

Gorgon and Jansz-Io Drilling, Completions and Well Maintenance **Program**

This document provides notification of NOPSEMA's decision made under regulation 10 of the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations 2009 (Environment Regulations) to accept an environment plan.

Submission information

Titleholder¹: Chevron Australia Pty Ltd Environment plan: Gorgon and Jansz-lo Drilling, Completions and Well Maintenance Environment Plan, Revision 2.0, 13 July 2018 Petroleum title(s)/Application number(s): WA-36-L WA-37-L WA-39-L Date first submitted to NOPSEMA: Activities type(s)²: • Drilling, any other petroleum-related activity Chevron Australia Pty Ltd (CAPL), on behalf of the Gorgon Joint Venturers and Jansz- lo Joint Venturers, has developed the Gorgon Foundation Project (GFP), which comprises the Gorgon and Jansz-lo gas fields, offshore production wells, and Feed Gas pipeline infrastructure. The GFP included the construction of a Gas Treatment Plant (GTP) on Barrow Island, and a domestic gas plant. To maintain gas supply for the GTP, the Gorgon Stage 2 (GS2) Project will expand the subsea gathering network in the Gorgon and Jansz-lo gas fields. This Plan includes drilling (and well completions), well intervention, and plug and abandonment activities undertaken by CAPL with either a Mobile Offshore Drilling Unit (MODU) or vessel within the 500 m safety exclusion zone at well locations within the Gorgon and Jansz-lo gas fields under production licences WA-36-L, WA-37-L and WA-39-L. Decision: Accepted Decision made by: Representative of NOPSEMA: Environment Manager - Drilling & Developments

	Decision:	Accepted
Decision made by: Representative of NOPSEMA: Environment Manager - Drilling & Developments	Decision date:	19/12/2018
	Decision made by:	Representative of NOPSEMA: Environment Manager - Drilling & Developments

Basis of decision

NOPSEMA has assessed the environment plan in accordance with its assessment policies and procedures. Having regard to all information provided by, and referred to in the environment plan, NOPSEMA is reasonably satisfied that the environment plan meets the criteria set out in regulation 10A of the Environment Regulations.

Next steps for the petroleum activity

An environment plan summary must be provided to NOPSEMA within 10 days of this acceptance. regulation 11(4) requires that this document provide material from the accepted environment plan.

Once the summary document has been prepared to NOPSEMA satisfaction it will be published on NOPSEMA's website. NOPSEMA aims to have all environment plan summary documents published within 20 days of acceptance. This timeframe may vary should the document require amendment by the titleholder.

The titleholder is required to notify NOPSEMA 10 days prior to the commencement of the activity. This notification will be published on NOPSEMA's website.

Titleholder environmental performance requirements

A titleholder is required to undertake a petroleum activity in accordance with the accepted environment plan. It is an offence under the Environment Regulations to act in a manner contrary to the accepted environment plan. A titleholder must submit a revision to the environment plan in response to a new or increased environmental impact or risk, or a significant modification or stage of the activity not provided for in the accepted environment plan.

How to get further information

If you have any further questions regarding the activity it is suggested you contact the titleholder's nominated liaison person for the activity.

If you would like to access any further information regarding this decision, or would like to contact NOPSEMA please email environment@nopsema.gov.au.

ithority

¹ A titleholder includes an applicant for a petroleum access authority, petroleum special prospecting authority, pipeline licence, greenhouse gas search authority or greenhouse gas special authority under sub-regulation 9(2).

Activity type as listed in the Offshore Petroleum and Greenhouse Gas Storage (Regulatory Levies) Regulations 2004
