.3).
- (1) On 28 February 2024, Woodside emailed YMAC draft consultation agreements for consideration including aims of consultation, proposed consultation agreement details and a consultation meeting framework. Woodside invites YMAC to propose a schedule of rates and other details relating to its engagements (SI Report, reference 60.4).
- On 29 February 2024, YMAC emailed Woodside acknowledging receipt of email and draft consultation agreement for review (SI Report, reference 60.5).
- On 9 September 2024, Woodside invited YMAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 79.1).
- On 3 October 2024, Woodside invited YMAC to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 79.3).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) YMAC has provided feedback that it is seeking an industry funded position to support consultations for this and other activities. YMAC has provided a draft consultation framework to assist the consultation process.	(1) Woodside assessment: Woodside has assessed the <i>Program of Ongoing Engagement with Traditional Custodians</i> will support ongoing consultation with YMAC and/or the groups it represents. This can address appropriate support for resourcing, separate from consultation under regulation 25 of the Environment Regulations. Sufficient information to allow informed assessment has already been provided by other means. Woodside response: In December 2023, Woodside emailed YMAC draft consultation agreements for consideration. Woodside has invited YMAC to propose a schedule of rates and other details relating to its engagements.	(1) Woodside will continue to engage with YMAC in relation to its request for an industry funded position and has put a proposal to YMAC in December 2023 for a Framework Agreement. This is described further in the <i>Program of Ongoing Engagement with Traditional Custodians</i>, (Appendix G).
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate Woodside will apply its Management of Change and Revision process (See Section 7.6.1 of the EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with YMAC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. YMAC has indicated that it will not provide substantive comment on EPs: Sufficient Information: - Woodside sought direction on YMAC's preferred method of consultation. This resulted in meetings being coordinated at location of YMAC's choosing, with YMAC nominated representatives. These meetings included Woodside presenting information in a format and style that was readily accessible and appropriate. - Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to YMAC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. - Articulated planned and unplanned environmental risks and impacts, with proposed controls. Reasonable Period:		

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with YMAC in October 2023.
- Woodside has addressed and responded to YMAC over 26 months, demonstrating a “reasonable period” of consultation.

Woodside asked YMAC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on YMAC functions, interests or activities.

Kimberley Land Council (KLC)

Kimberley Land Council is the Native Title Representative Body for the Kimberley region of Western Australia. As such, it is not a Prescribed Body Corporate or Registered Native Title Body Corporate but exists to assist Native Title claimants and holders.

Historical engagement:

- (1) On 16 February 2023, Woodside emailed KLC following a telephone discussion about EP consultations confirming that the KLC does not wish to be consulted on EPs but will facilitate consultation with Aboriginal Corporations it supports.

Please see Ngujima-Yin Facility Operations EP (Appendix F and SI Report) for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed KLC advising of the proposed activity (Record of Consultation, reference 1.77) and provided a simplified Consultation Information Sheet including a link to the detailed information sheet on Woodside’s website, as well as a summary overview fact sheet. The email requested information on the interests that KLC and its members may have within the EMBA, information on how KLC would like to engage, and requested that KLC provide information to other individuals as required.
- On 25 October 2023, Woodside emailed KLC by way of introduction to Woodside’s First Nations engagement team. Woodside requested the point of contact for WWAC, Wiliggin AC, WGAC and DAC and associated members to provide updates and information on Woodside activities and listen to feedback (SI Report, reference 61.1).
- On 30 October 2023, KLC emailed Woodside providing advice on point of contact for Aboriginal Corporations via an online website (SI Report, reference 61.2).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- (1) On 2 November 2023, Woodside emailed KLC confirming that Woodside had attempted to contact Aboriginal Corporations via website. Woodside reinforced that it was available to have discussions with each Aboriginal Corporation and was accommodating to meet their needs regarding dates and locations (SI Report, reference 61.3).
- (1) On 2 November 2023, KLC emailed Woodside stating it would pass on Woodside contact details to relevant organisations (SI Report, reference 61.4).

Woodside has been engaging with KLC on behalf of its represented groups as described in relevant sections above.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) KLC does not wish to be consulted on EPs but will facilitate consultation with Aboriginal Corporations it supports.	(1) Woodside assessment: Woodside acknowledges that KLC does not wish to be consulted on EPs but will facilitate consultation with Aboriginal Corporations it supports. Woodside response: Woodside has consulted with KLC in relation to its facilitation and coordination function as a Native Title Representative Body under applicable federal legislation.	(1) No additional measures or controls are required.
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with KLC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically:

Sufficient Information:

- Woodside sought direction on KLC's preferred method of consultation. This resulted in meetings being coordinated at location of KLC's choosing, with KLC nominated representatives. These meetings included Woodside presenting information in a format and style that was readily accessible and appropriate.
- Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to KLC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format.
- Articulated planned and unplanned environmental risks and impacts, with proposed controls.
- Confirmed the purpose of consultation and set out in detail what was being sought through consultation.
- Asked for the consultation and information sheets to be distributed to members and individuals as required.

Reasonable Period:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with KLC in October 2023.
- Woodside has addressed and responded to KLC over 27 months, demonstrating a “reasonable period” of consultation.

Woodside asked KLC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on KLC functions, interests or activities.

Northern Land Council (NLC)

NLC is the Native Title Representative Body for the northern region of the Northern Territory – including the Tiwi Islands and Groote Eylandt. NLC is not a Prescribed or Registered Native Title Body Corporate but exist to assist native title claimants and holders.

Summary of information provided and record of consultation for this EP:

- On 18 December 2023, Woodside emailed NLC advising of the proposed activity (Record of Consultation, reference 1.110) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that NLC and its members may have within the EMBA, information on how NLC would like to engage, and requested that NLC provide information to other individuals as required.
- On 17 January 2024, Woodside sent a follow-up email to NLC about the proposed activity. Woodside advised NLC that comments can be made over the life of the EP and offered to pay reasonable fees to consult with relevant corporations (SI Report, reference 77.1).
- On 18 January 2024, NLC emailed Woodside confirming receipt of Woodside’s previous email and advising the information provided will be reviewed (SI Report, reference 77.2).
- On 18 January 2024, Woodside emailed NLC thanking them for their response (SI Report, reference 77.3).
- On 6 February 2024, NLC emailed Woodside apologising for the delay in response and provided the best contact moving forward (SI Report, reference 77.4).
- On 7 February 2024, Woodside emailed NLC thanking them for their response and reached out to the new contact (SI Report, reference 77.5).

Ongoing engagement:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 17 February 2024, as a result of a change to the activity's EMBA, Woodside emailed NLC advising of the proposed activity (Record of Consultation, reference 1.106), which included the activity's Summary Information Sheet and Consultation Information Sheet. The email included:
 - An overview of the proposed activity.
 - Links to the NOPSEMA Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information, and contact details.
 - Information on the interests that NLC and its members may have within the EMBA.
 - A request for feedback by 19 March 2025.
 - Information on how NLC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face.
 - Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NLC to understand how it would like information to be managed.
 - That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.
 - A request for NLC to provide information about the proposed activity to other individuals, as required.
- (1) On 20 February 2025, Woodside met with NLC in Darwin to discuss the activity, highlighting the revised EMBA and EP. NLC provided feedback that there were no concerns (SI report, reference 77.6). (1) Woodside noted the feedback and advised it would document that there were no objections or claims from NLC relating to the activity.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) NLC provided feedback stating that there were no issues, including no objections or claims, relating to the activity.	(1) Woodside assessment: Woodside acknowledges that NLC had no issues or concerns, including no objections or claims, regarding this EP. Woodside response: Woodside will reflect NLC's feedback in the EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	(1) No additional measures or controls are required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has	Based on the engagement to date, no additional measures or controls required.

	been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NLC for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: • Woodside sought direction on NLC's preferred method of consultation. This resulted in a meeting being coordinated at location of NLC choosing, in Darwin, with NLC nominated representatives. The meeting included Woodside presenting information in a format and style that was readily accessible and appropriate. • Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to NLC. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Confirmed the purpose of consultation and set out in detail what was being sought through consultation. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • On 17 February 2024, as a result of a change to the activity's EMBA, Woodside emailed NLC advising of the proposed activity, which included: – An overview of the proposed activity. – Links to the NOPSEMA <i>Consultation Guidelines</i>, <i>Consultation Brochure</i>, and <i>Draft Policy for Managing Gender-Restricted Information</i>, and contact details. – Information on the interests that NLC and its members may have within the EMBA. – A request for feedback by 19 March 2025. – Information on how NLC would like to engage with Woodside about the proposed activity, including the opportunity to meet face to face. – Woodside's commitment to managing gender-restricted or other culturally sensitive information, and working with NLC to understand how it would like information to be managed. – That feedback can continue to be provided to Woodside during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA. – A request for NLC to provide information about the proposed activity to other individuals, as required. Reasonable Period: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • The revised version of the Consultation Information Sheet identifying the new EMBA, was available on the Woodside website from February 2025. • Woodside originally published advertisements about the activity in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South

Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).

- Woodside commenced consultation with NLC in December 2023, with a further consultation period in February 2025 due to a revised EMBA which determined NLC as a relevant person to consult.
- Woodside has addressed and responded to NLC in over 25 months, demonstrating a “reasonable period” of consultation.

Woodside asked NLC if it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NLC functions, interests or activities.

Self-identified First Nations Groups

Ngarluma Yindjibarndi Foundation Ltd (NYFL)

NYFL was created to act as Trustee for the Trust under the Northwest Shelf Agreement 1998 struck between the Ngarluma and Yindjibarndi registered native title claimants, the NWS JVs and Woodside, prior to the resolution of the Ngarluma and Yindjibarndi native title claim. Its purpose is to carry on the business of enterprise development, investment and social welfare.

In 1999 the Ngarluma and Yindjibarndi native title claim was settled with the Federal Court appointing, at the request of the common law native title holders, the Ngarluma Aboriginal Corporation (NAC) as PBC to represent the communal interests of the Ngarluma people and the Yindjibarndi Aboriginal Corporation as PBC to represent the communal interests of the Yindjibarndi people. In August 2023 Yindjibarndi advised Woodside that that NYFL would manage Oil and Gas matters on behalf of Yindjibarndi.

Historical engagement:

- On 18 July 2023, Woodside emailed NYFL NOPSEMA’s *Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information*.
- On 26 July 2023, Woodside emailed NYFL Woodside’s planned *Program of Ongoing Engagement with Traditional Custodians*.

Please see *Scarborough Seabed Intervention and Trunkline Installation EP (Appendix F and SI Report)* for further details of this correspondence.

Summary of information provided and record of consultation for this EP:

- On 19 October 2023, Woodside emailed NYFL regarding the proposed activity (Record of Consultation, reference 1.71) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside’s website) as well as a summary overview fact sheet. The email requested information on the interests that NYFL and its members may have within the EMBA, information on how NYFL would like to engage, and requested that NYFL

Uncontrolled when printed. Refer to electronic version for most up to date information.

provide information to other individuals as required. Woodside requested information be provided by 20 November 2023 and offered further information, support, and any assistance required by NYFL to participate in consultation.

- On 27 October 2023, NYFL provided its position statement regarding industry consultation (SI Report, reference 62.1). NYFL:
 - (1) Called for an updated proposal by Woodside to improve consultation.
 - (2) Advised that it does not have the capacity to respond adequately to EPs or other consultation material sent by proponents nor did it feel the process results in a fair representation of Traditional Owners.
- (1, 2) On 3 November 2023, Woodside emailed NYFL stating that Woodside would respond regarding the concerns raised on in the 27 October 2023 email. Woodside offered to meet to discuss short term solutions (SI Report, reference 62.2).
- On 7 November 2023, Woodside emailed NYFL offering to meet to discuss the issues raised, after the National Sea Country Summit taking place on 6-8 November.2023. Woodside offered to meet the week of 20 November 2023 (SI Report, reference 62.3).
- (1, 2) On 19 November 2023, NYFL emailed Woodside, stating it was awaiting an updated consultation framework from Woodside and was not able to meet as it didn't have resources to apply to developing a framework but looked forward to providing feedback on an updated framework (SI Report, reference 62.4).
- On 20 November 2023, Woodside emailed NYFL acknowledging its email of 19 November 2023 (SI Report, reference 62.5).

Ongoing engagement:

- On 4 December 2023, Woodside emailed NYFL (SI Report, reference 62.6):
 - Seeking clarification about changes in recent correspondence, noting that NYFL had indicated on several occasions over a number of months that it wished to await outcomes of the First Nations Sea Country Summit in Darwin and would be involved in the development of the National First Nations Led Framework on consultation.
 - Indicating it had requested to meet face-to-face with NYFL in November as Woodside wanted to understand NYFL's expectations and discuss the outcomes of the Summit.
 - Requesting discussion on the strategic sponsorship funding request noting it required a business case to understand what NYFL was suggesting and how it would align with NYFL's strategic objectives.
- On 6 December 2023, NYFL emailed Woodside (SI Report, reference 62.7) noting that:
 - At the meeting of 30 August 2023 there was discussion about challenges and proposed solutions to progress EP consultation.
 - (2) NYFL operated in a resource-constrained environment.
 - A proposal to NYFL responding to issues raised at the above meeting was expected.
 - The Summit had been referred to as a potential useful resource for developing an updated framework.
 - NYFL had agreed to progress the *Program of Ongoing Engagement with Traditional Custodians*.
 - Social investment and capacity building funding should remain separate to consultation regarding EPs and other environment and heritage matters.

- (1, 2) On 14 December 2023, Woodside emailed NYFL following up on previous emails about consultation on EPs, acknowledging NYFL's resource constraints and limitations that can be allocated to consultation on the EPs (SI Report, reference 62.8). Woodside proposed/noted the following to support consultation activities that would provide NYFL with the ability to engage and provide input and feedback:
 - Woodside intends to engage a senior Ngarluma person in an advisory/liason capacity, which will include facilitating consultation with NYFL members in relation to EPs.
 - A consultation framework on EPs which includes:
 - Agreement between Woodside and NYFL to consult in a meaningful and genuine manner.
 - The procedures Woodside will follow when a submission requires consultation.
 - Initial and ongoing consultation in relation to relevant Woodside EPs and the senior Ngarluma person's role in facilitating those consultations.
 - Agreement as to how Woodside will provide NYFL with the information NYFL requires to make free, prior and informed decisions about Woodside's EPs.
 - Agreement as to how NYFL will provide feedback and how that can best represent NYFL's feedback to NOPSEMA or other relevant organisations.
 - An agreed schedule of rates for NYFL's participation in consultation regarding Woodside's EPs.
 - How to manage the outputs of consultation.
 - Agreement on an approach to minimise duplication of consultation activities conducted with NAC, Yindjibarndi and NYFL.
 - An EP Consultation Working Group with representation from Woodside and NYFL.
- Suggested further discussion on the proposal at the NYFL/Woodside Quarterly meeting on 19 December 2023.
- On 9 January 2024, Woodside emailed NYFL following up if NYFL would like to discuss the current activities and EPs (SI Report, reference 62.9).
- (1) On 6 March 2024, Woodside emailed NYFL a draft consultation agreement for EPs (SI Report, reference 62.10).
- On 14 March 2024, NYFL emailed Woodside confirming receipt of draft consultation agreement (SI Report, reference 62.11).
- (1) On 19 March 2024, NYFL emailed Woodside an estimate for initial review of Woodside's draft consultation agreement (SI Report, reference 62.12).
- On 17 April 2024, NYFL emailed Woodside noting it was attending to Sorry business and per cultural protocols would require time within the community and engagement would be delayed until appropriate to re-commence (SI Report, reference 62.13).
- (1) On 10 May 2024, Woodside emailed NYFL discussing the intent of the consultation framework in the relation to EPs, how information would be presented and the costs Woodside is prepared to for meet for consultation. Woodside stated it looked forward to NYFL's advice for the preferred manner of consultation and an understanding of the costs NYFL preferred Woodside cover (SI Report, reference 62.14).
- On 9 September 2024, Woodside invited NYFL to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 25 September 2024 (SI Report, reference 83.1).
- On 25 September 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.2).

- On 3 October 2024, Woodside invited NYFL to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 23 October 2024 (SI Report, reference 83.3).
- On 10 October 2024, Woodside emailed NYFL regarding this EP, referring to correspondence sent to NYFL on 19 October 2023 and 9 January 2024 (SI Report, reference 62.15), Woodside stated that:
 - Consultation for this EP opened on 19 October 2023 when Woodside provided NYFL consultation information, and closed on 20 November 2023 allowing Woodside to prepare the EP.
 - The EP was now publicly available on NOPSEMA's website (and provided a link) and is being assessed by NOPSEMA.
 - Woodside would shortly resubmit this EP for further assessment and that the EP will be substantively the same as that published on the website.
 - Woodside requested NYFL provide any further feedback by 24 October 2024 to allow for preparation of its EP resubmission.
 - Any feedback, claims or objections about the adverse impacts (if any) relating to the EP that NYFL would like Woodside to consider as part of this resubmission, to be provided to Woodside no later than 24 October 2024.
 - Feedback could be provided by email, phone, directly to the engagement team, or directly to NOPSEMA and providing a range of contact details.
 - Woodside acknowledged discussions relating to framework agreements were ongoing and that consultation for this EP had occurred in parallel.
 - Woodside had provided sufficient information, allowed a reasonable period of time for consultation and given a reasonable opportunity to provide details about the adverse impacts of the activity on NYFL's functions, interests or activities, and looked forward to progressing discussions with NYFL on framework agreements separately.
 - Feedback could continue to be provided during the life of the EP, including after consultation for the EP had closed, during assessment of the EP, and after the EP has been accepted by NOPSEMA, and that Woodside would continue to receive, assess and respond to claims and objections from relevant persons throughout the life of the EP.
 - Should a claim or objection be received following the acceptance of the EP, Woodside would apply its Management of Change and Review process as appropriate.
- On 21 October 2024, Woodside emailed NYFL a reminder about consultation for EPs including this one (SI Report, reference 62.16). Woodside stated that:
 - Consultation for this EP would close on 24 October 2024 and that any feedback, opinions and comments provided by that date would be reflected in the EP resubmission.
 - NYFL was welcome to state its preferred method of consultation including whether it would like to meet face-to-face.
 - Woodside welcomed the opportunity to speak with Elders, office holders and other interested parties about this activity.
 - Woodside provided various forms of assistance to organisations, Traditional Custodian groups and individuals to support participation in consultation.
 - Woodside managed gender-restricted or other culturally sensitive information carefully and would work with NYFL to understand how it would like its information to be managed.
 - Feedback could continue to be provided during the life of an EP, Woodside would apply its Management of Change and Review process as appropriate.

- NYFL could forward this email and the attached document to members of the NYFL, Traditional Owners and other people and organisations who may be interested.
- NYFL was welcome to call or email Woodside if it would like to discuss consultation for this EP and other EPs further.
- On 21 October 2024, NYFL emailed Woodside (SI Report, reference 62.17). In the email NYFL stated:
 - **(3)** No formal consultation had taken place between NYFL and Woodside on this EP and others.
 - **(3)** Woodside's emails did not meet the standard of meaningful consultation.
 - **(1, 2)** Woodside has provided NYFL with a draft consultation agreement but had declined to agree with NYFL's estimated costs to proceed with the agreement.
 - NYFL would progress consultation on this EP and others once the consultation agreement had been formalised.
 - **(3)** A request for Woodside to note in any record provided to NOPSEMA that NYFL had not been consulted on this EP and others.
- On 23 October 2024, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.5).
- On 4 November 2024, Woodside emailed NYFL in response to statements and claims made in NYFL's email on 21 October 2024 (SI Report, reference 62.18). The email included the following:
 - **(1, 2)** Woodside's continued view that NYFL's cost estimates and rates are excessive, and the rates quoted by NYFL related to the North West Shelf agreements and were not consistent with reasonable rates for enabling and supporting consultation on this EP. Woodside also noted that the rates quoted by NYFL were for an initial review of a 7-page agreement.
 - **(3)** Woodside offered to meet and discuss the issue further and would be available to meet in-person in Ieramugadu (Roebourne), the week of 18 November 2024.
 - **(3)** Woodside confirmed that its use of email as one of the methods to engage in consultation correspondence mirrored what appears to be NYFL's primary approach of emailing consultation correspondence, and that Woodside is happy to discuss this EP and the various other EPs NYFL has listed in its recent correspondence.
 - **(1, 2)** Woodside reiterated that the ongoing negotiation of a consultation framework agreement can occur in parallel to consultation for EPs.
 - Woodside included a table identifying the status of each of the EPs referenced by NYFL.
- On 8 November 2024, NYFL emailed Woodside requesting to meet on 20 November 2024 and suggested Woodside approve an interim solution for external (legal) and internal cost estimates, until such a time a Board review is required and cost estimates can be determined (SI Report, reference 62.19).
- On 15 November 2024, Woodside emailed NYFL confirming the invitation to meet on 20 November 2024 and requested NYFL confirm with its legal provider that the cost estimates remain current for the consultation agreement. Woodside stated it would separately email NYFL about remaining EPs outlined in the 21 October correspondence (SI Report, reference 62.20).
- On 15 November 2024, NYFL emailed Woodside confirming NYFL's legal provider had advised the previous cost estimate remains current (SI Report, reference 62.21).

- On 20 November 2024, Woodside emailed NYFL thanking it for the meeting. (1,2) Woodside agreed to the amount for legal fees, as set out in its original estimate provided to Woodside by email on 19 March 2024, with the qualification that the amount is for the finalisation of the draft consultation agreement to be agreed between Woodside and NYFL executive staff for presentation to the NYFL Board for its consideration (SI Report, reference 62.22).
- On 21 November 2024, NYFL advised Woodside about the passing of a Senior Yindjibarndi Elder and founding member of NYFL. The NYFL Board advised that grieving protocols were underway, and the community was commencing a period of mourning (SI Report, reference 62.23). As a sign of respect, Woodside would be limiting communication with NYFL and Yindjibarndi Aboriginal Corporation until further notice.
- On 5 December 2024, Woodside emailed NYFL in response to its correspondence of 21 October 2024 (SI report, reference 62.24). Matters relevant to this EP included:
 - (1) Woodside had met with NYFL on 20 November 2024 to discuss progressing the Consultation Framework Agreement and had agreed a way forward.
 - (3) Woodside did not agree with NYFL's assertion that consultation for this EP and others had not commenced.
 - Woodside confirmed that consultation for this EP was complete and was now closed.
 - Woodside had continued to consult and engage with NYFL via email as this appeared to be NYFL's preferred and primary method of consulting with Woodside on EPs.
 - Woodside was open to meet as part of its ongoing consultation with NYFL.
 - (1) Woodside reiterated that ongoing negotiation of a consultation framework agreement could and continued to occur in parallel to consultation for EPs, including this EP, and that a consultation framework agreement was not a prerequisite to consultation.
 - Woodside attached a summary of the consultation that had occurred for the EP.
- Between 6 – 16 December 2024, Woodside and NYFL exchanged emails regarding matters relating to EP consultation, with NYFL stating it would progress consultation matters in due course (SI Report, references 62.25 – 62.27).
- On 4 March 2025, Woodside emailed NYFL an invitation to share stories and receives updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 5 March 2025 (SI Report, reference 83.7).
- On 5 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.8).
- On 24 March 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 26 March 2025 (SI Report, reference 83.10).
- On 26 March 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside discussed the process for writing EPs and how it communicates feedback from groups to NOPSEMA (SI Report, reference 83.11).
- (1) On 7 April 2025, NYFL emailed Woodside, in response to another EP, advising that NYFL will be meeting with its legal advisers regarding the consultation agreement and will send the agreement to Woodside in due course (SI Report, reference, 62.28).
- On 7 April 2025, Woodside emailed NYFL an invitation to share stories and receive updates from Woodside at its Monthly Community Luncheon for Traditional Owners to be held in Roebourne on 8 April 2025 (SI Report, reference 83.12).

- On 8 April 2025, Traditional Owner members from NYFL attended Woodside's Monthly Community Luncheon for Traditional Owners held in Roebourne. During the lunch Woodside requested feedback from all attendees about EPs and provided information about the consultation process (SI Report, reference 83.13).
- (1) On 10 April 2025, NYFL emailed Woodside a draft consultation agreement, previously provided by Woodside which incorporated NYFL changes (SI Report, reference 62.29).
- (1) On 24 April 2025, NYFL emailed Woodside with regard to an unrelated EP to note that it believed that NYFL had not been consulted and explained that NYFL looks forward to consulting on EPs once the consultation agreement between NYFL and Woodside has been progressed (SI Report, reference 62.30).
- (1) On 28 April 2025, NYFL emailed Woodside a response to a follow-up email about an unrelated EP and another (SI Report, reference 62.31). NYFL noted it looked forward to progressing the draft consultation agreement.
- (1) On 15 June 2025, Woodside emailed NYFL amendments to a draft consultation agreement (SI Report, reference 62.32). In the email Woodside reiterated that consultation for the preparation of environment plans occurs concurrently with agreement negotiations.
- (1) On 16 June 2025, NYFL emailed Woodside to acknowledge receipt of Woodside's amendments to a draft consultation agreement (SI Report, reference 62.33). (1) On 16 June 2025, NYFL emailed Woodside about an unrelated EP and further confirmed that a consultation agreement is the appropriate framework to engage in consultation and provided availability to discuss the consultation agreement (SI Report, reference 62.34).
- (1) On 19 June 2025, NYFL emailed Woodside and advised Woodside's amendments to a draft consultation were under review (SI Report, reference 62.35).
- (1) On 3 July 2025, NYFL emailed Woodside noting that NYFL looks forward to finalising the consultation agreement and undertaking consultation in regard to an EP not related to this activity (SI Report, reference 62.36).
- (1) On 4 July 2025, Woodside emailed NYFL to state that the preparation of EPs can and does occur concurrently with agreement negotiations (SI Report, reference 62.37).
- (1) On 24 July 2025, NYFL emailed Woodside and suggested meeting to discuss Woodside's amendments to a draft consultation agreement (SI Report, reference 62.38).
- (1) On 23 September 2025, NYFL emailed Woodside to follow-up on its earlier offer to meet to discuss the consultation agreement (SI Report, reference 62.39).
- (1) On 24 September 2025, Woodside emailed NYFL to confirm an online meeting could be held to discuss the consultation agreement however Woodside would not provide funding for legal advice. Woodside reminded NYFL that negotiation towards a consultation agreement can and does occur in parallel with consultation about individual EPs (SI Report, reference 62.40).
- (1) On 25 September 2025, NYFL emailed Woodside thanking for the response the day before and seeking further advice on funding scope (SI Report, reference 62.41).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) NYFL has acknowledged it supports an agreement to enable a process of consultation.	(1) Woodside assessment: Separate from consultation under Regulation 25 of the Environment Regulations, Woodside is open to engaging with a joint First Nations framework for	(1) Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	consultation, however, notes that this is not required to undertake and/or complete consultation in the course of preparing this EP. Consultation for this EP has occurred in parallel to discussions about a consultation agreement. Sufficient information to allow informed assessment has already been provided by other means. Woodside has an existing engagement framework in place with NYFL which enables regular (quarterly) communication. Woodside response: Woodside sent a 7-page draft consultation framework to NYFL in March 2024 for its consideration. In November 2024, Woodside met with NYFL to discuss a number of matters relating to the draft consultation agreement, with NYFL agreeing to provide Woodside with feedback on 7 April 2025, NYFL notified Woodside that it would be sending the draft agreement in due course.	
(2) NYFL has noted it operates in a restrained resource environment.	(2) Woodside assessment: Woodside supports reasonable requests for resourcing relating to consultation. Woodside response: The draft consultation agreement provided to NYFL in March 2024 would be an effective mechanism to address resourcing for ongoing consultation.	(2) The proposed Framework Agreement will address appropriate NYFL resourcing.
(3) NYFL has stated no formal consultation had taken place between NYFL and Woodside on this EP. NYFL would progress consultation on this EP once the draft consultation agreement was finalised.	(3) Woodside assessment: Woodside rejects NYFL's assertion that has not been consulted on this EP. Woodside began consulting NYFL on 19 October 2023 and has provided sufficient information, a reasonable period of time, and reasonable opportunity for NYFL to provide feedback. Woodside has clearly communicated to NYFL that consultation for this EP and others has occurred in parallel to negotiations about the draft consultation agreement. Woodside notes that the consultation agreement is not required to undertake and/or consult with NYFL on EPs. Woodside response: The information provided by Woodside meets the requirements of regulation 25 of the Environment Regulations for the reasons set out above.	(3) Not required.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with NYFL for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.5 of the EP. Specifically: Sufficient Information: • Sought direction on NYFL's preferred method of consultation. NYFL requested consultation material suitable for Traditional Custodian audience, which was developed and provided. As sufficient information and a reasonable period have been provided (see below), any meetings would be considered as ongoing engagement post regulation 25 of the Environment Regulations consultation. • Provided Consultation Information Sheet and Consultation Summary Sheets developed by Indigenous staff to NYFL. These set out details of the proposed activity, the location of the activity, the timing of the activity as well as the potential risks and impacts of the activity with controls in a digestible, plain English format. • Articulated planned and unplanned environmental risks and impacts, with proposed controls. • Confirmed purpose of consultation and set out in detail what is being sought through consultation. • Asked for the consultation and information sheets to be distributed to members and individuals as required. • Provided NOPSEMA's Brochure "Consultation on offshore petroleum environment plans" and Guideline "Guideline: Consultation in the course of preparing an environment plan. • Advised that NYFL can request that particular information provided in the consultation not be published (to align with regulation 25(4) of the Environment Regulations). • Woodside provided further information to NYFL on 10 October 2024, which included: – The dates Woodside emailed NYFL about the proposed activity. – That the original consultation period commenced on 23 October and closed on 20 November 2023. – A link to the publicly available EP on NOPSEMA's website. – Confirmation that Woodside will resubmit the EP for further assessment.		

- That feedback, claims or objections about the adverse impacts (if any) relating to the EP that NYFL would like Woodside to consider as part of the resubmission, should be provided to Woodside by 24 October 2024.
- That discussions relating to framework agreements can occur in parallel to EP consultation.
- That feedback can continue to be provided during the life of an EP, including after consultation for the EP has closed, during EP assessment, and after an EP has been accepted by NOPSEMA.

Reasonable Period:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in national, state, and relevant local newspapers including, the North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023).
- Woodside commenced consultation with NYFL in October 2023, with a further consultation period in October 2024.
- Woodside has responded to NYFL in over 27 months, demonstrating a “reasonable period” of consultation.

Woodside asked NYFL it was aware of any other Traditional Custodian groups or individuals with whom Woodside should consult. None were identified.

Woodside engages in ongoing consultation, beyond that required by regulation 25 of the Environment Regulations, throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).

Woodside considers the measures and controls described in this EP address the potential impact from the proposed activity on NYFL functions, interests, or activities.

Local government and elected Parliamentary representatives, community groups or organisations

Shire of Exmouth

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed Shire of Exmouth advising of the proposed activity (Record of Consultation, reference 1.18) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Exmouth following up on the proposed activity (Record of Consultation, reference 2.1).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Exmouth for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Exmouth on 15 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Shire of Exmouth with the opportunity to provide feedback over a 28-month period.		

Shire of Ashburton

Summary of information provided and record of consultation for this EP: • On 15 September 2023, Woodside emailed Shire of Ashburton advising of the proposed activity (Record of Consultation, reference 1.17) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 2 October 2023, Shire of Ashburton responded thanking Woodside for its correspondence and noting its support of the significant contribution the oil and gas sector makes to the community (SI Report, reference 63.1). The Shire asked for consideration of the following comments: – (1) The Shire confirmed it had no objections to the proposed activities. – (2) The Shire expects that Woodside will identify, manage and mitigate all possible impacts and risks in line with relevant regulatory frameworks. – (3) The Aboriginal Cultural Heritage Inquiry System (ACHIS) should be consulted to ensure site of significance are not impacted without consents. – (4) The Shire requires Woodside to brief the Shire's Local and District Emergency Management Committee's on its planned responses to such events before any activities commence. – (5) Asks that Woodside has communicated with appropriate emergency management agencies at either/or National, State, District and Local levels on potential hazards and risks around the activity; collaboration and/or cooperation on risk mitigation; considered impacted areas response capacity and capability and sustainability of response activities and escalation triggers.

- **(6)** The Shire anticipates that Woodside has undertaken their own emergency management planning to mitigate risk and recover from a risk related incident, has engaged with external emergency management agencies to ensure emergency management plans are aligned with outcomes to respond and/or recovery from the incident.
- **(7)** The Shire anticipates that Woodside has engaged with the community regarding what may happen in areas that are affected by the proposed activities.
- The Shire proposes that Woodside consider the Shire-operated Pilbara Regional Waste Management Facility (PRWMF) for its decommissioning, recycling and waste disposal purposes.
- **(8)** The Shire appreciates the opportunity to comment on the proposed activities and requests that Woodside provide the Shire with further updates as the proposal progresses.
- On 6 November 2023, Woodside responded thanking Shire of Ashburton for its feedback (SI Report, reference 63.2) and noted:
 - **(1)** That Woodside was required to manage environmental impacts and risks to the environment that may be affected (EMBA) by its proposed activities to As Low As Reasonably Practicable (ALARP) and to an acceptable level, as required by the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations), through the implementation of the EP. Woodside's proposed EPs will be submitted to the National Offshore Petroleum Safety Environmental Management Authority (NOPSEMA) for assessment and acceptance.
 - **(2)** Woodside routinely utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development process and included the results of these inquiry system searches as an appendix to each EP.
 - **(3)** Woodside was looking forward to presenting to the Shire at its Local and District Emergency Management Committee (LEMC) on 21 November 2023 on its approach to managing a hydrocarbon release in the highly unlikely event this occurs. Woodside confirmed it would welcome questions regarding this EP during the presentation. Woodside also sought to clarify the Shire's request to provide a briefing prior to activities commencing as this would potentially mean Woodside is providing frequent briefings on the same issue.
 - **(4)** Woodside has an Oil Pollution First Strike Plan in place for all EPs which details potential impacts, notifications and response mitigations that may be executed to manage an emergency event.
 - **(5)** In the course of developing EPs, Woodside develops oil spill preparedness and response positions tailor for individual projects, and consults with the relevant external emergency management agencies.
 - **(6)** Woodside consults relevant persons in the course of preparing an EP in accordance with regulation 11A (now regulation 25) of the Environment Regulations, and as per Woodside's ongoing consultation approach, feedback and comments received from relevant persons continue to be assessed and responded to, as required, throughout the life of an EP.
 - **(7)** Woodside notes the Shire's interest in ongoing local content opportunities and aims to work with local business through employment and contracting opportunities, where practical, to create and building community capacity and capability.
 - **(8)** Woodside would continue to provide the Shire with significant updates when relevant.
- On 14 November 2023, Shire of Ashburton responded (SI Report, reference 63.3) and, regarding Woodside's query seeking clarification on LEMC briefing requirements, confirmed:
 - **(9)** Woodside was not required to give a briefing on its response capability every time it undertook an activity that had a risk of a hydrocarbon release.

- **(10)** It was proposed that Woodside, when operating in an area, provided a briefing that covered its program of activities over a period of time, which could be determined by Woodside's own assessment of the need and liaising with the relevant LEMC/DEMC.
- **(11)** The word briefing should not be confused with advising stakeholders of any assessed high-risk activity where it is appropriate to inform those who might be impacted or involved in a response or recovery process.
- **(4)** On 21 November 2023, Woodside presented at the Shire of Ashburton LEMC meeting (SI Report, reference 63.4) and provided:
 - An overview of proposed activities relevant to the Shire including this EP.
 - An outline of the consultation approach and explanation of the EMBA as a modelling process of the broadest extent a diesel could spread based on a number of conditions.
 - Details of the oil spill response approach in the highly unlikely event of a hydrocarbon spill.
 - Woodside's key steps when activating an oil spill response plan.
 - Shire of Ashburton thanked Woodside for presenting to the committee and no questions or concerns were raised.
- On 22 November 2023, Woodside responded thanking the Shire for its email from 14 November 2023 and confirmed:
 - **(9)** It noted the Shire's advice that it was not required to provide a briefing on its response capability every time it undertakes an activity that has a risk of a hydrocarbon release.
 - **(10)** It accepted the Shire's proposal to provide briefings that cover its program of activities over a period of time, as determined by Woodside's own assessment of need and in liaison with the relevant LEMC.
 - **(11)** It will provide notifications to relevant stakeholders if required as per Woodside's oil spill response arrangements.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) No objections to the proposed activity.	(1) Woodside assessment: Woodside notes the Shire has no objections. Woodside response: Woodside acknowledged that the Shire of Ashburton had no objections to the activity.	(1) Not required.
(2) Identifying, managing and mitigating all possible impacts and risks.	(2) Woodside assessment: Woodside has assessed environment impacts and risks as well as mitigation and management measures in the EP. Woodside response: Woodside confirmed it was required to manage environmental impacts and risks to the environment by the proposed activities to As Low As Reasonably Practicable (ALARP),	(2) Existing controls considered sufficient as described in Section 6 of this EP.

	as per the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations).	
(3) Consulting the ACHIS.	(3) Woodside assessment: Woodside has utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System for this EP. Woodside response: Woodside confirmed it routinely utilised the Department of Planning, Land and Heritage Aboriginal Cultural Heritage Inquiry System as part of the EP development.	(3) A search of DPLH's Aboriginal Cultural Heritage Inquiry System was undertaken for this EP (see Appendix G of this EP).
(4) Briefing the Shire's Local and District Emergency Management Committee before activities commence.	(4) Woodside assessment: Woodside agrees there is merit in briefing the LEMC given its role and function. Woodside response: Woodside noted it was looking forward to presenting to the Shire of Ashburton's LEMC meeting on 21 November 2023 regarding its approach to managing a hydrocarbon release in the highly unlikely event this occurred and would be happy to take questions regarding this EP during the presentation. However, Woodside sought clarification on the frequency of the briefings and whether they were needed for each activity.	(4) Not required.
(5) Ensuring Woodside is communicating with appropriate national and state emergency management agencies.	(5) Woodside assessment: Woodside's oil spill preparedness and response plans for this EP include communication with appropriate agencies. Woodside response: Woodside confirmed it had an Oil Pollution First Strike Plan in place for this EP which detailed potential impacts, notifications and response mitigations that may be executed to manage an emergency event.	(5) In the course of developing this EP, Woodside has developed oil spill preparedness and response positions and an Oil Pollution First Strike Plan (see Appendix H and I of this EP).
(6) Assuming Woodside has emergency management planning in place.	(6) Woodside assessment: Woodside has developed oil spill preparedness and first response plans for this EP. Woodside response: Woodside confirmed that in the course of developing EPs, it developed oil spill preparedness and response positions tailored for individual projects. Woodside consults with the relevant external management agencies to ensure all emergency management plans are aligned with effective outcomes.	(6) In the course of developing this EP, Woodside has developed oil spill preparedness and response positions and an Oil Pollution First Strike Plan (see Appendix H and I of this EP).

(7) Ensuring Woodside has engaged with the community.	(7) Woodside assessment: Woodside has consulted relevant persons whose functions, interests or activities may be impacted by the activity, in line with regulation 25 of the Environment Regulations. Woodside response: Woodside advised it consulted relevant persons in the course of preparing an EP, and as per Woodside's ongoing consultation approach, feedback and comments from relevant persons continued to be assessed and responded to, as required, throughout the life of an EP.	(7) Woodside complies with regulation 25 of the Environment Regulations and consults relevant persons in the course of developing an EP, as described in Section 5.3 of this EP. Woodside also engages in ongoing consultation throughout the life of an EP as described in Section 7.15 of the EP.
(8) Provide updates as activities progress.	(8) Woodside assessment: Woodside will provide the Shire with significant updates with respect to the activity, as appropriate. Woodside response: Woodside confirmed it would continue to provide the Shire with significant updates with respect to the proposed activities when relevant.	(8) Woodside will provide notification of significant change to relevant persons as referenced in Section 7.15 of the EP.
(9) Amended its advice regarding the timing of briefings to the LEMC.	(9) Woodside assessment: Woodside accepts the LEMC's updated advice regarding briefing requirements. Woodside response: Woodside noted the Shire's advice regarding the frequency of briefings to the LEMC.	(9) Not required.
(10) Proposed Woodside give briefings that cover its program of activities over a period of time.	(10) Woodside assessment: Woodside accepts the Shire's proposal for Woodside to deliver briefings that cover its program of activities in an area over a period of time. Woodside response: Woodside confirmed it accepted the Shire's proposal to deliver briefings that cover its program of activities in an area over a period of time.	(10) Not required.
(11) Clarified the need for stakeholders to be advised of any assessed high-risk activity.	(11) Woodside assessment: Woodside will notify relevant stakeholders if required. Woodside response: Woodside confirmed it would notify relevant stakeholders if required as per Woodside's oil spill response arrangements.	(11) The Oil Pollution First Strike Plan (Appendix I) for this EP includes a requirement to notify stakeholders who may be affected by a spill.

While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Ashburton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers on 13 September 2023 advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Ashburton on 15 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to Shire of Ashburton over a 28-month period.		

City of Karratha

Summary of information provided and record of consultation for this EP:		
• On 15 September 2023, Woodside emailed City of Karratha advising of the proposed activity (Record of Consultation, reference 1.19) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to City of Karratha following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its	No additional measures or controls are required.

	Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Karratha for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to City of Karratha on 15 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided City of Karratha with the opportunity to provide feedback over a 28-month period.		

Shire of Carnarvon

Summary of information provided and record of consultation for this EP:		
• On 13 September 2023, Woodside emailed Shire of Carnarvon advising of the proposed activity (Record of Consultation, reference 1.4) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Shire of Carnarvon following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Carnarvon for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Carnarvon on 13 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Carnarvon with the opportunity to provide feedback over a 28-month period.

Town of Port Hedland

Summary of information provided and record of consultation for this EP:

- On 15 September 2023, Woodside emailed Town of Port Hedland advising of the proposed activity (Record of Consultation, reference 1.20) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Town of Port Hedland following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Town of Port Hedland for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.

- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Town of Port Hedland on 15 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Town of Port Hedland with the opportunity to provide feedback over a 28-month period.

Shire of Wyndham-East Kimberley

Summary of information provided and record of consultation for this EP:

- On 19 September 2023, Woodside emailed Shire of Wyndham-East Kimberley advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Wyndham-East Kimberley following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 February 2025, Woodside emailed Shire of Wyndham-East Kimberley a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Shire of Wyndham-East Kimberley. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to Shire of Wyndham-East Kimberley following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Wyndham-East Kimberley for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Wyndham-East Kimberley on 19 September 2023 and 17 February 2025 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided Shire of Wyndham-East Kimberley with the opportunity to provide feedback over a 28-month period.

Shire of Derby/West Kimberley

Summary of information provided and record of consultation for this EP:

- On 18 September 2023, Woodside emailed Shire of Derby/West Kimberley advising of the proposed activity (Record of Consultation, reference 1.24) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a follow-up email to the Shire of Derby/West Kimberley (Record of Consultation, reference 2.1 and included a link to the Consultation Information Sheet on Woodside's website)
- On 24 October 2023, Shire of Derby/West Kimberley responded (SI Report, reference 64.1) and:
 - (1) Confirmed it had no specific feedback regarding the unlikely oil spill impacts.
 - (2) Advised it expected to be notified as part of any oil spill response needed.
- On 03 November 2023, Woodside responded thanking Shire of Derby/West Kimberley for its feedback (SI Report, reference 64.2). Woodside:
 - (1) Noted the Shire had no specific feedback regarding the proposed activity.
 - (2) Confirmed that in the highly unlikely event a hydrocarbon release was to enter the Shire's area of responsibility, Woodside would at that time contact the Shire with respect to response arrangements.
- On 17 February 2025, Woodside emailed Shire of Derby/West Kimberley a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was

undertaking additional consultation with Shire of Derby/West Kimberley. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.

- On 10 March 2025, Woodside sent a reminder email to Shire of Derby/West Kimberley following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.
- On 10 March 2025, Shire of Derby/West Kimberley responded (SI Report, Reference 64.3). The Shire:
 - (1) Confirmed it had no specific concerns or feedback regarding the activity.
 - Noted some personnel changes and confirmed its best contact details going forward.
- On 14 March 2025, Woodside responded thanking the Shire for its feedback (SI Report, reference 64.4). Woodside:
 - (1) Acknowledged the Shire had no concerns or feedback.
 - Thanked the Shire for the updated contact details and confirmed future correspondence would be sent to the nominated address.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) No specific feedback regarding unlikely oil spill impacts.	(1) Woodside assessment: Woodside accepts that the Shire of Derby/West Kimberley has no concerns or feedback. Woodside response: Woodside noted Shire of Derby/West Kimberley had no specific feedback on the activity.	(1) Not required.
(2) Expected to be notified as part of any oil spill response needed.	(2) Woodside assessment: Woodside will notify relevant stakeholders in the highly unlikely event of a hydrocarbon release. Woodside response: Woodside confirmed that in line with the Oil Pollution First Strike Plan, in the highly unlikely event a hydrocarbon release was to enter the Shire's area of responsibility, Woodside would at that time contact the Shire with respect to response arrangements.	(2) The Oil Pollution First Strike Plan (Appendix I) includes a requirement to notify stakeholders who may be affected by a spill.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate,	No additional controls or measures are required.

	Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Derby/West Kimberley for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Derby/West Kimberley on 18 September 2023 and 17 February 2025 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided Shire of Derby/West Kimberley with the opportunity to provide feedback over a 28-month period.		

Shire of East Pilbara

Summary of information provided and record of consultation for this EP: • On 02 October 2023, Woodside emailed Shire of East Pilbara advising of the proposed activity (Record of Consultation, reference 1.52) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 24 October 2023, Woodside sent a reminder email to Shire of East Pilbara following up on the proposed activity (Record of Consultation, reference 2.7).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of East Pilbara for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of East Pilbara on 2 October 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Shire of East Pilbara with the opportunity to provide feedback over a 25-month period.

Shire of Broome

Summary of information provided and record of consultation for this EP:

- On 18 September 2023, Woodside emailed Shire of Broome advising of the proposed activity (Record of Consultation, reference 1.21) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 22 September 2023, Shire of Broome responded to Woodside (SI Report, reference 65.1) and:
 - (1) Advised it had no comment on the proposal due to the significant distance from Broome.
 - (2) Noted it looked forward to receiving referrals related to proposals closer to Broome.
- On 5 October 2023, Woodside responding thanking Shire of Broome for its email (SI Report, reference 65.2). Woodside:
 - (1) Noted Shire of Broome had no comment on the EP.
 - (2) Confirmed it would continue to consult the Shire on activities closer to Broome.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Due to the distance from Broome, the Shire had no comment on the proposal.	(1) Woodside assessment: Woodside accepts the Shire of Broome has no comments due to the distance from the Operational Area. Woodside response: Woodside noted the Shire of Broome had no comments on the proposal.	(1) Not required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(2) The Shire looked forward to receiving referrals related to proposals closer to Broome.	(2) Woodside assessment: Woodside will continue to consult Shire of Broome where it is identified as a relevant person. Woodside feedback: Woodside confirmed it would continue to consult Shire of Broome on proposals closer to Broome.	(2) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Broome for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Broome on 18 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has addressed and responded to Shire of Broome over a 28-month period.		

Shire of Shark Bay

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 399 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 19 September 2023, Woodside emailed Shire of Shark Bay advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Shark Bay following up on the proposed activities (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 October 2023, Woodside met with the Shire of Shark Bay during a community information session in Denham. The discussion with the Shire included:
 - (1) An overview of this EP and its consultation process, noting that consultation was based on the EMBA and that no activities were planned in Shark Bay.
 - (2) The Shire advising it would provide a list of other potentially relevant persons to consult.
- On 18 October 2023, the Shire of Shark Bay emailed Woodside thanking it for the meeting (SI Report, reference 66.1). The Shire:
 - (2) Recommended a list of contacts in Shark Bay who might be interested in providing feedback on the proposed activity and expressed an interest in setting up a meeting with interested contacts in the future. Woodside has sent consultation information to these contacts.
 - (3) Provided advice on the best consultation channels for the broader Shark Bay community and advised that as a local government, Shire of Shark Bay could not post Woodside content on its website but could share graphics containing consultation information on its Facebook page on behalf of Woodside.
- On 20 October 2023, Woodside sent an email thanking Shire of Shark Bay for the meeting (SI Report, reference 66.2) and:
 - (2) Confirmed it would consult the stakeholders recommended by the Shire.
 - (3) Thanked the Shire for its advice on the best consultation methods for reaching the broader community.
 - (1) Provided further information, including links to the Consultation Information Sheet, for this EP and two separate Woodside EPs in which the Shire had shown interest.
 - (1) Explained the environment that may be affected (EMBA) and how it affected the Shire of Shark Bay for this EP and the separate Woodside EP.
 - (1) Confirmed Woodside looked forward to meeting with the Shire in the future.
- On 31 October 2023, Woodside sent an email to three Shire of Shark Bay representatives providing another overview of the proposed activity (Record of Consultation, reference 1.60).
- On 15 December 2023, Woodside sent a reminder email to three Shire of Shark Bay representatives following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Explanation of Woodside's consultation process, the activities associated with this EP, and the EMBA.	(1) Woodside assessment: Woodside welcomes engagement with the Shire of Shark Bay which has been assessed as a relevant person for this EP. Woodside response: Woodside provided an explanation of the EP, EMBA and consultation process during a discussion with Shire	(1) Not required.

	of Shark Bay at a community information session. Woodside had previously provided consultation information to the Shire via email, and, following the meeting, Woodside emailed consultation information to additional Shark Bay representatives.	
(2) Provided a list of contacts who may be interested in providing feedback on the activities proposed in this EP.	(2) Woodside assessment: Woodside reviewed the Shire of Shark Bay's feedback regarding potentially relevant persons for this EP and provided consultation information to those stakeholders. Woodside response: Woodside confirmed it would provide consultation information to the stakeholders recommended by Shire of Shark Bay.	(2) Woodside updated its Assessment of Relevance (see Appendix F, Table 1) to include the stakeholders Shire of Shark Bay identified as potentially relevant.
(3) Provided advice on consultation channels for Shark Bay.	(3) Woodside assessment: Woodside notes Shire of Shark Bay's advice on consultation channels for the community and will incorporate this approach into future EPs where relevant. Woodside response: Woodside noted Shire of Shark Bay's advice for the best consultation channels for the broader community and will action this approach for consultation on future EPs where relevant.	(3) Not required.
(4) Advised it could share Woodside consultation graphics on its Facebook page.	(4) Woodside assessment: Woodside notes the Shire of Shark Bay can share information on its Facebook page on behalf of Woodside. Woodside response: Woodside noted the Shire of Shark Bay's advice regarding sharing consultation information on Facebook on behalf of Woodside.	(4) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Shark Bay for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Shark Bay on 19 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Shire of Shark Bay over a 28-month period.

City of Greater Geraldton**Summary of information provided and record of consultation for this EP:**

- On 19 September 2023, Woodside emailed City of Greater Geraldton advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to City of Greater Geraldton following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Greater Geraldton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to City of Greater Geraldton based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided City of Greater Geraldton with the opportunity to provide feedback over 26-month period.

Shire of Augusta Margaret River

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Shire of Augusta Margaret River advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Augusta Margaret River following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Augusta Margaret River for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Shire of Augusta Margaret River on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow up seeking feedback on the proposed activities.
- Woodside has provided Shire of Augusta Margaret River with the opportunity to provide feedback over a 28-month period.

Shire of Chapman Valley

Summary of information provided and record of consultation for this EP:

- On 19 September 2023, Woodside emailed Shire of Chapman Valley advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Chapman Valley following up on the proposed activity (Record of Consultation, reference 2.1).
- On 26 February 2025, Woodside emailed Shire of Chapman Valley a consultation update on this EP (Record of Consultation, reference 3.19). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Shire of Chapman Valley. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 19 March 2025, Woodside sent a reminder email to Shire of Chapman Valley following up on the proposed activity (Record of Consultation, reference 4.6). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Chapman Valley for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Shire of Chapman Valley on 19 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent follow-up emails seeking feedback on the proposed activities.
- Woodside has provided Shire of Chapman Valley with the opportunity to provide feedback over a 28-month period.

Shire of Dandaragan

Summary of information provided and record of consultation for this EP:

- On 19 September 2023, Woodside emailed Shire of Dandaragan advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Dandaragan following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Dandaragan for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information provided to Shire of Dandaragan on 19 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Dandaragan with the opportunity to provide feedback over a 28-month period.

Shire of Gingin

Summary of information provided and record of consultation for this EP:

- On 19 September 2023, Woodside emailed Shire of Gingin advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Gingin following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Gingin for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Gingin on 19 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 5

Page 406 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Woodside has provided Shire of Gingin with the opportunity to provide feedback over a 28-month period.

Shire of Northampton

Summary of information provided and record of consultation for this EP:

- On 19 September 2023, Woodside emailed Shire of Northampton advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Northampton following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Northampton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Northampton on 19 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Northampton with the opportunity to provide feedback over a 28-month period.

Shire of Christmas Island

Summary of information provided and record of consultation for this EP:

- On 19 September 2023, Woodside emailed Shire of Christmas Island advising of the proposed activity (Record of Consultation, reference 1.29) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to Shire of Christmas Island following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 25 October 2023, Woodside emailed Shire of Christmas Island to provide details for its contact for First Nations Peoples and seek contact details for the Christmas Island Malay Peoples (SI Report, reference 67.1).
- On 2 November 2023, Woodside sent a follow-up email regarding contacts for the Christmas Island Malay Peoples and explaining its intention to provide an overview of Woodside Energy and its projects to the community and broader Shire (SI Report, 67.2).
- On 3 November 2023, Woodside had a phone call with Shire of Christmas Island to discuss consultation opportunities (SI Report, 67.3). During the discussion:
 - Woodside provided an overview of role responsibilities and points of contact with First Nations communities and Corporations in WA and NT.
 - Woodside discussed the recent changes to consultation and engagement as a result of the Santos Tiwi Island matter.
 - The Shire provided history and context about the island and Shire roles.
 - (1) The Shire noted it was unaware of prior correspondence regarding this EP.
 - Woodside explained the process for determining the EMBA for this EP and confirmed why Christmas Island had been consulted.
 - (2) The Shire noted it appreciated and supported Woodside's methodology for identifying and including First Nations stakeholder input.
 - (3) The Shire identified other Malay and Chinese contacts that Woodside should consider including in future engagements where relevant.
 - (4) The Shire welcomed the opportunity for a potential meeting with Woodside on Christmas Island and provided information about flight availability.
- On 3 November 2023, Woodside sent an email in follow-up to the phone call (SI Report, reference 67.4). Woodside noted:
 - (1) It wanted to ensure Shire of Christmas Island had an opportunity to hear about Woodside Energy projects in the region and to take feedback.
 - (2) It appreciated the engagement with the Shire and its support for Woodside's methodology.
 - (3) Its approach to consultation in line with Regulation 25 including changes in relation to First Nations groups following recent court matters.
 - (4) Potential opportunities to meet with Shire of Christmas Island during November or December.
- On 3 November 2023, Shire of Christmas Island responded thanking Woodside for its email (SI Report, reference 67.5) and:
 - (4) Provided information about flight availability to Christmas Island during December for a potential meeting.
 - (1) Advised it had checked previous correspondence between Woodside and Christmas Island and noted a series of emails for licenced fishers about a separate Woodside drilling project earlier in 2023.

- On 6 November 2023, Woodside responded thanking Shire of Christmas Island for its email and advised it was also looking to organise a consultation session with Cocos (Keeling) Islands (SI Report, reference 67.6).
- On 6 November 2023, the Shire of Christmas Island responded and confirmed flights were available from Christmas Island to Cocos (Keeling) Islands (SI Report, reference 67.7).
- On 15 December 2023, Woodside emailed Shire of Christmas Island's Fisheries Management Committee (FMC) advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community.
- On 9 January 2024, Woodside sent a reminder email to the Shire's FMC following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.
- On 19 January 2024, the FMC responded thanking Woodside for the opportunity to provide feedback (SI Report, reference 67.8). The FMC:
 - **(5)** Stated its experience of emergency communications in the external Indian Ocean Territories (IOTs) during times of widespread natural disasters that impacted the WA coastline and IOTs simultaneously was less than satisfactory, and advised it would like to submit to Woodside that dedicated communication, care and mitigation plans needed to be committed to for Christmas Island and the neighbouring Cocos (Keeling) Islands.
 - **(6)** Noted that while the mainland had a larger population and potentially greater economic impact from a significant failure at the facility, the livelihoods of residents in the external territories also needed careful consideration, and the recent 2022 declaration of the Christmas Island and Cocos (Keeling) Islands Marine Parks further underscored the importance of addressing the unique concerns and circumstances of the external territories. The FMC further stated it would welcome a dedicated emergency plan from Woodside for the IOT territories of Christmas Island and Cocos (Keeling) Islands and would like to underline the dramatic effect on life on the islands in the event their waters sustained effects from an unwanted event at the Woodside facilities. The FMC asked that mitigation plans be discussed and workshopped with relevant stakeholders in the Commonwealth, local government and emergency services in the IOTs to ensure a planned response was on file.
- On 5 February 2024, Woodside phoned the Shire of Christmas Island following up on discussions regarding a potential meeting (SI Report, reference 67.9). The Shire advised that it had provided written feedback via its FMC. Woodside thanked the Shire and confirmed it would respond to the Shire via its FMC.
- On 12 February 2024, Woodside responded thanking the Shire's FMC for its correspondence and for seeking clarification on oil spill responses (SI Report, reference 67.10). Woodside:
 - **(5)** Confirmed its process for oil spill response planning included the following steps:
 - Assess the credible spill risk for the activity.
 - Establish areas that may be contacted by an oil spill based on the outputs of computer simulation modelling, which use credible spill information together with weather and oceanographic data.
 - Select appropriate oil spill response clean-up methods for the credible spill event.
 - Develop an activity-specific Oil Pollution First Strike Plan to set out the steps to take if an oil spill does occur.
 - Regularly test, train and assure the First Strike Plan.

- (5) Advised that for Pyrenees operations, the computer oil spill simulation modelling predicted a minimum contact time at Christmas Island of 44 days in the event of a highly unlikely oil spill. This was considered to be a significant lead time to mount appropriate spill response measures.
- (5) Noted that while oil spill response within the IOTs fell under the jurisdiction of AMSA, Woodside would make resources available to the response effort via oil spill response contractors and that Woodside maintained an equipment stockpile and trained staff on the mainland that could be deployed if required during a spill event.
- (6) Advised that Woodside, together with other Australian energy companies, had developed a suite of site-specific 'tactical response plans' (TRPs) which were shared across the industry. Woodside noted:
 - The plans provided information on suitable clean-up equipment required closest stockpiles, local infrastructure, specific sensitivities, and other pertinent information to improve efficiency during a spill.
 - As a result of FMC's feedback, Woodside had sought advice from an oil spill contractor on the development of a TRP appropriate for Christmas Island and understood a request had also been made for the contractor to develop a TRP for Cocos (Keeling) Islands.
 - Woodside would provide an update to FMC once it had received information from the oil spill contractor on an appropriate way forward for the Christmas Island TRP and may seek inputs for the TRP's development.
- (6) Advised that further to the proposed TRPs for Christmas and Cocos (Keeling) Islands, it could add a relevant contact for Christmas and Cocos (Keeling) Islands into the notifications table within the First Strike Plan for this activity, which would ensure timely notifications were made to relevant parties if a spill event occurred that risked contacting Christmas and Cocos (Keeling) Islands. Woodside asked that if this would be considered useful, the FMC provide relevant contact information.
- (2, 3) Sought additional advice on whether further consultation with Christmas Island's Malay community was requested. Woodside noted that a member of its First Nations Engagement team had received advice that the point of contact for the Malay community and the FMC were the same.
- On 11 June 2024, Woodside emailed the Shire's FMC and attached a copy of the newly developed TRP for Christmas Island ((SI Report, reference 67.11). Woodside:
 - (6) Recapped that Woodside, together with other Australian energy companies, had a suite of site-specific 'tactical response plans' (TRPs) which were shared across the industry.
 - (6) Advised that as a result of the FMC's feedback, Woodside had approached the oil spill contractor and a TRP had now been developed for Christmas Island.
 - (6) Provided an overview of the contents of the TRP and confirmed a copy of the TRP was also attached.
 - (6) Noted that it understood the oil spill contractor had also been approached regarding the development of a TRP for Cocos (Keeling) Islands.
- On 11 June 2024, Shire of Christmas Island responding thanking Woodside for forwarding the TRP for Christmas Island (SI Report, reference 67.12). The Shire:
 - (7) Suggested an update to the Area Description and Site Location details in the TRP, based on:
 - The Minister for Environment gazetted the Christmas Island Marine National Park in 2022, and while the draft management plan was still to finalised, zones had been determined.
 - The current Area Description only included the terrestrial national park and should be updated to include the marine park.

- On 14 June 2024, Woodside responded thanking the Shire for its feedback (SI Report, reference 67.13). Woodside:
 - (7) Confirmed it had updated the TRP to include the marine national park in the area description and site location sections.
 - (7) Attached a copy of the updated TRP.
- (7) On 14 June 2024, Shire of Christmas Island responded to confirm it had received the update (SI Report, reference 67.14). (7) Woodside noted the Shire had received the updated version of the TRP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) The Shire advised it was unaware of Woodside consultation correspondence related to this EP prior to a phone call from Woodside on 3 November 2023, but had seen a series of emails for fishery licence holders regarding a separate Woodside EP earlier in 2023.	(1) Woodside assessment: Woodside has provided sufficient information to Shire of Christmas Island in line with regulation 25(2) of the Environment Regulations but notes the Shire's preference for phone or face-to-face consultation in future. Woodside response: Woodside noted Shire of Christmas Island's feedback that it had not seen the email correspondence regarding this EP and that the Shire appreciated Woodside's phone call regarding the proposed activity and welcomed the opportunity to meet in-person to discuss Woodside Energy projects.	(1) Not required.
(2) Support for Woodside's methodology for identifying and including First Nations stakeholder input.	(2) Woodside assessment: Woodside welcomes engagement with the Shire and First Nations groups on Christmas Island. Woodside response: Woodside noted the Shire's support for its methodology and efforts in identifying and seeking input from First Nations stakeholders.	(2) Not required.
(3) Identification of Malay and Chinese communities on Christmas Island that Woodside should consider engaging for future EPs.	(3) Woodside assessment: Woodside complies with regulation 25 of the Environment Regulations in regard to the consultation process. For this EP, the Malay community of Christmas Island has been assessed as not a relevant person based on its functions, interests or activities, although Woodside chose to seek to contact the organisation at its discretion in line with Section 5.3.7. Woodside response: Woodside noted the Shire's advice regarding Malay and Chinese communities on Christmas Island who may be interested in providing feedback on Woodside activities in the future and advised it would consider the additional stakeholders during	(3) Woodside has assessed the relevancy of the Malay community of Christmas Island in Appendix F, Table 1 of the EP.

	relevancy assessments for future EPs. As part of ongoing consultation, Woodside would also continue to consult following acceptance of this EP.	
(4) Opportunity welcomed for a potential meeting with Woodside and provided information about flight schedules and bookings.	(4) Woodside assessment: Woodside welcomes the opportunity to consult with the Shire regarding Woodside activities and accepts feedback throughout the life of an EP. Woodside response: Woodside confirmed it would like to ensure Christmas Island had an opportunity to hear about Woodside Energy projects and would work towards dates in late November or December for a potential meeting.	(4) As identified in Section 7.15 off this EP, Woodside will continue to consult following acceptance of the EP, as requirement by the implementation strategy as set out regulation 22(15) of the Environment Regulations.
(5) The Shire's Fishing Management Committee (FMC) described its experience of emergency communications during natural disasters as less than satisfactory and advised it would like to submit to Woodside that dedicated communication, care and mitigation plans needed to be committed to for Christmas Island.	(5) Woodside assessment: Woodside's hydrocarbon release simulation modelling predicts a minimum contact time at Christmas Island of 44 days which provides a significant lead time to mount appropriate spill response measures. Woodside response: Woodside assessed the feedback from the FMC and provided an explanation of its process for oil spill response planning. Woodside advised that in the highly unlikely event of an oil spill, simulation modelling predicted a minimum contact time at Christmas Island of 44 days, which was considered to be significant lead time to mount appropriate spill response measures. Woodside noted that while oil spill response in the IOTs fell under the jurisdiction of AMSA, Woodside would make resources available to the response effort. Woodside confirmed it maintained an equipment stockpile and trained staff on the mainland that could be deployed if required.	(5) Woodside's process for identifying potential response options for hydrocarbon release scenarios is described in the OSPRMA (Appendix H).
(6) The FMC noted that the livelihoods of residents in the external territories needed careful and unique consideration and stated it would welcome a dedicated emergency plan from Woodside for Christmas Island.	(6) Woodside assessment: Woodside sought advice from an oil spill contractor on the development of a response plan for Christmas Island and the plan has now been developed. Woodside response: As a result of FMC's feedback, Woodside confirmed it would seek advice from an oil spill response contractor on the development of a TRP for Christmas Island. Woodside advised it would provide an update to the FMC once it received information on an appropriate way forward for the Christmas Island	(6) At FMC's discretion, Woodside will include a relevant Christmas Island contact in the notification table for the Oil Pollution First Strike Plan for this activity (Appendix I).

	TRP. In June 2024, Woodside forwarded a copy of the newly developed TRP to the FMC. Woodside also advised it could include relevant contacts in its First Strike Plan, and for Christmas Island to provide contact information if this would be useful.	
(7) Requested an update to the Christmas Island TRP to include the recently gazetted marine national park in the area description.	(7) Woodside assessment: Woodside agrees it is important to update the area description in the TRP to include the marine national park. Woodside response: Woodside confirmed it had updated the area description and site location sections of the TRP to include the marine national park. Woodside provided a copy of the updated TRP to the Shire.	(7) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Christmas Island for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Christmas Island on 19 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.		

- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has addressed and responded to Shire of Christmas Island over a 28-month period.

City of Busselton

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed City of Busselton advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to City of Busselton advising of the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Busselton for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to City of Busselton on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided City of Busselton with the opportunity to provide feedback over a 28-month period.

Shire of Carnamah

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Shire of Carnamah advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Carnamah following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Carnamah for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Carnamah on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Carnamah with the opportunity to provide feedback over a 28-month period.

City of Cockburn

Summary of information provided and record of consultation for this EP:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 21 September 2023, Woodside emailed City of Cockburn advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, City of Cockburn sent a reminder email to City of Cockburn following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Cockburn for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to City of Cockburn on 21 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided City of Cockburn with the opportunity to provide feedback over a 28-month period.		

Shire of Coorow

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Shire of Coorow advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 October 2023, Woodside sent a reminder email to Shire of Coorow following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Coorow for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Coorow on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Shire of Coorow with the opportunity to provide feedback over a 28-month period.

Shire of Harvey

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 21 September 2023, Woodside emailed Shire of Harvey advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet.
- On 18 October 2023, Woodside sent a reminder email to Shire of Harvey following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 17 February 2025, Woodside emailed Shire of Harvey a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Shire of Harvey. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to Shire of Harvey following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Harvey for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to Shire of Harvey on 21 September 2023 and 17 February 2025 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided Shire of Harvey with the opportunity to provide feedback over a 28-month period.		

Shire of Irwin

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Shire of Irwin advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Irwin following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Irwin for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Shire of Irwin on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has provided Shire of Irwin with the opportunity to provide feedback over a 28-month period.

City of Joondalup

- On 21 September 2023, Woodside emailed City of Joondalup advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to City of Joondalup following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Joondalup for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to City of Joondalup on 21 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided City of Joondalup with the opportunity to provide feedback over a 28-month period.		

City of Mandurah

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed City of Mandurah advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 18 October 2023, Woodside sent a reminder email to City of Mandurah following up on the proposed activities (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Mandurah for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: - Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. - Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. - Consultation Information provided to City of Mandurah on 21 September 2023 based on their functions, interests or activities. - Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - Woodside has sent a follow-up email seeking feedback on the proposed activities. - Woodside has provided City of Mandurah with the opportunity to provide feedback over a 28-month period.		

Shire of Manjimup

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Shire of Manjimup advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Manjimup following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Manjimup for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Manjimup on 21 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided Shire of Manjimup with the opportunity to provide feedback over a 28-month period.		

City of Rockingham

Summary of information provided and record of consultation for this EP: • On 21 September 2023, Woodside emailed City of Rockingham advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 18 October 2023, Woodside sent a reminder email to City of Rockingham following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Rockingham for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to City of Rockingham on 21 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided City of Rockingham with the opportunity to provide feedback over a 28-month period.		

City of Wanneroo

Summary of information provided and record of consultation for this EP:		
• On 21 September 2023, Woodside emailed City of Wanneroo advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 18 October 2023, Woodside sent a reminder email to City of Wanneroo following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its	No additional measures or controls are required.

	Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with City of Wanneroo for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to City of Wanneroo on 21 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent a follow-up email seeking feedback on the proposed activities. • Woodside has provided City of Wanneroo with the opportunity to provide feedback over 26-month period.		

Shire of Waroona

Summary of information provided and record of consultation for this EP:		
• On 21 September 2023, Woodside emailed Shire of Waroona advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 18 October 2023, Woodside sent a reminder email to Shire of Waroona following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website. • On 26 February 2025, Woodside emailed Shire of Waroona a consultation update on this EP (Record of Consultation, reference 3.19). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Shire of Waroona. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. • On 19 March 2025, Woodside sent a reminder email to Shire of Waroona following up on the proposed activity (Record of Consultation, reference 4.6). Woodside included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Shire of Waroona for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically: • Consultation Information Sheet publicly available on the Woodside website since 12 September 2023. • Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback. • Consultation Information provided to Shire of Waroona on 21 September 2023 based on their functions, interests or activities. • Woodside has provided a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • Woodside has sent follow-up emails seeking feedback on the proposed activities. • Woodside has provided Shire of Waroona with the opportunity to provide feedback over a 28-month period.		

Exmouth Community Liaison Group (Exmouth CLG)

Summary of information provided and record of consultation for this EP: • On 18 September 2023, Woodside emailed Exmouth CLG advising of the proposed activity (Record of Consultation, reference 1.25) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 16 October 2023, Woodside sent a reminder email to Exmouth CLG following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website. • On 21 November 2023, Woodside presented to Exmouth CLG meeting on a range of Woodside activities, including this EP. Woodside presented a slide which listed EPs on which the Exmouth CLG members had recently been consulted (SI Report, reference 74.1). The slide included a QR code and URL to the Consultation Activities page of the Woodside website. 12 individuals attended the meeting, representing: Exmouth Volunteer Marine Rescue; Gascoyne Development Commission; Shire of Exmouth; PHI Helicopters; Bhagwan Marine; Exmouth Chamber of Commerce and Industry; Ningaloo Coast World Heritage Advisory Council; Australia's Coral Coast Tourism; Santos. No feedback was received regarding this specific EP. – On 4 December 2023, Woodside's presentation was emailed to the Exmouth CLG regardless of whether they attended the meeting.
--

- On 17 July 2024, Woodside presented to the Exmouth CLG on Woodside activities, including this EP. Woodside presented a slide listing EPs on which the CLG members had recently been consulted and EPs currently under consultation (SI Report, reference 74.2).
 - No feedback was provided on this EP.
 - 13 individuals attended the meeting representing: Exmouth Volunteer Marine Rescue; Gascoyne Development Commission; Shire of Exmouth; PHI Helicopters; Exmouth Chamber of Commerce and Industry; Ningaloo Coast World Heritage Advisory Council / NOPSEMA Community and Environment Reference Group; Santos; AIMS; Department of Health.
 - No questions were raised by CLG members in attendance at the meeting.
 - In August 2024, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 12 November 2024, Woodside presented to the Exmouth CLG on Woodside activities, including this EP. Woodside presented a slide listing EPs on which the CLG members had recently been consulted and EPs currently under consultation (SI Report, reference 74.3).
 - No feedback was provided on this EP.
 - 13 individuals attended the meeting representing: Shire of Exmouth, Gascoyne Development Commission; Exmouth Chamber of Commerce and Industry; Ningaloo Coast World Heritage Advisory Council / NOPSEMA Community and Environment Reference Group; West Australian Country Health Service; Bhagwan Marine; PHI Helicopters; Exmouth Volunteer Marine Rescue; CSIRO; Santos.
 - On 2 December 2024, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 13 March 2025, Woodside presented to the Exmouth CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 74.4).
 - Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBA's.
 - The slides included a QR code and a URL for the Consultation Activities page of the Woodside website. Copies of the latest edition of Let's Talk were provided in hard copy and sent electronically with the minutes and slide pack.
 - listing EPs on which the CLG members had recently been consulted and EPs currently under consultation.
 - 7 individuals attended the meeting representing:
 - Shire of Exmouth
 - Gascoyne Development Commission
 - Exmouth Chamber of Commerce and Industry
 - Australia's Coral Coast/Regional Development Authority
 - Ningaloo Coast World Heritage Advisory Council / NOPSEMA Community and Environment Reference Group Exmouth community
 - West Australian Country Health Service
 - Bhagwan Marine
 - PHI Helicopters

- Exmouth Volunteer Marine Rescue
 - CSIRO
 - Santos.
- No feedback was provided for this EP.
- On 22 April 2025, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.
- On 26 June 2025, Woodside presented to the Exmouth CLG on EP consultation requirements and Woodside activities, including activities for this EP (SI Report, reference 74.5).
 - Woodside presented slides on how it consults relevant persons in the course of preparing EPs and provided information on relevant persons and EMBA's.
 - Woodside also discussed the Pyrenees EP, noting that the CLG had previously been consulted on the EP. Woodside advised that some additional consultation had also taken place due to additional modelling completed during the development of the EP. Woodside noted it continued to accept feedback throughout the life of an EP and provided a QR code and a URL for the Consultation Activities page of the Woodside website for any members wishing to provide feedback on Pyrenees or other EPs.
 - 7 individuals attended the meeting representing:
 - Shire of Exmouth
 - Exmouth Chamber of Commerce and Industry
 - Australia's Coral Coast/Regional Development Authority
 - PHI Helicopters
 - Local councillor
 - St John Exmouth Subcentre
 - Exmouth Freight and Logistics
 - Santos.
 - No feedback was provided for this EP.
- On 10 July 2025, Woodside's presentation was emailed to the CLG members, regardless of their attendance at the meeting.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP). Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Rockingham Kwinana Chamber of Commerce and Industry on 27 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Rockingham Kwinana Chamber of Commerce and Industry with the opportunity to provide feedback over a 28-month period.

Manjimup Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP:

- On 27 September 2023, Woodside emailed Manjimup Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Manjimup Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Manjimup Chamber of Commerce and Industry for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Manjimup Chamber of Commerce and Industry on 27 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Manjimup Chamber of Commerce and Industry with the opportunity to provide feedback over a 28-month period.

Augusta Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP:

- On 27 September 2023, Woodside emailed Augusta Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Augusta Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Augusta Chamber of Commerce and Industry for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.
- Consultation Information provided to Augusta Chamber of Commerce and Industry on 27 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Augusta Chamber of Commerce and Industry with the opportunity to provide feedback over a 28-month period.

Christmas Island Business Association

Summary of information provided and record of consultation for this EP:

- On 15 December 2023, Woodside emailed Christmas Island Business Association advising of the proposed activity (Record of Consultation, reference 1.101) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Christmas Island Business Association following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Christmas Island Business Association for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley

Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Christmas Island Business Association on 15 December 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Christmas Island Business Association with the opportunity to provide feedback over a 25-month period.

Indian Ocean Territories Regional Development Organisation

Summary of information provided and record of consultation for this EP:

- On 15 December 2023, Woodside emailed Indian Ocean Territories Regional Development Organisation advising of the proposed activity (Record of Consultation, reference 1.101) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Indian Ocean Territories Regional Development Organisation following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Indian Ocean Territories Regional Development Organisation for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Indian Ocean Territories Regional Development Organisation on 15 December 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Indian Ocean Territories Regional Development Organisation with the opportunity to provide feedback over a 25-month period.

Research institutes and local conservation groups or organisations

Cape Conservation Group (CCG)

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Cape Conservation Group advising of the proposed activity (Record of Consultation, reference 1.35) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Cape Conservation Group following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Cape Conservation Group (CCG) for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River

Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

- Consultation Information provided to Cape Conservation Group on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Cape Conservation Group with the opportunity to provide feedback over a 28-month period.

Protect Ningaloo

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed Protect Ningaloo advising of the proposed activity (Record of Consultation, reference 1.35) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to Protect Ningaloo following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has provided a reasonable period in which to receive feedback which is consistent with the intended outcome of consultation (see Section 5.4 of this EP). Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

Woodside has discharged its obligations for consultation under regulation 25 of the Environment Regulations and consultation with Protect Ningaloo for the purpose of regulation 25 is complete. Sufficient information and a reasonable period have been provided, as described in Section 5.4 of the EP. Specifically:

- Consultation Information Sheet publicly available on the Woodside website since 12 September 2023.
- Woodside published advertisements in a national, state and relevant local newspapers including The Australian, The West Australian, NT News, Pilbara News, North West Telegraph, Midwest Times, Manjimup-Bridgetown Times, Kalgoorlie Miner (13 September 2023), Broome Advertiser, South Western Times, Kimberley Echo, Albany Advertiser, Countryman, Narrogin Observer, Great Southern Herald, Harvey Waroona Reporter (14 September 2023) and Augusta Margaret River Times, Busselton Dunsborough Times, Geraldton Guardian (15 September 2023), Koori Mail (20 September 2023) and National Indigenous Times (26 September 2023) advising of the proposed activities and requesting feedback.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Page 452 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Consultation Information provided to Protect Ningaloo on 21 September 2023 based on their functions, interests or activities.
- Woodside has provided a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- Woodside has sent a follow-up email seeking feedback on the proposed activities.
- Woodside has provided Protect Ningaloo with the opportunity to provide feedback over a 28-month period.

Table 3: Engagement Report with Persons or Organisations Assessed as Not Relevant

Commonwealth and State Government Departments or Agencies

Southern Ports – Albany and Bunbury

Summary of information provided and record of consultation for this EP and the other operations EP: • On 21 September 2023, Woodside emailed Southern Ports – Albany and Bunbury advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. • On 18 October 2023, Woodside sent a reminder email to Southern Ports – Albany and Bunbury following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

While Southern Ports – Albany and Bunbury is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Southern Ports to provide feedback during the consultation process.

Port of Cocos (Keeling) Island

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 18 December 2023, Woodside emailed Port of Cocos (Keeling) Island advising of the proposed activity (Record of Consultation, reference 1.103) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 12 January 2024, Woodside sent a reminder email to Port of Cocos (Keeling) Island following up on the proposed activity (Record of Consultation, reference 2.20) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

While Port of Cocos (Keeling) Island is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Port of Cocos (Keeling) Island to provide feedback during the consultation process.

Commonwealth and State Government Departments or Agencies - Marine

Department of Industry, Tourism and Trade (DITT) – NT Fisheries

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside emailed DITT – NT Fisheries advising of the proposed activity (Record of Consultation, reference 1.39) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

- On 16 October 2023, Woodside sent a reminder email to DITT – NT Fisheries following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.
- On 17 February 2025, Woodside emailed NT Fisheries a consultation update on this EP (Record of Consultation, reference 3.3). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with NT Fisheries. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 10 March 2025, Woodside sent a reminder email to NT Fisheries following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While DITT – NT Fisheries is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for DITT – NT Fisheries to provide feedback during the consultation process.		

Commonwealth commercial fisheries and representative bodies

Cocos (Keeling) Islands Marine Aquarium Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 3 October 2023, Woodside sent a letter to Cocos (Keeling) Islands Marine Aquarium Fishery advising of the proposed activity (Record of Consultation, reference 1.53) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 24 October 2023, Woodside sent a reminder letter to Cocos (Keeling) Islands Marine Aquarium Fishery following up on the proposed activity (Record of Consultation, reference 2.9) and included a QR code link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 455 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA, and individual fishery licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	Woodside has assessed the potential for interaction with Commonwealth managed commercial fisheries issues in Section 4.10.1 of this EP. No additional measures or controls are required.
Outcomes of consultation		
While Cocos (Keeling) Islands Marine Aquarium Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Cocos (Keeling) Islands Marine Aquarium Fishery to provide feedback during the consultation process.		

Australian Southern Bluefin Tuna Industry Association (ASBTIA)

Summary of information provided and record of consultation for this EP: - On 3 October 2023, Woodside emailed ASBTIA advising of the proposed activity (Record of Consultation, reference 1.56) and provided a Consultation Information Sheet. - On 1 November 2023, Woodside sent a reminder email to ASBTIA following up on the proposed activity (Record of Consultation, reference 2.12) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted AFMA, DAFF - Fisheries, CFA and Tuna Australia. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
While ASBTIA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ASBTIA to provide feedback during the consultation process.		

Northern Territory commercial fisheries and representative bodies

Northern Territory Seafood Council (NTSC)

Summary of information provided and record of consultation for this EP and the other operations EP:		
- On 15 December 2023, Woodside emailed NTSC advising of the proposed activity (Record of Consultation, reference 1.102) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 9 January 2024, Woodside sent a reminder email to NTSC following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website. - On 17 February 2025, Woodside emailed NTSC a consultation update on this EP (Record of Consultation, reference 3.2). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with NTSC. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA. - On 10 March 2025, Woodside sent a reminder email to NTSC following up on the proposed activity (Record of Consultation, reference 4.1). Woodside included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While NTSC is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for NTSC to provide feedback during the consultation process.

Northern Territory Aquarium Fish/Display Fish Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside sent a letter to Northern Territory Aquarium Fish/Display Fish Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Aquarium Fish/Display Fish Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted NT Fisheries and individual licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

While Northern Territory Aquarium Fish/Display Fish Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Aquarium Fish/Display Fish Fishery to provide feedback during the consultation process.

Northern Territory Spanish Mackerel Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside sent a letter to Northern Territory Spanish Mackerel Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Spanish Mackerel Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted NT Fisheries and individual licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Northern Territory Spanish Mackerel Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Spanish Mackerel Fishery to provide feedback during the consultation process.		

Northern Territory Offshore Net and Line Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:		
- On 22 September 2023, Woodside sent a letter to Northern Territory Offshore Net and Line Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 16 October 2023, Woodside sent a reminder letter to Northern Territory Offshore Net and Line Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted NT Fisheries and individual relevant licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
While Northern Territory Offshore Net and Line Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Offshore Net and Line Fishery to provide feedback during the consultation process.		

Northern Territory Demersal Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:		
- On 22 September 2023, Woodside sent a letter to Northern Territory Demersal Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 16 October 2023, Woodside sent a reminder letter to Northern Territory Demersal Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted NT Fisheries and individual licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Northern Territory Demersal Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Demersal Fishery to provide feedback during the consultation process.		

Northern Territory Mud Crab Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 460 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 22 September 2023, Woodside sent a letter to Northern Territory Mud Crab Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Mud Crab Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside's website.
- On 20 October 2023, a licence holder from the Northern Territory Mud Crab Fishery responded thanking Woodside for the opportunity to be consulted (SI Report, reference 70.1). It explained its business undertakings related to Sea Country activities and enquired about:
 - (1) The process of reporting accidental waste discharged into the environment.
 - (2) The process for reporting damage to sea life on the sea floor, such as giant clams and any other protected or endangered species.
 - (3) Opportunities for local Aboriginal sea rangers to work on the activities associated with this EP or other activities.
 - (4) Opportunities for the licence holder to work with Woodside on any activities.
- On 17 November 2023, Woodside responded and thanked the licence holder for its feedback (SI Report, reference 70.2). Woodside:
 - (1) Advised that activities that occurred under this EP had requirements for reporting to NOPSEMA which included accidental waste discharged to the environment. The Environment Regulations specified when and what Woodside would need to report depending on the severity of the incident. There may also be requirements for reporting to other regulators that Woodside would follow, for example, to the Australian Maritime Safety Authority.
 - (2) Advised that activities associated with this EP were located where the sea floor was predominantly soft, sandy seabed and sea life such as giant clams and other protected or endangered species were not known to occur. However, if the activities described in the EP resulted in the unintentional death of or injury to a fauna species listed as Threatened or Migratory, and the activity was not authorised by a permit, this would be reported to the Department of Climate Change, Energy, Environment and Water
 - (3, 4) Noted the Aboriginal Sea Company's interest in opportunities for local Aboriginal sea rangers and broader opportunities between Woodside and the Traditional Owners and advised Woodside was currently looking to work through both the Northern Land Council and Tiwi Land Council.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) The process for reporting the discharge of accidental waste.	(1) Woodside assessment: Woodside complies with NOPSEMA's reporting requirements. Woodside response: Woodside provided information on the process for reporting accidental waste discharged into the environment.	(1) Existing controls considered sufficient as described in Sections 6.6 and 6.7 of the EP.
(2) The process for reporting damage to the sea life on the sea floor.	(2) Woodside assessment: Woodside complies with NOPSEMA's reporting requirements.	(2) Existing controls considered sufficient as described in Sections 6.6 and 6.7 of the EP.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	Woodside response: Woodside provided information on the sea floor where the activities associated with this EP are located, and on the process for reporting the unintentional death of or injury to a fauna species listed as Threatened or Migratory.	
(3) Opportunities for local Aboriginal sea rangers on the activity.	(3) Woodside assessment: Woodside notes ASC's interest in opportunities for local Aboriginal sea rangers. Woodside response: Woodside advised it was currently looking to work through both the Northern Land Council and Tiwi Land Council and was open to further discussion with ASC.	(3) Not required.
(4) Opportunities for the licence holder to work with Woodside on broader activities.	(4) Woodside assessment: Woodside notes ASC's interest in broader opportunities between Woodside and Traditional Owners. Woodside response: Woodside advised it was currently looking to work through both the Northern Land Council and Tiwi Land Council and was open to further discussion with ASC.	(4) Not required.
While feedback has been received, there were no objections or claims.	Woodside has consulted NT Fisheries and individual licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Northern Territory Mud Crab Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Mud Crab Fishery to provide feedback during the consultation process.		

Northern Territory Mollusc Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside sent a letter to Northern Territory Mollusc Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Mollusc Fishery following up on the proposed activity (Record of Consultation, reference 2.4).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside has consulted NT Fisheries and individual licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

While Northern Territory Mollusc Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Mollusc Fishery to provide feedback during the consultation process.

Northern Territory Aquaculture Fishery

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 22 September 2023, Woodside sent a letter to Northern Territory Aquaculture Fishery licence holders advising of the proposed activity (Record of Consultation, reference 1.42) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder letter to Northern Territory Aquaculture Fishery following up on the proposed activity (Record of Consultation, reference 2.4) and included a QR code link to the Consultation Information Sheet on Woodside's website.

Revision: 5

Page 463 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

No feedback, objections or claims received despite follow-up.	Woodside has consulted NT Fisheries and individual licence holders. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Northern Territory Aquaculture Fishery is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Northern Territory Aquaculture Fishery to provide feedback during the consultation process.		

Recreational marine users and representative bodies

Shark Bay Marine Users

Summary of information provided and record of consultation for this EP: - On 18 October 2023, in an email to Woodside, Shire of Shark Bay identified Shark Bay marine, dive and charter operators that may be potentially relevant persons for this EP. - On 31 October 2023, Woodside emailed the Shark Bay marine users advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 15 December 2023, Woodside sent a reminder email to Shark Bay marine users following up on the proposed activity (Record of Consultation 2.18) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Uncontrolled when printed. Refer to electronic version for most up to date information.

While Shark Bay Marine Users is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Marine Users to provide feedback during the consultation process.

Amateur Fishermen's Association of the NT

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 15 December 2023, Woodside emailed Amateur Fishermen's Association of the NT advising of the proposed activity (Record of Consultation, reference 1.99) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 9 January 2024, Woodside sent a reminder email to Amateur Fishermen's Association of the NT following up on the proposed activity (Record of Consultation, reference 2.19) and included a link to the Consultation Information Sheet on Woodside's website.
- On 18 February 2025, Woodside emailed Amateur Fishermen's Association of the NT a consultation update on this EP (Record of Consultation, reference 3.12). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with Amateur Fishermen's Association of the NT. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to Amateur Fishermen's Association of the NT following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

While Amateur Fishermen's Association of the NT is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Amateur Fishermen's Association of the NT to provide feedback during the consultation process.

Northern Territory Guided Fishing Industry Association (NTGFIA)

Summary of information provided and record of consultation:

- On 18 December 2023, Woodside telephoned NTGFIA advising of the proposed activity and seeking guidance on whether it was necessary to consult individual operators (SI Report, reference 48.1). Woodside noted that it was consulting on this EP in combination with another Operations EP, and that only the EMBA for the other Operations EP extended into Northern Territory waters.
- On 18 December 2023, Woodside emailed NTGFIA with further information about the proposed activity (Record of Consultation, reference 1.100) and provided a Consultation Information Sheet, and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 20 December 2023, NTGFIA responded thanking Woodside for the email (SI Report, reference 48.2). NTGFIA:
 - (1) Noted that given the very limited portion of NT waters impacted and the unlikelihood of its members operating in those areas, it had no comment at that time.
- On 21 December 2023, Woodside responded thanking NTGFIA for its feedback (SI Report, reference 48.3). Woodside:
 - (1) Noted the unlikelihood of members operating in those areas and that the NTGFIA therefore had no comment at this time.
 - (1) Advised that on that basis, Woodside would not consult individual operators for this activity.
- On 18 February 2025, Woodside emailed NTGFIA a consultation update on this EP (Record of Consultation, reference 3.12). Woodside advised that additional modelling during the EP development process had resulted in changes to the EMBA and based on those changes, Woodside was undertaking additional consultation with NTGFIA. Woodside attached an updated Consultation Information Sheet which included a map of the revised EMBA.
- On 11 March 2025, Woodside sent a reminder email to NTGFIA following up on the proposed activity (Record of Consultation, reference 4.2). Woodside included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's response	Inclusion in Environment Plan
(1) NTGFIA advised that due to the limited portion of NT waters impacted and the unlikelihood of its members operating in those areas, it had no comment at this time.	(1) Woodside assessment: Woodside accepts that NTGFIA has no comment on the proposed activity and, due to the unlikelihood of its members operating within the EMBA, Woodside has not consulted individual charter operators. Woodside response: Woodside acknowledged that NTGFIA had no comment and it was unlikely its members would operate within the EMBA. On that basis, Woodside advised it would not consult individual operators.	(1) Not required.

While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.1.16 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While NTGFIA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for NTGFIA to provide feedback during the consultation process.		

Peak Industry Representative Bodies

National Energy Resource Australia (NERA)

Summary of information provided and record of consultation for this EP: - On 5 October 2023, Woodside emailed NERA advising of the proposed activity (Record of Consultation, reference 1.55) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure Consultation on offshore petroleum environment plans: Information for the community. - On 30 October 2023, Woodside sent a reminder email to NERA following up on the proposed activity (Record of Consultation, reference 2.10) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

While NERA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for NERA to provide feedback during the consultation process.

Traditional Custodians and nominated representative corporations

Ngadju Native Title Aboriginal Corporation (Ngadju)

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 16 October 2023, Woodside emailed Ngadju advising of the proposed activity (Record of Consultation, reference 1.74) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Ngadju and its members may have within the EMBA, information on how Ngadju would like to engage, and requested that Ngadju provide information to other individuals as required.
- On 20 October 2023, Woodside telephoned Ngadju and left a message asking for its call to be returned (SI Report, reference 49.1). Ngadju returned Woodside's call.
- On 20 October 2023, in follow-up to the phone call, Woodside emailed Ngadju, advising of the proposed activity and again provided the Summary Information Sheet and links to detailed information sheets. Woodside also provided a link to NOPSEMA's Consultation Brochure as well as their contact details (SI Report, reference 49.2).
- On 31 October 2023, Woodside sent a follow-up email asking whether Ngadju would like any further information on the environment plan and advising it was available to meet in Perth on 2 November 2023 or 8 November 2023 (SI Report, reference 49.3). No response was received.
- On 7 December 2023, Woodside sent a follow-up email asking whether Ngadju would like any further information on the environment plan and advising there was availability to meet in Perth on 11 December 2023 (SI Report, reference 49.4). No response was received.
- On 19 December 2023, Woodside emailed Ngadju wishing them a safe festive season and offered assistance on the environment plan (SI Report, reference 49.5).
- (1) On 3 January 2024, Woodside met face to face with Ngadju to discuss the Ngadju Native Title Aboriginal Corporation's (NNTAC) recent elections and appointment of new CEO, and transfer of ranger group and conservation projects to new NNTAC CEO and Board. Ngadju expressed it is keen to continue working with Woodside on activities. No concerns were raised regarding the Pyrenees EP (SI Report, reference 49.6). (1) Woodside noted this feedback and will include it in the EP.
- On 25 January 2024, Woodside phoned Ngadju corporation and left a message requesting a return call, no response was received (SI Report, reference 49.7).
- On 2 February 2024, Woodside emailed Ngadju NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information, as well as a request to consult on the proposed activity. This email also reiterated Woodside's request that Ngadju advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 49.8).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) Ngadju is keen to continue working with Woodside and had no concerns about this activity.	(1) Woodside assessment: Woodside acknowledges Ngadju's feedback. Woodside response: Woodside is committed to further consultation and engagement with Ngadju on other activities.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
While Ngadju is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Ngadju to provide feedback during the consultation process.		

Yawoorroong Miriuwung Gajerrong Yirrgeb Noong Dawang (MGC) (MG Corp)

MG Corp is established under the *Native Title Act 1993 (Cth)* by the Miriuwung and Gajerrong people to represent the Miriuwung and Gajerrong people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

- On 18 July 2023, Woodside emailed MG Corp NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that MG Corp advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 55.1).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 469 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 15 September 2023, Woodside emailed MG Corp an agenda and presentation in advance of a meeting planned for 18 September to discuss unrelated activities as well as this activity (SI Report, reference 55.2).
- On 18 September 2023, Woodside met with the MG Corp Chair and Directors and presented on this activity along with others (SI Report, reference 55.3). Woodside:
 - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of the EMBA and discussed how the EMBA is developed.
 - Gave an overview of the activity.
 - Specifically, Woodside asked the following:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?
 - What are your concerns about the proposed activities and what do you think we should do about them?
 - Is there anything you would like included in the EPs before submission?
 - Is there anyone else Woodside should consult with about the activities?
 - MG Corp noted:
 - **(1)** That native title exists on Lacrosse Island and is closer to shore in relation to impacts from this activity. **(1)** Woodside informed MG Corp that Lacrosse Island did not fall in the EMBA for this activity.
 - **(1)** There are registered sites on Lacrosse Island to be aware of.
 - **(2)** That Balanggarra should be involved in future discussions. **(2)** Woodside said that they had made attempts to contact Balanggarra.
- On 13 October 2023, Woodside emailed MG Corp advising of the proposed activity (Record of Consultation, reference 1.105) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MG Corp and its members may have within the EMBA, information on how MG Corp would like to engage, and requested that MG Corp provide information to other individuals as required.
- On 1 November 2023, Woodside emailed MG Corp following up on the activity summary sheets and asking if there was any feedback or further information required (SI Report, reference 55.4). No response was received.
- On 25 January 2024, Woodside phoned MG Corp and was advised to send an email (SI Report, reference 55.5).
- On 25 January 2024, Woodside emailed MG Corp following up on this activity, re-attaching the Summary Information sheet sent in October 2023, and offering to provide further information if required. Woodside stated they would submit this EP to NOPSEMA in February 2024, re-iterating feedback from MG Corp is open for the life of the EP (SI Report, reference 55.6).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) MG Corp advised Woodside that Native title exists on Lacrosse Island and is closer to shore in terms of impacts, as well as there are registered sites on the island.	(1) Woodside assessment: Woodside acknowledges MG Corp advice that Native title exists on Lacrosse Island and there are registered sites on the island. Woodside response: Woodside informed MG Corp that Lacrosse Island did not fall in the EMBA for this activity.	(1) Not required.
(2) MG Corp advised Woodside that Balanggarra should be involved in future discussions.	(2) Woodside assessment: Woodside acknowledges MG Corp advice that Balanggarra should be involved in future discussions. Woodside response: Woodside has made a number of attempts to contact Balanggarra regarding this activity. On 4 March 2025, Balanggarra emailed Woodside confirming that previous emails about the proposed activity have been received.	(2) Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
While MG Corp is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for MG Corp to provide feedback during the consultation process.		

Mirning Traditional Lands Aboriginal Corporation RNTBC (MTLAC)

MTLAC is established under the *Native Title Act 1993 (Cth)* by the Mirning people to represent the Mirning people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 4 October 2023, Woodside emailed MTLAC advising of the proposed activity (Record of Consultation, reference 1.94) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that MTLAC and its members may have within the EMBA, information on how MTLAC would like to engage, and requested that MTLAC provide information to other individuals as required.
- On 24 October 2023, Woodside emailed MTLAC following up on the activity (SI Report, reference 56.1). No response was received.
- On 8 December, Woodside sent a follow-up email offering to answer any questions relating to the proposed EPs. Woodside advised of their availability to schedule a consultation session (SI Report, reference 56.2).
- On 19 December 2023, Woodside emailed MTLAC thanking them for their contributions throughout the year and offering opportunity for consultation regarding Woodside projects (SI Report, reference 56.3).
- On 9 January 2024, Woodside emailed MTLAC following up on previous correspondence and offering the opportunity to meet via MTLAC's preferred method of consultation (SI Report, reference 56.4).
- On 9 January 2024, MTLAC emailed Woodside advising acceptance of a meeting, enquiring the purpose of the meeting and requesting a date suitable to Woodside (SI Report, reference 56.5).
- On 10 January 2024, Woodside emailed MTLAC informing them of the aim of the meeting and advising a calendar invite would be sent out later that day (SI Report, reference 56.6).
- On 22 January 2024, Woodside met with MTLAC (SI Report, reference 56.7). Woodside:
 - Described the EP framework, referring to the Offshore Petroleum and Greenhouse Gas Storage Act (Environment) Regulations, NOPSEMA's role as regulator and general contents of EPs.
 - Displayed a map of the EMBA and discussed how the EMBA is developed.
 - Gave an overview of the activity including that woodside will continue to produce crude oil.
 - Spoke about routine inspections, monitoring maintenance and repairs associated with the subsea infrastructure.
 - Described planned and unplanned environmental risks and impacts in accordance with tables provided in the Information Sheets for the activities, emphasising that unplanned risks are not expected to occur and are unlikely.
 - Specifically, Woodside asked the following:
 - How could these activities impact your cultural values, interests, and activities - does protecting the environment do enough to protect your cultural values?

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

▪ What are your concerns about the proposed activities and what do you think we should do about them? ▪ Is there anything you would like included in the EPs before submission? ▪ Is there anyone else Woodside should consult with about the activities? – Advised that Woodside will continue to take feedback from MTLAC for the life of the EP. – Discussed ranger programs and initiatives that Woodside has partnered on. – MTLAC noted: ▪ (1) That due to the location of the activity it was unlikely that Mirning country would be impacted. (1) Woodside noted MTLAC's feedback and would document in the EP. – (2) Discussion on cultural heritage and Sea Country mapping took place. (2) Woodside noted that there would be an opportunity to talk further on Sea Country mapping. • On 31 January 2024, Woodside emailed MTLAC thanking them for the meeting that occurred on 22 January 2024. Woodside noted that it was unclear if they would need to consult with MTLAC on future environment plans and attached Woodside's program of ongoing consultation (SI Report, reference 56.8).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) MTLAC noted that due to the location of the activity it was unlikely that Mirning country would be impacted.	(1) Woodside assessment: Feedback has been received but this is an exchange of information, no objections or claims. Woodside response: Woodside accepts that MTLAC's feedback that due to the location of the activity it was unlikely Mirning country would be impacted.	(1) No additional measures or controls are required.
(2) MTLAC and Woodside discussed cultural heritage and Sea Country mapping.	(2) Woodside assessment: Woodside noted the discussion with MTLAC about cultural heritage and Sea Country mapping. Woodside response: Woodside confirmed that there could be opportunities to support MTLAC with Sea Country mapping.	(2) No additional measures or controls are required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the	Based on the engagement to date, no additional measures or controls are required.

	activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	
Outcomes of consultation		
While MTLAC is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for MTLAC to provide feedback during the consultation process.		

Esperance Tjaltjraak Native Title Aboriginal Corporation (ETNTAC)

Summary of information provided and record of consultation for this EP:

- On 3 October 2023, Woodside emailed ETNTAC advising of the proposed activity (Record of Consultation, reference 1.86) and provided a Summary Information Sheet (including a link to the detailed information sheet on Woodside's website). The email requested information on the interests that ETNTAC and its members may have within the EMBA. Woodside also provided a link to NOPSEMA's brochure "Consultation on offshore petroleum environment plans" alongside NOPSEMA's contact details.
- On 3 October 2023, ETNTAC emailed Woodside to confirm receipt of the email and noted the link to the detailed Consultation Information Sheet wasn't allowing access (SI Report, reference 47.1).
- On 3 October 2023, Woodside responded with a new link for the detailed Consultation Information Sheet (SI Report, reference 47.2).
- On 3 October 2023, ETNTAC responded (SI Report, reference 47.3) thanking Woodside for the link and asked:
 - (1) Woodside to summarise why it was seeking to engage with ETNTAC regarding the project.
 - (2) Why the limit of potential impact is Ravensthorpe and whether this is based on the potential impacts to coastal areas from a release of hydrocarbons as far east as Ravensthorpe, or another factor impacting inland areas as well.
- On 3 October 2023, Woodside responded (SI Report, reference 47.4) and:
 - (1, 2) Explained the methodology behind the EMBA and that the coast of Esperance falls within the catchment area.
 - (1) Provided some common Questions and Answers regarding what constitutes a relevant person and how an EMBA is determined. Woodside noted that following a Federal Court decision, it now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- Provided direction and a link to the NOPSEMA website for further information on consultation guidelines and oil spilling modelling.
- On 24 October 2023, Woodside sent a follow-up email enquiring if ETNTAC had any questions relating to this EP and offered consultation sessions with the members and/or board of ETNTAC (SI Report, reference 47.5). No response has been received.
- On 8 December 2023, Woodside emailed ETNTAC following up on previous correspondence and offering opportunity for consultation sessions with members and/or Board of ETNT during the festive period (SI Report, reference 47.6).
- On 19 December 2023, Woodside emailed ETNTAC wishing a happy festive season, thanking ETNTAC for their contributions throughout the year and offering availability for consultation sessions (SI Report, reference 47.7).
- On 22 December, ETNTAC emailed Woodside apologising for the lack of communication and advising Woodside of when to expect future correspondence from ETNTAC (SI Report, reference 47.8).
- On 9 January 2024, Woodside emailed ETNTAC following up on previous correspondence offering to meet and discuss the EP. Woodside included contact information of the best contact person following 31 January 2024 (SI Report, reference 47.9).
- On 2 February 2024, Woodside emailed ETNTAC links to NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. The email informed ETNTAC that consultation prior to being submitted to NOPSEMA would close for this EP on 23 February 2024. Woodside offered to meet with ETNTAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 47.10).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) ETNTAC has sought clarification on why Woodside is consulting with it on this activity.	(1) Woodside assessment: Woodside acknowledges ETNTAC needs information about why it is relevant to this activity. Woodside response: Woodside provided a written response advising ETNTAC of the methodology behind the EMBA, which for this EP includes the coast of Esperance, and confirmed that based on a Federal Court decision, Woodside now consults more broadly with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity. Woodside also provided some further Q&As about the development of the EMBA.	(1) Not required.
(2)	(2)	(2)

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

ETNTAC has queried why the limit of potential impact is Ravensthorpe.	Woodside assessment: Woodside has determined potential impacts through the development of an EMBA. Woodside response: Woodside provided a written response advising ETNTAC of the methodology behind the EMBA, which for this EP includes the coast of Esperance, Woodside also provided some further Q&As about the development of the EMBA.	Not required.
While feedback has been received, there were no objections or claims.	Woodside has assessed the merits of each objection or claim (if any) about the adverse impact of the activity to which the EP relates, as required under Regulation 24. Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted (including any relevant new information on cultural values), it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1).	Based on the engagement to date, no additional measures or controls are required.
Outcomes of consultation		
While ETNTAC is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ETNTAC to provide feedback during the consultation process.		

Wilinggin Aboriginal Corporation (Wilinggin)

Wilinggin Aboriginal Corporation is established under the *Native Title Act 1993 (Cth)* by the Ngarinyin people to represent the Ngarinyin people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical engagement:

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 476 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 18 July 2023, Woodside emailed KLC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that KLC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 57.1).

Summary of information provided and record of consultation for this EP:

- On 13 October 2023, Woodside emailed Wilinggin advising of the proposed activity (Record of Consultation, reference 1.93) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that Wilinggin and its members may have within the EMBA, information on how Wilinggin would like to engage, and requested that Wilinggin provide information to other individuals as required.
- On 25 October 2023, Woodside emailed Wilinggin (via KLC) introducing themselves and querying the best point of contact for Wilinggin (along with some other PBCs) (SI Report, reference 57.2).
- On 30 October 2023, Wilinggin (via KLC) emailed Woodside advising of the appropriate contact details for Wilinggin (SI Report, reference 57.3).
- On 2 November 2023, Woodside emailed KLC thanking them for providing the best contact details in their email on 30 October 2023 and explained how Woodside had tried all available contacts provided to them by KLC. Woodside also stated that they were flexible and will support Wilinggin's preferred method of consultation (dates and locations) (SI Report, reference 57.4).
- On 2 November 2023, Wilinggin (via KLC) emailed Woodside confirming that they would pass onto relevant persons (SI Report, reference 57.5).
- On 2 November 2023, Woodside emailed Wilinggin introducing themselves and enquiring the best point of contact. Woodside also queried if there was availability for a meeting or if any follow up information was required for this activity (SI Report, reference 57.6).
- On 16 November 2023, Woodside sent a follow-up email to Wilinggin enquiring the best contact to reach the Chief Executive Officer for the Wilinggin Aboriginal Corporation. Woodside also offered the opportunity to meet and discuss Woodside activities with the Wilinggin Aboriginal Corporation (SI Report, reference 57.7).
- On 24 November 2023, Woodside emailed Wilinggin requesting the opportunity to meet and answer any questions relating to the EP. Woodside again provided the Summary Information Sheets that were originally sent in October 2023 and asked whether Wilinggin had any feedback on the activity, noting that consultation was open for the life of the EP (SI Report, reference 57.8).
- On 23 January 2024, Woodside emailed Wilinggin to inform that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with Wilinggin at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments post 23 February 2024 (SI Report, reference 57.9).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted it will be assessed and, where appropriate, Woodside will apply its	No additional measures or controls are required.

	Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
While Wilinggin is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Wilinggin to provide feedback during the consultation process.		

Wunambal Gaambera Aboriginal Corporation (WGAC)

WGAC is established under the *Native Title Act 1993 (Cth)* by the Wunambal Gaambera people to represent the Wunambal Gaambera people (defined broadly by reference to descent from the set of ancestors who were known to have a continuous and unbroken connection as the Traditional Custodians at the time of European colonisation) and represent their communal interests including, among other things, management and protection of cultural values.

Historical Engagement

- On 18 July 2023, Woodside emailed WGAC/KLC NOPSEMA's Consultation Guidelines, Consultation Brochure, and Draft Policy for Managing Gender-Restricted Information. This email also reiterated Woodside's request that WGAC advise Woodside of any other Traditional Custodian groups or individuals with whom Woodside should consult (SI Report, reference 58.1).

Summary of information provided and record of consultation for this EP:

- On 2 October 2023, Woodside emailed WGAC advising of the proposed activity (Record of Consultation, reference 1.95) and provided a simplified Consultation Information Sheet (including a link to the detailed information sheet on Woodside's website) as well as a summary overview fact sheet. The email requested information on the interests that WGAC and its members may have within the EMBA, information on how WGAC would like to engage, and requested that WGAC provide information to other individuals as required. On 18 October 2023, Woodside emailed WGAC to identify the best contact details regarding consultation matters.
- On 18 October 2023, Woodside emailed WGAC seeking points of contact for consultation (SI Report, reference 58.2).
- On 18 October 2023, WGAC emailed Woodside with contact details (SI Report, reference 58.3).
- On 18 October 2023, Woodside emailed WGAC seeking to meet with the WGAC Board to provide information and seek feedback on Woodside activities (SI Report, reference 58.4).
- On 15 November 2023, Woodside emailed WGAC following up on previous correspondence and again requesting an opportunity to discuss current activities (SI Report, reference 58.5).
- On 23 November 2023, Woodside emailed WGAC offering a meet and greet to discuss potential funding of future arrangements for meetings and talk through the EP process (SI Report, reference 58.6).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 23 January 2024, Woodside emailed to inform WGAC that consultation prior to being submitted to NOPSEMA will close for this EP on 23 February 2024. Woodside offered to meet with WGAC at their preferred place and time. Woodside re-iterated that consultation was ongoing for the life of the plan and Woodside would assess and respond to any feedback and comments received post 23 February 2024 (SI Report, reference 58.7).

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objection or claim about the adverse impact of the activity received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While WGAC is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for WGAC to provide feedback during the consultation process.		

Local government and elected Parliamentary representatives, community groups or organisations

City of Albany

Summary of information provided and record of consultation for this EP:		
- On 21 September 2023, Woodside emailed City of Albany advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to City of Albany following up on the proposed activities (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its	No additional measures or controls are required.

	Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
While City of Albany is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for City of Albany to provide feedback during the consultation process.		

City of Bunbury

Summary of information provided and record of consultation for this EP and the other operations EP:		
- On 21 September 2023, Woodside emailed City of Bunbury advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to City of Bunbury following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While City of Bunbury is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for City of Bunbury to provide feedback during the consultation process.		

Town of Cambridge

Summary of information provided and record of consultation for this EP:		
- On 21 September 2023, Woodside emailed Town of Cambridge advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Town of Cambridge following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Town of Cambridge is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Town of Cambridge to provide feedback during the consultation process.		

Shire of Capel

Summary of information provided and record of consultation for this EP and the other operations EP: - On 21 September 2023, Woodside emailed Shire of Capel advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Shire of Capel following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Shire of Capel is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Capel to provide feedback during the consultation process.		

Shire of Cocos (Keeling) Islands

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 21 September 2023, Woodside emailed Shire of Cocos (Keeling) Islands advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 4 October 2023, Woodside emailed the Shire CEO to provide further information on EP consultation and to request feedback on interests/concerns. Woodside also enquired whether the Shire wished for Woodside to consult with the Cocos Malay community (SI Report, reference 68.1).
- On 18 October 2023, Woodside sent a reminder email to Shire of Cocos (Keeling) Islands following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.
- On 24 October 2023, Woodside sent a follow-up email and reconfirmed its offer to conduct a consultation meeting or to provide additional project information (SI Report, reference 68.2).
- On 6 November 2023, the Shire emailed Woodside to confirm that as mapping (for the other operations EP) showed the Cocos (Keeling) Islands may, while highly unlikely, be impacted by hydrocarbon release, it would like to have a roundtable discussion – preferably on-site but at a minimum online - to fully understand EMBAs (SI Report, reference 68.3).
- On 6 November 2023, Woodside emailed the Shire and acknowledged the request for a meeting (SI Report, reference 69.4). Woodside enquired about availability and preferred dates/times over the following weeks and confirmed it would discuss logistics for the meeting, with a face-to-face meeting preferred if possible.
- On 7 November 2023, Woodside emailed the Shire noting it had spoken to the travel advisor on the island and proposing potential meeting dates in late November or early December, or February if the 2023 dates did not align with the Shire's schedule (SI Report, reference 68.5).
- On 14 November 2023, Woodside emailed to follow up on potential dates for a meeting (SI Report, reference 68.6).
- On 5 February 2024, Woodside telephoned Shire of Cocos (Keeling) Islands to organise arrangements for an online meeting on 15 February 2024.
- On 15 February 2024, Woodside met with Shire of Cocos (Keeling) Islands via MS Teams (SI Report, reference 68.7). Woodside provided information about three EPs including this one and described how EMBAs were developed. Woodside noted that consultation for this EP had been combined with another Operations EP, therefore Woodside had chosen to consult the Shire for both EPs although the EMBA for this EP did not reach the Cocos (Keeling) Islands. During the meeting:
 - (1) The Shire noted it appreciated Woodside's consultation and the explanation of the EMBA, and had no comments or concerns specific to this EP.
 - (1) Woodside thanked the Shire for its feedback on consultation and noted it had no concerns on this specific EP.
 - The Shire advised many groups on the island had strong interests in environmental matters and suggested a further meeting with additional Shire representatives regarding Woodside activities. Woodside and the Shire agreed to arrange a future meeting to address this.
 - Woodside advised that it welcomed feedback throughout the life of an EP.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(1) The Shire had no specific comments or concerns on this EP.	(1) Woodside assessment: Woodside accepts that the Shire has no specific comments or concerns regarding this EP. Woodside response: Woodside noted the Shire had no specific comments or concerns regarding this EP.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Shire of Cocos (Keeling) Islands is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Cocos (Keeling) Islands to provide feedback during the consultation process.		

Shire of Denmark

Summary of information provided and record of consultation for this EP: - On 21 September 2023, Woodside emailed Shire of Denmark advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Shire of Denmark following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While Shire of Denmark is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Denmark to provide feedback during the consultation process.

Town of Cottesloe

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 21 September 2023, Woodside emailed Town of Cottesloe advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Town of Cottesloe following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Town of Cottesloe is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Town of Cottesloe provide feedback during the consultation process.		

Shire of Dundas

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 21 September 2023, Woodside emailed Shire of Dundas advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Shire of Dundas following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Shire of Dundas is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Dundas to provide feedback during the consultation process.		

Shire of Esperance

Summary of information provided and record of consultation for this EP:		
- On 21 September 2023, Woodside emailed Shire of Esperance advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Shire of Esperance following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Shire of Esperance is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Esperance to provide feedback during the consultation process.		

City of Fremantle

Summary of information provided and record of consultation for this EP and the other operations EP:
--

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 21 September 2023, Woodside emailed City of Fremantle advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to City of Fremantle following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While City of Fremantle is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for City of Fremantle to provide feedback during the consultation process.		

Shire of Jerramungup

Summary of information provided and record of consultation for this EP and the other operations EP:		
- On 21 September 2023, Woodside emailed Shire of Jerramungup advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Shire of Jerramungup following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation

While Shire of Jerramungup is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Jerramungup to provide feedback during the consultation process.

City of Kwinana

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 21 September 2023, Woodside emailed City of Kwinana advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to City of Kwinana following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While City of Kwinana is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for City of Kwinana to provide feedback during the consultation process.		

Town of Mosman Park

Summary of information provided and record of consultation for this EP and the other operations EP:

- On 21 September 2023, Woodside emailed Town of Mosman Park advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Town of Mosman Park following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
---	--	-------------------------------

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Town of Mosman Park is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Town of Mosman Park to provide feedback during the consultation process.		

Shire of Nannup

Summary of information provided and record of consultation for this EP:		
- On 21 September 2023, Woodside emailed Shire of Nannup advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Shire of Nannup following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Shire of Nannup is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Nannup to provide feedback during the consultation process.		

City of Nedlands

Revision: 5

Page 489 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

While Shire of Ravensthorpe is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shire of Ravensthorpe to provide feedback during the consultation process.

City of Stirling

Summary of information provided and record of consultation for this EP:

- On 21 September 2023, Woodside emailed City of Stirling advising of the proposed activity (Record of Consultation, reference 1.36) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to City of Stirling following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.

Outcomes of consultation

While City of Stirling is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for City of Stirling to provide feedback during the consultation process.

Albany Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP:

- On 27 September 2023, Woodside emailed Albany Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 18 October 2023, Woodside sent a reminder email to Albany Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Albany Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Albany Chamber of Commerce and Industry to provide feedback during the consultation process.		

Bunbury Geographe Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP and the other operations EP: - On 27 September 2023, Woodside emailed Bunbury Geographe Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Bunbury Geographe Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Bunbury Geographe Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Bunbury Geographe Chamber of Commerce to provide feedback during the consultation process.		

Capel Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP and the other operations EP: - On 27 September 2023, Woodside emailed Capel Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Capel Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation While Capel Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Chapel Chamber of Commerce and Industry to provide feedback during the consultation process.		

Denmark Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP: - On 27 September 2023, Woodside emailed Denmark Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Denmark Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Environment Plan Controls
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted,	No additional measures or controls are required.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

	it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
While Denmark Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Denmark Chamber of Commerce and Industry to provide feedback during the consultation process.		

Esperance Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP:		
- On 27 September 2023, Woodside emailed Esperance Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Esperance Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Esperance Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Esperance Chamber of Commerce and Industry to provide feedback during the consultation process.		

Fremantle Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP and the other operations EP:
--

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 27 September 2023, Woodside emailed Fremantle Chamber of Commerce and Industry advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Fremantle Chamber of Commerce and Industry following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Fremantle Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Fremantle Chamber of Commerce and Industry to provide feedback during the consultation process.		

Nannup Chamber of Commerce and Industry

Summary of information provided and record of consultation for this EP:		
- On 27 September 2023, Woodside emailed Nannup Chamber of Commerce advising of the proposed activity (Record of Consultation, reference 1.51) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 18 October 2023, Woodside sent a reminder email to Nannup Chamber of Commerce following up on the proposed activity (Record of Consultation, reference 2.2) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While Nannup Chamber of Commerce and Industry is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Nannup Chamber of Commerce and Industry to provide feedback during the consultation process.

Shark Bay Community Resource Centre

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Shark Bay Community Resource Centre as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Shark Bay Community Resource Centre advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Shark Bay Community Resource Centre following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

While Shark Bay Community Resource Centre not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Community Resource Centre to provide feedback during the consultation process.

RAC Monkey Mia Dolphin Resort

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified RAC Monkey Mia Dolphin Resort as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed RAC Monkey Mia Dolphin Resort advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

- On 15 December 2023, Woodside sent a reminder email to RAC Monkey Mia Dolphin Resort following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

While RAC Monkey Mia Dolphin Resort is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for RAC Monkey Mia Dolphin Resort to provide feedback during the consultation process.

Dirk Hartog Island**Summary of information provided and record of consultation for this EP:**

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Dirk Hartog Island as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Dirk Hartog Island advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Dirk Hartog Island following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While Dirk Hartog Island is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Dirk Hartog Island to provide feedback during the consultation process.

Shark Bay Aviation

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Shark Bay Aviation as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Shark Bay Aviation advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Shark Bay Aviation following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

While Shark Bay Aviation is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Aviation to provide feedback during the consultation process.

Naturetime Tours

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Naturetime Tours as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Naturetime Tours advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.

Page 497 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- On 15 December 2023, Woodside sent a reminder email to Naturetime Tours following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While Naturetime Tours is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Naturetime Tours to provide feedback during the consultation process.		

Wula Gura Nyinda Eco Cultural Tours

Summary of information provided and record of consultation for this EP: - On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Wula Gura Nyinda Eco Cultural Tours as a potentially relevant person for this EP. - On 31 October 2023, Woodside emailed Wula Gura Nyinda Eco Cultural Tours advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 15 December 2023, Woodside sent a reminder email to Wula Gura Nyinda Eco Cultural Tours following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While Wula Gura Nyinda Eco Cultural Tours is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Wula Gura Nyinda Eco Cultural Tours to provide feedback during the consultation process.

Shark Bay Coastal Tours

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified Shark Bay Coastal Tours as a potentially relevant person for this EP.
- On 31 October 2023, Woodside emailed Shark Bay Coastal Tours advising of the proposed activities (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to Shark Bay Coastal Tours following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.

Outcomes of consultation

While Shark Bay Coastal Tours is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Shark Bay Coastal Tours to provide feedback during the consultation process.

[Individual 1]

Summary of information provided and record of consultation for this EP:

- On 18 October 2023, in an email to Woodside (SI Report, reference 66.1), Shire of Shark Bay identified [Individual 1] as a potentially relevant person.
- On 31 October 2023, Woodside emailed [Individual 1] advising of the proposed activity (Record of Consultation, reference 1.62) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 15 December 2023, Woodside sent a reminder email to [Individual 1] following up on the proposed activity (Record of Consultation, reference 2.18) and provided a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of this EP).	No additional measures or controls are required.
Outcomes of consultation		
While [Individual 1] is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for [Individual 1] to provide feedback during the consultation process.		

Malay Association of Christmas Island

Summary of information provided and record of consultation for this EP: - On 25 October 2023, in an email to the Shire of Christmas Island, Woodside sought contact details for the Malay Association of Christmas Island (SI Report, reference 71.1). - On 2 November 2023, Woodside sent a follow-up email regarding contacts for the Malay Association of Christmas Island and explaining its intention to provide an overview of Woodside Energy and its projects to the community and broader Shire (SI Report, reference 71.2). - On 3 November 2023, Woodside had a phone call with Shire of Christmas Island to discuss consultation opportunities (SI Report, reference 71.3). During the discussion: - The Shire noted it appreciated and supported Woodside's methodology for identifying and including First Nations stakeholder input. - The Shire identified other Malay contacts that Woodside should consider including in future engagements where relevant. - On 5 February 2024, Woodside phoned the Shire of Christmas Island following up on whether the Malay community wished to meet. The Shire advised the best point of contact for the Malay Association of Christmas Island and noted it was the same contact who had provided feedback to Woodside via the Shire's Fisheries Management Committee (FMC) (SI Report, reference 71.4). - On 12 February 2024, in an email to the FMC on separate feedback, Woodside noted that it was aware the FMC contact was also the best contact for the Malay association, and enquired as to whether consultation was requested with the Malay community (SI Report, reference 71.5).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see (see Section 7.6.1 of the EP).	No feedback, objections or claims received.
Outcomes of consultation		
While Malay Association of Christmas Island is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Malay Association of Christmas Island to provide feedback during the consultation process.		

Other non-government groups or organisations

350 Australia (350A)

Summary of information provided and record of consultation for this EP: - On 26 September 2023, Woodside emailed 350A advising of the proposed activity (Record of Consultation, reference 1.44) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 17 October 2023, Woodside sent a reminder email to 350A following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While 350A is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for 350A to provide feedback during the consultation process.		

Greenpeace Australia Pacific (GAP)

Summary of information provided and record of consultation for this EP: - On 26 September 2023, Woodside emailed GAP advising of the proposed activity (Record of Consultation, reference 1.44) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 17 October 2023, Woodside sent a reminder email to GAP following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While GAP is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for GAP to provide feedback during the consultation process.		

Australia Conservation Foundation (ACF)

Summary of information provided and record of consultation for this EP: - On 26 September 2023, Woodside emailed ACF advising of the proposed activity (Record of Consultation, reference 1.44) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 17 October 2023, Woodside sent a reminder email to ACF following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of	No additional measures or controls are required.

	Change and Revision process (see Section 7.6.1 of the EP).	
Outcomes of consultation		
While ACF is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for ACF to provide feedback during the consultation process		

Australian Marine Conservation Society (AMCS)

Summary of information provided and record of consultation for this EP: - On 26 September 2023, Woodside emailed AMCS advising of the proposed activity (Record of Consultation, reference 1.44) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 17 October 2023, Woodside sent a reminder email to AMCS following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While AMCS is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for AMCS to provide feedback during the consultation process.		

Conservation Council of Western Australia (CCWA)

Summary of information provided and record of consultation for this EP: On 26 September 2023, Woodside emailed CCWA advising of the proposed activity (Record of Consultation, reference 1.44) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.
--

- On 17 October 2023, Woodside sent a reminder email to CCWA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While CCWA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CCWA to provide feedback during the consultation process.		

Sea Shepherd Australia (SSA)

Summary of information provided and record of consultation for this EP:

- On 26 September 2023, Woodside emailed SSA advising of the proposed activity (Record of Consultation, reference 1.44) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 17 October 2023, Woodside sent a reminder email to SSA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

While SSA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for SSA to provide feedback during the consultation process.

Environs Kimberley

Summary of information provided and record of consultation for this EP:

- On 17 February 2025, Woodside emailed Environs Kimberley advising of the proposed activity (Record of Consultation, reference 1.107) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 10 March 2025, Woodside sent a reminder email to Environs Kimberley following up on the proposed activity (Record of Consultation, reference 2.21) and included a link to the Consultation Information Sheet on Woodside's website.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While Environs Kimberley is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for Environs Kimberley to provide feedback during the consultation process.		

Research institutes and local conservation groups or organisations

University of Western Australia (UWA)

Summary of information provided and record of consultation for this EP:

- On 13 September 2023, Woodside emailed UWA advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure *Consultation on offshore petroleum environment plans: Information for the community*.
- On 16 October 2023, Woodside sent a reminder email to UWA following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While UWA is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for UWA to provide feedback during the consultation process.		

Western Australian Marine Science Institution (WAMSI)

Summary of information provided and record of consultation for this EP: - On 13 September 2023, Woodside emailed WAMSI advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. - On 16 October 2023, Woodside sent a reminder email to WAMSI following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While WAMSI is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for WAMSI to provide feedback during the consultation process.		

Australian Institute of Marine Science (AIMS)

Summary of information provided and record of consultation for this EP: - On 13 September 2023, Woodside emailed AIMS advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>. (1) On 28 September 2023, AIMS responded thanking Woodside for its email and confirming no AIMS activities were impacted by the ongoing venture (SI Report, reference 72.1). (1) On 02 October 2023, Woodside responded thanking AIMS for its feedback (SI Report, reference 72.2).		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) AIMS advised none of its activities were impacted by the ongoing venture.	(1) Woodside assessment: Woodside notes that none of AIMS' activities will be impacted. Woodside response: Woodside noted AIMS' advice that none of its activities would be impacted by the ongoing operations related to this EP.	(1) Not required.
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While AIMS is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for AIMS to provide feedback during the consultation process.		

Commonwealth Scientific and Industrial Research Organisation (CSIRO)

Summary of information provided and record of consultation for this EP: On 13 September 2023, Woodside emailed CSIRO advising of the proposed activity (Record of Consultation, reference 1.3) and provided a Consultation Information Sheet and a link to NOPSEMA's brochure <i>Consultation on offshore petroleum environment plans: Information for the community</i>.
--

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

On 16 October 2023, Woodside sent a reminder email to CSIRO following up on the proposed activity (Record of Consultation, reference 2.1) and included a link to the Consultation Information Sheet on Woodside's website.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
No feedback, objections or claims received despite follow-up.	Woodside engages in ongoing consultation throughout the life of an EP. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While CSIRO is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for CSIRO to provide feedback during the consultation process.		

Other

Member of the public [Individual 63]

Summary of information provided and record of consultation for this EP: (1) On 14 September 2023, [Individual 63] phoned Woodside's feedback line and raised concerns regarding the clarity of the map in the advertisement for consultation on this EP which appeared in the West Australian newspaper on 13 September 2023 (Record of Consultation, reference 5.1.2). - On 14 September 2023, Woodside phoned [Individual 63] to discuss their concerns (SI Report, reference 73.1). Woodside: (1) Advised it had reviewed the advertisement and the Operational Area and EMBA were clear in the map, and that the advertisement had also run in numerous other newspapers where the map was clear. (1) Offered to email a copy of the map to the member of the public, however the offer was declined.		
Summary of Feedback, Objection or Claim	Assessment of Merits of Feedback, Objection or Claim and Woodside's Response	Inclusion in Environment Plan
(1) A member of the public, [Individual 63] phoned Woodside with concerns regarding the clarity of	(1) Woodside assessment: Woodside reviewed the map and determined that it clearly shows the Operational Area and EMBA.	(1) Not required.

the map in a newspaper advertisement regarding consultation for this EP.	Woodside response: Woodside phoned the member of the public and advised it had reviewed the map, which clearly showed the Operational Area and EMBA. Woodside offered to email a copy of the map to the member of the public however the offer was declined.	
While feedback has been received, there were no objections or claims.	Woodside engages in ongoing consultation throughout the life of an EP. Woodside notes that further feedback may be received as part of ongoing consultation. Should feedback be received after the EP has been accepted, it will be assessed and, where appropriate, Woodside will apply its Management of Change and Revision process (see Section 7.6.1 of the EP).	No additional measures or controls are required.
Outcomes of consultation		
While [Individual 63] is not a relevant person under regulation 25 of the Environment Regulations, Woodside considers it has still provided sufficient information and a reasonable period outside of regulatory requirements for [Individual 63] to provide feedback during the consultation process.

1. Initial Consultation

1.1 Consultation Information Sheet

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

CARNARVON BASIN, NORTH-WEST AUSTRALIA

Woodside consults relevant persons in the course of preparing an environment plan (EP) to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that may be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. This is the intended outcome of consultation.

Woodside's aim is to ensure activities are carried out in a manner that is consistent with the principles of ecologically sustainable development (ESD), by which the environmental impacts and risks of the activity are reduced to as low as reasonably practicable (ALARP) and of an acceptable level. Woodside want relevant persons whose functions, interests or activities that may be affected by the proposed activity to have the opportunity to identify themselves and provide feedback on our proposed activity, in accordance with the intended outcome of consultation.

Woodside is consulting for both the:

- Pyrenees Floating Production, Storage and Offloading (FPSO) and associated subsea infrastructure (Pyrenees Facilities) Operations EP; and
- Ngujima-Yin Floating Production, Storage and Offloading (FPSO) and associated subsea infrastructure (Ngujima-Yin Facilities) Operations EP, together with their operations and associated activities are similar, and located 13 km apart in adjacent title areas.

Overview

Woodside will submit a five year revision of the Operations EPs for the Pyrenees and Ngujima-Yin Facilities located in Commonwealth waters, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (regulations).

Operations began in 2008 for the Ngujima-Yin Facilities and 2010 for Pyrenees Facilities.

Activity Overview

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin Facilities.

The activities that will continue at the Pyrenees and Ngujima-Yin Facilities are:

- Routine oil production, crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.

In addition to the above, the revised Ngujima-Yin Facility EP will also include:

- Production from an additional two wells via a subsea tieback to existing infrastructure and the operation of a new fuel gas flowline. The proposed wells will be located within the Operational Area (Figure 2). The location of the proposed flowline can be seen in Figure 2 and will originate from either the Pyrenees or Macedon field.

Drilling, construction and installation activities associated with the Ngujima-Yin tieback and fuel gas project will be subject to separate future EPs.

Stylised figures showing the existing Pyrenees Facilities are shown in Figure 3. Figure 4 shows the existing Ngujima-Yin Facilities. These figures are not to scale and are for illustration purposes.

Future decommissioning of infrastructure will be subject to separate future EPs.

Vessels

During normal operations, vessels will typically be limited to supply/support vessels and IMMR vessels. The vessel size and type will be dependent on the work scope. Vessels are not planned to anchor/moor on the seabed except in emergency situations. Offtake tankers will be used for offloading operations in both fields. It is anticipated vessels will operate 24 hours per day for the duration of activities.

Location and Operations

The Pyrenees FPSO is located about 45 km north of Exmouth, Western Australia, with the subsea facilities located within the Production Licenses WA-42-L and WA-43-L, and in water depths ranging from approximately 180 to 215 m (Figure 1). The Pyrenees FPSO is connected to the adjacent Macedon gas field located approximately 6 km southeast of the FPSO. The Macedon field is also operated by Woodside, and the connection allows gas to be supplied from the Macedon gas field for fuel gas on the FPSO, or produced via the Macedon subsea infrastructure to the onshore Macedon Gas Plant for domestic gas production.

The Ngujima-Yin FPSO is located about 57 km north of Exmouth, Western Australia, with the subsea facilities located within Production Licenses WA-28-L, WA-59-L and Pipeline License WA-28-PL, in water depths ranging from approximately 340 to 850 m (Figure 2).

Communication with mariners

The locations of the Pyrenees FPSO and the Ngujima-Yin FPSO as well as associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. The Ngujima-Yin FPSO petroleum safety zone is measured from the riser turret mooring at the bow of the vessel. Vessels are not permitted within the exclusion zone without permission. In addition, a 2.5 nm (4.6 km) radius cautionary zone is also marked on nautical charts around both FPSOs.

Assessment

Woodside has undertaken an assessment of the potential impacts and risks to the environment, as well as to relevant persons arising from the planned activities and unplanned events. This assessment considers timing, duration and location of activities and events. A number of mitigation and management measures will be implemented and are summarised in Table 3. Further details will be provided in each EP being revised to manage proposed activities.

In preparing the EPs, our intent is to minimise environmental, social or cultural impacts associated with the proposed activities, and Woodside are seeking any interest or comments you may have to inform our decision making.

For the potential impacts, Woodside has defined an 'Operational Area' within which the impacts from planned activities could occur.

Both the Pyrenees FPSO and Ngulima-Yin FPSO Operational Areas comprises a 1500 m radius around the FPSO to allow for offtake activities, as well as an area within 1500 m of the subsea infrastructure including wells, flowlines, umbilicals and pipeline (for Ngulima-Yin only).

The Operational Area for the Ngulima-Yin FPSO also includes an area around the potential installation of a flowline, with two options, one with

the flowline originating from Pyrenees field and one originating from Macedon field. No infrastructure exists within the area currently, and if installed, the infrastructure would be added to nautical charts, including the introduction of any associated petroleum safety zone.

Joint Venture

Woodside is the Operator for both the Pyrenees and Ngulima-Yin Facilities, on behalf of Joint Ventures comprising of Santos and Inpex for Pyrenees Facilities and Mitsui for Ngulima-Yin Facilities.

Figure 4. Overview of the subsea infrastructure layout associated with the Ngujima-Yin FPSO (not to scale)

Table 1. Activity summary

	Pyrenees Facility Operations Environment Plan	Ngujima-Yin Facility Operations Environment Plan
Facility type	Floating Production Storage and Offloading (FPSO) and associated subsea infrastructure	Floating Production Storage and Offloading (FPSO) and associated subsea infrastructure
Production License Areas	WA-42-L and WA-43-L	WA-28-L, WA-59-L and WA-28-PL
Approximate water depth	Ranging from approximately 180 to 215 m	Ranging from approximately 340 to 850 m
Commencement date	Production Commenced: 2010	Production Commenced: 2008
Approximate estimated duration	Routine Operations: Ongoing Estimated End of Field Life: 2035	Routine Operations: Ongoing Estimated End of Field Life: 2028
Infrastructure connected to the facility	Key infrastructure includes, but is not limited to: • 1 Disconnectable Turret Mooring system, incorporating the risers • 11 flexible risers and 2 umbilical risers distributed across 4 midwater arches and 1 flexible riser with buoyancy modules • 27 Xmas trees/wells • 10 Manifolds • Power and Control umbilicals • Umbilical Termination Assembly (UTA) • Flexible Flowlines and Jumpers • Subsea support structures	Key infrastructure includes, but is not limited to: • 1 Disconnectable Turret Mooring system, incorporating the risers • 6 flexible risers with buoyancy modules • 28 Xmas trees/wells • 4 Manifolds • Power and Control umbilicals • Umbilical Termination Assembly • Flexible Flowlines and Jumpers • Multi-Phase Pumps • Subsea pig launch and receiver facility • Subsea support structures Potential new infrastructure that could be installed in the next 5 years: • Two new wells • One new flowline supplying fuel gas from either Pyrenees or Macedon
Vessels	Key vessels include, but are not limited to: • Supply and support vessels • Oil tanker • IMMR support vessels including multi-purpose support vessels and dive support vessels	Key vessels include, but are not limited to: • Supply and support vessels • Offloading tanker • IMMR support vessels including multi-purpose support vessels
Operational Areas and Exclusion zones	Operational Area comprises: • Pyrenees FPSO and an area extending out to 1500 m to allow for offtake activities • Pyrenees subsea infrastructure, including wells, flowlines and associated infrastructure, and an area within 1500 m around the infrastructure Exclusion Zones: • A petroleum safety zone, comprising the length of the FPSO which is 260 m plus a 500 m safety zone, which extends to a distance of 760 m radius from the internal Turret of the Pyrenees FPSO	Operational Area comprises: • Ngujima-Yin FPSO and an area extending out to 1500 m to allow for offtake activities • Ngujima-Yin subsea infrastructure including wells, flowlines, a pipeline and associated infrastructure, and an area within 1500 m around the infrastructure. • An area within 1500 m around the proposed route of a subsea flowline either from Pyrenees or from Macedon Exclusion Zones: • A 500 m petroleum safety zone around the Ngujima-Yin FPSO
Distance to nearest town from FPSO	45 km north of Exmouth, Western Australia	57 km north of Exmouth, Western Australia
Distance to nearest marine park/nature reserve from FPSO	Pyrenees FPSO: • -14 km from the northern boundary of the Commonwealth Ningaloo Marine Park	Ngujima-Yin FPSO: • -26 km from the northern boundary of the Commonwealth Ningaloo Marine Park

Environment That May Be Affected (EMBA)

The environment that may be affected (EMBA) is the largest spatial extent where the Pyrenees Facility Operations activities and the Ngujima-Yin Facility Operations activities could potentially have an environmental consequence (direct or indirect). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these EPs, is determined by modelling the highly unlikely event of a hydrocarbon release. The worst-case credible spill scenario for these EPs is a release from a loss of well control or a vessel collision with the FPSO with enough force to breach the hull, releasing crude to the environment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected - the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

Figure 5 displays the EMBA for the Ngujima-Yin EP and Figure 5 displays the EMBA for the Pyrenees EP.

Figure 5. Ngujima-Yin FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

Figure 6. Pyrenees FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/ incident during the Petroleum Activities Program.

Mitigation and management measures

Woodside has undertaken an assessment to identify potential impacts and risks to the environment arising from the Pyrenees and Ngujima-Yin facilities operations activity, including IMMR activities and other contingent activities. A number of mitigation and management measures for the activity are outlined in Table 4. Further details will be provided in the EPs.

Table 4. Summary of key risks and/or impacts and preliminary management measures for the Activity*

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/ Risks	Proposed Mitigation and/or Management Measure
Planned Activities (Routine and Non-routine)			
Physical Presence: Interaction with other Marine Users, Cultural Values & Heritage	- The presence of FPSOs, other vessels and subsea infrastructure has the potential to exclude and/or displace other users from the Pyrenees or Ngujima-Yin Petroleum Safety Zone and Operational Areas respectively. - Physical presence of project vessels and activities may have potential to impact cultural values and heritage.	- Localised displacement of commercial fishing from the Operational Area. - Displacement of recreational fishing activity is likely to be low level due to the distance from boating facilities, lack of natural attractions (e.g. reefs or shoals) and water depth of Operational Area. - The presence of support vessels could cause temporary disruption to commercial shipping. No recognised shipping lanes overlap the Operational Areas. - Tourism and recreation within the Operational Areas is expected to be infrequent due to the lack of emergent features or natural attractions (e.g. reefs or shoals) and water depth.	- Vessels adhere to regulatory requirements for navigational safety. - Maintain a permanent Petroleum Safety Zone around the FPSO. - Notify Australian Hydrographic Office (AHO) of locations of new permanent infrastructures to enable update of maritime charts. - Consult with relevant persons so that they are informed of the proposed activities. - FPSO collision prevention system implemented to alert marine vessels of the facility location. - Woodside will actively support the capacity of Traditional Custodians for ongoing engagement and consultation on environment plans, for the purpose of avoiding impacts to cultural heritage values.
Physical Presence: Seabed disturbance	Seabed disturbance may result from the following activities: - Presence of FPSO, wells and subsea infrastructure (including moorings) modifying marine habitats. - Subsea operations, inspection, maintenance and repair activities resulting. - Anchoring as required in emergency conditions.	- Localised modification of seabed habitat within the Operational area through seabed scouring around subsea infrastructure or formation of artificial reef. - The infrastructure provides hard substrate for marine organisms and a fouling community. This may result in local increase biological productivity and diversity within the Operational Area. - During IMMR activities, a localised and temporary decline in water quality due to an increase of suspended sediment concentration and sediment deposition may occur.	- Monitoring and maintenance of all subsea infrastructure completed as per IMMR process. - Any new subsea infrastructure to have an as-left survey completed and location to be recorded.
Routine Light Emissions: Light Emissions from FPSO, Vessel Operations and Operational Flaring	- The FPSOs, vessels (including IMMR) and Remote Operation Vehicles (ROV) will use external lighting to conduct safe operations. - Light emissions from FPSO during flaring.	Light emissions have the potential to temporarily affect fauna such as fish, marine reptiles and seabirds by influencing changes in their behaviour or impacting orientation in close proximity to the FPSOs or vessels.	- Lighting limited to the minimum required for navigational and safety requirements, except for emergency events. - Flare management through reinjection to reduce flare intensity. - Implementation of appropriate measures based on recommendations of the National Light Pollution Guidelines for Wildlife Including Marine Turtles, Seabirds and Migratory Shorebirds.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Routine Acoustic Emissions: Generation of Noise During Routine Operations	Noise generated within the Operational Areas from: - FPSOs and associated subsea infrastructure; - Vessels; - Helicopters; and - IMMR activities (e.g. ROVs, AUVs, side scan sonar, echo sounder, vessels on DP).	- Elevated underwater noise can potentially disturb marine fauna, including marine mammals, turtles, and fish through behavioural effects, masking or interfering with other biologically important sounds (echolocation, vocal communication, signals, and sounds produced by predators or prey) or as direct physical damage. - The migration corridor (Biologically Important Area (BIA)) for pygmy blue whales and humpback whales overlaps with a small portion of the Operational Areas and may expose the mammals to underwater noise during seasonal migrations. Given the underwater noise levels and low likelihood of the whales being present in the Operational Area, the potential for impact is considered highly unlikely.	Comply with regulatory requirements for interactions with marine megafauna in attempt to prevent adverse interactions.
Routine and Non-routine Atmospheric and Greenhouse Gas (GHG) Emissions	Atmospheric emission and GHG emissions generated through fuel combustion from FPSO, vessels and helicopters, FPSO operational flaring and fugitive emissions (e.g. compressors, generators etc.).	- Emissions could result in temporary, localised reductions in air quality in the immediate vicinity. - Contribution to GHG emissions.	- Comply with regulatory requirements for GHG emissions and reporting. - Monitoring, review and optimisation of facility fuel and flaring emissions where possible.
Routine and Non-Routine Discharges: Subsea Operations and Activities	- Discharge of subsea control fluids from the actuation of valves or during subsea operations and activities. - Potential discharge of hydrocarbons or chemicals remaining in subsea pipework and equipment due to subsea intervention works (including pigging) and/or IMMR activities.	- Localised, short-term decrease in water quality around the subsea system within Operational Area due to relatively small volumes discharged and rapid dilution of release. - Any impacts to fauna should be minor and the potential for bioaccumulation in organisms or accumulation in sediments is considered negligible. - The Operational Area overlaps Key Ecological Features (KEFs), namely the Continental Slope Demersal Fish Communities and Canyons Linking the Cuvier Abyssal Plain and the Cape Range Peninsula. Discharges are not likely to have impacts to the ecosystem function of the KEFs.	- Marine discharges managed according to regulatory requirements. - Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. - Subsea infrastructure flushed and isolated where practicable during IMMR activities.
Routine and Non-routine Discharges: Utility Systems and Drains	- Discharge of sewage, grey water and putrescible waste from FPSOs or vessels to the marine environment. - Discharge of deck, bilge and drain water from FPSOs or vessels to marine environment.	- Potential slight, short-term, localised ongoing increase in nutrients and oxygen demand around FPSOs and vessels with no lasting effect. - Potential slight, short-term, localised ongoing decrease in water quality at discharge location. - Discharges are not likely to impact on the overlapping KEFs in the Operational Areas.	- Marine discharges managed according to regulatory requirements. - Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. - Onboard treatment and open / closed draining systems are monitored and maintained.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Routine and Non-Routine Discharges: FPSO production waste (Pyrenees only)	- Discharge of production waste from Pyrenees FPSO (produced water). - Note: All produced water from Ngujima-Yin FPSO is reinjected to the reservoir and discharge is not permitted in this EP.	Overboard discharges causing localised changes in water quality may result in potential environmental impacts to biota within the Operational Areas	- Marine discharges managed according to regulatory requirements. - Continuous measurements and monitoring of Produced Water (PW) Systems. Diversion of PW if measurements exceed acceptable baseline levels. - Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. - Maximise the reinjection of produced water.
Unplanned Events (Accidents / Incidents)			
Unplanned Hydrocarbon or Chemical Release: Hydrocarbon release during Bunkering / Refuelling and Chemical release during transfer, storage, and use	- Accidental spill of hydrocarbons (diesel) to the marine environment during bunkering / refuelling. - Chemical release to marine environment during transfer, storage and use.	- Potential to cause localised and temporary changes to water quality from a marine diesel or chemical spill. - Marine diesel is a relatively volatile, nonpersistent hydrocarbon with up to approximately 40% evaporating within the first 24 hours for a surface spill. - Potential impacts across the EMBA may include injury/mortality to seabirds, fish, plankton, marine mammals and marine reptiles. Mortality of larger fauna is not expected to occur. - No impacts to KEFs are expected, as these KEFs are mainly benthic and will therefore not be affected by a small surface release.	- Vessels compliant with regulatory guidelines for safe operations including bunkering / refuelling and emergency response. - Chemicals selected with lowest practicable environmental impacts and risks subject to technical constraints and approved through the Woodside chemical assessment process. - Safe storage of chemicals with spill clean-up equipment available. - Equipment for bunkering / refuelling regularly inspected / maintained and replaced as required. - Reporting of unplanned releases.
Unplanned Hydrocarbon Release: Loss of Hazardous and Non-Hazardous Waste / Equipment	Incorrect disposal or accidental discharge of non-hazardous and hazardous waste / equipment from FPSOs or vessels to the marine environment.	- The potential impacts of waste accidentally discharged to the marine environment include localised direct pollution and contamination of the environment, and secondary impacts potentially leading to injury and/or death to marine fauna (e.g. entanglement or ingestion). - The temporary or permanent loss of waste materials/equipment into the marine environment is not likely to have a significant environmental impact, based on the location of the Operational Area, the types, size and frequency of waste that could occur and species present.	- Compliance with regulatory requirements for the prevention of marine pollution and handling of hazardous wastes (i.e. Marine Orders 95 and 94). - Compliance with Waste Management Plans for the storage, handling and transportation of wastes. - Attempted recovery of dropped waste objects where safe and practicable.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Physical Presence (Unplanned): Vessel Collision with Marine Fauna	Vessel movements have the potential to result in collisions between the vessel (hull and propellers) and marine fauna.	- Vessel interaction presents a potential threat to marine mammals, marine reptiles and fish, sharks and rays. - Whilst a portion of both Operational Areas overlap the pygmy blue whale and humpback whale migration BIAs, this overlap represents a very small proportion of the BIA. Given the slow speeds at which project vessels generally operate, interactions with whales are considered unlikely. - Whale shark presence in the Operational Areas is likely during their migrations to and from Ningaloo Reef. Whale sharks are only expected in the area for short durations and their presence would be migratory. - The Pyrenees Operational Area overlaps BIAs for sensitive turtle areas but given the water depth and absence of potential for nesting, turtles are likely to only use the area infrequently for transit. - Vessel activities are unlikely to result in a consequence greater than short-term disruption to fauna, with no expected impact on critical habitat.	Comply with regulatory requirements for interactions (e.g., EPBC Regulations 2000 – Part 8 Division 8.1) with marine fauna to reduce the likelihood of a collision occurring.
Physical Presence (Unplanned): Introduction of Invasive Marine Species (IMS)	- Vessels transiting to the Operational Area may be subject to marine fouling whereby organisms attach to the vessel hull. - Organisms can also be drawn into ballast tanks during onboarding of ballast water. - IMS can also be present as biofouling on subsea structures.	- Transfer of IMS from infected vessels to the Operational Areas and establishment on the seafloor or subsea infrastructure is not likely due to the deep offshore waters which are not conducive to the settlement and establishment of IMS. - There is potential for IMS to transfer from infected vessels and attach to FPSO or turret. - Risk is considered remote that IMS will secondarily transfer from the FPSO or turret to another vessel given the offshore open ocean environment.	- Ballast water and biofouling will be managed according to regulatory requirements, including the Australian Ballast Water Management Requirements, and the Australian Biofouling Management Requirements, as applicable. - Woodside's IMS risk assessment process applied to project vessels and immovable equipment entering the Operational Areas. - Inspection of FPSOs by IMS Inspector prior to return from international sail away.
Unplanned Hydrocarbon Release: Subsea Infrastructure	Accidental release of hydrocarbons resulting from loss of containment of subsea infrastructure.	Potential significant impacts to marine environment including: - Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. - Disruption to marine fauna, including protected species. - Potential interference with or displacement of other sea users including fisheries and tourism and recreation.	- Compliance with Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. - The Subsea Infrastructure design includes a range of measures that specifically aid in minimising the risk of external damage. - Woodside management system implemented during operations to maintain infrastructure integrity, communication systems and safety instrumented systems to an acceptable standard. - Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. - Maintain a permanent Petroleum Safety Zone around FPSO. - Reporting of unplanned releases.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Unplanned Discharges: Loss of Well Containment	Accidental release of hydrocarbons to the marine environment due to loss of well containment.	- Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. - Disruption to marine fauna, including protected species. - Potential interference with or displacement of other sea users including fisheries, tourism and recreation.	- Compliance with Offshore Petroleum and Greenhouse Gas Storage (Resource Management and Administration) Regulations 2011: WOMP, which describes the well design and barriers to be used to prevent a loss of well control and to Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. - Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. - Maintain Well Safety Instrumented Systems to detect and act on events that have potential to cause a hydrocarbon event. - Reporting of unplanned releases.
Unplanned Hydrocarbon Release: Vessel Collision	Vessel collision involving a project vessel or third-party vessel, resulting in the release of marine diesel fuel if the collision has enough force to penetrate the vessel hull in the exact fuel location.	- In the highly unlikely event of a vessel collision it may cause a release of hydrocarbons, impacts to water quality and marine ecosystems could occur. - Marine diesel is a relatively volatile, nonpersistent hydrocarbon with up to approximately 40% evaporating within the first 24 hours for a surface spill. - Potential impacts to sensitive nearshore areas of offshore islands and coastal shorelines. - Potential disruption to marine fauna, including protected species. - Potential interference with or displacement of other sea users including fisheries, tourism and recreation.	- Compliance with regulatory requirements for safe vessel operations (i.e. Marine Orders 21, 27 and 30). - Maintain a permanent Petroleum Safety Zone around FPSO. - Management plans for simultaneous operations in place when working in vicinity of other Woodside operations / activities. - Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. - Reporting of unplanned releases.
Unplanned Hydrocarbon Release: Turret Operations	Release of hydrocarbons from turret operations, including spill from failure to connect / disconnect from turret, failure of mooring system, accidental leaks from storage and equipment, including ROVs.	Potential localised decline in water quality caused by accidental pollution/contamination.	- Implemented Turret Mooring System Connect and Disconnect Procedure. - Monitor the mooring system to identify potential issues with a mooring line. - Management of wells in accordance with Well Integrity Management System to prevent loss of well control and associated overpressure of turret equipment. - Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. - Reporting of unplanned releases.

Potential Impact/Risk	Description of Source of Potential Impact/Risk	Description of Potential Impacts/Risks	Proposed Mitigation and/or Management Measure
Unplanned Hydrocarbon Release: Offtake Operations	Release of hydrocarbons from FPSO offloading equipment to the marine environment and atmosphere during offloading / transferring operations.	- Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. - Disruption to marine fauna, including protected species. - Potential interference with or displacement of other sea users including fisheries and tourism and recreation	- Compliance to Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. - Implemented offloading procedures and all offtake tankers vetted to ensure they meet Woodside requirements. - Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. - Maintain a permanent Petroleum Safety Zone around FPSO. - Reporting of unplanned releases.
Unplanned Hydrocarbon Release: Loss of Containment of Crude Oil from FPSO	Release of hydrocarbons from FPSO to the marine environment due to loss of containment from bulk storage, topsides processing equipment, non-process topsides equipment or loss of structural integrity.	- Long-term impacts to sensitive nearshore areas of offshore islands and coastal shorelines. - Disruption to marine fauna, including protected species. - Potential interference with or displacement of other sea users including fisheries and tourism and recreation.	- Compliance to Offshore Petroleum and Greenhouse Gas Storage (Safety) Regulations 2009: Accepted Safety Case. - Maintain a permanent Petroleum Safety Zone around FPSO. - Maintenance of facility as per Performance Standard requirements. - Implemented Emergency Response and Spill Management Plans and maintained environmental response equipment. - Reporting of unplanned releases.

**These mitigation and management measures are subject to change through the consultation and subsequent assessment process and may not represent content in the publicly available EP or in the final plan once accepted.*

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

If you would like to comment on the proposed activities outlined in this information sheet, or would like additional information, please contact Woodside before **27 October 2023** via:

E: Feedback@woodside.com

Toll free: 1800 442 977

You can subscribe on our website to receive Consultation Information Sheets for proposed activities:

www.woodside.com/sustainability/consultation-activities.

Please note that stakeholder feedback will be communicated to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) as required under legislation. Woodside will communicate any material changes to the proposed activity to affected stakeholders as they arise.

Please note that your feedback and our response will be included in our Environment Plan for the proposed activity, which will be submitted to NOPSEMA for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) and support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the Environment Plan in order for this information to remain confidential to NOPSEMA.

1.2 Summary Consultation Sheet

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

CARNARVON BASIN, NORTH-WEST AUSTRALIA

When preparing an environment plan (EP), Woodside needs to notify relevant persons and obtain their input. This helps confirm current measures or identify additional measures, that may need to be taken to lessen or avoid potential adverse effects of the proposed activity on the environment. Woodside wants to give relevant persons whose functions, interests or activities may be affected by the proposed activity the opportunity to identify themselves and provide feedback on our proposed activity.

This summary information sheet provides a high-level overview of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees FPSO Operations environment plans. Further details, including an assessment of the potential impacts and risks to the environment, as well as mitigation and management measures, are available within the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plan Consultation Information Sheet (September 2023) which can be found at:

www.woodside.com/sustainability/consultation-activities

Overview

Woodside plans to submit a five-year revision of the Operations EPs for the Pyrenees and the Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The Pyrenees FPSO and associated production infrastructure is located in water depths ranging from -180 m to 215 m, in Commonwealth waters around 45 km north of Exmouth, Western Australia. Crude oil is produced on the Pyrenees FPSO from the Ravensworth, Crosby, Stickle, Tanglehead, Wild Bull and Moondyne reservoirs.

The Ngujima-Yin FPSO and associated production infrastructure is located in water depths ranging from -340 m to 850 m, in Commonwealth waters around 57 km north of Exmouth, Western Australia. Crude oil is produced on the Ngujima-Yin FPSO from the Vincent reservoir and the Greater Enfield development, which includes the Norton-over-Laverda, Laverda Canyon Reservoir and Cimatti fields.

Crude oil from both operations will be offloaded using Offtake Tankers. Other activities that will occur include surveys, inspection, maintenance, monitoring and repair activities, and other contingent activities.

Maps showing the location of the activities are provided below.

Figure 1. Pyrenees FPSO Location and Operational Area

Figure 2. Ngujima-Yin FPSO Location and Operational Area

Work Method

Key features of the Floating Production Storage and Offloading (FPSO) facilities include:

- Floating hull with integrated storage tanks.
- Connected to the seabed and subsea production system through turret mooring system which includes risers, umbilicals and chain mooring systems illustrated schematically in Figure 3 and 4.
- Above the water there will be supporting processing systems and equipment, flare systems, utilities, cranes, laydown and storage areas, utility buildings, living quarters and helideck.
- The FPSO provides oil processing to make the oil suitable for offloading to an Offtake Tanker.

Summary of key activities includes:

- Routine production operations involve the offloading of crude oil to Offtake Tankers.
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.
- Other activities include surveys, inspection, maintenance, monitoring, and repair (IMMR) activities on the FPSO and subsea infrastructure, and other contingent activities.

- For Ngujima-Yin, two potential future development activities may include production from an additional two wells via a subsea tieback to existing subsea infrastructure and the operation of a new fuel gas flowline. Drilling, construction and installation activities associated with the tieback and fuel gas project will be subject to separate future EPs.

During normal operations, vessels will typically be limited to supply/support vessels and Inspection, Monitoring, Maintenance and Repair (IMMR) vessels. Offtake tankers will be used for offloading operations in both fields. It is anticipated vessels will operate 24 hours per day for the duration of activities.

Figure 3. Overview of subsea infrastructure layout associated with the Pyrenees FPSO (not to scale)

Figure 4. Overview of the subsea infrastructure layout associated with the Ngujima-Yin FPSO (not to scale)

Environment That May Be Affected (EMBA)

The environment that may be affected (EMBA) is the largest spatial extent where the Pyrenees Floating Production, Storage and Offloading (FPSO) Operations and the Ngujima-Yin FPSO Operations' activities could potentially have an environmental consequence (direct or indirect). The broadest extent of the EMBA takes into consideration planned and unplanned activities, and for these EPs, is determined by modelling the highly unlikely event of a hydrocarbon release. The worst-case credible spill scenario for these EPs is a release from a loss of well control or a vessel collision with the FPSO with enough force to breach the hull, releasing crude to the environment.

The EMBA does not represent the extent of the predicted impact of the highly unlikely unplanned release of hydrocarbons. Rather, the EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release. This means in the highly unlikely event a hydrocarbon release does occur, the whole EMBA will not be affected - the specific and minimal part of the EMBA that is affected will only be known at the time of the release.

Figure 4. Ngujima-Yin FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

Figure 5. Pyrenees FPSO Operations Environment that May Be Affected (EMBA) by an unplanned hydrocarbon release from an accident/incident during the Petroleum Activities Program.

Feedback

Woodside consults relevant persons in the course of preparing Environment Plans to notify them of the activity and to obtain relevant feedback to inform its planning for proposed petroleum activities in the region.

1.3 Email sent to Australian Border Force (ABF), Department of Foreign Affairs and Trade (DFAT), Department of Transport (DoT), Ningaloo Coast World Heritage Advisory Committee (NCWHAC), Department of Biodiversity, Conservation and Attractions (DBCA), Department of Industry, Science and Resources (DISR), Department of Mines, Industry Regulation and Safety (DMIRS), Australian Energy Producers (AEP) (Formerly Australian Petroleum Production and Exploration Association), University of Western Australia (UWA), Western Australian Marine Science Institution (WAMSI), Australian Institute of Marine Science (AIMS), Commonwealth Scientific and Industrial Research Organisation (CSIRO) - 13 September 2023

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.4 Email sent to Shire of Carnarvon (13 September 2023)

Dear Shire of Carnarvon,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.5 Email sent to Western Gas, Exxon Mobil Australia Resources Company, Shell Australia, BP Developments Australia, PE Wheatstone, Kyushu Electric Wheatstone, Eni Australia, FINDER Energy, JadeStone, KUPPEC, Vermilion Oil & Gas, Santos NA Energy Holdings / Santos Ltd / Santos WA Northwest / Santos Offshore / Santos WA Southwest / Santos (BOL) / Santos WA PVG/ Santos Browse, Coastal Oil and Gas, Bounty Oil and Gas, OMV Australia / Sapura OMV Upstream, KATO Energy / KATO Corowa / KATO NWS / KATO Amulet, INPEX Alpha, JX Nippon O&G Exploration (Australia), 3D Oil Ltd, AGI Tubridgi P/L, Good Earth Energy Corporation, Pathfinder Energy P/L, Pilot Energy Ltd, Petro China International Investment, Triangle Energy, VRX Silica Ltd, Beach Energy, Origin Energy Browse, Strike Energy, Carnarvon Energy (14 September 2023)

Dear Titleholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 545 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline.

		The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing. Estimated End of Field Life: 2035.	Production Commenced: 2008. Routine Operations: Ongoing. Estimated End of Field Life: 2028.
Exclusionary/ Cautionary Zone	The location of the Pyrenees FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.	The location of the Ngujima-Yin FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.
Infrastructure	Key infrastructure includes, but is not limited to: • 1 FPSO • 1 Disconnectable Turret Mooring system, incorporating the risers • 11 flexible risers and 2 umbilical risers distributed across 4 Midwater Arches and 1 flexible riser with buoyancy modules • 27 Xmas trees/wells • 10 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs)	Key infrastructure includes, but is not limited to: • 1 FPSO • 1 Disconnectable Turret Mooring system, incorporating the risers • 6 flexible risers with buoyancy modules • 28 Xmas trees/wells • 4 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible and Rigid Flowlines and Jumpers • Multi-Phase Pumps

	- Flexible Flowlines and Jumpers - Subsea support structures.	- Subsea pig launch and receiver facility - Subsea support structures. Potential new infrastructure that could be installed in the next five years: - Two new wells - One new flowline supplying fuel gas from either Pyrenees or Macedon.
Vessels	Key vessels include, but are not limited to: - Supply and support vessels - Offtake tankers - IMMR support vessels including multi-purpose support vessels.	Key vessels include, but are not limited to: - Supply and support vessels - Offtake tankers - IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.6 Email sent to Exmouth Recreational Marine Users, Karratha Recreational Marine Users, Christmas Island Recreational Marine Users, Recfishwest, Marine Tourism Association, WA Game Fishing Association – 14 September 2023

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 548 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

1.8 Defence zone map sent to Department of Defence

1.9 Email sent to Department of Climate Change, Energy, the Environment and Water (DCCEE) (15 September 2023)

Dear Department of Climate Change, Energy, the Environment and Water,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 556 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including:

the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.10 Email sent to Western Australian Museum (15 September 2023)

Dear Western Australian Museum,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). **Also attached is a list of shipwrecks in State waters within the EMBA.** You can also choose to receive updates on our consultation activities by subscribing [here](#).

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). **A shipping lane map is also attached. 		Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing. Estimated End of Field Life: 2035.	Production Commenced: 2008. Routine Operations: Ongoing. Estimated End of Field Life: 2028.
Exclusionary/ Cautionary Zone	The location of the Pyrenees FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.	The location of the Ngujima-Yin FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.
Infrastructure	Key infrastructure includes, but is not limited to: • 1 FPSO	Key infrastructure includes, but is not limited to: • 1 FPSO

	• 1 Disconnectable Turret Mooring system, incorporating the risers • 11 flexible risers and 2 umbilical risers distributed across 4 Midwater Arches and 1 flexible riser with buoyancy modules • 27 Xmas trees/wells • 10 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible Flowlines and Jumpers • Subsea support structures.	• 1 Disconnectable Turret Mooring system, incorporating the risers • 6 flexible risers with buoyancy modules • 28 Xmas trees/wells • 4 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible and Rigid Flowlines and Jumpers • Multi-Phase Pumps • Subsea pig launch and receiver facility • Subsea support structures. Potential new infrastructure that could be installed in the next five years: • Two new wells • One new flowline supplying fuel gas from either Pyrenees or Macedon.
Vessels	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

1.14 Shipping lane map sent to AHO and AMSA

1.15 Email sent to Australian Maritime Safety Authority (AMSA) – Marine Pollution (15 September 2023)

Dear [Individual 4]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 574 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

1.16 Email sent to Onslow Chamber of Commerce and Industry (15 September 2023)

Dear [Individual 5]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

1.18 Email sent to Shire of Exmouth (15 September 2023)

Dear [– Individual 6]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing. Estimated End of Field Life: 2035.	Production Commenced: 2008. Routine Operations: Ongoing. Estimated End of Field Life: 2028.

the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.22 Email sent to Broome Chamber of Commerce and Industry (18 September 2023)

Dear Broome Chamber of Commerce and Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing.	Production Commenced: 2008. Routine Operations: Ongoing.

the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.26 Email sent to Karratha Community Liaison Group (18 September 2023)

Dear Karratha Community Liaison Group,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.

		Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing. Estimated End of Field Life: 2035.	Production Commenced: 2008. Routine Operations: Ongoing. Estimated End of Field Life: 2028.
Exclusionary/ Cautionary Zone	The location of the Pyrenees FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.	The location of the Ngujima-Yin FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.
Infrastructure	Key infrastructure includes, but is not limited to: • 1 FPSO	Key infrastructure includes, but is not limited to: • 1 FPSO

	• 1 Disconnectable Turret Mooring system, incorporating the risers • 11 flexible risers and 2 umbilical risers distributed across 4 Midwater Arches and 1 flexible riser with buoyancy modules • 27 Xmas trees/wells • 10 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible Flowlines and Jumpers • Subsea support structures.	• 1 Disconnectable Turret Mooring system, incorporating the risers • 6 flexible risers with buoyancy modules • 28 Xmas trees/wells • 4 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible and Rigid Flowlines and Jumpers • Multi-Phase Pumps • Subsea pig launch and receiver facility • Subsea support structures. Potential new infrastructure that could be installed in the next five years: • Two new wells • One new flowline supplying fuel gas from either Pyrenees or Macedon.
Vessels	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled Consultation on offshore petroleum environment plans – Information for the Community to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.30 Email sent to Director of National Parks (DNP) (19 September 2023)

Dear Director of National Parks

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Australian Marine Parks

We note Australian Government Guidance on consultation activities and confirm that:

- The proposed activities are outside the boundaries of any proclaimed Australian Marine Parks (AMPs).
 - The Pyrenees FPSO Petroleum Activity Area is located approximately 14 km from the northern boundary of the Commonwealth Ningaloo Marine Park, approximately 138 km south-west of the Barrow Island Marine Park and approximately 179 km south-west of the Montebello Island Marine Park.
 - The Ngujima-Yin FPSO Petroleum Activity Area is located approximately 26 km from the northern boundary of the Commonwealth Ningaloo Marine Park, approximately 140 km south-west of the Barrow Island Marine Park and approximately 180 km south-west of the Montebello Island Marine Park.
- We have assessed potential impacts to AMPs in the development of the proposed EP revisions and believe that planned activities have no potential to impact the values of the Marine Parks.
- For these EPs, the worst-case credible spill scenario is a hydrocarbon release from a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull, releasing crude oil to the environment. Through review of hydrocarbon spill modelling, and with consideration of a 50 ppb dissolved and 100 ppb entrained hydrocarbon threshold, the following AMPs may be contacted in the event of a spill:
 - Ningaloo Marine Park

- Gascoyne Marine Park
- Montebello Marine Park
- Dampier Marine Park
- Shark Bay Marine Park
- Carnarvon Canyon Marine Park
- Argo-Rowley Terrace
- Abrolhos
- Eighty Mile Beach Marine Park
- Mermaid Reef Marine Park
- Kimberley Marine Park
- Roebuck Marine Park
- Jurien Marine Park
- Two Rocks Marine Park
- Perth Canyon Marine Park
- Geographe Marine Park
- South-west Corner Marine Park
- Ashmore Reef Marine Park
- A Commonwealth Government-approved oil spill response plan will be in place for the duration of the activities, which will include notification to relevant agencies and organisations as to the nature and scale of the event, as soon as practicable following an occurrence. The Director of National Parks will be advised if an environmental incident occurs that may impact on the values of any Marine Park.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.31 Email sent to WAFIC (20 September 2023)

Hi [Individual 11],

Please see below for consultation information regarding the Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans. The consultation period is due to close on 27 October 2023.

I've also attached the consultation information sheet.

Could WAFIC please provide the consultation information to:

- Mackerel Managed Fishery (Schedule 2- Area 2) – Both activities
- Marine Aquarium Fish Managed Fishery – Both activities
- Pilbara Line Fishery (Condition) – Both activities
- West Coast Deep Sea Crustacean Managed Fishery – Both activities
- Specimen Shell Managed Fishery – Pyrenees
- Pilbara Trap Managed Fishery – Pyrenees

If this could go out today or tomorrow it would be much appreciated – this was the one from last Friday however it wasn't finalised at that time.

Kind regards,
Woodside Feedback

Dear Commercial Licence Holders

WAFIC is contacting you regarding activities Woodside is proposing in Commonwealth waters across the North West Shelf of WA. WAFIC is now working with Woodside to strategically streamline consultation with the commercial fishing industry.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 5

Page 631 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia.

Overview of Activities:

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

The table below provides a summary of the proposed activities under this EP. The attached Information Sheet provides additional information including a map of impacted areas, summaries of potential impacts and risks relating to the proposed activities, and associated management measures. These are also available on Woodside's [website](#).

Activity: Pyrenees Facility Operations, and Ngujima-Yin Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations

Feedback

Please provide any feedback specific to the proposed activities to [Individual 11] at WAFIC [\[Individual 11\]@wafic.org.au](mailto:[Individual 11]@wafic.org.au) by **27 October 2023**.

Your feedback and Woodside's response will be included in the Environment Plan which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the proposed activities (which may or may not be confidential). Please advise if you would like any information to remain confidential and Woodside will make this known to NOPSEMA upon submission of the Environment Plan.

To receive updates on Woodside's consultation activities, please subscribe [here](#).

Best regards

1.33 Email sent to Department of Agriculture Fisheries and Forestry (DAFF) – Fisheries (20 September 2023)

Dear DAFF – Fisheries and Biosecurity,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 638 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Biosecurity

With respect to biosecurity matters, please note the following information below:

Environment description

The Pyrenees Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 180 to 215 m on the outer continental shelf of the North West Shelf Province, approximately 45 km north of Exmouth. The seabed is generally flat and featureless, with some minor depressions and comprises primarily of soft sediment, which is consistent with the wider North West Shelf Province.

The Ngujima-Yin Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 340 to 850 m on the outer continental shelf and continental slope of the North West Shelf Province, approximately 57km north of Exmouth. The seabed in the north-east half of the Operational Area is relatively flat and featureless and comprises primarily of soft sediment which is consistent with the wider North West Shelf Province. The seabed in the south-west of the Operational Area intersects the Canyons linking the Cuvier Abyssal Plain Key Ecological Feature. A survey was undertaken in 2015 of the Enfield Canyon observed that the canyon comprised flat unconsolidated sediments composed of sand- and mud-sized particles and that the canyon does not appear significantly different than the surrounding region, with seabed habitats and deep-water biota being typical and representative in the wider region.

As such, the sediment throughout the Ngujima-Yin Operational Area are broadly consistent with those in the North West Shelf Province, which are characterised by fine to medium sediment (silts and sands) with patches of coarser sediments (shells/gravels).

Potential IMS risk

IMS risk mitigation management

Accidental introduction and establishment of invasive marine species

All vessels are required to comply with *the Australian Biosecurity Act 2015*, specifically the Australian Ballast Water Management Requirements (as defined under the Act) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing Invasive Marine Species (IMS).

Vessels entering the Operation Areas for Pyrenees and Ngujima-Yin will have Woodside's IMS risk assessment process applied, including for immersible equipment entering the Operation Area. Based on the outcomes of each IMS risk assessment, management measures commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced.

Inspection of the FPSOs will be completed by a qualified IMS Inspector prior to return from international sail away.

Feedback

If you have feedback specific to the proposed activities described under the EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 **by 27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.34 Email sent to Australian Fisheries Management Authority (AFMA) (20 September 2023)

Dear AFMA,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

There are some questions and answers at the bottom of this email explaining why you have received this email.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

(EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Questions and Answers

Why have I received this email?

Your organisation has been identified by Woodside as potentially being relevant to consult with for Environment Plans relating to our operations of the Pyrenees Floating Production Storage and Offloading (FPSO) Facility and Ngujima-Yin FPSO Facility, located off Exmouth, WA.

Woodside consults relevant persons to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or

avoid potential effects of the operations on the environment. This is the intended outcome of consultation.

But I'm not located near Exmouth?

Late last year a Federal Court decision looked at the way the Australian offshore energy industry consults relevant persons. Upon the establishment of this new case law, Woodside now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

Woodside uses the environment that may be affected or 'EMBA' to help identify who may be a relevant person. This [brochure](#) from the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has more information regarding consultation on offshore petroleum environment plans.

What is an EMBA?

The environment that may be affected or EMBA is the largest area where unplanned events from the operations off Exmouth could have an environmental consequence (impact) based on modelling.

For the Pyrenees and Ngujima-Yin Facility Operations Environment Plans, the EMBA represents the merged area of many possible modelled paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of release. This is based on oil trajectory modelling.

What does oil trajectory modelling involve and why is the EMBA so big?

The process of identifying and mapping out an EMBA for each petroleum activity is primarily for assessment of potential impacts and oil spill response planning purposes. As the events that may lead to a spill are unknown, for planning purposes, the worst case credible spill scenario is identified. This looks at the worst case credible volume, location, timing etc, and modelling is undertaken to understand where the oil may go, if unmitigated (i.e. if no response strategies are applied).

To account for weather and ocean current variables, the spill scenario is modelled multiple times (typically 100 to 200 times) to see where the weather and ocean currents may take the oil.

All the modelled spill trajectories are then merged to create an EMBA. This means in the highly unlikely event a hydrocarbon release does occur, the entire EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

In order to be able to pre-prepare, response plans are built around the potential impacts resulting from a selection of the worst case modelling runs.

Where can I get more information?

For more information on consultation and oil spill modelling visit the [NOPSEMA website](#).

1.37 Email sent to Tuna Australia, Commonwealth Fisheries Association (CFA), North West Slope and Trawl Fishery, Western Deepwater Trawl Fishery, Western Tuna and Billfish Fishery, Northern Prawn Fishery, Christmas Island Line Fishery (22 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 5

Page 655 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.38 Email sent to Department of Primary Industries and Regional Development (DPIRD) (22 September 2023)

Dear [Individual 12] and [Individual 13]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 659 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.39 Email sent to NT Fisheries (22 September 2023)

Dear NT Fisheries,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 664 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each

		of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.

1.40 Email sent to Northern Territory Department of Industry, Tourism and Trade (DITT) – Mining and Energy; Northern Territory Department of Environment, Parks and Water Security (DEPWS); Northern Territory Environment Protection Authority (NTEPA) (22 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

22 September 2023

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 673 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website at woodside.com. You can also choose to receive updates on our consultation activities by subscribing on our website.

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline.

	• Umbilical Termination Assemblies (UTAs) • Flexible Flowlines and Jumpers • Subsea support structures.	• Flexible and Rigid Flowlines and Jumpers • Multi-Phase Pumps • Subsea pig launch and receiver facility • Subsea support structures. Potential new infrastructure that could be installed in the next five years: • Two new wells • One new flowline supplying fuel gas from either Pyrenees or Macedon.
Vessels	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA. The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Regards,
Woodside Feedback

22 September 2023

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill

Uncontrolled when printed. Refer to electronic version for most up to date information.

scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website at woodside.com. You can also choose to receive updates on our consultation activities by subscribing on our website.

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: - Routine oil production, crude oil offloading and associated activities; - Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and - Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. 22 September 2023

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website woodside.com. You can also subscribe to receive updates on our consultation activities by subscribing on our website.

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

1.44 Email sent to 350 Australia (350A), Greenpeace Australia Pacific (GAP), Australian Conservation Foundation (ACF), Australian Marine Conservation Society (AMCS), Conservation Council of Western Australia (CCWA), Sea Shepherd Australia (SSA) (26 September 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including:

		• A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.
Schedule	Production Commenced: 2010. Routine Operations: Ongoing. Estimated End of Field Life: 2035.	Production Commenced: 2008. Routine Operations: Ongoing. Estimated End of Field Life: 2028.
Exclusionary/ Cautionary Zone	The location of the Pyrenees FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.	The location of the Ngujima-Yin FPSO and associated subsea infrastructure is marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone). For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zone without permission from the FPSO. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around the FPSO.
Infrastructure	Key infrastructure includes, but is not limited to: • 1 FPSO • 1 Disconnectable Turret Mooring system, incorporating the risers • 11 flexible risers and 2 umbilical risers distributed across 4	Key infrastructure includes, but is not limited to: • 1 FPSO • 1 Disconnectable Turret Mooring system, incorporating the risers • 6 flexible risers with buoyancy modules

	Midwater Arches and 1 flexible riser with buoyancy modules • 27 Xmas trees/wells • 10 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible Flowlines and Jumpers • Subsea support structures.	• 28 Xmas trees/wells • 4 Manifolds • Power and Control umbilicals • Umbilical Termination Assemblies (UTAs) • Flexible and Rigid Flowlines and Jumpers • Multi-Phase Pumps • Subsea pig launch and receiver facility • Subsea support structures. Potential new infrastructure that could be installed in the next five years: • Two new wells • One new flowline supplying fuel gas from either Pyrenees or Macedon.
Vessels	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.	Key vessels include, but are not limited to: • Supply and support vessels • Offtake tankers • IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Dear Titleholder,

**NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS
AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our website woodside.com. You can also subscribe to receive updates on our consultation activities by subscribing on our website.

Key vessels include, but are not limited to: - Supply and support vessels - Offtake tankers - IMMR support vessels including multi-purpose support vessels.

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

1.49 Email sent to Karratha and Districts Chamber of Commerce and Industry (27 September 2023)

Dear Karratha and Districts Chamber of Commerce and Industry,

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 704 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Questions and Answers

Why have I received this email?

Your organisation has been identified by Woodside as potentially being relevant to consult with for Environment Plans relating to our operations of the Pyrenees Floating Production Storage and Offloading (FPSO) Facility and Ngujima-Yin FPSO Facility, located off Exmouth, WA.

Woodside consults relevant persons to notify them, obtain their input and to assist Woodside to confirm current measures or identify additional measures, if any, that could be taken to lessen or avoid potential effects of the operations on the environment. This is the intended outcome of consultation.

But I'm not located near Exmouth?

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 715 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Late last year a Federal Court decision looked at the way the Australian offshore energy industry consults relevant persons. Upon the establishment of this new case law, Woodside now consults much more broadly and consults with persons based on potential impacts from an unplanned event rather than planned impacts of a proposed offshore activity.

Woodside uses the environment that may be affected or 'EMBA' to help identify who may be a relevant person. This [brochure](#) from the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has more information regarding consultation on offshore petroleum environment plans.

What is an EMBA?

The environment that may be affected or EMBA is the largest area where unplanned events from the operations off Exmouth could have an environmental consequence (impact) based on modelling.

For the Pyrenees and Ngujima-Yin Facility Operations Environment Plans, the EMBA represents the merged area of many possible modelled paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of release. This is based on oil trajectory modelling.

What does oil trajectory modelling involve and why is the EMBA so big?

The process of identifying and mapping out an EMBA for each petroleum activity is primarily for assessment of potential impacts and oil spill response planning purposes. As the events that may lead to a spill are unknown, for planning purposes, the worst case credible spill scenario is identified. This looks at the worst case credible volume, location, timing etc, and modelling is undertaken to understand where the oil may go, if unmitigated (i.e. if no response strategies are applied).

To account for weather and ocean current variables, the spill scenario is modelled multiple times (typically 100 to 200 times) to see where the weather and ocean currents may take the oil.

All the modelled spill trajectories are then merged to create an EMBA. This means in the highly unlikely event a hydrocarbon release does occur, the entire EMBA will not be affected. The specific and minimal part of the EMBA that is affected will only be known at the time of the release.

In order to be able to pre-prepare, response plans are built around the potential impacts resulting from a selection of the worst case modelling runs.

Where can I get more information?

For more information on consultation and oil spill modelling visit the [NOPSEMA website](#).

1.52 Email sent to Shire of East Pilbara (2 October 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 716 of 1047

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **27 October 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

03 October 2023

Dear Stakeholder,

**NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS
AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS**

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Dear Stakeholder,

NGUJIMA-YIN FLOATING PRODUCTION STORAGE AND OFFLOADING FACILITY OPERATIONS AND PYRENEES FACILITY OPERATIONS ENVIRONMENT PLANS

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account

1.55 Email sent to National Energy Resources Australia (NERA) (5 October 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Ngujima-Yin and Pyrenees facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities described under the proposed EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **06 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,
Woodside Feedback

1.56 Email sent to Australian Southern Blue Tuna Industry Association (ASBTIA) (12 October 2023)

Dear Stakeholder,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and

- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

1.57 Email sent to Department of Agriculture, Fisheries and Forestry (DAFF) – Biosecurity (16 October 2023)

Dear DAFF – Biosecurity,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Biosecurity

With respect to biosecurity matters, please note the following information below:

Environment description

The Pyrenees Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 180 to 215 m on the outer continental shelf of the North West Shelf Province, approximately 45 km north of Exmouth. The seabed is generally flat and featureless, with some minor depressions and comprises primarily of soft sediment, which is consistent with the wider North West Shelf Province.

The Ngujima-Yin Operational Area (which includes the FPSO and subsea infrastructure) is located in water depths of approximately 340 to 850 m on the outer continental shelf and continental slope of the North West Shelf Province, approximately 57km north of Exmouth. The seabed in the north-east half of the Operational Area is relatively flat and featureless and comprises primarily of soft sediment which is consistent with the wider North West Shelf Province. The seabed in the south-west of the Operational Area intersects the Canyons linking the Cuvier Abyssal Plain Key Ecological Feature. A survey was undertaken in 2015 of the Enfield Canyon observed that the canyon comprised flat unconsolidated sediments composed of sand- and mud-sized particles and that the canyon does not appear significantly different than the surrounding region, with seabed habitats and deep-water biota being typical and representative in the wider region.

As such, the sediment throughout the Ngujima-Yin Operational Area are broadly consistent with those in the North West Shelf Province, which are characterised by fine to medium sediment (silts and sands) with patches of coarser sediments (shells/gravels).

Potential IMS risk	IMS risk mitigation management
Accidental introduction and establishment of invasive marine species	All vessels are required to comply with <i>the Australian Biosecurity Act 2015</i>, specifically the Australian Ballast Water Management Requirements (as defined under the Act) (aligned with the International Convention for the Control and Management of Ships' Ballast Water and Sediments) to prevent introducing Invasive Marine Species (IMS). Vessels entering the Operation Areas for Pyrenees and Ngujima-Yin will have Woodside's IMS risk assessment process applied, including for immersible equipment entering the Operation Area. Based on the outcomes of each IMS risk assessment, management measures

Uncontrolled when printed. Refer to electronic version for most up to date information.

commensurate with the risk (such as the treatment of internal systems, IMS inspections or cleaning) will be implemented to minimise the likelihood of IMS being introduced.

Inspection of the FPSOs will be completed by a qualified IMS Inspector prior to return from international sail away.

Feedback

If you have feedback specific to the proposed activities described under the EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 **by 15 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,
Woodside Feedback

1.58 Email sent to Northern Prawn Fishery Industry Pty Ltd (18 October 2023)

Dear Northern Prawn Fishery Industry,

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

We are consulting you on the recommendation of AFMA. We are also consulting individual licence holders in the Northern Prawn Fishery.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 742 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **17 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,
Woodside Feedback

1.59 Email sent to Western Rock Lobster Council (30 October 2023)

Dear [Individual 14],

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 746 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities;
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Exclusionary / Cautionary Zones

The locations of the Pyrenees FPSO, Ngujima-Yin FPSO and associated subsea infrastructure, are marked on nautical charts. Nautical charts also include a 500 m radius petroleum safety zone (exclusion zone) around the FPSOs.

For the Pyrenees FPSO, this is measured in addition to the FPSO length (260 m), resulting in a 760 m exclusion zone. For the Ngujima-Yin FPSO this radius is measured from the riser turret mooring at the bow of the vessel. Vessels may not enter the exclusion zones without permission from the FPSOs. In addition, a 2.5 nm (4.6 km) radius Cautionary Zone is also marked on nautical charts around both FPSOs.

Environment that May Be Affected (EMBA)

Following recent changes to Commonwealth EP consultation requirements, Woodside is now consulting persons or organisations who are located within the environment that may be affected (EMBA) by a proposed petroleum activity. The EMBA is the largest spatial extent where unplanned events could potentially have an environmental consequence.

For these EPs, broadest extent of the EMBA has been determined by modelling the highly unlikely event of a hydrocarbon release from activities within the scope the EP 100-200 times (to account for the variation in environmental conditions throughout the year). The worst-case credible hydrocarbon spill scenario for these EPs is a release of crude oil to the environment either as a result of a loss of well control, or a vessel collision with the FPSO with enough force to breach the hull.

The EMBA represents the merged area of many possible paths a highly unlikely hydrocarbon release could travel depending on the weather and ocean conditions at the time of the release and is created by overlaying the hundreds of individual computer simulated hypothetical spills.

A **Consultation Information Sheet** is attached, which provides additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also subscribe to receive updates on our consultation activities by subscribing [here](#).

We have identified potential impacts to active commercial fishers and the environment, which are summarised below. We have endeavoured to reduce these risks to an as low as reasonably practicable level.

Fisheries have been identified as being relevant based on fishing licence overlap, assessment of government fishing effort data (including Fishcube and AFMA) from recent years, fishing methods and water depth.

Activity: Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations Environment Plans

Environment Plan	Pyrenees Facility Operations	Ngujima-Yin Facility Operations
Summary	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place.	Continuation of activities: • Routine oil production, crude oil offloading and associated activities; • Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and • Disconnection and sail-away of the FPSOs with the turret mooring and subsea infrastructure remaining in place. Future development activities are being considered for the Ngujima-Yin FPSO including: • A subsea tie back of two new wells to existing subsea infrastructure; and • A new flowline to provide fuel gas from a neighboring field to the facility. The revised Operations EP will account for production from the additional two proposed wells via a subsea tieback and the operation of a new fuel gas flowline. The drilling, installation and commissioning associated with each of the proposed activities will be subject to a future separate EP.
Permit Area	Activities will occur within Production Licenses WA-42-L and WA-43-L.	Activities will occur within Production Licenses WA-28-L and WA-59-L and Pipeline License WA-28-PL.
Location	~ 45 km north of Exmouth.	~ 57 km north of Exmouth.
Approx. Water Depth (m)	~ 180 to 215 m.	~ 340 to 850 m.

Feedback

If you have feedback specific to the proposed activities described under the operational EPs, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **20 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for*

Woodside Feedback

1.60 Email sent to Shire of Shark Bay (31 October 2023)

Dear [Individual 15], [– Individual 16] and [Individual 17],

Following Woodside's recent visit, please find an overview of proposed Woodside activities you may be interested in providing feedback on.

Also below is the previous email we sent to admin@sharkbay.wa.gov.au on 16 October regarding the Ngujima-Yin FPSO Facility Operations and Pyrenees Facility Operations Environment Plans.

Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

Woodside is planning to submit five-year revisions of the Ngujima-Yin FPSO Facility Operations and Pyrenees Facility Operations EPs:

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Scarborough Offshore Facility and Trunkline Operations EP:

Woodside is planning to submit the Scarborough Offshore Facility and Trunkline Operations Environment Plan which involves the installation of a Floating Production Unit (FPU) and complete subsequent hook-up and commissioning activities, prior to start-up and operations within Production Licences WA-61-L and WA-62-L. Gas from the FPU will be transferred through the gas export trunkline (the Trunkline - Pipeline Licence WA-32-PL) to the Pluto LNG Plant for further processing.

The FPU will be installed and connected to a pre-installed 20-point suction-piled mooring system and the riser pull-in(s) carried out. Hook-up and connection to subsea infrastructure will also occur, prior to commissioning.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 752 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

The commissioning activity involves:

- Dewatering and commissioning of the subsea production system, comprising wellheads, manifolds, flowlines, umbilicals, and communication lines.
- Activities to confirm the integrity of the entire interconnected facility, so it is ready for start-up (RFSU) with the introduction of reservoir hydrocarbons.

The FPU start-up consists of initiating the subsea production system and FPU to allow reservoir gas and processing equipment to reach operational pressures and temperatures, as well as obtaining sufficient and stable equipment inlet flow to enable the equipment to perform to design criteria. Well clean-up and commissioning will also be carried out and gas export trunkline pressurisation and nitrogen (N₂) removal.

Routine production operations involve transfer of reservoir fluids, including gas and produced water from the reservoir, along with Mono Ethylene Glycol (MEG) injection at the wells, through the subsea infrastructure to the FPU; and gas export via the Trunkline.

Other activities include gravimetry surveys for the purposes of reservoir monitoring, as well as IMMR activities on the FPU, subsea infrastructure (excluding well intervention or well workover activities) and gas export trunkline, and other contingent activities.

Consultation Information Sheets

Consultation Information Sheets are attached, which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

Woodside recently met with the Shire of Shark Bay who advised you may be interested in and have feedback on the following proposed Woodside activities. We have also consulted the central DBCA agency which has provided feedback regarding the establishment of baseline survey data for nearby areas of ecological importance, light pollution guidelines, and the 'Incidents and Emergency Response' process.

Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees Facility Operations Environment Plans (EPs):

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

Woodside is planning to submit five-year revisions of the Ngujima-Yin FPSO Facility Operations and Pyrenees Facility Operations EPs:

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Scarborough Offshore Facility and Trunkline Operations EP:

Woodside is planning to submit the Scarborough Offshore Facility and Trunkline Operations Environment Plan which involves the installation of a Floating Production Unit (FPU) and complete subsequent hook-up and commissioning activities, prior to start-up and operations within Production Licences WA-61-L and WA-62-L. Gas from the FPU will be transferred through the gas export trunkline (the Trunkline - Pipeline Licence WA-32-PL) to the Pluto LNG Plant for further processing.

The FPU will be installed and connected to a pre-installed 20-point suction-piled mooring system and the riser pull-in(s) carried out. Hook-up and connection to subsea infrastructure will also occur, prior to commissioning.

The commissioning activity involves:

- Dewatering and commissioning of the subsea production system, comprising wellheads, manifolds, flowlines, umbilicals, and communication lines.
- Activities to confirm the integrity of the entire interconnected facility, so it is ready for start-up (RFSU) with the introduction of reservoir hydrocarbons.

The FPU start-up consists of initiating the subsea production system and FPU to allow reservoir gas and processing equipment to reach operational pressures and temperatures, as well as obtaining

sufficient and stable equipment inlet flow to enable the equipment to perform to design criteria. Well clean-up and commissioning will also be carried out and gas export trunkline pressurisation and nitrogen (N₂) removal.

Routine production operations involve transfer of reservoir fluids, including gas and produced water from the reservoir, along with Mono Ethylene Glycol (MEG) injection at the wells, through the subsea infrastructure to the FPU; and gas export via the Trunkline.

Other activities include gravimetry surveys for the purposes of reservoir monitoring, as well as IMMR activities on the FPU, subsea infrastructure (excluding well intervention or well workover activities) and gas export trunkline, and other contingent activities.

- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

Scarborough Offshore Facility and Trunkline Operations EP:

Woodside is planning to submit the Scarborough Offshore Facility and Trunkline Operations Environment Plan which involves the installation of a Floating Production Unit (FPU) and complete subsequent hook-up and commissioning activities, prior to start-up and operations within Production Licences WA-61-L and WA-62-L. Gas from the FPU will be transferred through the gas export trunkline (the Trunkline - Pipeline Licence WA-32-PL) to the Pluto LNG Plant for further processing.

The FPU will be installed and connected to a pre-installed 20-point suction-piled mooring system and the riser pull-in(s) carried out. Hook-up and connection to subsea infrastructure will also occur, prior to commissioning.

The commissioning activity involves:

- Dewatering and commissioning of the subsea production system, comprising wellheads, manifolds, flowlines, umbilicals, and communication lines.
- Activities to confirm the integrity of the entire interconnected facility, so it is ready for start-up (RFSU) with the introduction of reservoir hydrocarbons.

The FPU start-up consists of initiating the subsea production system and FPU to allow reservoir gas and processing equipment to reach operational pressures and temperatures, as well as obtaining sufficient and stable equipment inlet flow to enable the equipment to perform to design criteria. Well clean-up and commissioning will also be carried out and gas export trunkline pressurisation and nitrogen (N₂) removal.

Routine production operations involve transfer of reservoir fluids, including gas and produced water from the reservoir, along with Mono Ethylene Glycol (MEG) injection at the wells, through the subsea infrastructure to the FPU; and gas export via the Trunkline.

Other activities include gravimetry surveys for the purposes of reservoir monitoring, as well as IMMR activities on the FPU, subsea infrastructure (excluding well intervention or well workover activities) and gas export trunkline, and other contingent activities.

Consultation Information Sheets

Consultation Information Sheets are attached, which provide additional background on the proposed activities, including summaries of potential key impacts and risks, and associated management measures. These are also available on our [website](#). You can also choose to receive updates on our consultation activities by subscribing [here](#).

Feedback

If you have feedback specific to the proposed activities, we would welcome your feedback at Feedback@woodside.com.au or 1800 442 977 by **13 November 2023**.

Your feedback and our response will be included in our EPs, which will be submitted to the National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) for acceptance in accordance with the *Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009* (Cth). Your feedback may also be used to support other regulatory processes associated with the planned activities (which may or may not be confidential).

Please let us know if your feedback for this activity is sensitive and we will make this known to NOPSEMA upon submission of the EPs, in order for this information to remain confidential to NOPSEMA.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation.

Kind regards,

Woodside Feedback

1.63 Email sent to Murujuga Aboriginal Corporation (MAC) (17 November 2023)

Hi there [Individual 20]

I'm not sure if you have received this information already so my apologies if this is a double up.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Controlled Ref No: PYHSE-E-001

Revision: 5

Page 757 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

The summary information sheet explaining the activities we plan to undertake can be found [here](#), and detailed consultation information sheets can be found on the external Woodside website <https://www.woodside.com/sustainability/consultation-activities>

Woodside is seeking to understand the nature of the interests that MAC and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know as soon as possible. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled [Consultation on offshore petroleum environment plans – Information for the Community](#) to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to Feedback@woodside.com.au, by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to communications@nopsema.gov.au or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to MAC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with MAC members, the MAC Board, Elders and office holders and any other interested parties.

This document is protected by copyright. No part of this document may be reproduced, adapted, transmitted, or stored in any form by any process (electronic or otherwise) without the specific written consent of Woodside. All rights are reserved.

Revision: 5

Page 758 of 1047

Uncontrolled when printed. Refer to electronic version for most up to date information.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist MAC in any way to participate in these processes.

Kind regards

1.64 Email sent to Nganhurra Thanardi Garrbu Aboriginal Corporation (NTGAC) (23 October 2023)

Hi there [Individual 21] and [Individual 22]

I hope you are both well.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

The summary information sheet explaining the activities we plan to undertake can be found [here](#), and detailed consultation information sheets can be found on the external Woodside website <https://www.woodside.com/sustainability/consultation-activities>

Woodside is seeking to understand the nature of the interests that NTGAC and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by **20 November 2023** please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. 1.67 Email sent to Kariyarra Aboriginal Corporation (18 October 2023)

Hi [Individual 25]

I understand Woodside has not yet responded to your most recent email, however I feel it is important to send the most current environment plan information to Kariyarra Aboriginal Corporation for their awareness.

The attached Environment plan is for existing operating FPSO's and not a new project. Ngujima-Yin commenced operation in 2008 and Pyrenees 2010, however Woodside are required to submit 5 yearly revision plans.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's), we are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing crude oil at the Pyrenees and Ngujima-Yin FPSO facilities. **Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.**

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

https://www.woodside.com/docs/default-source/current-consultation-activities/pyrenees-and-ngujimaef4471d4-d7f8-45cd-ab3b-df83bf2fde53.pdf?sfvrsn=319bbb00_5

Woodside is seeking to understand the nature of the interests that Kariyarra Aboriginal Corporation and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental

impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by 17-November 2023 and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to Feedback@woodside.com.au, by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to communications@nopsema.gov.au or (08) 6188 8700. Please also feel free to forward this email and the attached documents to Kariyarra Aboriginal Corporation members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with Kariyarra Aboriginal Corporation members, the Kariyarra Aboriginal Corporation Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist Kariyarra Aboriginal Corporation in any way to participate in these processes.

1.68 Email sent to Wirrawandi Aboriginal Corporation (WAC) (3 October 2023)

Good morning, [Individual 26]

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of Exmouth, Western Australia, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of Exmouth, Western Australia, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Please also feel free to forward this email and the attached documents to WAC members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with WAC members, the WAC Board, elders and office holders and other interested parties.

We look forward to hearing from you.

As always, please be in contact if you require further information and if Woodside can assist WAC in any way to participate in these processes.

Regards,

1.69 Email sent to Robe River Kuruma Aboriginal Corporation (RRKAC) (3 October 2023)

Good morning [Individual 27],

My name is [Individual 28], and I will be acting as the contact person for RRAK and for the rest of the groups in the Pilbara. [Individual 29] will now be focused on supporting the Corporations in the Northern Territory, so if there is anything you need, please reach out.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.
- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

I have attached summary information sheets that explain the activities we plan to undertake, and detailed consultation information sheets can be found at the links below:

-  [Summary Information Sheet - Ngujima-Yin Floating Production Storage and Offloading Facility Operations and Pyrenees Facility Operations EPs.pdf](#)

Woodside is seeking to understand the nature of the interests that **RRKAC** and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached

Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know by **2nd November 2023** and please also advise of your preferred method of consultation. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. Please click on the italicised text above to access this document.

Please provide feedback directly to me on the details below, to Feedback@woodside.com.au, by calling 1800 442 977, or directly to the Australian Government's National Offshore Petroleum Safety and Environmental Management Authority to communications@nopsema.gov.au or (08) 6188 8700.

Please also feel free to forward this email and the attached documents to **RRAC** members and other people and organisations who you think may be interested as required. Woodside would be happy to speak with **RRAC** members, the **RRAC** Board, elders and office holders and other interested parties.

As always, please be in contact if you require further information and if Woodside can assist **RRAC** in any way to participate in these processes.

I really look forward to working with yourself and the RRAC community [Individual 27]. So, please contact me any time if you would like to discuss this or any other matter.

Regards,

1.70 Email sent to Ngarluma Aboriginal Corporation (NAC) (17 November 2023)

Hi there [Individual 30]

My name is [Individual 31]. It's great to virtually meet you. I understand NAC is under significant pressure at the moment and [Individual 32] has informed me that all EP related interactions will cease until after your AGM. I send this to you as information for your consideration and don't expect to hear back from you until the end of the month at the earliest. I have highlighted this EP as one to discuss and provided a link to the information sheet to [Individual 32] previously.

Woodside is planning to submit five-year revisions of the Ngujima-Yin Floating Production Storage and Offloading (FPSO) Facility Operations and Pyrenees environment plans (EP's). Both FPSO's, Ngujima-Yin and Pyrenees have been in operation since 2008 and 2010 respectively and the EPs being submitted are the industry required 5 year revisions.

We are writing to you to ask if you are aware of any people, who in accordance with Indigenous tradition, may have spiritual and cultural connections to the environment that may be affected by the activity that have not yet been afforded the opportunity to provide information that may inform the management of the activity.

- The Ngujima-Yin FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 57 km north of **Exmouth, Western Australia**, within Production Licences WA-28-L and WA-59-L, and pipeline licence WA-28-PL.

Uncontrolled when printed. Refer to electronic version for most up to date information.

- The Pyrenees FPSO and associated subsea infrastructure is located in Commonwealth waters approximately 45 km north of **Exmouth, Western Australia**, within Production Licences WA-42-L and WA-43-L.

Overview

Both EPs are being revised and resubmitted for the continued production of crude oil via existing subsea infrastructure to the FPSOs, in accordance with the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Cth) (Environment Regulations).

Woodside plans to continue producing from the Pyrenees and Ngujima-Yin FPSO facilities.

Operations began in 2008 for Ngujima-Yin and 2010 for Pyrenees.

The activities that will continue at both FPSOs are:

- Routine oil production, including crude oil offloading and associated activities,
- Routine inspection, monitoring, maintenance and repair (IMMR) of the FPSOs and associated subsea infrastructure; and
- Disconnection and sail-away of the FPSO with the turret mooring and subsea infrastructure remaining in place.

In preparation for this work, Woodside has undertaken an assessment to identify potential impacts and risks to the marine environment arising from both planned activities and unplanned events. Mitigation and management measures have been developed for each of the risks identified and will be outlined in the EP.

The summary information sheet explaining the activities we plan to undertake can be found [here](#), and detailed consultation information sheets can be found on the external Woodside website <https://www.woodside.com/sustainability/consultation-activities>

Woodside is seeking to understand the nature of the interests that NAC and its members may have in the 'environment that may be affected' (EMBA) by this activity. The EMBA is the total area over which unplanned events could have environmental impacts. The EMBA is set out in the attached Summary Information Sheets and consultation information sheets. In particular, we are interested in hearing:

- how the activity could impact your interests and activities and/or your cultural values
- your concerns about the proposed activity and what you think we should do about those concerns
- whether there are any other individuals, groups, or organisations you think we should talk to.

If you would like to speak with us, please let us know after your AGM has passed. If there is any support or specific information that you require as part of our engagement, please let me know as soon as possible.

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) has published a brochure entitled *Consultation on offshore petroleum environment plans – Information for the Community* to help community members understand consultation requirements for Commonwealth EPs and how to participate in consultation. We look forward to hearing from you and all the best for the AGM.

As always, please be in contact if you require further information and if Woodside can assist NAC in any way to participate in these processes.

Kind regards

1.71 Email sent to NYFL on behalf of both NYFL and Yindjibarndi Aboriginal Corporation (19 October 2023)

Good afternoon, [Individual 33],

It was great to see you [Individual 34] and [Individual 35] last week. As mentioned, we still need to continue to progress our Environmental Plans while the agreement modernisation project takes place. I have spoken with [Individual 29], and he mentioned that you had sent through a proposal on a new consultation framework. Are you available to meet in the next few weeks so we can sit with [Individual 29] and discuss?
